**PPA Mission Statement**

Presidential Candidate Nominee Protection - Ensure the safety and security of Presidential and Vice Presidential candidates, nominees and spouses.

Protection resources directly support the DHS strategic goal to protect critical infrastructure, which includes candidates seeking our nation's highest offices. The Service ensures protectees' physical protection at all times. Protection includes all activities related to identifying threats, mitigating vulnerabilities and creating secure environments wherever protectees work, reside and travel. The requested amount addresses strategic challenges which include terrorists' sustained motivation to attack U.S. interests (including its leaders), and the increasing technological sophistication of the threat environment.

**PPA Mission Statement**

Domestic Field Operations - Investigate violations of laws relating to counterfeiting of obligations and securities of the United States; investigate financial crimes that include, but are not limited to, financial institution fraud, identity theft, access device fraud, and money laundering.

Domestic field office resources directly support the DHS strategic goal to protect critical infrastructure, which includes protecting our nation's currency and financial systems within our borders. The requested amount funds field offices nationwide in a strategic context that includes advances in photographic and printing device technologies and the spread of the internet and other consumer-friendly technologies. These developments both facilitate electronic commerce and increase the scope and complexity of financial crimes. As criminal exploitation of available technologies increases, field resources must continue to demonstrate agility in combating criminal efforts.

**PPA Mission Statement**

International Field Office Administration and Operations - Provide a comprehensive, internationally-coordinated response to threats to the integrity of U.S. currency and other transnational financial crimes.

International field office administration and operations resources directly support the DHS strategic goal to protect critical infrastructure, which includes protecting our nation's currency and financial systems from threats originating abroad. The requested amount funds field offices in 18 countries in a strategic context that includes advances in photographic and printing device technologies and the worldwide spread of the internet, other consumer-friendly technologies and dollarization (when a developing county replaces its national currency with the U.S. dollar). These developments both facilitate electronic commerce and increase the scope and complexity of financial crimes. As criminal exploitation of available technologies and practices increases, field resources must continue to demonstrate agility in combating criminal efforts.

**Summary Justification and Explanation of Changes**

**PPA Mission Statement**

Electronic Crimes Special Agent Program (ECSAP) - Develop and deploy personnel trained specifically to detect network intrusions and conduct examinations on all types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, scanners, and other electronic equipment, to investigate complex electronic crimes and develop strong cases for prosecution. Electronic Crimes Task Forces (ECTFs) - Form and expand partnerships to reinforce strategic alliances among law enforcement, academia and private industry to prevent, detect, investigate and mitigate the effects of electronic crimes on our nation's financial infrastructure.

ECSAP and ECTF resources directly support the DHS strategic goal to protect critical infrastructure, which includes reducing losses resulting from electronic crimes perpetrated against our nation's financial infrastructure. The ECSAP and ECTFs combat those who seek to defraud U.S. financial institutions, private industry or individuals through electronic or digital means. The requested amount funds the ECSAP and ECTF entities in a strategic context that includes advances in photographic and printing device technologies and the worldwide spread of the internet and other consumer-friendly technologies. These developments both facilitate electronic commerce and increase the scope and complexity of financial crimes. As criminal exploitation of available technologies and practices increases, the ECSAP and ECTF ensure the Service remains on the cutting edge of electronic crime investigations, and that it maintains liaisons with critical partners and stakeholders.

**Summary Justification and Explanation of Changes**

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	28,763	30,520	30,893	373

Salaries and benefits includes funding for 315 FTE. The FY 2011 request includes \$184,000 for full performance costs associated with three positions hired in FY 2009, a resource shift of (\$386,000) and (2) FTE to Presidential Candidate/Nominee Protection for the 2012 Presidential Campaign, \$226,000 for the annualization of the FY 2010 pay raise, and an increase of \$593,000 to cover increased payroll costs.

**PPA Mission Statement**

Headquarters, Management and Administration - Support and sustain operational success through progressive planning and performance in the areas of science and technology, organizational effectiveness, professional responsibility, stewardship of resources, and communication.

Headquarters, management and administration resources support the DHS strategic goal to protect critical infrastructure by enhancing the Service's administrative, professional, and technical infrastructure as well as the management systems and processes. In a strategic context of heightened threat, the Service must ensure that its business processes promote and strengthen the investigative and protective missions.

**PPA Mission Statement**

Rowley Training Center - Strengthen the agency's ability to develop and retain a highly specialized and dedicated workforce to fulfill mission-critical requirements.

Rowley Training Center resources support the DHS strategic goal to protect critical infrastructure by ensuring the USSS workforce is continuously prepared to meet the challenges of the investigative and protective missions. The requested amount will ensure that the Service's most important resource - its employees - have the knowledge and skills and abilities to execute the investigative and protective missions. In a strategic context of threat, the Service must ensure that its workforce planning and development practices outpace the threat environment.

**PPA Mission Statement**

Protective Intelligence Activities - Ensure protective intelligence processes, policies and systems provide quality information and services to securely and efficiently support the protective mission by investigating subjects (individuals or groups) and activities that pose threats to protectees and protected events.

Protective intelligence activities resources directly support the DHS strategic goal to protect critical infrastructure, which includes proactively leveraging advances in the behavioral and technological sciences in order to minimize the risk of harm to persons, property and events under Secret Service protection. The requested amount funds these activities in a strategic environment characterized by terrorists' sustained motivation to attack these targets, and by the increasing complexity and technological sophistication of the threat environment.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **Acquisition, Construction, Improvements, and Related Expenses**

### **I. Appropriation Overview**

#### **A – Mission Statement for Acquisition, Construction, Improvements, and Related Expenses**

The United States Secret Service performs two critical homeland security missions: protection and criminal investigations. The Secret Service protects the President and Vice President, their families, visiting heads-of-state/government, and other designated individuals, such as the Secretary of Homeland Security; investigates threats against these protectees; protects the White House, Vice President's Residence, foreign missions, and other designated buildings within the Washington, D.C. area; and designs, coordinates, and implements operational security plans for designated National Special Security Events. The Secret Service investigates violations of laws relating to: counterfeiting of obligations and securities of the United States; financial crimes such as access device fraud, financial institution fraud, identity theft, and computer fraud; and to crimes involving computer-based attacks on our nation's financial, banking, and telecommunications infrastructure. In order to accomplish both its protective and investigative missions, the Secret Service has offices located throughout the United States and in 18 foreign countries. The employees of the Secret Service are special agents, uniformed officers, and support personnel.

#### **B – Budget Activities:**

##### James J. Rowley Training Center (JJRTC)

The Acquisition, Construction, Improvements, and Related Expenses account is used to maintain the Service's JJRTC which provides the protection and criminal investigation training required to meet the needs of the Service's dual mission.

#### **C – Budget Request Summary:**

The U.S. Secret Service requests \$3,975,000 (0 FTE) to maintain the JJRTC located in Beltsville, Maryland; this reflects no funding change from the FY 2010 Enacted budget level.

II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

Program Performance Justification  
(Dollars in Thousands)**

**PPA: Acquisition, construction, improvements & expenses (Rowley Training Ctr):**

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2009 Actuals</b>	-	-	<b>6,257</b>
<b>2010 Enacted</b>	-	-	<b>3,975</b>
<b>2011 Current Services</b>	-	-	<b>3,975</b>
<b>2011 Total Request</b>	-	-	<b>3,975</b>
Total Change 2010 to 2011	-	-	-

The United States Secret Service requests \$3.975 million (0 FTE) for this activity. This reflects no funding change from the FY 2010 Enacted budget level.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Acquisition, Construction, Improvements, and Related Expenses account is used to maintain the JJRTC. This facility provides the protection and criminal investigation training required to meet the needs of the Service's dual mission.

Significant accomplishments in FY 2009 include the following:

- Completion of the Wilson Building and Tactical Village renovations.
- Conversion of the Merletti Building computer classroom and boiler replacement; installation of the Knight Building sprinkler/fire alarm system; and waterproofing of the Wilkie Building.
- Initiated the process of the Knight Building chiller replacement, repairs to the Merletti and Bowron Buildings (caulk masonry joints, weather stripping, gutters, fascia, and soffits), and campus-wide transformer replacements.

Significant planned accomplishments in FY 2010 include the following:

- Continue the replacement of the Baughman outdoor range roof and campus-wide ARC flash study, analysis, and correction upgrades.

- Continue the replacement of campus-wide HVAC/building management systems, emergency generators, lightning protection systems, surge suppression systems, street lighting, and perimeter fence.
- Continue Protective Obstacle Driving Course Pad repaving project and repairs to campus sewage lines and water tower.

Significant planned accomplishments in FY 2011 include the following:

- Continue to maintain the facilities and grounds at the James J. Rowley Training Center.

# I. STRATEGIC CONTEXT FOR FY 2011 BUDGET

## **A. Mission and Description of the USSS**

The USSS performs a critical homeland security mission of protecting some of our nation's most critical infrastructures and key assets. The USSS protects the President and Vice President, their families, visiting heads-of-state/government, and other designated individuals; investigates threats against these protectees; protects the White House, Vice President's Residence, Foreign Missions, and other designated buildings within the Washington, D.C. area; and designs, coordinates, and implements operational security plans for designated National Special Security Events (NSSE). The USSS safeguards the U. S. financial systems by investigating violations of laws relating to: counterfeiting of obligations and securities of the United States; financial crimes, such as access device fraud, financial institution fraud, identity theft, and computer fraud; and computer-based attacks on our nation's financial, banking, and telecommunications infrastructure.

In order to accomplish both its protective and investigative missions, the USSS has offices located throughout the United States and in 18 foreign countries. The USSS employs special agents, uniformed officers, and support personnel.

## **B. Major Activities and Key Strategic Issues**

### Protection

In FY 2009, the USSS provided protection to all designated protectees in travel status and within protected facilities, and provided appropriate equipment and staffing for enhanced protection services for White House protectees. The USSS provided protection and security operations at the 64<sup>th</sup> United Nations General Assembly and at NSSEs, including the 56<sup>th</sup> Presidential Inauguration, the President's State of the Union message to Congress, and the G-20 Economic Summit in Pittsburgh, PA. Beginning in January 2009, the USSS activated a fully-equipped operational protective detail for Former President and Mrs. George W. Bush in Dallas, Texas. Additionally, the USSS provided protection for Former Vice President Richard Cheney and his wife in accordance with the Former Vice President Protection Act of 2008.

Both President Obama and Vice President Biden engaged in extensive international and domestic travel during FY 2009. Since January 2009, President Obama has made 26 international stops, unprecedented for a first year administration.

The international, domestic and individual threat environments for protected individuals, venues, and infrastructure remained high in FY 2009 after the historic 2008 Presidential Campaign and Presidential Transition. The USSS hired and trained additional special agents and professional staff to assess and investigate the increased volume of protective threat information referred for evaluation by the intelligence community, federal, state and local law enforcement agencies and the general public. Additionally, the USSS increased the number of special agents, specialists and professional staff assigned to tactical, counter surveillance and countermeasure programs to ensure

critical coverage for the President and his family, while providing resources to other high threat protectees and protected sites as appropriate.

In FY 2011, the USSS will continue to provide incident-free protection to all designated protectees in travel status and within protected facilities, including the White House Complex. The USSS will also provide protection and plan security operations for NSSes.

### Investigations

Perhaps best known for protecting the nation's leaders, the Secret Service was established in 1865 to investigate and prevent counterfeiting. As the original guardian of the nation's financial payment system, the Secret Service has established a long history of protecting American consumers, industries, and financial institutions from fraud. Congress continues to recognize the Secret Service's 144 years of investigative expertise in financial crimes and over the last two decades has expanded the Secret Service's statutory authorities to include access device fraud (18 USC 1029), which includes credit and debit card fraud, and concurrent jurisdiction with other law enforcement agencies for identity theft (18 USC 1028), Aggravated Identity Theft (18 USC 1028A), computer fraud (18 USC 1030), wire fraud (18 USC 1343), and bank fraud (18 USC 1344). The Secret Service takes its mission to combat these financial crimes seriously and, as a result, the Secret Service is recognized worldwide for its investigative expertise and innovative approaches to detecting, investigating, and preventing financial crimes.

In FY 2009, the Secret Service was responsible for prosecuting financial crimes cases involving \$463M in actual loss, arresting 5,809 suspects, conducting 4,275 computer forensic examinations, and preventing \$1.8B in potential loss to the American public and financial institutions.

To continue to fulfill its obligation to protect the nation's financial infrastructure, industry, and the American public, the Secret Service has adopted a multi-faceted approach to aggressively combat financial crimes. The Secret Service has dismantled and continues to dismantle some of the largest known transnational criminal organizations by:

- collaborating with other law enforcement agencies and private industry through 35 Secret Service **Financial Crimes Task Forces (FCTF)**;
- collaborating with other law enforcement agencies, private industry, and academia through 28 Secret Service **Electronic Crimes Task Forces (ECTF)**;
- providing the necessary computer-based training to enhance the investigative skills of special agents through the Secret Service **Electronic Crimes Special Agent Program (ECSAP)**; and
- providing state and local law enforcement partners with the necessary computer-based training, tools, and equipment to enhance their investigative skills.

### Financial Crimes Task Forces (FCTF)

The Secret Service has established unique partnerships with state, local and other federal law enforcement agencies through years of collaboration on investigative and protective endeavors. The Secret Service has established a national network of 35 Financial Crimes Task Forces (FCTF) to

combine the resources of the private sector and other law enforcement agencies in an organized effort to combat threats to the nation's financial payment systems and critical infrastructures.

### Electronic Crimes Task Forces (ECTF)

In response to the USA PATRIOT Act, the Secret Service has established 28 ECTFs, to include the first international ECTF based in Rome, Italy. ECTF membership includes: 299 academic partners; over 2,100 international, federal, state, and local law enforcement partners; and over 3,100 private sector partners. The Secret Service ECTF model is unique in that it is an international network with the capabilities to focus on regional issues. For example, as the nation's largest "banking center," the New York ECTF focuses heavily on protecting the nation's financial institutions and financial infrastructure while the Houston ECTF works closely with partners such as ExxonMobil, Chevron, Shell, and Marathon Oil to protect the vital energy sector. By joining the Secret Service's ECTFs, all of the task force partners enjoy the resources, information, expertise, and advanced research provided by the Secret Service's international network of members while focusing on issues with significant regional impact.

### Electronic Crimes Special Agent Program (ECSAP)

A central component of the Secret Service's cyber-crime investigations is the Electronic Crimes Special Agent Program (ECSAP). This program is comprised of 1,148 special agents who have received at least one of three levels of computer crimes related training. These agents are deployed in more than 98 offices throughout the world and have received extensive training in forensic identification, preservation, and retrieval of electronically-stored evidence. ECSAP agents are computer investigative specialists and among the most highly-trained experts in law enforcement, qualified to conduct examinations on all types of electronic evidence. This core cadre of special agents is equipped to investigate the continually evolving arena of electronic crimes and have proven invaluable in the successful prosecution of criminal groups involved in computer fraud, bank fraud, identity theft, access device fraud, and various other electronic crimes targeting our financial institutions and private sector.

Over the years, the Secret Service's investigative mission has expanded in both scope and in depth. Today, the Secret Service's investigative programs and expertise not only provide essential support and services to various state, local, federal, and international law enforcement partners but this expertise has also become an essential element to the success of the Secret Service's Office of Protective Operations and Protective Intelligence Division.

Secret Service ECSAP agents conducted 88 computer forensic examinations on matters relating to protective intelligence cases, conducted 2,961 computer forensic examinations for other state, local, and federal law enforcement partners, and conducted 258 computer forensic examinations in support of the National Center for Missing and Exploited Children (NCMEC). Additionally, the Office of Investigations provides support to the Office of Protective Operations by routinely supporting all National Special Security Events (NSSE) and other major protective venues with the Secret Service's Cellular Phone Tracking Program and the Critical Systems Protection Initiative (CSPI).

## **C. Resources Requested and Performance Impact**

The proposed FY 2011 budget totals \$1,567,642,000 for the Salaries and Expenses account and \$3,975,000 for the Acquisition, Construction, Improvements, and Related Expenses account. Funding will be used to maintain current levels of program operations, provide funding for adjustments to the base, fund Uniformed Division pay restructuring, enhance electronic crimes investigations and support Task Force operations, and increase funding to support information integration and technology transformation efforts.

### **Current Services**

Currently the USSS is redeploying and managing existing baseline resources to augment its current capabilities in information integration and technology transformation, network security, and protective countermeasures. The agency is leveraging Departmental resources as well as conducting a disciplined assessment of mission needs to find efficiencies. At present, budget allocations are closely aligned with the USSS goals and objectives, and the agency is working with near-term reviews to continue with a sharpened focus.

### **Program Increases**

#### **Adjustments-to-the-Base**

The USSS is a labor-intensive operation, and it is vital that each program has all necessary resources to remain fully operational. This funding will cover increasing payroll and other personnel-related costs. This funding will allow program managers to direct an appropriate level of human and financial capital to continue the USSS's mission of protecting some of our nations most critical infrastructures and key assets.

The number of protectees receiving varying levels of protection from the USSS has significantly increased since September 11, 2001. Furthermore, the methods potentially utilized by terrorists to attack all core statutory responsibilities are becoming more sophisticated and, as a result, the countermeasures, tactics, and investigative methods are more complex and resource intensive. USSS personnel are performing critical tasks on a daily basis to meet core statutory responsibilities. These activities directly impact the USSS mission critical performance measures.

#### **2012 Presidential Campaign**

During FY 2011, the Secret Service will be required to make preparations for the 2012 Presidential Campaign by providing training to candidate protective detail personnel, and procuring and leasing equipment and supplies to support candidate/nominee protective operations. In order to have vehicles, equipment, and office space in place for the 2012 campaign, the procurement of these items must be accomplished during FY 2011. The equipment and services will be pre-positioned throughout the country to support the increased protective mission as the candidates/nominees travel throughout the country. The equipment and services procured with this funding support directly impact the performance measure – the *Percentage of Instances Campaign Protectees Arrive and Depart Safely*.

## **Information Integration and Transformation Program**

The White House Communications Agency (WHCA) provides limited worldwide telecommunications support to USSS Presidential and Vice Presidential protective operations. In 2008, WHCA completed a modernization of its telecommunications infrastructure by transitioning to Internet Protocol (IP) and advanced encryption. This modernization transformation revolutionized WHCA's overall communications security capacity while rendering USSS systems and devices utilized at field offices and tactical and countermeasure support elements incompatible.

FY 2011 funding will continue efforts to establish communications parity with WHCA, by implementing IP protocols and multi-level secure technologies into the USSS's planned Information Integration and Transformation Program (IIT) modernization efforts. The USSS will modernize its mobile communications program by combining the existing domestic land mobile radio system with the WHCA shared satellite-based communications system. The transformation plan provides new classified Information and Technology (IT) capabilities at USSS field offices through deployment of Homeland Security Data Network (HSDN) terminals to satisfy multi-level security requirements and ensure seamless information sharing. This initiative will directly impact protective performance measures including – the *Percentage of Instances Protectees Arrive and Depart Safely (Campaign, Domestic, and Foreign Dignitary Protectees)* and the *Volume of Intelligence Assessed (classified information)*.

IIT program funding allows for a cross-domain application multi-level security project necessary to meet the National Security Strategy (NSS) and DHS directives. The IIT program consists of the following elements: A major acquisition process involving systems engineering, architecture, design, development, test and evaluation, deployment, maintenance, sustainment, hardware and software. This multi-level secured cross-domain IT application and data environment will provide the USSS with the most efficient and effective means to perform mission critical operations.

This funding will support engineering and architecture activities to modernize the USSS database architecture to provide a higher rate of availability, and to optimize performance, scalability and disaster recovery capabilities to meet current and future mission requirements. The new database architecture will provide improved application and database performance, fewer outages, support continuity of operations, and support DHS Enterprise Data Management Directive 103.01.

This funding enables a proactive, cyber defense environment that provides real-time enterprise-wide protection through the dynamic information-sharing environment at DHS and the Director of National Intelligence cyber programs.

The cross-cutting database architecture and cyber security initiatives will directly impact protective and investigative performance measures including – the *Percentage of Instances Protectees Arrive and Depart Safely (Campaign, Domestic, and Foreign Dignitary Protectees)*, the *Volume of Intelligence Assessed (classified information)*, *Financial Crimes Loss Prevented (Through a Criminal Investigation and by the USSS Electronic Crimes Task Forces)* and *Counterfeit Passed as the Percent of the Amount of Genuine U.S. Currency in Circulation*.

The protective workload for the USSS has increased substantially. Domestic and international travel amongst protectees has become more frequent, complex, sensitive, and generally involves the deployment of more specialized teams. Protectee details, especially the President's, have become more time and logistics intensive, increasing the need for an integrated, enterprise-level operations logistics and scheduling capability.

Funding for the Combined Operations Logistics Database (COLD) will enable a robust operations logistics and scheduling capability that enables effective, efficient, and seamless achievement of mission objectives. The enhanced logistics and scheduling capabilities will improve planning and execution of mission activities while also enabling information sharing across the USSS enterprise.

The database system will directly impact all of the protective performance measures including – the *Percentage of Instances Protectees Arrive and Depart Safely (Campaign, Domestic, and Foreign Dignitary Protectees)*.

#### **D. Performance Highlights, Resources, and Alignment to Strategic Goals**

For each mission-oriented program, the program performance goal, alignment to Secretary's Priorities mission areas, total dollars and FTE, and Government Performance and Results Act (GPRA) performance plan measure/s are shown below. Additional measures are also displayed, as appropriate, to provide a more thorough context of expected performance results.

<b>Program: Campaign Protection</b>						
<b>Performance Goal:</b> Protect our Presidential and Vice Presidential Candidates and Nominees.						
<b>Secretary's Priority:</b> Preventing Terrorism and Enhancing Security						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$0	\$33,650	\$85,250	\$41,082	\$0	\$17,867
<b>FTE</b>	0	74	250	120	0	24

#### **Performance Plan Measures**

<b>Measure:</b> Percent of instances protectees arrive and depart safely (campaign protectees)						
<b>Description of Measure:</b> The security of protectees is the ultimate priority of the Secret Service; therefore, all necessary resources are utilized before and during a protective assignment in order to provide the highest - quality protection the Secret Service demands for all protectees. This measure represents the percent of travel stops where the protectee safely arrives and departs. The performance target is always 100%. Anything under 100% is unacceptable.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	N/A	N/A	100%	100%	N/A	N/A
<b>Actual:</b>	N/A	100%	100%	100%	N/A	N/A

<b>Program: Domestic Protectees (DP)</b>						
<b>Performance Goal:</b> Protect our Nation's leaders and other protectees.						
<b>Secretary's Priority:</b> Preventing Terrorism and Enhancing Security						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$830,560	\$859,669	\$910,127	\$1,046,216	\$1,012,592	\$1,081,508

<b>FTE</b>	3,374	3,440	3,491	3,578	3,778	3,734
------------	-------	-------	-------	-------	-------	-------

**Performance Plan Measures**

<b>Measure:</b> Percent of instances protectees arrive and depart safely (domestic protectees)						
<b>Description of Measure:</b> The percent of travel stops where our Nation's leaders and other protectees arrive and depart safely. The security of protectees is the ultimate priority of the Secret Service; therefore, all necessary resources are utilized before and during a protective assignment in order to provide the highest - quality protection the Secret Service demands for all protectees. The performance target is always 100%. Anything under 100% is unacceptable.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	100%	100%	100%	100%	100%	100%
<b>Actual:</b>	100%	100%	100%	100%	N/A	N/A

<b>Program: Financial Investigations (FI)</b>						
<b>Performance Goal:</b> Reduce losses to the public attributable to counterfeit currency, other financial crimes, and identity theft crimes that are under the jurisdiction of the Secret Service, which threaten the integrity of our currency and the reliability of financial payment systems worldwide.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$341,612	\$345,329	\$334,371	\$364,189	\$388,536	\$397,841
<b>FTE</b>	1,796	1,726	1,573	1,693	1,803	1,783

**Performance Plan Measures**

<b>Measure:</b> Counterfeit passed as a percent of the amount of genuine currency in circulation						
<b>Description of Measure:</b> The dollar value of counterfeit notes passed on the public reported as a percent of dollars of genuine currency. This measure is calculated by dividing the dollar value of counterfeit notes passed by the dollar value of genuine currency in circulation. This measure is an indicator of the proportion of counterfeit currency relative to the amount of genuine U.S. Currency in circulation, and reflects our efforts to reduce financial losses to the public attributable to counterfeit currency.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	<.01%	<.01%	<.0098%	<.0096%	<.0099%
<b>Actual:</b>	None	.0079%	0.0086%	0.0081%	N/A	N/A

<b>Measure:</b> Financial crimes loss prevented through a criminal investigation (in billions).						
<b>Description of Measure:</b> An estimate of the direct dollar loss to the public that was prevented due to Secret Service intervention or interruption of a criminal venture through a criminal investigation. This estimate is based on the likely amount of financial crime that would have occurred had the offender not been identified nor the criminal enterprise disrupted, and reflects the Secret Service's efforts to reduce financial losses to the public attributable to financial crimes. The Investigative program provides manpower on a temporary basis to support protective assignments; a role that is both purposeful and efficient. Field agents provide a "surge capacity" of protective manpower, without which the Secret Service could not accomplish its protective mandate in a cost - effective manner. Although these temporary assignments occur every year, they increase significantly during a presidential campaign requiring the Secret Service to decrease its investigative performance measure targets in campaign years.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011

<b>Actual:</b>	\$1.23	\$3.9	\$1.96	\$1.28	N/A	N/A

<b>Program: Foreign Protectees and Foreign Missions (FP/FM)</b>						
<b>Performance Goal:</b> Protect visiting world leaders.						
<b>Secretary's Priority:</b> Preventing Terrorism and Enhancing Security						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$129,134	\$130,781	\$136,012	\$141,544	\$145,704	\$150,968
<b>FTE</b>	659	659	659	659	660	661

### Performance Plan Measures

<b>Measure:</b> Percent of instances protectees arrive and depart safely (Foreign Dignitaries)						
<b>Description of Measure:</b> The percent of travel stops where visiting world leader protectees safely arrive and depart. The security of protectees is the ultimate priority of the Secret Service; therefore, all necessary resources are utilized before and during a protective assignment in order to provide the highest - quality protection the Secret Service demands for all protectees. The performance target is always 100%. Anything under 100% is unacceptable.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	100%	100%	100%	100%	100%	100%
<b>Actual:</b>	100%	100%	100%	100%	N/A	N/A

<b>Program: Infrastructure Investigations</b>						
<b>Performance Goal:</b> Reduce losses to the public attributable to electronic crimes and crimes under the jurisdiction of the Secret Service that threaten the integrity and reliability of the critical infrastructure of the country.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$50,958	\$54,140	\$54,794	\$63,254	\$68,867	\$71,317
<b>FTE</b>	289	300	277	291	305	303

### Performance Plan Measures

<b>Measure:</b> Financial crimes loss prevented by the Secret Service Electronic Crimes Task Forces (in millions).						
<b>Description of Measure:</b> An estimate of the direct dollar loss to the public prevented due to investigations by Secret Service ECTFs throughout the United States, which were established pursuant to the USA PATRIOT Act. The estimate is based on the likely amount of electronic financial crime that would have occurred had the offender not been identified nor the criminal enterprise disrupted. It reflects the Secret Service's efforts to reduce financial losses to the public attributable to electronic crimes. The Investigative program provides manpower on a temporary basis to support protective assignments; a role that is both purposeful and efficient. Field agents provide a "surge capacity" of protective manpower, without which the Secret Service could not accomplish its protective mandate in a cost - effective manner. Although these temporary assignments occur every year, they increase during a presidential campaign requiring the Secret Service to decrease its performance measure targets in campaign years.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011

<b>Target:</b>	\$150	\$150	\$150	\$300	\$310	\$304
<b>Actual:</b>	\$315.9	\$355.1	\$410.9	\$534.2	N/A	N/A

<b>Program: Protective Intelligence (PI)</b>						
<b>Performance Goal:</b> Reduce threats posed by global terrorists and other adversaries.						
<b>Secretary's Priority:</b> Preventing Terrorism and Enhancing Security						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$71,225	\$73,548	\$74,942	\$81,669	\$86,945	\$92,116
<b>FTE</b>	446	450	450	465	509	509

**Performance Plan Measures**

<b>Measure:</b> Number of Protective Intelligence cases completed.						
<b>Description of Measure:</b> The total number of intelligence cases completed by agents assigned to field operations. These cases generally represent an assessment of individuals or groups who have threatened a protectee of the Secret Service.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	4,000	3,300	4,200	4,000	4,000	4,000
<b>Actual:</b>	4,164	3,631	3,036	3,008	N/A	N/A

<b>Fiscal Year</b>	<b>Due Date</b>	<b>Reference/Citation</b>	<b>Requirement</b>	<b>Status</b>
2009	March 30, 2009	Reference: JES, Title III, p. 614; Senate Report, Title III, p. 97	Vulnerability Assessments: The Committee notes that while the Office of Infrastructure Protection has conducted many vulnerability assessments of critical infrastructure and key resources, much work remains to be done. The fiscal year 2009 justification indicates that it will "conduct approximately 315 vulnerability assessments on Tier 1 and 2 Critical Infrastructure and Key Resources, utilizing the National Guard in coordination and collaboration with Federal, State, local, and private sector partners." While the Committee strongly supports this work, it notes at that pace, it will take roughly 10 years to finish these assessments, even if no new facilities are added to the inventory. The Committee recommends \$25,409,000, an increase of \$8,000,000 from the budget request to accelerate these assessments and training programs and directs the Department to report to the Committee by March 20, 2009, on progress it has made to expand vulnerability assessment capacity.	Action Office
2009	September 13, 2008	Reference: Conference Report 109-699	Annual Report - NECP Coordination -- "(2) prepare and submit to Congress, on an annual basis, a strategic assessment regarding the coordination efforts of Federal departments and agencies to advance— '(A) the ability of emergency response providers and relevant government officials to continue to communicate in the event of natural disasters, acts of terrorism, and other man-made disasters; and '(B) interoperable emergency communications; '(3) consider, in preparing the strategic assessment under paragraph (2), the goals stated in the National Emergency Communications Plan under section 1802:...	Action Office
2008	December 26, 2008	Reference: PL 110-161 , p. 1008	Section 563 -- Ammonium Nitrate: issue a final rule implementing not later than 1 year after the date of enactment.	Action Office
2009	December 28, 2008	Reference: PL 110-161, p.1072	4th Qtr: FY08 - The Department is also directed to provide quarterly reports on US-VISIT implementation to include coordination with the Western Hemisphere Travel Initiative, the Secure Border Initiative, and other DHS efforts related to border security and interdiction of terrorist travel.	Action Office
2009	December 31, 2009	Reference: Section 2(a) Data Management Act Report (P.L. 106-215); Visa Waiver Permanent Program Act (P.L. 106-396)	Alien Arrival and Departure: By 12/31 of each year, Secretary shall report to House and Senate Judiciary Committees on the prior fiscal year data and any appropriate analysis reflecting no. of: 1. Aliens for whom departure data was collected during FY, with accounting by nationality of departing alien. 2. Departing aliens whose departure data was matched to the alien's arrival data, with accounting by nationality and by classification as an immigrant or nonimmigrant. 3. Aliens who arrived with a nonimmigrant visa, or as a visitor under the VWP, for whom no matching departure data have been obtained through system or any other means as of the end of authorized period of stay, with accounting by nationality and date of arrival in US. 4. Lawfully admitted nonimmigrants identified as having remained in US beyond period authorized by AG, with accounting by nationality. 5. Percentage of nationals lacking a departure record for each VWP country for the previous FY, together with analysis of that info.	Action Office
2009	April 6, 2008	Reference: House Report 110, Title III, p. 103	Exit Solution: The exit component of US-VISIT remains behind schedule. DHS has issued a notice or proposed rule making for a biometric exit solution for air and sea ports that would require air and sea carriers to collect and transmit biometric information to DHS in order to implement an air and sea exit system by the end of 2008. Section 711 of the 9/11 Act requires such as system to be implemented by that time in order for the Secretary to retain his authority to approve visa waiver program participation. The Committee is concerned that no pilot tests have been carried out or are planned for the proposed assignment of biometric collection responsibilities to private industry. Previous exit pilots involved the use of kiosks by departing passengers, but only on a voluntary basis. The Committee directs that the report on pilot results be reviewed by GAO, which shall provide an independent assessment of the report.	With GAO in Review

2010	Quarterly	Senate Report 111-31, p. 87	As discussed in the Senate Report, the Under Secretary is directed to provide quarterly briefings to the Committees on the specific use of resources"	Action Office
2010	Monthly	Senate Report 111-31, p. 89	For Infrastructure Security Compliance project, "The Committee expects that an accelerated hiring process will be fully maximized to bring qualified and vetted personnel on board quickly and directs NPPD to provide a monthly update of the FTE on-board and specific actions being taken to ensure expeditious hiring."	Action office
2010	90 days after Appropriation Act enactment and quarterly	Senate Report 111-31, p. 8	"The Committee understands that the Office of Infrastructure Protection, the Coast Guard, and the Transportation Security Administration are working together to coordinate chemical security responsibilities established by the Chemical Facilities Anti-Terrorism Standards regulations, the Maritime Transportation Security Act of 2002, and railroad security regulations. The Committee directs the Deputy Secretary to coordinate efforts and to work with the White House Office of Domestic Policy to develop' a coordinated and integrated approach for securing chemical facilities. Further, the Committee directs that the Department review and, if necessary, consider revising its information security regulations related to chemical facilities to ensure companies cannot misuse the regulations to improperly delay or impede Federal safety investigations following chemical accidents.  "The Committee directs the Department to provide a report to the Committee no later than 90 days after the date of enactment of this act, and quarterly thereafter, on the agency's efforts to coordinate chemical security across departments, particu	Action Office
2010	60 Days after Enactment	House Report 111-298, p. 96	"The conferees note the importance of a comprehensive effort to assess the security level of cyberspace at all levels of government. To accomplish this, cyber network security assessment tools must first be in place; however, the conferees understand that no such tools currently exist. Given this, the conferees do not require the Secretary to provide a report by June 1, 2010 on the status of cyber security measures in States and large urban areas, as proposed in the Senate report. Instead, NPPD, in cooperation with FEMA and relevant stakeholders, shall develop the necessary tools for all levels of government to complete a cyber network security assessment so that a full measure of gaps and capabilities can be completed in the near future. NPPD, in conjunction with FEMA, shall brief the committees within 60 days after the date of enactment of this Act on the specific timeframes and deliverables necessary to complete the development and execution of such tools in order to complete such an assessment by June 2011." p. 223	Action Office
2010	60 Days after Enactment	P.L. 111-83, p. 15	"Provided, that of the amount made available under this heading, \$161,815,000 may not be obligated for the National Cyber Security Division program and \$12,500,000 may not be obligated for the Next Generation Networks program until the Committees on Appropriations of the Senate and the House of Representatives receive an approve a plan for expenditure for each of these programs that describes the strategic context of the program, the specific goals and milestones set for the program, and the funds allocated to achieving each of those goals and milestones." p. 44-45	Undergoing DHS Review
2010	90 Days after Enactment	House Report 111-157, p. 116	"Therefore, the Committee directs FEMA, OEC, and SAFECOM to report to the Committee no later than 90 days after enactment of this Act on their collective efforts to provide technical assistance to States and localities on effective disaster and resilient communications systems. The report should also identify efforts to encourage States and localities to incorporate resilient communications into their emergency response planning and training. This report shall include a description of completed and planned tests and evaluations of resilient communications systems currently available for purchase of lease by States and localities. Furthermore, the report shall include data on the percentage of Public Safety Interoperable Communications grant funding allocated by States and localities for resilient communications."	Action Office
2010	90 Days after Enactment	P.L. 111-83, p. 16	"Provided, that of the total amount made available under this heading, \$75,000,000 may not be obligated for the United States Visitor and Immigrant Status Indicator Technology project until the Committees on Appropriations of the Senate and the House of Representatives receive a plan for expenditure, prepared by the Secretary of Homeland Security, not later than 90 days after the enactment of this Act that meets the statutory conditions specified under this heading in Public Law 110-329"	Action Office

2010	Quarterly	House Report 111-298, p. 99	"...and to continue to provide quarterly briefings on biometric exit implementation to the Committees, beginning November 1, 2009. The briefings should cover the status of air exit implementation, prospects for other exit solutions, and the status of discussions with Canada and Mexico on sharing immigration information to improve the ability to track departures. The monthly reports on implementation of biometric entrance and exit are no longer required."	Action Office
2010	Quarterly	House Report 111-298, p. 99	"The conferees direct US-VISIT to provide quarterly briefings to the Committees on its hiring and position conversion efforts, as called for in the House report. These briefings should be provided at the same time as the biometric exit briefings." p. 227	Action Office
2010	Quarterly	Senate Report 111-31, p. 93	"The Committee directs the US-VISIT program office to continue aggressively pursuing this issue and to continue providing quarterly briefings on progress being made on Unique Identity."	Action Office
2010	Quarterly	House Report 111-157, p. 100	"[...]The Committee directs US-VISIT and its counterparts at the Justice Department to continue providing quarterly interoperability briefings. These should indicate the remaining gaps in system interoperability, the operational impacts such gaps have on agency operations, and measures being taken to close them in the near term."	Action Office
2010	January 15, 2010	House Report 111-157, p. 100	"[...]The Committee understands that the Department is in the process of establishing a policy with regard to its use of identifiers, and directs DHS to report not later than January 15, 2010, on the status of this policy and the steps it will take to ensure compliance of DHS components and programs with such policy."	Action Office
2010	December 1, 2009	House Report 111-157, p. 101	"[...]The Committee directs US-VISIT to report not later than December 1, 2009, on steps that are being taken to reduce the backlog of "unreviewed" overstay records. The report should also include a summary of DIG performance in meeting targets for credibility and cost identified in the 2010 budget submission."	Undergoing DHS Review and adjudication
2010	January 15, 2010 and July 15, 2010	House Report 111-298, p. 97-98	"DHS managers overseeing this transition are instructed to brief the Committees on progress transferring FPS to NPPD at least semi-annually, starting no later than January 15, 2010, as discussed in the Senate report. The content of this briefing should include at a minimum as much detail as the transition plan discussed in the House report, which was submitted to the Committees on August 21, 2009."	Action Office
2010	December 31, 2009	P.L. 111-83, p. 16	"...Provided, That the Secretary of Homeland Security and the Director of the Office of Management and Budget shall certify in writing to the Committees on Appropriations of the Senate and the House of Representatives no later than December 31, 2009, that the operations of the Federal Protective Service will be fully funded in fiscal year 2010 through revenues and collection of security fees, and shall adjust the fees to ensure fee collections are sufficient to ensure that the Federal Protective Service maintains not fewer than 1,200 full-time equivalent staff and 900 full-time equivalent Police Officers, Inspectors, Area Commanders, and Special Agents who, while working, are directly engaged on a daily basis protecting and enforcing laws at Federal buildings (referred to as "in-service field staff")." **Management and Administration**

## **I. Appropriation Overview**

### **A – Mission Statement for Management and Administration**

Programs funded through the Department of Homeland Security (DHS) National Protection and Program Directorate (NPPD) Management and Administration appropriation contribute to the NPPD goal of advancing the Department's risk reduction mission. Reducing risk requires an integrated approach that encompasses both physical and virtual threats and their associated human elements. NPPD reduces the risk of attack against the Nation by protecting critical physical and cyber infrastructure, guarding against threats posed by foreign travelers to the country, and by standardizing the Department's approach to the analysis and management of potential risks to the Nation.

### **B – Budget Activities**

The Management and Administration appropriation major program activities include Directorate Administration and Risk Management and Analysis.

#### **Directorate Administration**

Directorate Administration includes the Office of the Under Secretary, which consists of: (1) Resource Administration, (2) Budget and Financial Administration, (3) Information Management, (4) Communications and Public Affairs, and (5) Office of Information Technology.

#### **Risk Management and Analysis**

Risk Management and Analysis (RMA) conducts strategic integrated risk analysis and develops the DHS Integrated Risk Framework.

### **C – Budget Request Summary**

NPPD requests 184 positions and 183 FTE and \$46.137 million in the FY 2011. This represents an increase of \$1.560 million from the FY 2010 Enacted Budget of \$44.577 million.

#### **Adjustments-to-Base**

- Annualization of the calendar year 2010 pay increase: \$0.052 million
- Calendar year 2011 pay increase: \$0.186 million
- GSA Rent inflation: \$0.028 million

- NPPD is offsetting the funding for 55 Federal positions from program funds within Directorate Administration and Risk Management and Analysis. The table below summarizes the offsets. There is a \$0.554 million efficiency in Directorate Administration to realign program funds to Federal positions.

<i>in thousands</i>	Total FTE	Total FTP	FY 2011 Program Funding	FY 2011 Salaries Funding	Net Budget Change
Dir. Administration	41	41	(\$5,668)	\$5,114	(\$554)
RMA	13	14	(\$1,198)	\$1,198	---
<b>Total</b>	<b>54</b>	<b>55</b>	<b>(\$6,866)</b>	<b>\$6,312</b>	<b>(\$554)</b>

Program Changes

1. *Directorate Administration.* A \$2.000 million program increase to Information Technology to manage the NPPD data center migration and consolidation efforts across the Directorate.
2. *Risk Management & Analysis.* A \$0.152 million program decrease to technical assistance that RMA provides to other DHS components.

## II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

### III. Current Services Program Description by PPA

**Department of Homeland Security  
National Protection & Programs Directorate  
Management and Administration  
Directorate Administration  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Directorate Administration**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>78</b>	<b>56</b>	<b>41,386</b>
<b>2010 Enacted</b>	<b>104</b>	<b>104</b>	<b>34,682</b>
2011 Adjustments-to-Base	41	41	(335)
<b>2011 Current Services</b>	<b>145</b>	<b>145</b>	<b>34,347</b>
2011 Program Change	-	-	2,000
<b>2011 Total Request</b>	<b>145</b>	<b>145</b>	<b>36,347</b>
Total Change 2010 to 2011	41	41	1,665

The National Protection and Programs Directorate requests \$34.347 million and 145 positions/FTE for Directorate Administration.

The FY 2011 request reflects an adjustment-to-base net decrease of \$0.335 million, which includes an additional 41 Federal positions/FTE offset by \$5.114 million in program/contract dollars; \$0.044 million for the 2010 pay increase, \$0.152 million for the 2011 pay increase; and \$0.023 million in GSA rent inflation. Other adjustments include efficiencies of \$0.554 million gained through the funding additional Federal staff from program funds. The \$2.000 million program increase will fund support to NPPD systems and applications migration to the two DHS Enterprise Data Centers.

As part of Secretary Napolitano's Departmentwide Efficiency Review, DHS is determining the most effective balance of contractors to Federal employees throughout the Department, and converting contractor positions to Federal employees when feasible and appropriate. In FY 2011, NPPD will convert contractor positions to government staff throughout the Office of the Under Secretary, avoiding \$554,000 in contract costs.

## **CURRENT SERVICES PROGRAM DESCRIPTION**

### ***Office of the Under Secretary***

The Office of the Under Secretary provides Directorate leadership and management; coordinates Directorate activities throughout the Department; and serves as an advocate for protection across all governmental sectors, protection stakeholders, and citizens. The Office of the Under Secretary consists of the Under Secretary, Deputy Under Secretary, Chief Operating Officer, and Chief of Staff, as well as legal and administrative support.

### ***Office of Budget and Financial Administration***

The Office of Budget and Financial Administration supports the NPPD mission by providing financial management information, oversight, and fiscal services and policies. The Office of Budget and Financial Administration consists of the following activities and elements:

- *Budget Formulation* - Reviews the current state of programs and projects, assesses activities against the desired future direction, and builds and justifies funding requests to resource mission needs.
- *Budget Execution* - Responsible for the workflow and funds control process to ensure that resources are available when needed, do not exceed authorized levels, are used in accordance with law and congressional intent, and are recorded and reported on in accordance with Federal accounting principles and guidelines.
- *Strategic Planning and Performance Management* - Fulfills internal and external performance management requirements, including the collection, analysis, monitoring, and reporting of performance data.
- *Accounting Operations* - Responsible for the overall accounting operations of NPPD and ensures that the Directorate meets financial execution and accounting requirements in support of DHS' centralized financial management program. Functions include commitment/obligations input and tracking, travel and purchase card processing, status of funds monitoring, and payroll reconciliation.
- *Financial Systems Reporting and Internal Controls* - Responsible for the preparation and submission of financial reports to DHS and the Immigration and Customs Enforcement (ICE) Chief Financial Officer. Works closely with the ICE CFO office to monitor and reconcile Treasury Information Executive Repository reports and to provide analysis to validate accuracy of data. Responsible for the development and monitoring of NPPD internal control programs.
- *Acquisition Operations* - Reviews and monitors NPPD's acquisition documents and ensures compliance with Federal and DHS acquisition regulations.
- *Procurement Operations* - Reviews and tracks NPPD contracts and small purchases, provides procedural guidance and support to NPPD staff, administers the purchase card program, and supports investment review. This office also serves as a liaison to the DHS procurement office.
- *Regulatory and Economic Analysis* - Ensures that NPPD guidance and regulatory actions consider alternatives and impacts; ensures that regulatory analyses are

completed following the requirements of statute, executive order, and Office of Management and Budget (OMB) policy; provides leadership with economic impact analysis related to NPPD programs and activities.

#### FY 2009 Accomplishments

- Provided day-to-day fiscal services and financial operations including funds approval, prompt payment of invoices, and payroll reconciliations
- Initiated an NPPD Internal Controls Program; in accordance with OMB Circular A-123, conducted assessments of internal controls on Funds Control and Budgetary Resource Management that will lead toward assurances in financial control and operational effectiveness. NPPD has:
  - Tested the design and control of Budgetary Resource Management processes
  - Tested the design and effectiveness of Entity Controls utilizing the Government Accountability Office tools checklist
  - Tested the design of fund balance with Treasury
  - Developed an improved process for analyzing and closing out undelivered obligations and unliquidated obligations
  - Improved invoice processing to reduce prompt pay penalties to less than \$200 per \$1 million of invoices processed
  - Improved the Intra-Governmental Payment and Collection processing and all payments were under 30 days
- Transitioned from Travel Manager to FedTraveler - a travel management system that allows for improved recordkeeping of electronic travel receipts
- Prepared the FY 2010 budget submission, Congressional briefings and testimony, and responded to questions for the record and getbacks
- Assisted with the transition planning to bring the Federal Protective Service (FPS) into NPPD in FY 2010
- Developed FY 2010 performance measures and managed the performance reporting for FY 2009 measures and year end results for the Annual DHS Performance Report; initiated a program self-assessment to validate and verify performance measure development and results reporting; supported the DHS Performance Improvement Council
- Worked with NPPD Human Capital to ensure the Government Performance Result Act performance measures were included in the appropriate Senior Executive Service performance plans
- Represented NPPD in the DHS Working Capital Fund Governance Board to review activities and proposals for new activities
- Conducted evaluations throughout FY 2009 of the NPPD payroll actuals and on board projections to evaluate the enacted payroll and expenditures; maintained and distributed to NPPD leadership and NPPD offices a detailed status of funds report to track financial performance
- Developed the NPPD Acquisition Review Process, which is designed to evaluate and improve the program management activities of all the Level 1 (>\$1,000 million), Level 2 (>\$300 million), and Level 3 (<\$300 million) programs in NPPD. As part of that development:

- Established the NPPD Acquisition Review Calendar
- Developed an Acquisition Advisory Council (AAC) Charter
- Conducted acquisition review process training and development for all the NPPD subcomponents
- Signed US-VISIT Mission Needs Statement Endorsed
- Reviewed and assessed all Level 1 and Level 2 NPPD acquisition portfolios
- Supported NPPD facilities expansion with cost estimation support, procurement requests, and monitoring of progress against the plan
- Provided ongoing assistance and review of ammonium nitrate rulemaking process and regulatory impact analysis
- Assisted US-VISIT acquisition and costing staff with ensuring consistency between regulatory and acquisition efforts; actively assisted US-VISIT with exit evaluation and rulemaking; provided senior leadership with analysis and recommendations on future program considerations
- Coordinated NPPD efforts for Secretary's Efficiency Initiative
- Conducted analytical review of NPPD subcomponent investment lifecycle cost estimates

#### FY 2010 Planned Accomplishments

- Design and conduct assessments of internal controls over financial and program operations; retest the design and control of budgetary resource management and test its effectiveness
- Develop an improved reconciliation process for the Federal Financial Management System and the procurement system to better evaluate the accuracy of processing commitments and obligations into the Federal Financial Management System
- Implement a web-based invoice consolidation payment system
- Transition the certification of purchase requests in the procurement and financial systems to the offices; train staff to transition and support requests for assistance during the year
- Prepare the FY 2011 budget submission, Congressional briefings and testimony, and respond to questions for the record and getbacks
- Institute Directorate-wide detailed operating plans for program and financial execution; measure progress against the plans through quarterly NPPD leadership reviews
- Audit program performance measure verification and validation data and develop corrective action plans for any weaknesses identified
- Update NPPD acquisition review process in accordance with the revised version of Directive-102
- Introduce FPS personnel to NPPD acquisition review process
- Ensure 80 percent of NPPD's acquisition portfolio undergoes an acquisition review
- Strengthen the Directorate knowledge base of program management techniques to enhance status reporting and to reduce program/project risk

### FY 2011 Planned Accomplishments

- Consolidate multiple instances of accounting into a single instance to create efficiency and improve overall budgetary and financial operations and reporting
- Initiate internal control evaluations on budgetary and financial operations of sub-offices to ensure internal controls are maintained
- Prepare the FY 2012 budget submission, Congressional briefings and testimony, and respond to questions for the record and getbacks
- Review status of corrective action plans for performance measure verification and validation weaknesses and ensure that actions stay on track
- Mature the detailed operating plans to expand the financial planning to include expenditure projections and timelines; measure progress against the plans through quarterly NPPD leadership reviews
- Facilitate integration of improved regulatory and program alternative analysis to include appropriate cost benefit or other economic analysis in decision making
- Provide routine assessment of economic considerations of NPPD programs to leadership; develop toolkit of readily available models and economic database access to support decision making
- Enhance data utilization and facilitate component training where required to ensure NPPD continuously improves quantitative and regulatory analysis

### *Office of Resource Administration*

The Office of Resource Administration (ORA) provides operational services for human capital planning, facilities and property, security, training, and emergency plans and continuity. The ORA consists of the following activities and elements:

- Human Capital - Responsible for recruiting, staffing, classification, performance management, awards, employee relations, benefits, pay & compensation, and personnel and payroll processing, as well as workforce utilization tracking by office and maintaining records of NPPD personnel.
- Training - Coordinates all of the mandatory and voluntary training requirements of the Directorate, the Department, and the Government.
- Facilities - Responsible for facilities property and logistics support, facility space planning, rent, procurement and oversight of facilities support services and Continuity of Operations activities.
- Assets and Property - Records Directorate property, manages the fleet of GSA-owned vehicles, and documents property records as well as disposal.
- Security- Implements all of the national security information programs, controlled unclassified information, and sensitive security information programs; procures the armed guards and escort services for NPPD facilities, physical access control and key control for NPPD facilities, and ensures that NPPD facilities' intrusion detection systems and security access control mechanisms are maintained and up-to-date.
- Emergency Plans and Continuity - Leads and coordinates the implementation of NPPD business continuity and emergency preparedness activities, including

continuity of operations (COOP) plans, incident information reporting, occupant evacuation plans, pandemic planning, and test, training, and exercise activities.

- Exercise Program - Plans exercises and coordinates NPPD participation in Departmental or governmentwide exercises.

#### FY 2009 Accomplishments

- 75 percent of positions authorized were filled or tentative job offers were extended
- Managed staffing level growth along with the associated need for space, equipment, and vehicles
- Implemented and established a full-service training program in conjunction with the Department's Training Branch
- Managed the Directorate Table of Organization, which lays out how personnel are aligned within the Directorate and staffing levels to assist in workforce planning
- Participated in DHS COOP exercises
- Updated NPPD COOP, Pandemic Influenza Annex, conducted COOP Exercise Eagle Horizon '09, and completed a net assessment of the Directorate's business continuity and emergency preparedness function

#### FY 2010 Planned Accomplishments

- Support long-range facilities planning efforts, including participating in the planning efforts for the eventual move to the St. Elizabeth's campus.
- Hire new positions requested in FY 2010
- Effectively transition the FPS workforce into NPPD
- Establish a full service human resources operation
- Participate in DHS COOP and Pandemic and H1N1 planning and exercises
- Strengthen the Directorate's business continuity and emergency preparedness posture and readiness to continue mission essential functions under all conditions
- Develop a consolidated facility plan for all NPPD components
- Implement and establish a full-service training program in conjunction with the Department's Training Branch
- Complete the absorption of FPS staff seamlessly into the NPPD training environment; establish full range of professional development opportunities for NPPD

#### FY 2011 Planned Accomplishments

- Strengthen the Directorate's business continuity and emergency preparedness posture and readiness to continue mission essential functions under all conditions
- Fill vacant and new positions
- Acquire an automated personnel tracking system for NPPD
- Participate in DHS COOP exercises
- Effectively transition all FPS facility, training, COOP and security functions into NPPD
- Create and deliver in-house developed training programs for NPPD staff to supplement Departmental offerings

### *NPPD Office of the Chief Information Officer*

The NPPD Chief Information Officer actively participates in strategic planning efforts for information technology management by ensuring that systems and processes are integrated with the DHS Chief Information Office Strategic Plan and DHS goals and objectives. The Chief Information Officer approves, oversees, and monitors Cyber Security & Coordination, US-VISIT, Infrastructure Protection, and Risk Management and Analysis IT investment requests, as well as performs System Engineering Life Cycle reviews; recommends new IT projects and program activity priorities for funding to support NPPD mission; and evaluates future technologies and their ability to support DHS and NPPD future missions. The Chief Information Officer works closely with the Under Secretary and Deputy Under Secretary in overall planning, program alignment, coordination, and assessments associated with information technology management for NPPD, Cyber Security & Coordination, US-VISIT, Infrastructure Protection, and Risk Management and Analysis within DHS. The Chief Information Officer and staff serves as the NPPD representative on planning, oversight, leadership, and counsel committees sponsored by the DHS Chief Information Office.

#### FY 2009 Accomplishments

- Delivered and provided a wide-range of IT services via a Project Management Office in direct support of the NPPD mission, goals, objectives, and programs for major systems
- Successfully coordinated program/project execution according to the standards of the System Development Life Cycle for NPPD IT investments and projects, ensuring mission requirements were met and are cost-effective
- Developed and maintained NPPD enterprise architecture alignment with the DHS enterprise architecture
- Supported NPPD IT investment funding prioritization, allocation, and periodic reporting providing enhanced decision support capabilities to Directorate leadership
- Developed and maintained a Directorate information security program that is fully aligned with the Department, including development and enforcement of security policy, communications security management, designated approving authority, information system security management, and information system security officer training

#### FY 2010 Planned Accomplishments

- Work with the DHS Office of Chief Information Officer (OCIO) and improve NPPD subcomponent program and project alignment with DHS policy, directives, and mandates as evidenced by enhanced program/project justifications, expenditure plans, and project reports
- Work with DHS OCIO to further support implementation of DHS and NPPD initiatives for personal identification verification and logical access, trusted internet connection planning, and data center migration to achieve enhanced technology security, integrity, and efficiency

- Provide comprehensive leadership, oversight, and support to NPPD offices and improve efficiencies and effectiveness of NPPD and its technology management to bring enhanced discipline, clarity, and transparency to NPPD technology programs and activities
- Promote NPPD major program alignment to the DHS enterprise architecture in order to optimize the value of information technology and demonstrate sound stewardship of information technology resources
- Maintain a Directorate information security program that is fully aligned with the Department, including development and enforcement of security policy, communications security management, designated approving authority, information system security management, and information system security officer training

#### FY 2011 Planned Accomplishments

- Work with the DHS OCIO and improve NPPD component office program and project alignment with DHS policy, directives, and mandates as evidenced by enhanced program/project justifications, expenditure plans, and project reports
- Work with DHS OCIO to further support implementation of DHS and NPPD initiatives for personal identification verification and logical access, trusted internet connection planning, and data center migration to achieve enhanced technology security, integrity, and efficiency
- Provide comprehensive leadership, oversight, and support to NPPD offices and improve efficiencies and effectiveness of NPPD and its technology management to bring enhanced discipline, clarity, and transparency to NPPD technology programs and activities
- Promote NPPD major program alignment to the DHS enterprise architecture in order to optimize the value of information technology and demonstrate sound stewardship of information technology resources
- Ensure that the Directorate's information security program is fully aligned with the Department, including development and enforcement of security policy, communications security management, designated approving authority, information system security management, and information system security officer training

#### *Office of Communications and Public Affairs*

The Office of Communications and Public Affairs is the nexus for all NPPD communications, outreach, and awareness. The Office of Communications and Public Affairs is comprised of three branches: Internal Communications, External Communications, and Strategic Communications.

The Office of Communications and Public Affairs plays a lead role in developing and approving all correspondence and messaging intended for external or internal outreach or distribution. The Office of Communications and Public Affairs develops communications strategies and action plans to promote Directorate programs and

activities, and develops and posts content for all directorate and component pages on the Intranet site (DHSONline.gov) and on the Department's external website (DHS.gov).

#### FY 2009 Accomplishments

- Produced and distributed a variety of electronic products to improve communication with internal and external audiences. Products included:
  - Daily News Clips (NPPD/DHS-related media coverage)
  - Daily Report (summary of public speaking events, interviews, products, etc.)
  - "Weekly Update" Newsletter (NPPD/DHS news and announcements)
- Managed and monitored NPPD Speaker's Bureau through the OCPA External Communications branch. The Speaker's Bureau serves as the clearinghouse for all external public speaking requests multimedia (radio, television, and film opportunities).

#### FY 2010 Planned Accomplishments

- Launch iShare information sharing resource through Internal Communications branch. iShare will enable the NPPD workforce to blog/post about Directorate issues and events, as well as directly engage the Directorate's leadership team.
- Establish a series of topical monthly leadership fora led by NPPD leadership to discuss issues of interest or concern to the workforce through the NPPD Employee Advisory Council

#### FY 2011 Planned Accomplishments

- Develop NPPD blog for employees to communicate with leadership on a regular basis through the NPPD intranet site
- In coordination with DHS Office of Public Affairs and senior communicators throughout the Federal Government, devise a comprehensive and effective National Cybersecurity Awareness Month education and outreach campaign targeting nontraditional audiences (K-12, collegiate, urban).

#### ***Office of Information Management***

The Office of Information Management is responsible for managing and improving external communications for NPPD. Information Management is comprised of the Executive Secretariat, Freedom of Information Act (FOIA)/Privacy, Records Management, and Audit Liaison functions.

- Executive Secretariat - Serves as the central processing point for formal documents and taskers sent to/from NPPD.
- Freedom of Information Act (FOIA)/Privacy - Works in concert with the Department Privacy Office, which serves as the steward of Section 222, the responsibilities of the Chief Privacy Officer, of the Homeland Security Act, the Privacy Act of 1974, the Freedom of Information Act, the E-Government Act of 2002 and the numerous laws, Executive Orders, court decisions, and

Departmental policies that protect the collection, use, and disclosure of personal and Departmental information.

- Records Management - Provides leadership and direction for the NPPD records management program; develops an overall records management strategy producing the policy, procedures, and guidance necessary to implement that program; develops policies and guidance on the application of technology to records management; coordinates the program within and outside NPPD overall.
- Audit Liaison - Serves as a liaison among external Departmental offices, the Government Accountability Office (GAO), Office of the Inspector General (OIG), and NPPD offices for all audit activities undertaken by either the GAO or OIG. Activities include entrance/exit conferences, fieldwork, release of draft and final reports, and recommendation follow-up.

#### FY 2009 Accomplishments

- Managed NPPD responses to OIG/GAO requests and tracked progress on open recommendations to promote closure of recommendations as appropriate; instituted policies and procedures to align with DHS Directive #077-02, Relations with the U.S. Government Accountability Office, including quarterly metrics reporting
- Researched and purchased Lockheed Martin's document management software, Internet Quorum, for the assignment, monitoring, reviewing, and editing of correspondence, action and information memoranda, congressional reports, White House requests, congressional questions for the record, and other material
- Ensured timely review and completion of NPPD reports to Congress
- Received and processed FOIA requests for information held by NPPD and provided guidance to NPPD personnel responsible for assisting with FOIA document and information requests
- In cooperation with Office of General Counsel, conducted Directorate-wide training on GAO and IG audit processes and procedures
- Continued working to build privacy protections into NPPD programs and systems
- Received approval to hire Directorate-level records manager and posted job by year-end

#### FY 2010 Planned Accomplishments

- Assign, monitor, review, edit, and manage correspondence, action and information memoranda, congressional reports, White House requests, congressional questions for the record, and other material
- Ensure timely review and completion of NPPD reports to Congress
- Receive and process FOIA requests for information held by NPPD and provide guidance to NPPD personnel responsible for assisting with FOIA document and information requests
- Ensure that privacy protections are maintained in NPPD programs and systems

#### FY 2011 Planned Accomplishments

- Assign, monitor, review, edit, and manage correspondence, action and information memoranda, congressional reports, White House requests,

congressional questions for the record, and other material using IQ software; conduct Directorate-wide training on processes and technology and provide guidance via an Executive Secretariat website

- Ensure timely review and completion of NPPD reports to Congress
- Ensure that privacy protections are maintained in NPPD programs and systems
- Formalize process mapping of all Office of the Under Secretary – Office of Information Management processes and procedures to make available to directorate components via the intranet
- Implement Electronic Records Management System and conduct Directorate-wide training on records retention processes and procedures

**Department of Homeland Security  
National Protection & Programs Directorate  
Management and Administration  
Risk Management & Analysis  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Risk Management & Analysis**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>11</b>	<b>11</b>	<b>9,581</b>
<b>2010 Enacted</b>	<b>25</b>	<b>25</b>	<b>9,895</b>
2011 Adjustments-to-Base	14	13	47
<b>2011 Current Services</b>	<b>39</b>	<b>38</b>	<b>9,942</b>
2011 Program Change	-	-	(152)
<b>2011 Total Request</b>	<b>39</b>	<b>38</b>	<b>9,790</b>
Total Change 2010 to 2011	14	13	(105)

In FY 2011, the NPPD requests \$9.790 million and 39 positions/38 FTE for Risk Management and Analysis (RMA). The FY 2011 Request includes 14 FTP/13 FTE offset by \$1.198 million in program/contract dollars. Adjustments-to-base include \$0.008 million for the 2010 pay increase; \$0.034 million for the 2011 pay increase; and a \$0.005 million increase to GSA rent. RMA’s program change is a \$0.152 million decrease to technical assistance programs supporting DHS components.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

It is the mission of RMA to enable and advance the effective management of risk by the homeland security enterprise. RMA, collaborating across DHS, is working to achieve an integrated risk management capability that ensures risk information and analysis are provided to decision-makers to inform a full range of decisions – including strategy formulation, preparedness priorities, and resource allocation.

The Nation’s homeland security is imperiled by a wide variety of hazards including natural disasters, terrorism, cyber attacks, pandemics, manmade accidents, and transnational crime. Balancing competing requirements to address these hazards, prioritizing among ways and means to promote our homeland security, and determining and communicating the current and expected level of risk to the Nation are serious challenges for leadership, and ones that can be addressed, at least in part, through effective risk management. The National Strategy for Homeland Security states that the Department must apply a “risk-based framework across all homeland security efforts in order to identify and assess potential hazards and their downstream effects, determine

what levels of relative risk are acceptable, and prioritize and allocate resources among all homeland security partners, both public and private, to prevent, protect against, and respond to and recover from all manner of incidents<sup>1</sup>.” Risk management is integral to effective decision making and must be a core element of homeland security enterprise management processes.

The Department’s approach to risk-informed decision making has matured considerably over the past 7 years and will continue to evolve as new analytic approaches are developed to deal with the complexities and uncertainties inherent in many of the risks for which DHS holds responsibility. Despite considerable progress, there is much that remains to be done. RMA, in conjunction with partners from across DHS and the homeland security enterprise – to include Federal, State, local, tribal, and territorial government organizations, the private sector, and NPPD’s international partners – is working to achieve an integrated approach to risk management that will increase the effectiveness of homeland security risk management. This approach will ensure that risk information and analysis are provided to decision makers to inform a full range of decisions, including strategy formulation, preparedness and mitigation priorities, and resource allocation.

#### FY 2009 Accomplishments

- Under the auspices of the Department’s Quadrennial Homeland Security Review (QHSR), RMA led a study team in 2009 that conducted a full review of the Homeland Security National Risk Assessment (HSNRA) concept. The work of the study group was captured in the October 2009 study group report, *HSNRA: Findings and Recommendations from the QHSR*, which clarified the need and requirements for a national risk assessment, and proposed a viable process and implementation plan to execute the assessment.
- Completed the Risk Assessment Process for Informed Decision-making (RAPID) prototype. The RAPID tool supports strategic policy and budgetary decision making, by assessing risk, evaluating risk reduction effects of DHS programs, and evaluating alternative resource allocation strategies. Its goal is to risk-inform the DHS Planning, Programming, Budgeting, and Execution (PPBE) cycle, including the Integrated Planning Guidance (IPG) and Resource Allocation Plans (RAP) guidance and the Resource Allocation Decision (RAD) process.
- Began implementing RAPID II, addressing a much fuller range of homeland security scenarios. Using RAPID II, RMA provided to the DHS Office of Policy on July 30, 2009, a detailed mapping for chemical and bioterrorism scenarios and a comparison of chemical, biological, radiological, and nuclear (CBRN) risks targeted for use in the FY 12-16 IPG. On September 30, 2009, RMA delivered to Policy a RAPID chemical and biological defense parametric analysis and demonstrated a functioning RAPID Analytical Tool. RMA will deliver RAPID II programmatic evaluations and tradeoff analyses based on program effectiveness judgments and validated program mapping by Spring 2010, together with the RAPID II analytical tool.

---

<sup>1</sup> The National Strategy for Homeland Security, October 2007, page 41.

- Published the Interim Integrated Risk Management Framework in January 2009. This keystone publication provides a foundation for developing follow-on policy, doctrine, and guidance that will institutionalize integrated risk management in the Department. The document outlines a vision, objectives, principles, and a process for integrated risk management within DHS, and identifies how the Department will achieve integrated risk management by developing and maturing governance, processes, training, and accountability methods.
- Published the first set of Risk Management Guidelines for risk practitioners across the homeland security enterprise. The Risk Management Guidelines provide a body of knowledge for DHS and its components to improve their risk management capabilities by promoting common and promising risk management processes and techniques. These primers capture and promulgate promising practices and lessons learned to promote convergence across DHS risk management activities and support education and training.
- Provided risk analytic expertise and support to DHS components and headquarters elements as requested. RMA provided technical assistance to the following programs:
  - **Interoperable Emergency Communications Grant Program (IECGP):** RMA supported the Federal Emergency Management Agency (FEMA) Grant Programs Directorate in the development of an “all-hazards” risk model for the IECGP. An “all-hazards” model is one of the implementing recommendations of the 9/11 Commission Act of 2007. This model will address both manmade disasters and natural disasters. IECGP provides governance, planning, training and exercise, and equipment funding to States, Territories, and local and tribal governments to carry out initiatives to improve interoperable emergency communications, including communications in collective response to natural disasters, acts of terrorism, and other manmade disasters.
  - **Target Capability List – Risk Management:** RMA and FEMA’s National Preparedness Directorate worked jointly to lead an effort to develop a target capability for risk management. As part of this effort, RMA hosted workshops with more than two dozen State and local homeland security officials to develop the capability targets.
  - **Office of Policy, Cyber:** In support of the Director of Cyber Security Policy within the DHS Office of Policy, RMA completed a preliminary assessment of cybersecurity risk. This assessment was coordinated with the NPPD Office of Cyber Security and Communications.
- Managed and led the administration and operation of a Department Risk Steering Committee (RSC). The Under Secretary for NPPD, pursuant to delegated authority from the Secretary, created a Departmentwide steering committee to serve as the Department’s risk management governance structure. The RSC, which is administered by RMA, is a three-tier construct. Tier I consists of all of the heads of DHS components; Tier II is comprised of Deputies (e.g., Deputy Under Secretary if in component with an Under Secretary); and in Tier III are senior policy and analysis staff. The RSC conducted more than two dozen meetings, including working groups, and hosted 10 Featured Risk Practice Series

presentations during which DHS components highlighted their methodologies and processes for assessing and managing risk to enhance their ability to achieve their missions.

- Chaired and led the Risk Methodology Committee for the DHS Special Events Program, and provided continuous support to the Special Events Working Group (SEWG). The SEWG is comprised of member representatives from 30 Departments, Agencies, components, and offices. The program was created to identify and assess all special events below the level of a National Special Security Event. In its role as Chair of the Methodology Committee, RMA assigned relative risk level to the 5,000+ special events submitted to DHS in an annual State and local data call; and presented results to the SEWG Co-Chairs (DHS/Ops, FEMA, USSS, FBI, and NPPD).
- Led the Department risk lexicon development program. The DHS Risk Lexicon was published in September 2008. Terms are continuously collected and evaluated for inclusion into the next DHS Risk Lexicon version.
- Conducted a functional needs assessment for the development of a risk management training curriculum for DHS, to include RSC members, senior leadership, program managers, and analysts.
- Supported FEMA in the development of State and local web-based risk management training.
- Led the Protect and Defend subobjective for the National Implementation Plan Global War on Terrorism to address the development of sound risk management, risk assessment, and risk mitigation practices to reduce vulnerabilities among all United States Government partners.
- National Academies: The FY 2008 DHS appropriations bill directed RMA to use up to \$1 million for the National Academy of Sciences (NAS) to: (1) evaluate the quality of the current DHS approach to measuring risk; (2) assess the significance accorded to the risk of natural disasters by such methodologies; (3) review the feasibility of combining terrorist threats and natural disasters within a single risk analysis; and (4) recommend how the risk models currently used by DHS can be improved and validated using empirical scientific standards. RMA supported the study and provided numerous briefs to NAS.

#### FY 2010 Planned Accomplishments

- Complete RAPID II - RMA will deliver the Department's first quantitative all hazards assessment of risk, as well as an initial evaluation of how well DHS' operational and primary enabling programs manage that risk. RAPID results will inform DHS' annual PPBE cycle of resource allocation decisions, including the FY 2012-2016 IPG, RAP, and the RAD process cycle. RMA will initiate the execution of RAPID III.
- Execute the HSNRA in calendar year 2010 - The HSNRA will inform strategy formulation and strategic decision-making by the Nation's homeland security leaders. This includes continuous DHS and interagency briefs, and State and local workshops with each of the FEMA regions. The HSNRA will:
  - Identify homeland security risks, including their likelihoods and consequences, to the Nation's strategic interests

- Analyze the identified strategic homeland security risks to produce a capstone document that includes a relative assessment of the risks and a comprehensive understanding of the drivers and conditions influencing those risks
- Identify strategic opportunities for managing these risks in order to improve security and resiliency across the homeland security enterprise
- Continue to build the Integrated Risk Management (IRM) Framework by developing an IRM policy statement for the Secretary to sign and an IRM Directive for the Department, as well as supporting implementing documents and instructions. These policy and guidance documents will help to operationalize the IRM Framework by further defining risk management priorities, and roles, responsibilities, and specific activities designed to enhance DHS' ability to lead the national homeland security risk management effort.
- Assign relative risk level to the 5,000+ special events submitted to DHS in an annual State and local data call; present results to the SEWG co-chairs. In addition:
  - Work with the Office of Intergovernmental Affairs to complete initial voluntary 2010 data call to State, local, tribal, and territorial event contributors and conduct analysis of the events
  - Chair the SEWG Risk Methodology Committee, conducting meetings as required
  - Co-chair the Risk Analysis Advisory Council and conduct ongoing analysis of additional risk data for new events and updated risk information for existing events and provide reports to the SEWG co-chairs
  - Conduct annual review of the Special Event Assessment Rating methodology and identification of opportunities to (1) improve the methodology to provide better information to the SEWG and (2) better align with risk analysis best practices; report findings to the SEWG co-chairs
- Provide risk analytic expertise and support to DHS components and HQ elements as requested. RMA is planning to provide technical assistance to the following programs:
  - GAO Draft Report: “Greater Attention to Key Practices Would Improve the Federal Protective Service’s Approach to Facility Protection” GAO-09-644SU (543230) - **GAO Recommendation 1:** “Instruct the Director of FPS to provide the Secretary with regular updates, on a mutually agreed-to schedule, on the status of RAMP and the National Countermeasures Program, including the implementation status of deliverables, clear timelines for completion of tasks and milestones, and plans for addressing any implementation obstacles.” DHS responded to GAO that FPS will continue to coordinate the methodological aspects of RAMP with RMA.
  - NPPD 60-Day Letter input for GAO 09-492 Final Report “Transportation Security: Comprehensive Risk Assessments and Stronger Internal Controls Needed to Help Inform TSA Resource Allocation.”

- In collaboration with its partners across DHS, RMA is working to help State, local, tribal, and territorial partners, including Fusion Centers, develop consistent risk management capabilities based on sound risk principles and processes. To that end, RMA is leading, in collaboration with FEMA, the development of a Comprehensive Preparedness Guide (CPG) focused on risk management. This effort will involve regional workshops to solicit a diverse set of perspectives (regional, functional, domain). The series will provide State and local jurisdictions and Fusion Centers with guidance on how to conduct analysis and build and achieve processes to manage their homeland security risks.
- RMA's risk management communications program will work to unify the risk communications activities and programs across the homeland security enterprise into an integrated strategy. The primary focus for this effort is to ensure clear and effective communications on risk and risk management developments across the enterprise.
- Produce additional risk management guidelines to continue to support the formalized training and education of homeland security risk practitioners. They will be reviewed and updated on an annual basis to ensure they remain an accurate reflection of, and relevant to, DHS risk management practice. Planned guideline topic areas include, but are not limited to: Modeling and Simulation, Expert Elicitation, Risk Communication, and Estimating Terrorism Threat Likelihood.
- Manage and lead the administration and operation of the RSC
- Provide technical risk analytical expertise and assistance for homeland security stakeholders as requested
- Produce strategic issue papers to serve as a forum to identify and assess strategic risk management issues facing the homeland security enterprise and provide decision-makers insight and recommendations to address these issues
- Continue to develop the Department's risk lexicon
- Begin to frame risk management approaches, analysis, and tools to support deliberate and crisis planning for homeland security operations (e.g. Fusion Centers, Protective Security Advisors)
- Complete the risk management study with NAS

#### FY 2011 Planned Accomplishments

- Modify the Homeland Security National Risk Assessment methodology as required
- Conclude RAPID III and incorporate the results to refine the methodology for the next RAPID iteration; prepare for application to inform the DHS's annual PPBE cycle of resource allocation decisions, including the FY 2013-2017 IPG and the process for developing the RAP and RAD
- Develop a risk analysis capability for contingency and crisis action planning
- Develop training modules for Strategic Risk Analysis for DHS components as well as State and local stakeholders
- Provide risk analytical tools to State and locals to assist them in conducting regional and local strategic risk assessments

- Continue to establish and formalize capability to provide technical assistance and support for DHS components and other homeland security stakeholders
- Provide general risk analytic expertise and support to DHS components and Headquarters elements as requested
- Continue the development and adoption of DHS risk management guidelines to serve as primers for DHS risk analysis practitioners on tactics, techniques, and procedures related to homeland security risk
- Manage and lead the administration and operation of the RSC.
- Continue to develop the Department's risk lexicon
- Continue the development of risk management approaches, analysis, and tools to support deliberate and crisis planning for homeland security operations. RMA will work with its partners in DHS to provide guidance and well as direct operational planning support to DHS components and offices, to support efforts such as execution of contingency planning, national exercises, and capability development planning.
- Continue to support FEMA and advance the CPG focus on risk management

## IV. Program Justification Changes

**Department of Homeland Security  
National Protection & Programs Directorate  
Management and Administration  
Directorate Administration  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** DHS Data Center Migration  
PPA: Directorate Administration  
Program Increase: Positions 0.0, FTE 0.0, Dollars \$2000.0

### Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							145	145	34,347
Program Increase							-	-	2,000
<b>Total Request</b>	<b>71</b>	<b>56</b>	<b>41,385</b>	<b>104</b>	<b>104</b>	<b>34,682</b>	<b>145</b>	<b>145</b>	<b>36,347</b>

### Description

FY 2011 requested funding will support the management of the NPPD data center migration for the continuation of system and application migration to the two DHS Enterprise Data Centers. This includes:

- Support for NPPD management, planning, and coordination of engineering activities associated with the discovery, migration, transition planning, and scheduling activities for NPPD systems/applications that will be migrating to the DHS Data Centers in FY 2011
- Component-level subject matter expert and engineering support to assist in systemic challenges and processes that cross multiple NPPD offices and systems as they migrate to the DHS Data Centers

### Justification

In FY 2011, NPPD will have multiple systems across Cyber Security Coordination, US-VISIT, and Infrastructure Protection, as well as COOP/disaster recovery capabilities in various stages of migration into the two DHS Data Centers. In order to ensure coordination and execution, component-level oversight and planning is required to ensure

outcomes at the office/program/system level, and enhanced coordination with DHS OCIO and the Data Center-managed service providers.

**Impact on Performance**

NPPD data center consolidation efforts will enhance DHS IT security posture, improve information sharing with stakeholders, reduce costs, and increase operational efficiencies over time.

