iii. Status of Congressionally Requested Studies, Reports, and Evaluation				
Department of Homeland Security Departmental Management and Operations				
Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2009	16-Aug-09	House Report 110-181	3rd Quarter Data Center Migration Report	Pending Clearance
2009	16-Nov-09	House Report 110-181	4th Quarter Data Center Migration Report	Pending Clearance
2010	28-Dec-09	P.L. 111-83 p. 3 Senate Rpt. 111-31 p. 20	OCIO Expenditure Plan Report	Pending Clearance
2010	6-Apr-10	House Rpt. 110-181 p. 28	CIO Led Information Technology Acquisitions	Pending Clearance
2009	15-Nov-08	Senate Rept. 110-396	CNE: Report no later than 45 days after the date of enactment, containing: (1) FY08 counternarcotics enforcement achievements, including: (a) an analysis of efforts to track and sever connections between illegal drug trafficking and terrorism, (b) an update on the National Southwest Border Counternarcotics Strategy implementation with an overview of objectives and recommendations that have not been implemented to date, (c) a strategy to counter increased usage of submersibles and low flying aircraft to smuggle illegal drugs; and (2) Office performance goals for FY09.	Pending Clearance
2010	15-Jan-10	Joint Exp. Statement p. 53 Senate Rpt. 111-31 p. 8	Office of Counternarcotics Enforcement Activities: Submit a report no later than 60 days after the date of enactment of this act to include: a detailed description of the Department's counternarcotics activities; whether those activities were sufficient to meet the Department's responsibility to stop the entry of illegal drugs into the United States; and recommended changes to those activities to improve the Department's counternarcotics performance.	Pending Clearance
2010	15-Jan-10	Joint Exp. Statement p. 53 House Rpt. 111-157 p. 15-16	Potentially Shifting Office of Counternarcotics Enforcement Functions to Office of Policy: Report by January 15, 2010, on whether it is appropriate to shift this office's functions into the Office of Policy or other Departmental office under this title.	Pending Clearance
2010	28-Dec-09	P.L. 111-83 p. 2 Joint Exp. Statement p. 53 Senate Rpt. 111-31 p. 9	FY10 Expenditure Plan - Office of Policy: \$15,000,000 shall not be available for obligation for the Office of Policy until the Secretary submits an expenditure plan for the Office of Policy for fiscal year 2010.  Provide an expenditure plan no later than 60 days after the date of enactment of this Act, as outlined in the Senate report. The conference report includes a statutory provision withholding \$15,000,000 until the expenditure plan is submitted. The conferees require a detailed explanation of how and for what purpose these funds are being allocated as part of the fiscal year 2010 expenditure plan. The plan shall provide a full explanation for each activity of this Office and accompanying costs.	Pending Clearance
2010	28-Dec-09	Joint Exp. Statement p. 54 House Rpt. 111-157 p. 17	Office of Intergovernmental Affairs, Organizational Plan: The conference agreement provides \$2,800,000 for the Office of Intergovernmental Affairs as proposed by the House instead of \$2,600,000 as proposed by the Senate. The name of this office has been modified as proposed by the Senate. This office has been moved from the Federal Emergency Management Agency as requested, and is assuming a new role. The Secretary is required to present a detailed organizational plan for the office as outlined in the House report.  Present a detailed organizational plan for this new office within 60 days of enactment of this bill. The plan should outline the cost savings and efficiencies this reorganization is expected to create.	Pending Clearance
2010	28-Dec-09	Joint Exp. Statement p. 54 Senate Rpt. 111-31 p. 10	FY10 Expenditure Plan - Office of Civil Rights and Civil Liberties: Submit an expenditure plan no later than 60 days after the date of enactment of this Act, as outlined in the Senate report.	Pending Clearance

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2010	contingent	Joint Exp. Statement pp. 126-127	<b>Principal Federal Official (PFO):</b> Sec. 522. Statutory language has been modified to allow the Secretary to waive the prohibition on the use of funds for a PFO or successor position under a Stafford Act declaration. After exercising this waiver, the Secretary must <b>report</b> to the Committees on Appropriations, as well as the House Transportation and Infrastructure Committee, and the Senate Homeland Security and Governmental Affairs Committee with the following information: (1) an explanation of the circumstances necessitating the waiver, including a discussion of how this action does not deviate from the role of the FEMA Administrator as the principal advisor on emergency management to the President, the Homeland Security Council, and the Secretary, as defined in P.L. 109-295 (6 U.S.C. 313); and (2) a discussion of the role in the field, or in headquarters, of staff deployed pursuant to the waiver, including measures taken to ensure compliance with subsection (c) of 6 U.S.C. 319.	TBD
2009	6/30/2009	Explanatory Statement	<b>May 09 - Monthly Report to the Committee - Office of the Chief Human Capital Officer:</b> The Office is directed to provide monthly reports to the Committees on Appropriations detailing; vacancies requested, by office, that have not been processed; vacancies announced, by office; and the amount of time after a vacancy has closed before a selection list is sent back to the requesting entity.	Pending Clearance

# BUDGET REQUEST AND SUPPORTING INFORMATION

## DEPARTMENTAL MANAGEMENT AND OPERATIONS OFFICE OF THE SECRETARY AND EXECUTIVE MANAGEMENT

### I. Appropriation Overview

#### **A. Mission Statement for Appropriation Name:**

The Department of Homeland Security (DHS) Office of the Secretary and Executive Management (OSEM) supports the Department and all of its components by providing leadership, direction, and management to the Department. OSEM establishes and implements policy and provides various support functions and oversight to all entities within the Department. The Department continues to work toward integration and consolidation of its resources and operations to create a seamless organization that shares services, information, and best practices across previously stove-piped organizations.

#### **B. Budget Activities:**

OSEM is a separate appropriation within Departmental Management and Operations that provides resources for thirteen separate Programs, Projects and Activities (PPA's) including: Immediate Office of the Secretary, Immediate Office of the Deputy Secretary, Chief of Staff, Executive Secretariat, Intergovernmental Affairs, Office of Policy, Office of Public Affairs, Office of Legislative Affairs, Office of the General Counsel, Office for Civil Rights and Civil Liberties, Office of the Citizenship and Immigration Ombudsman, Privacy Officer, and the Office of Counternarcotics Enforcement. Below are brief descriptive summaries of the thirteen PPA's.

*Immediate Office of the Secretary:* The Office of the Secretary's role is to provide executive leadership, management and direction, and oversight for the Department's 28 components. The Secretary represents the Department of Homeland Security to the President, to Congress, and to the general public.

*Immediate Office of the Deputy Secretary:* The Office of the Deputy Secretary supports the Secretary by providing leadership to the Department especially regarding internal management and direction.

*Chief of Staff:* The Chief of Staff is responsible for the coordination of policy initiatives and other actions of the Department Components directorates and offices.

*The Office of the Executive Secretary:* The Office of the Executive Secretary supports the Office of the Secretary and Office of the Deputy Secretary with management of their correspondence, decision documents, and other written communications, including briefing books. The Executive Secretariat is especially charged with ensuring that all materials presented to the Secretary and Deputy Secretary for signature has been thoroughly cleared with all relevant Components.

*Intergovernmental Affairs:* The Office of Intergovernmental Affairs (IGA) will communicate and coordinate all State, Local, Tribal, and territorial (SLTT) government activities throughout the Department. IGA also liaises with the SLTTs and the national associations that represent them to ensure there are open lines of communications with DHS and its stakeholders.

*Office of Policy:* The Office of Policy's responsibilities include the coordination of Department-wide policies, programs, and planning to ensure consistency and integration of missions throughout the Department. This office strengthens the Department's ability to maintain policy and operational readiness needed to protect the homeland by providing a centralized coordination point for developing and communicating policies across the multiple internal and external components of the Homeland Security network. In addition to DHS, the Office of Policy also interacts with other government entities, international counterparts, academics and private stakeholders.

*Office of Public Affairs:* The Office of Public Affairs is responsible for managing external and internal communications. The Office of Public Affairs responds to national media inquiries, maintains and updates the Department's website, writes speeches for principals, and coordinates speaking events for Department officials. The Office fosters strategic communication throughout the Department and with external stakeholders. It manages the Department's organizational identity program, which includes usage of the DHS seal and related guidelines. It also oversees the Department's employee communication activities, which include an all-employee newsletter, town hall meetings between management and employees, and an intranet site. Finally, its incident communications program guides overall federal incident communication activity and coordinates with state, local, and international partners to ensure accurate and timely information to the public during a crisis.

*Office of Legislative Affairs:* The Office of Legislative Affairs (OLA) serves as the Department of Homeland Security's primary liaison to Capitol Hill. They advocate the policy interest of the President of the United States and the Secretary of the Department of Homeland Security (DHS) and ensure that all components of DHS are actively engaged with Congress in their specific areas of responsibility. Similarly, OLA articulates the views of the Department including the components, on Congressional legislative initiatives. OLA responds for the Department to requests and inquiries from Congressional committees, individual congressional members and their staffs. OLA also participates in the Senate confirmation process for all Presidential Nominees to the Department.

*Office of the General Counsel:* The Office of the General Counsel comprises all lawyers within the Department of Homeland Security with dedicated attorneys operating at headquarters and component organizations. The General Counsel is the chief legal officer of the Department. In this role, they are ultimately responsible for all of the Department's legal determinations and for overseeing all of its attorneys. The General Counsel is also the Department's regulatory policy officer, managing the rulemaking program and ensuring that all Department of Homeland Security regulatory actions comply with relevant statutes and executive orders. Additionally, the General Counsel's central tasks include providing complete, accurate, and timely legal advice on possible courses of action for the Department; ensuring that Homeland Security policies are implemented lawfully, quickly, and efficiently; protecting the rights and liberties of any Americans who come into contact with the Department; facilitating quick responses to congressional requests for information; and representing the Department in venues across the country, including in the immigration courts of the United States.

*Office for Civil Rights and Civil Liberties:* The responsibility of the Office for Civil Rights and Civil Liberties is to protect the civil rights and civil liberties of our citizens, provide policy advice on civil rights and civil liberties issues, and to serve as an information and communication channel to the public on these issues. This office is tasked with reviewing and assessing information alleging abuses of civil rights, civil liberties, and racial and ethnic profiling by employees and by officials of the Department. The Office is responsible for overseeing the Departmental Equal Employment Opportunity programs.

*Citizenship and Immigration Services Ombudsman:* The statutory mission of the Citizenship and Immigration Services (CIS) Ombudsman is to assist individuals and employers in resolving problems with United States Citizenship and Immigration Services (USCIS), to identify individual and employee problem areas within USCIS and propose changes to mitigate identified problems.

*Privacy Office:* The DHS Privacy Office is the first statutorily mandated Privacy Office within the Federal government. The Privacy Office protects the collection, use, and disclosure of Personally Identifiable Information (PII) and departmental information. It ensures that appropriate access to information is consistent with the vision, strategic mission, and core values of the Department, and implements the policies of the Department to defend and protect individual rights, liberties, and information interests of our citizens. The Privacy Office has oversight of all privacy and disclosure policy matters, including compliance with the Privacy Act of 1974, the Freedom of Information Act, and the completion of privacy impact statements on all new programs and systems, as required by the E-Government Act of 2002 and Section 222 of the Homeland Security Act.

*Office of Counternarcotics Enforcement:* As the principal advisor to the Secretary on counterdrug matters, the Counternarcotics Enforcement Director reviews and evaluates the effectiveness of DHS counterdrug activities. The Office of Counternarcotics Enforcement coordinates Departmental policy and operations within the Department, other Federal departments and agencies and State and local agencies with respect to stopping the entry of illegal drugs into the United States. The Office ensures the adequacy of resources within the Department and recommends the appropriate financial and personnel resources necessary to help the Department fulfill its responsibilities to stop the entry of illegal drugs into the United States. The Office of Counternarcotics Enforcement also works closely with intelligence and law enforcement entities within DHS and across the federal government to assist in tracking and severing connections between drugs and terrorism (known as the DTX Project). DTX activities to track and sever the connections between drug trafficking and terrorism are conducted within the Joint Terrorism Task Force construct.

### **C. Budget Request Summary:**

The Office of the Secretary and Executive Management requests 647 positions, 645 FTE, and \$157,041,000 for the FY 2011 request. This represents an increase of 25 positions, 23 FTE, and \$9,223,000 over the FY 2010 Enacted Budget of 622 positions, 603 FTE, and \$147,818,000.

OSEM's adjustment to base includes an increase of 19 FTE, and a decrease of (\$2,184,000). The program change includes 25 positions, 23 FTE, and \$11,407,000.

Base adjustments include:

- Increase - Annualization of prior year funding (\$2,729,000; 19 FTE)
- Increase - FY 2011 pay raise and annualization of 2010 pay raise (\$1,297,000; 19 FTE); and
- Increase - GSA rent and payments to the Working Capital Fund (\$3,788,000).
- Decrease - Non-recurring of the Intermodal Security Coordination Office (\$10,000,000)

Requested program change increases in FY 2011 include:

- Intergovernmental Affairs (\$1,376,000; 10 positions; 10 FTE);
- Office for Civil Rights and Civil Liberties (\$1,206,000; 6 positions; 6 FTE);
- Office of Public Affairs (\$945,000);
- Office of Legislative Affairs (\$289,000);
- Executive Secretariat (\$538,000; 3 positions; 3 FTE);
- Privacy Office (\$993,000; 6 positions and 4 FTE); and
- Office of Policy (\$6,060,000).

<b>2011 Request</b>	<b>12</b>	<b>12</b>	<b>5,427</b>
Total Change 2010-2011	0	0	366

OSEM requests \$5.427 million for this activity. This is an adjustment to base increase of \$0.366 million over the FY 2010 enacted budget.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

**Immediate Office of the Secretary:** The Secretary is appointed by the President and confirmed by the Senate to lead the Department of Homeland Security (DHS) and act as the principal adviser to the President on homeland security matters. The Secretary ensures a coordinated national effort to prevent terrorist attacks in the United States, reduce vulnerability of the United States to terrorism, and minimize the damage, as well as recover from attacks that do occur. The Secretary is a member of the Homeland Security Council. The Secretary serves as the principal spokesperson for the Administration when testifying before the House Homeland Security Committee and the Senate Homeland Security and Government Affairs Committee.

**PPA: IMMEDIATE OFFICE OF THE DEPUTY SECRETARY**

<b>2011 Request</b>	<b>6</b>	<b>6</b>	<b>1,974</b>
Total Change 2010-2011	0	0	164

OSEM requests \$1.974 million for this activity. This is an increase of \$0.164 million over the FY 2010 enacted budget for adjustments to base.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

**Immediate Office of the Deputy Secretary:** The Immediate Office of the Deputy Secretary supports the Secretary by providing leadership to the Department. This office focuses on internal management and direction, which ensures efficient and effective operation of the Department. The Deputy Secretary’s role is to provide internal oversight to all Departmental operations, which allows the Secretary to focus on external matters concerning DHS.

**PPA: OFFICE OF THE CHIEF OF STAFF**

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>17</b>	<b>14</b>	<b>\$2,556</b>
<b>2010 Enacted</b>	<b>15</b>	<b>15</b>	<b>2,595</b>

<b>2011 Request</b>	<b>15</b>	<b>15</b>	<b>3,658</b>
Total Change 2010-2011	0	0	1,063

OSEM requests \$3.658 million for this activity. This is an increase of \$1.063 million over the FY 2010 enacted budget for adjustments to base. The adjustment to base will cover increased Working Capital Fund Rent charges and Information Technology support.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

**Office of the Chief of Staff:** The Chief of Staff oversees DHS activities, assists the Deputy in managing DHS operations, and supports the Secretary in achieving the Department’s missions. In FY 2009, the Office of the Chief of Staff was integral to assisting the Secretary in directing the Department’s resources toward accomplishing the Department’s mission.

**PPA: THE OFFICE OF THE EXECUTIVE SECRETARY**

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>46</b>	<b>43</b>	<b>\$7,163</b>
<b>2010 Enacted</b>	<b>55</b>	<b>55</b>	<b>7,800</b>

<b>2011 Current Services</b>	<b>55</b>	<b>55</b>	<b>8,429</b>
2011 Program Change	3	3	538
<b>2011 Request</b>	<b>58</b>	<b>58</b>	<b>8,967</b>
Total Change 2010-2011	3	3	1,167

OSEM requests \$8.967 million for this activity. This is an increase of 3 positions, 3 FTE, and \$1.167 million over the FY 2010 enacted budget. The adjustment to base increase of \$0.629 million covers pay inflation and Working Capital Fund adjustments. The additional 3 FTE and \$0.538 million in program changes provides additional support for the Secretary’s ongoing Efficiency Review.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

FY 2009 Accomplishments

- Assumed responsibility for the Secretary’s morning operations and intelligence brief;
- Continued to provide full service budget, administrative, and human capital support to the Office of the Secretary, Office of the Deputy Secretary and the Office of the Chief of Staff; and
- Provided significant cross-training of career staff in support of the transition of Administration in January 2009.

FY 2010 Planned Accomplishments

- Institutionalize policies and procedures established by the new Administration.
- Develop online training modules for Component Executive Secretariats to facilitate department-wide compliance with correspondence standards and foster a One DHS culture.
- Decrease prior year’s reliance on contractor support by 40%.
- Work with the Intelligence and Analysis Directorate and the Office of Operations Coordination to improve processes for delivering the Secretary’s daily classified brief.
- Work with the Management Directorate to improve the Department’s Management Directive development process.
- Serve as a pilot Component for evaluation of an electronic records management system.

## FY 2011 Planned Accomplishments

- Modify and streamline Executive Secretariat processes based on outcomes from the Secretary's Efficiency Review initiatives.
- Explore possible efficiencies in the preparation of the Secretary's classified and unclassified briefing materials.
- Decrease reliance on contractors another 40% based on FY 2010 levels.
- Develop and field on-site training/standardization teams to assist Component Executive Secretariat in maintaining Departmental standards.
- Explore staffing options for assuming responsibility for the Department's reports and testimony clearance.
- Ensure the Secretary's Efficiency Review personnel are fully staffed to support the Secretary's key Efficiency Initiatives that focus resources on the highest nation priorities, fiscal discipline, and ensure that taxpayer dollars are spent on programs that do not duplicate efforts and on programs that improve performance that promote greater accountability, transparency and customer satisfaction.

**PPA: OFFICE OF INTERGOVERNMENTAL AFFAIRS**

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>0</b>	<b>0</b>	<b>0</b>
<b>2010 Enacted</b>	<b>17</b>	<b>17</b>	<b>2,800</b>
2011 Adjustments-to-Base	0	0	31
<b>2011 Current Services</b>	<b>17</b>	<b>17</b>	<b>2,831</b>
2011 Program Change	10	10	1,376
<b>2011 Request</b>	<b>27</b>	<b>27</b>	<b>4,207</b>
Total Change 2010-2011	10	10	1,407

OSEM requests \$4.207 million for this activity. This is an increase of 10 positions, 10 FTE and \$1.407 million over the FY 2010 enacted budget. The \$1.407 million is comprised of an adjustment to base of \$0.031 for pay and non pay expense and program increase of \$1.376 million for outreach to state, local, tribal, and territorial officials.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

**Office of Intergovernmental Affairs (IGA):** The mission of IGA is to act both as an advocate for the State, local, tribal and territorial officials within the Department to operate as the primary liaison between those officials, the Secretary and senior DHS leadership.

The stakeholder community consists of over 500,000 non-Federal elected and appointed officials within the United States, including Governors, Homeland Security Advisors, Mayors, County Executives, State legislators, Leadership of the 564 Federally recognized Indian and Native Alaskan tribes, law enforcement officials, emergency managers, and the national associations that represent these officials.

IGA manages communications and coordinates activities across the spectrum of issues, initiatives, and programs confronting all agencies and components of the Department. No other DHS entity is charged with this Department-wide function. It also includes coordination with counterpart Intergovernmental Affairs Offices within other Executive Branch agencies and the White House Intergovernmental Affairs Office provide for coordinated interaction with non-federal government officials.

**FY 2009 Accomplishments**

- Created and coordinated a Department tribal policy and enhanced the role of tribal governments at DHS.
- Informed the State, local, tribal, and territorial officials (SLTT) on a regular basis of the Department’s progress and efforts on transition planning for the incoming Administration.
- Supported the Border Governor’s and other leadership of the Border States as well as tribal officials and communicated the requirements of Western Hemisphere Travel Initiative (WHTI) and continued discussions on Border protection issues.

- Communicated the Department guidance on priority efforts such as Real ID requirements and Fusion Centers to state, local, territorial, and tribal officials.
- Advocated for the policy positions taken by State, local, tribal, and territorial officials and the resources needed to carry out Departmental policy decisions.
- Coordinated timely, consistent and accurate Departmental guidance, information and policies to our State, local, tribal and territorial officials.
- Hosted the annual Governor's Homeland Security Advisor's Committee meeting and threat briefing.

#### FY 2010 Planned Accomplishments

- Communicate the new Administration's changes in intergovernmental affairs to the Department and the Administration's homeland security priorities to SLTT's and the national associations that represent them.
- Advise the Department on strategies, processes, procedures and other developments at the State, local, tribal and territorial levels. This includes preparation of a newly elected State and local officials on the roles and functions of the Department.
- Advocate for the policy positions taken by State, local, tribal, and territorial officials and the resources needed to carry out Departmental policy decisions. Ensure that SLTT's have a seat at the table and are active participants in policy development.
- Coordinate timely, consistent and accurate Departmental guidance, information and policies to our SLTT's.
- Host the 2<sup>nd</sup> Annual Homeland Security Terrorism Threat Conference for State Homeland Security Advisors and other key stakeholders.
- Assist two states with Gubernatorial Transitions, and take lessons learned from the two transitions and apply them to the upcoming FY 2011 Gubernatorial Transitions.
- Coordinate and consult with tribal nations on the President's Tribal Consultation Policy as well as increase awareness of tribal issues within the Department and formalize a tribal liaison program within the Department.

#### FY 2011 Planned Accomplishments

- Advise the Department on strategies, processes, procedures and other developments at the State, local, tribal, and territorial levels. This includes advising newly elected State and Local Officials on the roles and functions of the Department.
- Coordinate the Department's engagement during the extensive Gubernatorial Transitions taking place during FY2011 to ensure timely dissemination of information and to assist with related homeland security issues.
- Provide DHS 101 and threat briefs to any newly elected Governors and ensure a smooth transition at the State level with the Department since there will be 36 Gubernatorial races.

- Advocate for the policy positions taken by State, local, tribal, and territorial officials and the resources needed to carry out Departmental policy decisions. Ensure that SLTTs have a seat at the table and are active participants in policy development.
- Coordinate timely, consistent and accurate Departmental guidance, information and policies to our State, local, tribal, and territorial officials and the national associations that represent them.
- Finalize and maintain the Department's Tribal Resource Handbook, and continue to make improvements on tribal consultation pursuant to the President's memorandum on tribal consultation.
- Host an annual Governor's Homeland Security Advisor's Committee meeting and threat briefing, and host the 3<sup>rd</sup> Annual Homeland Security Terrorism Threat Conference.

**PPA: OFFICE OF POLICY**

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>208</b>	<b>189</b>	<b>\$47,711</b>
<b>2010 Enacted</b>	<b>187</b>	<b>182</b>	<b>51,564</b>
2011 Adjustments-to-Base	0	5	(7,817)
<b>2011 Current Services</b>	<b>187</b>	<b>187</b>	<b>43,747</b>
2011 Program Change	0	0	6,060
<b>2011 Request</b>	<b>187</b>	<b>187</b>	<b>49,807</b>
Total Change 2010-2011	0	5	(1,757)

OSEM requests \$49.807 million for this activity. This request is a decrease of \$1.757 million which is a net decrease of \$7.817 million due to the non-recurring of the Intermodal Security Coordination Office in FY 2011 and a program increase of \$6.060 million for additional program support.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Policy is comprised of nine program offices responsible for strengthening homeland security by developing and integrating Department-wide policies, planning, and programs to better coordinate the Department’s missions and goals. They are the Office of Strategic Planning, Policy Development, International Affairs, Screening Coordination, Homeland Security Advisory Council, Private Sector Office, State & Local Law Enforcement, Immigration Statistics, and Immigration and Border Policy.

The Office of Policy is central to achieving the goal of “One DHS” and a truly national homeland security enterprise. Policy provides a central office to develop and communicate policies across multiple components of the homeland security network and strengthens the Department’s ability to maintain policy and operational readiness needed to protect the homeland. It also provides the foundation and direction for Department-wide strategic planning and budget priorities.

The Office of Policy is also tasked with bridging multiple headquarters’ components and operating agencies to improve communication among DHS entities, eliminate duplication of effort, and translate policies into timely action. The Office of Policy creates a single point of contact for internal and external stakeholders that allow for streamlined policy management for the Department.

FY 2009 Accomplishments

- Led the effort to conduct the Quadrennial Homeland Security Review (QHSR), including managing the seven study groups, coordinating outreach to various stakeholders, and developing the online National Dialogue tool to encourage massive and diverse participation. The QHSR sets prioritized goals and objectives for homeland security for the next four years within the context of the Secretaries' priorities and themes, and set a course for maturing and unifying DHS and the entire national homeland security enterprise. The review continues to build the foundation for homeland security activities in order to enhance the security and resiliency of our

Nation. The report on the review will be delivered to Congress in second quarter 2010 after final coordination through the White House.

- Evaluated the Integrated Planning Guidance (IPG) for Fiscal Years (FY) 2011-15 against the decisions from the Program Review Board.
- Developed the IPG for FYs 2012-16 to provide 5-year programming and budgeting guidance to all DHS components and addressing critical capability gaps identified.
- Provided policy analysis, recommendations, and coordination in support of departmental international engagement goals and responsibilities.
- Provided leadership for the interagency implementation of the Western Hemisphere Travel Initiative (WHTI).
- Provided a reference guide targeted primarily to non-federal law enforcement partners, which provides information on current DHS initiatives, grants, training opportunities, and key points of contact for each. The resource was published on Homeland Security Information Network – Law Enforcement HSIN-LE for distribution to law enforcement partners.
- Established three new task forces under the Homeland Security Advisory Council (HSAC): Homeland Security Advisory System Task Force, Sustainability and Efficiency Task Force, and the Southwest Border Task Force.
- The Office of Immigration Statistics (OIS) Annual Flow Reports, Population Estimates, Fact Sheets, and the Yearbook of Immigration Statistics were downloaded from the DHS website an average of 13,000 times per week during FY 2009.

#### FY 2010 Planned Accomplishments

- Finalize and roll out the IPG for FY 2012-16 to provide 5-year programming and budgeting guidance to all DHS components and addressing critical capability gaps identified. Develop the IPG for FY 2013-17 to provide 5-year programming and budgeting guidance to all DHS components and addressing critical capability gaps identified.
- Develop and finalize findings and recommendations to the HSAC and the Secretary at the November 2009 public HSAC meeting. HSAC entities reporting findings and recommendations will be the Quadrennial Review Advisory Committee, Sustainability and Efficiency Task Force, and the Southwest Border Task Force.
- Expand the estimation of the characteristics of the unauthorized alien population in the United States to support possible immigration reform.
- Conduct an econometric study on border security effectiveness designed to evaluate the degree to which border enforcement activities deter unauthorized immigration at the southwestern border.

#### FY 2011 Planned Accomplishments

- Finalize and roll out the IPG for FY 2013-17 to provide 5-year programming and budgeting guidance to all DHS components and addressing critical capability gaps identified.

- Develop the IPG for FY 2014-18 to provide 5-year programming and budgeting guidance to all DHS components and addressing critical capability gaps identified
- Create and lead additional HSAC task forces as assigned by the Secretary.
- Continue the development of the QHSR and implement the results of the FY10 Bottom Up Review.
- Ensure implementation and compliance to Comprehensive Immigration Reform from FY10.
- Continue to strengthen key partnership programs such as Visa Waiver Program and security screening activities.
- Continue to support immigration statistics studies and provide other relevant analysis to support the development of the department's policies.
- Ensure implementation of PASSID which is a critical piece of National Security legislation that will improve the Real ID Act of 2005.
- Ensure development of Air Exit policies.
- Continue to strengthen private sector and law enforcement engagement, the development and implementation of cargo screening policies.
- Representing the Department on the Committee on Foreign Investment in the United States (CFIUS),
- Implement global engagement initiatives at overseas attachés in Europe, Latin American and the Middle East to meet the President's and Secretary's goals.

## PPA: OFFICE OF PUBLIC AFFAIRS

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>31</b>	<b>31</b>	<b>\$6,084</b>
<b>2010 Enacted</b>	<b>38</b>	<b>38</b>	<b>5,991</b>
2011 Adjustments-to-Base	0	0	89
<b>2011 Current Services</b>	<b>38</b>	<b>38</b>	<b>6,080</b>
2011 Program Change	0	0	945
<b>2011 Request</b>	<b>38</b>	<b>38</b>	<b>7,025</b>
Total Change 2010-2011	0	0	1,034

OSEM requests \$7.025 million for this activity. The \$1.034 million increase is a net result of \$0.089 million ATB increase for pay inflation and \$0.945 million program increase for operational support for the OPA program and the lease of space, build-out and furniture for the National Joint Information Center.

### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The DHS Office of Public Affairs is comprised of nine major functional areas. They are media relations, incident communications, intelligence and operations communications, strategic communications, employee communications, planning and technical operations, web content and new media, and multimedia liaison.

#### **FY 2009 Accomplishments**

##### Incident Communications

- Coordinated aggressive communications strategy with federal partners and Border States during the escalation of violence in Mexico along the southwest Border.
- Participated in the coordination of the U.S. government's communications and public affairs response to the initial H1N1 pandemic influenza outbreak.
- Developed and hosted a Domestic Incident Communications Exercise at the National Joint Information Center with the White House and Assistant Secretary's across the federal government to define federal roles and responsibilities in response to terrorist attacks on the United States.
- Continued the successful News and Terrorism program adding the 16<sup>th</sup> and 17<sup>th</sup> cities. The two workshops were conducted in San Diego and Las Vegas uniting government, media and the medical/scientific communities on the complexities of communicating technical subject matter in the aftermath of a terrorist attack and enhancing the local media's capacity to convey that subject matter to the public.
- Successfully coordinated incident communications activities during the presidential inauguration and transition of government leadership.
- Coordinated federal incident communications during the National Level Exercise in July.

#### Web Communications and New Media

- Launched redesign and new architecture of DHS.gov to reflect Department responsibilities and priorities.
- Launched The Blog @ Homeland Security to show the Department's day-to-day work.
- Launched Department YouTube channel to increase outreach and awareness of Department's initiatives.
- Increased the use of video in internal and external Department communications.

#### Strategic Communications

- Successfully developed strategic communications planning and coordination for major DHS announcements and rollouts.
- Successfully coordinated with DHS offices and components to achieve common goals efficiently and continue 'One DHS' objectives.

#### Internal Communications

- Developed and populated a new intranet channel dedicated to the Secretary's Efficiency Review that provides links to the 30-, 60-, and 90-day Action Directives and guidance.

#### FY 2010 Planned Accomplishments

- Strengthen communication on steady-state DHS policies and announcements, and crucial incidents, with private sector, state/local/tribal/international government, think tank policy experts, and other essential third-party stakeholders.
- OPA in conjunction with the Office of the Chief Information Officer (CIO) will launch a new intranet in the first quarter of FY 2010 that will serve as the foundation for a DHS-wide intranet
- Continue day-to-day operations of press operations and response to national and local media inquiries, strategic communications, public outreach, writing speeches for department senior officials, internal communications, and internet and website operation.
- Continue and successfully implement Efficiency Review prescriptions and achieve ER goals.
- Conduct planning, preparation, and consistent coordination for all incident communications activities and Emergency Support Functions.

#### FY 2011 Planned Accomplishments

- Continue day-to-day operations of press operations and response to national and local media inquiries, strategic communications, public outreach, writing speeches for department senior officials, incident communications, internal communications, and internet and website operation
- Establish a fully operational National Joint Information Center (NJIC), which will support the Continuity of Operations Plan /Continuity of Government (COOP/COG) functions for the Public Affairs Office. The NJIC will serve as the coordination facility for the United States Government for public information and public messaging following a Presidential Continuity of Government (COG) or Continuity of Operations (COOP) decision.

**PPA: OFFICE OF LEGISLATIVE AFFAIRS**

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>32</b>	<b>31</b>	<b>\$5,379</b>
<b>2010 Enacted</b>	<b>31</b>	<b>31</b>	<b>6,797</b>
2011 Adjustments-to-Base	0	0	114
<b>2011 Current Services</b>	<b>31</b>	<b>31</b>	<b>6,911</b>
2011 Program Change	0	0	289
<b>2011 Request</b>	<b>31</b>	<b>31</b>	<b>7,200</b>
Total Change 2010 - 2011	0	0	403

OSEM requests \$7.200 million for this activity. This request is an increase of \$0.403 million over FY 2010 enacted. The \$0.114 million ATB increase is for pay inflation, and the program increase of \$0.289 million is for operational support.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Legislative Affairs (OLA) has seen a steady increase in workload over the past year, which has required the application of additional personnel, resources, and effort. Because of continued Congressional interest in and the complexity of DHS programs this trend will likely continue. Total effort of the office is measured by the number of hearings and briefings presented to the Congress in the course of a year.

FY 2009 Accomplishments

- OLA attended, successfully coordinated and developed material for 131 hearings; to include hearings where multiple DHS witnesses were present.
- OLA assisted in preparing 173 witnesses for oral testimony.
- OLA attended, coordinated and managed 1,864 legislative briefings.

FY 2010 Planned Accomplishments

- Develop and coordinate materials for the projected increase in the number of hearings DHS witnesses will attend.
- Increase the number of witnesses the OLA assists in preparation of oral testimony.
- Increase the total number of legislative briefings the OLA attends, coordinates, and manages in advance of a hearings.

FY 2011 Planned Accomplishments

- Increase the number of hearing and briefings presented to the Congress.
- Augment visibility with Capitol Hill, Appropriations Officials and staff to ensure that the Office of Legislative Affairs represents all programs at headquarters and components.

**PPA: OFFICE OF THE GENERAL COUNSEL**

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>105</b>	<b>97</b>	<b>\$17,854</b>
<b>2010 Enacted</b>	<b>86</b>	<b>86</b>	<b>24,028</b>
2011 Adjustments-to-Base	0	0	335
<b>2011 Current Services</b>	<b>86</b>	<b>86</b>	<b>24,363</b>
2011 Program Change	0	0	0
<b>2011 Request</b>	<b>86</b>	<b>86</b>	<b>24,363</b>
Total Change 2010-2011	0	0	335

OSEM requests \$24.636 million for this activity. This request is an increase of \$0.335 million over FY 2010 enacted budget. The \$0.335 million increase is the net result of \$0.335 million ATB increase for pay inflation.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of the General Counsel (OGC) is responsible for all legal activities within the Department. In providing legal services, OGC facilitates full execution of the actions necessary for the Department to accomplish its mission and meet its statutory responsibilities. OGC provides legal counsel for all DHS offices (except those specifically excluded by statute). OGC legal services involve (to name only a few of the many legal areas) the law of national security, immigration, transportation security, maritime security, cyber security, criminal and administrative law enforcement, appropriations, and the regulation of infrastructure security.

FY 2009 Accomplishments

In addition to providing legal services on a daily basis for operation of the Department, OGC made significant contributions to the Department in the following activities:

- Provided legal advice concerning myriad issues involved with the Department’s first-ever transition of Administrations. This included advising the departing and incoming Secretaries; the provision of ethics advice to the many individuals involved in the transition process; the provision of legal advice concerning succession orders within the Department; and advice on the use of appropriated funds.
- Provided legal advice and services for the Secretary, other Department officials, and interagency partners on issues relating to the H1N1 influenza pandemic.
- Provided advice and counsel on a number of major procurement projects, such as the Transformation and Systems Consolidation Procurement (sometimes referred to as TASC) and procurement related to the USCIS Transformation Program.
- Built enhanced legal capabilities in the area of operations law.

- Provided operations and enforcement law advice for steady-state, incident, and exercise operations, including various natural disasters, the Inauguration, the H1N1 pandemic event, and National Level Exercise 2009.
- Developed and advised on significant homeland security rulemaking and other regulatory actions, including rescission of the Immigration and Customs Enforcement No-Match rule; publication of the final rule implementing the secure identification provisions of the REAL ID Act; publication of the proposed Large Aircraft Security Program regulation; publication of the Secure Flight final regulation; and publication of the proposed Coast Guard regulation on Standards for Living Organisms in Ships Ballast Water Discharged in U.S. Waters.
- Provided legal review and advice on many international agreements involving, for example, preclearance mechanisms for transportation security purposes and cooperation regarding the development of anti-terrorism technologies.
- Provided legal advice and services on a number of complex immigration matters, including advice related to operation of the visa waiver program; advice concerning the operation of e-Verify activities; advice concerning immigration implications associated with Guantanamo Bay detainees; and advice regarding asylum and other protections for vulnerable individuals.
- Provided legal review and analysis on a number of significant legislative proposals affecting the Department.

#### FY 2010 Planned Accomplishments

In addition to the provision of legal services described above, OGC plans to pursue the following activities in FY 2010:

- Communicate a clear strategic vision for the DHS Legal department; promote integration of the Legal department into “one DHS” with a common set of core priorities and processes; and recruit, develop, and retain outstanding legal talent at all levels of the organization.
- Provide legal support to the Secretary and others as the Administration and Congress develop and consider immigration reform legislation.
- Continue to develop and improve relations with the GAO to address in a timely manner the oversight and other needs of the Congress.
- Implement the Secretary’s Efficiency Review goals through a number of working groups developed to increase efficiency and coordination within OGC. These working groups, which already have work underway, will focus on issues such as document management systems to manage legal projects, e-discovery capabilities and efficient coordination of training for attorneys.
- Provide aggressive legal support for cyber security operations and initiatives. This will include continuing to enhance legal staff capable of advising on complex cyber law matters.
- Develop agile structure for coordination of legal advice during the response to significant incidents implicating homeland security concerns.

- Provide legal advice relating to the Department's review of the use of contractors and the maintenance of a federal workforce to perform inherently governmental functions.
- Build management and support infrastructure for legal offices in order to enhance efficiency and coordination.

#### FY 2011 Planned Accomplishments

In addition to the provision of legal services described above, OGC plans to pursue the following activities in FY 2011:

- Implement any appropriate upgrades to a system for managing e-discovery.
- Provide enhanced legal support to the Privacy Office and DHS in complying with the President's FOIA directive and in appropriate handling of FOIA requests. Help implement recommendations set forth in the GAO report to reduce the backlog of FOIA responses.
- Develop an integrated professional responsibility program for review of allegations concerning attorney conduct.

**PPA: OFFICE FOR CIVIL RIGHTS AND CIVIL LIBERTIES**

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>79</b>	<b>66</b>	<b>\$19,224</b>
<b>2010 Enacted</b>	<b>94</b>	<b>80</b>	<b>21,104</b>
2011 Adjustments-to-Base	0	14	2,249
<b>2011 Current Services</b>	<b>94</b>	<b>94</b>	<b>23,353</b>
2011 Program Change	6	6	1,206
<b>2011 Budget Request</b>	<b>100</b>	<b>100</b>	<b>24,559</b>
Total Change 2010-2011	6	20	3,455

OSEM requests \$24.559 million for this activity. This is an increase of \$3.455 million over FY 2010 Enacted. The \$2.249 million ATB increase is for pay, prior year part year funding of 14 FTE, and fully funding base FTE. The \$1.206 million program change includes a working capital fund rent increase of \$0.465 million and \$0.741 million and 6 FTE to hire six new management program analysts to support Intelligence and Analysis (I&A) product review and to provide civil rights and civil liberties training to DHS personnel.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office for Civil Rights and Civil Liberties (CRCL) provides DHS senior leadership with constructive advice spanning a wide range of issues confronting the Department. The Office accomplishes this by reviewing and assessing important programs and initiatives; engaging with ethnic and religious communities; advising emergency management officials on policies concerning people with disabilities and other special needs; improving immigration policy; developing and conducting training; and acting as the single contact officer for human and civil rights treaties. CRCL also performs a vital operational role through its Incident Community Coordination Teams.

CRCL makes available to the public information on the responsibilities and functions of and how to contact the Officer for Civil Rights and Civil Liberties, including how to file complaints. The Office also generates for Congress required reports regarding activities of the Office. CRCL investigates and resolves complaints from the public alleging violations of civil rights and civil liberties; racial, ethnic, or religious profiling; or administrative claims under Section 504 of the Rehabilitation Act.

CRCL leads the Department’s EEO and Diversity Programs and is responsible for Department-wide policies, training, and complaint adjudication processes to promote EEO and Diversity for all employees and applicants. The Office accomplishes this mission by aligning EEO and diversity objectives to the DHS Strategic Plan and the DHS Human Capital Strategic Plan. The EEO and Diversity Programs Division provides guidance to the Office of the Secretary and senior leaders on EEO and Diversity Management, and is responsible for coordinating cross-component EEO and Diversity Management functions, including diversity management initiatives and EEO complaint processing.

### FY 2009 Accomplishments

- Continued and increased Civil Liberties Impact Assessments (CLIA): In FY 2009, CRCL hired five full-time staff to conduct proactive CLIAs. CRCL matured the cooperative process used to conduct statutorily mandated CLIAs, and established relationships with DHS components to incorporate CLIAs into the regular development process of agency programs and initiatives.
- Expanded Engagement with Communities: In FY 2009, CRCL expanded ongoing engagement with ethnic and religious communities, adding new cities and regions to its roster of regular roundtable discussions with American Arab and Muslim community leaders currently held in Detroit, Los Angeles, Chicago, Houston, Washington DC, and Boston. CRCL also increased its dialogue with these communities by holding three youth roundtables.
- Developed and Implemented National Civil Liberties and Privacy Training Program for State, Local and Tribal Fusion Centers: In FY 2009, CRCL met its statutory training obligation through a partnership with the DHS Privacy Office and the Department of Justice's Bureau of Justice Assistance in which CRCL led the creation of a web portal and on-site training program.

### FY 2010 Planned Accomplishments

- Automation of Diversity Management Data and Reports: In FY 2010, CRCL will roll out a new database application providing the capability to mine, manipulate and report workforce demographic data relating to recruitment, development, advancement, and retention. This information technology solution will enable the Department to immediately access and analyze current workforce diversity information to ensure equal employment opportunity.
- Expansion of the Civil Liberties Institute (CLI): In FY 2010, CRCL will expand its efforts to provide high quality, Department-wide training on issues at the intersection of homeland security and civil rights and civil liberties. In addition to increasing its offerings of training produced by CRCL, the Office will improve the integration of civil rights and civil liberties issues into the standard training offered by other DHS components.
- Cross-Component Coordination and Efficiencies: In FY 2010, CRCL will establish and/or manage the Civil Rights, Civil Liberties and EEO Councils, responsible for providing cross-component planning, implementation, review, and evaluation of civil rights, civil liberties, EEO and diversity management functions.
- Office of Intelligence & Analysis (I&A) Product Review: CRCL and the Office of Privacy are now required through internal DHS Management Directives to review all I&A products.

### FY 2011 Planned Accomplishments

- CRCL's Civil Liberties Institute will meet the Office's statutory obligation through comprehensive civil liberties training and technical assistance to state, local and tribal fusion

centers via on-site sessions, webinars, training of local trainers and a web-based training resource center.

- Office of Intelligence & Analysis (I&A) Product Review: CRCL and the Office of Privacy are required through internal DHS Management Directives to review all I&A products. CRCL will dedicate new staff and conduct training for this effort.
- The Immigration Team will increase engagement with immigrant communities. This includes: roundtables focusing upon immigration initiatives and programs throughout the United States; strengthening the Incident Communications Network; strengthening the Immigrant Worker Roundtable, and educating communities affected by DHS programs, including 287(g), Secure Communities, E-Verify and SAVE about rights and CRCL's complaint processes.
- CRCL's Equal Employment Opportunity and Diversity Programs Division will continue to increase management and employee awareness of EEO and Diversity programs through development of standardized, Department-wide EEO and Diversity training. CRCL will also complete efforts to completely eliminate the Department's backlog of EEO complaints, which resulted from the inheritance of work from legacy agencies when DHS was first established.
- The Diversity Management Unit of EEO will continue implementation of the National Academic Internship Program (a subset of the National Security Internship Program). The goal of this program is to create a direct career path for the DHS with Native American students studying Homeland Security, Intelligence, and Area Studies. This program is an intensive full immersion summer program for qualified undergraduate and graduate candidates from throughout the U.S. that combines Homeland Security and Intelligence Seminars, and On-the-Job-Training internship at DHS.

**PPA: CITIZENSHIP AND IMMIGRATION SERVICES OMBUDSMAN**

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>23</b>	<b>24</b>	<b>\$4,966</b>
<b>2010 Enacted</b>	<b>36</b>	<b>36</b>	<b>6,685</b>
2011 Adjustments-to-Base	0	0	179
<b>2011 Current Services</b>	<b>36</b>	<b>36</b>	<b>6,864</b>
2011 Program Change	0	0	0
<b>2011 Request</b>	<b>36</b>	<b>36</b>	<b>6,864</b>
Total Change 2010-2011	0	0	179

OSEM requests \$6.864 million for this activity. This is an increase of \$0.179 million over FY 2010 enacted budget. The \$0.179 million ATB increase is for pay inflation adjustments.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The statutory mission of the Citizenship and Immigration Services Ombudsman (CISOMB) is to assist individuals and employers in resolving problems with United States Citizenship and Immigration Services (USCIS) identify areas in which individuals and employers have problems in dealing with USCIS, and propose changes to mitigate identified problems.

**FY 2009 Accomplishments**

- **Virtual Ombudsman:** The Ombudsman established a Pilot Program for the Virtual Ombudsman System (VOS) in FY 2009. The VOS supports the Ombudsman’s statutory mandate to assist individuals and employers who experience problems with USCIS and propose changes to mitigate such problems. The VOS will enable CISOMB to fulfill its statutory mandate by: (1) Streamlining and standardizing the process by which individuals and employers contact the Ombudsman by deploying an Internet-based portal that links directly to data fields that currently are captured in a workflow template managed by CISOMB staff; (2) Enabling individuals and employers to provide consent for information released through an electronic signature instead of an original ink signature that requires the submission and retention of paper correspondence; (3) Centralizing management of correspondence in all forms (paper, facsimile, email, etc.) in a single electronic management tool; (4) Providing functionality and control to CISOMB for data analysis as well as the creation and generation of various data reports requested by the Ombudsman to fulfill mission requirements; and, (5) Allowing for the collection and analysis of information obtained from meetings with stakeholders and USCIS.
- **Annual Report:** The Ombudsman submitted its 2009 Annual Report to the House and Senate Judiciary Committees on June 30, 2009, as required by statute. The Annual Report described recommendations issued to USCIS throughout the reporting year; pervasive and serious issues encountered by individuals and employers; an inventory of action and inaction taken by USCIS on CISOMB’s recommendations; work on case problems; and outreach initiatives.
- **Case Problems:** The Ombudsman continued to receive thousands of letters, emails, and telephone calls from individuals and employers regarding their problems with USCIS.

- Recommendations: In FY 2009, the Ombudsman made recommendations to USCIS to address systemic issues experienced by individuals and employers in their dealing with USCIS.
- Ombudsman Outreach: To better assist individuals and employers resolve problems with USCIS, CISOMB traveled to USCIS facilities nationwide, met with stakeholder organizations, held numerous in-person and telephonic meetings with interested parties, addressed thousands of e-mail inquiries, and held monthly public teleconferences.

#### FY 2010 Planned Accomplishments

- Virtual Ombudsman: Implementation of Phase 1 of the VOS should occur during FY 2010, to support the Ombudsman's statutory mandate, as described above.
- Ombudsman Outreach: The Ombudsman Outreach program, as described for FY 2009, will continue. It also will increase in scope as a result of the VOS deployment, as CISOMB will meet with increasing numbers of CBOs, NGOs, Federal agencies, and state and local governments to provide information and answer questions about the VOS. CISOMB also anticipates an increase in inquiries when individuals and employers begin using the VOS,
- Staffing: The Ombudsman will increase staff from 30 FTE to 36 FTE to address the expected workload increase generated by the deployment of the VOS and the possibility of the FY 2010 passage of comprehensive immigration reform.
- Case Problems: The Ombudsman plans to continue to receive thousands of letters, emails, and telephone calls from individuals and employers regarding their problems with USCIS.
- Recommendations: In FY 2010, the Ombudsman will continue to make recommendations to USCIS to address systemic issues experienced by individuals and employers in their dealing with USCIS.
- Annual Report: The Ombudsman plans to submit its 2010 Annual Report to the House and Senate Judiciary Committees on June 30, 2010, as required by statute. The Annual Report will describe: recommendations issued to USCIS throughout the reporting year; pervasive and serious issues encountered by individuals and employers; an inventory of action and inaction taken by USCIS on CISOMB's recommendations; work on case problems; and outreach initiatives.

#### FY 2011 Planned Accomplishments

- Virtual Ombudsman System: Implementation of Phase 2 of the VOS will support the Ombudsman's statutory mandate, as described above.
- Ombudsman Outreach: The Ombudsman Outreach program, as described for FY 2009, will continue in 2011. It also will increase in scope as a result of the VOS deployment, as CISOMB will meet with increasing numbers of CBOs, NGOs, Federal agencies, and state and local governments to provide information and answer questions about the VOS. CISOMB also anticipates an increase in inquiries when more individuals and employers use the VOS.

- **Staffing:** The Ombudsman will increase staff from 24 FTE to 36 FTE to address the expected workload increase generated by the deployment of the VOS and the possible passage of comprehensive immigration reform.
- **Case Problems:** The Ombudsman plans to continue to receive thousands of letters, emails, and telephone calls from individuals and employers regarding their problems with USCIS.
- **Recommendations:** In FY 2011, the Ombudsman will continue to make recommendations to USCIS to address systemic issues experienced by individuals and employers in their dealing with USCIS.
- **Annual Report:** The Ombudsman plans to submit its 2011 Annual Report to the House and Senate Judiciary Committees on June 30, 2011, as required by statute. The Annual Report will describe: (1) recommendations issued to USCIS throughout the reporting year; (2) pervasive and serious issues encountered by individuals and employers; (3) an inventory of action and inaction taken by USCIS on CISOMB's recommendations; (4) work on case problems; and (5) outreach initiatives.

## PPA: PRIVACY OFFICE

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>32</b>	<b>29</b>	<b>\$6,866</b>
<b>2010 Enacted</b>	<b>30</b>	<b>30</b>	<b>7,971</b>
2011 Adjustments to Base	0	0	154
<b>2011 Current Services</b>	<b>30</b>	<b>30</b>	<b>8,125</b>
2011 Program Change	6	4	993
<b>2011 Request</b>	<b>36</b>	<b>34</b>	<b>9,118</b>
Total Change 2010-2011	6	4	1,147

OSEM requests \$9.118 million for this activity. This is an increase of \$1.147 million over FY 2010 enacted budget. The increase includes a \$0.154 million ATB for pay adjustments and a program increase of 6 Positions, 4 FTE and \$0.993 million.

### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Privacy Office is responsible for protecting the Department's collection, use and disclosure of Personally Identifiable Information (PII). The Office manages departmental responsibilities related to the Freedom of Information (FOIA) and the Privacy Act. These responsibilities include coordinating and implementing policy development and compliance government-wide for the FOIA, and Department-wide for the Privacy Act. The Office decides all appeals from denials by any Department component of access to information under these two Acts. This Office demonstrates and encourages awareness of commitment to sound privacy policy and practice as currently accepted in the United States and internationally.

#### FY 2009 Accomplishments

- Conducted 413 Privacy Threshold Analysis (PTA), 58 Privacy Impact Assessments (PIA) and published 75 System of Record Notices (SORNs). This included the review and removal of 211 Legacy SORNs.
- Operationalized the *Privacy Office Handbook: Safeguarding Sensitive Personally Identifiable Information*, which applies to every DHS employee, contractor, detailee and consultant. The Office held quarterly PIA training for DHS personnel who were responsible for drafting privacy compliance documents and developed FOIA and Transparency Guidance to all components and directorates on proactive disclosure and departmental compliance with Subsection (a) (2) of the Freedom of Information Act, August 26, 2009.
- Held the *Privacy Compliance Fundamentals – PTA's, PIA's and SORNS*, June 10, 2009, at Washington, DC. As well as *Government 2.0: Privacy and Best Practices*, June 22-23, 2009, at Washington, DC.

- Instituted a cyber subcommittee of the DHS Data Privacy and Integrity Advisory Committee and coordinated with DHS Cyber Space & Communications (CS&C) to provide briefings of the Department's cyber security activities pursuant to the Comprehensive National Cyberspace Initiative. The Office lead DHS' participation in the White House's Information and Communications Infrastructure Sub-IPC for Civil Liberties and Privacy Rights.
- Created the *Privacy and Civil Liberties Policy Guidance Memorandum 2009-01* regarding information sharing, June 5, 2009, *Privacy Policy Guidance Memorandum 2008-02*, DHS policy regarding PIAs, December 30, 2008, the *Privacy Policy Guidance Memorandum 2008-01* and *The Fair Information Practice Principles: Framework for Privacy Policy at the Department of Homeland Security*, December 29, 2008.
- Supported negotiation of international information sharing agreements, including a political agreement on privacy and law enforcement principles with the European Union and conducted international privacy exchanges.
- Created the *Interim Report – European Union Approach to the Commercial Collection of Personal Data for Security Purposes*, January 16, 2009, *FY 2008 Freedom of Information Act Annual Report* – report to the Attorney General noting FOIA and disclosure activities at the Department, January 16, 2009, *Data Mining Letter Report*, December 2008, which was required under Section 804 of the 9/11 Commission Act, the *Federal Agency Data Mining Reporting Act of 2007* and Section 803 Reports – Section 803 of the 9/11 Commission Act requires the Privacy Office to submit quarterly reports on the activities of the Privacy Office and the Privacy Office Annual Report, September 2009.

#### FY 2010 Planned Accomplishments

In FY 2010, the Office will continue to carry out duties imposed by the Section 222 of the Homeland Security Act and Public Law 110-53. The Office expects to provide seven reports to Congress, pursuant to Section 222 of the Homeland Security Act.

In addition to the aforementioned reporting, the Privacy Office also plans to accomplish the following:

- Issue an updated Privacy Impact Assessment template (version 3).
- Issue Freedom of Information Act and Privacy Act regulations.
- Issue DHS Management Directive Principles for Implementing Privacy Protections in Research Projects.
- Report to Privacy Incidents summarizing privacy incident management at DHS in accordance with Office of Management and Budget and the DHS Privacy Incident Handling Guidance (PIHG).

- Publish Privacy Complaints Standard Operating Procedures (SOP) Guide.
- Issue new DHS PRIV Management Directive.
- Support negotiation of international information sharing agreements including a binding agreement on privacy and law enforcement principles with the European Union.
- Complete a second Privacy Impact Assessment of the DHS State, Local, and Regional Fusion Center Initiative, as required under Section 511 of the 9/11 Commission Act.
- Review draft state fusion center privacy policies to confirm they are at least as comprehensive as the Information Sharing Environment Guidelines.

#### FY 2011 Planned Accomplishments

- Provide training in support of Fusion Centers for Intelligence and Analysis employees and support the efforts of Fusion Centers to provide training to state and local employees.
- Execute privacy investigations, and provide additional support for the Information Sharing Environment.
- Provide high-level review of all Office of Intelligence and Analysis documents in accordance with the Secretary's instructions.
- Develop a privacy training module on safeguarding PII for use throughout the Department.
- Support negotiation of international information sharing agreements with international friends and allies including a binding agreement on privacy and law enforcement principles with the European Union.

Total Change 2010-2011	0	0	260

OSEM requests \$3.872 million for this activity. This request is an increase of \$0.260 million over FY 2010 enacted budget. The \$0.260 million ATB increase is for pay adjustments and increases for ongoing operational support.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Counternarcotics Enforcement (CNE) supports the Department and the national drug control program by coordinating policy and operations within DHS and between the Department and other Federal departments and agencies and between the Department and state and local agencies with respect to stopping the entry of illegal drugs into the United States. The Office ensures the adequacy of resources within the Department and recommends the appropriate financial and personnel resources necessary to help the Department better fulfill its responsibility to stop the entry of illegal drugs into the United States. CNE also works closely with intelligence and law enforcement entities within DHS and across the federal government to assist in tracking and severing connections between drugs and terrorism (known as the DTX Project). DTX activities to track and sever the connections between drug trafficking and terrorism are conducted within the Joint Terrorism Task Force (JTTF) construct.

FY 2009 Accomplishments

- 2009 National Southwest Border Counternarcotics Strategy: CNE co-chaired an interagency effort to update the *2007 National Southwest Border Counternarcotics Strategy*. This document identifies the major goals and objectives for closing gaps in U.S. and Mexico counternarcotics. CNE also served as the Co-Executive Agent for developing the Implementation Plan for the Strategy.
- Expand Drug-Terror Nexus Collection Networks: CNE promoted an exchange of drug-terror information between the law enforcement and intelligence communities, providing law enforcement agencies at all levels of government with actionable information needed to apprehend terrorists. CNE improved relationships with High Intensity Drug Trafficking Areas (HIDTAs), JTTF, Fusion Centers and state, local and tribal entities through regular meetings and correspondence with key personnel from these organizations.
- The Interdiction Committee (TIC): CNE continued to assist the TIC Chairman completing an interagency Western Hemisphere Transit Zone Performance Gap Analysis that developed

strategic objectives and recommended resource levels to meet national cocaine interdiction goals for FY 2010-2014.

- **DHS Statement of Intent:** CNE developed and submitted to the United States Interdiction Coordinator a formal document delineating the Department's intended baseline level of personnel and resources to be devoted to counterdrug operations in FY 2010. This document enables planners and commanders to estimate force levels that will be available for interdiction operations against drug smugglers in geographic regions including South America, Central America, the Gulf of Mexico, the Caribbean, and the Eastern Pacific.
- **Sustain DHS Counternarcotics Operations in the Eastern Pacific:** CNE collaborated with the Departments of State and Defense and DHS component organizations to minimize the disruption of the Department's counternarcotics aerial surveillance footprint following the closure of the Manta, Ecuador Forward Operating Location.
- **Methamphetamine and National Synthetic Drug Control Strategy:** CNE worked with USCG, CBP and ICE to identify opportunities for focusing the Department's interdiction, investigative, and law enforcement efforts on countering the flow of methamphetamine and its precursor chemicals into the United States.

#### FY 2010 Planned Accomplishments

- **Southwest Border Counternarcotics Strategy Oversight:** At the direction of the Director of the ONDCP, CNE will support the oversight of the Strategy by providing DHS input and coordination to the senior-level principal group charged with overseeing the implementation of the *2009 National Southwest Border Counternarcotics Strategy*.
- **DHS Counterdrug Doctrine:** CNE will work with DHS policy and operational components to develop and promulgate a Departmental statement of counterdrug doctrine by March 2010. This effort is intended to support the Secretary's goal of building "One DHS" and enhance the Department's ability to achieve its strategic goals and those presented in the National Drug Control Strategy.
- **Completion of a U.S.-Mexico Bi-National Criminal Proceeds Study:** The purpose of this study is to gain a better understanding of the movement of funds smuggled into and out of Mexico, including the identification of geographic locations in Mexico (cities) where these criminal proceeds are consolidated and laundered, and the process by which the funds enter into legitimate financial systems. The information garnered from this study, expected to be completed in April 2010, , expected to be completed by April 2010, will assist the United States Government and the Government of Mexico to dismantle and disrupt criminal organizations, particularly drug trafficking organizations that rely on illegal financial enterprises.
- **Track and Sever the Connections between Drug Trafficking and Terrorism:** CNE will work within DHS and with interagency law enforcement and intelligence partners to develop a framework to improve collaboration and knowledge sharing in order to enhance United States Government efforts to track and sever the connections between drug trafficking and terrorism.
- **Coordinate Budget, Policy and Operations among DHS Components:** CNE will ensure effective coordination of counternarcotics efforts among DHS components by using the DHS

Counternarcotics Coordinating Council (CCC) as a consultative forum through which the components can identify and address critical issues relevant to the achievement of our national drug control objectives. CNE hosted a meeting of the CCC in December 2009 and will host subsequent meetings in FY 2010 on a quarterly basis.

- DHS Statement of Intent: By August 2010, CNE will complete the DHS Statement of Intent, which will delineate the Department's intended baseline level of personnel and resources projected to be available to support counterdrug operations in FY 2011.

#### FY 2011 Planned Accomplishments

- Provide Executive Agent Oversight for Developing the *2011 National Southwest Border Counternarcotics Strategy*: At the direction of the Director of the ONDCP, CNE will co-lead the interagency's efforts to complete the statutorily-required biennial update to the *National Southwest Border Counternarcotics Strategy*.
- Expand Drug-Terror Nexus Connection Networks: Using the framework developed in 2010, CNE will work within DHS and with interagency law enforcement and intelligence partners to implement its proposal for improving collaboration and knowledge sharing in order to enhance United States Government efforts to track and sever the connections between illegal drug trafficking and terrorism.
- Implementation of Recommendations from U.S.-Mexico Bi-National Criminal Proceeds Study: CNE will coordinate, further develop, and mine the information gained from the U.S.-Mexico Bi-National Criminal Proceeds Study completed in 2010. CNE will work with ICE to support a First Quarter FY 2011 progress report on implementation.
- Timely Submission of Reports: CNE will complete and submit reports mandated by the OMB and Congress in a timely manner, ensuring that all reports are substantive and meet informational requirements.
- Coordinate Budget, Policy and Operations among DHS Components: CNE will continue to improve the coordination of counternarcotics efforts among DHS components. The Counternarcotics Coordinating Council will be used to identify and address areas where greater cooperation among DHS components can improve the Department's support to national drug control programs and objectives. By August 2011, CNE will complete the annual DHS Statement of Intent, which will delineate the Department's intended baseline level of personnel and resources needed to support counterdrug operations in FY 2012.

OSEM reimburses the Working Capital Fund (WCF), which is a fully reimbursable fund that finances a full range of administrative support services to DHS, for services provided. This centrally managed account provides department-wide functions such as finance, budget and accounting support, information technology, and personnel administration. Centralizing administrative support functions has enabled DHS to achieve economies of scale, reducing costs and increasing operational efficiencies, and has allowed DHS components to focus on and accomplish their goals. WCF allocates costs based on various algorithms, depending on the service provided. This request for additional funds is associated with operating costs in these WCF activities that are increasing more rapidly than the Cost of Living Adjustment (COLA). Request levels are based on estimates provided by the WCF, and determined by actual usage costs (including inflation). The \$3.678 million request reflects the estimated WCF costs (based on average WCF costs/FTE).

**IV. Program Justification of Changes**

**Department of Homeland Security  
 Departmental Management and Operations  
 Office of the Secretary and Executive Management  
 Justification of Program Changes  
 (Dollars in Thousands)**

**Program Increase 1:**                      Office of Intergovernmental Affairs

Program Increase:    Positions   10      FTE   10      Dollars 1.376M

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-				17	17	\$2,831
Program Increase							10	10	\$1,376
<b>Budget Request</b>				<b>17</b>	<b>17</b>	<b>\$2.800</b>	<b>27</b>	<b>27</b>	<b>\$4,207</b>

**Description of Item**

The Office of Intergovernmental Affairs program requests 27 FTE, 27 Positions and \$4.207 million for FY 2011. This request is \$1.407 million over the FY 2010 Enacted of 17 FTE and \$2.80 million. The total adjustment to base is \$0.031 million. The program increase includes 10 positions, 10 FTE, and \$1.376 million for additional program support.

**Justification**

The Office of Intergovernmental Affairs coordinates the Secretary's and other leadership officials' relationships with state, local, tribal and territorial governments and the interest groups which represent them. IGA's FY 2011 request consist of 10 FTE and \$1.376 million to meet mission requirements; support DHS and the Administrations priorities.

The requested FTEs is comprised of one Chief of Staff, one Executive Secretariat, one State Coordinator, two Local Affairs Coordinators, two Tribal Coordinators, one Public Engagement Assistant, and two Administrative Support personnel.

The additional FTEs will play a vital role in coordinating the following IGA responsibilities:

- Develop briefing material to update the Secretary on major issues and development;
- Prepare internal documents and coordinate efforts of intergovernmental outreach across the components and offices of DHS;

- Work to assist coordination and consultation with the 564 federally recognized tribes include Presidentially required consultation sessions;
- Complete outreach calls and stakeholder database maintenance tasks requiring individual outreach to specific states, localities, tribes and associations;
- Draft, edit, prepare and electronically an IGA newsletter for our stakeholders;
- Maintain and update information on the IGA and Tribal pages of the DHS website;
- Work with IGA staff to host and operate large conference calls with IGA's stakeholder community; and
- With the increase in additional IGA professional staff, additional administrative support is needed for travel assistance, human resource assistance and day-to-day office operations.

The additional personnel will strengthen IGA's ability to improve coordination and communication across IGA's stakeholder community. The stakeholder community consist of over 500,000 non-federal elected and appointed officials within the United States, including Governors, State Homeland Security Advisors (HSAs), Mayors, county officials, state legislators, leadership in the Indian tribes, emergency managers, first responders, and the national associations that represent these officials. A stronger, larger staff will enable IGA to greater fulfill its mission to promote an integrated national approach to homeland security by ensuring, coordinating, and advancing federal interaction with state, local, tribal, and territorial governments. As part of the Secretary's vision and a cross-cutting goal, IGA works to facilitate communication between the Department's expert resources and the expert resources of the nation's autonomous governments; acts as an advocate for State, local, Tribal, and territorial governments within the Department; and coordinates and maintains constant awareness of the various bilateral relationships.

IGA works directly with the Governors and their offices including their HSAs and policy staff, mayors, county officials, state legislators, tribal leaders, and their respective associations.

### **Impact on Performance**

The increase in funding will assist in revitalizing the working partnership with our state, local, tribal and territorial partners. Additional funding will improve coordination and communication across components and will help to avoid the stove-piping of information and duplication of requests that have often been cited by stakeholders as barriers to successful communication.

IV. Program Justification of Changes

**Department of Homeland Security  
 Departmental Management and Operations  
 Office of the Secretary and Executive Management  
 Justification of Program Changes  
 (Dollars in Thousands)**

**Program Increase 2:**                      CRCL Training and Services

Program Increase:      Positions   6      FTE   6      Dollars 1.206M

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							94	94	23,353
Program Increase							6	6	1,206
<b>Budget Request</b>	<b>85</b>	<b>60</b>	<b>18,596</b>	<b>94</b>	<b>80</b>	<b>21,104</b>	<b>100</b>	<b>100</b>	<b>24,559</b>

**Description of Item**

The Office for Civil Rights and Civil Liberties requests 100 FTE, 100 positions and \$24.559 million for FY 2011. This request is \$3.455 million over the FY 2010 enacted budget of 80 FTE. The total adjustment to base is 14 FTE and \$2.249 million. The program increase includes 6 positions, 6 FTE, and \$1.206 million for additional program support.

**Justification**

The Office for Civil Rights and Civil Liberties request of 6 positions, 6 FTE, and \$1.206 million will allow CRCL to provide the required full service level review of all intelligence products, offer various specialized training opportunities and support within DHS, and cover increases to CRCL Working Capital Fund Rent Charges.

CRCL requests 6 positions, 6 FTE and \$0.741 million to offer specialized training for the DHS Office of Intelligence and Analysis' (I&A) National Immigration Information Sharing Office, I&A's Basic and Mid-career Intelligence and Threat Analysis Courses, National Protection and Programs Directorate's (NPPD) US-CERT and the Cyber Initiative, the I&A supported National Suspicious Activity Reporting Initiative, the I&A supported Interagency Threat Assessment Coordination Group, the Federal law Enforcement Training Center Rural Policing Institute, Immigration and Customs Enforcement (ICE) Managers and Supervisors Course, ICE Factfinders, I&A intelligence analysts, the training of state and local law enforcement regarding immigration detainees and of local communities on rights and responsibilities when law enforcement agencies exercise authority to enforce immigration law, and a DHS-wide requirement to train all employees on their responsibilities under the Anti-Harassment Program.

For FY 2011, CRCL's rent charge under the Working Capital Fund (WCF) will increase by \$0.465 million as a result of CRCL's mission needs and increased staffing.

**Impact on Performance**

The funding request will ensure that CRCL continues its current level of services to DHS, provides for training in the specialized initiatives referenced above, and allows the Office to expand its review of intelligence products developed by the Office of Intelligence and Analysis.

IV. Program Justification of Changes

**Department of Homeland Security  
 Departmental Management and Operations  
 Office of the Secretary and Executive Management  
 Justification of Program Changes**  
 (Dollars in Thousands)

**Program Increase 3:**                      Office of Public Affairs

Program Increase:     Positions   0      FTE   0      Dollars \$0.945M

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							38	38	\$6,080
Program Increase							0	0	\$945
<b>Budget Request</b>	<b>43</b>	<b>31</b>	<b>6,248</b>	<b>38</b>	<b>38</b>	<b>5,991</b>	<b>38</b>	<b>38</b>	<b>7,025</b>

**Description of Item**

The Office of Public Affairs requests 38 positions, 38 FTE, and \$7.025 million for FY 2011. The request is an increase of \$1.034 million over the FY 2010 Enacted of 38 positions, 38 FTE, and \$5.991 million. The total adjustment to base is \$0.089 million. The program increase includes \$0.945 million for the National Joint Information Center (NJIC) and operational support

**Justification**

The Office of Public Affairs requests an increase of \$0.945 million in FY11. The request consists of \$0.386 million for the NJIC and \$0.559 million for operational support.

**National Joint Information Center** - The Office Public Affairs FY2011 requests a program increase of \$0.386 million to lease space for the National Joint Information Center (NJIC). Funding for the lease requirement will be a recurring cost each year. Currently, OPA does not have a dedicated facility to meet the Continuity of Operations Plan /Continuity of Government (COOP/COG) requirement. The NJIC supports the Secretary's HSPD-5 role to coordinate interagency communications during major incidents and inform the American people. In the event of an emergency or COOP/COG, OPA is mandated to establish an NJIC within 12 hours of notification, and coordinates the dissemination of public information and direction from National Continuity Programs.

The NJIC will provide an established dedicated facility in Winchester to support the Continuity of Operations Plan /Continuity of Government (COOP/COG) functions for the Public Affairs Office. The departments and agencies that will occupy the NJIC will be the Department of Defense, Department of

Justice, FBI, Department of Health and Human Services, OPM, Small Business Administration, DHS Office of Civil Rights and Civil Liberties, FEMA and others. In cases of emergency, the national media will be invited to establish communications within the NJIC where Senior US Government leaders will be located to provide continuous updates and access to the media.

With these funds OPA will be able to meet the directed COOP/COG requirement for an NJIC composed of: (1) Secretary press briefing room (2) Work area for DHS communication staff and (3) media working space.

OPA requests \$0.559 million in FY2011 to cover current staffing levels and services for the program and \$0.164 million which will cover FY2011 Working Capital Fund Rent increases.

**Impact on Performance**

The increase in OPA's budget is required to support the National Joint Information Center (NJIC). The additional resources will provide support to OPA in meeting the Continuity of Operations Plan/Continuity of Government (COOP/COG) requirement. The Federal Government needs a pre-configured NJIC ready to coordinate interagency communications, support the Secretary and execute White House directed activities in the event of a national COOP/COG situation.

IV. Program Justification of Changes

**Department of Homeland Security  
 Departmental Management and Operations  
 Office of the Secretary and Executive Management  
 Justification of Program Changes**  
 (Dollars in Thousands)

**Program Increase 4:**                      Office of Legislative Affairs Operations

Program Increase:     Positions   0      FTE   0      Dollars \$0.289M

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							31	31	6911

<b>Budget Request</b>	<b>31</b>	<b>31</b>	<b>5,301</b>	<b>31</b>	<b>31</b>	<b>6,797</b>	<b>31</b>	<b>31</b>	<b>7,200</b>

**Description of Item**

The Office of Legislative Affairs requests 31 positions, 31 FTE, and \$7.200 million for FY 2011. The request is an increase of \$0.403 million over the FY 2010 enacted budget of 31 positions, 31 FTE, and \$6.797 million. The total adjustment to base is \$0.114 million for pay inflation. The program increase includes \$0.289 million for operational support.

**Justification**

The Office of Legislative Affairs requests a program increase of \$0.289 million for operational support. The request will cover daily operations for the office, which include but are not limited to the information technology support, training and travel requirements that are necessary support OLA's primary functions as the Departments liaison the Hill.

**Impact on Performance**

In order for OLA to remain actively engaged with Congress and advocate the policy interest of the President and the Secretary of the Department of Homeland Security we request the additional funding to provide increased communications and interactions between DHS and Congress. This funding request will also enable the OLA to support congressional member and staff delegations to DHS facilities and other highly visible initiatives to familiarize them with DHS efforts to protect the nation.

IV. Program Justification of Changes

**Department of Homeland Security  
 Departmental Management and Operations  
 Office of the Secretary and Executive Management  
 Justification of Program Changes**  
 (Dollars in Thousands)

**Program Increase 5:**                      Office of the Executive Secretary

Program Increase:    Positions   3      FTE   2.5      Dollars \$0.538M

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							55	55	\$8,429
Program Increase							3	3	\$538
<b>Budget Request</b>	<b>46</b>	<b>42</b>	<b>7,164</b>	<b>55</b>	<b>55</b>	<b>7,800</b>	<b>58</b>	<b>58</b>	<b>\$8,967</b>

\*FTE include 2 GS-15s for the full year and 1 GS-9 lapsed at 50% (2.5 FTE rounded up to 3)

**Description of Item**

The Office of the Executive Secretary requests 58 positions, 58 FTE, and \$8.967 million for FY 2011. This request is an increase of 3 positions, 2.5 FTE, and \$1.167 million over the FY 2010 Enacted of 55 positions, 55 FTE, and \$7.800 million. The total adjustment to base is \$0.629 million. The program increase includes 3 positions, 3 FTE, and \$0.538 million for additional personnel.

**Justification**

In FY11, The Office of the Executive Secretary requests 3 positions, 3 FTE and \$0.538 million to fund the Department of Homeland Security's mission critical efficiency review efforts that have been initiated by Secretary Napolitano. The mission critical FTE's consist of two (2) GS-15's and one (1) GS-9 to ensure that the Office of the Executive Secretary is fully staffed to manage and lead the Secretary's department-wide key efficiency initiatives.

The Secretary's efficiency review personnel, previously funded by detail, have been permanently assigned to the Office of the Executive Secretary. Their ongoing work is imperative to the creation of the one-DHS culture which focuses resources on the highest national priorities, fiscal discipline, and programs that improve performance which promote greater accountability, transparency and customer satisfaction ensuring taxpayer dollars are not spent on duplicate efforts.

### **Impact on Performance**

The Secretary launched the Efficiency Review Initiative on March 27, 2009. Since that time, DHS Efficiency Review has implemented 20 separate efficiency initiatives Department-wide. Twice per year, in April and October, the Efficiency Review Steering Committee, composed of the Department's Component Heads, consider employee- and Component-submitted proposals for new efficiency initiatives. In 2010, initiatives selected for implementation will be promulgated Department-wide through Secretarial Action Directives in January, June, and December. Efficiency initiatives already in the implementation phase have reduced costs, streamlined processes, eliminated duplication, and improved customer service in several areas, such as printing management, travel, non-government facility rental, enterprise software licensing, and cross-component training. Near-term future initiatives will consider the areas of paperless earnings and leave statements, electronic billing, security/suitability within the on-boarding process, information sharing environment, and collaborative communication technologies. The requested funding is essential for the ongoing coordination of the efficiency review initiatives as the Department continues to evolve and grow.

IV. Program Justification of Changes

**Department of Homeland Security  
Departmental Management and Operations  
Office of the Secretary and Executive Management  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 6:**                      Privacy Office

Program Increase:    Positions   6      FTE   4      Dollars \$0.993M

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							30	30	\$8,125
Program Increase							6	4	993
<b>Total Request</b>	<b>36</b>	<b>23</b>	<b>\$6,275</b>	<b>30</b>	<b>30</b>	<b>\$7,971</b>	<b>36</b>	<b>34</b>	<b>\$9,118</b>

**Description of Item**

The Office of Privacy requests 36 positions, 34 FTE, and \$9.118 million for FY 2011. This request is an increase of 6 positions, 4 FTE and \$1.147 million over the FY 2010 Enacted budget of 30 positions, 30 FTE and \$7.971 million. The total adjustment to base is \$0.154 million. The program increase includes 6 positions, 4 FTE and \$0.993 million for additional personnel.

**Justification**

Additional training responsibilities were placed on the Privacy Office by Section 802 of 9/11 Recommendations Act which requires “Any employee of the Office of Inspector General (OIG) who audits or investigates any [privacy] matter referred [to the OIG by the Chief Privacy Officer] shall be required to receive adequate training on privacy laws, rules, and regulations, to be provided by an entity approved by the Inspector General in consultation with” the DHS Chief Privacy Officer.

The \$0.993 million and 4 FTE requested will allow the Privacy Office to hire two training and two analyst positions. The two training positions will conduct privacy training for (a) Office of Inspector General employees, (b) DHS personnel assigned to work with the Traveler Redress Inquiry Program, and (c) federal and state and local participants in the DHS State, Local, and Regional Fusion Center Initiative. Two analytical positions will analyze, coordinate and review policy documents to ensure compliance with privacy policies. DHS has placed additional requirements on the oversight of privacy sensitive information across the Department. Increased focus has been placed on the Department’s use of new technologies including biometrics, RFID and screening technologies. In addition, the Privacy Office is playing a key role in supporting the Department’s Cybersecurity Program and state and local Fusion Center Initiative. These developments have led to an increase of the compliance work required by the Privacy Office.

In addition to the FTE increase, the Privacy Office is requesting \$0.150 million for resources and positions to provide training to all fusion centers. Effective face-to-face training requires extensive travel to fusion centers; to date only 6 of the 72 fusion centers have received this training. Additional resources will be used to refine training materials, provide print materials, develop a comprehensive on-line privacy training course/module and continued travel for in-person presentations.

#### Impact on Performance

The funding request supports the Secretary's 2009 instructions, which requires the Privacy Office to conduct a review of all Office of Intelligence and Analysis products to ensure compliance with Federal privacy law and DHS information sharing policy. The funding request will significantly improve the intelligence review process; thereby ensuring that intelligence products are quickly disseminated by the department while adhering to applicable privacy standards.

IV. Program Justification of Changes

**Department of Homeland Security  
 Departmental Management and Operations  
 Office of the Secretary and Executive Management  
 Justification of Program Changes**  
 (Dollars in Thousands)

**Program Increase 7: Office of Policy**

Program Increase: Positions 0 FTE 0 Dollars \$6.060M

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							187	187	43,747
Program Increase							0	0	6,060
<b>Budget Request</b>	<b>194</b>	<b>189</b>	<b>48,908</b>	<b>187</b>	<b>182</b>	<b>51,564</b>	<b>187</b>	<b>187</b>	<b>49,807</b>

**Description of Item**

The Office of Policy requests 187 positions, 187 FTE, and \$49,807 million for FY 2011. The request is an increase of \$6.060M over the FY 2010 Enacted budget of 187 positions, 182 FTE, and \$ 51,564 million. The total adjustment to base is (\$7,817) million. The program increase includes \$6.060 million for additional program support.

**Justification**

The Office of Policy requests \$6.060 million in FY11 to fund mission critical support activities. The additional resources will provide technical and administrative expert analytical support to the following Office of Policy functions Strategic Planning, Policy Development, International Affairs and State, and Local Law Enforcement coordination. The analytical support will provide technical and administrative expertise to enrich the Office of Policy's analytical cadre. In addition, the resources will further support any travel and training associated with critical missions domestic and abroad.

**Impact on performance**

Funding the Office of Policy at requested levels will allow increased performance and improvement to capabilities in all mission critical functions in support of the President and the Secretary. As policies are developed, the Department must have the intellectual rigor and analytical support to justify any potential approaches to meet the administration's goals. This requires nothing less than solid quantitative and qualitative data to provide a foundation for all policies. Funding at these levels will allow the Office of Policy to continue its central role of achieving "One DHS" and a truly national homeland security enterprise. The Office of Policy provides a central office to develop and

communicate policies across multiple components of the homeland security network and strengthens the Department's ability to maintain policy and operational readiness needed to protect the homeland. It also provides the foundation and direction for Department-wide strategic planning and budget priorities. The Office of Policy is also tasked with bridging multiple headquarters' components and operating agencies to improve communication among DHS entities, eliminate duplication of effort, and translate policies into timely action. The Office of Policy creates a single point of contact for internal and external stakeholders that allow for streamlined policy management for the Department. The Office of Policy FY11 funding will allow continuity of all the initiatives the office is pursuing.

**Explanation of Increase/Decrease.**

The office of Policy manages the DHS Fellows Program. The entire program included 29 Fellows, with just under half of those funded by other DHS components.

The large increase from 2010 to 2011 for Policy is due to the success of the Fellows Program across DHS components.

### PPA Mission Statement

The Office of the Secretary provides central leadership, management and direction for the entire Department of Homeland Security. This Office provides oversight for all offices within the Departmental Operations function as well as all other entities of the Department. It is the Secretary's role to serve as the top representative of HS to the President, to Congress and to the general public.

**Summary Justification and Explanation of Changes**

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>Salaries and Benefits</b>	<b>\$1,283</b>	<b>\$1,904</b>	<b>\$1,933</b>	<b>\$29</b>

Salaries and Benefits fund for compensation directly related to duties performed for the Executive Leadership and Direction by Federal civilian employees. The FY 2011 request includes funding for the proposed pay raise (currently predicted at 1.4%), benefits, and other mandatory personnel entitlements and program increases.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>Travel</b>	<b>\$1,107</b>	<b>\$1,788</b>	<b>\$1,788</b>	<b>---</b>

Requested funds cover the travel costs of Executive Leadership and Direction's Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler. The FY 2011 reflects no change

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>Transportation of Things</b>	<b>\$29</b>	<b>---</b>	<b>---</b>	<b>---</b>

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2011 request reflects no change.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>GSA rent</b>	<b>\$314</b>	<b>\$411</b>	<b>\$417</b>	<b>\$6</b>

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2011 request reflects inflationary increase due to a change in the algorithm. The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's or Headquarters Office's WCF assessment amount divided by the total WCF assessment multiplied by total estimated cost of the activity.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>Other Rent</b>	<b>\$105</b>	<b>\$222</b>	<b>\$553</b>	<b>\$331</b>

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2011 request reflects a change due to a change in cost allocation.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>Communication, Utilities, and miscellaneous</b>	<b>\$24</b>	<b>\$151</b>	<b>\$151</b>	<b>---</b>

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2011 request has no change.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>Printing</b>	<b>\$16</b>	<b>\$16</b>	<b>\$16</b>	<b>---</b>

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2011 request has no change.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>Other Services</b>	<b>\$7</b>	<b>\$31</b>	<b>\$31</b>	<b>---</b>

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2011 request reflects no change.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>Purchase from Government Accounts</b>	<b>\$116</b>	<b>\$490</b>	<b>\$490</b>	<b>---</b>

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF, DHS Shared Services, and other government agencies including interagency service requirements. The FY 2011 request reflects no change.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>Medical Care</b>	<b>\$1</b>	<b>\$1</b>	<b>\$1</b>	<b>---</b>

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, DHS Shared Services assessment for the Federal Occupational Health Clinic is reflected in this object class. The FY 2011 request reflects no change.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>Supplies &amp; materials</b>	<b>\$55</b>	<b>\$44</b>	<b>\$44</b>	<b>---</b>

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2011 request reflects no change.

**PPA Mission Statement**

The Office of the Deputy Secretary directly supports the Office of the Secretary by providing leadership to the Deptmt. This focuses on internal management and direction, which ensures that the Department will continue to operate efficiently and effectively in carrying out its mission. It is the Deputy Secretary's role to provide internal oversight to all Departmental Operations, which allows the Secretary to focus more on external matters concerning DHS.

**PPA Mission Statement**

The Office of the Chief of Staff promotes the coordination of the agencies and directorates that have been consolidated into the Department of Homeland Security. The Office of the Chief of Staff is responsible for all operational functions that relate to the Immediate Office of the Secretary (budget, information technology, and personnel), and coordinates activities with the Department Headquarters continuity of operations. With the inherent challenges of a concurrent creation of a new Department, reorganization, consolidation, and several new offices, the Office of the Chief of Staff seeks to streamline, coordinate, and deliver highly effective initiatives and policies that will ensure our safety, response capacity, and our freedoms.

**Summary Justification and Explanation of Changes**

**PPA Mission Statement**

The Office of Policy is the primary coordinator of Department-wide policies, programs, and planning, which ensures consistency and integration of missions throughout the entire Department. It provides the Department with a central office to develop and communicate policies across multiple components of the homeland security network and it strengthens the Department's ability to maintain policy and operational readiness needed to protect the homeland. It also provides the foundation and direction for Department-wide strategic planning and budget priorities. A central DHS policy office that bridges multiple, headquarter components and operating agencies improves communication among DHS entities, eliminate duplication of effort, and translate policies into timely action. It also creates a single point of contact for internal and external stakeholders that will allow for streamlined policy management across the Department.

**Summary Justification and Explanation of Changes**

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>

**PPA Mission Statement**

The Assistant Secretary for Public Affairs oversees all external and internal communications for Homeland Security. On a daily basis, the Office of Public Affairs (OPA) responds to national media inquiries, maintains and updates the Department's web site, and coordinates speaking events for Department officials across the country. OPA also develops and manages various public education programs. The Office of Public Liaison, within OPA, fosters strategic communication with the Department's external stakeholders. The Department's organizational identity, including the Homeland Security seal and wordmark, was designed and implemented by the Office of Public Affairs. OPA directs the Department's Incident Communications program that guides overall Federal incident communication activity and coordinates with state, local, and international partners to ensure accuracy and timely information to the public during a crisis.

**PPA Mission Statement**

The mission of the Office for Civil Rights and Civil Liberties (CRCL) is to protect civil rights and civil liberties, to support DHS by providing policy advice on the full range of civil rights and civil liberties issues, and to serve as an information and communication channel with the public regarding all aspects of these issues. Section 705 of the Homeland Security Act provides that the Officer for Civil Rights and Civil Liberties shall: Department; and make public through the internet, radio, television, or newspaper advertisements information on the responsibility and function of, and how to contact, the Officer. Submit to the President of the Senate, the Speaker of the House of Representatives, and the appropriate committees and subcommittees of Congress through the Secretary on an annual basis a report on the implementation of this section, including the use of funds appropriated to carry out this section, and allegations of abuses described under subsection (a)(1) and any actions taken by the Department in response to such allegations.

**Summary Justification and Explanation of Changes**

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Presidents Budget</b>	<b>Request</b>	<b>Change</b>
<b>Salaries and Benefits</b>	\$9,188	\$14,087	\$16,922	\$2,835

Salaries and Benefits fund for compensation directly related to duties performed for CRCL by Federal civilian employees. The FY 2011 request includes funding for a 1.4% pay raise , benefits, and other mandatory personnel entitlements and program increases. The net increase of \$2.835 million includes annualization of \$1,937 million for 14 FTE, \$741k for 6 additional FTE for EEO programs, training and review and compliance programs .

**PPA Mission Statement**

The mission of the Citizenship and Immigration Services Ombudsman (CISOMB) is to assist individuals and employers in resolving problems with the United States Citizenship and Immigration Service (USCIS). Section 452 of the Homeland Security Act of 2002 requires that CISOMB assist individuals and employers in resolving problems with the Bureau of Citizenship and Immigrations Services, identify areas in which individuals and employers have problems in dealing with USCIS, and to the extent possible, propose changes in the administrative practices of the USCIS to mitigate problems.

**Summary Justification and Explanation of Changes**

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>

**PPA Mission Statement**

The Department of Homeland Security's Privacy Office protects the collection, use, and disclosure of personal and Departmental information. The Privacy Office ensures that appropriate access to information is consistent with the vision, mission, and core values of DHS, and implements the policies of the Department to defend and to protect the individual rights, liberties, and information interests of our citizens.

Through internal education outreach and the establishment of internal clearance procedures and milestones for program development, the Privacy Office is helping DHS components to consider privacy whenever developing new programs or revising existing ones. The Privacy Office is evaluating the use of new technologies to ensure that privacy protections are given primary consideration in the development and implementation of these new systems. In this process, DHS professionals have become educated about the need to consider – and the framework for considering – the privacy impact of their technology decisions.

The Chief Privacy Officer and the staff review Privacy Act system notices before they are sent forward and ensure that they collect only those records that are necessary to support DHS mission. The Privacy Office also guides DHS agencies in developing appropriate privacy policies for their programs and serves as a resource for any questions that may arise concerning privacy, information collection or disclosure.

**Summary Justification and Explanation of Changes**

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>Salaries and Benefits</b>	\$3,855	\$5,686	\$6,533	\$847

Salaries and Benefits fund for compensation directly related to duties performed for the Office of Privacy by Federal civilian employees. The FY 2011 request includes funding for a pay raise, benefits, and other mandatory personnel entitlements and program increases. In addition, 6 positions and 4 FTE to hire Intelligence Analysts, Trainers and Investigators for additional privacy oversight. FY 2011 request reflect 1.4% for inflation.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>Travel</b>	\$129	\$191	\$191	---

Requested funds cover the travel costs of Privacy's Federal civilian employees, while in authorized travel status, either directly or by reimbursing the traveler. The FY 2011 request reflects no change.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>GSA rent</b>	\$406	\$465	\$472	\$7

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2010 request reflects inflationary increase due to a change in the algorithm. The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's or Headquarters Office's WCF assessment amount divided by the total WCF assessment multiplied by total estimated cost of the activity. The FY 2011 request reflects an increase for rent.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>Other Rent</b>	\$7	---	---	---

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2011 request reflects no change.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>Printing</b>	\$14	\$27	\$27	---

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2011 request reflects no change.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>
<b>Advisory and Assistance Services</b>	\$1,042	\$175	\$175	---

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2011 request reflects no change.

	2009 Actuals	2010 Enacted	2011 President's Budget	2010 to 2011 Change
<b>Other Services</b>	\$799		\$229	\$379
			\$150	

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2011 request includes a program increase of \$150K.

	2009 Actuals	2010 Enacted	2011 President's Budget	2010 to 2011 Change
<b>Purchase from Government Accounts</b>	\$434		\$1,004	\$1,147
			\$143	

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF and DHS Shared Services. The FY 2011 request reflects an increases of 143K due to the change in the rent algorithm.

	2009 Actuals	2010 Enacted	2011 President's Budget	2010 to 2011 Change
<b>Medical Care</b>	\$2		---	---
			---	---

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2011 request reflects no change.

	2009 Actuals	2010 Enacted	2011 President's Budget	2010 to 2011 Change
<b>Supplies &amp; materials</b>	\$102		\$118	\$118
				---

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2011 request reflects no change.

	2009 Actuals	2010 Enacted	2011 President's Budget	2010 to 2011 Change
<b>Equipment</b>	\$76		\$76	\$76
				---

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2011 request reflects no change.

**PPA Mission Statement**

The Office of Counternarcotics Enforcement's (CNE) role is to oversee the Department of Homeland Security's efforts to secure the borders against the flow of illegal drugs and to protect the U.S. against drug-related criminal enterprises. The vision of the Office of Counternarcotics Enforcement is a homeland and its citizens free from illicit drugs and from the threats posed by drug-related criminal enterprises.

**Summary Justification and Explanation of Changes**

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>President's Budget</b>	<b>Change</b>

<b>BUDGET REQUEST AND SUPPORTING INFORMATION</b>
--

**Departmental Management and Operations  
Under Secretary for Management**

## **I. Appropriation Overview**

### **A. Mission Statement for Under Secretary for Management:**

The Management Directorate ensures delivery of effective and efficient business and management services throughout the Department, to enable the Department of Homeland Security (DHS) to lead the unified national effort to secure America.

The DHS Management Directorate provides the business framework that enables the Department of Homeland Security to achieve its mission. It does so by providing policy, guidance, operational oversight and support, and innovative solutions for the management needs of the entire Department.

### **B. Budget Activities:**

#### Immediate Office of Under Secretary of Management (OUSM)

The Immediate Office of the Under Secretary for Management's primary mission is to deliver quality administrative support services providing leadership and oversight for all departmental management functions which include information technology, security, budget and financial management, procurement and acquisition, human capital, and administrative services.

#### Office of the Chief Administrative Officer (OCAO)

Administrative Services establishes policy and procedures as well as provides both departmental leadership and oversight for all functional areas managed by the DHS CAO and component Chief Administrative Officers. Functional areas include asset management (logistics, real estate, personal property, aviation, transportation, fleet, marine vessels), mail screening and delivery, business continuity and emergency preparedness, occupational safety and health, environmental planning and management, historic preservation, energy management, records, directives, forms, library services, printing and graphics. In addition, OCAO also provides the day to day operational support for departmental headquarters and the other components [the Office of Intelligence and Analysis (I&A); the Office of Operations Coordination and Planning (OPS); and Science and Technology (S&T)].

#### DHS Nebraska Avenue Complex (NAC) Consolidation Project

Although the physical limitations of the NAC render it unsuitable as the permanent DHS Headquarters, the Department plans to retain this property to house certain mission support functions that will not relocate to the new DHS Headquarters Consolidated Campus currently at St. Elizabeths. Accordingly, DHS will continue to invest in this

property to sustain our operational capabilities while St. Elizabeth's is developed and leverage those investments as the Department realigns the overall real estate portfolio to support operations and integration.

#### Office of the Chief Human Capital Officer

The Office of the Chief Human Capital Officer (OCHCO) establishes policy and procedures as well as provides both departmental leadership and oversight for all Human Capital functional areas. OCHCO is organizationally structured into six functional areas (Policy & Programs; Learning & Development; Executive Resources; Human Capital Business Systems; Headquarters Human Resources Management Services; and Business Support and Operations) and is responsible for developing policy and procedures for these areas, as well as providing oversight, guidance and leadership within the Department.

#### Human Resources Information Technology (HRIT)

The HRIT program implementation began to merge and modernize the DHS HRIT infrastructure to provide flexibility and management information that allows the Department to foster the "One DHS" concept. Consolidation fulfills the critical need for complete visibility of all Department employees, thereby enabling executives to strategically manage the workforce while supporting the mission.

#### Office of the Chief Procurement Officer (OCPO)

The Office of the Chief Procurement Officer is responsible for the overall management, administration, and oversight of department-wide acquisition, financial assistance, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. The OCPO activities include:

##### Acquisition Support and Oversight

- **Acquisition Workforce:** Responsible for facilitating centralized hiring of the acquisition workforce including the Acquisition Professional Career Program for initial entry into select acquisition career fields and strategic acquisition workforce planning to ensure accession, development, and retention of a professional workforce.
- **Operations Support:** Principal liaison for the acquisition community and assist components to accomplish their varied missions.
- **Acquisition Oversight:** Responsible for developing and implementing a DHS acquisition oversight strategy in accordance with MD 0784 and implementing internal controls in accordance with A-123 for the DHS acquisition function.
- **Program Management:** Responsible for providing support to DHS program managers and assisting in the development of a DHS-wide acquisition management system.

### Strategic Initiatives

- **Acquisition Policy and Legislation:** Responsible for developing DHS acquisition regulations and policies, developing proposed acquisition legislation, and responding to proposed acquisition related legislation.
- **Competitive Sourcing and Privatization:** Responsible for the Department's implementation of the Federal Activities Inventory Reform (FAIR) Act of 1998, the Revised OMB Circular A-76 and the President's Management Agenda (PMA) Competitive Sourcing Initiative.
- **Strategic Sourcing and Acquisition Systems:** Responsible for managing the DHS strategic sourcing program; developing corporate strategies for the acquisition of shared commodities to achieve efficiencies and economies of scale.

### Office of Small and Disadvantaged Business Utilization (OSDBU)

- In support of the Small Business Act to maximize small business procurement opportunities, the OSDBU assists, counsels, and advises small businesses of all types on procedures for contracting with the DHS. Additionally, the OSDBU works closely with each Departmental organizational element to implement the Department's small business procurement assistance program. While this office works closely with the Chief Procurement Officer, it reports directly to the Deputy Secretary.

### Office of the Chief Security Officer (OCSO)

The mission of the Office of the Chief Security Officer (OCSO) is to secure the Department so the Department can secure the homeland. The OCSO implements security programs that safeguard DHS personnel, property, facilities, and information. The office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; and provides security support to DHS components. Additionally, the office investigates threats related to foreign intelligence, terrorism, and criminal activities within or directed against DHS.

### **C. Budget Request Summary:**

The Under Secretary for Management requests 1096 positions, 1046 FTE, and \$266.969M for FY 2011. The total adjustments-to-base are 212 positions, 259 FTE, and a reduction of \$5.806M to current services. The reduction in current services is comprised of an increase of \$15.036M for annualizations, working capital fund, and pay inflation; a one-time reduction of \$20M for the non-recurring of HSPD-12 base funding; and a decrease in OCHCO's salaries and expenses due to proper realignment and cost savings of the Working Capital Fund (WCF). The total program increase includes 150 FTP/FTE and \$18.585M, which is a combination of program reductions and an increase to the Department's acquisition workforce by \$24,235,700 as part of a presidential initiative intended to mitigate the risks associated with gaps in capacity or capability, to improve the effectiveness of the workforce, and to advance acquisition contracting oversight.

### III. Current Services Program Description by PPA

**Department of Homeland Security  
Departmental Management and Operations  
Under Secretary for Management  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Immediate Office of the USM**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>13</b>	<b>11</b>	<b>2,471</b>
<b>2010 Enacted</b>	<b>13</b>	<b>13</b>	<b>2,864</b>
2011 Adjustments-to-Base	-	-	34
<b>2011 Current Services</b>	<b>13</b>	<b>13</b>	<b>2,898</b>
2011 Program Change	-	-	(128)
<b>2011 Total Request</b>	<b>13</b>	<b>13</b>	<b>2,770</b>
Total Change 2010 to 2011	-	-	(94)

The Immediate Office of the Under Secretary for Management requests 13 FTP/FTEs and \$2.77M for FY 2011. This is a net reduction of \$94K from the FY 2010 enacted level and is comprised of an increase of \$34K for pay inflation; and a decrease of \$128K due to a reduction in contractor support.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Immediate Office of the Under Secretary of Management ensures the Under Secretary for Management offices function effectively and efficiently in support of the Department as a whole and the USM offices. The requested funding will allow the OUSM to manage the workload of the USM offices, respond quickly to queries from within and outside the Department, and further DHS efforts for functional integration.

<b>2011 Current Services</b>	<b>87</b>	<b>87</b>	<b>44,990</b>
2011 Program Change	-	-	(1,048)
<b>2011 Total Request</b>	<b>87</b>	<b>87</b>	<b>43,942</b>
Total Change 2010 to 2011	-	7	(549)

The Office of the Chief Administrative Officer requests 87 FTP/FTEs and \$43.942M for FY 2011. This is a net decrease of \$549K and an increase in 7 FTEs over the FY 2010 enacted level. This is due to the annualization of 7 FTEs and an increase of \$499K for pay inflation and WCF contributions, and a total reduction of \$1.048M in program, environmental, and technical support within the OCAO.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of the Chief Administrative Officer’s primary mission is to provide DHS-wide governance and management for administrative services. Activities that the OCAO manage include asset management (logistics, real estate, personal property, aviation, transportation, fleet, marine vessels), mail screening and delivery, occupational safety and health, environmental planning and management, historic preservation, energy management, records, directives, forms, library services, printing and graphics.

**FY 2009 Accomplishments**

- Published a series of critical guidance documents that included the department’s real property strategic requirements (submitted as a CORE program document), the DHS real property handbook manual and a real estate collocation handbook that established the DHS process for evaluating and executing real property opportunities;
- Issued DHS-wide workforce protection guidance for H1N1 and a mail management procedural manual; and
- Led the development of five of the Secretary’s efficiency initiatives and established requirements for a Department-wide Electronic Records Management System. In addition, the OCAO evaluated component performance quarterly for each of the program areas.

**FY 2010 Planned Accomplishments**

- Develop and implement a DHS Asset Review Board (DARB) to prioritize and consolidate major Non-IT Capital Investments;
- Execute a contract for a DHS Electronic Records Management System and conduct alpha and beta testing;

- Continue to manage the Secretary’s efficiencies for acquiring hybrids and alternative fuel vehicles, reducing fleet fossil fuel usage, increasing facilities’ energy efficiency, and reducing cost for printing and publication subscriptions; and
- Harmonize DHS Personal Protective Equipment programs for H1N1 exposure, issue guidance manuals for sustainable practices and environmental compliance and begin rulemaking for DHS-wide National Environmental Policy Act (NEPA) regulation.

**FY 2011 Planned Accomplishments**

- Establish the asset review process and begin implementation of an asset management application within the CFO Transformation and Systems Consolidation (TASC) program;
- Phase deployment of the Electronic Records Management System; and
- Implement a DHS environmental sustainability program

**PPA: DHS HQ NAC Project**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	<b>29,068</b>
<b>2010 Enacted</b>	-	-	<b>5,500</b>
2011 Adjustments-to-Base	-	-	-
<b>2011 Current Services</b>	-	-	<b>5,500</b>
2011 Program Change	-	-	-
<b>2011 Total Request</b>	-	-	<b>5,500</b>
Total Change 2010 to 2011	-	-	-

The DHS Headquarters Project at the Nebraska Avenue Complex (NAC) requests \$5.5M in FY 2011. There is no change from the FY 2010 enacted level.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The NAC is the headquarters facility for DHS, and presence at the Complex continues to expand as well as at other locations to meet current demands. Although the physical limitations of the NAC render it unsuitable as the permanent DHS headquarters, the facility at NAC must sustain the operational capabilities for effective mission execution until the new consolidated headquarters at St. Elizabeths is constructed. The current facility at the NAC is an integral part of the Headquarters Consolidation Program. Current services investments will be leveraged for future use of the NAC to house certain mission support functions that do not relocate to St. Elizabeths.

**FY 2009 Accomplishments**

- Perimeter Improvement Project: Awarded \$20M contract, through General Services Administration (GSA), for Perimeter Improvement Project. This included upgrade and replacement of existing perimeter fence, addition of sensors and cameras, new

command and control center, new visitor intake center, vehicle crash barriers and other improvements. Work began in September 2009;

- Medium Voltage Upgrade: Awarded a design-build contract (costs shared with GSA) for major upgrade of the campus electrical grid that provided electrical feeds and upgraded power supply for the entire campus to maintain true 24/7 operations. Power capacity will be increased from 7 watts per square foot to 22 watts per square foot when project is completed;
- NAC 19 and 61: Completed the construction of the new mechanical support building (NAC 61) that now provides all of the air conditioning and electrical service for NAC 19. The NAC 19 Basement renovation was completed June 18, 2009. The full renovation provides secure space for approximately 250 personnel provide direct mission-support operations functions, and includes a training room, multiple conference rooms, and state of the art LAN rooms;
- Carpet Replacement Project: Completed 8 phases of a 26-phase campus-wide carpet replacement project. All phases to be completed by 4<sup>th</sup> Qtr FY 2011; and
- Signage and Way Finding: Began installation of the campus-wide comprehensive signage and way finding system to facilitate staff, visitor and emergency personnel access to the campus and the buildings.

#### **FY 2010 Planned Accomplishments**

- Perimeter Improvement Project and Medium Voltage Upgrade Projects: Continue work on the Perimeter Improvement Project and the Medium Voltage Upgrade Project. The major upgrade of the campus electrical grid will provide electrical feeds and upgraded power supply for the entire campus to maintain true 24/7 operations. Power capacity will be increased from 7 watts per square foot to 22 watts per square foot when project is completed. The Perimeter Improvement Project will include the upgrade and replacement of existing perimeter fences, addition of sensors and cameras, new command and control center, new visitor intake center, vehicle crash barriers and other improvements;
- NAC 3: Design and procure major mechanical, electrical and physical security upgrades for NAC 3 to support direct mission-related operational functions;
- NAC 19: Design, procure and install HVAC upgrades to support direct mission-related operational functions;
- Design and build secure space/garage for the Secretary's security/communications vehicle; and
- ADA/EEO Compliance Survey and Remediation: Campus-wide survey for ADA compliance, as required by Equal Employment Opportunity Commission's Management Directive 715. This would include a plan, schedule and budget for remediation of ADA compliance issues, and funding to address immediate issues.

#### **FY 2011 Planned Accomplishments**

- Perimeter Improvement Project and Medium Voltage Upgrade Projects: Complete work on the Perimeter Improvement Project and the Medium Voltage Upgrade Project;
- NAC 3: Install/Construct major mechanical, electrical and physical security upgrades for NAC 3 to support direct mission-related operational functions;

- ADA/EEO Compliance Survey and Remediation: Continue to remediate ADA compliance issues, and funding to address immediate issues; and
- Carpet Replacement Project: Complete the 26-phase campus-wide carpet replacement project.

**PPA: Office of the Chief Human Capital Officer**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>82</b>	<b>43</b>	<b>21,485</b>
<b>2010 Enacted</b>	<b>93</b>	<b>89</b>	<b>25,473</b>
2011 Adjustments-to-Base	15	19	676
<b>2011 Current Services</b>	<b>108</b>	<b>108</b>	<b>26,149</b>
2011 Program Change	-	-	(1,150)
<b>2011 Total Request</b>	<b>108</b>	<b>108</b>	<b>24,999</b>
Total Change 2010 to 2011	15	19	(474)

The Office of the Chief Human Capital Officer requests 108 FTP/FTEs and \$24.999M for FY 2011. This is a net decrease of \$474K and an increase in 15 FTPs and 19 FTEs over the FY 2010 enacted level. This is due to the annualization of 4 FTEs, an increase of \$1.518M for pay inflation and WCF contributions, a 15 FTE increase in federal staff, and a current services reduction of \$842K to OCHCO salaries and expenses associated with cost effective realignment of WCF costs.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of the Chief Human Capital Officer provides overall management and administration for the Department’s human capital programs, policies, and practices.

**Challenges**

There are inherent complexities that make human capital a significant challenge within the Department of Homeland Security. As the largest merger in the federal government since the 1940s, DHS has brought together the workforces of 22 distinct agencies and programs, governed by multiple legacy rules, regulations, and laws representing hundreds of occupations. Furthermore, the Department’s 230,000 employees include a mix of civilian and military personnel working in diverse fields. These complexities have created significant challenges for implementing integrated human capital approaches. Current day challenges are as follows:

- Workforce Diversity: Although there have been improvements, the Department workforce does not reflect the diversity of the American population, especially in the ranks of executives. A stronger diversity “infrastructure” and additional resources will be required to deploy major diversity initiatives across DHS.

- Workforce Surveys: The 2007 DHS Annual Employee Survey (AES) and the 2008 Federal Human Capital Survey (FHCS) show that DHS faces significant challenges with employee satisfaction in the areas of performance, rewards and recognition, and particularly in the area of leadership. Subsequently, the negative impact on employee engagement could lead to decreased productivity, morale and retention.
- Leader Development: The Federal Human Capital Survey has identified significant DHS issues are symptomatic of deficiencies in leadership skills and can be addressed through improved leadership. DHS must design and implement a robust leader development program that provides current and newly selected supervisors with the skills needed to be effective leaders. The Department must ensure mandatory training is standardized and delivered via learning management systems or other electronic media to support the “One DHS” concept.
- DHS-wide Employee Performance Management Program: DHS still maintains legacy Performance Management systems (primarily in the bargaining units) within component organizations. Performance culture has been identified as one of the areas in the Federal Human Capital Survey results that continue to require special emphasis across the enterprise.
- HR Integration: DHS human resources programs, functions, practices and activities remain fragmented and “stove-piped” at every level. Cross-component integration of systems, policies, and practices will lead to human capital programs that support the mission and become a competitive advantage for the Department.

### **Key Strategies and Action Plans**

As a means of posturing itself to meet these challenges, the OCHCO has conducted a comprehensive review of all federal and contractor positions with a goal of realigning itself to reduce its significant over-reliance on contractor support. Based on the results of that review, the OCHCO seeks to increase authorized staffing levels by 19 FTE within existing budgets by reducing and/or eliminating more expensive contractor support and re-directing the contractor dollars to fund federal FTE. In doing so, the OCHCO will gain much greater control and accountability of outcomes, reduced reliance on contractor support, and more importantly, will be appropriately staffed to implement key strategies and action plans.

### Diversity

To ensure that all segments of American society are represented in DHS, a new organization was recently established within OCHCO. The organization is structured to support the development of department-wide strategies and policies as well as a focus on the operational aspects of recruiting in targeted areas, such as, but not limited to, Historically Black Colleges and Universities, Hispanic Association of Colleges and Universities, Urban League’s Black Executive Exchange Program.

OCHCO, in coordination with the Office for Civil Rights and Civil Liberties and other major stakeholders, will begin by actively engaging in increasing the diversity of the

Senior Executive workforce. In an effort to improve outreach, interviews will be required for each selection at the GS-15 level or equivalent, SES CDP selections and all SES positions and paid advertising will be strategically used to reach minorities and women.

#### Learning and Development

Developing and maintaining robust leadership development programs is not only an incentive to attract new talent and achieve a diverse and representative workforce, but also contributes to employee satisfaction and enhanced morale and will greatly assist in creating a “One DHS” culture. Numerous leadership development programs will be offered and standardization of legislatively mandated training will continue across the Department.

#### Workforce Survey

Recruiting the right people and retaining a talented and motivated workforce are critical to accomplishing the DHS mission. One important indicator of the ability to hire and retain the right people is the Federal Human Capital Survey (FHCS). Although DHS results for the 2008 FHCS are lower than government-wide averages, the results have greatly improved since the 2006 scores.

The DHS four overarching focus areas for improving employee satisfaction and engagement in FY 2010 and FY 2011 are:

- Developing Enhanced Leadership Capability
- Implementing Recruitment Improvements
- Initiating Retention Improvements
- Enhancing Action Planning and Program Accountability across DHS components

#### Performance Management

DHS will continue to implement the enterprise performance management program to provide greater clarity in performance expectations, defined competencies and individual goals that are tied to organizational goals, and improve the Department’s ability to meet OPM’s requirements within the Human Capital Accountability and Assessment Framework (HCAAF). In FY 2011, OCHCO will focus on developing and implementing a Department-wide performance management policy and automating the executive appraisal process to permit the alignment of strategic goals with individual performance measures.

#### Work-Life Initiatives

The Administration is emphasizing work-life and employee engagement programs, including telework, health and wellness, volunteer community service, and other flexibilities to make the government a model employer. To that end, OCHCO will assist in deploying the IdeaFactory to all DHS components. The IdeaFactory is a web-based employee engagement tool originally developed at the Transportation Security Administration. OCHCO will assist in monitoring, evaluating, and implementing program improvements.

As a part of the work-life initiatives and pursuant to Executive Order 12564, DHS is required to establish a Drug Free Workplace Program. In FY 2011, OCHCO plans to roll out a department-wide drug testing program. The program will require pre-employment drug testing as well as testing for employees in sensitive positions, positions requiring commercial driver's licenses, and positions requiring one to carry firearms. OCHCO will focus efforts to develop a DHS Plan and obtain certification from the Department of Health and Human Services (HHS). Additionally, OCHCO will focus on pursuing a department-wide contract for laboratory drug testing services as well as develop and deliver training to component Drug Program Coordinators (DPCs).

### **FY 2009 Accomplishments**

- Conducted the first DHS Veterans Job Fair;
- In partnership with CRCL/EEO, OCHCO served as an instrumental partner in development and deployment of a DHS Anti-Harassment Policy Directive and Instruction;
- OCHCO conducted three Human Resources Operational Audits within the headquarters components, eight Delegated Examining Unit reviews and one all-inclusive operational services follow-up;
- Assisted and supported the components in transitioning to a 5 USC Chapter 43-based DHS-wide Employee Performance Management Program; and
- Implemented a Department-wide HR Resource Center for established policies, programs, and practices.

### **FY 2010 Planned Accomplishments**

- Support the final development and implementation of a 5 USC Chapter 43-based DHS-wide Employee Performance Management Program that showcases exemplary employee work accomplishments "linked" to important Department goals and strategic plans;
- Support the Department in the development and implementation of an enterprise DHS labor-management relations strategy and on initiatives requiring a common labor relations approach;
- Establish a formal follow-up program to ensure post audit compliance deficiencies are corrected in a timely manner;
- Collaborate and consult with national level unions on the possibility of collective bargaining at the Transportation Security Administration and on the likely issuance of an executive order on labor-management forums to improve delivery of government services; and
- Fully implement the IdeaFactory in all DHS components and begin adopting new ideas generated through the system.

### **FY 2011 Planned Accomplishments**

- Continue efforts to improve Diversity across the Department, particularly in the executive ranks; develop and implement a comprehensive DHS-wide leader development program to address the needs of newly selected and existing supervisors;

- Enhance the SES Candidate Development Program, and increase the number of DHS employees matriculating through the DOD War College with the goal of having a Masters Degree from the War College serve as an equivalent to completing the requirements of the DHS SES Candidate Development Program;
- Aggressively expand outreach to former military personnel to meet the Secretary's goal of having 50,000 Veteran's employed at the Department; and
- Achieve efficiencies through the consolidation of human capital policies, programs, practices and staffing.

**PPA: Human Resources Information Technology (HRIT)**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	<b>15,248</b>
<b>2010 Enacted</b>	-	-	<b>17,131</b>
2011 Adjustments-to-Base	25	25	-
<b>2011 Current Services</b>	<b>25</b>	<b>25</b>	<b>17,131</b>
2011 Program Change	-	-	-
<b>2011 Total Request</b>	<b>25</b>	<b>25</b>	<b>17,131</b>
Total Change 2010 to 2011	25	25	-

The Office of the Chief Human Capital Officer requests \$17.131M for this activity. This reflects an increase of 25 FTE/FTP over the FY 2010 enacted level as a result of contractor conversions.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The mission of the HRIT program is to merge and modernize the DHS HRIT infrastructure to provide flexibility and the management information that will allow DHS to continuously evolve in response to changing business, legislative and economic drivers. Consolidation will fulfill the critical need for complete visibility of all Department employees thereby enabling executives to strategically manage the workforce while supporting the Department’s mission.

The OCHCO manages the annual distribution of \$16B in payroll and benefits for all civilian DHS employees while simultaneously working to streamline and modernize the HRIT capabilities of the Department.

**Challenges**

Hiring systems and practices throughout the Department are inconsistent and inefficient, serve as a disincentive to applicants, increase the burden on hiring managers through referral of poorly vetted applicants, and add to recruiting cycle time and cost. The overhaul of hiring processes is an enterprise problem that must be addressed quickly and from an enterprise perspective. This effort closely aligns with the OPM high priority hiring reform initiative.

The current IT infrastructure includes hundreds of component legacy IT systems, leading to unnecessary cost and complexity. The Department must identify a way ahead to eliminate redundant systems and deliver a modern HRIT infrastructure that supports mission requirements at the right cost.

### **Key Strategies and Action Plans**

For FY 2011, hiring will be designated as a top OCHCO priority, with a key milestone of deploying TALENTLink; a department-wide automated recruiting and staffing system. TALENTLink will streamline hiring and will provide an enterprise-wide solution to ensure that the hiring process is measurable from the time the manager identifies a hiring need to the time the selectee begins employment; it will ensure that job announcements are written in plain language to attract, rather than deter, applicants; and it will notify applicants of their status at four points in the hiring process in a timely manner – application received, application reviewed for qualifications, application referred to the selection official (or not), and applicant selected (or not). To accomplish this, supporting policies and procedures will continue to be developed with hiring managers engaged.

Building on previous deployments in FY 2009 (DHS HQ and FEMA) and planned for in FY 2010 (ICE, FLETC, OIG and NPPD), OCHCO will utilize the FY 2011 HRIT resources to deploy TALENTLink to USCG and USCIS, which will result in an enterprise deployment rate of 70%. To support the deployment of TALENTLink and other enterprise HRIT projects, OCHCO is proposing to utilize the HRIT resources, which have traditionally been employed for contractor services, to fund 25 contractor conversions. In support of the Administration's push to have more federal oversight for major acquisition programs, the OCHCO believes that hiring dedicated federal staff to consolidate and deploy the current and future enterprise systems will allow for improved oversight and accountability. Reduced staffing costs resulting from the contractor conversions will allow remaining dollars to be infused back into the program to extend OCHCO/Human Capital Business Systems (HCBS) service and support to components for system training and business process reengineering to further institute the "One DHS" initiative for Enterprise-wide HR systems.

The contractor conversions contained in this request will accomplish the following:

- Implement increased enterprise onboarding functionality within TALENTLink for new hires, including enhanced applicant security, testing, screening, and provisioning processes;
- Complete the integration of the enterprise Position Description (PD) Library and Staffing Case-tracking system, in partnership with the OCIO, to compliment TALENTLink and improve the hiring and staffing processes;
- Increase quality and functionality of EmpowHR and NFC by streamlining the Enterprise payroll/personnel reconciliation;
- Continue to support existing customers on the enterprise time and attendance system (webTA) while identifying new requirements for increased system functionality (e.g. labor distribution and scheduling capabilities);

- Gather and document system requirements for CBP, the final customer for webTA, achieving the goal of all DHS components reporting time on one system. This will afford the Department greater flexibility in reporting consolidated time and attendance data for such things as H1N1 and telework; and
- Identify and implement new capabilities to support and improve payroll and processing for the Department.

### **FY 2009 Accomplishments**

- TALENTLink: Established the baseline staffing configuration and deployed to FEMA and DHS HQ (NPPD, S&T, Policy, CHCO, USM, DNDO, OS, OCE, Privacy, CIS Ombudsman, OGC, CSO, OPA, OLA, CFO, CPO, OPO);
- WebTA: To benefit over 130,000 employee records, completed requirements of the Bi-directional interface between webTA and data contained in the NFC mainframe to reduce manual updates; in turn, error rates and labor hours needed to research timekeeping errors will also be reduced. Completed a technology upgrade to the Oracle 10g platform, and implemented one release for increased functionality and system maintenance. Supported requirements development for the integration of webTA with TSA's electronic time and scheduling system (eTAS), which will result in time savings for TSA's cost accounting and labor scheduling at airports;
- EOPF: Migrated the last DHS component, USSS, and implemented release 4.0 and 4.1 for increased functionality. Finalized requirements for the USCG and TSA merge onto the DHS instance to achieve cost and process efficiencies;
- EmpowHR: Completed 9.0 PeopleSoft upgrade and subsequent releases (9.01 and 9.02) to provide a robust foundation for future self-service, workflow and security management requirements. Utilized and implemented available workflow capabilities for HQ personnel processing to streamline processing times, reduce error rates and decrease hard copies sent via inter-office mail; and
- Payroll/Personnel: Implemented Fair Labor Standards Act Overtime (FLSA) changes for CBP officers (CBPO), which requires that CBPOs have their pay calculated based on dual compensation to ensure employees receive the most advantageous rate of pay. Completed Phase III of the EmpowHR and NFC Payroll reconciliation project.

### **FY 2010 Planned Accomplishments**

- TALENTLink: Establish the baseline onboarding configuration, in partnership with the OCIO, to streamline all new employee processes such as drug and medical tests, security screening, and provisioning into one integrated system. Complete deployments for NPPD, OIG, FLETC and ICE;
- WebTA: Complete deployment for USCIS. Implement bi-directional interface and TSA's eTAS integration project;
- EOPF: Complete USCG and TSA merges to the DHS instance. Implement two major product releases for improved processing and new functionality;
- EmpowHR: Implement three major releases that expand functionality and address reconciliation requirements; and

- Integration Tools: In partnership with the OCIO, implement a new enterprise integration environment to provide a central mechanism for secure data interchanges between and reporting among the enterprise HR applications to improve data integrity and availability of the information.

**FY 2011 Planned Accomplishments**

The Office of the Chief Human Capital Officer will use planned resources to fund the following programmatic areas:

- Fund and deploy TALENTLink to USCG and USCIS;

**PPA: Office of the Chief Procurement Officer**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>210</b>	<b>152</b>	<b>39,107</b>
<b>2010 Enacted</b>	<b>354</b>	<b>282</b>	<b>68,538</b>
2011 Adjustments-to-Base	100	122	10,314
<b>2011 Current Services</b>	<b>454</b>	<b>404</b>	<b>78,852</b>
2011 Program Change	150	150	20,911
<b>2011 Total Request</b>	<b>604</b>	<b>554</b>	<b>99,763</b>
Total Change 2010 to 2011	250	272	31,225

The Office of the Chief Procurement Officer requests 604 FTP/554 FTEs and \$99.763M in FY 2011. This is a net increase of 250 FTP/272 FTEs and \$31.225M over the FY 2010 enacted level; and includes an adjustment to base of 100 FTP/122 FTEs and \$10.314M for annualizations, pay inflation; program reductions of \$1.846M in contractual support and \$1.479M in centralized training; and a program increase of \$24.236M for enhancing the acquisition workforce.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The OCPO establishes the acquisition regulations, policies and procedures for DHS. It oversees the Department’s acquisition programs and assists the acquisition community with implementing difficult and complex procurements to reduce risk and ensure success. OCPO is responsible for acquisition workforce planning, centralized acquisition workforce recruitment, and training. In support of this responsibility and to address the government-wide need for acquisition professionals, OCPO has implemented a centrally funded and managed Acquisition Professional Career Program modeled after the highly successful Navy Intern Program. This program features three, single year rotations through various components and provides interns with all the experience and training needed to become journeymen level acquisition professionals. In FY 2011, CPO requests 100 FTP/50 FTE to continue the third year of this important program and will fund this initiative within their base funding.

**FY 2009 Accomplishments**

- Continued to build the DHS acquisition workforce, including the DHS Acquisition Workforce Intern Program; and
- Established an acquisition system whereby each requirement has a well defined mission and a management team.

**FY 2010 Planned Accomplishments:**

- Continue to improve the Acquisition Workforce Intern Program;
- Implement Acquisition Policy and Oversight for DHS' acquisition programs;
- Stand up the Office of Selective Acquisitions, to assume the role of handling classified procurements; and
- Assume responsibility for Investment Review across the Department.

**FY 2011 Planned Accomplishments:**

- Hire an additional 100 interns to complete the three year program and part of DHS's strategy to maintain the DHS acquisition workforce with well-trained acquisition personnel;
- Enhance the capability and capacity of acquisition workforce as part of a presidential initiative to mitigate the risks associated with gaps in either workforce capacity or capability, and improve workforce effectiveness as well as to advance contracting oversight;
- Expand the acquisition workforce certification in small increments in the career fields of Test and Evaluation, Logistics, Systems Engineering, and business Cost Estimating and Financial Management;
- Implement in phases a centralized registration system that will streamline the registration process and allow the Department to manage and forecast training needs more accurately; and
- Continue to exercise its acquisition governance responsibilities as required by Department acquisition policy.

**PPA: Office of the Chief Security Officer**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>123</b>	<b>150</b>	<b>61,338</b>
<b>2010 Enacted</b>	<b>187</b>	<b>173</b>	<b>90,193</b>

<b>2011 Total Request</b>	<b>259</b>	<b>259</b>	<b>72,864</b>
Total Change 2010 to 2011	72	86	(17,329)

The Office of the Chief Security Officer requests \$72.864M in FY 2011. This is an increase of 72 FTP/86FTEs and a decrease of \$17.329M over the FY 2010 enacted level. This request includes an adjustment to base of 72 FTP/86FTEs and \$2.671M for annualizations, pay inflation; and a reduction of \$20M for non recurring HSPD-12 base funding.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The mission of the Office of Security is to lead a collaborative security program to safeguard the Department's personnel, information, and property so the Department may secure the Homeland. Today's complex security environment demands that security operations be effectively structured and integrated into all DHS operations. OCSO implements department-wide security programs, policies and standards to safeguard DHS personnel, property, facilities, and information. Priority initiatives include expediting background investigations and granting security clearances; conducting facility security risk assessments; providing security education and awareness training; and issuing guidance on topics ranging from installing physical security equipment to handling classified information. Additionally, the OCSO investigates threats related to foreign intelligence, terrorism, and criminal activities within or directed against DHS.

The OCSO integrates all security disciplines in a manner that increases efficiency and enhances the overall security of the Department. The Office has nine divisions that work together to create an environment that promotes best practices and shares accountability. These divisions are:

- The Administrative Security Division - develops, implements, and oversees policies, programs and standards necessary to safeguard classified and sensitive but unclassified information ensures that all DHS employees are trained to recognize and defend against threats of the Department's personnel, information, and property;
- The Counterintelligence and Investigations Division - protects DHS personnel, information and property from foreign intelligence services, terrorists, and criminals. This division also identifies, analyzes, and defends against espionage directed at DHS and conducts investigations of crimes committed against DHS personnel, property and facilities;
- The Special Security Programs Division - which manages the DHS Sensitive Compartmented Information (SCI);
- The Physical Security Division - protects DHS personnel, controls access to DHS Headquarters facilities, and safeguards against damage and theft;
- The Personnel Security Division - ensures the highest levels of confidence in DHS employee and contractor trustworthiness, loyalty, integrity, and reliability. The division conducts background investigations, makes suitability and security clearance eligibility determinations and provides oversight of personnel security policy throughout the Department;
- The Systems Security Division – is responsible, in collaboration with the Office of the Chief Information Officer for managing the ongoing operations and enhancements to key security-related information systems;

- The Identity Management Division – implement and manage an enterprise-wide DHS HSPD-12 program;
- The Special Access Programs Division - consolidates the management of DHS Special Access Programs (SAPs) under one Department office, and ensures that all DHS SAP compliance activities are controlled and managed in an objective and independent way; and
- The Operations Division - provides an accurate account of the budget, both classified and unclassified. This division ensures coordination of security related budget issues with the DHS Budget Office (Office of the Chief Financial Officer), the Office of National Director of Intelligence (ODNI), the Office of Management and Budget (OMB), the House Appropriations Committee (HAC), and the Senate Appropriations Committee (SAC). The Operations Division also completes procurement actions, which require market research and evaluations so that the government can achieve the best value and executes reimbursable agreements with other government agencies.

**FY 2009 Accomplishments:**

- Security support at State and Local Fusion Centers to ensure that data shared with state and local partners remains secure; and
- Implement HSPD-12, to initiate a transition from a startup to operational mode, and identify and establish minimum security requirements for Federal facilities.

**FY 2010 Planned Accomplishments:**

- Continue to bolster its personnel adjudication process to meet increased Departmental needs;
- Support staffing for a Special Access Program Control Office (SAPCO); and
- Deploy HSPD-12 PIV cards to DHS employees and contractors for use to access secure facilities, communications, and data.

**FY 2011 Planned Accomplishments:**

- Continue to bolster its personnel adjudication process to meet increased Departmental needs; and
- Convert contractors to federal employees.

**Description of Item**

Successful acquisition outcomes are the direct result of having the appropriate personnel with the requisite skills managing various aspects of the acquisition process. Between FY 2000 and FY 2008, acquisition spending by civilian agencies increased by 56% (in inflation-adjusted dollars), while the number of contract specialists grew by only 24%. This increased workload results in less time for effective planning and contract administration and can lead to diminished acquisition outcomes. This lack of capacity and capability in the acquisition workforce - which includes contract specialists, program and project managers, and contracting officer technical representatives - results in tradeoffs during the acquisition lifecycle that may reduce the chance of successful outcomes while increasing costs and impacting schedule.

The President's March 4, 2009 memorandum on Government Contracting required agencies to improve acquisition practices and performance by maximizing competition and value, minimizing risk, and reviewing the ability of the acquisition workforce to develop, manage, and oversee acquisitions appropriately. Subsequent guidance from the Office of Management and Budget, including memorandum M-09-25 *Improving Government Acquisition* issued July 29, 2009, and OFPP's Memorandum of October 27, 2009 *Acquisition Workforce Development Strategic Plan for Civilian Agencies- FY2010-2014*, provided guidance to agencies to strengthen the acquisition workforce and increase the civilian agency workforce by 5% to more effectively manage acquisition performance.

In support of OMB's emphasis on strengthening the Federal acquisition workforce, DHS requests \$24.236M to increase the Department's acquisition workforce capacity and capabilities. The increase will mitigate the risks associated with gaps in either capacity or capability of the acquisition workforce and improve the effectiveness of the workforce. The resources will be used to:

- Increase the capacity of the acquisition workforce by approximately 8% (100 positions) in the contracting functional area and add an additional 50 positions in other acquisition series to include systems engineers, program managers, logisticians, and business cost estimators;
- Expand the acquisition workforce to include Test and Evaluation, Logistics, Systems Engineering, and Business Cost Estimating and further add 50 personnel spread among these series;
- Increase the capability of the acquisition workforce by investing in training to close identified gaps in such areas as project management, negotiations, requirements development, contract management, and other key topics;
- Increase the effectiveness of the acquisition workforce by investing in improvements to systems that support the contracting function;
- Conduct an assessment of options for creating systems to maintain comprehensive acquisition workforce data and selecting the appropriate system; and
- Increase the effectiveness of the Department's centralized acquisition workforce training program comprised of certification, targeted, and continuous learning developmental training opportunities.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The FY 2011 funding request will help ensure:

- The future programmatic growth capacity for training, recruitment, and retention activities while attracting and hiring qualified members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act. These funds allow DHS the ability to train, recruit, and retain at acceptable standards is at risk.
- The expansion of the acquisition workforce to include Test and Evaluation, Logistics, Systems Engineering, and Program Cost Estimating. These funds allow DHS the ability to expand the acquisition workforce is at risk.
- The sustainability and availability of information technology systems and equipment in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.
- The continued expansion of the Acquisition Professional Career Program to a planned three-year end strength of 300 participants by FY 2011, graduating 100 specialists annually. This program is the DHS acquisition succession

management plan that allows the Department to reach the targeted end-strength without jeopardizing the workforce's ability to manage the acquisitions.

**Program Decrease #1:** Contractor Support  
 PPA: Immediate Office of the USM  
 Program Decrease: Positions - 0 FTE - 0 Dollars –(\$128)

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

Program Decrease	-	-	-	-	-	-	-	-	(128)
<b>Total Request</b>	...	...	\$301	...	...	\$433	...	...	<b>\$185</b>

**Description of Item**

The Immediate Office of the Under Secretary for Management's primary mission is to deliver quality administrative support services providing leadership and oversight for all departmental management functions which include information technology, security, budget and financial management, procurement and acquisition, human capital, and administrative services. DHS is proposing to offset the \$128K by reducing services in the program support contract services area.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

In FY 2011, the Immediate Office of USM's budget can absorb the offset due to scaling back contractor support services towards the following tasking:

- Monitoring the GAO High Risk Area corrective action plans that are critical for reducing the Department's susceptibility to fraud, waste, abuse, and mismanagement.
- Supporting the Quadrennial Homeland Security Review with subject matter expertise that considers the strategic role for management functions which most efficiently support DHS component missions and National Security goals.
- Further developing performance management capability and participate in the Department's Performance Improvement Council in order to hold Department-wide management officials accountable for delivered services and operational outcomes.

**Program Decrease #2: Internal Controls**

PPA: Office of the Chief Administrative Officer

Program Decrease: Positions - 0 FTE - 0 Dollars –(\$400)

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	400
Program Decrease	-	-	-	-	-	-	-	-	(400)
<b>Total Request</b>	2	2	\$392	2	2	\$400	...	...	<b>\$0</b>

**Description of Item**

The internal controls group works closely with the CFO Internal Controls team to ensure the proper execution of controls outlined in OMB Circular A-123. This is the circular that defines management's responsibility for internal control in Federal agencies and is the federal government's response to the Sarbanes-Oxley Act of 2002 that specifies internal control requirements for publicly traded companies.

Two FTE from the OCAO liaise between the CFO Office of Internal Controls and the OCAO program offices relative to the development and monitoring of Management Action Plans. In addition, the FTE also assist the Asset Management program office with developing solutions to identify weaknesses within the asset management area.

Currently the internal controls group is focused on the following:

- 1) The FY 2008 Secretary's assurance letter that identified the following material weakness: "Asset and other material oversight and laptop security." The internal controls group is responsible for coordinating the response to and the plan for the resolution of those weaknesses.
- 2) The IG is in the process of issuing a final report on weapons security. The initial out briefs on the investigation indicate there are significant issues with regard to the security of weapons within the components relative to the department having sufficient policies, controls, and monitoring of compliance by several components. The internal controls group is currently involved in working with the IG, HQ Personal Property group, and the field components to implement a plan to resolve the issues that are raised in the IG report.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

OCAO will deal with problem areas that surface through GAO audits or IG investigations as they arise.

**Program Decrease #3:** Eliminate Decision Support & System Development

PPA: Office of the Chief Administrative Officer

Program Decrease: Positions - 0 FTE - 0 Dollars –(\$78)

Program Decrease	-	-	-	-	-	-	-	-	(78)
<b>Total Request</b>	...	...	...	...	...	...	...	...	<b>(\$78)</b>

**Description of Item**

This element supports the deployment of the Environmental Planning Decision Support System (DSS), which has been under development for the past five years. The DSS is a tool that would be used to provide consistent application of Categorical Exclusions throughout the department – (75% of the environmental planning work that is performed in DHS is through the use of categorical exclusions – approximately 30,000 per year), and promotes functional integration of DHS-wide processes. It leverages scarce resources by its accessibility to non-environmentally-trained personnel, and is a tool for personnel to use in-house, rather than contracting for expensive consulting services. Estimated cost avoidances (not using outside contractors) range from 40-70% of document costs (which vary from \$30,000-\$300,000 each depending on the complexity of analysis), and personnel time savings (having a vetted, defined process) range from 50-100% of personnel salaries (vary from GS-12 to GS-15, spending 20-40 hours per document).

The National Environmental Policy Act (NEPA) of 1969 and the National Historic Preservation Act (NHPA) of 1966 require the federal government to consider the impacts of actions on the environment (both natural/human) and historic places. Soon after DHS was formed, a large number of diverse activities were recognized with limited resources that needed this review. Furthermore, government and contractor personnel with diverse training and experience were involved in the reviews. Based on a recommendation from the Environmental Planning and Historic Preservation (EP&HP) Committee, DHS began the development of an automated system to establish a common process to review and document a basic level of NEPA and NHPA project review, as well as share the results among the components. The DSS focuses on determining whether a project may be categorically excluded from more extensive review under NEPA - a process occurring over 30,000 times a year in DHS.

The Environmental Planning and Historic Preservation DSS is used to provide consistent application of Categorical Exclusions (CATEXs) throughout the department. It documents the uses of CATEXs, and acts as a starting point for formal environmental assessments leading to a “Finding of No Significant Impact” or “Environmental Impact” statements. The system uses decision-tree logic to guide users through a basic

environmental planning and historic preservation review. At the end the user is advised if a CATEX can be used for the proposed action or if more extensive review is needed.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

The implementation of the software modifications will be delayed and the deployment schedule will be postponed to absorb the offset.

**Program Decrease #4:** Eliminate Environmental Planning and Historic Preservation (EP & HP) Program Management Support  
 PPA: Office of the Chief Administrative Officer  
 Program Decrease: Positions - 0 FTE - 0 Dollars –(\$160)

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	...
Program Decrease	-	-	-	-	-	-	-	-	(160)
<b>Total Request</b>	...	...	...	...	...	...	...	...	<b>(\$160)</b>

**Description of Item**

The Environmental Planning and Historic Preservation Program Management Support, is a contract effort that ensures DHS-wide compliance with over 80 laws and executive orders, and hundreds of associated regulations. For example, some of the laws include:

- National Environmental Policy Act
- Flood Plain Management Act
- Clean Air Act
- Clean Water Act
- Risk and vulnerability requirements related to protection of physical infrastructure

DHS HQ Environmental Planning directly supports DHS mission activities such as law enforcement operations, training, regulatory policy development, grant programs, asset management, and research and development efforts.

The Historic Preservation Program ensures compliance with 13 laws and executive orders, with many associated regulations, relevant to historic preservation and cultural resources management. Among the requirements are:

- National Historic Preservation Act
- Native American Graves Protection and Repatriation Act
- Archeological Resources Protection Act
- American Indian Religious Freedom Act
- Abandoned Shipwreck Act

In particular, the NHPA requires federal agencies to study the consequences of a proposed action on historic properties, including Native American sites, while

simultaneously providing the general public with a means to legally enjoin the federal government from taking that proposed action. In addition, the new Executive Order 13423 - Strengthening Federal Environmental, Energy and Transportation Management - and Executive Order 13287 – Preserve America - also further emphasize the importance of considering the potential for adverse effects on historic properties in the development of federal programs and activities. This E.O. requires the establishment of organizational processes and systems to continually emphasize the objective of minimizing the impact of federal activities.

The Historic Preservation Program ensures that new and existing DHS asset management and grant programs comport with the requirements of law and public policy established for the preservation of historic properties, including Native American sites. The DHS HQ Historic Preservation Program supports DHS activities such as law enforcement operations, grant programs, regulatory policy development, and asset management. This program supports public assistance grants for the Gulf Coast Recovery efforts, Headquarters Consolidation at St. Elizabeths, management of historic border stations, the REAL ID rulemaking, the NBAF (\$450M construction project), SBI and SBIInet.

Reliability is ensured through centralized oversight of related program performance in components, representation of DHS interests with external regulators, maintaining functional competencies among component staff, and consistent requirements in unified department-wide policies and procedures. Cost efficiency is gained through standardized procedures, identification and dissemination of best practices. Timely support is provided by integration of program requirements into the planning and development phases of component level activities. This environmental planning and historic preservation program reduces risk of legal liabilities and enhances relations with the stakeholders and communities where DHS operates. For example, the contract effort supported:

- A program to lease out historic lighthouse properties, negotiated with consultation from DHS HQ, providing the maintenance and preservation of these properties by qualified organizations at no cost to the federal government.
- The Gulf Coast Recovery effort as DHS HQ negotiated, with the Advisory council on Historic Preservation, an expedited review process for properties to be demolished enabling the historic preservation review to occur at a rate of an unprecedented 120 properties per hour. An expedited historic preservation review effort in St. Bernard and Plaquemines Parishes cleared over 7,300 properties in less than 15 days.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

No performance results will be demonstrated as this program is being eliminated. However, human capital resources will be redirected to other priority projects within the OCAO.

**Program Decrease #5:** Eliminate Technical & Program Support  
 PPA: Office of the Chief Administrative Officer  
 Program Decrease: Positions - 0 FTE - 0 Dollars –(\$300)

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	...
Program Decrease	-	-	-	-	-	-	-	-	(300)
<b>Total Request</b>	...	...	...	...	...	...	...	...	<b>(\$300)</b>

**Description of Item**

Within the DHS HQ Environmental Planning, NEPA is the only law that requires federal agencies to study the consequences of a proposed action on the surrounding human and natural environment, while simultaneously providing the general public with a means to legally enjoin the federal government from taking that proposed action. In addition, a new Executive Order 13423 - Strengthening Federal Environmental, Energy and Transportation Management – was issued in 2007 to further emphasize the importance of considering the potential for adverse effects to communities, public health, and the natural environment in the development of federal programs and activities. This E.O. requires the establishment of organizational processes and systems to continually emphasize the objective of minimizing the impact of federal activities on the environment.

The DHS HQ Environmental Planning Program minimizes impediments to mission execution. Reliability is ensured through oversight of related program performance in components, representation of DHS interests with external regulators and White House organizations (e. g., the Office of the Federal Environmental Executive, Council on Environmental Quality, Environmental Protection Agency, and the Department of the Interior), maintaining functional competencies among component staff and establishing consistent requirements in unified department-wide policy and procedures. Cost efficiency is gained through standardized procedures, identification and dissemination of best practices and automated systems for decision support and knowledge dissemination. Timely support is provided by integration of legal and policy requirements into the planning and development phases of component level activities, where the most effective accommodation is offered through the provision of automated decision support capabilities. This program functions to reduce risk of legal liabilities, lower long term operating costs and enhance relations with the stakeholders and communities where DHS operates.

Following are examples of DHS HQ Environmental Planning Program support:

- In the Gulf Coast Recovery effort, over 20,000 applications for public assistance have received environmental review. Through the use of cost effective

programmatic review processes, environmental review for temporary housing sites in Mississippi enabled the processing of over 57 site-specific applications in approximately two months, compared to site-by-site environmental review used elsewhere that can add 4-6 months of time to the processing of each application. Alternative arrangements (negotiated by DHS HQ) for the expeditious processing of grants for the recovery of 126 public schools in Orleans Parish have enabled two to four month environmental review processes, where up to 18 months may have been necessary under standard review processes.

- For the construction of border infrastructure, the identification of potential adverse effects on communities and natural resources through environmental planning (as standardized and over sighted by DHS HQ) resulted in a \$280M cost saving project change, reducing an estimated \$400M construction cost of border infrastructure between Yuma and Douglas, Arizona, to about \$120M.
- Through expedited procedures, about 90% of disaster mitigation grants, that might typically require 6-9 months for extensive environmental review, are categorically excluded, resulting in an average of 4 days of environmental review per grant application.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

No performance results will be demonstrated as this program is being eliminated.

**Program Decrease #6:** Eliminate System Administration for EP & HP

PPA: Office of the Chief Administrative Officer

Program Decrease: Positions - 0 FTE - 0 Dollars –(\$110)

Funding Profile

Program Decrease	-	-	-	-	-	-	-	-	(1,479)
<b>Total Request</b>	...	...	\$5,500	...	...	\$5,700	...	...	<b>\$5,521</b>

**Description of Item**

The acquisition workforce centralized training program benefits the entire acquisition workforce across all Department components. It is anticipated that the FY 2011 funding will continue ongoing efforts started in FY 2010 and prior years. The centralized training program includes all certification, continuous learning and acquisition specific targeted training through partnerships with the Defense Acquisition University, the Federal Acquisition Institute and commercial vendors. For FY 2010, the training program will provide:

- Over 7000 seats in 260 commercial vendor classes;
- In partnership with the Defense Acquisition University:
  - 923 quota allocations for classes (FY2010) across all acquisition career fields in Defense acquisition courses;
  - Training delivery in the Program Management 100 level certification courses (HSAC101 and HSPM102);
  - Continuous curriculum update of these 100 level courses;
  - Curriculum development of 2 X 200 level certification courses (HSAC201 and HSPM250);
  - Curriculum development of the 300 level certification courses (HSPM350);
  - Special set aside of a full DHS class section (30 students) of PMT352B, the 5 week DoD resident course, which meets DHS training requirements for level III certification;
  - Curriculum development of a 400 level course targeted for flag and SES ranks; and
  - The phased approach of a centralized registration system that will streamline the registration process, allow the Department to manage and forecast training needs more accurately, and prioritize students by urgency of needs.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

To accommodate the \$1.479M reduction in resources, the availability and enrollment in centralized training programs and acquisition workforce certifications across the following career fields will be scaled back: Test and Evaluation, Logistics, Systems Engineering and Business Cost Estimating and Financial Management.

**Program Decrease #9:** Acquisition Program Management Division (APMD) Contractor Support PPA:  
Office of the Chief Procurement Officer  
 Program Decrease: Positions - 0 FTE - 0 Dollars -(\$1,846)

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	15,436
Program Decrease	-	-	-	-	-	-	-	-	(1,846)
<b>Total Request</b>	18	9	\$3,100	38	38	\$13,635	38	38	<b>\$14,027</b>

**Description of Item**

The Acquisition Program Management Division provides the acquisition policy and oversight for DHS acquisition programs. Specifically, the team creates the DHS process for review and analysis of each major program, provides support and assistance for programs before exceeding budget or falling behind schedule. The team also creates a structure to ensure that DHS acquires the correct capability to meet its investment and acquisition decisions, performs oversight of program execution (conceptualization, initiation, design, development, test, contracting, production, deployment, logistics support, modification, and disposal), performs detailed review of major programs, provides advice and counsel to program management offices, and establishes acquisition policies and procedures.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

The offset will be absorbed by contractor support services. Contractor support services funding provides unique acquisition support from the Homeland Security Systems Engineering and Development Institute (SEDI), the Studies and Analyses Institute (SAI), and Federally Funded Research and Development Centers (FFRDC) analysts. APMD FFRDC support will be maintained by 10 contractors.

The major programs will be reviewed biannually throughout FY 2011.

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
Departmental Management and Operations  
Under Secretary for Management  
Justification of Proposed Changes in Salaries and Expenses  
Appropriation Language**

For necessary expenses of the Office of the Under Secretary for Management, as authorized by sections 701 through 705 of the Homeland Security Act of 2002 (6 U.S.C. 341 through 345), \$242,733,000, of which not to exceed \$3,000 shall be for official reception and representation expenses: Provided, That of the total amount, \$5,500,000 shall remain available until expended solely for the alteration and improvement of facilities, tenant improvements, and relocation costs to consolidate Department headquarters operations at the Nebraska Avenue Complex; and \$17,641,000 shall remain available until expended for the Human Resources Information Technology program.

For an additional amount for the Office of the Under Secretary for Management, \$24,235,700, to increase the Department's acquisition workforce capacity and capabilities: Provided, That such funds may be transferred by the Secretary to any other account in the Department to carry out the purposes provided herein: Provided further, That such transfer authority is in addition to any other transfer authority provided in this Act: Provided further, That such funds shall be available only to supplement and not to supplant existing acquisition workforce activities: Provided further, That such funds shall be available for training, recruitment, retention, and hiring additional members of the acquisition workforce as defined by the Office of Federal Procurement Policy Act, as amended (41 U.S.C. 401 et seq.): Provided further, That such funds shall be available for information technology in support of acquisition workforce effectiveness or for management solutions to improve acquisition management.

### PPA Mission Statement

The Immediate Office of the Under Secretary of Management (USM) ensures the Under Secretary for Management offices function effectively and efficiently in support of both the Department as a whole and the USM offices itself. The requested funding will allow the USM to manage the workload of the offices, respond quickly to queries from within and outside the Department, and further efforts for functional integration.

**Summary Justification and Explanation of Changes**

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>

**PPA Mission Statement**

Administrative Services establishes policy and procedures as well as provides both departmental leadership and oversight for all functional areas managed by the DHS Chief Administrative Officer (CAO) and Component Chief Administrative Officers. Functional areas include asset management (logistics, real estate, personal property, aviation, transportation, fleet, marine vessels), mail screening and delivery, occupational safety and health, environmental planning and management, historic preservation, energy management, records, directives, forms, library services, printing and graphics. In addition, OCAO also provides the day to day operational support for the departmental headquarters through our Administrative operations Branch and the start up components (I&A, NPPD, OPS, DNDO and S&T).

**PPA Mission Statement**

Nebraska Avenue Complex (NAC) - Headquarters facility for DHS. DHS presence at the Nebraska Avenue continues to expand as well as at other locations to meet current demand. Although the physical limitations of the NAC render it unsuitable as the permanent DHS headquarters, the facility at the NAC must sustain the operational capabilities for effective mission execution until the new consolidated headquarters at St. Elizabeths is constructed. The current facility at the NAC is an integral part of the Headquarters Consolidation Program. Current services investments will be leveraged for future use of the NAC to house certain mission support functions that do not relocate to St. Elizabeths.

**Summary Justification and Explanation of Changes**

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Transportation of Things</b>	\$334	\$0	\$0	\$0

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. There is no FY 2011 request.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Advisory and Assistance Services</b>	\$0	\$200	\$0	(\$200)

Advisory and Assistance Services for the NAC include the NAC portion of a Professional Services Contract for professional construction project and facility managers to support ongoing maintenance and renovation, as well as the reconfiguration, new construction, campus-wide security and electrical upgrades, and other facility maintenance and expansion issues. This category also includes the NAC portion of the Move Management contract that supports moves, relocations and reconfigurations, as well as a manager for the warehouse on campus - so that furniture and equipment can be re-used to the maximum ability, instead of purchasing new. Effective project management and oversight generally results in cost avoidance, and avoid costly errors and omissions. The FY 2011 Request includes an decrease of \$200,000 in support contracts.

**PPA Mission Statement**

Office of the Chief Procurement Officer (OCPO) establishes the acquisition regulations, policies and procedures for DHS. It oversees the Department's acquisition programs and assists the acquisition community with implementing difficult and complex procurements to reduce risk and ensure success. OCPO has implemented a centrally funded and managed Acquisition Professional Career Program modeled after the highly successful Navy Intern Program. This program features three, single year rotations through various components and provides these Interns with all the experience and training they need to become journeymen level acquisition professionals. Additionally, OCPO strategically sources common items across DHS to create more efficient procurements, manage DHS' competitive sourcing actions, and reports externally on DHS progress. OCPO is also responsible for acquisition workforce planning, centralized acquisition workforce recruitment, training; and manages the Acquisition Professional Career Program (APCP).

**Summary Justification and Explanation of Changes**

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Salaries and Benefits</b>	<b>\$18,035</b>	<b>\$49,753</b>	<b>\$71,093</b>	<b>\$21,340</b>

Salaries and Benefits total \$71,093,000 for 604 FTP/ 554 FTE. This represents an increase over FY2010 payroll costs for inflation and annualizations. The FY 2011 request will cover the cost of additional FTE for the Acquisition Professional Career Program (APCP) and APMD which will bolster the Acquisition Workforce.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Travel</b>	<b>\$252</b>	<b>\$290</b>	<b>\$537</b>	<b>\$247</b>

Travel funds in the amount of \$537,000 are sufficient to cover costs associated with formal and certification training, site visits, acquisition review boards and other programmatic travel requirements for annualized FTE and the new FTE from increasing the Acquisition Workforce. This reflects a change of \$247,000 over the FY2010 funding level.

	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>GSA Rent</b>	<b>\$1,342</b>	<b>\$3,000</b>	<b>\$5,400</b>	<b>\$2,400</b>

There is sufficient funding available in the amount of \$5,400,000 to cover rent expenses for FY2011. Funding increases in FY 2011 reflect expected increases in rent. This is a change of \$2,400,000 above FY 2010.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Printing</b>	<b>\$28</b>	<b>\$34</b>	<b>\$37</b>	<b>\$3</b>

Funding in the amount of \$37,000 is sufficient to cover printing costs for FY2011. The FY2011 request is \$3,000 more than FY 2010 and will cover the anticipated increased cost for this shared service.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Advisory and Assistance Services</b>	<b>\$1</b>	<b>\$1</b>	<b>\$1</b>	<b>\$0</b>

Advisory and Assistance Services include services acquired by contract from non-Federal sources (that is the private sector, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Funding for Advisory and Assistance Services does not include an increase in the FY 2011 request. The total amount will remain at \$1,000.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Other Services</b>	<b>\$15,963</b>	<b>\$10,889</b>	<b>\$13,721</b>	<b>\$2,832</b>

The FY 2011 request of \$13,721,000 includes funding for the centralized training program which provides acquisition training to all DHS personnel and \$1.3 M in associated contract support. The FY 2011 request is \$2,832,000 more than the FY2010 funding level.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Purchase from Government Accounts</b>	<b>\$2,994</b>	<b>\$3,862</b>	<b>\$7,592</b>	<b>\$3,730</b>

In accordance with A-11, this category is appropriate to reflect the funding for the Acquisition Program Management Division in acquiring acquisition support from the Systems Engineering & Development Institute (SEDI), the Studies & Analysis Institute, and Federally Funded Research & Development Centers (FFRDC). This funds critical, unique acquisition support necessary for the review of 67 major programs considered critical to the DHS mission. The FY 2011 request is \$3,730,000 more than the FY 2010

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Operation &amp; Maintenance of Facilities</b>	<b>\$39</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>

Operation & Maintenance of Facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. There is no FY 2011 request.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Medical Care</b>	<b>\$12</b>	<b>\$0</b>	<b>\$12</b>	<b>\$12</b>

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. There is an increase in medical care costs to accommodate the increase in staff.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Supplies &amp; Materials</b>	<b>\$402</b>	<b>\$339</b>	<b>\$500</b>	<b>\$161</b>

The FY 2011 request of \$500,000 to support all OCPO personnel and any additional requirements for the Office of Selective Acquisitions. The increase of \$161,000 is associated with the requirements of bolstering the Acquisition Workforce.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Equipment</b>	<b>\$0</b>	<b>\$370</b>	<b>\$870</b>	<b>\$500</b>

Funding for new equipment is requested in the amount of \$870,000 for the systems and equipment required for the enhancement of the Acquisition Workforce. This funding ensures the proper infrastructure is in place and maintained by increasing \$500,000 from the FY 2010 level.

**PPA Mission Statement**

The mission of the Office of Security is to secure the Department so the Department can secure the homeland. The Office of Security implements security programs that safeguard DHS personnel, property, facilities, and information. The Office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; and provides security support to DHS Components. Additionally, the Office investigates threats related to foreign intelligence, terrorism, and criminal activities within or directed against DHS.

**Summary Justification and Explanation of Changes**

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Salaries and Benefits</b>	\$18,648	\$18,932	\$38,705	\$19,773

The FY 2011 request includes an increase in salaries and benefits of \$19,773,000. The request includes the annualizations of 14 FTEs, and an additional 72 FTP/FTE due to increase of federal staff through the reduced reliance on contractors.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Travel</b>	\$318	\$445	\$452	\$7

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal Travel Regulations. The FY 2011 request includes anticipated travel costs and reflects a \$7,000 change from FY2010.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Transportation of Things</b>	\$0	\$532	\$541	\$9

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2011 request includes \$9,000 more than FY2010 for the projected costs associate with this object class.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>GSA Rent</b>	\$3,107	\$4,105	\$4,174	\$69

GSA Rent estimates all payments to General Services Administration (GSA) for rental of space and rent related services. The FY2011 request includes an increase of \$69,000 for projected rent costs for the office

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Other Rent</b>	\$33	\$0	\$0	\$0

Other Rent includes all payments to a non-Federal source for rental space, land, and structures. There is no anticipated costs for this object class in FY2011

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Communication, Utilities, and Misc. Charges</b>	\$0	\$2,405	\$2,435	\$30

Communications, utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2011 request includes an increase of \$30,000 for anticipated costs.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Printing</b>	\$46	\$85	\$87	\$2

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2011 request includes an increase of \$2,000 for non pay inflation.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Advisory and Assistance Services</b>	\$316	\$55,811	\$17,487	(\$38,324)

Advisory and Assistance Services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY2011 request includes a reduction of \$38,324,000 in contractor support due to the reallocation of resources to fund an increased federal staff.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Other Services</b>	<b>\$8,678</b>	<b>\$951</b>	<b>\$951</b>	<b>\$0</b>

Other Services include report contractual services with non-Federal sources that are not otherwise classified. The FY 2011 request is the same as in FY 2010.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Purchases from Government Accounts</b>	<b>8,678</b>	<b>\$3,770</b>	<b>\$3,799</b>	<b>\$29</b>

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2011 request includes \$29,000 for non pay inflation.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Operation &amp; Maintenance of Facilities</b>	<b>\$11</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>

Operation & Maintenance of Facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. There is no FY 2011 request.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Medical Care</b>	<b>\$27</b>	<b>\$0</b>	<b>\$24</b>	<b>\$24</b>

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2011 request includes \$24,000 more than FY 2010 for anticipated costs associated with this shared service.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Operation &amp; Maintenance of equipment</b>	<b>\$415</b>	<b>\$498</b>	<b>\$498</b>	<b>\$0</b>

Operation & Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2011 request is the same as in FY 2010.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Supplies &amp; Materials</b>	<b>\$286</b>	<b>\$303</b>	<b>\$303</b>	<b>\$0</b>

Supplies & Materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2011 request is the same as in FY 2010.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Equipment</b>	<b>\$830</b>	<b>\$2,356</b>	<b>\$3,408</b>	<b>\$1,052</b>

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2011 request is for additional costs anticipated.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **I. Appropriation Overview**

#### **A – Mission Statement for the DHS HQ Consolidation:**

The DHS HQ Consolidation Project is responsible for the collocation and consolidation of the Department through the lease consolidation and build out of the St. Elizabeths campus. The DHS Management Directorate provides the coordination, planning, policy, guidance, operational oversight and support, and innovate solutions for the management needs of the entire Department for the One DHS campus.

The Department is requesting a new appropriation for this activity separate from the current appropriation for the Under Secretary for Management (USM). The DHS HQ Consolidation will provide the Department, the Office of Management and Budget (OMB), and Congress with improved visibility of the ongoing efforts for establishing a central DHS facility. Additionally, the new appropriation will allow the Department to facilitate better reporting and overall management of the program.

#### **B – Budget Activities:**

##### **DHS Headquarters Consolidation – Mission Support**

As part of the DHS National Capital Region Housing Master Plan, and in an effort to achieve a “One DHS” culture, the Department will consolidate existing leases of components that provide mission support functions from 46 locations to approximately eight with the appropriate Interagency Security Committee (ISC) criteria. This project is very important to the overall plan as 82% of the existing leases are expiring before 2015.

##### **DHS Headquarters Consolidation – St. Elizabeths**

With facilities dispersed over more than 46 locations throughout the National Capital Region, many with sub-optimal security protections, DHS will continue the development of the DHS Headquarters Consolidation at the St. Elizabeths Campus to house executive leadership, operations coordination, and policy and program management functions in a secure setting. This integrated approach will allow DHS to effectively communicate and engage in critical events as they occur and share such information to help secure America.

#### **C – Budget Request Summary:**

The Under Secretary for Management requests 0 positions, 0 FTE, and \$362.8M for FY 2011. The FY 2011 request includes program enhancements for the following projects:

- Support the consolidation of mission support elements not re-locating to the St. Elizabeths Campus. (0 positions, 0 FTE, and \$75M)
- Support the consolidation of DHS Headquarters to the St. Elizabeths campus. (0 positions, 0 FTE, and \$287.8M).

**II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)**

<b>2011 Total Request</b>	...	...	75,000
Total Change 2010 to 2011	...	...	75,000

The Under Secretary for Management requests \$75M for the DHS HQ Consolidation Mission Support Project. This request will allow for the consolidation of leases for the Department in accordance with the “One DHS” culture.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The DHS Headquarters Consolidation Project does not have current services funding for FY 2011.

**FY 2009 Accomplishments**

Developed the Department of Homeland Security (DHS) National Capital Region (NCR) Housing Master Plan to provide the strategic vision for facilities that support a unified department, organizational structure, operations and culture. The plan proposes to consolidate the remaining functions not relocating to St. Elizabeths to enhance performance across the spectrum of operations, through improved communications and coordination among all DHS Headquarters components:

- Developed a migration plan that consists of two phases for efficiently consolidating the leases at the lowest cost, the fewest locations possible and the fewest moves required; and
- Prepared and coordinated a 1.2 million rentable square feet (RSF) prospectus for lease authority to OMB.

**FY 2010 Planned Accomplishments**

- Develop the procurement plan for leasing the necessary office space for consolidation;

**FY 2011 Planned Accomplishments**

- Complete the acquisition of the leased space; and
- Complete the design and construction of phase 1; and  
Begin the design for phase 2.

**PPA: DHS HQ Consolidation – St. Elizabeths**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	...	...	...

<b>2011 Total Request</b>	...	...	287,800
Total Change 2010 to 2011	...	...	287,800

The Under Secretary for Management requests \$287.8M for the DHS HQ Consolidation St. Elizabeths Project. This request will continue the build out of the St. Elizabeths campus.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The DHS Headquarters Consolidation Project does not have any current services funding for FY 2011.

**FY 2009 Accomplishments**

The FY 2009 appropriations bill and the American Recovery and Reinvestment Act initiated the execution phase of the St. Elizabeths development as the DHS Consolidated Headquarters Campus:

- With GSA, awarded the Design-Build Bridging Contract for the U. S. Coast Guard (USCG) Headquarters Building to Clark Design-Build, LLC of Bethesda MD (Clark Construction) with a total value of \$435.381M.
- Successfully concluded the planning, National Environmental Policy Act (NEPA), and Section 106 processes and received National Capital Planning Commission Approval for the St. Elizabeth’s Master Plan;
- Participated in the General Services Administration (GSA) Design Excellence Source Selection Panel for two Architectural Firms to design the remaining phases of development of the campus (one A/E to design Adaptive Reuse and the national

Operations center/Collocation of Component operations centers and one A/E to design the remaining new construction on the campus);

- Initiated the initial programming tasks for the National Operations Center (NOC) and Collocation of Component Operations Center Design effort;
- Initiated initial programming tasks for the FEMA Headquarters design; and

#### **FY 2010 Planned Accomplishments**

DHS will continue execution phase of the St. Elizabeths development as the DHS Consolidated Headquarters Campus as follows:

- Commence site development, complete design and commence construction of the USCG Headquarters Building and garage facility;
- Complete design of remaining Phase 1B shared use and special purpose facilities and award construction contracts for this development;
- Complete design of the NOC & Collocation of Component Operations Centers;
- Complete design of FEMA Headquarters Building; and
- Initiate design of the DHS Headquarters.

#### **FY 2011 Planned Accomplishments**

Currently there is no base funding in FY 2011 for the DHS HQ Consolidation Project. The FY 2011 request will continue the execution of the St. Elizabeths development for the DHS Consolidated Headquarters Campus as follows:

- Continuing Phase 1A and Phase 1B construction activities to meet the expected FY 2013 completion date;
- Procuring outfitting for the USCG Headquarters Building and special purpose spaces to meet an FY 2013 completion;
- Commencing Phase 2 Construction of the NOC/Collocation of Component Operations Centers, FEMA and the DHS Headquarters to meet an FY 2014 completion; and
- Continuing with campus infrastructure development

## IV. Program Justification Changes

### Department of Homeland Security Departmental Management and Operations DHS HQ Consolidation

#### Justification of Program Changes (Dollars in Thousands)

**Program Increase #1:** DHS HQ Consolidation – Mission Support  
**PPA:** DHS HQ Consolidation Project – Mission Support  
**Program Increase:** Positions - 0 FTE - 0 Dollars -\$75,000

#### Funding Profile

#### Description of Item

The Department of Homeland Security (DHS) National Capital Region (NCR) Housing Master Plan was developed to provide the strategic vision for facilities that support a unified department, organizational structure, operations and culture. The Plan was submitted to Congress on October 25, 2006 as required by Public Law 109-295. The plan outlines priorities of implementation and addresses the mission fragmentation caused by the Headquarters (HQ) elements being located in over 46 locations throughout the NCR.

To meet the component office space requirements through FY 2011 for headquarters facilities, the department will require about 8 million gross square feet (GSF) of office space in the NCR. While St. Elizabeths will accommodate the main Department and component HQ mission execution functions, it does not have the capacity to accommodate all of the DHS mission support elements. The DHS NCR Housing Master Plan proposes to consolidate the mission support elements that are currently dispersed throughout the NCR to support functional integration, improving the effectiveness and efficient management of the real estate portfolio.

#### Justification

The Department of Homeland Security (DHS) mission is to lead a unified national effort to secure America. Yet the Department's legacy facilities are dispersed throughout the

National Capital Region (NCR) with sub-optimal security protections that negatively impact critical communication, coordination, and cooperation across DHS components.

The Department will consolidate the mission execution functions of executive leadership, operations coordination, policy development and program management in an Interagency Security Committee (ISC) Level 5 secure campus setting at St. Elizabeths and the remaining mission support functions off campus in facilities that achieve the appropriate ISC criteria. Mission support consolidation will reduce the Department's overall security risk while improving response capability. It will also lower the total number of locations that house DHS components from 46 to approximately eight and incorporate the fact that more than 82% of the existing leases are expiring before FY 2015. In the first phase of the new lease alone, DHS will consolidate 15 leases in 500,000 RSF housing 5,140 employees. It will reduce fragmenting of component business units, standardize the work environment and improve communication and coordination across all DHS Headquarters. Consolidating aims to foster a "one-DHS" culture will optimize prevention and response capabilities across the spectrum of operations. The Mission Support consolidation plan has the potential to achieve over \$400M Net Present Value (NPV) savings/cost avoidances. It minimizes vacancy risk, short term lease extensions and multiple move requirements and forms the basis of the FY 2011 budget request.

DHS currently has over 10 space requests pending with GSA to accommodate existing requirements within the NCR that already exceed the capacities of the department's real estate portfolio. These requests, coupled with the existing 46 locations, have the potential to further exacerbate the challenges to the effective and efficient management of the portfolio in support of operations and integration. Without consolidation, as organizations mature and new program requirements develop, space requests will continue to be addressed with limited opportunities for strategic realignments and result in the lease renewals in an uncoordinated manner at higher overall costs and miss the opportunity to leverage existing federally owned and occupied locations. It is beneficial to gain from the opportunity to replace the large volume of expiring leases in a coordinated manner with the St. Elizabeths effort that takes financial advantage of the current depressed real estate market.

DHS plans to lease 1.2 million RSF of space with a two phase implementation schedule in calendar years 2013 and 2014. In cooperation with DHS and OMB, a Mission Support Consolidation Prospectus for lease authority was submitted by GSA to Congress on October 18, 2009 that will address the department's current housing needs through FY 2011. The prospectus is for leased office space and GSA will pass all cost to DHS and therefore, GSA will not request an appropriation. The FY 2011 request of \$75M initiates the project by funding the leasing for phase 1. The current schedule developed by GSA for this initiative is:

- Advertise – March 2010
- Offers Due – May 2010
- Source Selection Evaluation – September 2010
- Lease Signatures – March 2011

- Final Lease Award – June 2011
- Phase 1 & 2 Design and Phase 1 Construction Complete – July 2013
- Phase 1 Move-In – August/September 2013
- Phase 2 Construction Complete – July 2014
- Phase 2 Move-In – August/September 2014

Phase 1 of the new lease will consolidate 15 leases in 500,000 RSF housing 5,140 employees; part of Citizen Immigration Services (CIS) (2,154 seats), elements of the Undersecretary for Management (USM) (2,357 seats) and all of Science and Technology (S&T) (629 seats). Phase 2 will house the remainder of CIS.

GSA’s Pricing Guide requires tenant agencies to fully fund tenant improvements (TI). Tenant improvements are the finishes and fixtures that typically take space from the “shell” condition to a finished, usable condition. GSA provided the estimated TI for the mission support consolidation which is listed in the table below. DHS will request the remaining funding in future year budgets to complete the phase 2 improvements and for procurement and installation of fixtures, furnishings, deployment costs and IT/Telecom equipment requirements.

<b>Mission Support Project Requirement</b>	<b>FY 2011</b>
Tenant Improvements (Facilities)	\$49,450,000
Tenant Improvement (Security)	\$25,000,000
New Campus SCIF	\$550,000
<b>Total FY 2011 Request Mission Support Consolidation</b>	<b>\$75,000,000</b>

The Mission Support consolidation will also contribute to a reduction in facility operation and maintenance costs and provide quality of life features, as well as other amenities to attract and retain the best professional workforce. It is a foundation for developing a culture of success for DHS to achieve its mission. All new leased space will achieve administration and DHS sustainability goals for Leadership in Energy and Environmental Design (LEED).

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The status quo will continue to impact the effective communications and coordination among the headquarters and components due to the increasingly scattered nature of the portfolio. Without the requested funds it will be more difficult for DHS to operate as an integrated organization, and responses to natural disasters or terrorist attacks will not be as coordinated because the facilities will not be aligned to support effective mission execution. Due to lack of existing funds, as organizations mature and new program requirements develop, space requests will continue to be addressed with limited opportunities for strategic realignments, further resulting in uncoordinated lease renewals at higher overall costs estimated at over \$400M on a net present value basis. The Department identified the implementation of the DHS National Capital Region Housing Master Plan and the creation of a unified departmental headquarters as one of the top initiatives critical to establishing a common identity, supporting teamwork and a unified

culture. The joint funding of the Mission Support consolidation and the St. Elizabeths West Campus development will ensure the program is executed effectively.

(Dollars in Thousands)

**Program Increase #2:** DHS HQ Consolidation – St. Elizabeths Project  
**PPA:** DHS HQ Consolidation Project – St. Elizabeths  
**Program Increase:** Positions - 0 FTE - 0 Dollars -\$287,800

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	-
Program Increase	-	-	-	-	-	-	-	-	287,800
<b>Total Request</b>	...	...	...	...	...	...	...	...	<b>\$287,800</b>

**Description of Item**

The request of \$287.8M will continue the development of the DHS Consolidated Headquarters at St. Elizabeths on schedule and continue to be synchronized with the GSA funding request and performance. GSA Pricing Policy requires shared responsibility for federal office space development with the customer agencies responsible to fund specific tenant build out requirements, including outfitting and move costs.

**Justification**

The DHS mission is to lead a unified national effort to secure America. The mission demands an integrated approach to all hazards. Yet the Department’s legacy facilities are dispersed over more than 46 locations throughout the National Capital Region (NCR), sometimes with sub-optimal security protections and routinely impacting adversely critical communication and coordination across DHS components. To support the incident management and command-and-control requirements of the DHS mission, the Department will continue development of the DHS Consolidated Headquarters at St. Elizabeths Campus to house executive leadership, operations coordination, policy and program management functions in a secure setting.

Consolidation will allow the strategic realignment of the portfolio to more effectively and efficiently support the mission as organizations mature and new program requirements develop. In addition, consolidation will contribute to reduced facility costs, provide quality work space and other amenities to attract and retain the best professional workforce.

The request of \$287.8M maintains the Phase 1 construction of the USCG Headquarters on target for a FY 2013 completion date and initiates construction of the Phase 2A DHS Headquarters, and the National Operations/Collocation of Component Operations Centers immediately adjacent to the USCG site.

Phase 2A construction elements overlap with the Phase 1 site, requiring a seamless integration of this phase in order to avoid significant adverse impacts to costs and schedule between the phases due to site disturbances, conflicts, and loss of construction efficiency opportunities. At a funding level of \$287.8M, the DHS Consolidated Headquarters 3-Phase development plan remains on schedule with Phase 1 occupancy (USCG) planned for FY 2013, Phase 2 occupancy (DHS HQ, NOC/Collocation of Component Operations Centers, FEMA) planned for FY 2014 and Phase 3 occupancy (TSA, CBP, ICE, USCIS, USSS, S&T, DNDO) planned for FY 2016.

<b>Phase 1 Items</b>	<b>FY 2011</b>
Fee: GSA Management Fee (MI)	\$998

<b>Phase 2 Items</b>	<b>FY 2011</b>
Fee: GSA Management Fee (MI)	\$9,210
Construction (Tenant Buildout of Office space + Signage)	\$55,785
Construction (Tenant Buildout of Special/Classified/SCIF/Secret + Generator)	\$106,614
Construction (Tenant Buildout of IT infrastructure)	\$76,181
Construction (Tenant Buildout of Security infrastructure)	\$13,768
Total Design & Construction	\$261,559
Fee: GSA RWA fee	\$10,499
<b>Net phase 2 subtotal w/ GSA RWA fee</b>	<b>\$272,058</b>
<b>Build-out portion included in GSA budget request for Tenant Improvement Allowance</b>	<b>\$(55,444)</b>
<b>Net Phase 2 subtotal - (subtract out the Tenant Improvement Allowance)</b>	<b>\$216,613</b>
<b>Phase I and II Total FY 2011 Budget Request</b>	<b>\$287,800</b>

**Impact on Performance (Relationship of Increase to Strategic Goals)**

This funding request directly supports the Department’s strategic goal to Strengthen and Unify DHS Operations and Management. Continued development of the DHS Consolidated Headquarters at St. Elizabeths will allow the Department to enhance performance through improved communications and coordination across all DHS Headquarters units. Consolidating will foster a “one-DHS” culture and optimize prevention and response capabilities across the spectrum of operations.

**PPA Mission Statement**

The DHS mission is to lead a unified national effort to secure America. The lessons learned from Hurricane Katrina and the Second Stage Review reinforced the critical requirement that DHS operate with increased integration to prepare for and respond to natural disasters or terrorist attacks. Our mission demands this approach to all hazards. Yet the Department's legacy facilities are dispersed over more than 40 locations and more than 80 buildings throughout the National Capital Region (NCR), sometimes with sub-optimal security protections and routinely impacting adversely critical communications, coordination, and cooperation across DHS components. To support the incident management and command-and-control requirements of our mission, the Department will consolidate executive leadership, operations, coordination, policy and program management functions in a secure setting at St. Elizabeth's and needs to reduce the total number of locations that house DHS components to as few as possible to reduce fragmenting of component business units, standardize the work environment, improve communications, coordination and cooperation across all DHS Headquarters units. Consolidating will foster a "one-DHS" culture and optimize our prevention and response capabilities across the spectrum of operations.

## DEPARTMENT OF HOMELAND SECURITY DEPARTMENTAL MANAGEMENT AND OPERATIONS OFFICE OF THE CHIEF FINANCIAL OFFICER

### I. Appropriation Overview

	Perm Pos	FTE	Amount
<b>2009 Actual</b>	<b>163</b>	<b>128</b>	<b>\$43,900</b>
<b>2010 Enacted</b>	<b>183</b>	<b>173</b>	<b>60,530</b>
2011 Adjustments-to-Base	38	29	1,750
<b>2011 Current Services</b>	<b>221</b>	<b>202</b>	<b>62,280</b>
2011 Program Change	0	0	3,272
<b>2011 Request</b>	<b>221</b>	<b>202</b>	<b>65,552</b>
Total Change 2010-2011	38	29	5,022

The Office of the Chief Financial Officer (OCFO) requests \$65.552 million for FY2011. This is an increase of \$5.022 million over FY 2010.

#### **A. Mission Statement for the Office of the Chief Financial Officer (OCFO):**

The mission of the Office of Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department's budget, financial management, and resource management systems to ensure funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies.

The DHS CFO goals are:

1. To provide greater visibility into DHS' financial activity, through timely, accurate, and useful financial related data.
2. To improve systems and processes eventually leading to sustainable clean audit opinions.
3. To provide reasonable assurance about our internal controls over financial reporting.
4. To provide efficient financial management services.
5. To integrate the budget process with the policy and planning process.
6. To support the Under Secretary for Management and business line chiefs by supporting integration and standardization of our resource management systems.

#### **B. Budget Activities:**

Under the OCFO, the following Divisions fulfill these functions:

##### **Program Analysis and Evaluation (PA&E):**

- Develop and perform analyses and evaluations of alternative plans, programs, personnel levels, and budget submissions for the Department in relation to United States homeland security

objectives, projected threats, vulnerability assessments, estimated costs, resource constraints, and the most recent homeland security strategy;

- Provide guidance and oversee the development of the Future Years Homeland Security Program (FYHSP) of the Department;
- Lead the performance measurement and reporting for DHS mission-oriented programs;
- Oversee preparation of the DHS performance plan and other performance reporting;
- Integrate performance measurement into strategic planning, resource allocation, program evaluation, evaluation of management personnel, and the culture of DHS;
- Act as the Program Improvement Officer (PIO) in order to supervise performance management activities; provide advice on program performance goals; convene responsible parties to assess and improve program performance; and guide the use of performance measures in personnel performance appraisals;
- Provide leadership in developing and promoting improved analytical tools and methods for analyzing homeland security planning and the allocation of resources;
- Establish policies for, and oversee the integration of the planning, programming, and budgeting system of the Department; and
- Coordinate with and support the Office of Policy on DHS long-term strategic planning.

#### Budget:

- Administer the Departmental budget, appropriations, and expenditures of funds;
- Work with PA&E and DHS components to formulate annual budget submissions, assure these properly reflect the requirements of DHS, and assist in the presentation and defense of submissions to OMB and Congress;
- Coordinate and review budget execution for each component and appropriation; conduct spend plan and execution reviews; and act on requests for modifications;
- Conduct special studies and analyses of execution of financial plans and recommend reprogrammings as necessary for effective funds utilization;
- Prepare budgetary reports as necessary or as required by OMB and Congress;
- Administer funds not specifically allotted to other components of DHS, such as the Pandemic Influenza Supplemental;
- Prepare the Secretary to testify on the budget request;
- Track and monitor status of reports to Congress required by appropriations bills;
- Ensure technical accuracy and consistency of component budget materials in accordance with OMB or Congressional guidance;
- Manage and coordinate components' input into the President's electronic on-line MAX (budget preparation) data system;
- Analyze budget's impact and review pending legislation, reports to Congress, testimony, and other documents; and
- Coordinate and review apportionments, reapportionments, and allotments for all DHS appropriations.

#### Office of Financial Operations:

- Oversee all aspects of budget formulation and execution for Components under Title 1 of the DHS Appropriations Act, except for the Office of the Inspector General (OIG) and Analysis and Operations (A&O) appropriation;

- Provide budget execution, accounting, and financial management and reporting services for Title 1 Components, except OIG and A&O, including managing apportionments, allotments, funds certifications, invoice processing, general ledger, payroll reconciliations, bank card, and travel;
- Oversee and manage the DHS Working Capital Fund (WCF);
- Perform internal audits and audit follow-up; and
- Provide reasonable assurance on internal controls over financial reporting and internal controls over operations.

Office of Financial Management:

- Develop and oversee Departmental financial management policy; coordination of government-wide financial management initiatives in the Department;
- Prepare the Department's consolidated financial statements and other required financial information due to OMB and Treasury, including the Annual Financial Report at year end;
- Provide guidance and oversight to DHS components on accounting and financial reporting requirements, and coordinate the annual audit of the Department's financial statements included in the Annual Financial Report; and
- Administer the DHS Bankcard (purchase, travel, and fleet) Program, develop and document bankcard policy, provide training and establish and maintain internal control to provide reasonable assurance that the goals and objectives of the Bankcard Program are met and safeguard against fraudulent, improper, abuse, and untimely payment is identified on a timely basis and appropriate corrective action is taken.

Resource Management Transformation Office (RMTO):

- Manage system transformation projects to increase efficiencies, data reliability and financial transparency across DHS;
- Lead the effort to consolidate financial management systems with a focus on standardizing and centralizing business processes, moving to a single OMB-compliant accounting system, facilitating clean audit opinions and utilizing business intelligence tools to yield timely and accurate financial data; and
- Serve as the program management office (PMO) providing day-to-day project management and communications with stakeholders for the following DHS initiatives:
  1. Transformation and Systems Consolidation (TASC).
  2. E-Gov Travel Implementation.
  3. Business Intelligence/DHS Treasury Information Executive Repository (DHSTIER).

GAO and OIG Audit Liaison:

- Coordinate the Department's engagement in Government Accountability Office (GAO) and Office of the Inspector General (OIG) audits, including entrance and exit conferences, and the Department's response to audit reports and findings;
- Track audit recommendations and the Department's implementation of those recommendations; and
- Provide oversight and guidance to component-level GAO and OIG audit liaison offices and to DHS employees involved in audits, investigations, and inspections.

#### Internal Control Management Office:

- Implement the Federal Managers' Financial Integrity Act and its guidelines; OMB Circular A-123; *Management's Responsibility for Internal Control*; the Chief Financial Officers Act; the DHS Financial Accountability Act;
- Lead the Department's assessment of internal controls;
- Coordinate the development and implementation of Mission Action Plans to address material weaknesses and other significant conditions;
- Direct the Department's efforts to implement the Improper Payments Information Act;
- Issue guidance on, and coordinate preparation of, the Secretary's year-end Internal Control Assurance Statements; and
- Conduct reviews of key financial processes to ensure internal controls are operating effectively, with the goal of identifying weaknesses before they become problems.

#### Grants Management Division:

- Set policy for and oversee the management and administration of DHS grants and financial assistance;
- Provide oversight of determinations and decisions concerning financial assistance transactions in compliance with law and policy;
- Collect accurate and complete financial assistance information to address government-wide report and audit requirements;
- Collect and maintain grants and assistance award data, monitor close-out status, and assist DHS component grants awarding offices in closing out delinquent assistance awards;
- Promote information technology to increase productivity and streamline financial assistance systems;
- Represent the Department with other federal agencies or entities on government-wide initiatives and activities related to financial assistance management;
- Develop and maintain Grant Officer/Assistance Officer standards and qualifications; and
- Advise senior DHS leadership on DHS and government-wide statutes, regulations, OMB circulars, and Executive Orders related to grants management activities.

#### Workforce Development Division:

- Provide the training and tools to support excellence in personal performance, career path development, and to execute talent management initiatives to recruit the next generation of OCFO leaders;
- Provide experiences and opportunities designed to establish a strong foundation in financial management disciplines to optimize career building at DHS; and
- Create a pipeline of strong candidates for senior financial management leadership roles at DHS, specifically the CFO and/or Deputy CFO positions.

#### **C. Budget Request Summary:**

The Office of the Chief Financial Officer (OCFO) requests 221 positions, 202 FTE, and \$65.552 million for FY 2011. The total adjustments-to-base are 29 FTE (19 are for contract to FTE conversion) and \$3.272 million.

The Office of the Chief Financial Officer (OCFO) requests \$65.552 million for FY2011. This is an increase of \$5.022 million over FY 2010.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of the Chief Financial Officer (OCFO) has made significant progress leading improvement to financial management at DHS.

#### **Key Accomplishments**

In FY 2009, the OCFO accomplished the following:

- Completed the Department's multi-year plan to implement OMB Circular No. A-123, Management's Responsibility for Internal Control, and reduced the number of Component conditions that contributed to our material weaknesses in internal control over financial reporting by more than half since FY 2006.
- Achieved compliance with the Improper Payments Information Act, the Debt Collection Improvement Act, and the Government Performance and Results Act.
- Engaged the Department's Independent Auditor to conduct the Department's first ever integrated internal control and financial statement audit.
- DHS launched the E-Gov Travel system that provides a common, automated, web-based approach to managing government travel and follows a fee-for-service, shared service provider model. Over the spring and summer of 2009, four DHS components completed the transition to e-Travel, four more began the transition process including U.S. Citizenship and Immigration Services, and planning began for three additional components.
- Continued regular management assurance audits to identify vulnerabilities to waste, fraud, and abuse, and develop and strengthen internal controls.
- The CFO developed and launched, an on-line web-based manual consisting of comprehensive sets of financial management regulations for conducting financial management operations, from budgetary policy to financial reporting, resulting in common standards of accountability. The on-line policy and manual is designed to ensure proper stewardship of taxpayer dollars

remains tantamount to our mission and that DHS maintains efficient and transparent operations and our resources are not vulnerable to waste, fraud and mismanagement.

- Transitioned to GSA's SMART-PAY 2 program for Fleet, Travel, and Purchase cards.
- Successfully migrated the DHS Treasury Information Executive Repository (TIER) and CFO Vision applications and reports from Treasury to DHS.
- Responded effectively to all Headquarters' financial reporting requirements; monitored the monthly reconciliation of Headquarters' cash account; and certified each month that Headquarters' financial data was complete and accurate.
- Enhanced the Headquarters' internal functions by increased focus on meeting financial reporting requirements and internal control responsibilities.
- DHS budget information and requests were developed, coordinated, and delivered on time to the Office of Management and Budget and Congress, including reprogrammings and monthly budget execution reports. Additionally, key DHS leadership, including the Secretary, were well prepared to testify to Congress on all aspects of the DHS budget request. The CFO coordinated DHS responses to over 1,800 Congressional questions for the record resulting from 14 Appropriations Committee hearings, ensuring responses were accurate and timely, including providing the responses to several hundred questions in an unprecedented two week period.
- Submitted the FY 2011 Budget to OMB using the new Budget Formulation and Execution Manager (BFEM) System. This was the first year of pilot use at the Department level and select members of the DHS financial management community.
- Over the course of two months the CFO organized and developed options for resource decisions using seven cross-cutting issue teams to cover major programmatic issues such as border management, transportation security, air and marine coordination, immigration enforcement, and a host of smaller issues such as national security systems and radiological/nuclear detection systems.
- Continuing on a multi-year trend of improvement, the DHS Annual Performance Report was cited by the Mercatus Center as one of the best examples of performance reporting in the government, ranking it fourth out of 24 agencies. The DHS report provided a well organized, concise and easy to read direct link between mission outcomes and the dollars we spent, including information on the public benefit and positive outcomes DHS delivers in the use of tax-payers dollars.
- Implemented the first stage of Department-wide internal controls for the verification and validation of our publically reported set of Government Performance and Results Act measures.
- Conducted five independent program reviews to assess issues of cost and benefits within the Department.
- DHS continues the Transformation and Systems Consolidation project to establish standard business processes, strengthen internal controls, provide timely, accurate and comprehensive reporting and establish a standard line of accounting for DHS. In 2009, DHS requested and received industry proposals to provide an integrated financial, acquisition and asset management solution and, based on those proposals, is evaluating and selecting a contractor. Contract award is expected during the second quarter of 2010.
- The WCF Governance Board was formally established to provide oversight and help ensure all activities and cost allocations are reviewed and approved, and customers receiving the services

delivered through the fund. The Board developed and approved clear criteria for determining whether a new activity should be included in WCF, and reviewed the billing methods for current WCF activities.

- Began building the Department's grant management and oversight function to issue policy and monitor DHS grants and assistance awards and resolution of audit findings.
- Continued to refine, expand, and improve DHS financial management community human capital initiatives to improve human capital capabilities and a common culture.
  - A total of 142 individuals received training through the mentorship program, new hire, financial specialist intern and the financial management symposium. An additional 24 individuals received certification training for the Certified Government Financial Manager (CGFM) exam.
- Launched a far reaching pilot increasing the link between organizational and individual performance for senior executives.

In FY 2010, OCFO plans to accomplish the following:

- Improve the quality and completeness of Headquarters' financial data and implement a strategy to strengthen Headquarters' internal controls.
- Further reduce the number of material weaknesses on the DHS Financial Statements.
- Integrate and coordinate management assurance audit efforts with the Department's Independent Auditor to support the internal control and financial statement audit.
- Complete an assessment of processes that provide internal control over the financial reporting of the Statement of Budgetary Resources and Statement of Net Cost.
- Enhance the Treasury Information Executive Repository (TIER) System within DHS.
- Continue the DHS-wide implementation of e-Gov travel.
- Enhance the use of performance information in key DHS internal business processes, such as strategic planning, resource allocation, and senior leader performance evaluations.
- Lead the Fiscal Year 2012-2016 program resource and performance planning, including the Bottom-Up Review.
- Implement the Budget Formulation and Execution Manager (BFEM) System throughout DHS.
- Award a contract for the acquisition of a consolidated department-wide financial, acquisition, and asset management solution.
  - Validate and document component current state business processes for selected migrating components.
  - Deliver Data Clean-Up Guidance for selected migrating components.
  - Complete IT Systems Discovery Analysis for selected migrating components.
- Finalize grant management administrative policy and procedures in order to implement an oversight program that will identify internal control concerns, provide technical assistance to address those concerns and adjudicate A-133 audit findings.
- Continue to build on successes achieved in improving human capital capabilities through continuation of the mentorship program, the financial specialist intern program, and training for the Certified Government Financial Manager (CGFM) exam.

- Conduct several independent program reviews in order to evaluate and assess issues such as true costs and benefits of programs within the Department.

In FY 2011, OCFO plans to accomplish the following:

- Further reduce the number of material weaknesses on the DHS Financial Statements.
- Continue efforts to integrate and coordinate management assurance audit efforts with the Department's Independent Auditor to support the internal control and financial statement audit.
- Continue ongoing support and maintenance for the Treasury Information Executive Repository.
- Establish a DHS-wide Common Government-wide Accounting Classification (CGAC).
- Implement e-Gov travel at all remaining Components.
- Conduct risk based internal control assessments to sustain compliance with OMB Circular No. A-123, Management's Responsibility for Internal Control.
- Have a Component Senior Assessment Team that is actively engaged in overseeing Headquarters' assessments of internal controls and in preparing the annual assurance statements to the Secretary.
- Be able to better account for, and report on, real property, including Construction in Progress, leasehold improvements, and internal use software.
- Align and report on performance achievements related to the DHS strategic missions and goals defined by the Department's Quadrennial Homeland Security Review. Conduct approximately seven independent program reviews to evaluate and assess issues such as true costs and benefits of programs within the Department.
- Full performance of the Budget Formulation and Execution Manager (BFEM) System, including creation and submission of the FY 2013 budget to OMB and Congress.
- Continue updates and revisions to the Financial Management Policy Manual.
- Conduct additional independent program reviews in order to evaluate and assess issues such as true costs and benefits of programs within the Department.
- Migrate initial components to the consolidated department-wide financial, acquisition, and asset management solution.
- Award task order for solution configuration.
- Award task orders for selected migrating components.
- Finalize standardization of the nine business processes areas for DHS.
- Continue aggressive actions to establish action plans with definite milestones, and actively monitor and hold components accountable for making progress to improve Departmental operating effectiveness.
- Further build on successes achieved through DHS-wide training courses and programs.
- Facilitate grant management training required for Grant Officer Certifications.
- Implement business intelligence initiatives for financial management.

#### IV. Program Justification of Changes

**Department of Homeland Security  
Departmental Operations and Management  
Office of the Chief Financial Officer  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Improved Financial Accountability

Program Increase: Positions 0 FTE 0 Dollars \$3,272

	FY 2009 Actual			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									
Program Increase									\$3,272
<b>Total Request</b>									<b>\$3,272</b>

#### Description of Item

The Office of the Chief Financial Officer (OCFO) requests 0 FTE and \$3.272 million to support enhanced financial management services.

#### Justification

DHS is committed to addressing outstanding financial management challenges. The Fiscal Year (FY) 2009 audit shows the Department continues to make progress in implementing corrective actions and improving the quality and reliability of financial reporting. As DHS increases the number of standalone audits, there will be numerous additional opportunities for financial management improvement and to strengthen internal controls. Continued progress may require DHS to prepare two sets of financial statements (DHS-all and civilian components-only); at the same time the scope of the financial audits will be increasing. Increased funding is needed to continue with internal assurance teams to work proactively identifying and correcting emerging risk areas, financial reporting and internal control issues. Additional funding will help ensure DHS can properly account for and report on its resources, audit recommendations are addressed and tracked to completion, and good internal controls are in place to mitigate future risks.

Additionally, the Department is engaged in the implementation of major acquisitions that are key to the success of DHS' mission requirements. To provide for continued and enhanced support of these major acquisitions, funding is requested for the Office of Program Analysis and Evaluation to conduct a series of independent program/acquisition evaluations on programs that have a substantive impact on DHS or agency missions. Independent reviews, above and beyond internal evaluations alone, will systematically improve DHS programs to accomplish intended purposes and by contributing to a better understanding of true program costs, benefits, and improved mission performance.

#### Impact on Performance:

The Department's accountability, transparency, efficiency and effectiveness are significantly increased by improving financial management policy and oversight. Improving financial and programmatic accountability directly supports strengthening and unifying the Department. The overall result will be improved Departmental operations, resource allocation decision making, and audit effectiveness.

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
Departmental Management and Operations  
Office of the Chief Financial Officer  
Justification of Proposed Changes  
Appropriation Language**

For necessary expenses of the Office of the Chief Financial Officer as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113), [\$60,530,000] **\$65,552,000** of which \$11,000,000 is available until expended for financial systems consolidation efforts.

#### **Explanation of Changes:**

No substantive changes.

NOTE: \$11 million for DHS Improved Financial Systems carried over to FY 2010 from FY2009.

**Mission Statement**

The mission of the Office of Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department's budget, financial management, investment review, and resource management systems to ensure funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies.

**Summary Justification and Explanation of Changes**

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Salaries and Benefits</b>	\$17,007	\$25,062	\$29,761	\$4,699

Salaries and Benefits includes costs for 202 FTEs. The FY 2011 request includes an increase of \$514,000 for the proposed Fiscal Year 2011 increase in personnel compensation; \$200,000 in annualization for the Fiscal Year 2010 increase in personnel compensation; and an increase in 29 FTEs for \$939,000 (10 FTE from annualization ; 19 FTE from contract conversion). The contract conversion is in support of the DHS Balanced Workforce Strategy to ensure efficiencies, cost-effective performance improvements, and a more appropriate balance between in-house and contract resources.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Travel</b>	\$317	\$239	\$239	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>GSA Rent</b>	\$2,267	\$2,369	\$2,464	\$95

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Other Rent</b>	\$89	\$94	\$94	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Printing and Reproduction</b>	\$47	\$47	\$47	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Advisory and Assistance Services</b>	\$14,948	\$35,712	\$25,513	(\$10,199)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Other Services</b>	<b>\$650</b>	<b>\$478</b>	<b>\$478</b>	<b>\$0</b>

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Purchase from Government Accounts</b>	<b>\$7,904</b>	<b>\$6,920</b>	<b>\$6,335</b>	<b>(\$585)</b>

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Operation &amp; Maintenance of Facilities</b>	<b>\$77</b>	<b>\$154</b>	<b>\$157</b>	<b>\$3</b>

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Supplies &amp; materials</b>	<b>\$504</b>	<b>\$377</b>	<b>\$385</b>	<b>\$8</b>

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Equipment</b>	<b>\$76</b>	<b>\$78</b>	<b>\$79</b>	<b>\$1</b>

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

## BUDGET REQUEST AND SUPPORTING INFORMATION

### I. Appropriation Overview

#### A – Mission Statement for the Office of the Chief Information Officer:

The Department of Homeland Security (DHS) Office of the Chief Information Officer (CIO), in collaboration with the DHS Chief Information Officer Council, is responsible for implementing the necessary programs to align the Information Technology (IT) organization, including all of the systems and infrastructure, to support the missions and activities across the Department.

Under the leadership of the CIO, IT will enable the transformation of the Department into a performance based and integrated organization by providing effective technologies and systems. This transformation will align information-delivery resources into appropriate functions to achieve DHS missions. To that end, the CIO and the CIO Council are committed to providing the following:

- A secure means of sharing appropriate information to all internal and external stakeholders
- A set of advanced tools that enables the DHS workforce to rapidly and efficiently communicate, process, retrieve, deliver, and share information
- A single, DHS-wide IT infrastructure environment that is reliable, scalable, flexible, maintainable, and secure
- A clear set of performance metrics and efficient business processes
- IT standards and frameworks that provide for integration
- A single, consistent IT governance model
- Continued improvements in cyber security
- A mature and fully detailed Enterprise Architecture
- The alignment of acquisition for IT goods and services to the department's goals

#### B – Budget Activities:

The OCIO has a myriad of Information Technology related services and support programs that impact components across DHS. The Office is divided into four major programs as follows:

##### Salaries and Expenses

Salaries and Expenses is a crosscutting program that provides technology management, shared services, acquisition strategy and executive leadership support to all offices within the OCIO. This program provides Operations and Maintenance (O&M) of legacy

infrastructure as well as new information technology infrastructure investments. This program also provides security policy, architecture, Certification and Accreditation (C&A) remediation, Federal Information Security Management Act (FISMA) compliance and oversight, and IT awareness and training programs. The Salaries and Expenses program also includes the Office of Accessible Systems and Technology which provides guidance and oversight to all DHS components on implementing and maintaining initiatives to ensure that electronic and technological information is accessible to DHS employees and customers with disabilities.

### **Department-Wide Technology Investments**

**Information Technology Services** – A program that supports development, implementation, and maintenance of a comprehensive and integrated enterprise architecture, and the integration of the following initiatives across DHS: accessibility across the DHS enterprise architecture; IT Policy and Management; Strategic and Performance Goals; Capital Plan Investment Control and Guidance; geospatial technologies; Enterprise Data Management; and information sharing. This program also includes the planning and delivery of secure, enterprise application services that include IT operations such as Application Delivery, Enterprise Portal, and Solutions Engineering.

**Infrastructure and Security Activities** – A set of programs that provide for the integration and protection of sensitive and collateral DHS information. In FY 2011, the DHS OCIO will continue its efforts to consolidate disparate data centers into two DHS Data Centers; establish Disaster Recovery capability for primary DHS systems; consolidate multiple disparate networks into DHS OneNet; manage infrastructure support to include network services, data center services and application support for 15 enterprise applications; establish Trusted Internet Connection (TIC) capability and move all traffic behind the TIC; and Implement Single Sign-On and HSPD-12 initiatives. The DHS OCIO's immediate and long term goal is to protect DHS IT resources from cyber threats, provide One DHS Infrastructure platform, and foster information sharing across the Department. These initiatives fully support the Department's strategic goal to strengthen and unify DHS operations and management.

**National Security Systems (NSS)** – The NSS Program provides the environment for sharing and processing classified (Secret and Top Secret/SCI) information across the homeland security enterprise. This new PPA has three major projects that provide DHS the capability to receive, transmit, process and safeguard classified information: Homeland Secure Data Network (Secret network), Homeland Top Secret/SCI Network, and Communications Security Modernization. The CIO is requesting this reorganization to clearly identify projects associated with the securing of classified networks and the equipment utilized for secure communications. In prior years, this PPA contained only the Homeland Secure Data Network (HSDN).

The HSDN project is a classified wide-area network for DHS and its components, with specific and controlled interconnections to the Intelligence Community (IC) and federal law enforcement resources. HSDN is a critical asset to provide a pathway for secure information to reach federal agencies that are involved in homeland security. With

HSDN capabilities, DHS has the ability to collect, disseminate and exchange both tactical and strategic intelligence information throughout DHS and DHS partners. HSDN provides a state-of-the-art, flexible, secure through security certification and accreditation, Secret-classified, collateral, integrated, and centrally managed enterprise wide-area network.

The Homeland Top Secret/SCI Network (HTSN) project provides consolidation, alignment and management of an enterprise-wide comprehensive architecture and information sharing capability. The project enables intra-DHS TS/SCI communication, common provisioning of enterprise applications including office, file shares, e-mail; central Network and Security Operations Centers; centrally managed back-up, disaster recovery and Continuity of Operations capabilities; and redundant and controlled access to Joint Worldwide Intelligence Communications System (JWICS) and Intelligence Community resources. The project leverages existing and planned DHS network circuits to components.

The Communications Security (COMSEC) Modernization project provides a variety of COMSEC equipment and technical support to secure all the classified communications within the Department to protect the dissemination of Intelligence information on dangerous people and their activities. Further, the COMSEC program provides the support mechanism for secure communications interoperability between DHS HQ, components, State, Local, Tribal Governments, and the Department of Defense as well as other Government Agencies and Organizations.

### **C – Budget Request Summary:**

The CIO requests \$398.459M, 322 positions and 309 FTE for the FY 2011 Budget. The total net adjustment-to-base is an increase of \$1.831M, 27 positions, and 106 FTEs. This adjustment-to-base includes a 2011 pay inflation increase of \$226K, annualization of 2010 pay rise of \$108K, a Working Capital Fund increase of \$78K, a GSA Rent increase of \$1.419M, and an increase of 106 FTE resulting from contractor conversions.

CIO requests a net increase of \$58.235M for the following program changes in FY 2011:

- An increase of \$1.358M for the stand-up of the Office of Accessible Systems and Technology. Funding will be used to support the Operations & Maintenance and enhancements for the Accessibility Compliance Management System and to purchase Section 508-related testing tools for use by component-level testing programs across DHS.
- An increase of \$5M for Enterprise System Delivery program. Funding will go towards consolidating legacy component Web 2.0 infrastructure at legacy data centers which will be integrated into the target SharePoint environment at the department's data centers. Funds will be used to support the target intranet

website (DHSONline replacement) for use by components, the Idea Factory, and other enterprise unifying initiatives.

- An increase of \$7.609M for Enterprise Data Management program. Additional funding will allow the Enterprise Data Management Office to put in place procedures and practices across the components that will lower development costs by \$100M and decrease Operations and Maintenance of data by \$370M by FY 2013. The additional funds will allow DHS to build data standards for the Information Sharing Environment such as Alerts and Warnings, Suspicious Activity, Terrorist Watch Lists, and Cargo/Trade Screening. It will also allow DHS to support the National Information Exchange Model (NIEM) Program Management Office, including support to State and Local participation in the Information Sharing Environment thru the tools, training and technical support for the NIEM program.
- An increase of \$32.268M for Information Security and Infrastructure program. Increased funding will allow the Department of Homeland Security to consolidate component e-mail messaging systems into the DHS Stennis and EDS Data Centers through the standup of a unified E-mail as a Service (EaaS) capability. The increase in resources will also enhance the Single Sign-on (SSO) and Public Key Infrastructure(PKI) by leveraging technologies which will improve operator access to timely, secure mission applications for DHS employees and Federal, State, Local and Private Sector Partners.
- An increase of \$2.2M for the Homeland Secure Data Network to provide security enhancements to the classified wide-area network for DHS and its components, with specific and controlled interconnections to the Intelligence Community and federal law enforcement resources. With HSDN capabilities, DHS has the ability to collect, disseminate and exchange both tactical and strategic intelligence information throughout DHS and DHS partners.
- An increase of \$16.1M for Homeland Top Secret Network program. This new initiative will provide a centrally governed Enterprise-level Top Secret/SCI network which also enables intra-DHS TS/SCI communication, common provisioning of Enterprise applications including Office, file shares, e-mail; central NOC and SOC. Centrally managed back up, recovery and COOP operational capability, redundant and controlled access to JWICS and IC resources.
- A decrease of \$1.1M in the Applied Information Technology and Research Services program. This is due to the termination of the Applied Information Technology and Research Services program.
- A decrease of \$5.2M in the Infrastructure Operations program. This decrease will not impact OCIO's ability to protect the department's critical IT infrastructure.

- National Security Systems (NSS) is a new PPA beginning in FY 2011. In prior years, this PPA contained only the HSDN program. OCIO is requesting a reorganization of this PPA to include the COMSEC modernization and Homeland Top Secret/SCI Network projects. This reorganization will allow OCIO to properly align the above named projects with their IT responsibility for securing classified networks and communications for the Department.

## II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

**Department of Homeland Security**  
**Departmental Management and Operations**  
**Office of the Chief Information Officer**  
 Summary of FY 2010 Budget Estimates by Program/Project Activity  
 (Dollars in Thousands)

Program/Project Activity	<sup>1</sup> FY 2009 Actual		<sup>2</sup> FY 2010 Enacted		FY 2011 Request		Increase (+) or Decrease (-) For FY 2011

<b>Less: Adjustments for Other Funding Sources:</b>												
<b>Net, Enacted Appropriations and Budget Estimates</b>	<b>98</b>	<b>\$336,535</b>	<b>203</b>	<b>\$338,393</b>	<b>309</b>	<b>\$398,459</b>	<b>106</b>	<b>\$60,066</b>	<b>---</b>	<b>\$58,235</b>	<b>106</b>	<b>\$1,831</b>

Notes:

<sup>1</sup> FY 2009 Actuals includes obligations from prior year funding.

<sup>2</sup> The FY 2010 Enacted was 94 FTP/FTE.

<sup>3</sup> Name of PPA modified only; all programs, projects, and activities remain the same as in prior years.

<sup>4</sup> National Security Systems is a new PPA beginning in FY 2011. Prior year budget numbers are for the Homeland Secure Data Network, which is a program under this PPA in FY 2011.

### III. Current Services Program Description by PPA

**Department of Homeland Security  
Departmental Management and Operations  
Office of the Chief Information Officer  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Salaries and Expenses**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>98</b>	<b>98</b>	<b>86,122</b>
<sup>1</sup> <b>2010 Enacted</b>	<b>211</b>	<b>161</b>	<b>86,912</b>
2011 Adjustments-to-Base	10	55	757
<b>2011 Current Services</b>	<b>221</b>	<b>216</b>	<b>87,669</b>
2011 Program Change	-	-	(4,942)
<b>2011 Total Request</b>	<b>221</b>	<b>216</b>	<b>82,727</b>
Total Change 2010 to 2011	10	55	(4,185)

The Office of the Chief Information Officer requests 221 positions, 216 FTEs, and \$82.727M for this activity. This is an increase of 10 positions, 55 FTEs over the FY 2010 revised enacted level and includes a decrease of \$4.185M in budgetary resources. The adjustment to base includes increases in Working Capital Fund contributions, GSA Rent charges, and an increase of 55 FTE resulting from contractor conversions. The program change decreases are due to the elimination of the Applied IT and Research Services program and the decrease in the Infrastructure Operations program. The increases in adjustments-to-base are for pay inflation and the Working Capital Fund cost increases.

The OCIO is committed to building a strategic human capital planning capability that is supported by a structured total workforce approach; one that seeks efficiencies, cost effective performance improvements, and a more appropriate balance of in-house and contractor resources. During FY 2010, and with the FY 2011 request, the OCIO is implementing a DHS Balanced Workforce Strategy involving contractor conversions and the creation of additional personnel positions to provide greater government oversight and management of IT projects. The additional positions being requested in FY 2011 will be funded through the realignment of base resources.

---

<sup>1</sup> The FY 2010 Enacted level is 94 FTP/FTE, but is revised based on the DHS Balanced Workforce Strategy for FY 2010 and FY 2011.

## **CURRENT SERVICES PROGRAM DESCRIPTION:**

### **DHS Information Security Program**

The DHS Information Security Program provides oversight to ensure a secure and trusted computing environment that enables the Department to effectively share information in support of its mission. It also works to ensure compliance with the Federal Information Security Management Act (FISMA) and National Institute of Standards and Technology (NIST) security policies and requirements. The services of the program are to develop and document departmental information security requirements, develop enterprise security management tools, and oversee the implementation of information security for the information and systems that support the operations of the Department. Specifically, the program provides:

**Security Policy** – Establishes and implements DHS information security policies and guidance to ensure the protection of DHS information resources, and incorporate new information security requirements and best practices promulgated by Congress, the Office of Management and Budget (OMB), Homeland Security Presidential Directives (HSPDs), and NIST.

**Security Architecture/Strategy** - Supports information sharing and interoperability by integrating information security architecture with DHS Enterprise Architecture (EA), System Life Cycle, Capital Planning Investment Control (CPIC), and acquisition processes. Security Architecture works to develop enterprise procedures for dealing with cyber attacks, incidents, and newly discovered vulnerabilities (including patch management). Additionally, Security Architecture assesses technologies that show the greatest promise for enhancing information sharing and security and that can be scaled for enterprise application.

**Compliance and Oversight** – Comprises the management and oversight of the IT system inventory, the certification and accreditation (C&A) process, Plans of Action and Milestones (POA&M), FISMA reporting, the implementation of security management tools, and visits to assist with component compliance. The program also includes oversight of weakness remediation to resolve IT security weaknesses. This activity supports security metrics verification and enhancements to security tools to integrate functionality to improve FISMA compliance management and reporting.

**DHS IT Security Awareness, Training, and Education** - Ensures that all Federal regulations, OMB, and NIST guidance relating to IT Security Training are complied with. It supports the standardization of security content development within the Department. The IT Security Training Program provides IT Security Awareness, role-based IT security training for personnel with significant security responsibilities, and provides role-based training to improve reporting for FISMA and related metrics.

### **FY 2009 Accomplishments**

- Maintained full FISMA compliance for over 700 systems in the Department's annual inventory;
- Implemented a standardized operational review methodology to ensure compliance with network and technical guidance;
- Continued to standardize the Department's security operations activities;

- Monitored and reported DHS components' progress on completing system accreditations and resolving weaknesses identified in the components' respective POA&Ms; and
- Completed a rigorous review of the Enterprise Infrastructure and Architecture to ensure compliance with the Security Architecture Guidance annual review.

### **FY 2010 Planned Accomplishments**

- Improve the Department's classified cyber threat information processing capability and improve the analytical capability to better understand and respond to sophisticated threats;
- Conduct in-depth Technical Reviews for at least 20% of the Department's IT systems to assess quality assurance and validate compliance with DHS security requirements;
- Continue to upgrade the DHS IT system inventory, which includes aligning investments to IT systems;
- Implement weakness remediation plan for operational systems by focusing on effective POA&M management;
- Continue to enhance and maintain security management tools for FISMA compliance management and reporting; and
- Continue implementation of the OCIO/ISO Staffing with a goal of 80% staffing on board by the fourth quarter.

### **FY 2011 Planned Accomplishments**

- Continue to improve the Department's classified cyber threat information processing capability and improve the analytical capability to better understand and respond to sophisticated threats;
- Continue the implementation of the Information Strategic Plan;
- Conduct in-depth Technical Reviews for at least 20% of the Department's IT systems to assess quality assurance and validate compliance with DHS security requirements;
- Continue to upgrade the DHS IT system inventory, which includes aligning investments to IT systems;
- Continue to enhance and maintain security management tools for FISMA compliance management and reporting;
- Monitor and report DHS component's progress with completing system accreditations and resolving weaknesses identified in the component's POA&M; and
- Continue the OCIO/ISO hiring recruitment with a goal of 100% fully staffed by the fourth quarter.

### **Infrastructure Operations**

**Infrastructure Operations (IO):** IO includes initiatives for the following: Information Technology Security, Security Awareness and Training, Incident Response Team, Information Assurance Team, Headquarters Operations Center, and IT Business Process Re-engineering. IO program capabilities provide network, e-mail, internet, intranet, telecommunications infrastructure and end-user services including desktop computing, telecommunications, cell phones, Blackberry devices, printers, and peripheral equipment to users in the DHS Headquarters Offices.

IO responds to changes that include increases in Headquarters personnel, moves and consolidations of office space, renovations of facilities, and the expansion of mission

applications. IO also responds to infrastructure changes during periods of emergency, infrastructure disruption, and disasters by performing IT Contingency, IT Disaster, and business continuity planning as well as IT/communications support to those situations requiring a FEMA response. In addition, IO also provides two alternate sites with necessary IT/communications capabilities to support emergency operations during periods of activation by the President or Secretary for Continuity of Operations (COOP).

DHS' mission requires high performance standards for multiple data, voice and video network environments (sensitive but unclassified (SBU), Secret, and Top Secret/Sensitive Compartmented Information) with higher than normal levels of redundancy and continuous support. The IT infrastructure is comparable to the Department of Defense (DOD) in its scope, complexity and need for uninterrupted service. In the event of a national security emergency, the infrastructure must have the resiliency and capacity to provide uninterrupted operations to ensure that DHS maintains the ability to coordinate actions to protect the homeland.

This program also provides IT Continuity Management which includes: performing periodic risk, interdependency and business impact assessments; developing recovery strategies, writing business resumption, incident response and escalation, and network/system specific contingency plans; and conducting test, training, and exercise of plans and capabilities to ensure the continuation of services and capabilities. Continuity of Operations responsibilities include the IT/communications services and support of the components, preparation of exercises with more than 60 departments and agencies participating in efforts to test and improve their ability to perform essential government functions during threats and emergencies, and developing supporting capabilities and plans within the Office of the CIO.

**Information Technology Security:** The Information Technology Security program organizes mandated requirements and “best practices” to ensure security controls and measures are functional, active and assessed with respect to the business mission and acceptable level of risk acceptance. The program leverages DHS security stakeholder relationships with an application of Federal security policies, guidelines, and directives to partner with Chief Information Security Officer (CISOs) and Information Systems Security Managers (ISSMs) throughout the HQ DHS enterprise in refining the DHS security mission. The successful implementation of this program, as a whole, is absolutely essential and critical to protect America's sensitive and classified information, meet mandated security requirements, and ensure the Department of Homeland Security is practicing due diligence in protecting such information.

The key strategies to achieve this are:

- **Policy Adherence** – The IT Security Program promotes compliance in all areas of the DHS IT infrastructure. Current DHS IT standards provide the backbone to the program; therefore, enforcing the use and compliance to these standards not only ensure a standard security posture, but it also assists in mitigating unnecessary risk;
- **Key Stakeholder Collaboration** – The IT Security Program relies upon vigorous partnership and collaborations throughout the DHS CIO organization and its affiliates to execute security controls and enforce security standards. Coordination within the organization is critical to the program; and

- **Best Practices Familiarity** - The strategies, policies and methodologies of the IT Security Program are based on industry best practices as well as federally-mandated standards.

The IT Security Program's planning and reporting applies information security policies, executes the DHS Security Program to meet (FISMA) objectives, and oversight of DHS cyber-infrastructure integration. It also provides Certification & Accreditation and Information Systems Security Officer services, including project-specific security integration services, FISMA reporting, and security policy development. Specifically, the program addresses security plans and reports; identifies the personnel and approach needed for the DHS HQ to meet the requirements of FISMA and DHS Management Directive (MD) 4300.1; respond to congressional and audit requests, and enable situational awareness of DHS HQ information security posture.

### **FY 2009 Accomplishments**

- Acquired a suite of security applications products to better assess the security posture of the HQ IT infrastructure;
- Implemented an improved Information Security Vulnerability Management and Patch Management Process, and assigned roles and responsibilities; assessed patching of Linux Systems; prepared Patch Management Plan for non-Window Servers;
- Issued or expounded upon existing DHS and Federal policies regarding IT security;
- Conducted the first annual National Security Agency Blue Team Assessment for the DHS Secret network;
- Put mission focus and internal resources in place to facilitate annual National Security Agency Blue Team Assessments for DHS Unclassified and Secret networks;
- Developed methodology for determining complexity of DHS systems in support of effort to allocate security expenditures to ITSO Divisions and specific programs;
- Renamed and made permanent the DHS Infrastructure Change Control Board (ICCB), expanded ICCB scope to include Directory Services and Exchange Services (DSES) and Single Sign-On infrastructure, and added as ICCB voting members the Office of Intelligence & Analysis and the Science & Technology Directorate; and
- Completed the update of information in the Trusted Agent FISMA (TAF) for the Office of Management and Budget (OMB) 300 Exhibit with all systems within DHS.

### **FY 2010 Planned Accomplishments**

- Baseline the security suites to provide the best scope from a defense in depth perspective of the HQ IT Infrastructure;
- Conduct the second annual National Security Agency Blue Team Assessment for the DHS unclassified and Secret networks; and
- Complete the update of information in the Trusted Agent FISMA (TAF) for the Office of Management and Budget (OMB) 300 Exhibit with all systems within DHS.

### **FY 2011 Planned Accomplishments**

- Complete the update of information in the Trusted Agent FISMA (TAF) for the Office of Management and Budget (OMB) 300 Exhibit with all systems within DHS.

**Security Awareness and Training:** Capabilities include reviewing current DHS security training process, procedures, and content for accuracy and relevance, and make recommendations where improvements can be made.

#### **FY 2009 Accomplishments**

- Developed a Security Awareness Role-based Training program and conducted a pilot program.

#### **FY 2010 Planned Accomplishments**

- Continue the process of fortifying or constructing security awareness materials to refine the strategy of risk avoidance through improved training tailored to specific security functions.

#### **FY 2011 Planned Accomplishments**

- Continue the process of fortifying or constructing security awareness materials to refine the strategy of risk avoidance through improved training tailored to specific security functions.

**Security Compliance and Oversight:** Compliance with information security laws, guidance, regulations, and policies is a necessary part of any security program. A mix of information security practitioners, such as engineers, policy developers and certification and accreditation (C&A) professionals that have the necessary skills to review processes and procedures in the areas of National Security Agency Red Team-Blue Team exercises, compliance audits, C&A, and Service Level Agreements (SLAs) are engaged to action and report findings back to the CISO.

#### **FY 2009 Accomplishments**

- Completed majority of project actions to mitigate Blue Team findings about LAN A and verified their compliance.
- Completed remediation of printers, Internetwork Operating System (IOS) code upgrade, and BlackBerry remediation.
- Conducted testing and began implementation of Random Password Manager (RPM) at Stennis.
- Addressed meeting Microsoft Federal Server Core Configuration (FSCC) and Chief Information Security Officer (CISO) requirements.

#### **FY 2010 Planned Accomplishments**

- Initiate and remedy a new iteration of Blue Team Assessments for one or more of the enclaves within the ITSO umbrella; and
- Improve the consistency of Federal Information Security Management Agency (FISMA) score – maintain current ‘A’ grade score.

#### **FY 2011 Planned Accomplishments**

- Improve the consistency of Federal Information Security Management Agency (FISMA) score – maintain current ‘A’ grade score.

**Incident Response Team:** Tracks and mitigates incidents involving the unintentional release (spillage) of secure IT information, as well as, deviations from Rules of Behavior use of DHS IT

systems and equipment; and provides recommendations for closure to the HQ CISO and tracks and reports incidents via the DHS Security Operations Center (SOC) Portal.

#### **FY 2009 Accomplishments**

- Remedied 100% of identified security incidents to closure with approval from the HQ CISO.

#### **FY 2010 Planned Accomplishments**

- Maintain 100% remediation of identified security incidents to closure with approval from the HQ CISO.

#### **FY 2011 Planned Accomplishments**

- Remedy 100% of identified security incidents to closure with approval from the HQ CISO.

**Information Assurance Team:** Mission involves detecting, reporting, and responding to cyber threats. It entails testing the security of customers' systems, providing Operations Security (OPSEC) assistance, and evaluating commercial software and hardware against nationally set standards to better meet the department's information assurance needs.

#### **FY 2009 Accomplishments**

- Positioned an IA Lead at each of the Data Centers utilized by DHS to ensure compliance and situational awareness;
- Created a testing lab to test security solutions or identify issues with a proposed implementation;
- Prepared ISB Security Capabilities Overview Briefing for presentation at the US Immigration and Customs Enforcement (ICE) 'Birds of a Feather' Conference;
- Reviewed 394 Change Requests (CRs) and provided security assessments and security control recommendations prior to review by the Infrastructure Change Control Board (ICCB). Reviewed 147 CRs and provided security recommendations prior to review by the Review and Approval Committee (RAC); and
- Tested, scanned and/or provided hundreds of results and security assessments of Privileged Access Requests (PARs), computer hardware and application additions, from a defense-in-depth perspective, resulting in a more expedient business and security determination to approve or deny PAR requests or determine the need for system accreditation or re-accreditation.

#### **FY 2010 Planned Accomplishments**

- Using the testing environment implemented in FY 2009, collaborate with other Divisions of ITSO to evaluate security issues and solutions for a proposed rollout within the HQ IT Infrastructure; and
- Facilitate the alignment of federal desktop core configuration requirements as mandated by OMB.

#### **FY 2011 Planned Accomplishments**

- Using the testing environment implemented in FY 2009, continue to collaborate with other Divisions of ITSO to evaluate security issues and solutions for a proposed rollout within the HQ IT Infrastructure.

**Headquarters Operations Center:** The Headquarters Services Division (HSD) within the CIO has determined that the creation of a central facility for CIO network and security monitoring will alleviate many historical support issues and allow for efficient growth of the Department of Homeland Security's network infrastructure. This central facility was completed in April 2008 at the Nebraska Avenue Complex (NAC) and is commonly referred to as the Headquarters Operation Center (or the HOC). The IT security aspects of the HOC are supported by resources and oversight of the Information Security Division's personnel and provide Initial Operation Capability with three security personnel. This portion of the HOC mission is called the Security Management Center (SMC) and includes efforts to:

- Reduce the IT infrastructure vulnerabilities;
- Protect confidentiality and data integrity to ensure privacy and security;
- Identify and assess the vulnerability of key critical infrastructure assets;
- Develop timely and actionable information from intelligence and vulnerability assessments;
- Provide capabilities to detect and prevent terrorism and other illegal activities;
- Ensure the continuity of essential functions in the event of disaster; and
- Strengthen nationwide recovery plans and capabilities.

The SMC is responsible for assuring delivery and maintenance of available, confidential and high integrity IT and telecommunications services. In addition, the SMC is responsible for managing the configuration, operation, monitoring and maintenance of security devices deployed around the enterprise and responding to security events for all three DHS network enclaves. During subsequent phases of the HOC project, the contractor personnel will be replaced by Customs and Border Protection (CBP) personnel.

#### **FY 2009 Accomplishments**

- Achieved Full Operating Capability of the HOC; and
- Replaced contractor personnel with CBP personnel to perform security monitoring with the HOC.

#### **FY 2010 Planned Accomplishments**

- Review and update the applications and vehicle for retaining CBP to perform security monitoring within the HOC.

#### **FY 2011 Planned Accomplishments**

- Posture the HOC to be able to elevate SCI events reporting to the appropriate levels within the Intelligence Community; and
- Maintain the applications and vehicle for retaining CBP to perform security monitoring within the HOC.

#### **Applications Operations & Maintenance (AO&M)**

AO&M plans, implements, and maintains development, test and production infrastructure within both enterprise data centers to support the efficient development and implementation of enterprise application services. AO&M also provides ongoing maintenance and operations of enterprise application services, and implements necessary controls and procedures to enable the

cost effective delivery of secure services. These funds include the operation and maintenance of enterprise application services that support the DHS Headquarters and other DHS components, including enterprise internet/extranet/ intranet portals (e.g., DHS.gov, DHS Online, and DHS Interactive) and several CFO, CPO, and CAO applications.

#### **FY 2009 Accomplishments**

- Consolidated web physical infrastructure to include Storage Area Network, backup and database licenses to reduce licensing and operational cost; and
- Deployed applications to second data center to achieve full availability and reliability to support COOP requirements.

#### **FY 2010 Planned Accomplishments**

- Establish Development and Test infrastructure within both enterprise data centers for development of enterprise application services;
- Develop and implement virtualization framework to enable rapid provisioning of secure development/test/production environments and reduce overall operational costs; and
- Establish SharePoint as a service in both enterprise data centers.

#### **FY 2011 Planned Accomplishments**

- Certify and accredit development/test/production environments for high availability, confidentiality, and integrity.

#### **Infrastructure Transformation Program (ITP) Operations**

The Infrastructure Transformation Program (ITP) was established in FY 2004 as part of on-going efforts to optimize the Department of Homeland Security's (DHS) Information Technology (IT) infrastructure and increase the Department's effectiveness and efficiency.

ITP is led by the Chief Information Officer (CIO) and each project ("Domain") is led by a component acting as a Steward.

#### **FY 2009 Accomplishments**

- Supported operations and maintenance expenditures related to ITP investments (e.g. Network and Active Directory Exchange (Adex)/E-mail); and
- Ensured capability readiness and migration of legacy data center systems to the DHS Data Centers.

#### **FY 2010 Planned Accomplishments**

- Support operations and maintenance expenditures related to ITP investments (e.g. Network, Adex/E-mail, Single Sign-On and Wireless).

#### **FY 2011 Planned Accomplishments**

- Support operations and maintenance expenditures related to ITP investments (e.g. Network, Adex/E-mail, Single Sign-On and Wireless).

**PPA: Information Technology Services**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	...	...	<b>59,883</b>
<sup>2</sup> <b>2010 Enacted</b>	<b>60</b>	<b>30</b>	<b>51,417</b>
2011 Adjustments-to-Base	17	39	(7,947)
<b>2011 Current Services</b>	<b>77</b>	<b>69</b>	<b>43,470</b>
2011 Program Change	...	...	12,609
<b>2011 Total Request</b>	<b>77</b>	<b>69</b>	<b>56,079</b>
Total Change 2010 to 2011	17	39	4,662

The Office of the CIO requests 77 positions and 69 FTEs and \$56.079M for Information Technology Services, an increase of 17 positions, 39 FTEs, and \$4.662M over the FY 2010 revised enacted amount. The adjustment-to-base is a result of Working Capital Fund and GSA Rent cost increases and the realignment of the COMSEC modernization program (\$8.022M) to the National Security Systems program, as well as an increase of 39 FTE resulting from contractor conversions. The requested FY 2011 program increase of \$12.609M is for the Enterprise Data Management and the Enterprise Service Delivery programs, which are further discussed in the program change section.

The OCIO is committed to building a strategic human capital planning capability that is supported by a structured total workforce approach; one that seeks efficiencies, cost effective performance improvements, and a more appropriate balance of in-house and contractor resources. During FY 2010, and with the FY 2011 request, the OCIO is implementing a DHS Balanced Workforce Strategy involving contractor conversions and the creation of additional personnel positions to provide greater government oversight and management of IT projects. The additional positions being requested in FY 2011 will be funded through the realignment of base resources. In future budget requests, the OCIO will realign personnel and funding to Salaries and Expenses.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

**Geospatial Management Office (GMO)**

The Geospatial Management Office (GMO) provides oversight and guidance to DHS component organizations for geospatial policy and technology matters and serves as the central point of coordination for the maturing geospatial investment across the Department. The GMO executes a comprehensive program that enables the effective, collaborative, and integrated application of geospatial capabilities. DHS requires coordinated, and in some cases consolidated, enterprise geospatial solutions for emergency management, law enforcement, and other homeland security mission objectives, to ensure efficient and cost effective shared use of geospatial assets. The

<sup>2</sup> The FY 2010 Enacted level is 0 FTP/FTE, but is revised based on the DHS Balanced Workforce Strategy for FY 2010 and FY 2011.

GMO is also a participant on and thought leader for the coordination of the OMB Geospatial Line of Business (LoB) initiative across the Federal geospatial community of interest.

### **FY 2009 Accomplishments**

- Demonstrated cost avoidance benefits from applying portfolio management to geospatial investments of the DHS enterprise by fully funding (\$5.24M per year) Enterprise License Agreement for geospatial software valued at \$21.1M;
- Established a Geospatial Concept of Operations to support the National Response Framework. Initial baseline work product intended to improve National Incident Management System (NIMS) and National Response Framework (NRF) geospatial information management concepts and principles; and more clearly define roles and responsibilities for creating and disseminating geospatial products during all phases of the emergency management lifecycle;
- Established the Geospatial Information Infrastructure (GII) support services to provide an infrastructure to meet both common and mission-specific geospatial requirements of DHS components. The GII will be a modular, scalable, managed infrastructure that includes a core architecture, common operating data, and enterprise geospatial services. Capabilities provided through the GII will leverage economies of scale, existing investments, and shared services enhancing both the capability and cost effectiveness of partner geospatial initiatives;
- Supported the migration of the NPPD geospatial service (iCAV) into the EDS Data Center as the initial capability of the GII;
- Operationalized a capability to provide GPS interference reports to all Federal partners to support law enforcement, intelligence and operational missions of DHS and comply with DHS responsibilities under NSPD-39;
- Coordinated with the DHS Office of Grant Policy and Oversight to release geospatial guidance specific to the Homeland Security Grant Program;
- Provided technical staff to support the Federal Emergency Management Agency's National Response Coordination Center (NRCC) during Stafford Act declarations and the Secret Service during National Special Security Events (NSSE);
- Supported the establishment of the Department's Interagency Remote Sensing Coordination Council (IRSCC) by performing an imagery collection assessment, infrastructure requirements for a discovery and dissemination services;
- Contributed to the eGov Geospatial Line of Business activities in a coordinated approach to assess and prioritize tasks and data initiatives that support the mission objectives of the Department;
- Refined and consolidated the Geospatial Domain within the National Information Exchange Model (NIEM) and established the GMO as the domain steward;
- Revised and updated the Department's Geospatial Data Model (v 2.7);
- Supported the coordination of the delivery of DHS COD to the State and Local community through the HSIP Freedom program via HSIN;
- Completed 2008 Federal Radio-navigation Plan for the Secretary's signature;
- Established a standard reporting format for reporting GPS interference related issues to be used by USAF GPS Operations Center, USCG Navigation center and the FAA National Operations Center; and

- Completed requirements development for creating a central data repository for GPS interference reports. Utilized proven FAA's Spectrum Engineering Tracking System technical capability and significantly reduced risk and greater than \$1.25M cost avoidance.

### **FY 2010 Planned Accomplishments**

- Demonstrate cost avoidance benefits from applying portfolio management practices to geospatial investments of the DHS enterprise of at least \$10M;
- Complete migration of DHS component's geospatial software into the enterprise-wide Environmental Systems Research Institute (ESRI) Smart-Buy investment, projecting cost savings for the Department of over \$4.75M, representing an O&M phase of support and allowing for targeted expansion (5x) of select component usage (e.g. ICE), with corresponding cost savings;
- Implement shared enterprise services through the Geospatial Information Infrastructure; potential examples include geo-coding, map sharing, and user defined operational pictures (UDOP), avoiding costs of individual component implementations while increasing DHS interoperability to support disaster response and other missions;
- Consolidate two component geospatial applications to the target DHS geospatial information infrastructure (GII) target architecture, avoiding O&M costs for stand alone systems;
- Extend the Geospatial Concept of Operations to reflect requirements of a catastrophic disaster;
- Continue to look for areas to provide additional geospatial standards, guidance and recommendations for use in other DHS grant and financial assistance areas;
- Build upon eGov Geospatial Line of Business to access, produce, maintain, and utilize geospatial data to ensure and continue sustainable participation from Federal partners, and extend participation to State, Local and Tribal partners and the commercial stakeholder community;
- Establish DHS commercial remote sensing professional services contracts to provide remote sensing support to FEMA during emergency events. Coordinate with federal partners to disseminate post event data using existing geospatial portals in accordance with DHS functional requirements;
- Implement shared enterprise services for streaming video, imagery feature and map services, avoiding costs of individual component implementations while increasing DHS interoperability to support disaster response and other missions;
- Complete GPS risk assessment and technical capability gaps of Critical Infrastructure Key Resources (CIKR) sectors to baseline and develop a national level operations response plan. Prioritize CIKR sectors to identify mature technical capabilities for the protection of CIKR sectors;
- Continue to conduct Command Post Exercises (CPX) to identify response capability gaps among USG participants. Conduct CPX as part of national level exercise;
- Continue to engage DHS S&T and participate in capstone initiatives for Office of Applied Technology (OAT) positioning, navigation and timing programs;
- Complete national sensor strategy for positioning, navigation, and timing sensor capability requirements documentation to initiate development of Patriot Watch and Patriot Shield;
- Continue to work with Department of State on Presidential Study Directive – 3 on space-based PNT services as related to interference, detection and mitigation capabilities;
- Complete 2010 Federal Radio-navigation Plan;

- Continue working with National Geospatial Agency (NGA) on the development of domestic sensor gathering capabilities based on the DOD/NGA Joint Logistics Operations Center (JLOC) model. Establish DHS domestic JLOC master station for storing spectrum data;
- Complete feasibility studies at White Sands Missile Range on mature technical capabilities to be used in the national sensor network, Patriot Watch/Patriot Shield; and
- Consolidate USG efforts on development of a domestic sensor network.

### **FY 2011 Planned Accomplishments**

- Renegotiate the enterprise agreement for the Environmental Systems Research Institute (ESRI) Smart-Buy investment, projecting cost savings for the Department of at least \$4.75M. Continue to expand component usage, with corresponding cost savings;
- Consolidate three additional component geospatial applications to the target DHS geospatial information infrastructure (GII) target architecture, avoiding O&M costs for stand alone systems;
- Extend the Geospatial Concept of Operations to reflect requirements for law enforcement missions;
- Implement shared enterprise services; potential examples include geo-coding, imagery service, and map sharing avoiding costs of individual component implementations while increasing DHS interoperability to support disaster response and other missions;
- Expand enterprise services for streaming video and imagery services, avoiding costs of individual component implementations while increasing DHS interoperability to support disaster response and other missions; and
- Frame the national sensor network into Patriot Watch and Patriot Shield. Work with DoD on risk assessment associated with utilization of Patriot Shield for domestic use.

### **Enterprise Architecture (EA)**

Enterprise Architecture supports a "blueprint" for systematically and completely defining DHS' baseline environment, target environment, and transition plan to a common IT environment. This program establishes a Department-wide roadmap to improve mission effectiveness and efficiency, eliminate existing stovepipe systems, and increase interoperability and information sharing. It ensures the essential evolution of information systems and the development of a common environment.

### **FY 2009 Accomplishments**

- Documented benefits from the DHS EA process for costs avoidance and/or efficiency improvements of \$30M;
- Used the Homeland Security Enterprise Architecture (HLS EA) to guide the Strategic Requirements Planning Process (SRPP), Directive 102.1 (acquisition management policy), the Integrated Planning Guidance (IPG) FY 2011-2015 and the Quadrennial Homeland Security Review (QHSR) process;
- Enterprise Architecture Information Repository achieved IOC for the pilot at the SBU level;
- Transitioned to the DHS target architecture for 25% of all Data Center needs and 75% of all network needs;
- Conducted 100% of the mandated certifications or reviews of major IT programs; (EAB Reviews 40, ITAR Reviews 340, ACE M1 CDR);

- Developed Segment Architectures for Law Enforcement Shared Mission Community, National Biosurveillance Information Sharing Environment, and Identity & Access Management; and
- Updated the Screening, Intelligence and Enterprise IT Infrastructure Services segment architectures.

### **FY 2010 Planned Accomplishments**

- Demonstrate benefits from the DHS EA process for costs avoidance and/or efficiency improvements for at least \$30M;
- Incorporate results of the SRPP into the re-validation process for the mission/business architecture;
- Develop Segment Architectures for 4 of the 10 functional areas of the HLS EA;
- Document, by the end of FY 2010, transition to the DHS target architecture for 65% of all Data Center needs and 95% of all network needs;
- Conduct four critical design or production readiness reviews of major IT programs; and
- Implement the Performance Reference Model (PRM) governance process with the DHS Performance Improvement Office.

### **FY 2011 Planned Accomplishments**

- Demonstrate benefits from the DHS EA process for costs avoidance and/or efficiency improvements for at least \$50M;
- Completed Segment Architectures for 7 of the 10 functional areas of the HLS EA;
- Document by the end of FY 2011, transition to the DHS target architecture for 85% of all Data Center needs and 99% of all network needs;
- Conduct four critical design or production readiness reviews of major IT programs; and
- Track implementation of the Performance Reference Model (PRM) in coordination with the DHS Performance Improvement Office.

### **Enterprise Data Management**

The Enterprise Data Management program provides the Enterprise Architecture Data Reference Model for the understanding of data assets within and across the Department. The Enterprise Data Management Office (EDMO) establishes the guidance and oversight to DHS for data policy, data management, and data stewardship. This program supports the development of the Department-wide roadmap for data to improve mission effectiveness and efficiency, eliminating existing stovepipe data systems, and increasing interoperability and information sharing. The Data Reference Model (DRM) is a key governance tool to assure that mission needs drive technology investments. Additionally, through the use of the DRM, the EDMO is expected to recommend realignment of IT Investments or Acquisitions through the identification of targets at an estimated reduction of \$10M in annual IT costs by reducing the systems under maintenance, or driving common requirements for the development of centralized services.

The EDMO's program plans integrate information sharing requirements and enable access across all levels of government, first responders, and stakeholders in the private sector through the use of National Information Exchange Model (NIEM), development of Information Exchange Package Document (IEPD) guidelines, and collaboration with DHS components and external partners for IEPD development.

### **FY 2009 Accomplishments**

- Demonstrated repeatable Enterprise Data Management business case that showed cost avoidance of \$24M, (\$14M over target) in the reduction of new development through discovery and re-use of existing assets, by use of the Data Asset Repository (DAR) and/or NIEM implementation.
  - Continued development and support of the National Information Exchange Model (NIEM) as a standard for information exchange for the Department, including specific DHS information exchanges or Domains, such as (but not limited to):
    - Integration of Maritime domain community into NIEM in support of HSPD 13-driven Maritime Domain Awareness (MDA) information-sharing between USCG, Navy, CBP, and other Federal, state, local and international allies;
    - Developed the Core Biographic Person Data Elements information exchange within the Person Screening functional areas in support of the DHS Screening Coordination Office (SCO); and
    - Developed the NIEM-based person biometrics interoperability between major Federal agencies and DHS with the augmentation of the Terrorist Watchlist Person Data Element Standards into the US VISIT IDENT information exchange.
  - Advanced the to-be target data architecture including the development of at least 2 mission based Logical Data Models identified by the EA Transition Strategy; and
  - Identified and adopted international or industry data standards into EA, with an expected volume of 20 data standard insertions as part of the target data architecture.

### **FY 2010 Planned Accomplishments**

- Develop the Baseline to understand the 'Total Cost of Data' within the department (i.e. the total cost to maintain and store data); and
- Demonstrate cost avoidance of \$10M in the reduction of new development through discovery and re-use of existing assets, by use of the Data Asset Repository (DAR) and/or National Information Exchange Model (NIEM) implementation.

### **FY 2011 Planned Accomplishments**

- Measure the cost avoidance in IT dollars within the department as dollars spent shift from Operations & Maintenance (O&M) phase to Design, Modernization and Enhancements (DME) phase through the effective discovery and re-use of the Data Asset Repository (DAR);
- Measure the cost avoidance in IT dollars not spent the DME phase due to NIEM implementation;
- Roll-out formal NIEM Training Curriculum to the department to meet the needs of diverse stakeholders; and
- Increase rate of NIEM adoption to 90% of Major DHS IT Level 1 and 2 Programs.

### **Enterprise Service Delivery (ESD)(formerly Enterprise Application Delivery)**

ESD provides the planning and delivery of secure, high-quality enterprise application services for DHS customers. ESD is an initiative that leverages the capabilities and resources of three distinct IT operations: Application Delivery (AD); Enterprise Portal (EP); and Solutions Engineering (SE). ESD engineers and oversees implementation of several key headquarter and

enterprise applications. ESD is also the primary delivery function for the Enterprise Portal, which is the Department's primary gateway for DHS employees, stakeholders, and citizens to share information in compliance with the expectations established in the President's Management Agenda. ESD is currently implementing standards-based web environment at DHS Data Center services to support improved collaboration and information sharing.

### **FY 2009 Accomplishments**

- Stabilized and enhanced the ECT infrastructure to improve system performance and deploy new capabilities to DHS users. Leveraged ECT as the Department go-to product to deploy this system to other components in order to reduce operational cost and realize savings through shared service;
- Provided system enhancement to the project management tool to provide a centralized view of tracking cost, schedule, performance, risk/issues and provide accurate and timely reporting; and
- Deployed enterprise portal environment at enterprise data center 1 via MS SharePoint portal for internal collaboration and information sharing.

### **FY 2010 Planned Accomplishments**

- Establish key enterprise platform and software services to reduce overall costs and timeframes associated with the development of enterprise and HQ applications. Pilot services include portal/collaboration, Customer Relationship Management, staff management, and Business Intelligence;
- Establish Application Lifecycle Management (ALM) service for end-to-end management of requirements and delivery of enterprise services. Establish streamlined development standards/procedures that outline common evaluation criteria and agile certification processes to accelerate certification of reusable platforms and services and reduce implementation delays; and
- Implement upgrade of DHS Internet and Intranet platforms to improve end user experience and collaboration capabilities. Modernize current HQ applications that reside on existing Internet/Intranet development platforms.

### **FY 2011 Planned Accomplishments**

- Consolidate operational maintenance of enterprise application services to reduce operational cost;
- Establish cost recovery model and customer engagement strategy for the ongoing development, support, and maintenance of enterprise application services; and
- Upgrade and modernize key USM business applications to reduce operational costs and improve business capabilities to streamline key business processes (applications include the Future Years Homeland Security Plan and the Mail Business Intelligence Tool).

### **Program Management Support**

The OCIO Program Management program conducted by the Enterprise Business Management Office provides Program Management Office (PMO) services to the OCIO and DHS management to enhance IT program management capabilities and plans and executes an effective resource allocation program to support the Department's IT investments. Its activities include:

- IT Program Management;
- IT Services Portfolio Management and governance ;
- Alignment of portfolios to achieve DHS and IT Goals and Objectives, and the DHS Enterprise Architecture;
- IT acquisition strategy;
- Investment performance and budget integration;
- IT policy, including annual development of an IT Strategic Plan; and
- Develop improved enterprise acquisition and performance management tools

### **FY 2009 Accomplishments**

- Developed automated ITAR front-end business process solution-ready for beta test;
- Validated 98% alignment of Information Technology Acquisition Reviews (ITAR) to budgeted DHS CPIC Investments;
- Completed 50% of the Level 1 and 2 programs required to submit a Probability of Program Success (PoPS) report;
- 81% of Level 1 and 2 programs are reporting within 10% of planned cost and schedule; and
- Created and implemented a nPRS Configuration Management process and Change Management Control board to facilitate and control system enhancements;
- Conducted Budget Review of all Level 1, 2 and 3 IT investments; providing recommendations to leadership on several billion dollars of IT investments; and
- Developed the DHS IT Strategic Plan, which will be utilized to develop the DHS FY 2011-2015 Integrated Planning Guidance;

### **FY 2010 Planned Accomplishments**

- Implement a fully automated ITAR (ITAR online) business process solution;
- Develop automated capability leveraging SMART to analyze 100% of level 1 and 2 investments and 50% of level 3 investments;
- Align DHS IT Budget to 60% of the DHS Enterprise Architecture Functional, Technical, Data, and Performance Objectives;
- Conduct Budget Review of all Level 1, 2 and 3 IT investments and provide funding and recommendations to leadership;
- Work with the Office of Policy, OCIO Direct Reports and components to prepare the BY 2012-2016 IT Integrated Planning Guidance;
- Using integrated governance policies ensure 100% alignment of new investments/acquisitions to established targets; and
- Support the ARB investment reviews for compliance to nPRS and SMART;

### **FY 2011 Planned Accomplishments**

- Incorporate automated ITAR (ITAR Online) business process improvements from FY 2010 ICSAT (ITAR Component Senior Advisory Team) output;
- Reduce the number of red investments on the new IT Dashboard by 25%;

- Using lessons learned from FY 2010, refine standards for IT Program Management within DHS consistent with ITIL, CMMI, and DHS standards for PM Certification;
- Continue to support the OCIO efforts to refine and mature an ITIL governance structure for DHS IT Services. Support the evolution of the IT Services Governance Board functions;
- Using integrated governance policies, ensure 100% alignment of new investments/acquisitions to established targets;
- Continue the implementation of standard risk profiles in all Level 1 and 2 investments and 75% of reporting Level 3 investments.
- Ensure all documentation associated with the ARB or EACOE process is included on the SharePoint site; and
- Provide CIO analysis for 90% of DHS investment review at the ARB level;

### **Cyber Identity and Credentialing (Smartcard)**

Cyber Identity management includes the electronic matching of the appropriate users to the data, systems, and business transactions to which they require access. Cyber Identity management supports three of the Secretary's five goals for the Department: 1. Protect the Nation from Dangerous People; 3. Protect the Critical Infrastructure; and 5. Strengthen and Unify DHS Operations and Management. Each of these goals has need of strong electronic (cyber) identity management in order to ascertain who has access to information, networks and systems. Homeland Security Presidential Directive (HSPD-12) requires the issuance of a "secure and reliable form of identification" based on sound criteria for verifying an individual's identity, is strongly resistant to identity fraud, tampering, counterfeiting and terrorist exploitation that can be rapidly authenticated electronically to all employees and contractors. The prescribed identification credential is a smartcard. Smartcard technology coupled with the required Public Key Infrastructure (PKI) provides a high assurance token to be used as the basis for logical access to Departmental Information Technology systems, supports enablement of Single Sign on (SSO) solutions, Attribute Based Access Control (ABAC) solutions and federated access control solutions. Combined, Smartcards, SSO, ABAC, and federated access control solution technologies offer high-security, and efficient user access to the Department's information systems while allowing information sharing to outward facing partners – other Federal Agencies, State, Local and Tribal governments.

### **FY 2009 Accomplishments**

- Issued Smartcards to all DHS Headquarters employees and contractors; and
- Developed requirements, methodology, and began implementation of two-factor logical access using smartcards.

### **FY 2010 Planned Accomplishments**

- Continue roll out of Smartcard issuance to DHS components;
- Complete implementation for full operational capability for the Enterprise Identity Management Systems (EIMS); and
- Implement usage of HSPD-12 Smartcards for logical access.

### **FY 2011 Planned Accomplishments**

- Work with the Office of the Chief Security Officer to issue Smartcards to all DHS employees and contractors; and

- Implement mandatory usage of HSPD-12 Smartcards for logical access.

### <sup>3</sup>PPA: Infrastructure and Security Activities

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	...	...	<b>134,133</b>
<b><sup>4</sup>2010 Enacted</b>	<b>22</b>	<b>11</b>	<b>152,403</b>
2011 Adjustments-to-Base	...	11	973
<b>2011 Current Services</b>	<b>22</b>	<b>22</b>	<b>153,376</b>
2011 Program Change	...	...	32,268
<b>2011 Total Request</b>	<b>22</b>	<b>22</b>	<b>185,644</b>
Total Change 2010 to 2011	...	11	33,241

**Note:** This PPA has changed in name only. All programs, projects, and activities are the same as in prior years.

The Office of the Chief Information Officer requests 22 positions, 11 FTEs, and \$185.644M for this activity, an increase of 11 FTEs and \$33.241M over the FY 2010 enacted amount. The adjustment-to-base is a result of Working Capital Fund, GSA Rent cost increases, and an increase of 11 FTE resulting from contractor conversions. The FY 2011 program increase is requested for the Information Security and Infrastructure program.

The OCIO is committed to building a strategic human capital planning capability that is supported by a structured total workforce approach; one that seeks efficiencies, cost effective performance improvements, and a more appropriate balance of in-house and contractor resources. During FY 2010, and with the FY 2011 request, the OCIO is implementing a DHS Balanced Workforce Strategy involving contractor conversions and the creation of additional personnel positions to provide greater government oversight and management of IT projects. The additional positions being requested in FY 2011 will be funded through the realignment of base resources. In future budget requests, the OCIO will realign personnel and funding to Salaries and Expenses.

### **CURRENT SERVICES PROGRAM DESCRIPTION:**

#### **WATCH LIST**

The Watch List program supports the sharing of information included within the Terrorist Screening Center's Database and accomplishes the technical integration required to interoperably

<sup>3</sup> This PPA has changed in name only. All programs, projects, and activities are the same as in prior years.

<sup>4</sup> The FY 2010 Enacted level is 0 FTP/FTE, but is revised based on the DHS Balanced Workforce Strategy for FY 2010 and FY 2011.

share data in a secure manner with key DHS and other entities. The Watch List Technical Integration program accomplished its intended goal at the end of FY 2009.

### **FY 2009 Accomplishments**

- Completed implementation of the centralized DHS Watch List Services.

### **FY 2010 Planned Accomplishments**

- Provide Operation and Maintenance Support to DHS Watch List Services; and
- Provide Training Curriculum and Support to DHS Watch List Services.

### **FY 2011 Planned Accomplishments**

- Continue to provide Operation and Maintenance Support to DHS Watch List Services; and
- Continue to provide Training Curriculum and Support to DHS Watch List Services.

### **Information Security and Infrastructure**

The Information Security & Infrastructure (ISI) activity supports investment and investment-related Operations and Maintenance (O&M) and O&M for the capabilities developed in the Enterprise Services Division (ESD) of the IT Services Office (ITSO). Specifically, the ISI appropriation funds development of capabilities in Network Services, Active Directory Exchange (ADEX/E-mail Services), and supports the management and oversight of the ITP.

### **Network Services**

The Steward for the Network Services project is Customs and Border Protection (CBP). Network Services will provide a reliable, resilient and secure DHS-wide data network that streamlines appropriate sharing and discovery of information within the Department and associated organizations. The core of the unified environment will be consolidating all legacy networks to one enterprise-wide, integrated network called "OneNet." Major services provided by Network Services include:

- DHS OneNet - Wide Area Network (WAN) Services
- Network and Security Operations Centers
- Traffic Modeling and Data Analysis
- IP Address Administration
- Network Management
- Access Controls

OneNet will be comprised of two independent Multi-Protocol Label Switching (MPLS) networks, each provided by a separate vendor. Through physical line redundancy and first-tier vendor carrier delivery, the WAN systematically provides continuity and network availability. DHS sites will be connected to the WAN via two physical connections, each terminating at a different vendor's MPLS network. Key features of the MPLS-based network employed by OneNet include increased flexibility, scalability and security, as well as a lower total cost of ownership.

The Network Operations Centers/Security Operations Centers (NOC/SOC) will centrally oversee DHS' infrastructure systems and network components. Incident response and detection is

coordinated and escalated by the NOC/SOC within the network security and computing services groups depending on the nature of the breach or failure. This aids in availability management and capacity management by providing respective service groups with collected monitoring data.

Transitioning DHS Network Services (Legacy and OneNet) to General Services Administration's (GSA) Networx Contract will achieve greater network functionality and telecommunications capabilities than possible under the previous GSA contract vehicle.

### **FY 2009 Accomplishments**

- Implemented and can now monitor SOC Engineering Tool Set;
- Implemented Enterprise Anti-Virus Services;
- Integrated Wireless/Satellite;
- Performed Analysis/Management;
- Maintained Network Port Security;
- Integrated voice over IP (VOIP) and video conferencing capabilities using the OneNet infrastructure as a transport vehicle;
- Granted authority to individual Verizon and AT&T NOC to operate as part of the DHS Joint NOC;
- Completed multiple upgrades to the DHS Circuit Ordering system updates (NIMS) allow components to capability order under the Networx contract;
- Successfully completed the capability of NIMS to interface with AT&T and Verizon ordering systems;
- Peered FLETC 100% to OneNet;
- Maintained existing NOC/SOC capability;
- Completed Engineering and implementation of Second TIC at DC2;
- Executed Multicast capabilities on the OneNet WAN;
- Implemented Quality of Service (QoS) in the Carrier cloud, Field Sites, and at Datacenter Edge Routers (to prioritize delay sensitive data);
- Implemented multiple HSDN sites in the OneNet WAN;
- Implemented a point-to-point OC12 circuit between DC1 and DC2 for replication and disaster recovery;
- Maintained Internet and Extranet gateways;
- Updated and maintained Infrastructure Information Repository (IIR); and
- Supported transition to IPv6.

### **FY 2010 Planned Accomplishments**

- Network Services - Transition component Network Operations and the consolidation of major large program networks such as HSDN to OneNet Operations and Administration;
- Execute Engineering Enhancements & Upgrades;
- Migrate all DHS component Internet, Remote Access, Extranet, and Applications Hosting services to the OMB-approved TICs;
- Transitioning all high availability component sites to Networx;
- Provided IPv6 Alignment Support;
- Finalize Department migration subsequent to the DHS-approved TIC;
- Complete High Assurance Gateway;

- Complete the implementation of Verizon and AT&T backup NOCs;
- Complete the capability of the DHS Ticketing System to successfully interface with Verizon and AT&T ticketing systems; and
- Complete Public Facing Domain Name System Security (DNSSEC).

### **FY 2011 Planned Accomplishments**

- PEP completion;
- Enable Department TIC IPv6;
- Implement Reverse Proxy solution;
- Move 50% of components behind the PEP;
- Technology Replacement/Enhancement for the RTIC and OneNet; and
- Establish an Enterprise-LAB.

### **Active Directory and Exchange (ADEX)/E-mail Services**

The Steward for ADEX/E-mail Services is the US Coast Guard (USCG). E-mail and active directory services will provide more effective communication between and within DHS. ADEX/E-mail legacy systems will be consolidated within DHS to utilize a consolidated EaaS capability at the Enterprise Data Centers. ADEX/E-mail Services will allow personnel to gain access to critical business communications and are designed to deliver greater security, availability, and reliability.

Major services provided by the ADEX/E-mail Services program include:

- Consolidated DHS-wide Global Address List (GAL)
- Standard e-mail naming convention
- Delivery and management of a DHS-wide active directory
- Delivery of a DHS-wide e-mail platform

### **FY 2009 Accomplishments**

- Transitioned DHS e-mail gateways to the DHS TIC locations at both data centers;
- Engaged component technical POCs, through the EaaS Project, with the development of e-mail requirements and service deliverables in preparation of technical roadmap future implementation; and
- Integrated the Directory Services and Exchange Services into the Infrastructure change Control Board Process

### **FY 2010 Planned Accomplishments**

- Complete migration of DHS headquarters and FEMA e-mail inboxes, including e-mail archiving capability, to EaaS at the DHS Enterprise Data Centers

### **FY 2011 Planned Accomplishments**

- Begin migration of CBP, USCIS, FEMA, ICE, NPPD, S&T, USSS and DHS HQ of e-mail inboxes, including e-mail archiving capability, to EaaS at the DHS Enterprise Data Centers

### **Data Center Development**

Two enterprise-wide data centers will consolidate the Department's legacy data centers. Data Center Services will provide management and control of data center hardware, operating systems software, and environmental systems. Both data centers will have the ability to continuously

synchronize applications based upon mission requirements, so either facility can seamlessly take over in the event of a disaster. The DHS Data Center capabilities will provide the personnel and tools to manage service delivery and support activities.

Major services provided by Data Center Services include:

- Capacity management
- Availability management
- System management and administration
- Hardware/software maintenance
- Facility monitoring, management, and security
- Disaster recovery management and testing

The Data Center Development provides funding to consolidate and assist migrating data center environments to two enterprise-wide DHS Data Centers. The program will focus on continuing to build capabilities at both DHS Data Centers. In FY 2010, CIO is contributing a total of \$82.8M towards Data Center Consolidation; \$58.8M for Data Center Development power and infrastructure upgrades, and \$24M for O&M. In FY 2011, CIO is planning to contribute \$83.9M towards Data Center Consolidation; with \$74.7M towards development and \$9.2M for O&M.<sup>5</sup>

#### **FY 2009 Accomplishments**

- Began Federal Emergency Management Agency (FEMA) discovery efforts for migration to DC2;
- Established disaster recovery capability between the two DHS Data Centers in support of DHS Strategic Goal 3.2 to ensure continuity of government communications and operations;
- Completed the first major legacy data center migration, TSA Hazelwood;
- Began HSDN migration to DC2 and then synchronized HSDN services between DC1 and DC2; and
- Contracted two large-scale power projects for implementation while zone remediation projects progressed.