**Department of Homeland Security  
National Protection & Programs Directorate  
Management and Administration  
Risk Management & Analysis  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 1:** RMA Technical Assistance and Support  
PPA: Risk Management & Analysis  
Program Decrease: Positions 0.0, FTE 0.0, Dollars \$-152.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							39	38	9,942
Program Decrease							-	-	(152)
<b>Total Request</b>	<b>11</b>	<b>11</b>	<b>9,581</b>	<b>25</b>	<b>25</b>	<b>9,895</b>	<b>39</b>	<b>38</b>	<b>9,790</b>

**Description of Item**

The program decrease will reduce RMA’s technical assistance and support efforts in FY 2011. RMA provides risk management technical experts to help Federal, State, and local personnel develop and/or apply risk assessment/management concepts, methods, tools, and resulting data.

Examples of RMA technical assistance provided in FY 2009 and planned/in-process in FY 2010 include:

- **IECGP:** RMA supported FEMA’s Grant Programs Directorate in the development of an “all-hazards” risk model for the IECGP. An “all-hazards” model is one of the implementing recommendations of the 9/11 Commission Act of 2007. This model addressed both manmade and natural disasters.
- **Target Capability List – Risk Management:** RMA and FEMA’s National Preparedness Directorate jointly worked on a target capability for risk management. RMA led three workshops, hosted by FEMA, with State and local officials to build the target capability.
- **Office of Policy, Cyber:** In support of the Director of Cyber Security Policy within the DHS Office of Policy, RMA completed a preliminary assessment of cybersecurity risk. This assessment was coordinated with the NPPD Office of Cyber Security and Communications.
- In collaboration with FEMA and with its partners across DHS, RMA is working to help State, local, tribal, and territorial partners, including Fusion Centers, to develop risk management capabilities based on sound risk principles and processes. To that end, RMA is planning to lead, in collaboration with FEMA,

the development of a Comprehensive Preparedness Guide (CPG) series on risk management.

- GAO Draft Report: “Greater Attention to Key Practices Would Improve the Federal Protective Service’s Approach to Facility Protection” GAO-09-644SU (543230) - **GAO Recommendation 1:** “Instruct the Director of the Federal Protective Service to provide the Secretary with regular updates, on a mutually agreed-to schedule, on the status of RAMP and the National Countermeasures Program, including the implementation status of deliverables, clear timelines for completion of tasks and milestones, and plans for addressing any implementation obstacles.” DHS responded to GAO that FPS will continue to coordinate the methodological aspects of RAMP with RMA.
- RMA is providing 60-Day Letter input for GAO 09-492 Final Report “Transportation Security: Comprehensive Risk Assessments and Stronger Internal Controls Needed to Help Inform TSA Resource Allocation.”

### **Justification**

The execution RAPID and the HSNRA will require the majority of the RMA-requested FY 2011 funding, and the level of technical assistance and support that RMA provides to stakeholders will be reduced. RMA must continue to focus on the priority requirement for the Department – strategic integrated risk analysis capability through the execution of the RAPID and the HSNRA. These two programs are critical to the strategic planning and programming processes of the Department. Any remaining available staff time or resources will focus first on continuing support for any open technical assistance items listed above and then on any new requests based on the priority/urgency of the request.

### **Impact on Performance**

The Department continues to work toward a consistent application and integration of risk management methodologies and is in the process of determining how to resource RMA to provide Departmental components direct technical assistance. This decrease to the current technical assistance capability reduces the ability to integrate the Departmental risk assessment practices and management information consistently across the components. Integrated risk management addresses complex and crosscutting homeland security risks and no single entity within or outside of the Department can effectively balance these risks independently. This effort reflects concerted Departmental and national effort to integrate a wide range of homeland security missions and activities to manage risk to secure the homeland.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
National Protection and Programs Directorate  
Management and Administration  
Justification of Proposed Changes in Management and Administration  
Appropriation Language**

For salaries and expenses of the Office of the Under Secretary for the National Protection and Programs Directorate, support for operations, information technology, and the Office of Risk Management and Analysis, \$[44,577,000] **46,137,000**: Provided, That not to exceed \$5,000 shall be for official reception and representation expenses.

Explanation of Change:

No substantive changes proposed.

### PPA Mission Statement

The National Protection and Programs Directorate (NPPD) Directorate Administration includes the Office of the Under Secretary, the Office of Resource Administration, the Office of Budget and Financial Management, the Office of Information Management, the Office of Communications and Public Affairs, and the Office of Information Technology.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	6,406	10,893	14,910	4,017

The FY11 Request includes \$19,711,000 for salaries and benefits for 145 FTE; an increase of \$5,114,000 for federal staffing realignment of 41 FTE; \$196,000 in pay increases over the FY10 request.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.5 Other personnel compensation	128	217	298	81

See note in 11.1

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
12.1 Civilian personnel benefits	1,935	3,290	4,502	1,212

See note in 11.1

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
21.0 Travel and transportation of persons	88	243	243	-

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY11 request includes \$243,000 for federal travel, no change from the FY10 enacted.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
22.0 Transportation of things	26	-	-	-

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.1 Rental payments to GSA	6,136	2,613	2,636	23

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY11 Request of \$2,636,000 includes an increase of \$23,000 over the FY10 enacted to cover annual rent escalations.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.3 Communications utilities and miscellaneous charges	132	409	409	-

Communications, Utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY11 request for \$409,000 reflects no change from the FY10 enacted.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.1 Advisory and assistance services	13,001	8,140	2,472	(5,668)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY11 request is \$2,472,000, which includes an offset of \$5,114,000, for Federal staffing realignments of 41 FTE and an efficiency of \$554,000 associated with the realignment.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	46	510	510	-

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY11 request of \$510,000 reflects no change from the FY10 enacted.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.3 Purchases of goods & svcs. from Gov't accounts	10,510	8,362	10,362	2,000

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2011 request of \$10,362,000 reflects a \$2,000,000 increase over the FY 2010 request to cover the costs associated with NPPD's continued migration of systems and applications to the two DHS data centers, which NPPD will fund through the DHS Working Capital Fund.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>25.7 Operation and maintenance of equipment</b>	1,984	-	-	-

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY11 request reflects no change over the FY10 enacted.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>26.0 Supplies and materials</b>	195	5	5	-

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY11 request of \$5,000 reflects no increase in Supplies & Materials over the FY 2010 enacted.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>31.0 Equipment</b>	799	-	-	-

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY11 request reflects no change from the FY10 enacted.

**BUDGET REQUEST AND SUPPORTING INFORMATION**  
**Infrastructure Protection and Information Security**

**I. Appropriation Overview**

**A – Mission Statement for Infrastructure Protection and Information Security**

**Infrastructure Protection**

The Office of Infrastructure Protection (IP) leads the coordinated national effort to reduce risk to our critical infrastructure and key resources posed by acts of terrorism and enables national preparedness, timely response, and rapid recovery in the event of an attack, natural disaster, or other emergency.

**Identification and Analysis** – The Information and Analysis mission area includes projects and activities that support identification, prioritization, and protection of the Nation’s critical infrastructure and key resources, as well as assessment of critical infrastructure and key resource vulnerabilities, consequences and risks. These activities provide a comprehensive inventory of the Nation’s critical infrastructure and key resource assets. The program collects vulnerability and consequence information required to produce comprehensive asset and system risk analyses. They enable analysis of infrastructure interdependencies and cascading effects through strategic and tactical risk analysis for critical infrastructure and key resource protection, simulation and modeling, and intelligence fusion with information from practical field assessments.

**Coordination and Information Sharing** – The Coordination and Information Sharing mission area includes projects and activities that maximize the ability of government and private sector partners at all levels to assess risks, coordinate programs and processes, and execute risk mitigation programs and activities. Coordination and Information Sharing is responsible for executing the National Infrastructure Protection Plan and coordinating the efforts of the 18 sectors to implement and execute their Sector-Specific Plans. These activities foster information sharing and coordination between individual sector governance structures as well as facilitating development of critical infrastructure partner governance and coordination structures and models.

**Mitigation Programs** – The Mitigation Programs mission area includes voluntary and regulatory projects and activities, which enable security partners to identify and mitigate vulnerabilities, implement protective measures and report on risk mitigation activities, and increase preparedness and resilience for facilities, systems, and surrounding communities. They support public awareness efforts; facilitate the sharing of critical infrastructure and key resource protection-related best practices and lessons learned; and enable infrastructure protection planning, readiness, and incident management.

Infrastructure Protection derives its mission from the following statutes and regulations:

- Homeland Security Act of 2002
- Intelligence Reform and Terrorism Prevention Act of 2004
- Homeland Security Presidential Directive-7, “Critical Infrastructure Identification, Prioritization, and Protection”
- Section 550 of the Fiscal Year 2007 Homeland Security Appropriations Act
- Section 563 of FY 2008 Homeland Security Appropriations Act
- Energy Policy Act of 2005
- Homeland Security Presidential Directive-19, “Combating Terrorist Use of Explosives in the United States”
- Other Executive Orders, Homeland Security Presidential Directives and National Security Presidential Directives.

### **Cybersecurity and Communications**

The Office of Cybersecurity and Communications reduces risk to the Nation’s communication and information technology infrastructures, enables timely response and recovery of these infrastructures under all circumstances, and coordinates national security and emergency preparedness communications planning and provision for the Federal Government. Cybersecurity and Communications includes: *the National Cyber Security Division, the Office of Emergency Communications, and the National Communications System.*

The National Cyber Security Division partners with private sector, government, military, and intelligence stakeholders to conduct risk assessments and mitigate vulnerabilities and threats to information technology assets and activities affecting the operation of the civilian government critical cyber infrastructures. The National Cyber Security Division provides cyber threat and vulnerability analysis, early warning, and incident response assistance for public and private sector constituents. In addition, the National Cyber Security Division carried out the majority of DHS’ responsibilities under the Comprehensive National Cybersecurity Initiative. The National Cyber Security Division is comprised of the following congressional appropriated programs: *United States Computer Emergency Readiness Team (US-CERT), Strategic Initiatives, and Outreach and Programs.*

**United States Computer Emergency Readiness Team** – US-CERT leverages technical competencies in Federal network operations and threat analysis centers to develop knowledge and knowledge management practices supporting Federal stakeholders as they make key operational and execution decisions. It analyzes and reduces cyber threats and vulnerabilities, disseminates cyber threat warning information, and coordinates with partners and customers to achieve shared cyber situational awareness related to the Nation’s cyber infrastructure. US-CERT addresses the need for a single, accountable focal point for achieving cybersecurity throughout the Federal enterprise by utilizing a holistic approach to Federal government network security, enabling cybersecurity challenges to be addressed in a manner that maximizes value and minimizes risks associated with technology and security investments. US-CERT also manages the development, acquisition, deployment, and personnel support required to implement the National

Cybersecurity Protection System, operationally known as EINSTEIN. Additionally, US-CERT addresses the need to build a skilled cyber workforce for today's and tomorrow's Federal government; provides a set of comprehensive resources that can be used to appropriately manage supply chain risk across the lifecycle of networks, systems, and components; and oversees the implementation of national cybersecurity policies and ensures appropriate resources are available to support the mission and its specialized information technology systems.

**Strategic Initiatives** – Strategic Initiatives establishes mechanisms for Federal partners to deploy standardized tools and services at a reduced cost, paving the way for a collaborative environment that enables sharing of best practices and common security challenges and shortfalls. Strategic Initiatives develops and promulgates sound practices for software developers, information technology security professionals and other critical infrastructure and key resources stakeholders, and collaborates with the public and private sectors to assess and mitigate risk to the Nation's cyber critical infrastructure and key resources.

**Outreach and Programs** – Outreach and Programs promotes opportunities to leverage the cybersecurity research and development investments of public and private industry partners. It promotes cybersecurity awareness among and within the general public and key communities, maintains relationships with governmental cybersecurity professionals to share information about cybersecurity initiatives, and develops partnerships to promote collaboration on cybersecurity issues. Outreach and Programs also supports the National Cyber Security Division mission by establishing cybersecurity strategy and planning efforts through integrating resource management, human capital, facilities, performance management, and policy development and implementation into the broad array of issues addressed by the National Cyber Security Division.

**Office of Emergency Communications** – The Office of Emergency Communications supports and promotes the ability of emergency response providers and government officials to continue to communicate in the event of natural disasters, acts of terrorism, or other man-made disasters. The Office of Emergency Communications works to ensure, accelerate, and attain interoperable emergency communications nationwide.

The National Communications System was established by President Kennedy to bring about a single unified national communication system that allows Federal, State and local branches of government the ability to communicate during emergencies. The National Communications System is comprised of the following programs: *Priority Telecommunications Services, Critical Infrastructure Protection, Programs to Study and Enhance Telecommunications, and Next Generation Network.*

**Priority Telecommunications Services** – The Priority Telecommunications Services (PTS) program provides specially designed telecommunications services to the national security and emergency preparedness user community during natural or man-made disasters when conventional communications services are ineffective.

These telecommunication services are used to coordinate response and recovery efforts and, in severe conditions, assist with Continuity of Operations and Government. Also included within PTS are the Customer Service Branch (also known as Industry-Government Interagency Processes, IGIP) which manages the Committee of Principles, a confederation of 24 departments, agencies; industry partnerships through the National Security Telecommunications Advisory Committee; and Sector Specific Agency responsibilities for communication under HSPD-7.

**Next Generation Network** – The Next Generation Network program is a technology initiative to maintain and migrate legacy priority voice telecommunications features from the current public switched telephone network (PSTN), which is the current industry base to an Internet protocol (IP) based system, to which the industry is rapidly transitioning their voice services. The Office of the Manager, National Communication System is working with industry to apply priority to data and video applications as technology becomes available.

**Programs to Study and Enhance Telecommunications** – The Programs to Study and Enhance Telecommunications (PSET) program develops models and conducts technical analyses of public communications infrastructures and equipment to provide resiliency and identify vulnerabilities in new communications in the event of natural or man-made disasters. In accordance with National Presidential Security Directive – 51/ Homeland Security Presidential Directive - 20, PSET is developing a Continuity Communication Architecture (CCA). PSET also works on Committee on Foreign Investment in the United States (CFIUS) to review national security implications of foreign investments of U.S. companies. PSET works with national and international non-government standards bodies to ensure that evolving commercial standards address the technical requirements of national security and emergency preparedness communications.

**Critical Infrastructure Protection** – The Critical Infrastructure Protection program ensures the continued availability of national security and emergency preparedness telecommunications services under all circumstances, including emergency, attack, recovery, and reconstitution. The program includes: National Coordinating Center Operations (which includes the 24x7 Watch); Critical Infrastructure Protection Operations; Plans and Policy; Training and Exercises; Network Security Information Exchanges (NSIE); and Telecommunications Service Priority.

## **B – Budget Activities**

### **Infrastructure Protection**

In FY 2011, NPPD requests \$333.778 million for Infrastructure Protection, including 734 positions/700 FTE. This represents a decrease of \$13.525 million from the FY 2010 Enacted budget of \$347.303 million.

**Identification and Analysis** – In FY 2011, NPPD requests \$82.837 million for the Identification and Analysis program, including 134 positions/127 FTE. This represents a decrease of \$7.773 million below the FY 2010 Enacted budget of \$90.610 million. These funds support the vulnerability assessments, infrastructure sector analysis, infrastructure data management, infrastructure visualization, and infrastructure information collection projects.

**Coordination and Information Sharing** – In FY 2011, NPPD requests \$52.515 million for the Coordination and Information Sharing program, including 89 positions/86 FTE. This represents a decrease of \$7.067 million from the FY 2010 Enacted budget of \$59.582 million. These funds support the management and facilitation of critical infrastructure and key resources partnerships, operation and coordination of the associated Information Sharing Environment, coordination and management of the National Infrastructure Protection Plan and 18 supporting Sector-Specific Plans, preparation of the National Annual Report, development of National Infrastructure Protection Plan activity performance metrics, coordination of the Sector Annual Reports, development and execution of a variety of education/training/outreach programs, and Infrastructure Protection’s Management and Planning projects.

**Mitigation Programs** – In FY 2011, NPPD requests \$198.426 million, for the Mitigation Programs, including 511 positions/487 FTE. This represents an increase of \$1.315 million over the FY 2010 Enacted budget of \$197.111 million. These funds support the coordination and management of the Department’s regulatory authority over high-risk chemical facilities and ammonium nitrate; bombing prevention activities; protective security advisor support; Sector-Specific Agency responsibilities; and incident management, contingency, and readiness activities.

### **Cybersecurity and Communications**

In FY 2011, NPPD requests \$532.186 million for Cybersecurity and Communications, including 498 positions/462 FTE. This represents a decrease of \$19.927 million from the FY 2010 Enacted budget of \$552.113 million.

Within the National Cyber Security Division:

**United States Computer Emergency Readiness Team** – In FY 2011, NPPD requests \$314.989 million for the United States Computer Emergency Readiness Team, including 288 positions / 263 FTE. This represents a decrease of \$8.640 million over the FY 2010 Enacted budget of \$323.629 million. These funds support NPPD’s role in the Comprehensive National Cybersecurity Initiative (CNCI) and the other cybersecurity activities.

**Strategic Initiatives** – In FY 2011, NPPD requests \$56.880 million for Strategic Initiatives, including 38 positions / 29 FTE. This represents a decrease of \$7.299

million over the FY 2010 Enacted budget of \$64.179 million. These funds support NPPD's role in cybersecurity activities.

**Outreach and Programs** – In FY 2011, NPPD requests \$6.875 million for Outreach and Programs, including 16 positions / 14 FTE. This represents a decrease of \$2.471 million over the FY 2010 Enacted budget of \$9.346 million. These funds support NPPD's role in cybersecurity activities.

**Office of Emergency Communications** – In FY 2011, NPPD requests \$44.524 million for the Office of Emergency Communications, including 58 positions/58 FTE. This represents a decrease of \$0.536 million over the FY 2010 Enacted budget of \$45.060 million. These funds will support and promote the ability of emergency response providers and Federal Officials to continue to communicate in the event of natural disasters, acts of terrorism, or other manmade disasters, and to ensure, accelerate, and attain interoperable Emergency Communications nationwide.

Within the National Communications System:

**Priority Telecommunications Services** – In FY 2011, NPPD requests \$56.283 million for Priority Telecommunications Services, including 41 positions/FTE. This represents a decrease of \$0.490 million from the FY 2010 Enacted budget of \$56.773 million. These funds support the operation of the Government Emergency Telecommunications System, Wireless Priority Service, Special Routing Agreement Service, the Industry-Government and Interagency Processes, and funds for the Assistant Secretary, Cyber Security and Communications.

**Next Generation Network** – In FY 2011, NPPD requests \$21.095 million for the Next Generation Network. This represents a decrease of \$3.905 million from the FY 2010 Enacted budget of \$25.000 million. These funds support the transition of national security and emergency preparedness communications systems from the public switched networks to the next generation networks.

**Programs to Study and Enhance Telecommunications** – In FY 2011, NPPD requests \$16.657 million for Programs to Study and Enhance Telecommunications, including 28 positions/FTE. This represents a decrease of \$0.117 million from the FY 2010 Enacted budget of \$16.774 million. These funds support modeling, simulation, technology assessments, National Security and Emergency Preparedness standards, and vulnerability assessments on advanced technologies and converged networks.

**Critical Infrastructure Protection Program** – In FY 2011, NPPD requests \$14.884 million for the Critical Infrastructure Protection programs, including 29 positions/FTE. This represents an increase of \$3.532 million over the FY 2010 enacted budget of \$11.352 million. These funds support National Coordinating Center, Critical Infrastructure Protection Operations, planning, Network Security Information Exchange, and the Telecommunications Service Priority program.

## **C – Budget Request Summary**

In FY 2011, NPPD requests 1,232 positions/1,162 FTE and \$865.965 million for Infrastructure Protection and Information Security. This represents an increase of 97 FTP / 138 FTE and a decrease of \$33.451 million from the FY 2010 Enacted budget of \$899.416 million. The FTP and FTE amounts include an additional 51 FTP/106 FTE funded through offsets from program/contract dollars.

### **Adjustments-to-Base**

- Annualization of \$5.233 million for 38 positions received in FY 2010 (22 Infrastructure Security Compliance, 15 US-CERT, 1 Strategic Initiatives);
- Annualization of the calendar year 2010 pay increase: \$0.426 million;
- Calendar year 2011 pay increase: \$1.462 million;
- 51 FTP/106 FTE funded through offsets from program/contract dollars;
- GSA Rent inflation increase: \$0.187 million;
- A non-recurring adjustment of (\$8.000 million) for data center migration efforts;
- A transfer of \$4.000 million to move the National Computer Forensic Institute to Federal Law Enforcement Training Center.

### **Program Changes**

**Identification and Analysis** – A net program decrease of \$8.002 million and an increase of 4 positions and decrease of 2 FTE. The program changes include: a decrease of 5 FTE and \$0.700 million to salaries and benefits across the PPA based on a trend analysis of historic filled rates; an increase of \$1.588 million and 4 positions / 2 FTE for Information Technology Enterprise Modernization for the Infrastructure Information Collection Project; a decrease of \$3.697 million to Vulnerability Assessments program funding; a decrease of \$1.013 million to Infrastructure Visualization to scale down CWIN capabilities; a \$4.163 million decrease to Infrastructure Sector Analysis program funds; and a \$0.017 million decrease to Infrastructure Data Management program funds.

**Coordination and Information Sharing** – A net program decrease of \$7.275 million and 3 FTE. The program changes include: a decrease of 3 FTE and \$0.419 million to salaries and benefits across the PPA based on a trend analysis of historic filled rates; a decrease of \$10.021 million to CIKR Partnerships and Information Sharing program funds; a decrease of \$4.088 million to NIPP Management program funds; and a net increase of \$7.253 million to Management, Planning, and Administration program funds.

**Mitigation Programs** – A net program decrease of \$2.546 million, an increase of 5 positions, and a decrease of 19 FTE. The program changes include: a decrease of 23 FTE and \$2.998 million to salaries and benefits across the PPA based on a trend analysis of historic filled rates; an increase of \$1.935 million and 5 positions / 4 FTE for the Sector Specific Agency Management Critical Manufacturing Sector. Program decreases include

a decrease of \$0.099 million to Infrastructure Coordination and Incident Management program funds; a decrease of \$0.052 million to Protective Security Advisor program funds; a decrease of \$0.285 million to Infrastructure Security Compliance program funds; a decrease of \$0.047 million to the Office of Bombing Prevention program funds; and a decrease of \$1.000 million for the Philadelphia Infrastructure project.

**United States Computer Emergency Readiness Team** – A net program increase of \$0.984 million and an increase of 37 positions / 19 FTE. Program changes include: a decrease of \$13.543 million across multiple US-CERT projects to fund higher priority DHS initiatives; an increase of \$5.000 million and 26 positions / 13 FTE to advance Federal coordination of cybersecurity-related activities; and an increase of \$9.528 million and 11 positions / 6 FTE to enable the implementation of Assessment, Testing and Analysis Capability program that intends to test and measure departments' and agencies' compliance with laws, regulations, policies, and standards relating to information security, and also to establish and maintain a holistic, enterprise view of the Federal government's current security state.

**Strategic Initiatives** – A net program decrease of \$7.492 million.

**Outreach and Programs** – A net program decrease of \$2.500 million.

**Office of Emergency Communications** – A net program decrease of \$0.686 million. Program changes include an increase of \$1.000 million for the Public Safety Broadband Interoperability program in Federal Communication Services, and decreases of \$1.000 million for SEARCH funding, \$0.566 million for Multi-Jurisdictional Communications Services and \$0.120 million for Policy, Planning and Analysis.

**Priority Telecommunications Services** – A net program decrease of \$0.640 million as a result of increased program efficiencies.

**Next Generation Network** – A net program decrease of \$3.905 million, including a program decrease of \$3.576 million as a result of funding higher priority activities and a program decrease of \$0.329 million as a result of increased program efficiencies.

**Programs to Study and Enhance Telecommunications** – A net program decrease of \$0.172 million as a result of increased program efficiencies.

**Critical Infrastructure Protection** – A net program increase of \$3.475 million, including a program increase of \$3.576 million to support the National Coordinating Center 24x7 Watch and Title Globe and a program decrease of \$0.101 million as a result of increased program efficiencies.

## II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

**Department of Homeland Security**  
**National Protection & Programs Directorate**  
**Infrastructure Protection and Information Security**  
 Summary of FY 2011 Budget Estimates by Program Project Activity

FY 2011 Request  
 (Dollars in Thousands)

Program Project Activity	FY 2009		FY 2010		FY 2011		Increase(+) or Decrease(-) for FY 2011

### III. Current Services Program Description by PPA

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
Identification & Analysis  
Program Performance Justification**  
(Dollars in Thousands)

#### PPA: Identification & Analysis

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>83</b>	<b>75</b>	<b>79,232</b>
<b>2010 Enacted</b>	<b>130</b>	<b>130</b>	<b>90,610</b>
2011 Adjustments-to-Base	-	-	229
<b>2011 Current Services</b>	<b>130</b>	<b>130</b>	<b>90,839</b>
2011 Program Change	4	(3)	(8,002)
<b>2011 Total Request</b>	<b>134</b>	<b>127</b>	<b>82,837</b>
Total Change 2010 to 2011	4	(3)	(7,773)

In FY 2011, NPPD requests \$82.837 million for the Identification and Analysis program, including 134 positions/127 FTE. This represents a decrease of \$7.773 million below the FY 2010 enacted budget of \$90.610 million. These funds support the vulnerability assessments, infrastructure sector analysis, infrastructure data management, infrastructure visualization, and infrastructure information collection projects.

The FY 2011 request includes adjustments to base of \$0.229 million for pay inflation. NPPD proposes an increase of \$1.588 million and 4 positions/2 FTE for the Infrastructure Information Collection Project for Information Technology Enterprise Modernization. Program decreases include \$0.700 million to salaries and benefits to reduce 5 FTE across the PPA based on historical fill rates; \$3.697 million to Vulnerability Assessments program funds; \$4.163 million to Infrastructure Sector Analysis program funds; \$1.013 million to Infrastructure Visualization program funds; and \$0.017 million to Infrastructure Data Management program funds.

## CURRENT SERVICES PROGRAM DESCRIPTION

\$ thousands	FY 2010 Enacted		FY 2011 Request	
Personnel Costs	\$	16,503	\$	16,453
Program Costs	\$	74,107	\$	66,384
<b>Total Costs</b>	<b>\$</b>	<b>90,610</b>	<b>\$</b>	<b>82,837</b>

Identification and Analysis mission supports Infrastructure Protection's capability to identify, prioritize, and protect the Nation's critical infrastructure and key resources, assess critical infrastructure and key resource vulnerabilities and consequences, prioritize assets and systems, and analyze risk. These efforts provide a comprehensive inventory of the Nation's critical infrastructure and key resources and a capability to collect the vulnerability and consequence information required to conduct incident management and response activities necessary for comprehensive asset and system risk analyses. Efforts include critical infrastructure and key resources-related simulation and modeling as well as intelligence fusion with information from field assessments. This information enables analysis of interdependencies and cascading effects. Identification and Analysis' five Projects include: *Vulnerability Assessments, Infrastructure Sector Analysis, Infrastructure Visualization, Infrastructure Data Management, and Infrastructure Information Collection*. The descriptions below provide more definition and clarity of the capabilities provided by each of the Projects.

### *Vulnerability Assessments*

\$ thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	16	16	\$2,275	15	16	\$2,214	-1	0	-\$61
Program Costs			\$24,246			\$20,549			-\$3,697
<b>Total</b>	<b>16</b>	<b>16</b>	<b>\$26,521</b>	<b>15</b>	<b>16</b>	<b>\$22,763</b>	<b>-1</b>	<b>0</b>	<b>-\$3,758</b>

The Vulnerability Assessments Project is an Office of Infrastructure Protection-led collaborative effort between the Federal, State, local, and private sectors to identify vulnerabilities and enhance the security and resilience of the Nation's Level 1 and Level 2 (formerly referred to as the Tier 1 and Tier 2 list—nomenclature change was made to differentiate between this effort and facilities covered by the Chemical Facility Anti-Terrorism Standards) critical infrastructure and key resources, and provide capabilities to identify and prioritize infrastructure at the State and Sector levels. The Project fulfills the requirements of Homeland Security Presidential Directive 7 by coordinating efforts among Federal, State, and local governments and the private sector to protect the Nation's critical infrastructure and key resources, as well as supporting implementation of the National Infrastructure Protection Plan and the National Response Framework.

The Vulnerability Assessment Project conducts specialized field assessments to identify vulnerabilities of Level 1 and Level 2 critical infrastructure and key resources, providing

the foundation for the risk-based implementation of protective programs designed to prevent, deter, and mitigate the risk of a terrorist attack while enabling timely, efficient response and restoration in an all-hazards post-event situation. Current efforts cover the spectrum of field teams conducting single Site Assistance Visits and Buffer Zone Plans to larger-scale assessments of infrastructure “clusters,” systems and regions via the interagency Regional Resiliency Assessment Program. The Regional Resiliency Assessment Program examines vulnerabilities, threats, and potential consequences from an all-hazards perspective to identify dependencies, interdependencies, cascading effects, resiliency characteristics, and security gaps, and provide a comprehensive analysis of a region’s critical infrastructure and key resources, and prevention and protection capabilities.

The Computer-Based Assessment Tool (CBAT) complements these assessments by integrating assessment data with 360 degree geospherical video and geospatial and hypermedia data of facilities, surrounding areas, routes and other areas of interest, creating an interactive visual guide of any location. This provides Federal, State and local law enforcement, emergency response personnel and critical infrastructure and key resources owners and operators with a computer-based, cross-platform tool that allows them to present data, make informed decisions quickly, and confidently respond to an incident.

Additionally, the Vulnerability Assessment Project, in cooperation with the Nuclear Regulatory Commission, conducts security consultations to analyze the vulnerabilities and threats to the locations of proposed nuclear reactors. The security consultations are mandated by Section 657 of the Energy Policy Act of 2005.

### *Infrastructure Sector Analysis*

\$ thousands	FY 2010			FY 2011			Change

<i>NISAC</i>			\$20,000			\$16,000			-\$4,000
Program Costs			\$30,299			\$26,136			-\$4,163
<b>Total</b>	<b>42</b>	<b>42</b>	<b>\$34,824</b>	<b>41</b>	<b>42</b>	<b>\$30,541</b>	<b>-1</b>	<b>0</b>	<b>-\$4,283</b>

The Infrastructure Sector Analysis project provides the integrated capability to conduct comprehensive, timely, actionable, and risk-informed assessments, modeling, simulation, and analysis to advance the Nation’s understanding of the dynamic risk landscape impacting critical infrastructure and key resources. The Infrastructure Sector Analysis project, through the Homeland Infrastructure Threat and Risk Analysis Center (HITRAC) and the National Infrastructure Simulation and Analysis Center (NISAC) analyzes and monitors risks to the Nation’s infrastructure and provides key public and private sector decision-makers with risk-informed analytic products that influence the prioritization of risk-reduction strategies. In addition to its analytic products, the Infrastructure Sector Analysis project also develops and deploys methodologies, tools, and technologies that

enable National Infrastructure Protection Plan implementation and other risk mitigation activities at the Federal, State, local, Tribal, and Territorial government and private-sector levels.

### *Infrastructure Visualization*

\$ thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	19	19	\$2,550	18	19	\$2,482	-1	0	-\$68

The Infrastructure Visualization project provides access to infrastructure information, geospatial tools, technologies, and methodologies to support planning, preparedness, and protection efforts and situational awareness. Infrastructure Visualization provides near real-time situational awareness of the Nation’s infrastructure status, critical infrastructure and key resources incident management information, and access to geospatial and information management tools. Critical infrastructure and key resources situational awareness is enhanced through the production of related geospatial products that support various operational activities of the Protective Security Advisors, Chemical Security Inspectors, Infrastructure Liaison Officers, and the Office of Infrastructure Protection’s contingency planning and incident management, as well as other organizations internal and external to the Department that require display or mapping of the Nation’s infrastructure.

### *Infrastructure Data Management*

\$ thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	27	27	\$3,628	26	27	\$3,531	-1	0	-\$97
Program Costs			\$4,196			\$4,179			-\$17
<b>Total</b>	<b>27</b>	<b>27</b>	<b>\$7,824</b>	<b>26</b>	<b>27</b>	<b>\$7,710</b>	<b>-1</b>	<b>0</b>	<b>-\$114</b>

Infrastructure Data Management Project (IDM) establishes common and consistent standards in the collection, data management, and protection of infrastructure data. This capability is critical in leading DHS efforts to protect data management systems and provide standardized, relevant, and customer-focused infrastructure information to homeland security partners. The IDM project establishes policies and standards to guide the infrastructure data collection, maintenance, storage, and sharing activities within IP. IDM takes a data management leadership role within IP on all issues related to infrastructure data to ensure development of integrated, coordinated, and efficient solutions that support the broader infrastructure protection community within the interagency community; State, local, territorial, and tribal governments; and the private sector. Specifically, the IDM project continues implementation of the CII Act of 2002 through the Protected Critical Infrastructure Information (PCII) Program. It ensures the efficient use of resources by establishing and managing a data collection requirements

process. It also establishes robust partnerships across Federal, State, and local governments, coordinates with the DHS Enterprise Data Management Office (EDMO), the U.S. Department of Justice (DOJ) National Information Exchange Model (NIEM), and the Geospatial Management Office (GMO) to establish standards for infrastructure data and establishes policies for infrastructure data quality, dissemination, and use.

***Infrastructure Information Collection Project***

\$ thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	26	26	\$3,525	27	30	\$3,820	1	4	\$295
Program Costs			\$12,231			\$13,398			\$1,167
<b>Total</b>	<b>26</b>	<b>26</b>	<b>\$15,756</b>	<b>27</b>	<b>30</b>	<b>\$17,218</b>	<b>1</b>	<b>4</b>	<b>\$1,462</b>

The Infrastructure Information Collection Project is a secure, government-owned capability for a risk-related infrastructure information collection repository that contains quantitative, asset-specific risk data for the assets within the 18 critical infrastructure and key resources sectors. The Infrastructure Information Collection Project integrates multiple infrastructure information data sources, including existing Departmental data tools, into one viable IT interface in order to offer a comprehensive package for data risk analysis through a protected access system that is easily accessible for both clients and end users. The DHS tools integrated into Infrastructure Information Collection Project include the Automated Critical Asset Management System (formerly referred to as the Constellation/Automated Critical Asset Management System), the Methodology Technical Implementation, which includes the Risk Self-Assessment Tool (formally the Voluntary Information Self-Assessment Tool), and Integrated Common Analytical Viewer. The Infrastructure Information Collection Project adheres to the Web-based, Service Oriented Architecture selected by the Department.

The Infrastructure Information Collection Project provides a standardized collection management capability to harmonize the collected data with DHS’ pre-existing data model(s); the integration of data standards to provide common and consistent information; a common information collection, maintenance, and update process; and a processing capability to fuse and disseminate information to infrastructure protection partners internal and external to DHS. By combining these features into a single, integrated system, the Infrastructure Information Collection Project allows the DHS and other infrastructure protection partners to prioritize data, to perform sector, cross-sector, geographic, and national risk analysis, and to view asset and sector interdependencies. By producing a composite record comprised of the highest quality attributes among a collection of internal and external databases, the investment will improve the quality and depth of infrastructure information available to a wide range of essential stakeholders, including senior DHS officials, Homeland Security Advisors, Sector Specific Agencies, asset owners, and other partners. Overall, the Infrastructure Information Collection Project’s incorporation of risk-based data standards and collection procedures will improve the analytical products of other programs within the IP, as well as those of external partners across the Nation. In performing its functions, the Infrastructure

Information Collection Project supports Homeland Security Presidential Directive 7, the National Infrastructure Protection Plan, and Public Law 110-53.

#### FY 2009 Identification and Analysis Accomplishments

- Developed a pre-construction assessment methodology, which can be utilized in the design phase of new critical infrastructure and key resource construction. This methodology assesses the vulnerabilities of the design, annotates the protective measures needed to mitigate vulnerabilities, and includes a cost analysis of enacting those protective measures.
- Expanded the focus of vulnerability assessments from primarily individual assets to emphasis on critical infrastructure and key resource “clusters,” regions, and systems through the Regional Resiliency Assessment Program. Conducted 5 Regional Resiliency Assessment Programs.
- Expanded the National Guard Vulnerability Assessment Program to increase the number of nationwide critical infrastructure and key resource vulnerability assessments from 315 to 450.
- Expanded Critical Infrastructure Red Team work, expanding to four additional sectors in 2009. In each of the four targeted sectors, Critical Infrastructure Red Team worked with the Sector-Specific Agencies, and the respective owners/operators, to enhance their awareness of operationally validated vulnerabilities, improve protective postures against these vulnerabilities, and identify those required capabilities where Federal assistance is needed, such as DHS Science & Technology development, law enforcement grants, and exercise coordination.
- Developed an enhanced Level 1/Level 2 program, identifying and prioritizing nationally significant assets. Worked with partners to provide prioritization and analysis during incident response. Began work to expand program by working with stakeholders to nominate assets and systems for individual Sector, State, and Territory Lists. Enhancements allow users to categorize the infrastructure and resources they submit as single assets, systems, and clusters; such distinctions will assist data analysts with researching the interdependencies between assets and asset groups.
- Established and implemented a Request for Information (RFI) process and standard operating procedure for handling IP RFIs. Collaborated with IP mission partners to synchronize efforts and leverage tools for managing and tracking RFIs.
- Improved the quality assurance and quality control process for reviewing infrastructure data received from IP mission partners. The methodology standardized data collected and increased the accuracy and completeness of the data being managed and disseminated by IICD.
- Enhanced and implemented infrastructure data standards, infrastructure data elements and standard infrastructure information requirements to enable information sharing and establish a common nomenclature across the critical infrastructure protection community.
- Developed and implemented a plan for modifying the current Level1/Level 2 program data collection process. The solution streamlines the current process, integrates IP user applications, provides continuous access to data to mission partners and increases the quality of data managed by IP.

- Established foundational data management documents that shape the framework for assisting IP in establishing data standards, information requirements, and operating procedures. The purpose of these documents is to help ensure the consistency and relevance of infrastructure data in support of homeland security and homeland defense missions.
- Produced the FY 2010 Critical Foreign Dependencies List and Executive Report for FY 2010, a comprehensive inventory of infrastructure located outside the United States that if disrupted or destroyed, would lead to loss of life in the United States, or critically affect the Nation's economic, industrial, or defense capabilities.
- Completed deployment of the Integrated Common Analytical Viewer (iCAV) NextGen Web-based geospatial analysis capability on the DHS unclassified network. Completed development of Web-based training for the iCAV tool suite to significantly increase the iCAV user base while achieving a significant cost savings over instructor-led training.
- Developed the first-ever joint geospatial map book with the National Geospatial-Intelligence Agency (NGA) in support of the 2009 Major League Baseball All-Star Game.
- Initiated the Homeland Infrastructure Foundation Level Data (HIFLD) to the Regions effort to deploy 24 infrastructure data and geospatial analysis subject matter experts to the eight Protective Security Advisor (PSA) Areas.
- Enhanced the Infrastructure Data Taxonomy application to improve the delineation of infrastructure attributes of interest and foster ongoing feedback from end users. The application includes a mapping function that crosswalks different versions of the infrastructure taxonomy to quickly highlight areas of change between the versions.
- Increased Protected Critical Infrastructure Information accredited entities by two Federal agencies and 10 States and established new information sharing partnerships that incorporate Protected Critical Infrastructure Information protections.
- Trained over 7,000 new authorized users in the procedures for handling, use, and safeguarding of Protected Critical Infrastructure Information.
- Completed Initial Operating Capability of the Integrated Data Warehouse to enable compilation and dissemination of information to infrastructure protection.
- Developed a framework and automated a systematic process for the collection and management of infrastructure information nationwide and achieved Initial Operating Capability for the Infrastructure Information Collection System.
- Achieved Initial Operating Capability for the For Official Use Only Infrastructure Information Collection System Development and Test Systems.
- Finalized the Automated Critical Asset Management System 2.3 software requirements for the next upgrade.
- Established an Automated Critical Asset Management System production environment at a DHS Data Center.
- Enhanced infrastructure protection and Critical Infrastructure and Key Resources Asset Protection Technical Assistance Program service by deploying the Automated Critical Asset Management System Web-based training courseware, which dramatically lowered training costs for the Infrastructure Information Collection Division and for 35 State and local partners by leveraging distributed learning technology.

- Conducted the annual Critical Infrastructure and Key Resources Asset Protection Technical Assistance Program conference and rolled out distance learning and Web-based training applications to meet State and local users' needs, including periodic refresher training for analysts.
- Developed and implemented a Learning Management System for the Automated Critical Asset Management System.
- Completed voluntary chemical risk assessment pilot project for the Chemical Sector and the development/implementation of the Risk Self-Assessment Tool module for arenas and stadiums for the Commercial Facilities Sector.
- Completed efforts to build risk and vulnerability assessment tools vital to DHS efforts to execute National Comparative Risk Assessment. Completed tools will include the Risk Self-Assessment Tool for the Commercial Facilities Sector, the Risk Assessment Methodology – Water tool, enhancement of the Security and Emergency Management System tool for the Water Sector, the Food and Agriculture Sector Criticality and Assessment Tool version 2.0 for the Food/Agriculture Sector, the Risk Assessment Methodology – Dams tool for the Dams Sector, and the voluntary chemical risk assessment pilot project for the Chemical Sector.

#### FY 2010 Identification and Analysis Planned Accomplishments

- Conduct approximately 450 vulnerability assessments through Site Assistance Visit assessments, Buffer Zone Protection Plans, and the Regional Resiliency Assessment Program with a focus on Level 1/Level 2 assets, regional resiliency, specific CIKR clusters, and National Security Special Events venues, utilizing the National Guard, as per the established Memorandum of Agreement, in coordination and collaboration with Federal, State, local, and private sector partners. Assessment results will be utilized to influence facility security; direct DHS grant dollars to address equipment gaps in local law enforcement; and identify trends across sectors.
- Conduct approximately 10 New Nuclear Reactor Security Consultations that independently identify vulnerabilities at new reactor sites which the Nuclear Regulatory Commission incorporates into overall security evaluation and identify mitigating protective measures.
- Conduct Regional Resiliency Assessments in Seattle, Washington; Boston, Massachusetts; Atlanta, Georgia; Las Vegas, Nevada; Amarillo/Hereford, Texas; and the Kanawha River Valley region in West Virginia.
- Refine the methodologies and processes used to develop the National Critical Foreign Dependencies List and Executive Report. Work with Federal and public/private sector partners to develop a comprehensive inventory of infrastructure located outside the United States that if disrupted or destroyed, would lead to loss of life in the United States, or critically affect the Nation's economic, industrial, or defensive capabilities. Complete risk and risk-informed assessments as necessary for assets and systems found on the National Critical Foreign Dependencies List.
- Evaluate gaps in incident response products; continually work towards building an improved set of self-initiated analytical products that anticipate IP's incident-related information requirements. For example, ensure that a prioritized list of critical infrastructure and key resources can be immediately provided to leadership after an event has occurred.

- Complete release 1 of the Infrastructure Data Collection Application that allow IP to manage asset level data with more flexibility, efficiency, and accuracy, in order to better serve critical infrastructure protection mission partners.
- Complete the migration of the entire iCAV system from the Mt. Weather Data Center to DHS Data Center 2.
- Complete the implementation of three iCAV unclassified software development spirals to dramatically increase the capabilities and supporting data for Federal, State, and local iCAV users.
- Complete the Homeland Infrastructure Foundation Level Data (HIFLD) to the Regions deployment of 25 infrastructure data and geospatial analysis subject matter experts to the eight Protective Security Advisor (PSA) Areas.
- Complete the development of an IP remote sensing standard operating procedure to streamline IP remote sensing requirements management and data acquisition.
- Gain formal membership in the Interagency Remote Sensing Coordination Cell (IRSCC) to ensure timely access to mission critical remote sensing data.
- Complete the migration of all IICD training activities into a single, Web-based learning environment to streamline training access and delivery while dramatically reducing training costs.
- Codify the Infrastructure Data Collection management process to support the gathering, storage, and distribution of the infrastructure information that is required to fulfill the Infrastructure Protection mission. This will include the completion of a collection requirements management system prototype.
- Work with Infrastructure Data Taxonomy stakeholders to mature the infrastructure attributes of interest found within the taxonomy, and solicit feedback for developing the next version of the taxonomy. Collect customer requirements to further enhance the robustness of the Infrastructure Data Catalog.
- Train 2,200 new users to handle and use Protected Critical Infrastructure Information to avoid unauthorized disclosures.
- Complete the release of software for the Automated Critical Asset Management System version 3.0.
- Complete the release of the Automated Critical Asset Management System version 3.1 and implement the beta-tested version in the production environment.
- Redesign and deploy version 2.0 of the Automated Critical Asset Management System Web-based training.
- Achieve Full Operating Capability for Automated Critical Asset Management System Continuity of Operations systems and train an estimated 1,200 State and local officials on building and implementing critical infrastructure protection plans on the use of the Automated Critical Asset Management System.
- Achieve Initial Operating Capability for the Secret Infrastructure Information Collection System Development and Test System to create an environment to store prioritized data for use by homeland security partners.
- Achieve Initial Operating Capability for the For Official Use Only Infrastructure Information Collection System Production System to ensure infrastructure data is integrated, accessible, and distributed to the regional critical infrastructure and key resources community.

- Achieve Initial Operating Capability for the Secret Infrastructure Information Collection System Production Subsystem to ensure infrastructure data is integrated, accessible, and distributed to the regional critical infrastructure and key resources community.
- Complete the following within the Methodology Technical Implementation: the integration of the Risk Self-Assessment Tool and the Voluntary Chemical Assessment Tool with the Infrastructure Information Collection System, the Food and Agriculture Sector Criticality and Assessment Tool, version 2.0, the Security and Emergency Management System tool for the Water Sector, and the Risk Assessment Methodology for Dams tool for the Dams Sector.
- Complete efforts to build additional risk and vulnerability assessment tools for the Emergency Services, Transportation, and Government Facilities, Public Health sectors vital to DHS efforts to execute National Comparative Risk Assessment.

#### FY 2011 Identification and Analysis Planned Accomplishments

- Conduct New Nuclear Reactor Security Consultations in conjunction with Nuclear Regulatory Commission schedules as permitted by available funding.
- Conduct a minimum of 275 Vulnerability Assessments.
- Conduct inventories of equipment used in vulnerability assessments to ensure greater agility in conducting assessments and producing reports in the field.
- Conduct performance reviews on 10 percent of the assessment teams to ensure the National Guard assessment teams have the training needed to conduct assessments.
- Execute Regional Resiliency Assessment Program in high-risk Urban Areas Security Initiative regions. PSCD plans to conduct 6-8 RRAPs in FY2011. The final number conducted will be dependent the RRAP site selection process, which involves reviewing, prioritizing, and selecting critical clusters identified by States during the annual Level 1 and Level 2 data call. The number of UASI regions is dependent on the locations of the RRAP sites selected.
- Revise and reformat Characteristics and Common Vulnerabilities (CV), Potential Indicators of Terrorist Activity (PI), Protective Measures (PM) Reports and meta-tag corresponding Site Assistance Visits, Buffer Zone Plans, Regional Resiliency Assessment Program, and other reports for management and reference purposes.
- Issue 2010 Outreach Summary Report and 2011 Outreach Plan for the National Infrastructure Simulation and Analysis Center.
- Integrate appropriate modeling, simulation, and analysis requirements into National Infrastructure Simulation and Analysis Center work plan for upcoming year and complete National Infrastructure Simulation and Analysis Center End of Year Report. Initiate National Infrastructure Simulation and Analysis Center five year program review.
- Provide hurricane and other incident support as needed and continue to distribute current products via new and existing information sharing mechanisms.
- Prioritize fiscal year 2011 capability gaps and requirements and develop National Annual Report Chapters.
- Develop and refine approaches and tools that support cross-sector risk analyses.
- Continue to expand risk and risk management outreach, analysis, and Red Teaming activities to additional Sectors, regional and state and local security partners as well

as expanding coordination activities with international partners (anticipate 14 additional partnership engagements for FY2011).

- Complete the annual National Critical Infrastructure Prioritization Program Level 1/Level 2 data call to identify and prioritize the Nation's infrastructure assets.
- Continue to conduct state visits to discuss expansion of the Level 1/Level 2 program and promote the Infrastructure Risk Analysis partnership program (anticipate 20 regional/states coordination events for FY2011).
- Continue to work with sector and state partners to refine 18 prioritized sector infrastructure list and 56 state and territorial infrastructure lists.
- Conduct a technical refresh of the iCAV suite of tools to ensure continued operation at maximum efficiency and availability, while incorporating the most recent advances in information technology.
- Complete the implementation of a complete redundant iCAV system at the Stennis Data Center to ensure continuity of iCAV operations and the continued accessibility of iCAV capabilities and data.
- Complete the implementation of three iCAV unclassified software development spirals to dramatically increase the capabilities and supporting data for Federal, State, and local iCAV users.
- Complete the integration of the iCAV suite of tools with the National Operations Center (NOC) Common Operational Picture (COP) 2.0 technical architecture to ensure the use of common, consistent infrastructure and situational awareness data across DHS.
- Complete the fourth revision and release of the Infrastructure Data Taxonomy, which provides a common framework and infrastructure nomenclature, to capture, update and expand key data elements about critical infrastructure and key resource assets across the Nation.
- Enhance, refine and expand the infrastructure data catalog that is used to manage, store and codify infrastructure data.
- Expand the Infrastructure Data Governance Council to develop and implement policies for infrastructure data management, standards and data sharing across the Infrastructure Protection enterprise and with external mission partners to adjudicate data policy issues and harmonize DHS data management policies.
- Increase by 10 percent the number of Federal and State entities accredited by the Protected Critical Infrastructure Information Program to safeguard, handle, use, and disseminate Protected Critical Infrastructure Information to facilitate access to vital infrastructure information by homeland security officials.
- Achieve Full Operating Capability of the Protected Critical Infrastructure Information Management System.
- Increase by 20 percent the number of Protected Critical Infrastructure Information authorized users who are trained in the policies and procedures for handling, use and safeguarding Protected Critical Infrastructure Information to ensure that there are no unauthorized disclosures or inappropriate use.
- Complete the integration of the Automated Critical Asset Management System with the Infrastructure Information Collection System.
- Complete release of the Automated Critical Asset Management System versions 3.2 and 3.3 and implement beta-tested versions in the production environment.

- Plan and deploy version 2.1 of the Automated Critical Asset Management System Web-based training.
- Achieve Initial Operating Capability for the Infrastructure Information Collection System's Continuity of Operations System.
- Achieve Full Operational Capability of For Official Use Only and Secret Infrastructure Information Collection System Production and Continuity of Operations systems to increase the amount of infrastructure data accessible and available to the homeland security community by integrating numerous data sets into the Infrastructure Information Collection System to improve national risk management for critical infrastructure and key resources.
- Complete an enhancement of additional Risk Self-Assessment Tool sub-Sector modules.
- Complete efforts to build additional risk and vulnerability assessment tools for all six critical infrastructure and key resource sectors managed within DHS (i.e., Chemical, Commercial Facilities, Dams, Emergency Services, Critical Manufacturing, and Nuclear) to support the execution of the National Comparative Risk Assessment.

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
Coordination & Information Sharing  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Coordination & Information Sharing**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>83</b>	<b>83</b>	<b>57,862</b>
<b>2010 Enacted</b>	<b>89</b>	<b>89</b>	<b>59,582</b>

<b>2011 Current Services</b>	<b>89</b>	<b>89</b>	<b>59,790</b>
2011 Program Change	-	(3)	(7,275)
<b>2011 Total Request</b>	<b>89</b>	<b>86</b>	<b>52,515</b>
Total Change 2010 to 2011	-	(3)	(7,067)

In FY 2011, NPPD requests \$52.515 million for the Coordination and Information Sharing program, including 89 positions / 86 FTE. This represents a decrease of \$7.067 million from the FY 2010 enacted budget of \$59.582 million. These funds support the management and facilitation of CIKR Partnerships, operation and coordination of the associated Information Sharing Environment, coordination and management of the National Infrastructure Protection Plan and 18 supporting Sector-Specific Plans, preparation of the National Annual Report, development of National Infrastructure Protection Plan implementation activity performance metrics, coordination of the Sector Annual Reports, development and execution of a variety of education/training/outreach programs, and Infrastructure Protection’s Management and Planning projects.

The FY 2011 request includes adjustments to base of \$0.208 million, including increases of \$0.151 million for pay inflation and \$0.057 million for GSA Rent. Program decreases include \$0.419 million to salaries and benefits to reduce 3 FTE across the PPA based on historical fill rates; \$4.088 million to NIPP Management program funds; \$10.021 million to CIKR Partnerships program funds; and a net increase \$7.253 million to Management, Planning, and Administration program funds for data center migration.

The Coordination and Information Sharing mission area coordinates the public-private partnership activities that are the foundation for the Nation’s infrastructure protection and resilience strategy. It enhances and facilitates the ability of government and private sector critical infrastructure and key resources partners at all levels to assess risks, coordinate programs and processes, and execute risk mitigation programs and activities. In support of partner coordination, IP leads, integrates, and coordinates the execution of the National Infrastructure Protection Plan and the 18 Sector-Specific Plans. IP also is the nexus for information sharing, coordinates individual sector governance structures, and facilitates and provides the development and ongoing support of these partner governance and coordination structures or models. The mission area: manages the Information Sharing Environment and processes essential to the partnership (*CIKR Partnerships and Information Sharing*); measures and analyses the performance of National Infrastructure Protection Plan activities and enhances national capabilities and awareness through education, training, and outreach (*National Infrastructure Protection Plan Management*); and supports IP (*Management, Planning, and Administration*).

***National Infrastructure Protection Plan Management***

\$ thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	24	24	\$3,315	23	24	\$3,226	-1	0	-\$89
Program Costs			\$11,731			\$7,643			-\$4,088
<b>Total</b>	<b>24</b>	<b>24</b>	<b>\$15,046</b>	<b>23</b>	<b>24</b>	<b>\$10,869</b>	<b>-1</b>	<b>0</b>	<b>-\$4,177</b>

The National Infrastructure Protection Plan Management Project has three major activities:

- Coordination, development, and execution of the National Infrastructure Protection Plan (NIPP);
- NIPP activity performance metrics and national annual reporting; and
- Critical infrastructure protection education, training, and outreach.

The National Infrastructure Protection Plan Management Project serves as the foundation for all IP activities related to the NIPP and the 18 Sector-Specific Plans. The project is the vehicle through which a broad range of public and private sector partners interface with DHS. The project has overall responsibility for managing the collaboration, coordination, integration, awareness, measurement and reporting, education, training and outreach processes that result in implementation and execution of the NIPP and its Sector-Specific Plans. Some of the project’s responsibilities include: leading and coordinating the implementation and execution of the NIPP and the Sector-Specific Plans; managing the NIPP annual review and maintenance process and supporting the review and maintenance of the Sector-Specific Plans; developing guidance documents; connecting sectors with tools or methodologies to achieve their NIPP and Sector-Specific Plan goals and objectives; supporting and promoting a strategic framework to ensure that Sector-Specific Agencies, other partners at all levels of government, and the private

sector collaborate in the development, implementation, and maintenance of national approaches to information sharing, protection, and resilience; promoting understanding and engagement in the development and execution of the NIPP and Sector-Specific Plans through the development of multi-media materials and participation in national and sector-level events; developing and delivering education and training initiatives to ensure skilled professionals are available to implement the NIPP and the Sector-Specific Plans; as well as providing direct support to the sectors to ensure the NIPP is not only implemented consistently and comprehensively, but also kept responsive to the changing risk environment.

The National Infrastructure Protection Plan Management Project is responsible for measurement and reporting related to the national critical infrastructure and key resources protection and resilience mission area. Measuring, analyzing, and reporting the performance of the program helps to ensure accountability, provide transparency among sector partners, and provide information on the collective progress in enhancing critical infrastructure protection and resilience. The measurement and reporting goal is to develop comprehensive reports that measure the efficacy of risk management activities performed under the NIPP and the progress made in reducing the risks of the Nation’s critical infrastructure and key resources to terrorist attacks and other hazards to inform national and sector-level risk management decisions. The National and Sector Critical Infrastructure and Key Resources Protection Annual Reports, due to the Executive Office of the President and Congress annually, are the key mechanisms for achieving this goal.

The National Infrastructure Protection Plan Management Project provides the leadership, guidance, structure, and technical expertise to develop, support, and sustain a comprehensive Education, Training, and Outreach Program that engages all DHS and IP components and critical infrastructure and key resource partners. This is accomplished by building national awareness to support the critical infrastructure and key resources protection and resilience program, related protection investments, and protection and resilience activities. Outreach and awareness efforts promote an understanding of the all-hazards environment and of what is being done to protect and enable the timely restoration of the Nation’s critical infrastructure and key resources. These efforts are further supported by education and training programs that ensure that skilled and knowledgeable professionals and experienced organizations are able to undertake NIPP implementation and execution.

***Critical Infrastructure and Key Resources Partnerships and Information Sharing***

\$ thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	26	26	\$3,514	25	26	\$3,421	-1	0	-\$93
Program Costs			\$26,164			\$16,143			-\$10,021
<b>Total</b>	<b>26</b>	<b>26</b>	<b>\$29,678</b>	<b>25</b>	<b>26</b>	<b>\$19,564</b>	<b>-1</b>	<b>0</b>	<b>-\$10,114</b>

The Critical Infrastructure and Key Resources Partnerships and Information Sharing Project builds, sustains, and ensures the effective coordination and operations of the

comprehensive network of structures, mechanisms, and processes that engage all critical infrastructure and key resources stakeholders across the Nation. It enables systematic and sustainable communication, coordination, and information exchange among all partners. The resourcing of the partnerships structures and their operations is organized through sector partnership activities and Critical Infrastructure and Key Resources Information Sharing Environment activities.

Public-private partnership activities are the foundation of the Nation’s strategy for critical infrastructure protection and resilience. Although diverse and numerous, critical infrastructure and key resources stakeholders in these partnerships fall into four general categories: infrastructure owners and operators; Federal agencies and their national and international partners; State, local, tribal, and territorial governments and their regional partners; and subject matter experts. The sector partnership model, which is the organizing framework for these partnerships, is the foundation for implementation of the National Infrastructure Protection Plan and is the key to sustaining the Nation’s critical infrastructure and key resources protection and resilience programs. This governance structure provides the consensus-built policy and strategy that drives requirements; it sets requirements and implements a comprehensive set of mechanisms and processes that provide useful and actionable content; it identifies and demands accountability for efficient mechanisms and processes to deliver information between stakeholders and partners; and it fosters trusted relationships among the stakeholders, who then utilize the information to take action.

Information sharing enables effective coordination and communication within and across the partnerships, and is a critical enabler for risk management activities that strengthen the protection and resilience of the Nation’s critical infrastructure. An effective and robust information sharing environment that promotes a free flow of information requires an effective governance structure, such as the sector partnership to identify and employ an effective and trusted set of information-sharing risk mitigation mechanisms and processes, uniquely tailored to enable communication between government and the private sector. Unification and implementation of these necessary elements creates an effective, efficient and trusted Information Sharing Environment (Critical Infrastructure and Key Resources). The Critical Infrastructure and Key Resources Partnerships and Information Sharing Project resources all these activities to build the Information Sharing Environment.

***Management, Planning and Administration***

\$ thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	39	39	\$3,264	38	39	\$3,178	-1	0	-\$86
Program Costs			\$11,594			\$18,904			\$7,310
<b>Total</b>	<b>39</b>	<b>39</b>	<b>\$14,858</b>	<b>38</b>	<b>39</b>	<b>\$22,082</b>	<b>-1</b>	<b>0</b>	<b>\$7,224</b>

The Management, Planning and Administration project is a key enabler of all of the IP’s programmatic actions. It encompasses a number of planning, policy, and programmatic areas, including human resource management, professional development, budget

formulation and execution, investment planning, acquisition strategy, personnel and facility security, logistics and executive secretariat support, Government Accountability Office and DHS Inspector General facilitation and support, policy development and evaluation, legislative analysis, and International Partnership Coordination.

Integrating IP's activities on a strategic, organizational, and project level represents a core competency for IP. Management, Planning and Administration focuses on maturing and improving IP's strategic planning and its business and administrative processes. These functions support project management and execution as well as long-term investment planning and decision making for efficient and effective project execution. An integrated planning and performance capability ensures that IP's planning and communication and outreach efforts include Federal, State, local, tribal, and territorial governments; the private sector; and international security partners--thereby facilitating both greater transparency and a sense of community.

#### FY 2009 Coordination and Information Sharing Accomplishments

- Piloted deployment of a critical infrastructure and key resources support capability within State Fusion Centers, as recommended by the State, Local, Tribal, and Territorial Government Coordinating Council.
- Completed the triennial review, rewrite, and reissue process for the 2009 National Infrastructure Protection Plan to reflect the maturation of the Nation's critical infrastructure protection program, including more in-depth coverage of all hazards, explicit incorporation of resilience, and more emphasis on regional, State, and local partners. Increased coordination and collaboration between the public and private sectors through the triennial review process.
- Institutionalized processes to ensure the expanded capability of the Sector-Specific Agencies to identify/evaluate gaps in strategic planning and risk reduction programs, allowing resources to be allocated where they offer the greatest benefit.
- Established processes and mechanisms to support effective coordination and communication within multiple critical infrastructure and key resources sectors and between the sectors and the regional critical infrastructure and key resources relevant coalitions and Federal agencies.
- Coordinated with Regional Consortium Coordinating Council and facilitated interactions with Sector-Specific Agencies to establish strong relationships between the sectors and this newest part of the sector partnership model. This new council builds further links with critical infrastructure and key resources owners and operators, enabling more robust implementation of the National Infrastructure Protection Plan and the Sector-Specific Plans.
- In coordination with the Sector-Specific Agencies and private sector partners, developed metrics to assess the progress of implementing the National Infrastructure Protection Plan risk management framework and the value of critical infrastructure and key resources protection efforts.
- Developed guidance for and coordinated the Sector Critical Infrastructure and Key Resources Protection Annual Reports; analyzed sector and other annual reports to develop the National Critical Infrastructure and Key Resources Protection Annual

Report; and coordinated writing and printing of National Annual Report, delivered to the Executive Office of the President and Congress.

- Developed and delivered National Infrastructure Protection Plan-related courses to include web-based awareness level training on the critical infrastructure and key resources sectors and the Critical Infrastructure and Key Resources Support Annex to the National Response Framework; classroom-based courses to help government and private sector partners implement critical infrastructure and key resources program management activities; and others as appropriate.
- Created numerous videos and print stories to promote both the National Infrastructure Protection Plan and various Office of Infrastructure Protection programs to stakeholders, including the Protective Security Advisors and the Office of Bombing Prevention.
- Promoted the National Infrastructure Protection Plan and the Sector-Specific Plans at 14 national and sector conferences and to increase voluntary participation in protection and resilience programs and activities.
- Developed guidance and provided assistance to the 18 sectors as they worked with public and private sector partners to accomplish the triennial review and rewrite of the Sector-Specific Plans.
- Operated Critical Infrastructure Warning Information Network at 100% reliability and completed the implementation plan to fully integrate its capabilities with those of the Homeland Security Information Network for Critical Sectors to make more efficient use of network resources.
- Initiated a professional development program that defines educational-level and training requirements for Infrastructure Protection staff at all levels.
- Provided an integrated and comprehensive suite of processes, procedures, and methods related to all procurements and financial activities.
- Completed the initial stages of the cross-border initiative on critical infrastructure and key resources-related risk management and incident management with the State of Michigan and Canadian Federal, local, and provincial authorities.

#### FY 2010 Coordination and Information Sharing Planned Accomplishments

- Move the Critical Infrastructure and Key Resources Information Sharing Environment into full operations for critical infrastructure and key resources regional coalitions, thereby incorporating them into the critical infrastructure and key resources national community which will support effective coordination and communication among relevant regional relevant coalitions, Federal agencies, and the critical infrastructure and key resources sectors.
- Complete incorporation of 15 State Fusion Centers which require critical infrastructure and key resource protection and resilience mission support into the Critical Infrastructure and Key Resource Information Sharing Environment.
- Identify and resolve critical policy and legal issues related to information sharing with international partners.
- Collect and complete annual report on critical infrastructure and key resources information sharing metrics to measure progress on implementation of the Critical Infrastructure and Key Resources Information Sharing Environment and to identify gaps that may need to be addressed.

- In coordination with the Sector-Specific Agencies and private sector partners, refine metrics to assess the progress of implementing the National Infrastructure Protection Plan risk management framework and value of critical infrastructure and key resources protection efforts.
- Develop guidance for and coordinate the Sector Critical Infrastructure and Key Resources Protection Annual Reports and analyze sector and other annual reports to develop the National Critical Infrastructure and Key Resources Protection Annual Report.
- Complete the triennial review/rewrite processes, and release the 2010 Sector-Specific Plans which, like the 2009 National Infrastructure Protection Plan, have matured to reflect the advancements of each sector and its partnership.
- Launch the Commercial Facilities Training and Resources page on DHS.gov to provide a consolidated location for commercial facilities owners and operators to find training information. Produce the Suspicious Activity Awareness Video What's in Store: Ordinary People, Extraordinary Events.
- Coordinate the development of an enhanced framework for State, local, tribal, and territorial critical infrastructure and key resources program engagement with the Grant Programs Directorate risk-based processes and assessments.
- Expand participation of State, local, tribal, and territorial government representatives in the activities of the State, Local, Tribal, and Territorial Government Coordinating Council and its working groups' deliberations and recommendations.
- Create an Infrastructure Protection knowledge repository, policies, and operating procedures to improve communication and information sharing across Infrastructure Protection.
- Support national and sector awareness, outreach, education, and training efforts.
- Develop retention and recruiting strategy to ensure high quality candidates are successfully hired and on-boarded at Infrastructure Protection.

#### FY 2011 Coordination and Information Sharing Planned Accomplishments

- Move into production the standard operating plans for all participating sectors or subsectors in implementing each sector's Information Sharing Environment; completing and operationalizing sectors' sector-wide Standard Operating Procedures (which include training, sector outreach, and production cutover).
- Support the addition of a critical infrastructure and key resources protection capability into other State Fusion Centers.
- Deliver priority requirements for the Critical Infrastructure and Key Resources Information Sharing Environment to the Information Sharing Environment Program Manager, and complete annual comprehensive progress report.
- Complete re-charter of National Infrastructure Advisory Council.
- Partner with the State, Local, Tribal, and Territorial Government Coordinating Council and Regional Consortium Coordinating Council to develop and implement awareness initiatives that enable a more robust implementation of the National Infrastructure Protection Plan and the Sector-Specific Plans at the State, regional, and local levels.

- Institutionalize the processes to ensure the expanded capability of the Sector-Specific Agencies to identify/evaluate gaps in strategic planning and risk reduction programs, allowing resources to be allocated where they offer the greatest benefit.
- In coordination with the Sector-Specific Agencies and private sector partners, refine the National Infrastructure Protection Plan metrics process and analysis to improve assessment capabilities of the value of critical infrastructure and key resources protection efforts and develop a standardized method to report on outcomes and progress.
- Analyze sector and other annual reports to develop the National Critical Infrastructure and Key Resources Protection Annual Report. Coordinate writing and printing of National Annual Report, and ensured delivery to the Executive Office of the President and Congress.
- Develop the guidance for the respective 18 sectors, and provide assistance as they work with their public and private sector partners to accomplish their Sector Critical Infrastructure and Key Resources Protection Annual Reports in preparation for submission to DHS.
- Initiate the second triennial review and rewrite of the National Infrastructure Protection Plan that will culminate in its reissue in 2012. This process will ensure that the National Infrastructure Protection Plan and Sector-Specific Plans reflect the maturation and current focus of the Nation's critical infrastructure protection and resilience strategy; and continue to grow the partnering and collaboration efforts between the public and private sector throughout the national development and review process.
- Develop the guidance documents and initiate the process in coordination with the 18 sectors to accomplish their 2011 reviews of the Sector-Specific Plans.
- Develop and incorporate critical infrastructure and key resource courses into the Federal Emergency Management Agency's Emergency Management Institute's catalogue and integrate critical infrastructure and key resource content into existing Emergency Management Institute courses.
- Develop, update and deliver National Infrastructure Protection Plan-related courses to include web-based and classroom-based courses to help government and private sector partners implement critical infrastructure and key resource program management activities; and others as appropriate.
- Conduct outreach activities to engage sectors and partners in aligning to the National Infrastructure Protection Plan and critical infrastructure and key resources education and training.
- Support national and sector awareness and engagement activities.
- Fully implement an integrated performance management structure to ensure that IP's strategic goals and objectives and outcomes are linked to and inform all investment and budgetary planning and execution activities.
- Update IP's Strategic Plan.
- Develop and implement a professional development program that defines educational levels and training requirements for IP staff at all levels.
- Participate in Global Critical Energy Infrastructure Protection Initiative, along with Departments of Energy, State, Defense, and others.

**Infrastructure Protection and Information Security**  
**Mitigation Programs**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: Mitigation Programs**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>274</b>	<b>194</b>	<b>147,583</b>
<b>2010 Enacted</b>	<b>506</b>	<b>469</b>	<b>197,111</b>
2011 Adjustments-to-Base	-	37	3,861
<b>2011 Current Services</b>	<b>506</b>	<b>506</b>	<b>200,972</b>
2011 Program Change	5	(19)	(2,546)
<b>2011 Total Request</b>	<b>511</b>	<b>487</b>	<b>198,426</b>
Total Change 2010 to 2011	5	18	1,315

In FY 2011, NPPD requests \$198.426 million for the Mitigation Programs, including 511 positions/ 487 FTE. This represents an increase of \$1.315 million over the FY 2010 enacted budget of \$197.111 million. These funds support the coordination and management of the DHS’ regulatory authority over high risk chemical facilities and ammonium nitrate, bombing prevention activities, protective security advisors, Sector-Specific Agency responsibilities, and incident management, contingency and readiness activities.

The FY 2011 request includes adjustments to base of \$3.861 million, including increases of 22 FTE and \$3.029 million for annualization of positions received in FY 2010, \$0.832 million for pay inflation, and \$2.040 million offset from program funds to salaries and benefits for 15 FTE due to the realignment of federal workforce. NPPD proposes an increase of \$1.935 million and 5 positions/4 FTE for Sector Specific Agency Management Critical Manufacturing. Program decreases include \$2.998 million to salaries and benefits to reduce 23 FTE across the PPA based on historical filled rates; \$0.099 million to Infrastructure Coordination and Incident Management program funds; \$0.052 million to Protective Security Advisors program funds; a decrease of \$0.285 million to Infrastructure Security Compliance program dollars; a decrease of \$0.047 million to the Office of Bombing Prevention program funds; and a decrease of \$1 million for the Philadelphia Infrastructure Project.

## CURRENT SERVICES PROGRAM DESCRIPTION

\$ thousands	FY 2010 Enacted	FY 2011 Request
Personnel Costs	\$ 64,509	\$ 67,963
Program Costs	\$ 132,602	\$ 130,463
<b>Total Costs</b>	<b>\$ 197,111</b>	<b>\$ 198,426</b>

Mitigation Programs utilizes measures designed to prevent, deter, and mitigate threat to critical infrastructure and key resources, and enable timely, efficient response and restoration in a post-event situation for all hazards. Mitigation programs help security partners to identify and mitigate vulnerabilities, implement protective measures, and increase preparedness for facilities, systems, and surrounding communities. They also support public awareness efforts and facilitate the sharing of critical infrastructure and key resources protection-related best practices and lessons learned. Additionally, they enable Office of Infrastructure Protection planning, readiness and incident management capabilities. Mitigation Programs is divided into five projects: *Infrastructure Coordination and Incident Management, Infrastructure Security Compliance, Protective Security Advisors, Sector-Specific Agency Management, and Bombing Prevention*. The scope of *Infrastructure Coordination and Incident Management* project will expand in fiscal year 2009 by consolidating two smaller projects, *Contingency Planning* and *Readiness* into the larger *Infrastructure Coordination and Incident Management* project.

### *Infrastructure Coordination and Incident Management*

\$ thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	42	42	\$5,693	40	42	\$5,541	-2	0	-\$152
Program Costs			\$24,150			\$24,051			-\$99
<b>Total</b>	<b>42</b>	<b>42</b>	<b>\$29,843</b>	<b>40</b>	<b>42</b>	<b>\$29,592</b>	<b>-2</b>	<b>0</b>	<b>-\$251</b>

Guided by the National Infrastructure Protection Plan and the National Response Framework, the Infrastructure Coordination and Incident Management project provides the structures, mechanisms, facilities, and personnel needed to plan and execute a coordinated, interoperable, critical infrastructure and key resources -focused response to emerging and no-notice incidents. The project operates the National Infrastructure Coordinating Center to enable Office of Infrastructure Protection capability to respond to the full range of incidents by providing situational awareness, coordinating operational activities and developing recommended courses of action to government and private sector critical infrastructure and key resources partners. Office of Infrastructure Protection's incident management capability reduces risk to critical infrastructure and key resources sectors from impending or occurring incidents, enables more rapid recovery of damaged critical infrastructure and key resources assets and networks, and mitigates the impact of critical infrastructure and key resources degradation on the safety and quality of life of the American people.

Successful execution requires that the project conduct the necessary planning to ensure the capability to respond to the full range of incidents, and provide a readiness program to ensure planned responses are validated, exercised, and ready to execute. During steady-state, the project must maintain operational capability to develop and share situational awareness, conduct information sharing including alert and warning, and prepare for the increased operational demands of incident response. During incident response, the project must have the capability to operationalize established relationships, maintain situational awareness, share information, analyze data, develop recommended actions and protective measures, contribute to national reporting, and distribute key information and decision products.

### *Infrastructure Security Compliance*

Activity	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	246	268	\$33,495	257	268	\$35,453	11	0	\$1,958
Program Costs			\$69,868			\$69,583			-\$285
<b>Total</b>	<b>246</b>	<b>268</b>	<b>\$103,363</b>	<b>257</b>	<b>268</b>	<b>\$105,036</b>	<b>11</b>	<b>0</b>	<b>\$1,673</b>

The Infrastructure Security Compliance Project is being implemented in response to the DHS Appropriations Act of 2007 (Public Law 109-295), which provided DHS with the authority to regulate security at chemical facilities nationwide that present a high level of risk, with priority on highest risk facilities. The statutory requirements which Infrastructure Security Compliance Project implements are contained in the Chemical Facility Anti-Terrorism Standards (6 C.F.R. Part 27), and additional requirements are being added to the Infrastructure Security Compliance Project in response to Section 563 of the 2008 Consolidated Appropriations Act, Subtitle J – Secure Handling of Ammonium Nitrate (“Section 563”). Section 563 amends the Homeland Security Act of 2002 and provides the DHS with the authority to “regulate the sale and transfer of ammonium nitrate by an ammonium nitrate facility...to prevent the misappropriation or use of ammonium nitrate in an act of terrorism.”

Attacks on high-risk chemical facilities could cause significant numbers of deaths and injuries and disruption of critical sectors of the United States economy. Therefore the Federal Government has a compelling interest in reducing the risk of chemical facilities to attack. In addition to providing oversight and incentives to the risk-reduction activities of individual high-risk chemical facilities, Infrastructure Security Compliance Project applies a holistic view to managing the security of the Nation’s chemical facility infrastructure to ensure that risks are managed across the Nation. This will ensure that risks are not shifted between individual facilities; among surrounding communities; between States and regions; nor shifted to non-facility assets (i.e. chemical transportation and shipping infrastructure). Infrastructure Security Compliance Project engages with voluntary critical infrastructure and key resources protection efforts, to include the Chemical Sector-Specific Agency and related forums (e.g., Sector and Government Coordinating Councils) to ensure leveraging of, and coordination with, Homeland Security Presidential Directive-7-driven efforts, when appropriate.

*Protective Security Advisors*

\$ thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	107	107	\$14,805	102	107	\$14,296	-5	0	-\$509
Program Costs			\$12,824			\$12,772			-\$52
<b>Total</b>	<b>107</b>	<b>107</b>	<b>\$27,629</b>	<b>102</b>	<b>107</b>	<b>\$27,068</b>	<b>-5</b>	<b>0</b>	<b>-\$561</b>

The Protective Security Advisor Project was established in 2004 by DHS to increase critical infrastructure security representation and coordination at the Federal, State, local, Tribal and territorial levels. The Protective Security Advisors provide a local perspective to the National risk picture and serve as DHS’ on-site critical infrastructure and vulnerability assessment specialists. In this capacity, Protective Security Advisors serve as a vital channel of communication for government officials and private sector critical infrastructure and key resources owners and operators to communicate with DHS, and with one another.

While the Protective Security Advisor Project supports IP’s goals, it was established primarily to support its mission to build and sustain effective critical infrastructure and key resources partnerships and coordination mechanisms; understand and share risk and information about terrorist threats and other hazards to our Nation’s critical infrastructure and key resources; provide a foundation for continuously improving critical infrastructure and key resources preparedness; and build and implement a long-term, national critical infrastructure and key resources risk-management program.

Protective Security Advisors support the development of the national risk picture by identifying, assessing, monitoring, and minimizing the risk to critical assets at the State, local, and regional level. Protective Security Advisors conduct specialized Enhanced Critical Infrastructure Protection site visits at Level 1 and Level 2 facilities to assess overall security postures and track the implementation of new or improved protective measures. Protective Security Advisors also inform and educate facility owners and operators on the criticality of the facilities and relate threats from terrorism while forging strong relationships between Level 1 and Level 2 facility owners and operators, DHS, and Federal, State, and local law enforcement. Protective Security Advisors utilize a suite of tools to assist in conducting the specialized visits and to track improved protective measures at critical facilities. The Infrastructure Survey Tool is a web-based tool that is used in conjunction with Enhanced Critical Infrastructure Protection site visits and provides the ability to collect, process, and analyze assessment facility data in near real-time, enabling sector-by-sector and cross-sector vulnerability comparisons. Using the data collected DHS is able to identify security gaps and trends across sectors and sub-sectors while establishing sector baseline security scores; and tracking the progress toward improving overall CIKR security. Ultimately, this effort will inform and update sector outcome metrics as they relate to NIPP implementation.

Additionally, during incidents requiring Federal assistance and support, the Protective Security Advisors serve as the Infrastructure Liaisons at the Federal Emergency

Management Agency Joint Field Office and in the State and county Emergency Operations Centers, providing expert knowledge of the impacted infrastructure, maintaining communication with critical infrastructure and key resources owners and operators, and prioritizing the coordinated response, recovery, and restoration efforts for critical infrastructure.

***Sector-Specific Agency Management***

\$ thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	54	69	\$7,267	69	74	\$9,510	15	5	\$2,243

Program Costs			\$14,241			\$12,585			-\$1,656
<b>Total</b>	<b>54</b>	<b>69</b>	<b>\$21,508</b>	<b>69</b>	<b>74</b>	<b>\$22,095</b>	<b>15</b>	<b>5</b>	<b>\$587</b>

The Sector-Specific Agency Management project has been established to execute Sector-Specific Agency functions for six of the 18 Critical Infrastructure and Key Resource sectors: Chemical, Commercial Facilities, Critical Manufacturing, Dams, Emergency Services, and Commercial Nuclear Reactors, Materials, and Waste (Nuclear). In addition, the Sector-Specific Agency Management Project serves as the Program Management Office for the Interagency Security Committee (ISC), a Federal body created to enhance the security of non-military Federal facilities (DHS [IP] serves as Chair of the Interagency Security Committee).

The Sector-Specific Agency Management project’s fundamental mission is to achieve cohesive and coordinated risk reduction across its assigned Critical Infrastructure and Key Resource sectors. The Sector-Specific Agency Management project ensures that Critical Infrastructure and Key Resource sector risk management efforts are aligned and coordinated, and those resources are applied efficiently across the six Critical Infrastructure and Key Resource sectors (and the ISC). Where gaps are found and risk is identified, the Sector-Specific Agency Management project partners with the private sector and Federal, State, local, tribal, territorial, and regional government organizations to build capacity and mitigate risk. The Sector-Specific Agency Management project works with sector partners to align priorities, goals, and strategic planning efforts; facilitate the development and implementation of risk management and mitigation initiatives; coordinate education, training, and security exercises; ensure that security information is communicated efficiently and effectively; support critical infrastructure and key resources research and development efforts; work with partners to address international infrastructure issues; and perform important incident management functions for situational awareness.

## Bombing Prevention

\$ thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	20	20	\$3,249	19	20	\$3,164	-1	0	-\$85
Program Costs			\$11,519			\$11,472			-\$132
<b>Total</b>	<b>20</b>	<b>20</b>	<b>\$14,768</b>	<b>19</b>	<b>20</b>	<b>\$14,636</b>	<b>-1</b>	<b>0</b>	<b>-\$132</b>

The Bombing Prevention Project is managed by the Office for Bombing Prevention and is the DHS lead agent for homeland security activities that include strategic coordination, capabilities analysis, and information sharing to combat the improvised explosive device threat to the Homeland. Homeland Security Presidential Directive-19 (HSPD-19), the HSPD-19 *Implementation Plan* and the National Strategy for Combating Terrorist Use of Explosives in the United States placed new and significant responsibilities on the Bombing Prevention Project, including:

- Coordination of national and intergovernmental bombing prevention efforts; including DHS support to the HSPD-19 Implementation Plan and the required establishment of a DOJ/DHS Joint Program Office (JPO);
- Increasing information sharing on terrorists tactics and procedures for terrorist use of explosives with State, local, tribal, territorial, and private sector security partners;
- Conducting gap analyses to improve bombing prevention capabilities of State and local law enforcement protecting high consequence critical infrastructure and key resources from terrorist use of explosives.

Bombing Prevention, over the next several years, will implement a coordinated and responsive set of national programs to combat the threat of terrorist use of explosives in the United States, in accordance with Homeland Security Presidential Directive 19. These programs will be fed by information about the latest trends in tactics, techniques, and procedures used by terrorists, as well as regularly updated analyses of domestic bombing prevention capabilities. It will expand its partnership and services with and to State and local law enforcement, first responders, the private sector, and the public, as well as integrate information and capabilities from its partners in the Federal Government and international allies. Bombing Prevention intends to dramatically increase the number of services provided with a corresponding increase in resources.

### FY 2009 Mitigation Programs Accomplishments

- Integrated the private sector into the Infrastructure Protection incident management planning process, including coordinated planning, readiness, and incident management execution activities. Established routine Information Sharing and Analysis Center presence at National Infrastructure Coordinating Center watch. Developed concept for Sector Coordinating Council/Partnership for Critical Infrastructure Security presence in Incident Management Cell when activated.
- Completed integration of the 24x7 watch and Incident Management Cell into a single operational construct as elements of the National Infrastructure Coordinating Center

to improve incident management response and information sharing and increase efficiency.

- Led the cross-divisional effort to train and socialize the Infrastructure Protection incident management process with Federal, State, local, and industry partners.
- Established regularly scheduled training, drilling and team-building events for Infrastructure Protection incident management personnel, including Infrastructure Protection Incident Management Cell surge teams, to facilitate rapid activation of Incident Management Cell and transition to incident management activities during no-notice incidents.
- Coordinated IP's planning and execution efforts for the National Level Exercise (NLE) 2-09 including the completion of a comprehensive After Action Review (AAR) to guide planning for future NLEs.
- Organized IP's response to the American Samoa tsunami.
- Assembled "mobile office" fly-away kits for COOP, devolution, or incident management deployment.
- Completed review of 6,400 Security Vulnerability Assessments, issued approximately 1,000 final tiering determinations and Site Security Plan due dates, and initiated planning for inspections of CFATS Tier1-4 facilities, with priority on Tier 1 and Tier 2 facilities as site security plans are completed.
- Hired and trained approximately 25 inspectors to expand inspector cadre to a total of approximately 69 personnel.
- Coordinated DHS regulatory authorities related to the chemical sector with other DHS and Federal agencies.
- Began to develop rulemaking to regulate the sale and transfer of Ammonium Nitrate.
- Deployed 10 additional Protective Security Advisors to States without a Protective Security Advisor located within its boundaries (Maine, Vermont, New Hampshire, Rhode Island, Delaware, South Dakota, North Dakota, Wyoming, Montana, and Idaho). Field-deployed Protective Security Advisors are located in Federal Government offices near State homeland security officials. This enables stronger relationships between DHS and the State and local governments, and critical infrastructure and key resource owners and operators.
- Trained 70 percent of Protective Security Advisors to perform Infrastructure Liaison duties in a Federal Joint Field Office in support of the PFO and emergency support functions lead agencies with critical infrastructure and key resource analysis during incidents.
- Conducted 1,400 Enhanced Critical Infrastructure Protection assessment of Level 1 and Level 2 assets.
- Enhanced bombing prevention (TRIPwire) capability to include additional partner content-providing organizations, and expand TRIPwire user base to 7,500 registered users, to include select private sector security and international partners through TRIPwire Community Gateway. Provided TRIPwire Community Gateway to 18 Sectors.
- Conducted capability assessments for over 130 of the Nation's public safety bomb squads, explosives detection canine units, specialized weapons and tactics teams, and dive teams using National Capabilities Analysis Database and develop a systematic methodology for coordinating closing identified gaps with interagency partners.

- Bombing Prevention Project continued to support in the development of consensus-based best practices through the Scientific Working Group on Dog and Orthogonal Detector Guidelines and co-led the Homeland Security Presidential Directive-19 effort to produce national explosives detection canine certification and training standards.
- Sponsored and delivered 28 one-day improvised explosive device Awareness Workshop training courses, 70 three-day Surveillance Detection Courses, and 30 four-day Soft Target Awareness Courses for State and local law enforcement and private sector security partners.
- Developed 4 Multi-Jurisdiction Improvised Explosive Device Security Plans in support of FEMA's Regional Catastrophic Preparedness Grant Program and the Regional Resiliency Assessment Program.
- Conducted Bomb-Making Materials Awareness Program events in Philadelphia. The Bomb-Making Materials Awareness Program trains State and local law enforcement officers to conduct outreach to the private sector businesses that sell or supply materials that can be used to make improvised explosive devices to help employees identify relevant precursor components, such as chemicals and electronics, and suspicious purchasing behavior that could indicate bomb-making activity.
- Established Critical Manufacturing Sector Government Coordinating Council and completed Sector-Specific Plan to enable effective sector coordination, information sharing, and implementation of comprehensive public-private sector security programs.
- Completed Draft Physical Security Criteria for Federal Facilities for Interagency Security Committee to enhance security at all non-military Federal facilities.
- Completed testing and development of the Voluntary Chemical Risk Assessment Tool, allowing chemical owners/operators to efficiently and accurately carry out an all-hazards risk assessment of their facilities.
- Conducted the 2009 Dams Sector Exercise Series: Columbia River Basin to develop an Integrated Regional Strategy to improve disaster resilience and preparedness for the Tri-Cities area of Washington State.
- Completed draft Nuclear and Chemical Sector Risk Baseline Program and began expansion to other sectors. This process develops a prioritized baseline portfolio of the sector-wide risk landscape to guide decision making and measure the success of risk mitigation efforts.
- Developed voluntary Web-based Security Awareness Training tool that can be used by critical infrastructure and key resource employees in the Chemical, Commercial Facilities, Critical Manufacturing, Dams, Emergency Services, and Nuclear Sectors to increase security awareness nationwide.

#### FY 2010 Mitigation Programs Planned Accomplishments

- Integrate critical infrastructure and key resources private sector incident management processes and information flow beyond Infrastructure Protection, including the National Operations Center, NPPD, FEMA, and the Sector-Specific Agencies, to fully realize benefits of critical infrastructure and key resources incident-specific information sharing in protection and restoration of critical infrastructure and key resources during incidents.

- Establish unscheduled drilling and exercise events for National Infrastructure Coordinating Center Incident Management Cell surge teams to facilitate rapid activation of Incident Management Cell during no-notice incidents.
- Expand the quality and quantity of collaborative incident management relationships with key critical infrastructure and key resources partners including the Sector Specific Agencies, private sector, and State/Local/Regional Fusion Centers.
- Evaluate Infrastructure Protection Readiness related training and exercise programs to ensure that programs and resources are adequate to produce qualified and sufficient Incident Response staff and surge teams.
- Complete all Contingency Plans and Tactical Plans for 15 National Scenarios.
- Establish Critical Information Requirements/Essential Elements of Information for remaining national planning scenarios.
- Complete all preparations (seminars, workshops, drills, and TTXs) and execute annual National Level Exercise to validate incident management processes and ensure training of key personnel.
- Perform review and complete revisions of the Incident Management Base Plan and Incident Management and Infrastructure Liaison Standard Operating Procedures (SOPs).
- Complete review of Security Vulnerability Assessments submitted by CFATS facilities, and notify covered facilities (approximately 5000) of final tier and Site Security Plan due date.
- Review and approve or disapprove Site Security Plans under CFATS, prioritizing Tier 1 and Tier 2 facilities.
- Issue for public review and comment a proposed rule, and develop a final rule, to implement the Department's regulatory authority over the sale or transfer of Ammonium Nitrate (Section 563 requirements).
- Initiate inspections cycle to verify security measures in place, or planned, and assess compliance with CFATS annually at Tier 1 facilities, biannual efforts with Tier 2 facilities, and initial efforts with Tier 3 and 4 facilities.
- Continue to hire and train inspector cadre, running 2 chemical security academies.
- Adjust the Chemical Security Assessment Tool as necessary to support implementation of the Department's regulatory authority over the sale or transfer of ammonium nitrate (e.g., develop portal for submission of Ammonium Nitrate User Number registrations).
- Begin planning efforts to conduct pilot exercises (response capabilities vs. response needs) using threat scenarios that underpin the CFATS risk-based performance standards with select chemical facility owners and operators, and State and local partners.
- Continue implementation of the Enhanced Critical Infrastructure Protection assessment methodology/ Infrastructure Survey Tool across all 18 critical infrastructure and key resources sectors, and four sub-sectors, enabling a complete comparison of all asset vulnerabilities and the ability to fully identify the most vulnerable sectors and security areas of concern.
- Conduct targeted outreach through the Protective Security Advisors and distribute awareness materials to Sectors and facilities of concern.

- Conduct targeted outreach to the retail and lodging subsectors, including contact with 390 malls and training aides viewed by more than 10,000 facility employees.
- Complete Critical Manufacturing and Dams Sector Risk Baseline Program to establish a formalized process for analyzing overarching sector risk. This process develops a prioritized baseline portfolio of the sector-wide risk landscape to guide decision making and measure the success of risk mitigation efforts.
- Implement capabilities-based risk and prioritization program in Emergency Services Sector as a proof of concept that can be expanded to identify key sector capability gaps and to guide prevention, protection, response and recovery programs to close gaps.
- Complete a full review of all six Sector-Specific Agency Management Project Sector-Specific Plans, and revise according to changing risk environment and new priorities. The review will be undertaken in close coordination with sector partners.
- Implement the National Dams Security Performance Program to assess and track status, trends, and gaps regarding sector-wide implementation of security and protection programs.
- Develop protective measures guide for owners/operators in the Lodging and Outdoor Events sub-sectors of Commercial Facilities Sector. Two guides will be developed for the Outdoor Events sub-sector, one for parades and festivals (non-perimeter Guide) and one for amusement parks (perimeter Guide). Partner with the State of Colorado and owners and operators to develop and complete a Protective Measures Guide for mountain resorts.
- Complete Draft Minimum Standards for the Use, Training, and Certification of Contract Security Guards for Interagency Security Committee to enhance security at all non-military Federal facilities.
- Develop and coordinate a program to support the review of license applications for new commercial nuclear power reactors, and four license reviews.
- Conduct State Security Seminar and Exercise Series with state chemical industry councils to foster communication between facilities and their local emergency response teams. The program encourages representatives to share knowledge during a facilitated tabletop exercise tailored for the specific interests of the local chemical facilities.
- Conduct Bomb-Making Materials Awareness Program events in all Level 1 Urban Area Security Initiative regions and 30 additional cities. The Bomb-Making Materials Awareness Program trains State and local law enforcement officers to conduct outreach to the private sector businesses that sell or supply materials that can be used to make improvised explosive devices to help employees identify relevant precursor components, such as chemicals and electronics, and suspicious purchasing behavior that could indicate bomb-making activity.
- Develop and conduct targeted webinar training for service and security personnel to Sectors and facilities of concern.
- Access partner-provided content based upon expanded bombing prevention (TRIPwire) user base, including select private sector security and international partners through TRIPwire Community Gateway. Prototype the TRIPwire Field Tool to better support user community with increased utility and portability.

- Validate efforts of previous findings and complete assessments for 25% of the explosives detection canine units in UASI Level 1 cities.
- Develop 12 Multi-Jurisdiction Improvised Explosive Device Security Plans in support of FEMA's Regional Catastrophic Preparedness Grant Program and the Regional Resiliency Assessment Program.

#### FY 2011 Mitigation Programs Planned Accomplishments

- Complete all preparations and execute annual National Level Exercise to validate incident management processes and ensure training of key personnel.
- Complete final planning for National Exercise Program Level 2 or Level 3 Critical Infrastructure and Key Resource-focused exercise.
- Complete Sector-Specific Agency incident management training event.
- Perform review and revision of Incident Management and Infrastructure Liaison Standard Operating Procedures.
- Begin planning efforts to acquire, staff, and equip up to 2 additional permanent regional offices for inspection of high-risk chemical facilities and ammonium nitrate facilities.
- Continue to expand efforts to ultimately support full cycle of CFATS facility inspections, including prioritized review, assessment, and inspection efforts of Tier 3 and 4 facilities.
- Conduct one pilot exercise (response capabilities vs. response needs) using threat scenarios that underpin the Chemical Facility Anti-Terrorism Standards risk-based performance standards with select chemical facility owners and operators, and State and local partners.
- Conduct ongoing assessments of the interactions between chemical security inspectors and covered critical infrastructure and key resource owners and operators to inform procedures and processes.
- Maintain and utilize capability to support chemical security adjudication, enforcement, compliance, and appeals requirements to meet established CFATS requirements.
- Begin performing inspections to verify compliance with Ammonium Nitrate regulations in accordance with previously promulgated rulemaking.
- Maintain current levels of deployed PSAs. Terminate the deployment of Infrastructure Protection Analysts to support State and Local Fusion Centers with critical infrastructure protection subject matter expertise.
- Complete the initial deployment of the Geospatial Pilot Project in fiscal year 2011, providing a capability to accurately collect geospatial data on critical infrastructure and key resources, providing real-time vulnerability information to Headquarters.
- Continue to develop the Infrastructure Survey Tool for four additional sub-sectors to support the implementation of the Enhanced Critical Infrastructure Protection methodology.
- Collaborate with National Institute for Occupational Safety and Health, Chief Human Capital Officer and Federal facilities to identify and share best practices in preventing violence in the workplace. Using a multidisciplinary approach the goal is to develop a Workplace Violence Prevention Program for Federal Agencies.

- Complete Emergency Services Risk Baseline Program. This process develops a prioritized baseline portfolio of the sector-wide risk landscape to guide decision making and to measure success.
- Launch ISC Voluntary Security Recognition Pilot to encourage Federal facilities to adopt ISC Security measures. Program components will include vulnerability assessments, possible Buffer Zone Protection Plans, documentation for implemented security measures, employee security training, communications protocols and procedures with local first responders, security auditing plans, a certification process, and participating in exercises.
- Complete the “Roadmap to Secure Control Systems in the Dams Sector.” The roadmap will provide a comprehensive framework and recommended strategies focused on the protection of industrial control systems across the Dams Sector to enhance the sector’s understanding and management of cyber risk.
- Conduct six Chemical Sector Explosive Threat Awareness Training courses to increase awareness of the threat of improvised explosive devices to the Chemical Sector. The course provides safety precautions for security professionals dealing with explosive incidents, and strengthens deterrence, prevention, detection, protection against, and response to terrorist use of vehicle borne improvised explosive devices.
- Complete and distribute Protective Measures Guide for Shopping Facilities within the Commercial Facilities Sector.
- Expand TRIPwire user access to foreign security partners to include the United Kingdom, Australia, New Zealand, and Canada.
- Begin collection and data analysis for national bombing prevention capabilities in support of Quadrennial Homeland Security Review (QHSR) efforts.
- Continue public safety bomb squad capability assessments, and reassessments of squads assessed in FY 2005 – FY 2009.
- Commence development of TRIPwire Secret to enable high level criminal analysis and targeting, as well the ability to share classified information to and from other Federal government partners.
- Continue evaluation and refinement of a functional TRIPwire field tool.
- Fully support DHS requirements for the HSPD-19 Implementation Plan Joint Program Office.

Total Change 2010 to 2011	-	-	-

America’s information technology infrastructures, including the Internet, telecommunication networks and embedded computer systems, are increasingly being targeted for exploitation and disruption. Because America’s critical cyber infrastructures are under constant attack, the Department of Homeland Security created the National Cyber Security Division to enhance Federal cyber readiness; analyze cyber threats and vulnerabilities, disseminate threat warning information and coordinate incident response activities. The National Cyber Security Division mission operates under authorities derived from the Homeland Security Act of 2002; the Federal Information Security Management Act of 2002; the 2003 White House - National Strategy to Secure Cyberspace; Homeland Security Presidential Directive-7, Critical Infrastructure Identification, Prioritization and Protection; and National Security Presidential Directive-54/Homeland Security Presidential Directive-23, Cyber Security and Monitoring.

Based on the recommendations contained in the 2009 White House - Cyberspace Policy Review, the National Cyber Security Division will continue to advance and enhance the security and resiliency of the Nation’s cyber infrastructure in conjunction with its public and private partners, while maintaining its status as the DHS lead in implementing many cybersecurity mandates and requirements.

The National Cyber Security Division develops capabilities to prevent, prepare for, and respond to catastrophic incidents that could degrade or overwhelm the Nation’s critical information technology infrastructure and key cyber networks. National Cyber Security Division funds will identify and reduce vulnerabilities, mitigate threats, and ensure that cyber intrusions are detected and that disruptions cause minimal damage to public and private sector networks. To date, the National Cyber Security Division has leveraged its current investments in people and technology to provide capabilities to secure the Federal .gov domain and support key initiatives in the following mission areas:

- *Alert, Warning, and Analysis* activities use a standard, repeatable and reliable methodology to assess the severity of cyber activities reported through a myriad of sources. The National Cyber Security Division identifies and publishes alerts and warnings and mitigation strategies on vulnerabilities, incidents and exploits through established programs and mechanisms.
- *Coordination and Collaboration* activities receive information on cyber activity affecting the Nation's cyber infrastructure and coordinate with Federal departments and agencies, private industry and other key stakeholders to develop situational awareness. Interactions consist of two-way information sharing in the form of direct person-to-person communications or written products and both table top and large scale exercises. In order to complete this mission, a reliance on coordination and collaboration with a number of public and private industry communities of interest are critically important.
- *Response and Assistance* activities provide advice to Federal civilian, State and local government and critical infrastructure communities of interest in response to malicious cyber activity. This includes releasing products that contain cyber risk mitigation tools as well as the provision of technical cyber security assistance to Federal government departments and agencies to help bolster their incident response, and analysis of malware and digital media efforts.
- *Protection and Detection* activities develop and deploy the National Cybersecurity Protection System, operationally known as EINSTEIN, which detects malicious cyber activity within the .gov domain and assists with the protection of the Federal government's external Internet connection points. The National Cyber Security Division is also the Sector Specific Agency for the Information Technology Sector, designated under the National Infrastructure Protection Plan to provide critical infrastructure protection cyber security support across all sectors.

To meet increasing cyber risks, the request seeks to commensurately increase investments in the National Cyber Security Division. Funding enables the National Cyber Security Division to expand current baseline operations to fill identified capability gaps. This will significantly enhance the National Cyber Security Division's ability to work collaboratively with public, private, and international entities to mitigate risk and improve the protection and security of the Nation's cyber infrastructure.

National Cyber Security Division programs ensure that the statutory and derivative responsibilities underlying its mandates for protecting the Nation's cyber infrastructure are effectively executed. Planned activities will facilitate the Department's ability to close capability gaps in mission-critical areas and enhance the National Cyber Security Division's ability to respond to statutory requirements.

The National Cyber Security Division mission is to work collaboratively with Federal, State and local governments, the private sector, academia, and international partners to secure the Nation's critical cyberspace and information technology infrastructures through employing risk management and cyber incident preparedness, prevention, and

response activities. This broad mission gives the National Cyber Security Division a pivotal role in providing cyber analysis, intrusion detection and warning, intrusion prevention, incident response, information sharing and collaboration, vulnerability reduction, and cyber outreach and awareness. The National Cyber Security Division works in coordination with public and private sectors to promote the security, resilience, and reliability of the Nation's cyber infrastructure. Moreover, the National Cyber Security Division coordinates public and private sector cyber preparedness activities and aids in the preparation for, response to, and recovery from catastrophic incidents that would degrade or overwhelm our national cyber systems.

In FY 2009, President Obama directed the National Security Council and the Homeland Security Council to review cyber security government-wide plans, programs, and activities that were currently underway as well as imminently planned actions. One of the outcomes of the White House Cyberspace Policy Review was support to the Department of Homeland Security, National Cyber Security Division's FY 2010 budget request and its program goals and objectives. Furthermore, Congress appropriated approximately 99% of NCSA's cybersecurity request.

As addressed by language in the Joint Explanatory Statement accompanying Public Law 111-83, the request for the National Cyber Security Division is submitted in a PPA structure identical, by account, to that enacted in FY 2010. These PPAs are: United States Computer Emergency Readiness Team, Strategic Initiatives, and Outreach and Programs. Organizationally, the National Cyber Security Division consists of the Office of the Director and five organizational branches: US-CERT Operations, Federal Network Security, Network Security Deployment, Global Cyber Security Management and Critical Infrastructure Cyber Protection and Awareness. These organizations are responsible for the execution of the missions and responsibilities listed under this PPA structure.

<b>2011 Total Request</b>	<b>288</b>	<b>263</b>	<b>314,989</b>
Total Change 2010 to 2011	81	119	(8,640)

NPPD requests \$314.989 million for the United States Computer Emergency Readiness Team, including 288 positions and 263 FTE. This represents a net decrease of \$8.640 million over the FY 2010 enacted budget of \$323.629 million. A portion of these funds support NPPD's role in the Comprehensive National Cybersecurity Initiative and the other cybersecurity activities.

The FY 2011 request for the United States Computer Emergency Readiness Team includes adjustments-to-base for annualization of \$2.066 million for 15 FTE received in FY 2010, pay inflation of \$0.264 million, and rent inflation of \$0.046 million. Adjustments-to-base also include 44 positions / 85 FTE under the Workforce Realignment Program offset by \$11.932 million in program/contract dollars; a decrease of \$8.000 million for one time Data Center Migration costs; and a transfer of \$4.000 million to the Federal Law Enforcement Training Center for the National Computer Forensics Institute.

Program changes include: a decrease of \$13.543 million across multiple projects within US-CERT; an increase of \$5.000 million and 26 positions / 13 FTE to advance Federal coordination of cybersecurity-related activities, and an increase of \$9.528 million and 11 positions / 6 FTE to enable the implementation of the Assessment, Testing and Analysis Capability program that intends to test and measure departments' and agencies' compliance with laws, regulations, policies, and standards relating to information security, and also to establish and maintain a holistic, enterprise view of the Federal government's current security state.

US-CERT leverages technical competencies in Federal network operations and threat analysis centers to develop knowledge and knowledge management practices supporting Federal stakeholders as they make key operational and execution decisions. It analyzes and reduces cyber threats and vulnerabilities, disseminates cyber threat warning information, and coordinates with partners and customers to achieve shared cyber situational awareness related to the Nation’s cyber infrastructure. US-CERT addresses the need for a single, accountable focal point for achieving cybersecurity throughout the Federal enterprise by utilizing a holistic approach to Federal government network security, enabling cybersecurity challenges to be addressed in a manner that maximizes value and minimizes risks associated with technology and security investments. US-CERT also manages the development, acquisition, deployment, and personnel support required to implement the National Cybersecurity Protection System, which is operationally known as EINSTEIN. Additionally, US-CERT addresses the need to build a skilled cyber workforce for today’s and tomorrow’s Federal government; provides a set of comprehensive resources that can be used to appropriately manage supply chain risk across the lifecycle of networks, systems, and components; and oversees the implementation of national cybersecurity policies and ensures appropriate resources are available to support the mission and its specialized information technology systems.

This PPA encompasses the following activities:

- *Incident Handling* activities detect and mitigate targeted attacks against the Federal government by covering the security of Federal information technology assets and services, as well as the assurance of essential citizen services.
- *Analysis* activities correlate and analyze cyber threat data “in-house” and disseminate actionable data and information in order to improve the overall understanding of current or emerging cyber threats.
- *Strategic Operations* activities build critical interagency information sharing and incident response collaboration.

- *Situational Awareness* activities identify, analyze, and comprehend broad network activity, supporting incident handling and analysis of trends for Federal departments and agencies. It is responsible for the development, acquisition, deployment, and support required for the National Cybersecurity Protection System, operationally known as EINSTEIN.
- *Production* activities collaborate with the public and private sector to share and disseminate critical cybersecurity information through a variety of distribution mechanisms.
- *Cybersecurity Coordination* activities permit the National Cyber Security Center to deliver on six key service areas: mission integration; coordination and collaboration; situational awareness and cyber incident response; analysis and reporting; knowledge management; and technology development and management.
- *Assistant Secretary, CS&C*: The US-CERT PPA also includes funding for 19 staff for \$3.995 million and \$0.251 million of contract funding for the Assistant Secretary, CS&C.

To collect and disseminate cybersecurity threat and attack information, the US-CERT coordinates and facilitates information sharing with Federal civilian agencies, the Department of Defense, intelligence agencies, State and local governments, private sector partners, infrastructure owners and operators, international partners, as well as the general public.

It was established as the operational arm of the National Cyber Security Division with the mission to lead and coordinate efforts to improve the Nation's cybersecurity posture, promote cyber information sharing, and manage cyber risks to the Nation. Its mission elements include: analyze and reduce cyber threats and vulnerabilities; disseminate cyber threat warning information; coordinate with partners and customers to achieve shared cyber situational awareness of the Nation's cyber critical infrastructure; provide response and recovery support for national assets; and advise on national-level cybersecurity policy and guidance.

US-CERT encompasses the activities that provide immediate customer support and incident response, including 24x7x365 support in the National Cybersecurity and Communications Integration Center, which has connectivity to all major Federal cyber operations centers, industry, international and communications partners, including the National Coordinating Center for Telecommunications; supports the United States Computer Emergency Readiness Team mission through integrated planning and sustainable financial, acquisition, and human capital management; provides several levels of analytical insight into cyber activities. In near-real time, its analysts examine raw and summarized data from a wide variety of information sources to make determinations about potential attacks detected by the National Cybersecurity Protection System's alerting systems; and supports the implementation of tools and technologies, including monitoring of deployed sensors and creation of threat signatures, countermeasures, and scenarios to provide the ability to rapidly detect and categorize cyber activities that could

pose a potential risk to United States Computer Emergency Readiness Team stakeholders.

US-CERT proactively anticipates attack vectors and intrusion activity as individuals and groups responsible for this activity change methods and increase the complexity of attacks against Federal government systems. As adversaries evolve in sophistication, US-CERT's approach to prioritization and escalation is based on the expected impact of the incident on the nation's cyber critical infrastructure. It escalates and prioritizes to assess risk, identify mitigation strategies, coordinate strategies and monitor results in a comprehensive risk management approach.

Additionally, US-CERT maintains a 24x7 Operations Center that provides situational awareness and risk mitigation information and support for Federal government customers as well as the general public. Through monitoring, communications, and coordination, US-CERT is able to provide timely and accurate mitigation guidance and serve as the focal point for collaborative cyber awareness, mitigation, and reduction for cyber threats and vulnerabilities.

US-CERT also utilizes a holistic approach to Federal government network security that enables Federal partners to address cybersecurity challenges in a manner that maximizes value and minimizes risks associated with technology and security investments.

It leads the Comprehensive National Cybersecurity Initiative Trusted Internet Connections (TIC) Initiative with the Office of Management and Budget. It optimizes network security capabilities into a common solution for the Federal information enterprise and facilitates the reduction, and consolidation of external connections, including Internet points of presence, through approved access points; ensures that implementation efforts across the Federal enterprise are in compliance with information technology security policy directives and statutes; and supports Federal partners' by promoting cybersecurity directives and statutes, including Office of Management and Budget and National Institute of Standards and Technology guidelines and special publications.

US-CERT optimizes network security capabilities into a common solution for the Federal information enterprise and facilitates the reduction and consolidation of external connections, including Internet points of presence, through approved access points. The reduction and consolidation of external access points has a number of benefits for the Federal government, particularly when coupled with risk mitigation and added security measures. In total, this allows for the establishment of a central oversight and assurance function.

While the Office of Management and Budget maintains oversight of the Trusted Internet Connections Initiative, implementation relies on the technical expertise of US-CERT to synchronize the efforts of all participating Federal partners. US-CERT monitors and oversees Federal partners' transition to becoming a Trusted Internet Connection Access

Provider, and consequently manages their baseline information systems security capabilities.

US-CERT also collaborates with Federal partners to define capabilities that drive the enhancement of cybersecurity, monitors progress, and collects and distributes best practices information relating to lessons learned with the goal of improving Federal partners' cybersecurity posture. Through promulgation of guidelines and best practices, US-CERT provides a Federal enterprise-level perspective to the customer base on information systems security trends and approaches, and can also offer recommendations on process improvements.

Compliance validations at Trusted Internet Connection sites and Security Operations Centers are conducted by US-CERT. It develops and manages a compliance program capable of monitoring, evaluating, and enabling ongoing compliance with Federal information technology security directives and initiatives. As part of the process, the branch evaluates and enforces ongoing compliance with Trusted Internet Connection technical requirements.

US-CERT collaborates with the Committee on National Security Systems to ensure best practices are promulgated when appropriate. It also acts as a liaison between Federal partners and critical infrastructure and key resources stakeholders by serving as a conduit for information security best practices and trends.

It does this through collection and analysis of information on cybersecurity risks, agency preparedness, and threats and provision of a clearinghouse for cross-agency and cross-sector research and experience on cyber threats and their prevention and mitigation. US-CERT then utilizes this information to identify and draft proposed Federal cybersecurity policy options and white papers, support Office of Management and Budget policy and legislative proposals, and propose or refine Federal cyber-security strategy.

By ensuring that Federal partners comply with mandatory cybersecurity practices, US-CERT provides support for cross-government initiatives as necessary.

US-CERT is responsible for the development, acquisition, deployment, and support required for the National Cybersecurity Protection System, operationally known as EINSTEIN, which is an integrated intrusion detection/prevention system that encompasses the hardware, software, and other components being procured specifically to support the Department's responsibilities under the Comprehensive National Cybersecurity Initiative.

To respond to Comprehensive National Cybersecurity Initiative requirements, the National Cyber Security Division established the National Cybersecurity Protection System, an integrated detection/prevention system that encompasses the hardware, software and other components necessary to support the Department's cybersecurity mission.

The National Cybersecurity Protection System improves security over the .gov domain by providing customers with orderly and efficient capability improvements. Broadly, it consists of four discrete blocks, starting with Block 1, and then Blocks 2-4 consisting of follow-on end-to-end system upgrades. The end-to-end system upgrades are achieved through incremental development and deployment. The deployed capabilities include flow collection at agency sites, centralized data storage, visualization, correlation, knowledge based, intrusion detection system capabilities, and flow analysis tools; contextual data feeds; and a prototype environment.

- *National Cybersecurity Protection System Block 1/EINSTEIN 1* was deployed at thirty-one sites between 2003 and 2008. Its capabilities included flow collection at Federal partner site, centralized data storage, visualization, correlation, knowledgebase, flow analysis tools, and contextual data feeds.
- *National Cybersecurity Protection System Block 2/ EINSTEIN 2* are an expansion of Block 1/EINSTEIN 1. It is being deployed in four phases at up to a total of 100 sites from the year 2008 to the year 2010. EINSTEIN 2 includes capability improvements provided via EINSTEIN 1 system upgrades. It includes three parts: Blocks 2.0, 2.1 and 2.2 which provide EINSTEIN 2, updated visualization and correlation tools and other updated capabilities based on Federal partner-gathered data sets.
  - Block 2.0 includes flow collection and intrusion detection system at federal partner sites, centralized data storage, visualization, correlation, knowledge base/management, flow analysis, intrusion detection system tools, contextual data feeds, and a prototype environment.
  - Block 2.1 includes increased capabilities in event detection and management including aggregation, correlation, and visualization.
  - Block 2.2 includes increased functionality including information sharing environment across multiple agencies. Also includes establishing agreements on the nature of information sharing via Service Level Agreements/Memoranda of Understanding actions that are needed for collaboration.
- *National Cybersecurity Protection System Block 3/EINSTEIN 3* includes classified capability improvements. Its architecture and deployment are interdependent with the capabilities delivered via EINSTEIN 1 and EINSTEIN 2. Its capabilities will fulfill key components of the Comprehensive National Cybersecurity Initiative. The planned activities under this section can be provided via classified channels.

With enhanced capabilities, US-CERT will be able to implement improvements within the National Cybersecurity Protection System. For EINSTEIN 2, the end-to-end system upgrades are being deployed in four phases by adding flow collection and intrusion detection system at agency sites, intrusion detection system analysis tools, and a prototype environment. Phase I involved deployment at one department. Phase II deployed systems to five additional departments/agencies. Phase III is in the process of deploying to four NETWORKX Vendors and Phase IV involves all remaining installations.

US-CERT has developed a detailed deployment plan outlining activities and critical milestones needed to achieve Full Operational Capability for the EINSTEIN 2 deployment. The deployment plan provides an overview of how the information system will be deployed and tested, defining National Cybersecurity Protection System component entry and exit criteria for each upgrade installation, and detailing transition to an operational status. It also contains an overview of the system, a brief description of the major tasks involved in the implementation, the overall resources needed to support the implementation effort and any site-specific implementation requirements.

The National Cybersecurity Protection System structure improves the capability to analyze malicious activity occurring across the Federal information technology networks resulting in improved computer network security situational awareness. This increase in situational awareness can then be shared with Federal executive agencies in an effort to reduce and better prevent computer network vulnerabilities.

US-CERT addresses the need to build a skilled cybersecurity workforce for today's and tomorrow's Federal government and provides a set of comprehensive resources that can be used to appropriately manage supply chain risk across the lifecycle of networks, systems, and components.

The Comprehensive National Cybersecurity Initiative Education Initiative establishes the framework for shaping and delivering a cyber-capable workforce, with a focus on those requiring the role-based specialized skills needed to protect, deter, and respond to threats to Federal government networks. In turn, these priority initiatives will be informed by, and will inform, partnerships with advisory bodies, public, private, academic and other-government circles. These partnerships will form the foundations needed to prepare a skilled workforce for effective performance of cyber missions and promote a strong and dependable pipeline of skilled individuals in cybersecurity for future Federal government employment.

After in-depth reviews of cyber-related reports and studies, a high-level survey of current Federal government cyber education opportunities, and interviews with government and non-government stakeholders, the Comprehensive National Cybersecurity Initiative Cyber Education Senior Steering Committee identified three compelling drivers for cybersecurity training, education, and workforce development: keep pace with technological change, both in content and delivery; reinforce coherency through common language, guidelines, and standards; and invigorate the pipeline and accelerate the availability of skilled cybersecurity employees. Funding requested for US-CERT Operations support all three CNCI education goals.

US-CERT provides a set of comprehensive resources that can be used to appropriately manage supply chain risk across the lifecycle of networks, systems, and components. In order to achieve this, the branch brings together disparate policy, thus providing Federal partners with the necessary guidance to improve their protective posture from vulnerabilities arising out of the information and communications technology supply chain.

US-CERT oversees the implementation of national cybersecurity policies and ensures appropriate resources are available to support the mission of the Comprehensive National Cybersecurity Initiative and its specialized information technology systems.

Additionally, it provides comprehensive responses to Congressional Testimony and other inquiries, as well as informs the Department's internal and external stakeholders about cybersecurity issues and activities. It is responsible for security policy development and oversight and management of the overall security of the Division's information technology systems including the Mission Operating Environment, the National Cybersecurity Protection System and the United States Computer Emergency Readiness Team .gov portal.

US-CERT ensures that facilities and real estate plans accommodate not only the normal office and cubicle requirements for unclassified staff operations, but also the highly specialized requirements supporting secure and classified cyber and communications operations. Interim and long-range plans for improving facilities, infrastructure and communications will permit the National Cyber Security Division to fully execute its responsibilities under the Comprehensive National Cybersecurity Initiative and protect the Nation's critical infrastructure and key resources.

FY 2009 US-CERT Accomplishments:

- Conducted analysis and coordinated response support and defense against cyber attacks for the Federal civilian Executive Branch (i.e., .gov), and information sharing and collaboration with State and local government, industry and international partners.
- Issued alerts and warnings to United States Computer Emergency Readiness Team stakeholders through the National Cyber Alert System.
- Maintained the United States Computer Emergency Readiness Team Portal to facilitate disseminating situational awareness products and encourage collaboration among stakeholders.
- Co-sponsored the National Vulnerability Database hosted by the National Institutes of Standards and Technology.
- Implemented Technical Mentoring Initiative to maximize staff capabilities in analysis, detection and mitigation.
- Improved the process for release of actionable information by establishing a Joint Agency Cyber Knowledge Exchange Program to provide Federal agency Security Operations Centers with information on the cyber threats to their networks as well as mitigation techniques for protection.
- Expanded the Government Forum of Incident Response and Security Teams to include state and local stakeholders. The fifth annual Government Forum of Incident Response and Security Teams conference was attended by almost 1,000 information technology security professionals, with 180 hours of instruction and discussion facilitated by over 125 presenters and panelists.
- Enhanced the capability to provide timely warnings and notifications by sharing information on daily and weekly calls with National Security Agency/Central

Security Service Threat Operations Center (NTOC), Intelligence Community-Incident Response Center, Defense Cyber Crime Center, National Cyber Investigative Joint Task Force, and Joint Task Force - Global Network Operations.

- Produced over 6000 products (e.g., security bulletins and alerts) for the general public and government customers, and an additional 700 information security products (e.g., Situational Awareness Reports) for government customers only.
- Began soliciting feedback from stakeholders on a quarterly basis to enhance products and thus meet the needs of each sector better. As part of this endeavor, the United States Computer Emergency Readiness Team will improve the accuracy of its distribution lists for each product.
- Participated in Information Technology Sector Specific Plan implementation including working level discussions and activities to promote trusted information exchange on cybersecurity events.
- Conducted a pilot designed to implement a single, integrated process improvement training initiative to baseline business processes and formally integrate process requirements by re-engineering core Call Center and incident handling activities within the United States Computer Emergency Readiness Team.
- Hosted multi-agency Conficker Table Top to prepare for potential cyber attacks and surged operations to mitigate the Conficker worm impact.
- Created a widely distributed logon script tool for use on enterprise networks to detect infection by the Conficker worm.
- Conducted privacy training and finalized legal compliance requirements to ensure that the United States Computer Emergency Readiness Team is in full legal compliance with the Department of Homeland Security and Federal privacy requirements.
- Collaborated with United States Computer Emergency Readiness Team stakeholders on the development of the United States Computer Emergency Readiness Team Concept of Operations document.
- Supported nine Initial Operating Capability deployments of the National Cybersecurity Protection System Block 2/EINSTEIN 2.
- Drafted new United States Computer Emergency Readiness Team Concept of Operations (CONOPs) to clearly align mission, operational framework, and partnerships.
- Revised and drafted internal United States Computer Emergency Readiness Team standard operating procedures and playbooks.
- Increased staffing for the 24x7 Operations Center to provide capability for in-depth incident tracking, detecting, and mitigating, in order to improve around the clock analysis and fusion support.
- Maintained active collaboration with the Working Group of Key Allies, known as the Usual 5 (Australia, Canada, New Zealand, the United Kingdom, and the United States), the International Watch and Warning Network and the Forum of Incident Response and Security Teams.
- Established a baseline inventory of existing external connections and complete Initial Operating Capability Assessment for Trusted Internet Connection Access Providers.
- Oversaw Office of Management and Budget designated Trusted Internet Connection Access Providers implementation of technical requirements.

- Bundled Trusted Internet Connection compliant managed security services through the NETWORKX contract vehicle with General Services Administration.
- Monitored Federal partner transition to Trusted Internet Connection compliant, managed security services through the NETWORKX contract vehicle.
- Established a process to annually review and update the Trusted Internet Connection Access Points Technical and Information Systems Security Requirements and Trusted Internet Connection Architecture documentation.
- Created Trusted Internet Connection compliance assessments teams and establish follow-on contract for assessment team resources.
- Developed assessment metrics to measure long-term compliance of Trusted Internet Connection Access Providers.
- Conducted and evaluated eight Trusted Internet Connection Access Providers using Trusted Internet Connection compliance assessments, utilizing developed metrics to recommend changes to policy or architecture.
- Performed Operations and Maintenance, as required including new security patch management, hardware and software upgrades, and other actions needed to support improved communication.
- Attained Initial Operating Capability for EINSTEIN 2.
- Provided an initial intrusion detection capability for an expanded set of Departments/Agencies.
- Completed deployments to three NETWORKX Vendors' Trusted Internet Connection locations, which will expand intrusion detection capability to protect future Departments/Agencies that leverage General Services Administration NETWORKX Managed Trusted Internet Protocol Service Trusted Internet Connection services.
- Provided automated near real-time notification of detected intrusion events.
- Completed planning activities to stand up a redundant, warm site capability within the Department of Homeland Security to increase the availability and reliability of the detection and correlation capabilities.
- Created initial requirements to establish a Continuity of Operations Plan facility for the United States Computer Emergency Readiness Team to increase the availability and reliability of the analytical services provided to the Federal .gov.
- Baselined the Block 2.0 engineering and programmatic details in preparation for entering the Obtain/Deploy/Full Rate Production phase.
- Completed detailed design and began development of an initial Security Information and Event Management (SIEM) capability to enhance the aggregation and correlation of disparate data source events, data normalization, automatic correlation analysis, intelligent event monitoring and advanced threat visualization and analytics.
- Integration of a centralized Block 2.1 solution at the Services and Operations Center resulting in a decreased analyst workload through automation of data correlation and analysis processes.
- Established a partnership with the Federal Bureau of Investigation to launch a Digital Forensics Educators Working Group.
- Functioned as co-lead of the Comprehensive National Cybersecurity Initiative Education Initiative and the Initiative's Senior Steering Committee.

- Established interagency cybersecurity training partnerships to analyze requirements to synchronize cybersecurity roles and skill standards and develop a cybersecurity competence assessment methodology.
- Supported a multi-agency Federal Virtual World Collaboration program in the development of prototype user cases utilizing virtual world space for cybersecurity training activities.
- Developed a Federal cybersecurity training exercise program and conducted pilot training activities.
- Invested in Federal-wide access to online role-based training for the Federal cybersecurity workforce, via an unclassified network to approximately 100,000 users.
- Facilitated the dissemination of software assurance training and laboratory modules, as well as undergraduate and graduate courseware curriculum via virtual training environments.
- Sponsored an academic working group to design a concept and make recommendations on enhancing the Centers of Academic Excellence program criteria to support specific sectors of the critical infrastructures.
- Sponsored an academic working group and conducted a workshop to develop a model and define criteria for community college recognition and involvement in the Centers of Academic Excellence program.
- Sponsored an academic review of information assurance standards which led to the publication of a white paper outlining next steps and recommendations for mapping to higher education cybersecurity curricula.
- Implemented Supply Chain Risk Management projects to establish a body of best practices, guidance, and lessons learned across the Federal enterprise, thus identifying available Federal guidance and industry best practices sufficient for successful and consistent applications.
- Executed Supply Chain Risk Management programs in the civilian government and provide training opportunities to civilian agencies participating in the pilot programs, which involve streamlining and enhancing the execution of Supply Chain Risk Management for civilian agency pilot programs.
- Conducted quarterly programmatic evaluation of cost, schedule and performance activities relative to goals and objectives of Comprehensive National Cybersecurity Initiative-funded programs, including development and submission of quarterly Comprehensive National Cyber Security Initiative reports to the Office of the Director of National Intelligence and the Joint Interagency Cyber Task Force.
- As required, responded to inquiries and reporting requirements on Comprehensive National Cybersecurity Initiative programs, including those from Congress, the Office of Management and Budget, the Government Accountability Office, and other governing bodies, including development and submission of the FY 2009 Comprehensive National Cyber Security Initiative Expenditure Plan as required by Congress.
- Developed and submitted necessary five-year resource requests and justifications of Comprehensive National Cybersecurity Initiative programs as part of the Department's annual Planning, Programming, Budgeting, and Execution process.

#### FY 2010 US-CERT Planned Accomplishments:

- Conduct analysis and coordinate response support and defense against cyber attacks for the Federal civilian Executive Branch, i.e., .gov, and information sharing and collaboration with State and local government, industry and international partners.
- Issue alerts and warnings to United States Computer Emergency Readiness Team stakeholders through the National Cyber Alert System.
- Maintain the United States Computer Emergency Readiness Team Portal to facilitate disseminating situational awareness products and encourage collaboration among stakeholders.
- Partner in the activated National Cybersecurity and Communications Integration Center, which will improve the nation's capability and capacity to detect, prevent, respond, and mitigate disruptions of voice and cyber communications.
- Participate in Cyber Storm III, the national-level cyber exercise.
- Participate in the National Cyber Incident Response Plan Tabletop Exercise to stress, monitor and evaluate the effectiveness of the National Cyber Incident Response Plan during a cyber incident.
- Expand and operationalize the Technical Mentoring Initiative to maximize staff capabilities in analysis, detection and mitigation.
- Co-sponsor the National Vulnerability Database hosted by National Institutes of Standards and Technology.
- Evaluate the United States Computer Emergency Readiness Team's Classification Training program and develop an action plan so that the United States Computer Emergency Readiness Team is better able to share mitigating actions.
- Revise internal the United States Computer Emergency Readiness Team standard operating procedures and playbooks to support the United States Computer Emergency Readiness Team operations to include communications and coordination with Federal executive departments and agencies, industry and international partners.
- Improve relationships with industry to more quickly validate vulnerabilities and develop mitigation strategies.
- Participate in Information Technology Sector Specific Plan implementation including working level discussions and activities to promote trusted information exchange on cyber security events.
- Collaborate with private sector stakeholders from the information technology and communications sectors and co-draft a sector-specific Concept of Operations.
- Develop a plan and supporting procedures for mobile incident response team capabilities.
- Refine internal metrics to measure progress toward cybersecurity goals and objectives.
- Support National Cybersecurity Protection System deployments.
- Host Joint Agency Cyber Knowledge Exchange program.
- Develop a Federal department and agency partnership program to assign United States Computer Emergency Readiness Team personnel to work with specific .gov partners, thus creating a more specialized, customer service-focused program.
- Analyze existing Federal Information Security Management Act processes to reflect on information assurance policies and requirements to improve guidance and requirements based on current threats and vulnerabilities.

- Develop more comprehensive internal metrics to measure progress toward cybersecurity goals and objectives.
- Revise the United States Computer Emergency Readiness Team escalation and notification processes to include developing a cyber incident taxonomy in coordination with federal stakeholders.
- Hold Government Forum of Incident Response and Security Teams conference to educate the various levels of the Government Forum of Incident Response and Security Teams community on incident response activities.
- Increase staffing for the 24x7 Security Operations Center to provide an increased capability for in-depth incident tracking, detection, and mitigation, and provide around-the-clock analysis and fusion support.
- Manage continued Federal enterprise reduction and consolidation efforts of external connections, enabling efficient monitoring and alerting on suspicious activity occurring across the Federal enterprise.
- Conduct a combined feasibility study and cost-benefit analysis on the optimization of reducing Trusted Internet Connection access points. Explore at least two options for optimization in order to determine the extent to which consolidation efforts will continue to yield cost-effective optimization of Federal security and the point of diminishing returns on investment.
- Analyze and update the Trusted Internet Connection Access Points Technical and Information Systems Security Requirements and Trusted Internet Connection Architecture to: remain aligned with Federal security strategy; address identified solution gaps; provide Federal agencies clear guidance for the migration of existing infrastructure; and implementation of new capabilities in a manner consistent with the overall Federal security strategy.
- Align NETWORKX requirements and coordinate with the General Services Administration to adapt the NETWORKX contract vehicle to meet applicable Internet Connections/Trusted Internet Connection Access Points Technical and Information Systems Security Requirements in order to continue to provide Federal partners a cost effective solution for the implementation of capabilities necessary to comply with the overall Federal security strategy.
- Perform sixteen Trusted Internet Connection compliance assessments to ensure agencies have the appropriate operational capabilities in place to meet the Trusted Internet Connection Initiative objectives.
- Map Trusted Internet Connection compliance assessment criteria to other common Federal and industry compliance, audit, and certification criteria to allow parties engaged in the assessment process to leverage existing documentation to satisfy checks and eliminate unnecessary duplication of effort.
- Expand Trusted Internet Connection compliance assessment capabilities to support Comprehensive National Cybersecurity Initiative implementation by identifying and adding required capability checks to the compliance catalog. This will enable the creation of a broader compliance program of which the Trusted Internet Connection compliance assessments are a subset.
- Monitor implementation of Federal cybersecurity policies by Federal partners, providing coordination, guidance, and tracking the progress in implementation of information security policies. This will create an environment of improved

information security and awareness pertaining to the protection of Federal information and information systems from unauthorized access, use, disclosure, disruption, modification, or destruction.

- Assess the viability of a government-off-the-shelf Cyber Security Vulnerability Assessment tool to determine if it is feasible to distribute from a Federal enterprise standpoint as a common standardized tool that will minimize/eliminate the need for each Federal partner to develop or procure its own duplicative capability.
- Monitor and facilitate the Managed Trusted Internet Protocol Service offerings.
- Analyze and promote additional cybersecurity mitigation strategies and associated policies, working with the Office of Management and Budget and the National Institute of Standards and Technology, and facilitate and drive implementation of these additional capabilities across the Federal enterprise.
- Reduce potential alert pools by 70 percent, automatically filtering out false positives, increasing likelihood analysts are examining and mitigating true incidents.
- Increase the ability to aggregate and correlate identified events at deployed locations to 50 percent of events aggregated and correlated daily.
- Perform Operations and Maintenance while phasing out EINSTEIN 1 equipment as EINSTEIN 2 installations are completed.
- Enhance Block 2.0 data flow collection and intrusion detection system at 16 Federal sites.
- Aggregate and correlate data feeds from Blocks 1.0 and 2.0 and up to four industry data feeds. This provides analysts a more robust capability for targeting threats based on vulnerabilities identified from the National Cybersecurity Protection System inherent sensors and industry data.
- Enhance Block 2.1 baseline system enhanced to increased capabilities in event detection and management including data collection, correlation, analysis, and visualization.
- Integrate centralized Block 2.1 solution to decrease analyst workload through automation of data correlation and analysis processes.
- Incorporate interoperable information sharing environment across multiple Departments/Agencies and data centers to support Continuity of Operations Plan.
- Define requirements and architecture for EINSTEIN 3.
- Begin deployments of EINSTEIN 3 based on finalized requirements and architecture decisions.
- Improve the Centers of Academic Excellence program by implementing the community college information assurance pilot program, supporting the National Centers of Academic Excellence model to support the sectors of the critical infrastructures, and facilitating the development of cybersecurity standards relevant to higher education and recommendations for curriculum mapping.
- Lead, with the Department of Defense, the Comprehensive National Cybersecurity Initiative Education Initiative by initiating and/or continuing engagement with stakeholders to identify enhancement activities for cybersecurity workforce development.
- Conduct Federal cybersecurity training exercises via classroom and virtual environments.

- Provide and facilitate government-wide unclassified access to virtual training environments, hands-on laboratories, training exercises, and Web 2.0 technologies to provide cybersecurity training to all federal agencies.
- Create a systematic approach for establishing a skilled cybersecurity workforce by synchronizing Federal cybersecurity skill standards and training guidelines and designing a cybersecurity competency assessment model to measure cybersecurity workforce skill capabilities.
- Develop a training program for key Federal partners in order to provide security systems professionals with a Supply Chain Risk Management capability.
- Review results of Supply Chain Risk Management pilots to analyze potential application of best practices to other Federal departments and agencies.
- Identify Supply Chain Resource Management requirements for National Cybersecurity Protection System integration.
- Establish and complete program infrastructure, to include awarding acquisition contracts, creating a long-term Plan of Action and Milestones, completing a Work Breakdown Structure, Organizational Work Breakdown Structure and completing the program's Missions Needs Statement.
- Collaborate across Federal civilian departments, agencies, public, and private sectors to gain input into the design and implementation of the Supply Chain Risk Management Program.
- Identify and test Supply Chain Risk Management Key Practices (developed in FY 2009) through pilots and market research.
- Create Government-wide Risk Process Model for Supply Chain considerations.
- Establish threat information sharing capability with the Office of the Director of National Intelligence.
- Develop technical and acquisition recommendations based on pilot findings, market research and collaboration with both public and private sector partners.
- Establish governance, protocols, and standard operating procedures for the National Cyber Security Division, including process improvements that reduce time required to develop and process procurement requests, which will improve budget execution.
- Support the Office of Assistant Secretary for Cyber Security and Communications with the necessary resources to proactively lead and develop cross-cutting cyber strategic plans, implement standardized policies and programs, and more efficiently integrate critical National Cyber Security Division initiatives. These funds will also assist Cyber Security and Communications leadership efforts to develop a collaborative federated approach in working with Federal, State, local and private industry partners.
- Develop and submit required quarterly reports to the Office of the Director of National Intelligence and the Joint Interagency Cyber Task Force.
- As required, respond to inquiries and reporting requirements on Comprehensive National Cybersecurity Initiative programs, including those from Congress, the Office of Management and Budget, the Government Accountability Office, and other governing bodies, including development and submission of the FY 2010 Comprehensive National Cyber Security Initiative Expenditure Plan as required by Congress.

- Develop and submit necessary five-year resource requests and justifications of Comprehensive National Cybersecurity Initiative programs as part of the Department's annual Planning, Programming, Budgeting, and Execution process.
- Prepare, with the Department of Homeland Security Chief Administrative Officer, a National Cyber Security Division Facility Blueprint Plan to guide comprehensive facility short-term, interim, and long-term plans that address real estate, security and infrastructure issues.
- Complete the build out of the new integrated joint watch floor and successfully relocate associated Watch Center staff without interruption to service or capability.
- Work with the Office of the Assistant Secretary for Cyber Security and Communications to help relocate staff to new locations in order to alleviate the National Cyber Security Division staff operations space compression issue.

FY 2011 US-CERT Planned Accomplishments:

- Conduct analysis and coordinate response support and defense against cyber attacks for the Federal civilian Executive Branch, i.e., .gov, and information sharing and collaboration with State and local government, industry and international partners.
- Issue alerts and warnings to United States Computer Emergency Readiness Team stakeholders through the National Cyber Alert System.
- Maintain the United States Computer Emergency Readiness Team Portal to facilitate disseminating situational awareness products and encourage collaboration among stakeholders.
- Co-sponsor the National Vulnerability Database hosted by the National Institutes of Standards and Technology.
- Participate in Information Technology Sector Specific Plan implementation including working level discussions and activities to promote trusted information exchange on cyber security events.
- Support National Cybersecurity Protection System deployments.
- Host Joint Agency Cyber Knowledge Exchange program.
- Enhance the Federal Department and Agency partnership program.
- Analyze existing Federal Information Security Management Act processes to reflect on information assurance policies and requirements to improve guidance and requirements based on current threats and vulnerabilities.
- Hold Government Forum of Incident Response and Security Teams conference to educate the various levels of the Government Forum of Incident Response and Security Teams community on incident response activities.
- Assist in the development of requirements for next generation security solutions, including National Cybersecurity Protection System Block 3 and follow-on technologies to protect Federal networks.
- Update the Trusted Internet Connection Access Points Technical and Information Systems Security Requirements and Trusted Internet Connection Architecture to: remain aligned with Federal security strategy; address identified solution gaps; provide Federal agencies clear guidance for the migration of existing infrastructure; and implementation of new capabilities in a manner consistent with the overall Federal security strategy.

- Manage continued Federal enterprise reduction and consolidation efforts of external connections, enabling efficient monitoring and alerting on suspicious activity occurring across the Federal enterprise.
- Develop and maintain the cyber security strategic picture for the Federal government by maintaining actionable cyber strategic intelligence that realistically addresses existing and emerging security vulnerabilities, threats, and risks.
- Perform Trusted Internet Connection compliance assessments to ensure agencies have the appropriate operational capabilities in place to meet the Trusted Internet Connection Initiative objectives.
- Perform additional expanded Trusted Internet Connection compliance assessment capabilities to support Comprehensive National Cybersecurity Initiative implementation.
- Monitor implementation of Federal cybersecurity policies by Federal partners, providing coordination, guidance, and tracking the progress in implementation of information security policies. This will create an environment of improved information security and awareness pertaining to the protection of Federal information and information systems from unauthorized access, use, disclosure, disruption, modification, or destruction.
- Oversee designated Enterprise Security Solutions to ensure that the solutions and technologies remain current and are properly coordinated, planned and implemented with customer agencies.
- Analyze and promote additional cybersecurity mitigation strategies and associated policies, working with the Office of Management and Budget and the National Institute of Standards and Technology, and facilitate and drive implementation of these additional capabilities across the Federal enterprise.
- Improve ability to detect, prevent, and analyze threats to .gov traffic.
- Refresh and maintain intrusion detection capabilities.
- Complete replication of National Cybersecurity Protection System data to improve reliability of system.
- Implement information sharing to better coordinate and collaborate with other cyber centers.
- Continue deployment of EINSTEIN 3.
- As in FY 2010, lead, with the Department of Defense, the Comprehensive National Cybersecurity Initiative Education Initiative by initiating and/or continuing engagement with stakeholders to identify enhancement activities for cybersecurity workforce development.
- Provide and facilitate government-wide unclassified access to virtual training environments, hands-on laboratories, training exercises, and Web 2.0 technologies to provide cybersecurity training to all federal agencies.
- Conduct Federal cybersecurity training exercises via classroom and virtual environments.
- Implement the systematic approach for establishing a professional cyber workforce using common assessment tools to measure the performance of government personnel assigned to critical cyber positions.

- Deliver a report to the Office of Management and Budget identifying resource requirements for implementing Supply Chain Risk Management across all national security and other Federal government high priority systems.
- Deliver a report to the Office of Management and Budget identifying resource requirements for implementing Supply Chain Risk Management across all national security and other Federal government high priority systems.
- Provide a gap analysis of existing policy and guidance for Supply Chain Risk Management across the national security and Federal government high priority systems, and recommending remedial steps.
- Establish procedures for developing and disseminating all-source counterintelligence risk assessments for information technology to executive departments and agencies.
- Create a training program for Federal government counterintelligence risk management to be used within the Supply Chain Risk Management program.
- Implement governance, protocols, and standard operating procedures for the National Cyber Security Division.
- Develop and submit required quarterly reports to the Office of the Director of National Intelligence and the Joint Interagency Cyber Task Force.
- As required, respond to inquiries and reporting requirements on Comprehensive National Cybersecurity Initiative programs, including those from Congress, the Office of Management and Budget, the Government Accountability Office, and other governing bodies, including development and submission of the FY 2009 Comprehensive National Cyber Security Initiative Expenditure Plan as required by Congress.
- Develop five-year resource requests and justifications of Comprehensive National Cybersecurity Initiative programs as part of the Department's annual Planning, Programming, Budgeting and Execution process.
- With the Department of Homeland Security Chief Administrative Officer, begin implementation of the National Cyber Security Division Facility Blueprint Plan.
- Complete relocation of staff to new locations in order to alleviate the National Cyber Security Division staff operations space compression issue.

The US-CERT PPA also contains the budget request for Cybersecurity Coordination, which funds the National Cyber Security Center (NCSC).

NCSC's mission is to ensure that Federal agencies have access to and receive information and intelligence needed to execute their respective cybersecurity missions. All six service areas have been designed to deliver on that mandate, each with its own unique capability that enhances another service area. The integrating capabilities, processes and tools the Center deploys will strengthen each individual center's mission; promote an integrated national situational awareness; and support an integrated cyber incident response.

The NCSC plans to deliver on six key service areas:

- *Mission Integration* facilitates the integration of the six participating centers through common or aligned processes, procedures and techniques. The six

- participating centers include: the United States Computer Emergency Response Team (US CERT), the NSA Threat Operations Center (NTOC), the Intelligence Community Incident Response Center (IC-IRC), the US STRATCOM Cyber Command (CYBERCMD), the Department of Defense Cyber Crimes Center (DC3), and the National Cyber Investigative Joint Task Force (NCIJTF.)
- *Collaboration and Coordination* facilitates professional collaboration and managing the partnership agreement process with each center. The partnership agreements and the mission integration officers work to provide the cross organizational information sharing process. As an example, if US CERT needs information from DC3 to fulfill an information gap, and that same information is needed for CYBERCMD, the partnership agreements and mission integration officers will serve as the mechanism(s) for multi-cross organizational information sharing.
  - *Situational Awareness and Cyber Incident Response* sustains an integrated national situational awareness capability for operational and strategic means at all three classification levels. Provides support to steady state incident response and lead national cyber incident response efforts. Develops and deploy an integrated incident management system of detection, analysis, alert and notification, and response/remediation. Under the Situational Awareness and Cyber Incident Response team, this unit will support the Secretary as the Principal Federal Official for cyber under the National Infrastructure Protection Plan (NIPP).
  - *Analysis and Reporting* reports daily, weekly and annually on the composite state of the U.S. Cyber Networks and Systems. Conducts system wide incident analysis, and integrated incident response planning. Convenes and manages the cyber incident investigative capability, modeled after other successful federal investigative capabilities. Critical to this effort is for the Center to operate at all three classification levels - in order to share information across all classification domains and to build mechanisms to down grade information to a lower classification level to share information more broadly.
  - *Knowledge Management* provides a portal with a compendium of cybersecurity information and intelligence for cybersecurity professionals, analysts and center customers. Sustains a national cyber incident database. This knowledge management system will provide the means for on-line collaboration, correlation analysis, discovery, and trend studies.
  - *Technology Development and Management* provides enabling IT support for the center and provides enterprise tools and capabilities (process, tool deployment and common procedures) for all six centers.

NCSC will utilize the information sharing agency agreements documented in the 2003 Memorandum of Understanding (MOU) Between the Intelligence Community, Federal Law Enforcement Agencies, and the Department of Homeland Security Concerning Information Sharing (Information Sharing MOU); the 2005 Memorandum for the Heads of Executive Departments and Agencies on the Terrorism Information Sharing Environment; and the policies and procedures developed by the Program Manager for the Information Sharing Environment (PM-ISE). By 2011, the mission analysis and partnership agreements will be completed utilizing the framework established by the PM-

ISE. These agreements will identify complimentary mission space and information/intelligence gaps. The agreements will delineate how the NCSC will deliver key information and intelligence needs to improve each Center's mission as defined by National Security Presidential Directive 54 (NSPD 54)/Homeland Security Presidential Directive 23 (HSPD 23).

FY 2010 Cybersecurity Coordination Planned Accomplishments:

- Refine and improve the NCSC Coordination Council
- Integrate the NCSC as an integral part of the National Cyber Incident Response Plan
- Deploy the knowledge management system for cybersecurity information on Homeland Security Data Network (HSDN), at the secret level for all 6 centers, center customers and fusion centers. Complete all credentialing. Consolidate cybersecurity information at the secret level for all 6 centers, center customers and fusion centers.
- Complete mission analysis of each center. Complete cross center mission analysis to identify collective gaps and information needs.
- Complete partnership agreements with each center.
- Report on significant national cyber incidents.
- Create a standard operating procedure (SOP) for a NCSC watch function for cross domain situational awareness and incident response to monitor national cyber events and avoid replication of efforts with other cyber centers. Staff a watch desk at Glebe Road watch center for one shift.
- Achieve federal manning strength of 14 employees.
- Conduct a proof of concept for a national cyber incident database utilizing National Information Exchange Model developed by DHS (NIEM) and markup language of Information Object Data Exchange Format (IODEF).

FY 2011 Cybersecurity Coordination Planned Accomplishments:

- Complete partnership agreements with each center.
- Ensure and continue to monitor execution of deliverables as agreed to under each signed partnership agreement. Measure and report effectiveness of integration, collaboration and information sharing.
- Report on significant national cyber incidents.
- Release Version 3.0 of Knowledge Management System with Symantec web extensions. (Web extensions enable cross domain information sharing without having to re-key data).
- Sustain the knowledge management system at the secret level. Continue to add content and users.
- Support and integrate incident response activities under the National Cyber Incident Response Plan.
- Integrate results of IODEF proof of concept into the knowledge management system release Version 3.0.

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
Strategic Initiatives  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Strategic Initiatives**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	-
<b>2010 Enacted</b>	<b>37</b>	<b>28</b>	<b>64,179</b>
2011 Adjustments-to-Base	1	1	193
<b>2011 Current Services</b>	<b>38</b>	<b>29</b>	<b>64,372</b>

<b>2011 Total Request</b>	<b>38</b>	<b>29</b>	<b>56,880</b>
Total Change 2010 to 2011	1	1	(7,299)

NPPD requests \$56.880 million for Strategic Initiatives, including 38 positions and 29 FTE. This represents a net decrease of \$7.299 million over the FY 2010 enacted budget of \$64.179 million. These funds support NPPD's role in cybersecurity activities.

The FY 2011 request for Strategic Initiatives includes adjustments-to-base for annualization of \$0.138 million for 1 FTE received in FY 2010, pay inflation of \$.055 million, and 1 position offset by \$0.112 million in program/contract dollars. Program changes include a net decrease of \$7.492 million.

Strategic Initiatives establishes mechanisms for Federal partners to deploy standardized tools and services at a reduced cost, paving the way for a collaborative environment that enables sharing of best practices and common security challenges and shortfalls. It develops and promulgates sound practices for software developers, information technology security professionals, and other critical infrastructure and key resources stakeholders and collaborates with the public and private sectors to assess and mitigate risk to the Nation's cyber critical infrastructure and key resources.

This PPA encompasses activities under:

- *Critical Infrastructure Protection-Cyber Security* activities strengthen preparedness by partnering with the public and private sectors to reduce vulnerabilities and minimize the severity of cyber attacks across all critical infrastructures and key resources sectors.
- *Training and Education* activities provide resources to improve the training, education, and workforce development of information technology security professionals within the Federal government and private industry.
- *Software Assurance* activities improve software development and acquisition processes by way of forums, working groups, and best practices collaborations.
- *Cyber Exercises* activities plan, coordinate, and conduct cyber-focused exercises that prepare and enhance incident operational capabilities for the Department and its Federal, State, local, regional, international, and private sector partners.
- *Standards and Best Practices* activities promote and sponsor the development of standards, guidance documents, metrics, and tools that raise awareness and provide technical guidance for the implementation of cybersecurity controls.
- *Information Systems Security Line of Business (ISS LoB)* activities support the long-term strategic prevention of attacks against Federal government networks by addressing common challenges faced by all agencies.
- *Control Systems* focus on reducing the cyber risk to industrial control systems within the Nation's critical infrastructure and key resources.
- *Assistant Secretary, CS&C*: The Strategic Initiatives PPA also includes \$0.131 million of contract funding for the Assistant Secretary, CS&C.

Across the Federal civilian government, Strategic Initiatives: works to assess and prioritize common cybersecurity needs and solutions; promote actionable cybersecurity policies, initiatives, standards, and guidelines for implementation; works closely with the Office of Management and Budget, Department of Commerce, and others to enable and drive the effective implementation of cybersecurity risk mitigation strategies; and measures and monitors agency implementation strategies and compliance with published cybersecurity policies, initiatives, standards and guidelines. Federal Network Security supports the long-term strategic prevention of attacks against Federal government networks by addressing common challenges faced by all agencies.

To comply with the Federal Information Security Management Act and the E-Government Act of 2002 the Office of Management and Budget directed the Department of Homeland Security to establish the Information Systems Security Line of Business in

order to directly facilitate agency compliance with information security requirements, standards, and guidelines, and improve the level of information security across government. Strategic Initiatives leverages existing efforts and processes within the Office of Management and Budget Information Systems Security Line of Business. These activities focus on agency partnering, outreach, and collaboration to achieve objectives.

Combined with projects for software security automation and measurement, Strategic Initiatives' community collaboration efforts seek to reduce software vulnerabilities, minimize exploitation, and address means to improve capabilities that routinely develop and deploy trustworthy software products, enabling more resilient assets within the cyber critical infrastructure.

Strategic Initiatives promotes sound practices and standards that improve cybersecurity. It facilitates the promulgation, adoption, and enhancement of common indexing and reporting capabilities for malware, exploitable software vulnerabilities, and common attacks which target software by providing standardized schema for naming, indexing, describing, and cataloging. It supports the update of capabilities which enable the automation, use and evolution of these capabilities within the information technology security community. Through sponsoring and collaborating with numerous programs, committees, and working groups that seek to improve standardization of information across both public and private industry, Strategic Initiatives helps support Federal partners by providing them with cybersecurity research and development requirements to support their missions.

Through sponsorship of the Common Vulnerabilities and Exposures and Open Vulnerability and Assessment Language program, Strategic Initiatives works in partnership with the National Institute of Standards and Technology to standardize cyber vulnerability nomenclatures, making it possible to respond to vulnerabilities more efficiently as information is correlated across vendor products. The National Vulnerabilities Database, managed by the National Institute of Standards and Technology and funded by the National Cyber Security Division, is built on the outputs of the Common Vulnerabilities and Exposures program. The National Vulnerabilities Database provides stakeholders a comprehensive resource of publicly available United States government vulnerability resources including industry-specific information. It also participates in the National Institute of Standards and Technology's Security Content Automation Protocol program, which allows stakeholders to use commercial-off-the-shelf tools to check and map the security status and controls of their systems.

Strategic Initiatives works with the Department's Science and Technology Directorate to coordinate cybersecurity research and development priorities conducted through the Department's various programs. Through this collaboration, the National Cyber Security Division is able to participate in research and development program topic selections, proposal evaluations, vendor selection, and research and development program technical reviews. Through strategic workforce development programs, Strategic Initiatives facilitates the development of trained professionals to support the Nation's cybersecurity

needs, thus preparing the information technology workforce to meet current and future cybersecurity challenges.

Strategic Initiatives focuses resources on improving cybersecurity education, increasing the efficiency of existing cybersecurity training programs, and promoting cybersecurity workforce development. It influences numerous cybersecurity and information assurance education programs, including collaboration with the National Security Agency and the National Science Foundation to sponsor the National Centers of Academic Excellence in Information Assurance Education and Research program and the Federal Cyber Service: Scholarship for Service program, respectively.

Furthermore, it collaborates with stakeholders to promote innovative training programs and best practices to facilitate the availability of qualified information technology security professionals and a strong and dependable pipeline of future skilled cybersecurity employees in the Nation's workforce.

Strategic Initiatives collaborates with the public and private sectors to assess and mitigate risk to the Nation's cyber critical infrastructure and key resources.

Strategic Initiatives includes a special focus on identification, analysis, and remediation of control systems vulnerabilities because of the potential impacts of a control system attack. It also develops partnerships and provides guidance through programs aimed at reducing the likelihood of success and severity of impact of a cyber attack against the Nation's critical infrastructure industrial control systems. It coordinates with public and private partners to increase capabilities within critical infrastructure and key resources stakeholders to improve vulnerability assessment and mitigation, information dissemination, awareness, training, and tools.

In accordance with the National Infrastructure Protection Plan, Strategic Initiatives strengthens the Nation's preparedness through public and private partnerships that work to improve the security of the Information Technology Sector, serving as the designated Sector-Specific Agency. It provides assistance and expertise across all critical infrastructure and key resources sectors for cybersecurity.

It works with the National Programs and Protection Directorate's Office of Infrastructure Protection to develop and implement the National Infrastructure Protection Plan Information Technology Sector-Specific Plan. It also assists other Sector-Specific Agencies, private sector owners and operators of critical infrastructures and key resources, and State and local governments in assessing and mitigating cyber risks.

As part of its work on the National Infrastructure Protection Plan, Strategic Initiatives provides support to the National Infrastructure Protection Plan Program Management Office and the National Critical Infrastructure and Key Resources Annual Report. Working on these projects with Sector-Specific Agencies permits the opportunity to enhance cybersecurity in all critical infrastructure and key resources sectors via the cross-sector perspectives and activities on common vulnerabilities and protective measures,

interdependencies, and risk assessment methodologies and mitigation strategies. To further this objective, it formed and co-chairs the Cross Sector Cyber Security Working Group to share information and provide a forum of projects requiring input from all sectors.

Additionally, Strategic Initiatives plans, coordinates, and conducts cyber-focused exercises that prepare and enhance incident operational capabilities for the Department and its Federal, State, local, regional, international, and private sector partners. Working collaboratively with stakeholders, it develops, designs, and executes cyber exercises that range from policy process exercises that facilitate cybersecurity operations to network simulations that test command and control procedures, response mechanisms, and cross-sector coordination.

It also manages the biannual Cyber Storm exercises series, which involves hundreds of cross-sector critical infrastructure and key resources participants. The construction of a national cyber exercise supports Federal partners and State and local governments in identifying gaps in cybersecurity processes and procedures, demonstrating interdependencies between response organizations and the information technology, and improving cyber preparedness for the delivery of critical government services.

#### FY 2009 Strategic Initiatives Accomplishments:

- Defined, advised, assessed, and designated Federal enterprise-wide Shared Service Centers with Federal partners.
- Awarded a Federal enterprise-wide acquisition in order to provide Situational Awareness and Incident Response Tier I products and services with the General Services Administration.
- Defined and advised commercial Shared Service Center for Certification and Accreditation services with the General Services Administration.
- Defined technical requirements for Situational Awareness and Incident Response Tier II products and services collaborate with Federal partners.
- Updated the Software Assurance Community Resources and Information Clearinghouse, “Build Security In” web sites, and online resources consistent with stakeholder needs for software assurance sound practices for development, acquisition, and sustainment.
- Conducted semi-annual Software Assurance Forums for other government, private industry, academia, and international entities to facilitate the ongoing collaboration to identify methods for improving processes and practices throughout the software development lifecycle.
- Hosted Software Assurance Working Groups to advance focused portfolio efforts.
- Managed programs to collaborate with stakeholders in specifying and updating the Common Weakness Enumeration and Common Attack Pattern Enumeration and Classification.
- Collaborated with the National Institute for Standards and Technology to further develop final base-line source code security analysis tool specification document and a test plan document, Software Assurance Metrics and Tool Evaluation Reference

Dataset test suite, and Web Application Scanner Tool Functional Specifications test suite.