#### **FY 2010 Planned Accomplishments**

- Support major component data center migrations into the two DHS Data Centers;
- Fully address component disaster recovery within the two data centers; and
- Complete HSDN migration to DC2 and then synchronize HSDN services between DC1 and DC2.

#### **FY 2011 Planned Accomplishments**

- Continue to enable the smooth transition of major component data center migrations into the two DHS Data Centers.

---

<sup>5</sup> An additional \$108.2M is being provided to certain components, to be managed through the Working Capital Fund, to migrate those components to the two enterprise-wide DHS Data Centers.

**<sup>6</sup>PPA: National Security Systems**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	...	...	<b>53,854</b>
<b><sup>7</sup>2010 Enacted</b>	<b>2</b>	<b>1</b>	<b>47,661</b>
2011 Adjustments-to-Base	...	1	8,048
<b>2011 Current Services</b>	<b>2</b>	<b>2</b>	<b>55,709</b>
2011 Program Change	...	...	18,300
<b>2011 Total Request</b>	<b>2</b>	<b>2</b>	<b>74,009</b>
Total Change 2010 to 2011	...	1	26,348

**Note:** The OCIO is requesting this new PPA beginning in FY 2011. Prior year numbers shown above are for the Homeland Secure Data Network program only, which will be a program under this PPA beginning in FY 2011.

The Office of the Chief Information Officer requests \$74.009M for the NSS. The adjustment-to-base is a result of Working Capital Fund, GSA Rent cost increases, the realignment of the COMSEC Modernization program from the ITS program (+\$8.022M), and an increase of 1 FTE resulting from contractor conversions. The FY 2011 program increases are requested for the Homeland Top Secret Network program and the Homeland Secure Data Network, which are described in the program change section of this document. The CIO is requesting this reorganization to clearly identify projects associated with the securing of classified networks and the equipment utilized for secure communications. In prior years, this program contained only the Homeland Secure Data Network.

The OCIO is committed to building a strategic human capital planning capability that is supported by a structured total workforce approach; one that seeks efficiencies, cost effective performance improvements, and a more appropriate balance of in-house and contractor resources. During FY 2010, and within the FY 2011 request, the OCIO is implementing a DHS Balanced Workforce Strategy involving contractor conversions and the creation of additional personnel positions to provide greater government oversight and management of IT projects. The additional positions being requested in FY 2011 will be funded through the realignment of base resources. In future budget requests, the OCIO will realign personnel and funding to Salaries and Expenses.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

**Homeland Secure Data Network**

HSDN is a single program within DHS that enables agencies to collaborate and communicate effectively at a SECRET-classified level among Federal and State government and supporting

<sup>6</sup> The OCIO is requesting this new PPA beginning in FY 2011. Prior year numbers shown above are for the Homeland Secure Data Network program only, which will be a program under this PPA beginning in FY 2011.

<sup>7</sup> The FY 2010 Enacted level is 0 FTP/FTE, but is revised based on the DHS Balanced Workforce Strategy for FY 2010 and FY 2011.

entities. With HSDN capabilities, DHS has the ability to collect, disseminate and exchange both tactical and strategic intelligence information throughout DHS and partners.

- HSDN has established 138 sites composed of some 2,294 workstations;
- HSDN has approximately 5,252 established end user accounts who currently logon and exchange information across HSDN in performing their daily mission requirements; and
- HSDN currently operates its system-wide core capabilities and infrastructure consisting of its Network Operating Center (NOC), Secure Operating Center (SOC), four-tiered helpdesk, first data center, and system-wide telecommunications backbone on 24-hour operations in support of the mission requirements of its established end users.

### **FY 2009 Accomplishments**

- Completed NSA Blue Team audit of HSDN enterprise network in May 2009 with a passing score in network security;
- Successfully completed the HSDN Core (NOC, SOC, Help Desk, Data Center) reaccreditation for another 3 years;
- Completed HSDN site reaccreditations for all sites installed before December 31, 2005;
- Successfully Transitioned Operations from the HSDN Data Center at Fair Lakes, VA to the Data Center at Stennis, MS;
- Achieved ATO for the Talon Closed Storage Solution;
- Supported the national COOP exercise in July;
- Transitioned the HSDN Data Center from the Fair Lakes facility to the EDS facility at Clarksville, VA;
- Completed critical refreshment of one third of the established system-wide core infrastructure and site-specific aging HSDN equipment;
- Completed annual Operational Analysis periodic review and reporting process, for identifying areas for improvements in costs and operational efficiencies and effectiveness;
- Transition of Level 3 circuits to OneNet (80 sites); 3 complete at this time; and
- HSDN Deployment to 198 new sites, in addition to the 52 new sites included in the O&M baseline (250 total new sites in FY 2009) with the potential for an additional 150 sites for a total of 400 new sites deployments in FY 2009).

### **FY 2010 Planned Accomplishments**

- Complete annual Operational Analysis periodic review and reporting process, for identifying areas for improvements in costs and operational efficiencies and effectiveness;
- Transition Enterprise Portal to Operations;
- Complete Level 3 circuits to OneNet transition (80 sites);
- Continue tech refresh of site-specific aging equipment and Data Centers; and
- Continue build out of HSDN.

### **FY 2011 Planned Accomplishments**

- Complete annual Operational Analysis periodic review and reporting process, for identifying areas for improvements in costs and operational efficiencies and effectiveness;
- Continue build out of HSDN;
- Enhance user authentication security;

- Continue to add new applications; and
- Continue tech refresh of site-specific aging equipment and Data Centers.

### **Communications Security (COMSEC)**

The Homeland Security Central Office of Record (COR) was established to meet the national security policies associated with providing accounting, safeguarding and management control over classified communications security keying material and equipment.

The DHS COR provides COMSEC accounting services in accordance with established National Security Agency (NSA) policies and directives. This process includes processing incoming and outgoing transactions, destruction reports, and maintaining a consolidated database detailing the location and quantity of COMSEC material and key updates DHS COMSEC accounting policies and COMSEC training.

The COMSEC program provides keying material and technical support to the Transportation Security Agency (TSA) Trace system, the DHS NOC, and the Office of Intelligence and Analysis (I&A) to protect classified communications. The COMSEC program provides a variety of COMSEC equipment and technical support to secure all the classified communications within the Department to protect the dissemination of intelligence information.

### **FY 2009 Accomplishments**

- Developed modernization plan to transition all current voice communications using STU IIIs and STEs to new and enhanced cryptographic systems;
- Procured over \$2.8M dollars gratis in excess Secure Telephone Equipment from another Federal Agency which resulted in cost avoidance for DHS. This equipment replaced legacy secure phones and provided for new emerging requirements;
- Trained 69 students in equipment and custodian administration courses;
- Fielded Enhanced Crypto Cards (ECC) by December 2009;
- Provided updated COMSEC security policies and procedures annually for use by the components and performed audits of COMSEC accounts; DHS COR contributed over 117 legacy COMSEC items to the NSA COMSEC Utility Program allowing for over \$1.5M in cost avoidance and savings to other Civil and Department of Defense COMSEC Accounts;
- Established an interagency agreement with Tobyhanna Army Depot and SPAWAR Systems Center Charleston for equipment maintenance and repair; and
- Conducted 100% inventory of COR and COMSEC Headquarters accounts.

### **FY 2010 Planned Accomplishments**

- Replace KG-175 IT data encryption devices and train users on new equipment;
- Present new Business Case to DHS Management for Regionalization of the COMSEC support structure which will close the 105 current accounts and consolidate to 15 accounts. This will save 180 positions in DHS for other duties as the current 250 full and part time COMSEC personnel are replaced with 70 full time personnel saving training, travel and audit funds as well as reducing account management costs. Identify locations of Regional support offices and obtain funding for FY 2011;
- Study use of Voice Over Internet Protocol (VOIP) secure phones for use on HSDN in lieu of the 6,500 STEs in use for classified communications;

- Procure SME PEDS to DHS and business partners;
- Develop plan for an infrastructure to support the transition of DHS accounts from EKMS to the NSA mandated “Key Management Infrastructure (KMI)”. This 5-7 year project will transition and replace all of the DHS Communications Security Infrastructure;
- Procure new COMSEC equipment to replace obsolete COMSEC equipment 18 months before the decertification dates;
- Recruit and train new Regional staff to assume COMSEC support functions;
- Provide updated COMSEC security policies and procedures annually for use by the components and perform audits of COMSEC accounts; and
- Develop Electronic Key Management System (EKMS) Operation and Maintenance (O&M) contract.

### **FY 2011 Planned Accomplishments**

- Update plan for an infrastructure to support the transition of DHS accounts from EKMS to the NSA mandated “Key Management Infrastructure” (KMI);
- Field Modern easy to use Crypto Fill Device – Really Simple Key Loader (RASKL);
- Upgrade Electronic Key Management Software (EKMS) in order to prepare for transition to KMI;
- Procure additional Inline Network Encryptors to offset initial fielding cost of future KMI deployment;
- Plan for network certification and accreditation in support of anticipated fielding of KMI to allow required and necessary network centric capabilities to be deployed on DHS Networks; and
- Posture DHS COOP COMSEC operations for KMI Pilot Program.

## IV. Program Justification Changes

**Department of Homeland Security  
Departmental Management and Operations  
Office of the Chief Information Officer  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase #1:** Office of Accessible System & Technology  
PPA: Salaries and Expenses  
Program Increase: Positions -0 FTE - 0 Dollars -\$1,358

Funding Profile

Program Increase	-	-	-	-	-	-	-	-	1,358
<b>Total Request</b>			-			-	-	-	<b>1,358</b>

**Description of Item**

DHS created the Office of Accessible Systems & Technology (OAST) as part of both the Office of the Chief Information Officer (OCIO) and the Office for Civil Rights & Civil Liberties (CRCL) in 2005. OAST is dedicated to guiding and supporting all DHS components in removing barriers to information access and employment of qualified individuals with disabilities in accordance with Section 508 of the Rehabilitation Act (as amended). OAST strives to ensure that electronic and information technology (EIT) procured, developed, maintained, or used is accessible to DHS employees and customers with disabilities through a range of policy, training, technical assistance, compliance and governance activities. Like any new program, OAST started out small and focused on establishing department-wide policies and procedures and putting business processes in place to promote Section 508 compliance. Over time, gaps were identified and programs launched to address those gaps. OAST relies on a network of component-level Section 508 Coordinators to work within their respective components on Section 508-related activities. Management Directive 0007.1 – Information Technology Integration and Management requires each component CIO to establish a component Accessible Systems & Technology Program and requires the Director of OAST to coordinate with component CIOs to define oversight and compliance requirements along with performance metrics necessary to ensure the entire network of 14 programs align with DHS policies and that they meet all of the requirements established by public law.

From FY 2005 to FY 2010, OAST received its support from both the OCIO and CRCL through contributions. CRCL contributed two FTEs used to stand up the office and \$500K for

operational support. The OCIO initially provided one support contractor and office space. Since that time, OAST has grown to include 7 FTEs (6 belong to CRCL) and 6 contractors. The OCIO is currently contributing \$1.3M that is used to support the contractors and operational expenses.

OAST activities can be divided into three distinct business tracts: Compliance, Services, and Management.

*Compliance:* Management and oversight of the Web Accessibility and Remediation Program (WARP), the Section 508 Acquisition Audit Program, the Trusted Agent FISMA (TAF) Section 508 Audit Program, and the Section 508 Compliance Enterprise Architecture and Life Cycle Programs. Oversight involves conducting compliance reviews, assistance visits, and program management to verify and validate compliance with DHS Section 508 requirements. These efforts ensure that regular Web accessibility scans are completed and that OAST approved testing methods are followed, that acquisition audits for Section 508 compliance are conducted on a routine basis, that IT system owners have appropriately inputted the required accessibility information into TAF and uploaded the requisite Section 508 artifacts, and that EA Section 508 compliance reviews are conducted and the Section 508 requirements for the DHS SELC are adhered to.

*Services:* Management and oversight of Section 508 compliance for DHS IT Change Management and the EIT and Learning Management System (LMS) Accessibility Assessment Programs. Oversight involves conducting EIT accessibility assessments of software, Web, telecommunications, multimedia and video, self-contained and stand-alone products, and desktop and portable computers to determine Section 508 compliance. Oversight also requires a close working relationship with the Department's LMSs to ensure e-learning platforms and courses are Section 508 compliant when deployed.

*Management:* Management and oversight of OAST operations including contract management, strategic planning, and administrative support and operations. This program is also responsible for managing and operating the DHS Accessible Help Desk, and training and outreach activities. The Accessibility Help Desk serves as a single point of entry for disability-related services and technical assistance for the Department. The goal of this program is to work in concert with existing DHS and component-level help desks to ensure seamless delivery of IT services for customers with disabilities, including the provision of reasonable accommodations. The training program provides Section 508 Awareness, hands-on EIT accessibility testing training for personnel with significant development responsibilities, and provides role-based training for the process of relevant Section 508-related reporting and related metrics. The goal of this activity is to develop a knowledgeable workforce and culture in accordance with Section 508 accessibility requirements.

## **Justification**

In FY 2011 the DHS Office of Accessible Systems & Technology (OAST) requests \$1.358M. A small portion of the funds will be used to support the O&M and possible enhancements for the

Accessibility Compliance Management System and to purchase Section 508-related testing tools for use by component-level testing programs.

A majority of the funds will be used to fund contract-support services in the following areas: support Section 508 compliance quality assurance and independent validation & verification of COTS/GOTS products and systems; and support services to modify existing training courses (both online and classroom style) to reflect the new Section 508 Technical Standards expected out in late 2010 or early 2011.

Funds will also be used to support ongoing strategic planning activities to position OAST to better meet accessibility compliance and governance needs; support oversight and evaluation of component-level Accessible Systems & Technology Programs; and support ongoing oversight of accessibility compliance in change management, enterprise architecture, FISMA systems reporting, and acquisitions review activities.

The OAST spend plan consists of the following and will rely on contract support, to be expended at a continuous rate over the year:

***Ongoing quality assurance, and independent verification and validation: \$357K***

Contract support performs numerous Section 508 compliance assessments of new and upgraded IT applications (including COTS/GOTS applications) to ensure equal access to information and data.

***Training development: \$294K***

Development of online and classroom training related to the update of the Section 508 Electronic and Information Technology Accessibility Standards, online Program/Project Manager trainings, etc.

***Strategic planning: \$71K***

Update the OAST strategic plan and complete metrics development and monitoring of component-level Accessible Systems and Technology Programs.

***Governance support: \$540K***

Ongoing Enterprise Architecture Program and Technical Reviews, document review for change management, Section 508 compliance of TAFISMA systems, and Web Accessibility and Remediation Program.

***Section 508 compliance and document remediation automated tools: \$96K***

AccRepair, Common Look, ECMF, and JAWS maintenance.

**Estimated quarterly expenditures are:**

- Q1: \$315.5K
- Q2: \$315.5K
- Q3: \$411.5K (annual maintenance incurred in 3<sup>rd</sup> quarter)
- Q4: \$315.5K

## **Impact on Performance (Relationship of Increase to Strategic Goals)**

OAST funding will be used to align with the Federal government Section 508 strategic goals as provided. OAST has identified performance measures which include the strategic goal, objective and metric to achieve the overall mission goals.

### **Performance Measure 1:**

#### **Strategic Goal 1: Provide technical and administrative support services to optimize systems and technology access.**

Objective 1.1: Establish accessibility testing across DHS where appropriate.

Metric: Percent of components that adopt Section 508 testing procedures.

Risks: Production has significant Section 508 compliance gaps and incurs remediation expenses.

Objective 1.2: Increase visibility of Section 508 compliance for DHS IT systems and Web sites.

Metric: Percent of TA-FISMA systems validated for Section 508. Percent of Web sites attaining a status of “yellow” or better.

Risks: Legal risks for formal complaints. OAST is unaware of the current level of Section 508 compliance.

Objective 1.3: Enhance EIT acquisition reviews by implementing auditing procedures.

Metric: Percent of acquisition reviews audited that meet Section 508 requirements.

Risks: DHS accepts products that are not meeting requirements. DHS will incur increased project remediation costs and delays in delivering projects.

Objective 1.4: Further integrate Accessibility Help Desk (AHD) department-wide.

Metric: Percent of DHS and component-level Help Desks that liaise with the AHD. Improve customer satisfaction with people who are disabled.

Risks: People don't have access to their information and data. DHS may receive complaints related to Equal Employment Opportunity.

### **Performance Measure 2:**

#### **Strategic Goal 2: Maximize recognition and utilization of OAST services.**

Objective 2.1: Develop comprehensive marketing plan to integrate OAST services across DHS.

Metric: Percent of DHS constituents that are aware of OAST services and Section 508.

Risks: Expend DHS resources and provide limited outreach to the appropriate audiences as well as a lack of raised awareness.

**Performance Measure 3:**

**Strategic Goal 3: Provide training and materials to increase awareness of Section 508 principles and overall DHS EIT accessibility.**

Objective 3.1: Enhance training program to deliver the most effective content.

Metric: Number of training evaluations provided and *percentage rated satisfied or higher*.

Risk: Expending resources without increasing performance.

Objective 3.2: Enhance training delivery methods to increase access from remote locations.

Metric: Percent of trainings conducted in remote locations.

Risks: Non-local developers/testers/project managers are unaware of Section 508 or the requirements.

**Performance Measure 4:**

**Strategic Goal 4: Accomplish OAST mission in the most cost effective, efficient, and in an accountable manner.**

Objective 4.1: Periodically monitor OAST processes to ensure program and staff capabilities meet changing needs.

Metric: Percent of quarterly performance and accountability reports that receive a favorable rating.

**Program Increase #2:** Enterprise Systems Delivery – Web 2.0

PPA: Information Technology Services

Program Increase: Positions -0 FTE - 0 Dollars -\$5,000

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

Program Increase	-	-	-	-	-	-	-	-	5,000
<b>Total Request</b>			9,796			9,674	-	-	<b>14,749</b>

**Note:** In FY 2011, Enterprise Application Delivery (EAD) is being changed in name only to the Enterprise Systems Delivery Office (ESDO). Funding shown in prior years was allocated to EAD.

**Description of Item**

DHS currently lacks a cross-enterprise information sharing and collaboration capability. In response to leadership’s priority to unify the department, the DHS OCIO is working with component CIOs and Business Offices, including the Office of Public Affairs to build out an

innovative, collaborative environment as part of the Web 2.0 initiative. To meet the requirements from DHS Leadership and the DHS community as a whole, the DHS OCIO requests a budget increase of \$5M.

The funds will go towards consolidating legacy component Web 2.0 infrastructure at legacy data centers which will be integrated into the target SharePoint environment at the department's data centers.

Funds will be used to support the target intranet website (DHSONline replacement) for use by components, Idea Factory, and other enterprise unifying initiatives.

### **Justification**

Web 2.0 tools will enhance communication, collaboration, and information exchange; streamline processes; and foster productivity improvements in every aspect of Homeland Security. Use of Web 2.0 tools supports DHS goals of achieving the OneDHS to Strengthen and Unify DHS Operations and Management through interoperable and common operating environment by improving the Homeland Security's effectiveness through seamless access to critical information. Web 2.0 tools are useful in a geographically and functionally diversified enterprise by enabling personnel to more effectively collaborate and share information. The gains in productivity, efficiency, and innovation will be significant. Initial progress is being made toward this end as the Under Secretary for Management's office has recently reported to the White House how DHS is leveraging a Web 2.0 pilot to support the Secretary's Efficiency Review initiative.

This funding request will not only ensure the gains in the productivity, efficiency and innovation through use of Web 2.0 tools, but will further ensure tools do not compromise data confidentiality and integrity, and provides a secure environment to operate Web 2.0 tools. The framework will have extraordinary measures in implementing Web 2.0 technologies or integrating these tools into the "One DHS" environment.

### **Itemized Breakdown:**

**\$4.5M** – Deploy enterprise Web 2.0 capabilities across DHS and include services on both intranet and internet capabilities. For the intranet, DHS is standardizing on a common service offering in the Enterprise Data Centers. This funding will directly support:

- Establishing a Web 2.0 content delivery capability across the enterprise, modeled after the same capability used to deliver DHS.gov, TSA.gov, FEMA.gov among others on the internet.
- Establishing Initial Operating Capability for the DHS Web 2.0 Intranet site to include federated search across legacy intranet sites, enabling blogs, wikis, DHS employee locator services, etc.
- Enhancing the Secretary-directed Idea Factory Web 2.0 capability across DHS.
- Conducting a pilot for mobile Web 2.0 services where those services will be available across DHS blackberries
- Enhance DHS.gov current capabilities to include web reporting analytics, video streaming media services and other Web 2.0 capabilities

- Initiate the migration of legacy intranet sites to the target DHS Web 2.0 connection site. OCIO is establishing the enterprise service in FY 2010 and components will begin migrating off their legacy portal/collaboration sites to the new platform in the DHS Enterprise Data Centers in FY 2011.

**\$500K** – Support consolidation of legacy DHS SBU paths to HSIN Web 2.0

Additional resources required to manage and facilitate component SBU portal migration. This funding will be used to consolidate DHS SBU Maritime and Intelligence portal data to HSIN, simplifying DHS ability to share information with its partners.

- This funding will be used to complete HSIN SLC migration from legacy hosting environment and sunset that legacy service.
- The funding will also be used to migrate maritime data from the legacy USCG Homeport solution to HSIN and then retire Homeport.
- Ensuring Web 2.0 capabilities meet federal compliance standards.

**Impact on Performance**

This initiative will help achieve the DHS strategic goal of strengthening and unifying DHS operations and management by facilitating and streamlining information sharing and collaboration both within DHS and with citizens and partners. The impacts to performance for DHS employees will be achieved through a more cost efficient communications platform, improving transparency, accountability and information sharing across DHS.

**Program Increase #3: Enterprise Data Management**

PPA: Information Technology Services

Program Increase: Positions -0 FTE - 0 Dollars -\$7,609

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	1,972
Program Increase	-	-	-	-	-	-	-	-	7,609
<b>Total Request</b>			2,000			1,972	-	-	<b>9,581</b>

**Description of Item**

**Data Architecture/Data Management**

An addition of \$1.359M from the funding request for EDMO will allow the Enterprise Data Management Office to put in place procedures and practices across the components that will lower development costs and decrease Operations and Maintenance of data significantly.

**Data Standards for the Information Sharing Environment**

An addition of \$2M from the funding request will allow DHS to build data standards for the Information Sharing Environment such as Alerts and Warnings, Suspicious Activity, Terrorist Watch Lists, and Cargo/Trade Screening.

**Support for State and Local participation in the Information Sharing Environment.**

An addition of \$4.25M from the funding request will allow DHS to support the NIEM Program Management Office, including the support of State and Local participation in the Information Sharing Environment through the tools, training and technical support provided by the NIEM program. All of these initiatives will increase the success of the DHS goals for Information Sharing and increase the effectiveness of DHS Terrorism Preparedness, Prevention, and Response Discretionary Grants program.

**Justification**

Despite limited funding in FY 2009, the EDMO was able to document \$26M in cost avoidance using data architecture / data management practices. The additional \$7.609M requested in FY 2011 will allow the EDMO to put in place additional policies and practices to increase the \$26M of cost avoidance significantly in FY 2011 through FY 2013. Along with cost avoidance, these activities target performance increases for all major mission areas such as reduced time for detainee processing, increased usage of the Terrorist Watchlist, decreased time for adjudication of cases for U.S. citizenship, and increased capacity to screen cargo for dangerous materials. This funding impacts the performance of all DHS components that create, store, manage or share data.

This funding request will increase the number of standards available for use in the Information Sharing Environment, tripling the current capacity of the EDMO. In FY 2009, the EDMO facilitated the development of 20 standards. With additional funding, the number of standards developed in FY 2011 will increase significantly by FY 2013.

For State and Local information sharing, funding the NIEM program management office will increase the quality of the training by 100%, and increase the number of trainees per year from 300 in FY 2009 to an annual rate of 750 per year in FY 2011 and a sustainable capacity of 1200 in FY 2013. In addition, funding the PMO will decrease the cost for the development of tools for NIEM from \$3M in FY 2009 to \$1M in FY 2011.

The funding increase will allow EDMO to fully fund the core data architecture and information sharing environment initiatives; thereby reducing the risk of an uncoordinated response in the event of a disastrous event.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

This increase directly supports the DHS Strategic Goal 5: Strengthen and Unify DHS Operations and Management, Strategic Objective 5.1 Improve Department Governance and Performance by implementing a comprehensive, governance for the development of data standards and supports the Information Sharing Governance Board (ISBG). IT supports Objective 5.2 *Advanced Intelligence and Information Sharing* by supporting the development of standards, and the

development of training and tools for use within DHS, and with State, Local, Tribal and Private sector partners.

**Program Increase #4:** Information Security and Infrastructure  
 PPA: Infrastructure and Security Activities  
 Program Increase: Positions -0 FTE - 0 Dollars -\$32,268

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	66,615
Program Increase	-	-	-	-	-	-	-	-	32,268
<b>Total Request</b>			65,810			67,775	-	-	<b>98,883</b>

**Description of Item**

The Information Security & Infrastructure (ISI) appropriation supports investment and investment-related Operations and Maintenance (O&M) and O&M for the capabilities developed in the Enterprise Services Division (ESD) of the IT Services Office (ITSO). Specifically, the ISI appropriation funds development of capabilities in Network Services, ADEX/E-mail Services, and supports the management and oversight of the ITP.

**Justification**

Through targeted investments, the \$32.268M increase requested in FY 2011 would facilitate, strengthen and unify DHS Information Security and Infrastructure (ISI) operations, management, governance and performance. Enhancement objectives include investment in:

Single Sign-on (SSO) and PKI (\$12.268M): SSO funding will leverage technologies to improve operator access to timely, secure access to mission applications for DHS employees and Federal, State, Local and Private Sector Partners.

The Steward for SSO is Immigration and Customs Enforcement (ICE). SSO will minimize the number of distinct user login credentials that users will need to log-in to their systems and applications. By implementing SSO, DHS computer users will be able to log-in to their systems with only a single set of credentials to access multiple applications, minimizing the need for a user to log-in multiple times for different applications. SSO will also provide the ability to manage user names and passwords across potentially hundreds of applications throughout DHS. Ultimately, this will provide additional security and auditing to support the complex DHS IT infrastructure.

E-mail (\$20M): The Department of Homeland Security will be able to consolidate component messaging systems into the DHS Stennis and EDS Data Centers with the standup of a unified

EaaS capability. The requirements for the EaaS service offering have been jointly defined by representatives from each of the components as selected by the G7 Chief Information Officer (CIO) Council (CIO-C) members.

The funding would mitigate high risk areas within the DHS firewall by establishing Policy Enforcement Points (PEPs) across the DHS Network to reduce vulnerability and improve security within the DHS IT Enterprise. The improved DHS SOC remediation and forensics capabilities would counter threats and mitigate threat consequences by establishing robust classified facilities with highly skilled analysts and migrating legacy connections behind the DHS Trusted Internet Connections (TICs) for remediation.

The funding would further reduce vulnerability at the perimeter by establishing a High Assurance Guard to support DHS mission requirements for accessing social networking sites and establish a DHS e-mail disaster recovery capability for 100% of all e-mail traffic behind the two DHS TICs.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

This increase supports DHS Strategic Goal 3: Protect Critical Infrastructure, Strategic Objective 3.3 Improve Cyber Security. The Department is aligning infrastructure cyber security under a comprehensive, IT security strategy that maintains an appropriate set of common enterprise controls to facilitate information sharing within and across all appropriate mission boundaries.

This increase also directly support DHS’s Strategic Goal 5: Strengthen and Unify DHS Operations and Management, Strategic Objective 5.1 Improve Department Governance and Performance by implementing a comprehensive, defense-in-depth IT security strategy that maintains an appropriate set of common enterprise controls to facilitate information sharing within and across all appropriate mission boundaries.

**Program Increase #5:** Homeland Secure Data Network  
**PPA:** National Security Systems  
**Program Increase:** Positions -0 FTE - 0 Dollars -\$2,200

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	47,687
Program Increase	-	-	-	-	-	-	-	-	2,200
<b>Total Request</b>			53,854			47,661	-	-	<b>49,887</b>

**Description of Item**

The \$2.2M funding requested for the Homeland Secure Data Network will be used for security enhancements to the secret classified wide-area network for DHS and its components, which

provide specific and controlled interconnections to the Intelligence Community and federal law enforcement resources. HSDN is a critical asset to provide a pathway for secure information to reach federal agencies that are involved in homeland security. With HSDN capabilities, DHS has the ability to collect, disseminate and exchange both tactical and strategic intelligence information throughout DHS and DHS partners. HSDN provides a state-of-the-art, flexible, secure through security certification and accreditation, Secret-classified, collateral, integrated, and centrally managed enterprise wide-area network.

Specific spending includes:

- Mapping - \$400K
- Network IDS/Network IPS - \$570K
- Host IDS/Host IPS – \$430K
- Computer Incident Response Teams (CIRT) - \$800K

### **Justification**

The OCIO is responsible for ensuring the security of the classified networks utilized by the Department and its components for strategic and tactical information sharing. Upgrading the HSDN security posture to a Secret wide area network will decrease and mitigate intrusion.

The Homeland Secure Data Network provides a more effective, scalable, and secure centralized access to Intelligence Community resources (an enterprise approach) currently enabled by independent connections at each DHS component (an enclave approach). The enterprise approach improves the communication of Secret information across the Department and facilitates greater information sharing between DHS and the IC.

### **Impact on Performance**

This program directly supports Goal 5 and Strategic Objective 5.2 – Advance Intelligence and Information Sharing.

The proposed HSDN funding increase will provide DHS to foster a more defense in depth approach to security of its classified secret network and its ability to share information.

**Program Increase #6:** Homeland Top Secret/SCI Network  
 PPA: National Security Systems  
 Program Increase: Positions -0 FTE - 0 Dollars -\$16,100

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	-
Program Increase	-	-	-	-	-	-	-	-	16,100
<b>Total Request</b>			-			-	-	-	<b>16,100</b>

**Description of Item**

The \$16.1M funding requested will provide a centrally governed and managed enterprise-level Top Secret/Sensitive Compartmented Information (TS/SCI) network that is highly scalable, and has the flexibility to add server and storage resources as needed. It will leverage existing and planned DHS network circuits to DHS field components, enabling intra-DHS TS/SCI communication, including shared redundant and controlled access to Joint Worldwide Intelligence Communications System (JWICS) and Intelligence Community (IC) resources. It will provide an infrastructure on which to host existing and planned intelligence applications, consolidated common provisioning of enterprise applications including Office, file shares, and e-mail; central network and security operations and monitoring capability; leverage type-certified workstation solutions, Wide Area Network (WAN) and communication interface designs, and provide centrally managed back up, Disaster Recovery, and Continuity Of Operations Planning (COOP) capability for the TS/SCI network.

Specific spending and milestones include:

- Critical Design Review - \$1.1M
- Certification & Accreditation of Core System - \$3M
- Initial Operating Capability of Core System - \$5M
- Initial Operating Capability of Core Network - \$7M

**Justification**

The HTSN program will establish a core enterprise TS/SCI infrastructure with common governance, a consistent and transparent funding model, standardized connection policies, and Department-aligned technology, with a comprehensive acquisition strategy and operating model.

The Homeland Top Secret/SCI Network (HTSN) provides more effective, scalable, and secure centralized access to IC resources (an enterprise approach) currently enabled by independent connections at each DHS component (an enclave approach). The enterprise approach both (a) improves the communication of TS/SCI information across DHS and (b) facilitates greater information sharing between DHS and the IC. Current DHS TS/SCI network infrastructure is

limited to a small number of sites within the Washington, DC area and independent enclaves in the broader Continental United States (CONUS). Most requirements for TS/SCI connectivity are being addressed independently in the components. Dedicated enclave connections to IC sources result in higher costs through duplication of infrastructure, staff, and cleared support personnel. Service, governance and management of local infrastructure varies widely, creating uncertainty in availability and reliability during crisis, creating additional challenges when attempting to define and implement information sharing across DHS at the TS/SCI level.

Key objectives include:

- Increase classified information sharing capabilities across DHS at the TS/SCI level through a readily scalable infrastructure that can reach across the CONUS;
- Provide central management and governance to the enterprise network infrastructure with common provisioning; centralized security, operations, and monitoring; and centralized policy and connection management;
- Improve reliability and resiliency by leveraging DHS data centers and communications capabilities, and by implementing critical backup, Disaster Recovery and COOP;
- Reduce complexity and cost by sharing high-capacity external connections, and by implementing standard type-certified site configurations and workstation solutions; and
- Establish a consistent and transparent funding model that will include capital funding for new investments and operations and maintenance based on defined service objective. HTSN will include the cost of the network infrastructure and resources to govern, manage, and support it in keeping with “One DHS” and the President’s IT priorities, which include transparency, participation and collaboration, efficiency and effectiveness.

### **Impact on Performance**

This program directly supports Goal 5 and Strategic Objective 5.2 – Advance Intelligence and Information Sharing.

The proposed HTSN will provide a means to communicate TS/SCI information across the Department in the Washington Metropolitan Area and in selected locations nationwide. It will provide a Core TS/SCI Network allowing communication access for up to 100 sites for DHS and its components.

All components will share the HTSN infrastructure including:

- A centrally governed enterprise-level TS/SCI network that will leverage existing and planned DHS network circuits to Department field components;
- An infrastructure on which to host existing and planned intelligence applications;
- Common provisioning of enterprise applications to include office, file shares, and e-mail;
- Central network and security operations and monitoring capability;
- Conventional and low-cost type certified workstation solutions, WAN and communication interface designs; and

- Critical backup, Disaster Recovery, and COOP capability.

**Program Decrease #1:** Applied Information Technology and Research Services

PPA: Salaries and Expenses

Program Decrease: Positions -0 FTE - 0 Dollars – (\$1,100)

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

Program Decrease	-	-	-	-	-	-	-	-	(1,100)
<b>Total Request</b>		1,017	-			1,100	-	-	<b>(1,100)</b>

**Description of Item**

Under this program, DHS funds enterprise access to commercial IT research and advisory services. These services provide IT personnel with world-class IT knowledge resource to select and manage technology and participate in development of standards for DHS specific applications.

**Justification**

This program will be phased out by DHS OCIO in FY 2010.

**Impact on Performance (Relationship of Decrease to Strategic Goals)**

DHS components will be able to procure IT research and advisory services as needed from the same or similar sources as presently provided by OCIO. As a result, there will be no impact on performance.

**Program Decrease #2:** Infrastructure Operations

PPA: Salaries and Expenses

Program Decrease: Positions -0 FTE - 0 Dollars – (\$5,200)

<b>Total Request</b>			35,484			33,705	-	-	<b>28,505</b>

## **Description of Item**

IO program capabilities provide network, e-mail, internet, intranet, telecommunications infrastructure and end-user services including desktop computing, telecommunications, cell phones, Blackberry devices, printers, and peripheral equipment to users in the DHS Headquarters Offices.

IO responds to changes that include increases in Headquarters personnel, moves and consolidations of office space, renovations of facilities, and the expansion of mission applications. IO also responds to infrastructure changes during periods of emergency, infrastructure disruption, and disasters by performing IT Contingency, IT Disaster, and business continuity planning as well as IT/communications support to those situations requiring a FEMA response. In addition, IO also provides two alternate sites with necessary IT/communications capabilities to support emergency operations during periods of activation by the President or Secretary for Continuity of Operations.

This program also provides IT Continuity Management which includes: performing periodic risk, interdependency and business impact assessments; developing recovery strategies, writing business resumption, incident response and escalation, and network/system specific contingency plans; and conducting test, training, and exercise of plans and capabilities to ensure the continuation of services and capabilities. Continuity of Operations (COOP) responsibilities include the IT/communications services and support of the components, preparation of exercises with more than 60 departments and agencies participating in efforts to test and improve their ability to perform essential government functions during threats and emergencies, and developing supporting capabilities and plans within the Office of the CIO.

## **Justification**

The OCIO will continue to strive for efficiencies while providing the same level of service for DHS HQ A- and C-LANs for the disaster recovery (DR) program. The OCIO will continue to maximize resources while implementing project schedules towards a full disaster recovery capability.

## **Impact on Performance (Relationship of Decrease to Strategic Goals)**

This funding decrease will not have an impact on the ability to achieve DHS Strategic Goal 3: Protect Critical Infrastructure, Strategic Objective 3.2 to Ensure Continuity of Government Communications and Operations and DHS Strategic Goal 5: Strengthen and Unify DHS Operations and Management, Strategic Objective 5.1 Improve Department Governance and Performance.

## **V. Exhibits and Other Supporting Materials**

<sup>1</sup> The FY 2010 Enacted level is 94 FTP/FTE. Changes in FTE are due contractor conversions associated with the DHS Balanced Workforce Strategy.

### PPA Mission Statement

A crosscutting program that provides technology-management, shared services, acquisition strategy, executive leadership support, process development, and business transformation to several offices within the DHS Office of the CIO.

**Summary Justification and Explanation of Changes**

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Salaries and Benefits</b>	<b>\$13,899</b>	<b>\$20,757</b>	<b>\$21,886</b>	<b>\$1,129</b>

Salaries and Benefits includes costs for 216 FTEs. The FY 2011 Request includes an increase of \$1,129,000 and 55 FTEs for the proposed January 2010 2% increase in personnel compensation, projected 1.4% increase in personnel compensation for FY 2011, and CIO's Balanced Workforce Strategy. The funding associated with the changes in FTE as a result of the contractor conversions will be identified at a later date.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Travel</b>	<b>\$605</b>	<b>\$307</b>	<b>\$596</b>	<b>\$289</b>

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2011 Request includes increases of \$289,000 for anticipated travel expenses related to the governance and management of IT programs.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Transportation of Things</b>	<b>\$0</b>	<b>\$24</b>	<b>\$0</b>	<b>(\$24)</b>

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2011 Request includes a decrease of \$24,000 due to less than anticipated program requirements for this activity.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>GSA Rent</b>	<b>\$3,963</b>	<b>\$2,948</b>	<b>\$3,342</b>	<b>\$394</b>

GSA Rent includes all payments to General Services Administration (GSA) for space rental and rent related services. The FY 2011 Request includes an increase of \$394,000 for anticipated cost increase for leased space.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Other Rent</b>	<b>\$419</b>	<b>\$14</b>	<b>\$412</b>	<b>\$398</b>

Other Rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2011 Request includes an increase of \$398,000 for anticipated cost increase for leased space.

	2009 Actual	2010 Enacted	2011 Request	2010 to 2011 Change
<b>Communication, Utilities, and Miscellaneous Charges</b>	\$366	\$18,208	\$360	(\$17,848)

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2011 Request includes a decrease of \$17,848,000 due to the reprioritization of budgetary resources.

	2009 Actual	2010 Enacted	2011 Request	2010 to 2011 Change
<b>Printing</b>	\$46	\$35	\$45	\$10

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2011 Request includes an increase of \$10,000 for anticipated print costs.

	2009 Actual	2010 Enacted	2011 Request	2010 to 2011 Change
<b>Advisory and Assistance Services</b>	\$18,921	\$16,820	\$11,867	(\$4,953)

Advisory and Assistance Services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and Local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2011 Request includes a decrease of \$4,953,000 due to the offsets being provided by CIO for Infrastructure Operations and the phasing out of the Applied IT program.

	2009 Actual	2010 Enacted	2011 Request	2010 to 2011 Change
<b>Other Services</b>	\$505	\$4,246	\$496	(\$3,750)

The FY 2011 Request includes a decrease of \$3,750,000 for less than anticipated costs associated with Infrastructure costs.

	2009 Actual	2010 Enacted	2011 Request	2010 to 2011 Change
<b>Purchase from Government Accounts</b>	\$27,834	\$14,499	\$26,502	\$12,003

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2011 Request includes an increase of \$12,003,000 due to increased outsourcing requirements for IT services.

	2009 Actual	2010 Enacted	2011 Request	2010 to 2011 Change
<b>Operation &amp; Maintenance of Facilities</b>	\$305	\$0	\$300	\$300

Operation & Maintenance of Facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2011 Request includes an increase of \$300,000 for anticipated O&M of investment technologies.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Research and Development</b>	<b>\$0</b>	<b>\$384</b>	<b>\$0</b>	<b>(\$384)</b>

Research and Development includes costs for contracts for the conduct of basic and applied research and development. The FY 2011 Request includes a decrease of \$384,000 due to reprioritization of budgetary resources for program requirements.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Medical Care</b>	<b>\$10</b>	<b>\$0</b>	<b>\$10</b>	<b>\$10</b>

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2011 Request includes an increase of \$10,000 for anticipated health clinic costs for employees.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Operation &amp; Maintenance of Equipment</b>	<b>\$11,967</b>	<b>\$564</b>	<b>\$9,746</b>	<b>\$9,182</b>

Operation & Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2011 Request includes an increase of \$9,182,000 for O&M of equipment hosted at Data Centers.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Supplies &amp; Materials</b>	<b>\$321</b>	<b>\$216</b>	<b>\$316</b>	<b>\$100</b>

Supplies & Materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2011 Request includes an increase of \$100,000 for cost increases related to supplies.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Equipment</b>	<b>\$6,961</b>	<b>\$7,890</b>	<b>\$6,848</b>	<b>(\$1,042)</b>

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2011 Request includes a decrease of \$1,042,000 for less than anticipated costs for equipment.

<sup>1</sup> The FY 2010 Enacted level is 0 FTP/FTE. Changes in FTE are due contractor conversions associated with the DHS Balanced Workforce Strategy.

**PPA Mission Statement**

A program which supports development, implementation, and maintenance of a comprehensive and integrated Enterprise Architecture, the information technology framework for the Department, geospatial technologies, and information sharing.

**Summary Justification and Explanation of Changes**

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Salaries and Benefits</b>	\$0	\$2,229	\$0	(\$2,229)

FY 2011 request includes a decrease of \$2,229,000 in salaries and benefits due to its realignment under the Salaries and Expenses PPA. CIO is requesting an increase in 39 FTEs that will be funded from contractor conversions and the realignment of funding for personnel to perform government oversight and management functions. The funding associated with the changes in FTE as a result of the contractor conversions will be identified at a later date.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Travel</b>	\$16	\$93	\$16	(\$77)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2011 Request includes a decrease of \$77,000 for less than anticipated travel.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Transportation of Things</b>	\$0	\$8	\$0	(\$8)

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2011 Request includes a decrease of \$8,000 due to less than anticipated program requirements for this activity.

<sup>1</sup> Name of PPA modified only; all programs, projects, and activities remain the same as in prior years.

<sup>2</sup> The FY2010 Enacted is 0 FTP/FTE. Changes in FTE are due contractor conversions associated with the DHS Balanced Workforce Strategy.

**PPA Mission Statement**

A set of programs that provide for the integration and protection of sensitive DHS information.

**Summary Justification and Explanation of Changes**

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Salaries and Benefits</b>	\$0	\$0	\$0	\$0

The FY 2011 Request includes an increase in 11 FTEs that will be funded from contractor conversions. The funding associated with the changes in FTE as a result of the contractor conversions will be identified at a later date.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Travel</b>	\$8	\$51	\$112	\$61

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2011 Request includes increases of \$61,000 for anticipated travel expenses related to the governance and management of IT programs.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>GSA Rent</b>	\$411	\$1,540	\$2,492	\$952

GSA Rent includes all payments to General Services Administration (GSA) for space rental and rent related services. The FY 2011 Request includes increases of \$952,000 for anticipated cost increase for leased space.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Advisory and Assistance Services</b>	\$27,648	\$36,634	\$33,919	(\$2,715)

Advisory and Assistance Services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and Local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2011 Request includes a decrease of \$2,715,000 due to the less requirements for contractual services.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Other Services</b>	\$10	\$1,483	\$8,686	\$7,203

The FY 2011 Request includes an increase of \$7,203,000 for other contractual costs associated with infrastructure investments.

	<b>2009 Actual</b>	<b>2010 Enacted</b>	<b>2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Purchase from Government Accounts</b>	\$6,355	\$14,367	\$28,754	\$14,387

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2011 Request includes an increase of \$14,387,000 due to increased outsourcing requirements for IT services.

	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2010 to 2011</b>

**National Special Security Event State and Local Reimbursement Fund**

## **I. Appropriation Overview**

### **A – Mission Statement for National Special Security Event State and Local Reimbursement Fund**

On May 22, 1998, President William J. Clinton issued Presidential Decision Directive 62 (PDD 62) - Protection Against Unconventional Threats to the Homeland and Americans Overseas. PDD 62 established a framework for federal department and agency counter-terrorism programs, which addressed terrorist apprehension and prosecution, increased transportation security, enhanced emergency response, and enhanced cyber security. PDD 62 also designated specific Federal departments and agencies as the lead agencies in the event of terrorist attacks and for planning and implementation of National Security Special Events (NSSE).

The Office of Operations Coordination and Planning (OPS) will administer the Department's NSSE's State and Local Reimbursement Fund. The fund will be used to reimburse State and local governments for the actual costs associated with the increased security measures for an unplanned NSSE. The FY 2011 budget requests funds be appropriated to the Departmental Management and Operations account.

### **B – Budget Activities:**

#### **NSSE Reimbursement Fund**

Major events that are considered to be nationally significant may be designated by the President - or his representative, the Secretary of DHS – as NSSEs. From September 1998 through December 2009, there have been 35 events designated as NSSEs. Some of these events have included presidential inaugurations, presidential nominating conventions, major sports events, and major international meetings. Since the standup of DHS, there have been five unplanned NSSEs including presidential funerals and world economic summits (i.e., G8 and G20).

### **C – Budget Request Summary:**

The Department requests \$20,000,000 in FY 2011.

## II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

<b>2011 Total Request</b>	-	-	<b>20,000</b>
Total Change 2010 to 2011	-	-	20,000

The Department requests \$20,000,000 for National Special Security Event State and Local Reimbursement Fund (NSSE).

**Current Services Program Description:**

The unplanned NSSE reimbursement fund did not exist within DHS prior to FY 2011. The fund will be used to reimburse State and local governments for the actual costs associated with the increased security measures for an unplanned NSSE. It also includes funds for day-to-day activities to include policy formulation for State and local reimbursement of unplanned NSSEs, as well as administration of the reimbursement fund.

(Dollars in Thousands)

**Program Increase 1:** NSSE State and Local Reimbursement Fund  
PPA: NSSE State and Local Reimbursement Fund  
Program Increase: Positions 0.0, FTE 0.0, Dollars \$20,000.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	20,000
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>20,000</b>

**Description of Item**

The NSSE activities include the administration of reimbursement funds for State and local unplanned National Special Security Events. It also includes policy formulation for State and local reimbursement of unplanned NSSEs, as well as administration of the reimbursement fund.

**Justification**

The Department requests that OPS assume responsibility for the following requirement:

- \$20 million to establish a National Special Security Event (NSSE) State and Local Reimbursement Fund to be housed in the Office of the Secretary. The fund will be used to reimburse State and local governments for the actual costs associated with the increased security measures for an unplanned NSSE.
- This fund will not be used to reimburse the District of Columbia, as reimbursement already takes place under the Federal Payment for Emergency Planning and Security Costs in the District of Columbia account or to reimburse localities that receive reimbursement from the State Department’s Protection of Foreign Missions Operations.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

The increase request will improve DHS' ability to achieve the DHS Secretary's Priority of Ensuring Resilience to Disasters.

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

*For necessary expenses for the National Special Security Event State and Local Reimbursement Fund, as authorized by 18 U.S.C. 3056, \$20,000,000, to remain available until expended for reimbursement, as determined by the Secretary, of the actual costs for eligible expenses of providing public safety and security at events related to the presence of an unplanned designated National Special Security events, of which not to exceed one percent may be used for management and administrative costs related to operating this account: Provided, That funds shall not be available to reimburse the District of Columbia or any other locality for an NSSE that receives reimbursement from other Federal funds, including the State Department's "Protection of Foreign Missions and Officials" account.*

## **A. Mission and Description of Component**

### ***Office of the Secretary and Executive Management (OSEM)***

The Office of the Secretary and Executive Management (OSEM) supports the Department and all of its components by providing leadership, direction, and management.. OSEM provides departmental guidance, establishes and implements policy and provides various support functions, and oversight to all entities within the Department. This enables the Department to increasingly function as a unified, strategy-driven organization in preventing terrorist attacks and enhancing security, securing and managing our borders, enforcing and administering our immigration laws, safeguarding and securing cyberspace , and ensuring resilience to disasters. OSEM establishes and implements policy, and provides guidance, direction and oversight to all entities within the Department to meet these missions. It is the responsibility of the OSEM to deliver quality customer support services while eliminating redundancies and reducing support costs. The Department continues to work toward integration and consolidation of its resources and operations to create a seamless organization that shares services, information, and best practices across previously stove-piped organizations.

The Office of the Secretary and Executive Management includes 13 separate offices that individually report to the Secretary. These offices include: the Immediate Office of the Secretary; the Office of the Deputy Secretary; the Office of the Chief of Staff; the Office of the Executive Secretary; the Office of Intergovernmental Affairs; the Office of Policy; the Office of Public Affairs; the Office of Legislative Affairs; the Office of the General Counsel; the Office for Civil Rights and Civil Liberties; the Office of Citizenship and Immigration Ombudsman; the Privacy Office, the Office of Counternarcotics Enforcement.

### ***Under Secretary for Management (USM)***

The Office of the Under Secretary for Management delivers quality administrative support services and provides both leadership and oversight for all departmental management functions: information technology; budget and financial management; procurement and acquisition; human capital; departmental security; and administrative services. The USM delivers departmental customer services, while eliminating redundancies and reducing support costs, with the objective of improving the effective and efficient delivery of business and management services throughout the Department.

The Under Secretary for Management includes the following offices: the Immediate Office for Under Secretary for Management (USM), the Office of the Chief Administrative Officer (OCAO), the DHS Nebraska Avenue Complex (NAC) Project, the Office of the Chief Human Capital Officer (OCHCO), the Office of the Chief Procurement Officer (OCPO), and the Office of the Chief Security Officer (OCSO).

### ***DHS Headquarters Consolidation Project***

The DHS HQ Consolidation Project is responsible for the collocation and consolidation of the Department through the lease consolidation and build out of the St. Elizabeths campus. The DHS Management Directorate provides the coordination, planning, policy, guidance, operational oversight and support, and innovative solutions for the “One DHS” campus.

### ***Office of the Chief Financial Officer (OCFO)***

The mission of the Office of Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department's budget, financial management, resource management and organizational performance management systems to ensure funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant laws and policies.

The OCFO has nine divisions: Budget; Program Analysis and Evaluation; Office of Financial Operations; Financial Management and Policy; Resource Management Transformation (Financial Systems); GAO and OIG Audit Liaison; Internal Control Management; Grants Policy and Oversight; and Workforce Development.

### ***Office of the Chief Information Officer (OCIO)***

The DHS OCIO, in collaboration with the DHS CIO Council, is responsible for implementing and maintaining the necessary Information Technology (IT) systems and infrastructure to support the missions and activities across the Department. The DHS CIO Council, chaired by the DHS CIO, is the senior governance body to ensure proper coordination and oversight of all DHS IT. DHS IT is managed under a federated model, in which OCIO establishes IT policy, develops IT strategy, and performs IT enterprise governance and oversight of all DHS. OCIO is also responsible for the development and operations of enterprise infrastructure and service programs. In addition to the OCIO, DHS components maintain IT organizations, including CIOs and Deputy CIOs, to support the development, implementation, operations, and maintenance of systems specific to supporting the component's mission.

### ***National Special Security Events (NSSE) State and Local Reimbursement Fund***

The mission of the National Special Security Event State and Local Reimbursement Fund is to provide a stable and manageable funding source for reimbursement to state and local authorities who provide security for unplanned national events as identified by the President - or his representative, the Secretary of DHS as National Special Security Events.

## **B. Major Programs and Key Strategic Goals**

### ***Office of the Secretary and Executive Management (OSEM)***

***Immediate Office of the Secretary:*** The Office of the Secretary continues to provide leadership, management and direction, and oversight for all of the Department's components. The Secretary serves as the top representative of the Department of Homeland Security to the President, to the Congress, and to the general public.

***Immediate Office of the Deputy Secretary:*** The Office of the Deputy Secretary supports the Secretary by providing leadership to the Department by focusing on internal management and direction. This role ensures that the Department will operate efficiently and effectively when carrying out its mission. The Office will continue to provide internal oversight to all Department

operations, allowing the Secretary to focus attention on more external matters concerning the Department of Homeland Security.

***Office of the Chief of Staff:*** The Chief of Staff is responsible for the coordination of all Department agencies, directorates, and offices. This office is responsible for the budget, information technology, and personnel functions, as well as COOP (Continuity of Operations), as they relate to the Immediate Office of the Secretary. The Office will continue to streamline, coordinate, and deliver initiatives and policies that will ensure the country's safety, response capacity, and freedoms.

***Office of the Executive Secretary:*** The Office of the Executive Secretary's mission is to support the Office of the Secretary Through the accurate and timely dissemination of information and written communications throughout DHS and with homeland security partners. The Executive Secretary will continue to assist the Office of the Secretary by developing, implementing, and managing business processes for written communications, briefing book materials for the Secretary and Deputy Secretary, and all White House and interagency actions.

***Office of Intergovernmental Affairs:*** The mission of the Office of Intergovernmental Affairs is to communicate and coordinate all State, Local, Tribal, and Territorial (SLTT) government actions throughout the Department. The Office of Intergovernmental Affairs will continue the responsibility of acting as liaison to the SLTT governments, as well as the national associations that represent them, to ensure there are open lines of communication with DHS and the stakeholders.

***Office of Policy:*** The Office of Policy is responsible for the coordination of Department-wide policies, programs, and planning to ensure consistency and integration of missions throughout the Department. The Office of Policy continues its efforts, which strengthen the Department's ability to maintain policy and operational readiness necessary to protect the Homeland by providing a centralized coordination point for developing and communicating policies across the multiple internal and external components of the Homeland Security network. The Office of Policy also interacts with other government entities, international counterparts, academics and private stakeholders.

***Office of Public Affairs:*** The Office of Public Affairs is responsible for oversight and management of all external and internal communications for the Department of Homeland Security. On a daily basis, the Office responds to national media inquiries, maintains and updates the Department's website, writes speeches for principals, and coordinates speaking events for Department officials across the country. The Office of Public Affairs also develops and manages various public education programs including the Ready Campaign to increase citizen preparedness.

***Office of Legislative Affairs:*** The Office of Legislative Affairs serves as the primary liaison to members of Congress and their staffs, the White House and Executive Branch, and to other Federal agencies and governmental entities that have roles in ensuring national security. The Office responds to inquiries from Congress and the White House; notifies Congress about Department initiatives, policies, and programs; and keeps other governmental bodies informed concerning Homeland Security measures that affect their operations.

***Office of the General Counsel:*** The General Counsel is the chief legal officer of the Department, serves as the chief legal advisor to the Secretary and is responsible for the sound and efficient management of the legal affairs of DHS. The Office of the General Counsel is responsible for ensuring the implementation of the Department's statutory responsibilities and policies as set forth by the Administration, the Secretary, and all officials within the Department. The Office provides legal counsel for all Departmental offices, other than those specifically excluded by regulation or directive, determines the Department's position to provide effective legal services involving claims, protests, litigation, and alternative dispute resolution, and represents the Department in all legal forums. OGC provides legal counsel for all DHS offices and components and works to ensure that the Department's efforts to secure the Nation are consistent with civil rights and liberties of all citizens, to integrate the more than 1,700 Departmental lawyers into an effective, client-oriented, full-service legal team, to assist in policy and operational initiative planning, and to communicate and coordinate with each DHS component on legal matters that affect the mission.

***Office for Civil Rights and Civil Liberties:*** The Office for Civil Rights and Civil Liberties is responsible for protecting civil rights and civil liberties, providing policy advice to Departmental leadership on civil rights and civil liberties issues, and serving as an information and communication channel to the public on these issues. The Office is also responsible for overseeing the Departmental Equal Employment Opportunity (EEO) programs, providing oversight and adjudications of EEO complaints, and directing the Department's Diversity Initiative.

***Citizenship and Immigration Services Ombudsman:*** The Citizenship and Immigration Services Ombudsman assists individuals and employers in resolving problems with United States Citizenship and Immigration Services (USCIS), identifies individual and employee problems areas within USCIS, and proposes changes to mitigate identified problems. The Office will continue to initiate and expand activities to promote interagency cooperation and holistic approaches to immigration and to prepare the office for an expected workload increase.

***Privacy Officer:*** The DHS Privacy Officer is the first statutorily mandated Privacy Officer within the Federal government. The Office ensures that appropriate access to information is consistent with the vision, strategic mission, and core values of the Department, and implements the policies of the Department to defend and protect the individual rights, liberties, and information interests of U.S. citizens. The Privacy Office has oversight of all privacy policy matters, including compliance with the Privacy Act of 1974, the Freedom of Information Act, and the completion of privacy impact statements on all new programs, as specified in the E-Government Act of 2002 and Section 222 of the Homeland Security Act. The Privacy Office will continue to protect the collection, use, and disclosure of personally identifiable information (PII) and Departmental information.

***Office of Counternarcotics Enforcement:*** The Office of Counternarcotics Enforcement (CNE) coordinates policy within the Department, and with other Federal, State, and Local agencies with respect to stopping the entry of illegal drugs into the United States. The Office ensures the adequacy of resources within the Department and recommends the appropriate financial and personnel resources necessary to help the Department fulfill its responsibilities to stop the entry of illegal drugs into the United States. In addition, CNE will support the coordination of Departmental and interagency efforts to track and sever the connections between drug trafficking and terrorism to prevent harm to U.S. citizens or interests.

***Under Secretary for Management (USM)***

The Under Secretary for Management provides the necessary functions of leading, directing, and managing the Department. In addition to providing leadership to the Department, the Under Secretary for Management is responsible for the major activities associated with budgeting, appropriations, expenditure of funds, accounting and finance, procurement, human resources and personnel, information technology systems, facilities, property, equipment and other material resources, personnel security, and the development and improvement of performance measures aligned with the mission and goals of the Department.

The Under Secretary for Management is divided into six major subprograms as follows:

***Immediate Office of the Under Secretary for Management (OUSM):*** The Immediate Office of the Under Secretary of Management (OUSM) ensures the Under Secretary for Management (USM) offices function effectively and efficiently in support of both the Department as a whole and the USM offices themselves.

***Office of the Chief Administrative Officer (OCAO):*** Administrative Services establishes policy and procedures as well as provides both departmental leadership and oversight for all functional areas managed by the DHS Chief Administrative Officer (CAO) and component Chief Administrative Officers. Functional areas include asset management (logistics, real estate, personal property, aviation, transportation, fleet, marine vessels), mail screening and delivery, occupational safety and health, environmental planning and management, historic preservation, energy management, records, directives, forms, library services, printing and graphics. In addition, OCAO also provides the day to day operational support for departmental headquarters and other components [Intelligence and Analysis (I&A); Operations Coordination and Planning (OPS); and the Science and Technology (S&T) directorate].

***DHS Nebraska Avenue Complex (NAC) Consolidation Project:*** Although the physical limitations of the NAC render it unsuitable as the permanent DHS Headquarters, DHS plans to retain this property to house certain mission support functions that will not relocate to the new Consolidated DHS Headquarters Campus at St. Elizabeths. Accordingly, DHS will need to continue to invest in this property to sustain our operational capabilities while St. Elizabeths is developed, and leverage those investments as we realign the overall real estate portfolio to support DHS operations and integration.

***Office of the Chief Human Capital Officer (OCHCO):*** The Office of Human Capital is organized around four major initiative areas (Talent Management, Performance Culture, Learning and Development, and Service Excellence) and is responsible for the implementation of the Human Capital Operational Plan, which contains specific actionable goals in support of the Human Capital Strategic Plan, the Strategy for Developing a Homeland Security University, the Secretary's Goals, and other Executive and Legislative Branch regulations and directives.

As a means of posturing itself to meet these challenges, the OCHCO has conducted a comprehensive, wall-to-wall review of all federal and contractor positions with a goal of realigning itself to reduce its significant over-reliance on contractor support, address priorities and carry out its policy and oversight responsibilities. Based on the results of that review, the OCHCO seeks to increase authorized staffing levels by 40 FTE within existing budgets by reducing and/or eliminating more expensive contractor support and re-directing the contractor dollars to fund federal

FTE. In doing so, the OCHCO will gain much greater control and accountability of outcomes, reduced reliance on contractor support, and more importantly, will be appropriately staffed to implement key strategies and action plans.

***Office of the Chief Procurement Officer (OCPO):*** The OCPO reports directly to the Under Secretary for Management, and is responsible for overall management, administration and oversight assistance, strategic sourcing and competitive sourcing programs. Functions of the OCPO include:

- Acquisition Policy;
- Competitive Sourcing and Privatization: Responsible for the Department's implementation of the Federal Activities Inventory Reform, Circular A-76, and the President's Management Agenda (PMA) Competitive Sourcing Initiative; and
- Strategic Sourcing and Acquisitions Systems: Responsible for managing the DHS strategic sourcing program and acquisition systems and data management.

***Office of the Chief Security Officer (OCSO):*** The mission of the Office of the Chief Security Officer is to secure the Department which, in turn, allows DHS to secure the homeland. The OCSO implements security programs that safeguard DHS personnel, property, facilities, and information. The Office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; and provides security support to components. Additionally, the Office investigates threats related to foreign intelligence, terrorism, and criminal activities within or directed against DHS.

### **DHS Headquarters Consolidation Project**

***DHS Headquarters Consolidation Project - Mission Support:*** The DHS Headquarters Consolidation Project proposes to reduce the total number of locations housing DHS and component headquarters facilities, which currently stands at over 40 locations and 70 buildings scattered throughout the National Capital Region (NCR) for more efficient management.

***DHS Headquarters Consolidation Project – St. Elizabeths:*** The DHS Headquarters Consolidation Project is in accordance with the DHS National Capital Region Housing Master Plan signed by the Secretary and submitted to the Congress on October 25, 2006 as required by Public Law 109-295 (FY 2007 Homeland Security Appropriations Act). The project will consolidate executive program leadership of the Department in a secure setting for policy, management and operational coordination to facilitate the incident management functions as well as command and control capabilities.

### **Office of the Chief Financial Officer (OCFO)**

***Office of the Chief Financial Officer (OCFO):*** In FY 2011, the OCFO will refine and expand DHS financial management community human capital initiatives that strengthen our organizational culture and identity; update the financial management policy manual and improve consistency of handling financial transactions and processes across the DHS enterprise; eliminate many internal control and financial audit weaknesses; migrate more DHS components to modern resource management systems; enable improved decision making through business intelligence tools; and continue identifying vulnerabilities to fraud, waste, and abuse through internal assurance

reviews and developing and strengthening internal controls to prevent fraud, waste, and abuse. Further, OCFO will continue to build the Department's grants management and oversight function to issue policy, conduct audits mandated by the Single Audit Act, and monitor DHS grants and assistance awards of approximately \$20 billion.

### **Office of the Chief Information Officer (OCIO)**

**Office of the Chief Information Officer (OCIO):** The OCIO provides a myriad of IT related services and support throughout DHS. To comply with components' IT mission requirements and to ensure alignment with the Department's strategic goals and objectives, the DHS CIO community developed the following IT strategic goals:

1. Establish secure IT infrastructure capabilities to protect the Homeland and enhance our Nation's preparedness, mitigation and recovery capabilities.
2. Strengthen and unify the Department's ability to share information internally and with Federal, State, Local and Tribal partners.
3. Effectively manage IT capabilities and implement cross-departmental IT portfolios that enhance mission and business performance.
4. Develop and implement a comprehensive approach to IT employee recruitment, development, retention, and recognition to ensure excellence in IT delivery across the Department.

With those goals in mind, the OCIO program is divided into four major program, project and activities (PPAs): Salaries and Expenses, Information Technology Services, Infrastructure and Security Activities, and National Security Systems.

### **National Special Security Events (NSSE) State and Local Reimbursement Fund**

The NSSE State and Local Reimbursement Fund provides a reimbursable funding source for major events that are considered to be nationally significant by the President - or his representative, the Secretary of DHS. Beginning in September 1998 through February 2008, there have been 28 events designated as NSSEs. Some of these events have included presidential inaugurations, presidential nominating conventions, major sports events and major international meetings. Since the standup of DHS, there have been five unplanned NSSEs including presidential funerals and world economic summits (i.e., G8 and G20).

## **C. Resources Requested and Performance Impact**

### **Office of the Secretary and Executive Management (OSEM)**

The Office of the Secretary and Executive Management requests 647 positions, 645 FTE, and \$157.041M for FY 2011. This represents an increase of 25 positions, 42 FTE, and \$9.223M over the FY 2010 enacted budget of 622 positions, 603 FTE, and \$147.818M. Within this increase, 19 FTE and \$2.184M are requested for adjustments to base and 25 positions, 23 FTE, while \$11.407M are requested for program changes.

### **Under Secretary for Management (USM)**

The Under Secretary for Management requests 1096 positions, 1046 FTE, and \$266.969M for FY 2011.

Current Services: The total adjustments-to-base is 212 positions, 259 FTE, and a decrease of \$5.806M.

Program Increases: The Under Secretary for Management is requesting a total of \$24.236M and 150 FTP/FTE in a program increase for FY 2011. The program increase will:

- Bolster and enhance the Department's Acquisition Workforce by increasing staff in the Acquisition Professional Career Program, the Acquisition Program Management Division (APMD) and other areas of the acquisition professional workforce to improve contracting oversight. (150 positions, 150 FTE, and \$24,235,700).

Program Decreases: In FY 2011, the USM will reduce the scope or eliminate the following programs and initiatives for a total programmatic decrease of \$5.651M. The decreases are as follows:

- USM Front Office Contractor Support (\$128K)
- CAO Internal Controls (\$400K)
- OCAO Decision Support and System Development (\$78K)
- OCAO Environmental Planning and Historic Preservation (EP & HP) Program Management Support (\$160K)
- OCAO Technical and Program Support (\$300K)
- OCAO System Administration for EP & HP (\$110K)
- OCHCO Human Capital Operations Contractor Support (\$1.150M)
- OCPO Centralized Training (\$1.479M)
- OCPO Contractor Support (\$1.846M)

### **DHS Headquarters Consolidation Project**

The DHS Headquarters Consolidation Project requests 0 positions, 0 FTE, and \$362.8M in FY 2011.

Current Services: This is a new program for FY 2011.

Program Increases: The DHS Headquarters Consolidation Project is requesting a total of \$362.8M and 0 FTP/FTE in program increases for FY 2011. The program increases are as follows:

- DHS HQ Consolidation – Mission Support: Begin consolidation of the total number of locations housing DHS and component headquarters facilities, which currently consist of over 40 locations and 70 buildings scattered throughout the National Capital Region (NCR) (0 positions, 0 FTE, and \$75M).
- DHS HQ Consolidation – St. Elizabeths Project: Consolidate executive program leadership of the Department in a secure setting for policy, management and operational

coordination to facilitate the incident management functions and command and control capabilities (0 positions, 0 FTE, and \$287.8M). The \$287.8M will support the continuation of the Phase 1 development of the United States Coast Guard (USCG) Headquarters and initiate construction of the Phase 2A DHS Headquarters, and the National Operations/Collocation of Component Operations Centers.

### **Office of the Chief Financial Officer (OCFO)**

In FY 2011, the Office of the Chief Financial Officer requests 221 positions, 202 FTE, and \$65.552M. The request includes resources for 221 positions, primarily in the following occupational series: budget analyst, management and program analyst, staff accountant, systems accountant; financial analyst; and auditor.

Current Services: The budget request for FY 2011 for the Office of the Chief Financial Officer contains the following major changes within base level:

- An increase of 38 positions (19 FTE) for increased staffing in the Resource Management Transformation Office (RMTO) and for financial management activities. This DHS Balanced Workforce Strategy of contractor to FTE conversions is being achieved within current services levels to ensure efficiencies, cost effective performance improvements, and a more appropriate balance between in-house and contract resources.
- An increase of \$1.7M to fund existing Personnel cost growth,
- An increase of \$22K to pay for additional GSA rent due to increased space.
- An increase of \$75K to pay for additional Working Capital Fund contributions.

Program Increases: The budget request for FY 2011 for the Office of the Chief Financial Officer contains the following additional changes:

- An increase of \$3.3M to improve financial management in the Department. The OCFO will enable internal assurance teams to conduct reviews of Department operations, remedy GAO/IG high risk/management challenge areas, and strengthen internal controls over operations. The OCFO will also support a series of external evaluations of programs to be conducted periodically by Federally Funded Research and Development Centers or other independent parties outside the Department and enhance the Program Analysis and Evaluations (PA&E) mission to provide information on key analytical issues to Department leadership and the Administration.

### **Office of the Chief Information Officer (OCIO)**

In FY 2011, the Office of the Chief Information Officer requests 322 positions, 309 FTE, and \$398.459M.

Current Services: The Office of the Chief Information Officer is requesting 322 positions, 309 FTEs and \$342.424M in current services for FY 2011. The total adjustment to base is an increase of 27 positions, 106 FTE, and \$4.031M over the FY 2010 revised enacted level. The OCIO is committed to building a strategic human capital planning capability that is supported by a structured total workforce approach; one that seeks efficiencies, cost effective performance improvements, and

a more appropriate balance of in-house and contractor resources. During FY 2010, and with the FY 2011 request, the OCIO is implementing a DHS Balanced Workforce Strategy involving contractor conversions and the creation of additional personnel positions to provide greater government oversight and management of IT projects. The additional positions being requested in FY 2011 will be funded through the realignment of base resources resulting from the conversion of contractors to federal employees.

The increases in current services include a transfer from the National Protection and Programs Directorate (NPPD), Working Capital Fund costs, General Services Administration (GSA) rent costs, and pay inflation. In FY 2011, the DHS OCIO will continue to provide governance, management, and oversight of the Department's IT portfolios, capital planning, and strategic planning and budgeting for IT acquisitions, to ensure alignment with the Secretary's Goals, the DHS OCIO IT Strategic Goals, and the Enterprise Architecture. The DHS OCIO will continue to promulgate and implement DHS IT Security policy, governance, and security architecture guidance for all Departmental IT acquisitions as well as deliver and improve infrastructure services. The DHS OCIO will also continue its efforts to accelerate the consolidation of multiple data centers, networks, and services to comply with the One DHS, One Infrastructure policy.

Program Increases: The OCIO is requesting a total of \$56.035M and 0 FTEs in program enhancements for FY 2011. The program increases include the following:

- Office of Accessible Systems and Technology - \$1.358M - In FY 2011, the DHS Office of Accessible Systems and Technology (OAST) will be established and function as a separate office within OCIO. Funding will be used to support the O&M and enhancements for the Accessibility Compliance Management System and to purchase Section 508-related testing tools for use by component-level testing programs across DHS. A majority of the funds will be used to fund contract-support services in the following areas: Section 508 compliance quality assurance and independent validation and verification of Commercial Off-the-shelf (COTS)/Government Off the Shelf (GOTS) products and systems; services to modify existing training courses (both online and in the classroom) to reflect the new Section 508 Technical Standards; ongoing strategic planning activities to position OAST to better meet accessibility compliance and governance needs; oversight and evaluation of component-level Accessible Systems and Technology Programs; and ongoing oversight of accessibility compliance in change management, Enterprise Architecture, FISMA systems reporting, and acquisitions review activities.
- Enterprise Service Delivery - \$5M - DHS currently lacks a cross-enterprise information sharing and collaboration capability. In response to leadership's priority to unify the Department, the DHS OCIO is working with component CIOs and Business Offices, including the Office of Public Affairs, to develop SharePoint as a Service as part of the Web 2.0 initiative. Funding will go towards consolidating legacy component Web 2.0 infrastructure at legacy Data Centers which will be integrated into the target SharePoint environment at the Department's Data Centers. Funds will be used to support the target intranet website (DHSONline replacement) for use by components, Idea Factory, and other enterprise unifying initiatives.

- Enterprise Data Management – \$7.609M - Additional funding will enable the Enterprise Data Management Office to put in place procedures and practices across the components that will lower development costs and decrease O&M costs significantly. It will also enable DHS to support the NIEM Program Management Office, including support of state and local participation in the Information Sharing Environment through the use of tools, training and technical support for the NIEM program. The additional funds will enable DHS to build data standards for the Information Sharing Environment, such as Alerts and Warnings, Suspicious Activity, Terrorist Watch Lists, and Cargo/Trade Screening. All of these initiatives will increase the success of the DHS goals for Information Sharing and increase the effectiveness of DHS Terrorism Preparedness, Prevention, and the Response Discretionary Grants program.
- Information Security Infrastructure – \$32.268M - Increased funding will enable the following security infrastructure enhancements:

**E-mail:** DHS will consolidate component messaging systems into the DHS Stennis and EDS data centers with the standup of a unified E-mail as a Service (EaaS) capability. The requirements for the EaaS offering have been jointly defined by representatives from each of the components.

**Single Sign-on (SSO) and PKI:** SSO funding will leverage technologies to improve the timeliness of secure access of mission applications for DHS employees and Federal, State, Local and Private sector partners. Implementing SSO will enable DHS computer users to log-in to their systems with a single set of credentials, accessing multiple applications, thus minimizing the need for a user to log-in multiple times for different applications. SSO will also provide the ability to manage user names and passwords across potentially hundreds of applications throughout DHS. Ultimately, this will provide additional security and auditing to support the complexities of the DHS IT infrastructure.

- Homeland Top Secret Network (HTSN) - \$16.1M - The requested increase will provide a centrally governed and managed enterprise-level TS/SCI network that is highly scalable, and has the flexibility to add server and storage resources as needed. It will leverage existing and planned DHS network circuits to DHS components, enabling intra-DHS TS/SCI communication, including shared redundant and controlled access to JWICS and Intelligence Community resources. HTSN will provide an infrastructure on which to host existing and planned intelligence applications, consolidated common provisioning of enterprise applications including Microsoft Office, file shares, and e-mail; central network and security operations and monitoring capability; leverage type-certified workstation solutions; wide area network (WAN) and communication interface designs; and provide centrally managed back-up, Disaster Recovery (DR), and COOP capability for the TS/SCI network.

Program Decreases: In FY 2011, the OCIO will eliminate one program and reduce the scope of another for a total programmatic decrease of \$6.3M. The decreases include the following:

- Applied Information Technology and Research Services (\$1.1M) – The Applied Information Technology and Research Services program will be eliminated along with the subscriptions to the IT research services used by component CIO organizations for evaluation technology, support alternative analysis, and to introduce innovation into the Enterprise Architecture.
- Infrastructure Operations (\$5.2M) - The OCIO will continue to strive for efficiencies while providing the same level of service for DHS HQ A- and C-LANs for the disaster recovery (DR) program. The OCIO will continue to maximize resources while implementing project schedules towards a full disaster recovery capability. This decrease will not impact OCIO’s ability to protect the department’s critical IT infrastructure.

**National Special Security Event (NSSE) State and Local Reimbursement Fund**

In FY 2011, NSSE State and Local Reimbursement Fund is requesting \$20M to provide a stable and manageable source for reimbursement to state and local authorities who provide security for national events as identified by the President - or his representative, and the Secretary of DHS. This is a new program beginning in FY 2011.

**D. Performance Highlights, Resources, and Alignment to Strategic Goals<sup>1</sup>**

**Office of the Secretary and Executive Management (OSEM)**

For each program, the program performance goal, alignment to the DHS Secretary’s Priorities total dollars and FTE, and Government Performance and Results Act (GPRA) performance plan measures are shown below. Additional measures are also displayed, as appropriate, to provide a more thorough context of expected performance results.

<b>Program: Office of the Secretary and Executive Management (OSEM)</b>						
<b>Performance Goal:</b> Provide comprehensive leadership, oversight, and support to all Components and improve the efficiency and effectiveness of the Department and its business and management services.						
Secretary’s Priority: Mature and Strengthen the Homeland Security Enterprise						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$78,615	\$95,336	\$101,393	\$140,842	\$147,818	\$157,041
<b>FTE</b>	416	469	542	598	603	645

<sup>1</sup> Performance plans will be developed for the National Special Security Event State and Local Reimbursement Fund in 2010.

**Under Secretary for Management (USM)**

Under Secretary for Management – Consolidate support services under the control of the Department of Homeland Security in order to maximize management efficiencies and ensure continuity of services in the near term.

For each major program, the performance goal, alignment to the Secretary’s Goals, total dollars and FTEs, and main performance measures are shown below.

<b>Program: Under Secretary for Management</b>						
<b>Performance Goal:</b> Provide comprehensive leadership, oversight, and support to all Components and improve the efficiency and effectiveness of the Department and its business and management services.						
<b>DHS Secretary’s Priority:</b> Mature and Strengthen the Homeland Security Enterprise						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$167,147	\$149,540	\$149,498	\$391,793	\$254,190	\$266,969
<b>FTE</b>	265	283	352	466	637	1046

**Performance Plan Measures**

<b>Measure:</b> Attrition rate for career Senior Executive Service personnel						
<b>Description of Measure:</b> This measure reflects the number of career Senior Executive Service personnel who depart from the Department of Homeland Security due to retirements, transfers, resignations, and deaths. The Senior Executive Service plays a critical role as a central coordinating point between the Government's political leadership which sets the political agenda and the line workers who implement it. Managing the attrition rate for the Senior Executive Service is critical to maintaining a cadre of qualified leaders.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	11.5%	10.5%	9%	9%
<b>Actual:</b>	None	None	11%	8.9%	N/A	N/A

<b>Measure:</b> Percent of major acquisition projects that do not exceed 10% of cost/schedule/performance objectives						
<b>Description of Measure:</b> This measure reports the percent of Department and component major capital acquisition projects collectively that do not exceed cost, schedule, or performance objectives established in individual Acquisition Program Baseline plans by more than 10%. Acquisition Program Baselines (APB) establish projected cost, schedule, and performance milestones against which actual milestones are compared for this measure. Major acquisition projects are defined as the procurement of capital assets exceeding \$100M in acquisition costs for non-Information Technology assets, Information Technology systems that exceed \$100M in life cycle costs, and other programs designated as major by the Secretary. By meeting cost, schedule, and performance objectives, the Department is able to deliver capital equipment in a timely fashion that enable mission activities while being responsible stewards of appropriated funds.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	New	50%	45%	47%
<b>Actual:</b>	None	None	None	97.1%	N/A	N/A

Note Expansion in the number of projects included in this measure, and increased oversight criteria, will likely result in DHS in finding more major projects not meeting their cost, schedule, and performance thresholds. Thus the FY 2010 target has been set to be lower than the FY 2009 result. Steps taken by the Department to improve project staffing and training will take time to impact project performance before being reflected in improved project execution.

<b>Measure:</b> Percent of favorable responses by DHS employees on the annual employee survey						
<b>Description of Measure:</b> This measure reflects the average percent of positive responses to the 39 questions which make up the four Human Capital Assessment and Accountability Framework Indices (HCAAF) on the annual employee survey. The U.S. Office of Personnel Management (OPM) has determined the make up of the four HCAAF Indices as: Leadership and Knowledge Management; Results - Oriented Performance Culture; Talent Management; and Job Satisfaction. Employee surveys are conducted annually to gauge employees' perceptions on whether they are effectively led and managed, if they have opportunities to grow professionally and advance in their careers, and if their contributions are valued and recognized. The OPM conducts this survey during even-numbered years and the identical survey is administered by the DHS during the odd-numbered years. The survey results are used by DHS agency managers to address human capital management issues and improve agency performance in these areas.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	50%	51%	55%	56%
<b>Actual:</b>	None	None	50%	54%	N/A	N/A

<b>Measure:</b> Percent of DHS workforce (employees and contractors) with advanced identification cards						
<b>Description of Measure:</b> This measure indicates the percent of Department of Homeland Security federal employees and contractors that have been issued Personal Identifiable Verification cards with advanced features. Advanced identification cards are outfitted with a microchip that stores personal information, including biometric data (such as fingerprints) that can be read automatically by a card reader to check information against a database. If a match is verified and the person has been granted appropriate permissions, the person is permitted entry into a government facility and/or can log on to a computer workstation. This effort is being undertaken to comply with Homeland Security Presidential Directive - 12 (HSPD - 12) in order to ensure that government facilities and sensitive information stored in them are secure.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	New	20%	24%	76%
<b>Actual:</b>	None	None	None	4.8%	N/A	N/A

### **DHS Headquarters Consolidation Project**

<b>Program: DHS Headquarters Consolidation Project</b>						
<b>Performance Goal:</b> Provide comprehensive leadership, oversight, and support to all Components and improve the efficiency and effectiveness of the Department and its business and management services.						
<b>DHS Secretary's Goals:</b> Mature and Strengthen the Homeland Security Enterprise						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$0	\$0	\$0	\$200,000	\$0	\$362,800
<b>FTE</b>	0	0	0	3	0	0

<sup>1</sup> FY 2009 includes \$200M from the American Recovery and Reinvestment Act. Beginning in FY2010, the 3 FTEs will be absorbed and paid from the Office of the Chief Administrative Officer S&E account, under the USM appropriation.

### **Office of the Chief Financial Officer (OCFO)**

<b>Program: Office of the Chief Financial Officer</b>						
<b>Performance Goal:</b> Provide comprehensive leadership, oversight, and support to all Components and improve the efficiency and effectiveness of the Department and its business and management services.						
<b>DHS Secretary's Goals:</b> Mature and Strengthen the Homeland Security Enterprise						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$19,211	\$26,000	\$31,300	\$55,235	\$60,530	\$65,552
<b>FTE</b>	87	97	120	139	173	202

### Performance Plan Measures

<b>Measure:</b> Percent of improper payments collected						
<b>Description of Measure:</b> This measure reflects the percent of overpayments that the Department has recovered from the total dollar amount of identified recoverable erroneous payments. Improper contract payments to vendors are identified through a recovery audit process, and any other improper payments made by Components are identified through a payment sampling process. Debts over 180 days delinquent are turned over to the Department of the Treasury's Offset Program (TOP). Alternately, Components may offset debts from future payments to the same vendor. Tracking of collection data promotes oversight by the Department. Recoupment of improper payments save taxpayers money.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	New	52%	85%	86%
<b>Actual:</b>	None	None	None	89.7%	N/A	N/A

<b>Measure:</b> Percent of vendors paid electronically						
<b>Description of Measure:</b> This measure reflects the percent of vendors that are paid using Electronic Funds Transfer for payment of invoices. The Debt Collection Improvement Act requires the use of Electronic Funds Transfer for most Federal payments. An Electronic Funds Transfer is any transmission of monies, other than by cash, check, or similar paper, made through an electronic means. The Treasury Department indicates that it costs the Government \$0.98 to issue a payment by check and \$0.10 to issue an Electronic Funds Transfer payment. Payments made electronically reduce the administrative cost to the Government.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	New	96.5%	96%	96%
<b>Actual:</b>	None	None	None	97.5%	N/A	N/A

<b>Measure:</b> Interest penalties paid on all invoices (in millions)						
<b>Description of Measure:</b> This measure reflects the amount of interest penalties incurred by the Department of Homeland Security for late payment of invoices submitted by vendors that provided goods and services to the Government. The Prompt Payment Act requires that Federal agencies pay all approved vendor invoices in a timely manner. The Act assesses late interest penalties against agencies that pay vendors after a payment due date. Reducing the amount of interest paid ensures that all Department of Homeland Security vendors are paid in a timely manner without additional cost to the Government.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	\$300	\$250	\$200	\$200
<b>Actual:</b>	None	None	None	\$169.3	N/A	N/A

<b>Measure:</b> Percent of accounts receivable from the public delinquent over 180 days						
<b>Description of Measure:</b> This measure reflects the percent of dollars owed to the Department and its Components from individuals and organizations that are more than 180 days past the due date. By collecting these dollars sooner, the Department receives the cash in a timeframe that it can be used in a more effective manner. Money tied up in the collections process cannot be used by the Department to provide the services the American public expects.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	20%	15%	15%
<b>Actual:</b>	None	None	None	17.70%	N/A	N/A

<b>Measure:</b> Percent of non - credit card invoices paid on time						
<b>Description of Measure:</b> This measure reflects the percent of invoices paid by the payment due date by the Department of Homeland Security and its Component agencies for all goods and services purchased through means other than the Government Purchase Credit Card. The Prompt Payment Act requires that Federal agencies pay all approved vendor invoices within certain time periods and to pay interest penalties when payments are late. Increasing the percent of invoices paid on time ensures that all Department of Homeland Security vendors are paid in a timely manner and interest penalties are avoided.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	98.5%	98%	98%
<b>Actual:</b>	None	None	None	96.09%	N/A	N/A

<b>Measure:</b> Total instances of material weakness conditions identified by the independent auditor in their report on the DHS financial statements.						
<b>Description of Measure:</b> The number reported is the total instances of material weakness conditions in both the DHS Office of Financial Management and DHS components. A material weakness is a deficiency significant enough to be reported outside the agency.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	n/a	< 25	<16	<12	<11	<10
<b>Actual:</b>	25	16	13	12	N/A	N/A

***Office of the Chief Information Officer (OCIO)***

<b>Program: Office of the Chief Information Officer</b>						
<b>Performance Goal:</b> Provide comprehensive leadership, oversight, and support to all Components and improve the efficiency and effectiveness of the Department and its business and management services.						
<b>DHS Secretary's Goals:</b> Mature and Strengthen the Homeland Security Enterprise						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$294,257	\$330,549	\$289,092	\$272,169	\$338,393	\$398,459
<b>FTE</b>	78	87	91	94	203	309

## Performance Plan Measures

<b>Measure:</b> Percent of major Information Technology systems with full Federal Information Security Management Act Compliance						
<b>Description of Measure:</b> Information security is vital to U.S. economic and national security interests. This measure assesses the percent of the Department's major IT systems in the operations and maintenance phase that meet all Federal Information Security Management Act (FISMA) requirements. FISMA requires agencies to develop, document, and implement an agency-wide program to protect information and information systems from unauthorized access, use, disclosure, disruption, modification, or destruction. Major IT systems are defined as: important to the mission of the agency; for financial management obligating more than \$500K annually; having significant program or policy implications; high executive visibility, high development, operating, or maintenance costs; funded through other than direct appropriations; or defined as major by the agency's capital planning and investment control process. The targets reveal that there are always systems in a lifecycle transition phase.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009*	FY 2010	FY 2011
<b>Target:</b>	None	None	None	90%	90%	90%
<b>Actual:</b>	None	None	None	92%	N/A	N/A

<b>Measure:</b> Percent of major investments currently aligned to the Agency Enterprise Architecture.						
<b>Description of Measure:</b> This measure assesses how many of the Department's major (Level 1 and 2) investments are aligned with the DHS Enterprise Architecture. Enterprise Architecture is a blueprint for describing the enterprise and is one tool for managing change within DHS. Enterprise Architecture ensures that all investments are aligned to strategic goals and the target Enterprise Architecture for achieving those goals. Investment programs that align to the target Enterprise Architecture for the Department receive authority to proceed with their implementation. Investment programs determined not to align with the target Enterprise Architecture are provided recommendations on how to enhance their alignment before proceeding forward. The Enterprise Architecture alignment is important for improving mission effectiveness and operational efficiency while ensuring that all investments are not creating unnecessary redundancies.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009*	FY 2010	FY 2011
<b>Target:</b>	None	None	None	25%	50%	60%
<b>Actual:</b>	None	None	None	44%	N/A	N/A

\*The above performance measures are new measures beginning in FY 2009.

### E. High Priority Performance Goals

#### **High Priority Performance Goal:**

**Improve Acquisition Execution Across the DHS Acquisition Portfolio, by ensuring Key Acquisition Expertise resides in Major Program Office and Acquisition Oversight Staffs throughout the Department.**

DHS' performance in executing its acquisition portfolio requires improvement. Recent steps at the Department level and in some Components (developing and issuing improved acquisition policy and processes, creating and staffing dedicated acquisition oversight and assistance offices) have produced notable improvements in this important area.

In order for DHS to achieve an environment where superior acquisition is consistently achieved, though, all major program offices and Component acquisition staffs must be manned with a core combination of government personnel possessing requisite experience and knowledge in major acquisition disciplines (program management, systems engineering, business and financial management, logistics, contracting, test and evaluation, and cost analysis).

**Performance Measures**

<b>Component</b>	<b>FYHSP Program Name</b>	<b>Program Performance Goal</b>	<b>Performance Measure</b>	<b>Secretary's Priority</b>
<u>USM (Chief Procurement Office)</u>	<u>Departmental Management and Operations</u>	Provide comprehensive leadership, oversight, and support to all Components and improve the efficiency and effectiveness of the Department and its business and management services. # BUDGET REQUEST AND SUPPORTING INFORMATION

## Analysis and Operations

### I. Appropriation Overview

#### A – Mission Statement for Analysis and Operations

The Analysis and Operations appropriation provides resources for the support of the Office of Intelligence and Analysis and the Office of Operations Coordination and Planning. Even though these two offices are different and distinct in their missions, they work together and with other DHS components to support the Department's mission of protecting the homeland. The mission of Intelligence & Analysis is to provide homeland security intelligence to the Secretary, other government officials, and State, Local, and Private Sector partners. The mission of the Office of Operations Coordination and Planning is to integrate DHS and interagency planning and operations coordination in order to prevent, protect, respond to, and recover from terrorist threats/attacks or threats from other man-made or natural disasters.

#### B – Budget Activities:

*Office of Intelligence and Analysis (I&A)* - As a member of the U.S. Intelligence Community (IC), I&A is the nexus between the nation's intelligence apparatus and DHS components and other State, Local, and Private Sector (SLP) partners. I&A ensures that information is gathered from all relevant DHS field operations and other SLP partners and that this information is shared with appropriate stakeholders to produce accurate, timely and actionable analytical intelligence products and services. The Under Secretary for Intelligence and Analysis (U/SIA) leads I&A, and is also the Department's Chief Intelligence Officer (CINT), responsible for managing the entire DHS Intelligence Enterprise, and the Department's Chief Information Sharing Officer, responsible for implementing the objectives of the Program Manager – Information Sharing Environment (PM-ISE) within DHS.

*Office of Operations Coordination and Planning (OPS)* - OPS plays a pivotal role in DHS' mission to lead the unified national effort to secure America by facilitating the Secretary's responsibilities across the full spectrum of incident management (prevention, protection, response and recovery). OPS provides situational awareness, assessments and operations coordination for the DHS Secretary and facilitates operational information sharing with all DHS components, as well as for Federal, State, local, tribal, private sector and international partners. In support of the Secretary's role as principal Federal official for domestic incident management, OPS develops and coordinates Departmental and interagency strategic-level operations plans.

**C – Budget Request Summary:**

The Analysis and Operations account requests 955 positions, 870 FTE and \$347,930,000 for FY 2011. Details regarding the program increases can be found in the classified annex.

**iii. Status of Congressional Requested Studies, Reports, and Evaluation**

**Department of Homeland Security  
Office of Inspector General  
Audits, Inspections, and Investigations Program  
Summary of Requirements**

<b>Fiscal Year Statutory Citation</b>	<b>Reference/Citation</b>	<b>Requirement</b>	<b>Status</b>
1978	Inspector General Act of 1978 [PL 95-452] sec. 5	Semiannual Report to Congress - IG Act requires semiannual reports summarizing the activities of the office during the preceding six-month period	In Progress
1991	CFO Act [PL 101-576] 104 STAT. 2852 Sec. 304	Annual Audit of DHS' Consolidated Financial Statements - The Chief Financial Officers Act requires that an annual financial statement audit be performed at DHS.	In Progress
2002	Reports Consolidation Act of 2002 [PL 106-531] 114 STAT 2538, sec. 3516 (d)	Annual Report on Major Management Challenges - Congress requires an IG report that summarizes what the IG considers to be the most serious management and performance challenges facing the agency and briefly assesses the agency's progress in addressing those challenges. Report is included in the Department's annual report submitted to President, the Director of the OMB and Congress no later than 150 days after the end of the agency's fiscal year.	In Progress
2003	E-Government Act of 2002 [PL 107-347], 116 STAT. 2953 Sec. 3545(b); House Report 107-787 Sec. 3535 (b)(1), p. 34, p. 80, p. 102, p. 109	Annual Information Security Review - Annual independent evaluation of the information security program and practices of the agency to determine the effectiveness of such program and practices.	In Progress
2003	The Homeland Security Act of 2002 [PL 107-296] 116 STAT. 2250 Sec. 888(f)	Annual USCG Mission Review - Annual review to assess thoroughly the performance by the Coast Guard of all missions of the Coast Guard, with a particular emphasis on examining the non-homeland security missions.	In Progress

2005	DHS Financial Accountability Act [PL 108-330] 118 STAT. 1277 Sec. 4; OMB Circular A-123, Appendix A, II-V	Annual Audit of DHS' Internal Control Over Financial Reporting - Annual audit, jointly conducted by the Chief Financial Officers Council and the President's Council on Integrity and Efficiency (PCIE), of DHS' internal control over financial reporting to express an opinion about whether DHS has maintained effective internal control. OMB Circular A-123, Management's Responsibility for Internal Control (Revised), requires agency management to assess and document internal control over financial reporting; identify needed improvements; take corresponding corrective action; and make an assertion about the effectiveness of internal control over financial reporting. The audit will assess DHS management's assertion and effort to implement the Circular, which addresses financial performance in the President's Management Agenda.	In Progress
2005	The Coast Guard & Maritime Transportation Act 2004 [PL 108-293], 118 STAT. 1087 Sec. 809(g)	Annual Cargo Inspection Report - Inspector General report evaluating cargo inspection targeting system for international intermodal cargo containers.	In Progress
2004	Coast Guard and Maritime Transportation Act of 2004, PL 108-293, Sec. 213(c)(3), p. 11.	National Coast Guard Museum - (3) a certification by the Inspector General of the department in which the Coast Guard is operating that the estimates provided pursuant to paragraphs (1) and (2) are reasonable and realistic.	In Progress
2007	9-11 Commission Act of 2007 [PL 110-53], 121 STAT. 288-89; Conference Report 110-259 Sec. 2022 (A), p. 23-25	Annual Review of Grants to States and High Risk Urban Areas - Requires OIG to conduct audits of a sample of states and high-risk urban areas that receive grant monies. One audit of each state must be conducted every 7 years.	In Progress
2007	9-11 Commission Act of 2007 [PL 110-53], Conference Report 110-259 Sec. 2022 (D), p. 25.	The Inspector General of the Department shall submit to the appropriate committees of Congress an annual consolidated report regarding the audits completed during the fiscal year before the date of that report. For each year, the report required under clause (i) shall be submitted not later than December 31.	In Progress
2007	ONDCP Circular, Drug Control Accounting	Annual Office of National Drug Control Policy (ONDCP) Review - Reviews at CBP, USCG, and Immigration and Customs Enforcement (ICE) - Under 21 U.S.C. 1704 (d) and the ONDCP Circular, Drug Control Accounting, our office is required to perform a review of assertions made by management related to FY 2007 obligations for the National Drug Control Program.	In Progress

2008	Executive Order (EO) 13462; EO 12333	Intelligence Oversight and Quarterly Reporting - Final Report Each Quarter - Executive Order (EO) 13462 requires us to report on Departmental compliance with EO12333, identifying violations and mitigating actions taken in response. Intelligence elements of the Department include the Office of Intelligence and Analysis, the USCG National Intelligence Element, and those elements of the Department of Homeland Security concerned with the analysis of intelligence information. The report, signed by the IG and DHS General Counsel, is submitted quarterly to the Intelligence Oversight Board, a standing committee of the President's Intelligence Advisory Board.	In Progress
2010	FY 2010 Appropriations, HR 2892 (enrolled) Title II, p. 8; Conference Report, H Rept 111-298, Title II, p. 23; Joint Explanatory Statement, Title II, p. 31; House Committee Report 111-157, Title II, p. 51	ICE's 287(g) Agreements Report – Report on the performance of Immigration and Customs Enforcement 287(g) agreements [between ICE and state and local officials]	In Progress
2010	FY 2010 Appropriations, HR 2892 (enrolled), Title V, Sec. 521(d), p. 31; Conference Report, H Rept 111-298, Title V, Sec. 521(d), p. 95; Joint Explanatory Statement, Title V, Sec. 521, p. 111; S 1298, Title V, Sec. 525(d), p.64; Senate Committee Report 111-31, Title V, Sec. 525, p.131; House Committee Report 111-157, Title V, Sec.	Non-competitive Contracts Review – Review departmental contracts awarded non-competitively and report on the results to the Committees on Appropriations	In Progress
2010	FY 2010 Appropriations, HR 2892 (House engrossed) Title V, Sec. 545(b)(1)(C), p.82	Protection of Social Security Programs – Joint review by the SSA OIG and DHS OIG of annual accounting and reconciliation of the actual costs incurred and the funds provided under the agreement between the DHS Secretary and SSA Commissioner which provides funding to the Commissioner for the full costs of the Commissioner's responsibilities under section 404 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996.	In Progress
2010	FY 2010 Appropriations, House Committee Report 111-157, Title II, p.55	ICE Age Determinations – Committee directs the IG to continue to review ICE practices for determining the age of those in its custody, and to report to the Committees on Appropriations on any cases where ICE uses bone or dental forensic examinations.	In Progress

2010	FY 2010 Appropriations, Joint Explanatory Statement, Title I, p. 17 and Title III, p. 75; House Committee Report 111-157, Title III, p. 103	FEMA Hiring Practices – Committee directs the IG to investigate the hiring practices of FEMA as it pertains to this issue (FEMA hiring employees at rates above what its budget could support) and report to the Committee within 3 months after the date of enactment. As part of the investigation, the IG shall evaluate whether or not the budget request of \$35M is sufficient to rectify FEMA’s pay deficiencies.	In Progress
2010	FY 2010 Appropriations, Joint Explanatory Statement, Title I, p. 17; Senate Committee Report 111-31, Title I, p. 23	CBP Revenue Oversight – Included in the funding [for DHS OIG] are resources for U.S. Customs and Border Protection [CBP] revenue oversight.	In Progress

**Office of the Inspector General**

## **I. Appropriation Overview**

The Department of Homeland Security (DHS), Office of Inspector General (OIG) was established by the *Homeland Security Act 2002* (P.L. 107-296), by amendment to the *Inspector General Act of 1978*. The Inspector General (IG) has a dual reporting responsibility, to the Secretary of Homeland Security and to the Congress. The OIG serves as an independent and objective inspection, audit, and investigative body to promote economy, efficiency, and effectiveness in DHS programs and operations, and to prevent and detect fraud, waste, and abuse in such programs and operations. For fiscal year (FY) 2011, the OIG is requesting 668 positions, 665 full time equivalents (FTE) and \$129.806 million.

### **A – Mission Statement for Office of the Inspector General**

The *Homeland Security Act of 2002* provided for the establishment of an Office of Inspector General (OIG) in DHS by amendment to the *Inspector General Act of 1978*. By this action, the Congress and the Administration ensured independent and objective audits, inspections, and investigations of the operations of the Department of Homeland Security (DHS).

The OIG contributes to the agency's success by providing objective information to promote government management, decision making and accountability. The OIG focuses on eliminating waste, fraud and abuse, and on identifying problems and recommendations for corrective actions by agency leadership. The OIG provides the agency and the Congress with objective assessments of opportunities to be more successful.

The OIG conducts and supervises audits, inspections, special reviews, and investigations of the Department's programs and operations, including program and financial management, contract and grant activity, and disaster relief efforts. The OIG conducts these reviews to offer recommendations for improving the economy, efficiency, and effectiveness of the Department's operations and activities, when necessary; and to deter, identify, and address fraud, waste, and abuse. The OIG annually publishes a schedule of audits, inspections, and investigations that will assist the Department in fulfilling its mission and goals, and report its findings to the Secretary, the Congress, and the public, when appropriate. The IG statements for the record and testimony may be accessed through our website at [www.dhs.gov/xoig](http://www.dhs.gov/xoig).

## **B – Budget Activities:**

The OIG has one budget activity, the audits, inspections, and investigations program, that consists of 632 FTE in FY 2010 for the following executive management and oversight teams:

*The Executive Office* consists of the Inspector General, the Deputy Inspector General, an Executive Assistant, and support staff. It provides executive leadership to the OIG. The Executive Office has 4 FTE.

*The Office of Congressional and Media Affairs* serves as primary liaison to members of the Congress and their staffs, the White House and Executive Branch, the media, and to other federal agencies and governmental entities involved in securing the Nation. The office staff responds to inquiries from the Congress, the White House and the media; notifies the Congress about OIG initiatives, policies, and programs; and informs other governmental entities about OIG measures that affect their operations and activities. It also provides advice to the Inspector General and supports OIG staff as they address congressional, White House, and media inquiries. The office has 5 FTE.

*The Office of Counsel to the Inspector General* provides legal advice to the Inspector General and representation to other management officials. The office supports audits, inspections, and investigations by conducting legal sufficiency reviews that include Equal Employment Opportunity (EEO) and Merit Systems Protection Board (MSPB) actions and claims filed under the Federal Torts Claims Act (FTCA); representing OIG investigators in conjunction with the Department of Justice (DOJ) in Bivens actions; and assisting DOJ with Giglio requests. The office reviews all DHS management directives and delegations to ensure compliance with applicable laws and regulations. Charter includes protecting OIG's independence in the review process. The office also serves as the OIG's designated ethics office, manages the OIG's *Freedom of Information Act and Privacy Act* responsibilities, furnishes attorney services for the issuance and enforcement of OIG subpoenas, and provides legal advice on OIG operations. The office has 14 FTE.

*The Office of Administration* provides critical administrative support functions, including OIG strategic planning; development and implementation of administrative directives; the OIG's information and office automation systems; oversight of the personnel, procurement, travel, and accounting services provided to the OIG on a reimbursable basis by the Bureau of Public Debt. The office also prepares the OIG's annual performance plans and the semiannual reports to the Congress. The office has 41 FTE.

*The Office of Audits* conducts and coordinates audits and program evaluations of the management and financial operations of DHS. Auditors examine the methods employed by agencies, bureaus, grantees, and contractors in carrying out essential programs or activities. Audits evaluate whether established goals and objectives are achieved and resources are used economically and efficiently; whether intended and realized results are consistent with laws, regulations, and good business practice; and determine whether financial accountability is achieved and the financial statements are not materially misstated. The Office of Audits is also conducting reviews on DHS' programs addressed

by the *American Reinvestment and Recovery Act (ARRA)* of 2009. The office has 170 FTE.

*The Office of Information Technology (IT) Audits* conducts audits and evaluations of DHS' information management, cyber infrastructure, and systems integration activities; and provides technical forensics assistance to OIG offices in support of the OIG's fraud prevention and detection mission. The office reviews the cost effectiveness of acquisitions, implementation, and management of major systems, and telecommunications networks across DHS. IT Audits evaluates the systems and related architectures of DHS to ensure they are effective, efficient, and implemented according to applicable policies, standards, and procedures. The office assesses DHS' information security program as mandated by the *Federal Information Security Management Act (FISMA)*. The office has 43 FTE.

*The Office of Inspections* provides the IG with means to analyze programs quickly and to evaluate operational efficiency, effectiveness, and vulnerability. This work includes special review of highly visible or sensitive issues that arise suddenly, as well as congressional requests and mandates for studies that require immediate attention. The office examines all areas of the Department and makes recommendations in an effort to strengthen and unify DHS operations and management systems. The Office of Inspections is the lead organization in the OIG for monitoring DHS intelligence activities, reporting on the use of intelligence information within the Department and coordinating the OIG's interaction with the Intelligence Community. The office conducts special reporting on international affairs that involve DHS personnel, programs, and operations, civil rights and civil liberties, and science and technology. The office has 41 FTE.

*The Office of Investigations* conducts investigations into allegations of criminal, civil, and administrative misconduct involving DHS employees, contractors, grantees, and programs. These investigations can result in criminal prosecutions, fines, civil monetary penalties, administrative sanctions, and personnel actions. Additionally, the Office of Investigations monitors the investigative activity of DHS' internal affairs offices. The office has broad investigative and oversight responsibilities and mirrors Departmental priorities in working to ensure the integrity of the Nation's immigration system, borders, ports of entry, and national transportation network. The Office of Investigations is committed to protecting the civil rights and liberties of all persons in the U.S. and investigates all referrals of detainee deaths involving unusual or suspicious circumstances, all on-duty incidents involving the discharge of a firearm by a DHS employee, and all credible allegations of criminal abuse of authority that result in the deprivation of rights or other serious criminal offense. The Office of Investigations looks into allegations of gross misuse of classified information, privacy or law enforcement information; and allegations of criminal misconduct in the administration of immigration benefits. In addition, the Office of Investigations oversees the integrity of programs which distribute DHS funds for routine operations; in response to disasters and disaster preparedness training; and in association with programs used in the development of technologies critical to combating terrorism. Finally, the Office of Investigations

collects, analyzes and distributes data concerning fraud, and misconduct through our national hotline operation and the National Center for Disaster Fraud. We continue to exercise important oversight responsibilities over component internal affairs units who are tasked with investigating administrative misconduct issues within the DHS. The office has 239 FTE.

*The Office of Emergency Management Oversight (EMO)* provides an aggressive and ongoing audit and investigative effort designed to ensure that disaster relief funds are being spent appropriately, while identifying fraud, waste, and abuse as early as possible. The office is an independent and objective means of keeping the Congress, the Secretary, the Administrator of the Federal Emergency Management Agency (FEMA) and other federal disaster relief agencies fully informed on problems and deficiencies relating to disaster operations and assistance programs, and progress regarding corrective actions. EMO's focus is weighted heavily towards prevention, including reviewing internal controls, and monitoring and advising DHS and FEMA officials on contracts, grants, and purchase transactions before they are approved. This allows the office to stay current on disaster relief operations and provide on-the-spot advice on internal controls and precedent-setting decisions. The office coordinates with other Federal Offices of Inspector General, meets with state and local officials on audit and investigative matters, and advises contractors and grantees on compliance requirements. The office has 75 FTE.

#### **C – Budget Request Summary:**

- The Office of Inspector General requests 668 positions, 665 FTE, and \$129,806,000 for the FY 2011 Request. The request includes an increase for adjustments-to-base of \$21.8 million in the annualization of 30 authorized FTE, pay inflation, GSA rent, and to continue disaster relief efforts. The adjustments-to-base include a decrease of \$9.9 million to the OIG, which consists of a reduction of \$1.7 million for 12 audit positions and 6 FTE, and a reduction of \$8.2 million from efficiencies in purchases and contracts. The request includes a program increase of 18 positions, 9 FTE, and \$4.0 million for Audits, Inspections and Investigations to support DHS operations and programs.
- The request includes \$16.0 million in adjustments-to-base for OIG to annualize its Emergency Management Oversight disaster relief efforts, which in previous years had been transferred from the Disaster Relief Fund.
- The FY 2011 OIG President's Request includes \$2.8 million for training and \$400,000 in support of the interagency IG Council.

Total Change 2010 to 2011	6	33	15,932

The Office of Inspector General requests \$129.806 million for this activity. The request includes an increase for adjustments-to-base of \$21.8 million for annualization, pay raise, GSA Rent, and to continue disaster oversight efforts. To offset the increases, the adjustments-to-base also includes a decrease of \$9.9 million to the OIG, which consists of a reduction of \$1.7 million for 12 audit positions and 6 FTE, and a reduction of \$8.2 million from efficiencies in purchases and contracts. The request includes a program increase of \$4.0 million for Audits, Inspections and Investigations to support DHS operations and programs related to the Department's security reassessment effort.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Specifically, the OIG's key legislated responsibilities are to:

- Promote economy, efficiency, and effectiveness in the management of the Department's programs and supporting operations.
- Conduct and supervise audits, investigations, and inspections relating to the Department's programs and support operations.
- Detect and prevent fraud, waste, and abuse.
- Review existing and proposed legislation and regulations, and make appropriate recommendations.

- Maintain effective working relationships with other federal, state, and local governmental agencies, and non-governmental entities regarding the mandated duties of the OIG's.
- Inform the Secretary of the DHS and the Congress of serious problems and recommend corrective actions and implementation strategies.
- Comply with the audit standards of the Comptroller General of the Government Accountability Office (GAO); avoid duplication of GAO activities.
- Report violations of federal criminal law to the U.S. Attorney General.

Significant accomplishments in FY 2009 include:

- The OIG issued 111 management reports (audits and inspections) and 55 financial assistance grant reports. Currently, due to these efforts, \$156.7 million of questioned costs were identified, of which \$46.6 million were determined to be unsupported. In addition, \$63.6 million were recovered as a result of identifying disallowed costs from current and prior year reports and \$6.7 million of funds that could have been put to better use.
- DHS management concurred with 93 percent of the OIG's recommendations.
- OIG investigations resulted in 828 reports issued, 283 arrests, 248 indictments, 241 convictions, and 44 personnel actions. Investigations closed 1,021 investigations and 14,152 complaints. Additionally, investigative recoveries, fines, restitutions, and cost savings totaled \$55.3 million.

FY 2010 planned accomplishments include:

- The Office of Audits anticipates issuing 65 program and financial audits this fiscal year. The office will complete 20 of the FY 2009 carryover audits in FY 2010 and 45 new program and financial reports. The Office of Audits will continue to work closely with DHS management and congressional oversight committees to identify potential audit work that will promote the economy, efficiency, and effectiveness of departmental programs and operations. The Office of Inspector General has a number of planned and on-going audit efforts in FY 2010. The Audits Office is currently reviewing and evaluating the advanced imaging technology and liquid container screening and the Transportation Screening Officers (TSO) Training and Development Program. During FY 2010, Office of Audits plans to evaluate the effectiveness of cargo screening for passenger aircraft and continue to follow up on previous recommendations.
- The Office of Information Technology Audits (IT) plans to conduct 24 engagements. The IT office will continue to evaluate the Department's progress in establishing a cost-effective and secure information technology infrastructure. The office anticipates conducting evaluations and reviews on DHS-wide network consolidation and implementation of a standard IT platform, immigration systems modernization, and DHS efforts to protect the

Nation's cyber infrastructure and privacy. Specifically, the office will review the progress DHS is making in consolidating its myriad data centers from around 20 down to 2, and determine whether the department will achieve projected savings, estimated in the hundreds of millions of dollars. In addition, IT auditors will review FEMA's progress in modernizing its disaster response information systems, and evaluate the extent to which DHS component information systems are vulnerable to disruption by the malicious acts of trusted insiders. The IT office will also assess the effectiveness of IT systems used by State and Local Fusion Centers to share information with other state law enforcement, emergency management, and DHS elements. Also, the office will audit the effectiveness of privacy stewardship programs at U.S. Immigration Customs Enforcement (ICE) and Citizenship Immigration Services (CIS). The Forensics Division, under IT Audits, continues to conduct forensic audits and contract fraud reviews and make recommendations concerning DHS programs that are vulnerable to fraud, waste, and abuse. The Forensics Division expects to support 20-25 OIG engagements in FY 2010.

- The Office of Inspections will continue to provide quarterly reports to the President's Intelligence Oversight Board on the Department's compliance regarding intelligence on U.S. persons. The Office of Inspections will continue to respond to the majority of Congressional requests received by the Office of Inspector General for reviews of DHS programs, policies, and procedures, and will complete mandated reviews as prescribed by law. The office anticipates an increase from 30 projects in FY 2009 to 40 projects in FY 2010.
- The Office of Investigations will conduct criminal investigation of employee misconduct in a degree and manner that strengthens and supports the mission of DHS. In addition to investigations of corruption and other matters impacting border and transportation security, the office will broaden its participation in the prevention and detection of fraud and criminal misconduct associated with application and awarding of immigration benefits. In order to ensure compliance with OIG and DHS policy and procedures, internal inspections of the following OIG Investigations offices will be conducted: the San Francisco Field Office; the San Diego Field Office, including the Los Angeles and El Centro Resident Offices; the El Paso Field Office; and the Atlanta Field Office, including the Hattiesburg, Biloxi, and Mobile Sub-Offices. In addition, the office will conduct inspections of the following DHS component internal affairs offices: US Customs and Border Protection; the Federal Protective Service; and the Federal Air Marshal Service. On behalf of the Council of Inspectors General for Integrity and Efficiency, the Office of Investigations is coordinating and preparing a report, which reviews OIG Hotline operations. The Office of Investigations continues to emphasize employee development and will conduct in-service training courses designed to enhance specialized investigative skills commensurate with the complex makeup of the department.

- The Office of Emergency Management Oversight (EMO) will continue an aggressive audit effort designed to ensure that FEMA is fully prepared to carry out its mission and that Disaster Relief Funds are spent appropriately. The office focuses on ensuring that internal controls are in place and operating effectively to reduce opportunities for fraud, waste, and abuse, and on identifying and detecting fraud, waste, and abuse when it occurs. EMO plans to issue about 50 disaster grant audits, which will identify questioned costs and include recommendations to improve grantee and sub-grantee accounting and acquisition controls and other practices. EMO anticipates completing approximately 15 management audits focusing on areas such as logistics management, disaster assistance, and preparedness.

FY 2011 planned accomplishments include:

- The Office of Audits plans to issue and start approximately 101 programmatic and financial audits. The issued audit reports will include nearly 41 FY 2010 carryover audits that include at least 30 financial and grant audits performed by a contractor with OIG oversight, and 60 new performance audits scheduled for completion in FY 2011. During FY 2011, the Office of Audits is planning audits that focus on the Transportation Security Agency's (TSA) international in-bound flight initiatives, best practices with international partners, and the Secure Flight Program. OIG will also conduct reviews focused on TSA's in-line baggage screening system, the paperless boarding pass, and TSA Worker Identification Credentials. OIG will focus on TSA's procurement, deployment, and maintenance of new generation screening technology.
- The Office of Information Technology Audits (IT) plans on conducting 25 engagements in FY 2011. The IT office will continue to evaluate the Department's progress in establishing a cost-effective and secure information technology infrastructure. The office anticipates conducting projects on evaluations and reviews on DHS-wide network consolidation and implementation of a standard IT platform, immigration systems modernization, and DHS' efforts to protect the Nation's cyber infrastructure and privacy. Additionally, IT Audits anticipates undertaking reviews of Custom Border Patrol's (CBP) deployment of SBInet and the Z-Portal Vehicle Imaging System, TSA Office of Security Network, DHS' blackberry security controls, DHS' implementation of the Federal Desktop Core Configuration, and the National Cyber Security Division's efforts to protect US cyberspace. As mandated by the *Federal Information Security Management Act (FISMA)*, the Office of IT Audits assesses the Department's progress, action plans, and milestones, to ensure implementation of security policies, procedures, and systems certification and accreditation for a cost-effective and secure information technology infrastructure. The IT office will expand its privacy stewardship reviews to include CBP and the Coast Guard. The Forensics Division under IT Audits will continue to conduct forensic audits and contract fraud reviews and make recommendations concerning DHS

programs that are vulnerable to fraud, waste, and abuse. The Forensics Division expects to support 25-30 engagements during FY 2011.

- The Office of Inspections estimates that it will initiate and complete 25 reviews. The office recognizes the need to break the cycle of carryover reviews by limiting the number of planned new reviews. This will enable the office to respond more quickly to unplanned Congressional requests and mandated work while avoiding the necessity to unduly delay planned work. The Office of Inspections is planning more conservatively. The office will focus on the Secretary's priorities such as immigration enforcement, transportation security, chemical security, critical infrastructure protection, and border security.
- The Office of Investigations will continue to protect the integrity of DHS programs and operations by vigorously investigating all allegations of corruption involving personnel or programs and investigating the most serious allegations of program fraud and other employee criminal misconduct. The office will continue its emphasis on staffing the border offices and FEMA benefit fraud, while also seeking to ensure effective investigative coverage in areas where there is high volume of CIS benefit processing.
- The Office of Emergency Management Oversight (EMO) will focus on assessments of internal controls, grant and contract audits, performance reviews, and special projects covering all FEMA programs and operations, as well as programs and operations of other DHS components involved in disaster assistance. Additionally, the office will deploy experienced staff, as needed, to provide on-the-spot advice, assistance, and oversight to DHS, FEMA, state, and local officials after major, presidentially declared natural or man-made disasters. This approach allows the office to stay current on all disaster relief operations and provide timely advice on internal controls and precedent-setting decisions. The requested funding will allow us to complete between 75 and 125 disaster grant audits and 25 management audits.

## IV. Program Justification Changes

**Department of Homeland Security  
Office of the Inspector General  
Audit, Inspections, and Investigations Program  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Increase 1:** Audit, Inspections, and Investigations  
 PPA: Audit, Inspections, and Investigations Program  
 Program Increase: Positions 18.0, FTE 9.0, Dollars \$4,000.0

### Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							18	9	4,000
<b>Total Request</b>	-	-	-	-	-	-	<b>18</b>	<b>9</b>	<b>4,000</b>

### **Description of Item**

The FY 2011 program increase of \$4.0 million for audits, inspections and investigations reflects Office of the Inspector General's (OIG) commitment in support of the Department of Homeland Security's (DHS) priorities, to include Transportation Security Administration's (TSA) initiatives. Audits, inspections and investigations provide metrics to measure and evaluate DHS program effectiveness.

### **Justification**

The FY 2011 budget request for additional resources is tied to OIG audits, inspections and investigations responsibilities. These activities are related to DHS issues on immigration and border security, transportation security, critical infrastructure protection, federal and state/local intelligence sharing. In addition, the OIG will participate aggressively in the Nation's travel security audits in compliance with DHS' security reassessment effort. The OIG is planning audits that focus on TSA international in-bound flight initiatives, best practices with international partners, and the Secure Flight Program. OIG will also conduct reviews and evaluations focused on TSA's in-line baggage screening system, the paperless boarding pass, and TSA Worker Identification Credentials. Most importantly, the OIG will focus on TSA's procurement and deployment of new screening technology. The request provides the OIG an additional 18 positions and 9 FTE.

## **Impact on Performance**

The additional resources requested by the OIG reflect the DHS' highest priorities and vision, and support the achievement of the Secretary's mission support goal. The additional resources will allow the OIG to provide needed audit coverage in high priority areas such as the Department's reassessment of travel security.

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
Office of Inspector General  
Justification of Proposed Changes in Salaries and Expenses  
Appropriation Language**

For necessary expenses of the Office of Inspector General in carrying out the provisions of the Inspector General Act of 1978 (5 U.S.C. App.), [~~\$113,874,000~~]**\$129,806,000** of which not to exceed [~~\$150,000~~]**\$300,000** may be used for certain confidential operational expenses, including the payment of informants, to be expended at the direction of the Inspector General.

#### **Explanation of Changes:**

No substantive changes proposed.

### PPA Mission Statement

The *Homeland Security Act of 2002* provided for the establishment of an Office of Inspector General (OIG) in DHS by amendment to the Inspector General Act of 1978. By this action, the Congress and the Administration ensured independent and objective audits, inspections, and investigations of the operations of the Department of Homeland Security (DHS).

## Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1- 13.0 Salaries and Benefits	85,952	89,653	95,474	5,821

Salaries and Benefits includes costs for 665 FTE. The FY 2011 request includes an increase of \$5,821,000.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
21.0 Travel and transportation of persons	4,711	4,668	5,226	558

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2011 request includes an increase of \$558,000.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
22.0 Transportation of things	83	70	71	1

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2011 request includes an increase of \$1,000.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.1 Rental payments to GSA	10,903	11,173	11,329	156

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2011 request includes an increase of \$156,000.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.2 Rental payments to others	421	218	221	3

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2011 request includes an increase of \$3,000.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.3 Communications utilities and miscellaneous charges	3,001	2,718	2,807	89

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2011 request includes an increase of \$89,000.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
24.0 Printing and reproduction	60	235	238	3

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2011 request includes an increase of \$3,000.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.1 Advisory and assistance services	3,526	4,287	1,226	(3,061)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, state and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2011 includes a decrease of \$3,061,000 in contracted services.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	1,208	3,516	3,203	(313)

Other services include report contractual services with non-federal sources that are not otherwise classified under Object Class 25. The FY 2011 request includes a decrease of \$313,000 in contract services.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.3 Purchases of goods & svcs. from Gov't accounts	6,192	7,904	4,350	(3,554)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2011 request includes a decrease of \$3,554,000 in contract services.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.4 Operation and maintenance of facilities	331	135	137	2

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2011 request includes an increase of \$2,000.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.7 Operation and maintenance of equipment	598	339	343	4

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2011 request includes an increase of \$4,000.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
26.0 Supplies and materials	980	599	626	27

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2011 request includes increases of \$27,000.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
31.0 Equipment	2,891	4,209	4,255	46

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2011 request includes an increase of \$46,000.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
32.0 Land and structures	2,520	-	-	-

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2011 request reflects no change.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
91.0 Unvouchered	150	150	300	150

Unvouchered includes expenditures made lawfully for confidential purposes, including authorized payments made by law enforcement personnel to informants, which are not subject to detailed vouchering or reporting. The FY 2011 request includes an increase of \$150,000 for increased investigative activities. This increase is offset by the respective reduction in equipment.

I. STRATEGIC CONTEXT FOR FY 2011 BUDGET	
A. Mission and Description of Component.....	OIG-1
B. Major Programs and Key Strategic Goals.....	OIG-2
C. Resources Requested and Performance Impact.....	OIG-2
D. Performance Highlights, Resources, and Alignment to Strategic Goals.....	OIG-4
E. High Priority Performance Goals.....	OIG-5
F. Digest Tables by FYHSP Programs .....	OIG-6

## A. Mission and Description of Component

*The Homeland Security Act of 2002* provided for the establishment of the Office of Inspector General (OIG) to ensure independent and objective audits, inspections, and investigations of the operations of the Department of Homeland Security (DHS).

An Inspector General (IG), who is appointed by the President and confirmed by the Senate, reports directly to both the Secretary of DHS and the Congress. Barring narrow and exceptional circumstances, the IG may inspect, audit, or investigate anyone in the Department, or any program or operation of the Department. To ensure the IG's independence and objectivity, the OIG has its own budget, contracting and personnel authority, separate from that of the Department. Such authority enhances the OIG's ability to promote economy, efficiency, and effectiveness within the Department, and to prevent and detect fraud, waste, and abuse in the Department's programs and operations.

Specifically, the OIG's key legislated responsibilities are to:

- Promote economy, efficiency, and effectiveness in the management of the Department's programs and supporting operations.
- Conduct and supervise audits, investigations, and inspections relating to the Department's programs and support operations.
- Detect and prevent fraud, waste, and abuse.
- Review existing and proposed legislation and regulations and make appropriate recommendations.
- Maintain effective working relationships with other federal, state, and local governmental agencies, and non-governmental entities regarding the mandated duties of the OIG's.
- Inform the Secretary of the DHS and the Congress of serious problems and recommend corrective actions and implementation strategies.
- Comply with the audit standards of the Comptroller General of the Government Accountability Office (GAO); avoid duplication of GAO activities.
- Report violations of federal criminal law to the U.S. Attorney General.

The OIG requests 668 positions and 665 full-time equivalents (FTE). The OIG management team consists of 52 percent of professional staff in functional areas of audit, inspections, and emergency management oversight; 38 percent of criminal investigators; and 10 percent of support staff in executive and administrative management capacities.

Approximately 45 percent of these positions will be located in the Washington, D.C. headquarters office. The remainder will be located throughout the United States with locations in 30 field offices: Atlanta, Baton Rouge, Bellingham, Biloxi, Boston, Buffalo, Chicago, Denver, Detroit, Dallas, Del Rio, El Centro, Los Angeles, El Paso, Hattiesburg, Houston, New York, Laredo, McAllen, Mobile, Philadelphia, Miami, Orlando, San Diego, San Francisco, San Juan, Seattle, Tucson, Yuma, Washington, DC. In addition, there are temporary field offices dedicated to disaster oversight operations.

## B. Major Programs and Key Strategic Goals

In the FY 2009 report of management challenges, the OIG identified the following as the most serious management challenges facing DHS: acquisition management, information technology (IT) management, emergency management, grants management, financial management, infrastructure protection, border security, transportation security and trade operations and security.

The challenges we have identified significantly affect the Department's ability to protect our homeland and are decisive factors in setting priorities for the OIG audits, inspections, investigations and evaluations of DHS programs and operations. The OIG oversight activities provide significant measurable benefits, which result in financial savings and recoveries to the Department.

We will strive to have a consultative and collaborative working relationship with senior management of DHS while at the same time providing constructive and objective information to promote DHS management decision making and accountability.

The OIG has a dual reporting responsibility, to the Congress as well as to the Secretary of Homeland Security. During the reporting period, the OIG continued its active engagement with Congress through numerous meetings, briefings, and dialogues with members and staff of the Department's authorizing and appropriations committees and subcommittees on a range of issues relating to our work and that of the DHS. The OIG's statements for the record and the reports cited in the congressional testimony are available on the OIG website at [www.dhs.gov](http://www.dhs.gov).

In FY 2009, the OIG shifted its major strategy to address the investigative oversight efforts of the border control mission and statutory obligations to the Department to protect our Nation from dangerous people and from dangerous goods.

In FY 2010, the OIG will continue to support the efforts of achieving security and stability along the borders by expanding investigative oversight activities in response to the increased volume of investigative referrals and complaints.

In FY 2011, the OIG will be able to help the Department identify and mitigate vulnerabilities in its critical programs. FY 2011 initiatives include Transportation Security Agency's (TSA) programs like the advanced imaging technology, liquid container screening and the Transportation Screening Officers (TSO) Training and Development Program. In addition, the OIG investigative activities result in a high return on investment to the Department in protecting the personnel, property, and integrity of DHS.

## C. Resources Requested and Performance Impact

The Office of Inspector General provides an objective, third party assessment to ensure integrity, prevention and detection, and ferreting out of waste, fraud and abuse in DHS programs and operations. These activities result in financial savings and recoveries. The avoidance of fraud, waste, and abuse clearly contributes to the DHS goal of achieving organizational excellence, in addition to all other DHS strategic goals, while also providing the various DHS components and Congress with the assurances that DHS resources are being used as intended.