- Collaborated with the National Institute for Standards and Technology to provide Test Case Generator, which will generate thousands of small test programs embodying the weaknesses described in Object Management Group's Semantics of Business Vocabulary and Business Rules.
- Shared common naming conventions for vulnerabilities through further sponsorship of the Common Vulnerabilities and Exposures program and Open Vulnerability and Assessment Language to improve standardization of information across security advisories, tools, databases, and services.
- Participated in and provided technical expertise to various cybersecurity standards committees including the Department's Standards Committee, the Committee on National Security Systems, the International Organization of Standardization security standards committees, and other associated national research and development standards committees.
- In collaboration with Federal partners, private industries, and international stakeholders, conducted workshops and conferences on innovative cybersecurity standards and requirements topics, as well as best practices.
- Functioned as a national cybersecurity education resource, initiated engagement with stakeholders to identify enhancement activities for cybersecurity workforce development, conducted briefings and conference presentations.
- Co-sponsored the National Centers of Academic Excellence program, coordinating and conducting the Centers of Academic Excellence annual meeting and participating in annual program reviews.
- Co-sponsored the Federal Cyber Service: Scholarship for Service program, including coordinating and conducting the annual Scholarship for Service symposium and job fair, implementing a mentorship program, and conducting annual program quality reviews.
- Co-sponsor the annual Cybersecurity Educators Colloquium and the annual Federal Information System Security Educators' Association.
- Promoted Federal agency awareness of the Scholarship for Service program via agency information sessions, and participation in Federal government bodies, such as the Chief Information Officer Council's Information Technology Workforce Development Committee.
- Supported a group of state Chief Information Security Officers to design and develop a State government model for information security workforce development.
- Customized Department of Homeland Security curriculum supporting four information technology security roles requiring consistent, uniform training across federal organizational components to build an Information Systems Security Line of Business Tier Two Training Shared Service Provider Capability and conduct pilot training sessions.
- Enhanced the control systems testing environment by evaluating additional technologies, such as wireless connectivity.
- Established the Industrial Control Systems Joint Working Group to provide a formal mechanism to protect information and foster the coordination of activities and programs across government and private sector stakeholders.

- Developed the Cyber Security Evaluation Tool for critical infrastructure owners and operators.
- Organized and facilitated monthly conference calls with vendors of predominant Supervisory Control and Data Acquisition and control systems found throughout the nation which is attended by about 90 percent of all control systems vendors with a United States market share.
- Conducted vulnerability assessments on six legacy or commercial-off-the-shelf control systems components, operating systems, or networks to provide public and private partners with critical information on control security weaknesses, providing vendors with important control security information they can use to patch or eliminate security holes within their products resulting in more secure products and applications.
- Developed and presented training videos and classes at workshops, conferences and other venues to educate the control systems community on the risk of control system cyber attacks and mitigation solutions.
- Established the Industrial Control Systems Cyber Emergency Response Team, which is a national resource to receive, manage and respond to incidents and vulnerabilities that affect our nation's control systems.
- Conducted joint exercise with Department of Defense and Department of Energy, which included representatives from Federal Agencies and the private sector.
- Developed and validated control systems scenarios that illustrate the impact and consequences of vulnerabilities on our nation's critical infrastructure and key resources.
- Developed the Cyber Security Procurement Language for Control Systems that can be used ensure that security is built into systems before they are purchased.
- Developed the Catalog of Control System Security: Recommendations for Standards Developers to accelerate the cyber security standards process.
- Developed Creating Cyber Forensics Plans for Control Systems, recommended practice for Control Systems.
- Collaborated with the Chemical sector to publish their control system security roadmap.
- Assisted the Dams sector in drafting an initial version of their control system security roadmap.
- Supported Water sector roadmap implementation efforts by providing training at regional workshops.
- Expanded control systems malware analysis within the United States Computer Emergency Readiness Team branch by establishing a malware test bed in conjunction with the existing laboratory facilities, and supported it by helping to secure control systems through the production and dissemination of timely situational awareness information about control systems security and through the identification, analysis, and reduction of control system threats and vulnerabilities.
- Recapitalized the existing infrastructure of the control systems test bed in order to conduct scenario verification of control systems to capture the root cause of events and identify and disclose to public and private partners' protective measures and potential mitigation techniques.

- In coordination with the appropriate Information Sharing and Analysis Centers, identified key vulnerabilities and mitigation strategies to mitigate both previously and newly discovered high-priority weaknesses, and consequently provide control systems vendors with important control systems security information that can be used to patch or eliminate security holes within products.
- Completed and published the first information technology sector-wide baseline risk assessment in collaboration with industry and government partners.
- Distributed and implemented the automated cybersecurity vulnerability assessment for use by critical infrastructure and key resources stakeholders and conducted on-site assessments in coordination with the Protective Security Advisor program.
- Supported cyber security risk assessment and mitigation and conducted on-site assessments of facilities across critical infrastructure and key resources sectors. Provided critical infrastructure and key resources sector participants a portfolio of assessment tools, techniques, and analytics, ranging from those that can be self-applied to those that require expert facilitation or mentoring outreach.
- Supported the Office of Infrastructure Protection Protective Security Advisor Program in the Regional Resiliency Assessment Program by providing cybersecurity assessment expertise at critical infrastructure and key resources site assistance visits.
- Contributed the Cybersecurity Annual Report Appendix to the 2009 Critical Infrastructure and Key Resources National Annual Report
- Conducted sector interviews and provided guidance to the cross sector community on the Department's cybersecurity activities, as well as ways to address the National Infrastructure Protection Plan Measurement and Report Office Sector Annual Report Guidance during the 2009 Sector Annual Report development process.
- Convened workshop and follow-up meetings on research and development within the information technology sector and share results with public and private sector security partners invested in research and development. Critical Infrastructure Protection-Cyber Security developed the Public and Private Sector Research and Development Integration Concept of Operations which provides an approach for integrating private-sector input into Federal cybersecurity research and development efforts as part of the Comprehensive National Cybersecurity Initiative.
- Led efforts through the Cross Sector Cyber Security Working Group to enhance information sharing, metrics for success across the 18 critical infrastructure and key resource sectors, and identify incentives for cybersecurity.
- Participated in the Committee on Foreign Investment in the United States Interagency Working Group process to provide technical review and assistance on cybersecurity and/or information technology-related cases. A total of 64 Committee on Foreign Investment in the United States cases were reviewed by Critical Infrastructure Protection-Cyber Security in FY 2009.
- Initiated the 18-to-24-month planning process for Cyber Storm III, currently planned for 2010, and integrated aspects of Comprehensive National Cyber Initiative and the White House Cyberspace Policy Review into Cyber Storm III planning and development.
- Developed and deployed Cyber Exercise Technical Assistance and Cyber Exercise Support Program to bolster support and participation in cyber exercises with the full

range of critical infrastructure partners, thus enhancing collective cybersecurity preparedness and identifying interdependencies in cyber preparedness and response.

- Published, disseminated, and socialized the Cyber Storm II After-Action Report to further develop findings, identify areas for improvement, and formulate a roadmap based on the observations laid out in the Cyber Storm II After-Action Report.
- Managed cooperative agreement with University of Texas at San Antonio Center for Infrastructure Assurance and Security to conduct State and local cybersecurity preparedness assessments and exercise activities.

#### FY 2010 Strategic Initiatives Planned Accomplishments:

- Identify common solutions for information systems security that will reduce cost through shared services, providing benefits and cost efficiencies by eliminating duplication, increasing expertise through specialization, freeing-up resources for mission specific requirements, and other tailored security requirements.
- Strengthen the Federal government's information systems security through adherence to the management and reporting regulations of the Federal Information Security Management Act which will result in improved effectiveness and consistency in securing Federal government information systems.
- Support key components of the governance structure to improve information security decision making by providing a model for initiating, managing, and maintaining an approach for a range of security needs in a dynamic security environment. Elevate decision-making for common activities of information systems security from local programs to an enterprise level that ensures consistency and strengthens information systems security government-wide.
- Collaborate with the National Institute of Standards and Technology and tool vendors to create standards and certification mechanisms from which tools can be qualified for software security verification.
- Leverage international standards efforts including those of the Institute of Electrical and Electronics Engineers, the International Organization for Standardization/International Electrotechnical Commission and collaborate with stakeholders in the Software Assurance Program's Working Groups to create deliverables that seek to modify national and international standards that will better address software assurance needs.
- Participate in the Institute of Electrical and Electronics Engineers Computer Society and the International Organization for Standardization and International Electrotechnical Commission Joint Technology Council "Software and Systems Engineering" Standards Committees, and contribute to efforts to publish a systems and software assurance standard that could be used to communicate claims about the safety, security, and dependability of software products.
- Conduct semi-annual Software Assurance Forums for government, private industry, academia, and international entities to facilitate the ongoing collaboration to identify methods for improving processes and practices throughout the software acquisition and development lifecycles.
- Host Software Assurance Working Groups to advance focused portfolio efforts.
- Facilitate the promulgation, adoption, and enhancement of common indexing and reporting capabilities for malware, exploitable software vulnerabilities, and common

attacks which target software by providing standardized schema for naming, indexing, describing, and cataloging. This will support daily update of capabilities which enable the automation, use and evolution of these capabilities within the information technology security community.

- Provide criteria for evaluating capabilities of software suppliers, and in collaboration with the Defense Acquisition University complete development of a course curriculum based on the Software Assurance Acquisition Guide that began in FY 2008.
- Provide a repository and on-line resources of Software Assurance material suitable for use in education and training.
- Provide Software Assurance models and outlines to integrate Software Assurance in graduate and undergraduate education along with training through coordination with academia and training and certification organizations in support of Cyber Education and Training.
- Provide Software Assurance outreach through presentations and articles in professional journals, pocket guides, and handouts based on Software Assurance documents for development, acquisition, testing, measurement, and education.
- Develop technologies for the automated analysis of software and systems for exploitable vulnerabilities and malicious code.
- Develop configuration settings, guidance and tools to reduce exposure to vulnerabilities.
- Participate in appropriate standards committees to ensure the development and promotion of cyber security standards.
- Develop automated reconfiguration tools that may be used to recover from attacks.
- Develop standards and policies for the creation, use, and maintenance of identities and privileged information.
- Function as a national cybersecurity education resource, initiating engagement with stakeholders to identify enhancement activities for cybersecurity workforce development, conduct briefings and conference presentations.
- Co-sponsor, promote, and expand the Centers of Academic Excellence program and the Scholarship for Service program.
- Co-sponsor with the Federal Bureau of Investigation, the digital Forensics Educators Working Group and conduct quarterly meetings.
- Co-sponsor the annual Cybersecurity Educators Colloquium and the annual Federal Information System Security Educators' Association.
- Finalize the State government information security workforce development model and promote it nationally as a best practice, throughout multiple state government entities.
- Maintain interagency cybersecurity training partnerships to share investment and increase availability of shared training and experiential learning resources across the Federal government.
- Customize cybersecurity curriculum modules supporting two cybersecurity roles requiring consistent, uniform training across federal organizational components to build an Information Systems Security Line of Business Tier Two Training Shared Service Provider Capability and conduct pilot training sessions.

- Enhance risk and vulnerability assessments on commercial-off-the-shelf control systems components, operating systems, or networks to provide public and private partners with critical information on control security weaknesses, providing vendors with important control systems security information they can use to patch or eliminate security holes within their products, resulting in more secure products and applications.
- Conduct vulnerability analysis on SmartGrid enabling technologies, such as Advanced Metering Infrastructure, Advanced Meter Reading and Mesh network architectures to identify potential vulnerabilities and develop mitigation solutions.
- Collaborate with the Federal Energy Regulatory Commission on joint Electromagnetic Pulse studies to evaluate potential hazards to the electric grid.
- Operate the Industrial Control Systems Joint Working Group and its subgroups to provide a formal mechanism to protect information and foster the coordination of activities and programs across government and private sector stakeholders.
- Enhance the Industrial Control Systems Cyber Emergency Response Team, which is a national resource to receive, manage and respond to incidents and vulnerabilities that affect our nation's control systems.
- In accordance with the Control Systems Security Program Strategy, update and maintain the Federal Coordination Strategy for Securing Control Systems and the Control Systems Security Protection Framework as the central framework for coordinating Federal activities with State and local government, private industries, international entities, and control systems vendors.
- Assist the Chemical sector with implementation efforts for their control system security roadmap.
- Collaborate with the Water sector to publish their control system security roadmap.
- Work with the Energy sector to update their control system security roadmap.
- Expand the control systems content of the United States Computer Emergency Readiness Team's website, promoting it as a central repository for control systems cybersecurity information, control system vulnerability reporting, and cross-sector control systems information sharing for public and private partners.
- Review, enhance, and widely distribute the Cyber Security Evaluation Tool across the control systems community, including public and private partners to further the situational awareness information on the cyber status and health of critical infrastructure and key resources stakeholders' control systems.
- In close collaboration with Information Technology Government Coordinating Council and Information Technology Sector Coordinating Council, review and update the Information Technology Sector-Specific Plan to reflect changes in the information technology and cybersecurity landscape.
- Conduct sector interviews and provided guidance to the cross sector community on the Department's cybersecurity activities, as well as ways to address the National Infrastructure Protection Plan Measurement Program Management Office 2010 Sector Specific Plan Guidance during the 2010 Sector Specific Plan development process.
- Implement long-term actions as outlined in the Information Technology Sector-Specific Plan to develop a methodology to manage risks identified in the Information Technology Sector Baseline Risk Assessment, identify protective programs, enhance

information sharing, set the pace for the research and development agenda of the information technology sector, and track its progress.

- In close collaboration with Information Technology Government Coordinating Council and Information Technology Sector Coordinating Council, conduct activities in support of the next iteration of the IT Sector Risk Assessment.
- Contribute to the development of cybersecurity risk assessment methodologies including provision of cybersecurity content for risk and vulnerability assessment methodologies developed by the Department to assist critical infrastructure and key resources sectors with onsite cybersecurity implementation assessments and provide options for considerations to increase cybersecurity resiliency. For FY 2010, Critical Infrastructure Protection-Cyber Security plans to conduct 50 site assistance visits to critical infrastructure and key resources sites.
- Develop cybersecurity guidance for the Department's grants programs that promote efforts to enhance the security of State and local governments, which in turn will aid in the development and implementation of State and local critical infrastructure and key resources cybersecurity protection plans. Additionally, Critical Infrastructure Protection-Cyber Security plans to further develop and define the Regional Cyber Assessment Review Program which intends to build a comprehensive view of cybersecurity dependencies that can be applied regionally or organizationally.
- Execute Cyber Storm III National Cyber Exercise and during exercise activities, test and validate Cyber Exercise Range, which will provide the capability to execute technical level cyber exercises for the Federal government and State and local governments, providing the possibility of eventual expansion into private industries.
- Sponsor and support cyber exercises with State, local, regional, and private sector security partners as part of the Cyber Exercise Technical Assistance and Cyber Exercise Support program.
- Provide technical exercise assistance to the United States, Canada, Australia, New Zealand, and United Kingdom and continue execute an exercise plan to facilitate operational interaction with these nations and work with the International Watch and Warning Network to integrate capabilities into future cyber exercise plans.
- Support development and implementation of the Cyber Incident Response plan by conducting tabletop and other exercises, developing frameworks and playbooks as needed.

FY 2011 Strategic Initiatives Planned Accomplishments:

- Participate in Federal government-wide cybersecurity initiatives and serve as an information conduit to promote collaboration in providing e-government services and share lessons learned.
- Drive strategic sourcing efforts for investments in security solutions, technologies, and processes through cross-agency cooperation and partnerships.
- Oversee and monitor designated enterprise solutions.
- Manage the daily operations of the Information Systems Security Line of Business Program Management Office.
- Collaborate with other National Cyber Security Division programs to assess and maintain the cybersecurity strategic picture for the Federal government.

- Identify common needs and requirements that save time, money, and effort by capitalizing on shared solutions for common security areas.
- Lead important research and analysis projects that will evaluate emerging cyber technologies and risks by evaluating historical, existing, and emerging technologies with the potential ability to reduce vulnerabilities, prevent intrusions, and defend against threats.
- Effectively monitor and support cross government cyber initiatives and policies by maintaining a strong situational awareness capability to consistently and accurately monitor, evaluate, synthesize, validate, and report on cyber security initiatives.
- Facilitate the implementation of cross-government initiatives through proactive strategic support to agencies with respect to cyber policy. Also lead continuous improvement initiatives through established Federal executive cyber security committees.
- Strategic sourcing to help achieve more secure information systems within the Federal government by facilitating a more consistent, comparable, and repeatable approach for selecting and specifying security services and tools.
- Implementation of Enterprise Security Solutions so all Federal departments and agencies will benefit from reduced costs through sharing services and eliminating duplicative efforts; improved quality of service and expertise through specialization and consolidation; and improved levels of cyber security across government agencies, particularly smaller agencies that may not have these capabilities internally.
- Co-sponsor semi-annual software assurance forums and quarterly working groups with the Department of Defense and the National Institute for Standards and Technology to provide venues for public-private collaboration in advancing software security in development and acquisition processes and resources.
- Provide collaboratively developed, software assurance information resources via journals, guides and on-line resources suitable for use in education, training, and process improvement.
- Co-sponsor software security automation and measurement capabilities with the Department of Defense, the National Institute for Standards and Technology and the National Security Agency, including the use of common indexing and reporting capabilities for malware, exploitable software weaknesses, and common attacks that target software.
- Manage programs to facilitate the adoption of Malware Attribute Enumeration Classification, Common Weakness Enumeration, and Common Attack Pattern Enumeration and Classification.
- Co-sponsor with the Department of Defense, the National Institute for Standards and Technology and the National Security Agency standards, metrics and certification mechanisms from which tools can be qualified for software security verification.
- Participate in and provide technical expertise to various cybersecurity standards committees including the Department's Standards Committee, the Committee on National Security Systems, the International Organization of Standardization security standards committees, and other associated national research and development standards committees.
- Provide feedback to the Science and Technology Directorate on research and development priorities.

- Promote common naming conventions for vulnerabilities by sponsoring the Common Vulnerabilities and Exposures and Open Vulnerability and Assessment Language programs.
- Function as a national cybersecurity education resource, initiating engagement with stakeholders to identify enhancement activities for cybersecurity workforce development, conduct briefings, and conference presentations.
- Promote adoption of the State government information security workforce development model nationally as a best practice, throughout multiple state government entities.
- Co-sponsor, with the Federal Bureau of Investigation, the digital Forensics Educators Working Group and conduct quarterly meetings.
- Maintain interagency cybersecurity training partnerships to share investment and increase availability of shared training and experiential learning resources across the Federal government.
- Co-sponsor the annual Cybersecurity Educators Colloquium and the annual Federal Information System Security Educators' Association.
- Co-sponsor the National Centers of Academic Excellence and the Scholarship for Service program.
- Enhance risk and vulnerability assessments on commercial-off-the-shelf control systems components, operating systems, or networks to provide public and private partners with critical information on control security weaknesses, providing vendors with important control systems security information they can use to patch or eliminate security holes within their products, resulting in more secure products and applications.
- Expand the Advanced Vulnerability Discovery facility to include two Additional Real Time Data Simulators, an expanded wireless test bed spectrum, current generation Automated Metering Infrastructure/Automated Meter Reading technologies, initial baseline assessment of current systems.
- Operate the Industrial Control Systems Joint Working Group and its subgroups to provide a formal mechanism to protect information and foster the coordination of activities and programs across government and private sector stakeholders.
- Enhance the Industrial Control Systems Cyber Emergency Response Team, which is a national resource to receive, manage and respond to incidents and vulnerabilities that affect our nation's control systems.
- Assist the Water sector with implementation efforts for their control system security roadmap.
- In accordance with the Control Systems Security Program Strategy, update and maintain the Federal Coordination Strategy for Securing Control Systems and the Control Systems Security Protection Framework as the central framework for coordinating Federal activities with State and local government, private industries, international entities, and control systems vendors.
- Improve the control systems content of the United States Computer Emergency Readiness Team's website, maintaining it as a central repository for control systems cybersecurity information, control system vulnerability reporting, and cross-sector control systems information sharing for public and private partners.

- Maintain an ongoing program review, enhancement, and distribution of the Cyber Security Evaluation Tool across the control systems community, including public and private partners to further the situation awareness information on the cyber status and health of critical infrastructure and key resources stakeholders' control systems.
- Utilize the cyber assessment portfolio and relevant results to inform sector planning and make additional considerations for top-down design for sector-specific best practices, assessments, and security measurements and performance.
- Incorporate sector-specific objectives within critical infrastructure and key resource assessments and at the same time provide national-level estimations of sector and cross-sector cyber security capabilities, achievements, and barriers.
- Implement long-term actions as outlined in the Information Technology Sector-Specific Plan to develop a methodology to manage risks identified in the Information Technology Sector Baseline Risk Assessment, identify protective programs, enhance information sharing, set the pace for the research and development agenda of the information technology sector, and track its progress.
- In close collaboration with Information Technology Government Coordinating Council and Information Technology Sector Coordinating Council, conduct activities in support of the next iteration of the Information Technology Sector Risk Assessment.
- Utilize the developed cybersecurity risk assessment methodologies, including provision of cybersecurity content for risk and vulnerability assessment methodologies developed by the Department to assist critical infrastructure and key resources sectors with onsite cybersecurity implementation assessments and provide options for considerations to increase cybersecurity resiliency. For FY 2011, Critical Infrastructure Protection-Cyber Security plans to conduct 75 site assistance visits to critical infrastructure and key resources sites.
- Evaluate the results of the Cyber Storm III National Cyber Exercise.
- Sponsor and support cyber exercises with State, local, regional, and private sector security partners as part of the Cyber Exercise Technical Assistance and Cyber Exercise Support program.
- Provide technical exercise assistance to the United States, Canada, Australia, New Zealand, and United Kingdom and continue to execute an exercise plan to facilitate operational interaction with these nations and work with the International Watch and Warning Network to integrate capabilities into future cyber exercise plans.
- As necessary, support national efforts to conduct tabletop and other exercises.

<b>2011 Total Request</b>	<b>16</b>	<b>14</b>	<b>6,875</b>
Total Change 2010 to 2011	-	-	(2,471)

NPPD requests \$6.875 million for Outreach and Program, including 16 positions and 14 FTE. This represents a net decrease of \$2.471 million over the FY 2010 enacted budget of \$9.346 million. These funds support NPPD’s role in cybersecurity activities.

The FY 2011 request for Outreach and Programs includes adjustments-to-base for pay inflation of \$.029 million. Program changes net to a decrease of \$2.500 million.

Outreach and Programs promotes opportunities to leverage the cybersecurity research and development investments of others. It promotes cybersecurity awareness among and within the general public and key communities, maintains relationships with governmental cybersecurity professionals to share information about cybersecurity

initiatives, and develops partnerships to promote collaboration on cybersecurity issues. Outreach and Programs also supports the National Cyber Security Division by setting direction to overall cybersecurity strategy and planning by integrating resource management, human capital, facilities, performance management, and policy development and implementation into the broad array of issues addressed by the National Cyber Security Division.

This PPA encompasses activities under:

- *Stakeholder Outreach, Communications and Coordination* activities focus on the development of internal and external communications, ensure collaboration on events and activities across the National Cyber Security Division, and build and maintain stakeholder relationships to raise cybersecurity awareness.
- *International Affairs and Public Policy* activities conduct international outreach, facilitating collaboration, cooperation, planning, and policy development on global cyber security issues.
- *Planning and Programs* activities integrate resource management, human capital, facilities, performance management, and policy development and implementation into the broad array of issues addressed by National Cyber Security Division leadership.
- *Information Sharing and Collaboration* activities develop research, education, and outreach programs that focus on technology critical for cybersecurity and emergency preparedness and response.
- *Assistant Secretary, CS&C*: The Outreach and Programs PPA also includes funding for 3 staff for \$0.485 million for the Assistant Secretary, CS&C.

Outreach and Programs coordinates domestic and international engagement and outreach on behalf of the National Cyber Security Division. It promotes cybersecurity awareness among and within the general public and key communities, maintains relationships with governmental cybersecurity professionals to share information about cybersecurity initiatives, and develops partnerships to promote collaboration on cybersecurity issues. As part of its role, it works closely with other National Cyber Security Division programs to ensure that the public and key stakeholders are aware of the efforts and activities National Cyber Security Division conducts in support of cybersecurity.

It coordinates and develops internal and external communications, including the development of messages that support the advancement of Department cybersecurity priorities, and coordinating the channels by which those messages are disseminated to stakeholders. This includes developing talking points and speeches for leadership, coordinating speaking engagements across the Division, and providing support for all public affairs needs, including media engagement. It increases awareness with small and medium sized businesses, educational institutions, home computer users, and the general public. It also aims to increase knowledge in government—at all levels—about the capabilities, and services that National Cyber Security Division provides. Outreach and Programs concentrates on building and maintaining information sharing relationships with both internal and external stakeholders (e.g., State and local governments,

international partners, etc.), and engages in a number of bilateral, regional, and multilateral relationships to build situational awareness, strengthen operational information sharing, improve incident response capabilities, contribute to cybersecurity capacity building efforts, and coordinate on strategic policy issues.

Furthermore, Outreach and Programs is responsible for supporting the National Cyber Security Division leadership in setting direction to overall cybersecurity strategy and planning; in ensuring appropriate resources are available to support the mission; developing strategic implementation plans, including performance measures and milestones, focusing on the division's priorities, initiatives, and financial processes; and in preparing, justifying, and administering the National Cyber Security Division budget. It integrates resource management, human capital, facilities, performance management, and policy development and implementation into the broad array of issues addressed by National Cyber Security Division leadership.

It advises the development of national cybersecurity policy and acts as a liaison for: matters related to the Government Performance and Results Act; the implementation of the President's Management Agenda; the coordination of responses to audit groups, such as the Office of the Inspector General and the Government Accountability Office; and the development of performance measurement and vital information to justify five-year resource requests through the Future Years Homeland Security Program. Additionally, it provides comprehensive responses to Congressional Testimony and other inquiries, as well as informs the Department's internal and external stakeholders about cybersecurity issues and activities.

FY 2009 Outreach and Programs Accomplishments:

- Planned, organized, and implemented Department participation in the 2009 RSA Security Conference.
- Supported outreach for the Government Forum of Incident Response and Security Teams annual meeting.
- Prepared for 2009 National Cyber Security Awareness Month in October 2010.
- Coordinated activities and messaging with the National Cyber Security Alliance to promote cybersecurity awareness to the general public, small and medium size enterprises, and education community, to include the creation of a cyber volunteer education program, a K-12 baseline study on cyber education, and lessons plans for educators to promote cybersecurity education.
- Further advanced State and local collaboration through Department engagements including the Multi-State Information Sharing and Analysis Center, the National Association of State Chief Information Officers, National Fusion Centers, National Governors Association, and the State Homeland Security Advisors Council.
- Finalized and presented report on the value of cybersecurity exercises to the Asia Pacific Economic Cooperation Telecommunications and Information Working Group.
- Led the Meridian Programme Committee and began preparations to host the Meridian Conference in October FY 2010.
- Initiated planning for Cyber Storm III with the fifteen member nations of the International Watch and Warning Network by facilitating a table top exercise to

develop standard operating procedures that must be implemented by member nations and further tested through Cyber Storm III.

- Continued engagement in various multilateral forums in collaboration with the United States interagency to advance dialogue on cybersecurity and represented the National Cyber Security Division's equities to include the Asia Pacific Economic Cooperation Telecommunication and Information Working Group, the Organization for Economic Cooperation and Development, North Atlantic Treaty Organization, the Group of 8 High Tech Crime Sub-Group, the Inter-American Committee against Terrorism of the Organization of American States, and the International Telecommunication Union, among others.
- Continued engagement with Usual 5 and further advanced establishing secure communications for the Usual 5 member countries.
- Further advanced bilateral collaboration through international Department engagements including the United States-United Kingdom Joint Contact Group and the United States-Germany Security Cooperation Group.
- Coordinated bilateral workshops, briefings, and meetings with officials from Australia, Canada, Sweden, the United Kingdom, Japan, New Zealand, France, Estonia, and others to advance information and collaboration sharing on cybersecurity issues of mutual concern.
- Conducted programmatic evaluation of cost, schedule, and performance activities relative to goals and objectives.
- Developed and implemented process improvements that reduced the time required to develop and process procurement requests.
- Implemented new acquisition Department Management Directive requirements for program planning.
- Worked with Cybersecurity and Communications Budget and Finance Division to implement standardized budget policies and procedures.
- Enhanced the United States Computer Emergency Readiness Team's visualization and display capture capability to more effectively handle incidents and response.
- Provided compression and expansion options for key vendors and government staff in order to enhance information sharing.

FY 2010 Outreach and Programs Planned Accomplishments:

- Plan, organize, and implement Department participation in the 2010 RSA Security Conference.
- Support outreach for the Government Forum of Incident Response and Security Teams annual meeting in 2010.
- Sponsor the National Cyber Security Awareness Month in October 2010.
- Coordinate activities and messaging with the National Cyber Security Alliance to promote cybersecurity awareness to the general public, small and medium size enterprises, and education community, a K-12 baseline study on cyber education, and lessons plans for educators to promote cybersecurity education.
- Further advance State and local collaboration through Department engagements including the Multi-State Information Sharing and Analysis Center, the National Association of State Chief Information Officers, National Fusion Centers, National Governors Association, and the State Homeland Security Advisors Council.

- Lead implementation of national public affairs campaign effort initiated in FY2009 for the Department's Cyber Storm III Exercise.
- Host the biannual "Usual 5" meeting, to advance collaboration with a specific focus on planning for Cyber Storm III.
- Host the Meridian Conference in October FY 2010, to bring together senior policymakers to collaborate on critical information infrastructure protection.
- Participate in the Meridian Programme Committee to plan for the FY 2011 Meridian Conference in Taiwan.
- Finalize and present report on cybersecurity awareness to the Asia Pacific Economic Cooperation Telecommunications and Information Working Group.
- Develop and pilot an international training module for cybersecurity capacity building.
- Complete developing the standard operating procedures for the International Watch and Warning Network, which will be tested during Cyber Storm III.
- Advance Cyber Storm III planning with International Watch and Warning Network member countries.
- Continue engagement in various multilateral forums in collaboration with the United States interagency to advance dialogue on cybersecurity and represent the National Cyber Security Division's equities to include the Asia Pacific Economic Cooperation Telecommunication and Information Working Group, the Organization for Economic Cooperation and Development, North Atlantic Treaty Organization, the Group of 8 High Tech Crime Sub-Group, the Inter-American Committee against Terrorism of the Organization of American States, and the International Telecommunication Union, among others.
- Continue previous year efforts to further advance bilateral collaboration through international Department engagements including the United States-United Kingdom Joint Contact Group and the United States-Germany Security Cooperation Group.
- Work with the Cybersecurity and Communications and NPPD human capital leadership to improve the on-boarding of personnel and track all key events within the Department on-boarding cycle.
- Implement process improvements that reduce the time required to develop and process procurement requests.
- Implement Department Management Directive acquisition requirements for program planning.
- Develop and begin to implement process improvements within the National Cyber Security Division Executive Secretariat that will help improve document version review and control, and reduce the time required to provide responses to internal and external inquiries.
- Develop and submit five-year resource requests to the Department, the Office of Management and Budget, and Congress.
- Conduct programmatic evaluation of cost, schedule, and performance activities relative to goals and objectives.
- As necessary, provide responses to inquiries, including those from Congress, the Office of Management and Budget, the Government Accountability Office, and other governing bodies.

FY 2011 Outreach and Programs Planned Accomplishments:

- Plan, organize, and implement Departmental participation in the 2011 RSA Security Conference.
- Support outreach for the Government Forum of Incident Response and Security Teams annual meeting in 2011.
- Sponsor the National Cyber Security Awareness Month in October 2011.
- Coordinate activities and messaging with appropriate industry partners to promote cybersecurity awareness to the general public, small and medium size enterprises, and education community, a K-12 baseline study on cyber education, and lessons plans for educators to promote cybersecurity education.
- Further advance State and local collaboration through Department engagements including the Multi-State Information Sharing and Analysis Center, the National Association of State Chief Information Officers, National Fusion Centers, National Governors Association, and the State Homeland Security Advisors Council.
- Contribute to Meridian Program Committee in support of the 2011 Meridian Conference.
- Continue engagement in various multilateral forums in collaboration with the United States interagency to advance dialogue on cybersecurity and represent the National Cyber Security Division's equities to include the Usual 5, International Watch and Warning Network, Asia Pacific Economic Cooperation Telecommunication and Information Working Group, the Organization for Economic Cooperation and Development, North Atlantic Treaty Organization, the Group of 8 High Tech Crime Sub-Group, the Inter-American Committee against Terrorism of the Organization of American States, and the International Telecommunication Union, among others.
- Continue previous year efforts to further advance bilateral collaboration through international Department engagements including the United States-United Kingdom Joint Contact Group and the United States-Germany Security Cooperation Group.
- Work with the Cybersecurity and Communications and National Protection and Programs Directorate human capital leadership to further improve the on-boarding of personnel and track all key events within the Department on-boarding cycle.
- Enhance internal National Cyber Security Division transparency and efficiency by the continued implementation of governance, protocols, and standard procedures, including process improvements that reduce time required to develop and process procurement requests, which will improve budget execution.
- Develop and begin to implement process improvements within the National Cyber Security Division Executive Secretariat that will help improve document version review and control, and reduce the time required to provide responses to internal and external inquiries.
- Develop and submit five-year resource requests to the Department, the Office of Management and Budget, and Congress.
- Conduct programmatic evaluation of cost, schedule, and performance activities relative to goals and objectives.
- As necessary, provide responses to inquiries, including those from Congress, the Office of Management and Budget, the Government Accountability Office, and other governing bodies.

**Department of Homeland Security

<b>2011 Total Request</b>	<b>58</b>	<b>58</b>	<b>44,524</b>
Total Change 2010 to 2011	6	6	(536)

The National Protection and Programs Directorate (NPPD) requests \$44.524 million and 58 positions and FTE for Office of Emergency Communications (OEC) in FY 2011. This is a decrease of \$0.536 million compared to the FY 2010 enacted budget of \$45.060 million.

The FY 2011 request includes increases of \$0.135 million for pay inflation and \$0.015 million for GSA rent. Program changes include an increase of \$1.000 million for the Public Safety Broadband Interoperability program within Federal Communications Services. Program decreases include \$1.000 million for the SEARCH project, \$0.566 million for Multi-Jurisdictional Communications Services and \$0.120 million for Policy, Planning and Analysis.

The OEC request includes an adjustment to base for the addition of six more Federal positions, funded within the requested FY 2011 salary and benefit resources. Toward this goal, two mid-level Federal positions will be added to each of the following OEC Divisions: the Office of the Director, Multi-Jurisdictional Communications Services, and Federal Communications Services.

## CURRENT SERVICES PROGRAM DESCRIPTION

\$ thousands	FY 2010 Enacted	FY 2011 Request
Personnel Costs	\$ 9,226	\$ 9,361
Program Costs	\$ 35,834	\$ 35,163
<b>Total Costs</b>	<b>\$ 45,060</b>	<b>\$ 44,524</b>

Pursuant to Title XVIII of the Homeland Security Act of 2002, as amended, OEC was formally established on April 1, 2007. OEC's mission is to support and promote the ability of emergency responders and government officials to continue to communicate in the event of natural disasters, acts of terrorism, or other man-made disasters, and work to ensure, accelerate, and attain interoperable and operable emergency communications nationwide.

Mandated under the Post-Katrina Management Reform Act of 2006, OEC serves as the coordination point for interoperable communications policies and holds key responsibilities, including leading the development and implementation of the National Emergency Communications Plan (NECP), the first nationwide strategic plan for enhancing emergency communications. Moreover, OEC developed the National Emergency Communications Plan (NECP), with input from more than 150 stakeholders from all levels of government and the private sector, to address emergency communications challenges and gaps.

Emergency communications encompasses operability, interoperability, and the continuity of communications across a full range of current and future capabilities for the exchange of voice, data, and video information. The Office of Emergency Communications is committed to ensuring that emergency response personnel at all levels of government and across all disciplines can communicate as needed, on demand, and as authorized. In order to achieve this vision, the Office of Emergency Communications developed six key strategic goals to improve emergency communications and to support the goals of DHS.

- *Goal 1:* Foster coordination between Federal, State, local, tribal, and private sector Emergency Communications stakeholders.
- *Goal 2:* Improve emergency communications capability through targeted interaction with Federal, State, local, and tribal agencies.
- *Goal 3:* Target Federal grants to the most critical emergency communications needs of States and localities in alignment with the National Emergency Communications Plan.
- *Goal 4:* Develop policies and plans that guide, promote, and enhance efforts to improve emergency communications nationwide.
- *Goal 5:* Develop innovative methods for addressing emergency communications gaps.
- *Goal 6:* Create a unified Office of Emergency Communications Headquarters and regional staff committed to ensuring programmatic success.

To achieve its mission, vision, and goals, the Office of Emergency Communications organized itself to be flexible and responsive to its users' needs, yet capable of delivering consistent and effective services. This strategy is designed to drive effective and efficient capability improvements to strengthen emergency communications preparedness and response. The OEC Office of the Director provides leadership, direction, and oversight for Office of Emergency Communications activities in support of its mission, and serves as the organization's principal advocate before Congress; other Federal, State, local, and tribal agencies; key stakeholders; and the public. Three Divisions reporting to the OEC Director carry out the Office's mission and programmatic responsibilities, as follows:

- *Federal Communications Services (FCS)* engages with Federal Departments and Agencies to improve emergency communications capabilities, including policy development, investment planning, and direct assistance;
- *Multi-Jurisdictional Communications Services (MCS)* engages with State, local, and tribal stakeholders to deliver targeted technical assistance and to gather stakeholder input on policies, guidance, and initiatives; and
- *Policy, Planning, and Analysis (PPA)* identifies and assesses interoperable emergency communications capabilities and drives Federal grants to meet emergency responders' requirements and needs.

### *Office of the Director*

\$ thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	10	10	\$1,865	12	12	\$1,893	2	2	\$28
<i>Management &amp; Administration</i>			\$1,160			\$1,160			\$0
<i>Coordination</i>			\$2,240			\$4,048			\$1,808
<i>Technical Assistance</i>			\$3,783			\$990			-\$2,793
<i>Demonstration Projects</i>			\$3,783			\$1,015			-\$2,768
<i>Policy</i>			\$0			\$334			\$334
Program Costs			\$10,966			\$7,547			-\$3,419
<b>Total</b>	<b>10</b>	<b>10</b>	<b>\$12,831</b>	<b>12</b>	<b>12</b>	<b>\$9,440</b>	<b>2</b>	<b>2</b>	<b>-\$3,391</b>

The OEC Office of the Director provides strategic leadership and oversight guidance, which facilitates the dissemination of Office of Emergency Communication's mission objectives, policies, and programs to the nation's State, local, and tribal governments; other Departments and Agencies; key stakeholders; and the public. In FY 2011, the Office of Emergency Communications is realigning Sub-PPA activities and related funds from within respective branches to underneath the Office of the Director. These enterprise-wide functions include branch administrative and business operations support, Office of Emergency Communications-wide outreach and strategy support activities, and executive secretariat and coordination support. These realignments will allow for increased transparency and more efficient tracking of funds expended on Office of the Director and OEC organizational-wide activities, while serving to strengthen and unify operations and management functions across the enterprise.

FY 2009 Office of the Director Accomplishments:

- Defined strategic goals and developed the Office of Emergency Communications Strategic Plan, which maps to the National Emergency Communications Plan and is based upon the Policy, Coordination, Demonstration Projects, Grants, and Technical Assistance Service Offerings.
- Developed and conducted monthly Office of Emergency Communications budget and program management reviews, including the development of project financial status updates and financial risk mitigation strategies.
- To enhance the hiring process, the Office of the Director facilitated the development and implementation of various on-boarding standard operating procedures and related human capital tools.
- To support the release of the National Emergency Communications Plan, the Office of the Director, published articles in more than 20 media outlets, such as the Homeland Security Today, PC Magazine, and Federal Computer Week.

FY 2010 Office of the Director Planned Accomplishments:

- Implement a Training Roadmap to ensure employees develop core skill sets and competencies.
- Hire 10 Regional Coordinators and ensure effective administrative support to regional staff and State and local partners.
- Develop and implement a Telework Standard Operating Procedure specific to the Regional Coordinator requirements.
- Implement Continuity of Operations planning actions to ensure successful integration of OEC Continuity of Operations efforts are aligned to Cybersecurity & Communications (CS&C) planning efforts.
- Implement outcomes of the comprehensive Workforce Analysis in conjunction with NPPD.

FY 2011 Office of the Director Planned Accomplishments:

- Expand strategic planning and integration activities to encompass Department-wide and interagency Emergency Communications activities.
- Implement a plan for strategic communications efforts, including positioning the Office of Emergency Communications as a focal point of nationwide emergency communications and enhancing relationships among stakeholders and the inter-governmental community.
- Build upon previous efforts to manage Office of Emergency Communications Continuity of Operations planning and ensure integration of Office of Emergency Communications Continuity of Operations efforts with Cybersecurity & Communications Continuity of Operations.
- Implement outcomes of the comprehensive Workforce Analysis in conjunction with NPPD.

*Policy, Planning, and Analysis*

<i>Coordination</i>			\$1,116			\$1,085			-\$31
<i>Grants</i>			\$458			\$450			-\$8
Program Costs			\$6,538			\$6,707			\$169
<b>Total</b>	<b>8</b>	<b>8</b>	<b>\$7,811</b>	<b>8</b>	<b>8</b>	<b>\$7,999</b>	<b>0</b>	<b>0</b>	<b>\$188</b>

Policy, Planning, and Analysis identifies challenges facing the advancement of interoperable emergency communications capabilities and develops policies and strategies to meet these challenges. This includes the following: developing national assessments (e.g., National Communications Capabilities Report); monitoring the implementation of the National Emergency Communications Plan; leading development of emergency communications grant program guidance (e.g., Interoperable Emergency Communications Grant Program and the SAFECOM Grant Guidance); and engaging in outreach to industry partners. Policy, Planning, and Analysis also coordinates and integrates information collected by the Federal and Multi-Jurisdictional Communications Services programs to provide an integrated national assessment of existing and emerging interoperable emergency communications challenges and vulnerabilities, and develops Departmental Emergency Communications grant program guidance. Additionally, Policy, Planning, and Analysis evaluates progress achieved through these programs to ensure that Federal assistance is optimally targeted at addressing identified existing and emerging interoperable emergency communications challenges.

FY 2009 Policy, Planning, and Analysis Accomplishments:

- Developed foundational criteria to demonstrate the accomplishment of the National Emergency Communications Plan Goal 1. By the end of 2010 (90% of all high-risk urban areas are able to demonstrate response-level emergency communications<sup>1</sup> within one hour for routine events involving multiple jurisdictions and agencies).
- Hosted the first National Conference on Emergency Communications in April 2009 to bring together over 400 Federal, State, local, and tribal practitioners to discuss the current state of emergency communications, identify challenges, and collaborate on solutions.
- Assisted in the establishment of the Interoperable Emergency Communications Grant Program and developed grant guidance and program priorities in alignment with the National Emergency Communications Plan.
- Facilitated the following, through the Interoperable Emergency Communications Grant Program (IECGP): (1) an increase from 16 to 44 full-time Statewide Interoperability Coordinators (SWICs), who coordinate across disciplines, jurisdictions, and regions at the State level to achieve operable and interoperable

<sup>1</sup> Response-level Emergency Communication refers to the capacity of individuals with primary leadership responsibility to manage resources and make timely decisions during an incident involving multiple agencies, without technical or procedural communications impediments.

emergency communications; and (2) an increase from 2 to 19 Statewide Interoperability Governing Bodies (SIGBs).

- Furthered standardization of emergency communications requirements to improve interoperability by influencing \$2.4 billion dollars of grant programs with an emergency communications component through the development and issuance of the SAFECOM Recommended Guidance for Federal Grant Programs.

FY 2010 Policy, Planning, and Analysis Planned Accomplishments:

- Improve emergency communications response relationships and build upon accomplishments of FY2009 by reviewing local incident after action reports from the FY 2009 and FY 2010 Homeland Security Exercise and Evaluation Program to measure progress in achieving National Emergency Communications Plan Goal 1.
- Develop grant guidance, in collaboration with the Federal Emergency Management Agency, for the Interoperable Emergency Communications Grant Program and other Departmental grant programs for emergency communications, to ensure that grant selection criteria continues to reflect strategic objectives.
- Support all National Emergency Communications Plan goals through phone support, outreach, and data analysis and develop criteria for the proposed implementation process for Goal 3.
- Submit Biennial Progress Report to Congress on progress in implementing the National Emergency Communications Plan.
- Develop the SAFECOM Guidance for Federal Grant Programs, which provides consistent policy guidance on equipment, planning, and training standards.

FY 2011 Policy, Planning, and Analysis Planned Accomplishments:

- Complete a comprehensive assessment of Federal Emergency Communications capabilities for the next iteration of the National Communications Capabilities Report.
- Provide guidance to States and urban areas to help them achieve the targeted benchmarks under National Emergency Communications Plan Goal 1 by the end of 2010 (90% of all high-risk urban areas designated within the Urban Areas Security Initiative are able to demonstrate response-level emergency communications within one hour for routine events involving multiple jurisdictions and agencies).
- Provide guidance to States and urban areas to help them achieve the targeted benchmarks under National Emergency Communications Plan Goal 2 by 2011 (75% of non-Urban Areas Security Initiative jurisdictions are able to demonstrate response-level emergency communications in the event of a significant incident, as outlined in national planning scenarios, within three hours).
- Continue to develop grant guidance and review grant applications in collaboration with the Federal Emergency Management Agency for the Interoperable Emergency Communications Grant Program and other Departmental grant programs for emergency communications, to ensure that grants continue to support strategic objectives.
- Continue to facilitate a grant focus group within the Emergency Communications Preparedness Center for Federal Departments and Agencies with grant programs that

support emergency communications, in order to develop consistency and share best practices and lessons learned.

- Prepare Statewide Communication Interoperability Plan and Interoperable Emergency Communications Grant Program reports for Congress to demonstrate continual progress achieved by Federal grants and implementation of Statewide Communication Interoperability Plans.
- Develop criteria required to measure progress in achieving Goal 3 of the National Emergency Communications Plan by 2013 (75% of all jurisdictions are able to demonstrate response-level emergency communications in the event of a significant incident, as outlined in national planning scenarios, within three hours).
- Complete the National Communications Capabilities Report in mid 2011 with input from Federal, State, local, tribal, private sector, and non-governmental responders, leveraging existing studies by the Federal Communications Commission or other Federal entity.

Multi-Jurisdictional Communications Services establishes and administers services delivered to advance State, local, tribal, and multi-jurisdictional interoperable emergency communications capabilities. Multi-Jurisdictional Communications Services focuses on providing the Office of Emergency Communications' technical assistance and stakeholder engagement efforts through the Interoperable Communications Technical Assistance Program and SAFECOM programs. Technical assistance provides direct support through the development and delivery of training, tools, and on-site assistance to Federal, State, and local agencies for the implementation of the National Emergency Communications Plan and the advancement of public safety interoperable emergency communications capabilities. Through the SAFECOM program, Office of Emergency Communications develops tools, best practices, and methodologies that emergency response agencies can use to enhance their interoperability efforts. The stakeholder engagement effort focuses on conducting outreach and consensus building activities with State, local, and tribal government officials and national practitioner organizations to exchange best practices and build consensus for common challenges.

Included under the MCS program funding request, is the plan to allocate \$0.185 million to support the Office of Assistant Secretary for Cyber Security and Communications. Please see the attached Budget Addendum for additional details.

FY 2009 Multi-Jurisdictional Communications Services Accomplishments:

- Provided requested technical assistance to States and territories to support the implementation of Statewide Communication Interoperability Plans and the alignment of Statewide Communication Interoperability Plans to the National Emergency Communications Plan. The Statewide Communication Interoperability Plans identify and verify initiatives that States are undertaking to advance interoperable emergency communications.
- Provided Statewide Communication Interoperability Plans Implementation Workshops to support 49 States and territories in establishing concrete milestones for advancing interoperable emergency communications and identify priorities for the Office of Emergency Communications technical assistance services.
- Established the Statewide Interoperability Coordinators Council and the Metropolitan Area Working Group, stakeholder bodies that serve as a mechanism for Office of Emergency Communications to receive and provide feedback on the implementation of the National Emergency Communications Plan and Statewide Communication Interoperability Plans objectives and initiatives and as a forum for member collaboration.
- Assisted with the development of the first nationally standardized Type III Communications Unit Leader training course. Managed and funded completion of 49 Communications Unit Leader training sessions, resulting in over 1,200 students trained in aggregate across the Nation.

FY 2010 Multi-Jurisdictional Communications Services Planned Accomplishments:

- Provide assistance to States and territories to support the implementation of Statewide Communication Interoperability Plans and the alignment of Statewide Communication Interoperability Plans to the National Emergency Communications Plan.
- Deploy Communications Unit Technician Training in order to ensure that in the event of a multi-discipline, multi-jurisdictional response event, on site response practitioners are trained to a similar baseline. The Communications Unit Technician is responsible for assisting with the technical activities of incident response.
- Convene meetings for the Statewide Interoperability Coordinator Council to share challenges and solutions and to support OEC's achievement of National Emergency Communications Plan performance goals.
- Conduct 60 site visits to observe and validate Goal 1 of the National Emergency Communications Plan.
- Conduct 40 Statewide Communication Interoperability Plan workshops.

FY 2011 Multi-Jurisdictional Communications Services Planned Accomplishments:

- Provide requested technical assistance to States and territories to support the implementation of Statewide Communication Interoperability Plans.

- Provide targeted assistance, develop guidance documents, and conduct workshops to support implementation of Statewide Communication Interoperability Plans and leverage stakeholder groups to support the States' and territories' demonstration of National Emergency Communications Plan Goal 2 (75 percent of non-Urban Areas Security Initiative jurisdictions are able to demonstrate response-level Emergency Communications within one hour for routine events involving multiple jurisdictions and agencies).
- Continue to build out previous efforts to enhance information sharing by convening meetings for the SAFECOM Executive Committee, SAFECOM Emergency Response Council, the Statewide Interoperability Coordinator Council, and Metropolitan Area Working Group to share challenges and solutions and support OEC's achievement of National Emergency Communications Plan Goals and Milestones.

***Federal Communications Services***

FCS leads the Office of Emergency Communications' (OEC's) efforts to coordinate and align Federal emergency communications programs and initiatives with National goals. Through the Emergency Communications Preparedness Center (ECPC), OEC is establishing a forum for Federal Departments and Agencies to share information and coordinate communications programs and to connect those efforts with State, local, tribal, and private sector efforts. The ECPC serves as the interagency focal point for coordinating efforts to avoid unnecessary duplication and hindrances to emergency communications among the participating Federal Departments and Agencies. FCS also leads efforts to demonstrate innovative solutions for improving cross-border interoperability through the development of the Cross Border Security Communications Network and the Border Interoperability Demonstration Project (BIDP). These collaborations help to improve interoperability, while maximizing the use of scarce funding resources by identifying sharing opportunities.

**FY 2009 Federal Communications Services Accomplishments:**

- Officially established the ECPC following final approval of the charter by member Departments and Agencies.
- Coordinated with DHS and the Departments of Justice and Treasury to determine the future of the Joint Wireless Program.

- Co-convened the first U.S.-Canada Cross Border Workshop in May 2009 to address key challenges to cross-border interoperability and develop action plans to address and resolve the issues, as appropriate.
- Coordinated with more than 50 agencies, at all levels of government, to develop the Integrated Interoperable Communications Plan for the 2010 Winter Olympic and Paralympic Games.
- Developed application process and selection criteria for awarding Border Interoperability Demonstration Project (BIDP) grants via completion of the BIDP Funding Opportunity Announcement.

FY 2010 Federal Communications Services Planned Accomplishments:

- Implement the Emergency Communications Preparedness Center (ECPC) Clearinghouse on DHS.gov. This activity will identify and potentially eliminate duplication of emergency communications efforts and provide users access to a document library and a centralized information source.
- Formally stand up the ECPC and convene the first ECPC Executive Committee and Steering Committee meetings.
- Convene, in coordination with Public Safety Canada, a Cross-Border Interoperability Workshop.
- Award grants for the BIDP in coordination with the DHS Management Directorate, monitor project implementation and conduct technical assistance.
- Implement Phase I of the U.S.-Mexico High Level Consultative Commission on Telecommunications Security Communications Task Group (HLCC SCTG) Action Plan. This phase includes completing system implementation and finalization of bi-national and domestic standard operating procedures.

FY 2011 Federal Communications Services Planned Accomplishments:

- Continue the implementation of the U.S.-Mexico HLCC SCTG Action Plan. Phase II includes completing system implementation of two additional sites and completion of Customs and Border Patrol Border Patrol Operations/Dispatch Center upgrades.
- Monitor BIDP implementation and conduct technical assistance, as appropriate. Begin collecting best practices and lessons learned from initial phase.
- Coordinate interdepartmental policy efforts through the ECPC.

<b>2011 Total Request</b>	<b>41</b>	<b>41</b>	<b>56,283</b>
Total Change 2010 to 2011	-	-	(490)

In FY 2011, NPPD requests \$56.283 million for Priority Telecommunications Services, including 41 positions/FTE. This represents a decrease of \$0.490 million below the FY 2010 enacted budget of \$56.773 million. These funds support the operation of the Government Emergency Telecommunications System, the Wireless Priority Service, Special Routing Agreement Service, Industry-Government and Interagency Processes, and an internal realignment of base resources for the Assistant Secretary, Cyber Security and Communications.

The FY 2011 request includes adjustments-to-base for pay inflation of \$0.081 million and GSA Rent of \$0.069 million. A net program decrease of \$0.640 million is the result of increased program efficiencies. The FY 2011 includes an internal Priority Telecommunications Services realignment of \$1.552 million from Wireless Priority Services to the Industry-Government Interagency Processes (IGIP) project. This realignment of base resources allows for the accomplishment of Sector Specific Agency (SSA) communication responsibilities as assigned by Homeland Security Presidential Directive-7. The SSA activity requirement is executed by IGIP and will support efforts that identify and Manage Risk to Critical Infrastructure and Key Resources (CIKR); manage the National Infrastructure Protection Plan (NIPP) Partnership Framework and Coordinate Plan Implementation; and conduct CI/KR Training, Outreach and Awareness. Existing FTE positions will support this effort.

### ***Priority Telecommunications Services***

Priority Telecommunications Services offers solutions to acquire effective and survivable communications services by leveraging commercially-owned assets in the public switched networks, with industry investments in technology insertion and industry operating costs.

Priority Telecommunications Services ensure the availability of national security and emergency preparedness communications and help the Nation prevent, respond to, and recover from threatened and actual terrorist attacks, major disasters, and other emergencies. When conventional communications services are congested or degraded, Priority Telecommunications Services technologies will enable voice communications to support response and recovery coordination efforts for critical programs such as Continuity of Operations and Continuity of Government programs to ensure essential Government functions and operations are carried out.

During regional or national emergency situations when only degraded public networks exist, Priority Telecommunications Services significantly enhances call completion capabilities of first responders, national leadership, and other national security and emergency preparedness users by the following three PTS programs:

- *Government Emergency Telecommunications Service (GETS)*. A nationwide landline telephone service enabling priority communications for the President, Federal, State, and local governments, and industry organizations by providing priority voice calling via the existing public switched network;
- *Wireless Priority Service (WPS)*. A nationwide wireless telephone service providing end-to-end priority calls via selected commercial wireless carriers—which includes GETS interoperability to enhance the probability of call completion;
- *Special Routing Arrangement Service (SRAS)*. The SRAS is held in classified channels and supports special communication capabilities for unnamed selective users that require the highest level of non-traceable priority calls during times of severe public network congestion or when disruption may result from acts of war.

#### FY 2009 Priority Telecommunications Services Accomplishments

- Increased total Government Emergency Telecommunications Service cards to 229,838 and increased total Wireless Priority Service users to 97,998.
- Provided 90% of the Executive Departments and Agencies with Government Emergency Telecommunications Service and Wireless Priority Service at their headquarters and alternate operating facilities in support of Continuity of Operations and Continuity of Government requirements.
- Deployed interoperability specification in Verizon Wireless and Sprint Nextel networks to eliminate the ~20% network cellular Wireless Priority Service coverage gaps.
- Achieved 90% GETS call completion rate during emergency communications periods.
- Provided priority service to NS/EP personnel for use during time of crisis.

#### FY 2010 Priority Telecommunications Services Planned Accomplishments

- Readiness – Maintain nationwide coverage for Government Emergency Telecommunications Service while supporting increase to 252,822 users.
- Readiness – Maintain nationwide coverage for Wireless Priority Service while supporting increase to 103,891 users. This represents a 5,893 user increase over FY 2009.
- Performance - Achieve over 90% GETS call completion rate during emergency communications periods.
- Complete mobile switching center testing and deployment of the directed retry handover feature of the Wireless Priority Service. This feature automatically redirects Universal Mobile Telecommunications System (3rd generation wireless technology) subscribers (found in portions of the AT&T and T-Mobile networks) to carriers using Wireless Priority Service Global System for Mobile Communications (GSM) (2nd generation cellular technology). Both AT&T and T-Mobile utilize both of these wireless technologies in their network. Interoperability – Maintain GETS interoperability with selected Government communications services including the Defense Switched Network, Diplomatic Telecommunications Service, and GSA Federal Technology Service/Network.

#### FY 2011 Priority Telecommunications Services Planned Accomplishments

- Readiness – Maintain nationwide coverage for Government Emergency Telecommunications Service while supporting increase to 278,104 users.
- Readiness – Maintain nationwide coverage for Wireless Priority Service while supporting an increase to 108,231 national security and emergency preparedness users.
- Maintain SRAS operations supporting a special group of users (classified).
- Performance - Achieve over 90% GETS call completion rate during emergency communications periods.
- Interoperability – Maintain GETS interoperability with selected Government communications services including the Defense Switched Network, Diplomatic Telecommunications Service, and GSA's Federal Technology Service/Network.

### ***Customer Service/ Industry-Government Interagency Processes (IGIP) Branch***

The Customer Service/Industry-Government Interagency Processes Branch supports four main functions:

- Manages the President's National Security Telecommunications Advisory Committee (NSTAC) under Executive Order 12382;
- Supports the Committee of Principals (COP) under Executive Order 12472;
- Manages the Communication Sector under HSPD-7; and
- Serves as the Public Affairs coordinator for the National Communications System.

The Customer Service/IGIP Branch has extensive interface with government and private sector stakeholders. The IGIP Branch maintains relationships with key representatives from across the Communications Sector and other critical infrastructure sectors to ensure the communications infrastructure can be supported in the event of an emergency. Working across infrastructure sectors, IGIP helps ensure the communication sector has critical access, credentialing, fuel, and security when responding to attacks, accidents, and service impairment. If these services are not available, the ability to repair, recover, or reconstitute national communications networks are adversely impacted, increasing the duration and scope of a disruption.

As the Public Affairs coordinator, the Customer Service/ IGIP branch oversees coordinated strategic communications for the National Communications System. Additionally, the Branch provides extensive training on public-private sector relationship management and NCS strategies for national security emergency preparedness communications.

#### **FY 2009 Customer Service/IGIP Accomplishments**

- Provided support to the National Communications System (NCS) Committee of Principals (COP), including technical, logistical, executive, planning and managerial support in the identification, development, and analysis of current national security and emergency preparedness communications issues and recommended solutions. The COP is an interagency group designated by the President that provides advice and recommendations on NS/EP communications to the Executive Office of the President.
- Finalized National Communications System Committee of Principals' Communications Dependency on Electric Power Report and delivered to the Executive Office of the President.
- Maintained strong relations with the telecommunications industry and the National Communications System Committee of Principals to facilitate joint planning, operational activities, and coordination of assessments, information sharing, and restoration and recovery of the critical telecommunications infrastructure.
- Provided logistical and technical support to the National Communications System Committee of Principals working groups to address emerging continuity communications matters and minimum essential functions and processes under all circumstances, including crisis or emergency, attack, recovery, and reconstitution.

- Provided Secretariat Support for the National Security Telecommunications Advisory Committee, including quarterly National Security Telecommunications Advisory Committee Principal conference calls, the annual full-committee meeting, monthly Industry Executive Subcommittee meetings, task force, working group, and ad hoc meetings.
- Submitted National Security Telecommunications Advisory Committee membership analysis and recommendations for committee composition to the President.
- Managed the implementation of the Communications Sector Specific Plan and risk management framework, in response to Homeland Security Presidential Directive-7, and the National Infrastructure Protection Plan.
- Developed the 2009 Communications Critical Infrastructure and Key Resources (CI/KR) Sector Annual Report.
- Developed and reported quarterly Communications Sector Specific Plan implementation metrics to the DHS Office of Infrastructure Protection.
- In accordance with HSPD -7, performed ongoing reporting of Communications Critical Infrastructure and Key Resources (CI/KR) Tier 1, Tier 2 critical asset programs to identify and prioritize critical infrastructure and key resources within the Communications Sector. NCS CI/KR efforts help reduce risk to our Nation's most critical information technology and communication networks.
- Provided reports on sector plan implementation, as needed, against calls for data from DHS, and the Legislative and Executive Branches of the Federal Government.
- Provided ongoing critical infrastructure and key resources protection outreach and awareness for the Communications Sector stakeholders, customers, and owners and operators on sector protective programs, best practices and risk reduction capabilities.
- Coordinated and developed a response for the FCC Broadband Notice of Inquiry among the 24 Federal departments and agencies of the NCS.

#### FY 2010 Customer Service/IGIP Planned Accomplishments

- Provide support to the National Communications System Committee of Principals, including technical, logistical, executive, planning and managerial support in the identification, IPIS – 79 development, and analysis of current national security and emergency preparedness communications issues and recommended solutions.
- Represent National Communications System and DHS interests during Quarterly Committee of Principals meetings and the subordinate working groups.
- Maintain strong relations with the telecommunications industry and the National Communications System Committee of Principals to facilitate joint planning, operational activities, and coordination of assessments, information sharing, and restoration and recovery of the critical telecommunications infrastructure.
- Provide technical and logistical support to the National Communications System Committee of Principals working groups to address emerging continuity communications matters and minimum essential functions and processes under all circumstances, including crisis or emergency, attack, recovery, and reconstitution.
- Provide Secretariat Support for the National Security Telecommunications Advisory Committee, including quarterly National Security Telecommunications Advisory Committee Principal conference calls, the annual full-committee meeting, monthly

Industry Executive Subcommittee meetings, task force, working group, and ad hoc meetings.

- Submit National Security Telecommunications Advisory Committee membership analysis and recommendations for committee composition to the President.
- Collaborate with the National Infrastructure Advisory Council and other industry and governmental bodies involved in continuity communications, critical infrastructure protection and homeland security.
- Implement the Communications Sector Specific Plan and risk management framework, in response to Homeland Security Presidential Directive-7, and the National Infrastructure Protection Plan.
- Develop the cross sector risk assessments to define communications dependencies, corresponding risk mitigation activities, and recommended follow on activities such as research and development, capabilities' development, and protective programs.
- Publish 2010 triennial rewrite of the Communications Sector Specific Plan.
- Develop a 2010 Communications critical infrastructure and key resources Sector Annual Report.
- Develop and report quarterly Communications Sector Specific Plan implementation metrics to the DHS Office of Infrastructure Protection.
- In accordance with HSPD-7, report on Critical Infrastructure and Key Resources Tier 1 and Tier 2 critical asset program to identify and prioritize critical infrastructure and key resources within the Communications Sector.
- Provide critical infrastructure and key resources protection outreach and awareness for the Communications Sector stakeholders, customers, and owners and operators on sector protective programs, best practices and risk reduction capabilities.

#### FY 2011 Customer Service/IGIP Planned Accomplishments

- Ensure NCS Committee of Principals (COP) maintains its role as assigned in E.O. 12472 – Assignment of National Security and Emergency Preparedness (NS/EP) Functions.
- Develop priority list of Federal Government NS/EP emerging issues that the NCS COP could evaluate and provide guidance to senior leadership.
- Manage NCS COP processes, including technical, logistical, executive and planning requirements to support Federal Government communications policy recommendations.
- Represent the National Communications System and DHS interest during Quarterly Committee of Principals meetings, which are comprised of Assistant Secretary (or equivalent) level participants from 24 different Federal Departments and agencies.
- Provide necessary updates to Memorandum of Agreements with each of the 24 Federal members of the National Communications System as directed by National Communications System Directive 1-1.
- Manage the National Security Telecommunications Advisory Committee Federal Advisory Committee Act process. This includes the following activities: develop the work plan, conduct quarterly NSTAC Principal conference calls (CEO level), host the annual committee meeting, and hold monthly Industry Executive Subcommittee meetings. Additionally, IGIP will obtain or provide subject matter experts and

administrative support for task force, working group, and ad hoc meetings designed to address specific issues upon Federal Government Request (Primarily EOP and DHS).

- Submit National Security Telecommunications Advisory Committee membership analysis and recommendations for committee composition to the President annually.
- Collaborate with the National Infrastructure Advisory Council and other industry and governmental bodies involved in continuity communications, critical infrastructure protection, and homeland security.
- Review the cross sector risk assessments to identify communications dependencies, corresponding risk mitigation activities, and recommended follow-on activities such as research and development, capabilities development, and protective programs.
- Develop the 2011 Communications Critical Infrastructure and Key Resources (CI/KR) Annual Report.
- Develop and report quarterly Communications Sector Specific Plan implementation metrics to the DHS Office of Infrastructure Protection.
- Report on the Tier 1 and Tier 2 critical asset program to identify and prioritize CI/KR within the Communications Sector.
- Customer Service/IGIP manages the Government Coordination Council (GCC) which serves as a counterpart to the Sector Coordinating Council (SCC) for each CI/KR sector. The GCC provides effective coordination of CI/KR strategies and activities, policy, and communication across government and between the government and the sector to support the nation's homeland security mission.
- Provide critical infrastructure and key resources protection outreach and awareness with the CIP Branch for the Communications Sector stakeholders, customers, and owners and operators on sector protective programs, best practices and risk reduction capabilities.

***Assistant Secretary, CS&C and NCS Plans and Programs Support***

The PTS funding includes 4 staff for \$0.450 million and \$0.300 million of contract funding for the Assistant Secretary, CS&C, and NCS planning and programming support.

**Department of Homeland Security**  
**National Protection & Programs Directorate**  
**Infrastructure Protection and Information Security**

The National Communications System’s Next Generation Network (NGN) Priority Services program was established to address the ramifications of the evolving technology being implemented by the communications industry. Next Generation Network Priority Services will continue to ensure the availability of national security and emergency preparedness voice communications to help the Nation prevent, respond to, and recover from threatened and actual terrorist attacks, major disasters, and other emergencies. The Next Generation Network Priority Services program is essential to replace the current Priority Telecommunications Services program as its circuit-based priority features and functions are phased out by evolution to Internet Protocol/packet-based networks. The

Next Generation Network Priority Services program will continue to leverage the highly survivable commercially-owned public switched network assets to provide the Government with a robust and diverse nationwide communications capability.

The Next Generation Network Priority Services program provides for the continuation of critical telecommunications supporting response and recovery coordination efforts and programs such as Continuity of Operations and Continuity of Government, to ensure that essential Government functions and operations are carried out.

#### FY 2009 Next Generation Network Accomplishments

- Developed Next Generation Network priority core Voice over Internet Protocol Industry Requirements; completed development of Industry Requirements core document for NGN priority voice services and continued development of Access Industry requirements.
- Developed standards in support of Next Generation Network priority Voice over Internet Protocol.
- Designed and developed Next Generation Network priority features in a vendor's nationwide wireline network equipment.
- Developed and implemented performance metrics, monitoring plan, and network design demonstration of priority wireline network equipment features.
- Initiated work with industry to develop and implement Next Generation Network security measures, including survivability enhancements and user identification management and authentication. Deployed packet priority enhancements in AT&T's full operating capability Internet Protocol Common Backbone network.
- Initiated planning, architecture and implementation of Next Generation Network priority capabilities in two additional wireline service provider networks in support of the Initial Operating Capability milestone. Developed and demonstrated Next Generation Network priority core Voice over Internet Protocol prototype, identifying and implementing modeling and prototyping not addressed by carriers.
- Developed and implemented the NGN FY 2009 Expenditure Plan to help achieve Phase 1 core and voice milestones.

#### FY 2010 Next Generation Network Planned Accomplishments

- Develop Next Generation Network Standards in support of priority Voice over Internet Protocol.
- Complete Industry Requirements Access document for Next Generation Network priority voice services.
- Develop and attain approved Concept of Operations and Operational Requirements Document for Next Generation Network Video and Data services to support the NS/EP community.
- Develop Next Generation Network priority features in nationwide wireline network equipment.
- Complete planning, testing and implementation of Next Generation Network priority enhancements in a National Wireline Network to reach Limited Capability (Phase I).
- Draft Industry Requirements Core Broadband document for Next Generation Network priority services Inter-carrier, security and broadband services.

- Provide priority core Voice over Internet Protocol communications capability with at least one national carrier's core networks (1/3 completion).
- Prepare and submit a Request for Information (RFI) to industry to gather data to assist the NGN program office for technology planning purposes.

#### FY 2011 Next Generation Network Planned Accomplishments

- Conduct network design demonstrations of priority wireline network equipment features including performance metrics and monitoring plan.
- Conduct planning, architecture and implementation of Next Generation Network priority capabilities in two additional wireline service provider networks in support of the Initial Operating Capability milestone.
- Conduct planning and design of Next Generation Network Voice over Internet Protocol wireless prototype.
- Conduct planning and architecture of priority Next Generation Network Voice over Internet Protocol features in nationwide wireless carriers.
- Continue Next Generation Network engineering assessments and demonstrations of Next Generation Network priority data and video services.
- Work with industry to develop and implement Next Generation Network security measures, including survivability enhancements, national security threat mitigation, and user identification management and authentication.
- Provide priority core Voice over Internet Protocol communications capability with at least one national carrier's core networks.

<b>2011 Total Request</b>	<b>28</b>	<b>28</b>	<b>16,657</b>
Total Change 2010 to 2011	-	-	(117)

In FY 2011, NPPD requests \$16.657 million for the Programs to Study and Enhance Telecommunications, including 28 positions/FTE. This represents a decrease of \$0.117 million from the FY 2010 enacted budget of \$16.774 million. These funds support modeling, simulation, technology assessments, National Security and Emergency Preparedness standards, and vulnerability assessments on advanced technologies and converged networks. The FY 2011 request includes adjustments-to-base for pay inflation of \$0.055 million. A net program decrease of \$0.172 million is the result of increased program efficiencies.

***Modeling, Analysis and Technology Assessment***

Modeling, Analysis and Technology Assessment develops models and conducts technical studies and analyses of public communications infrastructures to identify approaches to fulfill national security and emergency preparedness communications objectives and

support priority service and the National Cyber Security Division's (NCS) Comprehensive National Cyber Initiative (CNCI) programs. The extensive dataset and software-based commercial and government off the shelf analytic tools analyzes natural and man-made disruptions on communications infrastructure, conducts vendor independent analyses, and identifies network effectiveness solutions. Modeling, Analysis and Technology Assessment also conducts communications technology assessments, such as those required by the Committee on Foreign Investment in the United States (CFIUS) in support of the DHS Office of Policy, and technology studies that help quantify the dependence of critical government networks on Internet service provider infrastructure.

#### FY 2009 Modeling, Analysis and Technology Assessment Accomplishments

- Developed and deployed version 3.3 of the Infrastructure Mapping Tool to improve the Emergency Support Function #2 operations which will integrate the Federal Communications Commission's Disaster Information Reporting System and include an enhanced weather mapping function.
- Developed an enhanced Internet Analysis Capability to improve Emergency Support Function #2 and United States Computer Emergency Readiness Team operations.
- Supported the National Cyber Security Division's activities under the Trusted Internet Connection initiative.
- Modeled and analyzed the effectiveness of solutions offered by the Next Generation Networks Access Industry Requirements working group for achieving survivable national security and emergency preparedness services.
- Study and report on the role of Digital Integrated Services Network Real Time Services, call admission control, and Internet Protocol Multimedia Subsystem models within next-generation architectures.
- Enhanced the Network Discovery Tool with additional software features and improved visualization capabilities.
- Provided subject matter expertise in assessing the technical aspects of Federal Communications Commission applications (e.g., the type of telecommunications infrastructure at issue, and the potential effects of changes to that infrastructure) during the review of Team Telecom and Committee on Foreign Investments in the U.S. (CFIUS) cases by DHS Office of Policy.
- Analyzed physical infrastructure diversity, or "last-mile" connectivity, for National Communications System member agencies to ensure primary mission essential functions are preserved.
- Study the dependence of two other critical infrastructure sectors on the telecommunications sector to determine communications resiliency.
- Developed proprietary network carrier models to evaluate survivability and performance of national security and emergency preparedness communications under damage scenarios.
- Improved NCS modeling and analysis capabilities through incorporation of Department of Defense analysis tools and datasets.
- Partnered with a major carrier to test the effectiveness of inter-network solutions for providing end-to-end national security and emergency preparedness services within next-generation voice architectures.

#### FY 2010 Modeling, Analysis and Technology Assessment Planned Accomplishments

- Develop and deploy version 3.4 of the Infrastructure Mapping Tool to continue improving Emergency Support Function #2 operations which will integrate a web-enabled platform and contain enhanced security levels.
- Enhance the Internet Analysis Capability to further improve Emergency Support Function #2 and United States Computer Emergency Readiness Team operations during natural and man-made disasters by providing capabilities for near real-time alerting and the incorporation of National Communications System datasets.
- Support the National Cyber Security Division's activities under the Trusted Internet Connection (TIC) initiative.
- Model and analyze the effectiveness of solutions offered by the Next Generation Networks (NGN) Access Industry Requirements working group for achieving survivable national security and emergency preparedness services.
- Enhance the Network Discovery Tool with additional software features based on requirements from the Trusted Internet Connection program.
- Perform cyber and communications modeling and analysis in support of emerging threats and requirements.
- Provide subject matter expertise in assessing the technical aspects of Federal Communications Commission applications (e.g., the type of telecommunications infrastructure at issue, and the potential effects of changes to that infrastructure) during the review of Team Telecom cases by DHS Office of Policy.
- Analyze physical infrastructure diversity, or "last-mile" connectivity, for five National Communications System member agencies to ensure primary mission essential functions are preserved.
- Study the dependence of three other critical infrastructure sectors on the telecommunications sector.
- Develop proprietary network carrier models to evaluate survivability and performance of national security and emergency preparedness communications under damage scenarios.

#### FY 2011 Modeling, Analysis and Technology Assessment Planned Accomplishments

- Develop and deploy version 3.5 of the Infrastructure Mapping Tool to continue improving Emergency Support Function #2 operations which will integrate other agency government-funded tools and data sets.
- Enhance the Internet Analysis Capability to further improve Emergency Support Function #2 and United States Computer Emergency Readiness Team operations during natural and man-made disasters by providing capabilities for historical trending and scenario generation.
- Support the National Cyber Security Division's activities under the Trusted Internet connection initiative.
- Model and analyze the effectiveness of solutions offered by the Next Generation Networks Access Industry Requirements working group for achieving survivable national security and emergency preparedness services.
- Enhance the Networx Pricer Infrastructure Module with additional software features based on agency feedback.

- Enhance ScoutVision capabilities by providing increased cyber situational awareness and incorporating NCS datasets.
- Perform cyber and communications modeling and analysis in support of emerging threats and requirements.
- Provide subject matter expertise in assessing the technical aspects of Federal communications commission applications (e.g., the type of telecommunications infrastructure at issue, and the potential effects of changes to that infrastructure) during the review of Team Telecom and Committee on Foreign Investment in the United States (CFIUS) cases by DHS office of Policy.
- Analyze physical infrastructure diversity, or “last-mile” connectivity, for 21 federal agencies to ensure primary mission essential functions are preserved.
- Study the dependence of other critical infrastructure sectors on the telecommunications sector.
- Continue development of proprietary network carrier models to evaluate survivability and performance of national security and emergency preparedness communications under damage scenarios.
- Implement methodology to test the effectiveness of inter-networking solutions within next-generation architecture providing end-to-end national security and emergency preparedness services.

### ***National Security and Emergency Preparedness Standards Team***

The Standards Team works with national and international industry standards organizations to ensure that evolving communications standards address the technical requirements of national security emergency preparedness communications. The Standards Team implements Presidential Executive Order 12472 mandates which direct the Office of the Manager National Communications System to survey the development of evolving industry consensus standards with respect to national security emergency preparedness communications mission. The Standards Team adheres to the policy put forth in OMB Circular A-119; *“Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities”* that: “directs agencies to use voluntary consensus standards in lieu of government-unique standards except where inconsistent with law or otherwise impractical.”

Traditional national security and emergency preparedness telecommunications services were designed around the legacy circuit-switched infrastructure of the public switched telephone network. Public networks are now merging with Internet Protocol (IP) packet-switched infrastructures and converging into Next Generation Networks. As this evolution continues to mature, national security and emergency preparedness telecommunications services will be guided by commercial standards and technologies based on packet-switching Internet Protocol based networks. Wireless public networks have also become increasingly vital during national security and emergency preparedness events. The Standards Team focuses on these changes by working proactively with industry in standards development organizations. The national security and emergency preparedness standards efforts involve a two-pronged approach. The first standards effort is to establish national security and emergency preparedness service requirements within the standards

bodies, and the second is to work to develop standards-based technical capabilities to support National Communications System programs and missions.

The Standards Team also provides direct support to the U.S. Department of State by Chairing the International Telecommunications Advisory Committee Telecommunications Sector Study Group 'B'. Team members serve as senior Government advisors and leaders to a variety of international meetings on communications. When requested, the Standards Team takes specific requirements from North Atlantic Treaty Organization and other member organizations and introduces them into the international standards process. In addition, the Standards Team members actively participate in the work of the following industry groups:

- Alliance for Telecommunications Industry Solutions
- Telecommunications Industry Association
- International Telecommunication Union
- Internet Engineering Task Force
- TeleManagement Forum
- Third Generation Partnership Project
- Third Generation Partnership Project 2
- Multi-Service Switching Forum
- Institute of Electrical and Electronics Engineers

The Government Emergency Telecommunications Service (GETS), Wireless Priority Service (WPS), Special Routing Arrangement Service (SRAS) and the Telecommunications Service Priority (TSP) are national security and emergency preparedness services based on national and international standards implemented in the public circuit switched network. Service providers are transitioning their network infrastructure to an Internet Protocol based infrastructure which means that the national security emergency preparedness services will also transition. In order for these services to transition and offer, at a minimum, the same level of capabilities available in today's circuit switched network it is necessary to make modifications to Internet Protocol specifications, as well as national and international standards.

#### FY 2009 Standards Team Accomplishments

- Worked with Internet Engineering Task Force to develop standards framework for priority communications during network congestion.
- Incorporated the Resource Priority Header field into Internet Engineering Task Force standards.
- Submitted plan to Internet Engineering Task Force on how preferential treatment can be signaled or conveyed to prioritize flows, and exempt them from degraded service during periods of wide-scale congestion.
- Developed baseline Next Generation Networks security and signaling requirements in the Alliance for Telecommunications Industry Solutions technical reports and standards.

- Worked with TeleManagement Forum experts on the development of Service Level Agreement application note(s) to aid national security and emergency communications users in acquiring services in a multi-vendor environment.
- Created Emergency Telecommunications Service Internet Protocol Multimedia Subsystem requirements in Third Generation Partnership Project and Third Generation Partnership Project 2.
- Developed and subsequently presented an OMNCS contribution dealing with Security and Signaling technical requirements within the Next Generation Network to International Telecommunication Union – Telecommunication Sector Study Group 13.
- Actively engaged industry experts to ensure that Emergency Telecommunication Service requirements are included in developing wireless technical standards.

#### FY 2010 Standards Team Planned Accomplishments

- Define network management security and the associated security management system functional requirements to contribute to International Telecommunication Union-Telecommunication Sector.
- Approve Next Generation Networks Requirements to contribute to International Telecommunication Union-Telecommunication Sector.
- Develop transport requirements for Emergency Telecommunications Service core Internet Protocol Multimedia Subsystem.
- Develop security contributions for Emergency Telecommunications Service Next Generation Networks and Cyber.
- Work with Alliance for Telecommunications Industry Solutions experts on the development of baseline Emergency Telecommunications Service Next Generation Networks security and signaling technical reports and standards.
- Contribute to TeleManagement Forum guidebook on national security and emergency preparedness management applications in Next Generation Networks.
- Develop Security and Signaling technical Requirements and Specifications for Priority Services.
- Work with voluntary consensus standards organizations on evolving Next Generation Networks related standards; this work will be based on the standards gap analysis completed through the Access Internet Protocol Multimedia Subsystem Industry Requirements process.
- Work with Internet Engineering Task Force to develop standards for priority communications in packet based during network congestion.

#### FY 2011 Standards Team Planned Accomplishments

- Actively participate in and make written contributions to the International Telecommunication Union – Telecommunication Sector work on management plane security and the associated security management system functional requirements.
- Actively participate in and make written contributions containing the Next Generation Networks Access Industry Requirements to the Alliance for Telecommunications Industry Solutions and the International Telecommunication Union-Telecommunication Sector.

- Write contributions on transport requirements for Emergency Telecommunications Service core Internet Protocol Multimedia Subsystem and present to appropriate standards organizations.
- Collaborate with Alliance for Telecommunications Industry Solutions experts on the development of baseline Emergency Telecommunications Service Next Generation Networks security and signaling technical reports and standards.
- Complete work on the TeleManagement Forum guidebook on national security and emergency preparedness management applications in Next Generation Networks.
- Actively participate in and submit contributions to standards organizations dealing with the evolving Next Generation Networks based on additional requirements developed through the Access Internet Protocol Multimedia Subsystem Industry Requirements process.
- Contribute to various Internet Engineering Task Force working groups to ensure that the evolving next generation standards support priority communications in packet based networks.

### ***Advanced Technologies/Converged Networks***

Advanced Technologies/Converged Networks provides a vulnerability assessment of new technologies to Telecommunications and their impact on the infrastructure.

Advanced Technologies/Converged Networks work also includes identification and assessment of the vulnerabilities of satellite communications systems, coordination with commercial vendors in conducting studies on physical vulnerabilities, development of plans to mitigate interference, leadership and coordination efforts across DHS to ensure that satellite capabilities required to prevent, protect, respond to and recover from acts of terrorism, natural disasters, and other emergencies are available when needed.

#### FY 2009 Advanced Technologies/Converged Networks Accomplishments

- Issued National Communications System Handbook 3-10-1 – “Guidance for Improving Route Diversity within Local Access Networks” in February 2009.
- Issued National Communications System Change Notice – “Updates to National Communications System Manual 3-10-1, Guidance for Implementing National Communications System Directive 3-10” in February 2009.
- Recommended follow on updates to the National Communications System Directive 3-10, “Minimum Requirements for Continuity Communications Capabilities” to the Office of Science and Technology Policy in April 2009.

#### FY 2010 Advanced Technologies/Converged Networks Planned Accomplishments

- Issue revisions to National Communications System Manual 3-10-1 – “Guidance for Implementing National Communications System Directive 3-10”, based upon Office of Science and Technology Policy approval of recommended updates.
- Modify data collection tools to support the data surveys of Federal Executive Branch department and agencies of their “As-Is” continuity communications architecture deployed capabilities.
- Work to develop a Continuity Communications Architecture (CCA) to ensure, under all conditions, Category I federal executive branch agency communications.

Development of the architecture will require identifying existing continuity communication capabilities, shortfalls or gaps, and development of technical requirements to improve the overall continuity communications posture. Implementation will ensure agencies can execute primary mission essential functions in support of the eight national essential functions.

FY 2011 Advanced Technologies/Converged Networks Planned Accomplishments

- Provide annual revisions to the National Communications System Manual 3-1-1 – “Guidance for Implementing National Communications System Directive 3-1”, based upon Office of Science and Technology Policy approval of recommended updates.
- Update and refine the continuity communications architecture (CCA) to incorporate select Category II agencies.

<b>2011 Total Request</b>	<b>29</b>	<b>29</b>	<b>14,884</b>
Total Change 2010 to 2011	-	-	3,532

In FY 2011, NPPD requests \$14.884 million for the Critical Infrastructure Protection programs, including 29 positions/ FTE. This represents an increase of \$3.532 million over the FY 2010 enacted budget of \$11.352 million. These funds support National Coordinating Center; Critical Infrastructure Protection operations, planning, policy; training and exercises; Network Security Information Exchange, and the Telecommunications Service Priority program.

The FY 2011 request includes adjustments-to-base pay inflation of \$0.057 million. Program changes include an increase of \$2.231 million for the National Coordinating Center 24x7 Watch, an increase of \$1.345 million for Title Globe, and a decrease of \$0.101 million resulting from program efficiencies.

The Critical Infrastructure Protection Programs ensure the continued availability of national security and emergency preparedness telecommunications services under all circumstances, including crisis or emergency, attack, recovery, and reconstitution. Critical Infrastructure Protection initiatives include:

- Operation and maintenance of the National Coordinating Center for Communications;
- Telecommunication analyses in support of disaster response exercises, planning, and operations;
- National continuity communications testing, compliance reporting, and scenario-based operations assessments;
- Continuity planning and operational support;
- Training and exercise of communications emergency response personnel;
- Production and maintenance of operational procedures, policies and support tools;
- Management of a structured forum for Government and telecommunication industry collaboration on national security and emergency preparedness telecommunications policies, procedures and issues; and
- Management of the system that provides for the restoration and provisioning of telecommunications circuits that support national security and emergency preparedness.

The Critical Infrastructure Protection Program includes the following Activities: *National Coordinating Center Operations; Critical Infrastructure Protection Operations, Plans, and Policy; Training and Exercises; Network Security Information Exchanges; and Telecommunications Service Priority.*

#### ***National Coordinating Center (NCC)***

The National Coordinating Center (NCC) Operations is a joint industry-government body that provides a mechanism to respond to national security and emergency preparedness telecommunications incidents. The mission of the NCC is to assist in the initiation, coordination, restoration, and reconstitution of national security and emergency preparedness telecommunications services or facilities under all conditions, crises, or emergencies. Government membership includes 24 Federal departments and agencies with significant national emergency responsibilities or critical telecommunications requirements. The Communications Information Sharing and Analysis Center (ISAC) is made up of industry members representing the country's wireline and wireless service providers, equipment vendors, internet service providers, satellite industry, and cable industry. The strength of the NCC lies in the trusted relationship between government and industry. This relationship is critical to the NCC in its role as the primary mechanism within the National Communications System for executing Emergency Support Function #2 – Communications under the National Response Framework during an incident.

The NCC is governed by Executive Order 12472, which establishes a joint industry-government National Coordinating Center; Homeland Security Presidential Directive-5, which directs the NCC to provide support to the National Response Framework; and Section 706 of the Communications Act of 1934, which governs NCC engagement in

Continuity of Operations and Continuity of Government activities. The NCC Operations is comprised of three sub-activities:

*NCC Watch* This sub-activity serves as the operational core of the National Communications System. Co-located with the United States Computer Emergency Readiness Team (US-CERT), the NCC Watch provides 24x7 situational awareness over the health of the telecommunications infrastructure and facilitates the initiation, coordination, restoration and reconstitution of national security and emergency preparedness telecommunications services or facilities during emergency events. Senior level information assurance analysts located on site in the NCC are closely integrated with the Government National Coordinating Center operations staff and resident and non-resident Industry representatives from the NCC's member companies. The NCC Watch enhances physical and cyber security of the Nation's critical communications infrastructures by facilitating cooperation, providing real-time situational awareness, enhancing information sharing, and maintaining system-to-system interaction among critical infrastructures and between the Government and the private sector. On a daily basis, the NCC Watch provides:

- Monitoring and situational awareness of essential communications facilities through exchanges with network owners and operators, open source reporting, and the Federal, State, local, and tribal partners;
- Consultation with private industry to exchange status information and develop coordinated action plans; and
- Assessing threats and vulnerabilities to national security and emergency preparedness communications needs of the Federal Government.

#### *NCC Programmatic Support*

Provides planning and preparedness activities in support of national security and emergency preparedness. This includes internally focused activities for designing, developing, and implementing plans and operating procedures and addressing policy development and implementation. External activities focus on relationship building, information sharing, and operational planning and execution under the joint government/industry Communications Information Sharing and Analysis Center and Government partners of National Communications System.

#### *High Frequency Radio Program*

Provides technical, administrative, operational, and readiness support to four emergency High Frequency radio operational activities: SHARED RESOURCES High Frequency Radio Program, NCC High Frequency Radio Program, the NCS Regional Managers High Frequency Radio Program, and the NCS Auxiliary High Frequency Radio Program. These programs support a nationwide radio network of approximately 1,400 high frequency radio stations contributed by 100 Federal, State and industry organizations to form a nationwide emergency message-handling network. SHARED RESOURCES has made a notable contribution to national security and emergency preparedness support in over 42 emergencies since it was formally established in 1989 and serves as a backup high frequency communications vehicle linking key Federal entities with the major

telecommunications infrastructure service providers. It was vital for ensuring communications during Hurricane Katrina between isolated emergency operations centers. The NCS High Frequency Radio Program supports the NCS mission of executing Emergency Support Function #2 under the National Response Framework and is essential in supporting the NCC mission.

### ***Critical Infrastructure Protection Operations, Plans, and Policy***

#### *Continuity of Operations.*

The goal of Continuity of Operations is to improve the overall readiness, operations and execution of mission essential functions, including Enduring Constitutional Government, and Continuity of Government operations. It also establishes the framework to ensure all National Communications System staff members are trained to work continuity operations during an all-hazards event or incident. Homeland Security Presidential Directive-20 and the National Continuity Directive - 1 requires all Executive Branch departments and agencies to have plans in place to continue their mission essential functions at alternate facilities if their primary facilities become uninhabitable for an extended period.

The Continuity of Operations Plan provides guidance for the organization, its leaders, and all assigned staff, should NCS be directed to deploy during a Continuity of Operations event. The Continuity of Operations Plan identifies the mission essential functions of each NCS Branch, the order of succession for leadership, Emergency Relocation Group members and Advance Relocation Team members, mission critical systems, vital records and databases, and required communications for the Relocation Facility.

#### *Operations Analysis*

The Operations Analysis (OA) Team provides telecommunication analyses in support of disaster response related exercises, planning, and operations and assessments of national continuity communications through monthly testing, quarterly compliance reporting, and scenario-based mission-focused operations analyses.

During significant disasters or crises, the Operations Analysis activity leads the multi-agency Analysis Response Team (ART) in support of the NCC Manager. In this capacity, the Operations Analysis Team provides rapid assessments of potential impacts and/or actual damage or disruptions of critical telecommunications infrastructures. This activity supports all phases of Emergency Support Function #2 operations – from planning and preparedness, to full recovery of the telecommunications infrastructure.

The Operations Analysis Team works within the telecommunications analysis community to support the development, documentation, implementation and maintenance of policies, procedures, tools, databases, capabilities, and baseline analyses to enable comprehensive, accurate, and rapid assessments of the communications infrastructure. For example, this activity is developing a series of in-depth regional and metro characterization baselines of the communications infrastructure in high-risk areas (e.g. Washington D.C., Philadelphia, and along the hurricane prone coastal areas.).These

characterizations are used for planning, exercises, and during actual crises or disaster operations to significantly reduce the time required to assess potential or actual telecommunications infrastructure issues.

This activity also supports the requirements in Homeland Security Presidential Directive-20 to “conduct quarterly and annual assessments of continuity communications capabilities.” To accomplish this, the Operations Analysis Team conducts the monthly Title Globe program continuity testing of departments and agencies specified by the Office of Science and Technology Policy (OSTP). In addition, the Operations Analysis Team conducts quarterly and annual assessments of National Communications System Directive 3-10, *Minimum Requirements for Continuity Communications Capabilities*, compliance on behalf of OSTP.

### ***Training and Exercise Program***

The Training and Exercise Program ensures that the National Communications System has a cadre of emergency response personnel prepared to respond across the spectrum of crises and emergencies. These personnel are organized in accordance with the Emergency Support Function #2 Annex of the National Response Framework and are tasked to coordinate the restoration and provisioning of national security and emergency preparedness communications during an incident or disaster. In response to the recommendations of the *Hurricane Katrina After Action Report*, the NCS is enhancing its readiness for emergency response operations with an increased tempo of training and exercises for personnel who have Emergency Support Function #2 collateral duties. The NCS participates in exercises involving scenarios as varied as continuity of operations, continuity of government, natural disasters, weapons of mass destruction, critical infrastructure protection, and cyber intrusion. The training program will combine distance learning instruction with a periodic conference to provide interaction among the team members.

### ***Network Security Information Exchanges***

The Network Security Information Exchanges (NSIE) activity provides technical and administrative support to both the National Security Telecommunications Advisory Committee (NSTAC) and Government Network Security Information Exchanges (NSIE). The NSIE consists of two bodies: the Government Network Security Information Exchange which represents Federal agencies that have research, standards, regulatory, law enforcement, or intelligence functions related to the public network, or are major telecommunications users, and the President’s NSTAC NSIE which includes representatives from telecommunications service providers, equipment vendors, systems integrators, and major users. Participants on this international forum include representatives from the Canadian and United Kingdom government and telecommunications industry involved in the United Kingdom and Canadian Network Security Information Exchanges. The NSIE forum provides a trusted environment in which industry and Government representatives exchange information on threats to and vulnerabilities of the public network. These bodies meet jointly on a bimonthly basis to

address major technical and operational issues affecting the security of the public network, such as unauthorized penetration or manipulation of the public network software, databases, and other infrastructures supporting national security and emergency preparedness telecommunications services. The NSIE forums are designed to exchange ideas on technologies and techniques for addressing and mitigating the risks to the public network and its supporting infrastructures.

### ***Telecommunications Service Priority Program***

The Telecommunications Service Priority (TSP) program was established by a Federal Communications Commission Report and Order 88-341 in 1988. TSP is the regulatory, administrative, and operational system authorizing and providing for priority treatment of national security and emergency preparedness telecommunications services. The TSP program provides national security and emergency preparedness users with priority restoration and provisioning of telecommunications services that are vital to maintaining readiness or response to an incident. As a result of hurricanes, floods, earthquakes, and other natural or man-made incidents, telecommunications service vendors may become overwhelmed with requests for new telecommunications services and requirements to restore existing telecommunications services. The TSP Program provides service vendors with a Federal Communications Commission mandate for prioritizing service requests by identifying those services critical to national security and emergency preparedness. A telecommunications service with a TSP assignment is assured of receiving full attention by the service vendor before a non-Telecommunications Service Priority service. The TSP Program has two component priorities which include restoration and provisioning. A restoration priority is applied to telecommunications services to ensure restoration before any other services. A provisioning priority is obtained to facilitate priority installation of new telecommunications services.

### **FY 2009 Critical Infrastructure Protection Accomplishments**

- Updated and maintained the NCS portion of the integrated NCS/NCSD Continuity of Operations Plan.
- Updated Continuity of Operations and Continuity of Government Communication plans, policies and procedures, as required.
- Updated emergency response plans, policies and procedures to reflect After Action/Lessons Learned reports from previous events.
- Conducted and documented in-depth telecommunications characterization baselines of hurricane prone coastal areas throughout the United States and other high interest areas in order to support disaster response operations, planning, and exercises related to critical communications infrastructures.
- Produced an initial assessment of the effect of several high-impact threat scenarios on the ability of the NCS to continue supporting mission essential functions.
- Produced an assessment of the potential communications impacts resulting from a nuclear burst at the U.S. Capitol Visitors Center in response to Office of Science and Technology Policy tasking.
- Provided Telecommunications Infrastructure Analysis to support planning for the 2009 Presidential Inauguration.

- Provided a set of Regional Characterizations of the Telecommunications Infrastructure to the Joint Telecommunications Resources Board.
- Provided the Joint Field Office and the NCC Manager reports on the projected telecommunications impacts and restoration status for Hurricane Ike.
- Developed plans, policies and procedures to support Emergency Support Function #2 operations with regard to the 15 National Planning Scenarios and other high interest scenarios.
- Coordinated interagency participation to conduct Emergency Support Function #2 operations in the annual National Level Exercises, and supported Emergency Support Function #2 participation in regional exercises.
- Supported Regional Communications Coordinator participation in earthquake preparedness planning and exercises associated with the Wasatch Fault in Utah.
- Planned and conducted an annual Emergency Support Function #2 Training Conference.
- Planned and implemented a comprehensive demonstration and validation of each Federal Agency's critical communications assets during the 2009 continuity of operations exercise, Exercise EAGLE HORIZON-09. The demonstration promoted operator awareness of the communications procedures and the equipment that is mandated for use by NCS Directive 3-10.
- Participated in regional emergency management workshops to plan and coordinate Emergency Support Function (ESF) #2 actions in response to an earthquake in the New Madrid Seismic Zone; a natural disaster in the Southeast US; and the health and societal limitations resulting from an influenza pandemic. The workshops highlighted the resources and capabilities that are available within the federal and state governments, and revealed the expectations for fulfilling shortfalls.
- Sponsored the 2009 ESF #2 Winter Training Conference, which provided a forum for the members of the interagency ESF #2 Emergency Communications Team to discuss lessons learned and best practices from the 2008 hurricane season, as well as, receive training on procedures that support ESF #2 operations.
- Conducted nine distance learning teleconferences and 'webinars' for the members of the ESF #2 Emergency Communications Team. The training sessions enabled discussion of the new team Job Aids, and provided instruction on special-interest subjects that apply to ESF #2 operations.
- Led communications readiness efforts and outreach to Government and Industry partners in preparation for the communications infrastructure due to the mass gathering of transient users attending the 56th Inauguration activities in the mid-Atlantic region.
- Planned, coordinated and directed Office of the Manager, NCS participation in headquarters-level exercises, e.g., Exercise EAGLE HORIZON-09 (EH-09) and the National Level Exercise-09 (NLE-09). The exercises provided an opportunity to assess the agency's operating plans and procedures; reinforced operator familiarity with the installed communications equipment; and emphasized the importance of procedures that facilitate government-industry coordination and information sharing.
- Compiled and coordinated the NCS Multi-Year Training and Exercise Plan, which provides a 5-year outlook of activities that will require manpower and financial

resources from the Office of the Manager, NCS and the ESF #2 partner agencies.

The Plan also identifies goals and objectives for ESF #2 participation in the events.

- Ensured operational readiness and validated information flow through participation in exercises such as Cyber Storm, Top Officials, Pinnacle, Forward Challenge, National Response Framework Exercises, and other continuity readiness events.
- Provided annual review of existing internal National Coordinating Center plans to support national security and emergency preparedness activities; development of new internal plans based on identified requirements; and support external organizations in updating plans, such as the National Response Framework and National Incident Management System.
- Expanded the National Coordinating Center and Communications Information Sharing and Analysis Center membership to keep pace with developing technologies and new entrants into communications sector.
- Fostered sharing of threats and intelligence through maintenance of National Communications System Homeland Infrastructure Threat and Risk Analysis Center position and increasing the number of industry members with Top Secret/SCI clearances.
- Ensured operational readiness through weekly net checks; planning and coordination of one annual nationwide SHARED RESOURCES exercise; Support ad-hoc exercises as appropriate.
- Expanded Radio-over-Internet Protocol network participation with Information Technology certification and deployment of Radio Over Internet Protocol to additional SHARED RESOURCES Control Station sites.
- Provided monthly Title Globe continuity communications testing, conducted quarterly multi-agency Continuity of Operations Communications Managers Group meetings, and developed an initial NCS Directive 3-10 compliance assessment report for OSTP.
- Provided Secretariat Support for the Government and National Security Telecommunications Advisory Committee's Network Security Information Exchanges, including 6 bimonthly joint meetings, working groups, conference calls, and ad hoc meetings.

#### FY 2010 Critical Infrastructure Protection Planned Accomplishments

- Develop annual update of the National Communications System Continuity of Operations Plan.
- Develop annual update of the Multi-Year Strategy and Management Plan for Continuity of Operations.
- Engage Emergency Support Function #2 participation in national security and emergency preparedness exercises in preparation for the 2010 Winter Olympics (January-February 2010).
- Provide Emergency Support Function #2 representatives to participate in the planning, coordination and conduct of the National Level Exercise 2010 (May 2010), which will feature the federal and state response to the detonation of a low-yield improvised nuclear device.
- Continue distance learning, teleconference training sessions for the interagency Emergency Support Function #2 team members by presenting instruction on topics

recommended or requested by the Emergency Communications Team members. The distance learning format provides a flexible, economical means to providing training to team members who are disbursed nationwide.

- Plan and conduct the FY2010 Emergency Support Function #2 Winter Workshop (December 2009) as a distance learning teleconference / webinar.
- Ensure operational readiness through participation in national exercises such as the Cyber Storm III, Top Officials, TOPOFF-5, and other national exercises that require communications resources to support the operational objectives.
- Provide annual review of existing internal National Coordinating Center plans to support national security and emergency preparedness activities, development of new internal plans based on identified requirements, and support external organizations in updating plans such as the National Response Framework and National Incident Management System.
- Expand the National Coordinating Center and Communications Information Sharing and Analysis Center membership to keep pace with developing technologies and new entrants into communications sector.
- Improve information sharing and coordination between Government and Information Sharing and Analysis Center members by increasing members' participation in national security and emergency preparedness communications activities such as the annual National Coordinating Center Industry Partner Conference.
- Foster sharing of threats and intelligence through maintenance of the National Communications System Homeland Infrastructure Threat and Risk Analysis Center position and increasing the number of industry members with Top Secret/SCI clearances.
- Ensure operational readiness through weekly net checks; planning and coordination of one annual nationwide SHARED RESOURCES exercise.
- Expand Radio-over-Internet Protocol network participation with IT certification and deployment of Radio-over-Internet Protocol to additional SHARED RESOURCES Control Station sites.

#### FY 2011 Critical Infrastructure Protection Planned Accomplishments

- Create new standard operating procedures, continuity of operations plans, and response plans for the Joint Watch mission that has been created due to the operational integration of the NCC 24x7 Watch and the US CERT.
- Broaden the mission of the NCC to work with government and industry partners in responding to cyber threats/attacks.
- Target the information technology industry for inclusion in the National Coordinating Center and Communications Information Sharing and Analysis Center membership to keep pace with developing cyber technologies that can provide support to the national security and emergency preparedness community.
- Increase the number of Communications Information Sharing and Analysis Center members with Top Secret/SCI clearances in order to share with them threat and intelligence information that is crucial in responding to threats/attacks to national security emergency preparedness telecommunications.

- Ensure operational readiness through participation in exercises such as Cyber Storm, Eagle Horizon, National Level Exercises, National Response Framework Exercises, and other Continuity of Operations and Continuity of Government readiness events.
- Ensure operational readiness through weekly network checks; planning and coordination of one annual nationwide SHARED Resources (SHARES) high frequency radio exercise.
- Restore radio-over-Internet Protocol network deployment test-bed for SHARES Control Station sites.
- Add remote transmitter and antenna capabilities at another Arlington, VA site to accommodate the redundancy of SHARES operations.
- Provide monthly Title Globe continuity communications testing, conduct quarterly multi-agency Continuity of Operations Communications Managers Group meetings, and develop quarterly and annual NCS Directive 3-10 compliance assessment report for Office of Science and Technology Policy.
- Conduct in-depth telecommunications assessment baselines of high risk areas throughout the United States and in support of special events in order to support disaster response operations, planning, and exercises related to critical communications infrastructures.
- Produce scenario/mission-based assessments of critical communications infrastructures in support of National Level Exercise 2011 and for ongoing continuity communications planning and architecture development.
- Provide an updated and expanded set of Regional Characterizations of the Telecommunications Infrastructure to the Joint Telecommunications Resources Board and for the ESF#2 community.
- Provide the Joint Field Office and the NCC Manager reports on the projected telecommunications impacts and restoration status for FY2011 hurricanes and any other significant disasters.
- Provide Secretariat Support for the Government and National Security Telecommunications Advisory Committee's Network Security Information Exchanges, including six bimonthly joint meetings, working groups, conference calls, and ad hoc meetings.
- Produce the 2011 Network Security Information Exchange "Assessment of the Risk to the Cyber Security of the Public Network" addressing the threats to and vulnerabilities of the telecommunications infrastructure.
- Develop annual update of the National Communications System Continuity of Operations Plan and the Multi-Year Strategy and Management Plan for Continuity of Operations to reflect After Action/Lessons Learned reports from previous National Level Exercises.
- Attain certification and accreditation from the DHS CIO to allow the Telecommunications Service Priority database to be web accessible. It is currently a closed system. This direct access allows more efficient processing of user and vendor data.
- Manage the Telecommunications Service Priority requirements that ensure the relevance and accuracy of the restoration priorities that are on the Nation's national security and emergency preparedness circuits. These requirements are the

revalidation of current assignments, telecommunications vendor confirmation of new assignments, and reconciliation of data with telecommunications vendors.

- Provide technical and logistical support to the Telecommunications Service Priority Oversight Committee that serves as an information sharing forum between private industry, the State and Federal Government organizations and the National Communications System so that the Committee can identify and review any problems developing in the Telecommunications Service Priority System and recommend actions to correct them or prevent recurrence.
- Finalize the planning, coordination and execution of Emergency Support Function #2 participation in the National Level Exercise (2011), which will feature an integrated federal and state response to a catastrophic earthquake within the New Madrid Seismic Zone.
- Plan, coordinate and conduct an ESF #2 full-field exercise in conjunction with Exercise NLE-2011 and as the culminating event for the ESF #2 Spring Training Exercise.
- Schedule and conduct 10 – 12 distance learning seminars to deliver periodic training to the interagency members of the ESF #2 Emergency Communications Team.
- Recruit and select Army Reserve field grade officers to fill vacancies within the NCS Individual Mobilization Augmentee Unit, as a result of personnel retirements and Active Duty mobilizations.
- Participate in the ‘new employee orientation’ by scheduling and conducting (every 4 months) a continuity of operations (COOP) awareness briefing for persons hired within the intervals.
- Review the results of the prior year’s Federal Emergency Communications Coordinators training curriculum to identify topics for addition, expansion, and to reinforce the training objectives.
- Review and update the Multi-Year Training and Exercise Plan to forecast the planning requirements to FY-2016.

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
National Command & Coordination Capability  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: National Command & Coordination Capability**

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2009 Actuals</b>	<b>16</b>	-	<b>2,417</b>
<b>2010 Enacted</b>	-	-	-
<b>2011 Current Services</b>	-	-	-
<b>2011 Total Request</b>	-	-	-
Total Change 2010 to 2011	-	-	-

In FY 2010, the Department discontinued this program.

**CURRENT SERVICES DESCRIPTION**

The scope of the National Command and Coordination Capability's mission encompassed a secure and non-secure, networked communications capability to support civil responses for domestic incidents requiring a coordinated Federal response.

This program is being discontinued. The Federal government, under National Communications System 3-10, is already purchasing secure and non-secure communications capabilities for continuity purposes in support of incident response and performance of primary mission essential functions. Additionally, there are considerable Federal communications capabilities in the field that can be leveraged during an event, and these existing, routinely used systems can be leveraged, as they are today, during a major incident.

#### IV. Program Justification Changes

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
Identification & Analysis  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease:** Identification & Analysis  
 PPA: Identification & Analysis  
 Program Decrease: Positions 4.0, FTE -3.0, Dollars \$-8002.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

***Salaries and Benefits Decreases: (\$0.700 million)***

Description of Item

Reductions were taken from Identification and Analysis salaries and benefits based on a historical trend analysis of filled / vacant positions.

Justification

The reductions are based on the application of the historical IP fill rate of 90%. The breakdown of the reduction is applied across Identification and Analysis projects as follows:

<b>Project</b>	<b>Reduction of FTE</b>	<b>Reduction to Salaries &amp; Benefits</b>
Vulnerability Assessments	(1)	(\$107)
Infrastructure Sector Analysis	(1)	(\$182)
Infrastructure Data Management	(1)	(\$98)
Infrastructure Visualization	(1)	(\$140)
Infrastructure Information Collection Project	(1)	(\$173)
<b>Total Identification and Analysis Reductions</b>	<b>(5)</b>	<b>(\$700)</b>

### Impact on Performance

There should be minimal impact to performance, as the 90% fill rate is based on historical actuals. Infrastructure Protection will always have vacant positions, and the Federal hiring process is time consuming to backfill staff lost to attrition. While there is a reduction to funding, there is no reduction proposed to the number of positions for Infrastructure Protection.

### ***Vulnerability Assessments Program Decrease: (\$3.697 million)***

#### Description of Item

The Vulnerability Assessment project provides IP with the capability to effectively assess vulnerabilities and consequences to the Nation's CIKR, and provide protective measures to Federal, State, and local stakeholders in all 18 CIKR Sectors. Current efforts cover the spectrum of field vulnerability assessment teams conducting single Site Assistance Visits, and Buffer Zone Plans to larger-scale assessments of systems, clusters and regions via the Regional Resiliency Assessment Program. The Computer Based Assessment Tool complements these assessments by integrating assessment data with geospherical video and geospatial and hypermedia data and providing first responders and planners with a computer-based, cross-platform tool that enables informed decisions and quicker incident response. The decrement in funding for the Vulnerability Assessment Project will result in a decrease in the number of national level vulnerability assessments from the FY 2010 target goal of 450 assessments by approximately 175 assessments with the requested FY 2011 funding.

#### Justification

A program reduction of \$1.200 million is proposed for Linking Encrypted Network System (LENS) / Infrastructure Relating Information System (IRIS). LENS/IRIS is a data warehouse and suite of data collection tools and applications integrating all vulnerability assessment information into an operational system accessed by all of IP. The data is readily accessible for steady-state operations, is used to support forward deployed IP employees during incident response, and provides detailed vulnerability information for physical security, security force, security management, interdependencies, protective measures, and risk mitigation.

The discontinued funding to provide Linking Encrypted Network System / Infrastructure Relating Information System is predicated on the creation of the Joint Technology Laboratory to manage and store the information currently contained in the Linking Encrypted Network System. This efficiency will eliminate duplicate systems for housing the information, tools and data collection applications. Savings is contingent upon the transition and full operational capability of the Joint Technology Lab, scheduled for March 2010.

A program reduction of \$2.497 million will result in a decrease in the number of national level vulnerability assessments completed in FY 2011, including:

- Site Assistance Visits - Identifies CIKR dependencies, interdependencies, resiliency characteristics, and regional capability gaps. The cost for a SAV is approximately \$50 thousand;
- The Buffer Zone Protection Program - A \$50 million, DHS-administered grant program focused on identifying and mitigating vulnerabilities at the highest-risk CIKR sites. It provides grant funding directly and only to first responders and local law enforcement to increase capabilities and preparedness. The cost for an average Buffer Zone Plan is approximately \$15 thousand;
- The Regional Resiliency Assessment Program - Cooperative DHS led interagency assessment of specific CIKR and regional analysis of the surrounding infrastructure to identify CIKR dependencies, interdependencies, cascading effects, resiliency characteristics, and gaps, and examine the vulnerabilities, threats, and potential consequences from an all-hazards perspective. The average cost to conduct a Regional Resiliency Assessment Program is approximately \$0.485 million. BZPP grant funding is also provided to the States selected for the Regional Resiliency Assessment Program. In FY10, \$1.5 million in BZPP grant funding was allocated to the States where a Regional Resiliency Assessment Program will be conducted.

Through the Vulnerability Assessment project, IP provides security consultations for areas where new nuclear reactors will be located. As part of the application process for new nuclear reactor licenses, required under the Energy Policy Act of 2005, Section 657, IP provides a report to the Nuclear Regulatory Commission (NRC) describing assessment results within reviewed areas and identifying potential vulnerabilities and threats to proposed new reactors sites.

#### Impact on Performance

The new funding level will result in an annual decrease of approximately 175 lower priority vulnerability assessments: a decrease in the number of Site Assistance Visits, Regional Resiliency Assessment Programs, and Computer Based Assessment Tool assessments. While these are critical to IP's ability to accurately identify and analyze vulnerabilities, consequences and the complex and direct interdependencies of the Nation's high-risk CIKR to identify protective measures, efforts are scalable each fiscal year and IP will prioritize the assessments to ensure the most critical are completed within the requested funding level.

#### ***Infrastructure Sector Analysis Program Decrease: (\$4.163 million)***

##### Description of Item

A decrease of \$4.163 million is proposed in FY 2011 from the FY 2010 enacted for Infrastructure Sector Analysis. This decrease will reduce the funding for National Infrastructure Simulation and Analysis Center modeling. National Infrastructure Simulation and Analysis Center was established to provide a comprehensive capability to assess the national system of interdependent infrastructures through advanced simulation and modeling. National Infrastructure Simulation and Analysis Center conducts analyses of technical, economic, and national security implications of critical infrastructure and

key resources protection, mitigation, response, and recovery options. To do this, National Infrastructure Simulation and Analysis Center conducts gap analysis using modeling and simulation to predict the performance of infrastructure under abnormal conditions (e.g., natural and manmade incidents), the effects of interdependencies, and the dynamics of their interconnections.

#### Justification

This programmatic decrease reflects a reduction of \$4.163 million for the National Infrastructure Simulation and Analysis Center efforts.

#### Impact on Performance (Relationship of decrease to Strategic Goals)

The reduction will delay the development of new tools and capabilities to analyze the Critical Manufacturing Sector by one year.

#### ***Infrastructure Visualization Program Decrease: (\$1.013 million)***

#### Description of Item

A decrease of \$1.013 million is proposed in FY 2011 from the FY 2010 enacted for Infrastructure Visualization. This decrement impacts the planned deployment of the iCAV SECRET system and the HIFLD to the Regions implementation.

#### Justification

iCAV SECRET system implementation, operations and maintenance will be deferred. IP will continue to operate the iCAV Sensitive but Unclassified (SBU) suite of tools and software development, operations and maintenance within the requested funding level.

One of the primary data sources for the iCAV system is updated by the Homeland Infrastructure Foundation Level Data (HIFLD) to the Regions effort. HIFLD to the Regions currently deploys sixteen Information Exchange Brokers (IEBs) and nine Geospatial Analysts (GAs) to the PSA regions to build partnerships with the state and local community for data sharing in the Homeland Security Infrastructure Program (HSIP). The GAs work with the Supervisory PSAs and provide geospatial products and data for planning, response, and recovery for major events including, but not limited to, National Security Special Events (NSSEs) such as the Presidential Inauguration, and natural and man-made events including earthquakes, hurricanes, and terrorist attacks. The IEBs coordinate with the data collection and management activities in the Infrastructure Information Collection Division (IICD) to get authoritative, high-quality infrastructure data at a reduced cost, ultimately to be included in the HSIP datasets.

#### Impact on Performance

There is no specified requirement within IP to build, host, or manage a classified version of the iCAV system. While the absence of a classified geographic information system (GIS) such as iCAV does limit the ability of IP to display the Level 1 and 2 infrastructure sites in a dynamic Web-based display, the only specified requirement for geospatially enabling the Level 1 and 2 data is via hard and soft copy geospatial products. IP currently has a capability to create SECRET hard and soft copy geospatial products

outside of a classified GIS system such as iCAV SECRET so the operational impact on IP of not funding an iCAV SECRET system is negligible at worst.

Given all other DHS priorities, funding for the HIFLD to the Region effort was reduced which will require prioritization for requests for GIS and will stagnate the ability to build new partnerships in FY11.

***Infrastructure Data Management Program Decrease: (\$0.017 million)***

Description of Item

A decrease of \$0.017 million is proposed in FY 2011 from the FY 2010 Enacted budget for Infrastructure Data Management training efforts.

Justification:

IP is focusing on the promotion of web-based training.

Impact on Performance

The reduction will reduce the number of off-site instructor-led training while continuing to promote webinar and web-based training.

***Infrastructure Information Collection Project Increase: \$1.588 million***

Description of Item

The Homeland Security Act of 2002, Public Law 110-53, and Homeland Security Presidential Directive-7 define a strategy for establishing an integrated, prioritized national asset database to “identify protective priorities and support protection measures.” Infrastructure Protection maintains numerous tools, systems, portals, and applications, such as Constellation/Automated Critical Asset Management System, Integrated Common Analytical Viewer, and Linked Encrypted Network System to support the infrastructure protection community at all levels of government to include State and Local Fusion Centers and the private sector. Many of these technologies were established prior to the publishing of the initial NIPP in 2006. With the publishing of the 2<sup>nd</sup> edition of the NIPP in 2009 Infrastructure Protection has reached a level of maturity and understanding of the various requirements and critical needs to support and enable a unified national approach to infrastructure protection and resiliency. The Infrastructure Information Collection Project IT Enterprise Modernization will enhance Infrastructure Protection’s Information Technology systems and improve functionality across the infrastructure protection community (Federal, State and Local and Private Industry) through an integrated IT architecture to provide technical services, data and tools that could be leveraged across the IP community. Current funding levels support the development and implementation of the Infrastructure Information Collection System. This proposed initiative will:

- Increase and enhance mission effectiveness across the entire infrastructure protection community by making tools, applications, and systems easier to

- manage, access, and leverage in direct support of infrastructure protection planning, response, and restoration activities;
- Strengthen State and local government knowledge and understanding of infrastructure and provide a user-defined operating picture with enriched infrastructure data and analytical applications;
  - Enable greater support to first responders and State and Local Fusion Centers by integrating, harmonizing, and serving infrastructure data used to prioritize infrastructure protection, incident response, and reconstitution in response to all hazards incident management; and
  - Strengthen Federal government knowledge of the nations Critical Infrastructure Key Resources (Level 1 and Level 2 facilities); but also manage and make available vast information on thousands of additional facilities of high interest to all levels of government and private sector owners and operators.

### Justification

Current funding levels support the development and implementation of the Infrastructure Information Collection System. Additional funding will allow Infrastructure Protection to not only integrate disparate systems but also evolve current tools and applications and leverage new technologies to keep pace with an expanding State and local and private sector infrastructure protection and resiliency mission. Specifically, this funding will:

- Expand the Infrastructure Information Collection System concept into an Infrastructure Protection-centric initiative;
- Begin the effort by integrating 19 geospatial and database systems;
- Support the design or procurement of advanced analytical software and technologies;
- Achieve systems integration and eliminate duplication of effort within Infrastructure Protection by building an enterprise for all Infrastructure Protection technology development, innovation, and deployment;
- Implement an integrated Infrastructure Protection-wide process to collect infrastructure information on vetted and prioritized requirements from State and Local Fusion Center and other Federal, State, local, territorial, and tribal stakeholders, as well as private sector entities; and
- Provide centralized, integrated help desk support to Infrastructure Protection's Information Technology systems.

The following justification describes the stakeholder benefits, cost savings, and resources needed to support each initiative cited above.

The integration of data into a single sign-on enterprise for access to infrastructure data will provide a direct enhancement to the mission effectiveness of first responders, State and Local Fusion Center analysts, emergency managers across all levels of government, and decision and policy makers who must understand the infrastructure landscape.

The key requirement of Information Technology systems integration is focused on the stakeholder need for easy access (through a single sign-on) to accurate, actionable data.

This data will be obtained through consolidated data sets and operational systems, databases, tools and applications. This effort establishes and increases data interoperability and access by combining existing hardware and software supporting Infrastructure Protection's databases, systems, tools, and applications. Through the Infrastructure Information Collection System, the Department will provide improved Information Technology systems and infrastructure data management support and technical tools that enable the collection and integration of various infrastructure information data sets to assist various homeland security partners across all levels of government and the private sector. Cost savings are anticipated with the consolidation of disparate systems, as well as system administration and security monitoring synergies.

Referencing the current capital investment plans, maintenance costs for the following programs are approximately:

- Constellation/Automated Critical Asset Management System – \$3.0 Million
- Integrated Common Analytical Viewer – \$5.2 Million
- InSight – \$3.0 Million
- Linked Encrypted Network System –\$1.0 Million
- Technical Resource for Incident Prevention –\$1.7 Million

Infrastructure Protection Information Technology enterprise modernization efforts will provide long-term cost savings for system maintenance and equipment upgrades as compared to maintaining and upgrading disparate systems. Additionally, long-term cost savings will be realized through reduced requirements for high-tech personnel such as database engineers, technical writers, and Information System Security Officers.

Development, innovation, deployment, and consolidation to enhance current tools and systems and leverage new technologies are critical components to building a viable enterprise. This will ensure Infrastructure Protection Information Technology enterprises evolves to maintain efficiency and effectiveness in supporting the infrastructure projection mission though the out years.

Infrastructure Protection's Information Technology enterprise modernization effort will provide sustained cost and operational efficiencies within Infrastructure Protection unavailable in today's environment where systems are geographically dispersed. Sharing hardware costs and exchanging data between systems will create economies of scales that will:

- Provide cost savings in hardware (server virtualization and data storage) and software licensing;
- Reduce redundant expenditures for most Chief Information Officer security requirements by leveraging one set of physical and cyber security controls;
- Increase service efficiencies through rapid prototyping and faster technology insertion; and
- Increase timely services and enhance customer responsiveness by providing an integrated workflow management system across the Office of Infrastructure Protection.

Implementing the Infrastructure Protection Information Technology enterprise modernization effort will conservatively reduce development costs between 15 percent and 20 percent per year. By expanding the development and testing time to coordinate systems development in a more collaborative and timely manner, increased staffing will benefit Infrastructure Protection.

#### Impact on Performance

By enhancing and integrating tools available to the infrastructure protection community, the Information Technology enterprise modernization effort will provide enhanced capability for geospatial visualization and data collection that will be re-integrated into the Infrastructure Information Collection System and the Geospatial Information Infrastructure data warehouses. The modernization will allow increased development of geospatial products in support of State and Local Fusion Center efforts, the development of data standards based on suspicious activity reporting, and the integration of existing State and Local Fusion Center tools and data with the Integrated Common Analytical Viewer suite of tools.

With this funded effort, the enterprise modernization will provide:

- Increased risk-related infrastructure information,
- Data standards for common and consistent information,
- Streamlined infrastructure information collection and management processes,
- Increased critical infrastructure and key resources information processing capability for users.
- hardware and software licensing,
- Chief Information Officer requirements, such as systems security certification and accreditation,
- system and user administration,
- Help Desk support.

Funding this effort will provide the State and Local Fusion Centers and other infrastructure protection partners with critical asset-, system-, and network-specific information to make risk-based decisions about real-time events and protection planning. Ultimately, State and Local Fusion Centers and other Federal, State, local, tribal, and territorial governments will be able to manage risks and allocate resources using timely, accurate, reliable, and valid data from numerous independent data sources.

The IP Information Technology Enterprise Modernization initiative promotes operational and information technology service efficiencies by standardizing data collection requirements and methodologies to support and contribute to the State and Local Fusion Center common operational picture and as a means for DHS to share operational data downward with State and local partners. When combined with State and local operational or infrastructure data, the integrated infrastructure visualization tools and Critical Infrastructure and Key Resources database information will help national homeland security move closer to a true “common” operational picture. The initiative

will provide a common and consistent means for sharing asset, system, and network vulnerability, risk, and protective measures data with infrastructure protection partners. The effort will consolidate and centralize disparate operations and systems with similar, overlapping areas of focus into a single, unified effort.

FY2011 Milestones

- Complete integration, implementation, and deployment of Automated Critical Asset Management System and Integrated Common Analytical Viewer into the Office of Infrastructure Protection Information Technology Enterprise.
- Achieve Initial Operational Capability for handheld field data collection tools.
- Complete efforts to build risk and vulnerability assessment tools development for all six critical infrastructure and key resources sectors managed by the Department to support the execution of the National Comparative Risk Assessment.

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
Coordination & Information Sharing  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease:** Coordination & Information Sharing  
**PPA:** Coordination & Information Sharing  
**Program Decrease:** Positions 0.0, FTE -3.0, Dollars \$-7275.0

Funding Profile

Program Decrease							-	(3)	(7,275)
<b>Total Request</b>	<b>83</b>	<b>83</b>	<b>57,862</b>	<b>89</b>	<b>89</b>	<b>50,582</b>	<b>89</b>	<b>86</b>	<b>52,515</b>

*Salaries and Benefits Decreases: (\$0.419 million)*

Description of Item

Reductions were taken from Coordination and Information Sharing salaries and benefits based on a historical trend analysis of filled / vacant positions.

Justification

The reductions are based on the application of the historical IP fill rate of 90%. The breakdown of the reduction is applied across Coordination and Information Sharing projects as follows:

<b>Project</b>	<b>Reduction of FTE</b>	<b>Reduction to Salaries &amp; Benefits</b>
NIPP Management	(1)	(\$137)
CIKR Partnerships	(1)	(\$143)
Management, Planning, and Administration	(1)	(\$139)
<b>Total Coordination &amp; Information Sharing Reductions</b>	<b>(3)</b>	<b>(\$419)</b>

Impact on Performance

There should be minimal impact to performance, as the 90% fill rate is based on historical actuals. Infrastructure Protection will always have vacant positions, and the Federal hiring process is time consuming to backfill attrited staff. While there is a

reduction to funding, there is no reduction proposed to the number of positions for Infrastructure Protection.

***NIPP Management Program Decrease: (\$4.088 million)***

Description of Item:

A decrease of \$4.088 million is proposed in FY 2011 from the FY 2010 enacted for NIPP Management. Homeland Security Act of 2002 Title II, Section 201 and Homeland Security Presidential Directive 7 require the development of the comprehensive national plan for securing the critical infrastructure and key resources of the United States. The NIPP was originally published in June 2006, and then reviewed, revised, and reissued in 2009 after extensive coordination and collaboration among the public and private sector partners. The NIPP and the 18 supporting Sector-Specific Plans (currently being revised and rewritten) serve as the foundation of the Nation's long-term critical infrastructure and key resources risk management program and the basis for virtually all of IP's activities. Successful execution of the NIPP is enabled by strong activities focused on: coordinating and supporting the efforts of all the Sector-Specific Agencies and other partners; increasing voluntary participation through a robust awareness and engagement program; providing comprehensive analysis and measurement based on a formal metrics program; reporting on critical infrastructure protection and resilience progress to Congress, the President, DHS, and other partners; and developing and offering a broad set of education, training, and outreach programs.

The NIPP has evolved considerably since the plan was first developed in 2006. The 2009 NIPP expands partnership at the National and local levels, and the number of engaged partners (both public and private) increases every year. The project's focus has matured to include all hazards, a broadened appreciation of resilience as a risk management strategy, and a shift from activity-based to outcome-based metrics to measure effectiveness; it has also strengthened sector linkages critical to incident management for operational effect during and after an incident.

The project is largely organized in the same fashion as it was since the plan was created, but must continue to adapt to support the needs of the expanding partnership in order to achieve the goals and objectives of the NIPP.

Justification:

This decrease assumes the maturation of the sector partnership and of National Infrastructure Protection Plan related programs to meet the project's mission, goals, and objectives with compensating actions required by Sector-Specific Agencies, coordinating councils, and private sector owners and operators.

Impact on Performance (Relationship of Decrease to Strategic Goals):

As the sectors have matured; they have moved from developing plans and providing qualitative reports on their progress to implementing and executing their Sector-Specific Plans, increased engagement with and training of sector partners, and more quantitative outcome measures that require considerable input from partners. This increased

complexity is overlaid on expansions in the scope of their efforts to cover all hazards. As a result, the NIPP Management Project provides ongoing guidance and assistance in the refinement and revision of the NIPP and its 18 Sector-Specific Plans, and additional support and resources for the Sector Specific Agencies as they move forward to enhance critical infrastructure protection and resilience. As the additional support will not be provided, the expected impacts are:

- NIPP Management Project will no longer provide liaisons and subject matter experts (SMEs) to the Sector-Specific Agencies which are funded by other federal agencies' budgets. These liaisons and SMEs have assisted the Sector-Specific Agencies in carrying out their annual reporting requirements, the development and execution of the Sector-Specific Plans, and other National Infrastructure Protection Plan related tasks. These federal agencies will need to use internal resources, for which they should be funded, to fulfill the roles and responsibilities set out for them in the National Infrastructure Protection Plan. This decrease in support to the sectors that are covered by other federal agencies will allow the NIPP Management Project to continue its comprehensive support to the remaining sectors for which DHS is directly responsible.
- There will be limited capability to provide targeted outreach and awareness support to the Sector Specific Agencies in response to individual sector needs. This includes threat-based products such as the Commercial Facilities Retail Awareness video, as well as other multi-media messaging to include webinars, printed materials, and training courses.
- Reductions in the analytical capabilities of the measurement and reporting activity, due to fewer resources to work with the individual sectors to ensure the proper (and necessary) data for outcome measures is available. Annual reporting will be more qualitative rather than quantitative. The ability to conduct detailed cross-sector analysis of sector and DHS programs will be reduced.
- Reduced rate of expansion of education and training programs, and a reliance on online offerings of existing programs.
- Reduction in the rate of expansion for States and regional consortia that can be actively engaged in awareness, outreach, education, and training programs.

***CIKR Partnerships and Information Sharing Program Decrease: (\$10.021 million)***

Description of Item

The Critical Infrastructure and Key Resources Partnerships and Information Sharing Project builds, sustains, and ensures the effective coordination and operations of the comprehensive network of structures, mechanisms, and processes that engage all critical infrastructure and key resources stakeholders across the Nation. It enables systematic and sustainable communication, coordination, and information exchange among those partners. The resourcing of the partnerships structures and their operations is organized through sector partnership activities and Critical Infrastructure and Key Resources Information Sharing Environment activities.

Collaboration, coordination, and trusted relationships are interdependent with an effective and efficient Critical Infrastructure and Key Resources Information Sharing Environment. Information sharing enables effective coordination and communication within the partnerships, and is a critical enabler for risk management activities that strengthen the security and resilience of the Nation's critical infrastructure and key resources. Implementation and unification of these necessary elements creates an effective and efficient Information Sharing Environment for the critical infrastructure and key resources stakeholders.

#### Justification

An overall decrease in budget of \$10.021 million dollars is proposed for the Partnerships and Information Sharing Project. These partnerships have developed, expanded, and matured over the past four years. IP will continue to leverage existing partnership and information sharing activities to maintain core levels of activity, particularly the private sector components of the sector partnership.

#### Impact on Performance

The Department will sustain current operations of the sector partnership and information sharing processes. Given the importance of the public-private partnership to all DHS and interagency critical infrastructure protection activities, high priority will be given to maintaining, to the greatest degree possible, continued and enhanced engagement and information sharing with private sector partners.

The Office of Infrastructure Protection will continue to support the majority of its partnerships; however, it will reduce support for sector partnership and cross-sector council meeting activities. Alternative, more cost effective, methods for engagement with these partners will be utilized and are being explored. IP will rely on existing relationships to sustain current partnerships, along with limited expansion of partnerships largely through the voluntary efforts under the National Infrastructure Protection Plan framework.

More specifically, support for travel, meetings, and workshops, as well as Secretariat support for State, local, tribal and territorial government, and regional consortium representatives is being reduced, with priority placed on the joint regional consortium meetings between the public and private sector, which will be reduced from eight meetings throughout the year to two meetings. Teleconference meetings will be utilized to the maximum extent possible to continue the hold meetings and workshops.

The Homeland Security Information Network – Critical Sectors (HSIN-CS) system will be maintained at the current level of 12,000 – 15,000 registered users. Deployment of targeted baseline critical infrastructure and key resources information-sharing capabilities to State and major urban area fusion centers will continue to be deployed to another 15 sites, the same level as planned for FY2010.

Operations for The Office of Infrastructure Protection-sponsored Critical Infrastructure Warning Information Network will be terminated. This network is designed to provide

connectivity between key critical infrastructure owners and operators and other critical stakeholders in unlikely event of a major disruption of the Internet and the public switched network, such as a hacking attack, to coordinate and communicate to quickly restore the Internet to support restoration of other critical infrastructures. This network includes leases of dedicated telecommunication circuits off the public switch network, operations, and maintenance of network servers and 150-180 terminals, the data center, and operations and maintenance services. This capability, if determined to be still required, should be integrated into the Department's overall future communication enterprise and strategy.

***Management, Planning, and Administration Program Increase: \$7.253 million***

*Data Center Migration Increase: \$7.300 million*

Description

FY 2011 data center development funding, to be managed through the DHS Working Capital Fund (WCF), will support the management of the system and application migration for Infrastructure Protection systems to the two DHS Enterprise Data Centers. The following IP systems will be supported by the data center migration:

- Infrastructure Information Collection Project: \$4.000 million
- Chemical Security Assessment Tool (CSAT): \$2.300 million
- Bombing Prevention/TripWire: \$1.000 million

These activities will include:

- Discovery, migration planning, and scheduling activities specifically related to systems/applications that will transition to the DHS Data Centers in FY 2010
- Purchase of new equipment for placement in the DHS Data Centers as part of migration/transition efforts
- Installation of equipment racks at the DHS Data Centers
- Migration-related build-out of DHS Data Center infrastructure
- Transition of disaster recovery/backup/COOP (Continuity of Operations) capability to DHS Data Centers
- Installation of infrastructure support as part of system migrations at the DHS Data Centers

Justification

In FY 2011, IP will migrate IICP, CSAT, and TripWire into the two DHS Data Centers. The Data Center consolidation efforts will standardize IT resource acquisitions across DHS Components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency.

Impact on Performance

Data Center consolidation efforts will enhance DHS and NPPD IT security posture, improve information sharing with stakeholders, reduce costs, and increase operational efficiencies over time.

*Program Efficiencies Decrease: (\$0.047 million)*

Description of Item

A decrease of \$0.047 million is proposed in FY 2011 from the FY 2010 enacted for IP Management, Planning and Administration. The decrease will reduce contract support for administrative activities.

Justification

The FY 2011 decrement will be offset through the hiring that has taken place in FY2009 and planned for FY 2010.

Impact on Performance

If the FY 2010 planned hiring is realized, there should not be any significant impacts to performance from this reduction.

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
Mitigation Programs  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease:** Mitigation Programs  
**PPA:** Mitigation Programs  
**Program Decrease:** Positions 5.0, FTE -19.0, Dollars \$-2546.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							506	506	200,972
Program Decrease							5	(19)	(2,546)
<b>Total Request</b>	<b>274</b>	<b>194</b>	<b>147,583</b>	<b>506</b>	<b>469</b>	<b>197,111</b>	<b>511</b>	<b>487</b>	<b>198,426</b>

***Salaries and Benefits Decreases: (\$2.998 million)***

Description of Item

Reductions were taken from Mitigation Programs salaries and benefits based on a historical trend analysis of filled/vacant positions.

Justification

The reductions are based on the application of the historical IP fill rate of 90%. The breakdown of the reduction is applied across Mitigation Programs projects as follows:

<b>Project</b>	<b>Reduction of FTE</b>	<b>Reduction to Salaries &amp; Benefits (thousands)</b>
Infrastructure Coordination & Incident Management	(2)	(\$228)
Infrastructure Security Compliance	(11)	(\$1,479)
Protective Security Advisors	(5)	(\$729)
SSA Management	(4)	(\$437)
Bombing Prevention	(1)	(\$125)
<b>Total Mitigation Program Reductions</b>	<b>(23)</b>	<b>(\$2,998)</b>

Impact on Performance

There should be minimal impact to performance, as the 90% fill rate is based on historical actuals. Infrastructure Protection will always have vacant positions, and the Federal hiring process is time consuming to backfill attrited staff. While there is a

reduction to funding, there is no reduction proposed to the number of positions for Infrastructure Protection.

***Infrastructure Coordination & Incident Management Program Decrease: (\$0.099 million)***

Description of Item:

A decrease of \$0.099 million is proposed in FY 2011 from the FY 2010 Enacted budget for Infrastructure Coordination and Incident Management. This decrease will reduce one table top exercise.

Justification:

Table top exercises are essential to validating incident management plans, train personnel for incident management responsibilities, and evaluate new incident management structures, policies and procedures. Infrastructure Protection plans six exercises every year, three sector-specific agency exercises and three internal IP exercises. The reduction would eliminate one internal IP exercise.

Impact on Performance:

The elimination of the table-top exercise will impact staff knowledge on incident management responsibilities, potentially delaying IP's response times during actual incidents.

***Infrastructure Security Compliance Program Decrease: (\$0.285 million)***

Description of Item:

A decrease of \$0.285 million is proposed in FY 2011 from the FY 2010 Enacted budget for Infrastructure Security Compliance. This decrease to program funding is necessary to maintain the inspector cadre and headquarters staff necessary to carry out the CFATS and Ammonium Nitrate regulatory programs.

Justification:

The funding reduction will be taken out of the planned case management system development funding. The case management system is necessary to catalog, maintain and report chemical facilities compliance with CFATS.

Impact on Performance:

The reduction will delay development of the system requirements definition by one year.

***Protective Security Advisors Program Decrease: (\$0.052 million)***

Description of Item:

A decrease of \$0.052 million is proposed in FY 2011 from the FY 2010 Enacted budget level for Protective Security Advisors. The decrease will reduce contract support that assist the PSAs with administrative activities.

Justification:

The FY 2011 decrement will be offset through the hiring that has taken place in FY2009 and planned for FY 2010.

Impact on Performance:

If the FY 2010 planned hiring is realized, there should not be any significant impacts to performance from this reduction.

***Bombing Prevention Program Decrease: (\$0.047 million)***

Description of Item:

A decrease of \$0.047 million is proposed in FY 2011 from the FY 2010 Enacted budget for Bombing Prevention. This decrease will reduce the number of State and local, and private sector awareness workshops from 40 to 37.

Justification:

State and local, and private sector awareness workshops on Bombing Prevention, IED Awareness / Bomb Threat Management, and IED Search Courses better equip first responders with the tools to necessary to recognize and deal with bombing situations.

Impact on Performance:

The reduction will eliminate 3 workshops. The targeted areas for the workshops will be impacted, and workshops for the areas impacted will become the highest priority in FY 2012.

***SSA Management Increase: \$1.935 million***

Description of Item:

In March 2008, the Secretary of the Department of Homeland Security designated Critical Manufacturing as the 18<sup>th</sup> critical infrastructure and key resources sector. Notice of the Secretary's designation and information about the development of the Critical Manufacturing Sector was published in the Federal Register, April 30, 2008, Volume 73, Number 84, pages 23475-23476. This capability will enable the Department of Homeland Security to effectively execute Sector-Specific Agency responsibilities for the Critical Manufacturing Sector.

Homeland Security Presidential Directive-7 (Sections 15 and 35) and the National Infrastructure Protection Plan establish and define the role of Sector-Specific Agencies, which is to lead and coordinate the unified public-private sector effort to manage and mitigate all-hazards risk to critical infrastructure or key resource sectors. The National Infrastructure Protection Plan and National Response Framework (Critical Infrastructure and Key Resources Support Annex [page 27 and throughout]) levy roughly 140 requirements on Sector-Specific Agencies. The Sector-Specific Agencies play a substantial role across the risk management continuum, including response and incident management.

In addition, the Homeland Security Act of 2002 defines the protection of critical infrastructure and key resources as one of the primary missions of the Department of Homeland Security. The requested capability also supports the “Implementing Recommendations of the 9/11 Commission Act of 2007 (9/11 Act)”, Title X, Section 210E, which requires the Department of Homeland Security, “... to establish and maintain a single classified prioritized list of systems and assets [that would], if destroyed or disrupted, cause national or regional catastrophic effects.” In addition, this requirement supports 9/11 Act Title X, Section 1002: Risk Assessments and Report.

Justification:

This capability will enable the Department to carry out its broad responsibilities as the Sector-Specific Agency for the Critical Manufacturing Sector. As described in the National Infrastructure Protection Plan, the core mission of each Sector-Specific Agency is to lead the unified public-private sector effort to enhance the security of the Nation’s critical infrastructure and key resources.

Sector-Specific Agency responsibilities are extraordinarily broad, and resources are required to support ongoing public-private partnership, multidirectional information sharing, and comprehensive risk management efforts for the Critical Manufacturing Sector. Critical infrastructure protection is a stated Department of Homeland Security priority, and the Sector-Specific Agency is fundamental to supporting meaningful security initiatives that improve infrastructure preparedness, prevention, protection, response and recovery. Currently, there is no dedicated funding to support this capability. This capability will provide \$0.551 million and 4FTE/5 Positions to support the initiatives and programs required to effectively execute the mission of the Critical Manufacturing SSA. This capability will also provide \$1.383 million in program funding. Specifically, the Critical Manufacturing Sector-Specific Agency must, at a minimum, coordinate sector-wide efforts to achieve the following risk management outcomes:

- Set Goals and Objectives:
  - The Sector-Specific Agency collaborates with security partners (Sector Coordinating Councils, Government Coordinating Councils, subject matter experts, etc.) to identify sector-specific security goals that collectively guide the Critical Infrastructure Protection efforts across all levels of government and the private sector.
  - Sector-specific goals align with the National Risk Profile and consider physical, human and cyber infrastructure elements.
  - Each sector presents its mission, security goals, and objectives in its Sector-Specific Plan, which is reviewed yearly, and revised and reissued every three years.
- Identify Assets, Systems and Networks:
  - The Sector-Specific Agency works with sector partners to establish a comprehensive taxonomy of assets, systems, and networks to define the sector “universe.”

- The Sector-Specific Agency focuses on facilitating the collection of data for critical infrastructure vital to the Nation’s security or economy, with significant dependencies, interdependencies, or critical functionality.
- Assess Risk:
  - Risk assessment and analysis enables the identification of critical elements (i.e. assets, systems, networks, etc.), and allows owners and operators to determine risk and consequence levels within their facilities.
  - The Sector-Specific Agency works with sector partners to develop sector-specific risk assessment methodologies and tools.
  - Assessment results help to capture the sector risk landscape, and identify key security gaps, vulnerabilities, dependencies, and interdependencies.
- Prioritize:
  - The 9/11 Commission Act requires the Office of Infrastructure Protection to create annual lists that identify infrastructure capable of generating “national or regional catastrophic effects.”
  - Based on risk assessment and analysis, each Sector-Specific Agency works to determine the assets, systems, and networks that face the highest risk.
- Implement Programs:
  - For prioritization efforts at the National, sector-specific and asset level, sectors identify areas of greatest need, and assess cost and efficacy of options to reduce risk and build resiliency. Where applicable, sectors also consider options to address international issues.
  - Coordinate, facilitate, develop, and/or implement CIKR initiatives to enhance preparedness, prevention, protection, response, and recovery of CIKR.
  - Assess research and development/technology needs, and work to address those needs.
- Measure Effectiveness:
  - Sector members and the Sector-Specific Agencies work together to monitor the progress of initiatives, document performance, and improve protection efforts.
  - Sector Annual Reports contain a list of key Risk Mitigation Activities; those activities that have the greatest potential risk mitigation impact for the sector, as well as associated progress indicators.

Impact on Performance:

The Critical Manufacturing SSA is responsible for coordinating and unifying a wide range of public and private sector interests to further homeland security goals. Participation from the broad range of public and private sector stakeholders expected to join and support the Department in its efforts is purely voluntary, and will not be forthcoming if the Department opts to forgo the minimum resource allocation required to effectively achieve its own stated goals.

The security of the Critical Manufacturing Sector is crucial to the economic prosperity and continuity of the United States. U.S. manufacturers design, produce and distribute products that provide more than one of every eight dollars of the U.S. gross domestic product and employ more than 10 percent of the Nation’s workforce. Because the

Critical Manufacturing Sector was established only recently (2008), security programs and policies are in their nascent stages and the sector is vulnerable. As the other 17 critical infrastructure and key resource sectors continue to move forward with their programs to mitigate risk and bolster resilience, the Critical Manufacturing Sector's ability to get up-to-speed with the other 17 sectors will be severely constrained without designated and increased funding.

With funding, this sector will rapidly ascend to a security posture on par with that of other sectors by utilizing methods and programs in use in other sectors that will have benefit with modification to this sector. This sector will then be able to meet the unique security challenges of critical manufacturing by designing programs tailored to Critical Manufacturing. The Critical Manufacturing Sector is at least four years behind the other 17 sectors in the development and implementation of needed assessment tools and mitigation initiatives; this capability will allow the sector to close that gap.

#### FY2011 Critical Manufacturing SSA Milestones

- Acquire full-time personnel and work with sector partners to set security goals, identify critical assets, systems, networks, and functions; assess sector risk against all hazards; prioritize security requirements; and begin to implement security programs.
- Produce a Critical Manufacturing Sector publication series (including pamphlets, brochures, articles, and newsletters) to educate, promote information sharing, and foster collaborative communications processes among Critical Manufacturing Sector partners.
- Revise and update the Critical Manufacturing Sector-Specific Plan to ensure continued alignment with the sector risk landscape and priorities.
- Identify and mitigate two previously identified security gaps in Detroit through facilitated exercises that test the efficacy of identified plans, protocols, and procedures, and reduce recovery time for Critical Manufacturing Sector functions following an incident.
- Attend a minimum of ten outreach events — including meetings with associations, attending conferences and training events — to increase awareness of the Critical Manufacturing Sector-Specific Agency's and to broaden the membership of the SCC.

#### ***Philadelphia Infrastructure Monitoring Program Decrease: (\$1.000 million)***

##### Description of Item

The Philadelphia Infrastructure Monitoring project funding was to purchase cameras for the city of Philadelphia. The cameras are to be placed around critical infrastructure and key resources to enhance the monitoring and protection of these sites.

##### Justification:

DHS is not requesting any funding for this activity in FY 2011.

##### Impact on Performance:

The cameras purchased with the FY 2008, FY 2009, and FY 2010 funding will continue to be operational into FY 2011.

<b>Total Request</b>	-	-	-	<b>207</b>	<b>144</b>	<b>323,629</b>	<b>288</b>	<b>263</b>	<b>314,989</b>

***Incident Handling Decrease: (\$0.075 million)***

Description of Item:

Program efficiencies have been gained under the US-CERT programs as a result of newly instituted FY 2009 Cybersecurity and Communications (CS&C) quarterly review efforts. As an outcome of these efforts, the US-CERT program has streamlined projected FY 2011 activities which will increase their overall operational efficiency.

Justification:

The US-CERT quarterly reviews are collaboratively managed by the CS&C Office of the Assistant Secretary and intended to instill fiscal accountability and track cost, schedule and performance activities.

Impact on Performance:

There is no impact to performance.

***Analysis Decrease: (\$0.012 million)***

Description of Item:

Program efficiencies have been gained under the US-CERT programs as a result of newly instituted FY 2009 Cybersecurity and Communications (CS&C) quarterly review efforts. As an outcome of these efforts, the US-CERT program has streamlined projected FY 2011 activities which will increase their overall operational efficiency.

Justification:

The US-CERT quarterly reviews are collaboratively managed by the CS&C Office of the Assistant Secretary and intended to instill fiscal accountability and track cost, schedule and performance activities.

Impact on Performance:

There is no impact to performance.

***Strategic Operations Decrease: (\$0.216 million)***

Description of Item:

Program efficiencies have been gained under the US-CERT programs as a result of newly instituted FY 2009 Cybersecurity and Communications (CS&C) quarterly review efforts. As an outcome of these efforts, the US-CERT program has streamlined projected FY 2011 activities which will increase their overall operational efficiency.

Justification:

The US-CERT quarterly reviews are collaboratively managed by the CS&C Office of the Assistant Secretary and intended to instill fiscal accountability and track cost, schedule and performance activities.

Impact on Performance:

There is no impact to performance.

***Situational Awareness Decrease: (\$13.282 million)***

Description of Item and Justification:

US-CERT leads the development and performance operation of cybersecurity technologies to counter on-going, real-world national cyber threats and apply effective risk mitigation strategies to detect and deter these threats in support of National Security Presidential Directive-54/Homeland Security Presidential Directive-23.

US-CERT is responsible for the design, development, acquisition, deployment, operations, and maintenance support required for the Department's segment of role in the Comprehensive National Cyber Security Initiative. It executes this responsibility through the National Cybersecurity Protection System, or EINSTEIN, which is an integrated intrusion detection system that encompasses the hardware, software, and other components being procured specifically to support this mission.

The National Cybersecurity Protection Systems helps protect Federal civilian government information technology enterprises through the analysis of network flow and intrusion detection information from Federal partners. It provides a high-level perspective from which analysts can observe potential malicious activity in Federal partners' computer network traffic by providing capabilities that support automated processes to collect, correlate, analyze, and share cybersecurity information across Federal government

computer networks. In turn, this will provide the United States Computer Emergency Readiness Team with increased situational awareness.

US-CERT is responsible for the EINSTEIN platforms through development, acquisition, deployment, operation, and maintenance of the EINSTEIN intrusion detection system, which currently includes: flow collection and intrusion detection at agency sites; centralized data storage; aggregation, correlation, and visualization of intrusion detection flow information; contextual data feeds; information sharing with departments/agencies and other partners; Continuity of Operations for United States Computer Emergency Readiness Team analysts; and a prototype environment for testing and validating signatures and analytics prior to deployment across the .gov domain.

US-CERT operates, maintains, and updates the EINSTEIN intrusion detection system, and with appropriate resources, will upgrade future versions of EINSTEIN to provide intrusion prevention capabilities.

Impact on Performance:

The funding decrement will slow down the EINSTEIN deployment originally scheduled for FY 2011. Given the software, hardware, and schedule uncertainties of planned deployments, DHS will work to finalize and better understand its cost requirements. However, DHS will continue to deploy EINSTEIN 3 in 2011 at a reduced rate.

***Situational Awareness Increase: \$9.528 million***

Description of Item and Justification:

The Assessment, Testing, and Analysis Capability function will allow US-CERT to fulfill their mission to objectively measure the effectiveness of Federal cybersecurity programs, systems and infrastructure and establish and maintain a holistic view of the Federal government's current security state. This function provides comprehensive risk analysis, vulnerability and threat assessment and penetration testing capabilities. The output will also be used to develop and evolve future required cybersecurity capabilities and practices and will be vital for the situational awareness of both the National Cyber Security Division and other stakeholders, such as the Office of Management and Budget.

Beginning in FY 2011, US-CERT will conduct Assessment, Testing, and Analysis Capability assessments of .gov departments' and agencies'<sup>2</sup> operational<sup>3</sup> networks and systems.

Assessment teams will operate both independently (red teaming), and collaboratively (blue teaming), to conduct assessments of the target department/agency. The assessors will test multiple levels of the target department's/agency's networks and systems to measure compliance and assess the effectiveness of its security controls.

---

<sup>2</sup> Refer to Appendix C of OMB Circular A-11 for a listing of Federal departments and agencies. Please note the Department of Defense and the Judicial and Legislative branches of government will be excluded.

<sup>3</sup> Research and development networks, pre-production systems, etc. will be considered "out of scope."

Assessments will be divided into two categories:

- Advanced Assessments will utilize vulnerability assessments and threat assessments coupled with penetration testing to produce a comprehensive risk analysis report.
- Basic Assessments will be less intense than advanced assessments that will incorporate vulnerability assessments and penetration testing.

In order to ensure the most comprehensive results, the latest commercial-off-the-shelf, government-off-the-shelf, and open source software tools will be used to conduct assessments.

At the completion of an evaluation, a detailed Assessment, Testing, and Analysis Capability Report describing the context and boundaries of the assessment, intended outcomes, findings and recommendations will be prepared. It will be made available to the assessed department/agency, as well as to those parties required by law, regulation, or policy, e.g. Office of Management and Budget. The assessed department/agency will also receive an in-person debriefing to discuss the findings and recommendations.

US-CERT will utilize aggregate Assessment, Testing, and Analysis Capability Reports and accompanying data to appraise the overall compliance state of the Federal civilian government in order to identify potential implementation issues, impediments, and capability gaps with regard to cybersecurity policy directives and mandates.

Specific FY 2011 mission improvements include: 11 positions / 6 FTE and associated salaries and benefits, contractor service and support teams, travel, and software and equipment and 27 assessments conducted.

Impact on Performance:

At current funding levels, US-CERT will be constrained in their ability to produce a more effective Assessment, Testing, and Analysis Capability function. Insight into the overall security posture of the Federal civilian government is needed by multiple stakeholders both within and outside of the Department of Homeland Security. Without this function, there will be a detrimental impact to the situational awareness of policy- and decision-makers across the .gov domain.

US-CERT mitigates and resolves strategic threats and vulnerabilities associated with the Federal government's cyber infrastructure, including that of the Federal government. These threats and vulnerabilities range from simple hacker activities and actions to those of other agents that are well-funded, knowledgeable, and capable of threatening the Nation's security. Moreover, technology has improved so that threats occur at velocities that outpace existing security investments.

US-CERT is however, on schedule in the effort of evaluating outsourced vulnerability assessment options to include proven programs within the Carnegie Mellon University Software Engineering Institute that can be leveraged through modifications to existing

contracts. The function would be managed by US-CERT staff and each assessment team would have a Federal team lead on-site.

***Production Increase: \$0.041 million***

Description of Item and Justification:

This minor program increase is the result of projected contract rate increases in this program.

Impact on Performance:

This has no significant impact on performance. The minor increase sustains activities at FY 2010 levels.

***Cybersecurity Coordination Increase: \$5.000 million***

Description of Item:

The additional funding requested will partially fund 26 positions in the following areas: NCSC oversight and management (2); situational awareness/integrated incident management (7); mission integration (8); analysis and reporting (5); collaboration and strategic partnerships (2); and technology/knowledge management (2).

Justification:

With the additional funding the NCSC plans the following accomplishments:

- Deploy the knowledge management system on the Joint Worldwide Intelligence Communications System (JWICS) Intelpedia (TS/SCI) and Homeland Security Information Network (HSIN) unclassified network. Complete all credentialing. Complete MOA with JWICs PMO (Project Management Office) to host DHS knowledge management system on JWICs. Implement the process for one-way transfer of data from unclassified to secret to TS/SCI until a cross domain solution is built. Continue to train users, and manage content.
- Deploy mission integration officers to each center to ensure delivery of information and intelligence needs/gaps identified under the partnership agreements.
- Staff a NCSC watch desk 24/7/365. Produce an initial integrated incident daily report and identify cyber incidents for national level reporting.
- Initiate a cross center collaborative Integrated Project Team (IPT) with representatives from all the centers and Office of the Director of National Intelligence (ODNI) to build an integrated incident management system. Integrated incident management system will identify as-is and to-be process structures to enable IT investment activities for situational awareness. Deliverables will include alignment of processes, creation of thresholds, common data standards, and a framework for a national incident database. Once the work of the IPT is complete, translate the team efforts into a process design and requirements definition for the integrated incident management system.

- Design and implement a program for cyber analysis process; defined as monitoring, measuring, analyzing and reporting on national cyber incidents of concern. Process design will include flow charts, process templates and detailed instructions to facilitate robust analytical functions. The process analysis will benchmark other federal investigative processes utilizing a model of assembling a team of experts, determining investigation scope (public/private, federal/private sector) conducting the investigation, and producing a final statement with recommendations/countermeasures for improvement.
- Assume responsibility of the day to day operation and maintenance of the information technology (IT) architecture used for collaboration amongst the participating centers.

Impact to Performance:

With the requisite increase requested, the NCSC will be able to deliver on the following key mission areas –

- *Oversight and Management* oversees all contracts, and provide acquisition planning advice, and ensure all contracts are closed out without any unobligated balances. Provides front office staff member to be communications/task management officer to ensure all actions are tracked and completed on time. These two positions improve the effectiveness and efficiency of the office.
- *Situational Awareness* provides the NCSC and the federal government with an integrated incident watch function, provides the team who will produce the daily integrated report and provides the nation with the capability to respond to a national cyber incident. This additional funding will provide a fully staffed 24/7/365 watch function, and provide the Secretary the Principal Federal Official for Cyber for a national level incident.
- *Mission Integration* fully funds the mission integration officers who are charged with ensuring the centers receive the information and intelligence identified in the partnership agreements. Additional funding will provide the team and the personnel to work on the business process changes to support common processes, standards, and lexicon. These additional resources will ensure that the 6 centers work in a coordinated, integrated effort, eliminate duplication and improve overall cyber incident response.
- *Analysis and Reporting* provides improved incident analytical functions on a national strategic level, provides the strong analytical team who will build and execute the processes for trend analysis, pattern identification, forecasting, and predictive analysis. The strong analytical team will also be charged with driving the knowledge management system so that event correlation can occur among disparate cyber incidents at the state, local and national level and to correlate incident activity against physical incidents and national level operations. This team will be responsible for producing the weekly and annual report and also to conduct deep dive investigative analysis on system wide incidents using the model described in item F below.
- *Collaboration and Strategic Partnerships* funding will ensure that the collaboration and strategic partnership agreements are completed in FY 2011.