The proposed FY 2011 budget request is \$129.8M, which includes \$16.0M for Emergency Management Oversight disaster relief activities. This reflects funding level activity that in previous years was transferred from the Federal Emergency Management Agency (FEMA) disaster Relief fund to the OIG in support of Emergency Management Oversight efforts.

Current services:

The Office of Audits continues to evaluate DHS programs to determine whether established goals and objectives are achieved and resources are used economically and efficiently; whether intended and realized results are consistent with laws, regulations, and good business practice; and whether financial accountability is achieved and the financial statements are not materially misstated. In FY 2011, the Office of Audits plans to issue and start approximately 101 programmatic and financial audits. The issued audit reports will include 41 FY 2010 carryover audits that include at least 30 financial and grant audits performed by contractors with OIG's oversight, and 60 new performance audits scheduled for completion in FY 2011. In addition, the OIG is planning audits that focus on Transportation Security Administration's (TSA) international in-bound flight initiatives, best practices with international partners, and the Secure Flight Program. The OIG will also conduct reviews focused on TSA's in-line baggage screening system, the paperless boarding pass, the TSA Worker Identification Credentials. Most importantly, the OIG will focus on TSA's procurement, deployment, and maintenance of new general screening technology. The OIG will continue to work closely with DHS management and congressional oversight committees to identify potential audit work that will promote the economy, efficiency, and effectiveness of departmental programs and operations.

The Office of Information Technology (IT) Audits conducts audits and evaluation of DHS' information management, cyber infrastructure, and systems integration activities; and provides technical forensics assistance to OIG offices in support of the OIG's fraud prevention and detection mission. Additionally, the Office of IT Audits anticipates undertaking reviews of Custom Border Patrol's (CBP) deployment of SBInet and the Z-Portal Vehicle Imaging System, Transportation Security Administration's (TSA) Office of Security Network, DHS' blackberry security controls, DHS' implementation of the Federal Desktop Core Configuration, and the National Cyber Security Division's efforts to protect US cyberspace. As mandated by the *Federal Information Security Management Act* (FISMA), the Office of IT Audits assesses the Department's progress, action plans, and milestones, to ensure implementation of security policies, procedures, and systems certification and accreditation for a cost-effective and secure information technology infrastructure. The office will expand its privacy stewardship reviews to include CBP and the Coast Guard. The Forensics Division under IT Audits continues to conduct forensic audits and contract fraud reviews and make recommendations concerning DHS programs that are vulnerable to fraud, waste, and abuse. The Forensics Division expects to support 25-30 engagements during FY 2011.

The Office of Inspections provides the Inspector General with means to analyze programs quickly and to evaluate operational efficiency and vulnerability. The Office of Inspections is the lead office for reporting DHS intelligence matters, international affairs, civil rights and civil liberties, and science and technology. The Office of Inspections continues to provide quarterly reports to the President's Intelligence Oversight Board on the department's compliance regarding intelligence on U.S. persons. The Office of Inspections will continue to respond to the majority of Congressional

requests received by the Office of Inspector General for reviews of DHS programs, policies, and procedures, and will complete mandated reviews as prescribed by law. In FY 2011, the Office of Inspections estimates that it will initiate and complete 25 reviews, consisting of a combination of new and carryover work, Congressional requests, and mandates. In addition, the Office of Inspections will focus its efforts to meet the Secretary's priorities such as immigration enforcement, transportation, chemical, and border security, and critical infrastructure protection.

The Office of Investigations will conduct criminal investigation of employee misconduct in a degree and manner that strengthens and supports the mission of DHS. In addition to investigations of corruption and other matters impacting border and transportation security, the office will broaden its participation in the prevention and detection of fraud and criminal misconduct associated with application and awarding of immigration benefits. The Office of Investigations continues to emphasize employee development and will conduct in-service training courses designed to enhance specialized investigative skills commensurate with the complex makeup of the Department. In 2011, the Office of Investigations will continue to protect the integrity of DHS programs and operations by vigorously investigating all allegations of corruption involving personnel or programs and investigating the most serious allegations of program fraud and other employee criminal misconduct. The office will continue its emphasis on staffing the border offices and FEMA benefit fraud, while also seeking to ensure effective investigative coverage in areas where there is high volume of U.S. Citizenship and Immigration services benefit processing.

The Office of Emergency Management Oversight (EMO) will continue an aggressive audit effort designed to ensure that FEMA is fully prepared to carry out its mission and that Disaster Relief Funds are spent appropriately. The office focuses on ensuring that internal controls are in place and operating effectively to reduce opportunities for fraud, waste, and abuse, and on identifying and detecting fraud, waste, and abuse when it occurs. In FY 2011, the office will complete between 75 and 125 disaster grant audits and 25 management audits.

D. Performance Highlights, Resources, and Alignment to Strategic Goals

For each business support program, a program performance goal, aligned to the Secretary's Priorities, total dollars, FTE, and Government Performance and Results Act (GPRA) performance plan measure/s are shown below. Additional measures are also displayed, as appropriate, to provide a more thorough context of expected performance results.

<b>Program: Audit, Inspections, and Investigations Program</b>						
<b>Performance Goal:</b> Add value to the DHS programs and operations; ensure integrity of the DHS programs and operations; and enable the OIG to deliver quality products and services.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$82,187	\$102,685	\$116,711	\$114,513	\$113,874	\$129,806
<b>FTE</b>	510	545	551	577	632	665

Performance Plan Measures

<b>Measure:</b> Percent of recommendations made by the Office of Inspector General (OIG) that are accepted by the Department of Homeland Security.
<b>Description of Measure:</b> The OIG audits and inspects programs for fraud, waste, and abuse. OIG also reviews programs to promote economy, efficiency, and effectiveness. The criteria used to select programs for audit or inspection includes: statutory and regulatory requirements;

adequacy of internal control systems; newness; changed conditions; potential dollar magnitude; etc. Where appropriate, OIG audit and inspection reports include recommendations which, if accepted and implemented, will improve the respective program. This measure reflects the percent of recommendations made by the OIG that are accepted and implemented by DHS. The OIG tracks the recommendations that are issued until they have been implemented.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	79%	85%	85%	85%	85%	85%
<b>Actual:</b>	91%	91%	96%	93%	N/A	N/A

**Measure:** Percent of substantiated investigations that are accepted for criminal, civil, or administrative action.

**Description of Measure:** The measure reports on the number of substantiated investigations that are accepted for criminal, civil, or administrative action in comparison to all substantiated investigations that the DHS Office of Inspector General (OIG) conducts during the fiscal year. This measure demonstrates a portion of the impact that OIG investigations have on DHS operations, as well as operations of the entire federal government.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	75%	75%	75%	75%
<b>Actual:</b>	None	None	87%	82%	N/A	N/A

**E. High Priority Performance Goals:**

Note applicable to OIG.

**F. Digest Tables by Future Year Homeland Security Program (FYHSP) Program**

FYHSP PROGRAM	FY 2009 Revised Enacted*		FY 2010 Enacted		FY 2011 Request	
	FTE	\$0	FTE	\$0	FTE	\$0
Audit, Inspections and Investigations	577	\$119,513	632	\$113,874	665	\$129,806
Audit, Inspections and Investigations	577	\$119,513	632	\$113,874	665	\$129,806
<b>Total Budget Authority</b>	<b>577</b>	<b>\$119,513</b>	<b>632</b>	<b>\$113,874</b>	<b>665</b>	<b>\$129,806</b>

*\*The FY09 column indicates revised enacted levels including supplemental appropriations such as Recovery Act funding. This differs from the other sections of the CJ and is intended to align with the resource levels contained in the Future Years Homeland Security Program (FYHSP) which captures total budget authority.*

# BUDGET REQUEST AND SUPPORTING INFORMATION

## Working Capital Fund

### I. Working Capital Fund Overview

#### A. Mission Statement for the Working Capital Fund (WCF):

To provide cost-effective support services throughout DHS, the WCF provides a mechanism for shared service costs to be distributed and recouped, and facilitates the delivery and oversight of shared services.

The WCF supports selected services, activities, and programs that benefit more than one DHS organizational component. Furthermore, the WCF supports the funding for government-wide initiatives as well as DHS crosscutting initiatives approved by OMB and Congress. The goal of the Under Secretary for Management is to maintain and operate a fund that promotes economy, efficiency, and accountability and to apply best practices from the public and private sectors for improving organizational performance, operational efficiencies, and ensure full cost recovery of goods and services for selected DHS agency-wide programs, activities, and services.

#### B. Budget Activities:

The key WCF activities are organized under the five activity categories listed below:

##### Fee for Service Activity

DHS WCF activity managers provide or coordinate delivery of a specific service or benefit to DHS components. The benefit/cost for providing the WCF activity is tangible and is directly linked to a component's use of services or products. These activities may include subscription-type services such as providing access to electronic services, for example the Library of Congress' FEDLINK. These WCF activities earn revenue from the provision of services, and have characteristics typical of a business enterprise. The costs for operating the "business" are reimbursed by billing customers for the provision of goods and services, through rates that are pre-approved by the CFO and reviewed by component customers. Each fee for service activity is expected to recover its operational costs, usually at a much lower cost as the components benefit from economies of scale. Examples include: GSA rent and real estate services, IT services, human resource services, procurement operations, and financial management services.

##### Government-wide Service Activity

Government-wide activities are Administration sponsored initiatives that are managed by a designated Federal department, to improve overall government performance. Other departments are assessed for the cost of supporting the activity. The activities should also provide a direct benefit to participating components. Examples include the government-wide e-Government initiatives related to the President's Management Agenda.

### **DHS Crosscutting Activity**

The DHS crosscutting activities are department-wide programs managed by a single office that yield some benefit, such as Strategic Sourcing, to all DHS components. The actual costs of the programs are recouped by redistributing the costs to the components based on their share of the discretionary budget, staffing or some other fair and equitable pro-rata basis.

### **WCF Management Activity**

The WCF Management Activity includes funding for the staff that develops WCF policy and procedures, formulates and executes the WCF budget and negotiates issues between activity managers and customers.

### **C. Budget Request Summary:**

The DHS WCF operating requirements for FY 2011 are estimated to be 519 FTEs and \$790.484 million in reimbursable authority. This is an increase of \$85.022 million and 93 FTEs over the FY 2010 enacted budget. The 93 FTEs are composed of adjustment-to-base of 34 FTEs relating to the National Capital Region Infrastructure Office (NCRIO), 57 FTE are program changes in the Fee for Service activities, 1 FTE is a program change within the Government-wide mandated service activity, 3 FTE for WCF Management Activity, and a reduction of 2 FTE within the DHS Cross-cutting Activity. .

In FY 2011, the WCF will continue all services and activities from the FY 2010 enacted budget. The FY 2011 increase is attributable to program increases of \$74.301 million approved for Fee for Services Activities, \$2.399 million for Tri-Bureau Service Activity; and \$0.255 million for Working Capital Fund Operations; and program decreases of \$4.096 million for Government-wide Mandated Service Activities and \$0.156 million for DHS Cross-Cutting Activities.

### **Fee for Service Activity; Program Changes: \$74.301 million increase and 57 FTEs over FY 2010**

- GSA Rent; \$17.193 million – The FY 2011 budget increase includes GSA occupancy agreement updates, Federal Protective Service (FPS) rate increases, and rent for additional space that will be required in FY 2011.
- Financial Statement Audit; \$2.990 million – The FY 2011 amount includes an increase in contract costs and OIG travel oversight cost for audit services.
- Finance and Accounting Shared Services; \$8.229 million – The additional resources requested in FY 2011 reflect higher than anticipated costs being incurred by the service provider <sup>1</sup>

1. Financial Shared Service FY2010 bill went from \$30,084,781 to \$22,656,868 based upon using the FY2010 actual cost versus the preliminary FY10 estimates. The FY2011 bill is \$31,270,700.

- NFC Payroll and Reporting; \$2.919 million - The FY 2011 request includes O&M costs for NFC payroll and EmpowHR personnel systems. The funding request reflects an increase in O&M costs as a direct result of deploying EmpowHR to additional DHS components in FY 2009 and FY2010 that includes FEMA, ICE and CIS.
- HQ Human Capital Services; \$0.020 million - The HQ Service center will continue to provide the full range of HR operational support, including Executive Resources, to DHS HQ components (excluding the OIG).
- Consolidated Subscriptions (Library of Congress – Fedlink); \$10.632 million and 1 FTE– The department has strived to reduce the costs of subscriptions, publications, electronic journals, data base subscriptions and books. As a result of the efficiency initiative, the scope and level of involvement in the FedLink program has expanded two-fold, resulting in overall efficiencies with the program being managed through the Working Capital Fund (WCF).
- Treasury Information Executive Repository (TIER); \$0.148 million - The DHS CFO’s office is responsible for creating the Department-wide financial statements. As part of this process, two software packages are used to process the work. These two products are the Treasury Information Executive Repository (TIER) and CFO Vision Software.
- Human Capital Business Systems (HCBS); \$3.288 million - The mission of the HCBS is to design, develop, acquire, implement, maintain and support DHS enterprise-wide human capital business systems and reduce costs by consolidating the number and variety of DHS human capital systems maintained.
- DHS EXEC Leadership; \$0.002– At a minimum, the Executive Leadership Curriculum will consist of two DHS-wide leadership development activities: the Secretary’s Senior Leadership Conference and the Senior Executive Service Candidate Development Program (SES-CDP).
- Microsoft Enterprise Software Licenses; \$7.297 million - The FY 2011 increase for this activity is due to the expiration of the current Microsoft contract that uses 2003 prices. The increases to many components’ assessments are attributed to the fact that they are currently paying for these services outside of the WCF. For FY 2011, these charges will be managed through the WCF as a result of the new contract with Microsoft.
- Data Center Consolidation; \$25.990 million - The DHS Office of the Chief Information Officer (OCIO) has established two enterprise DHS data centers to provide large-scale, physically secure, scalable, mission critical data center computing facilities and services for DHS. Operation as a WCF activity will allow a dramatic reduction in the overhead required to manage data center consolidation, and will enable greater transparency and more effective management of department-wide data center migration and consolidation efforts.

- Program Offsets, reduction of \$4.407 million in Fee for Service Activities.
  - -\$0.338 million NCR IT Services
  - -\$0.132 million CIO/DHS Infrastructure Transformation Program
  - -\$0.051 million Procurement Operations
  - -\$0.007 million Flexible Spending Plan
  - -\$0.004 million HQ EXEC Leadership
  - -\$0.208 million Financial Management Support-OFO
  - -\$0.493 million Bank Card Program
  - -\$0.001 million Employee Assistance Program
  - -\$3.173 million Internal Control Audit
  
- **Government-wide Mandated Service Activity; Program Changes: (\$4.096 million) net decrease and 1 additional FTE from 2010**
  - E-Gov Disaster Management: \$0.217 million – The increase is to cover all Federal agencies that are involved in disaster recovery, as well as state, local and tribal disaster recovery organizations and individuals.
  - Program Offsets, reduction of \$4.313 million in Government-wide Mandated Activities are due to reductions by OMB in the e-government amounts.
    - -\$0.421 million e-Rulemaking
    - -\$0.011 million e-Grant.gov
    - -\$0.003 Human Resource Line of Business
    - -\$0.002 million Interagency Council Funding
    - -\$0.004 million USA Jobs (Recruitment One Stop)
    - -\$3.627 million E-Training
    - -\$0.049 million E-Enterprise HR Integration
    - -\$0.146 million e-Financial Line of Business
    - -\$0.005 million IAE Loans & Grant
    - -\$0.003 million Geospatial Line of Business

- -\$0.040 million e-Integrated Acquisition Environment
- -\$0.002 million Budget Formulation & Execution Line of Business
  
- **DHS Crosscutting Activity; Program Changes: decrease \$0.156 million and 2 FTEs under 2010**
  - -\$0.094 million in CPO Shared Reporting
  - -\$0.054 million in Capital Planning& Investment Control (CPIC)
  - -\$0.008 million in Strategic Sourcing
  
- **WCF Management Activity; Program Changes: \$0.255 million over 2010**

The Working Capital Fund (WCF) Management Activity requests \$255K to cover the increase of pay in FY 2011 for 3 additional WCF FTEs. This increase will enable the WCF to ensure compliance with Congressional guidance and provide oversight to the increased number of WCF activities. The WCF will continue to improve cost methodologies in determining customer assessments for products and services received.

Working Capital Fund requests \$699.7 million in FY 2011 for Fee for Service activities. This is an increase of \$85.1 million over the FY 2010 enacted.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

***FEE FOR SERVICE ACTIVITY***

**GSA Rent – Fee for Service Activity**

**Description of Service:** The General Services Administration (GSA) charges rent to over 100 federal agencies, which is deposited into the federal buildings fund and used to operate the government's buildings and pay rent to private sector for lease space. GSA provides workspace and related services for over 100 federal client agencies serving more than one million workers through the Public Buildings Service (PBS). Whenever possible, client agencies are located in existing government-owned space. If suitable space in the government inventory is not available, PBS acquires leased space in privately owned buildings.

GSA also provides related real estate services including the operation and maintenance of buildings and out-leasing programs. GSA's Computer Integrated Facility Management program uses cutting-edge technology to look at a building's life cycle. Real estate services provided to clients appear in federal agencies' monthly electronic rent bills. GSA has simplified these bills so agencies have a clearer understanding of the costs they are charged for their workspace and services.

The Department has established a clearing account to expedite the payment of GSA rent billings for the Department of Homeland Security, excluding the major components. GSA bills the Department on a monthly basis for all GSA-controlled space that the Department occupies throughout the United States, including parking spaces allotted to the Department. Through this account, the Department entities have been billed based on the amount of space occupied multiplied by the average cost of rent per SF, as averaged across all HQ space. For FY11, it has been proposed to use actual GSA rates for each particular building, instead of averaged rates. In the Washington, DC area, components are also assessed rent surcharges on a per building basis. The rent surcharge is applied to all space types except warehouse and parking. The rent surcharge covers common costs including Federal Protective Service (building security), overtime utilities and antenna charges, as well as DHS-shared space. A computer-aided facility management system is being implemented to generate component space assignments and billings.

***Cost Allocation Methodology:***

***Current GSA Rent Algorithm:*** The cost allocation methodology is the amount of occupied space for each component in each building, multiplied by price per usable SF for each building. The per building usable SF price is based on GSA rent, and includes FPS, overtime utilities, antenna charges and DHS shared space.

***Full Time Equivalent (FTE):*** This activity requires 7 FTE

**FEDLINK (Library of Congress) – Fee for Service Activity**

***Description of Service:***The Department of Homeland Security (DHS) Library and Information Services' mission is to provide the DHS program managers and their end users with desktop access to mission critical, authoritative, timely, relevant commercial information content products and services. The activity was established in 2004 to implement DHS-wide information assets supporting decision making, enforcement, investigation, research and academic information gathering activities of the DHS workforce. The activity collaborates with the Library of Congress (LOC) FEDLINK program through which the LOC shares its expertise in information services and consolidates the buying power for federal agencies. In 2009 this activity became an S1 efficiency initiative which expanded its scope.

***Cost Allocation Methodology:*** The FY 2011 costing algorithm is based on two differing service types; enterprise-wide availability and account specific availability.

**Enterprise-wide Availability:** Services available enterprise-wide are made available to the entire DHS population based on Internet Protocol (IP) authentication. The cost for these services is distributed to each component based on the FTE listing in the FY 2011 President's budget, where available prior years usage percentages are used in place of FTE figures.

**Account Specific Availability:** Services available based on specific account availability are accessed using vendor provided user names and passwords. The cost for these services is distributed based on the actual cost of the user subscription service. Costs for these services may fluctuate throughout the year based on the amount of active accounts.

Full Time Equivalent (FTE): This activity requires 5 FTE.

**Financial Management (Finance & Accounting Shared Services) – Fee for Service Activity**

***Description of Service:*** The Office of the DHS Chief Financial Officer (CFO) gives authorization for financial systems in the Department of Homeland Security and sponsors, sets policy, and manages the development, implementation, operation and maintenance of the departmental financial management systems and related business processes. The CFO has determined that it is in the best interest of the Department to obtain selected financial management services from the Office of Financial Management, U.S. Immigration and Customs Enforcement, hereafter referred to as ICE OFM and FLETC, on a reimbursable basis. ICE OFM and FLETC provide financial management services in support of the following components:

- ICE OFM
  - Departmental Operations, including the immediate offices of the Secretary, the Directorate for Management, etc.
  - Office of Health Affairs
  - Directorate for Science and Technology
  - National Protection and Programs Directorate
  - U.S. Citizenship and Immigration Services
- FLETC OFM
  - Analysis and Operations

ICE OFM formulates and disseminates financial management policies, procedures, standards and maintains overarching internal controls in conjunction with the DHS CFO. The DHS CFO and ICE OFM assist DHS HQ components in the implementation, if needed. The activities with respect to this function include:

- Oversee the development and maintenance of OFM policies, standards, and procedures for serviced groups to ensure compliance, uniformity, and consistency with Federal Financial and Accounting regulations, guidelines, rules, and standards.
- Create and submit updates to be posted on the OFM intranet website.
- Ensure necessary continuation of operations plans are prepared, viable, and in place in the event of required use.
- Monitor, adjust, and execute shared services agreements including the development/refinement of cost methodologies.
- Channel customer service requirements to service owners through formalized meetings, memorandums, issues papers, and other communication mechanisms.
- Establish points-of-contacts to support customer liaison and service requirements, and participate in customer meetings.
- Conduct periodic reviews of internal business practices to identify means in order to improve operations in terms of effectiveness and efficiency.
- Create new Federal Financial Management System transaction codes and process changes to the general ledger.
- Manage travel card services by processing new travel card applications; establishing hierarchies, maintaining user profiles, handling disputes, increasing limits, replacing cards,

and contacting delinquent card holders.

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is based on the historical cost of providing seven categories of financial support to each participating component. The seven categories of financial support services include the following: (1) financial reports, (2) obligations and payment processing, (3) system usage, (4) receipts, (5) payroll, (6) overhead, and (7) travel and cash management services.

***Full Time Equivalent (FTE):*** This activity requires 0 FTE.

### **Financial Statement Audit – Fee for Service Activity**

***Description of Service:*** The DHS IG awards a contract to an independent CPA firm to perform a financial statement audit functions. The costs include travel and incidental costs associated with the performance of the audit as permitted by the contract maintained by the Office of the Inspector General (OIG) as the Contracting Officer's Technical Representative (COTR). Award will be made under a GSA schedule contract.

The Financial Statement Auditor is selected through contracting procedures by the OIG (with the Bureau of Public Debt (BPD) acting as the procurement office) and must stay independent from the DHS components that are being audited. The auditor selected commences work immediately and entrance conferences are held within a short time after award of the financial statement audit contract.

The Office of the Chief Financial Officer (CFO) coordinates and prepares the DHS consolidated financial statements and in this role acts as primary liaison for the auditors. All DHS departmental CFOs coordinate with the Director of Financial Management in the preparation of financial statements and completion of the audit.

The Office of the Inspector General is the COTR for the Financial Statement Audit contract. The WCF funds are used to support the departmental financial statement audits with the OIG having the following responsibilities:

- Contracting with an independent public accounting firm to perform the FY 2011 DHS financial statement audit.
- Providing oversight of the contract auditor
- Providing estimated cost information that allows the OCFO to properly budget for audit costs
- Notify the OCFO of any potential cost overruns and the related reasons
- Review and approve invoices for payment.

***Cost Allocation Methodology:*** The cost allocation methodology is the sum of the estimated auditor's billable hours multiplied by the hourly rate plus travel and incidental costs.

***Full Time Equivalent (FTE):*** This activity requires 0 FTE.

## **Internal Control Audit - Fee for Service Activity**

**Description of Service:** The contract includes time and materials for internal control audit services with the auditor providing the services and billing for hours worked at billing rates commensurate with the audit position being billed. The costs include travel and incidental costs associated with the performance of the audit as permitted by the contract maintained by the OIG as the COTR. The award will be made under a GSA schedule contract.

The Internal Control Auditor is selected through contracting procedures by the OIG (with the Bureau of Public Debt (BPD) acting as the procurement office) and must stay independent from the DHS components that are being audited. The auditor selected commences work immediately and entrance conferences are held within a short time after award of the financial statement audit contract.

The Office of the Chief Financial Officer (CFO) coordinates the assessment process to support management's assertion and in this role acts as primary liaison for the auditors. All DHS departmental CFOs coordinate with the Director of Financial Management in the preparation of and completion of the internal audit.

**Cost Allocation Methodology:** The cost allocation methodology is the estimated auditor's billable hours per component multiplied by the hourly rate plus travel and incidental costs.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

## **Financial Management – Fee for Service Activity**

**Description of Service:** The Office of Financial Operations (OFO) is a line of business under WCF that provides financial management to the offices within the Office of the Secretary and Executive Management (OSEM), the Under Secretary for Management (USM), the Office of the Chief Financial Officer (OCFO), and the Office of the Chief Information Officer (OCIO). The WCF Financial Operations processes and manages the processing of multiple types of financial document and transactions for its customers as well as FedTraveler Help Desk Support.

This funding provides the personnel and materials to perform the following budget execution activities:

- Procurement Requisition Operations and Management
- Invoice and IPAC Operations and Management
- Travel Operations Support and Management
- Payroll Reclassification, Reconciliation and Reporting Management
- Fiscal Year End Close Coordination and Support
- Travel Cards Operations and Management
- Purchase Card Operations Management

**Cost Allocation Methodology:** The cost allocation methodology is a pro-rata share based on the percent of each office within Office of Financial Operations' adjusted total FTEs multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 15 FTE.

### **Bankcard Program - Fee for Service Activity**

**Description of Service:** DHS has selected Customs and Border Protection (CBP) as the servicing agent to provide for a centralized invoicing and payment system for components within DHS. CBP has developed and implemented a system that supports the receipt of daily invoices for all of DHS from US Bank. This system assures payment of those invoices within one business day of receipt, and provides transmission of an electronic file containing transaction data to each component's accounting system.

**Cost Allocation Methodology:** The cost allocation methodology for this activity is based on the percent of each component's number of Bankcard transactions processed divided by the total number of Bankcard transactions processed for all participating components multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

### **Treasury Information Executive Repository (TIER) – Fee for Service Activity**

**Description of Service:** The DHS CFO's office is responsible for creating the Department-wide financial statements. As part of this process, two software packages are used to process the work. These two products are the Treasury Information Executive Repository (TIER) and CFO Vision Software. The DHS use of TIER and CFO Vision has benefited the entire Department by the cost and resource savings involved in being able to produce financial statements in a timely manner. This has been beneficial given the accelerated timeframes for producing the Annual Financial Report.

**Cost Allocation Methodology:** The cost allocation methodology for this activity is average cost equally distributed to the organization element.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

### **National Finance Center (NFC) Payroll/Services and Reporting – Fee for Service Activity**

**Description of Service:** The Department of Agriculture/National Finance Center (NFC) provides Payroll/Personnel services utilizing their legacy mainframe systems (payroll) and EmpowHR PeopleSoft application (personnel). In addition, NFC provides Payroll/Personnel policy support and benefits reconciliation, tax reporting, and payroll problem resolution. **NOTE:** The following components will have migrated to EmpowHR by FY 2011: TSA, USCG (civilian), HQ, FLETC, FEMA, ICE and CIS.

#### **Cost Allocation Methodology:**

Along with NFC Payroll/Personnel services and EmpowHR charges, NFC provides hosting services for the webTA (Time & Attendance) application. The FY 2011 cost estimate is based

on three algorithms: Payroll costs are \$157 per average employee paid. The second algorithm is \$105 per W-2 processed for EmpowHR. Third, the webTA hosting costs are \$12.30 per average employee paid.

Below are the Cost Areas and the Cost Drivers that the NFC Payroll/Services and Reporting are comprised of:

COST AREA	COST DRIVER
Postage-Earnings and Leave and Personal Benefits Statements	Pieces of mail
Treasury FMS Postage Charges for Single Address Checks	Checks mailed
USDA OIG Oversight of Non-USDA Payroll Processing	Avg # of employees paid
Payroll Operations Branch Support	Avg # of employees paid
Tax Reporting	Avg # of employees paid
Payroll Policy Support	Avg # of employees paid
e-Pay Policy Support	Avg # of employees paid
Benefits Reconciliation and Liaison Area	Avg # of employees paid
Debt Management	Receivables established
Claims	Claims processed
Payroll Accounting	Avg # of employees paid
Certification	Avg # of employees paid
Ad-Hoc reporting (based on CPU Minutes used)	CPU Minutes
Data Center Operations (Other than FOCUS)	Avg # of employees paid
Payroll/Personnel Baseline Services	Avg # of employees paid
<b>Full Time Equivalent (FTE):</b> This activity requires 0 FTE.	

**HQ Human Capital Services -Fee for Service Activity**

HQ Human Capital Services: The HQ Service center will continue to provide the full range of HR operational support, including Executive Resources, to DHS HQ components (excluding the OIG).

**Description of Service:** The HC Services team provides coordination and oversight support for outsourced services supporting HQ Human Capital operational needs. The team ensures that the personnel processes for HQ’s managers/employees and service providers, runs efficiently and effectively. Examples of services provided include: Staffing and Recruitment; Position Classification/Position Management; Performance Management; Payroll and Personnel Action Processing; Employee and Labor Relations Support; Retirements and Benefits Support; Time and Attendance Support.

The HC Services Team provides coordinated and prioritized services to all DHS customers; ensures timely and effective recruitment of staff; effectively manages the “on-board” staffing process (which includes security clearances and collaboration with the Personnel Security Office), quality personnel staffing services; and, efficient and effective facilitation of staff exiting out of DHS HQ.

**Cost Allocation Methodology:** The cost allocation methodology is a pro-rata share based on the

percent of each component's number of FTE divided by the total number of participating component's FTE multiplied by total estimated cost of the activity.

***Full Time Equivalent:*** This activity requires 51 FTEs.

### **Human Capital Business Systems (HCBS) – Fee for Service Activity**

Human Capital Business Systems (HCBS): The mission of the HCBS is to design, develop, acquire, implement, maintain and support DHS enterprise-wide human capital business systems and reduce costs by consolidating the number and variety of DHS human capital systems maintained.

***Description of Service:*** The mission of the HCBS is to design, develop, acquire, implement, maintain and support DHS enterprise-wide HC business systems. The system capabilities meet the requirements specified by the user-community and provide services in a timely, user-sensitive and cost-effective manner.

HCBS continues its enterprise acquisition strategies on behalf of all of DHS components, avoiding considerable duplicative costs if DHS components proceed independently. In addition to the T&A system mentioned above, this includes additional enterprise HR services and applications; web-based Performance Management (or "e-Performance"); Employee/Labor Relations Case tracking; the Reward system for market-based pay analysis; Pay Tools/Utilities to assist with new pay cluster and band determinations; and an e-Classification/e-Recruitment enterprise system. In each case the components are supported by the HCBS unit in a collaborative and leveraged approach.

***Cost Allocation Methodology:*** DHS population serviced assumes billing based on the "average number of employees paid" - which is consistent with NFC billing. HCBS is only charging Operations and Maintenance (O&M) costs to the WCF. Full IT costs, including design/implementation, software purchases, etc. are offset with appropriated Human Resources Information Technology (HRIT) funds.

It is important to note that for HRIT Systems; only those components that are benefiting from specific systems are being charged in the year that they benefit.

***Full Time Equivalent:*** This activity requires 24 FTE.

### **Flexible Spending Accounts (FSA) Administrative Costs – Fee for Service Activity**

***Description of Service:*** FSAs are employee-funded accounts that are used by the employee account holders to pay for medical expenses that are tax deductible, but not reimbursed by another source, as well as eligible dependent care costs. Contributions to the accounts come from an employee's pre-taxed salary; the government does not make a contribution. There is a fee that is charged by the administrator of these accounts. Effective FY08, the law requires that an agency pay these fees on behalf of their employees.

The costs for this program are charged based on actual invoices received in October and March of each calendar year. The March bill assesses a fee for employees of record as of January 1 of the calendar year. The October bill makes an adjustment for any new employees who have entered the program since January 1. The Human Capital Business Office manages the invoicing process with the FSA provider and charges the direct cost of the fees to the component based upon actual invoices received from the vendor.

Generally, the Department saves enough money in reduced payroll tax to cover administrative fees. Administering the costs of these services through the WCF provides for greater efficiencies through centralized management.

***Cost Allocation Methodology:*** The allocation methodology for the component assumes the total cost times the transaction % - which is the component's percentage of the population serviced (FTEs).

***Full Time Equivalent (FTE):*** This activity requires 0 FTE.

### **DHS Executive Leadership Development – Fee for Service Activity**

***Description of Service:*** A well executed Executive Leadership Program is a key element in sustaining a “One DHS” culture. For FY 2011, at a minimum, the Executive Leadership Curriculum will consist of two DHS-wide leadership development activities: the Secretary's Senior Leadership Conference and the Senior Executive Service Candidate Development Program (SES-CDP).

**The Secretary's Senior Leadership Conference** is important as change management starts with top leadership. The purpose of this conference is to:

- Provide an opportunity for the Secretary to meet with DHS executives and for those executives to interact with each other;
- Broaden the perspective of DHS leadership by actively creating a forum for in-depth dialogue and discussion for cross-cutting Departmental issues;
- Allow executives to learn about both key DHS-wide and component-specific strategic and tactical initiatives for the coming year, which is predicated on strategic linkage of resources, performance and results;
- Provide perspective from the White House, Congress, and others on issues important to DHS.

**The DHS Senior Executive Service Candidate Development Program** serves as a corner stone for sustaining a corporate leadership identity as directed in the DHS Strategic Plan; contributes to meeting our succession planning goals; and creates a high-quality SES leadership cadre. It is also a critical element in sustaining a “Green” rating under the President's Management Agenda's Human Capital Scorecard.

This centralized program complements and enhances the strengths of existing component Leadership development initiatives across the Department and further facilitates succession planning opportunities. It provides the opportunity for participants to take advantage of

developmental/rotational opportunities in other DHS components, thereby increasing participant's "corporate" DHS knowledge and experience. In addition, components benefit from these rotational assignments by having a senior staff person working with them on real issues and offering different perspectives and/or business experiences.

***Cost Allocation Methodology:*** The costs are allocated based on the percentage of SES slots a component has relative to the total DHS SES (or SES equivalent) population excluding military.

***Full Time Equivalent:*** This activity requires 2 FTE.

### **HQ Executive Leadership Development/General Workforce Training – Fee for Service Activity**

***Description of Service:*** The HQ ELDP provides executive level training to close potential competency gaps in our DHS Headquarters leadership. Programs to support Executive Leadership are provided through the following programs: The Treasury Executive Institute (TEI); the SES Forum; and, the Individual Executive Development Training and General HQ Workforce training. In addition to TEI and the SES forum, training opportunities could include attending courses in the Management Development Center (Shepardstown, WV) or the Federal Executive Institute.

***Cost Allocation Methodology:*** The allocation methodology for the components is the total cost divided by the total population serviced and then multiplied by the Component percentage of the population. This allocation excludes the OIG, per request.

***Full Time Equivalent (FTE):*** This activity requires 0 FTE.

### **HQ Employee Assistance Program (EAP) — Fee for Service Activity**

***Description of Service:*** The EAP program includes short term counseling for employees and family members, critical incident stress debriefing, peer support programs, short term counseling, management consultations, information and referral to community resources for mental health providers, mental health education training, and peer trauma team support. EAP assistance enables employees to achieve and maintain balance in their lives, increasing job performance, satisfaction, and morale. The development of a Peer Support Program enhances management's ability to provide assistance in traumatic and critical incidents – both on the local and national level to our employees, and to the public.

The goal of the EAP program is in support of DHS ongoing commitment to ensure effective recruitment, development, compensation, succession management and leadership of a diverse workforce to provide optimal service at a reasonable cost. The EAP is mandated under 5 U.S.C. 7904, 42 U.S.C. 290dd-1(a), and 42 U.S.C. 290ee-1(a).

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is the total cost of the EAP program divided by the population serviced.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

### **CIO/DHS Infrastructure Transformation Program – Fee for Service Activity**

**Description of Service:** The DHS Consolidated IT Infrastructure serves the majority of employees of the Department since its establishment on March 1, 2003. Since the IT infrastructure provides the foundation for effective operations of DHS systems and applications, including information sharing across components, a reliable and robust infrastructure is critical to the success of the DHS mission. From a business perspective, the goal of the IT infrastructure transformation is for the Department to be able to share data from any point in DHS to any decision maker.

The program provides a robust platform on which to quickly launch new capabilities. For example, when DHS was created the department supported numerous legacy IT programs such as 15 separate targeting systems, 14 alerts and warnings systems, and a handful of identification and credentialing systems across 24 DHS run data centers, seven wide area networks, and multiple local area networks with overlapping system circuitry. These data centers contained over 12,000 servers. Contrasting acquisition strategies and IT infrastructure policies among components further complicated the DHS environment and the ultimate goal of moving to one DHS-wide IT infrastructure in a consolidated IT data center operational environment.

The Infrastructure Transformation Program (ITP) has been chartered by the CIO Council as a DHS Level 1 investment with the following project domain initiatives included in the scope of the transformation effort to provide the following services: Network, Email, Helpdesk, Data Center, Desktop, Site, Voice, Video, and Wireless.

ITP resides within the IT Services Office (ITSO) of the DHS CIO. ITP is managed by the ITSO Enterprise Services Division (ESD) and is led by the Director of ESD and a CIO Council member executive sponsor. Furthermore, ITP is supported by a senior executive steering group of CIOs, which is staffed by a team of technical experts hired by the Department HQ from the components, several components' working group members, and contractor support.

The OCIO is committed to building a strategic human capital planning capability that is supported by a structured total workforce approach; one that seeks efficiencies, cost effective performance improvements, and a more appropriate balance of in-house and contractor resources. During FY2010, and with the FY2011 request, the OCIO is implementing a DHS Balance Workforce Strategy involving contractor conversions and the creation of additional personnel positions to provide greater government oversight and management of IT projects. The additional positions being requested in FY2011 will be funded through the realignment of base resources.

**Cost Allocation Methodology:** The FY 2011 cost allocation is based on the components' contribution percentages to the Consolidated IT Infrastructure FY 2010 OMB Exhibit 300.

**Full Time Equivalent (FTE):** This activity requires 36 FTE.

## National Capital Region Infrastructure Operations (NCRIO) – Fee for Service Activity

**Description of Service:** The NCRIO serves the DHS Headquarters, the department's components, and select field offices of the department's major components for network and internet/intranet access; infrastructure transformation and support; management and delivery of desktop computing applications and equipment, email, wireless communications, video (VTC), voice (phone) and messaging; communications security; and IT operations disaster planning and mitigation to ensure continuous operations. The NCRIO manages and maintains all deployed applications for full functionality and continuous availability on all Department of Homeland Security (DHS) systems, as well as full functionality of file and data storage and retrieval, printing, and remote access. The NCRIO coordinates management and delivery of these services with build-out of new facilities and provides customer service through a 24/7 help desk.

In providing these services, the NCRIO adheres to and follows all applicable executive orders, presidential directives, other Federal and DHS laws, Federal orders management policies, handbooks, guidelines, processes, and procedures. The NCRIO continually monitors vendors' performance and technology to ensure that DHS HQ IT infrastructure services conform to specified standards for reliability, readiness, sustainability, supportability, availability, stability, security, flexibility, responsiveness and cost effectiveness. The NCRIO tracks workload data by functional service area to identify trends and statistical variations, and provide technical, logistical and financial forecasts for future years. The NCRIO conducts baseline assessments of its existing systems and infrastructure against industry standards for items such as configuration and performance metrics. Using the results of baseline evaluations, the NCRIO maintains a program for the improvement of information technology services.

The NCRIO resides within the IT Services Office (ITSO) of the DHS CIO. NCRIO is managed by the ITSO Headquarters Services Division (HSD). NCRIO is led by the Director of HSD. Cost and activity based analyses are conducted, and projections validated independent of NCRIO management by the ITSO Business Services Division (BSD). Senior executive management of the DHS HQ Directorate Components formed a review group to identify and resolve customer service issues in monthly meetings with the DHS CIO.

The OCIO is committed to building a strategic human capital planning capability that is supported by a structured total workforce approach; one that seeks efficiencies, cost effective performance improvements, and a more appropriate balance of in-house and contractor resources. During FY2010, and with the FY2011 request, the OCIO is implementing a DHS Balance Workforce Strategy involving contractor conversions and the creation of additional personnel positions to provide greater government oversight and management of IT projects. The additional positions being requested in FY2011 will be funded through the realignment of base resources.

**Cost Allocation Methodology:** The FY 2011 WCF submission is allocated among the participating organizational components: Undersecretary for Management (USM), Offices of the Secretary and Executive Management (OSEM), Under Secretary for National Protection and Programs, Domestic Nuclear Detection Office (DNDO), Science and Technology (S&T),

Analysis & Operations, Office of Health Affairs (OHA), and the Office of Inspector General (OIG).

**Full Time Equivalent (FTE):** This activity requires 70 FTE.

### **Software Enterprise Licenses – Fee for Service Activity**

**Description of Service:** This service allows components to consolidate license requirements into a single enterprise-wide procurement to leverage DHS buying power. The activity further helps to decrease costs, reduce paperwork and save time by eliminating the need for repetitive, individual purchases of software licenses. This is the first procurement delivered through the management Action Directive Software Licenses, as reported at the 60-day Efficiency Review. The Department continues to pursue opportunities to benefit from economies of scale, moving from component or office specific software licenses to larger enterprise licenses for common services.

#### **Microsoft:**

In the spirit of the Federal Acquisition Streamlining Act (FASA), the Department of Homeland Security (DHS) and Dell Marketing, L.P. decided to re-enter into a single blanket purchase agreement (BPA) for a DHS-wide Microsoft Enterprise Agreement to standardize office automation and communication applications across the component agencies' existing IT environments. The account provides for the funding and management of the Microsoft Enterprise Agreement awarded in June 2009, which provides enterprise access to the Microsoft suite of products. The products include the software needed for individual desktops, laptops, and server platforms, such as MS Office, MS Project, MS Visio, MS Advanced Server, etc. This license agreement is utilized by all of DHS and this budget request reflects the contractual obligations of each of the Components.

The OCIO is committed to building a strategic human capital planning capability that is supported by a structured total workforce approach; one that seeks efficiencies, cost effective performance improvements, and a more appropriate balance of in-house and contractor resources. During FY2010, and with the FY2011 request, the OCIO is implementing a DHS Balance Workforce Strategy involving contractor conversions and the creation of additional personnel positions to provide greater government oversight and management of IT projects. The additional positions being requested in FY2011 will be funded through the realignment of base resources.

**Cost Allocation Methodology:** The annual costs are based on the total number of existing licenses plus the full cost of licenses requested by the Components and maintenance costs over a five-year period.

**Full Time Equivalent (FTE):** This activity requires 4 FTE.

### **Procurement Operations – Fee for Service Activity**

**Description of Service:** The DHS Office of Procurement Operations (OPO) provides full service acquisition support to OSEM, USM, S&T, USCIS, NPPD, OHA, OIG, A&O, DNDO,

FEMA and USVISIT. In addition, the OPO provides acquisition services for department-wide acquisition initiatives identified by both the Chief Information Officer and the various commodity councils within DHS. Services provided include acquisition planning, training, execution, and administrative services.

***Cost Allocation Methodology:*** The cost allocation methodology is based upon the alignment of eight OPO procurement services support divisions with their respective customers; a calculation of the full cost, both direct and indirect costs, of the services provided by each of those divisions to their respective customers consistent with each customer's level of demand for procurement support; each major customer is billed an amount equal to that calculation, an amount equal only to the full cost of each customer's procurement support. The OPO Departmental Operations Acquisitions Division's costs for support to approximately 17 of the smaller Departmental customers is calculated the same way but it is then further allocated to each customer according to each customer's percentage of the prior year's total procurements.

***The Allocation methodology*** produces a billing rate for each division, which is the division's total cost divided by that customer's total procurements for the prior year; for example: \$7M (division's annual costs) / \$547M (division's prior year procurements) = 1.29% (OPO cost is \$.0129 per contract dollar awarded).

***Full Time Equivalent (FTE):*** This activity requires 281 FTE.

### **Data Center Consolidation – Fee for Service Activity**

The funding request for the FY 2011 data center development within the components will be managed through the DHS Working Capital Fund (WCF). The funds will be used for the continuation of system and application migration to the two DHS Enterprise Data Centers for central DHS management in FY 2011. This includes: discovery, migration planning, and scheduling activities specifically related to systems/applications that will transition to the DHS Data Centers in FY 2010. Also, purchasing of new equipment for the placement in the DHS Data Centers as part of migration/transition efforts, installation of equipment racks at the DHS Data Centers, migration-related build-out of DHS Data Center infrastructure, transition of disaster recovery/backup/COOP (Continuity of Operations) capability to DHS Data Centers, installation of infrastructure support as part of system migrations at the DHS Data Centers, migration of USCIS hardware, and systems/applications to occupy rack space at the DHS Data Centers are also included in the FY 2011 budget request.

***Full Time Equivalent (FTE):*** This activity requires 0 FTE.

<b>2011 Request</b>	2	2	41,024
Total Change 2010-2011	...	...	3,047

The Working Capital Fund requests \$41.0 million in FY 2011 for Tri-Bureau Services which is an increase of \$3.0 million from FY 2010.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

*Tri-Bureau Services Activities*

**IT Services from Department of Justice (DOJ) – Tri-Bureau Service Activity**

**Description of Service:** The Department of Justice (DOJ) MOU Working Group performed an analysis that clarified IT services that DHS requires from DOJ and their associated costs. The working group defined the specific IT service requirements of each component currently using DOJ as the provider: USCIS, ICE, Office of Policy, and US-VISIT.

The working group is preparing migration plans to transfer services to the Enterprise Data Center.

DOJ provides the following data center services:

- Application hosting on OS/390 platform for approximately 40 applications.
- Application hosting on AIX Unix platform for approximately 25 applications.
- House DHS servers.
- Disk storage and enterprise tape backup capacity.
- Local printing services.
- Manage and operate Component-owned equipment.
- Perform transition support for de-installing, packing, and shipping systems as requested.
- Dedicated, separate raised-floor computer room space and utilities as requested.

**Cost Allocation Methodology:** The cost allocation methodology is based on the actual usage as determined by rates for DOJ Computer Services.

**Full Time Equivalent (FTE):** This activity requires 2 FTE.

PPA: Government-wide Mandated Services Activity

	Perm Pos	FTE	Amount
2009 Actual	4	4	28,968
2010 Enacted	8	8	35,761
2011 Adjustments-to-Base	...	...	614
2011 Current Services	8	8	36,375
2011 Program Change	1	1	(4,096)
2011 Request	9	9	32,279
Total Change 2010-2011	1	1	(3,482)

Working Capital Fund requests \$32.3 million in FY 2011 for Government-wide Mandated Services. This is an increase of 1 FTE over FY 2010, and a decrease of \$3.5 million.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

***GOVERNMENT-WIDE MANDATED SERVICE ACTIVITY***

**Interagency Council Funding - Government-wide Service activity**

***Description of Service:*** GSA provides oversight and administers the Interagency Council funds in consultation with the Chief Financial Officers Council, the Chief Information Officers Council, the Federal Acquisition Council and the Chief Human Capital Officers Council.

- **Chief Financial Officers (CFO) Council Funding Supports the Following Activities:**
  - Federal Audit Clearing House (FAC) - Disseminates audit information to Federal agencies and the public, supports OMB oversight and assessment of Federal award audit requirements, and assists Federal cognizant and oversight agencies in obtaining OMB Circular A-133 data and reporting packages.
  - Grants Streamlining – Is dedicated to implementing Public Law (P. L.) 106-107, the Federal Financial Assistance Management Improvement Act of 1999. It also proposes a standard format for Federal agency use in announcing discretionary grant and cooperative agreement funding opportunities;
- **Chief Information Officers (CIO) Council Funding Supports the Following Activities:**
  - A \$2 million contract to support the Portfolio Management Office for the ongoing e-government initiatives efforts.
  - Federal Enterprise Architecture (FEA) — the FEA PMO will continue efforts to identify and develop collaboration and consolidation opportunities across Federal agencies in support of the President’s Management Agenda initiatives.

- **Federal Acquisition Council (FAC) Funding Request Supports the Following Activities:**
  - The Federal Competitive Sourcing Database (FCSD) is intended to facilitate comprehensive, consistent, and timely reporting of government actions related to competitive sourcing.
  - Acquisition Workforce Competency Development and Training - Agencies use the Acquisition Career Management Information System (ACMIS) database which provides workforce training data and OPM data to make strategic workforce decisions affect the agency training and certification requirements.
  - Government-wide Performance Measures for Socio-Economic Goals - Small business success is currently measured by meeting established statutory goals.
  - Procurement Center Representatives (PCRs) Online - In order to obtain the appropriate level of contributory review, and move the procurement along in a timely fashion, the PCRs facilitate the requirement of the agencies and SBA uses an online workload tool.
  - The Service Acquisition Reform Act (SARA), Acquisition Advisory Panel and Report to Congress - Section 1423 of SARA requires the Administrator of OMB/Office of Federal Procurement Policy to establish an advisory panel of recognized experts in acquisition law and policy to review laws and regulations regarding the use of commercial practices, performance-based contracting, the performance of acquisition functions across agency lines of responsibility, and the use of government-wide contracts.
  - Acquisition Center of Excellence - SARA mandates the development and maintenance of a Center of Excellence in Contracting for Services.
  
- **Chief Human Capital Officers Council (CHCO) Funding Request Supports the Following Activities:**
  - CHCO Website - A critical component in advancing the government-wide goals of this management innovation has been the development and maintenance of a high-quality, component rich Web content delivery system. The creation of this site has provided a vehicle for sharing and exchanging information of interest to the Federal human resource management community. The system provides a forum for the exchange of information among members of the Council in both a public and private manner.

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is pro-rata share based on the percent of each component's adjusted total budget divided by DHS's total adjusted budget (excluding grant funding) multiplied by the total estimated cost of the activity.

***Full Time Equivalent (FTE):*** This activity requires 0 FTE.

### **USAJOBS (formerly Recruitment One-Stop)-Government-wide Service activity**

***Description of Service:*** The USAJOBS initiative is a government-wide initiative led by the Office of Personnel Management (OPM). All agencies fund their portion of this program (based on employment levels). Regulations contained in 5 CFR Parts 330, 333, and 335 implement section 4 of Public Law 1054-52 and authorizes OPM to charge fees to agencies in order to pay the cost of providing Federal employment information and services.

USAJOBS Federal Employment Information System delivers state-of-the-art on-line recruitment services to job seekers, simplifying the process of locating and applying for Federal jobs. It delivers a number of job seeker focused features including intuitive job searching; clean, concise, understandable and attractive job announcements; on-line resume submission; applicant data-mining; and on-line feedback on status and eligibility.

***Managing Partner:*** OPM

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's Full Time Equivalent (FTE) divided by the total DHS civilian FTE multiplied by the total estimated cost of the activity. This activity only benefits civilian personnel; therefore, military FTE's are not included in the cost allocation methodology.

***Full Time Equivalent (FTE):*** This activity requires 0 FTE.

### **e-Training – Government-wide Service Activity**

***Description of Service:*** Provides enterprise approach to leveraging technology to support learning and development programs, initiatives, and capabilities. This includes an enterprise architecture approach to the modernization and reduction in complexity of DHS Learning Management Systems (LMS'), building enhanced capability through tools such as web conferencing, and closing existing and future gaps in structured learning opportunities by providing every DHS employee access to over 3,000 online courses and 12,000 online books. Government-wide accomplishments derived from this activity are:

- Centralized procurement of primary DHS LMS' in use, providing greater visibility to CFO's, CIO's, and all DHS management regarding costs
- Consistent, standardized delivery of all legislatively mandated training to all DHS employees (and contractors where appropriate) launched IT security courses mapped to the Government Information Security Reform Act (GISRA) and The National Institute of Standards and Technology requirements
- Providing 21st Century approach to training in critical areas such as Emergency Medical Technician training by assisting in the coordination of DHS Modeling and Simulation activity in regards to training
- Compliance with OPM and OMB requirements for reporting Enterprise Human Resources Integration (EHRI) training data for all DHS Federal civilian employees

***Managing Partner:*** OPM

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's Full Time Equivalent (FTE) divided by DHS's total FTE (excluding military) multiplied by total estimated cost of the activity.

***Full Time Equivalent (FTE):*** This activity requires 9 FTEs.

## **Enterprise HR Integration – Government-wide Service Activity**

**Description of Service:** EHRI is a collaborative e-Government initiative designed to transform the way Federal HR Specialists and Managers access human resource information and the way all Federal employees access their personnel file information. EHRI is in the process of replacing the current paper based Official Personnel Folder (OPF) with an electronic employee record for all Executive Branch employees, resulting in a comprehensive electronic personnel data repository covering the entire life cycle of Federal employment. In addition to streamlining personnel management actions, EHRI provides HR managers and specialists with powerful workforce analytic and planning capabilities.

**Managing Partner:** OPM

**Cost Allocation Methodology:** Costs for EHRI's products and services will be recovered by EHRI from all agencies on an equitable basis related to the size and usage of each participating agency. Charges to each agency will be established by distributing total EHRI costs to all clients on the basis of the number of OPFs or on the basis of actual cost, depending on the service.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

## **e-Rulemaking – Government-wide Service Activity**

**Description of Service:** e-Rulemaking is a collaborative, interagency activity designed to establish a common, automated and integrated approach to managing the Federal government's rulemaking function. The activity consolidates rulemaking systems at the various departments and agencies and is centrally managed through a web-based environment offering such as one-stop access, search capabilities, and public commenting. e-Rulemaking activities include:

- Expanding public understanding of the rulemaking process
- Improving the quality of Federal rulemaking decisions
- Increasing the amount, breadth, and ease of citizen and intergovernmental participation in rulemaking
- Administering Regulations.gov, a cross-agency, front-end Web application that posts and allows comments on proposed Federal agency rules
- Writing memoranda to the President's Management Council (PMC), directing agencies to include a link to Regulations.gov on agency homepages and in the synopsis of the notice of any regulatory action requesting public comment
- Posting the dockets for the Department of Housing and Urban Development, USDA's Animal and Plant Health Inspection Service, a portion of DHS, and Office of Personnel Management rulemaking on EPA's on-line system as a proof-of-concept.

**Managing Partner:** Environmental Protection Agency

**Cost Allocation Methodology:** The cost allocation methodology for this activity is pro-rata share based on the percent of each participating Component's adjusted total budget divided by DHS's total adjusted budget (excluding grant funding) multiplied by the total estimated cost of

the activity.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

### **e-Grants – Government-wide Service Activity**

**Description of Service:** e-Grants creates a single portal for all Federal grant customers to find, apply and manage grants on-line. The Grants.gov Storefront provides electronic functionality for applicant's grantees, and reduces the paper-based processes that currently challenge the Federal grants environment. The initiative is designed to reduce existing inefficiencies, meet e-Gov goals, and provide benefits to both citizens and the government. Specifically, the initiative enables the government to meet many of the streamlining activities required by Public Law (PL) 106-107, Federal Financial Assistance Management Improvement Act, and called for in the PMA, such as deploying a unified search/find capability for grant opportunities, standard data sets, and a common mechanism and processes for applying for Federal grants funds.

**Managing Partner:** Department of Health and Human Services

**Cost Allocation Methodology:** The cost allocation methodology is a pro-rata share based on the percent of each organization element's grant funding divided by DHS's total grant funding multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

### **Human Resources Line of Business (HRLoB) – Government-wide Service Activity**

**Description of Service:** HRLoB has been launched to drive rapid and transformational improvements in the delivery of human resources services across government agencies. HRLoB has been tasked to consider business benefits and impacts and then propose a model that improves strategic management of human capital, is effective and efficient, and improves customer service.

**Managing Partner:** Office of Personnel Management

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's Full Time Equivalent (FTE) divided by DHS's total FTE multiplied by the total estimated cost of the activity. This activity only benefits civilian personnel; therefore, military FTE is not included in the cost allocation methodology.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

### **Geospatial Line of Business – Government-wide Service Activity**

**Description of Service:** The Geospatial LoB is designed to further refine the opportunities for optimizing and consolidating Federal geospatial-related investments to reduce the cost of government and, at the same time, improve services to citizens. Cross-agency coordination of

geospatial activities can identify, consolidate, and reduce or eliminate redundant geospatial investments. The Geospatial Line of Business (LoB) will result in a more coordinated approach to producing, maintaining, and using geospatial data, and will ensure sustainable participation from Federal partners to establish a collaborative model for geospatial-related activities and investments.

***Managing Partner:*** Department of Interior

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's adjusted total budget divided by DHS's adjusted total budget (excluding grant funding) multiplied by total estimated cost of the activity.

***Full Time Equivalent (FTE):*** This activity requires 0 FTE.

### **e-Gov Integrated Acquisition Environment Loans And Grants– Government-wide Service Activity**

***Description of Service:*** The Federal Funding Accountability and Transparency Act of 2006 (FFATA) requires OMB to “ensure the existence and operation of a single searchable website, accessible by the public at no cost to access” that includes information on each Federal award. The law specifically requires a unique identifier for the entity receiving the award and of the parent entity of the recipient, should the entity be owned by another entity. Some contracts (and some grants) already require Data Universal Numbering System (DUNS) numbers. This will allow those areas to feed information into the FFATA portal.

***Managing Partner:*** General Services Administration

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Equivalent (FTE), divided by DHS' total FTE and multiplied by total estimated cost of the activity.

***Full Time Equivalent (FTE):*** This activity requires 0 FTE.

### **Budget Formulation and Execution Line of Business– Government-wide Service Activity**

***Description of Service:*** The focus of the Budget Formulation and Execution Line of Business (BFE LoB) is to build a “budget of the future” by promoting information sharing across government agency budget offices and building a “community of practice.” With this collaboration, the budget community can start to identify best practices for all aspects of budget formulation and execution. The BFE LoB strives to find solutions that link budget formulation, execution, planning, performance, and financial information. Areas of particular interest include technology, budget performance integration, data collection and tracking, financial management integration, and human capital.

***Managing Partner:*** Department of Education

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's adjusted total budget divided by DHS' adjusted total budget (excluding grant funding) multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

### **Financial Management Line of Business– Government-wide Service Activity**

**Description of Service:** The Financial Management Line of Business (FMLoB) goals are to define, analyze, and implement options that will enhance cost savings in the financial management systems, provide for standardization of business processes and data models, promote seamless data exchange between Federal agencies, and strengthen internal controls through integration of core financial and subsidiary systems. The FMLoB's current objective is to improve the cost, quality, and performance of financial management (FM) reducing the number of noncompliant systems by leveraging common standards, shared service solutions, and implementing other government-wide reforms that foster efficiencies in Federal financial operations.

**Managing Partner:** General Services Administration (GSA)

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's adjusted total budget, divided by DHS' adjusted total budget (excluding grant funding) and multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

### **e-Gov Integrated Acquisition Environment – Government-wide Service Activity**

**Description of Service:** The Integrated Acquisition Environment (IAE) activity is a secure business environment that facilitates and supports cost-effective acquisition of goods and services in support of mission performance. The goals for the Integrated Acquisition Environment activity are achieved through four major business areas: Business Partner Network (BPN), Acquisition Information Reporting (AIR), e-Marketplace, and Standard Transactions. IAE is achieving its goal of streamlining the intricate system of process threats that is needed to buy and track over \$400 billion in goods and services annually.

**Managing Partner:** General Services Administration (GSA)

**Cost Allocation Methodology:** The cost allocation methodology is a pro-rata share based on the percent of each component's measurement of three contract acquisition variables divided by the total sum of all component measurements of the same three variables multiplied by total estimated cost of the activity. The three contract acquisition variables measured for each component is as follows: (1) the number of personnel providing contractor support, (2) number of contracts processed and (3) the dollar volume of contracts processed.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

### **e-Gov Disaster Management – Government-wide Service Activity**

**Description of Service:** Disaster Management is part of the e-Gov Act of 2002, Title II, and Section 214 "Enhancing Crisis Management Through Advanced Information Technology" and is described in OMB M-03-18, "Implementation Guidance for the e-Government Act of 2002." This initiative, which will support disaster assistance and "all hazards" response, is a joint effort involving 10 other Federal agencies that support disaster management. This initiative also supports many of the goals of the Initial National Response Plan dated October 2003.

The scope of the project covers all Federal agencies that are involved in disaster recovery, as well as state, local and tribal disaster recovery organizations and individuals. The value of this program is its contribution to improving disaster preparedness and its potential to reduce property damage and loss of life.

**Managing Partners:** FEMA and CIO

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's level of participation in Disaster Management divided by the total sum of all component levels of participation in Disaster Management multiplied by total estimated cost of the activity. Levels of participation include measuring the active participation of sixteen elements of Disaster Management defined by Disaster Management e-Government Initiative Program Office, EP&R/FEMA. The sixteen elements of Disaster Management include the following: (1) transportation, (2) communications, (3) public works and engineering, (4) firefighting/incident command system, (5) information and planning, (6) mass care, (7) resource support, (8) health and medical services, (9) search and rescue, (10) hazardous materials, (11) food, (12) energy, (13) warnings and alerts, (14) research and development, (15) emergency/domestic preparedness, and (16) disaster relief. The sixteen elements are the cost drivers for each component's assessment and because many components are involved in various activities at different levels of participation, the cost for this activity is fairly uniform across the components.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**Department of Homeland Security**  
**Working Capital Fund**  
**Program Performance Justification**  
(Dollars in thousands)

PPA: DHS Cross-Cutting Activities

	Perm Pos	FTE	Amount
<b>2009 Actual</b>	<b>4</b>	<b>0</b>	<b>11,368</b>
<b>2010 Enacted</b>	<b>4</b>	<b>4</b>	<b>15,719</b>

The Working Capital Fund requests \$15.8 million for DHS Cross-Cutting activities in FY2011. This is a decrease of 2 FTE and \$0.1million below FY 2010.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

***DEPARTMENT OF HOMELAND SECURITY***  
***CROSSCUTTING ACTIVITY***

**Capital Planning & Investment Control (CPIC) – DHS Crosscutting Activity**

**Description of Service:** Capital Planning and Investment Control (CPIC) is run jointly by the CFO (Program Analysis & Evaluation), CPO Acquisition Program Management Division (APMD) and the CIO (Portfolio Management) to carry out the Department’s responsibilities for the quality and performance of its investment projects. A CPIC process is required to comply with the budget preparation guidance provided by OMB Circular A-11, Preparing, Submitting and Executing the Budget, and the management guidance provided by OMB Circular A-130, Management of Federal Information Resources, under the legislative authorities and requirements in the Clinger-Cohen Act and the Homeland Security Act. Project management offices throughout the components prepare business cases to demonstrate to OMB that they are on-track and ready to effectively use the additional funding requested.

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each participating component’s Exhibit 300’s total divided by the total DHS Exhibit 300’s multiplied by the total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

### **Strategic Sourcing – DHS Crosscutting Activity**

**Description of Service:** DHS has established Strategic Sourcing Group (SSG) to implement a department-wide approach to acquiring goods and services. The SSG has established commodity councils that are working to identify the department's needs for each commodity and developing more efficient purchasing mechanisms to address those needs. The total number of commodity councils established thus far is 16 covering such commodities as weapons and ammunition, uniforms, electricity, office supplies, airport services, and copiers.

**Cost Allocation Methodology:** The cost allocation methodology is a pro-rata share based on the percent of each component's measurement of three contract acquisition variables divided by the total sum of all component measurements of the same three variables multiplied by total estimated cost of the activity. The three contract acquisition variables measured for each component is as follows: (1) the number of personnel providing contractor support, (2) number of contracts processed and (3) the dollar volume of contracts processed.

**Full Time Equivalent (FTE):** This activity requires 2 FTE.

### **CPO Shared Reporting – DHS Crosscutting Activity**

**Description of Services:** The DHS Shared Reporting - CPO system, known otherwise as the Homeland Security Contract Information System (HSCIS), is the acquisition data feeder system to the Federal Procurement Data System - Next Generation (FPDS-NG) that is required by statute. This data source is the primary source of all acquisition data for the Federal government, used by U.S. agencies, governments around the world, the public, and the commercial world for planning marketing opportunities with the American government related to its annual acquisition budget. DHS uses HSCIS to provide data to FPDS-NG and to monitor acquisition data.

**Cost Allocation Methodology:** The cost allocation methodology for this activity is a pro-rata share based on the percent of each participating component's adjusted total budget by DHS' adjusted total budget (excluding grant funding) multiplied by total estimated cost of the activity.

**Full Time Equivalent (FTE):** This activity requires 0 FTE.

**Department of Homeland Security**  
**Working Capital Fund**

Working Capital Fund requests \$1.6 million for this activity in FY2011. This is an increase of 3 FTE \$0.3 million over FY 2010.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

***WCF MANAGEMENT ACTIVITY***

**Working Capital Fund Operations – WCF Management Activity**

Description of Service: The Working Capital Fund Operations provides policy, procedures, budget formulation, execution and customer resolution services in managing the WCF. Services are provided to the activity managers as well as customer Components across DHS.

**Budget Formulation Services:**

- Oversee all budgets, make recommendations on all aspects of the WCF, and perform or direct all duties and responsibilities of financial management.
- Provide direction and assistance to program managers in the development of operating plans, budgets, and supporting documents relating to use of the WCF.
- In coordination with the Director, Budget Staff, make recommendations on operating plans, rate structures and activities to be supported by the fund.

**Budget Execution Services:**

- Review financial reports for conformance with program and financial plans, and inform senior management and program officials of trends and changes required in the financial plan.

***Cost Allocation Methodology:*** The cost allocation methodology for this activity is a pro-rata share based on the percent of each component’s WCF assessment amount divided by the total WCF assessment multiplied by total estimated cost of the activity.

***Full Time Equivalent (FTE):*** This activity requires 11 FTE to oversee all budgetary functions of the Working Capital Fund.

#### IV. Program Justification of Changes

**Department of Homeland Security  
Working Capital Fund  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** DHS Rent

PPA: Fee-For-Service Activity

Program Increase: Positions 2 FTE 2 Dollars \$17,193

	FY 2009 Actual			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							5	5	\$76,895
Program Increase							2	2	\$17,193
<b>Budget Request</b>	<b>1</b>	<b>1</b>	<b>\$48,422</b>	<b>5</b>	<b>5</b>	<b>\$75,606</b>	<b>7</b>	<b>7</b>	<b>\$94,088</b>

**Description of Item**

The General Services Administration (GSA) provides workspace and related services for over 100 Federal client agencies serving more than one million workers through the Public Buildings Service (PBS). GSA also provides related real estate services including the operation and maintenance of buildings and out-leasing programs. GSA’s Computer Integrated Facility Management Program uses cutting edge technology to look at the buildings life cycle. Real estate services provided to clients appear in Federal agencies monthly electronic rent bills.

The Department has established a clearing account to expedite the payment of WCF GSA rent billings for the Department of Homeland Security headquarters offices, excluding the major components, who pay their rent expenses directly to GSA. The monthly WCF bills include all GSA-controlled space that the Department headquarters occupies, including parking spaces allotted to the Department.

**Justification**

The FY 2011 budget increase includes GSA occupancy agreement updates, Federal Protective Service (FPS) rate increases, and rent for additional space that will be required in FY 2011.

**Impact on Performance**

These facilities improve the delivery of support services to each DHS component while reducing the cost of operations. The centralization of GSA Rent services for the Departmental Management and Operations is critical to the mission of the Department.

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 2:** FEDLINK (Library of Congress)

PPA: Fee-For-Service Activity

Program Increase: Positions 1 FTE 1    Dollars \$10,632

	FY 2009 Actual			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							4	4	\$11,396
Program Increase							1	1	\$10,632
<b>Budget Request</b>	<b>1</b>	<b>1</b>	<b>\$10,671</b>	<b>4</b>	<b>4</b>	<b>\$11,203</b>	<b>5</b>	<b>5</b>	<b>\$22,028</b>

**Description of Item**

The Department of Homeland Security (DHS) Library and Information Services’ mission is to provide the DHS program managers and their end users with desktop access to mission critical, authoritative, timely, and relevant commercial information content products and services. The activity was established in 2004 to implement DHS-wide information assets supporting decision making, enforcement, investigation, research and academic information gathering activities of the DHS workforce. The activity collaborates with the Library of Congress (LOC) FEDLINK program through which the LOC shares its expertise in information services and consolidates the buying power for federal agencies. In 2009 this activity became a Secretary’s efficiency initiative, which expanded its scope within the working capital fund while reducing total costs paid individually by components and Headquarters offices.

**Justification**

The department has strived to reduce the costs of subscriptions, publications, electronic journals, data base subscriptions and books. As a result of the efficiency initiative, the scope and level of involvement in the FedLink program as expanded two-fold.

**Impact on Performance**

The expansion of the FEDLINK activity has increased the efficiency of the Department and has reduced our operating cost by over \$1m in FY2010. The consolidation effort of pooling subscriptions will enable the participating agencies to acquire better services from the providers and receive better rates due to the volume in numbers for the users. As a result of the consolidation, the activity now plays a larger role in its mission to support critical services.

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 3:**                    Financial Statement Audit

PPA:                                        Fee-For-Service Activity

Program Increase:                    Positions   0   FTE   0   Dollars \$2,990

	FY 2009 Actual			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$15,816
Program Increase							0	0	\$2,990
<b>Budget Request</b>	<b>0</b>	<b>0</b>	<b>\$13,544</b>	<b>0</b>	<b>0</b>	<b>\$15,552</b>	<b>0</b>	<b>0</b>	<b>\$18,806</b>

**Description of Item**

DHS awards a contract to an independent CPA firm to perform financial statement audit functions. The contract includes time and material for audit services with the auditor providing the services and billing the hours worked at billing rates commensurate with the audit position being billed. The cost include travel and incidental costs associated with the performance of the audit as permitted by the contract maintained by the Office of the Inspector General (OIG) as the Contracting Officer Technical Representative (COTR).

**Justification**

In FY 2011, the Financial Statement Audit activity requests a funding increase of \$2.990 million in contractor cost and for travel oversight costs for the OIG staff. The amount includes an increase for time and material costs for audit services. These services include a full scope audit cost for Customs and Border Protection (CBP), Federal Law Enforcement Training Center (FLETC) Transportation Security Administration (TSA), Immigration and Customs Enforcement (ICE), and Citizenship and Immigration Services (CIS).

**Impact on Performance**

This increase will enable Financial Statement Audit to continue providing full scope auditing services for Customs and Border Protection (CBP), Federal Law Enforcement Training Center (FLETC) Transportation Security Administration (TSA), Immigration and Customs Enforcement (ICE), and Citizenship and Immigration Services (CIS).

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 4:**                    Finance and Accounting Shared Services

PPA:                                        Fee-For-Service Activity

Program Increase:                    Positions   0   FTE   0   Dollars \$8,229   

	FY 2009 Actual			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$23,042
Program Increase							0	0	\$8,229
<b>Budget Request</b>	<b>0</b>	<b>0</b>	<b>\$26,413</b>	<b>0</b>	<b>0</b>	<b>22,657</b>	<b>0</b>	<b>0</b>	<b>\$31,271</b>

**Description of Item**

ICE and FLETC’s Office of Financial Management provide a variety of financial shared services for various DHS components on a reimbursable basis. The types of financial services provided include financial reports, obligations and payment processing, system usage, receipts, payroll, overhead, and travel and cash management services.

**Justification**

The \$8.229 million increase reflects higher than anticipated costs being incurred by the service provider to support the DHS components in terms of higher demands of services from DHS and upgrading the ABC model to better track and determine component actual costs. These higher costs are being distributed across DHS components based on Activity Based Costing results from previous years. In addition, the Financial Shared Services FY2010 bill decreased from \$30,084,781 to \$22,656,868. Billing notifications have been adjusted for FY2010 based on actual cost. This will be adjusted at the beginning of FY 2011 per the ABC model.

**Impact on Performance**

The requested increase will cover the increased support costs of this activity in FY 2011.

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 5:**                    NFC Payroll Services & Reporting

PPA:    Fee-For-Service Activity

Program Increase:    Positions   0      FTE   0      Dollars \$2,919

	FY 2009 Actual			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$35,641
Program Increase							0	0	\$2,919
<b>Budget Request</b>	<b>0</b>	<b>0</b>	<b>\$32,344</b>	<b>0</b>	<b>0</b>	<b>\$35,045</b>	<b>0</b>	<b>0</b>	<b>\$38,560</b>

**Description of Item**

Description of Service: The Department of Agriculture/National Finance Center (NFC) provides Payroll/Personnel services utilizing their legacy mainframe systems (payroll) and EmpowHR PeopleSoft application (personnel). In addition, NFC provides Payroll/Personnel policy support and benefits reconciliation, tax reporting, and payroll problem resolution. The following components will have migrated to EmpowHR by FY 2011: TSA, USCG Civilian population, HQ, FLETC, FEMA, ICE and CIS.

NFC Payroll and Reporting; \$2.919million - The FY 2011 request includes O&M costs for NFC payroll and EmpowHR personnel systems. The funding request reflects an increase in O&M costs as a direct result of deploying EmpowHR to additional DHS components in FY09 and FY10 that includes FEMA, ICE and CIS.

## Justification

NFC Services that DHS components are billed for include:

<b>COST AREA</b>	<b>COST DRIVER</b>
Postage-Earnings and Leave and Personal Benefits Statements	Pieces of mail
Treasury FMS Postage Charges for Single Address Checks	Checks mailed
USDA OIG Oversight of Non-USDA Payroll Processing	Avg # of employees paid
Payroll Operations Branch Support	Avg # of employees paid
Tax Reporting	Avg # of employees paid
Payroll Policy Support	Avg # of employees paid
e-Pay Policy Support	Avg # of employees paid
Benefits Reconciliation and Liaison Area	Avg # of employees paid
Debt Management	Receivables established
Claims	Claims processed
Payroll Accounting	Avg # of employees paid
Certification	Avg # of employees paid
Ad-Hoc reporting (based on CPU Minutes used)	CPU Minutes
Data Center Operations (Other than FOCUS)	Avg # of employees paid
Payroll/Personnel Baseline Services	Avg # of employees paid

Along with NFC Payroll/Personnel services and EmpowHR charges, NFC provides hosting services for the webTA (Time & Attendance) application. The following components will have migrated to webTA by FY 2011: TSA, USCG, HQ, USSS, FEMA, FLETC, ICE and CIS. The FY 2011 cost estimate is based on three algorithms: Payroll costs are \$157 per average employees paid. The second algorithm is \$105 per W-2 processed for EmpowHR. Third, the webTA hosting costs are \$12.30 per average employees paid.

This request includes O&M costs for NFC payroll, EmpowHR personnel systems and webTA hosting services. The funding request increase is a direct result of deploying EmpowHR to additional DHS components in FY09 and FY10 that includes FEMA, ICE and CIS. This activity is a pass through charge from NFC through HCBS to bill each component in order to maintain payroll and personnel support services.

It is imperative for the Department to migrate to the modern personnel solution, EmpowHR, because NFC is planning to replace the mainframe payroll/personnel systems with a modern payroll engine beginning in FY 2011. Legacy personnel systems will be affected by this fundamental change and would require extensive code changes to interface with the new payroll engine; in turn, this would be redundant costs that can be avoided by migrating to EmpowHR.

## Impact on Performance

The activity directly supports the Secretary's goal to Strengthen DHS Operations and Management. The Government is looking at increasing effectiveness from a business perspective and with an enterprise-wide view. Based on the ePayroll Business Case, the best decision for the Government is to achieve savings and economies associated with rapid consolidation of providers while leveraging key technology investment. The goal is to interface payroll systems with customer administrative systems,

while increasing interoperability and reducing overall cost. This decision, made from a Government-wide rather than agency perspective, will move us toward the objective of a standard architecture and final Shared Service Provider solution.

Migrating DHS components to EmpowHR will offer a more stable, modern technology platform to support DHS business needs and result in the following efficiencies for the components:

- Reduction of duplicative personnel applications
- Cost savings
- Increased self-service capability
- Reduced processing cycle times
- Reduced processing errors
- Cost avoidance due to centralized management of enterprise solutions (Avoid redundant costs for managing Security, 508 compliance, infrastructure and contract management activities.)

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 6:** HQ Human Capital Service Center

PPA: Fee-For-Service Activity

Program Increase: Positions 0 FTE 0 Dollars \$20

	FY 2009 Actual			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							51	51	\$14,599
Program Increase							0	0	\$20
<b>Budget Request</b>	<b>33</b>	<b>33</b>	<b>6,477</b>	<b>51</b>	<b>51</b>	<b>\$14,324</b>	<b>51</b>	<b>51</b>	<b>\$14,619</b>

**Description of Item**

The HQ Service Center provides coordination and oversight support for outsourced services supporting HQ Human Capital operational needs. The team ensures that the personnel processes for HQ’s managers/employees and service providers runs efficiently and effectively. Examples of services include: Staffing and Recruitment; Position Classification/Position Management; Performance Management; Payroll and Personnel Action Processing; Employee and Labor Relations Support; Retirements and Benefits Support; Time and Attendance Support. It is imperative that we continue providing full-time, Federal employee oversight of these services.

**Justification**

In FY 2011, the estimated HQ population assumes “full-service” capacity. An increase in funding request will provide continued operational oversight of all contracted services as well as provide more effective focus on customer support. This team has continued to be very efficient and operates seamlessly, thus keeping costs with a modest increase for supplies. The increase is in line with the reprogramming increase that was approved for FY 2009.”

**Impact on Performance**

With this funding, the HC Service Center can provide coordinated and prioritized personnel staffing services; ensure timely and effectively recruitment of staff; effectively manage the “on-board” staffing process (which includes security clearances and collaboration with the Personnel Security Office).

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 7:** Microsoft Enterprise Software Licenses

PPA: Fee-For-Service Activity

Program Increase: Positions 0 FTE 0 Dollars \$7,297

	FY 2009 Actual			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							1	1	\$47,265
Program Increase							0	0	\$7,297
<b>Budget Request</b>	<b>0</b>	<b>0</b>	<b>51,960</b>	<b>1</b>	<b>1</b>	<b>46,474</b>	<b>1</b>	<b>1</b>	<b>\$54,562</b>

**Description of Item**

This service allows components to consolidate license requirements into a single enterprise-wide procurement to leverage DHS buying power. The activity further helps to decrease costs, reduce paperwork and save time by eliminating the need for repetitive, individual purchases from. It is the first procurement delivered through the management Action Directive Software Licenses, as reported at the 60-day Efficiency Review. The Department continues to pursue opportunities to benefit from economies of scale, moving from component or office specific software licenses to larger enterprise licenses for common services.

**Justification**

The FY 2011 costs are significantly higher than previous years due to the expiration of the initial contract that was based on 2003 Microsoft prices. In addition, the FY 2011 license costs are higher because they are based on the base requirements applied at the beginning of the contract in 2003, plus all of the actual requirements that have been made by components since that time. Before FY 2011 the costs included in the WCF were based on the 2003 base requirements and amortized over a period of five years. The FY 2011 price increase is based on today's market prices and the FY 2009 Enterprise Agreement awarded in June 2009. Due to DHS's buying power, the package includes more than the standard Microsoft Suite products.

In the spirit of the Federal Acquisition Streamlining Act (FASA), the Department of Homeland Security (DHS) and Dell Marketing, L.P. decided to re-enter into a single blanket purchase agreement (BPA) for a DHS-wide Microsoft Enterprise Agreement to standardize office automation and communication applications across the component agencies' existing IT environments. The account provides for the funding and management of the Microsoft Enterprise Agreement awarded June 2009, which provides enterprise access to the Microsoft suite of products. The products include the software needed for individual desktops, laptops, and server platforms, such as MS Office, MS Project, MS Visio, MS Advanced Server, etc. This agreement is utilized by all of DHS. The request reflects the contractual obligations of each of the Components.

**Impact on Performance**

This activity helps the agency to fulfill Federal Acquisition Streamlining Act (FASA) requirements. It also helps to ensure legal licensing of all DHS Microsoft servers deployed throughout the enterprise. In addition, it implements governance over the contract vehicle through which Microsoft licenses are purchased by DHS component organizations.

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 8: Data Center Consolidation**

PPA: Fee-for-Service Activity

Program Increase: Positions 0 FTE 0 Dollars \$25,990

	FY 2009 Actual			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$152,250
Program Increase							0	0	\$25,990
<b>Budget Request</b>		<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>150,000</b>	<b>0</b>	<b>0</b>	<b>\$178,540</b>

**Description of Item**

Currently, DHS is undergoing efforts to migrate disparate component systems and applications from legacy data centers to the two enterprise DHS data centers. The two DHS centers will address the need for greater efficiency, improved security posture and the rapid movement of information within the Department. By establishing two enterprise data centers, DHS has established the capabilities to integrate, consolidate, and transform the individual Component Infrastructures into a single, world-class IT infrastructure capable of supporting the significant demands required of an organization.

Managed through the WCF, Data Center Consolidation activity provides funding for the continuation of system and application migration to the two DHS Enterprise Data Centers for central DHS management in FY 2011.

**Justification**

The Data Center Consolidation WCF activity will provide the means by which to manage the funding for the migration efforts to the DHS enterprise facilities. Operation as a DHS WCF activity will allow a reduction in overhead required to manage data center consolidation. The WCF will allow DHS to act as a single bill payer to the Data Center service providers, and will reduce necessary procurement activities. The consolidation into a WCF activity will also allow for greater transparency and more effective management of the goods and services being provided to the Department. By allowing for the central management of the contracts between Data Center providers, the Data Center Consolidation activity enables Components to focus their resources on their missions, rather than contracting and administrative support for acquiring data center services.

**Impact on Performance**

This increase will improve the established two enterprise DHS data centers, which provide large scale, physically secure, scalable, mission critical data center computing facilities and service for DHS. The Enterprise Data Centers WCF supports the DHS goal of “One Infrastructure” and “One DHS.” The

Enterprise Data Centers WCF activity aligns with the DHS Strategic Goals, “Strengthen and Unify DHS Operations and Management”

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 9: e-Gov Disaster Management**

PPA: Government-wide Mandated Service Activity

Program Increase: Positions 0 FTE 0 Dollars \$ 217

	FY 2009 Actual			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$12,728
Program Increase							0	0	\$217
<b>Budget Request</b>		<b>0</b>	<b>12,270</b>	<b>0</b>	<b>0</b>	<b>12,515</b>	<b>0</b>	<b>0</b>	<b>\$12,945</b>

**Description of Item**

Disaster Management is part of the e-Gov Act of 2002, Title II, and Section 214 "Enhancing Crisis Management Through Advanced Information Technology" and is described in OMB M-03-18, "Implementation Guidance for the e-Government Act of 2002." This initiative, which will support disaster assistance and "all hazards" response, is a joint effort involving 10 other Federal agencies that support disaster management. This initiative also supports many of the goals of the Initial National Response Plan dated October 2003.

**Justification**

This increase will continue to support disaster assistance and "all hazards" response is a joint effort involving 10 other Federal agencies that support disaster management. The scope of the project covers all Federal agencies that are involved in disaster recovery, as well as state, local and tribal disaster recovery organizations and individuals. The value of this program is its contribution to improving disaster preparedness and its potential to reduce property damage and loss of life.

**Impact on Performance**

The activity supports the DHS goal of "One Infrastructure" and "One DHS." e-Gov Disaster Management "Strengthens and Unifies DHS Operations and Management". The increase in funding allows the activity to maintain its support of mitigating loss of life and would be susceptible to an increase property loss increased loss of life.

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 10: IT Data Center Service from DOJ**

PPA: Tri-Bureau Service Activity

Program Increase: Positions 0 FTE 0 Dollars \$ 2,399

	FY 2009 Actual			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							2	2	\$38,625
Program Increase							0	0	\$2,399
<b>Budget Request</b>	<b>0</b>	<b>0</b>	<b>43,243</b>	<b>0</b>	<b>0</b>	<b>37,977</b>	<b>2</b>	<b>2</b>	<b>\$41,024</b>

**Description of Item**

The Department of Justice (DOJ) MOU Working Group performed an analysis that clarified IT services that DHS requires from DOJ and their associated costs. The working group defined the specific IT service requirements of each component currently using DOJ as the provider: USCIS, ICE, OIS, NPPD, and US-VISIT. The working group is preparing migration plans to transfer services to the Enterprise Data Center. The Department of justice (DOJ) provides the following data center services:

- Application hosting on OS/390 platform for approximately 40 applications.
- Application hosting on AIX Unix platform for approximately 25 applications.
- House DHS servers.
- Disk storage and enterprise tape backup capacity.
- Local printing services.
- Manage and operate Component-owned equipment.
- Perform transition support for de-installing, packing, and shipping systems as requested.
- Provide dedicated, separate raised-floor computer room space and utilities as requested.

**Justification**

The Department of Homeland Security (DHS), Office of the Chief Information Officer (OCIO), Infrastructure Services Planning and Control (ISPC) project team will monitor all work related to clarifying, analyzing, and managing data center support and services required by DHS from Department of Justice (DOJ), and all related operation, usage and storage costs. Previously, information technology (IT) services provided by DOJ included data center services, data networks wide area network (WAN) services, voice network wireless application service providers (WASP), Just Message Switch and web/internet services. However, as a result of current DHS “One Infrastructure” activities, IT services being provided by DOJ now fall within the data center services category. Therefore, the ISPC project team continues to coordinate specific IT data center service requirements for DHS Components (U.S. Immigration and Customs Enforcement, U.S. Visitor and Immigrant Status Indicator Technology, U.S. Citizenship and Immigration Services, and Office of

Immigration Statistics) currently using DOJ facilities. Also, the team assists in establishing working capital fund budget submissions and forecasts, update the data center cost allocation methodology, and update the Memorandum of Agreement between DHS and DOJ.

**Impact on Performance**

This increase will enable OCIO continued support of the requirements set forth by DHS, maintaining IT performance and providing services for systems users. If this increase is not received, the DHS goal “to strengthen & Unify DHS operations and management” will be compromised and will delay DHS consolidating the number of DHS IT platforms.

**Department of Homeland Security  
Working Capital Fund  
Justification of Program Changes**

**Program Decrease 1:** IAE Loans and Grants

PPA: Government-wide Mandated Service Activity

Program Decrease: Positions 0 FTE 0 Dollars (\$5)

	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level				0	0	0	0	0	\$195
Program Increase							0	0	(\$5)
<b>Budget Request</b>	<b>0</b>	<b>0</b>	<b>190</b>	<b>0</b>	<b>0</b>	<b>192</b>	<b>0</b>	<b>0</b>	<b>\$190</b>

**Description of Item**

The Federal Funding Accountability and Transparency Act of 2006 (FFATA) requires OMB to “ensure the existence and operation of a single searchable website, accessible by the public at no cost to access” that includes information on each Federal award. The law specifically requires a unique identifier for the entity receiving the award and of the parent entity of the recipient, should the entity be owned by another entity.

**Justification**

This activity allows loan and grant information to feed information into the FFATA portal, and the Integrated Acquisition Environment (IAE) activity has been expanded for this purpose. OMB initiated funding requests for each agency to reimburse IAE for this additional cost. This activity is a required agency activity mandated by the e-Government Act of 2002.

**Impact on Performance**

In addition to tracking loans and grants via DUNS numbers, this activity supports the grants management process by supporting the effort to provide business and linkage data seamlessly, resulting in higher quality data that are provided via real-time updates. This will result in a more integrated business process for buyers and sellers that promote competition, transparency and integrity.

Program Decrease							4	4	(\$94)
<b>Budget Request</b>	<b>0</b>	<b>0</b>	<b>\$3,999</b>	<b>4</b>	<b>4</b>	<b>\$5,267</b>	<b>0</b>	<b>0</b>	<b>\$5,267</b>

**Description of Item**

The CPO Shared Reporting Working Capital Account provides the DHS acquisition workforce with eProcurement systems and tools which leverage investment costs and promote competition, transparency, integrity and standardization and provides for the comprehensive management of DHS' eProcurement Portfolio, ensuring proper program development, operation and maintenance.

**Justification**

CPO system is the acquisition data feeder system to the Federal Procurement Data System-Next generation (FPDS-NG) that is required by statute. This data source is the primary source of all acquisition data for the federal government, used by U.S. agencies, governments around the world, the public and commercial world for panning marketing opportunities with the American government related to its \$3.10 trillion annual acquisition budget. The Acquisition Systems Branch (ASB) has the fiduciary responsibility to provide the DHS acquisition workforce with systems and tools to efficiently and effectively perform their jobs. The CPO Shared Reporting Working Capital Fund supports the activities of the ASB and, more specifically, funds the DHS eProcurement Portfolio. Centralized funding and management of the Department's eProcurement Portfolio ensures comprehensive program management throughout the systems lifecycle and results in systems and tools that meet the needs of the entire DHS enterprise.

**Impact on Performance**

With this decrease in funding, the ASB will continue to provide the wide-ranging acquisition systems and tools and personnel to support the contracting mission of the Department efficiently and to ultimately further the Department's ability to more effectively support response and recovery activities. CPO Shared Reporting supports the Secretary's goal to Strengthen and Unify DHS Operations and Management. It also supports the Chief Procurement Officer's goals to make good business deals; perform effective contract administration; and to build and sustain the DHS acquisition workforce. No deterioration in performance is anticipated to result from the decrease in funding. The Acquisition Systems Branch will continue to provide systems and tools which support the acquisition

mission of the Department; support the Chief Procurement Officer's priority to make good business deals and to perform effective contract administration; as well as support the Secretary's goal to Strengthen and Unify DHS Operations and Management.

**Description of Item**

DHS has selected Customs and Border Protection (CBP) as the servicing agent to provide for a centralized invoicing and payment system for components within DHS. CBP has developed and implemented a system that supports the receipt of daily invoices for all of DHS from US Bank. This system assures payment of those invoices within one business day of receipt, and provides transmission of an electronic file containing transaction data to each component’s accounting system.

**Justification**

The decrease changes are in regards to Payment Audit, Merchant Category Code Reviews, and Payment Process, significantly impacted the cost and audit review process, thus causing a substantial decrease in the cost of this service.

**Impact on Performance**

The decrease is a result of decline in number of Bankcard transactions being processed on a daily basis. The efficiency of the activity is the prompt payment and separation of data transmission to each components accounting system; therefore reducing the margin of error in procurement actions.

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 4:**                    Internal Control Audit

PPA:                                        Fee-For-Service Activity

Program Decrease:                    Positions   0   FTE   0   Dollars (\$3,173)

	FY 2009 Actual			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

Program Increase							0	0	(\$3,173)
<b>Budget Request</b>	<b>0</b>	<b>0</b>	<b>\$1,447</b>	<b>0</b>	<b>0</b>	<b>\$4,935</b>	<b>0</b>	<b>0</b>	<b>\$1,846</b>

**Description of Item**

The DHS Financial Accountability Act requires an audit opinion on the Department’s Internal Controls over Financial Reporting. Due to the extent of material weaknesses, the Department’s Inspector General conducts performance audits to assess the effectiveness of DHS corrective actions in effort to comply with the Act. The Internal Control Auditor is selected through contracting procedures by the Office of Inspector General (OIG) and must stay independent from the DHS components that are being audited. The auditor selected commences work immediately and entrance conferences are held within a short time after award of the financial statement audit contract.

**Justification**

The decrease from \$4.935 million to \$1.846 million reflects efficiencies due to implementation of DHS corrective actions. DHS executed corrective actions and made progress on: resolving material weakness conditions, validating the effectiveness of internal controls over financial reporting and implementing the internal control audit provision of the DHS Financial Accountability Act.

**Impact on Performance**

With the funding level requested, DHS will continue implementing corrective actions and continue to resolve material weaknesses.

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 5:**                    e-Training

PPA:                                        Government-wide Mandated Service Activity

Program Decrease:                    Positions (1) FTE (1)    Dollars (\$3,626)

**Description of Item**

The DHS e-Training initiative is focused on strengthening and unifying DHS operations and management by taking an earned value approach to Information Technology Portfolio Management (IT PFM) in support of employee learning and development (L&D). Through consolidated systems and aligned business processes, the Advanced Distributed Learning Program Management Function (ADL PMF) within the Office of the Chief Human Capital Officer (OCHCO) serves to eliminate Department redundancies while increasing overall access to the highest quality ADL products and services. e-Training directly supports several government-wide initiatives as explained below. This activity benefits the Federal government, the Department, and the individual employee by:

- Reducing redundancies and achieving economies of scale in the purchase, deployment, and management of ADL technology infrastructure (e.g., Learning Management Systems (LMS), Learning Content Management Systems (LCMS) and/or other Information Technology (IT) hardware/software for Human Capital Performance Support (HCPS) tools), and the consolidation and/or sharing of hardware/software;
- Reducing redundancies and achieving economies of scale in the purchase and/or development of e-Learning courses and content (e.g., commercial-off-the-shelf (COTS) or custom-developed content to meet specific agency needs);
- Leveraging components of existing learning systems (e.g., LMS, LCMS, IT hardware, or HCPS tools) where clear value propositions exist;
- Offering user-friendly, one-stop access to a robust and high-quality learning environment;
- Encouraging ADL investments as part of a strategic, systematic, and continuous development of DHS human capital; and
- Fostering communication between Federal Human Resources Development (HRD) practitioners government-wide to identify, prioritize and develop solutions to issues of interest within the community, and to share best practices and resources where synergies are evident.

## **Justification**

FY 2011 requests funding for an expected stabilization of licensing support costs and an increase in dependency on centralized custom courseware development being managed by the ADL PMF.

e-Training directly supports the Department's strategic human capital management activity as defined in the Homeland Security Act (HR 5005), Title XIII, Section 1304 and academic training as described in Section 1331; the President's Management Agenda for e-Gov Initiatives; both the Office of Personnel Management's e-Training and Enterprise Human Resource Integration initiatives; and, specifically, Katrina Lessons Learned Recommendation 115.<sup>3</sup>

## **Impact on Performance**

Although there's a decrease in funding, e-training will continue to support the following critical goals:

- Supporting the President's Management Agenda (PMA), the DHS Human Capital Operations Plan (HCOP), and the DHS Learning and Development Strategic Plan for Fiscal Years 2006-2010 (specifically Goal 4, Strategy 2, and Tactic 1 which is to implement the recommendations of the ADL Enterprise Architecture Study).
- Serving is a key enabling IT component to the DHS Chief Learning Officer's Strategy for establishing a Homeland Security University System.
- Further leveraging simplicity through reductions in Department-wide Information Technology (IT) infrastructure and redundancies in DHS-wide training needs.
- Direct support of Department Information Technology Portfolio Management goals

Benefits to be derived from e-Training include:

- Increased functionality through automation of the SF-182 process
- Automated Enterprise Human Resources Integration (EHRI) reporting of training to OPM
- Access to professional development, required training, and other enterprise content
- Anticipated integration of competency management capabilities
- Enterprise-leveraged course procurement (i.e., increased buying power)
- Enterprise-leveraged course management. Preliminary analysis showed approximately 75% in cost savings through enterprise licensing of commercial-off-the-shelf (COTS) courseware versus contracting by individual Components.

These benefits will enhance the performance of the program as it will provide a seamless method to provide human capital other avenues to become more marketable. If the resources are not provided, it limits the human capital officer's ability to leverage the available technology.

3. Katrina Lessons Learned Recommendation 115: DHS should provide training, technical, and other assistance in support of other departments' and agencies' homeland security professional development programs. DHS should expand its use of innovative techniques and technologies to enhance the quality and dissemination of homeland security education and training. This may include the use of distance learning programs and interactive computer methodologies. DHS must expand its efforts to promote awareness and implementation of the NIMS and the NRP throughout Federal, State, and local governments, and private sector.

	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$7,828
Program Increase							0	0	(\$54)
<b>Budget Request</b>	<b>0</b>	<b>0</b>	<b>\$5,294</b>	<b>0</b>	<b>0</b>	<b>\$7,697</b>	<b>0</b>	<b>0</b>	<b>\$7,774</b>

**Description of Item**

CPIC is run jointly by the CFO, CIO, and CPO to assist the Department in carrying out its responsibilities for the quality and performance of its investment projects by providing support services and training for the Project Management Offices throughout the Department’s components. The Project Management Offices are required to prepare business cases to demonstrate to OMB that they are on-track and ready to effectively use the additional funding that they are requesting in the DHS budget submission. This Activity provides services to support these efforts, including automated tools to assist with portfolio analyses, document preparation, and document review and scoring, formal training, informational briefings, and remedial coaching to improve business case quality. It supports the Project Management Offices in preparing decision packages for DHS investment review boards at key decision points in their projects’ life cycle.

**Justification**

In FY2011 the CIO is leading an effort to improve DHS’s integrated program management and reporting capability, the System for Management Analysis and Resource Tracking (SMART) efficiently. SMART will realize incremental improvements to the existing DHS CPIC architecture; establish interfaces to target DHS financial, acquisition, asset management, enterprise architecture, and human resources systems, and deploy an enterprise wide Business Intelligence solution to provide comprehensive program management analysis and forecasting capability for decision support services across the Department.

In FY 2011 the funding will enhance the CPIC periodic reporting function by integrating planning, budgeting and performance reporting at the project level on a monthly basis with corresponding financial, acquisition, asset management, DHS Enterprise Architecture (EA), and human resources information. SMART will provide centralized management information services for components to manage programs and investments down to the project level and for DHS to track corresponding performance metrics at monthly intervals for tracking performance trends such as Earned Value Management (EVM) and identifying risks for early mitigation and resolution. Consolidation within SMART will save time for users by streamlining the DHS status reporting and review processes. It

will improve the quality, standardization, and consistency of program performance data across the entire department as the program managers entering corresponding performance data will have a personal stake in the quality of the data. SMART will provide integration of DHS business information and provide implementation of analytic tools that support better tracking of program performance and better decision making by senior leadership in line with the EA. The budget increase will fund:

- Component Level Reporting roll out;
- Rollout of a workflow and Project Asset Library to store and route all required documentation for review and approval;
- Integration of project performance data with target financial, acquisition, asset management, and human resources systems of records; and
- Hardware software and support services to maintain the SMART architecture

**Impact on Performance**

This decrease in funding reflects efficiencies and is sufficient to improve the number of DHS investments that perform within a 10 percent variance and reduce investment cost, schedule, and performance variances accordingly. It will also reduce overlap and duplication of investments; reduce reporting burdens on Components while improving data and information quality; increase alignment of DHS planning with program execution, and improve DHS Security Posture and information sharing capabilities.

<b>Budget Request</b>		<b>0</b>	<b>\$143</b>	<b>0</b>	<b>0</b>	<b>\$286</b>	<b>0</b>	<b>0</b>	<b>\$145</b>

**Description of Item**

The Financial Management Line of Business (FMLoB) goals are to define, analyze, and implement options that will enhance cost savings in the financial management systems, provide for standardization of business processes and data models, promote seamless data exchange between Federal agencies, and strengthen internal controls through integration of core financial and subsidiary systems.

**Justification**

The FMLoB's current objective is to improve the cost, quality, and performance of financial management (FM) reducing the number of noncompliant systems by leveraging common standards, shared service solutions, and implementing other government-wide reforms that foster efficiencies in Federal financial operations.

**Impact on Performance**

The decrease in funding is a result of the standardization, consolidation and optimization for the Financial Management Line of Business. This activity will continue to accomplish its objectives and goals of improving the cost, quality and performance of financial management and reducing the number of noncompliant systems.

**Department of Homeland Security**  
**Working Capital Fund**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 8:** USAJOBS (formerly Recruitment One-Stop)

PPA: Government-wide Mandated Service Activity

Program Increase: Positions  0  FTE  0  Dollars  (\$4)

	FY 2009 Actual			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FT E	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$1,212
Program Increase							0	0	(\$4)
<b>Budget Request</b>	<b>0</b>	<b>0</b>	<b>\$862</b>	<b>0</b>	<b>0</b>	<b>\$1,191</b>	<b>0</b>	<b>0</b>	<b>\$1,208</b>

**Description of Item**

OPM’s USAJOBS Program Office has increased the content and navigation of Veterans-focused resources; incorporated a new one-stop information center; successfully implemented e-Authentication for Federal HR users; provided a more robust and meaningful online application status tracking mechanism for job seekers; added graphics to announcements and incorporated an applicant survey to provide feedback to agencies about the application process. This program operates on a fully reimbursable basis to pay the cost of providing Federal employment information and services.

In prior years, OPM’s fee assessment was based on the number of Competitive Service employees within a given agency. Effective October 1, 2007, in accordance with CFR Title 5, Volume 1, Part 317.501(b)(2), those organizations with Executive Resource Service/Senior Executive Service positions which are required to be posted on USAJOBS must now pay a USAJOBS fee. In addition, similar per-capita staff and SES fees will be charged to excepted-service agencies which voluntarily elect to use USAJOBS. The DHS fee was calculated based upon the Department’s total “on-board” employment levels for competitive, excepted service, and ERS positions.

**Justification**

USAJOBS Federal Employment Information System delivers state-of-the-art on-line recruitment services to job seekers including intuitive job searching, on-line resume submission, applicant data-mining, and on-line feedback on status and eligibility. The additional funds support the USAJOBS system to deliver state-of-the-art on-line recruitment services to job seekers. OPM’s plan for USAJOBS is to complete the migration of agency job search engines, enhance website tools, and expand agency implementation of integrated job application and status tracking. Due to the fact that the majority of Federal government job announcements are posted via USAJOBS, and most job-seekers are aware of this tool, DHS will continue to be a user of this system.

**Impact on Performance**

Access to USAJOBS supports the DHS Strategic Goal to strengthen and unify operations and management, as well as the DHS Human Capital Operations Plan goal to “Hire and Retain a Talented and Diverse Workforce.” The FY 2011 funding request will allow DHS to continue utilizing USAJOBS to reach out to Federal job seekers. DHS’s continued use of this valuable system will support DHS efforts to promote DHS as the workplace of choice.

<b>Budget Request</b>	<b>3</b>	<b>3</b>	<b>\$108,725</b>	<b>9</b>	<b>9</b>	<b>\$121,315</b>	<b>30</b>	<b>30</b>	<b>123,049</b>

**Description of Item**

The NCRIO serves the majority of DHS Headquarters users for network, email, internet, intranet, and telecom infrastructure, as well as all end user desktop computing, telecom, and wireless services. NCRIO’s Program Management Office (PMO) coordinates management and deployment of infrastructure resources along with build-out of new facilities and provides continuous operations, help desk, vendor management, financial management, and technology evaluation.

**Justification**

With the growth in user demand that has been experienced in FY 2009 and FY 2010, DHS continues to realize an increased need for network storage and connectivity into FY2011. This funding request will cover the purchase and installation of additional network hardware and software to augment network capabilities and increase network utility for the users. Operational network features such as network storage capacity and connectivity will be enhanced. As a result of the IT infrastructure acceleration, an additional 21 FTE are estimated to meet requirements for the support of the infrastructure systems. DHS is slated to consolidate more systems as well as deployment of new systems; resources for build-out facilities will also require help desks, additional vendor management, and financial management. This effort will also require additional assistance for users at DHS Headquarters This initiative will result in strengthened operations and management of the DHS network

**Impact on Performance**

Network enhancements such as storage capacity and improved response time, will help in achieve DHS’ objective of improved IT performance for system users. These user friendly enhancements also support the DHS strategic goal to Strengthen and unify DHS Operations and Management.

**Department of Homeland Security**

**Working Capital Fund  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Decrease 10:**                    Flexible Spending Account Plan Fees (FSA FEDS)

PPA:    Fee-For-Service Activity

Program Decrease:                    Positions   0   FTE   0   Dollars (\$6)

	FY 2009 Actual			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$2,164
Program Increase							0	0	(\$6)
<b>Budget Request</b>	<b>0</b>	<b>0</b>	<b>\$1,582</b>	<b>0</b>	<b>0</b>	<b>\$2,128</b>	<b>0</b>	<b>0</b>	<b>\$2,158</b>

**Description of Item**

The purpose of this WCF activity is to pay fees associated with the administration of FSAFEDS. FSAFEDS is the Federal government’s Flexible Spending Account (FSA) Program designed to allow Federal employees to set aside pre-tax funds from their pay to cover health and dependent care costs not covered by any other source. Employees elect to participate in the program within 60 days of entry on duty or each year during the Federal Benefits Open Season. Once a DHS employee elects to participate in the Program, FSAFEDS receive allotments from the employee’s pay and places those allotments into an account where the funds are held. The employee then files a claim against those funds for reimbursement of incurred costs associated with health and/or dependent care.

FSAFEDS is managed by The Office of Personnel Management, with additional support of a contractor (SHPS, Inc.). This activity reimburses OPM and the vendor for administrative fees as mandated by The National Defense Authorization Act of 2004 (P.L. 108-136), which requires that agencies pay the administrative fees associated with employee participation in flexible spending account programs.

**Justification**

FSAs are employee-funded accounts that are used by the employee account holders to pay for medical expenses that are tax deductible, but not reimbursed by another source, as well as eligible dependent care costs. Contributions to the accounts come from an employee's pre-taxed salary; the government does not make a contribution. There are fees charged to each agency to administer these accounts on behalf of the employees.

SHPS Admin Fees- This is a fee that SHPS charges for administering the plan (i.e. call center, claims processing and reimbursement, etc)

OPM Reserve Fees- This is a contingency fund used when total claims received exceed total contributions for all agencies (basically because FSA funds are available up front in the beginning of

the plan and can be used all at once even though all payroll deductions haven't been taken from the employee's payroll)

**Impact on Performance**

Although there's a decrease in funding for this activity, FSA FEDS will have the capability to continue support to the gradual and consistent growth in DHS-wide participation. The payment program supports the Department's goal to Strengthen and unify DHS operations and management.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Working Capital Fund  
Justification of Proposed Changes in Department of Homeland Security  
Appropriation Language**

SEC. 504. The Department of Homeland Security Working Capital Fund, established pursuant to section 403 of Public Law 103-356 (31 U.S.C. 501 note), shall continue operations as a permanent working capital fund for fiscal year 2011: Provided, That none of the funds appropriated or otherwise made available to the Department of Homeland Security may be used to make payments to the Working Capital Fund, except for the activities and amounts allowed in the President's fiscal year 2011 budget: Provided further, That funds provided to the Working Capital Fund shall be available for obligation until expended to carry out the purposes of the Working Capital Fund: Provided further, That all departmental components shall be charged only for direct usage of each Working Capital Fund service: Provided further, That funds provided to the Working Capital Fund shall be used only for purposes consistent with the contributing component: Provided further, That such fund shall be paid in advance or reimbursed at rates which will return the full cost of each service: Provided further, That the Working Capital Fund shall be subject to the requirements of section 503 of this Act. Provided further, Provided further, That funds provided to the Working Capital Fund shall be available for obligation until expended to carry out the purposes of the Working Capital Fund: Provided further, That all departmental components shall be charged only for direct usage of each Working Capital Fund service: Provided further, That funds provided to the Working Capital Fund shall be used only for purposes consistent with the contributing component: Provided further, That such fund shall be paid in advance or reimbursed at rates which will return the full cost of each service: Provided further, That the Working Capital Fund shall be subject to the requirements of section 503 of this Act.

**iii. Status of Congressional Requested Studies, Reports, and Evaluation**

2009	1/8/2009  Monthly Report	FY 2009 Appropriations Act  House Report 110-862, Title II, p. 44	<b>Operations and Support:</b> The Committee recommends the funding level of \$410 million to make certain that the program does not lack basic operational resources despite the fact that the Department provided inadequate information to justify it. To ensure these funds are necessary, the Committee directs CBP to provide a detailed report on operations and support to obligations and expenditures on a monthly basis, beginning January 8, 2009. The first such report shall include all obligations and expenditures to date.	CBP is submitting this report to DHS for transmission to Congress on a monthly basis.
2009	January 16, 2008	FY 2009 Appropriations Act  Senate Rpt 110-396, Title II, p 33	<b>Ortly: Automated Commercial Environment (1st Quarter FY 09):</b> The Committee directs that CBP continue to provide the level of detail within the ACE expenditure plan as required in previous years.	03/09/09: Report was transmitted to Congress.
2009	1/30/2009	FY 2009 Appropriations Act  House Report 110-862, Title II, p. 31 and 42	<b>SBI Quarterly Report:</b> The Committee directs the Department to continue its Secure Border Initiative status reports on a quarterly, versus the current bi-monthly, schedule. The report should include an update on Northern Border <i>SBI</i> net investments.	Complete.
2009	January 30, 2009	FY 2009 Appropriations Act  Joint Explanatory Statement for P.L. 110-329, p. 586 House Report 110-862, Title II, p. 31	<b>Staffing Resources Report:</b> CBP is directed to brief the Committees not later than January 30, 2009, on how incentives such as pay adjustments could be used to recruit and retain Border Patrol agents and CBP Officers with language fluency skills, as outlined in the House report.	03/05/09: Although no longer a reporting requirement according to the final appropriations bill, CBP submitted a report on hiring and retention incentives; the report provides good insight in CBP's programs and ongoing efforts to maintain a healthy workforce. The report was transmitted to Congress.
2008	January 30, 2009	FY 2008 Appropriations Act  P.L 110-161, Division E, Title VI, Section 604, p. 253	<b>National Land Border Security Plan:</b> Not later than January 31 of every other year, the Secretary, acting through the Commissioner, shall prepare a National Land Border Security Plan and submit such plan to the Committees on Appropriations of the Senate and the House of Representatives, the Senate Committee on Environment and Public Works, the Senate Committee on Homeland Security and Governmental Affairs, the Senate Committee on the Judiciary, the House Committee on Transportation and Infrastructure, the House Committee on Homeland Security, and the House Committee on the Judiciary.	The reporting requirements for section 604 (this report) and 603 (POE Infrastructure Assessment Study) are combined into one report.  CBP and OMB are working to complete the report.
2008	January 30, 2009	FY 2008 Appropriations Act  P.L 110-161, Division E, Title VI, Section 603, p. 252	<b>Port of Entry Infrastructure Assessment Study:</b> Not later than January 31 of every other year, the Commissioner, in consultation with the Administrator of General Services shall submit an updated assessment of land port of entry infrastructure needs to the Committees on Appropriations of the Senate and the House of Representatives, the Senate Committee on Environment and Public Works, the Senate Committee on Homeland Security and Governmental Affairs, the House Committee on Transportation and Infrastructure, and the House Committee on Homeland Security.	The reporting requirements for section 603 (this report) and 604 (National Land Border Security Plan) are combined into one report.  CBP and OMB are working to complete the report.
2009	February 1, 2009	FY 2009 Appropriations Act  Joint Explanatory Statement for P.L. 110-329, p. 589	<b>Container Security Devices:</b> The bill includes language directing the Commissioner to submit to the Committees, not later than 120 days after the date of enactment of this Act, the results of operational field testing of container security devices and a plan for implementation and deployment of such devices, as applicable, in high risk trade lanes.	03/05/09: Report was transmitted to Congress.
2009	March 23, 2009	FY 2009 Appropriations Act  House Report 110-862, Title II, p. 36	<b>US-VISIT Function Support:</b> The Committee directs CBP to provide a detailed report on the prior year budget for this support, by account, purpose and fiscal year, with the fiscal year 2010 budget submission.	Complete.

2009	March 23, 2009,	FY 2009 Appropriations Act House Report 110-862, Title II, p. 50 Senate Report 110-396, Title II, p. 39	<b>Land Ports of Entry Modernization:</b> In addition to GSA facilities, the 43 land ports of entry owned by and maintained by CBP require significant recapitalization, which CBP estimates could cost \$150,000,000. The Committee includes \$10,000,000, as requested, to begin this recapitalization, and directs CBP to submit a detailed plan for modernizing all 43 ports of entry with its 2010 budget request	CBP and OMB are working to complete the report.
2009	March 23, 2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 38	<b>Unaccompanied Alien Children:</b> The committee directs CBP to implement periodic training for CBP staff dealing with unaccompanied children. Directs CBP to submit report with FY10 budget on results of the Border Patrol Self Inspection Program.	Complete.
2009	March 23, 2009	FY 2009 Appropriations Act Senate Report 110-396, Title II, pg. 38	<b>Air and Marine Facilities Upgrades:</b> The Committee is disappointed by the apparent lack of support for a continued commitment to upgrade the many outdated and ill sized air and marine facilities. The Committee encourages the Department to include additional funding for these facilities in the 2010 budget request.	The enhancements in the FY 2010 President's budget submission focus on addressing other critical areas of meeting future challenges and fulfilling our mission of securing America.
2009	March 23, 2009	FY 2009 Appropriations Act Senate Report 110-396, Title II, pg. 39	<b>Border Facilities Construction Backlog:</b> Committee encourages administration to include funds in its 2010 request to address infrastructure requirements at Sault Ste. Marie International Bridge and Columbus and Santa Teresa ports of entry.	The funding for these requirements are not included in the FY 2010 President's Budget submission.
2009	March 23, 2009	FY 2009 Appropriations Act Senate Report 110-396, Title II, pg. 30	<b>Customs Revenue Staffing Shortfalls:</b> CBP is encouraged to include in its FY10 budget submission a plan to address the significant shortfalls in all of these positions	CBP currently exceeds the required FY 2003 staffing levels. The enhancements included in the FY 2010 President's Budget submission will focus on addressing other critical areas for meeting future challenges and fulfilling our mission of securing America while facilitating legitimate trade.
2009	March 23, 2009	FY 2009 Appropriations Act Senate Report 110-396, Title II, pg. 28	<b>Vehicle Replacement:</b> DHS is directed to include with its fiscal year 2010 budget submission a plan to replace at least 20 percent of the CBP vehicle fleet annually, as well as the funding needed to execute the plan, as specified in the Senate report.	CBP has made progress in addressing fleet management responsibilities; however, CBP will not be able to achieve the replacement rate of 20%. The enhancements in the FY 2010 President's budget submission focus on addressing other critical areas for meeting future challenges and fulfilling our mission of securing America.
2009	March 23, 2009	FY 2009 Appropriations Act Senate Report 110-396, Title II, pg. 37	<b>Northern Border Air Branches:</b> The Committee encourages the Department to include in the fiscal year 2010 budget funding to expand the hours of operation at these air branches.	The enhancements in the FY 2010 President's budget submission focus on addressing other critical areas for meeting future challenges and fulfilling our mission of securing America.
2009	March 23, 2009	FY 2009 Appropriations Act Senate Report 110-396, Title II, pg. 26	<b>Passenger Screening at Airports:</b> The Committee is convinced that growth in the U.S. economy depends in no small measure on international travel and encourages inclusion of funds in the fiscal year 2010 budget request for robust staffing increases at both land and air ports of entry.	The enhancements in the FY 2010 President's budget submission for on addressing other critical areas for meeting future challenges and fulfilling our mission of securing America.

2009	March 23, 2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 38	<b>Carrizo Cane – FY 2009:</b> The Committee directs CBP to submit, with its fiscal year 2010 budget request, a comprehensive plan to eradicate <i>Arundo donax</i> and other invasive plants that inhibit security efforts along the U.S.-Mexico border, including in Eagle Pass and other Texas border areas not now included in the pilot programs.	This reporting requirement was to be submitted in the FY 2010 Budget Submission; however, it is too long to be included. This reporting requirement will be sent to Congress as a separate report, with the same due date of March 27, 2009.  06/02/09: Report was transmitted to Congress.
2009	March 23, 2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 37	<b>Textile Transshipment Enforcement – FY 2009:</b> The Committee directs CBP to submit report with FY10 budget on execution of 5-year plan.	This reporting requirement was to be submitted in the FY 2010 Budget Submission; however, it is too long to be included. This reporting requirement will be sent to Congress as a separate report, with the same due date of March 27, 2009.  02/20/09: Report was transmitted to Congress.
2009	February 16, 2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 39	<b>Project Seahawk:</b> The Committee directs CBP to report not later than February 16, 2009, on the impact of Project SeaHawk to date, and to include details of how the project will be funded and supported beyond fiscal year 2009.	11/03/2009: Report was transmitted to Congress.
2009	March 31, 2009	Tariff Suspension and Trade Act of 2000  P.L. 106-476, Chapter 3, section 1443	<b>Dog and Cat Fur Protection Act:</b> Annual report on CBP's efforts to enforce the provisions of the Dog and Cat Protection Act of 2000, which prohibit the importation of products made with dog and cat fur.	03/06/09: Report was transmitted to Congress.
2007	April 10, 2009	Security and Accountability for Every Port Act of 2006  P.L. 109-367, Section 232	<b>Full-Scale Implementation of Pilot Scanning System:</b> A report submitted every six months on the status of the costs and the efforts of CBP's full-scale deployment to scan, using non-intrusive imaging equipment and radiation detection equipment, all containers entering the United States before such containers arrive in the United States as soon as possible.	05/29/09: Report was transmitted to Congress.
2009	April 30, 2009	FY 2009 Appropriations Act House Report 110-862, Title II, p. 31 and 42	<b>SBI Quarterly Report:</b> The Committee directs the Department to continue its Secure Border Initiative status reports on a quarterly, versus the current bi-monthly, schedule. The report should include an update on Northern Border <i>SBI</i> investments.	Report was transmitted to Congress.
2007	May 1, 2009	Security and Accountability for Every Port of 2006  P.L. 109-347 Section 235	<b>Report on Pilot Program to Improve the Safety of Empty Containers:</b> A report on the one-year pilot program to assess the risk posed by and improve the security of empty containers at U.S. seaports to ensure the safe and secure delivery of cargo and prevent potential acts of terrorism involving such containers.	9/15/09: Report was transmitted to Congress.
2009	May 15, 2009	FY 2009 Appropriations Act Senate Rpt 110-396, Title II, p 33	<b>Qrtly: Automated Commercial Environment (2nd Quarter FY 09):</b> The Committee directs that CBP continue to provide the level of detail within the ACE expenditure plan as required in previous years.	8/20/09: Report was transmitted to Congress
2009	August 14, 2009	FY 2009 Appropriations Act Senate Rpt 110-396, Title II, p 33	<b>Qrtly: Automated Commercial Environment (3rd Quarter FY 09):</b> The Committee directs that CBP continue to provide the level of detail within the ACE expenditure plan as required in previous years.	10/26/09: Report was transmitted to Congress

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **Salaries and expenses:**

## **I. Appropriation Overview**

### **A – Mission Statement for Salaries and expenses:**

Since its inception in March 2003, U.S. Customs and Border Protection (CBP) has been making great strides in securing America's borders while safeguarding trade and international travel, ensuring the vitality of our economy. With the creation of CBP, for the first time in our nation's history, responsibility for securing, controlling and managing U.S. borders was consolidated within a single agency. America's frontline border agency employs more than 58,000 highly trained and professional personnel equipped with the latest homeland security technologies.

The agency is responsible for protecting the sovereign borders of the United States at and between official ports of entry. CBP is on the frontline protecting the American public against terrorists and instruments of terror and protects economic security by regulating and facilitating the lawful movement of goods and persons across U.S. borders. CBP performs these missions with vigilance, integrity and professionalism.

CBP ensures all persons and cargo enter the United States legally and safely through CBP's official ports of entry. CBP officers prevent cross-border smuggling of contraband such as controlled substances, weapons of mass destruction and illegal or diseased plants and animals. CBP ensures that travelers and immigrants present appropriate documentation. On a typical day, CBP officers screen more than 1 million international travelers and 70,000 cargo container before they enter the country. CBP also strives to prevent the illegal export of U.S. currency or other monetary instruments, stolen goods such as vehicles and other illegal items, as well as strategically sensitive technologies.

CBP carries out its homeland security mission without restricting the flow of legitimate trade and travel that is important to our nation's economy. Accordingly, CBP has a dual mission: to prevent terrorists and their weapons of mass destruction from entering the U.S. and to facilitate legitimate trade and travel. CBP has found that by using advanced information, risk assessment and management and appropriate scanning and other technologies, and by partnering with other nations as well as private industry, these goals need not be mutually exclusive.

In support of this dual mission, CBP has instituted various programs and initiatives such as the Secure Border Initiative, a comprehensive multi-year plan to secure America's borders and reduce illegal migration; the Cargo Security Initiative, a program intended to help increase security for containerized cargo shipped to the United States from around the world and the Customs-Trade Partnership Against Terrorist, a joint government-business initiative to build cooperative relationships that strengthen overall supply chain and border security.

CBP's primary field occupations consist of CBP officers including import, entry and agriculture specialists, Border Patrol agents, Office of Air and Marine pilots, and marine officers. Its field organization is focused around 20 Border Patrol Sectors with 34 border patrol checkpoints and 93 tactical checkpoints between the ports of entry, 143 stations and substations. Port security is maintained at 20 field offices and 327 associated ports of entry, of which 15 are pre-clearance stations outside the United States. Personnel use a mix of non-intrusive technology such as large-scale X-rays and radiation portal monitors, targeting systems, air and marine assets, and other forms of automation to ensure the identification and apprehension of high-risk travelers and cargo and the facilitation of legitimate traffic into the United States.

### **Mission Statement**

We are the guardians of our Nation's borders.

We are America's frontline.

We safeguard the American homeland at and beyond our borders.

We protect the American public against terrorists and the instruments of terror.

We steadfastly enforce the laws of the United States while fostering our Nation's economic security through lawful international trade and travel.

We serve the American public with vigilance, integrity, and professionalism.

### **Core Values**

***Vigilance:*** Vigilance is how we ensure the safety of all Americans. We are continuously watchful and alert to deter, detect, and prevent threats to our Nation. We demonstrate courage and valor in the protection of our Nation.

***Service to Country:*** Service to Country is embodied in the work we do. We are dedicated to defending and upholding the Constitution of the United States. The American people have entrusted us to protect the homeland and defend liberty.

***Integrity:*** Integrity is our cornerstone. We are guided by the highest ethical and moral principles. Our actions bring honor to our agency and ourselves.

## **B – Budget Activities:**

### Headquarter Management and Administration

Headquarters Management and Administration provides critical policy and operational direction, mission support, including equipment, training, and technical expertise to CBP front-line personnel. This program is essential in carrying out CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

### Border Security Inspections and Trade Facilitation at the Ports of Entry

The Inspections, Trade, and Travel Facilitation at the Ports of Entry program facilitates the flow of legitimate travel and trade across U.S. borders while ensuring that threats to the United States are not allowed entry. CBP accomplishes this by using technology, intelligence, risk information, targeting, and international cooperation in the screening of entering international cargo and travelers and departing export cargo. This program reduces the potential of terrorists' instruments of terror and contraband from entering the U.S. while facilitating the legal flow of people and trade by deploying CBP officers to the ports of entry. The goal of this program is to improve compliance with trade regulations and other mandatory import/export guidance while increasing the security of the U.S. CBP has extended its zone of security beyond its physical borders through the use of bilateral and private-sector partnerships, targeting, and scrutinizing advance information on people and products coming into this country. CBP is cultivating "smart borders" through the use of technology, has established a layered defense strategy, and has created "one face at the border," a unified, recognizable presence at the border to combine and capitalize on the authorities and skills of our diverse workforce.

### Border Security and Control Between the Ports of Entry

The primary purpose of the Border Security and Control Between the Ports of Entry program is to establish and maintain effective control of U.S. borders by detecting, responding to, and interdicting border penetrations. A national strategy that consists of five objectives has been established to achieve the mission of this program: (1) Establish a substantial probability of apprehending terrorists and their weapons as they attempt to enter illegally between the ports of entry; (2) Deter illegal entries through improved enforcement; (3) Detect, apprehend, and deter smugglers of humans, drugs and other contraband; (4) Leverage Smart Border Technology to multiply the effect of enforcement personnel; and (5) Reduce crime in border communities and consequently improve the quality of life and economic vitality of targeted areas. The National Border Patrol Strategy requires increasing national security by augmenting enforcement resources along the northern and southern border. The proper balance in the deployment of personnel, equipment, intelligence, support, technology, and infrastructure is critical. Reducing vulnerability to the entry of terrorists, illegal aliens and drugs by increasing personnel and resources, is the key to the successful implementation of this strategy.

### CBP Air and Marine – Salaries

CBP Air and Marine Salaries support a staff of over 1,800 air interdiction officers/pilots, marine enforcement officers, operational support, and administrative positions. It

provides funding to enhance skills and expertise to deter, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the U.S.

### **C – Budget Request Summary:**

CBP Salaries and Expense requests 49,640 positions, 49,053 FTEs, and \$8,207,986,000 for FY 2011. Program changes include a decrease of 284 positions and a decrease of 202 FTEs:

Data Center Migration – CBP requests an increase of \$26.6 million for the Data Center consolidation effort, which will standardize Information Technology (IT) resource acquisitions across components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation are enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time. The data center development funding, to be managed through the DHS Working Capital Fund (WCF), will be used for the continuation of system and application migration to the two DHS Enterprise Data Centers for central DHS management in FY 2011.

Intellectual Property Rights Enforcement – CBP requests an increase of \$25.0 million for IPR enforcement. The additional resources will be used to enhance information technology systems and enforcement activities that support IPR activities and will support the implementation of the IPR 5-Year Plan and CBP’s strategic goal of releasing legitimate cargo without delay, intercepting infringing goods, and preventing and deterring violations.

Office of Intelligence and Operations Coordination (OIOC) Staffing – CBP requests an increase of \$10.0 million to fund 103 Intelligence Analysts to support 24/7 operations of CBP Intelligence Watch, Operations Coordination and the Commissioner’s Situation Room. These positions will insure that CBP’s leadership is provided with the intelligence information required to make tactically and strategically sound decisions.

OIT Reduce Contractor Support – CBP requests a reduction of \$74.4 million to contractor support to ensure our highest priority capabilities are fully funded to achieve our core missions. This will reduce the amount of funding available for contract support in a number of areas within the Office of Information and Technology. The reductions will result in less direct support to the field and more centralized IT Help Desk support. OIT plans to mitigate the impacts by standardizing desktops, servers and storage; consolidate and centralize management of desktops; virtualize services/workstations and circuit/bandwidth optimization.

Not Sustaining FY 2010 Initiatives – CBP requests a reduction of \$27.7 million (OAM Reduction to FY 2010 Personnel Enhancement \$19.7 million, Cyber Security \$5.0

million, and API/PNR \$3.0 million) in FY 2010 enhancement capabilities. This cut to the FY 2010 enhancements is necessary to ensure our highest priority capabilities are fully funded to achieve our core missions.

**Reduction to Border Patrol Premium Pay and Agent Staffing** – CBP requests a reduction of \$31.7 million of OBP’s premium pay and agent staffing. The reduction reflects a proposed change to management of premium pay policy on working shifts, which currently results in higher premium pay costs, and it includes a staffing reduction, which translates into a decrease of 181 Border Patrol agents in FY 2011, but maintains approximately 20 thousand Border Patrol agents. The Border Patrol is committed to maintaining the current levels of effective control.

**Human Resource Reductions** – CBP requests a reduction of \$4.2 million to Human Resources. This reduction would be achieved in the following areas: travel, equipment replacement and telework, contractor support, staffing reduction, recruitment support and limit updates to data systems/software.

**Training and Development Reduction** – CBP requests a reduction of \$24.3 million to the Office of Training and Development (OTD). This reduction would be achieved in three major areas: OTD will reduce 50 positions and \$3.115 million at headquarters and the Academies through attrition and not filling current vacancies; OTD will reduce \$3.650 million in funding for contract positions for services that are no longer required; and OTD will reduce \$17.559 million from CBP’s National Training Plan.

**Office of Administration (OA) Reduction** – CBP requests a reduction of \$8.0 million to OA. This reduction will impact OA’s core areas such as acquisition management, systems development and deployment, facilities and real property management, as well as asset and personal property management. Decreased funding will reduce FTE’s by 3% and contractor support by 11%.

**Secure Freight Initiative** – CBP requests a reduction of \$16.6 million in the Secure Freight Initiative (SFI) Program. Under this reduction, three of the five existing SFI ports (Honduras, Southampton, and Korea) will revert to Container Security Initiative (CSI) protocols. Under CSI protocols, only targeted, high risk cargo will be examined, as opposed to 100% of all cargo under SFI. CSI will increase the use of remote targeting and examinations in order to achieve the program’s objectives. SFI operations at Qasim, Pakistan and Salalah, Oman will remain constant.

**Customs-Trade Partnership Against Terrorism (C-TPAT)** – CBP requests a reduction of \$12.0 million in the Customs-Trade Partnership Against Terrorism program (C-TPAT). The Automated Web-Base Portal System funding will be reduced by \$2.0 million, the number of contractors (software programmers and testers) assigned to the Office of Information Technology to develop the Automated Web-Based Portal System will be reduced from 8 to 2 programmers in equal increments from FY 2010 – FY 2012. The program will also take a \$10.0 million reduction in support funds, i.e., equipment, services and supplies.

Terminating United States Postal Service (USPS) Facilities Leases – CBP requests a reduction of \$4.4 million to terminate the lease space at U.S. Postal Service (USPS) buildings. The reduction may have an impact on mail inspections and entries since multiple cargo locations will now be used to process mail, but CBP expects this impact can be significantly mitigated by shifting to an automated versus manual cargo clearance environment that will also facilitate more effective targeting. CBP operations could be pushed upstream in line with other cargo operations and it would help achieve advanced electronic manifesting and create a more level playing field with express and air cargo operators as provided for in the Postal Accountability and Enhancement Act (PAEA).

Elimination of the Customs and Border Protection (CBP) Explosive Detector Dog Program – Resources totaling \$410 thousand to fund CBP’s Explosive Detector Dog Program have been eliminated. CBP will use state and local Explosive Detector Dog teams in emergency situations.

Container Security Initiative (CSI) – CBP requests a reduction of \$50.7 million in the CSI Program. As the CSI program matures, CBP will begin to shift from the initial CSI operating protocols (which were heavily dependent on the placement of U.S. personnel overseas) to a more technological based approach, relying on remote targeting from the National Targeting Center-Cargo (NTC-C), remote examinations and image analysis, and greater reciprocal examination relationships with host governments. As CSI activities transition to a more virtual environment, personnel and mission support resources stationed overseas will be relocated to U.S. domestic ports. This will allow the program to become more efficient and less costly.

Western Hemisphere Traveler Initiative (WHTI) Reduction – CBP requests a reduction of \$24.5 million in the WHTI Program. The legislative mandate to implement WHTI was met in June, 2009. All other enhancements have gone or will go beyond the legislative mandate. The reduction will be achieved by eliminating one half of funds recurred in FY 2011 for new acquisitions in FY 2010 (\$10.5 million) and reducing FY 2011 base funding by \$14.0 million.

Foreign Language Award Program (FLAP) – CBP requests a reduction of \$19.9 million in FLAP. FLAP was established in 1985 to pay cash awards to U.S. Customs and Border Protection (CBP) officers and CBP Agriculture Specialists in the Office of Field Operations (OFO) who are proficient in, and utilize, a foreign language in the performance of their official duties. CBP’s plan of action to suspend the FLAP program would first commence with notifying the National Treasury Employees Union (NTEU) of its intentions and this funding reduction will be taken against the Inspections, Trade and Travel Facilitation at POEs PPA. FLAP funding is currently paid for through the COBRA User Fees. Funding freed up from the elimination of FLAP will be used to fund salary costs in support of CBP officer staffing.

## II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

### Department of Homeland Security U.S. Customs and Border Protection Salaries and expenses:

Total Change 2010 to 2011	(18)	4	566

The President's Budget requests \$521.1 million for Headquarters Management and Administration – At the Ports. This is a decrease of \$566 thousand from the FY 2010 request. The request includes:

- increase of \$13.300 million for enhancement to Data Center Migration
- increase of \$9.822 million for annualization of tactical communications and land ports of entry modernization that are being procured and constructed under the ARRA
- increase of \$981 thousand for FY 2010 pay annualization
- increase of \$2.059 million for pay inflation
- transfer of \$315 thousand from the Facilities Program Oversight and Management PPA for non-personnel funding of Facilities personnel
- decrease of \$16.825 million for non recurring costs associated with the Data Center Migration
- decrease of \$3.916 million for program changes to the Office of Administration, which would reduce funding for both staff and contractors
- decrease of \$2.500 million for FY 2010 new initiatives for cyber security that will not be sustained.
- decrease of \$2.080 million for program changes to Human Resources Management, which would reduce funding for staff, contractors, and equipment
- decrease of \$340 thousand for Human Resources Management travel for management efficiencies

- decrease of \$250 thousand for non recurring of Internal Affairs positions added in the FY 2010 budget.

Total Change 2010 to 2011	(18)	(8)	(1,225)

CBP requests \$494.2 million for Headquarters Management and Administration – Between the Ports. This is a decrease of \$1.2 million from the FY 2010 request. The request includes:

- increase of \$13.300 million for enhancement to Data Center Migration
- increase of \$7.667 million for annualization of tactical communications that are being procured and constructed under the ARRA
- increase of \$1.099 million for FY 2010 pay annualization
- increase of \$2.307 million for pay inflation
- transfer of \$315 thousand from the Facilities Program Oversight and Management PPA for non-personnel funding of Facilities personnel
- decrease of \$16.825 million for non recurring costs associated with the Data Center Migration
- decrease of \$3.917 million for program changes to the Office of Administration, which would reduce funding for both staff and contractors
- decrease of \$2.500 million for FY 2010 new initiatives for cyber security that will not be sustained.
- decrease of \$2.080 million for program changes to Human Resources Management, which would reduce funding for staff, contractors, and equipment
- decrease of \$340 thousand for Human Resources Management travel for management efficiencies
- decrease of \$250 thousand for non recurring of Internal Affairs positions added in the FY 2010 budget.

## **CURRENT SERVICES PROGRAM DESCRIPTION:**

Headquarters Management and Administration provides critical policy and operational direction, mission support, and technical expertise to CBP front-line personnel. This program is essential in carrying out CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

Headquarters Management and Administration is comprised of two main groupings: "Policy, Direction and Human Capital," and "Technology and National Support."

### Policy, Direction and Human Capital

#### **Office of the Commissioner**

The Office of the Commissioner includes the Commissioner's direct staff and 4 offices:

#### Office of Intelligence and Operations Coordination (OIOC)

The Office of Intelligence & Operations Coordination (OIOC) coordinates national incident response and intelligence-driven special operations that requires collaboration between CBP offices. Through its five divisions (Intelligence & Situational Awareness, Analysis & Targeting, Incident Management and Operations Coordination, Field Coordination, and Mission Support), OIOC ensures that intelligence serves CBP operators, links closely with targeting efforts, and informs CBP leaders so that they can make the best possible decisions.

OIOC mission is to provide CBP decision-makers total situational awareness and facilitates operational response for all crimes, all threats, and all hazards throughout the CBP Area of Responsibility. The Office develops and disseminates Common Operating and Intelligence Pictures at all levels of decision-making and coordinates all cross-organizational operations as well as all CBP operations involving non-CBP elements. OIOC integrates all relevant operational, intelligence, targeting, and information sharing data, processes, mechanisms and programs. OIOC provides incident management and facilitates minimal disruption, rapid recovery, and resumption of national capabilities in the event of a major crisis.

#### Office of Chief Counsel

The Chief Counsel is the chief legal officer of CBP and reports to the General Counsel of the Department of Homeland Security through the Deputy General Counsel. The Chief Counsel serves as the Ethics Officer for the organization and is the principal legal advisor to the Commissioner of CBP and its officers. The Office of the Chief Counsel provides legal advice to, and legal representation of, CBP officers in matters relating to the activities and functions of CBP. The Office is also responsible for reviewing proposed actions to ensure compliance with legal requirements, preparing formal legal opinions, preparing or reviewing responses in all court actions, civil or criminal, involving CBP, and developing, implementing, and evaluating nationwide programs, policies, and

procedures within its functional areas. The Office of the Chief Counsel has both a Headquarters and a field structure. The Headquarters office is located in Washington, D.C. and its activities are divided broadly into three functional areas under the supervision of Associate Chief Counsels: Ethics, Labor and Employment; Enforcement; and Trade and Finance. The field structure consists of Associate and Assistant Chief Counsels located in major cities across the United States who advise CBP field managers in their geographic areas.

#### Office of Policy and Planning (OPP)

The Office of Policy and Planning provides leadership, direction, and advice regarding CBP's overall policy development and implementation; assists and works on behalf of the Commissioner and Deputy Commissioner in defining and advancing CBP priorities through the effective development, review, and implementation of key policy initiatives in coordination with other CBP offices, DHS, and other governmental agencies. OPP serves as the principle advisor to the Commissioner and other senior officials on CBP's strategic planning and, in coordination with Office of Finance and Office of Information Technology, on the integration of strategic-level planning and performance with resource allocation. OPP has developed and is responsible for implementing CBP's Strategic Management Framework (SMF), which is intended to fully integrate CBP's investment management, resource management and program management process and ensure that resources are used to maximize the return on investment on CBP's mission focused goals.

The SMF includes four major types of deliverables for which OPP has oversight responsibility: the CBP Strategic Plan, cross-cutting strategy documents, executive level strategic implementation plans, and quarterly progress reviews.

#### Office of Diversity and Civil Rights (DCR)

The Office of Diversity and Civil Rights (DCR), formerly the Office of Equal Opportunity, is responsible for ensuring diversity and inclusion, and compliance with civil rights and civil liberties statutes, regulations and policies. DCR provides leadership in the formulation, implementation and evaluation of CBP's policies and programs in these aforementioned areas. In addition, DCR ensures diversity and inclusion in all CBP programs and activities processes complaints of discrimination filed by applicants and employees; and allegations of civil liberties violations by members of the trade and traveling public and individuals detailed for law enforcement purposes.

#### **Offices of Internal Affairs (IA)**

The Office of Internal Affairs exercises oversight authority for all aspects of CBP operations, personnel, facilities, and the Counterintelligence Program, to include Cyber Security. IA's mission is to promote the integrity and security of the CBP workforce. IA performs and manages a wide variety of functions or programs comprising seven divisions: Personnel Security, Investigative Operations, Integrity Programs, Credibility Assessment, Operational Field Testing, Security Management, and Management Inspections.

IA conducts investigations of alleged criminal and serious non-criminal misconduct on the part of CBP employees. The office coordinates its internal investigative activity with

the Office of Inspector General (OIG), U.S. Immigration and Customs Enforcement's Office of Professional Responsibility (ICE/OPR), the FBI and numerous other federal, state and local law enforcement authorities. Currently, CPB IA is investigating nearly 1100 cases.

IA's Conduct and Integrity Oversight Initiative supports the Commissioner's objectives to strengthen employee base and integrity assurance; implement a proactive anti-corruption investigative program within CBP; and ensure that allegations are investigated thoroughly, objectively and in a timely manner by CBP Special Agents. Prior to hiring its own investigative cadre, CBP IA routinely received investigative reports from outside agencies that were over two years old. Now, CBP IA has implemented a 90 – 120 day goal for completion of misconduct investigations assigned to CBP IA Special Agents.

IA has implemented a Comprehensive Integrity Strategy, which integrates prevention, detection, and investigation capabilities to deter and respond to corruption and serious misconduct in the CBP workforce. The Comprehensive Integrity Strategy employs improved personnel security screening of prospective CBP employees, as well as polygraph examinations of certain law enforcement candidates, application of behavioral and analytical research tools to identify integrity indicators of corruption, and an intelligence-driven investigative response to integrity events. The Integrity Program Division conducts research (data) and analysis (behavior) designed to detect corruption, develops data/intelligence to drive the focus of integrity investigations, and applies "Insider Threat" methodologies for advanced detection of integrity threats.

#### **Office of International Trade (OT)**

The Office of International Trade (OT) is responsible for developing the national CBP trade policy and programs that facilitate legitimate trade and enforce our trade laws. OT is able to leverage a diverse array of skill sets to develop a comprehensive trade strategy and action plans, focused on results-driven strategic initiatives addressing trade facilitation, administration and enforcement issues. By promoting trade facilitation through partnership programs, OT streamlines the flow of legitimate shipments and fosters corporate self-governance as a means of achieving compliance with trade laws and regulations. OT also directs national enforcement responses through effective targeting of goods crossing the border as well as strict, swift punitive actions against companies participating in predatory trade practices, including textile transshipment and intellectual property rights infringement. A risk-based audit program is used to respond to allegations of commercial fraud and to conduct corporate reviews of internal controls to ensure importers comply with trade laws and regulations. OT provides the legal tools such as all regulations, Federal Register notices, binding rulings and decisions, and informed compliance publications, to support and promote facilitation and enforcement of our trade and border security requirements. OT is also the business process owner for the development of entry summary functionality in the Automated Commercial Environment (ACE), CBP's new automated trade system. Furthermore, OT has the lead in the modernization of trade policies, processes and procedures that will enable CBP to address the continuously changing trade environment.

### **Office of Human Resources (HRM)**

The Office of Human Resources (HRM) provides centralized human resources support to over 58,000 CBP employees. HRM is responsible for ensuring effective delivery of the following services: recruiting, providing employee services and benefits, processing personnel actions, improving business processes, and facilitating workforce effectiveness. HRM promotes and enables mission accomplishments through human capital planning and utilization, strategic leadership with regard to CBP employees, labor-management relations, training and employee safety.

### **Office of Training and Development (OTD)**

The Office of Training and Development (OTD) leads and directs Customs and Border Protection (CBP) training programs. OTD ensures that all training efforts support the CBP mission and strategic goals, meet the needs of a diverse and geographically dispersed workforce, and contribute to measurable outcomes and results. OTD establishes standards for designing, developing, delivering, and evaluating training. The office directly executes career development programs; basic and advanced training to all occupations; and supervisory, management, and executive development programs via the annual agency-wide training plan.

As CBP's hub for centralized leadership programs and direction of all CBP training programs, OTD promotes achievement and a results-driven culture through effective operational and mission support training efforts and a strong leadership curriculum. OTD prepares employees to carry out the core missions of CBP and continues to evolve to meet the needs of the Department of Homeland Security. By working with all CBP components to develop and deliver mission critical training, OTD prepares employees to protect America's frontline. OTD links to CBP's strategic goals to shape the knowledge of agency employees and instill a law enforcement ethic that prepares them for the ever changing challenges of the field.

OTD addresses critical challenges of the CBP operating environment by focusing on consolidating IT systems, achieving operational integration by developing a unified approach for CBP training, and developing a more robust evaluation and assessment process to measure training effectiveness and identify weaknesses.

### **Office of Congressional Affairs**

The Office of Congressional Affairs is responsible for advising CBP managers on legislative and congressional matters and for assisting members of Congress and their staffs in understanding current and proposed CBP programs.

### **Office of Public Affairs (OPA)**

The Office of Public Affairs communicates CBP's mission and operations. OPA continually informs the agency's chief stakeholders, the American public, through media outreach and public information campaigns conducted via media events, news releases, video and photography, as well as the public Web site CBP.gov, informational brochures, and a national customer service call center to address public questions/complaints. OPA also provides continual information to the CBP work force through the CBPnet intranet

site, the weekly e-mailed news compilation Frontline News, and through mass e-mails. A quarterly magazine, Frontline, is mailed to CBP personnel and other stakeholders throughout the nation. OPA acts as a conduit for information to and guidance from the Department of Homeland Security.

## **Technology and National Support**

### **Office of Information and Technology (OIT)**

The Office of Information and Technology provides integrated, comprehensive technical support to carry out the mission of CBP, as well as the Department of Homeland Security. OIT is responsible for developing, acquiring, testing, and maintaining existing technology and engineering new technology solutions; for managing the CBP Modernization Program; for overseeing the forensic and scientific analyses in the CBP laboratory system; for designing, developing, maintaining and training personnel on CBP's automated systems; for overseeing the tactical wireless radio program; and for ensuring the reliable performance of our infrastructure. OIT also manages the computer security program; establishes automated interfaces between CBP, trade participants, and other government agencies; and provides reference library and electronic information resources.

OIT supports business processes with the design, development, programming, testing, implementation, training, and maintenance of CBP automated systems. OIT is responsible for the management of all CBP computer facilities and systems including the hardware, software, data, video and voice communications, and related financial resources as well as identifying and evaluating new technologies for application in support of CBP business processes.

OIT establishes requirements for computer-to-computer interfaces between CBP and various trade groups and government agencies. OIT represents CBP on matters related to automated import, export and interagency processing and systems development and provides centralized research, development, test, evaluation, acquisition, training, and maintenance services in support of enforcement and inspection technology for CBP process owners and core strategies. OIT also ensures the coordination of applied technology programs with other domestic and international law enforcement agencies and represents CBP on matters related to applied technology development. OIT provides direct technology assistance in support of operational field activities.

OIT directly supports the CBP Chief Information Officer (CIO) functions and is responsible for management, budget and planning reviews impacting information technology programs. The Office serves as the scientific and technical arm of CBP and is responsible for management of the CBP laboratory system and providing scientific and technical opinions and sample analysis reports to CBP officers.

### **Office of Administration (OA)**

The Office of Administration provides a multitude of mission-support products and services that enable CBP's operational personnel and other business partners to succeed at CBP's mission, as well as promoting the prudent use of agency resources. OA delivers

services through customer involvement and modern, integrated financial systems in support of CBP's goal of developing and promoting more effective and efficient methods to obtain and manage financial data, resources, and capital assets, consistent with the needs of customers and stakeholders. OA provides financial management services, including budgeting, accounting and investment analysis and in addition, OA is responsible for acquiring and effectively managing the assets needed to accomplish CBP's frontline mission. This is done in a manner which incorporates the development, implementation and sustainment of effective program management, acquisition excellence and business transformation processes across CBP. This includes centralized requirements, planning and implementation of CBP's mail, uniform, personal property and fleet management programs. It also includes a consolidated facilities program account which allows the agency to strategically and consistently manage its complex facilities portfolio and operations and maintenance, including management of GSA rent costs.

FY 2009 accomplishments include:

- OA was designated to lead the CBP efficiency review effort. In Spring 2009, CBP launched 50 efficiency initiatives including 20 DHS wide and 30 internal CBP initiatives.
- OA's procurement directorate completed over 8,300 procurement actions totaling over \$3.4 billion and exceeded both our small business and 8(a) program dollar goals for the fiscal year. Included was the award of a DHS-wide Microsoft Support Services Contract worth approximately \$350 million.
- OA managed an inventory of over 1,400 operational facilities and 300,000 personal property assets during FY 2009. Our asset management directorate successfully managed the largest ever physical inventory of CBP personal property valued at over \$4.5 billion.
- OA fleet management program executed requirements to acquire 6,565 vehicles for use by CBP personnel.
- OA uniforms program fulfilled the uniform needs of over 45,800 CBP uniformed personnel.
- OA's National Finance Center processed 423,338 invoice payments in FY 2009 totaling over \$6.3 billion. During the calendar year 2009 our revenue division is on pace to review and approve over 170,000 continuous bond transactions. CBP has never in its history approved more continuous bond transactions in a 1 year period than were approved in 2009.
- Office of Information and Technology (OIT) provided Automated Targeting System operational enhancements for direct support of immediate intelligence threats for the National Targeting Center–Passenger and HQ OIOC intelligence support; Integrated cargo entry data from Mexico; Developed the Person and Vehicle Association tool which maps a driver to all vehicles they have been associated with to improve targeting effectiveness.
- OIT maintained 8 accredited forensics labs supporting 400 samples daily.
- OIT provided operations and maintenance of NII large-scale X-ray and gamma-ray imaging systems currently deployed to our nation's land, sea and air ports of

entry, as well as a variety of portable and handheld technologies, to include radiation detection technology.

- Office of Internal Affairs investigated and closed more than 700 investigations involving allegations of criminal and serious misconduct on the part of CBP employees.
- The Office of Human Resources exceeded all of CBP's fiscal year hiring targets for mission-critical, mission support, and front line occupations to include exceeding the Presidential mandate to hire 18,319 Border Patrol agents by December 31, 2008.
- The Office of Human Resources completed 1,540 worksite safety inspections and 73 hazard evaluations; distributed nearly 17 million personal protective devices to keep employees safe from on-the job hazards and illnesses.
- The Office of Intelligence and Operations Coordination (OIOC) fostered the Automated Targeting System Rules Conferences for passenger, cargo and all other fields. The purpose of the rules conference was to modify the threshold targeting rules and develop plans to continue supporting our programs to modify the threshold targeting rules and the Conferences through FY 2011.
- Office of Training and Development (OTD) created a unified CBP Canine Program by incorporating best practices in canine training, instructor development, procurement, facilities management, breeding, veterinarian care, and peer support.
- OTD revised 4 pandemic influenza courses to better prepare the CBP workforce to address the H1N1 threat.

FY 2010 goals include:

- OA major procurement actions in FY 2010 will include a re-compete and award to support the Employee Assistance Program, and completion of procurement actions in support of the ARRA funding for tactical communications, SBI net and land port of entry modernization. Also, OA will provide administration and oversight in FY 2010 and FY 2011 of the DHS-wide Microsoft Support Services Contract.
- The OIOC plans to inaugurate a fully operational Tucson Intelligence Operations Coordination Center (IOCC) and a fully operational Detroit, MI - Intelligence Coordination Center (ICT).
- OIOC will deploy the Homeland Secure Data Network (HSDN) to 11 sites including the Tucson IOCC, Detroit ICT, the Headquarters Watch expansion, Harper's Ferry, WV and an additional ICT and Air and Marines sites across the country.
- OIT will implement initial operating capability of passenger simulation environment to improve passenger targeting.
- OIT will maintain 8 accredited forensics labs supporting 400 samples daily.
- OIT will continue to provide integrated, comprehensive technical IT data, voice, wireless, and support to CBP's more than 58,000 users, ensuring that mission critical systems and information is available to CBP's front line 24x7x365.
- OIT will provide operations and maintenance of NII large-scale X-ray and gamma-ray imaging systems currently deployed to our nation's land, sea and air

ports of entry, as well as a variety of portable and handheld technologies, to include radiation detection technology.

- OTD will address critical challenges with the CBP operating environment and focuses on consolidating IT systems. The goal of achieving operational integration by developing a unified approach for CBP training will allow OTD to more effectively manage external inquiries to enhance training efficiency and ensure that all training efforts meet the needs of CBP.
- The Office of Internal Affairs Integrity Program Division plans to initiate 500 research and analysis projects.
- The Office of Internal Affairs Investigative Operations Division (IOD) plans to open 1,000 cases.
- HRM will build an infrastructure to streamline and re-engineer processes, create learning environments, and leverage its technology to provide better support to our staff and stakeholders.

FY 2011 goals include:

- OA will continue administration and oversight in FY 2011 of the DHS-wide Microsoft Support Services Contract.
- OA major procurement actions in FY 2011 will include a re-compete and award to support the Uniform contract to fulfill the uniform requirements for CBPs uniformed personnel for contracting various building services throughout the country as well as vehicle retrofitting services.
- OA major system implementations planned in FY 2011 include the CBP wide roll out of the Fed Traveler system and initial development of a CBP facilities project management system. OA will continue to strengthen acquisition management through establishing policies and processes for establishing Program Management Offices and implementing COTR training and tools.
- OA will facilitate the review, analysis and implementation of new efficiency topics such as contracting, in-sourcing and facilities management. We will continue to strengthen CBP Performance Management Framework by assessing current and proposed performance measures.
- OIOC will deploy the Homeland Secure Data Network (HSDN) to additional sites based upon the prioritized needs of CBP Operational offices.
- OIT will incorporate new methods for improving the integration of inspection results in the process for evaluating targeting concepts, rules, and lookouts; Continue incorporation of other federal government agency data into ATS to ensure real time situational awareness; Integrate additional analytical tools into ATS to improve targeting effectiveness.
- OIT will ensure that deployed NII technologies meet the expected operational requirements of CBP.
- OTD will develop a more robust evaluation and assessment process to measure the effectiveness of training and identify any weaknesses. This strategy will also enable OTD to implement a Succession Management Career Development process that engages all CBP management levels to identify individual competencies and establish development plans for employees.

- The Office of Internal Affairs Integrity Program Division plans to initiate 530 research and analysis projects.
- The Office of Internal Affairs Investigative Operations Division (IOD) will open another 1,000 cases.
- HRM will continue to become a premier provider of customer-centric HR Advisory Services.

## **Adjustments to Base**

### Human Resources Travel

With the slowing of adding new officers and agents, the Office of Human Resource will reduce travel by \$680,000. Decreases will be achieved by adopting the below strategies:

- Reducing travel associated with recruiting, interviews, testing, labor and employee relations advisory services, union negotiations
- Providing only limited support to recruiting events and
- Reduced capacity to conduct in-field consultations and program assessments with CBP leadership, decreasing organizational effectiveness and stakeholder support.

Some travel reductions could be mitigated through increased use of video-teleconferencing and web seminars.

Total Change 2010 to 2011	-	-	(1,690)

The President's Budget requests \$400.5 million for this activity. This is a decrease of \$1.7 million from FY 2010. The request includes:

- increase of \$4.482 million for annualizations of prior year initiatives
- increase of \$2.043 million associated with the adjustment to base for CBPO staffing
- increase of \$75 thousand for annualization of American Recovery and Reinvestment Act funding for Land Port of Entry Modernization
- decrease of \$4.400 million for terminating leased space at U.S. Postal Service facilities for cargo screening
- decrease of \$3.230 million for rent associated with FY 2011 program changes
- decrease of \$660 thousand for non-recurring costs for import safety.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

CBP leases a substantial portion of its real property assets through GSA and also by direct lease delegation to non-federal sources. This PPA includes funds to support the rental of facilities, space, buildings, structures, and land along with rent-related building charges and services, including utilities and services provided by the Federal Protective Service (FPS). The Rent PPA supports the Office of Border Patrol, Office of Field Operations, Office of Air and Marine, and the Mission Support activities.

The President' Budget requests \$2.5 billion for Border Security Inspections and Trade Facilitation at POEs. This is an increase of \$249.2 million over the FY 2010 Enacted Budget. The request includes:

- increase of \$181.815 million for salaries to fund Customs and Border Protection officers at a journeyman level of GS-12
- increase of \$70.000 million to address salary shortfalls in the for the current population of CBPOs and to sustain the FY 2010 Import Safety and Trade Enforcement initiative
- increase of \$44.815 million for an additional 389 Customs and Border Protection officers
- increase of \$25.000 million for Intellectual Property Rights enforcement efforts
- increase of \$19.368 million for pay inflation
- increase of \$21.590 million for prior year pay annualization (LPR, staffing for air and land ports of entry, agriculture specialists, passenger screening and DNDO positions)
- increase of \$9.223 million for FY 2010 annualization
- decrease of \$40.600 million in management efficiencies for OIT in source conversion of contractors to Federal positions
- decrease of \$24.500 million for the Western Hemisphere Travel Initiative (WHTI)

- decrease of \$19.948 for the Foreign Language Awards Program (FLAP), which provides cash awards to CBP Officers and Agricultural Specialists who are proficient in and utilize a foreign language in performance of official duties
- decrease of \$14.416 million for non-recurring costs for license plate reader and import safety
- decrease of \$9.447 million to realign 65 positions and the related salaries and benefits costs from the Inspections, Trade, and Travel Facilitation at the POEs PPA to the National Targeting Center PPA
- decrease of \$7.025 million to non-recur FY 2010 Congressional add-on of 50 Customs and Border Protection Officers
- decrease of \$3.647 million in management efficiencies for Office of Field Operations travel
- decrease of \$3.000 million for Advance Passenger Information/Passenger Name Record (API/PNR)

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This PPA supports the Office of Field Operations Strategic Plan goal to secure our Nation’s borders to protect America from entry of dangerous people and goods and prevent unlawful trade and travel and to ensure the efficient flow of legitimate trade and travel across the United States borders.

CBP officers and agriculture specialists are multi-disciplined and perform the full range of inspection, intelligence analysis, examination, and law enforcement activities relating to the arrival and departure of persons, conveyances, and merchandise at ports of entry. CBP’s primary responsibility is to identify potential terrorists and instruments of terror and to perform layered enforcement activities relative to counter-terrorism. These enforcement activities prevent the entry of terrorists and instruments of terror, harmful pests and diseases, illegal drugs and contraband, illegal aliens, and importations/exportations contrary to law and trade agreements, from entering/exiting the United States. CBP personnel interpret the laws and regulations of a broad range of Federal, state, and local agencies, relating to the admissibility of people, cargo, and conveyances.

Specific programs under Border Security Inspections and Trade Facilitation at the Ports of Entry (POEs) are covered below:

**Western Hemisphere Travel Initiative**

Section 7209 of the Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA; P.L. 108-458 as amended) directs the Secretary of Homeland Security, in consultation with the Secretary of State, to develop and implement a plan requiring U.S. citizens (and non-U.S. citizens) to present a passport or other authorized travel document that denotes identity and citizenship when entering the United States. Consistent with the Consolidated Appropriations Act of 2008, DHS continues to make the required investments to implement this secure document requirement at land and sea border ports of entry.

On June 1, 2009, CBP completed the implementation of WHTI to the 39 high volume ports of entry that support 95 percent of the land border traffic. This includes utilizing Radio Frequency Identification (RFID) technology and technical infrastructure to read, validate, and process passport cards issued by the Department of State and other WHTI compliant RFID-enabled documents such as the Enhanced Driver's License (EDL). CBP completed final operational testing and evaluation in August 2009. In FY 2009, CBP completed implementation of the new primary processing application at additional small land border POE. In FY 2010, CBP will fund operations and maintenance at the ports where WHTI has been implemented to ensure the ongoing optimal performance of the program. In FY 2011, WHTI will shift mainly to an operations and maintenance mode.

The new WHTI land border application fully interfaces with the trusted traveler database in order to allow "flex" lanes at the POEs, enabling lanes to be used as trusted traveler, RFID only, or standard vehicle primary lanes based on the operational needs of the individual POE. When a member in one of the trusted traveler programs (NEXUS, SENTRI, FAST) uses their RFID enabled card in the trusted traveler lane, it automatically captures and satisfies WHTI document requirements, thus enhancing CBP's ability to manage traffic flow at the land borders. This new application supports the EDL Project for the states and the Native American Tribal Enrollment Project in terms of developing the requirements, and it supports the technical interfaces necessary.

#### **Electronic System for Travel Authorization (ESTA)**

Section 711 of the Implementing the Recommendations of the 9/11 Commission Act of 2007 (P.L. 110-53) provides for the expansion and enhancement of the Visa Waiver Program (VWP). Pursuant to the 9/11 Act, DHS and CBP are required to provide an automated electronic travel authorization process to screen VWP travelers prior to their travel to the United States. CBP, in coordination with the Department of State, has developed the Electronic System for Travel Authorization (ESTA), which allows CBP to screen applicants in advance of travel to determine their eligibility to travel to the United States under the VWP.

Originally, 27 nations were members of the VWP, but the program expanded to 35 nations in FY 2009. ESTA gives VWP travelers advanced authorization to travel to the U.S. and allows CBP to pre-screen VWP travelers, providing another tool for CBP to further secure U.S. borders by pushing the zone of security outward.

In FY 2009, the ESTA program processed almost 12 million ESTA applications submitted by VWP travelers. CBP's denial rate is approximately 0.23%. In FY 2011, the ESTA program is projected to implement a fee for service, as authorized by Congress, which will fund the program. In FY 2011, CBP estimates that the program will receive over 10 million ESTA applications and that it will deny advance travel authorization to an estimated 0.2% of the applicants.

#### **Outbound Programs**

In order to address the escalating violence in Mexico and to increase outbound operations throughout the United States, CBP created the Outbound Programs Division in March

2009. This division oversees current outbound operations and develops the Office of Field Operation's (OFO) long term national outbound strategy.

Outbound Programs creates plans that:

- stem the illegal flow of firearms and currency out of the United States;
- increase the interdictions of stolen vehicles and fugitives who are attempting to flee the country; and
- augment compliance with the Nation's export laws.

The Outbound Program works to ensure that there are trained CBP officers able to conduct outbound operations; that CBP possesses adequate outbound facilities, equipment, and technology; that CBP is working with international and other government law enforcement agencies; and that CBP officers have adequate automated targeting assistance to identify violators. The Outbound Program oversees outbound operations at all POEs, including land crossings, airports, international mail and express courier facilities, and seaports.

CBP has partnered with ICE to support the multi-agency task forces established to identify, disrupt, and dismantle criminal organizations posing a significant threat to border security. CBP personnel are supporting these taskforces, known as Border Enforcement Security Taskforces (BESTs), at all ten established Southwest land border sites.

In FY 2009, thirteen additional currency/firearms detector canine teams completed training to bring the total to eighteen permanently assigned teams to the southwest land border and two additional Non-Intrusive imaging systems were deployed to southwest land border to support outbound operations. Additionally, all eight railroad crossings on the U.S. – Mexico border are conducting 100 percent scanning of outbound rail cars.

#### **Immigration Advisory Program (IAP)**

Under the IAP, CBP deploys officers overseas (London-Heathrow, Amsterdam, Tokyo, Frankfurt, Seoul, Madrid, and London-Gatwick) to support CBP's goal of enhancing the security of air travel by preventing terrorists from boarding commercial aircraft destined for the U.S. and reducing the number of improperly documented passengers traveling from or through a country to the United States. IAP provides information to host countries, or appropriate authorities, regarding travelers of interest. It focuses on high-risk persons through the use of current targeting and passenger analysis information or an assessment of the passenger's travel documentation. The goals of this effort are the interdiction and apprehension of criminals and persons of national security interest by host countries, the disruption of attempts to smuggle aliens, and the disruption of attempts to enter the U.S. with fraudulent documents. Since IAP does not have any authority in the host country to take such action, the program works with the host country's immigration and/or control authority and the air carrier who takes the appropriate action to prevent the person from boarding the flight to the United States. In addition to the current IAP locations, CBP conducted an IAP pilot study in Mexico for 120 days (Oct – Dec 2009).

### **Fraudulent Document Analysis Unit (FDAU)**

The mission of the FDAU is to remove fraudulent travel documents from circulation and to prevent the use of these documents by mala fide travelers attempting to enter the United States.

Program managers perform in-depth analysis of documents seized by CBP officers nationwide. These program managers also analyze intelligence from fraudulent documents seized overseas to uncover global patterns and trends. This information is shared within CBP and the Department of Homeland Security (DHS) and with other U.S. and foreign government agencies.

The Fraud Prevention Program was established to increase fraudulent document interceptions through sharing of information within and outside of CBP. In FY 2009, 143 CBP officers were designated as Fraud Prevention Officers (FPO). These FPOs are located at ports of entry, international mail and cargo facilities, and preclearance locations. As FPOs, they conduct document examination training and work closely with headquarters on matters related to document examination and document fraud. During FY 2009, 116 Fraud Prevention Program reports were submitted by FDAU.

As the central location for analysis of fraudulent documents seized by CBP, the FDAU provides training and training materials regarding fraudulent use. The FDAU has worked with the CBP Academy and the Advanced Training Center to update their document training programs. Training material and exemplars are provided to other CBP and DHS entities such as the Border Patrol, Transportation Security Administration, Citizenship and Immigration Services, and United States Coast Guard. In August 2009, Fraud Prevention Program training was made mandatory for all CBP officers. By September 30, 2010, all CBP officers will have received training on the nine training modules.

The FDAU also manages the Carrier Liaison Program (CLP). The mission of the CLP is to enhance border security by increasing commercial carrier effectiveness in identifying improperly documented passengers destined to the United States. In FY 2009, the CLP trained 4,711 airline and security personnel in 24 countries throughout Europe, Asia, South America, Africa, the Middle East, Australia, and New Zealand. The CBP assisted the Electronic System for Travel Authorization (ESTA) program on six international missions to train airline personnel on ESTA and update the Visa Waiver Program requirements mandated by the 9/11 Act. In addition, the program published, distributed, and posted to [www.cbp.gov](http://www.cbp.gov) a Revised 2009 Carrier Information Guide. The revised guide includes information on the WHTI, ESTA, and Trusted Traveler Programs, new Advanced Passenger Information System (APIS) information, and contains human trafficking information to highlight for the airlines the real threat to young victims around the world.

### **Admissibility Review Office (ARO)**

The ARO provides CBP with a dedicated resource with institutional knowledge and a consistent approach in making determinations of admissibility relative to the exercise of discretion of inadmissible aliens under the Immigration and Nationality Act (INA). The

ARO works extensively with the Department of State (DOS) and other agencies to determine whether inadmissible aliens may be permitted to travel as non-immigrants with waivers. The ARO reviews applications submitted by aliens who have been determined by CBP officers or consular officers to be ineligible to be admitted to the United States because of one or more grounds of inadmissibility under section 212(a) of the INA. The ARO completed over 18,000 cases in FY 2009. The ARO plans to complete approximately 16,000 cases in FY 2010 and 17,000 cases in FY 2011.

The ARO currently processes and adjudicates all nonimmigrant waivers of inadmissibility recommended by DOS consular officers worldwide. It also adjudicates all nonimmigrant temporary and permanent waiver applications, Form I-192, and Form I-212 within the jurisdiction of CBP.

### **Office of Alien Smuggling Interdiction (ASI)**

ASI was established in September 2006 to expand the nation's zone of security beyond physical U.S. borders by preventing the boarding of individuals traveling to the U.S. who may be inadmissible or traveling on fraudulent or fraudulently obtained travel documents, and to reduce the threat to our nation's security by combating illegal migration, disrupting organized smuggling operations, and identifying and preventing clandestine terrorist travel. ASI's primary goals are to deter, detect, and disrupt illegal migration to the United States and increase criminal prosecution of smugglers and human traffickers. The office focuses on migratory trends, specifically human smuggling and trafficking related issues.

ASI manages the Regional Carrier Liaison Groups (RCLGs) located at the international airports in New York (JFK), Miami and Honolulu. The RCLGs help to carry out the ASI mission by preventing passengers who may be inadmissible, or who possess fraudulent documents, from traveling to the U.S. RCLGs also work with carriers to facilitate boarding of bona-fide passengers and provide 24/7 assistance on immigration related issues. ASI/RCLG officers prevent fraudulently and improperly documented aliens from boarding U.S. bound aircraft through various targeting methods and by working with carriers and U.S. government representatives overseas. ASI/RCLG officers make recommendations to the carriers against boarding (offloading) suspect travelers and to refer these travelers to local authorities in all instances involving fraud. RCLGs provide a service to the travel industry by assisting carriers with boarding questions, and providing expert guidance on suspect passengers. The travel industry has come to rely on RCLGs as a means to navigate complicated immigration laws and as a resource for fraud prevention. In FY 2009, RCLG received approximately 17,000 calls for assistance from carriers and offloaded nearly 2,000 passengers bound for the United States, of which 224 were fraud related.

### **Canine Enforcement Program (CEP)**

CEP plays a crucial role in CBP's anti-terrorism and interdiction efforts. The CEP remains a major component in CBP's ability to interdict illegal narcotics, concealed humans, prohibited agriculture products, firearms, and undeclared currency while facilitating legitimate trade and travel.

Through CEP, CBP has established and deployed world-class detector dog programs to augment existing technology while establishing cutting edge detection capabilities. Under these programs, the agency now provides a higher level of security and detection capability while emphasizing a seamless conduit between existing technology and the proven capabilities of detector dogs. The CEP will continue to advance and develop the anti-terrorism aspects of its mission while maintaining the traditional roles of narcotics interdiction. The Office of Field Operations canine teams are strategically assigned to ports of entry around the United States and pre-clearance stations abroad. As their core mission, CBP officers use specially trained detector dogs in an interdiction role at our nation's ports of entry, and they are also involved in specialized detection programs aimed at combating the terrorist threat at our nation's borders, international airports, and seaports.

In FY 2009, the Office of Field Operations had 605 CBP canine officers: 208 Narcotics Detection Teams, 32 Currency Detection Teams, 212 Narcotics/Human Smuggling Detection Teams, 94 Agricultural Teams, 51 Canine Trainers, and 8 Canine Advisors.

#### **Trade Operations Division (TOD)**

TOD is responsible for coordinating, implementing, supporting, and monitoring trade enforcement initiatives in the field; collaborating with the Office of International Trade (OT) on the development of national enforcement efforts; supporting U.S. CBP's trade discipline role in security and enforcement matters; managing the operational implementation of trade policy established by OT pertaining to import specialists, entry specialists, and drawback specialists; ensuring the implementation and operational accountability of field offices in their administration of trade programs; establishing efficient and effective mechanisms to conduct oversight of trade programs; promoting uniformity through common measures and best practices; and developing mechanisms to identify operational deficiencies and provide a plan for resolution.

#### **Agriculture Programs and Trade Liaison (APTL)**

The APTL office provides leadership, expertise, and innovation to defend the United States from the threats of agro and bio-terrorism. APTL also is responsible for meeting the traditional goals of safeguarding and protecting American agriculture from the risks associated with the entry, establishment, or spread of plant pests and pathogens, noxious weeds, and foreign animal diseases. The specific activities conducted by CBP's APTL fall into five general areas:

- The Agro/Bio-Terror Countermeasures (ABTC) Program mission is to prevent ag/bio-terrorists, their equipment, and weapons from entering into the United States. In partnership with scientific, regulatory, intelligence, and law enforcement agencies, the program seeks to assess risks and obtain information to guide the development and implementation of specific targeting and inspection systems to better protect our people, agriculture, food, and economy from ag/bio-terror attacks.

- The Agriculture Operational Oversight (AOO) office is responsible for improving oversight of the agricultural mission across all CBP field offices by ensuring a more consistent application of agriculture inspection policy across all ports of entry. The office is the primary point of contact for all stakeholder-related issues and the implementation of the Joint Agency Task Force Implementation Action Plans, including coordination with the Animal & Plant Health Inspection Service (APHIS), Department of Agriculture (USDA), Department of Homeland Security, and our agriculture industry stakeholders.
- Agricultural Policy provides policy, planning, and guidance for CBP agriculture inspection programs in order to prevent the intentional and unintentional introduction of plant and animal pests and diseases.
- Agricultural Safeguarding is responsible for the development, clarification, and interpretation of agricultural oversight policy and procedures. In addition, Agricultural Safeguarding is responsible for the application strategies for maritime cargo, air cargo, land border cargo, passenger processing (air, maritime, land border), and trade facilitation and related operations.
- The Fines, Penalties, & Forfeitures (FP&F) Division is responsible for the oversight, policy initiation, and staffing of all 41 Fines, Penalties, and Forfeitures Offices across the United States. These 41 offices perform administrative legal processing of all enforcement actions performed by CBP officers, import specialists, entry specialists and ICE special agents. The FP&F Division is responsible for all aspects of the seized property process to ensure proper management control and accountability of all property that CBP's OFO seizes. The FP&F Division also adjudicates carrier fines assessed under the Immigration and Nationality Act (INA), all liquidated damages, penalty, and seizure cases initiated under the Tariff Act (Customs violations) and certain agriculture penalties. This adjudication includes oversight of both administrative and judicial actions related to violations of law referred to headquarters for initiation as well as providing guidance to the field on carrier fines issues.

### **Air/Sea Cargo Security Verification Program**

The Air/Sea Cargo Security Verification Program establishes maritime and air cargo policy. The program's primary focus is to secure cargo against terrorists and the transport of terrorist weapons within the cargo arena, to coordinate the maritime/air programs with other law enforcement agencies, and to ensure the maximization of efforts in these environments. The program provides a critical component in the facilitation and coordination among other law enforcement agencies of combined anti-terrorism efforts while ensuring the facilitation of trade continues with minimal effect on our economy.

In the maritime environment, CBP has the lead for cargo security controls and measures to mitigate the risk of suspect shipments arriving from or departing to foreign destinations. These efforts support the CBP Cargo Security Strategy and other DHS initiatives such as implementation of the SAFE Port Act of 2006 (P.L. 109-347), and the

9/11 Act. CBP works in collaboration with DHS and its component agencies, such as the United States Coast Guard (USCG), on cargo and port security matters. CBP and USCG have developed joint protocols for maritime operations, including the development of response matrices and joint protocols in the event of an incident of national significance. Further, CBP and USCG routinely conduct joint operations such as law enforcement vessel boardings, targeting efforts, and maritime cargo enforcement operations. Additionally, CBP continues to work with the Transportation Security Administration (TSA) and the USCG in an effort to facilitate the enforcement of the Transportation Worker Identification Credential. Lastly, CBP and USCG work to address business resumption and recovery efforts under the Homeland Security Presidential Directive 13 and collaboratively address industry and trade issues through specific cargo and maritime federal advisory committees.

In the air environment, CBP is strengthening air cargo security measures by updating its national advance targeting unit efforts in support of the CBP International Air Cargo Security Strategy and DHS's National Strategy for Aviation Security. Currently, CBP is working to effectuate enhanced security protocols in the air cargo environment to ensure that high risk cargo is identified for examination and is not released without proper CBP authorization. Additionally, CBP is working with TSA and the DHS Screening Coordination Office to strengthen access control protocols in the air cargo and passenger environments. Lastly, the CBP Office of Port Security is working with the field to identify operational issues and to maximize efforts in the air cargo security environment and other modes of transportation.

## **Adjustments to Base**

### Journeyman Increase

CBP requests an increase of \$181.815 million to fund the increased salary and benefit requirements associated with the implementation of raising the journeyman grade level for the frontline CBP officers (CBPOs), Border Patrol agents (BPAs) and CBP Agricultural Specialists (CBPAS') within CBP from the GS-11 level to the GS-12 level.

The Office of Personnel Management has issued a revised GS-1800 Inspections, Investigation, Enforcement and Compliance Standard. The new standard covers the Customs and Border Protection officer series as well as the Border Patrol agent series and provides factor level descriptions and illustrations, which represent current information as to the occupations within its coverage, based upon the audits and interviews that the OPM position classifiers learned from on-site visits to field locations, as well as input from the agencies human resources and operational staffs.

CBP has also conducted a rigorous review of the nature of the work performed by the core of the frontline border patrol agents and CBP officers. The work responsibilities and expectations have continuously increased since CBP became the principal border control agency when DHS was created. The outcomes and consequences of front-line work have never been greater.

CBPOs, BPAs and CBPAS' daily work is exemplar of individuals working at the GS-12 level; and the agency needs to provide these dedicated employees with the appropriate level of compensation.

The work performed by most frontline officers, agents, and specialists equates to the GS-12 level based on the pending job duties description that we are now finalizing. The factors of their work that merit the increase include:

- Job complexity in the wide variety of laws that are enforced;
- The broadening of mission and responsibilities to include focus on terrorist activities;
- Shift to an intelligence-driven organization that makes work more proactive in nature;
- Deployment of sophisticated technology and infrastructure;
- Increased violence at the borders; and
- Increased work with other law enforcement agencies, and enforcement-related activities.

CBP will soon be finalizing the new position descriptions that outline the duties and responsibilities of these critical frontline positions.

#### Salary Shortfalls for Current CBPOs and Import Safety Initiative Sustainment

CBP proposes to increase the Inspections, Trade, & Travel Facilitation at the POEs PPA by \$70 million to address the systemic salary shortfall in the current population of CBPOs and to sustain the FY 2010 Import Safety and Trade Enforcement initiative.

#### CBPO Staffing

CBP requests an adjustment to base of \$44.815 million, 389 positions, and 195 FTEs for an increase to Customs and Border Protection Officers (CBPOs) in the Office of Field Operations. The adjustment to base will fund 318 CBPOs and 71 support positions. The proposed adjustment will allow CBP to maintain staffing for critical positions and support CBP's mission to protect the U.S. at its POE from the infiltration of terrorists and other criminal elements into the country as well as efforts to address the illegal smuggling of drugs, money instruments, and aliens across our borders.

#### In-Source Contractor Positions (Conversion to Federal Positions)

The Office of Information Technology will reduce Inspection, Trade, and Travel Facilitation by \$40.6 million in anticipated savings which will be achieved through hiring Federal employees to perform inherently governmental tasks currently performed by contractors. Based on current costs being paid to contractors for these services, we anticipate significant savings with little or no impact on service. OIT anticipates additional benefits will be achieved through having a more stable workforce committed to the mission of the agency.

The types of work that will be transitioned to government staff include budget planning and execution, acquisition support and oversight, audit support, program management, system acceptance testing, technology evaluation and acceptance and technical skills necessary to ensure that the government has the capability to properly evaluate and manage those services and products provided by contractors.

#### National Targeting Center Realignment

The Office of Field Operations will realign 65 positions and \$9.447 million for salaries and benefits costs from the Inspections, Trade, and Travel Facilitation at the Ports of Entry PPA to the National Targeting Center (NTC) PPA. This realignment will correct an error in how the positions were originally annualized.

Through the FY 2007 War Supplemental, OFO received 227 positions for targeting and screening US bound cargo. Of the 227 positions, 162 CBPOs were for increased enforcement and inspection activities at high-priority northern border ports of entry. 65 CBPOs were assigned to the NTC-Cargo to screen and target inbound cargo. The 65 NTC positions should have been annualized in the NTC PPA. The funding realignment corrects the error and has no programmatic impact.

#### Office of Field Operations Travel Reduction

The Office of Field Operations will reduce their headquarters and field travel by \$3.647 million. Decreases are projected in the following areas:

- Resources to support agriculture inspections conducted in the field;
- Number of Temporary On-Duty (TDY) personnel detailed to headquarters to support current programs; and
- Government travel by headquarters personnel to attend meetings and conferences held by stakeholders.

OFO headquarters programs will discontinue the use of TDY personnel as a stop-gap measure while filling staffing vacancies. In order to achieve the reduction, OFO will have to reduce the number of TDY personnel detailed to headquarters to support current programs. Government travel to participate in various meetings, conferences, and recruitment events throughout the country will also be reduced.

FY 2009 accomplishments include:

- Completed the rollout of WHTI infrastructure and technology to all remaining high volume land ports of entry and completed the deployment of the new vehicle primary processing application to the remaining lower volume ports of entry;
- Completed implementation of the ESTA system and website in multiple languages to accommodate all VWP countries;

- Addressed the threat of border violence by doubling the number of currency/firearm canine teams deployed;
- Identified nearly 2,800 persons who were not properly documented for travel to the U.S. Thirty-eight persons were intercepted with fraudulent documents; two persons were identified as smugglers; and a total of 212 terrorist-related suspects were intercepted. Four additional employees were deployed to two overseas locations (Amsterdam and London);
- Continued to enhance CBP's internal and external agricultural-related outreach and communication efforts by leveraging DHS, USDA, and stakeholder outlets;
- Deployed outbound equipment, officers, and overtime in order to increase outbound currency and firearm seizures along the Southwest land border which has resulted in a seizure of over 100 weapons and \$37 million in undeclared currency being smuggled into Mexico; and
- Since March 2009, CBP conducted five Mobile Response Team (MRT) operations to support the SWB surge operations

FY 2010 goals include:

- Transitioning the ESTA system and website to an Operations and Maintenance (O&M) mode;
- Delivering a traffic management system (LED signage) to the high volume land ports of entry, completing deployment of WHTI facilitative technology to novel booth configurations and to additional land ports of entry with an operational requirement for the WHTI technical solution, maintaining a secure border at the land ports of entry while facilitating legitimate trade and travel, and extending WHTI facilitative technology to other environments such as pedestrian processing, ferries, and rail;
- Enhancing the capabilities of the Canine Enforcement Program to match the increasing challenges of expanding foreign trade and the new demands related to the terrorist threat;
- Creating a CBP Agriculture Specialist (CBPAS) risk-based resource allocation and optimization model for assisting in determining deployment for CBPAS and CBP agricultural canine resources at ports of entry; and
- Increasing recruitment efforts in outbound operations, and installing outbound license plate readers along the southwest border to increase the seizures of firearms and currency and the interdiction of stolen vehicles and fugitives.

FY 2011 goals include:

- Continuing to enhance the capabilities of the Canine Enforcement Program to match increasing challenges of expanding foreign trade and the new demands related to the terrorist threat;
- Transitioning the WHTI program to an Operations and Maintenance (O&M) mode and achieving performance goals;
  - Implementing a fee for service program for ESTA, as authorized by Congress;
- Developing comprehensive information exchange procedures with the U.S. Department of Agriculture (USDA) Animal Plant Health Inspection Service

- (APHIS) to fully integrate data capture and analysis capabilities for agriculture operations at ports of entry and cargo business processes; and
- Improving risk management and risk analysis activities within agriculture programs.

<b>2011 Total Request</b>	-	-	<b>3,274</b>
Total Change 2010 to 2011	-	-	48

CBP requests \$3.3 million for Harbor Maintenance Fee Collection. This is an increase of \$48 thousand over the FY 2010 Enacted Budget. The request includes:

- increase of \$16 thousand for FY 2010 pay annualization
- increase of \$32 thousand for 2011 pay increase

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Harbor Maintenance Fee is an Army Corps of Engineers (COE) fee, which is collected for the operation and maintenance, as well as improvements, of U.S. channels and harbors. CBP is reimbursed for a portion of the costs associated with the collection of the fee for COE.

Total Change 2010 to 2011	(8)	(4)	(77,555)

The President’s Budget requests \$84.4 million for International Cargo Screening. This is a decrease of \$77.6 million from the FY 2010 Enacted Budget. The request includes:

- increase of \$185 thousand for FY 2010 pay annualization
- increase of \$388 thousand for FY 2011 pay raise
- decrease of \$50.749 million for the Container Security Initiative (CSI), which will be achieved as CSI transitions from a physical presence to a virtual presence at most CSI ports
- decrease of \$16.579 million for the Secure Freight Initiative (SFI), which will be achieved by reverting to CSI protocols (high-risk scanning instead of 100% scanning) at three SFI ports
- decrease of \$10.800 million for management efficiencies through eliminating the purchase of information on the financial solvency of trading companies and relying on current sources and open sources for the required information

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This PPA supports the Office of Field Operations Strategic Plan goal to ensure the efficient flow of legitimate trade and travel across the United States border.

This PPA includes Container Security Initiative (CSI) operations, which consists of 58 foreign ports, and the Secure Freight Initiative (SFI) at the current services level. The CSI/SFI program will continue its mission to prevent terrorists and terrorist weapons

from entering the U.S. while also facilitating the flow of legitimate trade and phasing out operations at 54 foreign ports.

### **Container Security Initiative**

CSI is a multinational program in place to assist protecting maritime containerized shipping from being exploited or disrupted. In FY 2010, CSI continues to operate in 58 ports and screened over 80 percent of the volume of maritime containers destined for the U.S. CBP will begin to shift from the initial CSI operating protocols (which were heavily dependent on the placement of U.S. personnel overseas) to a more technological based approach, relying on remote targeting from the NTC-C, remote examinations and image analysis, and greater reciprocal examination relationships with host governments. As CSI activities transition to a more virtual environment, personnel and mission support resources stationed overseas will be relocated to U.S. domestic ports. This will allow the program to become more efficient and less costly.

The current core elements of CSI are:

- Identifying high-risk containers—CBP uses automated targeting tools to identify containers that pose a potential risk of terrorism, based on advance shipping information and strategic intelligence.
- Screening and evaluating containers before they are shipped—shipments are screened as early in the supply chain as possible, generally at the last port of lading.
- Using technology to scan high-risk containers to ensure that scanning can be done rapidly without impeding the movement of trade—this technology includes large-scale X-ray, gamma ray machines, and/or radiation detection devices.

Since CSI was unveiled in January 2002, it has been part of our government's strategy to secure the nation from the potential terrorist threat of using maritime cargo containers. With the four remaining ports, CSI will continue to foster partnerships with other countries and our trading partners in order to inspect high-risk shipments before they are loaded on board vessels to the United States. CBP will ensure effective coordination with host countries by conducting periodic risk evaluations of ports to assess the level of staffing and other resource needs. CBP will also encourage interagency cooperation by developing a capacity to collect and share information and trade data gathered from CSI ports.

### **Secure Freight Initiative (SFI)**

The goal of SFI is to incorporate a three-pronged approach to enhance supply chain security that includes the International Container Security (ICS) program, the development of a regulation to require additional data elements for improved high-risk targeting, known as Security Filing (10+2), and initiatives to identify and acquire technology enhancements to strengthen cargo scanning and cargo risk assessment capabilities.

The ICS program uses an integrated scanning system, consisting of radiation portal monitors (RPM) and non-intrusive inspection (NII) imaging systems provided by CBP, to scan containers as they move through foreign ports. Through optical character recognition technology, data from these systems are integrated and provided to CBP officers, who determine if the container should be referred to the host nation for secondary examination prior to lading. ICS provides additional data points that are used in conjunction with advanced manifest data, such as 24-hour rule information, Customs-Trade Partnership Against Terrorism information, and the Automated Targeting System to assess the risk of each container coming to the United States.

In FY 2010, the SFI's ICS program is fully operational and is currently scanning a portion of U.S. bound containers laden in the below three foreign ports that were mandated by the SAFE Port Act to establish a pilot program in foreign countries to scan all US-bound containers laden in those ports for radioactive and nuclear material:

- Port of Qasim (Pakistan)
- Puerto Cortes (Honduras)
- Port of Southampton (UK)

On April 30, 2009 CBP and the Hong Kong government concluded the cooperative agreement to conduct a pilot study to scan maritime containers under SFI utilizing large-scale radiation detection and imaging systems. This study provided valuable operational lessons on the technical, logistical, and diplomatic challenges with scanning maritime containers in a high volume port such as Hong Kong. CBP and the Hong Kong government have agreed to continue to work together and explore alternative approaches toward enhancing container and trade security through risk management and total supply chain security.

CBP has been focusing initial deployments of SFI scanning/imaging operations to a limited number of strategic locations where the additional scan data would prove the most beneficial towards enhancing CBP targeting for high-risk maritime cargo.

In FY 2011 CBP will begin a transition to phase out operations at three of the five current locations and relocate personnel domestically; CBP will maintain operations at Port of Qasim, Pakistan and in Salalah, Oman.

Although SFI is a part of CBP's layered risk-based approach, CBP will continue to use and strengthen other means towards the same goals of SGI such as the 24 hour rule, Importer Security Filing and Additional Carrier Requirements Rule (10+2), and C-TPAT.

The Importer Security Filing and Additional Carrier Requirements required DHS to develop a regulation that requires additional data elements for improved high-risk targeting, including appropriate security elements of entry data to be provided as advanced information prior to vessel lading. CBP's 'Importer Security Filing and Additional Carrier Requirements' regulation, also known as "10+2", became effective on January 26, 2009 as an Interim Final Rule. The "10+2" Interim Final Rule significantly

increases the scope and accuracy of information gathered on the goods, conveyances and entities involved in the shipment of cargo to the United States via vessel by requiring importers to supply CBP with an electronic Importer Security Filing consisting of 10 trade data elements 24 hours prior to lading for cargo shipments that will be arriving into the United States by vessel. The ocean carriers are required to provide their vessel stow plans and container status messages to CBP electronically.

In FY 2011, CBP will revert to CSI protocols, which means to only scan those containers identified as “high risk” at three of the five existing ports (Honduras, Southampon and South Korea). CBP operations at Port of Qasim, Pakistan and in Salalah, Oman will remain constant.

### **Adjustments to Base**

#### Efficiencies in Information Sources for Trade

CBP will eliminate a contract which provides information on companies’ financial status and soundness. This contract elimination will result in an efficiency saving of \$10.8 million annually. This reduction will have a limited impact on CBP’s ability to determine a company’s reliability and financial soundness. As an alternative to the contact, CBP will determine potential alternate sources of business information such as open source information to augment the needs of the Customs-Trade Partnership Against Terrorism and the trade programs that currently receive information from this contract.

FY 2009 accomplishments include:

- Phased in the implementation of Secure Filing (10+2) regulations; and
- Workload and staffing levels were evaluated in all CSI ports to ensure staffing levels were consistent with workload. Eliminated thirty positions through normal attrition and/or staff reduction; those officers returned to domestic ports and/or to the NTC-C.

FY 2010 goals include:

- Finalizing the structured review of the “10+2” Interim Final Rule;
- Establishing a port in Karachi; and
- Maintaining “10+2” data in the Automated Targeting System to enhance CBP’s targeting efforts; and

FY 2011 goals include:

- CBP will begin the transition from a physical presence to a virtual presence at CSI ports; and
- SFI will begin a transition to phase out operations at three of the five current locations and establish a port in Karachi.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and expenses:  
Other international programs  
Program Performance Justification

<b>2011 Current Services</b>	<b>101</b>	<b>101</b>	<b>11,308</b>
<b>2011 Total Request</b>	<b>101</b>	<b>101</b>	<b>11,308</b>
Total Change 2010 to 2011	-	-	127

The President’s Budget requests \$11.3 million for Other International Programs. This is an increase of \$127 thousand over the FY 2010 Enacted Budget. The request includes:

- increase of \$41 thousand for FY 2010 pay annualization
- increase of \$86 thousand for 2011 pay raise

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of International Affairs (INA) administers several international programs that support the U.S. Government’s objectives in anti-terrorism, border security, non-proliferation and customs and immigration laws. CBP’s international programs serve as the conduit for CBP’s participation in international forums such as the World Customs Organization (WCO), and in regional bodies such as the Asia-Pacific Economic Cooperation (APEC) forum. These programs provide the platform for the negotiation of agreements, memoranda of understanding and letters of intent. CBP’s key objectives for its international programs are:

- Develop, promote, and implement CBP’s international strategy;
- Negotiate international agreements and other instruments for CBP;
- Advance CBP’s international policy initiatives in international forums; and
- Develop and maintain strategic international relationships

INA is also responsible for coordinating and supporting foreign initiatives, programs, and activities within CBP. INA strives to extend U.S. borders by implementing programs and initiatives that promote anti-terrorism, global border security, non-proliferation, export controls, immigration, capacity building, and facilitating legitimate trade. INA focuses

on international cooperation and strengthening multi- and bi-lateral relationships to achieve international agreements and joint efforts that both facilitate and secure legitimate trade and travel. INA promotes expansion of the World Customs Organization (WCO) Security and Facilitation in Global Environment (SAFE) Framework of Standards by providing targeted countries with training and advisory support through programs such as Capacity Building and Export Control and Border Security (EXBS).

Additionally, INA identifies, develops, implements, and coordinates specialized training and developmental assistance programs for foreign customs and other law enforcement officials and organizations. INA provides in-country advisory support for broad-based customs reform and modernization and ensures CBP is represented at overseas posts and influencing policy throughout the world.

FY 2009 accomplishments include:

- Identified and pursued opportunities for cooperation with foreign governments and international organizations on issues such as the Mutual Recognition of customs-trade programs and “single window” data systems for international trade and customs information;
- Increased awareness of the Electronic System of Travel Authorization (ESTA) and other CBP initiatives and programs by facilitating and participating in international conferences and meetings; and
- Arranged the signing of a Letter of Intent between the Secretary of DHS and Mexico’s Minister of Finance.

FY 2010 goals include:

- Pursuing, maintaining and establishing international partnerships to share best practices, exchange information, and promote the facilitation of secure travel and trade and support implementation of the WCO SAFE Framework;
- Implement initiatives in support of an international immigration strategy to identify and interdict high risk travelers; and
- Continue to provide leadership in the Mexico Interagency Team, which coordinates and oversees U.S. government technical assistance activities in Mexico; and

FY 2011 goals include:

- Identify international arenas in which CBP should raise its level of engagement to promote CBP’s objectives;
- Promote CBP’s strategies for post-event security (e.g., Business Resumption/Trade Recovery initiatives); and
- Strengthen relationships with DHS components, Other Government Agencies (OGAs), and non-government stakeholders with regard to international initiatives.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and expenses:  
C-TPAT  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: C-TPAT**

Total Change 2010 to 2011	-	-	(11,476)

The President’s Budget requests \$51.1 million for C-TPAT. This is a decrease of \$11.5 million from the FY 2010 Enacted Budget. The request includes:

- decrease of \$12.000 million in program changes for C-TPAT, which will result in reduced contractor support. As C-TPAT moves into a maintenance mode, less contractors are needed.
- increase of \$169 thousand for FY 2010 pay annualization
- increase of \$355 thousand for FY 2011 pay raise

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This PPA supports the Office of Field Operations Strategic Plan goal to ensure the efficient flow of legitimate trade and travel across the United States borders. This program, in compliance with the requirements of the Safe Port Act, reviews and certifies security profiles within 90 days of submission and conducts validations within one year of certification and revalidations within three years of the initial validations for supply chain participants.

The C-TPAT program is CBP’s premier trade security program. The purpose of C-TPAT is to partner with the trade community for the purpose of securing the U.S. and international supply chains from possible intrusion by terrorist organizations. C-TPAT requires the trade community participant to document and validate their supply chain security procedures in relation to existing C-TPAT criteria or guidelines as applicable. C-TPAT company participants develop an internal validation process to ensure the

existence of security measures documented in their Supply Chain Security Profile and in any supplemental information provided to CBP. As a part of the C-TPAT process, C-TPAT Supply Chain Security Specialists (SCSS) and the C-TPAT participants jointly conduct a validation of the company's supply chain security procedures. The validation process is essential to verify the company's commitment to C-TPAT.

C-TPAT's Supply Chain Security Specialists conduct C-TPAT validations, identify supply chain security vulnerabilities, and work to monitor company initiatives that address those vulnerabilities. Validations conducted by Supply Chain Security Specialists serve to determine the accuracy and effectiveness of companies' security profiles as applied to their foreign and domestic supply chains.

To better secure and facilitate the flow of goods into the United States, CBP will continue to ensure that existing and new C-TPAT partners fulfill their commitments by verifying that agreed upon security measures have been implemented. CBP will also continue to work with C-TPAT partners to further finalize minimum applicable supply chain security criteria and security best practices. C-TPAT teams travel around the globe to visit partners, their vendors, and vendors' plants to validate that supply chain security meets C-TPAT minimum security criteria. They also ensure that best practices and procedures used are reliable, accurate, effective, and meet the agreed upon security standards. CBP will continue to provide tools and create incentives for the private sector to join C-TPAT, which is a prerequisite for the Free and Secure Trade (FAST) program and other CBP expedited processing programs.

FY 2009 accomplishments include:

- Complied with the requirements of the Safe Port Act, such as reviewing and certifying security profiles within 90 days of submission and conducting validations within one year of certification and revalidations within three years of the initial validation;
- Continued to expand and strengthen the C-TPAT program and ensure that certified member companies are securing their goods moving across the international supply chain to the United States;
- Completed an additional mutual recognition arrangement with Japan; and
- Created a new enrollment sector for Third Party Logistics Providers (3PL) involved in the international movement of cargo and began accepting and processing applications for companies eligible to participate in the program under this new sector.

FY 2010 goals include:

- Maintaining 90 percent or higher compliance rates for C-TPAT members in terms of the ratio of suspensions/removals to overall number of certified/validated partners;
- Completing an additional mutual recognition arrangement with a foreign Customs counterpart;
- Implementing an international strategy that will focus on encouraging the formation of industry partnership programs overseas; and

- Creating a more robust information collection and analytical process to improve information sharing.

FY 2011 goals include:

- Establishing an evaluation branch to effectively assess the program's internal policies and procedures, which will ensure C-TPAT members are improving the security of their supply chains in accordance with the security criteria;
- Expanding the analytical capabilities of the program as resources permit to identify trends and specific high risk areas, which need to be validated;
- Conducting revisits of validated companies to physically confirm that all security deficiencies that were previously identified have been rectified, as resources permit;
- Completing an additional mutual recognition arrangement with a foreign Customs counterpart; and
- Addressing narcotics breaches involving C-TPAT members along the southwest border by implementing new strategies such as focused outreach sessions to strengthen supply chains originating in Mexico.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and expenses:  
Trusted Traveler Programs (TTP)  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Trusted Traveler Programs (TTP)**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	<b>11,220</b>
<b>2010 Enacted</b>	-	-	<b>11,274</b>
2011 Adjustments-to-Base	-	-	(387)
<b>2011 Current Services</b>	-	-	<b>10,887</b>
<b>2011 Total Request</b>	-	-	<b>10,887</b>
Total Change 2010 to 2011	-	-	(387)

CBP requests \$10.9 million for Trusted Traveler Program (TTP). This request includes a decrease of \$387 thousand for management efficiencies implemented through WHTI technology.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This PPA supports the Office of Field Operations Strategic Plan goal to ensure the efficient flow of legitimate trade and travel across the United States borders.

**Trusted Traveler Programs (TTPs)**

Since the terrorist attacks of September 11th, 2001, CBP has placed great emphasis on developing and expanding TTP for passengers and commercial truck drivers at the land borders with Canada and Mexico and developing similar programs for international air passengers. TTP helps to identify low-risk, vetted travelers by the voluntary submission of an application and subsequent vetting using automated name and fingerprint based checks of law enforcement databases, fingerprint/name checks, and an interview with a uniformed officer. The programs continued to expand, and membership increased by 18% in FY 2009 for a total of 667,000 members. Currently, CBP TTP has four programs – NEXUS, Secure Electronic Network for Travelers Rapid Inspection (SENTRI), Free and Secure Trade (FAST), and Global Entry.

**NEXUS Highway and Air**

NEXUS is a joint US/Canada enrollment program at the Northern Border land ports of entry and all Canadian preclearance ports that identifies low risk travelers through a

complete biographic check, an interview with a CBP officer, and a fingerprint check. Once an applicant is identified as low-risk they are enrolled in the NEXUS program and given a Radio Frequency Identification (RFID) enabled card that is specific to the traveler. The RFID-enabled card allows the traveler to use specific primary lane(s) at the land border port of entry that are reserved for NEXUS enrollee use. At the Canadian preclearance airports, passengers use kiosks instead of dedicated lanes, and CBP uses iris scans to identify low risk travelers rather than RFID-enabled cards. At the time of enrollment, travelers qualify for trusted traveler status in all modes of travel, e.g. air, sea, and land. The introduction of WHTI lane technology will provide local managers with the flexibility to add and subtract dedicated lanes to fit traffic demand. In 2009, CBP had approximately 350,000 NEXUS members. This is 37,000 more members than previously predicted. In FY 2010, CBP projects to have 460,000 members in the NEXUS program.

#### **Secure Electronic Network for Traveler's Rapid Inspection (SENTRI)**

SENTRI is an enrollment program at the Southern Border land ports of entry that is similar to NEXUS except the program is run by CBP exclusively and vehicle information is also vetted through law enforcement databases and is searched prior to enrollment. SENTRI is only a land border program. The SENTRI program is located at nine Southern Border locations - Nogales, Arizona (1); Calexico (1) Otay Mesa (1) and San Ysidro (1), California; and Brownsville (1), Hidalgo (1), Laredo (1) and El Paso (2), Texas. The future WHTI lane expansions will have NEXUS and SENTRI RFID capabilities. In FY 2009, CBP has 203,000 SENTRI members, a slight increase over previous projections, and in FY 2010, projects to have 235,000 members in this program.

#### **Free and Secure Trade (FAST)**

FAST is the cargo equivalent of the SENTRI and NEXUS facilitative programs in the passenger environment. Through FAST, importers, commercial carriers, truck drivers, and manufacturers who enroll in the program and meet agreed upon security criteria, including participation in the Customs-Trade Partnership Against Terrorism program, are entitled to expedited clearance at the port of entry. Using electronic data transmission and transponder technology, CBP expedites clearance of approved trade participants. The FAST program fosters more secure supply chains and enables CBP to focus security efforts and inspections where they are needed most – high-risk commerce. In FY 2009, CBP has 93,000 FAST members and plans to have 100,000 members in this program in FY 2010.

#### **Global Entry (GE)**

GE is a program operated by CBP to allow for the expedited clearance of pre-approved low-risk air travelers into the United States. Through the use of automated kiosks placed in the Federal Inspection Services (FIS) area of each identified airport, a vetted, enrolled traveler is able to conduct the Passport Control Inspection without having to see a CBP officer. This program is of great benefit especially for those frequent travelers who travel internationally.

Currently, GE is available at Atlanta, Boston, Dallas/Ft. Worth, Dulles, Chicago, Detroit, Ft. Lauderdale, Honolulu, Houston, Las Vegas, Los Angeles, Miami, Newark, Chicago, New York (JFK), Orlando, Philadelphia, Sanford (FL), San Juan, San Francisco, and Seattle. Since April 2009, CBP has operated a joint pilot with the Government of the Netherlands that allows qualified U.S. citizens to join Privium, the Dutch equivalent to GE, and allow Dutch citizens to join GE. Participants in this pilot must pass each nation's security vetting requirements. CBP had 21,833 members in FY 2009, a higher amount than previously projected. CBP projects 40,000 program members in FY 2010. CBP is submitting a separate Fee Congressional Justification in FY 2011.

### **Global Enrollment System (GES)**

CBP has developed GES for all CBP TTP to be operational on the CBP national network. GES has integrated the independent CBP enrollment and validation processes into a single solution, and provides a more efficient platform to share data and perform real-time watch list and lookout checks.

GES also reduces the redundancy of maintaining several application processes, and allows for a quicker and more accurate applications process. CBP has developed a single online, paperless application process to support the GES and will allow a traveler to apply to multiple programs online. The on-line application Global On-Line Enrollment System (GOES) supports all Trusted Traveler program applications.

### **Adjustments to Base**

#### Trusted Traveler Program Non-RFID Stickers

CBP will begin purchasing a non- Radio Frequency Identification (RFID) sticker to save approximately \$387,000 in lieu of using the current Radio Frequency Identification (RFID) technology sticker for Secure Electronic Network. The current RFID sticker is no longer required because the Western Hemisphere Travel Initiative (WHTI) Vehicle Primary Client (VPC) reads license plates and compares with data in Global Enrollment System (GES) in lieu of the windshield stickers.

FY 2009 accomplishments include:

- Distributed over 600,000 upgraded trusted traveler cards with a minimum of problems. This effort included new artwork design, latest security features, novel manufacturing techniques, and remote user activation;
- Launched Global Entry at 17 additional locations. This involved drafting a Federal Register Notice, issuing policy guidance, training CBP staff, meeting with airports/airlines to discuss installation locations, and working with OIT on the procurement and deployments. This also met an important Congressional deadline to complete the expansion in FY 2009;
- Worked with the Office of Regulations and Rulings and Counsel on drafting the Notice of Proposed Rule Making (NPRM) to establish regulations making Global Entry a permanent program. The NPRM has been approved by DHS and submitted to the Office of Management and Budget;
- Added two new FAST enrollment centers in Skagway and Alcan, Alaska; and

- Installed RFID readers for FAST GEN 2 cards at Otay Mesa, Calexico, Tecate, Port Huron, Peace Bridge, and Lewiston.

FY 2010 goals include:

- Fully integrating FAST and the Automated Commercial Environment (ACE);
- Implementing bi-lateral international air trusted traveler programs with additional countries;
- Increasing the number of kiosks that can process Global Entry members;
- Ensuring Global Entry perform ESTA clearances where appropriate; and
- Expanding bi-lateral agreements with foreign governments to allow reciprocal expedited travel for pre-qualified low-risk travelers.

FY 2011 goals include:

- Implementing bi-lateral international air trusted traveler programs with additional countries;
- Increasing membership in Trusted Traveler memberships;
- Achieving unified fees for all Trusted Traveler programs; and
- Introducing a secondary biometric check for both identification and exit control.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and expenses:  
Inspection and Detection Technology  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Inspection and Detection Technology**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	<b>137,446</b>
<b>2010 Enacted</b>	-	-	<b>153,563</b>
2011 Adjustments-to-Base	-	-	2,000
<b>2011 Current Services</b>	-	-	<b>155,563</b>
2011 Program Change	-	-	(410)
<b>2011 Total Request</b>	-	-	<b>155,153</b>
Total Change 2010 to 2011	-	-	1,590

The President’s Budget requests \$155.2 million for Inspection and Detection Technology. This is an increase of \$1.6 million over the FY 2010 Enacted Budget. The request includes:

- increase of \$12.000 million for the annualization of NII equipment purchased with ARRA funds
- decrease of \$10.000 million for non-recurring costs related to NII equipment at locations along the southwest border
- decrease of \$410 thousand in program changes for eliminating the explosive detector dogs program.

**CURRENT SERVICES PROGRAM DESCRIPTION**

This PPA supports the Office of Field Operations Strategic Plan goal to secure our Nation’s borders to protect America from entry of dangerous people and goods and prevent unlawful trade and travel.

CBP’s reliance on Non-Intrusive Inspection (NII) technology to secure our borders has become more and more critical. In conjunction with CBP’s many other initiatives (24-Hour and Trade Act rules, Automated Targeting System (ATS), Container Security Initiative (CSI), Customs-Trade Partnership Against Terrorism (C-TPAT) etc.), NII is part of a multi-layered approach which allows CBP to work smarter and faster in recognizing potential terrorist threats and other contraband. These complementary layers enhance security and protect our nation.

CBP has long recognized that an adversary can defeat any single system or device. For this reason, CBP cannot rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood that a nuclear or radiological weapon, weapons grade material, illegal aliens or other contraband being smuggled across the United States borders will be detected. NII technologies are viewed as force multipliers that enable CBP officers to screen or examine a larger portion of the stream of commercial traffic while maintaining the flow of legitimate trade, cargo, and travelers.

Since 9/11, NII technology has been the cornerstone of the CBP multi-layered enforcement strategy. Technologies currently deployed to our nation's land, sea, and air ports of entry include large-scale X-ray and gamma-ray imaging systems, as well as a variety of portable and handheld technologies, including radiation detection technology.

This PPA provides funds for Operations and Maintenance (O&M) of: (a) the 230 large scale NII systems, (b) 5,816 small scale NII units, 1,515 Radiation Isotope Identifier Devices (RIIDs), and 19,365 Personal Radiation Detectors (PRDs) and, (c) 1,351 Radiation Portal Monitors (RPM).

The (O&M) funds requested will ensure that deployed NII technologies meet the expected operational requirements of CBP as well as the requirements surrounding the Federal Information Systems Management Act (FISMA; P.L. 107-347). Additionally, these funds will ensure mandated security and vendor upgrades are installed while providing CBP with the means to dispose of obsolete NII systems as mandated by federal regulations. Lastly, these funds will provide maintenance support at approximately 600 locations throughout the U.S. and its territories.

FY 2009 accomplishments include:

- Tested and deployed 28 remaining new (additional) and replacement large-scale NII systems purchased in FY 2007;
- Purchased, tested, and deployed approximately 96 baggage X-ray units, 20 tool trucks, 20 X-ray vans, 150 busters, 200 laser range finders, and 200 fiberscopes to replace outdated technologies; and
- Continued operating and maintaining NII technologies at 327 U.S. ports of entry, all 16 of the U.S. mail facilities that process international mail, and all 75 of the international airports; and
- Deployed 224 additional Radiation Portal Monitors (RPM) nationwide.

FY 2010 goals include:

- Continuing the test and evaluation (T&E) efforts for assessing and analyzing new technology to determine its suitability for use in day-to-day CBP operations. This level of T&E has provided CBP with specific data to support their acquisition decisions and sustain any third party inquiries. CBP also recognizes the need to increase the rigor of the testing process to evaluate new and emerging technologies;

- Continuing to conduct thorough testing and evaluation in accordance with ANSI 42.46-2008 of all NII Commercial systems that are acquired before they are accepted and deployed for CBP operations. CBP has been conducting this level of testing on all NII systems to ensure that the vendor's product conforms to contractual requirements;
- Continuing to develop strategies and radiation detection systems for General Aviation;
- Purchasing 4 new large scale NII systems; and deploying 6 large scale systems purchased in FY 2007; 3 high energy replacement systems and 24 low energy systems purchased in FY 2009;
- Developing a rail scanning strategy by the end of FY 2010; and
- Utilizing Explosive Detector Dog resources from TSA, State and local agencies.

FY 2011 goals include:

- Continuing the test and evaluation (T&E) efforts for assessing and analyzing new technology to determine its suitability for use in day-to-day CBP operations. This level of T&E has provided CBP with specific data to support their acquisition decisions and sustain any third party inquiries;
- Continuing to conduct thorough testing and evaluation in accordance with ANSI 42.46-2008 of all NII Commercial systems that are acquired before they are accepted and deployed for CBP operations. CBP has been conducting this level of testing on all NII systems to ensure that the vendor's product conforms to contractual requirements;
- Deploying 3 high energy replacement systems, 5 additional high energy systems for new/enhanced ports, 2 low energy portal systems for the northern border, 2 low energy mobile systems for commercial airports, and 1 high energy rail system purchased in FY09;
- Continuing to work toward 100 percent scanning for radiation of all sea cargo containers at designated POEs by the end of CY 2012 and 100 percent scanning for radiation of all air cargo at designated airports by the end of CY 2015; and
- Continuing to utilize Explosive Detector Dog resources from TSA, state and local agencies.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and expenses:  
Systems for Targeting  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Systems for Targeting**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>8</b>	<b>8</b>	<b>32,507</b>
<b>2010 Enacted</b>	<b>8</b>	<b>8</b>	<b>32,560</b>

<b>2011 Current Services</b>	<b>8</b>	<b>8</b>	<b>32,565</b>
<b>2011 Total Request</b>	<b>8</b>	<b>8</b>	<b>32,565</b>
Total Change 2010 to 2011	-	-	5

The President’s Budget requests \$32.6 million for Systems for Targeting. This is an increase of \$5 thousand above the FY 2010 Enacted Budget. The request includes:

- increase of \$2 thousand for FY 2010 pay annualization
- increase of \$3 thousand for FY 2011 pay raise

**CURRENT SERVICES PROGRAM DESCRIPTION:**

At the core of CBP’s ability to achieve its critical border security objectives and maintain the flow of lawful commerce is the ability to identify high-risk travelers and goods for inspection while allowing law-abiding travelers and commerce to move without unnecessary delay. Legislation and regulatory action, such as the Trade Act of 2002 (P.L. 107-210), the 24-hour rule, the Aviation and Transportation Security Act of 2001 (P.L. 107-71), the Enhanced Border Security and Visa Entry Reform Act of 2002 (P.L. 107-173), the Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 109-458), and the SAFE Port Act (P.L. 109-347), have made it mandatory to provide advance information about conveyances, travelers and goods arriving in the United States. CBP uses computer technology and rule-based software to analyze the data provided on conveyances, travelers, and shipments arriving in the United States. CBP applies its targeting methods against the data to determine which conveyances, travelers or shipments need to be segregated for a closer look and possible intensive inspection.

The main platform used to perform this analysis is the Automated Targeting System (ATS). ATS allows CBP officers including those stationed overseas, to cross-check the passenger, crew and cargo manifests against subject lookouts, including those contained

in the Terrorist Identities Datamart Environment (TIDE), TECS, and the National Crime Information Center (NCIC), using databases such as the Automated Commercial System (ACS), the Advance Passenger Information System (APIS), the Border Crossing Information System (BCIS), the Non-Immigrant Information System (NIIS), the Arrival and Departure Information System (ADIS) that provide advance notice of conveyances, travelers and goods arriving at U.S. ports of entry. The ATS Passenger module also uses Passenger Name Record (PNR) data from commercial airlines on arriving and departing passengers to identify high-risk travelers and to facilitate persons posing little to no risk.

Currently, ATS consists of six modules that focus on exports, imports, passengers and crews, private vehicles crossing at land borders, and import trends over time. The six modules are: ATS-Inbound, which serves as the primary decision support tool for inbound targeting of cargo; ATS-Outbound, which is used for targeting outbound cargo and assists in identifying exports which pose a high risk of containing goods requiring specific export licenses, narcotics, or other contraband; ATS-Passenger (ATS-P), which is used at all U.S. airports and seaports receiving international flights and voyages to evaluate passengers and crewmembers prior to arrival or departure; ATS-Land (ATS-L) provides analysis and rules-based risk assessment of private passenger vehicles crossing the nation's borders; ATS-Trend Analysis and Analytical Selectivity improves CBP's ability to examine, locate, and target for action violators of United States laws, treaties, quotas, and policies regarding international trade; and ATS-International provides foreign custom authorities with automated cargo targeting capabilities and provides a systematic medium for exchanging best practices and developing and testing targeting concepts.

Future targeting system enhancements will focus on increasing data collection from internal and external sources and improving geographical unit interface display capabilities.

FY 2009 accomplishments included:

- Developed new targeting methodologies and efforts in support of the Western Hemisphere Travel Initiative;
- Developed targeting rules in ATS-P to counter threats posed by drug trafficking organizations (DTOs) and currency smugglers; and
- Implemented Vessel Summary page and Stow Plan viewer in ATS-N Ocean mode and displaying Security Filing Data and Container Status Messages; and

FY 2010 goals include:

- Deploy the Intelligence & Operations Framework System (IOFS) at all CBP targeting units in the field locations and expand the encounter management, analytical and reporting capabilities of the IOFS;
- Develop ATS-L targeting specific rules to interdict terrorist suspects, weapons of mass effect, contraband, human smuggling, agriculture, and currency violations; and
- Analyze and develop new maritime weight sets and rules in ATS-N via National Security weight set that will target ISF data transmissions and methodology.

FY 2011 goals include:

- Incorporate all local and national trade criteria into ATS User Defined Rule functionality;
- Support the development, maintenance, and enhancement of ATS targeting for vehicles and risk assessments for passengers in the land environment; and
- Deploy the IOFS to all intelligence coordination teams (ICT) at field locations as well as U.S. Embassies overseas.

<b>2011 Current Services</b>	<b>218</b>	<b>218</b>	<b>36,465</b>
<b>2011 Total Request</b>	<b>218</b>	<b>218</b>	<b>36,465</b>
Total Change 2010 to 2011	65	76	10,110

The President’s Budget requests \$36.5 million for the NTC. This is an increase of 10.1 million from the FY 2010 Enacted Budget. The request includes:

- increase of \$9.447 million to realign 65 positions and the related salaries and benefits costs from the Inspections, Trade, and Travel Facilitation at the POEs PPA to the National Targeting Center PPA
- increase of \$394 thousand for prior pay annualization (analyze and employ intelligence & information at the NTC)
- increase of \$87 thousand for FY 2010 pay annualization
- increase of \$182 thousand for FY 2011 pay raise.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This PPA supports the Office of Field Operations Strategic Plan goal to ensure the legitimate trade and travel across the United States borders.

The NTC consists of two separate centers, one to address passenger screening, the National Targeting Center – Passenger (NTC-P), and the other address cargo screening, the National Targeting Center – Cargo (NTC-C). They provide around-the-clock tactical targeting and analytical research support for CBP antiterrorism efforts. CBP officers, border patrol agents, and import specialists, who are experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments primarily, staff both NTC facilities. In addition to using existing databases and information to identify potential targets, the NTC also develops tactical targets from raw intelligence in support of CBP’s mission to detect and prevent terrorists and terrorist

weapons from entering the United States. While the vast majority of travelers and goods are legitimate, both NTC facilities are designed to carefully examine the small minority of shipments and/or travelers that may be connected to terrorism or other transnational crimes such as money laundering or narcotics smuggling.

The NTC-P continues to use Terrorist Identities Datamart Environment (TIDE) in researching all possible TECS lookouts encountered at POEs. Through the TIDE/Visa Revocation Unit (TVR), the NTC-P consults with both the Terrorist Screening Center (TSC) and the Terrorist Screening Operations Unit (TSOU) in determining identity and a course of action, thus providing guidance to the POE.

The NTC-C provides cargo research and analysis on positive TIDE passengers, responds to research requests from CBP domestic and Container Security Initiative (CSI) ports, and conducts cargo research for NTC-P and NTC-C liaisons. Additionally, the NTC-C conducts national cargo sweeps in the Automated Targeting System, supports Intelligence Driven Special Operations (IDSOs), and conducts Weapons of Mass Destruction/Weapons of Mass Effect (WMD/WME), agro-terrorism, and bio-terrorism rules development. The NTC-C will continue to provide support to CBP's CSI and the Secure Freight Initiative (SFI). The NTC-C has dedicated staff to support and coordinate the International Container Security (ICS) component of SFI. The program utilizes remote technology to facilitate near real time scanning and monitoring of cargo/containers destined to the United States from select foreign ports. Targeting decisions are made based on container images, radiation alarm profiles, and cargo descriptions provided from overseas.

## **Adjustments to Base**

### National Targeting Center Realignment

The Office of Field Operations will realign 65 positions and \$9.447 million for salaries and benefits costs from the Inspections, Trade, and Travel Facilitation at the Ports of Entry PPA to the National Targeting Center (NTC) PPA. This realignment will correct an error in how the positions were originally annualized.

Through the FY 2007 War Supplemental, OFO received 227 positions for targeting and screening US bound cargo. Of the 227 positions, 162 CBPOs were for increased enforcement and inspection activities at high-priority northern border ports of entry. 65 CBPOs were assigned to the NTC-Cargo to screen and target inbound cargo. When the 65 NTC positions were annualized in FY 2009, they were incorrectly annualized in the Inspections at POEs PPA, along with the 162 other CBPOs, instead of in the NTC PPA. The 65 NTC positions should have been annualized in the NTC PPA. The annualization costs for the new NTC positions were calculated prior to CBPOs receiving enhanced retirement benefits. The original annualized funding level for the 65 positions does not capture their true full costs. Given these factors, OFO continues to experience a shortfall in the NTC PPA. The funding realignment corrects the error and has no programmatic impact.

FY 2009 accomplishments include:

- Enhanced NTC-P's automated systems in an effort to identify passengers with possible ties to terrorist activities;
- Expanded the NTC-C support and coordination of the ICS component of SFI by increasing the number of ports in which NTC-C utilizes remote location technology to facilitate near real time scanning and monitoring of cargo/containers destined for the U. S. from selected foreign ports; and
- Enhanced research efficiency of positive TIDE matches to identify possible links between terrorist related passenger events.

FY 2010 goals include:

- Continuing to foster relationships with the intelligence community both internal and external to DHS to ensure current trends and threats are addressed by NTC-P targeting;
- NTC-P's TVR Unit will continue to maintain a close working relationship with members of the TIDE community including the National Counter Terrorism Center (NCTC), the TSC, and the TSOU in an effort to prevent terrorist threats to our national security. In addition, the TIDE Unit in a joint effort with the TIDE community will review policies and procedures to streamline the WATCHLIST vetting process;
- Continuing to expand outbound targeting of shipments of weapons and bulk cash destined and in-transit within the western hemisphere; and
- Continuing to expand in transit cargo with ICE Counter-Proliferations Investigations for weapons-related and dual-use items regardless of destination.

FY 2011 goals include:

- Developing a national Counter Terrorism Response Team (CTR) in an effort to standardize policies, coordination, and reporting requirements for field officers;
- Developing a CTR field position designated solely for processing individuals of interest to national security and establish a mandatory national CTR training program;
- Integrating the use of biometric data within United States Visitor and Immigrant Indicator Technology (US-VISIT) and the Integrated Automated Fingerprint Identification System (IAFIS), for vetting against the WATCHLIST and providing verification in other databases such as the State Department's Consular Consolidated Database;
- Performing targeting for the Port of Karachi;
- Identifying drug trends that transnational criminal organizations use in all modes, and conducting tactical post seizure analysis to target those involved and use this information to disseminate intelligence products and improve targeting; and

- Continuing to expand the emphasis on targeting of shipments of narcotics and precursor chemicals transiting the western hemisphere.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and expenses:  
Training at the Ports of Entry  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Training at the Ports of Entry**

<b>2011 Total Request</b>	-	-	<b>21,628</b>
Total Change 2010 to 2011	-	-	(3,150)

The President’s Budget requests \$21.6 million for At the Ports Training. There is a decrease of \$3.2 million from the FY 2010 Enacted Budget. The request includes:

- decrease of \$2.650 million in program changes for service contracts to support the training facilities
- decrease of \$500 thousand for management efficiencies (efficiency savings in travel, supplies and equipment)

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Training and Development (OTD), through the National Training Plan (NTP), provides CBP with a comprehensive and accurate needs assessment of all standard, core, and recurring training. The NTP provides CBP’s headquarters and field managers an opportunity to advance the Secure Border Initiative by bringing the workforce together to train. The NTP also emphasizes CBP’s anti-terrorism mission as a strategic imperative, providing a robust menu of anti-terrorism related courses of every level of sophistication and covering a wide range of specialization. The NTP will continue to modernize and streamline the training and development infrastructure and ensure support of pivotal training such as firearms and tactical training, leadership, and advanced training programs. CBP will continue to utilize the NTP to successfully plan and execute training resources to effectively meet the ever expanding and evolving mission.

### **CBP Field Operations Academy**

The CBP Field Operations Academy is located at the Federal Law Enforcement Training Center in Glynco, Georgia. The Academy is responsible for the development and delivery of basic, mid, and advanced-level training programs for mission critical occupations (e.g., CBP officers, Agriculture Specialists, Import Specialists, and Entry Specialists). This training represents key components of the goal to combat terrorism, improve border security, improve inspection and control, and facilitate trade.

### **OTD/Use of Force Policy (UFPD)**

The OTD/Use of Force Policy Division is responsible for the development, articulation and implementation of CBP use of force policy and related equipment. The OTD/UFPD seeks to research, evaluate, and procure the best possible equipment while providing comprehensive asset and resource management for tactical equipment and body armor. The OTD/UFPD has developed appropriate controls, standards, training, best practices and policies in order to enhance the safety and performance of approximately 18,000 Customs and Border Protection (CBP) officers.

### **OTD/Leadership and Organization Development (OTD/LODD)**

The OTD/Leadership and Organization Development Division designs, develops, delivers, and evaluates training and development activities for CBP supervisors, managers, and executives. The OTD/LODD provides core and advanced leadership/supervisory/management courses to meet organization, occupation, and individual needs.

### **OTD/Border Enforcement Training (OTD/BETD)**

The OTD/Border Enforcement Training Division primarily engages in anticipating, identifying, initiating, and analyzing occupation specific training needs of CBP's over 40,000 uniformed workforce, and producing customer focused training portfolios that facilitate border enforcement readiness.

The fight against terrorism remains the top priority for CBP. In support of that primary mission, OTD will continue to oversee the anti-terrorism training program ensuring employee preparedness and skill development to confront the threat of terrorist incidents or infiltration along our borders.

### **OTD/Workforce Development (OTD/WFDD)**

The OTD/Workforce Development Division partners with CBP offices to identify, articulate, and address the training needs of CBP's non-uniformed personnel. WFDD works to provide a comprehensive suite of training programs in support of CBP customer office priorities through the development and maintenance of detailed customer profiles including information on training projects and funding, active courses, and workforce demographics.

Focus areas of training include trade training (training for Import Specialists, Entry Specialists, Drawback Specialists, Regulatory Auditors, International Trade Specialists, other revenue positions, and attorneys), information technology, intelligence and

operations coordination training, training for international assignments, cross-occupational training, project/program management certification, and CBP Tuition Assistance Program (TAP).

### **OTD/HQ Other Training**

OTD/Headquarters sponsors other basic and specialized training programs for various occupations within CBP. These training programs, including Canine Office of Field Operations training, are funded through the NTP but are often coordinated with other NTP Training Leads, CBP organizations, and program managers for scheduling, facilities, instructors, etc.

### **Adjustments to the Base**

#### **Operation Reduction – Travel, Supplies, Equipment**

The Office of Training and Development (OTD) will reduce funding by \$500 thousand primarily in the area of basic training. The number of personnel attending basic training is projected to decrease compared to previous years which will generate a savings in the area of TDY for instructors and supplies needed for students entering the academy.

The President's Budget requests \$3.5 billion for this activity. This is an increase of \$2.9 million over the FY 2010 Enacted Budget. The request includes:

- increase of \$128.588 million to adjust salaries to fund increasing Border Patrol agents to a journeyman level of GS-12.
- increase of \$14.996 million in pay annualization
- increase of \$31.490 million for FY 2011 pay raise
- increase of \$43.049 million for annualization of FY 2009 Border Patrol staffing initiative (\$42.934) and for annualization of FY 2010 Combating Southbound Firearms and Currency Smuggling initiative (\$115 thousand)
- increase of \$10.000 million for additional Intelligence Analysts staffing
- decrease of \$74.400 million in funding for the contractor workforce supporting the Office of Information and Technology
- decrease for transfer of \$70.000 million to address payroll shortfalls for CBPOs.
- decrease of \$19.478 million to non-recur FY 2010 Congressional add-on for Border Patrol agents
- decrease of \$15.523 million for Border Patrol staffing reductions
- decrease of \$15.000 million in premium pay, which reflects a proposed change to management of premium pay policy on working shifts
- decrease of \$12.000 million for management efficiencies in the areas of travel, supplies and equipment
- decrease of \$10.000 million to non-recur the FY 2010 Congressional add-on for NII equipment

- decrease of \$8.000 million in the National Training Program to reflect current training schedules
- decrease of \$800 thousand to non-recur the FY 2010 Congressional add-on for solar-powered batteries.

### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The National Border Patrol Strategy articulates one clear, strategic mission for the Border Patrol: To establish and maintain control of the border of the U.S. between the ports of entry. The strategic goal includes interdicting illegal aliens, smugglers, narcotics and other contraband entering the U.S. Since the terrorist attacks of September 11, 2001, preventing terrorists and terrorist weapons from entering the U.S. was added to the Border Patrol's strategic goal.

The Border Patrol developed five objectives to support the national strategy. Each objective further identifies the intended mission outcome and focus of the Border Patrol's operational planning and execution. The objectives are: (1) Establish a substantial probability of apprehending terrorists and their weapons as they attempt to enter illegally between the ports of entry; (2) Deter illegal entries through improved enforcement; (3) Detect, apprehend, and deter smugglers of humans, drugs and other contraband; (4) Leverage Smart Border Technology to multiply the effect of enforcement personnel; and (5) Reduce crime in border communities and consequently improve the quality of life and economic vitality of targeted areas.

The National Border Patrol Strategy ensures that the Border Patrol deploys the appropriate mix of resources and employs appropriate tactics with the end state objective of consistently being able to detect, identify and classify, respond, and resolve all illegal entries.

The Border Patrol's national strategy is based on deploying the appropriate mix of resources – personnel, tactical infrastructure and technology – to gain control of the border. The Border Patrol reached a staffing level of 20,163 Border Patrol agents in 2009. The Border Patrol will hire an additional 44 Border Patrol agents in FY 2010 as part of the Secretary's initiative to combat southbound firearms and currency smuggling. In addition to the 44 agents, another 100 new agents will be deployed to the southern border to enhance southwest border operations. CBP also plans to continue to add to its inventory of permanent tactical infrastructure and technology deployments on the border in FY 2010. In addition, CBP will continue to deploy resources developed through CBP's *SBI*net program. The new resources will include technology solutions, such as sensors and cameras, to increase the Border Patrol's ability to detect illegal entries and to provide greater situational awareness. In addition, *SBI*net will provide new tactical infrastructure, such as fences and vehicle barriers, to further enhance the Border Patrol's ability to secure the border.

The Border Patrol establishes and maintains effective partnerships, formal and informal, with other federal, state and local law enforcement agencies, as well as other federal

agencies that have an interest in the border regions. Further, the Border Patrol maintains international partnerships to enhance border security primarily with agencies of the governments of Mexico and Canada. A number of these partnerships are described below.

### **Operation Arizona Denial**

Operation Arizona Denial, 2008, known previously as Arizona Border Control Initiative, was developed in response to the continued high level of illicit cross-border and ancillary illegal activity in Arizona. Since the late 1990s, illicit cross border activity through the Border Patrol's Tucson Sector represented almost half of all that seen throughout the entire nation. The chaotic environment created by this high level of activity negatively impacted border security.

The goal of Operation Arizona Denial, 2008, in direct support of the Border Patrol National Strategy, was to incrementally bring operational control to the border within the Tucson Sector area of operations. The general strategy consisted of a four faceted approach:

- Operational Coordination
- Intelligence Fusion
- Breaking the Smuggling Cycle
- Focused Enhanced Enforcement Operations

A core component of Operation Arizona Denial, 2008, was a number of removal programs designed both to separate aliens from smugglers as well as provide a consequence to illegal entry. These programs included the Arizona Denial Prosecution Initiative, Alien Transfer Exit Program, Mexican Interior Repatriation Program, and Operation Against Smugglers Initiative on Safety and Security.

A principal concept of Operation Arizona Denial, 2008, was the focus of resources in prioritized geographical areas. Tucson Sector field managers prioritized border areas of focus as well as major routes of egress. The prioritized areas were based on vulnerabilities identified throughout the sector and a detailed, documented methodology was used to determine priority order.

The initial area of focus was the Priority 1 area, 40 miles of border around Sasabe. On July 27, 2008, operations expanded 91 miles west to the Priority 2 area.

Operation Arizona Denial, 2009, has built on the success of the 2008 operation but it also incorporated several new initiatives and programs. These included:

- *Peace Officer Cross-Designation for Selected Agents* – The Sector has coordinated with the Cochise County Sheriff to cross-designate a number of Sector Intelligence Agents and canine handlers as state Peace Officers. This allowed the agents to pursue state prosecution in cases where Federal prosecution

is not possible. Peace Officer designation to canine handlers allow them to issue civil citations to those they identify during the course of their duties possessing small amounts of illegal drugs.

- *Expanded the Alien Transfer Exit Program* – The ATEP was expanded to increase daily removals in Arizona and included removals through Ports of Entry in the Marfa Sector of Texas.
- *Co-Location with ICE* – ICE co-located Special Agents with the Sector Disrupt Unit and the Disrupt Unit at the Nogales Station. These assignments, as well as the current assignment of BPAs to ICE BEST teams ensured a proper transition from interdiction to investigation and facilitated an improved level of information sharing and operational coordination with ICE.
- *Expanded Quick Court* – Quick Court was expanded from 30 to 100 daily removal proceedings.
- *Expand the Arizona Denial Prosecution Initiative* – The ADPI was expanded to 100 daily prosecutions.
- *Coordination with Yuma Sector* – The Yuma Sector was included in 2009 to support Operation Arizona Denial, 2009, through:
  - Increased staffing of Camp Grip to allow agents based from that location to flex east to Tucson Sector Zones 1 and 2.
  - Operation of the SR-85 traffic checkpoint.
  - Flexing of Air Operations support east to allow support to Tucson Sector Zones 1 and 2.
- *Use of Wackenhut to Provide Hospital Security* – Wackenhut Contract Transportation Services received an increase in resources during FY 2009. In addition to more efficient transportation of detainees, this allowed use of Wackenhut resources for hospital guard duties, relieving as many as a dozen agents per day of this requirement.
- *Coordination with Joint Counter Narcotics Task Force (JCNTF)* – National Guard JCNTF has recently expressed an increased willingness to conduct support missions. These will likely include air support, FLIR or scope missions, and LP/OP support.

## **Operation Streamline**

Operation Streamline is a zero-tolerance, prosecution-based deterrence initiative that attaches a penalty to the act of illegally entering the U.S. Operation Streamline was envisioned to address three components: arrest, prosecution, and removal. Under the concept of the Operation, the sector's Chief Patrol Agent designates a specific geographic

area as a zero-tolerance zone and focuses his resources to ensure a high probability of apprehension and criminal prosecution.

With the cooperation of the U.S. Attorney's Office and the U.S. Marshals Service, virtually all undocumented aliens apprehended within the designated geographic location are criminally prosecuted for their illegal entry under 8 USC 1325. The deterrent effect of this program has had pronounced results on the number of aliens attempting illegal entry/re-entry. By reducing the volume of illegal entries, the Border Patrol has greater flexibility to focus resources on apprehending terrorists, terrorist weapons, and smugglers of humans, drugs, and other contraband illegally entering the U.S.

Operation Streamline has proven to be beneficial and is a key component to achieving significant ground and effective control of the border. Operation Streamline has been showcased to both federal and state Senators and Representatives, along with the public, as a best practice and effective utilization of existing resources.

### **Special Operations Group (SOG)**

SOG is under the direction of the Border Patrol's Special Operations Command (SOC), and has two component units: Border Patrol Tactical Unit (BORTAC) and the Border Patrol Search, Trauma and Rescue Unit (BORSTAR) – each responsible for a different skill set, but often working in close coordination with each other to adequately address an all threats mission profile, both nationally and internationally.

In 2007, the Border Patrol established, and continues to build upon, the SOG Headquarters element with full deployment capability on Biggs Army Airfield (AAF), El Paso, Texas. Agents assigned to this office are routinely deployed throughout the U.S. in support of the Border Patrol National Strategy and are at the ready to address Emergency Support Functions (ESFs) for national level incidents, as outlined in the National Response Framework. The SOG facility has classrooms, a new rappel tower, an obstacle course, and a live fire multi-building training complex located at McGregor Range, New Mexico.

BORTAC remains CBP's premier tactical response team. BORTAC is summoned for difficult and high-risk missions. BORTAC trained its active personnel on their Mission Essential Tasks List and hosted numerous advanced skills training sessions. BORTAC has preformed joint SOG missions and worked in conjunction with multiple local, state and federal law enforcement agencies in both training and operational environments. In the future, BORTAC will continue to train its members to improve its readiness for response to threats of national security.

BORSTAR is comprised of Border Patrol agents with specialized and advanced skills and training for the tactical medical and search and rescue environments. In addition to proficiently conducting the primary duties of a Border Patrol agent, BORSTAR agents have additional training in search and rescue, emergency medical treatment, rope rescue, water rescue, incident command management, communications, and tactical medical

interventions. BORSTAR provides rapid response to search, rescue, and medical response to acts of terrorism, potential terrorism, and natural disasters throughout the U.S. These duties are often in conjunction with local, county, state, and federal entities.

OBP/SOG, in coordination with the Office of Intelligence and Operations Coordination, has established Law Enforcement Technical Collection Centers (LETCs) to improve intelligence collection and dissemination capabilities among the 20 sectors that comprise the field headquarters element. By establishing best practices, the methodologies used to collect, analyze, and disseminate actionable intelligence will be streamlined and standardized.

The possibility of widespread bio-terrorism and other pandemic perils remains a paramount concern for CBP and other federal, state, and municipal entities. Border Patrol is a major participant/facilitator in the CBP Continuity of Operations Plan (COOP) and will continue to build on established partnerships in an effort to rapidly respond and mitigate the impact of a catastrophic incident, be it an act of terrorism or a natural disaster.

### **Traffic Checkpoints**

The Border Patrol is tasked with securing the Nation's borders between the ports of entry using a multi-tiered enforcement strategy. A major component of this strategy includes the strategic placement of checkpoints in tactical locations that contributes significantly to gaining effective control of the Nation's borders.

Traffic checkpoints are critical components of the U.S. Border Patrol's enforcement-in-depth border security strategy. This strategy was developed to maximize resources and to increase the certainty of arrest of anyone posing a threat to the United States. Border Patrol checkpoints are strategically located on routes of egress leading away from the border, thus, greatly increasing the Border Patrol's detection and interdiction capabilities.

A complete border security model that includes enforcement-in-depth creates an environment that denies, degrades and disrupts the criminal elements ability to exploit the infrastructure needed to conduct operations.

The primary function of checkpoints is to deny routes of egress to the criminal element and to disrupt and degrade their ability to operate. The checkpoints' impact forces the criminal element to take risks that would otherwise not exist, thus raising their cost of doing business.

In locations where checkpoint operations have been established, criminal organizations cannot engage in illegal activity in the border areas and then freely egress to their destination. They must utilize other tactics, such as using secondary staging areas and circumvention routes, which disrupt and degrade their operations and give the Border Patrol additional time and distance to detect, deter, and interdict them.

The Interstate 19 (I-19) corridor is the major route of egress from the Nogales, Arizona area. As a result, the majority of illegal cross border activity that takes place in the Nogales area seeks to make its way to the corridor in an effort to exit the border area. The strategic value of a permanent checkpoint on I-19 cannot be overstated. A continuous checkpoint operation on Interstate 19 (I-19) creates an enforcement profile that denies, degrades, disrupts, and deters the criminal element from utilizing I-19 as a route of egress. This inability to exploit I-19 as a route of egress forces the criminal element to utilize secondary, less traveled routes of egress. These routes are often remote and infrequently traveled making them more identifiable to law enforcement agents thus further disrupting and degrading the criminal element's ability to operate.

The overall effect of enforcement-in-depth, to include checkpoints, deters illegal activity and reduces cross-border traffic and the crime associated with it. Sustained checkpoint operations have shown to not only reduce crime in adjacent communities, but contribute significantly to an overall reduction in cross-border criminal activity in the areas south of the checkpoints.

Safe, efficient, and effective enforcement operations along the border and routes of egress, to include effective checkpoint operations, are essential to a complete enforcement strategy which will lead to increased border security and an improved quality of life in border communities.

### **Border Patrol International Liaison Unit (ILU)**

The ILU creates and maintains positive working relationships and to foster alliances with foreign counterparts in order to increase border security. The alliances established will maintain open communications and mutual respect with and between foreign and domestic law enforcement counterparts. The ILU builds partnerships and enhances border security awareness in support of the National Border Patrol Strategy.

The ILU also paved the way to programs like the Operation Against Smugglers Initiative on Safety and Security (OASISS). In March 2005, the U.S. and Mexico agreed to establish a bilateral, standardized prosecution program. The product of that agreement was OASISS. The OASISS program was developed to address the increasing amount of alien smugglers across the southwest border. The program allows for alien smugglers apprehended in the U.S. to be prosecuted by the Government of Mexico. This program is very effective in areas along the southwest border that are affected by guidelines that make it difficult to prosecute certain alien smuggling cases. OASISS has proven to be an invaluable tool to the Border Patrol. It also rewards the efforts of the agents by giving them another tool to be able to put criminals behind bars.

The liaison efforts with Mexican authorities that have occurred and continue to take place along the southwest border have essentially bridged the communication gap between the U.S. and Mexico. This is an extraordinary accomplishment when one considers the economic vitality of the region and the political sensitivities between the two countries. In light of the newly established policy and standard operating procedures guiding the

ILU program, it is expected that the program will flourish as it strengthens relationships with foreign governments.

### **Forward Operating Bases (FOBs)**

Use of FOBs began to address remote crossing points that have historically been very difficult for agents to patrol due to the vast distances and the time involved to access these areas. FOBs have proven to be very beneficial to the detection and deterrence of illegal entries in the areas in which they have been deployed and are now utilized in areas wherever the Border Patrol has a need to extend its reach.

The use of FOBs directly supports the Border Patrol's mission of gaining, maintaining, and expanding effective control of the Nation's borders. As the Border Patrol continues to gain control of the border, illegal migration activities and smuggler tactics shift in an attempt to identify and exploit vulnerabilities in border security measures, particularly in the more remote areas of the border. Strategically placed FOBs afford a distinct advantage in that they provide a cost effective, secure staging facility that allows agents to be forward deployed in close proximity to the border – thereby improving Border Patrol's capability to rapidly respond to and counter these shifts in illicit cross-border traffic.

### **Surge Operations**

The Border Patrol authorizes the implementation of surge operations to maintain or gain effective control of the border through improved enforcement. The Border Patrol's strategy for implementing surge operations across the southwest border is based on threats, risks, vulnerabilities, and the resources of partner agencies. These operations increase the probability of apprehending terrorists who are attempting to illegally enter the U.S. between the ports of entry, as well as their weapons. They also assist in the reduction of crime in border communities. Surge operations are implemented to proactively address intelligence, seasonal migration, and smuggling trends.

### **Border Patrol National Native American Program**

The mission of the Border Patrol National Native American Program is to facilitate new partnerships, improve relationships, and increase trust throughout the Native American Indian tribes that have a nexus to the U.S. border. The program champions partnerships between tribal law enforcement, various Native American organizations, and the Border Patrol to support the national strategy. The Border Patrol National Native American Program is operational in twelve of the Border Patrol sectors. The program acts as a conduit between the Border Patrol and tribal, local, state and federal law enforcement agencies, as well as tribal councils located along both the Southwest and northern borders.

The program was designed to support ongoing enforcement operations within the respective agencies, while enhancing the liaison between them. As the relationship

solidified, contact and responses to illicit activity along the borders has increased, allowing for joint law enforcement support for both Border Patrol and Tribal Law enforcement. Routine communication and liaison between some sectors and Tribal Council officials has led to enhancing the security and safety of the agents who are working in dangerous areas along the border. Through the Border Patrol National Native American Program, information-sharing efforts have allowed the Border Patrol sectors to conduct All-Terrain Vehicle training, search and rescue training, advanced four-wheel-drive training, and vehicle stops.

The Border Patrol National Native American Program is working to standardize policies and procedures and is proactively developing performance measures for the program to evaluate and measure the effectiveness of its initiatives.

### **Borderlands Management Task Forces (BMTF)**

These task forces were created to facilitate an intergovernmental forum for cooperative problem-solving on common issues related to the international border. The primary mission is to address border security, human safety, and natural and cultural resource protection through shared resources, information, communication, problem-solving, standardization, and training. The goals of the BMTF are the following:

- Create a positive, intergovernmental working relationship and foster support among agencies charged with border responsibilities;
- Create mutually beneficial solutions to resource management issues within the border area;
- Provide expertise, experience and information to address common border issues; and
- Educate our agencies and interested parties about border issues and recommendations for the implementation of possible solutions.

An integral part of the BMTF is the participation of the Sector Public Lands Liaison Agents (PLLA).

The PLLA works to foster better communication, increase the interagency understanding of respective mission objectives and priorities, and serve as a central point of contact within the Border Patrol to facilitate the successful resolution of environmental issues at the local level.

### **Adjustments to Base**

#### Journeyman Increase

CBP requests an increase of \$128.6 million to fund the increased salary and benefit requirements associated with the implementation of raising the journeyman grade level for the frontline CBP officers (CBPOs), Border Patrol agents (BPAs) and CBP agricultural specialists (CBPAS') within CBP from the GS-11 level to the GS-12 level.

The Office of Personnel Management has issued a revised GS-1800 Inspections, Investigation, Enforcement and Compliance Standard. The new standard covers the Customs and Border Protection officer series as well as the Border Patrol agent series and provides factor level descriptions and illustrations, which represent current information as to the occupations within its coverage, based upon the audits and interviews that the OPM position classifiers learned from on-site visits to field locations, as well as input from the agencies human resources and operational staffs.

CBP has also conducted a rigorous review of the nature of the work performed by the core of the frontline border patrol agents and CBP officers. The work responsibilities and expectations have continuously increased since CBP became the principal border control agency when DHS was created. The outcomes and consequences of front-line work have never been greater.

CBPOs, BPAs and CBPAS' daily work is exemplar of individuals working at the GS-12 level; and the agency needs to provide these dedicated employees with the appropriate level of compensation.

The work performed by most frontline officers, agents, and specialists equates to the GS-12 level based on the pending job duties description that we are now finalizing. The factors of their work that merit the increase include:

- Job complexity in the wide variety of laws that are enforced;
- The broadening of mission and responsibilities to include focus on terrorist activities;
- Shift to an intelligence-driven organization that makes work more proactive in nature;
- Deployment of sophisticated technology and infrastructure;
- Increased violence at the borders; and
- Increased work with other law enforcement agencies, and enforcement-related activities.

CBP is required to effect the change in pay shortly after the duties of the position are established. CBP will soon be finalizing the new position descriptions that outline the duties and responsibilities of these critical frontline positions.

#### Realignment to support maintaining CBPO FTE levels

CBP proposes to realign funds in FY 2011 between PPAs within the Salaries & Expenses Appropriation. CBP proposes realigning \$70 million from the Border Security and Control to address the Office of Field Operations projected payroll shortfall in FY 2011. Without these funds CBP would have to reduce a significant number of CBPO FTE, increasing wait times and diminishing the security at the ports of entry. The realignment of funds from the Border Security and Control Between POEs PPA into the Inspections, Trade, and Travel Facilitation at the POEs PPA will not impact CBP's ability to achieve

its current mission and goals. Based on CBP's current analysis and protections, Border Patrol will be able to maintain its current population of Border Patrol agents.

### Office of Border Patrol Efficiency

The Office of Border Patrol will reduce its budget by \$12.0 million in the following areas:

- Employee travel and the number of Temporary On-Duty (TDY) personnel detailed to headquarters to support current programs,
- Government travel by headquarters personnel to attend meetings and conferences held by stakeholders,
- Supplies, and
- Equipment

### **Conclusion**

In FY 2011, the Border Patrol will continue to further its mission by using a variety of programs and initiatives to support strategic objectives. The Border Patrol will continue to plan for an appropriate mix of additional resources to achieve its strategic goal. A major future objective of the Border Patrol is to ensure that its workforce is highly mobile so that it can rapidly adjust to changes in the border security environment. The Border Patrol will continue to reevaluate its existing programs and planned initiatives as the threats and vulnerabilities to border security change in response to newly deployed border enforcement resources.

The Border Patrol is committed to addressing southbound land border enforcement efforts to combat the smuggling of firearms and currency to Mexico. The accomplishments of this commitment are being reported in the Inspections, Travel and Trade Facilitation at the Ports PPA by the Office of Field Operations which has the lead for reporting on southbound operations.

FY 2009 accomplishments include:

- Hired an additional 2,200 agents; and
- Brought an additional 182 miles of border under control, for a total of 939 miles of border under control.

FY 2010 goals include:

- Maintaining effective control of 939 miles of border;
- Implementing the new journeyman policy;
- Hiring 2,000 Border Patrol agents to backfill attrition;
- Hiring 44 new Border Patrol agents for southbound operations to combat firearms and currency smuggling, which will increase the agent staffing level to 20,163; and
- Adding 367 Border Patrol agents to the northern border in order to achieve the goal of 2,212 agent strength by the end of FY 2010.

FY 2011 goals include:

- Maintaining effective control of 939 miles of border; and
- Maintaining a force of 20,000 Border Patrol agents.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and expenses:  
Training Between the Ports of Entry  
Program Performance Justification**  
(Dollars in Thousands)

Total Change 2010 to 2011	(50)	(25)	(14,542)

The President’s Budget requests \$37.2 million for Between the Ports Training. This is a decrease of \$14.5 million from the FY 2010 Enacted Budget. The request includes:

- increase of \$124 thousand for FY 2010 pay annualization
- increase of \$262 thousand for FY 2011 pay raise
- decrease of \$13.378 million in program changes for the national training plan (\$9.559 million), staffing reductions (\$2.819 million), and service contracts (\$1.000 million)
- decrease of \$1.550 million in management efficiency for travel, supplies and equipment

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Training and Development (OTD), through the National Training Plan (NTP), provides CBP’s national leadership with a comprehensive and accurate needs assessment of all standard, core, and recurring training. The NTP provides CBP’s headquarters and field managers an opportunity to advance the Secure Border Initiative by bringing the workforce together to train. The NTP emphasizes CBP’s anti-terrorism mission as a strategic imperative, providing a robust menu of anti-terrorism related courses of every level of sophistication and covering a wide range of specialization. The NTP will continue to modernize and streamline the training and development infrastructure and ensure support of pivotal training, such as firearms and tactical training, leadership, and advanced training programs. CBP will continue to utilize the

NTP to successfully plan and execute training resources to effectively meet the ever expanding and evolving mission.

### **Border Patrol Academy**

The Border Patrol Academy identifies and provides core operational training for Border Patrol agents to accomplish their mission of protecting the boundaries of the U.S. The Border Patrol Academy is currently located in Artesia, New Mexico where they conduct basic training. Advanced-level training and instructor training is held at Charleston and is also conducted in field locations.

### **OTD/Use of Force Policy Division (UFPD)**

OTD/UFPD is responsible for the development, articulation, and implementation of CBP use of force policy and the related equipment. OTD/UFPD seeks to research, evaluate and procure the best possible equipment while providing comprehensive asset and resource management for tactical equipment and body armor. OTD/UFPD has developed appropriate controls, standards, training, best practices and policies in order to enhance the safety and performance of over 20,000 Border Patrol agents.

### **OTD/Leadership and Organization Development Division (OTD/LODD)**

OTD/LODD designs, develops, delivers, and evaluates training and development activities for CBP supervisors, managers, and executives. OTD/LODD provides core and advanced leadership/supervisory/management courses to meet organization, occupation, and individual needs.

### **OTD/Border Enforcement Training Division (OTD/BETD)**

OTD/BETD primarily engages in anticipating, identifying, initiating, and analyzing occupation specific training needs of CBP's over 40,000 uniformed workforce, and producing customer focused training portfolios that facilitate border enforcement readiness.

The fight against terrorism remains the top priority for CBP. In support of that primary mission, OTD will continue to oversee the anti-terrorism training program ensuring employee preparedness and skill development to confront the threat of terrorist incidents or infiltration along the Nation's borders.

### **Border Patrol Agent Training**

Training courses focus on technical, intelligence, or specialized training for Border Patrol agents. Training courses include: Border Patrol Technical Course for Supervisors; Border Patrol Agent-In-Charge (PAIC) Intel Course; Emergency Medical Technician Certification; BORSTAR training; and Canine training.

### **Other Training**

OTD/Headquarters sponsors other basic and specialized training programs for various occupations offered CBP-wide. These training programs are funded through the NTP but are often coordinated with other NTP Training Leads, CBP organizations, and program managers for scheduling, facilities, instructors, etc.

## **Adjustments to the Base**

### Efficiency Reduction – Travel, Supplies, Equipment

The Office of Training and Development (OTD) will reduce funding by \$1.6 million primarily in the area of basic training. The number of personnel attending basic training is projected to decrease as compared to previous years which will generate a savings in the area of TDY for instructors and supplies needed for students entering the academy.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and expenses:  
Air and Marine Operations, Personnel Compensation and Benefits  
Program Performance Justification

The President's Budget requests \$298.3 million for this activity. This is a decrease of \$11.3 million from FY 2010 enacted. This request includes:

- decrease of \$18.182 million in not-sustaining the FY 2010 program enhancement which will reduce Air and Marine staffing by 120 positions
- increase of \$3.007 million in prior year annualization for the national strategic plan
- increase of \$2.625 million in FY 2011 pay raise
- increase of \$1.251 million in annualization of FY 2010 pay raise

**CURRENT SERVICES PROGRAM DESCRIPTION:**

CBP Office of Air and Marine (OAM) secures the borders against terrorists, acts of terrorism, drug smuggling, and other illegal activity by operating air and marine branches at strategic locations along the borders. Multi-mission aircraft with advanced sensors and communications equipment provide powerful interdiction and mobility capabilities directly in support of detecting, identifying and interdicting suspect conveyances, and apprehending suspect terrorists and smugglers. CBP OAM maximizes the capabilities of air and marine assets through a cohesive joint air operations model for centralized command and control and a responsive and integrated control system for decentralized execution.

CBP OAM partners with numerous stakeholders in performing its missions throughout the continental United States and the Western Hemisphere. This includes domestic operations

at the borders, source, transit and arrival zone operations, interior law enforcement support, and support to other agencies. In fulfilling the priority mission of CBP to protect the borders, CBP OAM's three main geographical mission Areas of Responsibilities (AOR) are: the southwest, northern, and southeast/coastal borders (to include Caribbean corridors).

FY 2009 accomplishments include:

- Hiring 115 marine interdiction agents to fully staff the 11 new marine branches funded in FY 2008 to minimize gaps in maritime law enforcement coverage and better secure our waterways and borders; and
- To support the Border Patrol agents on ground hiring, 24 additional Unmanned Aircraft Systems (UAS) pilots for the Sierra Vista branch and Grand Forks, ND branch to expand CBP's UAS capabilities across the southwest and northern border regions.

FY 2010 goals include:

- Hiring an additional 24 positions which will be used to primarily provide key headquarters leadership with special skill and technical support to programs and field locations as CBP expands support for border security operations.

FY 2011 goals include:

- Continue to ensure that key headquarters leadership has the skill and technical staffing support for its programs and field offices.

SAVE Award - Establish Pre-employment Fitness Standards

Funding Decrease: \$1.5 million

FTE Decrease: 0

Description: CBP has established pre-employment fitness standards for its officers and agents that help to secure the nation's borders at and between the ports of entry. This proposal will examine potential benefits that would result from adding a 1.5 mile run to the Pre-employment Fitness Test. Specifically, it may help avoid costs associated with those new employees who fail the run at the end of the 12 week academy course. The estimated funding decrease or cost avoidance is based on student travel, FLETC tuition, shipping, supplies, and equipment from FY 2010. Any projected savings from this initiative will help CBP operate within the FY 2011 President's budget request and does not represent additional savings beyond the requested level.

Program Decrease							-	-	(4,400)
<b>Total Request</b>	-	-	-	-	-	-	-	-	-

Description of Item

The President’s Budget requests a reduction of \$4.4 million to terminate the lease space at U.S. Postal Service (USPS) buildings to ensure our highest priority capabilities are fully funded to achieve our core missions.