These additional resources will provide the personnel who will track the metrics associated with the partnership agreements, manage the NCSC coordination council monthly meetings and off-sites, and will manage the contract to provide facilitated collaboration sessions.

- *Technology/Knowledge Management* resources will provide the program manager and Contracting Officer Technical Representative (COTR) for the integrated incident management system and the national cyber incident database. With the dedicated COTR, this staff member will drive the execution and implementation of this critical national level system for situational awareness. With the resources to hire a knowledge management training and operations manager, the system will have a dedicated person who manages the user interface. The user interface on each page of the system will have a content comment query, so that users, who don't find the information useful, can't find information they need, or need more information, can comment and expect a response. This staff member will also be charged with analyzing and determining how user feedback will be incorporated into improving the system, and managing on-line training aids. This is a critical staff function so that the system meets user needs.

With the increase in program dollars, the NCSC will be able to accomplish deployment of the knowledge management system on TS/SCI and Unclassified networks to include certification and accreditation and purchase of hardware. Development and analysis of the as-is and to-be process modeling and business analysis to support an integrated incident management system and a national cyber incident database.

Moreover, with the funds for both personnel and program dollars, the NCSC will be able to deliver the following outcomes:

- Deploy the knowledge management system on JWICs Intelpedia and HSIN. Complete all credentialing. Complete MOA with JWICs Project Management Officer (PMO) to host DHS knowledge management system on JWICs. Implement the process for one-way transfer of data from unclassified to secret to TS/SCI until a cross domain solution is built. Continue to train users, and manage content.  
*Outcome:* Cybersecurity information will be shared more broadly, beyond the secret level. More users will have access to cybersecurity information across all 6 centers and customer sets at all three classification levels. Users will have immediate access to information concerning threats, vulnerabilities, incidents, alerts, notification and analysis.
- Lead efforts to host a national cyber incident database on the knowledge management system. Deploy the national cyber incident database.  
*Outcome:* Will provide the nation with a national level cyber incident database with a compendium of incident data across all spectrums, - federal, state, local, private sector. Analysts will have easy access to a compendium of incident data to correlate trends, conduct forecasting and

do predictive analysis – where today no system exists with incident data across a broad spectrum.

- Staff a 24/7/365 integrated situational awareness capability. Produce a daily incident report.  
*Outcome:* An integrated incident watch capability for the nation will be sustained, integrating incident data, infrastructure data and operational data. The watch desk will track and monitor incident data and determine when alerts need to be issued and when an incident reaches a critical level for national level response. The center will have the ability to produce a daily integrated report which will form the basis for trend analysis and national level reporting.
- Complete the process design, and requirements definition for the integrated incident management system.  
*Outcome:* This analysis will support the future development of a business case for a national level situational awareness capability and provide the requirements definition to design an IT solution that supports detection, analysis, alert and notification, response/remediation for multi-organizational incidents.
- Design and implement a program plan for cyber analysis process; defined as monitoring, measuring, analyzing and reporting on cyber incidents of concern. Process design will include flow charts, process templates and detailed instructions to facilitate robust analytical functions. The process analysis will benchmark other federal investigative processes utilizing a model of assembling a team of experts, determining investigation scope (public/private, federal/private sector) conducting the investigation, and producing a final statement with recommendations/countermeasures for improvement.  
*Outcome:* NCSC will be able to provide a robust analytical function that will include the staffing, process and methodology for high-end analytics. The process methodology will identify key data elements (reports) needed to conduct correlation, forecasting, predictive, and trending analysis. Moreover this analysis will describe the key NCSC reports – their purpose, periodicity and intended audience. Critical to this function is the ability to ingest unstructured reports and data (demonstrated through the NIEM and IODEF pilot), and the establishment of the national cyber incident database.

**Department of Homeland Security  
National Protection & Programs Directorate

***Critical Infrastructure Protection-Cyber Security Decrease: (\$3.735 million)***

Description of Item:

Program efficiencies have been gained under the Strategic Initiatives programs as a result of newly instituted FY 2009 Cybersecurity and Communications (CS&C) quarterly review efforts. As an outcome of these efforts, the Critical Infrastructure Protection program has streamlined projected FY 2011 activities which will increase their overall operational efficiency.

Additionally, the FY 2010 Research Triangle Institute project (\$3.500) million is discontinued in order to fund mission critical requirements.

Justification:

The US-CERT quarterly reviews are collaboratively managed by the CS&C Office of the Assistant Secretary and intended to instill fiscal accountability and track cost, schedule and performance activities.

Impact on Performance:

This has no significant impact on performance.

***Training and Education Decrease: (\$4.482 million)***

Description of Item:

Program efficiencies have been gained under the Strategic Initiatives programs as a result of newly instituted FY 2009 Cybersecurity and Communications (CS&C) quarterly review efforts. As an outcome of these efforts, the Training and Education program has

streamlined projected FY 2011 activities which will increase their overall operational efficiency.

Additionally, the FY 2010 Upstate New York Cyber Initiative earmark (\$0.100 million), the FY 2010 Virginia's Operational Integration Cyber Center of Excellence earmark (\$0.500 million), and the FY 2010 University of Texas-San Antonio earmark (\$3.500 million) will be discontinued in order to fund mission critical requirements.

Justification:

The Strategic Initiatives quarterly reviews are collaboratively managed by the CS&C Office of the Assistant Secretary and intended to instill fiscal accountability and track cost, schedule and performance activities.

Impact on Performance:

This has no significant impact on performance.

***Software Assurance Decrease: (\$0.126 million)***

Description of Item:

Program efficiencies have been gained under the Strategic Initiatives programs as a result of newly instituted FY 2009 Cybersecurity and Communications (CS&C) quarterly review efforts. As an outcome of these efforts, the Software Assurance program has streamlined projected FY 2011 activities which will increase their overall operational efficiency.

Justification:

The Strategic Initiatives quarterly reviews are collaboratively managed by the CS&C Office of the Assistant Secretary and intended to instill fiscal accountability and track cost, schedule and performance activities.

Impact on Performance:

This has no significant impact on performance.

***Cyber Exercises Increase: \$3.283 million***

Description of Item:

This increase is funded from the redistribution of NCSD FY 2010 base funds to increase cyber exercises.

Justification:

Cyber Exercises activities promote information-sharing and coordination across the Federal Government, State, local and private sector. The increased testing and validation of cyber-related plans and procedures will both detect infrastructure vulnerabilities and ensure that the public health and safety, and national economic viability are protected.

Impact on Performance:

This will enable the program to enhance the number of cyber exercises supported and conducted with Cybersecurity stakeholders and the technical assistance and training sessions conducted.

***Standards and Best Practices Decrease: (\$3.132 million)***

Description of Item:

Program efficiencies have been gained under the Strategic Initiatives programs as a result of newly instituted FY 2009 Cybersecurity and Communications (CS&C) quarterly review efforts. As an outcome of these efforts, Standards and Best Practices program has streamlined projected FY 2011 activities which will increase their overall operational efficiency.

Additionally, the FY 2010 Multi-State Information Sharing and Analysis Center (\$3.000 million) earmark will be discontinued in order to fund other NCSA mission critical requirements.

Justification:

The Strategic Initiatives quarterly reviews are collaboratively managed by the CS&C Office of the Assistant Secretary and intended to instill fiscal accountability and track cost, schedule and performance activities.

Impact of Performance:

This has no significant impact on performance.

***Control Systems Increase: \$0.700 million***

Description of Item and Justification:

This increase of \$0.700 million is to fund the continuation of high priority Control Systems activities at the same levels achieved FY 2010.

Additionally, the FY 2010 Idaho National Laboratory earmark (\$3.000 million) funding will be applied to fund Control Systems mission critical requirements.

Impact on Performance:

This will enable the program to meet mission critical activities including support for site assistance visits to identify vulnerabilities and mitigation strategies.

**Department of Homeland Security

Program Decrease							-	-	(2,500)
<b>Total Request</b>	-	-	-	<b>16</b>	<b>14</b>	<b>9,346</b>	<b>16</b>	<b>14</b>	<b>6,875</b>

***Stakeholder Outreach, Communications, and Coordination Decrease: (\$0.252 million)***

Description of Item:

Program efficiencies have been gained under Outreach and Programs as a result of newly instituted FY 2009 Cybersecurity and Communications (CS&C) quarterly review efforts. As an outcome of these efforts, Stakeholder Outreach, Communications, and Coordination has streamlined projected FY 2011 activities which will increase their overall operational efficiency.

Justification:

The Outreach and Programs quarterly reviews are collaboratively managed by the CS&C Office of the Assistant Secretary and intended to instill fiscal accountability and track cost, schedule and performance activities.

Impact on Performance:

This has no significant impact on performance.

***International Affairs and Public Policy Increase: \$0.003 million***

Description of Item and Justification:

This minor program increase is the result of projected contract rate increases in this program.

Impact on Performance:

This has no significant impact on performance. The minor increase sustains activities at FY 2010 levels.

***Planning and Program Decreases: (\$0.001 million)***

Description of Item:

Program efficiencies have been gained under Outreach and Programs as a result of newly instituted FY 2009 Cybersecurity and Communications (CS&C) quarterly review efforts. As an outcome of these efforts, Planning and Programs has streamlined projected FY 2011 activities which will increase their overall operational efficiency.

Justification:

The Outreach and Programs quarterly reviews are collaboratively managed by the CS&C Office of the Assistant Secretary and intended to instill fiscal accountability and track cost, schedule and performance activities.

Impact on Performance:

This has no significant impact on performance.

***Information Sharing and Collaboration Decrease: (\$2.250 million)***

Description of Item and Justification:

The Information Sharing and Collaboration project will not be funded in FY 2011 and going forward due to other, higher priority National Cyber Security Division responsibilities.

Impact on Performance:

This will not jeopardize the program mission or objectives, and the Information Sharing and Collaboration project will meet the agreed upon goals with the funding provided to date.

**Department of Homeland Security  
National Protection & Programs Directorate  
Infrastructure Protection and Information Security  
Office of Emergency Communications  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease:** Office of Emergency Communications  
PPA: Office of Emergency Communications  
Program Decrease: Positions 0.0, FTE 0.0, Dollars \$-686.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							58	58	45,210
Program Decrease							-	-	(686)
<b>Total Request</b>	<b>47</b>	<b>27</b>	<b>35,487</b>	<b>52</b>	<b>52</b>	<b>45,060</b>	<b>58</b>	<b>58</b>	<b>44,524</b>

***SEARCH Decrease: (\$1.000 million)***

Description of Item:

Through a grant to SEARCH of Sacramento, California, interoperable communications, training, certification, technical assistance, and outreach programs to State, regional, and local first responder communications coordinators was provided.

Justification:

The SEARCH grant was a one-time, non-recurring grant funding initiative managed by the Office of Emergency Communications' Multi-Jurisdictional Communications Services Division.

Impact on Performance:

The results of this initiative will be integrated into ongoing OEC programs.

***Policy, Planning, and Analysis Decrease: (\$0.120 million)***

Description of Item:

OEC hosts a national conference on Emergency Communications, which serves as a mechanism to bring together over 400 Federal, State, local, and tribal practitioners to discuss the current state of Emergency Communications, identify challenges, and collaborate on solutions.

Justification:

OEC will not host a national conference on Emergency Communications in FY 2011. While this will delay the opportunity for a large-scale assembly of national Emergency

Communications practitioners to collaborate, eliminating the FY 2011 conference will enable OEC to preserve other key means of promoting national Emergency Communications interoperability, as well as practitioner collaboration at the Federal, State, local, and tribal levels through targeted workshops, trainings, and direct technical assistance.

Impact on Performance:

The Office of Emergency Communications is evaluating the frequency upon which to conduct this conference in the future. OEC will continue to provide technical assistance and training workshops.

***Multi-Jurisdictional Communications Services Decrease: (\$0.566 million)***

Description of Item:

OEC publishes guidance documents on best practices, lessons learned, and how-to guides in order to provide support to emergency responders, localities, States, and tribal nations as they build communication capabilities. By producing these guidance documents, OEC is able to further expand its reach in assisting State, local, and tribal emergency responders in improving their Emergency Communications capabilities. OEC provides financial assistance to organizations that further activities central to the Department's strategic objectives, such as national interoperable communications and public safety.

Justification:

The elimination of this funding for FY 2011 will not jeopardize OEC's mission or objectives and will allow for continued funding for higher priority Emergency Communications initiatives.

Impact on Performance:

The number of guidance documents OEC can produce will be reduced and OEC will provide limited financial assistance during FY 2011 to organizations that support national interoperable communications and public safety initiatives. Deferring funding for these two efforts will preserve other mission-critical OEC programs that directly support high-profile OEC activities, including implementing the National Emergency Communications Plan (NECP) and assisting States and territories in implementing Statewide Communication Interoperability Plans (SCIPs) in alignment with the National Emergency Communications Plan.

***Federal Communications Services Public Safety Broadband Interoperability Increase: \$1.000 million***

Description of Item:

The Office of Emergency Communications will use the funds to support the development of public safety broadband and the Emergency Response Interoperability Center (ERIC). Specifically, the Office of Emergency Communications will conduct key analysis and coordination activities crucial to the effective management, deployment, and long-term operations of public broadband services and ERIC.

Justification:

The advent and rapid adoption of wireless broadband technologies will play an important role in improving public safety communications interoperability and mission effectiveness. Broadband-enabled applications can facilitate greater situational awareness, faster decision making, and more rapid emergency response coordination. Therefore, the advancement of a public safety broadband services will improve the ability of emergency responders to establish seamless interoperable communications. To this end, ERIC will establish a public safety interoperability communications profile including interoperability standards, authentication, encryption, roaming, priority access, application uses and interconnectivity which will be used to set baseline requirements for public safety users.

The Office of Emergency Communications is working closely with the FCC on this initiative. In order to successfully operate and maintain these initiatives, significant analysis and coordination must be done prior to deployment. The Office of Emergency Communications has determined that the following activities should be completed in FY11:

- Requirements analysis to ensure the network meets user technical and operational needs.
- ERIC roles and responsibilities analysis.
- Key policy issue analysis (e.g., non-discriminatory access, security, standards)

Impact on Performance:

The funding for the Public Safety Broadband Interoperability Program increases DHS' ability to strengthen response and recovery by effectively leveraging advanced communications technology to significantly enhance the ability of emergency responders to communicate. Further, the Office of Emergency Communications would provide critical planning, analysis, and coordination, thereby ensuring the successful deployment of public safety broadband services and ERIC. This important initiative will help to remedy historic barriers to public safety communications interoperability by establishing standards before the widespread adoption of new technologies, and is a key element of next-generation public safety communications capabilities.

**Department of Homeland Security

***National Coordinating Center 24x7 Watch and Title Globe Decrease: (\$3.576 million)***

Description of Item:

This program decrease of \$3.576 million supports higher priorities with the National Communications System

Justification:

The reduction in the Next Generation Networks Priority Services program is justified by greater funding needs in high priority programs elsewhere in the National Communications System. This requested program change reprioritizes base funds from Next Generation Network to Critical Infrastructure Protection within the National Communications System, to expand the National Coordinating Center operating capacity to allow for 365x24x7 operations, and allow for Title Globe to conduct monthly continuity testing of Departments and Agencies networks.

Impact on Performance:

The FY 2011 reduction to the Next Generation Network Priority Services program will require milestone adjustments to the program schedule, allowing for greater input from the communications vendors.

***Program Efficiencies Decrease: (\$0.329 million)***

Description of Item:

Program efficiencies have been gained under the Next Generation Network (NGN) program as a result of newly instituted FY 2009 Cybersecurity and Communications (CS&C) quarterly review efforts. As a result of these efforts, the NGN program has

streamlined projected FY 2011 activities which will increase their overall efficiency. Savings to the NGN program are therefore estimated to be \$0.329 million.

Justification:

The NCS/NGN quarterly reviews are collaboratively managed by the CS&C Office of the Assistant Secretary and intended to instill fiscal accountability and track cost, schedule and performance activities.

Impact on Performance:

Not applicable.

Description of Item:

Program efficiencies have been gained under the Programs to Study and Enhance Telecommunications (PSET) programs as a result of newly instituted FY 2009 Cybersecurity and Communications (CS&C) quarterly review efforts. As an outcome of these efforts, the PTS program has streamlined projected FY 2011 activities which will increase their overall operational efficiency of the Modeling, Analysis and Technology Assessment, National Security/Emergency Preparedness Standards Team and Advance Technology programs. Savings to the PSET programs are estimated to be \$0.172 million.

Justification:

The NCS/NGN quarterly reviews are collaboratively managed by the CS&C Office of the Assistant Secretary and intended to instill fiscal accountability and track cost, schedule and performance activities.

Impact on Performance:

***National Coordinating Center 24x7 Watch Increase: \$2.231 million***

Description of Item:

National Coordinating Center Watch personnel stand watch for the National Protection and Programs Directorate (NPPD) and the communications sector, serving as the first line of defense in enhancing the Federal government’s ability to rapidly identify, monitor and respond to emerging telecommunications events. As the operational arm of NPPD’s National Communications System, the NCC Watch provides 365x24x7 staffed operations to maintain situational awareness on the health of the Nation’s telecommunications infrastructure. In this role, the NCC Watch provides time sensitive alerts, warnings, and in-depth analyses on national security/emergency preparedness issues impacting United States Government departments and agencies as well as their industry partners. Moreover, the NCC Watch is the integration point for other Information Sharing and Analysis Centers (ISACs) and government coordination centers. As such, the NCC Watch requires both experienced and operationally trained staff to handle no-notice as well as notice events around the clock.

Justification:

The realignment of FY 2010 enacted base funds to National Coordinating Center 24x7 Watch programs from Next Generation Networks supports CS&C priorities.

Impact on Performance:

Without these critical funds, the NCC Watch will not be able to staff or support 365x24x7 mission operations. The NCC Watch mission fulfills the National Continuity Policy mandates under Homeland Security Presidential Directive (HSPD)–20.

***CIP Operations, Planning and Policy/Title Globe Increase: \$1.345 million***

Description of Item:

Title Globe is a classified program that provides for monthly continuity testing of United States Government telecommunication networks as specified by the Office of Science and Technology Policy in support of Homeland Security Presidential Directive – 20.

Justification:

The transfer of program funds to Title Globe programs from Next Generation Networks supports CS&C priorities.

Impact on Performance:

The Title Globe mission fulfills the National Continuity Policy mandates under Homeland Security Presidential Directive (HSPD)–20.

***Program Efficiencies Decrease: (\$0.101 million)***

Description of Item:

Program efficiencies have been gained under Critical Infrastructure Protection (CIP) programs as a result of newly instituted FY 2009 Cybersecurity and Communications (CS&C) quarterly review efforts.

As a result of these efforts, CIP programs including NCC Operations, Operations Plans and Policy, Training and Exercises have streamlined their projected FY 2011 activities and plans for increased efficiencies, resulting in a savings of 0.101 million.

Justification:

The NCS/CIP quarterly reviews are collaboratively managed by the CS&C Office of the Assistant Secretary and intended to instill fiscal accountability and track cost, schedule and performance activities.

Impact on Performance:

Not applicable.

### PPA Mission Statement

The Information and Analysis mission area includes projects and activities that support identification of the Nation's critical infrastructure and key resources, assessment of critical infrastructure and key resource vulnerabilities, consequences and risks.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	8,348	12,483	12,446	(37)

The FY 2011 Request includes \$16,453,000 for salaries and benefits for 127 FTE, which represents a decrease of \$50,000 from FY 2010. The change includes an increase of \$229,000 for pay inflation, a program decrease of 5 FTE totaling \$700,000 based on historical fill rates, and a program enhancement of 4 FTP/2 FTE for \$421,000.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.5 Other personnel compensation	167	250	249	(1)

See note in 11.1

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
12.1 Civilian personnel benefits	2,521	3,770	3,758	(12)

See note in 11.1

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
21.0 Travel and transportation of persons	420	832	832	-

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2011 Request represents no change from FY 2010.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
24.0 Printing and reproduction	-	8	8	-

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2011 Request represents no change from FY 2010.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.1 Advisory and assistance services	18,727	16,712	12,989	(3,723)

Advisory and assistance services include services acquired by contract from non-Federal sources as well as from other units within the Federal Government. The FY 2011 Request includes a program decrease of \$3,723,000 from FY 2010. This change includes a decrease of \$3,697,000 to Vulnerability Assessments, a decrease of \$163,000 to Infrastructure Sector Analysis, a decrease of \$1,013,000 to Infrastructure Visualization, a decrease of \$17,000 to Infrastructure Data Management, and an increase of \$1,167,000 to the Infrastructure Information Collection Program for IT Enterprise Modernization.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	5,288	19,416	19,416	-

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2011 Request represents no change from FY 2010.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.3 Purchases of goods & svcs. from Gov't accounts	40,773	36,784	32,784	(4,000)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2011 Request includes a program decrease of \$4,000,000 from FY 2010 for the National Infrastructure Simulation and Analysis Center project.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.7 Operation and maintenance of equipment	2,939	-	-	-

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
26.0 Supplies and materials	49	355	355	-

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2011 Request represents no change from FY 2010.

## Section 1: Overview

NPPD is submitting a budget addendum to the FY 2011 IPIS budget request for several budget structural changes for consideration by Congress. Changes to the IPIS budget structure would:

1. Recognize significant mission expansion or mission changes since previous budget structures were established;
2. Align the budget with organizational structures;
3. Increase transparency and accountability for execution and mission performance; and
4. Streamline NPPD financial execution and reporting.

It is important to note that these requested budget structure changes do not in any way cause changes to the FY 2011 Congressional Justification plans and milestones or program changes. Rather, it is a request to more accurately present both the budget request and execution in the future.

The proposed changes to IPIS structure include:

1. Cybersecurity & Communications (CS&C): Establish a PPA for the Assistant Secretary, CS&C. Funding/ staff were previously budgeted and funded out of the multiple CS&C PPAs.
2. CS&C: Realign National Communications System personnel across the NCS PPAs to align with the projects supported.
3. CS&C: Updating the National Cyber Security Division PPA structure to more accurately reflect the mission expansion and execution under HSPD-23.
4. National Cyber Security Center: Break out Cyber Coordination as a separate PPA under the IPIS appropriation.

The tables below reflect the FY 2011 IPIS request in the Congressionally approved PPA structure, as well as the FY 2011 IPIS request with the changes outlined in the budget addendum. The specific drivers and details for the requested changes are outlined in greater detail in the text below.

## Section 2: Cybersecurity and Communications

### *Section 2.1: Office of the Assistant Secretary for Cybersecurity and Communications*

#### **PURPOSE:**

The purpose of this Budget Addendum is to describe Cybersecurity and Communications (CS&C) restatement of resources to establish a separate Program, Project, Activity for the Assistant Secretary, CS&C.

Cybersecurity & Communications (\$000)	FY 2011 Request			Transfers			FY 2011 Addendum		
	FTE	FTP	\$	FTE	FTP	\$	FTE	FTP	\$
<b>Assistant Secretary</b>				26	26	5,679	<b>26</b>	<b>26</b>	<b>5,679</b>

#### **DESCRIPTION:**

The Office of the Assistant Secretary for Cybersecurity and Communications (CS&C) requests a restatement of \$5.679 million and 26 FTP/FTE from the CS&C Divisions / PPAs to reflect the Immediate Office of the Assistant Secretary staff and support funds. Due to expanding mission responsibilities and the need to integrate organizational activities across the CS&C enterprise, CS&C Division staffing resources are budgeted to support the CS&C Office of the Assistant Secretary. The current ad hoc cadre assigned to the CS&C leadership manage the myriad of collaborations that occur across the United States Government on cyber and communications policy initiatives and mission activities. These critical staffing resources serve as a critical link to external stakeholders, OMB and Congress. The requested restatement of salaries and support funds to the Office of the Assistant Secretary CS&C will formalize the current ad hoc allocation of resources and centralize outreach efforts with inter-governmental, international, private sector, and other stakeholders. These resources provide additional staffing and oversight of the following functional areas: Strategic Planning and Policy, Mission Integration, External Affairs, Human Capital, Budget and Finance, Continuity of Government, and Facility Planning.

*Immediate Office of the Assistant Secretary:* The Immediate Office of the Assistant Secretary provides strategic leadership across the Cybersecurity and Communications enterprise. The Assistant Secretary and Deputy Assistant Secretary collaborate with internal and external stakeholders and provide policy guidance in carrying out operational missions. They oversee the mission to prepare for and respond to incidents that could degrade or overwhelm the operation of the Nation's information technology and communications infrastructure.

*External Affairs:* The External Affairs Section is responsible for providing leadership, oversight, and operational services to Cybersecurity and Communications and its line components in support of the Public Affairs Annex to Emergency Support Function (ESF) 15 and for the Comprehensive National Cybersecurity Initiative strategic communications efforts. The External Affairs Section also has primary responsibility for managing Congressional affairs activities; coordinating with the Government Accountability Office;

overseeing Cybersecurity and Communications' role in support of the Speaker's Bureau process; integrating component strategic communications and public affairs events; supporting inter-governmental and international affairs as well as private sector engagements.

Human Capital: The Human Capital Section is responsible for identifying, recruiting, and on-boarding highly qualified personnel, as well as assisting program managers at all levels with training, developing, motivating, and retaining skilled staff. This Section also works closely with the NPPD Training Director to provide personnel with effective and efficient employee development and training programs designed to provide the entire CS&C workforce with the knowledge, skills, abilities, and competencies to accomplish the mission of CS&C.

Budget and Finance: The Budget and Finance Section is responsible for coordinating the Department's Planning, Programming, Budgeting, and Execution process across the Cybersecurity and Communications enterprise, as well as supporting key leadership initiatives. The Budget and Finance Section is comprised of three functional areas: Budget Formulation, Budget Execution, and Financial Operations.

Acquisitions and Procurement: The Acquisitions and Procurement Section is responsible for implementing acquisition review board strategies and oversees the CS&C Divisions' acquisition programs to ensure compliance with applicable NPPD, DHS, and government procurement regulations and procedures. Additionally, the Acquisitions and Procurement Section provides oversight for procurement activities, process and program definition, and the timely processing and submission of contracts.

The request is a restatement of \$5.679 million and 26 FTP/FTE positions from respective CS&C Divisions as indicated below:

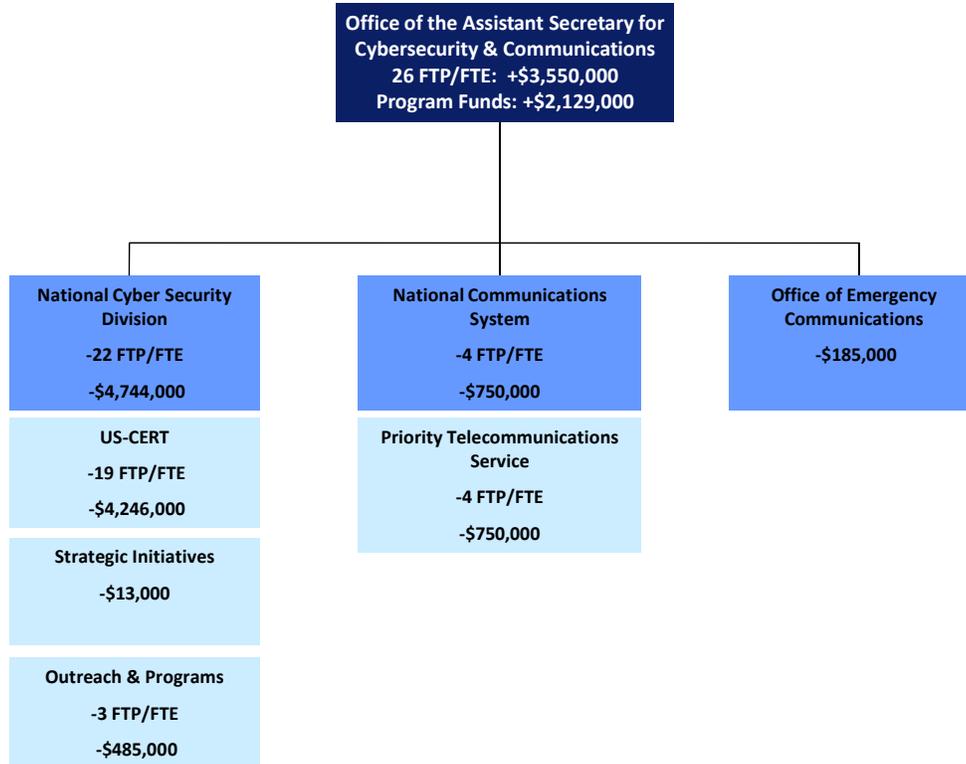

National Cyber Security Division (NCSD): Restatement from NCSD includes program funds totaling \$4.744 million and 22 FTP/22 FTE billets.

National Communications System (NCS): Restatement from NCS includes program funds totaling \$0.750 million and 4 FTP/FTE billets.

Office of Emergency Communications (OEC): Restatement from OEC includes program funds totaling \$0.185 million from the Office of Emergency Communications.

The chart below reflects the disposition of the restatement of resources at the PPA levels to the Office of the Assistant Secretary from the CS&C Divisions.

## Restatement of NCSD-NCS-OEC Resources Supporting the Office of the Assistant Secretary for Cybersecurity and Communications

The restatement of \$5.679 million and 26 FTP/FTE to the Assistant Secretary for Cyber Security and Communications is critical to carry out necessary executive and operational leadership over national cyber and communication activities. These dedicated resources allow for the promulgation of CS&C-wide policies and technology solutions; integration of operational missions; realization of economies-of-scale of common financial and administrative activities across CS&C; and the creation of best employment practices. As noted, many of these positions are already filling roles within the Office of the Assistant Secretary and this request restates the funding and personnel in an effort to increase the transparency of the C&SC budget request and execution. This change will not cause deleterious mission impacts.

## Section 2.2: National Communications System Realignment

### PURPOSE:

The National Communications System (NCS) is requesting a restatement of personnel and support resources from across the National Communications System Programs to more closely reflect how the NCS mission is currently being executed. This requested restatement creates a consolidated Plans and Programs project within Priority Telecommunication Service PPA to coordinate the planning and provisioning of national security and emergency preparedness communications, resources are currently budgeted across all four PPAs. It also restates the NCS positions across the four PPAs to tie the staffing more closely to the projects they support (for example, restating of the 12 NGN Program Office staff to the NGN PPA.)

	FY 2011 Request			NCS Realignment			Assistant Sec. CS&C			Addendum Request		
	FTP	FTE	(\$000)	FTP	FTE	(\$000)	FTP	FTE	(\$000)	FTP	FTE	(\$000)
PTS	41	41	\$ 56,283	5	5	\$ 1,880	(4)	(4)	\$ (750)	42	42	\$ 57,413
PSET	28	28	\$ 16,657	(14)	(14)	\$ (2,578)	-	-	\$ -	14	14	\$ 14,079
CIP	29	29	\$ 14,884	(3)	(3)	\$ (571)	-	-	\$ -	26	26	\$ 14,313
NGN	-	-	\$ 21,095	12	12	\$ 1,269	-	-	\$ -	12	12	\$ 22,364
Total	98	98	\$ 108,919	-	-	\$ -	(4)	(4)	\$ (750)	94	94	\$ 108,169

### DESCRIPTION:

This restatement will create a new Plans and Programs project under the PTS PPA, but will not cause any other structural changes to the current projects under PTS or the projects in the other three PPAs.

Changes include:

- Net Increase of \$1.880 million and 5 FTP/FTE to Priority Telecommunications Service (PTS);
- Net Decrease of \$2.578 million and 14 FTP/FTE from Programs to Study & Enhance Telecommunications (PSET);
- Net Decrease of \$0.571 million and 3 FTP/FTE from Critical Infrastructure Protection Programs (CIP);
- Net Increase of \$1.269 million and 12 FTP/FTE to Next Generation Networks (NGN)

The table on the next page provides the restatements at the project level and for the personnel across the NCS PPAs.

The Plans and Programs office provides necessary business and administrative support for the National Communications System and centralizes cross-cutting activities such as budget formulation and execution, contracts management, planning, human capital, performance management oversight, as well as management of travel, training, and supplies across NCS. Benefits derived from the consolidation of resources across the National Communications System into the Plans and Programs office under PTS enables economies of scale to be achieved in budget, HR and contract management activities in an effort to reduce costs and increase operational efficiencies.

The most significant realignment of personnel is to reflect those positions that are in the NGN Program Office. The NGN program office has the responsibility for monitoring changes to telecommunication policies and technology trends; formulate funding projections necessary to support future program activities; support internal and external reporting requirements; and ensure program adherence to effective NGN cost, schedule, and performance goals.

## Section 2.3 National Cyber Security Division and Cyber Coordination

### PURPOSE:

This proposed PPA structure for FY 2011 is requested for the National Cyber Security Division to better align appropriated resources to its expanded responsibilities and enhanced mission outlined under the Comprehensive National Cybersecurity Initiative and other recent mandates.

Under this requested realignment, the current National Cyber Security Division PPAs are proposed to be broken out into two PPAs:

- Cybersecurity Coordination. In the new structure for FY 2011, NPPD requests \$10.000 million for Cybersecurity Coordination, including 40 positions / 27 FTE. This represents an increase of \$5.000 million over the FY 2010 enacted budget of \$5.000 million.
- Cybersecurity. In the new structure for FY 2011, NPPD requests \$364.000 million for Cybersecurity, including 280 positions / 257 FTE. These figures exclude Cyber Coordination and the realignment of staff and resources for the Assistant Secretary, CS&C. These funds support NPPD's role in the Comprehensive National Cybersecurity Initiative and other cybersecurity activities, and is structured to align to the NCSD organizational structure: US-CERT Operations, Federal Network Security, Network Security Deployment, Global Cyber Security Management, Critical Infrastructure Cyber Protection and Awareness, and Business Operations.

The requested PPA structure outlined below provides for future increased visibility and transparency into how the National Cyber Security Division is executing funding and meeting mission requirements. It also pulls out Cyber Coordination as a separate PPA within IPIS.

	FY 2011 Request			FY 2011 Realignment			Transfer for Asst. Sec. CS&C			FY 2011 Request

Cybersecurity			
	\$ in Thousands		
	FTE	FTP	Amount
<b>FY 2009 Actual</b>	<b>79</b>	<b>128</b>	<b>\$252,140</b>
<b>FY 2010 Enacted*</b>	<b>186</b>	<b>260</b>	<b>\$392,154</b>
2011 Adjustments to Base	65	9	-\$14,146
<b>2011 Current Services</b>	<b>251</b>	<b>269</b>	<b>\$378,008</b>
2011 Program Changes	6	11	-\$14,008
<b>FY 2011 Request</b>	<b>257</b>	<b>280</b>	<b>\$364,000</b>
Total Change 2010-2011	71	20	-\$28,154
*Total does not include \$5 million enacted for Cybersecurity Coordination.			

NPPD requests \$364.000 million for Cybersecurity, including 280 positions and 257 FTE. This represents a decrease of \$28.154 million over the FY 2010 enacted budget of \$392.154 million<sup>1</sup>. These funds support NPPD’s role in the Comprehensive National Cybersecurity Initiative and other cybersecurity activities, and will be executed under the following: US-CERT Operations, Federal Network Security, Network Security Deployment, Global Cyber Security Management, Critical Infrastructure Cyber Protection and Awareness, and Business Operations.

The FY 2011 request for Cybersecurity includes adjustments-to-base for annualization of \$2.203 million for 16 FTE received in FY 2010; pay inflation of \$0.348 million; GSA Rent escalation of \$0.046 million; and 30 positions / 71 FTE additional Federal positions offset by \$9.571 million in program/contract dollars; a decrease of \$8.000 million for Data Center Migration; and a transfer of \$4.000 million to the Federal Law Enforcement Training Center for the National Computer Forensics Institute. The Adjustments to Base in the table above also reflect the Assistant Secretary for CS&C Realignment of 22 FTE/FTP and \$4.744 million.

Program changes are a net decrease of \$14.007 million and an increase of 11 positions / 6 FTE, and specifically include: an increase of \$0.069 million to US-CERT Operations; an increase of \$9.528 million, including 11 positions / 6 FTE to Federal Network Security to enable the implementation of the Assessment, Testing and Analysis Capability (ATAC) program; a decrease of \$12.903 million to Network Security Deployment; a decrease of \$2.842 million to

<sup>1</sup> The FY 2010 Enacted amount does not include \$5 million appropriated for Cybersecurity Coordination.

Global Cyber Security Management; a decrease of \$7.401 million to Critical Infrastructure Cyber Protection and Awareness; and a decrease of \$0.458 million to Business Operations.

This PPA encompasses activities under: US-CERT Operations, Federal Network Security, Network Security Deployment, Global Cyber Security Management, Critical Infrastructure Cyber Protection and Awareness, and Business Operations. Additional details on each activity follows below:

### *US-CERT Operations*

\$ in Thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
<b>Salaries &amp; Benefits</b>	71	98	\$10,019	118	120	\$15,477	47	22	\$5,458
<i>Mission Management</i>			\$22,487			\$21,330			-\$1,157
<i>Business, Performance &amp; Planning</i>			\$6,837			\$2,410			-\$4,427
<i>Analysis</i>			\$21,641			\$19,840			-\$1,801
<i>Detection</i>			\$22,908			\$21,349			-\$1,559
<b>Program Costs</b>			\$73,873			\$64,929			-\$8,944
<b>Total</b>	71	98	\$83,892	118	120	\$80,406	47	22	-\$3,486

To accomplish its mission, US-CERT Operations is comprised of four functional areas:

- *US-CERT Operations Mission Management* encompasses the activities that provide immediate customer support and incident response, including 24x7x365 support of the National Cybersecurity and Communications Integration Center, which has connectivity to all major Federal cyber operations centers, industry and international partners.
- *US-CERT Operations Business, Performance, and Planning* supports the US-CERT mission through integrated planning and sustainable financial, acquisition, and human capital management.
- *US-CERT Operations Analysis* provides several levels of analytical insight into cyber activities. In near-real time, its analysts examine raw and summarized data from a wide variety of information sources to make determinations about potential attacks detected by the National Cybersecurity Protection System's alerting system.
- *US-CERT Operations Detection* supports the implementation of tools and technologies, including monitoring of deployed sensors and creation of threat signatures, countermeasures, and scenarios to provide the ability to rapidly detect and categorize cyber activities that could pose a potential risk to US-CERT stakeholders.

### *Federal Network Security*

\$ in Thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
<b>Salaries &amp; Benefits</b>	14	20	\$1,933	24	31	\$3,043	10	11	\$1,110
<i>Requirements &amp; Acquisition Support</i>			\$2,600			\$2,600			\$0
<i>Network &amp; Infrastructure Security (TIC)</i>			\$5,062			\$4,926			-\$136
<i>Compliance &amp; Oversight</i>			\$8,875			\$17,728			\$8,853

<b>Total</b>	14	20	\$19,690	24	31	\$29,245	10	11	\$9,555

Federal Network Security utilizes a holistic approach to Federal government network security that enables Federal partners to address cybersecurity challenges in a manner that maximizes value and minimizes risks associated with technology and security investments.

To accomplish its mission, Federal Network Security is comprised of four functional areas:

- *Requirements and Acquisitions Support* supports the long-term strategic prevention of attacks against Federal government networks by addressing common challenges faced by all departments and agencies.
- *Network and Infrastructure Security* leads the Comprehensive National Cybersecurity Initiative Trusted Internet Connections (TIC) Initiative with the Office of Management and Budget. It optimizes network security capabilities into a common solution for the Federal information enterprise and facilitates the reduction, and consolidation of external connections, including Internet points of presence, through approved access points.
- *Compliance and Assurance Program* ensures that implementation efforts across the Federal enterprise are in compliance with information technology security policy directives and statutes.
- *Security Management* supports Federal partners' by promoting cybersecurity directives and statutes, including Office of Management and Budget and National Institute of Standards and Technology guidelines and special publications.

### ***Network Security Deployment***

\$ in Thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
<b>Salaries &amp; Benefits</b>	22	32	\$3,202	39	40	\$5,226	17	8	\$2,024
<i>System Engineering &amp; Integration</i>			\$18,884			\$17,045			-\$1,839
<i>Deployment, Logistics &amp; Sustainment</i>			\$99,702			\$92,625			-\$7,077
<i>Program Management &amp; Acquisition</i>			\$37,436			\$34,031			-\$3,405

<i>Data Center Migration</i>			\$8,000			\$0			-\$8,000
<b>Program Costs</b>			\$190,466			\$167,699			-\$22,767
<b>Total</b>	22	32	\$193,668	39	40	\$172,925	17	8	-\$20,743

Network Security Deployment is responsible for the development, acquisition, deployment, and support required for the National Cybersecurity Protection System, operationally known as EINSTEIN, which is an integrated intrusion detection/prevention system that encompasses the hardware, software, and other components being procured specifically to support the Department's Comprehensive National Cybersecurity Initiative mission.

To accomplish its mission, Network Security Deployment is comprised of four functional areas: *System Engineering and Integration*; *Program Management and Acquisition*; *Deployment, Logistics and Sustainment*; and *Business, Investment and Budget*.

### ***Global Cyber Security Management***

\$ in Thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
<b>Salaries &amp; Benefits</b>	18	22	\$2,572	18	22	\$2,624	0	0	\$52
<i>Software Assurance</i>			\$1,809			\$1,678			-\$131
<i>Standards, Best Practices &amp; R&amp;D Coordination</i>			\$4,138			\$1,752			-\$2,386
<i>Cyber Education</i>			\$6,909			\$6,691			-\$218
<i>Supply Chain Risk Management</i>			\$4,463			\$4,339			-\$124
<b>Program Costs</b>			\$17,319			\$14,460			-\$2,859
<b>Total</b>	18	22	\$19,891	18	22	\$17,084	0	0	-\$2,807

Global Cyber Security Management develops and promulgates sound practices for software developers, information technology security professionals and other critical infrastructure and key resources stakeholders. Global Cyber Security Management also addresses the need to build a skilled cyber workforce for today and tomorrow and provides a set of comprehensive resources that can be used to appropriately manage supply chain risk across the lifecycle of networks, systems, and components.

To accomplish its mission, Global Cyber Security Management is comprised of four functional areas:

- *Software Assurance* seeks to improve software development and acquisition processes by way of forums, working groups, and best practices collaborations.
- *Standards, Best Practices, and Research and Development Coordination* standardizes cyber vulnerability nomenclatures, making it possible to respond to vulnerabilities more efficiently as information is correlated across vendor products, and coordinates cybersecurity research and development priorities conducted through the Department's various programs.
- *Cyber Education and Workforce Development* addresses the need to build a skilled cybersecurity workforce for today's and tomorrow's Federal government in accordance with the Comprehensive National Cybersecurity Initiative and other cybersecurity mandates.
- *Supply Chain Risk Management* works collaboratively with the Department of Defense to develop a method to provide the Federal enterprise the ability to manage and mitigate global information and communications technology supply chain risks.

### ***Critical Infrastructure Cyber Protection and Awareness***

\$ in Thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
<b>Salaries &amp; Benefits</b>	24	33	\$3,425	25	34	\$3,493	1	1	\$68
<i>Outreach &amp; Awareness</i>			\$7,245			\$3,992			-\$3,253
<i>Control Systems Security</i>			\$26,564			\$27,258			\$694
<i>CIP - Cyber Security</i>			\$12,052			\$8,313			-\$3,739
<i>Cyber Exercises</i>			\$10,876			\$9,877			-\$999
<b>Program Costs</b>			\$56,737			\$49,440			-\$7,297
<b>Total</b>	24	33	\$60,162	25	34	\$52,933	1	1	-\$7,229

Critical Infrastructure Cyber Protection and Awareness collaborates with the public and private sectors to assess and mitigate risk to the Nation's cyber critical infrastructure and key resources

and promotes cybersecurity awareness among and within the general public and key communities, maintains relationships with governmental cybersecurity professionals to share information about cybersecurity initiatives, and develops partnerships to promote collaboration on cybersecurity issues.

To accomplish its mission, Critical Infrastructure Cyber Protection and Awareness is comprised of three functional areas:

- *Outreach and Awareness* coordinates domestic and international engagement and outreach on behalf of the National Cyber Security Division and promotes cybersecurity awareness among and within the general public and key communities, maintains relationships with governmental cybersecurity professionals to share information about cybersecurity initiatives, and develops partnerships to promote collaboration on cybersecurity issues.
- *Control Systems Security Program* focuses on reducing the cyber risk to industrial control systems within the Nation’s critical infrastructure and key resources.
- *Critical Infrastructure Protection-Cyber Security* strengthens the Nation’s preparedness through public and private partnerships that work to improve the security of the Information Technology Sector, serving as the designated Sector-Specific Agency.
- *Cyber Exercises Program* plans, coordinates, and conducts cyber-focused exercises that prepare and enhance incident operational capabilities for the Department and its Federal, State, local, regional, international, and private sector partners.

***Business Operations***

\$ in Thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
<b>Salaries &amp; Benefits</b>	37	55	\$5,070	33	33	\$4,513	-4	-22	-\$557
<i>Business Operations</i>			\$3,769			\$1,307			-\$2,462
<i>Facilities</i>			\$6,012			\$5,587			-\$425
<b>Program Costs</b>			\$9,781			\$6,894			-\$2,887
<b>Total</b>	37	55	\$14,851	33	33	\$11,407	-4	-22	-\$3,444

Business Operations is responsible for supporting the National Cyber Security Division leadership in setting direction to overall cybersecurity strategy and planning; in ensuring appropriate resources are available to support the mission; developing strategic implementation plans, including performance measures and milestones, focusing on the division’s priorities, initiatives, and financial processes; and in preparing, justifying, and administering the National Cyber Security Division budget. It integrates resource management, human capital, facilities, performance management, and policy development and implementation into the broad array of issues addressed by National Cyber Security Division leadership.

PPA: Cyber Coordination

	\$ in Thousands		
	FTE	FTP	Amount
<b>FY 2009 Enacted</b>	<b>0</b>	<b>0</b>	<b>\$0</b>
<b>FY 2010 Enacted</b>	<b>0</b>	<b>0</b>	<b>\$5,000</b>
2011 Adjustments to Base	14	14	\$0
<b>2011 Current Services</b>	<b>14</b>	<b>14</b>	<b>\$5,000</b>
2011 Program Changes	13	26	\$5,000
<b>FY 2011 Request</b>	<b>27</b>	<b>40</b>	<b>\$10,000</b>
Total Change 2010-2011	27	40	\$5,000

NPPD is requesting that Cybersecurity Coordination be established as a PPA within IPIS. Cyber Coordination funds the National Cyber Security Center (NCSC).

\$ thousands	FY 2010			FY 2011			Change		
	FTE	FTP	Enacted	FTE	FTP	Request	FTE	FTP	\$
Salaries & Benefits	0	0	\$0	27	40	\$4,181	27	40	\$4,181
Program Costs			\$5,000			\$5,819			\$819
<b>Total</b>	<b>0</b>	<b>0</b>	<b>\$5,000</b>	<b>27</b>	<b>40</b>	<b>\$10,000</b>	<b>27</b>	<b>40</b>	<b>\$5,000</b>

As stated in National Security Presidential Directive 54 (NSPD 54)/Homeland Security Presidential Directive 23 (HSPD 23), paragraph 29(d) - the NCSC is to ensure that Federal agencies have access to and receive information and intelligence needed to execute their respective cybersecurity missions. All six service areas have been designed to deliver on that mandate, each with its own unique capability that enhances another service area. The integrating capabilities, processes and tools the Center deploys will strengthen each individual center's mission; provide integrated national situational awareness; and integrated cyber incident response.

The NCSC plans to deliver on six key service areas:

- *Mission Integration* facilitates the integration of the six participating centers through common or aligned processes, procedures and techniques. The six participating centers include: the United States Computer Emergency Response Team (US CERT), the NSA Threat Operations Center (NTOC), the Intelligence Community Incident Response Center (IC-IRC), the US STRATCOM Cyber Command (CYBERCMD), the Department

of Defense Cyber Crimes Center (DC3), and the National Cyber Investigative Joint Task Force (NCIJTF.)

- *Collaboration and Coordination* facilitates professional collaboration and managing the partnership agreement process with each center. The partnership agreements and the mission integration officers work to provide the cross organizational information sharing process. As an example, if US CERT needs information from DC3 to fulfill an information gap, and that same information is needed for CYBERCMD, the partnership agreements and mission integration officers will serve as the mechanism(s) for multi-cross organizational information sharing.
- *Situational Awareness and Cyber Incident Response* sustains an integrated national situational awareness capability for operational and strategic means at all three classification levels. Provides support to steady state incident response and lead national cyber incident response efforts. Develops and deploy an integrated incident management system of detection, analysis, alert and notification, and response/remediation. Under the Situational Awareness and Cyber Incident Response team, this unit will support the Secretary as the Principal Federal Official for cyber under the National Infrastructure Protection Plan (NIPP).
- *Analysis and Reporting* reports daily, weekly and annually on the composite state of the U.S. Cyber Networks and Systems. Conducts system wide incident analysis, and integrated incident response planning. Convenes and manages the cyber incident investigative capability, modeled after other successful federal investigative capabilities. Critical to this effort is for the Center to operate at all three classification levels - in order to share information across all classification domains and to build mechanisms to down grade information to a lower classification level to share information more broadly.
- *Knowledge Management* provides a portal with a compendium of cybersecurity information and intelligence for cybersecurity professionals, analysts and center customers. Sustains a national cyber incident database. This knowledge management system will provide the means for on-line collaboration, correlation analysis, discovery, and trend studies.
- *Technology Development and Management* provides enabling IT support for the center and provides enterprise tools and capabilities (process, tool deployment and common procedures) for all six centers.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **US-VISIT**

## **I. Appropriation Overview**

### **A – Mission Statement for US-VISIT**

The mission of the Department of Homeland Security (DHS) United States Visitor and Immigrant Status Indicator Technology (US-VISIT) Program is to provide biometric identification through the collection, maintenance, and sharing of biometric and selected biographic data to authorized DHS, Federal, State, local, and law enforcement agencies in support of the DHS mission. Through its use of biometrics, US-VISIT collects, stores, and shares digital fingerprints and digital photographs for subsequent verification. This biometric information is paired with biographic information used to establish and verify an individual's identity, as well as to vet that identity against criminal and immigration violator watchlist. US-VISIT also analyzes biographic data for the identification of potential overstays.

US-VISIT established four guiding principles to accomplish its mission: (1) enhance the security of our citizens and visitors; (2) facilitate legitimate travel and trade; (3) ensure the integrity of our immigration system; and (4) protect the privacy of our visitors. US-VISIT is a key component of a multi-layered, multi-agency defense that is integral to domestic security. US-VISIT satisfies legislative and DHS mandates, and contributes to DHS immigration and border management goals and provides U.S. citizens and foreign visitors with a safer and more facilitative border security and immigration process.

### **B – Budget Activities**

**Systems Operations and Maintenance (O&M)** – US-VISIT operates and maintains two major automated identification systems in support of its mission: the Automated Biometric Identification System (IDENT) for biometric data and the Arrival and Departure Information System (ADIS) for biographic data. US-VISIT provides the information technology (IT) support enabling identity verification and screening services through these systems, including the support infrastructure providing the foundation for enhancing and developing new capabilities. O&M includes systems operations and maintenance, development of IT architecture and platforms for user and program interfaces, data center operations support and services, network and data communications integration and support, and technical IT support services.

IDENT processes more than 135,000 transactions per day for DHS and the Department of State (DOS), as well as for other stakeholders. At the end of FY 2009, IDENT stored more than 106 million fingerprint records of individuals and contained biometric data for legitimate travelers to the United States, immigration benefit seekers, and immigration

violators. IDENT contains biometric watchlist and enrolled fingerprints that are compared to identify persons who should be more closely scrutinized prior to entering the United States or prior to being granted visas or immigration benefits. The biometric watchlist contains information on known or suspected terrorists (KSTs), criminals, sexual offenders, domestic and international fugitives, threats to officer safety, military detainees, persons of interest, and immigration violators. Each time DHS encounters an individual, his or her fingerprints are compared against the watchlist and the results returned to the agency fingerprint submitter. At the initial encounter, the individual is enrolled and his or her biometric data is stored in IDENT. The individual's fingerprints are compared against the enrollment to verify identity on each subsequent encounter. Each time fingerprints are taken, the reason for the encounter—such as entry to the United States at an air, sea, or land port of entry (POE), or application for a visa or immigration benefits—is recorded in IDENT. For example, when a foreign traveler provides fingerprints to a U.S. Customs and Border Protection (CBP) officer at a POE, the identity verification and watchlist results are provided back to the officer within 10 seconds. Identity verification or matches against a watchlist assist decisionmakers in determining admissibility or eligibility for immigration benefits. Using an automated system quickly enables the identification of KSTs, criminal aliens, and repeat immigration violators, even by those who resort to the use of fraudulent documents and aliases.

ADIS contains arrivals, departures, and current immigration status about noncitizens. This information is gathered from Traveler Enforcement Compliance System officer-confirmed arrivals, I-94 forms, and other traveler information. ADIS compares departures with arrivals to create a complete record of events for more than 200 million foreign travelers and identifies whether travelers have possibly overstayed their admissibility.

**Identity Screening Services** – US-VISIT is the DHS focal point for providing identity screening services, handling a large workload providing diverse assistance and timely responses to DHS in supporting immigration and border management as well as to international stakeholders. The IDENT and ADIS systems are supported by fingerprint examiners and analysts in US-VISIT's Identity Services Branch. The fingerprint analyses conducted by examiners in the Biometric Support Center (BSC) provide real-time human biometric verification services, supplementing IDENT automated matching. Data Integrity Group (DIG) analysts work with data from ADIS and other systems to identify and verify overstay violators. Watchlist records are created for overstay violators and persons of interest with known immigration violations or criminal records. Law Enforcement and Intelligence (LE&I) personnel coordinate with law enforcement and intelligence agencies' operational activities to improve US-VISIT data systems accuracy and usefulness, including management of the US-VISIT watchlist. US-VISIT also shares information with, and provides technical assistance to, other nations engaged in developing and supporting their own biometric capabilities for border and immigration management programs. Further, US-VISIT Information Sharing and Technical Assistance (ISTA) branch staff supports DHS efforts to ensure advanced and coordinated research and standards on biometric applications. These services provide identity

management and screening support and reliable information to US-VISIT operational customers and stakeholders.

**Program Management Services** – US-VISIT funds the Federal and contractor support staff who maintain mission essential IT systems, manage the manual identity verification services and the projects resulting in improved capabilities, and mission support functions such as policy and planning.

**Data Center Mirroring and Migration** – US-VISIT data center operations represent an integral element within the US-VISIT service delivery framework. Presently, US-VISIT systems are hosted in two Department of Justice (DOJ) data centers. This hosting includes physical areas, rack supports, service support, hardware maintenance, memory and storage capacity, data and backup management, operating systems level support, disaster recovery, and network fiber optics and cabling infrastructures. DHS has mandated the consolidation of all component data centers into two DHS enterprise data centers. US-VISIT must migrate its systems by FY 2012. US-VISIT data center environments are not 100-percent redundant and currently operate at 50-percent redundancy. US-VISIT IDENT and ADIS systems are critical to the Nation’s safety and security. Therefore, a redundancy is required to replicate current data center operations before migration to the two DHS enterprise data centers.

**Unique Identity – Full Operational Capability** – Full Operational Capability includes integrated workstreams for achieving interoperability between IDENT and Integrated Automated Fingerprint Identification System (IAFIS). The objective of collecting and storing 10-prints is to facilitate travel by reducing the number of travelers sent for secondary processing; provide more matchable data, which reduces the likelihood of misidentifying a traveler as being on a US-VISIT watchlist; and increase opportunities to identify persons of interest, as 10-prints are more likely to be matched to latent fingerprints collected and maintained in criminal and intelligence biometric data stores. Interoperability with both foreign and domestic partners enriches the biometric database used by border management, intelligence, and law enforcement agencies. In conjunction with 10-prints, enhanced data sharing through interoperability increases the probability of identifying persons of interest and enhances law enforcement actions.

**Legislative and Administrative Mandates** – The budget requests resources necessary for DHS to meet essential legislative mandates and DHS strategic goals:

*The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA)*, Public Law 104-208, requires the development of an automated entry and exit control system to collect records of departure and to match them with records of arrival.

*The Immigration and Naturalization Service Data Management Improvement Act of 2000*, Public Law 106-215, amends IIRIRA to require that the entry and exit data system integrate all “authorized or required” alien arrival and departure data; use available data to match an alien’s arrival and departure; assist the Attorney General (now the Secretary of Homeland Security) and the Secretary of State to identify lawfully admitted nonimmigrants who have overstayed their periods of admission; use available data to

produce a report of arriving and departing aliens by nationality, classification as an immigrant or nonimmigrant, and dates of arrival in and departure from the United States; and be implemented at all air and sea POEs by December 31, 2003, at all air and sea ports and the 50 land border ports serving the highest numbers of aliens by December 31, 2004, and at all POEs by December 31, 2005.

*The Visa Waiver Permanent Program Act of 2000*, Public Law 106-396, requires that the entry and exit data system –

- Contain records of arrival and departure of every alien admitted under the Visa Waiver Program (VWP) who arrives and departs by air or sea
- Contain sufficient data to permit the Attorney General (now the Secretary of Homeland Security), for each fiscal year, to calculate the percentage of each VWP country's nationals who are admitted under the VWP and for whom no departure record exists
- Use available data to produce a detailed annual report to Congress by December 31 of each year containing the numbers of departing aliens with their nationalities, successful arrival/departure matches, and classifications by immigrant or nonimmigrant, VWP, and other immigrants for whom no departure data is available at the end of the alien's authorized period of stay, among other specific information
- Record arrivals and departures of every VWP alien transiting through air and sea ports by October 1, 2001

*The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act*, Public Law 107-56, requires that the entry and exit data system be implemented with all deliberate speed and as expeditiously as practicable, particularly focused on using biometrics and tamper-resistant documents, and be able to interface with law enforcement databases for use by Federal law enforcement to identify and detain individuals who are threats to national security.

*The Enhanced Border Security and Visa Entry Reform Act of 2002 (EBSVERA)*, Public Law 107-173, requires that the entry and exit data system –

- Use technology and biometric standards to be developed by the National Institute of Standards and Technology, in consultation with other agencies, for alien identification and other purposes
- Be accessible at POEs and overseas consular posts
- Consist of equipment and software to allow biometric comparison and authentication of all U.S. visas, other travel and entry documents issued to aliens, and the machine-readable, biometric passports required to be issued to nationals of VWP countries at all POEs by October 26, 2005
- Have database(s) containing alien arrival and departure data from machine-readable visas, passports, and other travel and entry documents
- Use technologies that facilitate the lawful and efficient cross-border movement of commerce and persons without compromising the safety and security of the United States

- Be integrated into the new and broader Immigration and Naturalization Data System that fully integrates all the former Immigration and Naturalization Service databases and data systems that process or contain alien information

*The Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA)*, Public Law 108-458, Section 7208, specifically addresses biometric entry and exit and calls for the Secretary of Homeland Security to accelerate the full implementation of US-VISIT.

*The Implementing Recommendations of the 9/11 Commission Act*, Public Law 110-53, Section 711, calls for the creation of a biometric exit system at airports to record the departure of VWP travelers. Such an air exit system must match biometrics against watchlists and immigration information and compare biometrics against the departure manifest to confirm the individual alien's departure from the United States.

## **C – Budget Request Summary**

US-VISIT requests 412 full-time positions (FTPs), 399 full-time equivalents (FTEs), and \$334.613 million. The net program decrease is \$39.149 million over the FY 2010 Enacted budget of \$373.762 million.

### **Adjustments-to-Base:**

- *Annualization of 2010 Pay Raise* – (0 FTP, 0 FTEs, \$0.093 million increase). Salaries and benefits for FY 2010.
- *2011 Pay Increase* – (0 FTP, 0 FTEs, \$0.315 million increase). Salaries and benefits for FY 2011.
- *GSA Rent* – (0 FTP, 0 FTEs, \$0.064 million increase). All payments to the General Services Administration for rental of office space and rent-related services.

### **Program Changes:**

- *Systems Operations and Maintenance* – (0 FTP, 0 FTE, \$1.794 million decrease). A \$1.794 million decrease will require US-VISIT to extend a portion of the two-print fingerprint matcher refresh.
- *Identity Screening Services* – (0 FTP, 0 FTE, \$0.65 million decrease). The requested program change will maintain current service levels for existing customers.
- *Program Management Services* – (200 FTP, 200 FTE, \$12.632 million decrease). A \$12.632 decrease in Program Management Services will require US-VISIT to reduce contractor staffing and increase Federal staffing to offset the reduction.
- *Data Center Mirror and Migration* – (0 FTP, 0 FTE, \$1.266 million decrease). The requested program change defers a portion of this effort to occur in FY 2012.<sup>1</sup>

---

<sup>1</sup> The US-VISIT program change for data center migration reflects the net change amount of a \$16.266M decrease from FY 2010 enacted US-VISIT funding for data center migration and a \$15M one-time enhancement from the consolidated DHS CIO data center funding.

- *Unique Identity - Full Operational Capability* – (0 FTP, 0 FTE, \$2.848 million decrease). The requested program change will maintain current service levels for existing US-VISIT operational customers and stakeholders.
- *US-VISIT 1.0* – (0 FTP, 0 FTE, \$1.569 million increase). The requested program change is to provide initial funding for US-VISIT to address system performance limitations and increasing O&M costs through the evaluation of technologies that will leverage a modernized architecture, resulting in an increasing transaction throughput and reducing the US-VISIT hardware footprint at DHS data centers.
- *Comprehensive Biometric Exit* – (0 FTP, 0 FTE, \$22 million decrease). The requested program change will temporarily eliminate funding for Comprehensive Biometric Exit in FY 2011, pending DHS decisions on policy implementation.

II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

<b>2011 Total Request</b>	<b>412</b>	<b>399</b>	<b>334,613</b>
Total Change 2010 to 2011	200	200	(39,149)

US-VISIT requests \$334.613 million in FY 2011 for ongoing operations, including the implementation of initiatives and deployment of capabilities, a decrease of \$39.149 million from the FY 2010 Enacted Budget of \$373.762 million.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

**Systems Operations and Maintenance (O&M)**

<i>In thousands</i>	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>
Systems Operations and Maintenance	\$86,200	\$128,126	\$126,332

US-VISIT operates and maintains the IDENT and ADIS systems, providing essential biometric and biographic identity management services to US-VISIT customers in a reliable and timely fashion. US-VISIT maintains these systems to ensure they meet significant annual increases in transactions and gallery sizes (fingerprints stored within IDENT), and maintain established response times through service-level agreements.

IDENT and ADIS O&M is critical to the immigration and border management enterprise. US-VISIT technologies support the missions of CBP, U.S. Immigration and Customs Enforcement (ICE), U.S. Citizenship and Immigration Services (USCIS), U.S. Coast Guard (USCG), Department of Defense (DOD), DOS, DOJ, Transportation Security Administration (TSA), and the intelligence community. A failure to maintain deployed systems and capabilities would adversely impact data search and response times critical to stakeholder mission success.

O&M includes application support for adaptive, preventive, and perfective maintenance, release management, architecture support, interface support, configuration management, security certifications and accreditations, software licenses, and appropriate technology refreshes. The primary applications are IDENT, ADIS, and US-VISIT equipment and internal use systems (corporate systems). US-VISIT IT services are delivered in compliance with the DHS enterprise architecture standards and include platforms for users, program interfaces, data center operations, network communications integration and support, and related technical support services. Data center operations include the physical layout of equipment, hardware maintenance, searchable online (memory), storage capacity, data and recovery (backups) management, operating system services, and disaster recovery. Network support provides DOJ data centers network and circuit maintenance, controlled access to other DHS components, and specific interfaces to DOS and the US-VISIT program office. A centralized help desk provides support to US-VISIT systems and application users, as well as database administration, and local area networks at four metropolitan Washington, D.C., locations.

US-VISIT operations are a large and complex undertaking requiring uninterrupted operations, maintenance, and application support. US-VISIT currently maintains this operational support at two DOJ data centers (Dallas, Texas, and Rockville, Maryland) that provide logistical support for the deployment of identity verification services. IDENT operations currently are composed of approximately 500 servers, more than 100 highly specialized matchers, and 45 terabytes of data storage. US-VISIT is experiencing a growth rate of four terabytes per month in IDENT operations—a rate projected to continue increasing. ADIS operations currently consist of 16 high end-servers across the two data centers and process more than one million transactions a day within a five-terabyte database that is estimated to increase by nearly one terabyte per year.

There are two primary factors driving growth in gallery size and transaction volume associated with the O&M of the IDENT and ADIS systems: the normal growth attributable to servicing existing customers and the growth arising from new capabilities and new customers. ADIS currently is growing at about 300 million records annually. ADIS intends to add crossing data for the Electronic System for Travel Authorization (ESTA) and the Western Hemisphere Travel Initiative (WHTI); estimated to combine for an additional 300 million records per year. These will more than double transactions, volume input and throughput, and database storage requirements. As the database grows and the identity-matching candidate pool grows for travelers with duplicative names, ADIS will require faster hardware processing capability both to process twice as many records daily against an ever increasing candidate identity matching pool, and to sustain

established customer service levels. The customer base is expected to grow with the addition of DOS users in all foreign consulates, as ADIS data is used by DOS to determine visa eligibility and create a robust profile of visa violators and fraudulent activities utilized to obtain visas. These factors will add to the existing field-user base in the US-VISIT DIG, ICE Compliance Enforcement Unit (CEU), and CBP Office of Field Operations.

US-VISIT must invest in leading-edge hardware and software capable of meeting increased performance requirements against a continuously growing database and expanding alien population processed in border crossing operations, while simultaneously sustaining its performance for a widening customer base.

IDENT is experiencing continuing growth in gallery size and transactions driven by increasing service demands from existing customers. The gallery size at the end of the FY 2009 had approximately 106 million fingerprint records with expected growth (without new capabilities) projected at a minimum 18 million records annually.

A 75-year record retention policy for both ADIS and IDENT contributes to US-VISIT data storage and gallery size growth. The following table illustrates the actual and expected growth in gallery size and transaction volumes.

***US-VISIT Current Services O&M Projected Growth***

	<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>FY 2012</b>	<b>FY 2013</b>	<b>FY 2014</b>	<b>FY 2015</b>
Annual Transaction Volumes (in millions of transactions)	56	60	62	65	72	79	87
Gallery Size (in millions of records)	106	132	151	169	187	205	223

The second primary workload driver is IDENT capabilities expansion and improvement. IDENT has never operated in a true steady-state environment since its transfer to US-VISIT. New requirements, such as 10-print capture and IDENT/IAFIS interoperability initiatives continue to require funding to meet customer service levels.

While the US-VISIT biometric storage requirements are growing for both gallery size and transaction volume from FY 2010 to FY 2011, US-VISIT is evaluating server consolidation through virtualization technology to help keep the O&M costs at or below the current requirements. US-VISIT will avoid spending \$1,794,000 in FY 2011 O&M funds, as the virtualization will allow for multiple independent virtual operating systems on a single physical computer, resulting in a reduction of the number of servers, associated hardware, and support maintenance costs.

**FY 2009 Accomplishments – O&M**

## IDENT

In FY 2009, US-VISIT adhered to service-level agreements with its customers while accommodating nearly a 15-percent growth in transaction volume over FY 2008 levels and a five million record increase in gallery size. The growth in gallery size, in particular, challenges the accuracy and timeliness of IDENT responses.

A summary of significant performance indicators includes:

- *POE Average IDENT Biometric Watchlist Search Time* – average number of seconds it takes the IDENT system to return a response about a traveler at any POE is 10 seconds or less. This measure is calculated monthly. The actual time was 8.62 seconds.
- *BioVisa (DOS) IDENT Biometric Watchlist Average Search Time* – average number of minutes it takes the IDENT system, when initially queried, to return a response about a visa applicant at any consular office is 5 minutes or less. This measure is calculated monthly. The actual time was 2.78 minutes.
- *Law Enforcement Average IDENT Biometric Watchlist Search Time* – average number of minutes it takes the IDENT system to complete a search of all of IDENT when CBP and ICE agents make an enforcement request is 2 minutes or less. This measure is calculated monthly. The actual time was 0.9 minutes.
- *Biometric Interoperability Average IDENT Biometric Watchlist Search Time* – average number of minutes it takes the IDENT system to return a response for a Federal/State/local/tribal user is 15 minutes or less. The actual time was 4.64 minutes.
- *IDENT Operational Availability* – ratio of the time that the IDENT system is available to process end-user transactions during the period divided by the total scheduled up-time for that period is 99.7 percent or greater. The actual time was 99.8 percent.
- *Watchlist False Accept Rate* – the probability that a traveler is erroneously identified as being on the watchlist is 0.04 percent or less. The actual probability was 0.037 percent.

## ADIS

In FY 2009, US-VISIT experienced a 22-percent user increase as compared to FY 2008 due to new services deployed via ADIS web. It is imperative to ensure that ADIS system availability remains at 97 percent in the face of this continued growth.

A summary of significant accomplishments includes:

- *ADIS Release 3.2* - This release was deployed in July 2009 to a limited user base that included the US-VISIT DIG to evaluate the new JAVA web interface. After this limited user testing and acceptance was completed, the release was deployed to new web servers within the current data centers. The JAVA web interface was designed to match the current features and look-and-feel of the current web applications so that the current user base would have little or no learning curve. Additional programming was completed with regard to the ADIS graphical user

interface to ensure that it remains compliant with Section 508 standards for persons with disabilities. This change in the web application interface will streamline implementation of future enhancements and modifications.

- *ADIS Release 3.3* – This release was successfully deployed to the field users. This release included a change to a JAVA web interface that provided the user with the ability to tailor and save the output of ad-hoc search results; receive and process WHTI Vehicle Primary Client (WHTI VPC) interface messages; provide the user with the ability to have a method of performing drill-downs to observation details within an ad-hoc detail view; create a user interface to support ADIS web user administrator functions; and implement program changes to provide users with additional information and increased data accuracy.

An assessment to identify the challenges facing ADIS was completed in the third quarter of FY 2009. Subsequent reporting will provide an independent technical assessment of production system architecture and system revision recommendations.

### Corporate Systems

US-VISIT is currently working with the NPPD Chief Information Officer to refine the migration plan for network services and program office IT help desk support. The plan is incremental and is expected to allow for full migration from ICE support to DHS enterprise network and help desk services. In order to assure continuity of operations, US-VISIT has entered into an FY 2010 support services agreement with ICE for continuation of services in the interim period.

US-VISIT deployed laptops and aircards to all government employees to enable the implementation of teleworking capabilities for US-VISIT Federal staff, which provides work flexibility and prepares the program to respond in the event of a disruptive scenario, such as a flu epidemic.

US-VISIT corporate O&M supports the US-VISIT Alternate Operating Facility (AOF) IT buildout in Baltimore, Maryland.

### **FY 2010 Planned Accomplishments – O&M**

#### IDENT

In FY 2010, funds are requested to enable IDENT and ADIS to overcome challenges posed by increasing gallery size and transaction volumes and to continue adherence to previously established performance targets. Increased IDENT workload is anticipated as a result of rolling out additional 10-print and IDENT/IAFIS interoperability, including support for the Secure Communities initiative, expansion of mobile capabilities supporting law enforcement interaction with IDENT, expanding State and local support requests, and growth in credentialing transactions supporting DHS agency compliance with Homeland Security Presidential Directive 12.

US-VISIT plans to accomplish the following in FY 2010:

- Complete IDENT hardware refresh including matchers, database, and storage hardware. This refresh is the first year of a 5-year refresh cycle targeting approximately 20 percent of the IDENT matcher subsystem annually.
- Implementation of a modernized data storage and tape backup/recovery solution for production IDENT and ADIS database systems
- Implementation of the IT asset management and IT configuration management pilot processes and IT Service Management (ITSM) software management toolset
- Planning and analysis of the IT service desk pilot processes, ITSM software management toolset, and Phase 1 Operations Roadmap (stabilization objectives)
- Development of an enterprise monitoring strategy for US-VISIT IT Management (ITM) production systems
- Initial deployment and integration of the enterprise monitoring tools and ITSM software management toolset

### ADIS

The most notable workload driver for ADIS will be incorporating WHTI, ESTA, and DOS data to provide a complete non-immigrant travel record. US-VISIT plans to accomplish the following in FY 2010:

- Maintain ADIS as required to achieve established performance metrics that include planned release management, hardware and software maintenance renewals, independent verification and validation support, database support, data center and network operations support, and break-and-fix support.
- Deployment of ADIS Release 3.4, which will include an integrated interface to the Secondary Inspection Tool, an updated interface to the FBI's Foreign Terrorist Tracking Task Force, and additional functionality to allow users to reconcile an individual's travel history. This release will also provide the user with additional capability to receive and process I-94 arrivals and departures, update messages from the I-94 automated air/sea records, and provide more accurate information.
- ADIS Release 3.5 will include the migration of ADIS to an Oracle 11g environment. This change in environments will allow the partitioning of database tables to improve performance on the new IBM 595 platform.
- ADIS Release 3.6 will include an automated interface with DOS. Also within this release will be enhanced system change requests to provide more accurate information.
- ADIS Technical Assessment and the Lawrence Livermore National Laboratory Assessment will provide a review, analysis, prioritization, and an estimated schedule of recommendations to be implemented based on the assessment findings.

### Corporate Systems

In FY 2010, US-VISIT Corporate Systems includes funding for email and web-enabled telephones (hardware and service), laptops, aircards, and assorted peripherals required to support the growing US-VISIT Federal workforce. Corporate Systems includes all annual software licenses and advisory services including those for Microsoft, Oracle,

Gartner and the Corporate Executive Board, ICE network connectivity, and IT support services and help desk support.

US-VISIT Corporate Systems planned accomplishments include:

- The final phases of the AOF in Baltimore, Maryland, will be completed, allowing back-up and recovery between the primary US-VISIT office and the AOF.
- US-VISIT corporate O&M will support the next iteration of the General Support Systems upgrades enabling the fulfillment of newly developed requirements by Business users.
- The US-VISIT Program Office IT infrastructure will be migrated from ICE support to DHS Onenet infrastructure.

### **FY 2011 Projected Accomplishments – O&M**

US-VISIT is projecting to accomplish the following:

#### IDENT

- Consolidate servers through virtualization, allowing the scaling down of servers and improved efficiencies by creating multiple operating environments, thereby reducing hardware and support maintenance costs. Virtualization is a method of running multiple independent virtual operating systems on a single physical computer to maximize physical resources while reducing hardware costs.
- Obtain skilled resources to identify servers to be consolidated, purchase virtualization software licenses, and identify machines to virtualize.
- Research and implement an Instant Recovery Strategy with the purpose of supporting the US-VISIT mission by maintaining a 24/7/365 environment that provides constant uptime to all domestic and international partners.
- Develop a Synthetic Transaction Strategy to monitor end-to-end system process flows for US-VISIT applications, allowing US-VISIT to mimic user transactions and identify service impacts from the user community, such as POEs.
- Implement the Operations Roadmap Phase 2 and provide an efficient operating environment to meet target operational goals.
- Develop IT Infrastructure Library Processes for DHS Stennis Data Center.
- Initiate operations at the DHS Clarksville Data Center.

#### ADIS

- Maintain ADIS as required to the established performance measures that include planned release management, hardware and software maintenance and renewal agreements, independent verification and validation support, database support, data center and network operations support, and break-fix maintenance.
- Implement the applicable recommendations from the FY 2010 ADIS Technical Assessment and Lawrence Livermore National Laboratory technology assessments.

Corporate Systems

- Conduct a planned campus infrastructure refresh to include email and web-enabled telephones, workstations, laptops, printers, scanners, and software tools. The last refresh was completed in FY 2008 and the 3-year cycle is recognized as an IT industry standard. The refresh applies only to those items purchased in FY 2008 or earlier.

**Identity Screening Services**

<i>In thousands</i>	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>
Identity Screening Services	\$20,000	\$31,000	\$30,350

US-VISIT is the DHS central point for providing identity management and screening support. US-VISIT biometric and biographic matching functions improve the capabilities to manage and screen against watchlist records that include KSTs, persons of interest, and immigration violators. These capabilities strengthen national security; international, Federal, State, local and tribal government collaboration; and meet other user needs.

Identity Screening Services provides IDENT and ADIS systems business management and oversight, real-time human biometric verification services, overstay analysis, and updates and maintains the US-VISIT watchlist and lookout records. US-VISIT meets its mission requirements through efforts in four areas: (1) positively confirming biometric identity by operating IDENT, supplemented with fingerprint analyses conducted by examiners in the BSC; (2) operating ADIS and analysis by the DIG enhancing biometric identification through biographic, overstay, and data integrity analysis; (3) coordinating LE&I operational activities to improve US-VISIT data systems accuracy and usefulness to the community through the LE&I branch; and (4) providing information sharing and technical assistance to other nations engaged in developing biometric capabilities supporting their border and immigration management programs, and supporting DHS efforts ensuring advanced and coordinated research and standards on biometric applications.

Collectively, these services uniquely identify individuals by providing person-centric, actionable information to US-VISIT operational customers.