Justification

CBP currently leases space in USPS or General Services Administration (GSA) contracted facilities to enable Customs and Border Protection officers (CBPOs) to inspect and make entry on international mail shipments. The reduction may have an impact on mail inspections and entries since multiple cargo locations will now be used to process mail, but CBP expects this impact can be significantly mitigated by shifting to an automated versus manual cargo clearance environment that will also facilitate more effective targeting.

The USPS is continually making changes to its processing locations - most recently in Los Angeles, Seattle, Dallas, and Chicago – and CBP is expected to relocate as the USPS dictates. CBP expects the leases could be terminated by the end of FY 2010, which would mean an immediate costs savings of the leases and the equipment located within the facilities.

CBP operations could be pushed upstream in line with other cargo operations and it would help achieve advanced electronic manifesting and create a more level playing field with express and air cargo operators as provided for in the Postal Accountability and

Enhancement Act (PAEA; P.L. 109-435). The PAEA instructs CBP to offer similar customs treatment for so-called “competitive” mail shipments services and underscores the provisions of the Trade Act of 2002 (P.L. 107-210) regarding the submission of advanced electronic information on all goods arriving in the United States. The express and cargo industry are clamoring for equivalent customs treatment and ironically, the USPS has approached CBP about offering cargo or express treatment for some of its services. CBP’s presence in USPS buildings, at CBP expense, gives the impression of favorable treatment to postal shipments.

Operationally, the main impact will be that mail arriving via commercial flights will need to be cleared at various locations at CBP ports versus at a single USPS facility. If the level of information available electronically in advance on individual items increases as expected, the impact will be minimal. (CBP can already access basic manifest data at the receptacle level provided by carriers.) There will be a transition period of physical handling and entry processing, radiation screening, outbound physical examinations, etc. which will need to be identified and resolved prior to moving. The USPS may be impacted from a mail receipt, accounting, and service standpoint but, as mentioned, mail is moving into an electronic environment and the USPS is seeking alternative arrangements for customs processing.

Below is a general five step plan that describes the most practical and logical steps involved in terminating the lease spaces at the USPS facilities or GSA contracted facilities. This will help achieve several CBP goals for international mail, such as pushing processing upstream in line with other cargo operations, requiring advance electronic manifesting (to meet Trade Act requirements), utilizing personnel more efficiently, and precluding dependence on USPS operational decisions. It will also create a more level playing field with express and air cargo operators as required by PAEA.

### **Step 1**

After internal meetings, CBP will meet with USPS counterparts to inform them of CBP’s intentions for all international mail facilities locations; invite them to participate in the process; and ask them for a list of all air and sea carriers that transport mail to and from the United States. This could also be an opportunity to emphasize the need for advance electronic data for incoming international mail shipments.

### **Step 2**

Detailed plans for vacating USPS facilities or GSA contracted facilities, including timelines, will be developed for each location. These plans will provide specifics about how the transition will take place and will address issues such as: lease terminations, physical move plans, redeployment of personnel and equipment, new process flows, enforcement plans, seizure processing, entry, other agency coordination, radiation and non-intrusive inspection screening, etc.

### **Step 3**

CBP will consult with internal offices concerning the workability of the site specific plans for vacating to either adopt the plans as proposed or with modifications.

#### **Step 4**

A meeting will be convened with the International Air Transport Association and Air Transport Association to discuss the impact of this initiative on air carrier operations, and with the World Shipping Council to discuss the impact on sea carriers. A meeting may also be needed with the Military Postal Service Administration regarding Army Post Office/Fleet Post Office mail.

#### **Step 5**

Depending on the aforementioned plans, local circumstances and USPS actions, CBP will begin severing leases and moving operations. It is expected that this will be complete by the end of FY 2010.

#### Impact on Performance (Relationship of Decrease to Strategic Goals)

DHS Goal 1: Preventing Terrorism and Enhancing Security

CBP Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

CBP Objective 1.2: Using a risk-based approach, deploy and employ the most effective inspection and scanning technology available at designated land border ports, airports, seaports, permanent Border Patrol traffic checkpoints, and international areas in which CBP operates to detect and prevent the entry of hazardous materials, goods, and instruments of terror into the United States.

CBP Strategic Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders.

All affected field offices will be surveyed and be instructed to prepare an operational plan for the USPS facilities or GSA contracted facilities within their area of responsibility. Mail will be processed along with regular air cargo (there is one office in New Jersey that receives some mail by sea) and, at a minimum, PRDs will be used to screen for radiation. ATS will be used to identify receptacles and – in coming years - individual packages for further examination and NII will be deployed if needed.

\* FLAP benefits are funded from the collection of COBRA fees. Funding freed up from the elimination of FLAP will be used to fund salary cost, decreasing the appropriated funding.

Description of Item

The President’s Budget requests a reduction of \$19.9 million in the Foreign Language Awards Program (FLAP) to ensure CBP’s highest priority capabilities are fully funded to achieve our core missions.

Justification

FLAP was established in 1985 to pay cash awards to U.S. Customs and Border Protection (CBP) officers and CBP agriculture specialists in the Office of Field Operations (OFO) who are proficient in, and utilize, a foreign language in the performance of their official duties. The funding reduction will be taken against the Inspections, Trade and Travel Facilitation at POEs PPA. FLAP funding is currently paid for through the COBRA User Fees.

CBP’s plan of action to suspend the FLAP program would begin with notifying the National Treasury Employees Union (NTEU) that CBP intends to suspend the FLAP program. A memorandum would then be issued notifying the affected workforce of our suspension of the FLAP program. Since the proficiency rating periods are split into the two six-month increments (October 1 – March 31 and April 1 – September 30) and employees are compensated based on the six-month increments for which they are certified, the elimination of FLAP would take effect April 1 due to the work already

having been performed. Lastly, the below testing companies would be notified to terminate the interagency agreements:

- Ordinate/Versant
- Foreign Service Institute
- Language Testing International
- Federal Bureau of Investigation

FLAP was originally implemented as an incentive for CBP officers and Agriculture Specialists to learn foreign languages to compliment duties at the ports of entry. However, since the initiation of FLAP there have been significant changes to benefits available to CBP officers and agriculture specialists. Most notably, these personnel now receive enhanced retirement benefits similar to other law enforcement officers. In addition, DHS is requesting that these officers become eligible for a journey level increase to address the heightened responsibility due to the post-9/11 increased scope and complexity of these core positions. Other CBP personnel (for example Border Patrol agents) have a language requirement for employment and do not receive special compensation. Section 5.4.1 of the FLAP directive indicates that all FLAP awards are subject to the availability of funds.

#### Impact on Performance (Relationship of Decrease to Strategic Goals)

DHS Strategic Goal: Preventing Terrorism and Enhancing Security  
Securing and Managing Our Borders

CBP Goal 1: Secure the Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

CBP Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of appropriate mix of infrastructure, technology and personnel.

All DHS/CBP Goals can be attained without the payment of FLAP awards. CBP's foreign language capabilities within its workforce will continue to be present and utilized with or without FLAP.

**Department of Homeland Security**

**Salaries and expenses:**  
**Inspections, Trade, and Travel Facilitation**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Intellectual Property Rights Enforcement  
PPA: Inspections, Trade, and Travel Facilitation  
Program Increase: Positions 0.0, FTE 0.0, Dollars \$25000.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	25,000
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>25,000</b>

The President’s Budget request \$25.0 million to begin implementation of CBP’s long-term strategy for improving Intellectual Property Rights (IPR) enforcement. The IPR enforcement strategy is an ambitious, ground-breaking plan which takes into account the changes in trade, technology, and IPR infringement that have occurred since many laws and regulations were written, and the resulting enforcement procedures put into place. Successful implementation of the strategy will require legal reform, technological changes, and process redesigns as well as cooperative efforts between CBP and all of its stakeholders. The requested resources will be allocated as follows:

Total FY 2011 Resources	<input type="checkbox"/> Human capital investment	\$ 14,100,000
	<input type="checkbox"/> Technology procurement	\$ 5,500,000
	<input type="checkbox"/> Travel/temporary duty assignments	\$ 3,100,000
	<input type="checkbox"/> Training	\$ 800,000
	<input type="checkbox"/> Administrative overhead	<u>\$ 1,500,000</u>
	<b>Total</b>	<b>\$ 25,000,000</b>

Justification

CBP envisions an effective IPR enforcement process in which legitimate cargo is released without delay, infringing goods are intercepted, violations are prevented, and violators are deterred or put out of business. CBP needs modernized laws, regulations, processes, and technologies to ensure compliance, facilitate trade, and enable CBP to respond to violations as quickly and effectively as possible. Partnerships between CBP,

the trade community, other federal agencies, and foreign governments, which would enhance the flow of information and support IPR enforcement and the facilitation of legitimate trade, are also necessary for an effective IPR enforcement process.

To create a more effective IPR enforcement process, CBP will work to remove or reduce the encumbrances that are detrimental to the effective enforcement. CBP has developed a multilayered strategy that takes into account the trade landscape and focuses work in three areas of the international trade process: pre-entry, entry, and post-entry.

**I. Pre-entry Strategy**

In the pre-entry environment, CBP’s IPR strategy seeks to build partnerships with the trade community that will provide advance information to improve targeting effectiveness and prevent the importation of goods that infringe on IPR. CBP’s objective is to increase the segment of trusted importers, allowing CBP to focus its targeting and enforcement efforts on known IPR violators and on less trusted imports for which it lacks advance information.

<p>I.1 Create IPR Component In Importer Self Assessment (ISA) Program</p>	<ul style="list-style-type: none"> <li>• Develop an IPR component in the Importer Self Assessment (ISA) program with input from the trade community, including certification requirements and program benefits</li> <li>• Open enrollment into the IPR component of ISA</li> <li>• Focus initial marketing of the program to significant non-rights holders who import goods at high risk for IPR infringement</li> </ul>
<p>I.2 Explore Development Of A Distribution Chain Management Program</p>	<ul style="list-style-type: none"> <li>• Seek input from stakeholders and explore possible approaches for implementing a distribution chain management protocol in which right holders provide information to CBP to enable CBP to determine whether shipments are legitimate without examining the goods</li> <li>• Assess options for implementing a distribution chain management protocol, including necessary technological, legal and operational changes and costs</li> </ul>

**II. Entry Strategy**

In the entry environment, CBP will continue to target, seize, and forfeit counterfeit and pirated goods, and enforce ITC exclusion orders, but will undertake a number of actions to improve its efforts. This includes improving the efficiency of targeting models; expanding training for enforcement personnel to better equip them to enforce IPR; improving infringement determination tools, and processes to expedite the release of legitimate goods and avoid the release of infringing goods; encouraging the trade community to assist enforcement by providing information on IPR violations that they discover; stopping counterfeit and pirated goods before they arrive at U.S. borders; and improving interdiction of goods that do reach U.S. borders through cooperation with other federal agencies and foreign governments.

<p>II.1 Improve The Efficiency Of Targeting Models</p>	<ul style="list-style-type: none"> <li>• Complete development of an enhanced predictive risk model targeting ocean shipments at high risk for IPR violations</li> <li>• Implement a pilot program at select seaports, and depending on the results, implement at all seaports</li> <li>• Evaluate and adjust ocean shipment risk model</li> <li>• Use ocean model as a basis for creation of additional IPR risk models for other modes of transportation</li> </ul>
<p>II.2 Expand Training For All Enforcement Personnel</p>	<ul style="list-style-type: none"> <li>• Develop a curriculum for a live instructor-led course for enforcement personnel and begin delivery to ports</li> <li>• Develop and deliver classroom and online training for post-entry IPR audit personnel</li> <li>• Increase information sharing capabilities between Headquarters and field locations on IPR issues</li> <li>• Explore the use of alternative delivery systems for IPR training for enforcement personnel</li> <li>• Define best practices for IPR enforcement and disseminate to all field locations</li> <li>• Seek input from rights holders to enhance product specific IPR training</li> </ul>
<p>II.3 Improve infringement determination tools and process</p>	<ul style="list-style-type: none"> <li>• Explore ways to enhance CBP’s ability to make infringement determinations, including possibly sharing additional information with rights holders</li> <li>• Initiate work with rights holders, authentication technology providers, and standards setting organizations to improve the tools and technology used in authentication of goods and encourage standardization</li> <li>• Implement or continue as necessary to explore options to enhance CBP’s ability to make infringement determinations</li> <li>• Continue to work with rights holders, authentication technology providers, and standards setting organizations to improve the efficiency of authentication tools and technology and encourage standardization</li> </ul>
<p>II.4 Encourage And Enable Importers And Other Non-Rights Holders To Assist CBP’s IPR Enforcement</p>	<ul style="list-style-type: none"> <li>• Complete evaluation of the Commercial Operations Advisory Committee (COAC) recommendation that CBP establish a program that would allow the trade community to voluntarily disclose information to CBP on IPR violations in a manner similar to the prior disclosure clause under 19 U.S.C. § 1592 for other violations</li> <li>• Implement a pilot program if appropriate based on the outcome of assessment of the legal and operational impact of the COAC’s recommendation</li> </ul>
<p>II.5 Stop</p>	<ul style="list-style-type: none"> <li>• Strengthen bilateral and multilateral engagement and</li> </ul>

<p>Counterfeit And Pirated Goods Before They Arrive At U.S. Borders, And Improve Interdiction Of Goods That Do Reach U.S. Borders</p>	<p>pursue cooperative efforts with foreign customs authorities, including:</p> <ul style="list-style-type: none"> <li>• sharing enforcement practices</li> <li>• exchanging information on IPR violations</li> <li>• conducting joint customs IPR enforcement operations</li> <li>• Pursue cooperative efforts with other Federal agencies, including: <ul style="list-style-type: none"> <li>• Assisting the United States Trade Representative (USTR) with negotiation of ACTA</li> <li>• assisting USTR with the annual Special 301 Report</li> <li>• providing IPR training for foreign officials</li> <li>• collaborating with the Intellectual Property Enforcement Coordinator (IPEC) and participating in interagency IPR working groups</li> </ul> </li> </ul>
---	---

### III. Post-entry Strategy

In the post-entry environment, CBP’s objectives are to strengthen the deterrent effect of fines and penalties by appropriately levying them and increasing collections, expanding IPR audits, increasing the effectiveness of audits in depriving counterfeiters and pirates of their illicit profits, and combating criminal counterfeiting and piracy by collaborating with ICE and supporting the National IPR Coordination Center (IPR Center).

<p>III.1 Strengthen the Deterrent Effect of Fines and Penalties</p>	<ul style="list-style-type: none"> <li>• Work with the Department of Justice (DOJ) to identify and implement ways to enhance the efficacy of IPR fines and penalties cases, including possibly detailing CBP attorney to U.S. attorney offices</li> <li>• Examine the appropriateness of assessments of fines and penalties to make them more effective, and implement changes</li> <li>• Provide additional guidance and oversight to ensure consistency and uniformity nationwide with respect to actions</li> </ul>
<p>III.2 Expand Post-entry Audits and Increase Their Effectiveness</p>	<ul style="list-style-type: none"> <li>• Increase from 20 to 30 the number of IPR audits focusing on repeat offenders and major importers with high potential for IPR violations</li> <li>• Explore changes to laws, regulations, or policies to:</li> <li>• give CBP clear authority to seize IPR infringing goods discovered during an audit</li> <li>• allow ICE agents to better assist CBP in enforcement and audits</li> <li>• allow CBP auditors to conduct more effective audits of known IPR violators</li> <li>• Pursue appropriate changes to increase the effectiveness of the IPR audit program</li> </ul>

<p>III.3 Combat Criminal Counterfeiting and Piracy</p>	<ul style="list-style-type: none"> <li>• Increase referrals of investigatory leads to ICE and to other agencies through participation in the IPR Center</li> <li>• Provide staffing to the IPR Center, including a deputy director, analyst, and uniformed officer</li> <li>• Commit additional resources for audit assistance in ICE investigations</li> </ul>
--	---

Impact on Performance (Relationship of Increase of Strategic Goals)

The additional \$25 million in funds to support CBP’s IPR enforcement efforts is aligned to CBP Strategic Goal 4: Facilitating Legitimate Trade and Travel; and Objective 4.4: Through the implementation of a multilayered 5-year strategy that takes into account the trade landscape and focuses work in three areas of the international trade process: pre-entry, entry, and post-entry.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and expenses:  
Inspections, Trade, and Travel Facilitation  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Decrease 1:** Not Sustaining FY 2010 Initiatives - API/PNR  
PPA: Inspections, Trade, and Travel Facilitation  
Program Decrease: Positions 0.0, FTE 0.0, Dollars \$-3000.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	3,000
Program Decrease							-	-	(3,000)
<b>Total Request</b>	-	-	<b>1,727</b>	-	-	<b>3,000</b>	-	-	-

Description of Item:

A reduction of \$3.0 million in enhancements to the Advance Passenger Information (API)/Passenger Name Record (PNR) system which were provided in FY 2010 will not be sustained in order to ensure our highest priority capabilities are fully funded to achieve our core missions.

Justification:

With the \$3 million reduction to API/PNR, CBP will focus its capabilities on the core missions of securing the border, and trade and travel facilitation. In order to maintain these capabilities at the highest possible level, CBP will reduce capacity on programs that do not provide acceptable returns on the investment or not focused explicitly on our primary responsibilities on the U.S. border. CBP remains interested in implementing a global strategy for the use of API/PNR through partnership with select foreign governments to enhance national security and facilitate legitimate travel. Within the current strained fiscal climate, CBP must focus on its primary mission to protect America's physical border from dangerous people and dangerous goods. The program was a part of DHS and CBP's in-depth layered defense approach to security that would extend our conceptual border and substantially reduce the risk of successful terrorism events impacting U.S. interests. CBP continues to identify, and track down suspected terrorists, potential threats to national security through the successful domestic APIS system.

Impact on Performance (Relationship of Decrease to Strategic Goals):

CBP objective 1.2 will be impacted because of the reduction to API/PNR which will reduce CBP's presence in international areas. However, CBP will continue to focus on its primary mission to collect and use data sets to track dangerous people and goods from entering within our borders through domestic APIS.

CBP objective 1.3 will be impacted because API/PNR allowed receipt of foreign government data in near real-time, allowing for timely analysis of high-risk travelers and data to be collected in an automated system to enable standardization for possible further dissemination to other government partners.

<b>Total Request</b>	<b>294</b>	<b>250</b>	<b>139,973</b>	<b>294</b>	<b>250</b>	<b>144,936</b>	<b>294</b>	<b>294</b>	<b>123,497</b>

Description of Item

The President's Budget requests a reduction of \$24.5 million in the Western Hemisphere Traveler Initiative (WHTI) Program to ensure CBP's highest priority capabilities are fully funded to achieve our core missions. The reduction will be achieved by eliminating one half of funds recurred in FY 2011 for new acquisitions in FY 2010 (\$10.5 million) and reducing FY 2011 base funding by \$14.0 million.

Justification

In FY 2011, the WHTI program will largely be a steady state investment, supporting approximately 500 inbound lanes with radio frequency identification (RFID) technology. The legislative mandate to implement WHTI was met in June 2009; work planned in the outyears goes beyond the legislative mandate.

Impact on Performance (Relationship of Decrease to Strategic Goals)

DHS Strategic Goal: Preventing Terrorism and Enhancing Security  
Securing and Managing Our Borders

CBP Goal 1: Secure the Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

CBP Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of appropriate mix of infrastructure, technology and personnel.

This reduction will have a moderate impact on the WHTI program's operation. Potential impacts and their corresponding reduction amounts are highlighted below:

- Vehicle Primary Client (VPC; -\$2.0 million): This reduction will cause VPC enhancements to be delayed and may result in decreased response times on data inquiries and analysis.
- Enterprise Data Management & Engineering / Enterprise Networks & Technology Support (ENTS/EDME; -\$4.2 million): Funding for the National Data Center and the Stennis backup site will be reduced. This reduction will impact customer response times at the Trusted Traveler Program (TTP) Help Desk. Support would be reduced by cutting available hours for assistance or removing live support by going to email support only.
- Enhanced Drivers Licenses (EDLs), Enhanced Tribal Cards (ETCs) & Passport Cards (-\$1.5 million): Oversight of State and Tribal EDL production methods and coordination with program partners and stakeholders may be affected.
- Global Enrollment System (GES) (-\$3.3 million): This reduction will decrease the personnel and operational hours in support of TTP enrollment centers, potentially affecting customer service.
- Deployed Technology Operations & Maintenance (-\$3 million): With recent equipment procurements, WHTI's O&M requirements have continued to increase, so deferring O&M will have an impact on WHTI operations. The reduction may result in LPR/RFID read rate performance being impaired. It will also delay routine lane equipment maintenance and may prevent CBP from making timely repairs to damaged lane infrastructure. CBP's ability to support the Central Image Archive for users including Internal Affairs, Data Integrity Monitors, the Intelligence Community, and Field Offices will be deferred or scaled back.
- FY 2010 Initiatives (-\$10.5 million): CBP will delay or eliminate program enhancements including Pedestrian Re-engineering, Land Border Model Port development, Outlying Area Reporting System, the Remote Port of Entry Project, Small Boats Program, and stacked booth infrastructure.

Description of Item

The President’s Budget requests a reduction of \$50.7 million in the Container Security Initiative (CSI) Program to ensure our highest priority capabilities are fully funded to achieve our core missions.

Justification

CBP’s capabilities are focused on the core missions of securing the border, and trade and travel facilitation. In order to maintain these capabilities at the highest possible level, CBP will reduce capacity on programs that do not provide acceptable returns on the investment and are not focused explicitly on our primary responsibilities on the U.S. border. While activities like CSI are supportive of activities at the border by adding additional layers in CBP’s layered approach to securing the border, they are not essential to CBP’s core missions, which can be accomplished at the border.

As the CSI program matures, CBP will shift from placing U.S. personnel overseas (part of the initial CSI operating protocols) to a more technological approach, relying on remote targeting from the National Targeting Center – Cargo and remote examinations and image analysis, and greater reciprocal examination relationships with host governments. As CSI activities transition to a more virtual environment, personnel and mission support resources stationed overseas will be relocated to U.S. domestic ports. This will allow the program to become more efficient and less costly.

Below is a general three step plan of action that describes the most practical and logical steps involved in moving to a more virtual environment for the CSI program.

### **Step 1**

Coordination with other U.S. Government Agencies – DHS and CBP would also need to notify other government entities e.g., mainly Department of Energy (DOE) and Immigration and Customs Enforcement (ICE), that most CBP personnel will be removed from their foreign assignments. CSI is an integral part of DOE Megaport program, with CSI personnel mitigating radiation alarms through CBP’s Laboratory and Science Services. Additionally, the Memorandum of Understanding (MOU) between ICE and CBP allows ICE to utilize the services of CBP personnel to provide research to further investigations in support of international terrorism. ICE overseas investigations and the 22 ICE agents currently assigned or scheduled to be deployed to foreign locations would be impacted if CSI funding is reduced. The notification process to DOE and ICE should begin as soon as a final decision is reached to begin this transition.

### **Step 2**

Coordination with Foreign Partners - Prior to transitioning to a more virtual CSI operation, DHS, CBP, and the Department of State (DOS) would need to engage the 32 countries in order to obtain their concurrence to perform examinations on behalf of CBP, since CBP personnel will no longer be present.

### **Step 3**

Virtual Operations and Staffing - Upon completion of Steps I and II, CSI will begin technological assessments with the CBP Office of Information technology to establish data transmissions systems and processes, which will allow the host government to submit NII images and radiation spectra to the NTC-C.

CBP anticipates that assessments and establishing communication protocols will take most of FY 2011 to accomplish. As the CSI program transitions to a more virtual operation through FY 2011 and FY 2012, the personnel and mission support resources associated with the CSI program will be relocated domestically and realigned to another PPA.

### Impact on Performance (Relationship of Decrease to Strategic Goals)

DHS Strategic Goal: Preventing Terrorism and Enhancing Security

CBP Goal 1: Secure the Nation’s borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

CBP Objective 1.2: Using a risk-based approach, deploy and employ the most effective inspection and scanning technology available at designated land border ports, airports, seaports, permanent Border Patrol traffic checkpoints, and international areas in which CBP operates to detect and prevent the entry of hazardous materials, goods, and instruments of terror into the United States.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and expenses:  
International Cargo Screening  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 1:** Secure Freight Initiative  
PPA: International Cargo Screening (Container Security Initiative)  
Program Decrease: Positions -8.0, FTE -4.0, Dollars \$-16579.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							17	17	19,866
Program Decrease							(8)	(4)	(16,579)
<b>Total Request</b>	<b>17</b>	<b>17</b>	<b>7,787</b>	<b>17</b>	<b>17</b>	<b>19,866</b>	<b>9</b>	<b>13</b>	<b>3,287</b>

Description of Item

The President’s Budget requests a reduction of \$16.6 million in the Secure Freight Initiative (SFI) Program to ensure our highest priority capabilities are fully funded to achieve our core missions.

Justification

Through partnerships with foreign governments, terminal operators, and carriers, SFI enhances DHS’s capability to assess the security of U.S.-bound maritime containers by scanning them for special nuclear and other radioactive materials before they are laden on vessels bound for the United States. An integrated scanning system, consisting of an Radiation Portal Monitor (RPM) provided by the U. S. Department of Energy (DOE) and non-intrusive inspection (NII) equipment provided by DHS, collects and aggregates container data. This data is analyzed by CBP officers to determine if the container should be referred to the host nation for secondary examination prior to lading.

CBP’s capabilities are focused on the core missions of securing the border and trade and travel facilitation. In order to maintain these capabilities at the highest possible level CBP will reduce capacity on programs that provide lower returns on the investment. The data provided by the SFI program is useful to CBP operations, but at the same time the operational costs of SFI are significant, as are the ongoing challenges facing SFI. These challenges include obtaining the necessary support and “buy in” of host governments and the industrial community, equipment downtime, operational issues such as port infrastructure constraints, and health and safety concerns regarding the operation of

imaging equipment. In light of the costs and challenges facing SFI, CBP will limit the program while testing new technology and working to find solutions to these complex challenges.

The Secure Freight Initiative will close three of the five existing ports (Honduras; Southampton, United Kingdom (UK); and South Korea). Personnel assigned to the three ports will be relocated domestically. The personnel reassignments may not occur until FY 2012, depending on how quickly the timeline for phasing out SFI moves forward. The remaining \$3.3 million in available funds will support existing operations.

Below is a general four step plan of action that describes the most practical and logical steps involved in ceasing SFI operations in Honduras, Southampton, and South Korea:

### **Step 1**

Legal Actions - The Implementing Recommendations of the 9/11 Commission Act (P.L. 110-53; 9/11 Act) mandates 100% scanning in foreign ports. In order to begin the process of discontinuing the requirements to scan 100% as mandated in the 9/11 Act, the proposal to amend the law would need to be presented to Congress in February 2010.

### **Step 2**

Coordination with other U.S. Government Agencies – CBP will notify U.S. Government partners of changes in current and planned joint scanning operations: Department of State (overseas coordination), Department of Energy (partnership in equipment deployment), and Department of Defense (planned retrograde joint effort). Memoranda of Understanding (MOU) will need to be amended to reflect CBP's withdrawal from these partnerships.

### **Step 3**

Coordination with Foreign Partners/SFI Operations Shutdown - CBP will meet with overseas partners to inform them of required changes in existing agreements resulting from ceasing SFI scanning operations at their ports. Honduras, Southampton, and South Korea will cease as SFI participants. In Southampton, the equipment may be gifted to the UK Border Agency (UKBA) or to the Southampton Container Terminal (SCT) operator. If UKBA or SCT do not accept the equipment, costs associated with de-commissioning will have to be considered. The TDY staff due to return to the U.S. in June will not be replaced, and the current plan to hire Foreign Service Nationals will be halted. In South Korea, the equipment will be decommissioned and returned to the U.S., and the deployed staff could be reassigned to other CBP programs. In Honduras, the deployed staff could be reassigned to other CBP programs. Transmission of scan data back to the U.S. (NTC/SFI interface) will be discontinued at these ports by the end of FY 2010.

### **Step 4**

Limited Operations and Staffing - All contractor support for IT development for SFI will cease by FY 2011. Limited staff will remain associated with the SFI program to manage SFI operations at Qasim, Pakistan and Salalah, Oman. The field personnel at domestic ports will have to be notified that operations have ceased. This will involve changing the

targeting process at domestic ports that received containers from these SFI locations by reverting to pre-SFI protocols.

In FY 2012, or a point in time when the SFI ports have reverted to CSI protocols, the personnel and mission support resources associated with the SFI program will be relocated domestically and assigned to another Program, Project, and Activity (PPA).

Impact on Performance (Relationship of Decrease to Strategic Goals)

DHS Strategic Goal: Preventing Terrorism and Enhancing Security

CBP Goal 1: Secure the Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

CBP Objective 1.2: Using a risk-based approach, deploy and employ the most effective inspection and scanning technology available at designated land border ports, airports, seaports, permanent Border Patrol traffic checkpoints, and international areas in which CBP operates to detect and prevent the entry of hazardous materials, goods, and instruments of terror into the United States.

The SFI Program is a helpful but not essential part of CBP's layered risk-based approach to detect and prevent the entry of hazardous materials, goods, and instruments of terror into the United States. DHS will continue to use and, when appropriate, strengthen other means to achieve the same goals of SFI, such as the 24 hour rule, the Importer Security Filing and Additional Carrier Requirements Rule (10+2), and the Customs-Trade Partnership Against Terrorism (C-TPAT) program.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and expenses:  
C-TPAT

(Dollars in Thousands)**

**Program Decrease 1:** Customs-Trade Partnership Against Terrorism  
PPA: C-TPAT  
Program Decrease: Positions 0.0, FTE 0.0, Dollars \$-12000.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							207	207	63,136
Program Decrease							-	-	(12,000)
<b>Total Request</b>	<b>207</b>	<b>207</b>	<b>52,420</b>	<b>207</b>	<b>207</b>	<b>62,612</b>	<b>207</b>	<b>207</b>	<b>51,136</b>

Description of Item

The President’s Budget requests a reduction of \$12.0 million in the Customs-Trade Partnership Against Terrorism program (C-TPAT) to ensure our highest priority capabilities are fully funded to achieve our core missions.

Justification

The current funding profile for the C-TPAT program was developed during the start up and expansion phase. The program is now mature, and \$12 million can be eliminated from its budget with no impact on operations. Based on projected workload, as well as on program efficiencies, the operational capability cut will not impact CBP’s supply chain security mission. The program has aggressively worked to identify and successfully implement travel and validation procedures aimed at maximizing program resources.

C-TPAT will reduce the number of contractors (software programmers and testers) assigned to the Office of Information Technology to develop the program’s Automated Web-Based Portal System from 8 to 2 programmers in equal increments from FY 2010 – FY 2012. The Portal is the primary interface with the C-TPAT trade members and has approximately 20,000 designated users. It warehouses information pertinent to the validation process and is critical to effective and efficient administration of the program. A phased down approach will give the program the opportunity to make needed functional enhancements over an extended time period.

Impact on Performance (Relationship of Decrease to Strategic Goals)

DHS Strategic Goal: Preventing Terrorism and Enhancing Security

CBP Goal 1: Secure the Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

CBP Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of the appropriate mix of infrastructure, technology, and personnel.

The reduction to funds supporting the Automated Web-Based Portal System will have minimal impacts because CBP will use a phased approach in which necessary enhancements will still be made, over an extended time period. The reduction to support funds, including equipment, services and supplies, will not impact the program's ability to meet current mission goals. The C-TPAT program will meet all timelines as mandated by the Security and Accountability for Every Port Act of 2006 (P. L. 109-347).

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and expenses:  
Inspection and Detection Technology  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 1:**                    CBP Explosive Detector Dog Program  
PPA:    Inspection and Detection Technology  
Program Decrease:                    Positions 0.0, FTE 0.0, Dollars \$-410.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	410
Program Decrease							-	-	(410)
<b>Total Request</b>	-	-	-	-	-	-	-	-	-

Description of Item

The President’s Budget requests a reduction of \$0.41 million to Customs and Border Protection’s Explosive Detector Dog Program to ensure our highest priority capabilities are fully funded to achieve our core missions.

Justification

Since September 11, 2001, many state and local law enforcement agencies have increased the number of explosive dogs in their departments. With the overlapping number of state and local explosive detector dog teams deployed at airports and mass transit areas, CBP will be able to utilize state and local teams in emergency situations.

Currently, there are 20 CBP Explosive Detector Dog Teams. The annual cost of maintaining the explosive program is approximately \$410,000. Training material costs account for \$50,000, travel \$120,000 and hazard duty pay \$240,000.

Impact on Performance (Relationship of Decrease to Strategic Goals)

DHS Strategic Goal: Preventing Terrorism and Enhancing Security

CBP Goal 1: Secure the Nation’s borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.

CBP Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of the appropriate mix of infrastructure, technology, and personnel.

The impact on performance will be minimal since CBP will be able to utilize state and local teams in emergency situations.

Program Decrease							-	-	(2,650)
<b>Total Request</b>	-	-	<b>28,099</b>	-	-	<b>24,778</b>	-	-	<b>21,628</b>

Description of Item

CBP requests a reduction of \$24.3 million in training and development programs to ensure our highest priority capabilities are fully funded to achieve our core missions

Justification

The Office of Training and Development (OTD) identified three major areas that can be reduced by FY 2011 for a total savings of \$24.3 million:

OTD plans to reduce 50 positions total through attrition and not filling current vacancies. This reduction will target positions at headquarters and the Academies. The Academy position reduction will target both mission support and instructor positions. OTD first plans to look at consolidating the mission support functions at the Academies with the goal of minimizing the impact to instructor positions. At the headquarters level, OTD plans to reduce positions based on the realignment of positions and functions. These reductions take into consideration the goal of transitioning the course design/development function to permanent FTE employees.

The CBP's National Training Plan (NTP) will be reduced by \$17.464 million in FY 2011 as a result of identified savings and a projected decrease in training requirements for basic students. This reduction is based on three areas of savings: (1) \$7 million reduction in TDY instructors; (2) \$2.5 million in new development costs as this function is brought in-house; and (3) \$7.964 million in savings for student travel based on past spending trends. The NTP funds new development through a combination of in-house

design/development and contractors. OTD is currently in the process of adding permanent FTE to provide additional in-house capability in an effort to reduce the need for contractor development. By FY 2011, OTD anticipates that a savings could be realized as more of this function is brought in-house.

OTD projects that \$3.65 million can be reduced from its contract budget by FY 2011 through the reduction/elimination of these contracts. These reductions are based on the elimination of contract positions and services that are no longer required for operations. Some contract positions will be converted to permanent FTEs. One major contract that will be significantly reduced is the Primescape contract which currently funds 18 positions in support of Headquarter operations. The other major contracts identified are the Info-Zen and Challenge Contracts at the Field Operations Academy (FOA) which provided support in the area of training scheduling/registration. OTD has identified several other smaller service contracts that can be eliminated as services are no longer necessary for operations.

#### Impact on Performance (Relationship of Decrease to Strategic Goals)

Border Security Inspections and Trade Facilitation at POE's Long Term Performance Goal – Improve the targeting, screening, and apprehension of high-risk international cargo and travelers while providing processes to facilitate the flow of safe and legitimate trade and travel.

Goal 1 – Continue to Protect Our Nation From Dangerous People

Objective 1.1 – Achieve Effective Control of Our Borders

Border Security and Control Between POE's Long Term Performance Goal – To gain effective control in areas deemed as high priority for terrorist threat potential or other national security objectives through the establishment of the Operational Requirements-Based Budgeting Program.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and expenses:  
Border Security and Control  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 1:** Border Patrol Staffing and Premium Pay Reduction  
PPA: Border Security and Control  
Program Decrease: Positions -181.0, FTE -91.0, Dollars \$-30523.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

<b>Total Request</b>	<b>22,787</b>	<b>21,135</b>	<b>3,447,627</b>	<b>22,923</b>	<b>22,836</b>	<b>3,535,286</b>	<b>22,619</b>	<b>22,709</b>	<b>3,610,608</b>

Description of Item

Resources to fund OBP's premium pay and agent staffing have been reduced to ensure our highest priority capabilities are fully funded to achieve our core missions.

Justification

A \$15.0 million reduction reflects a proposed change to management of premium pay policy on working shifts which currently results in higher premium pay costs. The proposed policy changes would require restrictions on weekend work schedules that currently result in the payment of Sunday differentials, staffing adjustments during holiday periods and overtime changes related to Fair Labor Standards Act (P.L. 75-718, as amended) overtime paid at the end of a workday shift.

A \$15.523 million reduction request to Border Patrol agent staffing translates to a reduction of 181 Border Patrol agents in FY 2011 while maintaining a level of approximately 20 thousand Border Patrol agents.

Impact on Performance (Relationship of Decrease to Strategic Goals)

The change in premium pay policies is not anticipated to have a major impact on border operations or the effectiveness of the agent workforce. These pay policy changes are required to ensure that there are not further staffing reductions taken in the agent workforce that could have a negative impact on border enforcement capabilities.

The 181 agent reduction in FY 2011 will result in a total agent force of 20,000. The Border Patrol is committed to maintaining the current level of effective control that has been achieved through the strategic deployment of additional agents, technology and infrastructure.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and expenses:  
Border Security and Control  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Increase 1:** Intelligence and Operations Coordination Staffing  
PPA: Border Security and Control  
Program Increase: Positions 103.0, FTE 52.0, Dollars \$10000.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							200	200	58,009
Program Increase							103	52	10,000
<b>Total Request</b>	<b>200</b>	<b>200</b>	<b>58,009</b>	<b>200</b>	<b>200</b>	<b>58,009</b>	<b>303</b>	<b>252</b>	<b>68,009</b>

Description of Item

The President's Budget requests \$10.0 million in FY 2011 salary and benefits funding for 103 positions which consists of 52 additional FTEs to reach the staffing authorization of 303 positions. The Office of Intelligence and Operations Coordination (OIOC) has a unique mission and as a result has a very specialized workforce. The office is comprised of Intelligence Officers, Operators and support personnel that provide subject matter expertise responsible for targeting and analysis functions, coordination of national incident response and intelligence driven special operations that require collaboration between CBP offices. Requested funds allow for:

- 24/7 RRB Intelligence Watch Staffing and Intelligence Officers
- Appropriate staffing levels for Agency Incident Management, Operations Coordination, Continuity of Operations (COOP) and Business Recovery missions

Justification

The OIOC is responsible for developing a predictive intelligence and analysis capability for CBP, improving situational awareness for CBP Headquarters and field decision makers, and improving coordination of CBP-wide operations. OIOC is responsible for the entire intelligence cycle including planning, collection, processing, analysis, production and dissemination of all-source information and intelligence which includes subject matter expertise in diverse categories; coordination of joint operations in support of CBP's mission; overseeing the establishment of integrated intelligence teams in the field and management of the CBP incident management program. OIOC ensures the

flow of valuable information to and from field intelligence assets, providing frontline officers and agents with a greater ability to protect our nation's border.

The requested increase will provide an authorized staffing level of 303 positions. Additional funding will afford the opportunity for OIOC recruitment of individuals to support current ongoing OIOC projects and programs. An example, is hiring additional Intelligence Officers who will analyze and evaluate intelligence data collected; process, review and evaluate large volumes of information from a wide range of sources to identify trends, patterns, profiles, estimates and studies; research, analyze, assimilate and evaluate available information; review new incoming material selecting and isolating pertinent materials from files and prepare finished studies of factual data in support of the CBP frontline and as it relates to the CBP mission of safeguarding the American homeland at and beyond the borders.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

##### DHS Strategic Goal:

- Preventing and Protecting Against Terrorism
- Securing and Managing Our Borders
- Enforcing and Administering Our Immigration Laws
- Safeguarding and Securing Cyberspace
- Ensuring Resilience to Disaster

##### CBP Goals:

- Secure our nations border to protect America from the entry of dangerous or illegal people or goods
- Ensure the efficient flow of lawful people and goods across U.S. borders

##### CBP Objectives:

- Establishes an integrated framework to enhance CBP's Intelligence capability
- Maintain and enhance effective coordination of multi-component and inter/intra-agency operations
- Promote an environment that values open communication and information sharing
- Cultivate and maintain a workforce that is aligned, trained, and staffed to meet OIOC's mission

Without this funding CBP will not be able to adequately staff, expand and/or improve the following subset of key agency mission areas:

- Commissioner's Situation Room – War Room Program
- Incident Management
- Operational Analysis/BorderStat/EMIS
- Operations Coordination
- IOCCs/ICTs
- RRB Intelligence Watch - 24/7 Operation

- Targeting
- El Paso Intelligence Center
- Requirements and Collection Management
- Tasking Production Exploitation and Dissemination (Air Marine Operation Center)

Current Services Level							-	-	-
Program Decrease							-	-	(74,400)
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>(74,400)</b>

Description of Item

Resources to fund \$74.4 million in capability have been reduced to ensure our highest priority capabilities are fully funded to achieve our core missions.

The \$74.4 million reduction will reduce the amount of funding available for contract support in a number of areas within the Office of Information and Technology (OIT). The reductions will result in less direct support to the field and more centralized IT Help Desk support. OIT plans to mitigate the impacts by standardizing desktops, servers and storage; consolidate and centralize management of desktops; virtualize services/workstations and circuit/bandwidth optimization.

Justification

The \$74.4 million reduction will be achieved through reducing the contractor workforce support Office of Information and Technology. In order to absorb this decrease in resources, OIT is developing plans that include revising strategies for delivering support to field locations and evaluating technology solutions that will reduce the amount of manpower required for desktop support. This reduction will be carefully managed to minimize impact on mission critical systems and of federal, state, local, and international government agencies nationwide.

### Impact on Performance (Relationship of Decrease to Strategic Goals)

The \$74.4 million reduction to OIT contract support resources supports the goal of Strengthen and Unify DHS Operations and Management. Although this initiative will initially have some impact on the level of service provided to the field, the long-term effort to revise our service delivery model and take advantage of automated tools will result in improved service, better business practices and significant savings that can be reinvested in other mission critical programs.

Measures are in place to minimize the impact of the reduction on mission critical operations, including:

- Improved project prioritization through use of business requirements/governance. Assistant Commissioners will approve customer requests for system development/enhancements to ensure that they represent priority business-owner requirements
- Creation of the Chief Information Officer Governance Board to validate efficiency impacts on CBP operations
- Increased automation, monitoring and availability of desktops and support systems
- Increased systems availability
- Improved hardware availability
- Immediate response to requests for assistance through web-based Remedy:
  - Knowledge Base to walk users through most common issues for quicker resolution
  - User password reset capabilities
- Increased web-based training services
  - Enables supervisors to schedule staff training with more flexibility
- Centralized Field Support management
  - Leverages enhanced automation tools for remote support
- Consolidation of project deployments through initiation of a geographic deployment strategy

Description of Item:

A reduction of \$18.182 million in enhancements which were provided in FY 2010 will not be sustained in order to ensure our highest priority capabilities are fully funded to achieve our core missions.

Justification:

The Office of Air and Marine (OAM) reduction of \$18.182 million will forgo an approximate 120 position enhancement received in FY 2010. OAM maximizes the capabilities of air and marine assets through a cohesive joint air operations model for centralized command and control and a responsive and integrated control system for decentralized execution. OAM partners with numerous stakeholders in performing its missions throughout the continental United States and the Western Hemisphere. This includes domestic operations at the borders, source, transit and arrival zone operations, interior law enforcement support, and support to other agencies.

U.S. Customs and Border Protection  
Salaries and expenses:  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Increase 1:** Data Center Migration  
PPA: Salaries and expenses:  
Program Increase: Positions 0.0, FTE 0.0, Dollars \$26600.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	7,770
Program Increase							-	-	26,600
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>34,370</b>

The President’s Budget requests \$26.6 million for data center migration (development) funding that will be used for the continuation of system and application migration to the two DHS Enterprise Data Centers for central DHS management in FY 2011.

Resources for the Data Center Migration will establish and transition the following services to EDS:

<b>Project</b>	<b>FY2011*</b>
Passenger Systems	\$ 6,650,000
Cargo Systems	\$ 6,650,000
Targeting Systems	\$ 6,650,000
Border Enforcement Systems	\$ 6,650,000
<b>Total</b>	<b>\$26,600,000</b>

\*Estimate is based off of the execution of the FY2010 system migration. The FY2011 plan will be refined depending on the progress made during FY2010.

Justification

The Data Center consolidation efforts will standardize IT resource acquisitions across Components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation are enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

FY 2011 data center development funding, to be managed through the DHS Working Capital Fund (WCF), will be used for the continuation of system and application migration to the two DHS Enterprise Data Centers for central DHS management in FY 2011. The data center migration includes:

- Discovery, migration planning, and scheduling activities specifically related to systems/applications that will transition to the DHS Data Centers in FY 2010
- Purchase of new equipment for placement in the DHS Data Centers as part of migration/transition efforts
- Installation of equipment racks at the DHS Data Centers
- Migration-related build-out of DHS Data Center infrastructure
- Transition of disaster recovery/backup/Continuity of Operations (COOP) capability to DHS Data Centers
- Installation of infrastructure support as part of system migrations at the DHS Data Centers
- Migration of USCIS hardware, systems/applications to occupy rack space at the DHS Data Centers.

Impact on Performance (Relationship of Increase to Strategic Goals)

DHS Goal 3: Protect Critical Infrastructure

Objective 3.1: Protect and Strengthen the Resilience of the Nation's Critical Infrastructure and Key Resources

Objective 3.3: Improve Cyber Security

CBP Strategic Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel;

Objective 1.1: Establish and maintain effective control of air, land, and maritime borders through the use of the appropriate mix of infrastructure, technology, and personnel; and

Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders;

Objective 2.1: Through the use of accurate advance information and modernized systems for cargo processing, expedite the processing of people, products, and conveyances at land border ports, airports, and seaports.

If funding is not provided, CBP will not have the additional capability to operate critical systems in multiple geographic locations during times of peace and national crisis, replicate and perform maintenance without impacting the mission, reduce our dependency on legacy architectures, or make our data more readily available to DHS and our intelligence partners.

Migration of CBP production systems in FY2011 to the DHS Stennis and EDS Data Centers will enable DHS to fulfill its mission, strategic goals and business objectives to create "One Network, One Infrastructure, and One DHS." Lack of migration will inflict a negative impact on CBP's ability to address DHS OIG findings related to CBP's disaster recovery posture, as outlined in *Disaster Recovery Planning for DHS Information Systems Needs Improvement*, OIG-IT-04-003, dated February 2005.

In alignment with DHS departmental goals to consolidate all component Data Centers into the Stennis and EDS Data Centers, CBP plans to continue our transition leadership role to migrate all systems in FY11. This will help us to modernize and advance existing services, thus improving data and information sharing, as well as interoperability.

Description of Item

The Human Resources (HR) staff funding will be reduced to ensure our highest priority capabilities are fully funded to achieve our core missions.

Justification

The reduction to the Human Resources Division will be achieved in the following areas;

- Reducing \$56,000 needed to address equipment associated with replacement and telework
- \$3,416,000 Services: Contractors and other services; support of recruitment, hiring, retirement processing and systems
- They will reduce staffing by 6 positions associated with non-mission critical needs
- Trimming HR management (HRM) contractors staff by 7%
- Reduces training for new field Labor Employee Relations personnel and HQ subject matter experts
- Downgrades hiring centers' ability to support CBP operational and mission support stakeholders
- Limits update data systems/software (through reduced contractor support) and replacement of obsolete equipment
- Providing limited support to recruitment events

Some travel reductions could be mitigated through increased use of video-teleconferencing and web seminars, other field consultations and training that require an

on-site presence of HRM personnel cannot be mitigated. There is no method to mitigate the impact of reducing supply and equipment purchases other than continued use of some obsolete computer hardware/software (e.g., extending personal computer replacement cycle from three years to five).

Impact on Performance (Relationship of Decrease to Strategic Goals)

The decrease in human resources will be mitigated by decreasing on-site support and reduced travel. In addition, the decrease will cause delays in pre-employment processing and recruitment and diminish capabilities to evaluate recruitment and assessment programs; eliminating the capability to provide training and processing in retirement programs and benefits/worklife.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Salaries and expenses:

Current Services Level							-	-	5,000
Program Increase							-	-	(5,000)
<b>Total Request</b>	-	-	-	-	-	<b>5,000</b>	-	-	-

Description of Item:

A reduction of \$5.0 million in Cyberspace enhancements which were provided in FY 2010 will not be sustained in order to ensure our highest priority capabilities are fully funded to achieve our core missions.

Justification:

The \$5 million reduction for Cyber Security will not impact CBP's ability to provide Top Secret/Sensitive Compartmented Information (TS/SCI). CBP will continue to insure that CBP and DHS networks remain secure and not vulnerable to attack, have minimum loss of availability, and are not compromised. Existing capabilities within the Security Operations Center (SOC) will allow for the continuation of classified processing capabilities. Existing resources will allow for some visibility into monitoring, incident response and processing of classified threat information. SOC will forgo the expansion of capabilities and increased cyber security visibility.

Impact on Performance (Relationship of Decrease to Strategic Goals):

DHS Strategic Goal: Safeguarding and Security Cyberspace

CBP objective 2.1 will be impacted because of the reduction to Cyber Security. However, CBP will continue to make sure that classified processing capabilities will allow for continuous TS/SCI and collateral classified access via an onsite Sensitive Compartmented Information Facility with Joint Worldwide Intelligence Communications System and Homeland Secure Data Network terminals.

**Department of Homeland Security  
U.S. Customs and Border Protection

<b>Total Request</b>	<b>3,822</b>	<b>3,733</b>	<b>1,313,558</b>	<b>3,854</b>	<b>3,840</b>	<b>1,016,000</b>	<b>3,824</b>	<b>3,839</b>	<b>997,902</b>

Description of Item

The President’s Budget requests a reduction of \$8.01 million (including rent) reduction to the Office of Administration (OA) to ensure our highest priority capabilities are fully funded to achieve our core missions

Justification

The reduction would be taken across OA’s directorates and there would be impacts in areas such as acquisition management, systems development and deployment, facilities and real property management, as well as asset and personal property management. Decreased funding will reduce FTE’s by 3% and contractor support by 11%.

OA would delay some of its annual property inventory activities. Further development and deployment of Fedtraveler, Facilities Project Management and Property Management systems would be deferred for at least one to two years. There will be delays in facilities and construction projects.

Much of OA’s work involves mandatory, time-sensitive activities such as collecting revenue, preparing budgets, paying bills, awarding contracts, etc. that cannot be reduced or delayed without financial consequences. To avoid missing legislative deadlines, having to pay penalties for late payments and lapsing of annual funds due to delays in contract awards, OA will need to direct its reductions to areas not directly related to these requirements.

Impact on Performance (Relationship of Decrease to Strategic Goals)

The reductions in the Office of Administration will result in less contractor support in core areas such as acquisition management, systems development and deployment, facilities and real property management, as well as asset and personal property management. OA will rely more on federal employees to absorb work previously completed by contractors.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

For necessary expenses for enforcement of laws relating to border security, immigration, customs, and agricultural inspections and regulatory activities related to plant and animal imports; purchase and lease of up to 8,000[4,500] (~~7,000~~ [4,000] for replacement only) police-type vehicles; and contracting with individuals for personal services abroad; [\$7,623,068,000]\$8,207,986,000, of which [\$3,226,000]\$3,274,000 shall be derived from the Harbor Maintenance Trust Fund for administrative expenses related to the collection of the Harbor Maintenance Fee pursuant to section 9505(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 9505(c)(3)) and notwithstanding section 1511(e)(1) of the Homeland Security Act of 2002 (6 U.S.C. 551(e)(1)); of which not to exceed \$45,000 shall be for official reception and representation expenses; of which not less than [\$309,629,000]\$298,330,000 shall be for Air and Marine Operations; of which such sums as become available in the Customs User Fee Account, except sums subject to section 13031(f)(3) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(f)(3)), shall be derived from that account; of which not to exceed \$150,000 shall be available for payment for rental space in connection with preclearance operations; of which not to exceed \$1,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security [; and of which not more than \$800,000 shall be for procurement of portable solar charging rechargeable battery systems]: Provided, That for fiscal year [2010]2011, the overtime limitation prescribed in section 5(c)(1) of the Act of February 13, 1911 (19 U.S.C. 267(c)(1)) shall be \$35,000; and notwithstanding any other provision of law, none of the funds appropriated by this Act may be available to compensate any employee of U.S. Customs and Border Protection for overtime, from whatever source, in an amount that exceeds such limitation, except in individual cases determined by the Secretary of Homeland Security, or the designee of the Secretary, to be necessary for national security purposes, to prevent excessive costs, or in cases of immigration emergencies[: Provided further, That of the total amount provided, \$1,700,000 shall remain available until September 30, 2011, for the Global Advanced Passenger Information/Passenger Name Record Program]. (Department of Homeland Security Appropriations Act, 2010.)

**PPA Mission Statement**

The purpose of Inspections, Trade and Travel Facilitation at Ports of Entry (POEs) is to facilitate the flow of legitimate travel and trade across U.S. borders, while ensuring that threats to the United States are not allowed entry, using technology, intelligence and risk information, targeting, and international cooperation in the screening of entering international cargo and travelers and departing export cargo. This program reduces the potential of terrorists, instruments of terror, and contraband from entering our country, while facilitating the legal flow of people and trade by deploying CBP officers, agricultural specialists, and imports specialists to the ports of entry. The goal of this program is to improve compliance with trade regulations and other mandatory import/export guidance while increasing the security of the United States.

**Summary Justification and Explanation of Changes**

**PPA Mission Statement**

International Cargo Screening (ICS), which includes CBP's Container Security Initiative (CSI) and Secure Freight Initiative (SFI), enhance the security of maritime containerized shipping from exploitation by terrorists. ICS's goal is three-fold: (1) to expand operations to new critical international seaports; (2) to secure and improve operations at existing ports; and (3) to encourage global efforts to enhance maritime container security through capacity building. Working with foreign administrations, CSI is designed to achieve a more secure maritime trade environment while ensuring the need for efficiency in global commerce. The three core elements of the program are: (1) establishing security criteria and identify high-risk containers; (2) scanning those containers identified as high-risk prior to arrival at U.S. ports; (3) using technology to quickly scan high-risk containers.

The SFI builds on the operational pillars of the DHS Container Security Initiative (CSI) and the Department of Energy Mega ports initiative to maximize radiological and nuclear screening of U.S. bound maritime containers in foreign ports of departure. It merges data from a next generation risk assessment screening program and an overseas integrated detection network with existing and new information regarding maritime containers transiting through the supply chain in order to create detailed records for CBP's risk management process to target maritime containers that pose a threat.

**PPA Mission Statement**

The goal of Other International Programs is to extend the U.S. zone of security beyond U.S. Borders by promoting international border security and global standards. In this arena, CBP implements programs and initiatives that support the U.S. Government's objectives in anti-terrorism, border security, non-proliferation, export controls, immigration and capacity building. This program's efforts foster and facilitate legitimate international trade, increase compliance, build alliances to combat trans-national crime, reduce corruption, strengthen border controls, promote the rule of law and enhance economic stability throughout the world. This is accomplished through the development and maintenance of collaborative relations with foreign governments, the development of international strategies, and representation of CBP positions in various international forums, international technical assistance and training, and the negotiation of international agreements.

In FY 2010, CBP will pursue international partnerships to share best practices, exchange information and promote the facilitation of secure travel and trade; actively support implementation of the World Customs Organization framework; and implement initiatives to support an international immigration strategy to identify and interdict high risk travelers.

**PPA Mission Statement**

The Customs-Trade Partnership Against Terrorism (C-TPAT) is a partnership between the Federal government and private industry. It is an effort that CBP has undertaken with the business community to secure the supply chain. The goal of C-TPAT is to develop and maintain a secure supply chain, from factory floor to port of entry, which enables CBP to facilitate trade and ensure safe and secure borders. C-TPAT is designed to use and enhance the security processes and procedures currently employed by the trade community and ensure that international shipments are not compromised or diverted by terrorists or their accomplices.

**PPA Mission Statement**

CBP's trusted traveler programs enhance the agency's ability to expedite the process and facilitate known, low risk "trusted travelers" arriving into the United States by allowing CBP officers additional time to focus on higher risk, unknown travelers; develop and implement national policies related to trusted traveler programs; provide guidance to the field locations on the operation of trusted traveler programs; strategize the growth of current programs and the development and implementation of new programs; and respond to congressional and industry inquiries of trusted traveler program related matters.

Currently, CBP TTP has four programs – NEXUS, Secure Electronic Network for Travelers Rapid Inspection (SENTRI), Free and Secure Trade (FAST), and Global Entry.

**PPA Mission Statement**

The CBP reliance on Non-Intrusive Inspection (NII) technology to secure the borders has become more and more critical. In conjunction with CBP's many other initiatives (24-Hour and Trade Act rules, Automated Targeting System (ATS), Container Security Initiative (CSI), Customs-Trade Partnership Against Terrorism (C-TPAT) etc.), NII is part of a multi-layered approach which allows CBP to work smarter and faster in recognizing potential terrorist threats. These complementary layers enhance security and protect our nation.

CBP has long recognized that an adversary can defeat any single system or device. For this reason, CBP cannot rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood that a nuclear or radiological weapon, weapons grade material, illegal aliens or other contraband being smuggled across the United States borders will be detected. NII technologies are viewed as force multipliers that enable CBP officers to screen or examine a larger portion of the stream of commercial traffic while maintaining the flow of legitimate trade, cargo and travelers.

Since 9/11, NII technology has been the cornerstone of the CBP multi-layered enforcement strategy. Technologies currently deployed to our nation's land, sea and airports of entry include large-scale X-ray and gamma-ray imaging systems, as well as a variety of portable and handheld technologies, to include radiation detection technology.

**PPA Mission Statement**

At the core of CBP’s ability to achieve its critical border security objectives and maintain the flow of lawful commerce is CBP’s ability to identify high-risk travelers and goods for inspection while allowing the vast majority of law abiding travelers and commerce to continue to their destination without unnecessary delay. Legislation and regulatory action, such as the Trade Act of 2002 and the Safe Port Act, respectively, have made it mandatory to provide advance information about passengers and goods arriving in the U.S. CBP uses computer technology and rule-based applications to analyze the data provided on passengers and shipments arriving in the U.S. CBP applies its targeting methods against the data to determine which passengers or shipments need to be segregated for a closer look and possibly inspection.

The main platform CBP uses to analyze arriving passenger and shipment data is the Automated Targeting System (ATS). ATS is a web-based enforcement and decision support tool that is the cornerstone for all CBPs targeting efforts. ATS incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. In this way, ATS allows CBP officers to focus their efforts on cargo shipments and passengers that most warrant further attention. ATS standardizes names, addresses, ship names, and similar data so these data elements can be more easily associated with other business data to form a more complete picture of a passenger, import, or export in context with previous behavior of the parties involved. Every passenger and shipment processed through ATS is subjected to a real-time risk evaluation. Risk assessment strategies are multi-tiered in their approach and are founded on complex statistical studies, data analysis, and rules based on knowledge engineering.

**PPA Mission Statement**

The priority mission of the U.S. Customs and Border Protection's National Targeting Centers is to provide around-the-clock tactical targeting and analytical research support for CBP anti-terrorism efforts. The NTC facilities are primarily staffed by CBP officers, border patrol agents and field analysis specialists who are experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments. The NTC staff develops tactical targets from raw intelligence in support of the CBP mission to detect and prevent terrorists and terrorist weapons from entering the United States. NTC supports all CBP field elements, including CSI personnel stationed in countries throughout the world, with additional research assets for passenger and cargo examinations.

**PPA Mission Statement**

The Office of Training and Development exists to develop and deliver basic, mid, and advanced level training programs for all CBP employees, especially mission critical occupations (e.g., CBP Officers, Agricultural Specialists, Imports Specialists, and Entry Specialists) at the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of combating terrorism, improving border security, improving inspection and control, and facilitating trade.

**PPA Mission Statement**

The Office of Border Patrol (OBP) has been delegated with the authority and responsibility to deliver the Executive Branch Program for “Border Security and Control between the Ports of Entry.” The primary purpose of this program is to prevent the entry of terrorists and their instruments of terror, illegal immigrants, and contraband, while facilitating the legitimate flow of people, goods, and services on which the economy depends. The program will be accomplished through the judicious use of resources including personnel, surveillance technology, communications, transportation, facilities, and mission support activities.

Border Patrol agents deter uncontrolled entry into the interior of the U.S. by: the rapid detection, interception, and apprehension of illegal entrants at or near the border; interdicting or deterring illegal aliens, drug smugglers, potential terrorists and criminals from attempting illegal entry between ports-of-entry; and causing persons seeking admission into the U.S. to present themselves at designated ports for inspection.

Strategic issues and challenges evolve around integrating unique and broader enforcement authorities working to uncover systemic vulnerabilities that pose a threat to the Nation and its economy and work to eliminate vulnerabilities as quickly as possible. Through an array of investigative processes in the areas of smuggling, finance and national security, Border Patrol's OI is challenged to identify the people, materials, & funding essential to sustaining terrorist threats and criminal enterprises, and to disrupt and dismantle their operations.

The requested amount will help address Border Patrol's strategic challenges of disrupting terrorist threats and preventing potential terrorists and immigration violators from entering the country. More effective immigration enforcement will contribute to enhanced national security as well as greater deterrence.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change

**PPA Mission Statement**

The Office of Training and Development exists to provide core operational training for Border Patrol Agents whose primary responsibility lies between the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of safeguarding the borders of the United States. This training ensures that CBP is able to rapidly deploy a highly motivated, well-trained workforce, both on a temporary and permanent basis, who can quickly respond to potential terrorist threats, shifts in smuggling patterns and other national security threats.

**Summary Justification and Explanation of Changes**

**PPA Mission Statement**

The purpose of Air and Marine Salaries is to apply the skills and expertise of CBP air and marine personnel to deter, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the United States. Having aircraft and vessels along the borders reduces the quantity of drugs entering the U.S. and minimizes threat levels. The goal of this program is to deny the use of air, land and coastal waters for conducting acts of terrorism and other illegal activities against the United States.

## BUDGET REQUEST AND SUPPORTING INFORMATION

### Border Security Fencing, Infrastructure, and Technology:

## I. Appropriation Overview

### A – Mission Statement for Border Security Fencing, Infrastructure, and Technology:

The DHS border security mission is to prevent people and things from illegally entering the United States, including terrorists and instruments of terror. DHS created the Secure Border Initiative (SBI) to bring clarity of mission, effective coordination of DHS assets, and greater accountability to the work of DHS in securing the Nation's borders. SBI is the United States' most far-reaching effort to gain control of its nearly 6,000 miles of international land border. Customs and Border Protection (CBP) is the lead agency within DHS for the development and deployment of SBI technology (called *SBI<sub>net</sub>*) and tactical infrastructure to secure America's borders.

This appropriation provides continued funding for the CBP Program Offices tasked with developing and installing technology and tactical infrastructure solutions, enabling a more effective and efficient method for controlling border security. Whereas the initial focus of SBI has been on serious vulnerabilities along the southwest border and between the official ports of entry (POE), attention is also being given to the northern border to address needs and vulnerabilities there. More specifically, this request will be used to respond to the changing threat and operational needs by delivering enhanced border control capabilities and services to the operational user in the following major areas:

- **SBI<sub>net</sub> Block 1 Deployments to Arizona.** Through *SBI<sub>net</sub>*, CBP will continue to implement its initial technology solution, called Block 1, in Arizona. The solution consists of surveillance, detection, identification, classification, tracking, communications, and command and control capabilities that allow Border Patrol agents to efficiently detect, identify, classify, track, and resolve illegal incursions. Currently CBP plans to deploy the Block 1 technology system to the Tucson and Yuma sectors by 2013. The first two *SBI<sub>net</sub>* operational deployments to the Tucson and Ajo stations are currently underway. Following the System Acceptance Test and Operational Test and Evaluation in 2010, a production decision will be requested to acquire and complete the remaining Arizona Border Patrol stations. FY 2011 funds will be used for buying equipment and beginning construction for the remainder of the Tucson sector, which includes Naco, Willcox, and Casa Grande. These deployments, when combined with personnel and tactical infrastructure, will contribute significantly towards the effective operational control across the Arizona border.
- **Other Technology Deployments.** In addition to Block 1 deployments, CBP will continue to address pressing operational needs with other proven technology capabilities, such as Remote Video Surveillance Systems (RVSS), Mobile Surveillance Capabilities (MSC), Unattended Ground Sensors (UGS), or other

available, lower-cost solutions. As part of SBI's evolving acquisition strategy to expand border security solutions for a wider spectrum of CBP operational users, the SBI System Program Office (SPO) is assessing near-term, non-developmental, low-cost technologies that can provide high payoff capabilities for urgent and compelling needs. The Innovative Technology Pilot Program will rapidly and continually expand and improve the technology tools available for border control by piloting readily available capabilities with operators in the field and getting their feedback. To support this expanded portfolio of technologies, SBI is also looking at Open Architecture software implementations that would facilitate future integration of these technologies, and the acquired sensor information, for enhanced border security operations.

- **P-25 Tactical Communications Deployments.** CBP has a critical need to modernize its tactical communications and move from a mixed analog/digital, leased circuit-based architecture to an integrated internet protocol/quality of service-based digital network. FY 2011 funds will be used to procure and deploy additional P-25 systems to the southwest border, which will enable improved operations and agent safety.
- **Northern Border Projects.** As an area of emphasis, through *SBI<sub>net</sub>*, CBP is in the process of demonstrating technology for addressing the needs and vulnerabilities of the northern border maritime (river/lake), cold weather environment, as well as deploying proven, stand-alone technology that provides immediate operational benefit. FY 2011 funds will be used to continue these demonstrations and deployments with an emphasis on learning how best to integrate various sensors, organizations involved in border security, and mission operations to optimize border security in this challenging environment. Lessons learned will inform the operational and system requirements for a technology solution tailored for follow-on deployments to the northern border.

## **Effective Control**

The primary goal of the Department's strategy to secure our Nation's borders is Effective Control, as described in the National Border Patrol Strategy. Effective Control is achieved when the Office of Border Patrol (OBP) determines that agents deployed in any given area are able to:

- *Detect* an illegal entry into the United States;
- *Identify and classify* the threat level associated with that illegal entry;
- *Respond* to the area of the illegal entry; and
- Bring the situation to a law enforcement *resolution* (e.g. arrest).

## **SBI Capabilities Enabling Effective Control of the Border**

Effective Control is established through the proper mix of technology, personnel, and tactical infrastructure (fencing and roads) that will allow CBP to confront and

appropriately resolve illegal cross-border activity. The mix of these three components will vary depending on the challenges of the focus area:

- *Technology* is the baseline requirement for any area of operations. It allows us to *detect the entries and to identify and classify* the threat;
- *Personnel* provide the *response* to confront illegal cross border activity; and
- *Tactical Infrastructure* supports the response by *providing access, and also extends response time by deterring or slowing* the ability to easily cross the border and escape.

The Department's strategy is to Gain, Maintain, and Expand Effective Control:

- *Gain*: Deploy resources based on known threats, vulnerability, and risk;
- *Maintain*: Sustain effective control once gained and seek efficiencies to allow us to hold the area with fewer resources; and
- *Expand*: As we gain control of any given area, activity will be displaced to other areas of operations. We will adjust deployment of resources to expand effective control to areas where there is new or increased activity.

While additional resources, tactical infrastructure, and technology will continue contributing to enhancing effective control of the Nation's borders, it is important to emphasize that effective control of a specific segment is not necessarily gained through the deployment of just one tool or resource. In most cases, fencing will be complemented with a technology component and enforcement personnel. In some cases, such as pedestrian fencing in urban areas, sensors and cameras will be installed to alert agents to any attempted breaches of the fencing. In more rural areas where vehicle fencing is installed, any range of technologies may be required to detect, monitor and facilitate a response to intrusions by foot.

Once established, border security levels remain dynamic. While the goal is always to increase the level of border security, security in a given sector may decline as a result of many factors. These factors include the effect of enforcement efforts in adjacent sectors, changes in the level or nature of activity and resource availability. Therefore, in order to maintain and expand upon our established border security levels, it is critical to continue the balanced deployment of personnel, technology, and tactical infrastructure.

Each Border Patrol sector has developed operational plans to achieve effective control of the border in their Area of Responsibility (AOR). These plans are updated annually, and provide a baseline assessment of the current level of control throughout their AOR and the resources (e.g., agents, air support, infrastructure, technology) needed to ultimately gain effective control of their AOR.

Based on an analysis of the terrain and operational dynamic, the Office of Border Patrol (OBP) determines the right mix of technology, tactical infrastructure, personnel, and other assets needed to detect, identify and classify, respond, and resolve illegal incursions in that area. OBP "rates" the different components' capabilities. Some of the key components employed today are rated against the following capabilities:

<u>Component(s)</u>	<u>Capabilities</u>
Radars, Aircraft, Sensors	Detection and Tracking
Cameras, Agents	Identification and Classification
Fence	Persistent Impedance/Delay
Agents, Aircraft, Vehicles, Facilities, Roads, Transportation	Response & Resolution

These capability components form the basis of specific system acquisition programs. The acquisition program plans and budgets are developed and approved. Then after appropriate testing, the systems are deployed, operated, and maintained.

### **B – Budget Activities:**

SBI programs must be responsive to the needs and requirements of the mission elements that share responsibility for the security of the Nation’s borders. Within CBP, those mission elements include Office of Border Patrol (OBP), Office of Field Operations (OFO), Office of Air and Marine (OAM), and the Office of Intelligence and Operations Coordination (OIOC). In addition, SBI is charged with integrating and responding to requirements of mission elements outside of CBP – including but not limited to the U.S. Coast Guard (USCG), Immigration and Customs Enforcement (ICE), and the DHS Office of Intelligence and Analysis.

In meeting its responsibilities, SBI performs four broad types of functions: Operational Integration, Technology Demonstration, Commodity Procurement, and System Development. SBI is funded entirely by the Border Security Fencing, Infrastructure and Technology (BSFIT) appropriation that is comprised of three major investment accounts (or Program, Project, and Activities (PPAs)), which support the above functions:

#### Development and Deployment

Development and Deployment provides for surveillance and detection which consist of sensor systems, such as Unattended Ground Sensors (UGS), radars, and day/night cameras to improve CBP operational forces’ ability to detect, identify, classify, and track illegal entries and items of interest (IOIs) across all border environments. These sensor systems are deployed on fixed and relocatable towers, mobile platforms (wheeled vehicles and aircraft), and on the ground. Examples include newly developed systems, such as SBInet Block 1, and existing systems, such as the Remote Video Surveillance System and Mobile Surveillance System.

Development and Deployment also provides for Command, Control, Communications, and Intelligence (C3I) which includes sensor control and data processing, tracking, identification and classification, friendly (blue) force tracking, enhanced intelligence collection and analysis/dissemination tools, and shared situational awareness, i.e., Common Operating Picture (COP). This integrated network relies on upgraded and interoperable digital field communications, improved Command and Control (C2)

facilities, an enhanced wireless communications network such as P-25 Tactical Communications, and network and security operations.

Development and Deployment funds Tactical Infrastructure (TI), built to create persistent impedance against illicit cross-border activity. TI includes pedestrian and vehicle fencing, roads, bridges, brush removal, and lighting installed in relevant areas to support border enforcement activities.

Finally, Development and Deployment provides for related activities, such as technical support, systems engineering services, prime contractor program management and systems engineering, advanced technology development, Operational Test & Evaluation support, and environmental planning, assessment and mitigation activities associated with fielding technology and tactical infrastructure.

#### Operations and Maintenance (O&M)

Operations and Maintenance funds provide logistics support – supply, maintenance, and training services – to operate and maintain all *SBI*net deployments and legacy surveillance and communication systems. A combination of government and contractor logistics activities provide maintenance management, system support analysis, call center operations, asset management, critical property, spare parts storage, management and inventory records, field services, and training.

In addition, O&M provides maintenance and repair (M&R) services for all types of TI, both legacy and newly constructed, to include maintenance and repair of fences, gates, roads, bridges, drainage structures, grates, lighting, and electrical systems; vegetation management and control; and debris removal. It also includes the development and implementation of a tracking system to capture and store O&M data so that future maintenance work can be better scoped and planned.

#### Program Management

Program Management funds provide for the necessary government and support personnel, tools, planning, processes, procedures, and resource matrices in an integrated and effective manner to enable all other program objectives to be successfully implemented, while ensuring alignment across the program.

### **C – Budget Request Summary:**

CBP requests 200 (FTE) full time positions and \$574,173,000 for FY 2011. The total adjustments-to-base is a negative \$67,496,000. The program changes include a total program decrease of \$158,331,000 to:

- Development and Deployment for any new tactical infrastructure and new SBI technology investments. (\$135,107,000)
- Program Management for contractor support and environmental planning. (\$23,224,000)

## II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

**Department of Homeland Security**

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U.S. Customs and Border Protection  
Border Security Fencing, Infrastructure, and Technology:  
Program Management  
Program Performance Justification  
(Dollars in Thousands)**

#### PPA: Program Management

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2009 Actuals</b>	<b>200</b>	<b>183</b>	<b>67,574</b>
<b>2010 Enacted</b>	<b>200</b>	<b>200</b>	<b>92,000</b>
2011 Adjustments-to-Base	-	-	397
<b>2011 Current Services</b>	<b>200</b>	<b>200</b>	<b>92,397</b>
2011 Program Change	-	-	(23,224)
<b>2011 Total Request</b>	<b>200</b>	<b>200</b>	<b>69,173</b>
Total Change 2010 to 2011	-	-	(22,827)

CBP requests \$69.2 million for Program Management. This is a decrease of \$22.8 million below FY 2010. The request includes:

- an increase of \$128 thousand for FY 2010 pay annualization
- an increase of \$269 thousand for FY 2011 pay inflation
- a decrease of \$23.224 for contractor support and environmental planning

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

Program Management funds provide for the necessary government and support personnel, tools, planning, processes, procedures, and resource matrices in an integrated and effective manner to enable all other program objectives to be successfully implemented, while ensuring alignment across the program. For FY 2011, Program Management provides for 200 government employees to staff the CBP Program Offices, supplemented by a reduced number of contractor support personnel. Also included are travel, office supplies and equipment, and other expenses necessary to conduct program office operations.

Further, the request includes \$20 million that will be used for ongoing environmental planning (surveys and assessments in deployment areas), environmental impact mitigation projects, as well as program management tools and support from partner agencies.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Border Security Fencing, Infrastructure, and Technology:  
SBI net Operations and Maintenance  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: SBI net Operations and Maintenance**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	<b>112,416</b>
<b>2010 Enacted</b>	-	-	<b>200,000</b>
2011 Adjustments-to-Base	-	-	(30,643)
<b>2011 Current Services</b>	-	-	<b>169,357</b>
<b>2011 Total Request</b>	-	-	<b>169,357</b>
Total Change 2010 to 2011	-	-	(30,643)

CBP requests \$169.4 million for Operations and Maintenance. This is a decrease of \$30.6 million from FY 2010. The reduction reflects delays to the Block 1 deployment schedule.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Operations and maintenance funds are required to support SBI technologies, surveillance systems (both “legacy” and Block 1), and tactical infrastructure acquired with previous acquisition funding incorporated into the SBI program. Specifically, the BSFIT O&M funding requirements are for:

- Fixed and mobile surveillance and detection systems for improved detection and identification capabilities across all border environments, including radars, cameras, sensors, as well as P-25 tactical communications upgrades;
- Physical infrastructure that has been built, to include maintenance of tactical infrastructure roads, vehicle and pedestrian fences, port of entry barriers, lights, bridges, etc; the towers for technology and surveillance also require regular recurring maintenance, including the maintenance of access roads;
- Command, control, communications and IT systems, to include the COP, case processing, intelligence systems and applications, wireless communications, Network/Security Operations Center; and
- System support analysis, call center operations, asset management, critical property, spare parts storage, management and inventory records, field services, maintenance, overhaul, and training.

The BSFIT O&M budget reduction from FY 2010 to FY 2011 reflects two ongoing concerns, as follows:

- The schedule for Block 1 deployments has been delayed one year from the plans articulated in the FY 2010 budget submission. Emerging technical issues and CBP's commitment to deliberately and comprehensively review the quality and effectiveness to the system has delayed the Block 1 deployment schedule. Therefore, the need to sustain this technology has also been deferred by one year. As Block 1 deployments are completed, future O&M funding requirements will progressively increase.
- CBP is also transitioning its logistics support activities (e.g., Block 1 maintenance, supply operations, security/network operations, etc) from contracted support to CBP full-time government personnel. This transition offers significant overall cost savings for the government, but is dependent on progress with Block 1 deployments. FY 2010 funding will be used to initiate this logistics transition.

Given these concerns, CBP will carryover approximately \$20 million of O&M funding into FY 2011. CBP reduced the FY 2011 O&M request accordingly, thereby showing an adjustment to FY 2011 funding requirements.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Border Security Fencing, Infrastructure, and Technology:  
SBI-net Development and Deployment  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: SBI-net Development and Deployment**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	<b>442,635</b>
<b>2010 Enacted</b>	-	-	<b>508,000</b>
2011 Adjustments-to-Base	-	-	(37,250)
<b>2011 Current Services</b>	-	-	<b>470,750</b>
2011 Program Change	-	-	(135,107)
<b>2011 Total Request</b>	-	-	<b>335,643</b>
Total Change 2010 to 2011	-	-	(172,357)

CBP requests \$335.643 million for Development and Deployment. This is a decrease of \$172.3 million below FY 2010. The request includes:

- a decrease of \$16.7 million to non-recur the FY 2010 northern border technology investments
- a decrease of \$20.5 million to fully non-recur the FY 2010 P-25 Tactical Communications modernization initiative
- a decrease of \$135.1 million, which reduces funding for new tactical infrastructure investments, technology, and development

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In conjunction with CBP agents and officers, Development and Deployment provides technology and tactical infrastructure solutions that help CBP achieve effective control of the U.S. borders. When fully implemented, SBI Technology and Tactical Infrastructure will improve the Border Patrol agents' abilities to rapidly and effectively respond to illegal activities and help DHS and CBP manage, control, and secure the border.

Due to the interdependency of SBI components, each component is vital to the system's overall success. A system with the technology to detect, identify, and classify illegal entries and criminal activity, but without the human capability for a rapid response or interdiction, cannot complete the law enforcement mission. Conversely, law enforcement personnel with inadequate intelligence, physical infrastructure, and technology required

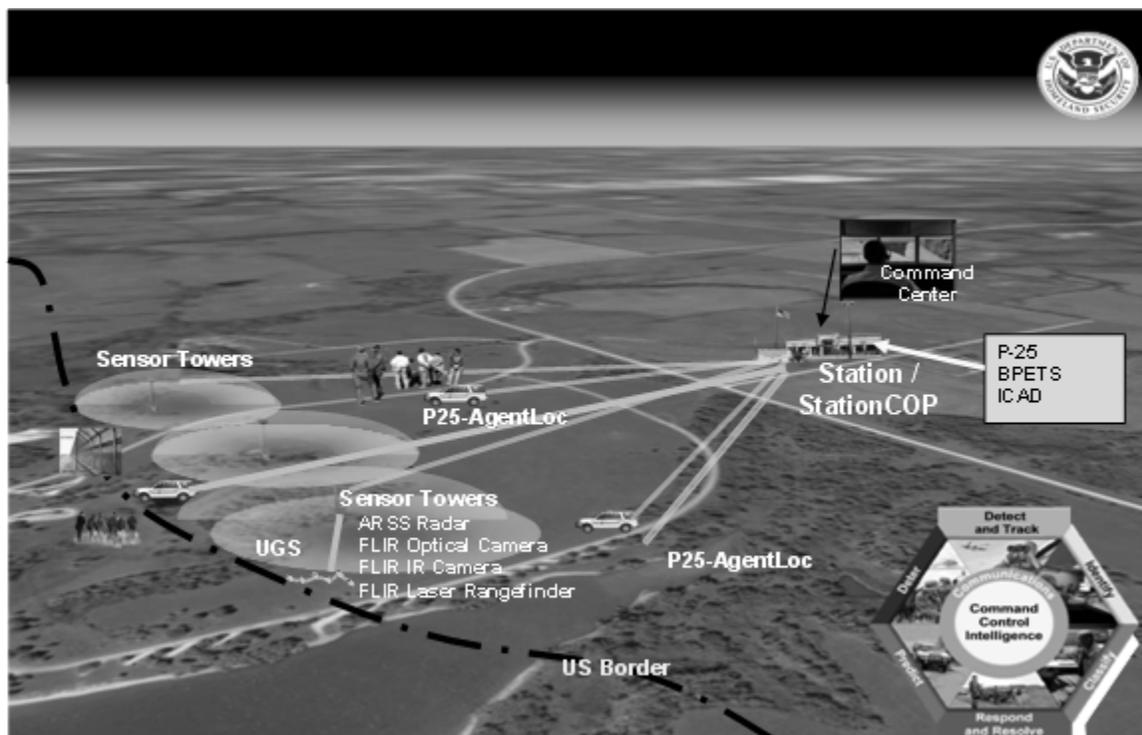

for situational awareness, or equipment necessary to conduct enforcement activities are much less likely to be effective in today's dynamic border enforcement environment.

### **SBInet Block 1**

Efforts thus far have been focused on the design, development, integration, and testing of the first increment of *SBInet* functionality, called Block 1, the deployment laydown design, and the associated environmental and land acquisition activities. Block 1 is applicable to the southwest border desert environment between the ports of entry. The Block 1 system configuration consists of the following initial components:

- Fixed Tower segments (both sensor and communication towers)
- Advanced Radar Surveillance System (ARSS) radar
- Electro-optical Infrared camera
- Unattended Ground Sensors (UGS)
- Laser Range Finder
- Microwave Backhaul Communications
- Command, Control, Communications, and Intelligence (C3I) COP Software Release 0.5

See the figure below, which depicts how the components of *SBInet* Block 1 are used to provide an end-to-end system solution for border security:

**Operational View of SBInet Block 1**

Based on approval of the DHS Acquisition Review Board (ARB) in January 2009, *SBInet* Block 1 is being deployed initially to two areas within the Tucson Sector of

Arizona, referred to as TUS-1 and AJO-1. Following a System Acceptance Test and Operational Test and Evaluation in late 2010, a production decision will be requested to acquire and complete the remaining Arizona Border Patrol stations. FY 2011 funds will be used for Naco, Willcox, and Casa Grande stations. These deployments, when combined with personnel and tactical infrastructure, will contribute significantly towards the effective operational control across the Arizona border.

### **Other Technology Deployments**

As part of SBI's evolving acquisition strategy to expand its border security solutions across a wider spectrum of CBP operational users, the SBI SPO is assessing near-term, non-developmental, low-cost technologies that can provide high payoff capabilities for urgent and compelling needs. In addition to Block 1 deployments, CBP will continue to address pressing operational needs with other proven technology capabilities, such as Remote Video Surveillance Systems (RVSS), Mobile Surveillance Capabilities (MSC), Unattended Ground Sensors (UGS), or other available, lower-cost solutions. The Innovative Technology Pilot Program will rapidly and continually expand and improve the technology tools available for border control by piloting readily available capabilities with operators in the field and getting their feedback. To support this expanded portfolio of technologies, SBI is also looking at Open Architecture software implementations that would permit future integration of these technologies and sensor information for enhanced border security operations.

### **P-25 Tactical Communications**

CBP has a critical need to modernize its tactical communication assets and move from a mixed analog/digital, leased circuit based architecture to an integrated internet protocol/quality of service-based digital network environment. The P-25 Tactical Communication Project upgrades CBP Land Mobile Radios to P-25 systems and enables the *SBI*net COP to leverage P-25's inherent Global Positioning System (GPS) feature to track "friendly" forces. The P-25 tactical communications modernization provides:

- Initiation and assessment planning for each sector;
- Requirements gathering and radio frequency (RF) site survey analysis;
- System design – system includes subscriber units, civil infrastructure, communications infrastructure (repeaters, controllers) and dispatch equipment—P-25 modernization is dependent on *SBI*net to provide microwave backhaul in a given project area;
- Spectrum planning and site leasing;
- Equipment and infrastructure construction and installation; and
- Acceptance testing, training, and close out.

Prior year funds were used to support P-25 construction and deployment activities for El Paso, Rio Grande Valley, and Laredo Sectors. Subject to operational priorities, FY 2011 funds will be used to continue Rio Grande Valley and Laredo construction and deployment activities.

## **Northern Border Projects**

CBP continues to have significant involvement in the development of a comprehensive DHS Northern Border Strategy, and *SBI<sub>net</sub>* represents only one piece of a larger CBP investment to the north. *SBI<sub>net</sub>* is in the process of demonstrating technology for addressing the needs and vulnerabilities of the northern border maritime (river/lake), cold weather environment, as well as deploying proven, stand-alone technology. Prior year BSFIT and Border Patrol funds are being used to deploy existing sensor systems to Detroit, Buffalo, and Swanton Sectors to provide immediate operational capability and also allow evaluation of these systems for their suitability to the northern border environment.

Current Northern Border Projects consists of two main elements: Increment 1 – Northern Border Surveillance Project; and Increment 2 – Northern Border Integration Demonstration. For Increment 1, the Northern Border Surveillance Project, three Mobile Surveillance System (MSS) units, consisting of truck-mounted sensor suites of day and night cameras and a radar, were deployed to Swanton, Detroit, and Buffalo Sectors in mid-2009. In addition, Remote Video Surveillance Systems (RVSSs) – day and night cameras with remote control (pointing) from a Border Patrol station (command center) – are currently being deployed to Buffalo and Detroit Sectors, to be completed by early 2010. Buffalo Sector deployments are along the Niagara River, where five new RVSSs will augment four existing RVSSs in Buffalo to expand coverage. Detroit Sector deployments consist of eleven RVSSs along the St. Clair River. RVSSs are being deployed and operated incrementally as construction is completed.

Increment 2, the Northern Border Integration Demonstration, supports and enhances border security in the Detroit Area of Operations. The threats of concern in the Detroit area are similar to those that U.S. Border Security agencies and their mission partners must contend with along the southern border. The threats of interest include, but are not limited to, terrorist activity, drug smuggling, contraband smuggling, human smuggling, and mala fide travelers. These threats represent significant challenges to border security in the northern border areas where sightlines can be significantly shorter, urban and wilderness environments can limit access, and natural barriers are not as great a hindrance. Increment 2 will provide U.S. Border Security agencies and their mission partners improved means of meeting these challenges through enhancing operational integration between agencies, more effective resource deployment, and by providing new technical tools to support the planning and execution of operations.

Increment 2 implementation is underway with operation set to begin in mid-2010. The goals of the project are to provide operational integration of border security efforts in the Detroit area, improve detection capabilities in the vicinity of the St. Clair River area, and enhance the situational awareness for the CBP and their mission partners in the region. Operational integration will be improved by developing and sustaining an Operational Integration Center (OIC) at Selfridge Air National Guard Base. This OIC will provide a collaborative work area and communications capabilities for representatives of all

components of Customs and Border Protection, United States Coast Guard and other DHS organizations, Federal Law Enforcement agencies, state and local law enforcement, and Canadian officials. The OIC will provide surge capabilities to support collaboration among more than 40 personnel from different agencies. This includes law enforcement intelligence coordination.

The detection capabilities will be improved, through the addition of sensors, consolidation and display of video feeds from multiple sources, and by providing downlink of video for Office of Air and Marine assets. The situational awareness capabilities will be enhanced through the integration of multiple information feeds at the OIC. These information feeds include selectable radar and camera feeds, FAA and DoD radar information, blue force location, database query, enhanced communications, chat capabilities, remote sensors inputs, and many other information services. This system will provide customizable views at each of the OIC workstations, allowing partners to gather and consolidate the information required to plan and perform their mission in the operational environment.

CBP is also launching Increment 3 with FY 2010 enacted funding of \$40 million. The objective of Increment 3 is to make balanced investments in filling capability gaps against priority threats in high threat areas across the northern border. The planned use of FY 2010 funding for Increment 3 is to pursue improvements in Air and Maritime surveillance, such as:

- Planning and preparing for the development and deployment of an initial capability for providing Low Flying Aircraft Surveillance;
- Beginning technology investigations, improvements, and integration with Maritime Radar systems, a P-3 Airborne Early Warning Pilot Program, and an Aircraft Video Data Link;
- Continuing development and deployment of Law Enforcement Technical Collection (LETC) systems and technologies; and
- Continuing integrated sensor evaluation, integrated mission planning and operations through the Detroit (Selfridge ANG Base) Operational Integration Center.

Included within the FY 2011 request is \$40 million to be used to continue and enhance previous demonstrations and deployments throughout priority locations along the northern border- Increment 4.

### **Tactical Infrastructure**

Tactical Infrastructure (TI) is one of the layers of the systematic law enforcement approach necessary to gain effective control of identified border areas. Pedestrian and vehicle fences provide persistent impedence so that agents and officers can gain a tactical advantage. The added physical barrier affords agents additional cover making physical assaults more difficult to carry out. Some examples of the types of TI are pictured below:

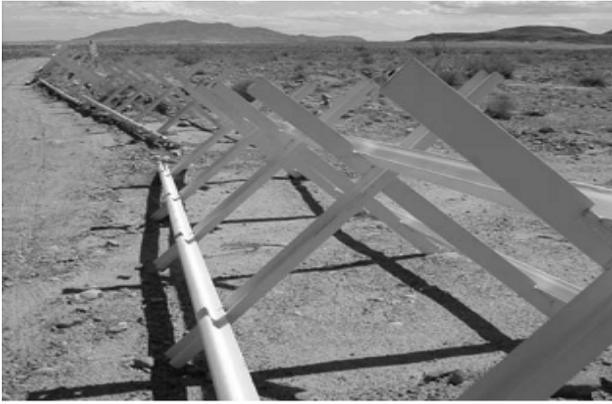

**Bollard Pedestrian Fence with Steel Sheath Extension**

**Bollard Pedestrian Fence with Fence Caps**

**Post-on-Rail Vehicle Fence**

### **Normandy Vehicle Fence**

As of January 1, 2010, through TI, CBP has constructed fencing totaling 642.8 miles along the southwest border (344.3 miles of pedestrian and 298.5 miles of vehicle fence). The few remaining segments are anticipated to be complete by December 2010.

For FY 2010, the current OBP operational requirements for the nine southwest border sectors also call for:

- the completion of gates in the Rio Grande Valley Sector required to complete the Pedestrian Fence 225 (PF 225) program; and
- the construction of additional primary pedestrian fencing the Rio Grande Valley Sector, pending approval from the Secretary of Homeland Security.

Additional funding in FY 2010 will also be used to fund the remaining real estate costs associated with adverse condemnations for the PF 225 program.

Completion of these requirements will contribute to the ability of OBP to obtain effective control of the southwest border. Note that as tactical infrastructure is constructed, shifts in illegal cross-border traffic may necessitate re-evaluating and adjusting operational requirements and priorities to address new vulnerabilities and/or officer safety.

For FY 2011, CBP is requesting \$25 million for new TI projects. CBP operators have identified priority projects, which include the completion of primary pedestrian fence in the El Paso Sector, tunnel gates in the Tucson Sector and replacement of the surf fence in the San Diego Sector.

## IV. Program Justification Changes

**Department of Homeland Security  
U.S. Customs and Border Protection  
Border Security Fencing, Infrastructure, and Technology:  
Program Management  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 1:** Reduction to Contractor Support and Environmental  
PPA: Program Management  
Program Decrease: Positions 0.0, FTE 0.0, Dollars \$-23224.0

### Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Decrease							-	-	(23,224)
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>(23,224)</b>

### Description of Item

The funding reduction of \$23.2 million will decrease the FY 2011 funding request for BSFIT Program Management (PM) to \$69.2 million.

- (\$8.2 million) Reduction to the SBI program office contractor support personnel – The SBI program office recently concluded a major consolidation of contractor support requirements and billets through a competitive contract award. The new contract should be in place during 2010, and therefore the program is planning on reduced funding needs to maintain future contractor support personnel.
- (\$15.0 million) Reduction to planned Environmental Planning activities for BSFIT-related projects. Congress earmarked funds in the PM PPA for environmental planning, assessments, and mitigation projects (\$50 million in FY 2009, \$40 million in FY 2010) in support of the Tactical Infrastructure and SBI*net* Block 1 deployments in the southwest border area. In FY 2011, new Tactical Infrastructure is reduced, and accordingly there will be less environmental planning and mitigation required for future BSFIT projects.

### Justification

For BSFIT program management, SBI is striving to establish a program office consisting of a majority of government personnel with requisite engineering, business, contracting, and acquisition/program management qualifications and experience. As SBI is successful in increasing the government ranks, SBI is decreasing the numbers of contractor support personnel needed. By FY 2011, SBI projects a significantly lower number of contractor support personnel needed to augment the projected government staff.

For environmental planning, SBI and other CBP partners believe the need for detailed environmental planning and assessments will decrease considerably as new Tactical Infrastructure projects are reduced given the decline in new TI investment. The remaining funds will be adequate to (1) maintain detailed planning and assessments for planned *SBI*net Block 1 deployments in Arizona; (2) maintain detailed planning and assessments for planned technology deployments in northern border regions; as well as (3) maintain ongoing environmental mitigation projects and commitments in southwest border areas where TI and Block 1 have been deployed.

### Impact on Performance (Relationship of Decrease to Strategic Goals)

The above reductions are consistent with mission and fiscal priorities. CBP anticipates no significant impact to CBP operational performance due to the proposed BSFIT PM reductions.

PPA: SBI<sup>net</sup> Development and Deployment  
Program Decrease: Positions 0.0, FTE 0.0, Dollars \$-135107.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	470,750
Program Decrease							-	-	(135,107)
<b>Total Request</b>	-	-	<b>442,635</b>	-	-	<b>508,000</b>	-	-	<b>335,643</b>

Description of Item

The funding reduction of \$135.1 million will decrease the FY 2011 funding request for BSFIT Development and Deployment (D&D) to \$335.643 million. The Department's current plan is to complete the deployment of SBI<sup>net</sup> Block 1 in FY 2013. SBI will maintain P-25 Tactical Communications modernization, northern border projects, and other technology deployments, such as Mobile Surveillance Systems, at a modest rate and continue to provide field maintenance and logistics support activities for deployed Tactical Infrastructure, SBI<sup>net</sup> Block 1, P-25 TACCOM, Mobile Surveillance Systems, and legacy systems. While plans to complete SBI<sup>net</sup> Block 1 in FY 2013 remain on target, significant impacts will result, to include:

- New Tactical Infrastructure investments will be reduced from \$110 million in FY 2010 to \$25 million in FY 2011.
- SBI<sup>net</sup> Block 2 design and development will be eliminated in FY 2011.
- The lessons learned from SBI<sup>net</sup> Block 1 will be incorporated into the design of a second generation situation awareness technology system.

Justification

The substantial BSFIT reductions outlined above are necessary to ensure CBP's highest priority capabilities are fully funded to achieve CBP core missions. The remaining funds will be used to complete SBI<sup>net</sup> Block 1. P-25 Tactical Communications and northern border projects have been funded in the plan. P-25 provides modern tactical communications for improved operations and agent safety.

Impact on Performance (Relationship of Decrease to Strategic Goals)

Since effective control of the border is secured using an appropriate mix of personnel, technology, and tactical infrastructure (fences, roads, lighting, brush removal, etc), reductions in all three areas will reduce and/or will significantly delay progress toward meeting DHS and CBP strategic goals.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

For expenses for [customs and border protection] border security fencing, infrastructure, and technology, [\$779,452,000] \$574,173,000, to remain available until expended[: Provided, That of the amount provided under this heading, \$400,000,000 shall not be obligated until the Committees on Appropriations of the Senate and the House of Representatives receive and approve a plan for expenditure, prepared by the Secretary of Homeland Security and submitted not later than 90 days after the date of the enactment of this Act, for a program to establish and maintain a security barrier along the borders of the United States of fencing and vehicle barriers, where practicable, and other forms of tactical infrastructure and technology, that includes the following\_][ (1) a detailed accounting of the program's implementation to date for all investments, including technology and tactical infrastructure, for funding already expended relative to system capabilities or services, system performance levels, mission benefits and outcomes, milestones, cost targets, program management capabilities, identification of the maximum investment, including life cycle costs, related to the Secure Border Initiative program or any successor program, and description of the methodology used to obtain these cost figures;][ (2) a description of how specific projects will further the objectives of the Secure Border Initiative, as defined in the Department of Homeland Security Secure Border Plan, and how the expenditure plan allocates funding to the highest priority border security needs;][ (3) an explicit plan of action defining how all funds are to be obligated to meet future program commitments, with the planned expenditure of funds linked to the milestone-based delivery of specific capabilities, services, performance levels, mission benefits and outcomes, and program management capabilities;][ (4) an identification of staffing, including full-time equivalents, contractors, and detailees, by program office;][ (5) a description of how the plan addresses security needs at the Northern border and ports of entry, including infrastructure, technology, design and operations requirements, specific locations where funding would be used, and priorities for Northern border activities;][ (6) a report on budget, obligations and expenditures, the activities completed, and the progress made by the program in terms of obtaining operational control of the entire border of the United States;][ (7) a listing of all open Government Accountability Office and the Office of Inspector General recommendations related to the program and the status of Department of Homeland Security actions to address the recommendations, including milestones to fully address such recommendations;][ (8) a certification by the Chief Procurement Officer of the Department that the program: (a) has been reviewed and approved in accordance with the investment management process of the Department, and that the process fulfills all capital planning and investment control requirements and reviews established by the Office of Management and Budget, including as provided in Circular A-11, part 7; (b) that the plans for the program comply with the Federal acquisition rules, requirements, guidelines, and practices, and a description of the actions being taken to address areas of non-compliance, the risks associated with such actions, together with any plans for addressing these risks, and the status of the implementation of such actions; (c) that procedures to prevent conflicts of interest between the prime integrator and major subcontractors are established and that

the Secure Border Initiative Program Office has adequate staff and resources to effectively manage the Secure Border Initiative program, all contracts, including the exercise of technical oversight; and (d) the certifications required under this paragraph should be accompanied by all documents or memoranda, as well as documentation and a description of the investment review processes used to obtain such certifications;][(9) a certification by the Chief Information Officer of the Department that: (a) the system architecture of the program is sufficiently aligned with the information systems enterprise architecture of the Department to minimize future rework, including a description of all aspects of the architectures that were or were not assessed in making the alignment determination, the date of the alignment determination, and any known areas of misalignment together with the associated risks and corrective actions to address any such areas; (b) the program has a risk management process that regularly and proactively identifies, evaluates, mitigates, and monitors risks throughout the system life cycle and communicates high-risk conditions to U.S. Customs and Border Protection and Department of Homeland Security investment decision-makers, as well as a listing of all the program's high risks and the status of efforts to address such risks; (c) an independent verification and validation agent is currently under contract for the projects funded under this heading; and (d) the certification required under this paragraph should be accompanied by all documents or memoranda, as well as documentation and a description of the investment review processes used to obtain such certification;][(10) a certification by the Chief Human Capital Officer of the Department that the human capital needs of the Secure Border Initiative program are being addressed so as to ensure adequate staff and resources to effectively manage the Secure Border Initiative, together with a description of SBI staffing priorities;][(11) an analysis by the Secretary for each segment, defined as not more than 15 miles, of fencing or tactical infrastructure, of the selected approach compared to other, alternative means of achieving operational control, and such analysis should include cost, level of operational control, possible unintended effects on communities, and other factors critical to the decision making process; and][(12) is reviewed by the Government Accountability Office:][Provided further, That the Secretary shall report to the Committees on Appropriations of the Senate and the House of Representatives on program progress, and obligations and expenditures for all outstanding task orders as well as specific objectives to be achieved through the award of current and remaining task orders planned for the balance of available appropriations at least 15 days before the award of any task order requiring an obligation of funds in an amount greater than \$25,000,000 and before the award of a task order that would cause cumulative obligations of funds to exceed 50 percent of the total amount appropriated: Provided further, That none of the funds provided under this heading may be obligated unless the Department has complied with section 102(b)(1)(C)(i) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1103 note), and the Secretary certifies such to the Committees on Appropriations of the Senate and the House of Representatives: Provided further, That none of the funds under this heading may be obligated for any project or activity for which the Secretary has exercised waiver authority pursuant to section 102(c) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1103 note) until 15 days have elapsed from the date of the publication of the decision in the Federal Register: Provided further, That notwithstanding the previous provisos, \$100,000,000 of the amount provided under this

heading shall be made available for obligation upon enactment of this Act without restriction]. (Department of Homeland Security Appropriations Act, 2010.)

**Explanation of Changes:**

In spite of considerable effort and attention, all of the conditions outlined for an Expenditure Plan have yet to be fully met. The root cause of not meeting all conditions stems from the highly technical nature of the conditions themselves and the auditing approach for determining compliance. Such an approach sets a very high standard for compliance, draws the focus away from a broader assessment of the overall quality of the plan, and discounts volumes of supporting information that augmented the data provided directly in the Expenditure Plan. CBP is prepared to provide the Committees with any information needed for the exercise of their responsibilities, to include embedding supporting source material in the Expenditure Plan. However, doing so will increase the difficulty in preparing, coordinating, and maintaining an already voluminous document.

A more streamlined approach would be to craft compliance conditions that focus more on the substantive quality of the plan than narrow pass/fail technical requirements. More specifically, recommend that the Committees avoid overly technical compliant requirements for the Expenditure Plan, thus limiting requirements to the minimum essential information and conditions needed to determine the overall quality of the plan. The Committees should also permit source material to be referenced and otherwise used to assess accuracy and completeness of the Expenditure Plan, rather than be embedded within the Expenditure Plan itself in order to be compliant. In addition, the Committees should consider other more flexible and responsive methods for getting the information needed, such as being involved along with the GAO during the Expenditure Plan drafting stage and using meetings and presentations to the Committees or the Committees' staffs to provide information. Finally, to avoid unintended programmatic impacts due to funding withholds, collaboration on the amount of funding being withheld is urged before it becomes legislation.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
21.0 Travel and transportation of persons	192	552	236	(316)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2011 request includes a decrease of \$127,000 associated with the reduction of contractor support and environment planning, and an adjustment of \$189,000 associated with FY 2009 carryover funds included within the FY 2010 amount.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.3 Communications utilities and miscellaneous charges	30	4,172	2,656	(1,516)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2011 Request includes a decrease of \$1,428,000 associated with the reduction of contractor support and environment planning, and an adjustment of \$88,000 associated with FY 2009 carryover funds included within the FY 2010 amount.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	43,627	82,655	30,381	(52,274)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2011 Request includes a decrease of \$16,333,000 associated with the reduction of contractor support and environment planning, and an adjustment of \$35,941,000 associated with FY 2009 carryover funds included within the FY 2010 amount.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.3 Purchases of goods & svcs. from Gov't accounts	2,037	5,379	2,407	(2,972)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2011 Request includes a decrease of \$1,294,000 associated with the reduction of contractor support and environment planning, and an adjustment of \$1,678,000 associated with FY 2009 carryover funds included within the FY 2010 amount.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.4 Operation and maintenance of facilities	6,246	16,493	7,380	(9,113)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2011 Request includes a decrease of \$3,967,000 associated with the reduction of contractor support and environment planning, and an adjustment of \$5,146,000 associated with FY 2009 carryover funds included within the FY 2010 amount.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.7 Operation and maintenance of equipment	-	11	7	(4)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2011 Request includes a decrease of \$4,000 associated with the reduction of contractor support and environment planning.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
26.0 Supplies and materials	113	46	-	(46)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2011 Request includes an adjustment of \$46,000 associated with FY 2009 carryover funds included within the FY 2010 amount.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
31.0 Equipment	374	408	130	(278)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2011 Request includes a decrease of \$71,000 associated with the reduction of contractor support and environment planning, and an adjustment of \$207,000 associated with FY 2009 carryover funds included within the FY 2010 amount.

**PPA Mission Statement**

Operations and Maintenance funds provide logistics support – supply, maintenance, and training services – to operate and maintain all SBIInet deployments and legacy surveillance and communication systems. A combination of government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, critical property, spare parts storage, management and inventory records, field services, and training.

In addition, O&M provides maintenance and repair (M&R) services for all types of TI, both legacy and newly constructed, to include maintenance and repair of fences, gates, roads, bridges, drainage structures, grates, lighting, and electrical systems; vegetation management and control; and debris removal. It also includes the development and implementation of a tracking system to capture and store O&M data so that future maintenance work can be better scoped and planned.

**Summary Justification and Explanation of Changes**

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>21.0 Travel and transportation of persons</b>	<b>36</b>	<b>200</b>	<b>48</b>	<b>(152)</b>

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2011 request includes an adjustment of \$152,000 associated with FY 2009 carryover funds included within the FY 2010 amount.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.2 Rental payments to others	321	-	-	-

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

**PPA Mission Statement**

Development and Deployment provides for surveillance and detection which consist of sensor systems, such as Unattended Ground Sensors (UGS), radars, and day/night cameras to improve CBP operational forces' ability to detect, identify, classify, and track illegal entries and items of interest (IOIs) across all border environments. These sensor systems are deployed on fixed and relocatable towers, mobile platforms (wheeled vehicles and aircraft), and on the ground. Examples include newly developed systems, such as SBIInet Block 1, and existing systems, such as the Remote Video Surveillance System and Mobile Surveillance System.

Development and Deployment also provides for Command, Control, Communications, and Intelligence (C3I) which includes sensor control and data processing, tracking, identification and classification, friendly (blue) force tracking, enhanced intelligence collection and analysis/dissemination tools, and shared situational awareness, i.e., Common Operating Picture (COP). This integrated network relies on upgraded and interoperable digital field communications, improved Command and Control (C2) facilities, an enhanced wireless communications network such as P-25 Tactical Communications, and network and security operations.

Development and Deployment funds Tactical Infrastructure (TI), built to create persistent impedance against illicit cross-border activity. TI includes pedestrian and vehicle fencing, roads, bridges, brush removal, and lighting installed in relevant areas to support border enforcement activities.

Finally, Development and Deployment provides for related activities, such as technical support, systems engineering services, prime contractor program management and systems engineering, advanced technology development, Operational Test & Evaluation support, and environmental planning, assessment and mitigation activities associated with fielding technology and tactical infrastructure.

## Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>21.0 Travel and transportation of persons</b>	1,562	968	145	(823)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2011 request includes an adjustment of \$823,000 associated with FY 2009 carryover funds included within the FY 2010 amount.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>22.0 Transportation of things</b>	-	22	-	(22)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2011 request includes an adjustment of \$22,000 associated with FY 2009 carryover funds included within the FY 2010 amount.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>23.2 Rental payments to others</b>	267	867	157	(710)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2011 request includes an adjustment of \$710,000 associated with FY 2009 carryover funds included within the FY 2010 amount.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>23.3 Communications utilities and miscellaneous charges</b>	327	385	192	(193)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2011 request includes an adjustment of \$193,000 associated with FY 2009 carryover funds included within the FY 2010 amount.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>25.1 Advisory and assistance services</b>	3	4	2	(2)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2011 request includes an adjustment of \$2,000 associated with FY 2009 carryover funds included within the FY 2010 amount.

## BUDGET REQUEST AND SUPPORTING INFORMATION

### Automation Modernization

## I. Appropriation Overview

### A – Mission Statement for Automation Modernization

To further the U.S. Customs and Border Protection (CBP) mission of securing our nation's borders while facilitating legitimate trade, CBP is in the midst of modernizing its information technology systems. The foremost automation effort is the phased implementation of the Automated Commercial Environment (ACE), which is being developed and deployed in phases and will replace the current trade management system, the Automated Commercial System (ACS). ACE will provide tools and enhance the business processes that are essential to securing U.S. borders from terrorists by providing intelligence required to target illicit goods, while ensuring the efficient processing of legitimate goods. ACE capabilities have been designed to identify potential risks, analyze information prior to arrival of people and cargo, and provide intelligence in easy-to-use formats. As a web-based system, ACE will provide users from government and the trade community with new, more efficient ways of accessing, processing, and sharing trade-related information. CBP is modernizing their infrastructure via COPPS which provides nearly all the CBP IT infrastructure to operate and maintain mission-critical IT systems requisite to securing the borders while facilitating legitimate trade and travel. TECS provides critical border enforcement and port of entry (POE) processing capabilities. TECS Modernization is a multi-year project that will enhance CBP's mission capabilities by developing and deploying a modernized TECS. The Terrorism Prevention Systems Enhancement (TPSE) initiative focuses on enhancing our system infrastructure and the supporting enterprise services that enhance our continuity of operations.

### B – Budget Activities:

#### Automated Commercial Environment/ International Trade Data System (ITDS)

The Automated Commercial Environment (ACE) is a U.S. Customs and Border Protection (CBP) initiative designed to reengineer agency business processes and modernize the IT systems that support them. Initially, ACE was created in response to the Title VI of the North American Free Trade Agreement Implementation Act, commonly referred to as the Modernization Act (Mod Act) of December 1993 to focus on import processing, which would be followed later by other elements of customs modernization, such as enforcement. An overarching goal of the Mod Act was to place a greater responsibility upon the trade community to comply with import requirements.

In 2001, the U.S. Customs Service (now part of CBP) embarked on ACE as its first project in a multi-year modernization effort. The terrorist attacks on September 11, 2001 modified this singular focus. ACE is now being developed to support the CBP mission of

protecting the American public against terrorists and the instruments of terror and enforcing the laws of the United States while fostering our Nation's economic security through the facilitation of lawful international trade and travel.

CBP has also aligned ACE with the DHS mission and strategic goals. ACE will help reduce our Nation's vulnerability to threats without diminishing economic security by providing threat awareness, prevention, and protection for the homeland. Specifically, ACE will provide DHS personnel with more automated tools and information to decide, before a shipment reaches U.S. borders, what cargo should be targeted because it poses a potential risk and what cargo should be expedited because it complies with U.S. laws.

### Critical Operations Protection & Processing Support

The Critical Operations Protection and Processing Support (COPPS) PPA provides funds for three initiatives: the COPPS Information Technology (IT) infrastructure initiative; TECS modernization; and Terrorism Prevention Systems Enhancements (TPSE). The COPPS initiative provides nearly all the CBP IT infrastructure to operate and maintain mission-critical IT systems requisite to securing the borders while facilitating legitimate trade and travel. The infrastructure provides the support for maintaining a reliable trade management system that maximizes compliance with the law, moves legitimate cargo efficiently; targets high risk shipments, secures our borders, facilitates movement of international travel and protects the public from contraband. TECS provides critical border enforcement and POE processing capabilities. TECS Modernization is a multi-year project that will enhance CBP's mission capabilities by developing and deploying a modernized TECS. TECS provides critical border enforcement and POE processing capabilities. TECS is a key system for border enforcement and sharing of information about people who are inadmissible or may pose a threat to the security of the United States. The TPSE initiative focuses on enhancing our system infrastructure and the supporting enterprise services that enhance our continuity of operations. TPSE will enable 24x7x365 systems operational availability to meet the future processing and storage/backup requirements for passenger screening while enhancing the existing systems.

### **C – Budget Request Summary:**

U.S. Customs and Border Protection requests \$347,575,000 and 63 positions and 63 FTE for the FY 2011 Automation Modernization account. The request includes an adjustment to base decrease of \$74,870,000.

<b>2011 Total Request</b>	<b>62</b>	<b>62</b>	<b>153,090</b>
Total Change 2010 to 2011	-	-	(74,870)

The President's Budget requests \$153.090 million for ACE/ITDS. This is a decrease of \$74.870 million from FY 2010. The request includes:

- increase of \$0.041 million for pay annualization and \$0.089 million for pay inflation
- decrease of \$75 million for ACE/ITDS non-recurs

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Automated Commercial Environment (ACE) is a U.S. Customs and Border Protection program designed to reengineer agency business processes and modernize the Information Technology systems to support them. ACE was created in response to the Title VI of the North American Free Trade Agreement Implementation Act. An overarching goal of this Act was to place greater responsibility upon the trade community to comply with import requirements.

ACE benefits include:

- Enhanced cargo control business processes for imports and exports
- Reduction of costly labor and paper intensive activities
- Trade data reporting to multiple agencies via a single, secure, Internet based portal

- Enhanced revenue collection capability
- Ability to view and manage trade activity from a national account perspective

To date, ACE has deployed 10 drops of functionality, which are strengthening national security, facilitating the flow of legitimate trade, and providing industry with new tools that save them money and help them comply with U.S. laws. Capabilities deployed to date include: ACE Foundation; Account Creation; Periodic Monthly Statement; three drops of screening and targeting functionality; Enhanced Accounts; Reference Data; e-Manifest Trucks; Initial Entry Summary Types.

**Delivered Capabilities – 10 Successful Drops**

**ACE Foundation, Account Creation, Periodic Monthly Statement, Screening Foundation, Targeting Framework, Advanced Targeting, Enhanced Accounts, Reference Data, e-Manifest Trucks, Initial Entry Summary Types**

<b>Anti-terrorism</b>	<b>Trade Facilitation</b>
<ul style="list-style-type: none"> <li>• <b>Targets new information</b></li> <li>• <b>Links information on all entities</b></li> <li>• <b>Sends enforcement alerts</b></li> <li>• <b>Uses business rules-based engine</b></li> <li>• <b>Allows end users to define and maintain rules</b></li> <li>• <b>Provides access external intelligence data sources</b></li> <li>• <b>Increases referrals to secondary through focused targeting</b></li> </ul>	<ul style="list-style-type: none"> <li>• <b>Enables quicker processing</b></li> <li>• <b>Fosters efficiency in the primary booth</b></li> <li>• <b>Provides Trade Partner savings</b></li> <li>• <b>Expands PGA involvement</b></li> <li>• <b>Provides Trade access to import data</b></li> <li>• <b>Increases communication between CBP and Trade Partners</b></li> </ul>

Through the ACE Secure Data Portal, CBP and trade community users now have an account-based view of CBP data, enabling companies to proactively monitor compliance issues and giving CBP a broader, national view of trade activities. Overall, there are more than 16,500 ACE portal accounts.

The Periodic Monthly Statement allows importers and brokers with ACE accounts to centralize payment processing and to utilize Periodic Monthly Statement and payment capabilities through Automated Clearinghouse Credit and Debit. It also provides an initial customer account-based subsidiary ledger interface with the CBP general ledger for financial transaction processing and an expanded account view into account activity logs and exam findings. Other benefits include cash flow benefits through payment of duties and fees on a monthly basis, online tracking of trade activities through customized account views, and access to more than 100 customizable reports that can be used to track compliance and monitor daily operations. On average, 50 percent of duties and fees are paid via Periodic Monthly Statement, representing approximately \$1 billion dollars per month.

The Screening and Targeting functionality is comprised of Targeting Framework and Advanced Targeting. The Screening and Targeting functionality performs automated screening and targeting of inbound and outbound cargo across the borders of the United States and also provides the framework for all U.S. Government agencies involved in security, economic, and safety missions to leverage advanced risk assessment information and automated targeting systems. This framework provides a modernized National Targeting Center analyst workflow, case management, and single sign-on capability system. Through the Targeting Framework, the National Targeting Center has the ability to initiate activities, foster collaboration among analysts, and access past activity logs and external data sources for additional intelligence.

The Advanced Targeting drop extends the risk-management life cycle with increasing analysis capabilities and feedback into targeting effectiveness. This drop combined Screening Foundation and Automated Targeting System targeting capabilities into a single platform that leverages new methods for developing targets while incorporating existing ATS targeting concepts and has allowed a seamless integration of functionality without interruption of services to the users. Advanced Targeting uses targeting performance metrics defined by recorded results and rule-based risk assessments to evaluate targeting approaches and provide recommendations for adjustments.

In September 2007, CBP deployed Entry Summary, Accounts, and Revenue (ESAR): Master Data and Enhanced Accounts (A1) capabilities. These capabilities expanded the number of ACE account types to include virtually every entity doing business with CBP, provided enhanced ACE Secure Data Portal account management features, and laid the foundation for a future integrated, account-based financial and entry summary processing system in ACE.

The e-Manifest: Trucks capability, which includes an automated truck manifest system, expedites information processing and brings the ACE portal interface to CBP officers. This enhanced security and facilitates clearance of trucks entering the country by providing officers with access to shipment, crew, and conveyance data before the truck reaches the border. E-Manifest: Trucks enables targeting of illicit goods that require scrutiny and allows the free flow of legitimate trade. This capability is now operational at all land border Ports of Entry. ACE has reduced truck processing times by 24 percent, enabling officers to dedicate more time to border security activities.

The deployment of initial entry summary processing functionality allows the trade community and CBP to file and process the most common entry summary types via ACE. These entry summaries represent nearly 98 percent of all entries eligible to be filed each year. ACE automates the most commonly used CBP forms and processing entry types. The new ACE entry summary processing capabilities allow ACE Secure Data Portal importer account holders the option to receive and respond to CBP forms electronically through the ACE portal. Electronic responses are stored with associated entry summaries, enabling them to be shared within CBP nationwide. Modernizing the entry summary process enhances uniformity and facilitates compliance for those filing for

entry. Entry summary processing for remaining entry types will be added throughout the next few years.

Other Government agencies are better able to fulfill the mandate set forth under the Security and Accountability for Every Port Act of 2006 which requires agencies with licensing and admissibility requirements to participate in the International Trade Data System (ITDS) access to ACE. ITDS is the mechanism for coordinating intergovernmental involvement with ACE. A total of 46 government agencies are currently participating in the ACE/ITDS initiative. Once fully utilized, ITDS will provide unprecedented interagency coordination and information sharing, ultimately making ACE the “single window” for the collection and dissemination of trade data. This capability reduces Government and private sector costs through the elimination of unnecessary paperwork while enabling electronic processing of trade documentation.

The on-going development of ACE is still a challenging and complex endeavor. Program re-planning efforts have been completed and the priorities for the remainder of the ACE program have been determined. FY 2010 and 2011 will focus on the completion of ACE cargo release functionality and the development of enhanced entry summary processing features. ACE in FY 2011 will enter into an operations and maintenance mode.

Specifically for FY 2010, there are four ACE projects that are planned. They are detailed below:

- E-Manifest: Rail and Sea will provide cargo manifest processing for rail and sea modes of transportation and the creation of a unified, multi-modal environment that will support all modes of transportation. CBP expect full operational capability by the first quarter of FY 2011.
- E-Manifest: Air will provide air cargo into the multi-modal manifest processing environment shared by the rail and sea modes of transportation. Drop M2.1 will result in the rail, sea, and air modes of transportation sharing a common repository and reference files in an environment of enhanced functionality access via the portal. Full operational capability for this release is dependent upon the successful completion of e-Manifest: Rail and Sea Manifest.
- Cargo Release will provide for collection of additional data elements to support participating government agency as well as CBP. Full operational capability for this release is dependent upon the successful completion of e-Manifest: Rail and Sea Manifest.

ESAR: Remaining Entry Summary Types will implement some of the remaining basic entry summary transactions such as post-summary corrections. The ESAR: Remaining Entry Summary Types will also implement document image capture. CBP expects full operational capability by the first quarters of FY 2011.

<b>2011 Total Request</b>	<b>1</b>	<b>1</b>	<b>194,485</b>
Total Change 2010 to 2011	-	-	-

The President’s Budget requests \$194.485 million for COPPS. The request reflects the same level as the FY 2010 enacted level.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The COPPS IT infrastructure program provides nearly all the CBP IT infrastructure to operate and maintain mission-critical IT systems needed to secure the borders while facilitating legitimate trade and travel. The IT infrastructure is the backbone that supports CBP’s systems. These systems allow for a unified border presence and provide for more efficient and effective sharing of information amongst trade and law enforcement agencies. CBP’s IT infrastructure serves a variety of federal, state, local, and international government agencies. These agencies have varying missions and strategic goals, but collectively their purpose is to minimize threats to the American people. The IT systems are vital tools that CBP and other federal agencies use to defend our borders and support ports of entry. The IT infrastructure systems assist CBP officers to identify potential catastrophic threats, including terrorists, weapons of mass destruction and bioterrorism. The systems provide the means by which U.S. criminal and trade laws are enforced and provide the capability to collect tariffs and taxes associated with international trade and commerce.

CBP facilitates trade and the efficient processing of international travelers with multiple types of information technology systems. The technology used by CBP enables CBP to continually improve the selectivity of low-risk cargo, vehicles, and people while expediting the clearance process. The infrastructure provides the support for maintaining a reliable trade management system that maximizes compliance with the law, moves legitimate cargo efficiently, targets high risk shipments, secures our borders, facilitates movement of international travel, and protects the public from contraband.

By keeping the IT infrastructure secure, available, and reliable, CBP greatly improves the ability of CBP employees to make timely decisions and to take appropriate action in protecting our Nation's borders.. CBP's infrastructure requirements continue to grow, both in response to greater DHS requirements and in response to the growth of international trade and immigration. CBP's trade systems receive data from over 12,500 brokers, freight forwarders, and others representing the trade community. Updated technology will allow CBP to keep up with demand, maintain acceptable response times, and migrate away from some of the older more expensive technologies that CBP is currently using.

Funded within the COPPS PPA is TECS Modernization. TECS is a key border enforcement system for CBP and DHS, and plays an essential role in the screening of travelers entering the U.S. and in supporting the screening requirements of other federal agencies. Maintaining TECS functionality is critical to CBP's border enforcement mission. The current TECS system is over 20 years old and uses technology that will be increasingly difficult to support in the future. The multi-year TECS Modernization project will replace the mainframe components of TECS with a sustainable technical architecture including modern databases and graphical user interfaces.

TECS provides critical border enforcement and POE processing capabilities. TECS is a key system for border enforcement and sharing of information about people who are inadmissible or may pose a threat to the security of the United States. CBP is collaborating with Immigration and Customs Enforcement (ICE) in the development of TECS Modernization. TECS is the primary lookout record database for all of DHS. TECS currently:

- Provides subject record "watch list" processing for DHS and other agencies. This includes maintenance of lookout records and vetting services against these records.
- Supports primary and secondary inspections at the POEs.
- Receives and processes passenger manifests from carriers.
- Supports more than 70,000 users from over 20 federal agencies responsible for traveler processing, investigations, case management and intelligence.
- Provides entry/exit data to other systems/agencies.
- Provides a real time interface with Federal Bureau of Investigation's National Criminal Information Center (NCIC) and Integrated Automated Fingerprint Information System (IAFIS) for on line-queries of wants/warrants and criminal history records.
- Provides a real time interface to National Law Enforcement Telecommunications System (NLETS) for on-line queries of driver's licenses, vehicle registration and state wants/warrants from all 50 states and Canada.
- Processes over 2,000,000 transactions daily.
- Supports the case management solution for ICE investigations including functions such as Investigative Case Management, Money Laundering Tracking and Reporting, Telephone Analysis and other functionalities unique to the ICE

Also funded within the COPPS PPA is TPSE. The TPSE initiative was initiated in FY 2008 to enhance critical infrastructure, monitoring capabilities, networking, and computing capabilities to support our worldwide passenger responsibilities such as facilitating electronic travel authorization, pre-clearance of all passengers coming into all POEs, and analyzing passenger data for terrorist and threat analysis. CBP's current infrastructure contains many single points of failure and outdated components that have caused repeat problems at POEs. This initiative is intended to ensure 24/7 systems availability, network redundancy, and monitoring in the Passenger and Targeting areas. The TPSE infrastructure enhancements will be implemented at the CBP National Data Center, the DHS Stennis Data Center, and targeted POEs. TPSE will enable 24x7x365 systems operational availability to meet the future processing and storage/backup requirements for passenger screening while enhancing the existing systems.

Strategic investments such as TPSE will ensure that the critical infrastructure services that enable continuous passenger systems operations are improved to meet the mission demand. These services include enhancing our monitoring capabilities, improving our current data center infrastructure, and enhancing our capability to maintain exact copies from our production facility to our continuity facility.

COPPS PPA FY 2009 accomplishments include:

- Within the TPSE environment, established secure accounts tied to specific users, monitoring environments, and service level agreements reporting systems
  - Installed a 2<sup>nd</sup> common WAN high speed connection circuit in Stennis using an alternate path which doubled the network capacity; using storage systems and monitoring tools to enhance our ability to maintain exact copies of our data between production and our continuity facility
- Deployed a journaling solution for email and single instance storage
- Renewed the certification and accreditation (C&A) for systems with expiring C&A
- Maintained the percentage of processor capacity used at CBP's goal of 80%
- Supported more than 58,000 CBP users (including CBP and contract staff)
- Completed enterprise-wide CBP Data Reference, Conceptual, Logical and Physical data models
- Ensured TECS was available to end users 99% of the time

COPPS PPA FY 2010 goals include:

- Supporting additional CBP users including new Border Patrol agents
- Maintain 20% Production System Reserve Capacity, providing a buffer for unforecasted growth in user demand for computing capacity, allowing for unusual spikes in demand
- Deploy the baseline image of the latest Microsoft desk operating systems (Windows 7) and continue the application of Federal Desktop Core Computing (FDCC) to those

- Establish a configuration management control technology to manage the CBP desktops
- Update several rooms to Sensitive Compartmented Information Facility (SCIF) standard at the National Data Center Complex to protect sensitive critical operational data
- Complete a transition from legacy model to CBP modernized Help Desk
- Perform a System Test and Evaluations (ST&Es) to evaluate the security posture of the systems
- Improve the quality of 100% of the new Certification and Accreditation packages in Risk Management System (RMS) and Trusted Agent FISMA (TAF), a tool designed to manage the collection and reporting of information relevant to information security practices and controls
- Complete the archiving solution for email and single instance storage
- Within the TPSE environment:
  - Provide resources to advance the programs' technology and human contingency planning
  - Migrate legacy systems to an advanced replicated storage environment
  - Improve email processing functionality
  - Expand the current Web Services capabilities and establish duplication of critical system components, with the intention of increasing reliability, in Stennis
  - Create a duplicate virtual environment for legacy systems to allow continuous uninterrupted service between Stennis and NDC
  - Establish technologies to provide for remote management and automatic failover of systems to enhance continuity capability
  - Increase the network bandwidth duplication to account for newly implemented technologies and ensure mission success between Stennis and NDC
  - Upgrade the current NDC Local Area Network (LAN) to provide additional capacity for systems migrated from legacy hardware environments
  - Establish advanced monitoring and fault detection systems in Stennis
  - Improve remote management systems in Stennis and NDC to improve response time to identify and resolve system deficiencies
  - Eliminate legacy backup technology to improve the current recovery time for non-replicated systems
  - Install the switch network in Stennis to allow these technologies to connect
  - Determine requirements for continuous operations for all Passenger offices
  - Modernize the collection and maintenance of all Passenger lifecycle IT support documentation

COPPS PPA FY 2011 goals include:

- Reduce response time to critical field application fileserver outages by 5%
- Migrate to a new more secure Microsoft operating system (Windows 7)
- Reduce by 17% planned outages due to technology refresh and advancements
- Maintain the processor capacity usage rate of less than an 80%
- Ensure that TECS will be available to end users 98.9% of the time and the network will be available 99.6% of the time.