**FY 2009 Accomplishments – Identity Screening Services**

Biometric Support Center

In FY 2009, the BSC supported existing end users at the FY 2008 service levels. Key performance results against targets for average performance, through the end of FY 2009:

- provide fingerprint verification decisions on urgent requests in 10 minutes or less; actual was 4.2 minutes

- provide fingerprint verification decisions on non-urgent requests within 24 hours; actual was 3.3 hours
- provide enrollment and verification of terrorism related prints in two hours or less; actual was 51.8 minutes

Of particular note was the continued increase in latent work being accomplished by the BSC. Due to enhanced data sharing efforts within DHS, as well as between US-VISIT and both DOD and DOJ, the BSC processed and enrolled 18,066 latent prints into its unsolved latent database for screening against the more than 100 million subject prints in IDENT in FY 2009. In FY 2009, this workload led to more than 4.6 million fingerprint comparisons, an 88-percent increase over FY 2008. These efforts resulted in 348 identifications, some of which have aided significantly in terrorism and criminal investigations. For example, on March 14, 2009, the BSC matched a latent print against a print in the US-VISIT database. The agency that submitted the print, California Department of Justice, was immediately contacted and provided with details regarding the individual who had 10 DHS apprehension encounters recorded in the US-VISIT database. The latent was from a cold case homicide in Turlock, California. Other latent matches over the course of the year included cases involving national security threats and resulted in individuals being watch-listed.

In FY 2009, manual fingerprint verifications (both urgent and non-urgent requests) as well as field-submitted lookout enrollments remained roughly level with FY 2008 levels. These efforts are critical to ensuring that DHS officers are quickly notified of watchlist hits, that legitimate travel is not adversely impacted, that officers are notified of DHS encounters, and that the integrity of biometric identity is maintained.

FY 2009 identifications of unknown individuals (typically deceased) have continued the upward trend from FY 2008, which is mainly attributable to increased awareness among the law enforcement community of the benefit of US-VISIT data. These efforts have led to the closure of cold cases, including a 19-year old unsolved homicide as well as the identification of a top ten wanted subject from a southern border state.

#### Data Integrity Group

FY 2009 marked continued advances in efforts to identify potential overstays and the DIG has nearly doubled all production trend measures from FY 2008 totals. This increase continues the emphasis on establishing lookouts to identify persons seeking re-entry or obtaining new visas who have previously overstayed their prior term of admission. This ability led to a significant increase in adverse actions at POEs and overseas consular offices. The following table shows the number of cases in which out-of-country lookouts and in-country referrals to ICE have resulted in arrests, denials of visas, or admissibility. Over the past 3 years, the work of the DIG has resulted in more than 3,000 individuals being arrested or denied entry.

***DIG Historical Production Trends***

<b>Fiscal Year</b>	<b>Referred to ICE</b>	<b>Arrests Based on Referrals</b>	<b>Out-of-Country Lookouts</b>	<b>Port/Visa Refusals Based on Lookouts</b>
2009	16,379	568	16,691	2,502
2008	13,343	715	13,276	1,441
2007	12,372	338	7,357	451
2006	4,155	139	457	5

In addition, the DIG achieved operating efficiencies through FY 2009 as a result of stability, increasing workforce experience, and through implementation of an additional automated vetting process through the Computer-Linked Application Management Information System. The average cost per in-country overstay leads had decreased from \$123 at the end of FY 2008 to \$87 at the end of FY 2009. The average cost per out-of-country overstay leads declined from a low of \$114 in FY 2008 to \$107 for FY 2009. The DIG eliminated the backlog of VWP traveler records in June 2009, 4 months ahead of schedule. The elimination of this backlog allows the DIG to vet all current VWP overstay records and will increase the viability of records being vetted and forwarded for law enforcement action.

**Law Enforcement and Intelligence (LE&I)**

US-VISIT provides value-added identity management services with a focus on biometrics in support of analytical, investigative, and operational needs.

With initial deployment of 10-print capture, IDENT/IAFIS interoperability, and the expansion of biometric credentialing screening for critical infrastructure, the complexity of information available increased. Optimal use of the data contained within US-VISIT databases required an integrated and coordinated near real-time response to all stakeholders. LE&I was involved in several global projects with foreign partners to detect and deter malafide aliens from entering the United States and applying for immigration benefits. Further deployment of 10-print capture and interoperability with IAFIS, support of DOD initiatives regarding high-threat subjects, and the formalization of process and procedures with DHS components for assorted projects increased the watchlist hits reviewed workload.

In the second quarter of FY 2009, LE&I exchanged biometric data among the United States, Australia, Canada, and the United Kingdom on a test basis to identify cases and trends in immigration fraud.

***Key LE&I Workload Statistics***

<b>Activity</b>	<b>FY 2007</b>	<b>FY 2008</b>	<b>FY 2009</b>
Watchlist Hits Received	10,447	42,035	121,223
Watchlist Hits Adjudicated	9,404	27,554	22,931*
Watchlist Demotions		24,273	50,960

\*Reduction in FY 2009 adjudications was due to limited CBP detailees.

### Information Sharing and Technical Assistance (ISTA)

In FY 2009, four new countries launched plans or adopted the fingerprint standard for identity management purposes in their border and immigration operations: Canada, Korea, Dominican Republic, and Mexico. US-VISIT has contributed to technical information in support of efforts by these countries to implement biometric uses compatible with the US-VISIT model of identity management. These countries join the United States, United Kingdom, and Japan in actively using fingerprints at points along the travel continuum. This continuum consists of the issuance of a travel document, the issuance of a visa, the admission to the state, the status of the individual while in the state, and the enforcement of that individual's status including departure from the state.

US-VISIT began collecting requirements to implement the agreements with the Federal Republic of Germany and the Republic of Korea outlined in the VWP agreements on enhancing cooperation in preventing and combating serious crime.

US-VISIT has information sharing agreements with the United Kingdom, Australia, Canada, and New Zealand. US-VISIT created an Integrated Project Team in FY 2009 to manage the implementation of Phase 2 of the Hunter Valley Accord, which sets the conditions governing the automated exchange of biometric data among the five countries.

In FY 2009, a multibiometric technology evaluation was completed to inform comprehensive land exit planning. Evaluation results have been incorporated into the land exit planning document delivered in December 2008. The evaluation incorporates input from independent sources as to the feasibility of potential technical solutions for a land exit capability.

ISTA delivered a report on its face quality improvement study in the second quarter of FY 2009. This study seeks to improve facial image quality while minimizing the processing time for CBP officers.

ISTA delivered a final report on multibiometric testing evaluation in the second quarter of FY 2009, which provided recommendations concerning biometrics capture on exit, drawing on the results from a proof of concept demonstration using iris technology, with a series of evaluations conducted in multiple phases along with input from partner agencies.

ISTA developed and is now implementing an action plan that identifies short- and long-term goals for biometric implementation activities with Mexico as part of DHS efforts to broaden biometric data exchange opportunities.

### **FY 2010 Accomplishments – Identity Screening Services**

With the FY 2010 requested funding level, US-VISIT will ensure that existing service levels are maintained.

### Biometric Support Center

In FY 2010, US-VISIT will employ approximately 80 full-time contractors providing expert fingerprint verification, and latent processing and lookout enrollment services in the two centers on the east and west coasts. These centers provide around-the-clock expert fingerprint matching services to the immigration and border management enterprise and enforcement communities. Although IDENT fingerprint matching technology is among the fastest and most accurate in the world, manual fingerprint verifications are necessary to analyze poor-quality prints and to ensure that derogatory data is not erroneously associated with an individual.

The BSC will continue supporting existing end-users at the same service level targets reported for FY 2009. To ensure that legitimate travel is not impeded and officer safety is not negatively impacted, it is critical that the BSC continue to provide fingerprint verification decisions on urgent requests in 10 minutes or less, non-urgent verifications within 24 hours, and enrollment and verification of terrorism-related prints in 2 hours or less. Anticipated organic volume increases and anticipated incremental volumes coming from investments will continue to increase BSC workloads. These increases include future enhanced interoperability with additional DHS components, other agencies, such as DOJ, and other non-U.S. governments, and significant increases in latent print workloads.

### Data Integrity Group

US-VISIT plans to hire approximately 38 government positions to support the DIG for two primary functions: (1) overstay identification through analysis of ADIS data, and (2) analysis of data integrity issues to improve record matching algorithms and systemic data.

The DIG will prioritize its workload according to criteria provided by ICE. The DIG workload will increase in FY 2010 as the DIG expands its coverage from solely reviewing traveler records from ICE priority countries of interest to include all non-immigrant visitors to the US. It is likely this additional workload will double the FY 2009 workload. The current plan, based on increased staffing, is to reduce the backlog of all unvetted, in-country overstays by 50 percent in the second quarter with the remainder completed by fourth quarter.

During FY 2010, the DIG will focus attention on improving ADIS records integrity to achieve a goal of 95 percent exit-to-entry match rate and accurate overstay identification of VWP participants; therefore, efforts to identify and deploy new algorithms improving record-matching performance will continue. The DIG will also continue reviewing the age of the travelers on whom records will be maintained (e.g., those under the age of 14 and over the age of 79 are to be excluded) and class of admission.

In FY 2010, the DIG plans to reduce the backlog of all unvetted overstay records by approximately 50 percent, improve the ADIS data integrity for the exit-to-entry match rate by approximately 95 percent or more, and award a new identity services support

contract and ensure a smooth transition within acceptable learning and clearance constraints.

DIG performance targets for FY 2010 include:

- *In-Country Overstay Lead Credibility Rate* – Probability that leads submitted by the DIG to ICE CEU represent travelers who are currently in the United States and have overstayed their authorized periods of admission. This measure of quality is being revised to remove external factors, such as investigative priority changes beyond US-VISIT's control which have adversely affected its managerial usefulness. The updated measurement will measure the internal quality control of the DIG production and have a new credibility target of 98 percent.
- *Out-of-Country Overstay Lead Credibility Rate* – Probability that vetted overstay leads are correctly promoted to the lookout list and actually represent travelers who are overstaying their authorized periods of admission by more than 180 days: 98 percent or greater.
- *Cost per Overstay Lead* - US-VISIT is revising its method for analyzing DIG efficiency to address weaknesses detected in its efficiency measures (cost per in-country overstay lead and cost per out-of-country overstay lead) which failed to capture operational realities, masked important performance trends, and introduced data distortions from outside factors. The new consolidated efficiency measure reflects that analysts work both in-country and out-of-country leads. The average cost per lead target for FY 2010 is \$52.

#### Law Enforcement and Intelligence

US-VISIT's identity and screening services validate and approve all demotions; select promotions to the biometric watchlist based on entry/exit encounters; and work with internal and external units on possible identity and other fraud issues. US-VISIT anticipates additional workload growth stemming from the increased review of watchlist hits resulting from further 10-print capture and interoperability deployments, support for DOD initiatives, and formalizing processes and procedures with DHS components for assorted projects such as Secure Communities. US-VISIT also anticipates formalizing an agreement to exchange biometric data with Australia, Canada, and the United Kingdom.

Through enacted FY 2010 funding, LE&I will add an additional 20 researchers/analysts to support an initial phase of the implementation of a 24/7 capability along with support of DOD initiatives, and formalization of processes and procedures with DHS components for additional information sharing projects such as Secure Communities. With these additional resources, LE&I anticipates the ability to adjudicate approximately 153,600 records in FY 2010, a fivefold increase over FY 2009 in watchlist encounters researched.

Planned accomplishments for FY 2010 also include the following:

- Formalize a biometric data exchange with Australia, Canada, and the United Kingdom

- Reduce the watchlist encounter backlog by 25 percent as resources are made available
- Remain current on research and coordination of the United Kingdom visa project
- Initiate a pilot exchange of biometric prints with the Federal Republic of Germany

#### Information Sharing and Technical Assistance

ISTA will continue to foster partnerships with like-minded countries to support their implementation of biometrics in the border and immigration control areas: United Kingdom, Canada, New Zealand, Australia, Japan, Singapore, Hong Kong, South Korea, and Brunei.

ISTA will engage international partners under the Agreements for Preventing and Combating Serious Crime: Germany, Korea, Czech Republic, Latvia, Lithuania, Hungary, Slovakia, Estonia, Malta, Italy, Spain, and Portugal.

ISTA will support information sharing opportunities or capacity building with other countries of strategic interest: Mexico, Dominican Republic, Argentina, Iraq, Saudi Arabia, Yemen, Afghanistan, Ukraine, Thailand, India, Nigeria, Israel, and United Arab Emirates.

The FY 2010 and FY 2011 funds will support the continued and expanded use of temporary onsite technical experts (secondments) overseas. The technical experts posted to the United Kingdom and Australia will:

- Analyze the current and future biometric capabilities throughout both countries' border and immigration infrastructure
- Assist with planning of biometric processes and systems within the government in relation to the ports of entry
- Recommend improvements based on expert biometric business process and technical experience
- Provide expert knowledge and guidance on biometric standards, methods, and products
- Develop and deploy quality assurance measures for biometric implementations
- Identify and mitigate deployment risks, including cultural and business process change implications
- Ensure interoperability of systems adhering to international standards

US-VISIT will continue to provide technical assistance to the Government of Mexico's National Migration Institute to facilitate the incorporation of biometrics into the Integrated System for Migration Operations as envisioned under the Merida Initiative.

US-VISIT will further advance adoption of compatible biometric systems by border and immigration authorities internationally through posting technical experts to the European Agency for the Management of Operational Cooperation at the External Borders of the European Union (Frontex) and the International Criminal Police Organization (INTERPOL). Frontex, based in Warsaw, Poland, is the European Member States in the

field of border security and INTERPOL, based in Lyon, France, is the independent international police organization. The US-VISIT technical expert at Frontex will evaluate operations at the European Union's external borders and identify ways to increase security and facilitate legitimate travel through incorporation of biometric technology into existing FRONTEX operations. The US-VISIT technical expert posted at INTERPOL will directly support biometric initiatives by ensuring international immigration and border security requirements are included in INTERPOL's future priorities.

Overseas postings benefit DHS through successful collaboration and information sharing. The positive results of the information sharing effort have been twofold—1) improving the integrity of the United Kingdom visa application process and 2) providing additional actionable information on persons of interest to ICE, as well as to other law enforcement agencies, through US-VISIT receipt of biometrics from United Kingdom visa applicants based in the United States.

- As a result of this unprecedented collaboration, there have been 68 confirmed biometric matches of United Kingdom Border Agency (UKBA) and US-VISIT watchlist data. For example, two applicants for United Kingdom visas were identified as convicted drug traffickers. As a result, their applications were denied and alerts were posted to inform UKBA authorities to deny attempts to enter the UK.
- In November 2009, the search of a United Kingdom visa applicant's biometrics against US-VISIT's watchlist data revealed a match to a known or suspected terrorist identity in the Terrorist Identities Datamart Environment. As a result, US-VISIT forwarded the information to the Terrorism Screening Center and made associations with previous applications for immigration benefits in the United States.

In FY 2010, ISTA will test and evaluate iris and facial recognition capabilities in an operational environment under the Multi-Biometric Technical Evaluation Project. This work will be coordinated with Science and Technology, the National Institute of Standards and Technology, DOD, CBP, and other DHS components and Federal partners. A final report will be distributed late in FY 2010.

### **FY 2011 Projected Accomplishments – Identity Screening Services**

US-VISIT will continue to provide the same level of service to stakeholders as in FY 2009 and 2010, while operating more efficiently to handle anticipated increases in workload.

#### Biometric Support Center

In FY 2011, the BSC will continue supporting existing end-users at the same service levels achieved in FY 2009 and FY 2010. To ensure that legitimate travel is not impeded and officer safety is not negatively impacted, it is critical that the BSC continue to provide fingerprint verification decisions on urgent requests in 10 minutes or less, non-

urgent verifications within 24 hours, and enrollment and verification of terrorism-related prints in 2 hours or less.

#### Data Integrity Group

The estimated number of records to be manually vetted in FY 2011 is 90,000, with approximately one-third being forwarded to ICE/CEU for law enforcement action. The hiring and training of additional contractors in FY 2010 will allow the DIG to manually review these additional records. With the increased staffing and additional vetting, the DIG expects to promote more than 50,000 records to the out-of-country watchlist in FY 2011 and perform Federal reviews on more than 48,000 validated in-country overstay records, resulting in quality investigative referrals to ICE. The DIG will maintain FY 2010 performance targets in FY 2011.

#### Law Enforcement and Intelligence

In FY 2011, LE&I will continue to provide research and coordination for all international and domestic programs that affect the IDENT watchlist. By the end of the 4th quarter of FY 2011, LE&I will also be able to provide up-to-date and comprehensive watchlist adjudication on all entry matches, and as resources permit, provide biometric intelligence reporting to DHS and the intelligence and law enforcement communities. LE&I will also initiate a robust training program to train and develop BTS officers and their awareness of the DHS border security enterprise.

LE&I will continue to support the Full-time Operational Support Environment at FY 2010 levels. This unit will consist of LE&I analysts capable of researching biometrically verified hits against IDENT data submitted by the FBI, contributing agencies, DHS entities, critical infrastructure facilities, and others to leverage biometric and biographic capabilities within IDENT. Capabilities developed in FY 2010 will continue as growing demand for analytical support of Criminal Master File-driven inquiries increases. This centralized decision center, providing one source of information for operational and tactical support all linked to a biometric, will consolidate and expand resources to compile overstay and watchlist encounter research allowing US-VISIT to provide more effective analysis, including trending, fraud detection, and risk-based decision support.

#### Information Sharing and Technical Assistance

In FY 2011, ISTA will increase the number of cooperative agreements with foreign partners that provide access to actionable information of appropriately vetted identity, criminal, civil, and immigration-related information. This will enrich the US-VISIT watchlist and provide its users useful information to make risk and eligibility decisions.

Information exchange with foreign governments enriches the US-VISIT watchlist as experience with the United Kingdom, Australia, and Canada demonstrates. More than 1,850 persons of interest were identified during a pilot exchange of 54,000 records, a 3.4-percent hit rate. If a similar result were obtained from the expected volume of foreign watchlist records (each country within the Five Country Conference will be able to match 3,000 against IDENT) US-VISIT plans to receive in FY 2011, this would be more than 2,200 hits that would not otherwise occur.

The Agreement for Preventing and Combating Serious Crime with Germany will provide the model for use with other VWP countries (Japan, Singapore, Korea, Brunei, Czech Republic, Latvia, Lithuania, Hungary, Slovakia, Estonia, Malta, Italy, Spain, and Portugal) as well as countries of interest (Mexico, Dominican Republic, Argentina, Iraq, Saudi Arabia, Yemen, Afghanistan, Ukraine, Thailand, India, Nigeria, Israel, and United Arab Emirates). US-VISIT is working with other U.S. Government components to pursue potential information sharing agreements using biometrics.

In FY 2011, ISTA will evaluate biometric technologies for combating determined, fraudulent efforts to defeat biometric identity verification systems as part of the ongoing Multi Biometric Technology Evaluation. This work will support US-VISIT’s review of multi-modal capabilities and the potential acquisition of next generation technologies. Increasing biometric capabilities through technology innovation and standards development (fingerprint, iris, face, vascular, DNA) will expand potential data sharing opportunities with countries that employ iris and facial recognition as their primary biometrics for identity management.

The portfolio of ISTA work plans adheres to the direction from the 9/11 Commission to expand information sharing efforts for people screening.

**Program Management Services**

<i>In thousands</i>	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>
Program Management Services	\$102,105	\$118,692	\$106,532

US-VISIT’s program management services provide Federal and contractor staffing to all direct mission activities, such as IDENT and ADIS O&M, projects, and identity screening services support to US-VISIT customers, as well as program support-based activities. The demand for US-VISIT services continues to grow along with the need for the workforce to deliver these services. Historically, US-VISIT has provisioned these services with the assistance of a large contingency of contracted resources. Staffing constitutes a major expenditure and comprises all Federal staff and program-level contractor personnel. Given the long-term prospects of the organization and the nature of many services delivered, US-VISIT proposes to transition a majority of the contract positions to Federal positions, in compliance with the DHS Balanced Workforce Strategy. This structured workforce approach will promote long-term continuity and achieve economic efficiencies. US-VISIT plans to utilize funds to establish an additional 200 government positions during FY 2010 and 2011. US-VISIT’s program management services provide mission-support resources, ensuring that appropriate strategic and operational planning activities, human capital, budget and financial management resources, program office IT technical support, acquisition policies and procedures, and administration and logistics are in place. These resources also provide funding for the program’s support of the DHS working capital fund.

Contributions of the Federal staff and program support contractors are presented in all sections of this justification to include systems O&M, identity screening services, project management, and investments.

### **FY 2009 Accomplishments – Program Management Services**

In FY 2009, US-VISIT built on earlier achievements by:

- Providing privacy policy support for new and ongoing projects to ensure the promotion of privacy best practices and the protection of personally identifiable information so that projects are sufficiently planned and developed to align with existing privacy statutes and regulations in accordance with the US-VISIT Enterprise Life Cycle Methodology and Capability Maturity Model Integration (CMMI) principles.
- Supporting analysis of DHS-wide policy and management initiatives, such as implementation of Homeland Security Presidential Directive 24, the first DHS Quadrennial Review, and the DHS Credentialing Framework Initiative.
- Developing a governance system allowing for effective input from Departmental stakeholders. The initial meeting of this external governance board was held on March 10, 2009, to coordinate with DHS customers to ensure that US-VISIT is meeting their biometric identification and analysis needs over the next 5 years.
- Processing privacy redress requests in an average of 15 days through June 30, 2009, against the target of 22 days.
- Serving as the DHS lead in the development of biometric standards, with primary focus on adoption of international standards to support current and future DHS capabilities.
- Changing the program's monthly contractor performance reviews from a focus on task-oriented data to project-oriented data, enabling closer control of projects' cost, scope, and schedule performance because the earned value management is more accurate and relevant.
- Cross-training the program analysts to perform Contracting Officer's Technical Representative duties. As the analysts become certified (via DHS-approved guidelines), their reviews of contractor reports and deliverables will be more stringent, will reflect their subject matter expertise, and will provide better contract oversight.
- Forming a contracts process action team to review the risks posed to US-VISIT meeting its operational goals by the various contracts, task orders, and interagency agreements. Planned actions will align with Federal acquisition best practices and result in increased competition in systems engineering, operations and maintenance, and program support to increase efficiency.
- Completing such steps as conducting briefings and training to meet the September 30, 2009, completion date for aligning US-VISIT lifecycle processes with newly issued guidance from DHS for the investment review process (Management Directive 102-01) and the standard DHS Systems Engineering Life Cycle.
- Establishing a quality management function responsible for implementing the process improvement plan developed in FY 2008. Quality management will ensure that process improvements are institutionalized across the organization.

- Demonstrating progress in addressing GAO open recommendations through active management of responsive mitigation plans. As of September 30, 2009, US-VISIT has either closed or demonstrated substantive progress in addressing 96 percent of all GAO recommendations.
- Increasing the methodological rigor and level of documentation within the US-VISIT Life Cycle Cost Estimate to better support the program during acquisition governance reviews.
- Incorporating the GAO Cost Assessment Guide into program cost estimating practices and further refined the US-VISIT planning, programming, and budgeting process.
- Improving the methodology underlying three key program performance measures to improve measurement validity, more accurately reflect program contributions, and increase managerial usefulness.
- Completing training governance for Federal partners in support of 10-print capture technology in compliance with training best practices.
- Initiating National Environmental Policy Act compliance analysis and documentation for land exit.
- Establishing the Environmental Management System, which complies with Executive Order 13423 and fulfills a commitment made in the programmatic environmental assessment. Personnel are fully trained and the improvement plan is being implemented.
- Coordinating materials distribution at the World Travel Market; developing and implementing “Welcome to the United States” Webinar providing US-VISIT updates to travel and tourism stakeholders for their distribution to international travelers worldwide.
- Implementing a strategic communications plan that will continue to educate stakeholders as US-VISIT evolves further into a biometric identity management services across Federal, State, local, and tribal agencies, and that works in collaboration with global partners. The program will ensure the ongoing awareness and understanding of US-VISIT’s capabilities and future offerings to key stakeholders—agencies, officials, organizations, media, and others interested in the program and the issues it helps to address.
- Participating in the July 2009 National Level Exercise which tested and refined Continuity of Operations (COOP) response capabilities and the ability of DHS to continue to function in the event of a major incident.

### **FY 2010 Planned Accomplishments – Program Management Services**

In FY 2010, US-VISIT plans to build on prior program management accomplishments by:

- Developing and implementing a plan to continue the DHS Balanced Workforce Strategy to increase Federal staff within current funding levels through organizational design, recruitment, selection, and on-boarding.
- Implementing acquisition strategies for the prime integrator support contract and the program management support contractor. In addition, an overall acquisition strategy will be developed to align with US-VISIT’s biometric support mission.

- Implementing DHS Directive 102-01 to improve implementation and oversight of acquisition practices for significant investments.
- Implementing program-level quality assurance and independent verification and validation functions to assess the implementation of program management processes and recommended improvements.
- Completing the US-VISIT Data Governance Strategic Plan and the supporting Data Governance Implementation Plan.
- Continuing required privacy impact assessments on new projects and programs and updating existing assessments on information systems that are more than 3 years old (i.e., IDENT and ADIS).
- Implementing the DHS and internal US-VISIT policies to reduce the risk of a privacy incident involving personal information.
- Presenting privacy training to ensure employee awareness of responsibilities to protect information against loss, theft, or misuse, as well as unauthorized access, disclosure, copying, use, modification, or deletion.
- Complying with the goal to address privacy redress requests within an average of 20 days or less.
- Developing the policy, process, and governance structure that allows for the efficient intake, assessment, and prioritization of new US-VISIT projects.
- Conducting an annual review of all individual performance plans in the context of the Human Capital Strategic Plan to ensure that employee goals support US-VISIT requirements.
- Implementing a more comprehensive training program to provide US-VISIT with a wider range of skill sets required to support its role as the central biometric identity management service for the Department.
- Establishing a record management capability in accordance with a DHS/Chief Administrative Officer strategic objective. US-VISIT will complete an inventory of records, develop & implement records management policies & procedures, and train US-VISIT staff to achieve full compliance OMB Circular A-130.
- Completing actions required to achieve full compliance with Executive Order 13423 on environmental, energy and transportation management.
- Providing the COOP training and support necessary to maintain existing plans in a readiness state.
- Implementing a global public education program to maintain and expand awareness, understanding, and acceptance of US-VISIT, and the enhanced border and immigration management system among travelers, the news media, and stakeholders, domestically and abroad.
- Providing updated versions of the US-VISIT Life Cycle Cost Model, with increasing detail, depth, and methodological rigor, to support program budget formulation and decision-making.
- Training program staff to comply with the standards and utilize the procedures of the GAO Cost Assessment Guide in the areas of program management and cost estimation.
- Assessing US-VISIT performance measurement practices against Software Engineering Institute (SEI) Capability Maturity Model Integration (CMMI) Level

- 2 Measurement & Analysis criteria and develop an improvement plan to assist the program in attaining SEI CMMI Level 2 Certification.
- Supporting US-VISIT facility planning efforts as US-VISIT continues to hire additional Federal staff and to support continued staffing growth in the near term.
- Updating the US-VISIT processes and procedures governing schedule management, risk management, and program management.

### **FY 2011 Projected Accomplishments – Program Management Services**

In FY 2011, US-VISIT projects to accomplish the following in the program management services and builds on prior accomplishments by:

- Continuing the DHS Balanced Workforce Strategy efforts to increase Federal staff within current funding levels through organizational design, recruitment, selection, and on-boarding.
- Performing SEI-led appraisal of organizational Level 3 maturity and selected CMMI Level 4 process areas against CMMI Acquisition Model (CMMI-ACQ) and addressing the weaknesses in the assessment findings.
- Continuing with an independent verification and validation review of cost, schedule, and technical baselines regarding leadership priorities, important project initiatives, and progress with identified problem areas.
- Implementing full earned value management on contracts within the US-VISIT program exceeding the dollar threshold.
- Moving all sustainment training courses to e-Learning format and piloting an organizational design.
- Deploying US-VISIT-wide organization design service.
- Conducting quarterly recruiting strategy reviews based on workforce analyses and annual sourcing strategy validation.
- Developing a career laddering communication initiative and enhancing the career development program and the success management process that includes cascading goals and new competencies.
- Assessing long-term human capital and training technology needs and identifying available solutions.
- Updating the acquisition plan as needed.
- Developing pre-award contract documentation through the acquisition lifecycle process such as statements of work, independent government cost estimates, and procurement requests.
- Performing technical evaluations and documenting the source selecting findings on received requests for proposals, request for information, or request for quotations.
- Preparing and executing contract award kickoff meetings and integrated baseline reviews.
- Updating the US-VISIT Program Management Execution Plans (Configuration Management, Schedule Management, Risk Management, and Document Management Plans) to strengthen execution activities across the US-VISIT Program.

- Continuing the staffing efforts for Program Management functions to achieve 85 percent or better on-board-to-vacancy ratio. (For comparison, the ratio as of January 2009 was 20 percent.)
- Preparing for and participating in an Acquisition Review Board with DHS Acquisition and Program Management Division.

**Data Center Mirroring and Migration**

<i>In thousands</i>	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request<sup>2</sup></b>
Data Center Mirroring and Migration	\$25,327	\$45,244	\$43,978

US-VISIT data center operations represent an integral component of the US-VISIT service delivery framework. Presently, US-VISIT systems are hosted in two DOJ data centers. This hosting includes physical area and rack space, service support, hardware maintenance, memory and storage capacity, data and backup management, operating system level support, disaster recovery, and fiber/cabling.

DHS deployed two enterprise data centers to achieve the IT infrastructure consolidation goal. For US-VISIT to assist in the Department’s goal, it must relocate systems and hosting services from the DOJ data centers in Dallas, Texas, and Rockville, Maryland. US-VISIT systems hosted in these data centers are not 100-percent redundant. Therefore, a “mirroring” approach is required before existing operations can be decommissioned. Mirroring requires acquiring and provisioning (i.e., “go-live”) equivalent capabilities presently in the DOJ data centers within one of the two DHS enterprise data centers before a DOJ data center hosting service can be decommissioned.

US-VISIT occupies 2 of the 17 DHS data centers targeted by the Secretary for the first wave of consolidation. US-VISIT must execute one of the highest priority migration efforts and the requested funding enables US-VISIT to meet baseline requirements and further departmental efforts toward achieving this critical IT infrastructure consolidation goal. Data center funds guarantee this critical initiative is met and redundancy requirements are in place as warranted.

**FY 2009 Accomplishments – Data Center Mirroring and Migration**

During FY 2009, the US-VISIT Data Center Mirroring and Migration (DCMM) initiative proceeded as planned, though complex dependencies as well as minimizing risks related to continuity of operations impacted the schedule in the latter half of the fiscal year.

---

<sup>2</sup> The US-VISIT program change for data center migration reflects the net change amount of a \$16.266M decrease from FY 2010 enacted US-VISIT funding for data center migration and a \$15M one-time enhancement from the consolidated DHS CIO data center funding.

US-VISIT completed the core infrastructure installation in the DHS Clarksville Data Center for the two-print matcher subsystem infrastructure, including the hardware and additional capacity to the matcher cluster for connecting the new DHS enterprise platform in the DHS Clarksville Data Center to legacy DOJ production platforms. The DCMM team also established monitoring capabilities for the expanded US-VISIT processing infrastructure regarding connectivity, transactions, and applications.

The matcher addition in the DHS Clarksville Data Center that was slated for the FY 2009 third quarter was delayed due to human resources and remote connectivity issues. This accomplishment is now expected to be completed in the first half of FY 2010.

The IDENT and ADIS database, storage, and backup infrastructure were installed in FY 2009 with final configuration and implementation targeted for early FY 2010. This implementation is dependent on other modernization activities, namely the DOJ Rockville Data Center Technical Refresh and the Oracle 11g migration.

Finally, in addition to the accomplishments noted above, the DCMM team also initiated the planning and engineering process to build the core infrastructure and establish required processes and procedures at the DHS Stennis Data Center to position it for forthcoming production deployment of US-VISIT systems and data in order to achieve performance-balancing objectives.

### **FY 2010 Planned Accomplishments – Data Center Mirroring and Migration**

The FY 2010 funding for US-VISIT for DCMM supports IDENT and ADIS system capacities from the organic growth of data capture, implement system, and processing reliabilities, and will meet critical deficiencies within the current IT infrastructure regarding transition from 2- to 10-print capture as implemented in FY 2009. US-VISIT will execute a high-priority mirroring and migration effort to overcome limited physical data storage growth within the existing data centers and to establish critical IDENT redundancies for workload leveling and disaster recovery during the first phase of mirroring and migration to the DHS enterprise data centers.

Planned accomplishments for the Data Center for FY 2010 include the following:

- Add remaining matchers to DHS Clarksville Data Center.
- Complete the deployment of the US-VISIT matcher cluster to DHS Clarksville Data Center, including the establishment of connectivity between data center and the legacy DOJ Data Center in Rockville, Maryland.
- Complete final configuration and installation of database in the DHS Clarksville Data Center in tandem with DOJ Rockville Data Center Technical Refresh and the Oracle 11g Migration.
- Establish data replication to legacy databases in the DOJ Rockville Data Center, including the establishment of monitoring capabilities for the expanded US-VISIT processing infrastructure regarding connectivity, transactions, and applications.

- Complete the DHS Clarksville Data Center migration and production processing cutover from the DOJ Dallas Data Center in Dallas, Texas. Build and test the Stennis Data Center Core Infrastructure. Decommission the DOJ Dallas Data Center for US-VISIT processing. Equipment at this data center will be redeployed to the DHS Clarksville Data Center to complete the data center activities and US-VISIT data-mirroring requirements.
- Redeploy matchers from the DOJ Dallas Data Center to the DHS Stennis Data Center.

**FY 2011 Projected Accomplishments – Data Center Mirroring and Migration**

The Data Center Mirroring and Migration Initiative will see a sustained level of effort in FY 2011. The activities are similar in that the process for migration of the first data center, which occurred in the FY 2009 and FY 2010 timeframe, is repeated for the second data center. Specific activities planned for FY 2011 include the following:

- Deploy and test WAN connectivity at DHS Clarksville Data Center
- Redeploy re-usable infrastructure
- Deploy and Test modernized 2-print Matcher Head for DHS Stennis Data Center
- Deploy and test modernized database infrastructure at DHS Stennis Data Center
- Deploy and test IDENT and ADIS production database replication services between DHS Clarksville Data Center and DHS Stennis Data Center
- Deploy, test, and transition to O&M database monitoring and management tools

**Unique Identity (UI) – Full Operational Capability**

<i>In thousands</i>	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>
Unique Identity (UI) – Full Operating Capability	\$63,027	\$28,700	\$25,852

The UI initiative includes integrated work streams for the national deployment of 10-print capture, conversion of IDENT from a 2-fingerprint matching system to a system that can utilize up to 10 fingerprints for matching and achieving interoperability between IDENT and stakeholder agencies, as well as initial investigations of potential iris and facial recognition capability enhancements. The objective of using 10-prints is to facilitate travel by reducing numbers of travelers sent to secondary inspection and provide more data on which to match, subsequently reducing false positive identifications. Further, there are greater opportunities to identify persons of interest since 10-prints are more likely to match latent fingerprints in criminal and intelligence biometric data stores of fingerprints collected at crime scenes or terrorist locations. Interoperability enlarges the biometric database used by both border management and law enforcement agencies. When used in conjunction with the 10-print initiative, it will enhance the ability to identify high-risk persons through its development of the ability to receive, link, store, and share information associated with an individual identity between DHS, DOJ, and DOD systems, as well as with biometric data from foreign governments.

US-VISIT funding supports continued delivery of 10-print interoperability between the DHS IDENT biometric database and the DOJ IAFIS biometric database. IDENT/IAFIS interoperability is a statutory and Department mandate. Interoperability is being achieved in three phases:

- 2006: interim Data Sharing Model (iDSM) completed
- 2009: Initial Operational Capability (IOC) completed
- 2014: Full Operational Capability (FOC) targeted for completion

Once completed, FOC will provide real-time services and data sharing between IDENT and IAFIS and will include the following functionality:

- *Shared-service component.* This functionality provides the ability to fully search IAFIS and IDENT for all FBI Criminal Justice Information System (CJIS) Division and DHS stakeholders. To enable this functionality, software enhancements are implemented to submit, receive, and process shared services messages from IAFIS and IDENT. Additional network functionality is required and system processing must increase to handle the shared services requests. This may include the addition of system processors, storage, and access management controls, and the enhancement or addition of various service-oriented architectures.
- *Wrap-back functionality.* This functionality notifies authorized agencies of subsequent criminal and/or civil data to an existing biometric record. This allows for:
  - authorized agencies to receive notifications of subsequent criminal activities for individuals after the initial encounter with the individual and to notify the responsible agency regarding criminal activity of the individuals in sensitive positions
  - the automatic transition of files between civil and criminal repositories
  - the ability to search civil records with remote latent fingerprint submissions
  - expanded and new search and response generation capabilities
  - collectively locating civil histories to facilitate the search, addition, consolidation, modification, expunging, response generation, and file maintenance of civil and criminal informationThis work requires designing and implementing new system processes through software enhancements and requires adding IDENT system resources including system processing, storage, and network services.
- *IDENT data response.* Based upon evaluation results from data collected during the IDR pilot, US-VISIT will examine the need to adjust components for the final IDENT data response (IDR) functionality, software enhancements/changes needed to process and send the IDR to IAFIS. US-VISIT will examine whether additional network functionality is required and system processing and storage should be increased to handle the packaging and submission of any increase in data transmitted.

- *Maintaining/improving accuracy and timeliness in the face of rising transaction volumes.* The increasing volume of transactions and the amount of stored biometric data adversely affects the accuracy and timeliness of biometric searches. The accuracy and timeliness of biometric searches are critically important and need to be maintained or improved. New biometric search algorithms, system transaction management techniques, and data access methods must be implemented to support the best possible IDENT accuracy and responsiveness. This work will include enhancements to current software, the transaction management systems within IDENT, and the design and implementation of additional hardware and network systems to support increased data volumes. FOC capabilities include adding improved system service requests, messaging, and compliance with the DHS/DOJ National Information Exchange Model enterprise-wide messaging standard.

### **FY 2009 Accomplishments - Unique Identity**

The 10-Print Full Deployment phase began in June 2008 and successfully completed its objective to deploy capability to collect 10 fingerprints from over 97 percent of in-scope travelers at 2,600 ports of entry by December 31, 2008.

Interoperability IOC was deployed on October 27, 2008. This capability provided a) an initial IDR to positive matches identified by IAFIS submissions to IDENT, and b) near real-time hit notifications and automated updates to the DHS shared data component (Expedited Removals and Category One Visa Refusals) to increase the value of data provided to all users.

Planning, analysis, and deployment of hardware and systems enhancements to support increased capacities resulting from larger Secure Communities Deployment were completed in March 2009. The initial deployment of Secure Communities capabilities to address deployment to the initial 52 locations was included in the IOC deployment in November 2008. It was anticipated that additional capacity would need to be built to address the addition of locations beyond these initial locations. As the result of the efficiencies identified, the initial deployment, in conjunction with modifications as part of other initiatives on the Unique Identity program, provided enough capacity to enable deployment to a significant number of additional locations without further investment.

US-VISIT completed requirements development for the record linking and wrap-back capabilities. CJIS requirements for corresponding capabilities are still under development.

Discussions with CJIS for increased sharing of additional IAFIS data sets resulted in identification of additional datasets whose use is currently under review by the Department of Justice Legal Counsel to assess privacy impacts.

In FY 2009, US-VISIT collaborated with DOD to outline requirements for data sharing and interoperability capabilities. These efforts were centered on two paths. The first is a

shared data element in which KSTs and other persons of interest are provided to US-VISIT for enrollment into IDENT and searched for any matches. Any matches of persons of interest are reported back to DOD and other anti-terrorism agencies for potential action. These transactions are not real-time because the subjects have been previously encountered and are not being held.

The second path is a transaction-based element. In this scenario, prints are collected by an entity encountering an individual and are transmitted to IDENT for search with an expectation of a result within a shorter, finite period to support a particular operation. This transaction is supported through improving the means for communicating between the Automated Biometric Identification System (ABIS), DOD’s biometric database, responsible for supporting the DOD ABIS community, and IDENT, including establishing dedicated transmission paths. Also included in this work are plans to automate system-to-system interactions, alleviating manual approaches when and where possible that will allow for searches of each system.

**FY 2010 Planned Accomplishments – Unique Identity**

Planned accomplishments for Unique Identity for FY 2010 include the following:

- Deploy multi-modal pilot, including development of an architecture and design of capabilities that can support identity services using multiple biometrics.
- Deploy 10-print matching capability – enhance matching capability from current 2-print standard to the ability to match based on 10 prints. This capability will enhance verification of an individual’s biometrics.
- Complete the deployment of IDENT data response, which provides State and local law enforcement with biometrically matched identity information.

**FY 2011 Projected Accomplishments – Unique Identity**

The projected accomplishments for Unique Identity in FY 2011 include the following:

- Complete the system to system interaction between IDENT and ABIS.
- Begin record linking design. This functionality allows for the retrieval of information from both IDENT and IAFIS with a single submission, minimizing the number of identification searches. This will allow for more efficient system searches thus improving operational efficiencies and improving response times. US-VISIT planning and analysis will occur in FY 2010, design and initial build activities in FY 2011, and deployment in FY 2012.

**US-VISIT 1.0**

<i>In thousands</i>	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>
US-VISIT 1.0	-	-	\$1,569

With the US-VISIT 1.0 initiative, the program is taking steps towards addressing system performance limitations and high O&M costs by analyzing multiple approaches to re-

architecting the current system to optimize performance and gain efficiencies. The current biometric identity matching system, IDENT, has grown to a very large scale because each new traveler to the U.S. must provide fingerprints as a condition of entry, while known travelers provide new fingerprints each time they enter the U.S. via air or sea carriers. It is projected that the IDENT fingerprint gallery (i.e., the fingerprint images available to the matchers) will continue to grow beyond the 114 million identities estimated at the end of FY 2009 and will reach a critical point of 250 million identities between 4 and 6 years from now. At 250 million identities, projections indicate that there will not be sufficient time to update fingerprint matcher memory with new fingerprint images (i.e. images that are better than those already in memory) and that IDENT will slow down to the point of becoming an ineffective tool.

As policy evolves to include much larger in-scope populations and new applications of biometric identity screening are identified, the current system will lag behind the need for real-time (i.e., 10 seconds) watchlist checks. Other transactions will be challenged, too; currently IDENT may take up to 2 minutes of service time to verify that an asserted identity matches the supplied fingerprints, but this time is projected to increase in the fact of IDENT growth estimates. This critical point is a fundamental limit of the IDENT architecture. Adding more matchers, more servers, more storage, or any of the other usual upgrades will not change this limit.

US-VISIT has two other legacy systems that face challenges as the number of daily transactions increases: ADIS and the Technical Reconciliation Analysis Classification System. These systems face their own scaling challenges that are significant both in terms of functional growth, ability to meet customer needs, and cost. More fundamentally, however, these systems both use and supply information that is or could be used by the biometric identity verification service provided by IDENT. It makes both functional and economic sense to provide a single flexible system that incorporates the functions of these three currently independent systems.

Current approaches to scaling the IDENT system are monolithic, (i.e., require costly modification to the entire system each time an enhancement is needed), involve costly proprietary components, and incur large and increasing costs for support hardware and O&M that are not sustainable.

O&M costs in FY 2011 for IDENT, ADIS, and corporate systems are projected to be \$128.1 million, compared to \$86.2 million in FY 2009. O&M cost growth is attributable to the current approach to adding system scale requiring the continuous acquisition and maintenance of servers and fingerprint matchers to keep pace with transactional and storage size growth. Each time system scale is added, there is a need for development support to accommodate new requirements and additional data center space to accommodate more IT infrastructure. At the current rate of growth and within current resource levels, US-VISIT will require two-thirds of its total program resources to maintain systems with limited scalability and capacity. This scenario will increasingly prevent further investment in innovation and efficiency, as investment dollars will be

consumed by O&M at an increasing rate each year, especially as the size and speed of these systems are scaled up.

The objective of US-VISIT 1.0 is to improve system performance while reducing O&M costs by at least 30 percent annually; leading to a break-even point for the investment roughly 4 years after full operating capability is achieved, based on O&M savings alone. Expected improvements to systems performance, including reduced response times, may yield additional productivity benefits to system users that will be quantified in an economic analysis planned for FY 2013. The combination of higher performance and lower ownership costs are expected to benefit not only US-VISIT, but customers throughout DHS, and DOS, DOD, DOJ, and international data sharing partners as well, while providing greater flexibility in support of new or changed policies.

**FY 2011 Projected Accomplishments – US-VISIT 1.0**

The requested resources will enable US-VISIT to develop a complete requirements base regarding fingerprint, face, and iris multi-biometric high-speed matching and design logic, a model target architecture, and to validate the targeted architecture with specific prototypes.

**Comprehensive Biometric Exit**

<i>In thousands</i>	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>
Comprehensive Biometric Exit	-	22,000	-

Comprehensive Biometric Exit is chartered to develop a capability to collect biometrics (e.g., finger scans, photographs, etc.), of in-scope travelers departing the U.S. by air, sea, and land. When implemented, DHS can be more certain that an individual departed the U.S. and will be better able to match the individual’s exit record to the entry record. This will ensure that future decisions requiring eligibility determination for visa renewals, subsequent applications for admission to the U.S., and adjudications of immigration benefit applications are fully informed.

This entry/exit capability is critical to safeguarding against possible fraudulent or nefarious activities by unauthorized travelers seeking access to the U.S. through its air, sea, or land POEs. Currently, law enforcement and immigration specialists rely on biographic processes for recording departures, which may not capture accurate or current traveler identification. Their reliance on biographic information alone does not ensure the identity of the person who submitted the biographic information. Without biometric identity verification the ability to determine overstays is impacted, resulting in inefficient resource use by DHS components working to locate potential overstays who may have departed the country. Additionally, there is a compliance gap with the VWP, as existing departure processes do not allow a comprehensive picture of VWP traveler compliance regarding overstay rates and thereby adversely impact VWP eligibility determination or validation.

A notice of proposed rulemaking (NPRM) was published on April 24, 2008, addressing the collection of biometric data from aliens departing from air and sea ports. The proposed rule provided that commercial air carriers and cruise line owners and operators would collect and transmit international visitors' biometric information to DHS within 24 hours of their departure from the U.S. The 2009 Appropriations Act required that at least two pilots be conducted. One pilot required the airlines to collect and transmit biometric exit data, as proposed in the NPRM, and a second pilot required CBP to collect biometric exit data at the departure gates. A third US-VISIT pilot was added by the Department but was not directed specifically in the 2009 Appropriations Act. It required TSA to collect biometric exit data at the security checkpoint. The CBP and TSA pilots were conducted as planned, May 28-July 2, 2009. US-VISIT was unable to conduct a pilot in which airlines would collect and transmit biometric exit data as proposed in the NPRM. While US-VISIT has engaged in many discussions with the airline industry on several levels, no airline would agree to participate in the pilot. Therefore, DHS directed US-VISIT to move forward in absence of an airline and to conduct the pilot with only TSA and CBP.

#### **FY 2009 Accomplishments – Comprehensive Biometric Exit**

During FY 2009, US-VISIT, TSA, and CBP successfully completed two air exit pilots. The results were evaluated and distributed in an evaluation report that was delivered to Congress in October 2009. Included in the evaluation report were the results from two test scenarios that were completed in early July 2009. These scenarios assessed alternative business processes for collecting biometric information from in-scope travelers departing the U.S. from air POEs and deployed associated reporting capabilities to support analysis.

#### **FY 2010 Planned Accomplishments – Comprehensive Biometric Exit**

Once a decision is reached on the best solution, US-VISIT will use the unobligated balance of prior year appropriations and the FY 2010 appropriation to begin the implementation of a biometric air/sea solution. When a final rule is issued, US-VISIT will have implementation milestones available.

## IV. Program Justification Changes

**Department of Homeland Security  
National Protection & Programs Directorate  
US-VISIT  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Decrease:** Comprehensive Biometric Exit  
 PPA: United States Visitor and Immigrant Status Indicator Technology  
 Program Decrease: Positions 0.0, FTE 0.0, Dollars \$-22000.0

### Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	22,000
Program Decrease							-	-	(22,000)
<b>Total Request</b>	-	-	-	-	-	<b>22,000</b>	-	-	-

### Description of Item

Comprehensive Biometric Exit is chartered to develop a capability to collect biometrics, (e.g., finger scans, photographs, etc.) of departing in-scope travelers by air, sea, and land. During FY 2009, US-VISIT, TSA, and CBP successfully completed two air exit pilots. The results were evaluated and distributed in an evaluation report that was delivered to Congress in FY 2010. While the Comprehensive Biometric Exit project remains a top priority to DHS and Congress, DHS did not submit a request for the project in FY 2011 pending policy decisions regarding the long-term exit solution.

### Justification

Once a decision is reached on the best solution, US-VISIT will use the unobligated balance of prior year appropriations and the FY 2010 appropriation to begin the implementation of a biometric air/sea solution. When a final rule is issued, US-VISIT will provide the critical implementation milestones and associated resource requirements.

### Impact on Performance

This investment addresses data accuracy gaps as they pertain to an alien and the matching of his or her travel records (i.e., exit record accurately matched to an entry record for aliens subject to US-VISIT processing). The benefit of this capability is that it closes the gaps in traveler data, thereby informing CBP officers and ICE for admissibility and immigration purposes. This entry/exit capability is critical to safeguarding against possible fraudulent or nefarious activities by unauthorized travelers seeking access to the U.S. through its air, sea, or land POEs. Currently, law enforcement and immigration

specialists rely on biographic processes for recording departures, which may not capture accurate or current traveler identification. Their reliance on biographic information alone does not ensure the identity of the person who submitted the biographic information. Without identity verification the ability to determine overstays is impacted, resulting in inefficient resource use by DHS components working to locate potential overstays, who indeed may have departed the country. Additionally, there is a compliance gap with VWP, as existing departure processes do not allow a comprehensive picture of VWP traveler compliance regarding overstay rates and thereby adversely impact VWP eligibility determination or validation.

The FY 2011 request allows for sufficient time to satisfy the policy and regulatory evaluation processes associated with addressing the capability gaps mentioned above. The benefit of time spent gaining clarity and acceptance on a long-term exit solution is the selection of a path forward that best meets the needs of DHS, the transportation industry, and the traveling public.

**Department of Homeland Security  
National Protection & Programs Directorate  
US-VISIT**

**Justification of Program Changes**

(Dollars in Thousands)

**Program Decrease:** Data Center Mirror and Migration

Program Decrease							-	-	(1,266)
<b>Total Request</b>	-	-	<b>25,327</b>	-	-	<b>45,244</b>	-	-	<b>43,978</b>

Description of Item

The DCMM project was initiated in direct response to the DHS Enterprise Architecture Transition Plan that outlines goals for consolidating and closing selected component data centers as part of achieving one DHS IT infrastructure. As part of the plan, US-VISIT must migrate its systems currently hosted at two DOJ data centers to DHS data centers by FY 2012. By establishing two enterprise data centers and consolidating the more than 20 component data centers into these DHS centers, DHS will eliminate duplicative infrastructure, services, and achieve significant economies of scale.

US-VISIT capabilities are successfully used by many agencies, both internal and external to DHS, and within the immigration, border management, intelligence, and law enforcement communities. In FY 2008, US-VISIT processed more than 47 million biometric transactions for its user agencies. As a result, more than 277,000 individuals were biometrically matched against the US-VISIT watchlist. The ability to biometrically identify greatly reduces identity fraud and provides DOS consular officers, CBP and Border Patrol officers, ICE agents, USCG personnel, and others with valuable information to make risk assessments. US-VISIT's biometric information has contributed to denial of visas, refused entry at U.S. POEs, and denial of immigration benefits, as well as arrests and deportations.

Entry and exit matching capabilities of ADIS is a critical resource to US-VISIT data integrity analysis providing overstay leads to ICE. Between FY 2007 and 2008, ICE arrests based upon US-VISIT referrals more than doubled to 715, while the port and visa refusals based upon US-VISIT lookouts tripled to more than 1,400.

### Justification

The FY 2011 budget request continues data center mirror and migration efforts. The DCMM project will provide 100-percent data center redundancy for IDENT and ADIS by FY 2012, ensuring continuity of operations in the event of an unplanned outage of services. IDENT and ADIS are mission critical DHS systems and neither system's customers can tolerate an interruption of services, yet at present the time, these systems are approximately 50-percent redundant in their current data center hosting environments. This project addresses the data center redundancy gap and is critical to enhancing DHS' overall disaster recovery posture. At the same time, this initiative will provide a modernized architecture for IDENT and ADIS, which will be consistent with the DHS data center consolidation objectives as set forth by the Chief Information Officer. Each DHS data center will contain identical IDENT and ADIS systems, resulting in mirrored systems and 100-percent redundancy.

To maintain US-VISIT service level agreements, US-VISIT will provide operational funding for both the DOJ and DHS data centers. This funding will continue until the DHS data centers are established with hardware, software, and tested prior to a full service failover. In FY 2010, US-VISIT anticipates to perform a full service failover which will result in the decommissioning of the US-VISIT systems and services in the DOJ Dallas Data Center.

### Impact on Performance

By the end of FY 2010, US-VISIT will have successfully completed its data center migration from the DOJ Dallas, Texas, data center to the DHS EDS data center. This migration from the DOJ Dallas data center marks the achievement of 50 percent of the data center consolidation objective for US-VISIT. In order to accomplish this, US-VISIT is building out technical capability for the DHS EDS data center and will decommission US-VISIT computing platforms and redeploy equipment where appropriate.

FY 2011 funding allows US-VISIT to successfully complete data center migration from the DOJ Rockville, Maryland, data center to the DHS Stennis Data Center. This data center migration marks the achievement of 80 percent of the data center consolidation objective for US-VISIT. In order to accomplish this, US-VISIT is required to build out technical capability for the DHS enterprise data center in Stennis, Mississippi, to decommission US-VISIT computing platforms, and to redeploy this equipment where appropriate.

The DCMM project reduces the probability of an interruption of service to US-VISIT system users and enhances the ability of other DHS components, including ICE, CBP, USCG, TSA, USCIS, and other Federal agency users, including DOS and DOJ's Federal Bureau of Investigation, to accomplish their missions. The project enables US-VISIT to improve its data center redundancy for the IDENT and ADIS systems from approximately 50 percent to 100 percent and provides systems disaster recover and enables operations continuity.

**Department of Homeland Security  
National Protection & Programs Directorate  
US-VISIT**

**Justification of Program Changes**

(Dollars in Thousands)

**Program Decrease:** Identity Screening Services  
 PPA: United States Visitor and Immigrant Status Indicator Technology  
 Program Decrease: Positions 0.0, FTE 0.0, Dollars \$-650.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	31,000
Program Decrease							-	-	(650)
<b>Total Request</b>	-	-	<b>20,000</b>	-	-	<b>31,000</b>	-	-	<b>30,350</b>

Description of Item

Identity Screening Services provides oversight and business management of the IDENT and ADIS systems, real-time human biometric verification services, overstay analysis, and updates and maintenance to the US-VISIT watchlist. Fingerprint examiners provide real-time verification that supplements automated system matching. Data integrity analysts work with ADIS information and data from other systems to identify and verify overstay violators. LE&I staff coordinate with Federal, State, local, and tribal law enforcement and intelligence agencies to improve accuracy and usefulness of the US-VISIT watchlist. Collectively, these identity screening services support and provide reliable and actionable information to US-VISIT customers and stakeholders.

Information sharing and technical assistance efforts support engagement with foreign governments' immigration and border components. This interchange provides technical assistance with biometric standards and emerging biometric technologies. Engagements with foreign partners expand the US-VISIT model and result in data sharing.

Justification

US-VISIT requests funds to maintain the same levels of services for biometric identification, watchlist and overstay management, and the continued operation of a 24/7 biometric support center. These funds will provide an integrated, timely delivery of information, and further improve the immigration screening capabilities through cooperation with foreign immigration services.

US-VISIT will continue to provide real-time human biometric verification, data integrity, and law enforcement and intelligence services at FY 2009 levels. These services will be provided through the efforts of expert analysts in researching biometric and biographic data, including data submitted by the FBI, DHS, critical infrastructure facilities, and other

contributing agencies. US-VISIT data analyses provide requesting agencies with the additional biographic, immigration, derogatory, and intelligence information to support their missions and decision-making processes.

As part of the IDENT/IAFIS Interoperability initiative, 10-prints collected through the CBP primary inspection process are checked against the FBI Criminal Master File (CMF) database requiring analytical support to determine if the record causing the hit should be promoted and remain on the IDENT watchlist. US-VISIT will continue to support services commensurate with the growing demand for analytical services and support for the CMF-based inquiries to provide one source of information for operational and tactical support linked to biometrics.

#### Impact on Performance

The BSC, DIG, and LE&I will continue to support existing customers at the same service levels achieved in FY 2010.

<b>Total Request</b>	<b>150</b>	<b>131</b>	<b>102,105</b>	<b>212</b>	<b>199</b>	<b>118,692</b>	<b>412</b>	<b>399</b>	<b>106,532</b>

Description of Item

US-VISIT program management services provide Federal and contractor staffing to all direct mission activities, such as systems O&M, projects, and identity screening services support to US-VISIT customers, and program support-based activities. US-VISIT staffing constitutes a major expenditure and comprises all Federal staff and program-level contractor personnel. US-VISIT program management services provide mission resources ensuring that appropriate strategic and operational planning activities, human capital, budget and financial management resources, program office IT technical support, acquisition policies and procedures, and administration and logistics are in place and available to support overall program direction and control.

Program management services funds recurring costs such as facilities, rent, and the working capital fund. These resources also provide funding for the US-VISIT enterprise architecture and IT security efforts in support of DHS policy direction.

Justification

US-VISIT will sustain the performance necessary to meet a variety of performance targets, including the following examples:

- The percentage of authorized Government billets filled should be 85 percent or better.
- The average time from recruitment to tentative job offer should be less than 55 days.
- Quarterly obligation targets and carryover of not more than 10 percent of available fiscal year dollars should be achieved.
- The average processing time for a privacy redress request should not exceed 22 working days.

Further planned milestones for improving program management include:

- Early in the fiscal year, perform SEI-led appraisal of organizational Level 3 maturity and selected CMMI Level 4 process areas against model CMMI-ACQ. Address weaknesses the remainder of the year.
- Continue with an independent verification and validation review of cost, schedule, and technical baselines regarding leadership priorities, important project initiatives, and progress with identified problem areas.
- Achieve full earned value management disclosure covering all contracts within the US-VISIT program.
- Move all sustainment training courses to e-Learning format and pilot an organizational design.
- Pilot organization design for select US-VISIT branches.
- Deploy US-VISIT-wide organization design service.
- Conduct quarterly recruiting strategy reviews based on workforce analyses and annual sourcing strategy validation,
- Develop career laddering communication initiative and enhance the career development program and the success management process that includes cascading goals and new competencies.
- Assess long-term Human Capital and Training technology needs. Identify available solutions.
- Prepare program for SEI evaluation under the CMMI standards for measurement and analysis.

US-VISIT evaluated end-state staffing levels for FY 2011, and a Federal staff realignment is requested for 200 positions. No additional funding will be requested for the Federal positions, as the funding for the positions will be offset by reductions to program funds.

#### Impact on Performance

The reduction to US-VISIT program management services requires US-VISIT to reduce a portion of the support functions currently performed by contractors. US-VISIT has evaluated appropriate Federal staffing levels and is utilizing program funding to offset hiring of additional Federal staff to mitigate the reduction of contractors. If there are hiring delays, functions that will be impacted include subject matter expertise in strategic and operational planning, performance budgeting and financial management, human capital management, audit coordination and resolution, systems engineering and IT security, continuity of operations, and independent validation and verification.

Description of Item

US-VISIT Systems O&M provides operations and support for three O&M investments:

IDENT is the largest fingerprint repository and most efficient matching system in the world. It can process up to 200,000 transactions per day for DHS, DOS, and DOD; Federal, State, and local law enforcement agencies; and other stakeholders. Currently, IDENT stores more than 106 million individual fingerprint records that contain biometric data for legitimate travelers to the United States, immigration benefit seekers, and immigration violators. It contains watchlist data: information on KSTs, criminals, sexual offenders, domestic and international fugitives, officer safety threats, military detainees, immigration violators, other persons of interest, and other egregious offenders. IDENT receives a subject's fingerprints, stores them via an enrollment transaction, and compares them against stored fingerprint records. Results are provided to end users to help determine identity in 10 seconds or less against the subsets (highly actionable) of the watchlist.

IDENT O&M costs include support for application-related components: servers, matchers, storage required to meet expanding gallery size and transaction volumes, and service, including a 24/7 Help Desk and system uptime maintenance at 99 percent or better. Gallery size (stored fingerprints) is the primary cost driver. Increased gallery size requires additional data storage and equipment to maintain IDENT's matching speed. O&M costs continue increasing as IDENT is adjusted to support fingerprint database expansion and a yearly growth rate of at least 18 million new fingerprints.

ADIS is an electronic system that collects information about noncitizens traveling to the United States. This includes arrival and departure border crossings and immigration status updates for each traveler. ADIS receives information from multiple systems, some

of which are from government organizations external to US-VISIT, and matches events to a unique person to create a complete record of events during their arrival, stay, and departure from the United States. ADIS matches departures with arrivals to ascertain compliance, stores travel and status adjustment records, and provides a range of ad hoc queries and reporting capabilities. ADIS incorporates additional data elements and transactions associated with all US-VISIT systems and other immigration systems to maintain complete traveler histories. ADIS maintains travel histories for more than 200 million alien travelers. The data collected includes key biographic and biometric identifiers and the processing of information provided to law enforcement and other stakeholders. ADIS receives 100 percent of all system-confirmed arrivals and all air/sea arrival and departure manifests, along with I-94/I-94W departure records. ADIS also receives status updates from the USCIS Computer Linked Application Information Management System 3 and the ICE Student and Exchange Visitor Information System on aliens and changes to their immigration status.

ADIS O&M costs include support for infrastructure management (hardware), application management (product support and help desk support), and network and data center support. Services are growing to support more stakeholders and users, including a 24/7 Help Desk and system uptime maintenance at 99 percent or better.

Corporate Systems – IT Infrastructure includes:

- All US-VISIT corporate hardware maintenance including software tools and campus infrastructure upgrades
- Corporate Systems Help Desk
- Corporate Network Services – including the Project Office Network and LAN
- Corporate Systems maintenance agreements for US-VOICE, DOORS, Portfolio Management, IMP/IMS, Microsoft EA, Oracle, and LE&I

Continual O&M support of applications and systems ensures US-VISIT's functional capability and safeguards the service and performance levels of US-VISIT as a "system of systems." As a DHS enterprise service provider, US-VISIT currently supports a growing user base, which includes DHS customers as well as interagency and international stakeholders.

#### Justification

FY 2011 funding is necessary to support current services related to IDENT record enrollment and transaction processing, demand which is expected to trend upward significantly by FY 2010 and level off in FY 2011. FY 2011 O&M resources provide the continuation of a hardware refresh program initiated in FY 2010 to replace portions of the original two-print fingerprint matcher hardware inventory that supports IDENT biometric identification capabilities.

Current Services Growth – Three factors contribute to IDENT's sustained growth in O&M: increasing transaction volumes, fingerprint gallery size growth, and maintaining safe levels of system capacity in the face of continuous growth. Approximately one of every three travelers encountered results in an enrollment record (two-thirds will already

be enrolled). For FY 2011, US-VISIT projects a gallery size growth of 18 million records. US-VISIT must continue investing in hardware and software allowing consistent search and match performance against an exponentially growing gallery to meet existing service-level agreements.

*Fingerprint Matcher Hardware Refresh* – The IDENT fingerprint matcher subsystem was developed and implemented prior to the US-VISIT Program’s first major milestone: the January 2004 delivery of biometric identification and screening services to air and sea POEs. The fingerprint matcher hardware acquired in FY 2004 has a useful life of 3 to 5 years. The program is initiating a phased hardware refresh of the matchers and plans to replace 20 percent of the original matcher inventory with the FY 2010 increase—part of a 5-year refresh plan. The hardware refresh requires increases in operations support for IDENT database administration, software licenses, and application management support.

#### Impact on Performance

US-VISIT’s capabilities are successfully used by many agencies, both internal and external to DHS and within the immigration, border management, intelligence, and law enforcement communities. Maintaining appropriate levels of O&M funding is critical to enabling IDENT and ADIS to continue to provide biometric and biographic matching capabilities to US-VISIT users in line with past performance. To minimize impact to customers, the reduction to US-VISIT O&M will require US-VISIT to extend a portion of the two-print fingerprint matcher refresh program for an additional year. This will have a negligible impact on performance since only a portion of the planned FY 2011 replacement will be required.

In FY 2009, IDENT processed more than 54 million biometric transactions for its user agencies. As a result, more than 302,553 individuals were biometrically matched against the US-VISIT watchlist in FY 2009. The ability to biometrically verify identity greatly reduces identity fraud and provides consular officers, CBP officers, Border Patrol officers, ICE agents, USCG personnel, and others with valuable information upon which to make risk assessments. US-VISIT biometric information contributed to the denial of visas, refused entry at U.S. ports of entry, and denial of immigration benefits, as well as arrests and deportations.

ADIS entry/exit matching capabilities are a critical resource to US-VISIT analysts, providing overstay leads to ICE. Between FY 2007 and 2008, ICE arrests based upon US-VISIT referrals more than doubled to 715, while the POE and visa refusals tripled to more than 1,400 based on information provided by US-VISIT. FY 2009 production rates continue to match or exceed the FY 2007-2008 experience; through the end of FY 2009, there were 568 ICE arrests based upon US-VISIT referrals and more than 2500 port and visa refusals based upon US-VISIT lookouts. US-VISIT tracks watchlist and lookout hits as well as the actions its customers take using the information it provides, including law enforcement actions. However, the program does not set future year targets for this type of output measure because multiple external factors influence its customers’ actions, which are outside the program’s control.

Description of Item

US-VISIT will complete deployment of the modernized IDENT in FY 2010. This contemporary architecture takes the original monolithic IDENT architecture and re-deploys several functions as discrete components as the program deploys a Service Oriented Architecture (SOA). This is only a preliminary step, however, in developing the scalability required to process the increased transaction volumes expected in coming years.

With the US-VISIT 1.0 initiative, the program is taking steps towards addressing system performance limitations and high O&M costs by analyzing multiple approaches to re-architecting the current system to optimize performance and gain efficiencies. It is projected that the IDENT fingerprint gallery (i.e., the fingerprint images available to the matchers) will continue to grow beyond the 114 million identities at the end of FY 2009 and will reach a critical point of 250 million identities between 4 and 6 years. At 250 million identities, projections indicate that there will not be sufficient time to update fingerprint matcher memory with new fingerprint images (i.e., images that are better than those already in memory) and that IDENT will slow down to the point of becoming an ineffective tool.

To mitigate these capacity concerns and to mitigate the increasing cost of maintaining IDENT, US-VISIT continually evaluates emerging and anticipated technologies. US-VISIT plans to leverage its modernized, “building block” architecture to evaluate and integrate the newest and future technologies. The US-VISIT 1.0 system will increase the capacity of US-VISIT to provide identity-matching services to facilitate travel and trade by handling more transactions (up to 10 times more) more quickly (a goal of a uniform service level agreement of 10 seconds for all transaction types) than US-VISIT is able to accommodate today. The reduced hardware footprint will result in a “greener” US-

VISIT environment through reduced hardware. Data center cost reductions are currently projected to be approximately 30 percent; however, this estimate must be confirmed by more rigorous economic analysis. US-VISIT anticipates a reduction in server acquisition and maintenance costs of at least 30 percent, reducing the total cost of ownership of the US-VISIT identity services support systems substantially while supporting up to 10 times more transactions to meet existing and new policy requirements. The combination of increased capacity and reduced costs will yield a much lower cost per match than is seen with current systems. US-VISIT 1.0 will allow for more comprehensive searches of the biometric gallery: the entire gallery will be subject to every search, in contrast to current segmented searches.

#### Justification

The requested resources will enable US-VISIT to develop a complete requirements base regarding fingerprint and other multi-biometric high-speed matching and a model target architecture, and to validate the targeted architecture with specific prototypes. When completed, the requirements will be used to develop a business case and economic analysis.

#### Impact on Performance

Better use of virtualized hardware and software will reduce O&M lifecycle costs for data center support, labor, hardware replacement, and maintenance agreements, and will allow the Government to better control these costs. US-VISIT anticipates a minimum of 30-percent savings in these areas and will confirm savings in the economic analysis before proceeding with any acquisitions. This estimate is based on a conservative estimate of a 3:1 hardware savings by virtualized hosting of applications currently allocated on a 1:1 basis to hardware. It is reasonable to expect, based on wide industry experience, that a sizable minority of server consolidation via virtualization may exceed the 3:1 ratio and may reach 5:1 or 7:1 without material impact on performance under current load conditions. Sophisticated monitor and control software available as commercial-off-the-shelf will be utilized to maintain a view of and automated control over the operational status of each virtualized environment to assure an automated fail-over and restart of any transaction that does not complete normally.

The use of nonproprietary fingerprint matching algorithms deployed on commodity high-performance hardware will dramatically reduce or eliminate vendor lock-in and will reduce the current acquisition and O&M costs associated with vendor proprietary hardware and software. Full nonstop fail-over capability will be achieved for much less cost than a similar capability implemented with current vendor offerings. The next generation architecture will reduce matching response times for many of the fingerprint transactions as the gallery expands from 114 million fingerprints at the end of FY 2009 to an eventual 500 million identities defined with one or more biometrics (fingerprints, iris, vein, or facial) and biographic information.

In addition, the US-VISIT 1.0 system will increase US-VISIT's capacity to provide identity-matching services to facilitate travel and trade by handling more transactions (up to 10 times more) more quickly (a goal of a uniform service-level agreement of 10

seconds for all transaction types) than US-VISIT is able to accommodate today. The combination of increased capacity and reduced costs will yield a much lower cost per match than is seen with current systems. US-VISIT 1.0 will allow for more comprehensive searches of the biometric gallery: the entire gallery will be subject to every search, in contrast to current segmented searches.

Description of Item

As DHS biometric service provider, US-VISIT plans to continually expand capabilities for biometric verification of identity, as well as interoperability with pertinent databases and the watchlist. US-VISIT’s initial focus was on achieving matching capabilities with the FBI IAFIS. This effort continues to expand into development of additional exchange opportunities with the FBI.

US-VISIT will investigate biometric identification technologies, such as iris and facial recognition, to review the merits of potentially developing interoperability with other biometric identification systems.

Justification

The requested resources will enable US-VISIT to:

- *Deploy civil search capability*, enabling full noncriminal justice purpose searches of IAFIS and IDENT for all FBI CJIS and DHS stakeholders, providing access to more than 60 million images in FBI civil fingerprint files captured and stored as part of background checks for employment, licensing, and other non-criminal justice purposes.
- *Deploy record linking functionality*, allowing for the retrieval of information from both IDENT and IAFIS from a single transaction while minimizing the number of identification searches. This will allow for more efficient system searches, thus improving operational efficiencies and improving response times. The use of a “person-centric” identifier will link fingerprint records common to both IDENT and IAFIS. The development and deployment of this capability has a significant dependency on the FBI’s Next Generation Identification which will update IAFIS.

US-VISIT planning and analysis will occur in 2010, design and initial build activities in FY 2011, and deployment in FY 2012.

Impact on Performance

Expanded interoperability and biometric identification technologies provide US-VISIT's users with more comprehensive, accurate, and cost-effective identification and watchlist matching capabilities. The enablement of record linking with previously deployed capabilities will allow for automatic notification of the addition of subsequent criminal or civil data to be recorded. This will provide additional, near real-time encounter information on the individual, such as new criminal information, and improve DHS' decision-making with regard to admissibility decisions and enforcement actions.

The deployment of civil search capability will better help authorities determine when individuals have misrepresented their identities or travel histories and enhance the quality of decision-making. Civil search will enable full vetting against a maximum of Federal information on criminal and immigration history. Individuals in positions of public and private trust that significantly impact the public and Nation will be vetted for criminal history, immigration history, and will have their identities verified. This will lower risk by ensuring that individuals in these positions have no derogatory information that would impact and inhibit their ability to perform the functions of their position.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

#### **Department of Homeland Security National Protection and Programs Directorate**

#### **Justification of Proposed Changes in United States Visitor and Immigrant Status Indicator Technology Appropriation Language**

For necessary expenses for the development of the United States Visitor and Immigrant Status Indicator Technology project, as authorized by section 110 of the Illegal Immigration Reform and Immigration Responsible Act of 1996 (8 U.S.C. 1365a), [\$372,762,000] \$334,613,000 to remain available until expended. [: Provided, That of the total amount made available under this heading, \$75,000,000 may not be obligated for the United States Visitor and Immigrant Status Indicator Technology project until the Committees on Appropriations of the Senate and the House of Representatives receive a plan for expenditure, prepared by the Secretary of Homeland Security, not later than 90 days after the date of enactment of this Act that meets the statutory conditions specified under this heading in Public Law 110-329: Provided further, That not less than \$28,000,000 of unobligated balances of prior year appropriations shall remain available and be obligated solely for implementation of a biometric air exit capability.]

#### **Explanation of Changes:**

Request removing spend plan requirement withholding funds, as well as language describing use of prior year appropriations for biometric air exit.

### PPA Mission Statement

The mission of the United States Visitor and Immigration Status Indicator Technology (US-VISIT) program is to provide biometric identification through the collection, maintenance, and sharing of biometric information and selected biographic data to authorized DHS, Federal, State and local government and law enforcement agencies in support of the DHS mission. Through its use of biometrics, US-VISIT collects, stores, and shares digital fingerscans and digital photographs for subsequent verification. This biometric information is paired with biographic information used to establish and verify an individual's identity, as well as vet that identity against criminal and immigration violator watchlists. US-VISIT also analyzes biographic data for identification of potential overstays.

### Summary Justification and Explanation of Changes

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
11.1 Total FTE & personnel compensation	13,794	23,467	40,530	17,063

The salaries and benefits request includes an increase of \$23,724,000 for 399 FTEs, proposed cost of living

allowance, medical benefits, and other mandatory personnel entitlements including the annualization of the 2010 cost of living increase of \$93,000, the 2011 cost of living increase of \$315,000. The increase of 200 FTEs is funded by an offset to the program/contract funds.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.3 Other than full-time permanent	398	375	415	40

See note in 11.1

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
21.0 Travel and transportation of persons	327	400	400	-

The travel and transportation of persons request includes funding of \$400,000 for travel and transportation costs of Government employees and other persons, while in an authorized travel status, which are subject to regulations governing travel, and includes incidental travel expenses such as baggage transfer, telephone expenses, and other expenses as authorized.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
22.0 Transportation of things	120	155	155	-

The transportation of things request includes funding of \$155,000 for the care of things while being transported, and includes other related expenses such as freight and express charges, transportation handling, and mail charges for express package services and postage.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.1 Rental payments to GSA	3,575	3,600	3,664	64

The rental payments to General Services Agency (GSA) request includes funding of \$3,664,000, an increase of \$64,000, for all payments to GSA for rental of office space and rent related services.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.2 Rental payments to others	2,825	2,800	2,800	-

The rental payments to others includes funding of \$2,800,000 for payments to a non-Federal source for rental space in support of the US-VISIT mission.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.3 Communications utilities and miscellaneous charges	586	600	600	-

The communications, utilities, and miscellaneous charges request includes funding of \$600,000 for payments for information technology, utilities and miscellaneous changes in support of the US-VISIT mission such as hardware, software, data storage, transmission, and related services.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.1 Advisory and assistance services	94,922	102,000	50,883	(51,117)

The advisory and assistance services request includes funding of \$50,883,000, a decrease of \$51,117,000, for services acquired by contract from non-Federal sources and other Federal government services for studies, analysis and evaluations.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	54,617	70,000	23,665	(46,335)

The other services request includes funding of \$23,665,000, a decrease of \$46,335,000, for contractual services with non-Federal sources for program office support, interagency agreements for services (equipment staging, data center application hosting, data communications, etc.).

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.3 Purchases of goods & svcs. from Gov't accounts	230	230	230	-

The other purchases of good and services from Government accounts request includes funding of \$230,000 for interagency agreements for contractual services for the purchase of goods and services and the expenditure transfers between Federal government accounts for jointly-funded projects.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.4 Operation and maintenance of facilities	2,182	2,200	2,200	-

The operations and maintenance of facilities request includes funding of \$2,200,000 for the operation and maintenance of facilities done by contract with the private sector or interagency agreement for routine repairs and upkeep.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.7 Operation and maintenance of equipment	49,723	58,115	59,479	1,364

The operation and maintenance of equipment request includes funding of \$59,479,000, an increase of \$1,364,000, for operation, maintenance , repair and storage of equipment done under contract with the private sector or though interagency agreement for information technology systems, license agreements, and other contract based equipment maintenance and operation.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
26.0 Supplies and materials	416	475	500	25

The supplies and materials request includes funding of \$500,000, an increase of \$25,000, for commodities

such as office supplies, publications, information technology supplies and materials such as manuals and data storage media, and toner cartridges for laser printers.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
31.0 Equipment	68,242	103,155	136,281	33,126

The equipment request includes funding of \$136,281,000, an increase of \$33,126,000, for the purchase of personal property of a durable nature that is expected to have service life of one year or more and includes the initial installation of equipment performed under contract. This request also includes funds for data center mirror and migration equipment purchases.