#### IV. Program Justification Changes

Not Applicable.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
U.S. Customs and Border Protection  
Justification of Proposed Changes in Appropriation Name  
Appropriation Language**

For expenses for U.S. Customs and Border Protection automated systems, [\$422,445,000,] \$347,575,000, to remain available until expended, of which not less than [\$227,960,000] \$153,090,000 shall be for the development of the Automated Commercial Environment: [*Provided*, That of the total amount made available under this heading, \$194,485,000 may not be obligated for the Automated Commercial Environment program until 30 days after the Committees on Appropriations of the Senate and the House of Representatives receive a report on the results to date and plans for the program from the Department of Homeland Security].

#### **Explanation of Changes**

In FY 2011, the ACE modernization development effort will shift to an operations and maintenance mode and, as such, the President's Budget requests the removal of the reporting requirements associated with the ACE development effort.

### PPA Mission Statement

ACE will provide tools and enhance the business processes that are essential to securing U.S. borders from terrorists by providing intelligence required to target illicit goods, while ensuring the efficient processing of legitimate goods. ACE capabilities have been designed to identify potential risks, analyze information prior to arrival of people and cargo, and provide intelligence in easy-to-use formats. As a web-based system, ACE will provide users from government and the trade community with new, more efficient ways of accessing, processing, and sharing trade-related information.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	4,515	6,687	6,791	104

Salaries and Benefits includes costs for 62 FTEs. The FY 2011 Request includes an increase of \$41,000 for Pay Annualization and \$89,000 for personnel compensation.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.3 Other than full-time permanent	-	60	61	1

See 11.1 above.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.5 Other personnel compensation	13	-	-	-

See 11.1 above.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
12.1 Civilian personnel benefits	1,500	1,583	1,608	25

See 11.1 above.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
21.0 Travel and transportation of persons	486	512	363	(149)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. A carryover amount of \$149,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.3 Communications utilities and miscellaneous charges	1,173	1,212	875	(337)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. A carryover amount of \$337,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	134,315	129,319	25,217	(104,102)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Includes an adjustment to base decrease of \$75,000,000 for the ACE program. A carryover amount of \$29,102,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.7 Operation and maintenance of equipment	65,061	52,539	48,544	(3,995)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. A carryover amount of \$3,995,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
26.0 Supplies and materials	152	1,181	113	(1,068)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. A carryover amount of \$1,068,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
31.0 Equipment	93,171	87,366	69,518	(17,848)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. A carryover amount of \$17,849,000 is included in the 2010 Enacted figure.

## BUDGET REQUEST AND SUPPORTING INFORMATION

### Facilities Management

## I. Appropriation Overview

### A – Mission Statement for Facilities Management

CBP is the frontline border security agency within the U.S. Department of Homeland Security (DHS) charged with the mission of preventing terrorists and terrorist weapons from entering the United States while also facilitating the flow of legitimate trade and travel. More than 58,000 CBP employees manage, control, and protect the Nation's borders at and between the official ports of entry (POEs). CBP is responsible for protecting more than 5,000 miles of border with Canada, 1,900 miles of border with Mexico, and 95,000 miles of shoreline. CBP's mission is vitally important to the protection of the American people and the national economy.

The CBP Construction and Facilities Management account provides the facilities and associated infrastructure required to obtain and maintain operational control of the border, a primary factor of CBP's mission to prevent terrorists and terrorist weapons from entering the United States, and to ensure the efficient flow of legitimate trade and travel across the border. This account addresses the requirements for new, modernized, expanded, and sustained facilities to:

- Maximize CBP operational capabilities, efficiencies, and integration;
- Accommodate increasing capacity demands associated with expanded mission focus, personnel growth, increased space requirements for property assets, and changing inspection, detection, and communications technologies;
- Modify and/or correct facilities portfolio and real property program deficiencies; and
- Sustain real property inventory through proactive maintenance.

The success of CBP's mission depends heavily on the health and effectiveness of its physical infrastructure, specifically its real property program and facilities portfolio, that support its operations and administrative support requirements. Adequate facilities and real property are critical to CBP operations in that they provide logistical and operational support to CBP's agents, officers, pilots and other personnel; protect critical assets; supply strategically-located bases to improve mobility; and promote maximum efficiencies on mission-related activities.

CBP's diverse real property portfolio includes, but is not limited to: ports of entry, Border Patrol stations, Border Patrol sector headquarters, traffic checkpoints, forward operating base camps, laboratories, aviation hangars, marine piers/docks, administrative office space, classrooms and other training facilities, maintenance and repair facilities, parking facilities, vaults, firing ranges, intelligence and operations coordination centers, residential housing units, and parcels of land.

All CBP facility efforts are planned, executed, and managed by the Office of Administration, Facilities Management and Engineering (FM&E) Directorate, operating in conjunction with its business partners, service providers, and internal/external stakeholders.

## **B – Budget Activities:**

The CBP Construction and Facilities Management program provides the facilities and associated infrastructure required to effectively meet CBP's dual mission of securing the nation's border while facilitating legitimate travel and trade. It addresses requirements on the northern and southern borders for new and enhanced facilities and related initiatives to fulfill immediate operational needs; accommodate increasing capacity demands associated with new agent, officer, pilot, and asset deployments; provide resources to modify and/or correct facilities and real property program deficiencies; and allow CBP to proactively maintain the real property inventory and facilities portfolio. Resources for the Facilities Construction and Sustainment and Program Oversight and Management (PO&M) are consolidated into the Construction and Facilities Management account to provide CBP maximum flexibility to determine the most appropriate facilities solution required to meet CBP's driving mission needs and employ the most appropriate strategy.

### Facilities Construction and Sustainment

CBP primarily employs the following strategies for its real property program to support its driving mission needs and operational priorities: construction, acquisition, leasing, and/or sustainment. Where feasible, CBP attempts to co-locate its facilities solutions within CBP's portfolio or across the other components within DHS.

Facilities Construction and Sustainment activities include, but are not limited to: site and facility planning, environmental activities (including environmental compliance, assessment, surveys, and remediation); acquisition of real property assets including procurement, leasing, and construction; design, architecture, and engineering services; construction and demolition; installation of voice, data, and security infrastructure; installation of equipment and furnishings; project management and oversight services; maintenance, repairs, and operations; and alterations.

This PPA also includes funding to support CBP tunnel remediation. Tunnel remediation is the process whereby cross-border tunnels are physically secured and rendered unusable after discovery. The remediation process includes: initial analyses, environmental services, project oversight and support, obtaining rights of entry, engineering/surveying, filling/plugging, inspection/acceptance, and reporting of associated status.

### Program Oversight and Management

The Program Oversight and Management PPA provides for the activities and actions associated with program planning, management, and support activities and resources required to administer the CBP Construction and Facilities Management program.

This includes, but is not limited to, planning initiatives to provide the decision support and communication mechanisms required to respond to emerging operational demands and evolving facility requirements; financial resources to support the administration of the CBP facilities management program (funding for government employees is in the Salaries and Expenses account); and other requirements associated with the management and oversight of the construction and facilities management account.

**C – Budget Request Summary:**

The U.S. Customs and Border Protection (CBP) requests \$275,740,000 for the FY 2011 Construction and Facilities Management account. This includes a total adjustments-to-base decrease of (\$43,830,000). Additionally, CBP requests the cancellation of \$99,772,000 of prior year, unobligated balance funding.

## II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U.S. Customs and Border Protection  
Facilities Management  
Construction  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Construction (Border Patrol)**

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2009 Actuals</b>	-	-	<b>399,938</b>
<b>2010 Enacted</b>	-	-	-
<b>2011 Current Services</b>	-	-	-
<b>2011 Total Request</b>	-	-	-
Total Change 2010 to 2011	-	-	-

In FY 2010, Congress approved the consolidation of all facilities-related funding into a single, consolidated “Construction and Facilities Management” account, with the exception of funding for rent, which was consolidated into the Salaries and Expenses account. As a result, current services funding from the Construction account was transferred to the Facilities Construction and Sustainment and the Program Oversight and Management PPAs in the new Construction and Facilities Management account. The FY 2011 submission builds upon the establishment of these two PPAs and the transfer of this funding.

CBP also requests that a total of \$99.772 million be cancelled from prior year, unobligated funding balances. This reduction will be attained by cancelling or reducing the size of construction and facilities projects that are currently in various stages of planning and execution. Specific project and cost details for the impacted projects are being developed as we continue to assess our portfolio of projects to ensure the most critical requirements are funded. To minimize the impact of the \$99.772 million funding cancellation, CBP is assessing the requirements for the Offices of the Border Patrol, Air and Marine, and Training and Development to ensure our highest priorities are funded to deliver critical facilities and infrastructure necessary to achieve our core missions and critical operational needs. Having the appropriate infrastructure to support CBP operations is critical to strengthening border security, along the northern, southern, and coastal borders.

Unfortunately, impacted facilities projects may include critical facilities projects on the northern and southwest borders for new, replacement, and enhanced facilities required to fulfill immediate operational needs and strengthen national security; accommodate increasing capacity demands associated with new agent, officer, pilot, and asset deployments including over 800 Border Patrol agents and key operational air and marine components required to secure the southwest border; and correct deficiencies within existing facilities and structures. Specifically, these include overcrowded, obsolete, and inefficient Border Patrol stations, sector headquarters, checkpoints, air hangars, and various operational support facilities along the borders and coastal regions of the United States, along with enhanced and advanced training capabilities for the Advanced Training Center in Harpers Ferry, West Virginia.

**Department of Homeland Security  
U.S. Customs and Border Protection  
Facilities Management  
Facility Construction and Sustainment  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Facility Construction and Sustainment**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	-
<b>2010 Enacted</b>	-	-	<b>282,557</b>
2011 Adjustments-to-Base	-	-	(43,200)
<b>2011 Current Services</b>	-	-	<b>239,357</b>
<b>2011 Total Request</b>	-	-	<b>239,357</b>
Total Change 2010 to 2011	-	-	(43,200)

CBP requests \$239.4 million for this activity. This is a decrease of \$43.2 million below FY 2010. The request includes:

- a decrease of \$39.7 million to fully non-recur the FY 2010 congressional initiative for the Advanced Training Center at Harpers Ferry; and
- a decrease of \$3.5 million to fully non-recur the FY 2010 congressional initiative for Air and Marine facilities at the El Paso International Airport

CBP depends heavily on the health and effectiveness of its physical infrastructure, specifically the facilities, buildings, structures, and land that support its operations and administrative support requirements. The Facilities Construction and Sustainment PPA provides the facilities and associated infrastructure required to obtain and maintain operational control of the border, a primary factor of CBP's mission to prevent terrorists and terrorist weapons from entering the United States. Specific CBP facility types include, but are not limited to: ports of entry, Border Patrol stations, Border Patrol sector headquarters, traffic checkpoints, forward operating base camps, laboratories, aviation hangars, marine piers/docks, administrative office space, classrooms and other training facilities, maintenance and repair facilities, parking facilities, vaults, firing ranges, intelligence and operations coordination centers, residential housing units, and parcels of land.

Financial resources in the Facilities Construction and Sustainment PPA in FY 2011 will be used for all actions and activities required to sustain and support CBP's real property portfolio, as well as other efforts, such as tunnel remediation.

Significant completed accomplishments in FY 2009 include the delivery of the following facilities and real property program requirements, which were funded with prior year Construction appropriations:

- **Border Patrol Stations (BPS):** Calexico, California; El Paso, Texas; Fort Fairfield, Maine; Ft. Hancock, Texas; Havre, Montana; McAllen, Texas; Rangeley, Maine; Richford, Vermont; Sweetgrass, Montana; Wellton, Arizona; Weslaco, Texas; Willcox, Arizona.
- **Border Patrol Checkpoints:** Uvalde, Texas (Highway 90 East); Truth or Consequences, New Mexico (Interstate 25)
- **Forwarding Operating Bases (FOB):** Deming, New Mexico
- **Other Accomplishments:** Rio Grande Valley (RGV) Asset Forfeiture Building; Border Patrol Facilities Standards Final Sign-off;
- **Interim Marine Unit Facilities:** Marathon, Florida; Port Huron, Michigan; Rochester, New York; Sault Ste. Marie, Michigan; Riviera Beach, Florida.
- **Air Branches:** Detroit, Michigan; Houlton, Maine; and Miami, Florida.
- **Field Operations:** Capital projects in Ysleta, Paso Del Norte, and Del Rio in Texas and Champlain, New York were completed by GSA. CBP also completed the standardization of elements study which provides a component library of port designs for firms to apply to port projects to streamline design and construction processes.

Significant planned accomplishments in FY 2010 include the delivery of the following facilities and real property program requirements:

- **Border Patrol Stations (BPS):** Lordsburg, Sonoita, and Calexico in Arizona.
- **Field Operations:** CBP will begin operations at 3 new ports of entry along the southwest border: San Luis II commercial-only facility in Arizona; and the non-commercial ports of Donna and Anzalduas, Texas. Additionally, GSA will complete large-scale capital improvements at the existing Massena, New York; Warroad, Minnesota; and Jackman, Maine LPOEs.
- **Marine Units:** Permanent facilities in Corpus Christi, Texas; Galveston, Texas; and Houma, Louisiana; Interim facilities in Erie, Pennsylvania and Panama City, Florida.
- **Air & Marine Hangar, Maintenance & Administrative Facilities:** Laredo, Texas; Alpine (Marfa), Texas; Uvalde, Texas; Plattsburg, New York; and Ramey, Puerto Rico.
- **Marine Training Facility:** McAllen, Texas.

Significant planned accomplishments in FY 2011 include the delivery of the following facilities and real property program requirements:

- **Border Patrol Stations (BPS):** Ajo, Arizona.
- **Permanent Marine Units:** Buffalo, New York; Erie, Pennsylvania; Ft. Myers, Florida; Key Largo, Florida; Marathon, Florida; Panama City, Florida; and Port

- **Advanced Training Facility, Harpers Ferry, West Virginia:** Completion of the Welcome/Security Center, Leadership Academy, and Warehouse.

In addition, the American Recovery and Reinvestment Act (ARRA) of 2009 appropriated \$720 million to upgrade land port facilities along the northern and southern borders of the United States. Of the total amount, the ARRA provided \$420 million directly to CBP for the modernization of CBP-owned land ports of entry (LPOEs) (the remaining was appropriated to the U.S. General Services Administration (GSA)).

In FY 2009, CBP awarded 17 design/build contracts for complete port replacement projects at the LPOEs listed below, along with contracts for the partial planning and design of the ‘Program Management Reporting System’ (PMRS), a facilities management tool.

- Antelope Wells, NM
- Frontier, WA
- Scobey, MT
- Walhalla, ND
- Neche, ND
- Noonan, ND
- Antler, ND
- Wild Horse, MT
- Churubusco, NY
- Hansboro, ND
- Pinnacle Road, VT
- Pittsburg, NH
- Carbury, ND
- Westhope, ND
- Morgan, MT
- Whitetail, MT
- Sherwood, ND

In FY 2010, CBP plans to award contracts for 16 additional design/build projects, as well as additional repair and alterations contracts, and to complete the design, testing, and deployment of PMRS.

In FY 2011, CBP plans to complete the construction of the 17 LPOEs awarded in FY 2009 (listed above).

**Department of Homeland Security  
U.S. Customs and Border Protection  
Facilities Management  
Program Oversight and Management  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Program Oversight and Management**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	-
<b>2010 Enacted</b>	-	-	<b>37,013</b>
2011 Adjustments-to-Base	-	-	(630)
<b>2011 Current Services</b>	-	-	<b>36,383</b>
<b>2011 Total Request</b>	-	-	<b>36,383</b>
Total Change 2010 to 2011	-	-	(630)

CBP requests \$36.4 million for this activity. This is a decrease of \$630 thousand below FY 2010. The request includes:

- a decrease of \$630 thousand to transfer into the Salaries and Expenses account, Headquarters, Management and Administration PPA, funding for the operational requirements of government personnel who support the construction and facilities management program.

The Program Oversight and Management PPA provides for the program planning, management, and support activities. Examples include: contract management services; programmatic contract support; strategic resource assessments; data and information management solutions; space models; costing; valuation; depreciation methodologies and tools; reconciliation of assets; and other activities associated with the acquisition, management, and sustainment of real property assets and facilities portfolio.

#### IV. Program Justification Changes

Not Applicable.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

For necessary expenses to plan, acquire, construct, renovate, equip, and maintain buildings and facilities necessary for the administration and enforcement of the laws relating to customs and immigration, [\$319,570,000] \$275,740,000, to remain available until expended.

*Of the unobligated balances available under the heading "Construction" appropriated for construction projects in prior year appropriations, \$99,772,000 are hereby permanently cancelled: Provided, That no amounts may be cancelled from amounts that were designated by the Congress as an emergency requirement pursuant to the Concurrent Resolution on the Budget or the Balanced Budget and Emergency Deficit Control Act of 1985, as amended.* (Department of Homeland Security Appropriations Act, 2010)

### Explanation of Changes:

The CBP Construction and Facilities Management account provides the facilities and associated infrastructure required to obtain and maintain effective control of the border, a primary factor of CBP's mission to prevent terrorists and terrorist weapons from entering the United States, and to ensure the efficient flow of legitimate trade and travel across the border. To enable CBP to provide adequate facilities and sound real property solutions based on driving operational requirements, CBP must have maximum flexibility and greater capability to consistently plan, acquire, finance, manage, and sustain its multifaceted real property program and facilities portfolio to best fulfill the driving mission needs. The ability to plan, acquire, construct, finance, renovate, equip, manage, and sustain allows CBP to provide the best and most appropriate facilities solution available given available resources and operational requirements.

CBP also requests that a total of \$99.772 million be cancelled from prior year, unobligated funding balances. This reduction will be attained by cancelling or reducing the size of construction and facilities projects that are currently in various stages of planning and execution. To minimize the impact of this reduction, CBP is working with the Offices of the Border Patrol, Air and Marine, and Training and Development to ensure our highest priorities are funded to deliver critical facilities and infrastructure necessary to achieve our core missions and critical operational needs. Having the appropriate infrastructure to support CBP operations is critical to strengthening border security along the northern, southern, and coastal borders.

## F. Permanent Positions by Grade

Not Applicable

**G. Capital Investment and Construction Initiative Listing**  
**U.S. Customs and Border Protection**  
**Construction and Facilities Management**

This in response to the reporting requirements set forth in the Joint Explanatory Statement (H.R. 111-298) accompanying the FY 2010 DHS Appropriations Act (P.L. 111-83).

The Joint Explanatory Statement states:

*The conference agreement includes \$402,263,000 for Rent in the Headquarters, Management, and Administration PPA, as proposed by the Senate, instead of in the proposed Facilities Management account, as proposed by the House. The conferees view keeping rental payments within the Salaries and Expenses appropriation as consistent with fully capturing and displaying the budgets of activities funded in that appropriation, in that rental costs are necessarily included in resource allocation decisions for program operations. At the same time, the conferees see value in being able to compare all facility related costs, whether rent, lease, or investment. The conferees therefore direct CBP to submit, with its justification materials accompanying the 2011 budget request, a consolidated presentation of all CBP facilities costs.*

The following is a consolidated presentation of all CBP facilities costs, which includes the Rent from the Salaries and Expenses Appropriation and the entire Construction and Facilities Management Appropriation.

Salaries and Expenses Appropriation: Rent PPA

- \$395,594,000

Construction and Facilities Management Appropriation

- \$275,740,000
- CBP Construction and Facilities Management includes:
  - Facilities Construction and Sustainment
  - Program Oversight and Management

PROGRAM	FY 2011 FUNDING REQUEST (\$000)			FUNDING FROM:	
	Current Services Level	New Initiative	Total	Program, Project Activity (PPA)	Appropriation
Rent	\$407,075	(\$11,481)	\$395,594	Rent	Salaries and Expenses
Facilities Construction & Sustainment	\$239,357	\$0	\$239,357	Facilities Construction & Sustainment	Construction and Facilities Management

Program Oversight & Management	\$36,383	\$0	\$36,383	Program Oversight & Management	Construction and Facilities Management
<b>Total Investments</b>			<b>\$671,334</b>		

## NAME OF CONSTRUCTION INITIATIVES

### 1. Project Description, Justification and Scope

The FY 2011 budget submission requests funding for *sustainment* of CBP's real property program and facilities portfolio and associated infrastructure requirements. There is no request for funding for new construction projects.

### 2. Significant Changes

The FY 2011 budget submission requests funding for *sustainment* of CBP's real property program and facilities portfolio and associated infrastructure requirements. There is no request for funding for new construction projects.

The FY 2011 budget submission includes the transfer of \$630,000 from the Program Oversight and Management PPA to the Salaries and Expenses account, Headquarters Management and Administration PPA. These resources are associated with the operational requirements of the government personnel supporting the construction and facilities management account.

### 3. Project Schedule

The FY 2011 Budget Submission requests funding for sustainment of existing facilities and infrastructure requirements. There is no request for funding for new construction projects.

### 4. Schedule of Project Funding (Dollars in Thousands)

<b>Rent</b>						
	Prior	FY 2009	FY 2010	FY 2011	FY 2012	Total
Appropriation		\$0	\$402,263	\$395,594	\$0	\$797,857

Obligation (planned)		\$0	\$37,013	\$36,383	\$0	\$73,396
Expenditure (planned)		\$0	\$32,013	\$22,074	\$0	\$54,087

### **5. Cost Estimate Detail and Changes (Dollars in Thousands)**

The FY 2011 budget submission requests funding for *sustainment* of CBP's real property program and facilities portfolio and associated infrastructure requirements. There is no request for funding for new construction projects.

### **6. Method of Performance**

CBP Construction and Facilities Management requirements are executed through the U.S. Army Corps of Engineers (USACE), the General Services Administration, and the CBP Office of Procurement.

Through a Memorandum of Agreement, the USACE provides CBP with consolidated program management services for real estate planning and acquisition, planning and programming, environmental protection, design and cost engineering, construction and warranty enforcement and integrated occupancy services.

For facilities and construction projects, the schedule and funding are tracked within the current CBP accounting system. This system includes modules that store specific information on each asset. That information is automatically linked to key information systems and includes modules that cover all aspects of the assets. The real property profile performance data can be used to produce financial, procurement, and real property indices for measuring the performance of the assets. Projects in Progress are tracked and reported on a monthly basis by Project Managers in the field. The tracking consists of monitoring the project delivery for construction and leasing through industry standards, including tracking each specific project's schedule, scope, and budget.

Across CBP's owned facilities, the general performance indices include:

- Facility Condition - Condition surveys are performed on a periodic basis to ascertain the true condition of the asset. A Strategic Resource Assessment will be the primary means by which this information will be generated in the future.
- Facility Utilization - These indices track the square footage of space and the number of FTE's assigned.
- Operating Costs - These indices track the cleaning / janitorial, maintenance and utility costs at the asset level.
- Mission Dependency - The primary categories include: Mission Critical, Mission Dependent Not Critical, and Non Mission Dependent.
- Energy Consumption - As part of the Operating Costs Indices, energy consumption and conservation measures are tracked separately.
- National Historical Preservation Assets - Real Property Assets that could be eligible for the National Historical Preservation List are tracked.

Within the land ports of entry, CBP applies an additional set of performance indices including:

- Mission and Operations - Factors for the mission and operations criterion measure the facility's compatibility with specific inspection responsibilities. Individual factors address the type of activities performed within the facility and features of the facility necessary for successful inspection services. This criterion contains factors that cause the most significant disruptions to inspection activities and conditions that reflect the significance of the facility's operations.
- Life Safety and Security - The factors for security and life safety measure a facility's ability to protect occupants and visitors and allow law enforcement functions to maintain safe and secure control of the public and detained individuals. The individual factors address compliance with security and life safety standards (features incorporated in the facility to resist assault and allow staff to maintain operations during emergencies) and deficiencies that represent hazards to the occupants. Safety standards include building life safety codes, as well as federal standards developed in response to terrorist attacks or other threats faced by the occupants.
- Space and Site Deficiencies - Space and site deficiencies are related to the functional work environment and the overall facility site. Space deficiencies are determined by applying utilization rates, based on space standards, to existing personnel and functions to calculate the amount of usable space that should be available in an existing facility. In addition, the major facility systems and site and building layouts are evaluated for functionality and expansion potential.

- Personnel and Workload Growth - The personnel and workload growth criterion contains factors related to both current and future personnel, along with current and projected workload categories that generate the need for additional personnel and space at each facility. The points for many of the factors are determined through a national ranking system.

**7. Related Annual Funding Requirements  
(Dollars in Thousands)**

Salaries and Expenses Appropriation	FY 2011
	Current Estimate
Rent	\$395,594
Total	\$395,594

Construction & Facilities Management Appropriation	FY 2011
	Current Estimate
Facilities Construction and Sustainment	\$239,357
Program Oversight and Management	\$36,383
Total	\$275,740

**8. Budget Allocation to Programs**

Program	Allocated Budget (\$000)	
	FY 2010	FY 2011
Rent	\$402,263	\$395,594
Facilities Construction & Sustainment	\$282,557	\$239,357
Program Oversight & Management	\$37,013	\$36,383
Total	\$721,833	\$671,334

**9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders**

The Construction and Facilities Management program complies with the IMMIGRATION AND NATIONALITY ACT (INA), Section 235 Inspection by Immigration Officers; Expedited Removal of Inadmissible Arriving Aliens; Referral For Hearing; Section 287 Powers of Immigration Officers and Employees and in the ILLEGAL IMMIGRATION REFORM AND IMMIGRANT RESPONSIBILITY ACT OF 1996 (IIRIRA) - Section 102 Improvement of Barriers at Border, and the Homeland Security Act of 2002.

**PPA Mission Statement**

Facilities Construction and Sustainment - provides facilities management, acquisition, construction, and sustainment of CBP occupied facilities, and associated infrastructure and services, that the U.S. Customs and Border Protection needs to perform its enforcement and trade facilitation mission.

**Summary Justification and Explanation of Changes**

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>22.0 Transportation of things</b>	-	795	356	(439)

Transportation of things includes all costs associated with the physical move and relocation activities and services of CBP components from one facility to another. This includes physical move of files, furniture, equipment, personnel, etc from one facility to another. The FY 2010 Enacted figure includes \$439,000 of carryover funding.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.3 Communications utilities and miscellaneous charges	-	14,164	6,351	(7,813)

Communications, utilities, and miscellaneous charges include all payments for the rental or lease of construction/building equipment, tools, and vehicles, such as rental of generators, powers tools, forklifts, etc) associated with facilities management, construction, and sustainment. Includes rental or lease of space, docks, hangars, and other structures and payments for standard and overtime utilities, postal services, and other short-term rentals. The FY 2010 Enacted figure includes \$7,813,000 of carryover funding.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	-	42,736	19,162	(23,574)

Other services include payments for contractual services to conduct feasibility studies, environmental assessments, planning and design services, and other services associated with project administration, oversight, and contractual support for facility projects. The FY 2010 Enacted figure includes \$23,574,000 of carryover funding.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.3 Purchases of goods & svcs. from Gov't accounts	-	225,200	190,653	(34,547)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. No funding is requested for FY 2011. The FY 2010 Enacted figure includes \$34,547,000 of carryover funding.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.4 Operation and maintenance of facilities	-	-	-	-

Operation and maintenance of facilities include all payments for the operation, maintenance, and sustainment of facilities when done by contract with the private sector or another Federal Government account. Also includes repairs and alterations to facilities and CBP occupied space and housing.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.7 Operation and maintenance of equipment	-	19,332	8,668	(10,664)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2010 Enacted figure includes \$10,664,000 of carryover funding.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
31.0 Equipment	-	127,942	14,167	(113,775)

Equipment includes all costs for the purchases of personal property and other assets of a durable nature or the initial installation of furniture, appliances, and/or equipment when performed under contract. Includes physical security equipment, alarms, voice and data equipment, generators, appliances, and related facility equipment. The FY 2011 request includes a decrease of \$43,200,000 for the FY 2010 non recur of the Harpers Ferry Training Facility for \$39,700,000 and the El Paso Airport Hanger for \$3,500,000. The FY 2010 Enacted figure includes \$70,575,000 of carryover funding.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
32.0 Land and structures	-	200,000	-	(200,000)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Includes construction costs of CBP buildings, structures, and facilities and acquisition of land and structures. The FY 2010 Enacted figure includes \$200,000,000 of carryover funding.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **Air and Marine Interdiction:**

## **I. Appropriation Overview**

### **A – Mission Statement for Air and Marine Interdiction:**

CBP protects the Nation through the coordinated use of integrated air and marine forces to detect, interdict, and prevent acts of terrorism and the unlawful movement of people, illegal drugs, and other contraband toward or across the borders of the United States. The CBP Office of Air and Marine's (OAM's) core competencies include air and marine interdiction, air and marine law enforcement, and air and national border domain security.

OAM has a staff of 1,895 personnel, including pilots and aircrew, air and marine law enforcement officers, operations specialists, logistics and maintenance support personnel, and administrative personnel. In FY 2011, mission critical assets will consist of approximately 280 aircraft (including fixed wing, rotary helicopters, and unmanned aircraft systems), approximately 200 marine vessels, a national air and marine operations center (AMOC), fixed and mobile surveillance equipment, ground vehicles, training facilities, maintenance facilities, aircraft hangars, and marine facilities located along all of the nation's borders and at key interior support locations.

### **B – Budget Activities:**

OAM's Air Strategic Plan was updated in FY 2007 to include marine strategic plans, an expanded plan for Unmanned Aircraft Systems (UASs), a facilities enhancement approach, and updates to the ten-year investments model provided in the baseline plan submission to Congress. OAM's approach to executing the plan can be divided along the three major border security areas of responsibility (AOR) – northern border, southwest border, and southeast/coastal borders. Since FY 2004, five primary air branches and supporting units were established along the northern border. Consideration will be given to establishing secondary or satellite sites to support the concentration of assets needed to meet specific threats as they are identified. Based on the results of operational demonstrations conducted from the joint CBP/Air National Guard (ANG) located in North Dakota in FY 2008, OAM's UAS capabilities to obtain increased intelligence and gain better situational awareness in support of the Secure Border Initiative (SBI) was expanded to North Dakota. Both air and marine operations will expand along the Great Lakes and the northwestern and northeastern maritime approaches to the Nation's borders as additional aircraft, marine vessels, and personnel are deployed. The delivery of new aircraft and additional pilots/air crew will provide increased tactical support to the Border Patrol along the southwest, northern, and southeast coastal borders as the number of agents on the ground increases. The UAS Branch will expand its operations as additional systems are delivered and deployed. Within the southeast/coastal AOR, P-3 aircraft wing operations will increase as assets are delivered from extensive depot-level rework.

Maritime demonstrations of UAS capabilities in the southeast coastal approaches to the U.S. have been conducted and CBP has plans for a permanent UAS Branch along the gulf coast or eastern shore of Florida in FY 2011 or FY 2012. Marine operations in the Gulf of Mexico will be enhanced as new interceptor vessels replace the aging Black Night Interceptors and additional sea-borne radar platforms are acquired. The investments needed to achieve OAM's end state and to support the operational objectives discussed above can be described in four broad categories discussed below.

#### Aircraft Safety and Service Life Extension

The highest priority remains the P-3 Service Life Extension Program (SLEP) since it rectifies serious flight safety concerns and provides an unmatched capability to interdict bulk drug shipments to Mexico through the source and transit zones. The average age of 49% of OAM aircraft is 33 years, and the aircraft in the P-3 fleet are over 40 years old. The P-3 SLEP began in FY 2006 with the repair of fleet-wide wing stress cracks and the development of the requirements for extending the lives of the 16 P-3 aircraft by 20 years. Two P-3 aircraft will be inducted in the re-wing phase of SLEP in FY 2010, followed by one in FY 2011. This brings the total wing kits procured from FY 2008 thru FY 2010 to 9, with 2 more planned for FY 2011. CBP OAM plans to send 14 of its 16 P-3's through SLEP in total. The remaining 2 platforms will likely be retired without undergoing a SLEP, as CBP plans to introduce a new replacement capability for the P-3 consistent with the results of an assessment of alternatives that should be completed sometime in FY 2011.

#### Establishment of a Strategic Intelligence, Surveillance, and Interdiction Capability

The UAS program is an equally high priority. This program will support CBP's efforts to maintain priority coverage along the southwest and northern borders and increase effectiveness at the southeast/coastal borders. In FY 2006, CBP established a UAS program that will be the key element of the agency's strategic intelligence, surveillance, and interdiction capability. The total capability will include the P-3 Maritime Patrol Aircraft and the DHC-8/Q200 and Q300 Multi-Role Patrol Aircraft (MPA). The strategic plan currently calls for up to three squadrons of UASs to be deployed along the southwest border, northern border, and southeast/coastal operating area. The end-state objectives for the MPA changed in FY 2007 when the manufacturer closed the DHC-8/Q300 production line in favor of a larger, more commercially viable DHC-8/Q400. OAM concluded that the larger Q400 was not suitable for its missions, and instead focused on the acquisition in early FY 2009 of a smaller, twin-engine, Multi-Role Enforcement Aircraft (MEA) capable of operating effectively over land and water. Additionally, UAS supports Immigration and Customs Enforcement (ICE) investigative efforts, extends cross border operations into the source and transit zones, as well as augments and enhances the crewed air and marine assets. Coincident with enhancements gained through the UAS program, CBP will continue to work on the software and systems of AMOC, using funds provided by Congress in FY 2010.

#### Air Recapitalization and Modernization

The present air fleet consists of 19 different aircraft types. Currently, seven of ten

aircraft types have exceeded their normal service life expectancy, some by as much as almost two times the industry average. The impact has been an unavoidable loss of operational sorties because of additional maintenance down time due to increased inspections and a shrinking pool of spare parts. To accomplish its border security, anti-drug, and customs and immigration enforcement support missions, CBP requires a more flexible and supportable air fleet. To this end, the air fleet is being standardized, emphasizing the use of multi-mission assets that can be deployed to multiple locations as the threat changes over time. The strategic objective is to reduce the types of aircraft to eight or nine, and to increase the total number of aircraft to a level consistent with operational demands. The total will likely change over time as the nature of the threat changes; therefore, the CBP strategic plan and end-state model will be updated accordingly.

#### Aged Aircraft Risk Management

CBP must maintain its aging aircraft to keep pace with mission demands. The slow pace of aged aircraft replacement and the prospect for a constrained resource environment require CBP to take additional action to ensure its aged assets can be operated safely. To accomplish this, an aged aircraft investigation will be conducted in FY 2010 to determine how long selected assets, such as the OH-6 helicopters and C-12/C-12M aircraft, will remain operational. The aged aircraft investigation will help determine the operating life limitations of the aircraft types most at risk. Based on the results, a sustainment regimen will be established for each aircraft type that employs additional inspections, shortened maintenance intervals, and additional repairs. Along with the additional inspections and repairs, CBP will revise its maintenance reporting requirements to capture the data needed to identify key indicators of aged aircraft condition that would drive CBP to retire the aircraft from service. In accordance with House Report 111-157, as modified in the joint Conference Report 111-298, CBP provided the Committees a brief on its plans to manage its aging aircraft, details of which are contained in the FY 2010 update to the Strategic Air and Marine Implementation Plan being submitted to the Committees under separate cover.

#### Marine Recapitalization and Modernization

In FY 2008 and FY 2009, Congress provided funding for 11 new marine units consisting of 197 new marine agents, and 54 new marine vessels, including 26 new Safeboat Interceptors and 7 Interim Coastal Interceptors. A portion of the funding was used to acquire an Advanced Concept Technology Demonstration (ACTD) vessel for a new class of fast coastal interceptors that completed a year of test and evaluation in November 2009. The results of the ACTD effort has enabled CBP to define its requirements for a highly capable replacement for the slower, aging Midnight Express Interceptors currently employed that will be released in a competitive procurement during the first half of FY 2010.

The largest portion of the marine expenditure plan for FY 2010 is allocated for the interceptors and their sensor systems as displayed below. A small amount is also allocated to the purchase of approved riverine vessels.

FY 2010 Planned Marine Vessel Acquisitions

Vessel/Equip Type	Qty	Est Unit Cost	(\$M)
			Total Cost

New Coastal Interceptor	17	0.62	10.6
Interceptor EO/IR Sensors	[10]	0.25	2.5
Riverine Vessels	12	0.083	1.0
New Vessel Initial Outfitting	N/A	0.4	0.4

Total Vessels/Cost Estimate	29		14.5
-----------------------------	----	--	------

Note: Though all of the new Coastal Interceptor vessels will be equipped to accept the new EO/IR sensor, not all of the vessels will need the sensor on all missions. Therefore only 10 units are to be purchased for the first 17 vessels.

The largest change to the investment plan was driven by the transfer of used vessels from the USCG to CBP over the past 2 years. As of this report, the USCG has transferred custody of 55 21-27 foot Safeboat-type vessels that are being refurbished and returned to service with CBP. In general, the vessels were transferred in good-to-excellent condition, some provided with the requisite outboard engines. The transfer of these vessels has enabled CBP to avoid future riverine vessel investments totaling nearly \$9 million (including the amount needed to repair and upgrade the vessels and to provide engines).

**C – Budget Request Summary:**

CBP requests \$503,251,000 for the FY 2011 Request. The total adjustments-to-base is a decrease of \$14,000,000 to non-recur the FY 2010 Marine Vessels investments of \$8 million and the FY 2010 AMOC investments of \$6 million. The program changes include a total program decrease of \$2,575,000 to:

- Operations and Maintenance for planned Logistics and Maintenance systems upgrades. (\$2,575,000)

## II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

<b>2011 Current Services</b>	-	-	<b>374,217</b>
2011 Program Change	-	-	(2,575)
<b>2011 Total Request</b>	-	-	<b>371,642</b>
Total Change 2010 to 2011	-	-	(2,575)

CBP requests \$371.6 million for this activity. This is a decrease of \$2.6 million from FY 2010 for a program decrease to Logistics and Maintenance Systems upgrades.

CBP secures the borders against terrorists, acts of terrorism, drug smuggling and other illegal activity by operating air and marine branches at strategic locations along the borders. Multi-mission aircraft with advanced sensors and communications equipment provide powerful interdiction and mobility capabilities directly in support of detecting, identifying, and interdicting suspect conveyances, and apprehending suspect terrorists and smugglers. OAM maximizes the capabilities of air and marine assets through a cohesive joint air operations model for centralized command and control and a responsive, integrated control system for decentralized execution.

CBP partners with numerous stakeholders in performing its missions throughout the continental United States and the Western Hemisphere. This includes domestic operations at the borders; source, transit, and arrival zone operations; interior law enforcement support; and support to other agencies. Truly crosscutting within the Department and the Federal government as a whole, the unique capabilities of OAM serve as both a stand-alone entity and as a force multiplier. In fulfilling the mission of CBP to protect the borders, OAM's geographical disposition has shifted from a concentration on the southern border to include all of our Nation's borders. A CBP

priority mission is to continue protecting the American people and critical infrastructure by using an integrated and coordinated air and marine force of over 1,895 personnel, including pilots and air crew, fixed wing aircraft, rotary helicopters, unmanned aircraft systems, marine vessels, a national air and marine operations center, and surveillance equipment, to detect, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the United States.

Significant accomplishments in FY 2009 include:

- OAM continued improvements to aviation maintenance, which will incorporate all legacy assets into a single, more effective nationwide logistics and maintenance support contract.
- OAM has expanded flight hours in response to increasing mission demands from the Border Patrol and ICE.
- OAM has assessed the need for secondary and satellite sites based on the results of operations across the northern border, expanded UAS operations as additional systems are delivered to the southwest border, deployed for test and evaluation to the northern border, and re-outfitted with maritime search radars for test and evaluation in the southeast/coastal area of responsibility.

FY 2010 goals include:

- OAM has taken a clockwise approach with the deployment of its resources and assets. For example, in FY 2006 and FY 2007 CBP saw a rapid redeployment in its resource/asset requirement along the southwest border in support surge in the Office of Border Patrol (OBP) growth and Arizona Border Control Initiative (ABCI), ABCII, and the Secure Border Initiative (SBI). In FY 2008 and FY 2009, CBP redeployed assets (primarily from the southeast coastal) to the northern border to support the establishment of the final two primary air branches in North Dakota and Great Lakes region of Detroit. In FY 2010 and FY 2011, CBP plans to replenish those resources/assets deployed from the southeast/coastal area in earlier years while at the same time continue to fill minor “holes” along the northern border. This approach represents CBP OAM’s deployment end-state that considers the entirety of our Nation’s borders and will best address threats, increased efficiencies and operational effectiveness.
- OAM will continue to support (as possible) expanded flight hours in response to increasing mission demands from OBP and ICE.

FY 2011 goals include:

- In FY 2011, while OAM continues to take into inventory aircraft it has been acquiring since FY 2006, OAM will also continue to maintain older, less supportable aircraft as long as they are safe to fly in order to continue providing a reasonable level of aviation support along all borders.
- With the initiation of the aged aircraft investigation effort in FY 2010, there will be an engineering assessment of the service lives remaining on selected aircraft

**Department of Homeland Security  
U.S. Customs and Border Protection  
Air and Marine Interdiction:  
Procurement  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Procurement**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	<b>249,136</b>
<b>2010 Enacted</b>	-	-	<b>145,609</b>
2011 Adjustments-to-Base	-	-	(14,000)
<b>2011 Current Services</b>	-	-	<b>131,609</b>
<b>2011 Total Request</b>	-	-	<b>131,609</b>
Total Change 2010 to 2011	-	-	(14,000)

CBP requests \$131.6 million for this activity. This is a decrease of \$14.0 million from FY 2010. The request includes:

- a decrease of \$8.0 million to non-recr FY 2010 Marine Vessels investments
- a decrease of \$6.0 million to non-recr FY 2010 AMOC investments

The CBP Procurement PPA recurs each fiscal year and is used to acquire new aircraft and marine vessels, retire unserviceable assets, upgrade sensors and surveillance capabilities, and support the expansion of mission capabilities along the borders in response to ongoing threat assessments and mission assignments directed by higher authority.

Significant accomplishments in FY 2009 include:

- OAM continued several acquisition efforts including 2 MEA, 1 UAS, 1 MLH A-L Conversion, 1 C-550 Interceptor sensor upgrade, various maritime vessels, and \$5 million towards Wireless Airport Surveillance Platforms (WASP).
- The FY 2008 appropriation included \$47.0 million to continue the P-3 SLEP and extend the service life of CBP's existing aircraft by about 20 years. The FY 2009 appropriation included an additional \$9.0 million for a total funding level of \$56 million for P-3 SLEP. Funds will continue the procurement of the new wing/tail assembly, the wing/tail refurbishment kits for aircraft that do not need new wings/tails, continue the special structural inspections (SSI) and extended special structural inspections (ESSI), and begin the SLEP of the first of the 16 P-3 aircraft in the CBP inventory.

FY 2010 goals include:

- In FY 2010, OAM received an additional \$9.0 million to be used for the P-3 SLEP, for a total funding level of \$65.0 million. These funds will continue the

- OAM plans to ensure adequate radar coverage along the borders by utilizing the joint DOD/DHS Long Range Radar assessments office to monitor FAA progress on maintaining nation-wide primary air search radar capabilities to detect and track non-cooperative targets, by continuing to add Canadian radar feeds to the AMOC capabilities, and by utilizing C-550 Interceptor and the Multi Role Enforcement Aircraft (MEA) to track and/or intercept both conventional and non-conventional aircraft.
- OAM will continue the acquisition of five to six AS-350s (Light Enforcement Helicopters), UAS spare parts and components, and one C550 Sensor Upgrade. A contract for the new class of coastal interceptor vessel should be awarded before the end of the year.
- Guardian MVP - CBP A&M will test the first Maritime configured Predator B aircraft equipped with Raytheon's SeaVue marine radar and enhanced EO/IR optical sensor. Working closely with DoD, CBP will also be leveraging extensive U.S. Navy developments in ocean surveillance and tracking technology to greatly enhance maritime target detection, identification and tracking of surface and semi-submersible targets. To exercise command and control of the new Maritime Predator B aircraft, CBP will also be evaluating and procuring a specifically configured maritime ground control station which exploits all of the new maritime surveillance hardware and software.

FY 2011 planned accomplishments include:

- The FY 2011 budget request includes \$47.7 million for P-3 SLEP. These funds will continue the procurement of the new wing/tail assembly, the wing/tail refurbishment kits for aircraft that do not need new wings/tails, continue the special structural inspections (SSI) and extended special structural inspections (ESSI), and induct an additional P-3 platform into the SLEP program.
- Continue the acquisition of up to eight AS-350 (Light Enforcement Helicopters). By the end of FY 2011, OAM will have acquired 39 of the 50 AS-350's under contract.
- Funding is provided for 1 MQ-9 Maritime Variant (Guardian) Unmanned Aircraft System.
- Funding is provided to convert one UH-60 Medium Lift Helicopter from an A (alpha) to L (lima) model.
- Funding is provided to convert one UH-1 to UH-2 Utility Helicopter
- Funding is provided for P-3 Sensor Upgrades, specifically 3 additional SeaVue maritime radars.
- Funding is also provided for various marine vessels, to include up to 6 additional coastal interceptors and additional riverine vessels.

## IV. Program Justification Changes

Program Decrease							-	-	(2,575)
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>(2,575)</b>

Description of Item

CBP requests a reduction of \$2.6 million to Logistics and Management (L&M) Systems upgrades.

Justification

Resources to fund the Logistics and Maintenance Systems upgrades have been reduced to fund the highest priority capabilities to achieve our core missions.

Impact on Performance (Relationship of Decrease to Strategic Goals)

CBP does not anticipate an operational impact to Air and Marine performance; however, this reduction in funding will defer plans to implement the GAO recommended system upgrades to its logistics and maintenance systems.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

For necessary expenses for the operations, maintenance, and procurement of marine vessels, aircraft, unmanned aircraft systems, and other related equipment of the air and marine program, including, operational training and mission-related travel, and rental payments for facilities occupied by the air or marine interdiction and demand reduction programs, the operations of which include the following: the interdiction of narcotics and other goods; the provision of support to Federal, State, and local agencies in the enforcement or administration of laws enforced by the Department of Homeland Security; and at the discretion of the Secretary of Homeland Security, the provision of assistance to Federal, State, and local agencies in other law enforcement and emergency humanitarian efforts, [\$519,826,000] \$503,251,000, to remain available until expended: Provided that, no aircraft or other related equipment, with exception of aircraft that are one of a kind and have been identified as excess to United States Customs and Border Protection requirements and aircraft that have been damaged beyond repair, shall be transferred to any other Federal agency, department, or office outside of the Department of Homeland Security during fiscal year [2010] 2011 without prior notice to the Committees on Appropriations of the Senate and the House of Representatives. (*Department of Homeland Security Appropriations Act, 2010.*)

### Explanation of Changes:

No substantive changes.

**1. Project Description, Justification and Scope**

**Project Description**

In the summer of 2006, CBP A&M developed and submitted to Congress a Strategic Air Plan that defines the end state for the air force based on ongoing threat assessments, mission requirements determined by higher authority, and the evolving requirements of the Secure Border Initiative (SBI). In 2007, this Plan was updated to incorporate Marine vessels and Unmanned Aircraft Systems (UAS). The UAS PPA was formally merged into CBP A&M Procurement PPA in FY 2007.

The Air Plan calls for the air and marine fleets to be standardized, emphasizing the use of multi-mission assets that can be deployed to multiple locations as the threat changes over time. The A&M Procurement PPA recurs each fiscal year and is used to acquire new aircraft and marine vessels, UAS, retire unserviceable assets, upgrade sensors and surveillance capabilities, and support the expansion of mission capabilities along the borders in response to ongoing threat assessments and mission assignments directed by higher authority.

**Program Justification**

*Gain operational control of the borders*

Through the coordinated use of integrated air and marine force to detect, interdict and prevent acts of terrorism and the unlawful movement of people, illegal drugs and other contraband toward or across the borders of the United States. Terrain, weather, and distance are significant obstacles along much of the southern, northern, and coastal borders. CBP A&M support acts as a force multiplier, allowing personnel and equipment to be transported efficiently and effectively. This support also provides rapid-response relocation of personnel and equipment, to safeguard people and critical infrastructure from acts of terrorism, natural disasters and other emergencies. The Air Safety and Life Extension Contract support the aircraft that makes it possible for CBP A&M to perform this mission.

**2. Significant Changes**

The funds requested will enable continued support for program operations through FY 2011.

- **Project Schedule**

	FY 2008	FY 2009	FY 2010	FY 2011
Aircraft Acquired	30	2	6	8
UAS Acquired	1	1	0	1
Vessels Acquired	21	18	29	30

**4. Schedule of Project Funding  
(Dollars in Thousands)**

	FY 2009	FY 2010	FY 2011	Total
Appropriation	147,978	145,609	131,609	\$425,196
Obligation (planned)	147,978	145,609	131,609	\$425,196
Expenditure (planned)	147,978	145,609	131,609	\$425,196

**5. Cost Estimate Detail and Changes  
(Dollars in Thousands)**

Not Applicable

**6. Method of Performance**

1. Is there a project (investment) manager assigned to the investment?

Yes

If so, what is his/her name?

Charles Bourquardez

2. Is there a contracting officer assigned to the investment?

Yes

If so, what is his/her name?

Sharon Lim

3. Is there an Integrated Project Team?

Yes

If so, list the skill set represented.

The IPT is comprised of individuals from the Office of CBP Air, Office of Administration, Office of Information and Technology, Technology Systems Program Office (TSPO), Office of Chief Counsel, SBI-PMO, and Office of Border Patrol representing systems acquisition, project management, systems engineering, legal review and test and acceptance.

4. Is there a sponsor/owner for this investment?

Yes

If so, identify the sponsor/process owner by name and title and provide contact information.

Michael C. Kostelnik, Assistant Commissioner, Office of CBP Air & Marine, (202) 344-3950.

Fiscal Year	Strategic Goal(s) Supported	Performance Measure / Type	Explanation or Description	Target or Goal	Actual Performance Results	Performance Metric Improvement
2010	DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity	Provide Strategic Air Coverage  Long Term/ Output	This measure shows the progress made toward expanding strategic air surveillance coverage along the borders and approaches to the borders of the U.S. by the end of the decade. The measure is the percent of border miles at risk that is under surveillance by CBP patrol-type aircraft (including unmanned aircraft systems). Measuring surveillance is an evolving metric. In FY 2003 and FY 2004 metrics were based on the measurement of 7200 P-3 flight hours provided in support of drug enforcement. In FY 2005, the UAV was	2003 – 2400  2004 – 2400  2005 – 7200  *2006 – 7200  2007 – 60% (of border at risk)  2008 – 70%  2009 – 80%  2010 – 90%	2003 – 4700  2004 – 6700  2005 – 7500  2006 – 55%	Effective FY08 the measure will be represented by the miles of at risk borders under strategic air surveillance in response to the anti-terrorism mission.

			introduced and added to these total hours.			
2010	DHS Prevention Goal 2 and Objective 2.1 Secure our Borders Against Terrorists, Means of Terrorism, Illegal Drugs, and other Illegal Activity	Extend the Zone of Security Beyond the Nation's Physical Boundaries  Long Term/ Output	This measure monitors A&M efforts in reducing, with the intent of ultimately denying, the use of border air space for acts of terrorism or smuggling using intelligence and threat assessments. The number of Targets of Interest (TOI) has been reduced over time as strategic surveillance and tactical responses by CBP interceptors and patrols, work with the Border Patrol on the ground, to deter the use of air routes into the U.S. A&M continues to gather and analyze intelligence on past and current threat	2003 – 20 2004 – 11 2005 – 10 2006 – 10 2007 – 10 2008 – 10	2003 – 20 2004 – 11 2005 – 10 2006 – 13	N/A

			<p>patterns to forecast and disseminate information about potential and emerging threats. To highlight the effectiveness of these practices, commencing in the 1970's, there were over 7,000 known Targets Of Interests (TOI) violating the southwestern border airspace. This number was reduced to approximately 150 in the mid-1980's and further reduced to 10 in 2005. The targeted goal for this measure is to maintain this low level of border incursions at a minimum and reduce it if possible, until there are no border incursions.</p>

### PPA Mission Statement

The Office of Air & Marine (OAM) is responsible for the protection of the borders of the United States. OAM identifies, deters, interdicts, and investigates acts of terrorism and smuggling arising from unlawful movement of people and goods into and out of the United States with an integrated and coordinated air and marine force. OAM has historically conducted missions along the southern borders of the United States, Mexico, South America and the Caribbean. Since September 11, 2001, OAM has established a presence along the northern border. OAM has a staff of over 1,895 pilots, law enforcement officers, operational support, and administrative positions. Mission critical assets consist of aircraft (including fixed wing and rotary helicopters), marine vessels, P-3 surveillance aircraft, surveillance equipment, maintenance facilities and hangers. With the transfer of the Unmanned Aircraft Vehicles (UAS) and Border Patrol assets, U. S. Customs and Border Protection (CBP) has been able to achieve increased effectiveness and economies of scale in the operation, procurement and maintenance of CBP's assets.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
21.0 Travel and transportation of persons	18,692	21,818	28,000	6,182

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel

expenses in accordance with Federal travel regulations. The FY 2011 Request includes increases of \$8,000 in object class realignment. A carryover amount of \$1,818,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
22.0 Transportation of things	1,572	2,158	2,245	87

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2011 Request includes an increase of \$245,000 in object class realignment. A carryover amount of \$158,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.1 Rental payments to GSA	165	-	-	-

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. In FY 2010 all obligations for GSA Rent were transferred to create a consolidated Rent account.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.2 Rental payments to others	9,522	-	-	-

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. In FY 2010 all obligations for GSA Rent were transferred to create a consolidated Rent account.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.3 Communications utilities and miscellaneous charges	6,570	7,644	2,751	(4,893)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2011 Request includes a reduction of \$4,249,000 for object realignment to better address the needs of the program. A carryover amount of \$644,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
24.0 Printing and reproduction	5	3	-	(3)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. A carryover amount of \$3,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.1 Advisory and assistance services	4,568	811	-	(811)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. A carryover amount of \$811,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	31,804	243,517	223,179	(20,338)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2011 Request includes a reduction of \$20,338,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.3 Purchases of goods & svcs. from Gov't accounts	61,155	7,025	-	(7,025)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. A carryover amount of \$7,025,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.4 Operation and maintenance of facilities	3,907	566	-	(566)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. A carryover amount of \$566,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.6 Medical care	35	3	-	(3)

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. A carryover amount of \$3,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.7 Operation and maintenance of equipment	151,657	18,646	-	(18,646)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. A carryover amount of \$18,646,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
26.0 Supplies and materials	94,393	111,538	107,167	(4,371)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2011 Request includes an object class realignment of \$6,950,000. A carryover amount of \$11,321,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
31.0 Equipment	6,111	22,261	8,300	(13,961)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2011 Request includes an increase of \$3,300,000 in object class realignment. A carryover amount of \$17,261,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
32.0 Land and structures	331	32	-	(32)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. A carryover amount of \$32,000 is included in the 2010 Enacted figure.

**PPA Mission Statement**

The Office of Air & Marine (OAM) is responsible for the protection of the borders of the United States. OAM identifies, deters, interdicts, and investigates acts of terrorism and smuggling arising from unlawful movement of people and goods into and out of the United States with an integrated and coordinated air and marine force. OAM has historically conducted missions along the southern borders of the United States, Mexico, South America and the Caribbean. Since September 11, 2001, OAM has established a presence along the northern border. OAM has a staff of over 1,895 pilots, law enforcement officers, operational support, and administrative positions. Mission critical assets consist of aircraft (including fixed wing and rotary helicopters), marine vessels, P-3 surveillance aircraft, surveillance equipment, maintenance facilities and hangers. With the transfer of the Unmanned Aircraft Vehicles (UAS) and Border Patrol assets, U. S. Customs and Border Protection (CBP) has been able to achieve increased effectiveness and economies of scale in the operation, procurement and maintenance of CBP's assets.

**Summary Justification and Explanation of Changes**

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>21.0 Travel and transportation of persons</b>	<b>118</b>	<b>2,341</b>	<b>-</b>	<b>(2,341)</b>

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. A carryover amount of \$2,341,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
22.0 Transportation of things	59	203	-	(203)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. A carryover amount of \$203,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.2 Rental payments to others	334	-	-	-

Other rent includes all payments to a non-Federal source for rental space, land, and structures. In FY 2010 all obligations for GSA Rent were transferred to create a consolidated Rent account.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.3 Communications utilities and miscellaneous charges	97	830	-	(830)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. A carryover amount of \$830,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
24.0 Printing and reproduction	23	4	-	(4)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. A carryover amount of \$4,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.1 Advisory and assistance services	3,829	1,045	-	(1,045)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. A carryover amount of \$1,045,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	4,024	56,753	52,281	(4,472)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. A carryover amount of \$4,472,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.3 Purchases of goods & svcs. from Gov't accounts	6,536	8,425	-	(8,425)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. A carryover amount of \$8,425,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.4 Operation and maintenance of facilities	1,953	729	-	(729)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. A carryover amount of \$729,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.7 Operation and maintenance of equipment	41,316	24,017	-	(24,017)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. A carryover amount of \$24,017,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
26.0 Supplies and materials	22,769	22,582	8,000	(14,582)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. A carryover amount of \$14,582,000 is included in the 2010 Enacted figure.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
31.0 Equipment	168,078	108,287	71,328	(36,959)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2011 request includes a reduction of \$8,000,000 for non-recurring of marine vessels and \$6,000,000 for AMOC. A carryover amount of \$22,959,000 is included in the 2010 Enacted figure.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **COBRA passenger inspection fee**

## **I. Appropriation Overview**

### **A – Mission Statement for COBRA passenger inspection fee**

The Consolidated Omnibus Budget Reconciliation Act of 1985 (P.L. 99-272; COBRA) created a series of user fees to recover certain costs incurred by Customs and Border Protection (CBP). Public Law 99-272, codified as 19 U.S.C. 58c (a)(1-8), established processing fees for air and sea passengers, commercial trucks, railroad cars, private aircraft and vessels, commercial vessels, dutiable mail packages, broker permits, barges and bulk carriers from Canada and Mexico, cruise vessel passengers, and ferry vessel passengers.

Collections from COBRA user fees are made available through permanent/indefinite appropriation created by the user fee statute. The fees are deposited in the Customs User Fee Account (No Year) at the U.S. Treasury. Excess collections, after reimbursements for inspectional overtime and preclearance costs are available without fiscal year limitation.

The COBRA statute mandates that the fee collections be used to pay for (in the order listed):

- All inspectional overtime
- Premium Pay
- Civil Service Retirement and Disability Fund (Agency Contribution)
- Excess Preclearance
- Foreign Language Proficiency Awards
- Enhanced Equipment and Support

The Trade Act 2002 (P.L. 107-210) section 337, codified as 19 USC 58c (b)(9)(A) (ii) and (b) (9)(B), authorized the establishment of the Express Consignment Courier Facilities (ECCF) fee to reimburse CBP for the processing costs incurred at those facilities. The original fee was set at 66 cents per individual airway bill or bill of lading. The Act also stipulated that the fee could be increased to a maximum of \$1.00 per individual airway bill or bill of lading. In fact, the ECCF fee increased to \$1.00 effective July 2008. Congress also mandated that 50 percent of the ECCF collection be transferred to Treasury's General Fund.

Since collections from the ECCF are deposited in the Customs User Fee Account, for budgetary purposes, they are reported as part of the COBRA User Fees.

### **B – Budget Activities:**

Not Applicable.

**C – Budget Request Summary:**

Collections for COBRA user fees and the ECCF are estimated at \$390,974,058 in FY 2011. COBRA and ECCF collections are projected to support 1,683 FTEs in FY 2011.

CBP projected FY 2011 collections by applying the air passenger volume growth rate of 4.6 percent, as forecasted by Federal Aviation Administration (FAA). Since historical revenue trends show that fluctuations in collections from the ECCF charge are correlated with collections from air passenger fees, CBP applied the same anticipated growth rate to project revenues from this fee.

Total Change 2010 to 2011	145	145	17,194

The components of the COBRA User Fees account are: international air and sea passenger, commercial trucks, loaded/partially loaded rail cars, commercial vessels, private aircraft and vessels, dutiable mail, customs broker permits, barges/bulk carriers, cruise vessel passenger fees and express consignment carrier fees. Revenues from these charges will support CBP's inspection functions in meeting Strategic Goals number 1, 3, and 4. These goals are Preventing Terrorism at Ports of Entry, Unifying as One Border Agency, and Facilitating Legitimate Trade and Travel.

### PPA Mission Statement

Customs and Border Protection user fees are authorized under Title 19 U.S.C. 58c, fees for certain customs services. The fees were created by the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA). COBRA fees are made available through permanent/indefinite appropriation created by the user fee statute. CBP collects customs inspection fees to cover the cost of providing customs inspections of commercial operations, including, but not limited to, all costs associated with commercial passenger, vessel, vehicle, aircraft, and cargo processing.

The fees are deposited in the Customs and Border Protection User Fee Account (No Year) at the U.S. Treasury. The excess of collections over inspectional overtime and preclearance costs are available without fiscal year limitation, except that \$30 million of such excess remains as a contingency for use in any year in which receipts are insufficient to cover the costs of providing the services described in the statute.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	126,979	90,932	86,622	(4,310)

Salaries and Benefits include costs for 1,683 FTE.

**Immigration inspection user fee**

## **I. Appropriation Overview**

### **A – Mission Statement for Immigration inspection user fee**

The Department of Justice Appropriation Act of 1987 (P.L. 99-591) authorized the collection of user fees for International Arrivals of air and sea passengers. This law codified as 8 U.S.C. 1356(h) established the air and sea passenger fees to generate revenues that would reimburse “the appropriation for expenses incurred by the Attorney General in providing immigration inspection and pre-inspection services for commercial aircraft or vessels”.

After the creation of the Department of Homeland Security (DHS), most of the immigration inspection functions were transferred to CBP. However, the detention and removal of inadmissible aliens and other activities related to investigations funded by Immigration Inspection User Fees (IUF) were transferred to the U.S. Immigration and Customs Enforcement (ICE). As a result, a Memorandum of Agreement (MOA) was established in 2004 between CBP and ICE to determine the allocation of fee collection between the two DHS’ components.

### **B – Budget Activities:**

Not Applicable

### **C – Budget Request Summary:**

Customs and Border Protection’s (CBP) share of the IUF collections for FY 2011 is estimated at \$525,442,746. CBP will support 4,311 FTEs with its share of IUF collections. CBP projected FY 2011 collections by applying the air passenger volume growth rate of 4.6 percent, as forecasted by Federal Aviation Administration (FAA).

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U.S. Customs and Border Protection  
Immigration inspection user fee  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Immigration inspection user fee**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>4,777</b>	<b>4,777</b>	<b>542,082</b>
<b>2010 Enacted</b>	<b>4,921</b>	<b>4,921</b>	<b>502,335</b>
2011 Adjustments-to-Base	(610)	(610)	23,108
<b>2011 Current Services</b>	<b>4,311</b>	<b>4,311</b>	<b>525,443</b>
<b>2011 Total Request</b>	<b>4,311</b>	<b>4,311</b>	<b>525,443</b>
Total Change 2010 to 2011	(610)	(610)	23,108

As established in a Memorandum of Agreement between CBP and ICE, funds from the Immigration Inspection User Fee account are used by CBP (82.63%) and ICE (17.37%) to recover the costs of immigration inspection services and detention and removal of inadmissible aliens. At air and sea ports of entry specifically, the fees cover the costs of immigration personnel, the maintenance and updating of systems to track criminal and illegal aliens in areas with high apprehensions, and the repair and maintenance of equipment. Revenues from these charges will support CBP's inspection functions in meeting Strategic Goals number 1, 3, and 4. These goals are Preventing Terrorism at Ports of Entry, Unifying as One Border Agency, and Facilitating Legitimate Trade and Travel.

### PPA Mission Statement

The Department of Justice Appropriation Act of 1987 (P.L. 99-591) authorized the collection of user fees for processing commercial air and sea passengers. This law codified as 8 U.S.C. 1356(h) established the two fees to generate revenues that would reimburse "the appropriation for expenses incurred by the Attorney General in providing immigration inspection and pre-inspection services for commercial aircraft or vessels."

### Summary Justification and Explanation of Changes

**Land border inspection fee**

## **I. Appropriation Overview**

### **A – Mission Statement for Land border inspection fee**

The Department of Justice Appropriation Act of 1990 (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes the fees to recover costs incurred in the following categories involving the operation of various pilot programs:

- Overtime inspection services;
- Expansion, operation and maintenance of information technology systems for non-immigrant control;
- The hiring of temporary and permanent inspectors;
- Minor construction costs associated with the addition of new traffic lanes;
- Detection of fraudulent travel documents; and
- Administrative expenses of account.

The following fees are deposited into the Land Border Inspection Fee account:

- Dedicated Commuter Lane additional vehicle (DCL)
- Arrival/Departure Land Border (I-94)
- Non-Immigrant Visa Waiver (I-94W)
- Canadian Boat Landing Permit Individual (I-68)
- Canadian Boat Landing Permit Family (I-68)
- Replacement of Papers for Non-resident Mexican Crossing (I-190)
- NEXUS
- SENTRI (Secure Electronic Network for Travelers Rapid Inspection)
- Fast (Free and Secure Trade Program ) Driver Application Fee

### **B – Budget Activities:**

Not Applicable.

### **C – Budget Request Summary:**

Collections for Land Border Inspection Fees are estimated at \$28,597,773 in FY 2011. This represents an increase of \$1,099,773 over FY 2010. The applied growth of collections is based on growth of the overall economy (Gross Domestic Product), as projected by the Congressional Budget Office. CBP is projecting to support 287 FTEs with collections from the Land Border Inspection Fees.

As authorized by law, Land Border Inspection Fees are used to recover part of CBP's costs of immigration inspections at land border ports of entry. This includes inspections of pedestrians, buses, passenger occupancy vehicles, and rail cars. It also includes antiterrorism efforts, dedicated lane programs, and forms processing.

### PPA Mission Statement

The Department of Justice Appropriation Act of 1990 (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes the fees to recover costs incurred in the following categories involving the operation of various pilot programs:

- Overtime inspection services;
- Expansion, operation and maintenance of information technology systems for nonimmigrant control;
- The hiring of temporary and permanent inspectors;
- Minor construction costs associated with the addition of new traffic lanes;
- Detection of fraudulent travel documents; and
- Administrative expenses of account.

**Immigration enforcement fines**

## **I. Appropriation Overview**

### **A – Mission Statement for Immigration enforcement fines**

Section 382 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (P.L. 104-208; IIRIRA) created the Immigration Enforcement Account (IEA). In addition to creating this account, IIRIRA also added new types of fines, such as those fines levied against aliens for failure to depart the United States after being so ordered.

The authorized uses of this fund consist of the identification, investigation, apprehension, detention and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities.

### **B – Budget Activities:**

Not Applicable.

### **C – Budget Request Summary:**

Based on previous year collections, FY 2011's Immigration Enforcement Fines collections are estimated at \$1,037,118. Since violations of the law are not easily quantifiable, enforcement related collections are also relatively fluid. CBP will support 23 FTEs with collections from Immigration Enforcement Fines in FY 2011.

These funds will be used for the identification, investigation, apprehension, detention and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens at air and sea ports of entry in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities. Revenues from these fines will support CBP's immigration law enforcement functions in meeting Strategic Goal number 3: Unifying as One Border Agency.

### PPA Mission Statement

The Immigration Enforcement account was established under Section 382 of the Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) of 1996. Previously, similar fines were collected and deposited into the Immigration User Fee account. In addition to creating this account, IIRIRA also added new types of fines, such as those fines levied against aliens for failure to depart the United States after being so ordered.

The authorized uses of this fund consist of: the identification, investigation, apprehension, detention and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities.

**Global Entry User Fees**

## **I. Appropriation Overview**

### **A – Mission Statement for Global Entry User Fees**

The Global Entry Program is authorized under the Consolidated Appropriations Act of 2008 (P.L. 110-161) Section 565(3)(A). The Program established an international registered traveler program that incorporated available technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. In addition, Section 565 (3)(B) of the Consolidated Appropriations Act of 2008 authorized the imposition of a fee to recover the full cost of the Program. The current fee rate has been set at \$100 per applicant.

### **B – Budget Activities:**

Not applicable.

### **C – Budget Request Summary:**

The Office of Field Operations is projecting to process a total of 25,000 enrollees in FY 2011. Based on projected enrollment \$2,500,000 in collections are expected in FY 2011. Collection from the Global Entry fee will support 40 FTEs.

The Global Entry Program authorizes the use of available technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. Currently there is a \$100 per applicant fee charged to cover the costs of this program. This fee will be reviewed and adjusted accordingly if needed. Revenues from this fee will support CBP's inspection functions in meeting Strategic Goals numbers 3 and 4. These goals are Unifying as One Border Agency and Facilitating Legitimate Trade and Travel.

**PPA Mission Statement**

The Global Entry Program is authorized under the Consolidated Appropriations Act of 2008 Section 565(3)(A). The Program established an international registered traveler program that incorporated available technologies, such as biometrics and e-passports, and security threat assessments to expedite screening and processing of international passengers. In addition, Section 565 (3)(B) of the Consolidated Appropriations Act of 2008 authorized the imposition a fee to recover the full cost of the Program. The current fee rate has been set at \$100 per applicant.

**APHIS User Fees**

## **I. Appropriation Overview**

### **A – Mission Statement for APHIS User Fees**

Section 2509 of the Food, Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624) authorized United States Department of Agriculture (USDA) to collect user fees for various services. The law codified as 21 U.S.C. 136a authorized the Secretary of Agriculture to prescribe and collect fees to recover the costs of providing Agriculture Quarantine and Inspection (AQI) services for international arrivals of passengers, conveyances, animals, plants and agricultural goods at Ports of Entry. This authority establishes fees on five modes of international passenger transportation: (i) commercial aircraft, (ii) sea going vessels, (iii) trucks with single entry, (iv) trucks operating under a multiple entry decal, and (v) loaded rail cars. Revenues from AQI (or APHIS) user fees are used to reimburse the full costs incurred in providing inspection services.

The Homeland Security Act of 2002 transferred to DHS/CBP, APHIS' responsibility for inspecting passenger declarations and cargo manifests, international air passengers, baggage, cargo, and conveyances and holding suspect articles in quarantine to prevent the introduction of plant or animal diseases. Section of 421(f) in the Homeland Security Act of 2002, mandates DHS/CBP and USDA/APHIS to agree on a periodic transfer of funds from the latter to the former to cover its agricultural inspectional costs. Under an MOA between DHS/CBP and USDA/APHIS, the former received approximately 63 percent of the collections from the APHIS user fees in FY 2009. CBP expects to maintain a similar share in FY 2010 and 2011.

### **B – Budget Activities:**

Not applicable.

### **C – Budget Request Summary:**

Based on APHIS' estimates, CBP's share from APHIS user fees in FY 2011 is anticipated to be \$318,471,670. This represents a \$6,245,330 increase from the enacted amount in FY 2010. Depending on the implementation of a rule to adjust APHIS fees in FY 2011, CBP's share from these fees is expected to increase above current projected levels. However, at this point the implementation of the aforementioned rule in FY 2011 is not certain. Therefore, for purposes of this submission, CBP assumed that the rule will not be implemented in FY 2011. CBP projects to support 2,332 FTEs with its share from APHIS user fees.

### PPA Mission Statement

Section 2509 of the Food, Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624) authorized USDA to collect user fees for various services. The law codified as 21 U.S.C. 136 established seven types of Plant Protection and Quarantine (PPQ) user fees, six of which are the Agriculture Quarantine and Inspection (AQI) fees, known to CBP as the APHIS user fees. The six established processing fees are for international air passengers, commercial aircraft clearance, commercial vessels, commercial trucks, commercial truck decals, and loaded rail cars. The revenues from these fees are used to reimburse the full costs incurred in providing the inspectional activities associated with the passengers and conveyances that are subject to the fees.

**Small Airport User Fee**

## **I. Appropriation Overview**

### **A – Mission Statement for Small Airport User Fee**

The Small Airport User Fee is authorized under Title 19 U.S.C. 58b and administered under Title 19 U.S.C. 58c (b) (9) (A) (i). The Small Airport User Fee program authorizes inspection services to be provided to participating small airports on a fully reimbursable basis. The fee charged under this program is set forth in a Memorandum of Agreement (MOA) between the user fee airport and Customs and Border Protection, and may be adjusted annually as costs and requirements change. The MOA includes provisions for payment of a flat initial start-up fee and an annual recurring fee. The fees do not cover overtime or certain computer and telecommunications costs that are paid separately by the airport authority.

### **B – Budget Activities:**

N/A

### **C – Budget Request Summary:**

Based on the anticipated \$8,164,998 in collections from the Small Airport User Fee, CBP will support 54 FTEs. Collections from the Small Airport User Fee are based on the anticipated number of CBP Officers assigned to those locations.

<b>2011 Total Request</b>	<b>54</b>	<b>54</b>	<b>8,164</b>
Total Change 2010 to 2011	-	-	164

The Small Airport User Fee program authorizes inspection services to be provided to participating small airports on a fully reimbursable basis. The amount charged is determined by how many CBP Officers are stationed at the port and whether it is a new or existing facility. CBP is not expecting an increase in revenues for FY 2011.

### PPA Mission Statement

Small Airport Facilities is authorized under Title 19 U.S.C. 58b and administered under Title 19 U.S.C. 58c (b) (9) (A) (i). The User Fee Airports program authorizes inspection services to be provided to participating small airports on a fully reimbursable basis. The fee charged under this program is set forth in a Memorandum of Agreement between the small airport facility and the agency, and may be adjusted annually as costs and requirements change.

**Puerto Rico Trust Fund**

## **I. Appropriation Overview**

### **A – Mission Statement for Puerto Rico Trust Fund**

Title 48 U.S.C. 740 authorizes the collections of duties and taxes in Puerto Rico and the creation of the Puerto Rico Trust Fund (PRTF). Collections in Puerto Rico, less the costs of collecting duties and taxes, are transferred to Puerto Rico's Treasury (Hacienda), to be expended as required by law for the Government of Puerto Rico and the benefit thereof. The Government of Puerto Rico negotiates biennial agreements with CBP's Office of Air and Marine (OAM) and Immigration Customs Enforcement (ICE) to cover the costs of performing their functions in Puerto Rico. CBP transfers funds to OAM and ICE based on the agreement negotiated.

### **B – Budget Activities:**

Not applicable.

### **C – Budget Request Summary:**

CBP projects collections to total \$89,980,122 in FY 2011. The applied growth of collections is based on growth of the over economy (Gross Domestic Product), as projected by the Congressional Budget Office. With the collections of import duties and certain taxes deposited in the Puerto Rico Trust Fund, CBP will support 529 FTEs.

Total Change 2010 to 2011	-	-	(2,020)

CBP is authorized to use collections in the Puerto Rico Trust Fund to cover its costs related to the collections of duties and taxes in Puerto Rico. CBP's Office of Air and Marine and U.S. Immigration and Customs Enforcement (ICE) negotiate biennial agreements with Puerto Rico's Treasury that are funded with the anticipated surplus Puerto Rico expects to receive after CBP covers its customs related costs.

### PPA Mission Statement

The duties and taxes related to the Puerto Rico Trust Fund are authorized under Title 48 U.S.C. 740. The duties and taxes collected in Puerto Rico, less the costs of providing inspection and law enforcement services, are paid into the treasury of Puerto Rico, to be expended as required by law for the Government of Puerto Rico and the benefit thereof. These funds are intended to combat criminal elements who have focused on Puerto Rico as a gateway to illegally introduce narcotics into the mainland of the U.S.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	31,366	20,144	19,701	(443)

Salaries and Benefits include costs for 529 FTE.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.3 Other than full-time permanent	422	389	381	(8)

See above.

See above.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
21.0 Travel and transportation of persons	1,149	714	699	(15)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal Travel regulations.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
22.0 Transportation of things	116	163	160	(3)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.1 Rental payments to GSA	183	237	232	(5)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and related services.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.2 Rental payments to others	108	61	59	(2)

Payments to a non-Federal source for rental of space, land, and structures.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.3 Communications utilities and miscellaneous charges	3,386	2,008	1,964	(44)

Communication, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.1 Advisory and assistance services	4	-	-	-

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	8,759	47,156	46,120	(1,036)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.3 Purchases of goods & svcs. from Gov't accounts	31,392	-	-	-

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.4 Operation and maintenance of facilities	2,728	-	-	-

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.6 Medical care	21	-	-	-

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.7 Operation and maintenance of equipment	2,021	-	-	-

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
26.0 Supplies and materials	1,728	864	845	(19)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
31.0 Equipment	2,212	1,127	1,103	(24)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
41.0 Grants/Subsidies/Contributions	1,744	-	-	-

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
44.0 Refunds	-	5,825	5,696	(129)

Payments of amounts previously collected by the Government.

#### **A. Mission and Description of U.S. Customs and Border Protection**

CBP is charged with the securing our Nation’s borders and facilitating legitimate trade and travel. CBP accomplishes this mission through six operational offices: the Office of Border Patrol, the Office of Field Operations, the Office of Air and Marine, the Office of International Affairs, the Office Internal Affairs, and the Office of International Trade. These six offices receive critical support from CBP’s other mission-focused offices. Since the publication of our first strategic plan in 2005, CBP has made steady progress toward:

- protecting our country from the threats of global terrorism, illegal migration, and trafficking of narcotics and other contraband;
- protecting our economy by enforcing trade laws, intellectual property rights, and collection of revenue on goods imported into the United States;
- protecting our food supply and agricultural industry from pests and disease; and
- increasing the security of our airspace.

CBP’s FY 2009-2014 strategic plan is one of the most important tools that will be used to chart the Agency’s course of action for the next five years. It is designed to help guide the strategic planning efforts of the various offices and programs within CBP; enabling the development of effective strategies and the establishment of key priorities needed to achieve our mission and improve organizational performance.

CBP’s mission statement: We are the guardians of our Nation's borders. We are America's frontline. We safeguard the American homeland at and beyond our borders. We protect the American public against terrorists and the instruments of terror. We steadfastly enforce the laws of the United States while fostering our Nation's economic security through lawful international trade and travel. We serve the American public with vigilance, integrity, and professionalism.

CBP's primary field occupations include CBP Officers, Border Patrol Agents, Air and Marine Interdiction Agents, CBP Agriculture Specialists, and Import and Entry Specialists. Its field organization includes 20 Border Patrol Sectors with 34 permanent traffic checkpoints and 98 tactical traffic checkpoints between the ports of entry (POE); 145 stations and substations; 20 Field Operations Offices and 327 associated POEs, of which 15 are pre-clearance stations in other countries; and 74 Air and Marine operating locations. Field personnel use a mix of assets, technologies and automation to identify and apprehend undocumented aliens and high-risk travelers, and to facilitate legitimate travel and trade. Those resources include aircraft and boats, non-intrusive inspection technology, such as large-scale imaging devices that use x-ray and gamma ray technology, radiation portal monitors, and automated targeting software to name a few.

## **B. Major Activities and Key Strategic Goals**

Resources appropriated by Congress are used to achieve CBP's strategic goals and priorities. Development of these goals and priorities involved careful consideration of National Strategy for Homeland Security, the Presidential Directive on National Security, the National Drug Control Strategy, Executive Orders, the FY 2008-2013 Department of Homeland Security (DHS) Strategic Plan, the DHS Secretary's Priorities, and the CBP 2009-2014 Strategic Plan to ensure alignment and mutual support. CBP's investments also reflect the goals and objectives of programmatic plans, such as the National Border Patrol Strategy, Securing America's Borders at Ports of Entry (SABPOE) Strategic Plan, and the National Southwest Border Counternarcotics Strategy.

The FY 2009-2014 CBP Strategic Plan communicates two strategic goals and three cross-cutting enablers.

### **Goal 1: Secure our Nation's borders to protect America from the entry of dangerous people and goods and prevent unlawful trade and travel.**

As the frontline border security agency, CBP has a multifaceted and complex mission of protecting the Nation against a multitude of cross-border violations. Our first priority is to prevent terrorists and terrorist weapons from entering the country. All of our efforts to secure the border, including our traditional missions of enforcing the immigration, customs, trade, agricultural, and other laws of the United States contribute to thwarting terrorism. CBP will continue its efforts to expand and maintain effective control of all air, land, and maritime borders at and between U.S. POEs through a layered, defense-in-depth approach. Achieving this aim means not only preventing the illegal entry of inadmissible persons and illicit contraband but also competently expediting the cross-border flow of lawful immigration, travel, and commerce at our borders. Providing security along the northern, southern, and coastal borders requires effective coordination and integration of all of CBP's operational components, along with the guidance and assistance of essential CBP mission support personnel.

A segment of the border between POEs is considered under effective control when CBP can simultaneously and consistently achieve the following: (1) detect illegal entries into the United States; (2) identify and classify these entries to determine the level of threat involved; (3) efficiently and effectively respond to these entries; and (4) bring each event to a satisfactory law enforcement resolution. At the POEs, CBP officers take a similar approach to secure U.S. borders by detecting, identifying, and preventing illegal activity and entries. Gaining control of U.S. borders is a comprehensive mission that involves numerous programs and activities across CBP, all

working together to enforce a wide range of immigration, customs, trade, agricultural, and other laws and regulations.

CBP is responsible for developing and deploying integrated solutions that provide frontline agents and officers with enhanced detection, tracking, and response situational awareness capabilities. The technology solution will support and complement investments in personnel and tactical infrastructure (pedestrian fence, vehicle fence, roads and lights). An essential component of securing U.S. borders involves providing adequate infrastructure and technology at U.S. POEs. CBP's air and marine assets are another key component of its border security efforts. While technology, tactical infrastructure, and air and marine assets are all necessary resources in gaining effective control of the border, CBP also must ensure that an adequate law enforcement personnel are deployed at strategic locations throughout the United States and overseas. Border Patrol agents, Air and Marine Interdiction agents, and CBP officers will be CBP's most valuable resource in its efforts to secure the Nation's borders.

Technology is an important part of CBP's defense-in-depth approach. Non-Intrusive Inspection (NII) technology is used to detect and interdict weapons, narcotics, currency, and other contraband concealed in large containers and commercial shipments. Technologies currently deployed include large-scale X-ray and gamma ray imaging systems, radiation detection technology, as well as a variety of portable and hand-held technologies. CBP screens 100 percent of all containers for illicit radiological materials and inspects 100 percent of all targeted high-risk containers. To achieve this, CBP must continue to deploy and maintain appropriate NII capabilities at all inspection points. Moreover, it must deploy enough NII systems to ensure that it can respond to increases in the threat level, either nationally or at specific locations, as well as examine the increasing volume of cargo and conveyances crossing our borders.

The US-VISIT program continues to deploy and support biometric systems at many of our land, sea, and air POEs. These systems enable CBP Officers to use biometric identifiers, such as fingerprints (using an inkless fingerprint scanner) and photographs (using a digital camera), to verify the identity of foreign nationals wishing to enter the United States. US-VISIT's biometric information also helps thwart identity fraud by providing unalterable, unassailable identity information.

Border Patrol Stations are equipped with equipment to collect and electronically transmit biometric information to the Automated Biometric Identification System/Integrated Automated Fingerprint Identification Systems (IDENT/IAFIS). IDENT collects and maintains a subject's biometric information (fingerprints and photographs) and performs a search against the Lookout, Recidivist, and Alien Registration databases within DHS.

Another key aspect of CBP's strategy is to fully execute and build on the early success of the Western Hemisphere Travel Initiative (WHTI). Before WHTI, Canadian and U.S. citizen travelers were able to offer an oral declaration alone to prove citizenship. WHTI increases the security of U.S. borders by requiring travelers to present only secure documents issued by trusted entities, which denote identity and citizenship. By limiting the number of documents accepted at the border to those for which CBP has a high degree of confidence, WHTI decreases opportunities for fraud, electronically verifies the document back to issuing source, and promotes faster processing of travelers.

## **Goal 2: Ensure the efficient flow of legitimate trade and travel across U.S. borders.**

In order to meet its dual goals of security and facilitation, CBP will develop and implement programs that expedite the processing of people and goods at land border ports, airports, and seaports, while at the same time securing the global trade environment and strengthening supply chain security. CBP will focus its resources on identifying and responding to high-risk travelers and conveyances. CBP employs a risk-based, layered enforcement approach through the use of accurate advance information; the most advanced inspection, screening, and scanning technology available; modernized systems for cargo processing; and international and trade compliance partnership programs, such as the Automated Targeting System (ATS), Traveler Enforcement and Compliance System (TECS), Automated Commercial Environment (ACE), and the application of principles to prioritize efforts. The more technology, information, training, and infrastructure are used to support operations that identify and expedite lawful travel and commerce across our borders, the more frontline officers can focus on the known threats that require increased scrutiny.

CBP's ability to expedite the processing of people, products, and conveyances is dependent on its ability to identify high-risk travelers and goods for inspection. Legislation and regulatory action, such as the Trade Act of 2002, the 24-hour rule, and the SAFE Port Act, have made it mandatory to provide advance information on passengers and goods arriving in the U.S. CBP applies its targeting methods against the arrival information to determine which passengers or shipments need to be segregated for closer inspection. The main platform used to perform this analysis is the Automated Targeting System (ATS). ATS and associated databases will provide CBP Officers (including those stationed overseas) with advanced notice of travelers and goods arriving at U.S. POEs, allowing them to cross-check the passenger and cargo manifests against databases, such as TECS, for "lookouts" of unlawful activity. TECS is also used to screen passengers arriving at land POEs without prior arrival notification, such as pedestrian traffic or those in private automobiles.

CBP's trusted traveler programs enhance the agency's ability to expedite the process and facilitate known, low risk persons seeking to legally cross the U.S. border. Trusted traveler programs involve voluntary submission of an application and subsequent vetting using automated name and fingerprint based checks of law enforcement databases and an interview with uniformed officers. CBP's trusted traveler programs include the Secure Electronic Network for Traveler Rapid Inspection (SENTRI) program, developed for the U.S. southern border in conjunction with Mexico, and the NEXUS program, a joint U.S.-Canadian trusted traveler program developed for the northern border. Both programs facilitate travel for noncommercial travelers. For commercial drivers, Free and Secure Trade (FAST) is the trusted traveler program implemented for both the northern and southern borders. In 2008, CBP implemented Global Entry, a trusted traveler program for the air environment. These programs collectively expedite legal travel while allowing CBP officers additional time to focus on higher risk, unknown travelers.

ACE is the modernized U.S. trade processing system that consolidates seven cargo processing systems into a single portal. It provides CBP and other component personnel better information to decide—before a shipment reaches U.S. borders—what cargo should be expedited based on compliance with U.S. laws and what cargo should be targeted based on rule based risk assessments. Additionally, by eliminating paper processes through documentation automation, ACE will enable CBP to improve traffic management that will support the efficient movement of both passenger and commercial traffic at land border POEs and airports.

CBP employs three principles in a coordinated approach to balance security, risk, and efficiency in resolving compliance issues while facilitating legitimate trade. First, CBP identifies trade issues that cause significant revenue loss, pose economic risk to U.S. industry, or represent health and safety concerns to citizens. Second, CBP investigates trade issues that are susceptible to non-compliance; have a history of problems; or are characterized by a lack of automation, or by complexity. Third, CBP provides the trade community with guidance in the form of regulations, rulings, and directives that enable traders to meet their obligations. Working in concert, these principles enable CPB to analyze information and identify high-risk trade areas. Currently, CBP concentrates on seven priority trade issues: Antidumping and Countervailing Duty, Intellectual Property Rights, Textiles and Wearing Apparel, Revenue, Agriculture, Import Safety, and Penalties.

CBP must leverage its frontline officers and agents to gain information that can be used to strengthen the Nation's security and to act upon intelligence that will help it carry out its critical border security mission. The need for real-time information for decision making and the lack of detailed information about the persons or goods attempting to cross the border offer two of the greatest front line challenges. In response, CBP's primary strategy is to develop and deploy an integrated intelligence capability that will allow CBP to become a fully integrated, intelligence-driven organization.

Cross-cutting enablers in CBP's strategic plan also affect the Agency's ability to accomplish its mission and achieve its goals. These enablers are improved intelligence and information sharing, maximizing partnerships, and an effective management infrastructure. They are vital to mission success. Through focus on them across Agency goals, CBP can better integrate the work of the entire agency.

**Enabler 1: Leverage improved intelligence and information sharing to maximize the effectiveness of our limited resources.**

As just mentioned, the need for real-time information for decision making and the lack of detailed information about the persons or goods attempting to cross the border present significant operational challenges. By leveraging frontline officers and agents to gain information, CBP can strengthen the Nation's security and more quickly act upon intelligence critical to the border security mission. Also, CBP working in concert with other DHS components and the Joint Terrorism Task Force will collectively improve the ability to synthesize, share, and exploit all available intelligence. In doing so, CBP will become a more fully integrated, intelligence-driven organization.

**Enabler 2: Maximize the power of partnerships.**

Partnerships have contributed greatly to our progress in developing and implementing the various strategies that have improved border security and facilitation of global trade and travel. CBP's success relies upon the creation of enduring partnerships and maintaining open lines of communication domestically and internationally. Partnerships must be wide reaching and touch Federal, State, local, tribal, foreign, and domestic law enforcement agencies, as well as private sector industry and international partners. CBP's ability to align and/or increase needed resources will enhance existing security measures in targeted areas. Identifying, establishing, and enhancing or expanding beneficial partnerships while aligning resources will also allow CBP to enhance the

enforcement of and compliance with agriculture, customs, immigration, and other agency enforced laws and regulations.

**Enabler 3: Promote achievement and a results-driven culture through an effective management infrastructure that fosters the highest standards of integrity.**

CBP fosters an environment designed to leverage state-of-the-art technologies, innovative strategies, and world-wide partnerships to protect America's communities and defend its borders. Through the development and implementation of an innovative strategic planning framework that integrates investment management, resource management, and program management, CBP will achieve a maximum return on investment on CBP's top mission-focused goals. CBP will provide the best support services throughout DHS by promoting a business culture that creates effective management partnerships among the Information Technology, Finance, Internal Affairs, Training and Development, and Human Resources Management functions. To ensure that CBP remains the employer of choice for a talented, dedicated workforce, it will implement a leadership-focused culture that recruits, trains, and retains the right people.

**C. Resources Requested and Performance Impact**

Major Changes within the Base Level

The FY 2011 President's Budget funding request will allow CBP to fulfill its priority mission of preventing terrorists and terrorist weapons from entering the United States while facilitating legitimate travel and trade. This request will provide CBP with the opportunity to transform border control and security at and between POEs, using an effective mix of manpower, infrastructure and technology. To ensure that America's borders are not the first line of defense against terrorism, CPB's request will provide additional means for extending our zone of security beyond our physical borders. Furthermore, CBP will be able to continue to focus on its traditional mission of enforcing trade, agriculture, customs, and immigration laws, and regulations at our borders. CBP will continue to reallocate resources from lower to higher priorities to meet its strategic goals and objectives.

The President's Budget requests a total of \$11.180 billion in FY 2011, a decrease of \$269 million from the FY 2010 enacted request of \$11.449 billion. This funding level will allow CBP to maintain its mission capabilities and important activities and programs by managing efficiencies and requesting programmatic changes. The FY 2011 budget request will increase direct FTE from 58,223 for FY 2010 to 58,575 for FY 2011. Changes include: 10 FTE for the annualization of positions from the FY 2009 American Recovery Reinvestment Act for Land Ports of Entry; 74 FTE for the annualization of the FY 2009 War Supplemental positions; 72 FTE for the annualization of positions for Air and Marine Strategy; 26 FTE for the annualization of 65 CBP Officers; 44 Border Patrol Agents and 16 support staff for Combating Southbound Firearms and Currency Smuggling on the Southwest border Initiative; 61 FTE for the annualization of additional Border Patrol Staff; 51 FTE for the annualization of 12 scientists, 1 paralegal, 34 international trade specialists, 32 auditors, 10 attorneys, 3 import specialists and 11 support personnel for Import Safety and Trade Enforcement; 11 FTE for the annualization of 20 Customs and Border Protection Officers and 2 mission support personnel for Analyze and Employ Information and Intelligence; 3 FTE for the annualization of Technology Oversight positions for TECS, Secure Border Initiative, and Automated Commercial Environment; 1 FTE for the annualization of a position for the Conduct and Integrity Oversight Initiative; 475 FTE from an Office of Information Technology

management and technology efficiency adjustment to base for the conversion of contractors to Federal employees; (425) FTE from an adjustment to base decrease for user fee projections; and 195 FTE from an Office of Field Operations Position enhancement for 315 CBPOs.

Additionally, the President’s Budget requests a \$99.8 million recession of prior year unobligated balances which had been appropriated for Facilities.

Adjustments-to-Base

CBP requests the following adjustments to base to meet the current services level requirements in the following areas:

- **Journeyman Increase ..... \$310.4 million (0 FTE)**  
The 2011 Budget funds the full-year impact of the salary and benefit requirements associated with the implementation of raising the journeyman grade level for frontline CBP officers, Border Patrol agents and Agricultural Specialists—from the GS-11 level to the GS-12 level. This change will be implemented in the spring of 2010. The work responsibilities of CBP officers, Border Patrol agents, and Agricultural Specialist have continued to increase since the creation of DHS.
- **CBP Officers..... \$46.8M (389 FTE)**  
CBP requests an adjustment to base of \$46.8 million to fund 318 FTEs within the Office of Field Operations and 71 support FTEs for the agency. This will support CBP’s mission to protect the U.S. at its Ports of Entry from the infiltration of terrorists and other criminal elements into the country and address illegal smuggling of drugs, money instruments, and aliens across our borders.
- **Automated Commercial Environment (ACE)..... -\$75.0M (0 FTE)**

In FY 2011, the ACE program will begin entering into an operation and maintenance steady state and forgo development of enhanced modernization capabilities. ACE is an automated process that facilitates legitimate trade while helping to interdict illicit/unsafe goods, streamlines the flow of all trade information, and provides CBP/DHS with risk-based decision-making capabilities to further secure U.S. borders. ACE will continue to enhance border security, expedite trade flow and simplify and expedite cargo releases. However, the development of the remaining basic entry summary transactions, modernized cargo release processes or enhancing the single window concept that integrates with Participating Government Agencies will be deferred.

Management Efficiencies

In April 2009, Secretary Napolitano announced a series of bold and far-reaching initiatives to improve efficiency and increase transparency in the Federal Government. The initiatives, termed “Efficiency Reviews,” sought to ensure taxpayer dollars are being used in the most efficient way possible. The reviews focused initially on the key areas of reducing printing and distribution cost; maximizing use of government versus commercial facilities for meetings, conferences, etc.; consolidation of publication subscriptions; and eliminating non-essential travel while maximizing use of conference calls and web-based training and meetings. As an overarching theme, the initiatives seek to create a culture of increased stewardship and accountability to our Nation including thinking outside the initial focus areas. Actively engaged in this program, CBP will achieve a 25 percent reduction in energy costs at a new Border Patrol Sector Station in El Paso that has emphasized “green” energy design and construction. In coordination with ICE, CBP also

expects to generate more than \$250,000 in annual savings through a new voluntary conversion of paystubs from paper to online.

For FY 2011, CBP's efforts will continue. Every dollar saved will be prioritized to support CPB's most critical mission activities. Major initiatives include:

- The Office of Information Technology (OIT) will reduce Inspection, Trade and Travel Facilitation by the \$40.6 million by hiring federal employees to perform inherently governmental tasks currently performed by contractors resulting in 475 FTE.
- CBP will eliminate a contract which provides information on companies' financial status and soundness which will result in a cost avoidance of \$10.8 million annually. This identified efficiency will eliminate the purchase of information on the financial solvency of trading companies and rely on current and open sources for the required information.
- The Office of Border Patrol will reduce its budget by \$12.0 million in the areas of travel, supplies and equipment. This will be done by reducing the number of Temporary On-Duty personnel detailed to headquarters and government travel by headquarters personnel to attend meetings.
- The Office of Training Development will reduce funding by \$2.1 million in the area of basic training.
- The Office of Field Operations will reduce headquarters and field travel by \$3.6 million.
- The Office of Human Resource will reduce travel by \$680,000.
- CBP will save \$387,000 from management efficiencies implemented through WHTI technology by purchasing a non-Radio Frequency Identification (RFID) sticker in lieu of using the current RFID technology sticker for the Secure Electronic Network.

**Program Changes to the Current Service Level**

The following is a list of programs changes to address priorities for FY11.

These changes fund the increased salary and benefit requirements associated with the implementation of raising the journeyman grade level for the frontline Officers and Agents, fund shortfalls for the annualization of enhancements received in prior years, and sustain the facilities and equipment funded through the American Recovery and Reinvestment Act (ARRA) initiatives, such as NII, Tactical Communication and LPOE modernization.

**FY 2011 Program Changes**

*Program Increases*

**Data Center Migration..... \$26.6M (0 FTE)**  
CBP requests an increase of \$26.6 million for the Data Center consolidation effort, which will standardize Information Technology (IT) resource acquisitions across components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting

response times in the event of an emergency. Benefits derived from consolidation are enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time. The data center development funding, to be managed through the DHS Working Capital Fund, will be used for the continuation of system and application migration to the two DHS Enterprise Data Centers.

**Intellectual Property Rights Enforcement..... \$25.0M (100 FTE)**

CBP requests an increase of \$25.0 million for IPR enforcement. The additional resources will be used to enhance information technology systems and enforcement activities that support IPR activities and will support the implementation of the IPR 5-Year Plan and CBP’s strategic goal of releasing legitimate cargo without delay, intercepting infringing goods, and preventing and deterring violations.

**Intelligence Analysts..... \$10.0M (52 FTE)**

CBP requests an increase of \$10.0 million to fund 103 Intelligence Analysts to support 24/7 operations of CBP Intelligence Watch, Operations Coordination and the Commissioner’s Situation Room. These positions will insure that CBP’s leadership is provided with the intelligence information required to make tactically and strategically sound decisions while also insuring cost-effectiveness.

**FY 2011 Program Changes**

*Program Decreases*

**Border Security, Fencing, Infrastructure, & Technology (BSFIT)..... -\$158.3M (0 FTE)**

A total of \$574M is requested for SBI in FY 2011, this is a reduction of \$158M from the FY 2010 enacted level. This funding level maintains CBP’s investment in priority border technology, including the construction, deployment and evaluation of Block 1 of the SBInet initiative to additional border patrol sectors in Arizona. Moreover, the FY 2011 request expands the deployment and integration of technology along the northern border. The request permits deployments of new tactical infrastructure, P-25 Tactical Communications modernization, and other technology (i.e., mobile sensor capabilities), and continue to support field maintenance and logistics activities for deployed tactical infrastructure, SBInet, P-25, Mobile Surveillance Systems, and legacy systems.

**OIT Reduce Contractor Support..... -\$74.4M (0 FTE)**

CBP requests a reduction of \$74.4 million to contractor. The reduction will occur through less direct field support and increased centralized IT Help Desk support. OIT plans to standardize desktops, servers and storage; consolidating and centralizing management of desktops; virtualizing services and workstations; and by optimizing circuits and bandwidth.

**Western Hemisphere Travel Initiative (WHTI)..... -\$24.5M (0 FTE)**

CBP requests a reduction of \$24.5 million in the WHTI Program because it is transitioning to a steady state. The reduction will be achieved by eliminating one half of funds recurred in FY 2011 for new acquisitions in FY 2010 (\$10.5 million) and reducing FY 2011 base funding by \$14.0 million.

**Secure Freight Initiative (SFI)..... -\$16.6M (-4 FTE)**

CBP requests a reduction of \$16.6 million in the Secure Freight Initiative (SFI) Program. SFI will transition three of the five existing ports (Honduras, Southampton, and Korea) from a 100% scanning operation to CSI operations. Under CSI protocols, only targeted, high-risk cargo will be examined, as opposed to 100% of all cargo under SFI. CSI will increase the use of remote targeting and examinations in order to achieve the program’s objectives. The remaining funding will support existing operations.

**Customs-Trade Partnership Against Terrorism (C-TPAT) ..... -\$12.0M (0 FTE)**

CBP requests a reduction of \$12.0 million in the C-TPAT program because it is transitioning from an expanding program to a steady-state program. The Automated Web-Base Portal System funding will be reduced by \$2.0 million by reducing from 8 to 2 the number of contract programmers assigned to OIT in equal increments from FY 2010 – FY 2012. The program will also take a \$10.0 million reduction in support funds, i.e., equipment, services and supplies.

**D. Performance Highlights, Resources and Alignment to Strategic Goals**

For each mission-oriented program, the program performance goal, alignment to Secretary’s priorities, total dollars and FTE, and Government Performance and Results Act (GPRA) performance plan measures are shown below. Additional measures are also displayed, as appropriate, to provide a more thorough context of expected performance results.

<b>Program: Border Security Inspections and Trade Facilitation at Ports of Entry</b>						
<b>Performance Goal:</b> Improve the targeting, screening, and apprehension of high - risk international cargo and travelers to prevent terrorist attacks, while providing processes to facilitate the flow of safe and legitimate trade and travel.						
<b>Secretary’s Priority:</b> Securing and Managing our Border; Complementary Activities						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$3,827,103	\$3,890,812	\$4,313,718	\$4,820,325	\$4,593,088	\$4,810,530
<b>FTE</b>	26,117	26,479	28,687	30,311	31,397	31,397

**Performance Plan Measures**

<b>Measure:</b> Air passenger apprehension rate for major violations						
<b>Description of Measure:</b> This measure provides a statistically valid estimate of the apprehension rate of air passengers for major violations at international airports. Data is derived from a comprehensive compliance examination program used to identify the rate of major violations in the sample, which is then applied to the general population. The major violations found during the regular primary inspection process are then compared to the expected number to compute the apprehension rate for major violations among air passengers traveling to the U.S. A major violation involves serious criminal activity, including possession of narcotics, smuggling of prohibited products, human smuggling, weapons possession, fraudulent U.S. documents, and other offenses serious enough to result in arrest. These major violations comprise less than 1% of the overall number of travelers presenting themselves at the Ports of Entry. Narcotics violators constitute the biggest segment that gets through without detection.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	N/A	41%	25%	FOUO	FOUO
<b>Actual:</b>	None	40.3%	25%	FOUO	N/A	N/A

<b>Measure:</b> Land border passenger apprehension rate for major violations						
<b>Description of Measure:</b> This measure provides a statistically valid estimate of the apprehension rate of land vehicle passengers for major violations who enter through U.S. land border ports of entry. A major violation involves serious criminal activity, including possession of narcotics, smuggling of prohibited products, human smuggling, weapons possession, fraudulent U.S. documents, and other offenses serious enough to result in arrest. The sample rate is used to estimate the expected number of major violations in the general population. The major violations found during the primary inspection process are then compared to the expected number to compute the apprehension rate for major violations among vehicle passengers traveling to the U.S. These major violations comprise a very small proportion of the number of travelers presenting themselves at Ports of Entry and far less than 1% in both air and land. Narcotics violators constitute the biggest segment of violators that get through without detection.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	N/A	35%	28%	FOUO	FOUO
<b>Actual:</b>	None	34.5%	28.9%	FOUO	N/A	N/A

<b>Measure:</b> Air passengers compliant with laws, rules, and regulations (%)						
<b>Description of Measure:</b> This measure is the compliance rate of international air passengers with all of the laws, rules, and regulations that CBP enforces at the Ports of Entry, with the exception of agriculture laws and regulations. It is also referred to as the Air COMPEX rate, and includes ALL customs and immigration violations, both category I (major) and category II (relatively minor). Category II violations far out - number category I violations and include all noncompliance with established customs and immigration laws, rules, regulations, as well as violation of all rules and regulations of other agencies that CBP is tasked by Congress with enforcing. This includes inadmissible alien travelers (for any reason) as well as discovery of prohibited items for other agencies, such as FDA pharmaceutical regulations, confiscation of alcoholic beverages on behalf of state authorities, CPSC product safety alerts, and trade violations such as amended declarations resulting in additional revenue or CBP action.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	99.2%	99.2%	99.2%	99.2%	98.0%	98.0%
<b>Actual:</b>	98.7%	98.7%	99.5%	98.1%	N/A	N/A

<b>Measure:</b> Border vehicle passengers in compliance with agricultural quarantine regulations (percent compliant)						
<b>Description of Measure:</b> The measure shows CBP's success at maintaining a high level of security in the land border environment by measuring the degree of compliance with U.S. Department of Agriculture (USDA) agricultural quarantine regulations and other mandatory agricultural product restrictions. CBP randomly samples border vehicle passengers for compliance with all USDA laws, rules, and regulations using USDA guidance on sampling procedures.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	94.6%	94.6%	94.6%	95.5%	95.5%	95.5%
<b>Actual:</b>	92.9%	95.7%	97.73%	97.06%	N/A	N/A

<b>Measure:</b> Compliance rate for Customs - Trade Partnership Against Terrorism (C - TPAT) members with the established C - TPAT security guidelines.						
<b>Description of Measure:</b> This measure provides a summary of the overall compliance rate achieved for all validations performed during the Fiscal Year. After acceptance into the C - TPAT program, all C - TPAT members must undergo a periodic validation in which CBP examiners visit company locations and verify compliance with an industry - specific set of CBP security standards and required security practices. These validations are prepared using a weighted scoring system that is used to develop an overall compliance rate for each company. This measure provides a summary of the overall Compliance Rate achieved for all validations performed during the Fiscal Year.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	90%	95%	95.5%	99%	95%	95%
<b>Actual:</b>	98%	98%	99.9%	97.5%	N/A	N/A

<b>Measure:</b> Estimated revenue losses due to non - compliance with trade laws, regulations, and agreements (in millions)						
<b>Description of Measure:</b> This measure estimates the amount of uncollected duties, in millions, with an annual target of 1% or less of all collectable revenue (i.e. revenue gap) from commercial imports to the United States due to non - compliance with trade laws, regulations, and agreements. This is projected annually for expected growth in imports and revenues. The revenue gap is a calculated estimate based on a statistically valid sample of the revenue losses and overpayments detected during compliance measurement reviews conducted throughout the year. The estimate is called The Entry Summary Compliance Measurement (ESCM) which provides baseline and trend data for revenue gap estimates and trade compliance. This information is also used to target potential illegal operations and emerging risks.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	\$265	\$310	\$310
<b>Actual:</b>	None	None	None	\$235	N/A	N/A
<b>Measure:</b> International air passengers in compliance with agricultural quarantine regulations (percent compliant)						
<b>Description of Measure:</b> The measure shows CBP's success at maintaining a high level of security in the international air environment by measuring the degree of compliance with U.S. Department of Agriculture (USDA) agricultural quarantine regulations and other mandatory agricultural product restrictions by international air passengers. CBP randomly samples international air passengers for compliance with all USDA laws, rules, and regulations using USDA guidance on sampling procedures.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	97%	97%	97%	96%	95.5%	95.5%
<b>Actual:</b>	95.5%	94.2%	95.8%	96.12%	N/A	N/A

<b>Measure:</b> Land border passengers compliant with laws, rules, and regulations (%)						
<b>Description of Measure:</b> This measure is the Compliance Rate of land border vehicle passengers with all of the laws, rules, regulations that CBP enforces at the Ports of Entry, with the exception of agricultural laws and regulations. It is also referred to as the Land COMPEX rate, includes ALL customs and immigration violations, both category I (major) and category II (relatively minor). Category II violations far out - number category one violations and include all noncompliance with established customs and immigration laws, rules, and regulations, as well as violation of all rules and regulations of other agencies that CBP is tasked by Congress with enforcing. This includes inadmissible alien travelers (for any reason) as well as discovery of prohibited items for other agencies, such as FDA pharmaceutical regulations, confiscation of alcoholic beverages on behalf of state authorities, CPSC product safety alerts, trade violations such as amended declarations resulting in additional revenue or CBP action.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	99.9%	99.9%	99.9%	99.9%	99.6%	99.6%
<b>Actual:</b>	99.9%	99.9%	99.9%	99.8%	N/A	N/A

<b>Measure:</b> Percent of individuals screened against law enforcement databases for entry into the United States						
<b>Description of Measure:</b> This measure identifies the percent of individuals arriving at the ports of entry who have their names and other identification information checked against electronic law enforcement databases. A query is comprised of a review of identification documents such as passports, visas, border crossing cards, military identification, etc., for authenticity and a check of the individual's name and other identification information against the electronic law enforcement databases available through the Traveler Enforcement Communications System (TECS) during the entry process at all ports of entry, including airports, land border ports, and seaports. More thorough screening increases the likelihood that high - risk travelers that might cause harm are not allowed entry into the United States.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	60%	80%	FOUO	FOUO
<b>Actual:</b>	None	None	73.5%	FOUO	N/A	N/A

<b>Measure:</b> Percent of requested cargo examinations conducted at foreign ports of origin in cooperation with host nations under the Container Security Initiative (CSI)						
<b>Description of Measure:</b> Customs and Border Protection (CBP) officials located at foreign ports participating under agreements between the host nations and the Container Security Initiative (CSI) request examinations on containers that have been identified by CBP as higher - risk. This measure is the percent of requested container examinations resolved or conducted by foreign Customs officials meeting CBP examination standards and requirements divided by the total number of examinations requested by CBP CSI officials. These examinations would otherwise have taken place at US ports of entry. The measure is an indication of the extent to which potential higher - risk cargo is satisfactorily inspected before it leaves the foreign port of origin. It also reflects the cooperation of foreign Customs officials, who are not required by law to complete examinations, but do so by arrangement through the Declaration of Principles between CBP and the host country.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	97%	97%	95%	95%
<b>Actual:</b>	None	None	95.1%	93%	N/A	N/A

<b>Measure:</b> Percent of sea containers scanned for contraband and concealed people using imaging for physical inspection						
<b>Description of Measure:</b> The measure shows the progress towards increasing security by tracking the percent of sea containers arriving at seaports that are scanned for contraband and concealed people using non - intrusive inspection (NII) technology and physical inspection. Sea containers that are scanned are those that are identified as high - risk through the Automated Targeting System (ATS) manifest reviews as well as those selected for random review. NII technology consists of x - ray imaging and electro - magnetic imaging equipment that is very effective at inspecting trucks, containers, and packages for shapes, density, and hidden cargo to identify weapons, narcotics, smuggled humans, and concealed cargo. NII equipment is not effective at identifying radioactive or weapons - grade materials which are identified using radiation portal monitors. These two technologies work together to fully screen cargo.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	5.25%	5.5%	5.75%	3.2%	FOUO	FOUO
<b>Actual:</b>	5.25%	4.0%	3.6%	FOUO	N/A	N/A

<b>Measure:</b> Percent of truck containers scanned for contraband and concealed people using imaging for physical inspection						
<b>Description of Measure:</b> The measure shows the progress towards increasing security by tracking the percent of truck containers that were scanned for contraband and concealed people using non-intrusive inspection (NII) technology or physical inspection. Truck containers that are scanned are those that are identified as high-risk through the Automated Targeting System (ATS) as well as those selected for random review. NII technology consists of x-ray imaging and electro-magnetic imaging equipment that is very effective at inspecting trucks, containers, and packages for shapes, density, and hidden cargo to identify weapons, narcotics, smuggled humans, and concealed cargo. NII equipment is not effective at identifying radioactive or weapons-grade materials which are identified using radiation portal monitors. These two technologies work together to fully screen cargo.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	FOUO	FOUO
<b>Actual:</b>	None	None	None	FOUO	N/A	N/A

<b>Measure:</b> Percent of rail containers scanned for contraband and concealed people using imaging for physical inspection						
<b>Description of Measure:</b> The measure shows the progress towards increasing security by tracking the percent of rail containers that were scanned for contraband and concealed people using non-intrusive inspection (NII) technology or physical inspection. NII technology consists of x-ray imaging and electro-magnetic imaging equipment that is very effective at inspecting trucks, containers, and packages for shapes, density, and hidden cargo to identify weapons, narcotics, smuggled humans, and concealed cargo. NII equipment is not effective at identifying radioactive or weapons-grade materials which are identified using radiation portal monitors. These two technologies work together to fully screen cargo.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	FOUO	FOUO
<b>Actual:</b>	None	None	None	FOUO	N/A	N/A

<b>Measure:</b> Percent of worldwide U.S. - destined containers processed through Container Security Initiative (CSI) ports						
<b>Description of Measure:</b> This measure is the percent of worldwide U.S. - destined containers (and their respective bills of lading) processed through CSI ports as a deterrence action to detect and prevent weapons of mass destruction/effect and other potentially harmful materials from leaving foreign ports headed to U.S. ports. Processed may include any of the following: 1) U.S. - destined cargo manifest/bills of lading data reviewed using the Automated Targeting System (ATS); 2) further research conducted; 3) collaboration with host country and intelligence representatives, and 4) physical examination of the container.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	81%	86%	86%	86%	FOUO	FOUO
<b>Actual:</b>	82%	86%	86.1%	FOUO	N/A	N/A

<b>Program: Border Security and Control Between Ports of Entry</b>						
<b>Performance Goal:</b> Gain effective control of the U.S. border in areas deemed as high priority for terrorist threat potential or other national security objectives.						
<b>Secretary's Priority:</b> Securing and Managing our Borders						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$3,041,760	\$3,099,934	\$4,025,611	\$4,994,645	\$4,804,295	\$4,646,159

### Performance Plan Measures

<b>Measure:</b> Border miles under effective control (including certain coastal sectors)						
<b>Description of Measure:</b> This measure depicts the number of border miles under effective control, a condition met when there is reasonable assurance that illegal entries are detected, identified, and classified, and the Border Patrol has the ability to respond and bring these incidents to a satisfactory law enforcement resolution. Our Nation's southwest, northern, and coastal borders extend 8,607 miles through deserts, prairies, forests, mountains, open spaces, waterways, small town settings, and urban centers. This vast area between the legal ports of entry is controlled by deploying the appropriate mix of personnel, technology, and tactical infrastructure to the disparate border environments.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	338 miles	524	674	815	939	939
<b>Actual:</b>	449	599	757	939	N/A	N/A

<b>Measure:</b> Border miles with increased situational awareness aimed at preventing illegal entries per year						
<b>Description of Measure:</b> This measure indicates the number of border miles where the situational awareness has increased, or improved, to prevent illegal entries into the U.S. The Border Patrol uses the following levels to describe border security from the least secure to the most secure: Remote/Low Activity; Less Monitored; Monitored; and Controlled. Border regions classified as Remote/Low Activity are generally characterized by rugged and inaccessible terrain. By raising the border security status to Less Monitored (or higher), the Border Patrol improves its situational awareness and border security.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	136	100	100	141	108
<b>Actual:</b>	None	387	480	555	N/A	N/A

<b>Measure:</b> Percent of apprehensions at Border Patrol checkpoints.						
<b>Description of Measure:</b> Checkpoints are facilities used by the Border Patrol to monitor traffic on routes of egress from areas on the Southwestern and Northern borders. Checkpoints are an integral part of the Border Patrol's defense-in-depth, layered strategy. As such, measurements of activities occurring at checkpoints serve not only to gauge checkpoint operational effectiveness, but also serve as barometers of the effectiveness of the Border Patrol's overall national border enforcement strategy to deny illegal entries into the United States. This measure examines one component of checkpoint activity, the number of persons apprehended by Border Patrol agents, and compares these apprehensions to Border Patrol apprehensions made nationwide.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	5 - 10%	5 - 10%	3 - 8%	>3%	<5%	<5%
<b>Actual:</b>	5.9%	5%	2%	2.85%	N/A	N/A

<b>Program: Automation Modernization</b>						
<b>Performance Goal:</b> Improve the threat and enforcement information available to decision makers to enforce trade rules and regulations and facilitate U.S. trade.						
<b>Secretary's Priority:</b> Securing and Managing our Borders						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$509,632	\$451,440	\$476,609	\$511,334	\$422,445	\$347,575
<b>FTE</b>	62	62	63	63	63	63

### Performance Plan Measures

<b>Measure:</b> Number of trade accounts with access to Automated Commercial Environment (ACE) functionality to manage trade information						
<b>Description of Measure:</b> This measures the extent to which the Automated Commercial Environment (ACE) is made available to and used by members of the trade community (importers, brokers, carriers, etc.) to process and manage trade - related information.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	5000	9,000	14,000	15,500	20,000	21,000
<b>Actual:</b>	3,737	11,950	15,465	17,014	N/A	N/A

<b>Measure:</b> Percent of CBP workforce using Automated Commercial Environment (ACE) functionality to manage trade information.						
<b>Description of Measure:</b> The number of Customs and Border Protection people using Automated Commercial Environment (ACE), compared to the targeted adoption rate shows that internal personnel have easier, timelier, access to more complete and sophisticated information than in the past.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	14%	30%	40%	63%	42%	60%
<b>Actual:</b>	23%	30%	38.3%	40%	N/A	N/A

<b>Measure:</b> Percent of network availability.						
<b>Description of Measure:</b> The CBP network provides the basis for linking all IT systems for communications and access to mission critical systems. High levels of system availability are needed to accomplish CBP's mission. The measure represents the percentage of network availability to users.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	98%	98%	98%	98%	98%	98%
<b>Actual:</b>	99.9	99.4%	99.7%	99.068%	N/A	N/A

<b>Measure:</b> Total number of linked electronic sources from CBP and other government agencies for targeting information						
<b>Description of Measure:</b> This measure counts the number of electronic sources to which CBP information technology systems are linked to share information for targeting purposes. The measure reflects the ability to accurately and efficiently identify a potential risk to border security in any conveyance entering the U.S. is improved by linking data sources from CBP automated systems and other government agencies, through the Automated Commercial Environment (ACE), as a single source for border decision makers.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	4	16	16	22	24	26
<b>Actual:</b>	9	16	19	22	N/A	N/A

**Measure:** Percent of time the Traveler Enforcement Communication System (TECS) is available to end users.

**Description of Measure:** This measure quantifies the availability of the Traveler Enforcement Communication System (TECS) service to all end - users based on a service level of 24X7 service. TECS is a CBP mission - critical law enforcement application system designed to identify individuals and businesses suspected of or involved in violation of federal law. TECS is also a communications system permitting message transmittal between DHS law enforcement offices and other National, State, and local law enforcement agencies, access to the FBI's National Crime Information Center and the National Law Enforcement Telecommunication Systems (NLETS). NLETS provides direct access to state motor vehicle departments.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	92%	97%	97.5%	98%	98%	99%
<b>Actual:</b>	98%	98.7%	99.9%	99%	N/A	N/A

<b>Program: Air and Marine</b>						
<b>Performance Goal:</b> Deny the use of air, land, and coastal waters for conducting acts of terrorism and other illegal activities against the United States.						
<b>Secretary's Priority:</b> Securing and Managing our Borders						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$598,281	\$864,080	\$796,787	\$804,679	\$829,455	\$801,581

### Performance Plan Measures

<b>Measure:</b> Number of detected conventional aircraft incursions along all borders of the United States						
<b>Description of Measure:</b> This measure shows the number of conventional aircraft that were detected attempting illegal entry into United States airspace. The measure reflects the program's efforts in reducing, with the intent of ultimately denying, the use of border air space for acts of terrorism or smuggling. Strategic air surveillance and tactical responses to incoming threats are used to deter the use of air routes into the U.S. The program gathers and analyzes intelligence on past and current threat patterns to forecast and disseminate information about potential and emerging threats.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	≤ 100	≤ 100
<b>Actual:</b>	None	None	None	None	N/A	N/A

<b>Measure:</b> Percent of air support launches accomplished to support border ground agents to secure the border.						
<b>Description of Measure:</b> A primary and important measure for Air and Marine (AM) is its capability to launch an aircraft when a request is made for aerial support. This measure captures the percent of all requests made for air support to which the program was able to respond.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	>95%	>95%	>95%	>95%	>95%
<b>Actual:</b>	None	98%	98%	99%	N/A	N/A

<b>Measure:</b> Percent of at-risk miles under strategic air surveillance						
<b>Description of Measure:</b> The measure reflects the percent of at - risk miles under strategic air surveillance using Air and Marine personnel, technology, and equipment. At - risk miles is defined as those miles deemed to be of higher risk of illegal border crossing based on intelligence and historical data. Air surveillance assists with the detection, monitoring, and interdiction of terrorists and illegal aliens, and the smuggling of drugs and other contraband. This program assists in securing the border through a multi layer approach using 1) P - 3 and Unmanned Aerial System aircraft, 2) Intelligence driven support for the rapid deployment of forces, and 3) Strategic and tactical support to ground law enforcement.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	50%	60%	70%	80%	FOUO	FOUO
<b>Actual:</b>	55%	60%	84%	FOUO	N/A	N/A

<b>Program: Border Security Fencing, Infrastructure, and Technology</b>						
<b>Performance Goal:</b> Gain and maintain effective control of U.S. land border areas by deploying a combination of technology and tactical infrastructure to enhance the effectiveness of frontline officers and agents.						
<b>Secretary's Priority:</b> Securing and Managing our Borders						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$0	\$1,187,565	\$1,225,000	\$875,000	\$800,000	\$514,173
<b>FTE</b>	0	39	160	185	200	200

### Performance Plan Measures

<b>Measure:</b> Total number of cumulative miles of permanent tactical infrastructure constructed						
<b>Description of Measure:</b> This measure shows the total number of cumulative miles of tactical infrastructure constructed. Tactical Infrastructure consists of barriers built to deter or delay illegal entries into the United States. Tactical infrastructure includes pedestrian fencing, all - weather roads, vehicle fence, and permanent lighting installed in the border areas to support border enforcement activities.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	310	600	800	825	825
<b>Actual:</b>	None	400.2	501.6	812	N/A	N/A

### E. High Priority Performance Goals

**High Priority Performance Goal:** Prevent terrorist movement at land ports of entry through enhanced screening while expediting the flow of legitimate travel.

The United States land ports of entry handle hundreds of thousands of arriving and departing travelers each day. As threats to the homeland have increased since 9/11 and border violence has escalated over the past several years, expansion of our capability to screen all travelers at the land ports of entry has required a complex and sophisticated solution that addresses both the need for new technologies and upgrading aging and out-dated facilities. U.S. Customs and Border Protection (CBP) needs to continue to make sure that despite new challenges it continues to meet its twin objectives of security and facilitation of trade and travel.

Beginning in September 2008 upgrades in inbound vehicle primary processing technology and facilities, through the Western Hemisphere Travel Initiative (WHTI), have provided CBP with capabilities to better meet the twin objectives of security and facilitation in that environment. Work remains to leverage these investments by extending these capabilities to additional locations and to continue to get new RFID travel documents into the hands of travelers.

Though inbound vehicle processing capabilities are improved, a need for similar upgrades has been identified in certain outbound, pedestrian, and Border Patrol Checkpoint processing environments. A major benefit in upgrading all mission environments will be the integration of vehicle and passenger information and enhanced sharing among law enforcement operations.

By upgrading capabilities in these environments, and integrating traveler information across all mission environments, CBP will be better equipped to combat the illicit outflow of currency and weapons which fuel the increasingly violent drug trade, improve screening of the millions of pedestrians that annually cross the border, and greatly improve inspection efficiency and effectiveness at checkpoints.

Through integration of these vital land border missions, CBP will be positioned to improve screening, protect the Homeland, and improve the border travel experience for legitimate travelers.

High Priority Performance Goal Measures

<b>FYHSP Program Name</b>	<b>Program Performance Goal</b>	<b>Performance Measure</b>	<b>Secretary's Priority</b>
Border Security Inspections and Trade Facilitation at Ports of Entry	Improve the targeting, screening, and apprehension of high - risk international cargo and travelers to prevent terrorist attacks, while providing processes to facilitate the flow of safe and legitimate trade and travel.	Western Hemisphere Travel Initiative (WHTI) Compliance	Securing and Managing our Borders
Border Security Inspections and Trade Facilitation at Ports of Entry	Improve the targeting, screening, and apprehension of high - risk international cargo and travelers to prevent terrorist attacks, while providing processes to facilitate the flow of safe and legitimate trade and travel.	Personally-Owned Vehicle (POV) processing time	Securing and Managing our Borders
Border Security Inspections and Trade Facilitation at Ports of Entry	Improve the targeting, screening, and apprehension of high - risk international cargo and travelers to prevent terrorist attacks, while providing processes to facilitate the flow of safe and legitimate trade and travel.	Land Border Enforcement Query Rate	Securing and Managing our Borders
Border Security Inspections and Trade Facilitation at Ports of Entry	Improve the targeting, screening, and apprehension of high - risk international cargo and travelers to prevent terrorist attacks, while providing processes to facilitate the flow of safe and legitimate trade and travel.	Radio Frequency Identification (RFID) document utilization rate	Securing and Managing our Borders
Border Security Inspections and Trade Facilitation at Ports of Entry	Improve the targeting, screening, and apprehension of high - risk international cargo and travelers to prevent terrorist attacks, while providing processes to facilitate the flow of safe and legitimate trade and travel.	Average pedestrian processing time	Securing and Managing our Borders
Border Security Inspections and Trade Facilitation at Ports of Entry	Improve the targeting, screening, and apprehension of high - risk international cargo and travelers to prevent terrorist attacks, while providing processes to facilitate the flow of safe and legitimate trade and travel.	Outbound License Plate Reader (LPR) Rate	Securing and Managing our Borders

**Department of Homeland Security**

**U.S. Immigration and Customs Enforcement**

<b>Fiscal Year</b>	<b>Due Date</b>	<b>Reference/Citation</b>	<b>Requirement</b>	<b>Status</b>
2010	Unspecified	Conference Report 111-298, Title II, p.8	ATD Nationwide Expansion Plan - Withholds from obligation all personnel and non-planning costs for field office collocation until ICE submits a plan for nationwide expansion of ATD program identifying: (1) the funds required for nationwide program implementation; (2) the timeframe for achieving nationwide program implementation; and (3) an estimate of the number of individuals who could be enrolled in a nationwide program	Report was returned to ICE for changes. ICE is currently updating.
2010	Unspecified	Conference Report 111-298, Title II, p.76; Senate Report 111-31, Title II, p. 53	Automation Modernization Expenditure Plan - \$10,000,000 made available for Automation Modernization shall not be obligated until Committees receive FY 2010 expenditure plan.	Report is within ICE.

2010	Unspecified	House Report 111-157, Title II, p.56	Textile Transshipment Enforcement - ICE is directed to provide a report with its fiscal year 2011 budget request on its actual and projected obligations of this funding, covering fiscal years 2005 to 2010; including staffing levels by fiscal year since 2005, and a five-year enforcement plan for transshipment violations.	Report is within ICE.
2009	3/1/2009	Conference Report 110-329, Title II, p.637	Transportation of Unaccompanied Minors - ICE, along with DHS, OMB, and HHS, will issue recommendations on which agency is most appropriate to fund the transportation of unaccompanied alien minors between DHS and HHS custody.	Report was submitted to DHS and is still with OMB.
2009	11/14/2009	Conference Report 110-329, Title II, p.637	DRO 4th Quarter Report - DRO is directed to continue to report quarterly on deportation, exclusion, and removal orders sought and obtained by ICE.	Report is within ICE.
2009	11/14/2009	Conference Report 110-329, Title II, p.635	OI 4th Quarter Report - 'ICE will provide quarterly updates on the OI Spend Plan.	Report is within ICE.
2009	11/14/2009	House Report 110-862, Title II, p.57	Treatment of Children 4th Quarter Report - 'ICE will report quarterly on any incidents involving strip searches of children, or placing	Report is within ICE.

			them in restraints and/or using disciplinary weapons against them.	
2010	11/28/2009	Conference Report 111-298, Title II, p.73	SC Allocation Plan - 'Within 30 days of the enactment of this act, ICE directed to submit to the Committees an explicit plan for how the agency will allocate program resources to the identification and removal of deportable criminal aliens.	Report is within ICE.
2010	12/28/2009	Conference Report 111-298, Title II, p.75	'Deportation of Parents of U.S. Born Citizens - 'ICE directed within 60 days after the date of enactment of this Act, an evaluation of the process and data management system changes necessary to track the information timeline for implementing the required changes in fiscal year 2010.	Report is within ICE.
2010	1/4/2010	House Report 111-157, Title II, p.55	Family Detention Report - ICE is directed to report on the results of OPR's review of families detained in ICE custody since 2007 (as directed in the House Report) no later than the submission of the 2011 budget.	Report is within ICE.

2010	1/15/2010	Conference Report 111-298, Title II, p.74; Senate Report 111-31, Title II, p.51	DRO 1st Quarter Report - ICE is directed to continue to submit quarterly reports on detention and removal statistics; first quarterly report due not later than 1/15/2010.	Report is within ICE.
2010	1/29/2010	House Report 111-157, Title II, p.56	Treatment of Children 1st Quarter Report - ICE is directed to review the necessity of retaining the practices of strip searches of children, placement of children in restraints, or use of disciplinary weapons against children and update the Committee on any changes to these policies by 11/2/09 and ICE is directed to continue to provide reports 30 days after the end of each quarter of the fiscal year on any incidents involving strip searches of children, placement of children in restraints, or use of disciplinary weapons against children.	Report is within ICE.
2010	1/30/2010	House Report 111-157, Title II, p.53	Medical Services to Detainees Report - ICE is directed to report within 30 days of the end of each quarter on actions taken to address inadequacies in medical services to detainees.	Report is within ICE.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Immigration and Customs Enforcement (ICE) Salaries and Expenses**

### **I. Appropriation Overview**

#### **A – Mission Statement for Salaries and Expenses**

Programs funded through the Salaries and Expenses account contribute to the ICE mission of bringing a unified and coordinated focus to the enforcement of federal immigration and customs laws. Salaries and Expenses resources are used to combat terrorism and illegal immigration activities through investigating, detaining, and prosecuting both criminal and other aliens, and domestic gangs. These activities protect the infrastructure and persons within the United States.

#### **B – Budget Activities:**

##### **Management and Administration**

The Offices of the Assistant Secretary (OAS), Professional Responsibility (OPR), State and Local Coordination (OSLC), the Chief Diversity Officer, the Chief Financial Officer (OCFO), the Chief Information Officer (OCIO), Acquisition Management, Human Capital, and Freedom of Information Act perform the management and administration (M&A) activities for ICE. The M&A activities include executive and overall leadership direction, strategic planning, policy development, and administrative support for the human, financial, information, and physical resources required to facilitate the operational capabilities of a productive ICE workforce.

##### **Legal Proceedings**

The Office of the Principal Legal Advisor (OPLA) provides the legal advice, training, and services required to support the ICE mission. As the legal representative for the U.S. Government at immigration court hearings, OPLA attorneys handle a variety of immigration-related issues that range from contested removals to custody determinations to applications for administrative relief. Additionally, OPLA provides legal advice in customs-related enforcement actions, represents the Government in Merit System Protection Board and Equal Employment Opportunity hearings, provides ethics advice, and handles matters involving commercial and administrative law.

##### **Investigations**

The Office of Investigations (OI) is divided into four broad investigative categories: National Security; Financial and Trade; Smuggling and Public Safety; and Investigative Services. OI enforces trade and immigration laws through the investigation of activities, persons, and events that may pose a threat to the safety or security of the United States and its people. OI also investigates illegal trafficking in weapons (including weapons of mass destruction), the smuggling of narcotics and other contraband, human smuggling

and trafficking, money laundering and other financial crimes, fraudulent trade practices, identity and benefit fraud, child pornography, child sex tourism, and health and public safety dangers.

### **International Affairs**

The ICE Office of International Affairs (OIA) represents DHS's largest investigative law enforcement presence abroad and strongest protection beyond the border. ICE OIA has the broadest international footprint in DHS with 61 offices in 44 countries. Through OIA, ICE works with foreign counterparts to identify and combat criminal organizations before they can adversely impact the United States. ICE's international mission is to protect the United States by enhancing its security through international investigations; preventing acts of terrorism by targeting the people, money, and materials that support terrorist and criminal activities; and identifying and eliminating vulnerabilities in the nation's border, economic, transportation, and infrastructure security.

### **Intelligence**

The Office of Intelligence collects, analyzes, and distributes information on critical homeland security vulnerabilities that could be exploited by terrorist and criminal organizations. Intelligence utilizes data and information on the movement of people, money, and materials into, within, and out of the United States to provide accurate and timely reporting to ICE leadership and field agents. Intelligence Operations' Field Intelligence Groups (FIGs) are the agency's primary vehicle for intelligence analysis in support of field operations and enforcement. FIGs link headquarters and field components to facilitate intelligence collection, integration, analysis, and dissemination.

### **Detention and Removal Operations**

The Office of Detention and Removal Operations (DRO) is responsible for ensuring that every alien who has been ordered removed departs the United States through enforcement of the Nation's immigration laws and coordination with foreign governments to ensure countries will accept removable aliens. DRO is comprised of five Program/Project Activities:

**Custody Operations Program** – This program provides safe, secure, and humane detainment for removable aliens and seeks to ensure that aliens in ICE custody appear for their immigration hearings and subsequent removal from the United States.

**Fugitive Operations Program** – This program locates and apprehends fugitive aliens in the United States. ICE focuses on criminal aliens, but strives to identify and apprehend all fugitives, creating a deterrent to potential absconders and increasing the integrity of the immigration process.

**Criminal Alien Program** – This program identifies criminal aliens incarcerated within federal, state, and local correctional facilities. To ensure that these criminal aliens are not released into the community, ICE secures a final order of removal prior to the termination of their sentences. Upon completion of their criminal sentences, aliens are transferred into ICE custody to be removed from the United States.

**Alternatives to Detention Program** – This program places low-risk aliens under various forms of intensive supervision rather than traditional detention. It is a cost-effective way to ensure individuals’ appearance for an immigration hearing or for removal. This program lowers the risk that aliens will become fugitives through a variety of methods of supervision.

**Transportation and Removal Program** – This program provides for the safe and secure transportation of aliens in ICE custody and removal of aliens from the United States, as ordered by an immigration judge.

**Secure Communities/A Comprehensive Plan to Identify and Remove Criminal Aliens (SC/CIRCA)**

Secure Communities/Comprehensive Plan to Identify and Remove Criminal Aliens (SC/CIRCA) is a comprehensive plan to improve community safety by transforming the way the federal government cooperates with state and local law enforcement agencies to identify, detain, and remove criminal aliens held in custody and at large. SC/CIRCA is working to revolutionize immigration enforcement by using technology to share information between law enforcement agencies and by applying risk-based methodologies to focus resources on assisting local communities in the removal of those criminal aliens representing the greatest threat to community safety. SC/CIRCA’s risk-based application of enforcement assets is now being utilized ICE-wide.

**C – Budget Request Summary:**

U.S. Immigration and Customs Enforcement (ICE) requests 20,550 positions, 20,164 FTE, and \$5,439,100,000 for FY 2011 in the Salaries and Expenses (S&E) account. In order to accomplish the agency’s objectives and mission, ICE requests \$5,358,762,000 and 20,044 FTE to maintain current services and \$80,338,000 and 120 FTE in program enhancements in the S&E account.

**Enhancement Requests**

ICE requests program enhancements for the Salaries and Expenses account in the following key areas:

- **Detention and Removal Operations .....\$20.0M (0 FTE)**  
This request will help detention and removal operations to maintain current bed space. The funding will covers such items as contract costs, medical care, and oversight.
- **Co-Location of ICE Facilities.....\$19.9M (0 FTE)**  
This request funds the third year of the ICE-wide co-location strategy to consolidate ICE personnel and operations scattered across multiple buildings in select metropolitan areas with the intended result of improved operational efficiency and long-term cost savings.

- **Office of Investigations Mission Support.....\$15.0M (84 FTE)**  
 This request will fund a total of 84 mission support FTEs to help alleviate administrative functions performed by agents and allow them to focus on their primary function – the investigation of transnational and border crime. This funding will help ensure agents have the necessary mission support so they can focus their efforts on investigations, rather than administrative tasks.
- **Data Center Migration.....\$10.4 M (0 FTE)**  
 This request is targeted at migrating data center operations, active online data, and other IT assets from two Department of Justice (DOJ) data centers and multiple processing centers to two new DHS data centers while ensuring near continuous operations of mission-critical IT systems through contingency infrastructure, planning, and testing, to provide systems and data integrity that align with the DHS goal of ensuring that two new DHS Data Centers support fully redundant IT systems.
- **Border Enforcement Security Task Forces (BESTs).....\$10.0M (23 FTE)**  
 This request will establish BESTs in three additional locations (Massena, NY; San Francisco, CA and Honolulu, HI) to prevent the illegal smuggling of goods, and the illegal entry of persons, with a priority focus on terrorist groups, gang members, and criminal aliens.
- **Intellectual Property Rights Enforcement.....\$5.0M (13 FTE)**  
 This request will fund a total of 13 FTE for the ICE-led National Intellectual Property Rights Coordination Center (IPR Center), a collaborative effort bringing together key US government agencies, to stop intellectual property rights (IPR) violations that threaten our economic stability, restrict the competitiveness of US industry, and endanger the public’s health and safety. Additionally, ICE will focus on disrupting criminal organizations through the internet to facilitate IPR crime and provide support for anti-counterfeiting efforts.

## II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

Note: In order to consolidate ICE's overall cost of beds to allow a clearer depiction of actual costs being incurred, ICE is proposing for FY 2011 that bed costs currently in the base funding for Fugitive Operations, Criminal Alien Program (CAP), and Secure Communities/CIRCA be permanently reprogrammed under Custody Operations, which manages all bed-related activities for ICE. This zero-sum reprogramming between ICE programs results in a \$129.7 million increase to Custody Operations and corresponding decreases to the other three programs. In addition, in order to assure that personnel are appropriately being charged to the program under which they function, ICE is proposing to move funding for a total of 79 positions currently in Custody Operations base to the programs where these positions are performing the bulk of their work: CAP - 10 positions, Alternatives to Detention - 10 positions, and Transportation and Removal Program - 59 positions. This is a zero-sum reprogramming within DRO programs that results in a \$17.1 million decrease to Custody Operations. Net change of these two actions is a \$112.6 million adjustment-to-base increase to Custody Ops.

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Salaries and Expenses**  
**Personnel Compensation and Benefits, Service, and Other Costs**  
**Program Performance Justification**  
(Dollars in Thousands)

#### PPA: Personnel Compensation and Benefits, Service, and Other Costs

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>1,144</b>	<b>887</b>	<b>209,413</b>

Total Change 2010 to 2011	-	69	21,298

U.S. Immigration and Customs Enforcement requests \$300.4 million for this activity. This is a \$21.3 million increase from the FY 2010 enacted level, of which \$1.4 million is for annualization of prior year funding, pay inflation, and management and technology efficiencies and \$19.9 million is for program changes. In FY 2011, this PPA is estimated to pay \$30.5 million in servicewide costs (e.g., rent, working capital fund).

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

ICE Management and Administration (M&A) resources provide for top-level agency-wide management in the following areas: the Offices of the Assistant Secretary (OAS), Professional Responsibility (OPR), State and Local Coordination (OSLC), the Chief Diversity Officer, the Chief Financial Officer (OCFO), Acquisition Management, Human Capital, and Freedom of Information Act. The M&A activities include executive and overall leadership direction, strategic planning, policy development, and administrative support for the human, financial, information, and physical resources required to facilitate the operational capabilities of a productive ICE workforce. The following highlights the primary functions of the various M&A activities:

- Office of the Assistant Secretary – The ICE Office of the Assistant Secretary (OAS) is responsible for the advancement of the agency’s objectives outlined in the ICE strategic plan. This includes both operational and management support to

meet day-to-day organizational needs, as well as long-term agency goals. The Operational Division provides leadership and coordination of all of ICE's operational components, to address operational challenges, and to support ICE's continued growth and development as a premier law enforcement agency. The Management Division provides coordination of all administrative and managerial components of ICE. OAS is responsible for OSLC Program Management, Human Capital, Congressional Relations, Public Affairs, Training and the Freedom of Information Act Office.

- Office of Professional Responsibility - The ICE Office of Professional Responsibility (OPR) is assigned a broad range of mission responsibilities. Among the most important duties tasked to OPR is the responsibility to investigate allegations of misconduct involving employees of ICE and Customs and Border Protection (CBP). In addition to maintaining its ability to conduct internal investigations, OPR conducts independent inspections and reviews to ICE offices, operations and processes so as to provide executive management with an independent review of the agency's organizational health and assess the effectiveness and efficiency of the overall ICE mission. OPR ensures that all ICE applicants are properly screened prior to entering on duty by appropriately assessing the security clearance level needed for all ICE federal and contract employees. Finally, OPR Security Management Unit provides the appropriate oversight for all physical, communication and operational security requirements governing ICE employees and facilities world wide.
- Office of the Chief Financial Officer – The ICE Office of the Chief Financial Officer (OCFO) works to effectively manage cost controls, and to determine the availability and efficient use of resources and services. ICE OCFO implements mechanisms to develop performance-budget integration, strategic and competitive sourcing, financial management, and capital asset management to support ICE's mission.
- Acquisition Management - The ICE Office of Acquisition Management (OAQ) is a, customer-focused organization with an enterprise-wide, strategic approach to procurement. OAQ operates as a full business partner with internal and external organizations and serves as a strategic asset dedicated to improving the agency's overall business performance. The mission of the ICE Office of Acquisition Management is to create quality business solutions that accomplish ICE mission goals.

## **Key Accomplishments**

In FY 2009, ICE:

- Received its first Stand Alone Audit of the Balance Sheet in FY 2009. In previous years, ICE did not receive its own audit opinion. ICE was only considered as a subset of the Department's consolidated audit of the entire agency. This change involved significantly more scrutiny by the auditors and ICE was required to prepare and provide extensive data. As a result of our efforts, ICE obtained a Clean Opinion on the FY 2009 Balance Sheet.
- Awarded 11,867 contract actions valued over \$2.9 billion.
- Received over 12,188 allegations of misconduct involving ICE and CBP employees via the ICE/CBP Joint Intake Center. Of those, over 8,210 involved CBP-related allegations. ICE OPR retained 270 of the CBP criminal and serious administrative misconduct allegations. The Joint Intake Case Management System was also enhanced to an Oracle web-based system to improve users access to cases.
- Trained and cross-designated 287(g) agents throughout the country to reduce response times and expand coverage for 287(g) issues.
- Exceeded the government goal for end-to-end processing of initial investigations for Top Secret and Secret security clearances by 16.2%. ICE processed these investigations in 62 days compared to the government goal of 74 days. In addition, ICE processed 12,045 applicants through the suitability and security process with over 53% or 6,324 approved within 8 days, an increase of 2,464 over FY08. ICE also processed 9,477 background investigations, an increase of 2,718 from FY08, and made over 13, 296 final adjudications for suitability, security and reinvestigations resulting in an increase of 2,398 over FY08.

In FY 2010, ICE will:

- Reduce the use of high-risk contracts (noncompetitive, cost-reimbursement, and time-and-materials and labor-hour contracts) by 10% using FY 2008 as a baseline.
- Establish OPR Office of Detention Oversight (ODO) offices in Phoenix and Houston. The ODO office in Phoenix will be co-located with the Management Inspection Unit (MIU). The ODO office in Houston will be co-located with the RAC Houston office. This expansion is an effort to ensure the welfare, safety, and living conditions of ICE detainees and the safety of ICE employees through onsite detention inspections.

- Fully implement the Power Management Initiative for computers, laptops and monitors, which will result in anticipated annual savings of over \$1.2M

In FY 2011, ICE will:

- Expand the use of digital archiving throughout the acquisitions process to improve operational efficiency and effectiveness.
- Focus additional OPR resources in the Laredo area to reduce the opportunity for corruption along one of the busiest commercial ports of entry along the southwest border. ICE plans to place four additional FTEs in this area.
- Support, develop, and implement continued coordination with major local, national and international media outlets regarding the release of official information surrounding ICE's mission and activities worldwide through public affairs outreach efforts.
- Increase ICE stakeholder outreach and engagement, strengthen program stewardship and strengthen internal management capability and while improving internal controls.

Total Change 2010 to 2011	47	51	(23,901)

U.S. Immigration and Customs Enforcement requests \$209.4 million for this activity. This is a \$23.9 million decrease from the FY 2010 enacted level, of which -\$34.3 million is for annualization of prior year funding, pay inflation, and management and technology efficiencies, and \$10.4 million is for program changes. In FY 2011, this PPA is estimated to pay \$10.6 million in servicewide costs (e.g., rent, working capital fund).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The ICE Office of the Chief Information Officer (OCIO) provides information technology services and products that enable ICE and DHS to meet their respective missions. In order to meet these goals, the OCIO has developed a number of critical IT initiatives that will help ICE to modernize its IT systems, adapt and conform to modern IT management disciplines, and provide IT solutions throughout ICE.

ICE is in the process of streamlining IT activities to create efficiencies that will result in approximately \$11.7 M or 7 percent in contract savings by the end of FY 2011. In an effort to create efficiencies ICE will:

- Review existing contracts utilizing high risk vehicles such as Time and Materials, and re-compete where feasible to lower risk vehicles such as Firm Fixed Price;
- Target a reduction of 20 contractor FTEs for FY 2010 – FY 11;
- Convert 47 Contractor FTEs to Government FTEs; and
- Assess the OCIO workforce for additional in-sourcing opportunities.

#### FY 2009 Accomplishments:

- Continued the ongoing technology refresh cycle, to include: E-Mail upgrades, desktop and laptop replacements, Printers upgrades, File Server refresh, DHS One Net implementation, Streaming Video implementation, Local Area Network upgrades, Enterprise Query implementation, Interoperability Hub establishment, Web Farm establishment, Single Sign-On implementation and Audit Log Management capability; and
- Served as a pilot program within ICE to address concerns outlined in OMB Memorandum 09-25, "Improving Government Acquisition" (July 29, 2009), and began developing a plan to save 7 percent of baseline contract spending within the HQ Managed IT account by the end of FY 2011.

#### FY 2010 Planned Accomplishments:

- Begin migration to DHS Data Centers;
- Complete migration to DHS One Net; and
- Finalize and begin implementing reductions of 7 percent of baseline contract spending within the HQ Managed IT account by the end of FY 2011.

#### FY 2011 Planned Accomplishments:

- Complete Migration to DHS Data Centers;
- By the end of the fiscal year, save 7 percent of baseline contract spending within the HQ managed IT account by:
  - Review existing contracts utilizing high risk vehicles such as Time and Materials';
  - Re-compete where feasible to lower risk vehicles such as Firm Fixed Price;
  - Target a reduction of 20 Contractor FTEs for FY10 – FY11;
  - Convert 47 Contractor FTEs to Government FTEs in FY10 – FY11;
  - Assess the OCIO workforce for additional in-sourcing opportunities; and
- Continue implementing ongoing three-year cycle technology refresh schedule.

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Salaries and Expenses**  
**Legal Proceedings**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: Legal Proceedings**

Total Change 2010 to 2011	-	13	-

U.S. Immigration and Customs Enforcement requests \$221.7 million for this activity. There is no change from the FY 2010 enacted level. In FY 2011, this PPA is estimated to pay \$32.2 million in servicewide costs (e.g., rent, working capital fund).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

ICE Legal Proceedings (also referred to as the Office of the Principal Legal Advisor or OPLA) provides the legal representation, advice, training, and services required to support the ICE mission. Pursuant to section 442(c) of the Homeland Security Act, OPLA is the exclusive legal representative for ICE and the DHS legal component authorized to represent the government in all exclusion, deportation, and removal proceedings before the Department of Justice’s Executive Office for Immigration Review (EOIR).

As the legal representative for the U.S. Government at immigration court hearings, OPLA attorneys handle a variety of immigration-related issues that range from contested removals to custody determinations to applications for administrative relief. Many of the hearings involve criminal aliens, while others involve terrorists and human rights abusers. Additionally, OPLA provides critical legal support to ICE operational elements concerning customs, worksite enforcement, ethics, employment law, tort claims, and administrative law issues.

OPLA consists of a headquarters component and 26 Chief Counsel Offices (CCOs). The areas of responsibility for these CCOs are consistent with the 26 domestic areas of

responsibility within the ICE Office of Investigations (OI). Additionally, Mission Support Divisions provide administrative services to OPLA's operational elements. The following highlights the primary duties and responsibilities of OPLA's headquarters divisions:

- Appellate and Protection Law Division (APLD). APLD has various primary areas of responsibility, which includes the following: appellate and motions practice before the Board of Immigration Appeals (BIA); federal litigation review; and protection law issues. APLD reviews all ICE appeals to the BIA and plays a lead role in briefing the most significant cases. APLD provides assistance and legal guidance daily to the Chief Counsel Offices and other OPLA/HQ Divisions on appellate and motion practices, as well as protection law issues. In addition, APLD reviews and makes recommendations on adverse federal litigation impacting ICE and provides guidance to the CCOs on developments in the federal courts. APLD works closely with the Department of Justice's Office of Immigration Litigation (OIL), DHS Office of the General Counsel, and U.S. Attorney Offices in developing legal strategy and briefing in significant federal cases. Furthermore, APLD reflects the commitment within ICE and OPLA to the sound and thoughtful handling of protection law issues and cases. The immigration courts and BIA adjudicates tens of thousands of requests for asylum, withholding of removal and for protection under the Convention Against Torture annually. These proceedings play a critical role in the development of U.S. protection law, including the issuance of decisions by the BIA and in federal courts. APLD also has primary responsibility for handling automatic and discretionary stays of immigration court bond decisions, oral arguments before the BIA, and recommendations to certify cases to the Attorney General.
- Commercial and Administrative Law Division (CALD). CALD provides legal advice to ICE and represents ICE in the areas of fiscal law, federal tort claims and Bivens actions, memoranda of understanding and other agreements, contract law, breached bonds, and a range of other administrative law matters in support of ICE operations. CALD also adjudicates administrative tort claims, provides guidance and legal advice concerning procurement actions, and develops and coordinates ICE legal policy in these areas. CALD represents ICE before the Government Accountability Office and the Civilian Board of Contract Appeals in procurement matters. CALD further assists Department of Justice litigation attorneys in representing ICE before the various federal courts in federal tort claims and Bivens cases, procurement matters, and other administrative law matters.
- Enforcement Law Division (ELD). The ELD is responsible for handling traditional immigration enforcement issues, general officer authority issues, and providing legal advice on custom issues. The demand for high quality products from ELD has increased tremendously in recent years. This is illustrated by the dramatic increase in enforcement activities and the need for increased ELD client advice in the areas of detention, expedited removal, stipulated removal, reinstatement of removal and custody determination. ELD plays a significant role

in large enforcement operations, including review of warrant affidavits, providing legal advice to operational planners and agency leadership, traveling to the site to advise on legal issues arising during operations, and working extensively with the Department of Justice in related federal court litigation. Further, ELD provides legal support and counsel to the national security and cybercrimes sections of ICE Offices of Investigations and International Affairs, on highly specialized issues.

Additionally, any proposed legislation or regulation on immigration and customs issues requires ELD attention and expertise, whether to draft, negotiate, advise, or comment. OPLA's Regulatory Counsel has various major functions and plays a significant role in ICE's mission, which includes: drafting and assisting others in drafting ICE regulations, including changes in response to comments received during the clearance process, or public comments on a proposed or interim rule; guiding ICE regulations through the clearance process to the publication in the Federal Register of a proposed rule and ultimately a final rule; and reviewing regulations proposed by other agencies that affect ICE's operations.

- Ethics Division. The Ethics Division administers the ICE federal government Standards of Conduct Program, providing training, counseling, and management of the ethics financial disclosure process for all ICE employees. The Ethics Division provides legal professional responsibility advice to ICE attorneys and oversees management inquiries into OPLA employee misconduct complaints.
- Human Rights Law Division (HRLD). HRLD coordinates ICE's litigation efforts nationwide to pursue criminal prosecutions and judicial orders of removal against human rights abusers. HRLD team members work closely with the Office of Investigations and Office of Detention and Removal (DRO) to provide legal advice to agents and officers in the identification, investigation, prosecution, and removal of individuals involved in human rights abuses such as genocide, extrajudicial killings, and torture. HRLD works closely with the Departments of State and Justice, intelligence agencies, and non-governmental organizations to ensure that the United States does not become a safe haven for human rights abusers. HRLD currently has a caseload of 800 cases in various stages of litigation involving individuals from 85 different countries.
- Knowledge Management Division (KMD). KMD is responsible for assuring that information relating to the critical issues of the day is available and rapidly developed into knowledge for decision-making processes. This includes obtaining and managing access to all critical databases, such as TECS, Consular Consolidated Database (CCD), and the new systems of agencies and other DHS components, such as U.S. Citizenship and Immigration Services (USCIS) Enterprise Document Management System (EDMS). KMD develops and provides the organizational processes for a synergistic combination of the data and information-processing capacity of information technologies and the creative and innovative capacity of human beings. Toward this end, the KMD has developed and deployed the General Counsel Electronic Management System

- (GEMS) – a case and document management system. KMD develops, monitors compliance of users, and analyses OPLA workload and performance data. KMD is OPLA’s liaison with the Office of the Chief Information Officer (OCIO) on all issues, including field office support, deployment of new systems and hardware, information sharing and system compatibility, and e-discovery. KMD staff serves as subject matter experts for OPLA IT in the field.
- Labor and Employment Law Division (LELD). LELED provides legal advice and represents ICE in the areas of employment and labor law. LELED represents ICE before the Equal Employment Opportunity Commission, the Merit Systems Protection Board, and the Federal Labor Relations Authority in employment and labor matters. LELED assists Department of Justice litigation attorneys in representing ICE before the various federal courts in Freedom of Information Act and Privacy Act cases and other labor law matters.
  - Legislative Counsel. Legislative Counsel drafts and reviews legislative proposals for ICE, including coordinating the legislative proposals with the ICE Office of Congressional Relations, Office of Policy, and ICE Executive Secretariat, as well as coordinating with the DHS Office of the General Counsel and DHS Policy Office.
  - National Security Law Division (NSLD). NSLD provides legal advice and oversees litigation involving special interest cases, including those involving international terrorism, counter-terrorism, espionage, and other national security matters. The legal work performed by the NSLD is critical to ICE’s efforts to protect the nation’s security. NSLD attorneys are involved in a fast-paced practice, working closely with other federal law enforcement and intelligence agencies, including the FBI and CIA, and routinely make decisions that have an immediate impact on national security. Specifically, NSLD attorneys oversee and coordinate removal proceedings involving terrorists and foreign intelligence agents, provide legal support and training to ICE’s OI (especially the Counter Terrorism Unit, National Security Integration Center, and Visa Security Unit) and Office of Intelligence, and liaison with the Civil and Criminal Divisions of the Department of Justice.
  - Strategic Management Division (SMD). SMD serves as the central point for the general planning, budgeting, and managing of OPLA. SMD administers OPLA’s strategic plan ensuring OPLA maintains a trained, professional, highly motivated, and client-focused staff who effectively and efficiently handle legal matters in support of the ICE mission. SMD ensures that OPLA’s objectives are consistent with the ICE Assistant Secretary’s strategic vision and coordinates refinements as necessary to OPLA’s three to five year plan objectives. Additionally, SMD leads OPLA’s risk management activities with ICE planning work groups. By incorporating the activities of strategic planning and risk management, SMD formulates future budget requests for OPLA that are based on Senior Leadership’s vision for the organization. SMD conducts on-site reviews of Chief Counsel

Offices and coordinates implementation of recommended “best practice” improvements. To help ensure consistency throughout OPLA, SMD drafts new or revised program policy and serves as the central repository for all OPLA policies.

- Training Division (TD). OPLA’s TD is responsible for a variety of training events such as, Management Meetings, New Attorney Training, and specialty law training specifically tailored for OPLA staff such as National Security, Human Rights, Labor Law, and Leadership Development Training Program. The TD coordinates and facilitates training with other federal, state, and local government agencies (i.e., 287(g) training). Finally, the TD tracks training for all OPLA employees and ensures compliance with mandatory ICE training requirements.

### **Key Accomplishments**

In FY 2009, OPLA was very successful in achieving program staffing goals. At the end of FY 2009 the on-board attorney staffing level was approximately 97 percent of the approved level of 914 attorneys. This represents an increase of approximately 23 percent above FY 2008 levels.

In FY 2009, the total number of new matters received by the EOIR was 389,352 and the total matters completed were 351,234. Additionally, the Board of Immigration Appeals received 33,000 appeals filed from decisions made by the immigration judges.

In an effort to increase efficiency of the removal process, OPLA, in conjunction with DRO and EOIR, focused legal support and stakeholder training efforts on the stipulated removal program to eliminate the need to have an in-person hearing before an immigration judge. A total of 29,012 cases were completed through the stipulated removal process.

The successful staffing of the 21 Special Assistant U.S. Attorney (SAUSA) positions in FY 2009 had proved to be a positive program resource. The Special Assistant U.S. Attorneys (SAUSAs) primarily focus on criminal cases brought by the Office of Investigations, thereby increasing the number of ICE cases prosecuted by the US Attorney’s Office.

During FY 2009, OPLA realigned attorney resources to provide increased support and assistance to ICE components and external stakeholders. OPLA filled 73 newly created Senior Attorney positions in the field offices. Senior Attorneys provided a myriad of services, but their main duties include: providing training to other ICE components, handling national security and special interest cases, and providing specialized legal advice to the Special Agents-in-Charge (SACs) and Field Office Directors (FODs).

In FY 2009, OPLA played a significant role providing legal advice and training to OI in support of worksite operations. In some of the larger, more significant operations, OPLA deployed attorneys to provide on-site advice to ICE agents and officers.

OPLA's workload also increased due to enhanced enforcement capabilities such as 287(g), Secure Communities, Criminal Alien Program, and other efforts. For example, at the end of FY 2009, there were 67 signed Memorandum of Agreements (MOAs) located in 23 states. This led to the 1,075 state and local law enforcement officers who were 287(g) trained, encountering over 133,000 aliens that were amenable for placement into removal proceedings.

OPLA's plan for FY 2010 builds upon the FY 2009 accomplishments by expanding support of immigration enforcement actions such as 287 (g), worksite, stipulated removals, and criminal prosecutions. Additionally, OPLA will implement the results of the High Performing Organization (HPO) study that concentrated on the legal support services performed in OPLA's field offices. By increasing efficiencies in field legal support services, support staff will be able to provide additional services in support of the attorneys.

ICE strategic planning indicators for FY 2011 and beyond suggest that ICE will continue to focus casework on immigration enforcement efforts, bulk cash smuggling, contraband smuggling, and aliens committing violent crimes against persons. In support of these ICE initiatives, OPLA will direct resources toward these efforts. Additionally, OPLA's broad objectives for FY 2011 include further enhancing OPLA's capabilities to effectively and efficiently prosecute immigration and customs law violations by further refining and improving efficiencies in how workload is managed.

Total Change 2010 to 2011	237	374	77,487

U.S. Immigration and Customs Enforcement requests \$1,727.0 million for this activity. This is a \$77.5 million increase from the FY 2010 enacted level, of which \$47.5 million is for annualization of prior year funding, pay inflation, and management and technology efficiencies, and \$30.0 million is for program changes. In FY 2011, this PPA is estimated to pay \$270.2 million in servicewide costs (e.g., rent, working capital fund).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of Investigations (OI) enforces customs and immigration laws through the investigation of activities, persons, and events that may pose a threat to the safety or security of the United States and its citizens. Investigations lead to the arrest and prosecution of perpetrators and/or result in the removal of individuals posing risks to national security or public safety. OI investigates: illegal trafficking in weapons and procurement of sensitive U.S.-origin technology, including weapons of mass destruction; the smuggling of narcotics and other contraband; human smuggling and trafficking; money laundering and other financial crimes; fraudulent trade practices; identity and benefit fraud; child pornography; child sex tourism; employers that hire illegal and undocumented workers; and health and public safety dangers.

The following five investigative components of OI use immigration and customs authorities to address vulnerabilities and prevent violations that threaten national security and public safety.

**National Security Investigations:** OI works to deter and dismantle terrorist groups, individuals, and companies involved in the illegal procurement and movement of weapons of mass destruction and their materials and components. National Security Investigations personnel work closely with the Federal Bureau of Investigation's Joint Terrorism Task Forces (JTTFs). JTTFs utilize the collective resources of the participating agencies for the prevention, deterrence, and investigation of terrorism and related activities occurring in or affecting the United States.

The Counter Proliferation Unit (CPU) leads U.S. Government efforts to prevent foreign adversaries from illegally obtaining U.S. military products and sensitive technology, including weapons of mass destruction components. ICE special agents possess the U.S. Government's most extensive expertise, longest ranging experience, and broadest export-related authorities.

Project Shield America is ICE's public and industry outreach program. Under this program, ICE special agents visit U.S. manufacturers and exporters of arms and sensitive goods to educate them about U.S. export laws and solicit their assistance in identifying potential illegal exports. Since late 2001, ICE special agents have conducted more than 14,000 presentations, resulting in tips that have led to ICE criminal investigations.

Millions of nonimmigrant aliens enter the United States every year to visit, work, and attend school. An estimated 100,000 of these aliens annually will overstay or violate the terms of their authorized period of admission, for economic, personal, and criminal reasons. In an effort to combat this threat, the federal government has implemented the National Security Entry Exit Registration System (NSEERS), the Student and Exchange Visitor Information System (SEVIS), and U.S. Visitor and Immigrant Status Indicator Technology (US-VISIT) to track nonimmigrant aliens in the United States. The responsibility for enforcing these systems lies with the Compliance Enforcement Unit (CEU).

The Threat Analysis Section (TAS), a part of the National Security Unit (NSU), is a specialized group of agents and intelligence analysts who proactively identify persons of interest from within the non-immigrant community of visitors, students, and temporary workers in the United States. The TAS uses the latest computer technology and access to immigration, law enforcement, and intelligence information to identify hidden links and associations between persons and events that could indicate a previously unknown threat.

National Security Investigations personnel participate in the Human Smuggling and Trafficking Center (HSTC), which combines ICE's resources with other Federal agency representatives from the policy, law enforcement, intelligence and diplomatic arenas to work together to achieve increased progress in addressing the problems of human smuggling, human trafficking, and clandestine terrorist mobility.

**Financial Investigations:** OI identifies, investigates, disrupts, and dismantles criminal organizations and the complex systems used to launder funds generated from smuggling, human trafficking, financial scams, commercial fraud and intellectual property rights

violations, forced child labor, and other criminal activity. In coordination with private sector partners, OI reduces the vulnerability of U.S. financial systems to exploitation by terrorist and other criminal organizations, and seizes illicit proceeds derived from and used for criminal activity. In view of the significant role that financial assets and money laundering play in sustaining criminal organizations and criminal activity, all ICE investigations include a financial component.

The Cornerstone Initiative focuses on coordination and cooperation with other domestic and foreign law enforcement agencies and the private sector to eliminate vulnerabilities in U.S. financial systems and disrupt and dismantle alternative financing mechanisms that terrorists and other criminals use to earn, move, and store illicit funds.

The domestic Trade Transparency Unit (TTU) and Money Laundering Coordination Center (MLCC) provide the analytical infrastructure to support financial and trade investigations. The TTU provides the capability to identify and analyze complex trade-based money laundering systems, such as the estimated \$5 billion-per-year drug money-laundering scheme known as the Black Market Peso Exchange (BMPE).

OI actively participates in collaborative investigative task forces with other federal, state, local, and international law enforcement agencies (e.g., High Intensity Financial Crime Area programs, Joint Vetting Units, Financial Action Task Forces) targeting terrorist financing and transnational money laundering.

**Smuggling/Public Safety Investigations:** OI identifies, deters, interdicts, and investigates activities associated with the unlawful movement of people and goods into and out of the country. In addition to conducting investigations targeted at disrupting and dismantling activities of groups and individuals engaged in the smuggling of humans and contraband, OI investigates human rights violations, exploitation of individuals, importation of hazardous and prohibited items, identity and benefit fraud, critical infrastructure protection/worksites enforcement, and violent criminal aliens.

Agents are confronted with numerous challenges in the effort to combat drug traffickers and, ultimately, significantly reduce the amount of illegal drugs introduced into the United States each year. Drug smuggling organizations continue to develop new and sophisticated methods to smuggle drugs into the United States by developing new concealment techniques, organizing internal conspiracies (i.e., criminals target corrupt personnel within a company or transportation industry to introduce contraband into otherwise legitimate cargo or conveyances), using various transshipment routes, and attempting to corrupt law enforcement officers.

Using programs such as the Maritime Port Security Program, OI eliminates the threats posed by internal conspiracies and smuggling organizations. Operation Safe Harbor focuses on investigative initiatives in the maritime port environment as well as non-investigative initiatives including cooperative programs with CBP and other DHS agencies.

Resources and support for these investigative efforts are enhanced through increased coordination and cooperation with other federal, state, tribal, local, and foreign law enforcement agencies and through participation in task forces such as the Organized Crime Drug Enforcement Task Force, the High Intensity Drug Trafficking Area, and the High Intensity Financial Crime Area programs.

The Commercial Fraud Unit and National Center for Intellectual Property Rights (IPR Center) target predatory and unfair trade practices that threaten our economic stability, restrict the competitiveness of U.S. industry in world markets, and place the public health and safety of the American people at risk. ICE is the only federal agency that investigates predatory and unfair trade practices under title 19 of the U.S.C.

Identity and benefit fraud is a vulnerability of national security because it enables terrorists and criminals to exploit the legitimate immigration process and obtain “legal” status in the United States via fraudulent means. Benefit fraud is an extremely lucrative form of organized white-collar crime; it is complex and challenging to investigate, and often involves sophisticated, multi-layered schemes with multiple co-conspirators that take years to investigate and prosecute. OI focuses on identifying and targeting the most significant, prolific, and egregious violators, and individuals and organizations that pose a risk to national security or public safety.

Violent criminal aliens, such as sexual predators and street gang members, pose a significant threat to public safety. In partnership with state and local law enforcement, OI investigates foreign-born sex offenders for violations of laws in order to remove them from the country. Likewise, OI coordinates investigations with domestic and international law enforcement to disrupt and dismantle street gangs with foreign-born members, which have been involved in various crimes with a nexus to the border, such as drug and human smuggling, weapons trafficking, document fraud, and the export of stolen goods. OI also works to deny safe haven to human rights violators in the United States by investigating their violations of U.S. criminal and immigration laws.

Through worksite enforcement initiatives, OI works with the federal and private sector to prevent criminals and terrorists from penetrating and harming the U.S. economy by gaining employment in critical and sensitive areas. OI enforcement operations prioritize and target the most important, and vulnerable, facilities for enforcement activity, and identify and remove unauthorized facility workers through multi-agency screening and arrest operations. Furthermore, OI is applying sanctions to criminal employers whose employment practices constitute worker exploitation or have a nexus to alien smuggling or fraud. OI also conducts enforcement operations and I-9 audits on egregious violators that are not complying with the Employment Eligibility Verification requirements and have adopted the use of unauthorized workers as part of their business strategy. OI also conducts proactive outreach presentations and seminars under the ICE Mutual Agreement between Government and Employers (IMAGE) program to educate employers and trade associations as to their legal responsibilities that will help them remain in or achieve compliance with immigration and related laws.

**Investigative Services:** OI provides investigative support services to all categories of investigations, including Asset Forfeiture and the Law Enforcement Support Center (LESC). Asset Forfeiture laws allow ICE agents to store and maintain seized property and forfeit illicit proceeds and other criminally derived assets from critical infrastructure cases. Illicit proceeds are gained by organizations utilizing undocumented workers at Ports of Entry and/or In-Bond warehouses and are used to sustain the criminal activity and to fund other criminal endeavors. The LESL is an ICE 24-hour national enforcement operations facility that provides real-time immigration status assistance to federal, state, and local LEAs on aliens suspected, arrested, or convicted of criminal activity. The LESL responds to inquiries from state and local law enforcement partners who have apprehended individuals suspected of being in the country illegally. The LESL processes biometric information on criminal arrestees generated through interoperability between the FBI IAFIS database and the US-VISIT IDENT database to identify removable criminal aliens and research the severity of the subject's criminal history for prioritization of enforcement actions. These efforts also directly support the ICE Secure Communities Initiative.

**Law Enforcement Support & Information Management:** OI provides investigative support services to all categories of investigation, including the Cyber Crimes Center (C3), Technical Operations, and the Forensic Document Laboratory (FDL). The C3 manages Operation Predator and investigates and provides computer forensics on domestic and international criminal activities occurring on, or facilitated by, the Internet, including document and benefit fraud, arms and strategic technology, money laundering, counterfeit pharmaceuticals, child pornography, and child sex tourism investigations.

The FDL is the only federal crime laboratory dedicated exclusively to detecting and deterring travel and identity document fraud. This capacity is critical to finding and eliminating the root causes of immigration fraud. Technical Operations assists the field by providing support for technical equipment needs including tracking devices, video equipment, body wires, covert entry, Title III equipment, Telecommunications Linking System as well as supporting all ICE OI Title III telephone, email and IP intercepts, and pen registers. Technical Operations provides training in undercover (UC) classes, designated technical agent (DTA) classes, technical enforcement officer (TEO) classes, Title III classes, Penlink software classes, and to foreign governments.

## **Key Accomplishments**

In addition to ongoing activities, OI accomplished the following in FY 2009:

- Executed operations in seven additional Border Enforcement Task Force (BEST) locations in FY 2009 to bring the total number to 17; new BEST seaport operations in Los Angeles/Long Beach, Miami, and New York/New Jersey; southwest border BEST operations in Las Cruces and Deming, New Mexico; northern border BEST operations in Detroit, Michigan; and an overseas BEST in Mexico City;

- Managed the Armas Cruzadas Surge Operation consisting of a three month enforcement period to utilize all available assets to conduct enforcement activities which will maximize weapons interdictions including targeting of known weapons proliferation networks and conducting roving southbound operations with CBP at the ports of entry (POEs);
- Temporarily enhanced Southwest Border investigative resources to address border violence along the U.S./Mexico border and focus on cross border and threats in the region including contraband smuggling, money laundering and bulk cash smuggling, human smuggling and trafficking, transnational criminal gangs, and tunnel detection;
- Updated MOU with ATF and DEA to clearly establish how the two agencies investigative resources will work together on investigations of international firearms trafficking and possession of firearms by illegal aliens;
- Executed the Visa Waiver Enforcement Program (VWEP) to address vulnerabilities inherent in the Visa Waiver Program;
- Coordinated with Census, the State Department, and U.S. Customs and Border Protection (CBP) to put in place the necessary regulation changes so that the serial numbers on all firearms exported from the U.S. will be captured at the time of export;
- Continued to participate in efforts to establish a formal Trade Transparency Unit in Panama;
- Conducted Operation Stamp Out in collaboration with CBP and the U.S. Postal Inspection Service (USPIS) to combat the rise in the importation and distribution of counterfeit U.S. Postal money orders, stamps, and meter stamps into the U.S.;
- In coordination with CBP, implemented HQ-initiated Fraud Investigative Strike Team Operations to ten ports/ICE offices;
- Expanded the ability of the Cyber Crimes Center (C3) to address the increases in digital data forensics volumes, while developing new tools and methods to manage and improve the analysis of derived digital information;
- Conducted training to promote the use of Title III intercepts to combat crime along the Southwest border;
- Directed a Rapid Deployment Team (RDT) to assist with the initiation of Title III intercepts;
- Operated a wire-room to facilitate Title III operations in small Southwest border offices;
- Reduced vulnerabilities in U.S. critical infrastructure, unlawful acquisition of export restricted technology, and unlawful entry of unauthorized non-immigrants into the United States;
- Expanded Operation Guardian to incorporate additional agency partners and increase the scope of targeting, interdiction, and investigation of the importation of substandard, tainted and counterfeit products being imported into the U.S.;
- Operated a Human Rights Violator and War Crimes Center within the office of investigation to lead the efforts to prevent human rights violators from entering the U.S. or being issued immigration benefits, provide direct support to on-going criminal and administrative investigations and court proceedings involving human

- rights violators along with generating and disseminating investigative referrals to the field for investigation;
- Continued to identify, locate, arrest, criminally prosecute and ultimately remove transnational criminal street gang members from the U.S., as part of Operation Community Shield;
  - Managed the Bulk Cash Smuggling Center (BCSC), an around the clock intelligence and operations facility to provide real-time tactical intelligence to federal, state and local officers involved in enforcement and interdiction of bulk cash smuggling and the transportation of illicit funds.
  - Conducted Cornerstone's outreach and training for the trade and financial business communities; and
  - Directed the Jamaican Operations Linked to Telemarketing (JOLT) and continued to further telemarketing fraud investigations, to include the support and enhancement of the existing Project Canadian Operations Linked to Telemarketing (COLT), identifying, disrupting and dismantling organizations perpetrating this fraudulent scheme and seizing the proceeds as well as returning money to victims of such crimes.

In addition to ongoing activities, OI plans to accomplish the following in FY 2010:

- Permanently expand investigative resources at the Southwest Border to address border violence along the U.S./Mexico border and focus on cross border and threats in the region including contraband smuggling, money laundering and bulk cash smuggling, human smuggling and trafficking, transnational criminal gangs, and tunnel detection;
- Expand the BEST program to additional seaport locations in San Juan, Puerto Rico, New Orleans, Louisiana, Charleston, South Carolina, Boston, Massachusetts, Houston, Texas, and Honolulu, Hawaii;
- Expand Operation Armas Cruzadas to incorporate additional agency partners and increase the scope of targeting, interdiction, and investigation of the smuggling of weapons from the U.S. into Mexico and continue to effectively respond to and support the task of investigating the illegal smuggling of weapons from the U.S. into Mexico;
- Increase compliance enforcement efforts while increasing efficiency, and build on interagency partnerships to ensure efforts remain focused on emerging national security threat streams;
- Coordinate with CBP to expand the "security bond" initiative targeting the illegal diversion of commercial goods transported globally via the in-bond process;
- Continue export enforcement programs dedicated to specific dual-use and military technology;
- Continue the roll-out of Operation TECH Defense, an initiative intended to disrupt and deny suspect non-immigrants access to sensitive U.S. technologies through either immigration or export enforcement actions;
- Develop additional commercial fraud based initiatives in coordination with CBP that focus on revenue protection and other import violations;

- Build on the successful partnerships that have been created through the IMAGE program with exemplary businesses within the area of immigration compliance;
- Upgrade information technology to enhance trade-based money laundering and other commercial fraud investigations;
- Continue partnerships with the Department of Labor, Department of State, Social Security Administration, U.S. Postal Service, USCIS, and other federal, state and local agencies to address document and benefit fraud and vulnerabilities in the immigration process;
- Continue IPR Center outreach efforts both nationally and internationally;
- Disrupt, dismantle, and eliminate vulnerabilities within Internet financial sectors and services before terrorists and other criminal organizations can exploit them;
- Continue asset forfeiture investigations by identifying, seizing, and forfeiting illegal proceeds;
- Continue to support the Human Rights Violator and War Crimes Center and attempt to expand by partnering with other agencies that have a role in the domestic and overseas investigation, prosecution, and removal of human rights violators and war criminals;
- Continue to coordinate with Census, the Department of State, and CBP to put in place the necessary regulation changes so that the serial numbers on all firearms exported from the U.S. will be captured at the time of export;
- Continue to roll-out Operation High Road, an ICE-led, multi-agency initiative to investigate U.S.-based automobile exporters to the Middle East and the flow of associated funds from these exports back to the U.S.;
- Continue to utilize Title III intercepts to disrupt and dismantle criminal organizations;
- Conduct training to promote the use of Title III intercepts to combat crime along the Southwest and Northern borders;
- Infiltrate, disrupt and dismantle transnational criminal street gang organizations through the use of RICO, VICAR, CCE, Hobbs Act and other statutory violations in furtherance of Operation Community Shield;
- Establish partnerships with CBP, TSA and the U.S. Postal Service aimed at disrupting efforts of criminal organizations involved in cross-border crimes to move their illicit proceeds;
- Continue Cornerstone's outreach and training for the trade and financial business communities; and
- Continue to further telemarketing fraud investigations, Project JOLT and Project COLT, to identify, disrupt and dismantle organizations perpetrating this fraudulent scheme and seize the proceeds of their operations, as well as return money to victims of such crimes.

In FY 2011, OI will:

- Continue to expand Operation Armas Cruzadas to incorporate additional agency partners and increase the scope of targeting, interdiction, and investigation of the smuggling of weapons from the U.S. into Mexico to reduce the flow of weapons trafficking through U.S. borders;

- Expansion of mission support FTEs to help alleviate administrative functions performed by agents and allow them to focus on their primary function – the investigation of transnational and border crime. This funding will help ensure agents have the necessary mission support so they can focus their efforts on investigations, rather than administrative tasks.
- Establish BESTs in three additional locations (Massena, NY; San Francisco, CA and Honolulu, HI) to prevent the smuggling of goods and the illegal entry of persons, with a priority focus on terrorist groups, gang members, and criminal aliens.
- Hire 13 FTEs for the ICE-led National Intellectual Property Rights Coordination Center (IPR Center), a collaborative effort bringing together key U.S. Government agencies, to stop intellectual property rights (IPR) violations that threaten our economic stability, impact the competitiveness of U.S. industry, and endanger the public's health and safety. Additionally, ICE will focus on disrupting criminal organizations through the Internet to facilitate IPR crime and provide support for anti-counterfeiting efforts.
- Reduce the nation's vulnerability to exploitation of nonimmigrant visas/programs by increasing compliance enforcement actions;
- Continue coordination with CBP to expand the "security bond" initiative targeting the illegal diversion of commercial goods transported globally via the in-bond process;
- Continue export enforcement programs dedicated to specific dual-use and military technology;
- Expand training and targeting of potential violators in support of Operation TECH DEFENSE through the identification of sensitive technologies, the manufacturers of those technologies and determining whether the companies are compliant with immigration and export regulations and laws;
- Develop additional commercial fraud based initiatives in coordination with CBP that focus on revenue protection and other import violations. Initiatives would include investigations of antidumping evasion, misclassified textiles, forced labor products, and restricted endangered species imports;
- Further enhance national security violation investigations that involve smuggling or trafficking of aliens or some other form of worker exploitation;
- Upgrade information technology to enhance trade-based money laundering and commercial fraud investigations;
- Partner with the Department of Labor, Department of State, Social Security Administration, U.S. Postal Service, USCIS, and other federal, state and local agencies to address document and benefit fraud and vulnerabilities in the immigration process;
- Continue IPR Center outreach efforts both nationally and internationally;
- Disrupt, dismantle, and eliminate vulnerabilities within internet financial sectors and services before terrorists and other criminal organizations can exploit them;
- Continue asset forfeiture investigations by identifying, seizing, and forfeiting illegal proceeds;
- Continue to review current operations to ensure resources are targeted based on risk;

- Continue to develop plans that will provide continuity for critical ICE enforcement activities currently conducted at the LESC; and
- Continue to support the activities, goals, and plans of Secure Communities working with federal, state and local law enforcement agencies.
- The Office of Investigations expects approximately 392 Investigative FTE and \$100 million to be spent in support of the following overarching goals of the SWB Counter-Narcotics Strategy:
  - Investigations and Prosecutions - Targeting and attacking criminal organizations through effective investigations and prosecutions
  - Money - The processes of moving bulk cash out of the country and its eventual repatriation present vulnerabilities and intelligence which U.S. law enforcement can exploit to identify and dismantle illicit drug organizations.
  - Weapons - develop an effective, coordinated, and comprehensive response to the threat of illegal weapons smuggling/trafficking from the United States into Mexico, and to support Mexico's broader efforts to deny drug trafficking organizations access to arms from other international sources.

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Salaries and Expenses**  
**International Investigations**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: International Investigations**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>269</b>	<b>274</b>	<b>109,780</b>
<b>2010 Enacted</b>	<b>218</b>	<b>193</b>	<b>112,872</b>
2011 Adjustments-to-Base	-	6	817
<b>2011 Current Services</b>	<b>218</b>	<b>199</b>	<b>113,689</b>
<b>2011 Total Request</b>	<b>218</b>	<b>199</b>	<b>113,689</b>
Total Change 2010 to 2011	-	6	817

U.S. Immigration and Customs Enforcement requests \$113.7 million for this activity. This is a \$0.8 million increase from the FY 2010 enacted level, which is for annualization of prior year funding, pay inflation, and management and technology efficiencies. In FY 2011, this PPA is estimated to pay \$6.6 million in servicewide costs (e.g., rent, working capital fund).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Office of International Affairs (OIA) protects the United States by enhancing its security through proactive international investigations overseas involving transnational criminal organizations responsible for the illegal movement of people, goods, and technology. As the forward element of ICE, OIA works with foreign counterparts to identify and combat criminal organizations *before* they can adversely impact the United States. OIA serves as the primary component of DHS international law enforcement operations presence and must maintain operational flexibility in order to meet the dynamic challenges and threats in the global environment. OIA personnel collaborate with foreign counterparts in joint efforts to deter, disrupt, and dismantle transnational criminal organizations engaged in contraband smuggling, human smuggling and trafficking, immigration violations, money laundering, arms and technology trafficking, child sexual exploitation (child pornography and child sex tourism), forced child labor, and financial and cyber crimes overseas.

The primary mission of an OIA Attaché office is to conduct ICE investigations and critical law enforcement operations and to provide investigative support to domestic offices in combating transnational crime. Attaché offices coordinate international law

enforcement operations and build relationships with foreign law enforcement, immigration and customs counterparts; support other DHS, ICE and U.S. government components and initiatives; refer requests from host country agencies to domestic offices; serve as advisors to U.S. missions; and provide training and conduct outreach to foreign officials on ICE international priorities. OIA also coordinates with foreign counterparts to share information under negotiated bilateral agreements and Customs Mutual Assistance Agreements. OIA conducts and coordinates international training of law enforcement counterparts overseas resulting in enforcement outcomes and coordinates training through International Law Enforcement Academies (ILEA). OIA's activities also support the goals set forth by the DOS in the areas of regional stability, counter-terrorism, homeland security, weapons of mass destruction, international crime and drugs, economic prosperity, and public diplomacy.

### **International Removals and Repatriations**

One of ICE's primary strategic goals is to promote public safety and combat immigration-related crimes by removing individuals, especially criminals and other threats to public safety that are unlawfully present in the United States. OIA facilitates the timely removal and return of aliens from the United States to host countries, and strengthens and supports legal migration. Through the use of dedicated Assistant Attaché for Removals overseas, OIA is able to coordinate returns with host governments and to facilitate transits and country clearances. The newly deployed Assistant Attachés are integrated with and supported by the ICE Attaché offices. Where there is no Assistant Attaché for Removals deployed, the ICE Attachés still bears the ultimate responsibility for the host country acceptance of aliens from the United States. The removal and repatriation activities are focused in areas where liaison will have the greatest enforcement benefit and regional impact, such as the Caribbean, the Americas, Asia, and Africa.

Through its newly-established Repatriations and International Agreements Unit (RIA), OIA coordinates with the ICE Office of Detention and Removal Operations (DRO) to effect the removal of aliens from the United States who have final orders of removal. These functions speed the removal process and reduce related detention costs. The DOS also benefits from ICE support at the U.S. embassies through assistance in sensitive removal discussions with receiving and transit countries. Close foreign coordination is required to gain cooperation from foreign governments on return of aliens and coordination of Justice Prisoner and Alien Transport System flights, country clearances, escorts, and charters. The RIA also furthers law enforcement coordination through development of international agreements, and in addition to acting as liaison with ICE DRO, coordinates information sharing through and ICE negotiation on Customs Mutual Assistance Agreements, Mutual Legal Assistance Treaties and other international agreements as needed. These bilateral agreements and activities are centrally controlled and coordinated under OIA to provide one voice for ICE.

## Key Accomplishments

In FY 2009, OIA:

- Opened new Attachés offices in several strategic locations, including Brussels, Belgium, Cartagena, Colombia, Guayaquil, Ecuador, and Amman, Jordan;
- Received the INTERPOL Secretary General's concurrence on placement of a Senior ICE executive at INTERPOL headquarters in Lyon, France;
- Established the RIA Unit within OIA to work with DRO and DOS to negotiate and maintain removal agreements with foreign countries. This unit develops approaches for working with recalcitrant countries which do not allow the repatriation of their citizens and works with other U.S. Government agencies to negotiate various mutual assistance agreements and other international agreements;
- Deployed Assistant Attaché for Removals to six additional Attaché offices overseas to coordinate with host governments to facilitate removals of aliens under orders from the U.S.;
- Received authority to establish an Attaché office in Kabul, Afghanistan in support of the "civilian surge" initiative;
- Received funding from the Department of Defense (DOD) to support U.S. Central Command (CENTCOM), U.S. Southern Command (SOCOM), and U.S. mission interests, and to support DHS and DOD priorities regionally;
- Continued to work with DOD partners to support efforts in the Global War on Terror (GWOT) and established Senior ICE Representative positions at SOCOM, Africa Command (AFRICOM), and United States European Command (USEUCOM);
- Supported the Southwest Border Initiative Surge to combat the ongoing and increasing cross-border violence by sending 12 additional personnel on temporary assignment to four existing offices in Monterrey, Hermosillo, Juarez, and Tijuana to achieve a quantitative increase in operational investigations, seizures, arrests, and investigative leads to domestic field offices;
- Established a Border Enforcement Security Task Force (BEST) in Mexico City in cooperation with Mexican law enforcement agencies to facilitate the exchange of information and rapid bilateral investigation of violations on both sides of the border through coordination with the 17 existing Southwest border BESTs and the Armas Cruzadas Virtual Web Portal;
- As part of the Merida Initiative, sent 14 criminal investigators and 1 intelligence analyst to teach Basic Investigative Methods to approximately 1,350 students and continued to support the training;
- Concluded Counter Proliferation Investigations (CPI) in child pornography, human smuggling and trafficking, illegal arms exports, child sex tourism, and financial crimes cases, leading to the arrest/indictment of the people/networks attempting to acquire U.S. controlled technology/goods bound for prohibited destinations;
- Provided logistical support/coordination for 16 Textile Production Verification Team (TPVT) visits and investigated leads for potential transshipment violations;

- Continued participation and support of Project Center for Operations Linked to Telemarketing (COLT), a very successful program within Royal Canadian Mounted Police's (RCMP) Commercial Crimes Unit. With ICE assistance with the research, investigation and ultimate extradition to the U.S. of the perpetrators, funds intercepted by Canada Post from U.S. victims have been returned to the victims in an efficient and timely manner;
- Began participation in the 41K Project, a bilateral information sharing initiative between the Canadian and U.S. Governments aimed at determining how many of the approximate 41,000 persons ordered removed from Canada have absconded to the U.S. and to locate, apprehend, and prosecute the individuals who entered the U.S. under false pretenses;
- Assigned personnel to the RCMP – National Child Exploitation Coordination Center NCECC, a national clearinghouse for all international requests to conduct investigations in Canada related to child sexual exploitation on the Internet;
- Entered into a Memorandum of Agreement with Jamaica, which established Project Jamaican Operations Linked to Telemarketing (JOLT) that serves to identify, disrupt, and dismantle the severe increase in Jamaican based telemarketing fraud operations that prey on U.S. citizens, many of whom are senior citizens;
- Assisted in the formulation of Operation Arena in Jamaica, a multinational operated undercover anti-corruption taskforce, that consists of international law enforcement partners working in a non-disclosed location with the goal of identifying, disrupting, extraditing, and prosecuting high-level Jamaican police and government officials. Operation Arena will focus on cross-border financial crimes committed by identified targets;
- Conducted joint OIA, Office of Investigations, Customs and Border Protection (CBP), and DHS bilateral Bulk Cash Smuggling (BCS) operations in furtherance of the ICE Hands Across the World (HAW) initiative utilizing real-time exchange of cash declaration information and intelligence to combat the threat of international BCS by assisting foreign customs administrations in targeting cash couriers. FY09 HAW operations in Italy, Spain, the United Kingdom, Taiwan, Israel, and the Kingdom of Bahrain resulted in dozens of currency seizures totaling more than \$600,700,000 in U.S. currency;
- Co-sponsored, with Australian Customs, the Asia Pacific Economic Cooperation (APEC) Workshop on Detecting and Deterring Cash Couriers and Bulk Cash Smugglers in Sydney, Australia for 80 participants from 20 APEC economies, featuring presentations from international customs and law enforcement experts, case studies, and practical exercises and visited the Sydney International Airport to see how Australian Customs targets illicit cash couriers;
- Coordinated an unprecedented multilateral BCS operation with Group of Eight (G8) member countries, targeting illicit cash couriers traveling on commercial airlines to locations in the Middle East and Asia resulting in simultaneous BCS interdictions and forced declarations in airports in member countries, examination of approximately 515 international flights, and at least 63 cash seizures with an approximate aggregate value of \$3 million U.S.; joint US/Australian South East Asia Regional BCS training representing 8 nations and 26 government agencies

- that resulted in simultaneous BCS interdiction and training at airport locations in 2 different countries and a cash seizure at one airport and multiple forced declarations at the other;
- Deployed 13 Biometric Data Collection Kits and trained over 200 Philippine National Police personnel on their use and benefits in the fight against global terrorism, which led to the identification of over 120 individuals that were added to the Terrorist Identities Datamart Environment;
  - Established closer working relationship with the Cambodian Government, which has allowed for the expeditious expulsion of US citizens charged in the U.S. for violations of the Protect Act;
  - Facilitated the removal of high level/value detainees, i.e., Nazi guard Ivan Demanjuk, Irish Republic Army member Pol Brennan, Palestinian Liberation Organization (PLO) member Khaled Aljasem;
  - Obtained the conviction of Andrew Mogliansky on Child Sex Tourism charges; Attaché Moscow was instrumental in securing evidence, locating victim/witnesses, and Russian cooperation;
  - Successfully investigated an international alien smuggling and document fraud organization in Colombia;
  - Produced the Annual Report of the Task Force on the Prohibition of Importation of Products of Forced or Prison Labor from the People's Republic of China (PRC), a mandatory annual report summarizing the activities of the China Prison Labor Task Force established by Congress to promote the effective enforcement of section 307 of the Tariff Act of 1930 with respect to the PRC and chaired by the Assistant Secretary of ICE;
  - Provided Export Control and Related Border Security (EXBS) training to authorities in 6 countries and over 180 foreign law enforcement officials;
  - Provided BCS overseas training to over 1,245 foreign law enforcement officers in 27 countries;
  - Coordinated ILEA training for approximately 850 local and national police, customs and immigration officers and prosecutors from 56 countries in human smuggling and trafficking, financial crimes, commercial fraud, child exploitation, intellectual property rights, fraudulent documents, and arms trafficking; and coordinated 146 visits and/or hosted briefings for 631 officials from 64 countries through the International Visitors Program (IVP);
  - Conducted cultural repatriations of 450 objects to five different countries.

In FY 2010, OIA will:

- Deter, dismantle, and disrupt transnational criminal organizations;
- Expand presence in Central America to assist in the reduction of narcotics trafficking through ICE's existing strong partnerships with Central American law enforcement and efforts to building capacity to investigate and interdict narcotics and bulk cash shipments;
- Continue to support investigations of child exploitation/child sex tourism, human smuggling and trafficking, illegal arms exports, financial crimes, proliferation networks, and transnational criminal organizations;

- Explore and expand opening new Attaché offices in several strategic locations; and expand OIA presence in Mexico to combat the ongoing and increasing cross-border violence;
- Deploy a Senior ICE executive at INTERPOL headquarters in Lyon, France;
- Deploy three additional personnel to Attaché office locations overseas to coordinate with host governments to facilitate removals of aliens under orders from the U.S.;
- Continue to work with DOD partners to support efforts in GWOT and continue working to fully standup the Attaché office in Kabul, Afghanistan in support of CENTCOM, SOCOM, and U.S. mission interests and to support DHS and DOD priorities in the region;
- Deploy Senior ICE Representatives to the CENTCOM and NORTHCOM;
- Continue to support Project COLT which is expected to increase the amount of funds returned to U.S. victims. This increase will be attributed to ICE's continued victim outreach efforts and application of viable targeting strategies;
- Expand involvement and investigation of 41K Project leads by increasing the amount of leads received from the Canadian government;
- Continue involvement in the RCMP - NCECC;
- Continue involvement in the Operations Arena Task Force;
- Continue to provide EXBS training to foreign law enforcement officials, BCS training to designated countries with a heavy emphasis on operational and regional training, and ILEA training, as well as hosting/coordinating IVP visits for foreign officials; and
- Continue operational training of foreign law enforcement officials in undercover techniques and CPI; task force efforts to identify and investigate Politically Exposed Persons (PEP) in coordination with foreign governments; and efforts to establish permanent, formal TTUs.

In FY 2011, OIA will:

- Deter, dismantle, and disrupt transnational criminal organizations;
- Improve and expand the global reach in the investigative areas of child exploitation/child sex tourism, human smuggling and trafficking, illegal arms exports, financial crimes, proliferation networks, and transnational criminal organizations, and reduce threats associated with foreign nationals transiting the U.S.;
- Increase working relationships and coordination with DOD elements and other U.S. and foreign partners in the GWOT, and combat transnational criminal organizations;
- Continue efforts to identify and investigate PEPs in coordination with foreign governments;
- Support investigative initiatives by identifying emerging patterns and national security threats of increased risk from terrorists, criminals, and other ineligible visa applicants;
- Continue to coordinate TPVT visits, international EXBS and BCS training and ILEA training of foreign law enforcement officials in a wide range of

- investigative areas; and conduct resulting investigations and joint ICE and DHS operations to reduce violations;
- Augment its current presence in Mexico to a total of 40 U.S. direct-hire enforcement personnel by adding personnel to existing offices. This includes 12 special agents funded by an FY 2010 enhancement and 3 special agents funded by a reprogramming of base appropriated funds.
  - Increase coordination with host governments to remove aliens from the U.S. and reduce the time to secure the removal overseas; and
  - Continue to support ICE and other DHS law enforcement related programs overseas.
  - ICE OIA proposes to expend \$1.3 million in support of the National Southwest Border Counter-Narcotics Strategy. These investigative resources will:
    - Enhance interagency and interdisciplinary efforts between ICE and Mexico: OIA partners with domestic ICE components and with U.S. law enforcement agencies overseas to leverage overseas sources to counter global narcotics threats to the U.S. including utilizing investigative and intelligence techniques to support domestic cases and interagency cross-border initiatives.
    - Increase coordination with Mexico to target and reduce vulnerabilities and criminal organizations that threaten our security: OIA supports U.S. drug control policy by supporting the overall ICE mandate to detect, disrupt, and dismantle organizations smuggling contraband (including narcotics) into the United States.

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Salaries and Expenses**  
**Visa Security Program**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: Visa Security Program**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>39</b>	<b>36</b>	<b>22,354</b>
<b>2010 Enacted</b>	<b>71</b>	<b>67</b>	<b>30,686</b>
<b>2011 Current Services</b>	<b>71</b>	<b>67</b>	<b>30,686</b>
<b>2011 Total Request</b>	<b>71</b>	<b>67</b>	<b>30,686</b>
Total Change 2010 to 2011	-	-	-

U.S. Immigration and Customs Enforcement requests \$30.7 million for this activity. This constitutes no change from the FY 2010 enacted level. In FY 2011, this PPA is estimated to pay \$1.7 million in servicewide costs (e.g., rent, working capital fund).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Authorized by the Homeland Security Act of 2002, the Visa Security Program (VSP) and Security Advisory Opinion Unit (SAOU) reduce the potential for criminals, terrorists, and persons of interest to exploit the legal visa process to enter the U.S. The VSP identifies potential terrorist or criminal threats before they reach the United States by conducting targeted, in-depth vetting of individuals who apply for visas overseas. The VSP and SAOU foster coordinated decision-making across DHS and DOS to utilize law enforcement expertise and analysis to maximize the enforcement benefit to the visa process.

In implementing the VSP, OIA is working closely with DOS to enhance national security by providing an additional level of review and security, along with the unique law enforcement expertise necessary to identify terrorists, other criminals, and persons of special interest from 14 posts in 12 countries before they enter the U.S.

The Visa Security Program enhances the security of visa issuance at high-risk overseas posts by deploying highly skilled and experienced law enforcement officers who conduct in-depth investigative reviews of visa applications that raise security concerns, investigate concerns relating to visa fraud and other criminal activity which can exploit the visa system, and provide advice and training on security issues to DOS consular

officers, thereby enhancing their ability to screen security risks as they adjudicate visas and refuse or revoke applications when warranted.

## **Key Accomplishments**

In FY 2009, VSP:

- Expanded Visa Security Program (VSP) operations to two new highest-risk visa adjudicating posts consistent with the VSP Expansion Plan;
- Exceeded the Government Performance and Results Act (GPRA) performance target for the number of visas recommended for refusal based on derogatory information, by recommending denial for 1,027 visa applicants;
- Expanded SAO Unit (SAOU) operations to CBP's National Targeting Center-Passenger (NTC-P) facility to increase collaboration between ICE and CBP and support our common goal to prevent terrorists and criminal suspects from entering the U.S.;
- Completed the initial development of the VSP Tracking System (VSPTS-Net), a globally accessible, intranet-based system that manages the workflow associated with visa security reviews and provides the necessary analytical, reporting, and data storage capabilities that the VSP requires;
- Collaborated with DOS in revising the rules governing the sharing of TECS data with DOS' Consular Lookout and Support System (CLASS). Initial revisions to the rules in FY 2009 provided over 500,000 records related to international war criminals and other individuals inadmissible under U.S. law to DOS, to prevent those individuals from receiving visas to travel to the United States; and
- Trained 63 ICE Special Agents as Visa Security Officers (VSOs).

In FY 2010, VSP will:

- Continue to expand the VSP, consistent with the VSP Expansion Plan, by opening two Visa Security Units (VSUs) in high-risk locations; conducting in-depth visa applicant reviews/investigations, and providing advice and training to DOS Consular Officers. ICE is mandated by Congress to use the remaining two-year enhancement funds of \$3.437 million it received for expansion by the close of FY 2010 pursuant to its Expansion Plan or the funds will be lost;
- Continue to increase the number of visa applications in which VSP discovered derogatory information and provided the information to the Department of State;
- Continue to expand the Security Advisory Opinion Unit (SAOU) to screen and vet additional categories of SAOs;
- Continue to develop and refine the VSP Tracking System (VSPTS-Net) to connect to a more comprehensive targeting tool to facilitate vetting activities and provide direct communication with the necessary interagency systems;
- Continue to train ICE Special Agents as Visa Security Officers (VSOs).

In FY 2011, VSP will:

- Continue increasing the number of visas reviewed, and increasing the number of visa applications in which VSP discovers derogatory information and provides the information to DOS building from offices opened in FY 2009 and FY 2010;
- Support investigative initiatives by identifying emerging patterns and national security threats of increased risk from terrorists, criminals, and other ineligible visa applicants; and
- Continue to support DHS and other U.S. Government agencies and programs overseas.

U.S. Immigration and Customs Enforcement requests \$71.1 million for this activity. This is a \$1.3 million increase from the FY 2010 enacted level, which is for annualization of prior year funding, pay inflation, and management and technology efficiencies. In FY 2011, this PPA is estimated to pay \$10.3 million in servicewide costs (e.g., rent, working capital fund).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Intel is responsible for managing the ICE intelligence system and its operational functions, including the activities of the headquarters staff, and field offices co-located with ICE enforcement offices throughout the country. The overall aim is to ensure that intelligence developed or received is processed, analyzed, and disseminated to ICE executive management and to operational units as it pertains to homeland security and ICE strategic goals, which include anti-terrorism infrastructure protection and investigating the illegal movement of people, money, and cargo entering, exiting, transitioning, or moving within the Nation's borders.

The staff, assets, and resources of Intel operate across the U.S. and at several overseas posts, and respond to intelligence needs, based on formal, documented requirements from its customers, in support of the following programmatic and functional areas:

- Southwest Border Violence, where Intel provides a wide spectrum of intelligence support to enforcement entities on the Southwest Border including state, tribal, local and other Federal law enforcement and Intelligence Community partners;

- Human Smuggling and Public Safety, focusing on human smuggling, trafficking in persons, immigration benefit fraud, mass migration, and threats to public safety emanating from street gangs and other criminal aliens;
- Contraband Smuggling, where Intel provides intelligence to assist in the disruption of the activities related to the trafficking of international narcotics and other prohibited goods;
- Illicit Finance and Trade Fraud, involving illicit movements of money or financial instruments, and other commerce-related crime issues such as international trade violations, protection of intellectual property rights, and public health threats that cross our borders;
- Counter-Proliferation Intelligence, focusing on the identification and disruption of individuals and organizations involved in the unauthorized movement and procurement of critical technology, dual-use goods, chemical, biological, radiological, nuclear/conventional weapons, and unauthorized U.S. exports to prohibited countries;
- Field Intelligence Groups (FIGs), which yield fiscal efficiencies through collocation with other elements of ICE. The 26 FIGs foster relationships between Intel analysts and the customers they support. This structure also allows for flexibility to support customers as the FIG can be augmented with analysts temporarily deployed from around the country as needed;
- Intel analysts provide support to Secure Communities by exploiting classified reporting, conducting Human Intelligence (HUMINT), and conducting research to develop actionable information on biometric “no match” hits. Intel also produces alerts and reports that enhance officer safety and provide situational awareness to personnel participating in removal operations overseas;
- The International Intelligence Unit (IIU) provides intelligence support to ICE’s Office of International Affairs worldwide with emphasis on regions having significant levels of transnational criminal activity affecting ICE operations;
- Collections and Requirements works to increase responsiveness to customer and executive leadership, emphasizing requirement-driven intelligence service and improving internal and external information sharing.

## **Key Accomplishments**

In FY 2009, the Office of Intelligence:

- Satisfied over 820 requirements associated with violent criminal organizations on the Southwest Border by providing regular assessments of the most troubled areas of the region;
- Provided customers such as the Border Enforcement Security Task Forces (BESTs) along the Southwest Border with over 150 Homeland Security Intelligence Reports, and 218 investigative leads that resulted in arrests and seizures. These products provided valuable information enabling law enforcement actions associated with border tunnel operations, the arrest of a 15 mid-to high-level Sinaloa Cartel members and seizure of their weapons,

- investigations into a major Houston area Money Laundering Drug Trafficking Organization (MLDTO) and multiple Alien Smuggling Organization (ASO) investigations in the Dallas area;
- Received 12,725 customer requirements and satisfied 8,417 of them, representing a ten fold increase in both requirements intake and requirements satisfied over the previous year;
  - Identified and interviewed 81 suspected criminal aliens in support of a Secure Communities initiative at correctional facilities near Tiptonville, Tennessee. Of those interviewed, Intel identified 68 as deportable criminal aliens with convictions that included murder, aggravated assault, rape, rape of a child, and distribution of narcotics;
  - Deployed Intel analysis and the Document Exploitation Unit to support an ICE investigation related to a \$100 million U.S. Government contract fraud scheme; this resulted in three indictments, two convictions and \$250,000 in fines;
  - Contributed products that enabled SAC NY to identify the source of their target's means for acquiring shell companies which imported hundreds of ocean containers used to smuggle counterfeit/trademark items into the U.S.;
  - Identified two separate ephedrine shipments from India during the summer of 2009 which facilitated seizure of the shipments at John F Kennedy Airport; the total amount of ephedrine seized exceeded 6,245,000 grams;
  - Produced 54 Homeland Security Intelligence Reports in direct support of the National Export Enforcement Coordination Network of the Office of Investigations. One third of these leads led to new open cases, including the indictment and subsequent arrest of a Chinese national in violation of the Arms Export Control Act;
  - Provided support to SAC Chicago during Community Shield Surge Operations, which targeted suspected criminal aliens involved in street gangs. During FY09, Intel produced 153 target folders, which contributed to the arrest of 89 suspected illegal alien gang members;
  - Produced over 140 products that targeted 130 individuals engaged in human smuggling and alien trafficking, significantly disrupting three foreign based Alien Smuggling Organizations with ties to Special Interest Aliens;
  - Piloted with the Office of Investigations a new methodology for predicting patterns in contraband smuggling and identifying high risk shipments in cooperation with Customs and Border Protection. This new initiative focuses on dismantling contraband smuggling organizations that utilize commercial shipping, package delivery services, trucking, and air freight in furtherance of their criminal activities. The first month of this pilot yielded seizures of over 180 kilograms of narcotics, so Intel plans to expand this effort in FY2010;
  - Moved expeditiously to assign people to the Organized Crime Drug Enforcement Task Force (OCDETF) Fusion Centers and the Special Operations Division consistent with the General Accounting Office's recent recommendation; and
  - Placed liaison officers within partner agencies of DOJ and other departments such as the FBI, and is exploring new ways to provide additional support to partners at the state and local Fusion Centers.

In FY 2010, the Office of Intelligence will:

- Continue to employ the Intelligence Requirement Intake System and requirements management process to support our customer's needs for intelligence products in line with the strategic objectives of ICE and customer demand is expected to continue to outstrip capacity;
- Continue to mitigate this shortfall by information sharing with other intelligence partners, and is seeking to expand resources at State and Local Fusion Centers via the DHS Joint Fusion Center Program Management Office;
- Significantly increase activity involving Southwest Border violence and satisfy at least 20 additional requirements for each analyst full time equivalency that enters on duty during the year under the enhancement;
- Continue to work with DOJ and other partners to ensure that each agency's collection and reporting assets complement each other and that information is shared in an efficient and effective manner; and
- Identify and implement efficiency measures to avoid duplication of capabilities and leverage the complimentary capabilities of Intelligence Community and Law Enforcement partners to ensure that Intel continues to work to close intelligence gaps.

In FY 2011, the Office of Intelligence will continue to:

- Seek efficiencies through collocation, information sharing partnerships with other Federal, state, tribal and local partners;
- Develop innovative approaches to yield a five percent increase in production per analyst FTE each year through business process improvements;
- Adapt to changing operational requirements levied by its customers; and
- Pilot innovative methodologies that enhance our ability to better support customers in executing law enforcement actions such as arrests, seizures, and the return of criminal aliens.
- In FY11, ICE Office of Intelligence will apply \$7.9M and 47 positions out of the FY10 Southwest Border Enhancement towards the National Southwest Border Counter-Narcotics Strategy. These resources will contribute to the Strategy by:
  - Working within the DHS Intelligence Enterprise to enhance coordination and harmonization of intelligence and information collection, analysis and dissemination among the Intelligence Community and law enforcement agencies with Southwest border counterdrug intelligence responsibilities through coordinating activities of entities such as the Border Violence Intelligence Cell and Reports Officers who share information with partners to include Border Enforcement Security Task Forces, State and Local Fusion Centers, Department of Justice's Bureau of Alcohol, Tobacco, Firearms and Explosives, and partner agencies of the Government of Mexico.
  - Providing direct support to ICE investigations and prosecutions focused on disrupting and dismantling drug trafficking organizations and their activities to include, weapons being smuggled south, narcotics smuggling

and illicit financial activities through dissemination of such products as threat assessments and target folders identifying individuals, organizations, and other entities that constitute the enablers of these illicit activities.

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Salaries and Expenses**  
**DRO - Custody Operations**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: DRO - Custody Operations**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>4,994</b>	<b>4,905</b>	<b>1,774,696</b>
<b>2010 Enacted</b>	<b>5,210</b>	<b>5,210</b>	<b>1,771,168</b>
2011 Adjustments-to-Base	(79)	(79)	112,596

2011 Program Change	-	-	20,000
<b>2011 Total Request</b>	<b>5,131</b>	<b>5,131</b>	<b>1,903,764</b>
Total Change 2010 to 2011	(79)	(79)	132,596

U.S. Immigration and Customs Enforcement requests \$1,903.8 million for this activity. This is a \$132.6 million increase from the FY 2010 enacted level. \$20.0 million is for program changes. In addition, in order to consolidate ICE's overall cost of beds to allow a clearer depiction of actual costs being incurred, ICE is proposing for FY 2011 that bed costs currently in the base funding for Fugitive Operations, Criminal Alien Program (CAP), and Secure Communities/CIRCA be permanently reprogrammed under Custody Operations, which manages all bed-related activities for ICE. This zero-sum reprogramming between ICE programs results in a \$129.7 million increase to Custody Operations and corresponding decreases to the other three programs. In addition, in order to assure that personnel are appropriately being charged to the program under which they function, ICE is proposing to move funding for a total of 79 positions currently in Custody Operations base to the programs where these positions are performing the bulk of their work: CAP - 10 positions, Alternatives to Detention - 10 positions, and Transportation and Removal Program - 59 positions. This is a zero-sum reprogramming within DRO programs that results in a \$17.1 million decrease to Custody Operations. Net change of these two actions is a \$112.6 million adjustment-to-base increase to Custody Ops. In FY 2011, this PPA is estimated to pay \$162.0 million in servicewide costs (e.g., rent, working capital fund).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Custody Operations provides safe, secure, and humane conditions of detention for aliens taken into custody or arrested by ICE and other law enforcement entities, such as the Office of the Border Patrol, and state, county, and local law enforcement jurisdictions within the United States.

## Current Bedspace Management

ICE owns and operates seven secure detention facilities called Service Processing Centers (SPCs) located in: Aguadilla, Puerto Rico; Batavia, New York; El Centro, California; El Paso, Texas; Florence, Arizona; Miami, Florida; and Los Fresnos, Texas. ICE implemented a design-build approach to enhance the physical plan of SPCs and support facilities. With the addition of two administration and processing complexes at the Krome SPC in Miami and the Port Isabel SPC in Texas, operational efficiency at these locations has greatly improved due to improving internal logistics and meeting the national standards for conditions of confinement. ICE is currently reviewing whether owning SPCs is in the best interest of the Federal government. Recent analysis has shown that, on average, SPC detention beds cost more to operate than beds utilized in other types of facilities.

ICE also currently utilizes seven contract detention facilities (CDFs), which are run by contractors solely for ICE. These facilities are located in: Aurora, Colorado; Houston, Texas; Tacoma, Washington; Elizabeth, New Jersey; Broward County, Florida; Pearsall, Texas; and San Diego, California. In addition, ICE contracts for additional bed space with state and local facilities through Inter-governmental Service Agreements (IGSAs) with counties and municipalities throughout the United States. Furthermore, ICE supplements detention capacity through an arrangement with the Federal Bureau of Prisons' (BOP) Federal Detention Center in Oakdale, Louisiana.

Key to ICE's success in managing a growing detention population is the use of ICE's Detention Operations Coordination Center (DOCC) to manage detention and transportation resources on a national level. The national management of these resources has allowed ICE to support arrests in field offices with limited detention capacity by transporting cases to field offices with larger capacities.

## Detention Standards Compliance Oversight

ICE monitors detention facilities for compliance with National Detention Standards. These standards specify the living conditions appropriate for detainees and ensure that detainees are treated with dignity and respect, and that they receive the best possible care while they are housed at a facility. A core group within the ICE Office of Professional Responsibility monitors conditions where ICE detainees are held in order to assure that facilities utilized by ICE maintain appropriate conditions of confinement consistent with correctional industry standards and practices.

Additional detention facility oversight mechanisms to assure compliance with the National Detention Standards include annual inspections and on-site monitoring at all of our facilities, and ongoing quality assurance compliance monitoring at our largest facilities. Both the inspections and compliance monitoring are performed by outside contractors who maintain considerable detention facility program and operational service expertise.

DRO's Detention Standards Compliance Unit is in the final stages of modernizing ICE's National Detention Standards (NDS) to update agency policy regarding detention and bring ICE DRO practices in alignment with industry standards. The new standards are Performance-Based Standards (PBS), which focus on the results or outcomes that the required procedures are expected to accomplish.

### Healthcare

Primary healthcare for alien detainees is managed by the Division of Immigration Health Services (DIHS), which became a component of DRO operations in FY 2008. Through comprehensive health screening and the provision of direct patient care and managed care services to approximately 20,000 detainees, DIHS directly impacts the globalization of communicable disease and serves as a model for global health services delivery. A managed healthcare program is available system-wide to ensure adequate and appropriate care is provided to all detainees at the lowest possible cost.

The breadth of the responsibilities within the detention program requires a readiness to respond to a wide variety of emergency situations. As part of planning for a mass migration or disaster, the DRO Incident Response Unit has created contingency plans for DRO resources to remain readily available for deployment in the event of a natural disaster, terrorist attack, or mass immigration emergency and these plans are reviewed and modified based on lessons learned from recent occurrences.

### Bond Management Unit

The Bond Management Unit (BMU) is responsible for developing and implementing uniform bond policies and procedures. The BMU provides uniform guidance to DRO field offices and ensures that bond-related issues are addressed and resolved in a timely manner. The BMU works with the Debt Management Center (DMC), Burlington Finance Center, Department of Justice attorneys, and the Administrative Appeals Office (AAO) regarding bond-related litigation issues.

### **Detention Reforms**

In FY 2009, ICE undertook a review of how to improve the current system of detention which resulted in the announcement of several major reforms to ICE's detention system. These reforms are intended to address the vast majority of complaints about the current immigration and detention system, while allowing ICE to maintain a significant, robust detention capacity to carry out serious immigration enforcement. ICE is committed to taking the steps that will lead the agency away from the present decentralized, jail-oriented approach to a system wholly designed for and based on ICE's needs.

Steps will include housing detainees in a set of facilities designed, located and operated for immigration detention purposes and increasingly relying on ICE employees instead of contractors for more of the core operational decisions and no longer relying primarily on

excess capacity in penal institutions. These reforms will bring improved custodial conditions, ICE oversight, medical care, and fiscal prudence.

In FY 2010, through the newly created Office of Detention Policy and Planning (ODPP), ICE has initiated the following Detention Reform activities:

- Revision of immigration detention standards to reflect the conditions appropriate for various immigration detainee populations while keeping costs neutral.
- Systematic review of high cost detention space to maximize the use of less expensive detention resources, and encourage the private sector to develop innovative and less expensive civil detention facilities.
- Improving detention by reviewing contracts for all detention facilities to identify opportunities to centralize all detention contracts managed by field offices. ICE plans to achieve a cost savings via centralized procurement management and its work with the Office of the Federal Detention Trustee (referenced below).
- ICE is refining a risk assessment instrument that will improve custody decisions and ensure bed space is being used prudently.
- Development of medical care risk assessment system to assist in the appropriate placement of detainees with medical and mental health issue to avoid unnecessary and costly transfers.
- ICE is developing a program to utilize federal employees as detention services monitors. By federalizing this function and developing a corps of specialized detention experts, ICE will reduce its dependency on private sector resources and eliminate its contract costs by an estimated \$13M annually.

### **ICE & Office of the Federal Detention Trustee Collaboration**

In FY 2010, ICE has begun to collaborate closely with the Office of the Federal Detention Trustee (OFDT) on a number of joint actions aimed at improving the efficiency and cost effectiveness of ICE's detention program in FY 2011.

Specifically under consideration are:

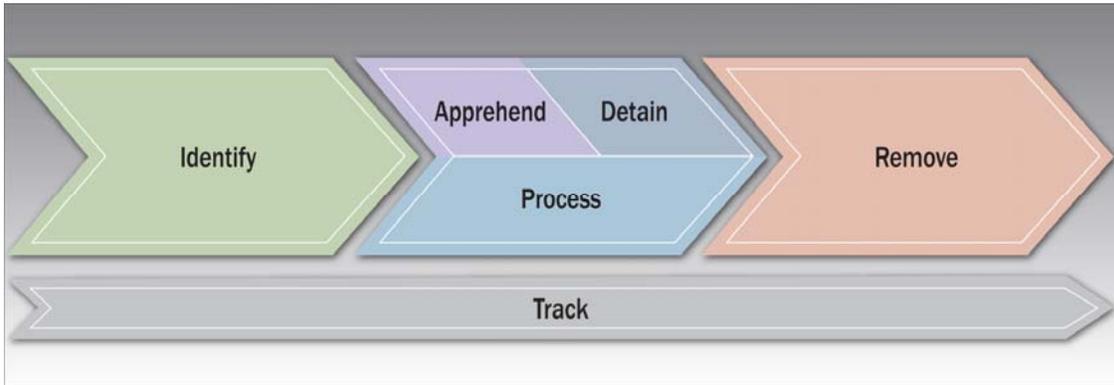

- The establishment of common Federal per diem rates to leverage Federal buying power in an effort to reduce ICE's daily bed costs;
- The sharing and cross utilization of ICE, OFDT, and U.S. Marshal Service facility inspections to ensure consistent conditions of confinement and reduce ICE's inspection costs; and
- Joint population projections and capacity planning to optimize the size, type, location, utilization and acquisition of Federal detention space.

### **Reducing the Average Length of Stay (ALOS) in FY 2011**

In FY 2011, ICE is projecting that 80 percent of the ICE-detained population will be comprised of criminal aliens encountered through ICE's criminal and fugitive alien efforts. The remaining 20 percent will be primarily made up of aliens apprehended by U.S. Customs and Border Protection.

In FY 2010, ICE launched two initiatives with the objective of reducing the ALOS for the detained population to a target of 28 days in FY 2011 from 33.6 days in FY 2010 (as of 12/28/09). The reduction in ALOS will allow ICE to increase the number of aliens it can detain to potentially 430,000 in FY 2011 while utilizing the same number of beds. In FY 2009, ICE detained over 380,000 aliens.

There are six phases in the criminal alien enforcement lifecycle. They are as follows:

Phase	Description
<b>Identify</b>	This phase consists of the processes that allow ICE to use automated biometric queries to identify, classify, and prioritize criminal aliens.
<b>Apprehend</b>	This phase consists of the processes ICE uses to arrest or otherwise take custody of criminal aliens for detention and, if judged removable, removal from the country.
<b>Detain</b>	This phase consists of the processes required to detain a criminal alien once in ICE custody.
<b>Process</b>	This phase consists of the due process legally required to authorize the removal of a criminal alien from the United States.
<b>Remove</b>	This phase consists of all the processes required to affect the removal of a criminal alien from the United States, once the individual is judged or otherwise determined to be removable.
<b>Track</b>	Track is a supporting information process that continues throughout all phases of the Criminal Alien Enforcement Lifecycle. Each step of the alien's progress is carefully tracked and recorded, from identification through removal.

In FY 2011, ICE will continue to focus on reducing the amount of time a criminal alien spends in the "Process" phase of the criminal alien enforcement lifecycle. On average, a detained alien whose case appears before an immigration judge can spend approximately 41 days in custody whereas a detained alien not requiring a hearing will spend 16 days. ICE is working with the Executive Office of Immigration Review (EOIR) to reduce this amount of time by reducing the number immigration hearing continuances and the length

between them. As the current ALOS data suggests, ICE has identified a higher percentage of detained aliens who are processed through a more expedited removal processes – e.g. stipulated removals. In July of 2009, the Department of Justice and the Department of Homeland Security identified a number of policy and procedural impediments which contributed to increasing the length of the hearing process. One impediment discussed was the inconsistent application or acceptance of the stipulated removal process. Both DHS and DOJ have agreed to commission an intra-agency workgroup which will begin in 2nd quarter of FY 2010 to resolve the issues which will allow all eligible detained aliens to request stipulated removal orders.

The next area ICE will focus on is in the “Removal” phase of the criminal alien enforcement lifecycle. A detained alien spends approximately 10 – 14 days in the “Removal” phase of the lifecycle. Because of various country requirements and interagency procedures, a detained alien cannot immediately be removed from the United States as soon as a removal order is final. Beginning in FY 2010, working with DOS and ICE OIA, ICE will seek to reduce or even eliminate country notification timeline requirements. If DOS and ICE are successful in making changes to existing requirements, ICE would still notify the receiving and transiting countries of removal efforts, but removal would not be contingent upon receipt of acceptance from the countries involved.

#### Bed Cost Realignment

Several different ICE PPAs have funded detention bed procurement in the past. For FY 2011, ICE is proposing to fund all detention beds from the Custody Operations PPA, providing better transparency into the cost of detention bed procurement. The usage by detainee type can still be tracked but bringing all funding for bedspace under one PPA eliminates the need for artificial division of funding as bedspace is procured by facility rather than source of detainee.

#### Key Accomplishments

In FY 2009, Custody Operations began taking the steps toward reforming the immigration detention system and implementing initiatives to achieve greater program efficiency. Among the steps accomplished, DRO:

- Created the Office of Detention Policy and Planning (ODPP) to improve the design and long-term oversight of the detention system, to ensure more uniform conditions of confinement and medical care and to design and create a civil detention system tailored to the needs of ICE;
- Discontinued use of family detention at the T. Don Hutto Family Residential Facility in Texas;
- Hired an expert in healthcare administration and a medical expert to provide an independent review of medical complaints and denials of requests for medical services;

- Recruited 23 ICE detention managers to work in DRO, supporting the Field Office Directors and stationed at 23 significant facilities, to substantially increase direct federal oversight.
- Established an Office of Detention Oversight (ODO) within the Office of Professional Responsibility (OPR), replacing and expanding upon the current Detention Field Inspection Group; and
- Formed two advisory groups of local and national organizations interested in ICE's detention system. These groups will provide feedback and input to the Assistant Secretary. One will focus on general policies and practices, while the other will focus on detainee health care.

In addition, in FY 2009, DRO achieved greater efficiencies and program improvements, including the following:

- Continued its support of the Secure Communities/Comprehensive Plan to Remove Criminal Aliens (SC/CIRCA);
- Continued development and refinement of a customized bed space forecast model based upon transportation routes, arrest forecasts, and historical length of detention data and case type;
- Continued the development and refinement of the Bed Space Tracking and Transportation (BST&T) system to increase the process efficiency of locating available beds and transporting detainees;
- Entered into a new annual detention compliance inspection contract with MGT. MGT replaced the former Creative Corrections contract that was in place during FY 2008 to conduct annual reviews of detention facilities housing ICE detainees and assist with program management, inspection schedules, reports.
- Entered into a new contract with the Nakamoto Group for on-site detention standards compliance. The Nakamoto Group provides on-site compliance verification for detention facilities housing ICE detainees, including an automated reporting function to allow DRO to monitor the current compliance status of any particular facility.
- Continued the design and deployment of the eBONDS System. In FY 2009, BMU continued working closely with the ICE Office of the Chief Information Officer (OCIO) and the Office of Acquisition Management (OAQ) to aggressively pursue the design, build, and deployment of the eBONDS Project. The BMU held Registration Authority Training where a member from each field office was granted registration authority, thus allowing them to grant access to other personnel in their respective field office to use digital signature pads to complete eBonds transactions. Signature pads have been distributed to each field office in anticipation of the deployment of eBonds. The eBONDS application supports the DHS bond management process and the Bond Management Information System. The basic function of eBONDS is to:
  - Reduce data entry costs by enabling customers to begin the bond process by providing the capability for surety companies to complete the I-352 Immigration Bond form using web-based technology;
  - Provide the capability to analyze and report on bond metrics associated

with bond management and reduce the time spent on manually fulfilling report requests from field users; and

- Develop a workflow dashboard for surety companies to view the status of active and historical bond processing.
- Provide the ability to enroll and update user information (names, roles, permissions, and associated digital signatures) for use by a third party surety, surety contact information, including managing agent, tax identification number, address, and telephone number, and generate a PDF bond form documentation package, complete with a power of attorney form, I-352, and digital signature capability.

In FY 2010, Custody Operations will continue efforts towards improving the quality and care for detainees, increasing program efficiencies, and addressing congressional priorities as follows:

- Continue to support Secure Communities initiatives to identify and remove all criminal aliens amenable to removal in jails and prisons throughout the United States. Secure Communities risk-based application of resources will continue to inform the use of enforcement activities as well as detention space.
- Continue the refinement of the bed space forecast model and Bed Space Tracking and Transportation system;
- Implement an electronic policy management system to centralize publication of policies, facilitate development and modification of new policies, and allow collaboration across DRO and with other ICE programs;
- Continue to support state and local jurisdictions through the provision of detention space for detainees arrested by municipal law enforcement jurisdictions and brought to DRO custody; and
- Sustain American Correctional Association (ACA) accreditation for all DRO-operated facilities.
- Deploy the eBONDS initiative;

In FY 2011, Custody Operations aims to build on prior successes to:

- Continue to support any additional bed space requirements generated by Secure Communities; as ICE's focus on criminal alien identification and removal intensifies, work to ensure current resources can strategically be focused on those efforts;
- Continue the refinement of the bed space forecast model;
- Continue the refinement of the BST&T system;
- Custody Operations will continue efforts towards improving the quality and care for detainees while increasing program efficiencies.
- Continue to support state and local jurisdictions through the provision of detention space for detainees arrested by municipal law enforcement jurisdictions and brought to DRO custody;
- Continue its detention inspection program; and

- Sustain American Correctional Association (ACA) accreditation for all DRO-operated facilities.

<b>2011 Current Services</b>	<b>677</b>	<b>677</b>	<b>168,449</b>
<b>2011 Total Request</b>	<b>677</b>	<b>677</b>	<b>168,449</b>
Total Change 2010 to 2011	-	-	(61,233)

U.S. Immigration and Customs Enforcement requests \$168.5 million for this activity. In order to consolidate ICE's overall cost of beds to allow a clearer depiction of actual costs being incurred, ICE is proposing for FY 2011 that bed costs currently in the base funding for Fugitive Operations, Criminal Alien Program (CAP), and Secure Communities/CIRCA be permanently reprogrammed under Custody Operations, which manages all bed-related activities for ICE. This zero-sum reprogramming between ICE programs results in a \$61.2 million decrease to Fugitive Operations. In FY 2011, this PPA is estimated to pay \$20.9 million in servicewide costs (e.g., rent, working capital fund).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The National Fugitive Operations Program (NFOP) is responsible for reducing the fugitive alien population in the United States. At the end of FY 2008, there were an estimated 557,761 fugitive aliens at large in the United States, according to the DRO Deportable Alien Control System (DACS). As of August 24, 2009, there were 540,505 fugitive aliens-at-large. ICE works to reduce the fugitive alien population by using Fugitive Operations Teams (FOTs), which consist of:

- One Supervisory Detention and Deportation Officer (SDDO);
- Four Deportation Officers (DOs);
- One Immigration Enforcement Agent (IEA); and
- One Deportation and Removal Assistant (DRA).

DRO created the Fugitive Operation Support Center (FOSC) to enhance the efficiency and effectiveness of the NFOP. The FOSC reviews and updates ICE fugitive alien cases in the Enforce Alien Removal Module (EARM), provides comprehensive leads to the FOTs, closes cases as appropriate, and facilitates the overall efforts to arrest fugitives.

As a component of the NFOP, the goal established for the FOSC is to eliminate 26,000 cases from the fugitive population each fiscal year.

The FOSC conducts analysis, screening, background checks, and related support activities for the vetting of ICE fugitive aliens. The FOSC then reconciles data from external government and private sources. A significant number of cases are closed as a result of data analysis performed at the FOSC, resulting in more focused FOT operations. After analyzing, vetting, and compiling data, actionable information is disseminated to FOTs.

Fugitive Operations also supported the overall ICE goal to identify and remove criminal aliens as outlined below.

### **Key Accomplishments**

In FY 2009, Fugitive Operations had the following successes:

- Of the ICE fugitives arrested in FY 2009, as of August 24, 11,289 were criminal aliens. Of the non-fugitive arrests, 4,655 were criminal aliens. In FY 2008, these figures were 5,652 criminal fugitives and 2,267 non-fugitive criminals.
- ICE increased the total number of arrests made by ICE Fugitive Operations teams by eight percent as compared to the same period in FY 2008.
- ICE reduced the fugitive case backlog. As of August 24, 2009, ICE's fugitive case backlog was 540,505 fugitive aliens, which are 17,256 fewer fugitives than the backlog recorded on October 1, 2008.
- All of the 104 funded Fugitive Operations Teams (FOTs) are operational and conducting enforcement activities across the United States. Presently, each of the 24 DRO Field Offices has at least one operational FOT.
- As of August 24, 2009, 23,653 fugitive aliens have been arrested and another 7,786 non-fugitive aliens have been arrested.
- As of August 24, 2009, the FOSC resolved 55,416 fugitive cases, assisting in the reduction of the fugitive backlog.

In FY 2010 and FY 2011:

- Fugitive Operations will continue to conduct targeted fugitive alien operations to reduce the fugitive alien backlog as directed by Congress. Fugitive alien enforcement operations conducted by 104 FOTs will primarily target criminal aliens and those found to be a threat to community safety or national security;
- Through the use of technology and partnerships with law enforcement agencies, the FOSC will continue to enhance procedures to process and analyze EARM fugitive data;
- The FOSC Resolution Unit will continue to develop and augment procedures in an effort to analyze the nature and characteristics of the fugitive alien population. This effort will aid in reducing the reported number of fugitives by reconciling the

records of those fugitive aliens who have left the country, adjusted their status, immigrated, or were discovered to be incarcerated;

- As ICE's focus on criminal alien identification and removal intensifies, work to ensure NFOP can support the Secure Communities Program's targeting criminal aliens and fugitives; and
- The FOOSC Leads Unit will continue to enhance and incorporate technologies such as the analysis of government and commercial databases to prepare leads on fugitive aliens for transmission to the field.

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Salaries and Expenses**  
**DRO - Criminal Alien Program**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: DRO - Criminal Alien Program**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>1,127</b>	<b>1,068</b>	<b>188,286</b>
<b>2010 Enacted</b>	<b>935</b>	<b>932</b>	<b>192,539</b>
2011 Adjustments-to-Base	10	10	(13,222)
<b>2011 Current Services</b>	<b>945</b>	<b>942</b>	<b>179,317</b>
<b>2011 Total Request</b>	<b>945</b>	<b>942</b>	<b>179,317</b>
Total Change 2010 to 2011	10	10	(13,222)

U.S. Immigration and Customs Enforcement requests \$179.3 million for this activity. In order to consolidate ICE's overall cost of beds to allow a clearer depiction of actual costs being incurred, ICE is proposing for FY 2011 that bed costs currently in the base funding for Fugitive Operations, Criminal Alien Program (CAP), and Secure Communities/CIRCA be permanently reprogrammed under Custody Operations, which manages all bed-related activities for ICE. This zero-sum reprogramming between ICE programs results in a \$15.3 million decrease to CAP. In addition, in order to assure that personnel are appropriately being charged to the program under which they function, ICE is at the same proposing to move funding for a total of 79 positions currently in Custody Operations base to the programs where these positions are performing the bulk of their work; through this zero-sum reprogramming within DRO programs, CAP receives funding for 10 positions, resulting in an increase to CAP of \$2.1 million. Net change of these two actions is a \$13.2 million decrease to CAP. In FY 2011, this PPA is estimated to pay \$38.9 million in servicewide costs (e.g., rent, working capital fund).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Criminal Alien Program (CAP) conducts ICE-wide operations to identify and arrest criminal aliens who are incarcerated within federal, state, and local prisons and jails. ICE ensures that all efforts are made to arrest and remove these individuals from the community by securing a final order of removal prior to the termination of their period of imprisonment. The identification and processing of incarcerated criminal aliens, prior to release from jails and prisons, decreases or eliminates the time spent in ICE custody, reducing the overall cost to the U.S. Government. Additionally, integral to the effective execution of this program is the aggressive prosecution of criminal offenders identified by DRO officers.

DRO, in conjunction with the United States Attorney's office, actively pursues criminal prosecutions when offenses of the nation's criminal code and immigration laws are discovered. This further ensures public safety and provides a significant deterrent to recidivism. ICE has also continued deployment of Video Teleconference (VTC) systems to CAP programs throughout the country. These tools further the effectiveness of the Criminal Alien Program.

A CAP team is composed of:

- One Supervisory Deportation Officer;
- One Deportation Officer;
- Six Immigration Enforcement Agents; and
- Two Deportation Assistants.

Throughout the United States, state and local correctional departments provide ICE with inmate rosters maintained through independent data systems. ICE works with state and local governments to analyze their data and verify prisoners' identities against ICE immigration databases.

In FY 2008, ICE received funding for an additional 30 CAP teams – for a total of 119. Secure Communities funding added seven additional teams in FY 2009 for a new total of 126. ICE is supported through the Secure Communities Initiative to implement interoperability with the law enforcement agencies in order to match biographical data against ICE databases that will help assist in the identification of criminal aliens more efficiently and effectively in federal, state and local facilities. CAP has expanded its enforcement activities with the Joint Criminal Alien Taskforce (JCART), Violent Criminal Alien Section (VCAS), and the Phoenix Law Enforcement Area Response (LEAR).

## **Key Accomplishments**

In FY 2009, CAP:

- Encountered, through interviews or screenings, over 771,000 people and issued over 204,000 charging documents;
- Presented 11,144 cases to the U.S. Attorney's office for criminal prosecution and, of those, 7,256 cases were accepted;
- Strategically allocated 336 Secure Communities-funded positions to enhance existing JCART, VCAS, and CAP nationwide based on the risk-based assessment;
- Deployed 57 VTC units, including three Bureau of Prison sites.
- Assisted in the deployment and expansion of Interoperability under the Secure Communities plan. As an operational partner of Secure Communities, CAP provides the required manpower to ensure successful operation of Interoperability.

In FY 2010, CAP will:

- Strategically allocate 80 additional Secure Communities funded positions nationwide;
- Continue the deployment of VTC systems to CAP programs throughout the country;
- Work to increase the level of screening nationally to achieve 100 percent in all identified facilities. This will enhance the mission of pursuing a final order of removal prior to the termination of a person's sentence. Upon completion of criminal sentences, aliens are transferred into ICE custody to remove them from the United States; and
- Increase the number of criminal prosecutions presented to the U.S. Attorney's office.

In FY 2011, ICE will:

- Continue to increase efforts to identify, screen and interview criminal aliens incarcerated in federal, state, and local facilities, and the additional personnel will help to ensure that these criminals are not released into the community while preparing for immigration proceedings;
- Continue to increase the number of criminal prosecutions of violent recidivist criminal aliens;
- Continue to further the advancement of the Secure Communities plan within the law enforcement community across the United States;
- Ensure current resources are strategically focused on criminal alien identification and removal as well as specific SC/CIRCA appropriations; and
- Develop new advancements and best practices to ensure full screenings of institutional facilities; and
- Utilize three Interoperability Response Centers (IRCs) to assist with the deployment of Interoperability throughout the country. CAP special programs will strategically allocate 60 Secure Communities funded contractors between the three IRCs.

<b>2011 Total Request</b>	<b>181</b>	<b>182</b>	<b>72,075</b>
Total Change 2010 to 2011	10	10	2,162

U.S. Immigration and Customs Enforcement requests \$72.1 million for this activity. In order to assure that personnel are being appropriately being charged to the program under which they function, ICE is proposing to move funding for a total of 79 positions currently in Custody Operations base to the programs where these positions are performing the bulk of their work; through this zero-sum reprogramming within DRO programs, Alternatives to Detention receives funding for 10 positions, resulting in an increase to ATD of \$2.2 million. In FY 2011, this PPA is estimated to pay \$5.5 million in servicewide costs (e.g., rent, working capital fund).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

National security and public safety are ICE’s first priorities. To that end, ICE detains all aliens who pose a threat to community safety or national security, as well as those ICE is required to detain under U.S. immigration law. The Alternatives to Detention (ATD) Program enables ICE to remove people from detention who, if monitored on ATD, will appear for hearings and removal. ATD is comprised of two primary programs: the Intensive Supervision Appearance Program (ISAP) and the Enhanced Supervision/Reporting (ESR) Program.

Intensive Supervision Appearance Program

The ISAP program provides community-based supervision services for aliens while in the removal process. The program employs case specialists who closely supervise the enrolled aliens, utilizing a variety of tools to ensure successful completion of the program. ISAP relies on electronic monitoring devices (e.g., telephonic reporting, radio

frequency and global positioning satellite monitoring), unannounced home visits, and required office visits. In addition, the contractor assists the enrollees in obtaining travel document information and utilizes community-based organizations to provide services such as housing, health, and employment services for those participants authorized to work.

ISAP provides services in 12 locations: Baltimore, MD; Delray Beach, FL; Denver, CO; Kansas City, MO; Los Angeles, CA; Miami, FL; New York, NY; Orlando, FL; Philadelphia, PA; Portland, OR; St. Paul, MN; and San Francisco, CA.

ISAP currently has a maximum participant limit of 6,000 aliens, and 5,900 are currently participating in the program. Since its inception, ISAP has served over 13,500 participants. ISAP currently reports an overall compliance rate with administrative removal orders of 91 percent.

### Enhance Supervision/Reporting Program

The ESR is similar to ISAP in that supervision specialists closely supervise aliens utilizing electronic monitoring, residence verification, home visits, in-person reporting, and travel document information collection. ESR is distinct from ISAP in that it requires fewer home visits, in-person reporting<sup>1</sup>, and does not incorporate community-based organizations referral requirements. The contractor also provides support during large-scale operations. The Electronic Monitoring (EM) component requires the officers in the field to enroll the alien participant into the program and to respond to violation notifications. EM technologies available for use are telephonic reporting, radio frequency and global positioning satellite (GPS) monitoring.

ESR provides services within all 24 DRO Field Offices and three Sub-Offices (Charlotte, NC; Hartford, CT; and Orlando, FL). The current maximum participant limit for ESR is 7,000 and there are currently over 6,200 active participants enrolled. EM has no participant limit and is available nationwide. The ESR program currently reports an overall compliance rate with administrative removal orders of 65 percent.

### **Key Accomplishments**

In FY 2009, ICE:

- Solicited a new contract<sup>2</sup>, which was awarded in August 2009. However, a protest was filed and is currently with the Government Accountability Office (GAO) for decision. The current ESR and ISAP contracts will continue pending the outcome

---

<sup>1</sup> The frequency of In-Person Office and Unannounced Home Visits range from two times per month to one time every other month.

<sup>2</sup> The contract will be awarded through the means of “full and open” competition as required by the Competition in Contracting Act (CICA), which was enacted as Title VII of the Deficit Reduction Act of 1984, Public Law 98-369.

of the protest. The new contract is similar to the current ISAP contract and will allow for phased openings of ISAP programs nationwide as funding permits. The expansion of ATD services will continue into FY 2010 as stipulated in the contract to achieve coverage of all field and main sub-offices as funding permits during that year. The goal of this expansion is the successful transition of all current ESR, EM, and ISAP participant population to the new contract;

In FY 2010, ATD will:

- Conduct a feasibility study to implement “kiosk-type” technology nationwide. This initiative would assist the field office with the enormous task of supervising non-removable aliens who do not pose a risk to the community, by reducing face-to-face meetings with aliens to potentially realign many man-hours to perform in other critical DRO mission areas; and
- Continue with the staggered opening of ISAP program nationwide with the goal of increasing coverage of ATD services to up to 82 new locations and increase the participant capacity up to 24,000.

In FY 2011, ATD will:

- Continue with the phased opening of ISAP program to new offices and increase participant capacity; and
- Review feasibility of “kiosk-type” technology and secure funding study the potential costs and benefits of for entering into a contract for nationwide implementation if appropriate.

<b>2011 Current Services</b>	<b>59</b>	<b>59</b>	<b>294,632</b>
<b>2011 Total Request</b>	<b>59</b>	<b>59</b>	<b>294,632</b>
Total Change 2010 to 2011	59	59	12,754

U.S. Immigration and Customs Enforcement requests \$294.6 million for this activity. In order to assure that personnel are being appropriately being charged to the program under which they function, ICE is proposing to move funding for a total of 79 positions currently in Custody Operations base to the programs where these positions are performing the bulk of their work; through this zero-sum reprogramming within DRO programs, the Transportation and Removal Program receives funding for 59 positions, resulting in an increase to TRP of \$12.8 million. In FY 2011, this PPA is estimated to pay no servicewide costs (e.g., rent, working capital fund).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Appropriations to the Transportation and Removal Program fund safe and secure transportation of aliens in ICE custody and removals of aliens from the United States, as ordered by an immigration judge.

**The Removal Management Division (RMD)** is comprised of the Case Management Unit, Flight Operations Unit, and the Removals Coordination Unit. RMD provides oversight through its three component units, to all 24 Field Offices. RMD conducts air transportation and removal planning, and develops and implements strategies to support the removal of all removable aliens. RMD oversees and supports Field Office Directors' execution of air transportation and removal funding. RMD, through these units, ensures the Transportation and Removal Program funds are efficiently and effectively used.

**Case Management Unit (CMU)** - The CMU provides nationwide guidance and oversight relating to aspects of case management of detained aliens who have received a final order of removal. This includes oversight of the Post Order Custody Review

(POCR) process, deferred action, conducting field office site visits and training, monitoring monthly custody reports and the Weekly Inventory List of Detained Cases (WILDC). CMU also supports field offices and overseas entities on travel document and removal issues to ensure the safe and orderly removal of persons from the United States. CMU has oversight of the electronic Travel Document System (eTD) and conducts liaison with governmental and non-governmental organizations, over 200 embassies and consulates within the United States, foreign governments, and law enforcement organizations world wide.

**The Removal Coordination Unit (RCU)** manages commercial airline removals (Centralized Ticketing, CENTIX) and the Detention Operations Coordination Center (DOCC). RCU facilitates:

- Commercial escorted and unescorted removal operations in coordination with DRO Field Offices and Omega Travel Management Center. Services include requesting country clearances via the electronic Country Clearance system (eCC) and sending removal notifications via a secure messaging system (cable), both of which interface with the Department of State.
- The DOCC ensures capacity equilibrium among detention locations. The DOCC identifies available space to meet field office requirements and coordinates available transportation options. The DOCC also provides detention and transportation support for ICE Enforcement Operations.

The **Flight Operations Unit (FOU)** manages all DRO mass airlift operations through a combination of ICE-chartered aircraft and a partnership with the Justice Prisoner and Alien Transportation System (JPATS). In conducting its mission of transporting aliens with a removal order, the FOU oversees domestic and foreign scheduling of all DRO-managed aircraft based on the operational requirements of the 24 field offices along with coordination with each respective receiving country and ICE Attaché office. The FOU also coordinates the procurement of ICE charters involved with the removal of aliens to Central Asia, the Pacific Rim, Africa, and the Middle East.

## **Key Accomplishments**

In FY 2009:

- DRO continued to engage other government agencies and embassies to accelerate travel documents issuance for aliens pending removal from the United States. DRO continued to develop and expand the eTD system and encouraged other foreign governments to use the system; FOU operated seven charters outside of the Americas returning 495 alien passengers to Albania, Cambodia, Egypt, Indonesia, Jordan, Morocco, Nigeria, Pakistan, the Philippines, Palestinian Authority, and Liberia while also supporting the policies of “catch and return” and increased interior enforcement operations. FOU moved nearly 200,000

aliens, domestic and foreign; by increasing the number of ICE chartered aircraft and simultaneously augmenting JPATS aircraft.

- In FY 2009, RCU coordinated and effected the commercial removal of 21,163 aliens. In addition, RMD moved 220,083 aliens through ICE managed aircraft during FY2009. By comparison, ICE movements for all of FY 2008 totaled 67,219.
- RCU continued to expand the use and success of the Pennsylvania Transportation Hub (PATH) program to transport a total of 16,529 aliens.
- CMU implemented case management efficiencies such as weekly and monthly reporting requirements, and expanded field office site visits to ensure field office compliance with regulations and procedures. CMU successfully developed and ensured successful implementation of the November 2007 policy titled Parole of Aliens Found to have a 'Credible Fear' of Persecution or Torture.

In FY 2010, DRO will:

- Increase removals 1% over the same time period in FY09 to meet the FY10 goal of 391,677 removals (including Voluntary Returns);
- Increase the overall number of FOU transported passengers by 1% over the same time period in FY09 to meet the FY10 goal of 230,116;
- Deploy the Electronic Travel Document (eTD) program to one additional country by the end of FY10;
- Employ four ICE charter aircraft operating six days per week to support foreign removals;
- Use the ICE chartered aircraft as a long-range platform capable of supporting special removal missions to South America, Eastern Europe, Africa, Middle East and Pacific Rim;
- Use JPATS contract aircraft to support shorter-range domestic movements with four airplanes—two each located in Alexandria, Louisiana and Phoenix, Arizona; and
- Place Immigration Enforcement Agents and Division of Immigration Health Services medical personnel on all DRO-managed aircraft, both foreign and domestic.

In FY 2011, DRO will:

- Continue to expand CMU activities; and
- Develop a strategic air plan for DRO flight operations based on a mission needs statement, operational requirements document, concept of operations plan, and an acquisition strategy that supports increased enforcement activity, decreased detention time, and increased removal operations to suit FY 2011 needs.
- DRO anticipates coordinating the movement of over 240,000 aliens through the use of eight large and one medium sized aircraft in FY 2011. Accordingly, DRO plans to log 13,000 flight hours or more.

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Salaries and Expenses**  
**Comprehensive Identification and Removal of Criminal Aliens**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: Comprehensive Identification and Removal of Criminal Aliens**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>545</b>	<b>276</b>	<b>273,839</b>
<b>2010 Enacted</b>	<b>552</b>	<b>512</b>	<b>200,000</b>
2011 Adjustments-to-Base	-	40	(53,057)
<b>2011 Current Services</b>	<b>552</b>	<b>552</b>	<b>146,943</b>
<b>2011 Total Request</b>	<b>552</b>	<b>552</b>	<b>146,943</b>
Total Change 2010 to 2011	-	40	(53,057)

U.S. Immigration and Customs Enforcement requests \$146.9 million for this activity. This is a \$53.1 million decrease from the FY 2010 enacted level, which is for annualization of prior year funding, pay inflation, and management and technology efficiencies. In FY 2011, this PPA is estimated to pay \$11.0 million in servicewide costs (e.g., rent, working capital fund).

In order to consolidate ICE's overall cost of beds to allow a clearer depiction of actual costs being incurred, ICE is proposing for FY 2011 that bed costs currently in the base funding for Fugitive Operations, Criminal Alien Program (CAP), and Secure Communities/CIRCA be permanently reprogrammed under Custody Operations, which manages all bed-related activities for ICE. This zero-sum reprogramming between ICE programs results in a \$53.1 million decrease to Secure Communities.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

In FY 2008, Congress appropriated \$200 million to “improve and modernize efforts to identify aliens convicted of a crime, sentenced to imprisonment, and who may be deportable, and remove them from the United States once they are judged deportable.” In FY 2009, Congress appropriated an additional \$150 million for SC/CIRCA to continue meeting the program’s goals. Congress further required ICE to utilize an additional \$850 million of existing programs’ resources “to identify aliens convicted of a crime, and who may be deportable, and to remove them from the United States once they are judged deportable.”

ICE continues to work to achieve the three SC/CIRCA strategic goals:

- Identify criminal aliens through modernized information sharing;
- Prioritize enforcement actions to ensure apprehension and removal of dangerous criminal aliens; and

- Transform criminal alien enforcement processes and systems to achieve lasting results.

In FY 2010, ICE will continue to integrate and harmonize all of its efforts to identify, prosecute and remove criminal aliens across its program offices. Secure Communities has promoted key enforcement initiatives that have led to record levels of criminal alien removals. Specifically, through Secure Communities oversight, DRO's Fugitive Operations program and CAP, and OI's LESC, ICE aims to reduce the population of criminal aliens in the United States. These efforts are successful, but in FY 2010 ICE will work to make them even more successful and efficient. One way may be to integrate the Secure Communities into the DRO program. This shift would ensure the programs' efforts are centralized and streamlined. With SC linked more directly to DRO operations, ICE will be able to apply a risk-based approach consistently across all funding sources. This will further the ICE goal of identifying and removing criminal aliens and strengthening the overall effort to do so.

### **Key Accomplishments**

In FY 2009, ICE exceeded congressional requirements by obligating an estimated \$1.681 billion toward criminal alien enforcement, including \$275 million in SC/CIRCA appropriations. Expanded ICE criminal alien enforcement operations achieved the following results in FY 2009:

- Identified and issued charging documents on approximately 230,250 criminal aliens, representing nearly a four percent increase over FY 2008;
- Removed approximately 135,880 criminal aliens, representing nearly a 19 percent increase over FY 2008;
- Reduced criminal alien detention times by nine percent compared to FY 2008, to approximately 42 days;
- Collaborated with U.S. Attorneys to initiate prosecutions against approximately 6,200 violent, recidivist criminal aliens for felony violations of U.S. immigration law;
- Continued outreach to the national law enforcement community to communicate SC/CIRCA goals and objectives and strengthen information sharing partnerships for identifying and removing criminal aliens;
- Completed the hiring of an additional 59 personnel that serve on CAP teams to expand ICE screening for criminal aliens to additional local jails and prisons;
- Expanded ICE's operational capacity for completing threat assessments and alien status determinations on suspected criminal aliens by hiring 82 additional LESC personnel and by improving IT systems supporting criminal alien identifications;
- Piloted methods to identify and apprehend at-large criminal aliens, whether fugitives or not, based upon threat to the community by hiring 22 enforcement agents;

- Aggressively prosecuted over 5,180 violent, recidivist criminal aliens in coordination with U.S. Attorney offices, thus deterring removed criminal aliens from re-entering the country;
- Increased ICE's capacity to process greater numbers of criminal alien removal cases by hiring 173 removal case management personnel;
- Initiated development of systems to track the exact location of criminal aliens from the time they enter ICE custody until the time they are removed from the United States, improving officer safety and intelligence gathering efforts on detainees among other benefits;
- Funded 1,246 detention beds and costs of removing criminal aliens taken into ICE custody;
- Deployed biometric identification capability (integration of DOJ and DHS biometric databases) to 88 jurisdictions in nine States and covering approximately 31 percent of the estimated nationwide number of the foreign born non citizen population;
- Processed over 825,000 fingerprints submitted through interoperability; 100,328 of these have resulted in an IDENT match, of which 9,486 identified criminal aliens charged with or convicted of Level 1 offenses and 86,111 of which identified Level 2 and 3 offenses (see table that follows); and
- Removed 2,105 criminal aliens charged with or convicted of Level 1 offenses and identified through interoperability (see table that follows).

In FY 2010, ICE plans to use current ICE resources, prior year carry-forward balances of SC/CIRCA appropriations, and the President's budget request, to:

- Continue moving toward nationwide identification, apprehension and removal of all Level 1 (those convicted of violent felonies and major drug crimes) criminal aliens in accordance with the SC/CIRCA strategic plan, program goals and program objectives by extending criminal alien biometric identification capabilities to over 180 jurisdictions, covering approximately 84 percent of the estimated nationwide number of the alien population;
- Identify approximately 20,000 Level 1 IDENT matches;
- Process approximately 4,000 Level 1 removals due to IDENT matches (removal of Level 1 criminal aliens is expected to significantly lag identification due to extended incarceration sentences that many must serve prior to their removal);
- Continue submitting a greater number of violent criminal aliens who repeatedly enter the United States illegally to U.S. Attorneys for aggressive prosecution under felony immigration charges; and
- Work with other ICE programs to determine how existing activities and capacity can better support SC/CIRCA goals.

In FY 2011, ICE plans to use current ICE resources, prior year carry-forward balances of SC/CIRCA appropriations, and the President's FY 2011 request to incorporate SC/CIRCA's risk-based application of resources ICE-wide, including:

- Continue FY 2010 progress toward nationwide identification, apprehension and removal of all Level 1 (those convicted of violent felonies and major drug crimes) criminal aliens by operating criminal alien biometric identification capabilities in over 897 additional jurisdictions (1175 cumulative) covering approximately 96 percent of the estimated nationwide number of the foreign born non citizen population;
- Identify approximately 20,000 Level 1 IDENT matches;
- Detain and remove all criminal aliens who are subject to the mandatory detention provisions of the Immigration and Nationality Act (INA) by prioritizing use of finite enforcement resources over approximately 200,000 lower priority aliens encountered by CAP, 287(g), CBP, and USCIS; and
- Continue submitting violent criminal aliens who repeatedly enter the United States illegally to U.S. Attorneys for aggressive prosecution under felony immigration charges.

SC/CIRCA, in cooperation with Federal, State and local law enforcement agencies, will provide a safeguard to American communities by removing those criminal aliens from the United States that represent the greatest threats to community safety and by deterring their re-entry through aggressive prosecution of recidivists.

### 2009 Interoperability Statistics