## BUDGET REQUEST AND SUPPORTING INFORMATION

### Federal Protective Service

## I. Appropriation Overview

### A – Mission Statement for Federal Protective Service

The Federal Protective Service (FPS) is the Federal law enforcement organization responsible for the protection of federal facilities. FPS executes the Department of Homeland Security's responsibility to protect federally owned property, leased property and personnel across the nation, as required by section 1315 of title 40 United States Code. FPS operations focus on security and law enforcement activities that reduce vulnerability to criminal and terrorist threats, while ensuring facilities are secure and occupants are safe. FPS protects Federal facilities and the employees within them through measures such as all hazards based risk assessments; appropriate placement of countermeasures, law enforcement response; assistance to stakeholders through Facility Security Committees; and emergency and safety education. FPS also partners with Federal agencies to provide additional required security services. FPS is the lead Government Facilities Sector-specific Agency for the National Infrastructure Protection Plan (NIPP). FPS employs approximately 1,225 Law Enforcement Officers (LEO) and non-LEO employees, as well as the services of 15,000 contract security guards strategically located throughout the Nation to protect facilities in its purview.

FPS transferred to the National Protection and Programs Directorate (NPPD) in FY 2010 from Immigration and Customs Enforcement. FPS serves as the Sector-specific agency for the Government Facilities sector and is an active critical infrastructure security partner with NPPD's Office of Infrastructure Protection, further solidifying NPPD as the Department's lead for critical infrastructure protection.

DHS established a series of national strategic themes to guide the activities of all the department's components. While the FPS mission incorporates all of these strategic themes, there are five that are particularly relevant to the FPS mission:

- awareness;
- prevention;
- protection;
- service; and
- organizational excellence.

These five themes are the foundation of the FPS vision of "Secure Facilities, Safe Occupants"—a vision that contributes to the DHS mission of securing America. These themes serve as the foundation of the FPS mission to keep America safe by mitigating risk to Federal facilities and their occupants.

## **B – Budget Activities**

### Basic Security

The Basic Security services include law enforcement services on federally-controlled property, preliminary investigations of incidents, limited proactive activities to detect and deter attack on high-risk facilities, and capture and detention of suspects. This security also includes the 24-hour security alarm monitoring, nationwide dispatch services, facility security assessments, assistance to Facility Security Committees, and sharing of current information on domestic and foreign terrorist threats. FPS estimates revenue and expenditures for Basic Security to total \$220 million for FY 2011.

### Building Specific Security

Building Specific Security is based on security countermeasure requirements specific to a particular building. The two components are the Contract Security Guard and Security Systems programs. The Contract Security Guard program includes access control to facility entrances and exits, employee and visitor identification checks, monitoring security equipment, and roving patrols of the interior and exterior of Federal facilities. The Security Systems program is a component of Building Specific Security and includes the purchase, installation, and maintenance of security equipment, such as cameras, alarms, magnetometers, and x-ray machines. Security equipment is based on identified projects in security assessment and standard replacement schedules. FPS estimates revenue and expenditures for Building Specific Security to total \$420 million for FY 2011.

### Reimbursable Agency Specific Security, commonly known as Security Work Authorizations (SWAs)

FPS enters into Security Work Authorizations with customer agencies to procure security measures beyond those included within Basic Security and Building Specific Security. FPS does not request authority for these collections because the additional security services and contract guards are determined by the operational security needs of the customer agencies (e.g. an additional contract guard and Closed Circuit Television (CCTV) cameras within a U.S. Citizenship and Immigration Services waiting room in a multi-tenant Federal building). FPS estimates revenue and expenditures for Security Work Authorizations to total \$475 million for FY 2011.

## **C – Budget Request Summary**

With its current staffing of 1,225 FTE, FPS can provide services which include; incident response, conducting Facility Security Assessments (FSAs), supporting Facility Security Committees (FSCs), assisting Designated Officials in creating and maintaining Occupant Emergency Plans (OEPs), and oversight of contract guards.

## II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

Total Change 2010 to 2011	-	-	-

**Reimbursable Agency Specific Security**

FPS enters into Security Work Authorizations (SWA) with customer agencies to procure security measures beyond those included within Basic Security and Building Specific Security. These SWA estimates are included in the Budget justification for congressional awareness, as FPS does not request authority for these collections since customers enter into the agreements at their discretion. The additional security services and contract guards are determined by the operational security needs of the customer agencies (e.g., an additional contract guard and Closed Circuit Television (CCTV) cameras within a U.S. Citizenship and Immigration Services waiting room in a multi-tenant Federal building). FPS estimates collections and expenditures for Security Work Authorizations to total \$475 million for FY 2011, \$400 million of which is estimated collections of customer operations security needs.

The FPS reimbursable offsetting collections budget estimate also includes approximately \$75 million in estimated contingency planning collections to enable FPS to provide increased security in the event of a significant natural disaster or an increase in national threat levels. FPS must respond immediately in support of FEMA disaster response and disaster recovery efforts under the National Response Plan. For example, in FY 2006, FPS provided reimbursable security support for the FEMA response in the Gulf Coast to Hurricanes Katrina, Rita, and Wilma. Planning for contingency collections ensures that the FPS can respond without potential delays to emergent security requests. The contingency collections will only be used if the security is required and requested by FEMA or another Federal agency. This can lead to the actual collections and expenditures reported to be less or more than the collections estimated, since incidents of this nature are hard to predict and vary from year to year.

## **CURRENT SERVICES PROGRAM DESCRIPTION**

The Federal Protective Service (FPS) is the Federal law enforcement organization responsible for the protection and security of Federal buildings, property, and personnel across the Nation. FPS security operations include regular facility security assessments of Federal facilities, nationwide communications, alarm monitoring, and dispatching services, and administration of contract guards within Federal facilities.

In FY 2010, FPS continues to realign its mission, workforce, and resources to strengthen Federal physical security measures, procedures, and standards that apply to Federal buildings and enhance oversight and protection activities. FPS is focused on the protection of Federal property as required by section 1315 of Title 40 United States Code and as the sector-specific agency for the National Infrastructure Protection Plan (NIPP). Relying on the work of FPS Law Enforcement Security Officers (Inspectors), the protection focus is driven by the guiding principles of stakeholder service, technical expertise and organizational excellence. These include efficient stakeholder-oriented law enforcement and security services; sound standards, consistent compliance, and innovative techniques; strengthening overall organizational performance and business processes; and continuously enhancing the protection of Federal facilities under a risk-based approach.

The FPS strategic goal, “*Secure Facilities, Safe Occupants*”, continues to focus on the protection of Federal facilities and employees through a comprehensive law enforcement and security program. FPS security operations include regular facility security assessments of Federal facilities, nationwide communications, alarm monitoring, and dispatching services, and administration of contract guards within Federal facilities.

The FY 2010 Appropriation transferred FPS to the National Protection and Programs Directorate, to further align the critical infrastructure protection missions within the Department.

Below are the achieved and planned accomplishments for FPS. These accomplishments are achieved collaboratively through the basic, building specific, and reimbursable agency specific security funds.

### **Key Accomplishments**

Significant accomplishments in FY 2009 include:

- Strengthened security standards and practices related to access control, screening, and the training and oversight of contract protective security officers to mitigate identified vulnerabilities to past and emerging threats;
- Improved the strategic methods used in identifying and reducing real and /or perceived threats faced by customers; and
- Provided law enforcement and security services at national security events that pose increased threats at or in the vicinity of Federal facilities, including the Inauguration of the President of the United States.

FY 2010 FPS planned accomplishments include:

- Realigning its mission, workforce and resources to further strengthen the protection of Federal property through collaborative partnerships and effective communication with stakeholders, proactive information and intelligence sharing, efficient stakeholder-oriented law enforcement and security services, sound security procedures with consistent compliance and innovative techniques through a highly skilled and operationally aligned workforce;
- Providing law enforcement and security services at national security events posing increased threats at or are in the vicinity of Federal facilities; and
- Serving as the sector specific agency for the Government Facilities Sector under the National Infrastructure Protection Plan (NIPP) to coordinate protection and security efforts for designated critical infrastructure and key resources across the sector.
- Developing and implementing a capital plan to utilize current balances to modernize FPS infrastructure.

FY 2011, FPS will:

- Provide maximum protection to ensure facilities are secure and occupants kept safe;
- Improve the strategic methods used in identifying and reducing actual and potential threats directed at FPS-protected facilities;
- Restoring proactive monitoring activities to mitigate the increased risk to FPS-protected facilities noted by the Government Accountability Office;
- Improve the service provided by our contract security guard force multiplier via effective acquisition strategies and intensive monitoring and coaching;
- Develop risk-based security standards tied to intelligence by implementing a robust and improved risk assessment tool to improve threat identification, identify associated risk mitigation countermeasures and provide objective security evaluations to stakeholders;
- Increase coordination across the government facilities sector in support of the FPS roles as the sector-specific agency under the National Infrastructure Protection Plan (NIPP); and
- Continue to refine business practices to ensure full collection of revenue through positive stakeholder interface.
- Continue to implement a capital plan that will result in improved security and customer service.

#### IV. Program Justification Changes

Not Applicable

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
National Protection and Programs Directorate  
Justification of Proposed Changes in Federal Protective Service  
Appropriation Language**

The revenues and collections of security fees credited to this account shall be available until expended for necessary expenses related to the protection of federally-owned and leased buildings and for the operations of the Federal Protective Service[: *Provided*, That the Secretary of Homeland Security and the Director of the Office of Management and Budget shall certify in writing to the Committees on Appropriations of the Senate and the House of Representatives no later than December 31, 2009, that the operations of the Federal Protective Service will be fully funded in fiscal year 2010 through revenues and collection of security fees, and shall adjust the fees to ensure fee collections are sufficient to ensure that the Federal Protective Service maintains not fewer than 1,200 full-time equivalent staff and 900 full-time equivalent Police Officers, Inspectors, Area Commanders, and Special Agents who, while working, are directly engaged on a daily basis protecting and enforcing laws at Federal buildings (referred to as "in-service field staff")]. [Department of Homeland Security Appropriations Act, 2010] **Department of Homeland Security Appropriations Act, 2011.**)

#### Explanation of Change:

FPS should have the flexibility to determine the appropriate staffing levels needed to accomplish its mission.

\*FY 2009 actuals do not include \$57,236,000 for Capital Investments funded from prior year funds.

\*\* The estimate does not represent a change in the total amount of offsetting collection authority for the FPS in FY 2011. Rather, it reflects an adjustment to realign authority between Basic and Building Specific Security to better reflect anticipated sources of revenue.

### PPA Mission Statement

The Basic Security services include law enforcement on federally-controlled property, preliminary investigations of incidents, limited proactive activities to detect and deter attack on high-risk facilities, and capture and detention of suspects. This security also includes the 24-hour security alarm monitoring, nationwide dispatch services, facility security assessments, assistance to Facility Security Committees, and sharing of current intelligence on domestic and foreign terrorist threats. FPS estimates collections for Basic Security to total \$220 million for FY 2011.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	73,708	82,251	88,428	6,177

The FY11 request includes \$131,063,000 for salaries and benefits, an increase of \$8,218,000 over the FY10 enacted, for \$1,891,000 in pay inflation and \$6,327,000 realigned funds from Building-Specific Security to support projected FY 2011 staffing requirements.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change

**PPA Mission Statement**

Building Specific Security is based on security countermeasure requirements specific to a particular building. The two components are the Contract Security Guard and Security Systems programs. The Contract Security Guard program includes access control to facility entrances and exits, employee and visitor identification checks, monitoring security equipment, and roving patrols of the interior and exterior of federal facilities. The Security Systems program includes the purchase, installation, and maintenance of security equipment, such as cameras, alarms, magnetometers, and x-ray machines. Security equipment is based on identified projects in security assessment and standard replacement schedules. FPS estimates collections for Building Specific Security to total \$420 million for FY 2011.

**Summary Justification and Explanation of Changes**

**PPA Mission Statement**

FPS enters into Security Work Authorizations with customer agencies to procure security measures beyond those included within Basic Security and Building Specific Security. FPS does not request authority for these collections because the additional security services and contract guards are determined by the operational security needs of the customer agencies (e.g. an additional contract guard and Closed Circuit Television (CCTV) cameras within a U.S. Citizenship and Immigration Services waiting room in a multi-tenant Federal building). FPS estimates collections for Security Work Authorizations to total \$475 million for FY 2011.

**Summary Justification and Explanation of Changes**

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	10,688	7,456	7,571	115

The FY11 request includes \$11,307,000; there is a \$171,000 increase over the FY 2010 for pay inflation.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.3 Other than full-time permanent	18	13	13	-

See note in 11.1

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.5 Other personnel compensation	2,537	842	855	13

See note in 11.1

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
12.1 Civilian personnel benefits	3,384	2,825	2,868	43

See note in 11.1

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
21.0 Travel and transportation of persons	395	941	941	-

The FY11 program includes \$941,000; no increase over the FY10 program for all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. Funding in the travel area will be used to complete all Building Security Assessments and training requirements.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
22.0 Transportation of things	1,869	1,906	1,906	-

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.1 Rental payments to GSA	2,740	2,795	2,795	-

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.3 Communications utilities and miscellaneous charges	1,587	1,455	1,455	-

The FY11 request includes \$1,455,000; no increase over the FY10 program for communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.1 Advisory and assistance services	5,836	4,200	4,029	(171)

The FY11 request includes \$4,029,000; a decrease of \$171,000 for efficiencies to absorb pay inflation out of base funds for management and professional services for mission organization support.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	361,192	443,728	443,728	-

The FY11 request includes \$443,728,000; no increase over the FY10 program for contractual services with non-federal agencies not otherwise classified in Object Class 25.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.3 Purchases of goods & svcs. from Gov't accounts	512	606	606	-

The FY11 request includes \$606,000; no increase over the FY10 program for purchases from other government agencies not otherwise classified in Object Class 25.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.7 Operation and maintenance of equipment	4,006	4,598	4,598	-

The FY11 request includes \$4,598,000; no increase over the FY10 program for preventative, routine, and emergency care repair, and storage of security and protective equipment.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
26.0 Supplies and materials	12	939	939	-

The FY11 request includes \$939,000; no increase over the FY10 program for Supplies and materials defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
31.0 Equipment	300	2,696	2,696	-

The FY11 request includes \$2,696,000; no increase over the FY10 program for all costs covering the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

## A. Mission and Description of the National Protection and Programs Directorate

The National Protection and Programs Directorate (NPPD) is a diverse organization with the vital, cross-cutting, and unifying mission of risk reduction. The Directorate works to reduce risks to the Nation through five mission areas: protect the Nation's citizens and visitors against dangerous people; protect the Nation's physical infrastructure; protect the Nation's cyber and communications infrastructure; strengthen the Department's risk management platform; and strengthen partnerships and foster collaboration and interoperability.

**Protecting the Nation's Citizens and Visitors against Dangerous People.** NPPD works with its Federal, State, local, tribal, territorial and private sector partners to guard against threats posed by terrorists and other criminals intending harm to the United States. NPPD works with domestic and international organizations in monitoring the status of known individuals or groups posing a threat to critical infrastructure. NPPD provides biometrics-based information to border officers, law enforcement, and other decision-makers about persons of interest. Additionally, the Directorate helps prevent document and identity fraud threatening immigration process integrity and foreign visitor safety.

**Protecting the Nation's Physical Infrastructure.** NPPD leads the coordinated effort reducing risk to the Nation's critical infrastructure and key resources (CIKR) from acts of terrorism, natural disasters, and other devastating emergencies by integrating and disseminating CIKR threat, consequence, and vulnerability information; developing risk mitigation strategies; and overseeing the national plan for protecting the Nation's infrastructure (National Infrastructure Protection Plan). These efforts help ensure essential government missions, public services, and economic functions are maintained, and CIKR elements are not exploited for use as weapons against our people or institutions.

**Protecting the Nation's Cyber and Communications Infrastructure.** NPPD collaborates with public, private, and international partners in ensuring the security and continuity of the Nation's cyber and communications infrastructures in the event of acts of terrorism, national disasters, and other catastrophic incidents. Additionally, NPPD protects and strengthens the reliability, survivability and interoperability of the Nation's communications capabilities - including those utilized during emergencies - at the Federal, State, local, and tribal levels.

**Strengthening the Department of Homeland Security's Risk Management Platform.** NPPD leads the Department's efforts to establish a common framework addressing overall management and analysis of homeland security risk, with a focus on standardizing and integrating risk management approaches throughout the Department. NPPD ensures all individual risk programs utilize common risk approaches and methodologies, lexicon, training standards, and data collection structures.

**Strengthening Partnerships and Fostering Collaboration and Interoperability.** NPPD engages with public and private sector partners to ensure effective information exchange and collaboration.

## B. Major Activities and Key Strategic Goals

NPPD's major activities in FY 2011 are presented in the structure of the performance based budget as reflected in the DHS Future Years Homeland Security Program (FYHSP). FY 2011 FYHSP programs include: *Cyber Security and Communications, Infrastructure Protection, Federal Protective Service, and United States Visitor and Immigrant Status Indicator Technology Program. Risk Management and Analysis, and Directorate Administration*, are also included for informational purposes. Note that the resources dedicated for Risk Management and Analysis and Directorate Administration are distributed to the FYHSP Programs on page 24, but are broken out separately in the narrative below. These activities are presented below in accordance with the Secretary's Priorities.

### MISSION 1: PREVENTING TERRORISM AND ENHANCING SECURITY

**Infrastructure Protection.** The performance goal of Infrastructure Protection (IP) is to improve protection of the Nation's high risk and most valued critical infrastructure and key resources by characterizing and prioritizing assets, modeling and planning protective actions, and building partnerships. IP leads the coordinated national risk reduction effort against acts of terrorism and strengthens preparedness, response, and recovery of infrastructure in the event of an attack, natural disaster, or other emergency.

In FY 2011, NPPD requests \$ 333.779 million to reduce risks to the Nation's critical infrastructure and key resources, a decrease of \$13.524 million over the FY 2010 enacted budget of \$347.303 million. These funds will support three infrastructure protection mission areas: Identification and Analysis, Coordination and Information Sharing, and Mitigation Programs.

Identification and Analysis. The Identification and Analysis mission area includes IP projects and activities supporting the capability to identify the nations CIKR, assess CIKR vulnerabilities and consequences, and analyze and reduce risk. Activities include developing an inventory of CIKR assets; risk analysis, modeling and simulation; and fusing information from field assessments to enable analysis of infrastructure interdependencies.

Coordination and Information Sharing. The Coordination and Information Sharing mission area includes IP projects and activities that enhance situational awareness and maximize government and private sector security partners' abilities at all levels to assess risks, coordinate programs and processes, and execute risk-mitigation programs and activities. Coordination and Information Sharing leads and coordinates National Infrastructure Protection Plan execution, acting as a central clearinghouse for individual sectors information sharing and coordination activities as well as facilitating security partner governance models development and support.

Mitigation Programs. The Mitigation Programs mission area includes voluntary and regulatory projects and activities enabling security partners to identify and mitigate vulnerabilities, implement protective measures, and increase preparedness for facilities, systems, and surrounding communities. They support public awareness efforts and facilitate sharing CIKR protection-related best practices and lessons learned as well as enabling IP planning, readiness and incident management.

#### FY 2009 Accomplishments

- Expanded the focus of vulnerability assessments from primarily individual assets to emphasis on critical infrastructure and key resource "clusters," regions, and systems in major metropolitan areas, and increased the number of nationwide critical infrastructure and key resource

vulnerability assessments and Regional Resiliency Assessment Programs conducted. Five assessments were completed in FY2009, located at the Chicago Financial District, the Raleigh-Durham North Carolina Research Triangle, the New Jersey Turnpike Exit 14 Chemical Corridor, the New York Bridges, and the Tennessee Valley Authority.

- Coordinated the establishment of the Regional Consortium Coordinating Council and facilitated interactions with Sector-Specific Agencies to establish strong relationships between the sectors and this newest part of the sector partnership model. This new council builds further links with critical infrastructure and key resources owners and operators, enabling more robust implementation of the National Infrastructure Protection Plan and the Sector-Specific Plans. Infrastructure Protection also developed and delivered National Infrastructure Protection Plan-related training to help government and private sector security partners implement critical infrastructure and key resources program management activities.
- Deployed 10 additional Protective Security Advisors, ensuring DHS coverage in each State. Protective Security Advisors facilitate information sharing between DHS and the State and local governments, and critical infrastructure and key resource owners and operators.
- Enhanced bombing prevention (TRIPwire) capability to include additional partner content-providing organizations, and expanded the TRIPwire user base to 7,500 registered users, to include select private sector security and international partners through TRIPwire Community Gateway. Provided TRIPwire Community Gateway to all 18 sectors and the TRIPwire Field Tool to better support the user community with increased utility and portability.
- Developed and deployed the Chemical Security Assessment Tool (CSAT), the Top Screen Module facility data collection tool, the Security Vulnerability Assessment template, and the Site Security Plan module to ensure compliance with Chemical Facility Anti-Terrorism Standards and protect high-risk chemical facilities from attack. Issued an advanced notice of proposed rulemaking to begin the process of regulating certain Ammonium Nitrate transactions nationwide to prevent its use in an act of terrorism.

#### FY 2010 Planned Accomplishments

- Conduct approximately 450 vulnerability assessments through Site Assistance Visit assessments, Buffer Zone Protection Plans, and the Regional Resiliency Assessment Program with a focus on Level 1/Level 2 assets, regional resiliency, specific CIKR clusters, and National Security Special Events venues in coordination and collaboration with Federal, State, local, and private sector partners. Assessment results will be utilized to influence facility security; direct DHS grant dollars to address equipment gaps in local law enforcement; and identify trends across sectors.
- Enhance the Infrastructure Information Collection System to expand the infrastructure data accessible and distributed to the regional homeland security community and the Automated Critical Asset Management System to assist state and local officials on building and implementing critical infrastructure protection plans.
- Release the 2010 Sector-Specific Plans to reflect the advancements and maturation of each critical infrastructure and key resources sector and its partnership, release the National Critical Infrastructure and Key Resources Protection Annual Report, and refine metrics to assess the progress of implementing the National Infrastructure Protection Plan risk management framework and value of critical infrastructure and key resources protection efforts
- Implement the Chemical Facility Anti-Terrorism Standards (CFATS) through review and approval of Security Vulnerability Assessments submitted by CFATS facilities; initiation of the

inspections cycle to verify security measures in place, or planned, and assess compliance; and continue hiring and training of an inspector cadre, running 2 chemical security academies.

- Issue for public review and comment a proposed rule, and develop a final rule, to implement the Department's regulatory authority over the sale or transfer of Ammonium Nitrate (Section 563 requirements).
- Continue implementation of the Enhanced Critical Infrastructure Protection assessment methodology/ Infrastructure Survey Tool across all 18 critical infrastructure and key resources sectors, and four sub-sectors, enabling a complete comparison of all asset vulnerabilities and the ability to fully identify the most vulnerable sectors and security areas of concern.

#### FY 2011 Planned Accomplishments

- Conduct a minimum of 275 Vulnerability Assessments on Tier1/Tier 2 assets, special events projects and as directed by leadership, utilizing the National Guard in coordination and collaboration with Federal, State, local, and private sector partners. Assessment results will be utilized to influence facility security; direct DHS grant dollars to address equipment gaps in local law enforcement; and identify trends across sectors. Conduct New Nuclear Reactor Security Consultations in conjunction with Nuclear Regulatory Commission.
- Conduct 6-8 Execute Regional Resiliency Assessment Program assessments in high-risk Urban Areas Security Initiative regions.
- Complete the initial deployment of the Geospatial Pilot Project which will provide the capability to accurately collect geospatial data on critical infrastructure and key resources and provide real-time vulnerability information.
- Initiate revisions to National Infrastructure Protection Plan (NIPP) that will culminate in its reissue in 2012. This process will ensure that the National Infrastructure Protection Plan and Sector-Specific Plans reflect the maturation and current focus of the Nation's critical infrastructure protection and resilience strategy; and continue to grow the partnering and collaboration efforts between the public and private sector throughout the national development and review process.
- Analyze sector and other annual reports to develop the National Critical Infrastructure and Key Resources Protection Annual Report.
- Build additional risk and vulnerability assessment tools for all six critical infrastructure and key resource sectors managed within DHS (Chemical, Commercial Facilities, Dams, Emergency Services, Critical Manufacturing, and Nuclear) to support the execution of the National Comparative Risk Assessment.
- Partner with the State, Local, Tribal and Territorial Government Coordinating Council and Regional Consortium Coordinating Council to develop and implement awareness initiatives that enable a more robust implementation of the National Infrastructure Protection Plan and the Sector Specific Plans at the state, regional and local levels.
- Conduct one pilot exercise using threat scenarios that underpin the Chemical Facility Anti-Terrorism Standards risk-based performance standards with select chemical facility owners and operators, and State and local partners. Maintain and utilize capability to support chemical security adjudication, compliance and appeals requirements to meet established Chemical Facility Anti-Terrorism Standards requirements and initiate planning for inspection regime to verify requirements of Ammonium Nitrate regulation.

- Launch Infrastructure Security Compliance Voluntary Security Recognition Pilot to encourage Federal facilities to adopt Infrastructure Security Compliance Security measures. Program components will include vulnerability assessments, possible Buffer Zone Protection Plans, documentation for implemented security measures, employee security training, communications protocols and procedures with local first responders, security auditing plans, a certification process, and participating in exercises.
- Develop the Infrastructure Survey Tool (IST) to support the implementation of the Enhanced Critical Infrastructure Protection Program methodology, serving as a data repository and analysis tool for information collected during Enhanced Critical Infrastructure Protection Program assessments.
- Expand TRIPwire user access to foreign security partners to include the United Kingdom, Australia, New Zealand, and Canada.

**Federal Protective Service.** The performance goal of the Federal Protective Service's (FPS) is to mitigate risk to Federal facilities and their occupants. The FPS leads the Department's comprehensive security and law enforcement services to more than 9,000 Federal facilities nationwide; mitigating risk to those facilities and their 1.1 million occupants. FPS operational activities include conducting comprehensive risk assessments of Federal facilities to determine and install appropriate risk mitigation measures. Further, FPS personnel provide regular security awareness training to stakeholders, conduct criminal investigations, respond to critical incidents, and provide support to major events.

In FY 2011, NPPD requests \$1,115.000 million to ensure the security of 9,000 Federal facilities nationwide, with no increase over the FY 2010 enacted budget.

#### FY 2009 Accomplishments

- Provided security at nearly 9,000 federal facilities, conducting more than 2,500 facility security assessments while conducting numerous investigations and preventing hundreds of thousands of prohibited and potentially dangerous items from being brought into federal buildings.
- Provided law enforcement and security services at national security events that pose increased threats at or in the vicinity of Federal facilities, including the Inauguration of the President of the United States.
- 94% of countermeasures deployed in Federal buildings, including cameras, x-ray equipment, magnetometers, alarms and security guards were found to be effective in preventing harm and destruction to the building and its contents, based on Interagency Security Committee standards.

#### FY 2010 Planned Accomplishments

- Provide law enforcement and security services at national security events that pose increased threats at or are in the vicinity of Federal facilities; and
- Serve as the sector specific agency for the Government Facilities Sector under the National Infrastructure Protection Plan (NIPP) to coordinate protection and security efforts for designated critical infrastructure and key resources across the sector.
- Develop and implement a capital plan to utilize current balances to modernize FPS infrastructure.

#### FY 2011 Planned Accomplishments

- Improve the strategic methods used in identifying and reducing actual and potential threats directed at FPS-protected facilities and restore proactive monitoring and law enforcement activities to mitigate the increased risk to FPS-protected facilities noted by the Government Accountability Office.
- Develop risk-based security standards tied to intelligence by implementing a robust and improved risk assessment tool to improve threat identification, identify associated risk mitigation countermeasures and provide objective security evaluations to stakeholders.
- Improve the service provided by our contract security guard force multiplier via effective acquisition strategies and intensive monitoring and coaching and continue implementation of a capital plan that will result in improved security and customer service.

## MISSION 2: SECURING AND MANAGING OUR BORDERS

**United States Visitor and Immigrant Status Indicator Technology Program.** The performance goal of the US-VISIT program is to improve identity and document verification capabilities available to immigration and border management stakeholders to enable them to make timely and accurate risk and eligibility decisions. To achieve this goal, the program collects, maintains, and shares information; including biometric identifiers, on foreign visitors. This information assists in determining whether an individual should be prohibited from entering the United States; can receive, extend, change, or adjust immigration status; has overstayed or otherwise violated the terms of admission; should be apprehended or detained for law enforcement action; or needs special protection or attention (e.g., refugees).

In FY 2011, NPPD requests \$334.613 million to strengthen screening of travelers and workers, a decrease of \$39.149 million over the FY 2010 enacted budget of \$373.762 million.

### FY 2009 Accomplishments

- Tested and reported on the collection of biometrics from non-U.S. citizens exiting the United States in two different settings at airports: (1) collection by Transportation Security Administration staff at the airport terminal screening checkpoint; and (2) collection by U.S. Customs and Border Protection at the boarding gate.
- Transitioned from a 2-print to a 10-print collection capability at 2,600 air, sea, and land inspection lanes, facilitating travel by reducing the number of travelers referred for secondary inspection. Ten-print capability provides more matchable data, which reduces the likelihood of misidentifying a traveler as being on a US-VISIT watchlist, and increases opportunities to identify persons of interest. The transition also allows for a search of the Federal Bureau of Investigation's Criminal Master File.
- Implemented the initial operational capability for the Automated Biometric Identification System/Integrated Automated Fingerprint Identification System Interoperability project. Enhancing data sharing through interoperability increases the probability of identifying persons of interest and supports U.S. Immigration and Customs Enforcement's support of State and local law enforcement through its Secure Communities program.

### FY 2010 Projected Accomplishments

- Maintain high credibility rates of overstay leads provided to ICE representing travelers who are currently in the United States and have overstayed their authorized periods of admission.

- Formalize a biometric data exchange with Australia, Canada and the United Kingdom and initiate a pilot exchange of biometric prints with the Federal Republic of Germany.
- Reduce the watchlist encounter backlog by 25 percent as resources are made available.
- Post temporary onsite technical US-VISIT expert in Warsaw, Poland and Mexico to assist in integrating biometrics into immigration and border information systems.
- Implement acquisition strategies for the prime integrator support contract and the program management support contractor. In addition, an overall acquisition strategy will be developed to align with US-VISIT's biometric support mission.
- Complete the deployment of the US-VISIT matcher cluster from the Department of Justice Dallas Data Center to Clarksville, Virginia, including the establishment of connectivity between the two DHS data centers and the legacy Department of Justice data center in Rockville, Maryland.
- Deploy 10-print matching capability – enhance matching capability from current 2-print standard to the ability to match based on 10 prints. This capability will enhance verification of an individual's biometrics.
- Expand support to Immigration and Custom Enforcement (ICE) Secure Communities. ICE will use US-VISIT's expanded interoperability and will build on existing relationships with State and local law enforcement agencies to ensure that incarcerated criminal aliens are removed from the country instead of being released into our communities after custody.

#### FY 2011 Projected Accomplishments

- Manually vet over 90,000 records of potential visa overstays to provide an estimated 30,000 referrals to Immigration and Customs Enforcement (ICE) for further investigation. US-VISIT is targeting 98% credibility rate for those referrals provided to ICE. With the increased staffing and additional vetting, US-VISIT expects to promote more than 50,000 records to the out-of-country watchlist in FY 2011 and perform federal reviews on over 48,000 validated in-country overstay records, resulting in quality investigative referrals to ICE. US-VISIT will maintain FY 2010 performance targets in FY 2011.
- Enable full non-criminal justice purpose searches of US-VISIT systems for all FBI Criminal Justice Information Systems and DHS stakeholders, providing access to more than 60 million images in FBI civil fingerprint files captured and stored as part of background checks for employment, licensing, and other non-criminal justice purposes.
- Begin US-VISIT 1.0, developing a complete requirements base regarding fingerprint, face and iris multi-biometric high-speed matching and design logic, a model target architecture, and validate the targeted architecture with specific prototypes.
- Evaluate biometric technologies for combating efforts to defeat biometric identity verification systems as part of the ongoing Multi Biometric Technology Evaluation. Increasing biometric capabilities through technology innovation and standards development (Fingerprint, iris, face, vascular, DNA) could expand potential data sharing opportunities with countries that employ iris and facial recognition as their primary biometrics for identity management.

#### MISSION 4: SAFEGUARDING AND SECURING CYBERSPACE

**National Cyber Security Division.** The performance goal of the National Cyber Security Division (NCSA) is to improve the security of cyberspace and America's cyber assets in the United States by working collaboratively with public, private, and international entities. To achieve this goal NCSA partners with the private sector, government, military, and intelligence stakeholders in risk assessment and threat/vulnerability reduction to critical IT assets for the United States' critical infrastructures. Additionally, NCSA provides cyber threat and vulnerability analysis, early warning, and incident response assistance for public and private sector constituents.

In FY 2011, NPPD requests \$378.744 million to improve cyber security, a decrease of \$18.410 million from the FY 2010 enacted budget of \$397.154 million.

US-CERT. leverages technical competencies in Federal network operations and threat analysis centers to develop knowledge and knowledge management practices supporting Federal stakeholders as they make key operational and execution decisions. It analyzes and reduces cyber threats and vulnerabilities, disseminates cyber threat warning information, and coordinates with partners and customers to achieve shared cyber situational awareness related to the Nation's cyber infrastructure. US-CERT addresses the need for a single, accountable focal point for achieving cybersecurity throughout the Federal enterprise by utilizing a holistic approach to Federal government network security, enabling cybersecurity challenges to be addressed in a manner that maximizes value and minimizes risks associated with technology and security investments. US-CERT also manages the development, acquisition, deployment, and personnel support required to implement the National Cybersecurity Protection System, operationally known as EINSTEIN. Additionally, US-CERT addresses the need to build a skilled cyber workforce for today's and tomorrow's Federal government; provides a set of comprehensive resources that can be used to appropriately manage supply chain risk across the lifecycle of networks, systems, and components; and oversees the implementation of national cybersecurity policies and ensures appropriate resources are available to support the mission and its specialized information technology systems.

Strategic Initiatives. Strategic Initiatives establishes mechanisms for Federal partners to deploy standardized tools and services at a reduced cost, paving the way for a collaborative environment that enables sharing of best practices and common security challenges and shortfalls. Strategic Initiatives develops and promulgates sound practices for software developers, information technology security professionals and other critical infrastructure and key resources stakeholders, and collaborates with the public and private sectors to assess and mitigate risk to the Nation's cyber critical infrastructure and key resources.

Outreach and Programs. Outreach and Programs promotes opportunities to leverage the cybersecurity research and development investments of public and private industry partners. It promotes cybersecurity awareness among and within the general public and key communities, maintains relationships with governmental cybersecurity professionals to share information about cybersecurity initiatives, and develops partnerships to promote collaboration on cybersecurity issues. Outreach and Programs also supports the National Cyber Security Division mission by establishing cybersecurity strategy and planning efforts through integrating resource management, human capital, facilities, performance management, and policy development and implementation into the broad array of issues addressed by the National Cyber Security Division.

## FY 2009 Accomplishments

- Expanded the cyber intrusion detection capabilities of the Federal Executive Branch through the deployment of nine EINSTEIN 2 sensors to departments and agencies and three EINSTEIN 2 sensors to awarded NETWORKX Vendors' Trusted Internet Connection locations.
- Increased staffing for the 24x7x365 Operations Center, by hiring United States Computer Emergency Readiness Team analysts capable of in-depth incident tracking, detection, and mitigation, enabling around the clock analysis and fusion support.
- Published the first Information Technology sector-wide baseline risk assessment in collaboration with industry and government partners. The baseline risk assessment provides an all-hazards risk profile that can be used to inform resource allocation for research and development and other protective measures to enhance the security and resiliency of the critical Information Technology Sector functions.

#### FY 2010 Planned Accomplishments

- Conduct analysis and coordinate response support and defense against cyber attacks for the Federal civilian Executive Branch, i.e., .gov, and information sharing and collaboration with State and local government, industry and international partners and issue alerts and warnings to United States Computer Emergency Readiness Team stakeholders through the National Cyber Alert System.
- Perform sixteen Trusted Internet Connection compliance assessments to ensure agencies have the appropriate operational capabilities in place to meet the Trusted Internet Connection Initiative objectives and expand Trusted Internet Connection compliance assessment capabilities to support Comprehensive National Cybersecurity Initiative implementation by identifying and adding required capability checks to the compliance catalog. This will enable the creation of a broader compliance program of which the Trusted Internet Connection compliance assessments are a subset.
- Deploy the knowledge management system for cybersecurity information on Homeland Security Data Network (HSDN), at the secret level for all 6 centers, center customers and fusion centers. Complete all credentialing. Consolidate cybersecurity information at the secret level for all 6 centers, center customers and fusion centers.
- Identify common solutions for information systems security that will reduce cost through shared services, providing benefits and cost efficiencies by eliminating duplication, increasing expertise through specialization, freeing-up resources for mission specific requirements, and other tailored security requirements.
- Strengthen the Federal government's information systems security through adherence to the management and reporting regulations of the Federal Information Security Management Act which will result in improved effectiveness and consistency in securing Federal government information systems.
- Enhance the Industrial Control Systems Cyber Emergency Response Team, which is a national resource to receive, manage and respond to incidents and vulnerabilities that affect our nation's control systems.

#### FY 2011 Planned Accomplishments

- Coordinate efforts to deploy advanced collaborative and analytical technologies and methods while continuing spiral development of new capabilities in response to emerging threats and technologies. Assist in the development of requirements for next generation security solutions,

including National Cybersecurity Protection System Block 3 and follow-on technologies to protect Federal networks.

- Maintain the United States Computer Emergency Readiness Team Portal to facilitate disseminating situational awareness products and encourage collaboration among stakeholders.
- Participate in Government-wide cybersecurity initiatives and serve as an information conduit to promote collaboration in providing e-government services and share lessons learned.
- Update the Trusted Internet Connection Access Points Technical and Information Systems Security Requirements and Trusted Internet Connection Architecture to: remain aligned with Federal security strategy; address identified solution gaps; provide Federal agencies clear guidance for the migration of existing infrastructure; and implementation of new capabilities in a manner consistent with the overall Federal security strategy. Perform Trusted Internet Connection compliance assessments to ensure agencies have the appropriate operational capabilities in place to meet the Trusted Internet Connection Initiative objectives.
- Enhance the Industrial Control Systems Cyber Emergency Response Team, which is a national resource to receive, manage and respond to incidents and vulnerabilities that affect our nation's control systems, and assist the Water sector with implementation efforts for their control system security roadmap
- Co-sponsor with the Department of Defense, the National Institute for Standards and Technology and the National Security Agency standards, metrics and certification mechanisms from which tools can be qualified for software security verification.
- Lead research and analysis projects that will evaluate emerging cyber technologies and risks by evaluating historical, existing, and emerging technologies with the potential ability to reduce vulnerabilities, prevent intrusions, and defend against threats.
- Support and integrate incident response activities under the National Cyber Incident Response Plan.
- Utilize cybersecurity risk assessment methodologies, including cybersecurity risk and vulnerability assessment methodologies, to assist critical infrastructure and key resources sectors with onsite cybersecurity implementation assessments and provide options for considerations to increase cybersecurity resiliency. Conduct 75 site assistance visits to critical infrastructure and key resources sites.

#### **MISSION 5: ENSURING RESILIENCE TO DISASTERS**

**National Communications System.** The performance goal of the National Communications System (NCS) is to improve the security and reliability of America's telecommunications assets by working collaboratively with public, private, and international entities.

In FY 2011, NPPD requests \$108.919 million to ensure continuity of government communications and operations, a decrease of \$0.980 million from FY 2010 enacted budget of \$109.899 million. These funds will support four programs: Priority Telecommunications System, Next Generation Networks, Programs to Study and Enhance Telecommunications, and Critical Infrastructure Protection.

**Priority Telecommunications System.** The Priority Telecommunications System program provides specially designed telecommunications services to the national security and emergency preparedness

user community during natural or man-made disasters when conventional communications services are ineffective. These telecommunication services are used to coordinate response and recovery efforts, and in severe conditions, assist with Continuity of Operations and Government.

*Next Generation Networks.* A technology insertion initiative to maintain and migrate legacy priority voice telecommunications features (Government Emergency Telecommunications Service and Wireless Priority Service) and to apply priority to data applications as the public switched network evolves to Next Generation Networks.

*Critical Infrastructure Protection.* Ensures the continued availability of national security and emergency preparedness telecommunications services under all circumstances, including crisis or emergency, attack, recovery, and reconstitution. The Critical Infrastructure Protection program includes National Coordinating Center Operations, Critical Infrastructure Protection Operations, Plans, and Policy, Training and Exercises, Network Security Information Exchanges, and Telecommunications Service Priority.

*Programs to Study and Enhance Telecommunications.* The Programs to Study and Enhance Telecommunications involve technical studies and analyses of public communications infrastructures, assessments of new communications technologies vulnerabilities to Telecommunication Electromagnetic Disruptive Effects, and works with the international communications industry consensus standards organizations to ensure evolving communications commercial standards address national security and emergency preparedness communications technical requirements.

#### FY 2009 Accomplishments

- The National Communications System provided telecommunications infrastructure analysis and incident management support for the 2009 Presidential Inauguration, Hurricane Ike, and after the earthquake/tsunami disaster in American Samoa.
- Provided support to the NCS Committee of Principals, including technical, logistical, executive, planning and managerial support in the identification, development, and analysis of current national security/emergency preparedness communications issues and recommended solutions.
- Produced a 2009 risk assessment of the threat to and vulnerability of the public communications Networks.
- Analyzed physical infrastructure diversity, or “last-mile” connectivity, for two National Communications System member agencies to ensure primary mission essential functions are preserved.

#### FY 2010 Planned Accomplishments

- Maintain nationwide coverage for 252,822 Government Emergency Telecommunications Service and 103,891 Wireless Priority Service users. Achieve over 90% GETS call completion rate during emergency communications periods.
- Implement the Communications Sector Specific Plan and risk management framework, in response to Homeland Security Presidential Directive-7, and the National Infrastructure Protection Plan.

- Complete Industry Requirements Analysis and Industry Standards for Next Generation Network Priority Voice Services. Develop Concept of Operations and Operational Requirements Document for Next Generation Network Video and Data services.
- Support Emergency Support Function #2 participation in national security and emergency preparedness exercises before the 2010 Winter Olympics (January-February 2010).
- Develop and implement continuity communications architecture to ensure, under all conditions, federal executive branch cross-department and agency communications.

#### FY 2011 Planned Accomplishments

- Maintain nationwide coverage for 278,104 Government Emergency Telecommunications Service and 108,231 Wireless Priority Service. Achieve over 90% GETS call completion rate during emergency communications periods.
- Work with various telecommunications industry working groups and forums to ensure that the evolving next generation standards support priority communications in packet based networks.
- Develop Next Generation Network priority features in nationwide wireline network equipment that can be leveraged for implementation of priority services in carrier networks and work with industry to develop and implement Next Generation Network security measures, including survivability enhancements, national security threats, and user identification management and authentication in support of evolving data and video services. Provide priority core Voice over Internet Protocol communications capability with at least one national carrier's core networks.
- Analyze physical infrastructure diversity, or "last-mile" connectivity, for 21 federal agencies to ensure primary mission essential functions are preserved and continue development of proprietary network carrier models to evaluate survivability and performance of national security and emergency preparedness communications under damage scenarios.
- Enhance membership of information technology industry in the National Coordinating Center and Communications Information Sharing and Analysis Center to keep pace with developing cyber technologies that can provide support to the national security and emergency preparedness community.
- Develop new standard operating procedures, continuity of operations plans, and response plans to support the Joint Watch mission the National Coordinating Center 24x7 Watch and the US-CERT.
- Conduct in-depth telecommunications assessment baselines of high risk areas throughout the United States and in support of special events in order to support disaster response operations, planning, and exercises related to critical communications infrastructures.

**Office of Emergency Communications.** The performance goal of the Office of Emergency Communications (OEC) is to advance Federal, State, Local, and Tribal Government interoperable emergency communications capabilities by facilitating the identification of capability needs, the adoptions of solutions, and the verification (through realistic exercises) that capabilities effectively addressed the needs. OEC supports and promotes the adoption of capabilities that enhance interoperability or the ability of emergency response providers and Federal officials to continue communicating in the event of natural disasters, acts of terrorism, or other man-made disasters.

In FY 2011, NPPD requests \$44.524 million to strengthen the Nation's response and recovery capabilities, a decrease of \$0.536 million from the FY 2010 enacted budget of \$45.060 million.

#### FY 2009 Accomplishments

- Provided technical assistance to all 56 States and territories to support the implementation of Statewide Communication Interoperability Plans and the alignment of Statewide Communication Interoperability Plans to the National Emergency Communications Plan.
- Provided Statewide Communication Interoperability Plan Implementation Workshops to support States and territories in establishing concrete milestones for advancing interoperable emergency communications and identify priorities for the Office of Emergency Communications technical assistance services.
- Officially established the Emergency Communications Preparedness Center following final approval of the charter by all 22 member Departments and Agencies.
- Deployed Communications Unit Leader Training/Instructor Training that ensures every State and territory has qualified personnel capable of coordinating on-scene emergency communications during a multi-jurisdictional response.

#### FY 2010 Planned Accomplishments

- Provide assistance to States and territories to support the implementation of Statewide Communication Interoperability Plans and the alignment of Statewide Communication Interoperability Plans to the National Emergency Communications Plan and conduct 60 site visits to observe and validate Goal 1 of the National Emergency Communications Plan.
- Deploy Communications Unit Technician Training in order to ensure that in the event of a multi-discipline, multi-jurisdictional response event, on site response practitioners are trained to a similar baseline. The Communications Unit Technician is responsible for assisting with the technical activities of incident response.
- Implement the Emergency Communications Preparedness Center (ECPC) Clearinghouse on DHS.gov. This activity will identify and potentially eliminate duplication of emergency communications efforts and provide users access to a document library and a centralized information source.
- Implement Phase I of the U.S.-Mexico High Level Consultative Commission on Telecommunications Security Communications Task Group Action Plan. This phase includes completing system implementation and finalization of bi-national and domestic standard operating procedures.

#### FY 2011 Planned Accomplishments

- Provide guidance to States and urban areas to help them achieve the targeted benchmarks under National Emergency Communications Plan Goals 1 and 2. Develop criteria required to measure progress in achieving Goal 3 of the National Emergency Communications Plan by 2013.
- Implement U.S.-Mexico the High Level Consultative Commission on Secure Communications Task Group Action Plan. Phase II includes completing system implementation of two additional sites and completion of Customs and Border Patrol Border Patrol Operations/Dispatch Center upgrades.

- Provide requested technical assistance to States and territories to support the implementation of Statewide Communication Interoperability Plans and leverage stakeholder groups to support the States' and territories' demonstration of National Emergency Communications Plan Goal 2.
- Implement a plan for strategic communications efforts, including positioning the Office of Emergency Communications as a focal point of nationwide emergency communications and enhancing relationships among stakeholders and the inter-governmental community.

## MISSION SUPPORT

**Risk Management and Analysis.** Risk Management and Analysis (RMA) leads the Department's efforts to establish a common framework addressing the overall management and analysis of homeland security risk. RMA supports development of a consistent, standardized, coordinated and collaborative approach to risk management, which allows RMA to direct and integrate risk expertise across Department components as well as external stakeholders.

In FY 2011, NPPD requests \$9.790 million for RMA, a decrease of \$0.105 million from the FY 2010 enacted budget of \$9.895 million.

### FY 2009 Accomplishments

- Led a full review of the Homeland Security National Risk Assessment requirement, culminating in a viable process and implementation plan in October 2009. The Homeland Security National Risk Assessment, when executed in 2010, will inform strategy formulation and strategic decision making by the Nation's homeland security leaders.
- Completed the Risk Assessment Process for Informed Decision-making (RAPID) prototype proof of concept. RAPID is intended to gauge, at a strategic level, risks across the full range of DHS responsibilities and how program effectiveness may influence those risks.

### FY 2010 Planned Accomplishments

- Implement Risk Informed Decision Making to inform the Planning, Programming, Budgeting, and Execution cycle of resource allocation decisions, including the FY 12-16 IPG and the process for Resource Allocation Plans and Resource Allocation Decisions.
- Continue to lead the Protect and defend sub-objective related to risk management for the National Implementation Plan Global War on Terrorism.

### FY 2011 Planned Accomplishments

- Provide routine assessment of economic considerations of NPPD programs to leadership. Develop toolkit of readily available models and economic database access to support decision making
- Consolidate multiple instances of accounting into a single instance to create efficiency and improve overall budgetary and financial operations and reporting.
- Initiate internal control evaluations on budgetary and financial operations of sub-offices to ensure internal controls are maintained.
- Conclude RAPID III and incorporate the results to refine the methodology for the next RAPID iteration. Prepare for application to inform the DHS's annual Programming, Budgeting, and

Execution cycle of resource allocation decisions, including the FY 2013-2017 IPG and the process for developing the RAP and RAD.

## **BUSINESS SUPPORT**

**Directorate Administration.** Administration guides and assists the Directorate's programs in enhancing the protection of America's critical infrastructure and key resources. This appropriation supports activities associated with the Office of the Under Secretary, Office of Budget and Financial Administration, Office of Resource Management, Information Technology Division, Office of Communications and Public Affairs, and Office of Information Management. Together these activities provide Directorate leadership, budgeting, financial execution, human capital, security, program review and evaluation, executive secretariat functions, information technology support, facilities build out, rent and security services.

In FY 2011, NPPD requests \$36.347 million to perform these functions, an increase of \$1.665 million from the FY 2010 enacted budget of \$34.682 million.

### FY 2009 Accomplishments

- 75% of positions authorized filled or tentative job offers have been extended. NPPD had 939 employees on-board at the end of FY2009.
- Initiated Internal Controls program, tested the design and control of the funds balance with treasury and the Budgetary Resource Management processes.
- Improved invoice processing to reduce prompt payment interest penalties to under \$200 per \$1 million, last 3 months NPPD has paid 99% of all invoices on-time.
- Developed NPPD short term facilities plan and managed the build out of new locations to alleviate the shortage in space for new employees.
- Developed the Federal Protective Service transition plan in conjunction with ICE to evaluate the NPPD administrative support requirements for FY 2010.
- Developed an Acquisition Review Process to evaluate all programs & major acquisitions.
- Provided economic and regulatory impact analyses of the Ammonium Nitrate and US-VISIT Air Exit rulemaking.
- Updated NPPD COOP Plan, Pandemic Influenza Annex, and conducted COOP exercise Eagle Horizon '09.

### FY 2010 Planned Accomplishments

- Integrate the Federal Protective Service into NPPD.
- Implement Personal Identification Verification and Logical Access and support data center migration efforts.
- Stand up a full service Human Capital Office. Fill 90-95% of authorized billets by fiscal year end 2010.
- Support DHS long range facilities planning efforts.
- Implement a web-based invoice consolidation payment system.
- Conduct assessments of the Internal Controls and develop corrective action plans.

- Launch iShare information sharing resource for NPPD workforce to blog/post and directly engage with the Directorate's leadership team.
- Implement a document management system for the assignment, monitor, review, and approval of correspondence, action and information memoranda, Congressional Reports, White House requested and Congressional Questions for the Record.

#### FY 2011 Planned Accomplishments

- Work with the DHS Office of Chief Information Office and improve NPPD Component Office program and project alignment with DHS policy, directives, and mandates as evidenced by enhanced program/project justifications, expenditure plans and project reports.
- Formalize process mapping of all OUS OIM processes and procedures to make available to directorate components via the intranet.
- Implement Electronic Records Management System and conduct directorate-wide training on records retention processes and procedures.
- Facilitate integration of improved regulatory and program alternative analysis to include appropriate cost benefit or other economic analysis in decision making and develop toolkit of readily available models and economic database access to support decision making.
- In coordination with DHS Office of Public Affairs and senior communicators throughout the Federal government, devise a comprehensive and effective National Cybersecurity Awareness Month education and outreach campaign targeting non-traditional audiences (K-12, collegiate, urban).
- Strengthen the Directorate's business continuity and emergency preparedness posture and readiness to continue mission essential functions under all conditions.
- Consolidate multiple instances of accounting into a single instance to create efficiency and improve overall budgetary and financial operations and reporting.

#### C. Resources Requested and Performance Impact

In FY 2011, NPPD requests \$2,361.715 million gross discretionary, \$1,426.715 million net discretionary, 2,969 FTE, a decrease of \$71.040 million and increase of 392 FTE over the FY 2010 enacted budget of \$2,432.755 million gross discretionary, \$1,317.755 net discretionary enacted, 2,577 FTE.

#### *Current Services*

- Annualization of \$5.233 million for 38 positions received in FY 2010 (22 Infrastructure Security Compliance, 16 National Cyber Security Division);
- 2010 pay increase (2.1%) and 2011 pay inflation (1.4%): \$2.534 million;
- 306 FTP/360 FTE funded through offsets from program/contract dollars;
- GSA Rent inflation increase: \$0.279 million;
- A non-recurring adjustment of (\$8.000) million for data center migration efforts;
- A transfer of \$4.000 million to transfer the National Computer Forensics Institute to the Federal Law Enforcement Training Center.

#### *Program Increases*

- **Federal Network Security (Federal Enterprise Cybersecurity)..... \$9.528M (6 FTE)**  
 The Assessment, Testing, and Analysis Capability program will objectively measure the effectiveness of Federal cybersecurity programs, systems, and infrastructure; and establish and maintain a holistic view of the Federal government’s current security state. This function provides comprehensive risk analysis; vulnerability and threat assessment; and penetration testing capabilities. The output will be used to develop and evolve future required cybersecurity capabilities and practices.
- **Cybersecurity Coordination.....\$5.000M (13 FTE)**  
 This enhancement for the National Cyber Security Center will allow for the enhancement of Cybersecurity Coordination capabilities across Government including mission integration; collaboration and coordination; situational awareness and cyber incident response; analysis and reporting; knowledge management; and technology development and management.
- **National Coordination Center 24X7 Watch.....\$2.231M (0 FTE)**  
 Funding will provide additional resources to the National Coordinating Center (NCC) 24x7 Watch, the National Communications System response capability for telecommunications events. The NCC Watch provides 24x7 operations and maintains situational awareness on the health of the Nation’s telecommunications infrastructure, as well as time sensitive alerts, warnings, and in-depth analyses on national security/emergency preparedness issues impacting the NCS’ 24 departments and agencies and industry partners.
- **Title Globe.....\$1.345M (0 FTE)**  
 An increase of \$1.345 million will support Title Globe, a monthly continuity communications capabilities test platform for Departments and Agencies specified in Homeland Security Presidential Directive – 20, National Continuity Policy.
- **Public Safety Broadband Interoperability.....\$1.000M (0 FTE)**  
 An additional \$1.0M will support the implementation of DHS’s responsibilities for the Emergency Response Interoperability Center in conjunction with the Federal Communications Commission (FCC). These efforts will include setting the broad policy framework for public safety broadband networks, providing technical assistance and coordinating Federal broadband interoperability efforts.
- **Infrastructure Information Collection Program.....\$1.588M (2 FTE)**  
 An increase of \$1.588 million will allow Infrastructure Protection to integrate disparate information systems, evolve current tools and applications, and leverage new technologies to keep pace with an expanding State and local and private sector infrastructure protection and resiliency mission.
- **SSA Management Critical Manufacturing.....\$1.935M (4 FTE)**  
 This capability will enable the Department to carry out its broad responsibilities as a Sector-Specific Agency. As described in the National Infrastructure Protection Plan, the core mission of each Sector-Specific Agency is to lead the unified public-private sector effort to enhance the security of the Nation’s critical infrastructure and key resources.
- **US-VISIT 1.0.....\$1.569M (0 FTE)**

An increase of \$1.569 million will support planning activities, including the development of operational and functional requirements documentation for the re-architecture of the Automated Biometric Identification System and the Arrival and Departure Information System. These activities will incorporate technological advancements as well as future stakeholder needs to ensure the US-VISIT system can meet system demand. These requirements will guide subsequent activities, including the development of an analysis of alternatives to examine methods to fuse multiple biometric identification modalities (e.g., fingerprints, facial recognition, and iris).

- **NPPD Data Center Migration.....\$24.300M (0 FTE)**  
The Data Center consolidation efforts will standardize IT resource acquisitions across DHS Components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation are enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

*Major Program Decreases*

- **Network Security Deployment..... \$13.282M (0 FTE)**  
The funding for the National Cybersecurity Protection System (NCPS) is being deferred in order to fund higher priority cybersecurity efforts. The NCPS helps protect Federal civilian government information technology enterprises through the analysis of network flow and intrusion detection information from Federal partners. It provides a high-level perspective from which analysts can observe potential malicious activity in Federal partners' computer network traffic by providing capabilities that support automated processes to collect, correlate, analyze, and share cybersecurity information across Federal government computer networks.
- **National Infrastructure Protection Plan Management and Critical Infrastructure/ Key Resources Partnership Programs..... \$14.109M (0 FTE)**  
The NIPP and the 18 supporting Sector-Specific Plans serve as the foundation of the Nation's long-term critical infrastructure and key resources risk management program and the basis for virtually all of IP's activities. The Critical Infrastructure and Key Resources Partnerships and Information Sharing Project builds, sustains, and ensures the effective coordination and operations of the comprehensive network of structures, mechanisms, and processes that engage all critical infrastructure and key resources stakeholders across the Nation. The structures and partnerships created by these programs have matured and are able to sustain core levels of activity under a program decrease.
- **US-VISIT Comprehensive Biometric Exit..... \$22.000M (0 FTE)**  
Funding is not being requested for the US-VISIT Comprehensive Biometric Exit Program in FY 2011, as DHS is in the process of determining the appropriate Exit Solutions.
- **US-VISIT Program Management Services..... \$12.632M (0 FTE)**  
The request for Program Management Services is decreased in FY 2011 as US-VISIT has increased the Federal staffing levels over the last several years and matured program management activities to support the program.

#### D. Program Performance Highlights, Resources, and Alignment to Strategic Goals

For each mission-oriented program, the program performance goal, alignment to Secretary's Priorities, total dollars and FTE, and Government Performance and Results Act (GPRA) performance plan measures are shown below. Additional measures are also displayed, as appropriate, to provide a more thorough context of expected performance results.

<b>Program: Infrastructure Protection</b>						
<b>Performance Goal:</b> Improve the protection of the Nation's high risk and most valued critical infrastructure and key resources by characterizing and prioritizing assets, modeling and planning protective actions, and building partnerships.						
<b>Secretary's Priority:</b> Preventing Terrorism and Enhancing Security						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$311,381	\$299,460	\$251,633	\$328,357	\$359,463	\$346,606
<b>FTE</b>	201	338	267	424	761	782

#### Performance Plan Measures

<b>Measure:</b> Percent of critical infrastructure and key resource sector specific protection implementation actions on track						
<b>Description of Measure:</b> The National Infrastructure Protection Plan (NIPP) defines a set of 23 core metrics applied across 17 critical infrastructure and key resources (CIKR) sectors, for a total of 391 total metrics. These metrics track the success of actions taken to further protection and partnership building activities within each sector. Specifically the metrics track the implementation of planned sector accomplishments in Sector Partnerships, Information Sharing, Security Goals, Asset Identification, Risk Assessments, Prioritization, Implement Protective Programs, and Effectiveness. This measure evaluates annually the percent of the 391 total protection action metrics that were scored as being on track.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	90%	90%	100%	100%
<b>Actual:</b>	None	None	93%	93%	N/A	N/A

<b>Measure:</b> Percent of high - priority critical infrastructure and key resources where a vulnerability assessment has been conducted and enhancement(s) have been implemented.						
<b>Description of Measure:</b> This measure tracks the number of the Nation's high priority critical infrastructure and key resources (CIKR) sites at which at least one vulnerability assessments (VA) has been conducted and a protective enhancement has been implemented. High - priority CIKR includes assets categorized in Tier 1, the highest priority assets, and other CIKR assets planned in the fiscal year. Vulnerability assessments are conducted to identify physical, cyber, and human - related vulnerabilities at an asset and dependencies/interdependencies on other assets and sectors. The assessment analyzes the benefits of existing protective programs and provides recommendations to remediate unresolved vulnerabilities. The assessments are also used to assist federal stakeholders and private sector owners in making optimal resource allocation decisions for future enhancements.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	95%	95%	100%	100%
<b>Actual:</b>	None	None	100%	100%	N/A	N/A

<b>Measure:</b> Percent of inspected high - risk chemical facilities in compliance with risk based performance standards.						
---	--	--	--	--	--	--

<b>Description of Measure:</b> The program conducts onsite inspections to provide regulatory oversight of the Nation's high - risk chemical facilities and verify compliance with the Chemical Facility Anti - terrorism Standards (CFATS). Inspections are conducted in intervals starting with the highest risk facilities. Compliance means that chemical facilities have been inspected to ensure that the facility's Site Security Plan (SSP) is in accordance with the Risk - Based Performance Standards set forth by DHS, or that the facility is seeking/will seek remedies to identified security gaps. It is estimated that many of the high risk facilities are already in compliance with the CFATS standards so initial percentages are high, but that with the inclusion of lower risk facilities compliance percentages may fluctuate and then increase in later years.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	0%	75%	85%	70%	75%
<b>Actual:</b>	None	None	No Data	No Data	N/A	N/A

<b>Program: Federal Protective Service</b>						
<b>Performance Goal:</b> Mitigate risk to Federal facilities and their occupants.						
<b>Secretary's Priority:</b> Preventing Terrorism and Enhancing Security						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$487,000	\$516,000	\$613,000	\$640,000	\$1,115,000	\$1,115,000
<b>FTE</b>	1,300	1,295	1,053	1,225	1,225	1,225

Performance Plan Measures

<b>Measure:</b> Countermeasure effectiveness at facilities protected by the Federal Protective Service						
<b>Description of Measure:</b> This measure determines what percent of countermeasures deployed, when tested, prove to be effective in preventing harm and destruction to the building and its contents. This applies only in those federal buildings where the Federal Protective Service provides security and law enforcement services. Countermeasures include systems such as cameras, x - ray equipment, magnetometers, alarms, and security guards. Effectiveness standards are based on established testing protocols and are informed by Interagency Security Committee standards. These tests occur on a regular basis and provide the program decision makers a means of assessing the effectiveness of existing countermeasures.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	>94%	>96%	>98%	>95%	>95%	>95%
<b>Actual:</b>	90%	94%	94%	94.4%	N/A	N/A

<b>Measure:</b> Percent of successful completions of building security assessments						
<b>Description of Measure:</b> This measure indicates the percent of planned federal building security assessments that are completed to standards during the fiscal year. A building security assessment is a comprehensive risk assessment that examines credible threats to federal buildings and the vulnerabilities and consequences associated with those threats. Credible threats include things such as crime activity or potential terrorism acts. Requirements for the frequency of federal building security assessments are driven by Federal Protective Service program policy and the Interagency Security Committee standards. Typically, these assessments occur on either a three or five - year basis.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	>89%	>90%	>90%
<b>Actual:</b>	99%	93%	100%	95%	N/A	N/A

<b>Measure:</b> Percent of tenants satisfied with the level of security provided at Federal facilities						
<b>Description of Measure:</b> This measure assesses the effectiveness of security services provided by the Federal Protective Service (FPS) to the Government Services Agency (GSA) tenants						

through the use of a formal customer satisfaction survey. The Federal Protective Service uses the feedback from this survey to identify opportunities for improvement in the security services provided to its customers.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	80%	81%	82%
<b>Actual:</b>	None	None	None	None	N/A	N/A

**Program: US – VISIT**

**Performance Goal:** Improve the identity and document verification capabilities available to Immigration and Border Management stakeholders to enable them to make timely and accurate risk and eligibility decisions.

**Secretary's Priority:** Securing and Managing Our Borders

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$236,622	\$368,656	\$355,247	\$313,917	\$386,848	\$347,472
<b>FTE</b>	102	109	101	131	220	446

Performance Plan Measures

**Measure:** Accuracy of non - immigrant traveler investigative lead referrals to Immigration and Customs Enforcement

**Description of Measure:** An in - country overstay is a non - immigrant foreign traveler whose authorized period of admission granted at arrival in the United States expired without a subsequent departure, arrival, or status update. An individual is considered an overstay if the subject has not departed the United States within 7 days after the terms of their admission. This measure gauges the accuracy of the program in identifying individuals who may have overstayed their authorized period of admission. The program uses on algorithms run in the Arrival and Departure Information System and manual vetting records to identify these individuals. Records identified as likely overstays are sent to government quality control review prior to forwarding to ICE/CEU for further investigation. An lower trend indicates an increasing error in credible leads identified and forwarded to government for secondary review prior to sending the leads to ICE/CEU for further investigation.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	98%	98%
<b>Actual:</b>	None	None	None	None	N/A	N/A

**Measure:** Average biometric watch list search times for queries from ports of entry

**Description of Measure:** This measure reports the average response time of biometric watchlist queries processed through the Automated Biometric Identification System (IDENT) system in response to queries from ports of entry (POE) where fingerprints are captured. The target is less than 10 seconds to provide critical watchlist and identity screening information to inspectors in a timely manner to facilitate traveler processing.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	Less than 10 sec.	Less than 10 sec.	Less than 10 sec.	<10 sec.	<10 sec.	<10 sec.
<b>Actual:</b>	7.14 seconds	9.47 seconds	9.67 secs	8.713 seconds	N/A	N/A

**Measure:** Average biometric watch list search times for queries from U.S. consulates

**Description of Measure:** This measure is used to determine the average amount of time required to complete an automated search processed through the United States Visitor and Immigrant Status Indicator Technology (US - VISIT) Automated Biometric Identification System (IDENT)

system in response to queries from consular offices worldwide where fingerprints are captured as part of the BioVISA form process. The service level agreement with the Department of State is less than 15 minutes to provide critical identity and watch list information in a timely manner to not impede traveler processing. In light of past performance, the program has set a target of processing BioVisa searches within 5 minutes.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	5 minutes	<5 minutes	<5 minutes	<5 minutes	<5 minutes
<b>Actual:</b>	None	2.21 minutes	2.34 minutes	2.57 minutes	N/A	N/A

**Measure:** Deviation from predicted error rate in biometric screening

**Description of Measure:** US - VISIT receives biometric screening requests from a variety of sources, including Customs and Border Protection Officers processing individuals through International ports of entry, or Department of State Consular offices processing VISA applicants. US - VISIT screens individuals against a biometric watchlist. In processing these screening requests, US - VISIT operates to minimize the number of individuals the US - VISIT system mistakenly identifies as being on a watchlist when they are not, while maximizing the chances of identifying persons of interest. This measure reflects the success of US - VISIT's biometric matching system in minimizing false matches. To keep at a minimum false matches, US - VISIT applies process control methodologies to compare the level of false matches against statistically acceptable levels reflected in a biometric false match index between 1 and - 1. Variations beyond this threshold can indicate degradation of system performance or the need for corrective measures

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011

**Program: Cyber Security and Communications**

**Performance Goal:** Improve the security and interoperability of Americas cyber and emergency preparedness communications assets by working collaboratively with public, private, and international entities.

**Secretary's Priority:** Resilience to Disasters  
Safeguarding and Securing Cyberspace

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$261,317	\$298,339	\$331,208	\$515,989	\$571,444	\$552,638
<b>FTE</b>	106	155	114	275	371	516

**Performance Plan Measures**

**Measure:** Government Emergency Telecommunications Service call completion rate during emergency communication periods.

**Description of Measure:** This measure gauges the Government Emergency Telecommunications Service (GETS) call completion rate. The GETS call completion rate is the probability that an National Security/Emergency Preparedness (NS/EP) user completes a call via public telephone network, landline or wireless, to communicate with the intended user/location/system/etc, under all - hazard scenarios. Hazard scenarios include natural or man - made disasters such as a hurricane, earthquake, or terrorist incident.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	90%	90%	90%	90%	90%	90%

<b>Actual:</b>	97.8	None	97%	94.2%	N/A	N/A
<b>Measure:</b> Percent of Critical Infrastructure/Key Resource Sectors that have implemented the Cyber Security Evaluation Tool						
<b>Description of Measure:</b> This measure evaluates the use of the Cyber Security Evaluation Tool (CSET) by asset owners and operators to conduct assessments to identify and mitigate vulnerabilities in their Critical Infrastructure and Key Resource (CI/KR) cyber systems. Prioritization of tool distribution to stakeholders is determined based on estimated risk level of the stakeholder, stakeholder receptivity to the product, and level of impact the tool may have on stakeholder protection and prevention needs in control systems.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	N/A	25%	75%	80%	85%
<b>Actual:</b>	None	None	50%	75%	N/A	N/A

<b>Measure:</b> Percent of high - risk urban areas designated within the Urban Areas Security Initiative (UASI) able to demonstrate response - level Emergency Communications within one hour for routine events involving multiple jurisdictions and agencies.						
<b>Description of Measure:</b> This measure gauges Federal, State, local, and tribal agencies' success in meeting a baseline level of national interoperable communications as established in the National Emergency Communications Plan (NECP). The first goal of the NECP requires that high - risk urban areas designated within the Urban Areas Security Initiative (UASI) are able to demonstrate response - level Emergency Communications within one hour for routine events involving multiple jurisdictions and agencies.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY2011
<b>Target:</b>	None	None	None	None	90%	N/A*
<b>Actual:</b>	None	None	None	None	N/A	N/A

\*Data for this measure is reported every other year.

<b>Measure:</b> Percent of Trusted Internet Connections protected and monitored by the National Cybersecurity Protection System.						
<b>Description of Measure:</b> This measure tracks the overall percentage of Office of Management and Budget approved Trusted Internet Connections (TICs) that are monitored by the products and capabilities delivered by the National Cybersecurity Protection System (NCPS), operationally known as EINSTEIN. A TIC is considered monitored after EINSTEIN is installed and actively processing traffic.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	85%	95%
<b>Actual:</b>	None	None	None	None	N/A	N/A

<b>Measure:</b> Percent of unique high alert level events detected by the National Cyber Protection System validated as legitimate incidents.						
<b>Description of Measure:</b> This measure reflects improvements in efficiency of the United States - Computer Emergency Response Team (US - CERT) through more effective resourcing to analyzing legitimate, high - alert level cyber incidents. A high - alert level cyber incident poses a potentially severe impact to the security or operations of a Department or Agency's network, or to the integrity of its proprietary information. The National Cyber Protection System reduces the number of false positives through improved signature development and enhanced automated detection capabilities. This measure tracks improvements in signature methodology by focusing on unique high - level events and provides a key indicator for the overall accuracy of the National Cyber Protection System in detecting malicious activity in the .gov domain. The percent of						

legitimate incidents detected will increase as the signatures used for detection of malicious activity are improved with technology, tuning and information sharing activities.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011

## BUDGET REQUEST AND SUPPORTING INFORMATION

### Office of Health Affairs

## I. Appropriation Overview

### A – Mission Statement for Office of Health Affairs

The Office of Health Affairs (OHA) serves as the Department of Homeland Security's principal authority for all medical and health matters. OHA provides health, medical, and scientific expertise to support the DHS mission of preparing for, responding to, and recovering from all threats.

OHA serves as the principal advisor to the Secretary and the Federal Emergency Management Agency (FEMA) Administrator on medical and public health issues. OHA leads the Department's workforce health protection and medical oversight activities, leads and coordinates the Department's biological and chemical defense activities, and provides medical and scientific expertise to support DHS' preparedness and response efforts.

### B – Budget Activities:

The Office of Health Affairs budget is divided into five Program, Project and Activity (PPAs) areas:

#### **BioWatch:**

The BioWatch Program enables DHS to detect biological attacks by managing an early warning system to rapidly detect dangerous pathogens in the air. This program deploys detection devices in over thirty major metropolitan areas throughout the nation. The BioWatch Program provides public health experts with a warning of a biological agent release before exposed individuals become clinically symptomatic ("ill"). This "detect-to-treat" approach provides public health officials an opportunity to respond aggressively to eliminate or substantially mitigate the potentially catastrophic impact on the population of a biological agent release.

#### **Chemical Defense and the Rapidly Deployable Chemical Detection System:**

The Rapidly Deployable Chemical Detection System is a mobile set of chemical point detection sensors that can be deployed across the nation and set up in hours prior to an event and is intended for use at large, high profile gatherings such as National Special Security Events (NSSE) or DHS Special Event Assessment Rating (SEAR) Level events. This system of systems can identify a variety of threat chemicals and can decrease the initial period of uncertainty that could occur following chemical incidents. Technology and operations already used for RDCDS will become the nexus for creating an overarching chemical defense and chemical detection architecture.

### **National Biosurveillance Integration Center:**

The Implementing Recommendations of the 9/11 Commission Act of 2007 (9/11 Act), P.L. 110-53, established the National Biosurveillance Integration Center (NBIC) to enhance the Federal government's capability to rapidly identify and monitor biological events of national concern. The 9/11 Act also tasks NBIC to disseminate alerts to Federal partners, states and localities to help them prepare and respond to biological threats.

NBIC collaborates with federal and state partners to collect, analyze, and share human, animal, plant, food, and environmental biosurveillance information from a myriad of monitoring systems. NBIC provides a Biosurveillance Common Operating Picture (BCOP) to senior decision-makers and partner agencies. The BCOP provides biosurveillance situational awareness for DHS and its partners.

### **Planning and Coordination:**

The Planning and Coordination PPA is composed of the programs within the Office of Medical Readiness (OMR) and the Food, Agriculture, Veterinary Defense (FAVD) division.

The experts within OMR provide advice and guidance on health and medical issues to the Secretary of DHS and the Administrator of FEMA through the Assistant Secretary for Health Affairs/Chief Medical Officer (CMO). OMR provides health and medical support to DHS operations for incident management, and provides direction and subject matter expertise to the federal interagency planning process to ensure health impacts are fully integrated into federal plans. OMR experts also develop guidance on the health and medical aspects of federal grant programs, and lead the development of the National Biodefense Architecture.

The Food, Agriculture, and Veterinary Defense (FAVD) division leads the coordination of the Department's programs to ensure the security of our Nation's food, agriculture, human and animal health. FAVD experts support the development of the federal CONOPS for Foreign Animal Diseases and the development of the multistate/regional plans for catastrophic events.

### **Salaries and Expenses:**

The Salaries and Expenses (S&E) PPA funds all FTEs within OHA. The S&E PPA provides programmatic funding for the Office of the Assistant Secretary, Office of Component Services and the Office of International Affairs and Global Health Security.

The Office of the Assistant Secretary (OAS) is headed by the Chief of Staff. The Office of the Chief of Staff provides direct support to the Assistant Secretary, and provides policy, external affairs, and executive secretariat services to all entities within OHA. The Management Operations Division supports OAS and includes the Chief Financial Officer, the Chief Administrative Officer, and the Chief Human Capital Officer.

The Office of Component Services is headed by an Associate Chief Medical Officer and is responsible for establishing policy, standards, requirements and metrics for the

Department's health and safety programs, and provides protective and operational medical oversight, credentialing, and medical quality management across DHS.

The Office of International Affairs and Global Health Security (OIAGHS) oversees the Department's global health security initiatives, including the international aspects of pandemic influenza planning and international lessons learned from public health crises. OIAGHS maintains high-level liaison with senior foreign partners, international private sector representatives, technical and professional associations, and other Federal agencies to facilitate sustainable solutions for global health security issues that may have national implications for homeland security.

**C – Budget Request Summary:**

OHA requests \$212.734 million, 104 full-time positions (FTP) and 95 full-time equivalents (FTE).

- OHA requests an increase of \$83.992 million for the BioWatch Generation 3 program in addition to the current services of \$89.513 million for a total of \$173.505 million.

## II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

### III. Current Services Program Description by PPA

**Department of Homeland Security  
Office of Health Affairs  
Salaries and Expenses  
Program Performance Justification**  
(Dollars in Thousands)

#### PPA: Salaries and Expenses

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2009 Actuals</b>	<b>80</b>	<b>71</b>	<b>29,973</b>
<b>2010 Enacted</b>	<b>84</b>	<b>84</b>	<b>30,411</b>
2011 Adjustments-to-Base	20	11	(2,858)
<b>2011 Current Services</b>	<b>104</b>	<b>95</b>	<b>27,553</b>
<b>2011 Total Request</b>	<b>104</b>	<b>95</b>	<b>27,553</b>
Total Change 2010 to 2011	20	11	(2,858)

OHA requests \$27,553 million which will fund 104 FTP/95 FTE for the Office of the Health Affairs. This is a decrease of \$2.858 million from FY 2010 enacted and is attributed to a decrease in supplies, staff travel, training and development and the conversion of contract support services for associated management and administration activities. The increase in FTE is due to the DHS Balanced Workforce Strategy.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

##### **Management and Administration:**

OHA is led by the Assistant Secretary for Health Affairs, who also holds the title of Chief Medical Officer for DHS, and serves as the principal health and medical advisor to the Secretary and the Administrator of FEMA. The Deputy Chief Medical Officer and Principal Deputy Assistant Secretary for Health Affairs serves as the Chief Operating Officer. This request will fund 104 FTP/95 FTE throughout the Office of Health Affairs.

##### **Office of Component Services**

The Office of Component Services (OCS) provides medical guidance, oversight, support and standards for all DHS components. OCS activities are divided into three areas:

Occupational Medical Services efforts include development of strategy, policy, requirements and metrics for the medical aspects of a Department-wide occupational health and safety program. This is done in partnership with the Office of Safety and Environmental Programs within the Office of the Under Secretary for Management.

Occupational Medical Services provides health and medical consultation resources to DHS components on a 24/7 basis. OHA consultation services will ensure regulatory compliance and consistency with industry best practices in support of various component missions with regard to medical, health and safety considerations. Occupational Medical Services also assists the Department's Office of the Chief Human Capital Officer in developing physical evaluation programs (pre-placement, fitness-for-duty, return-to-work, etc.) and performing post-incident analyses.

Workforce Health Protection activities enhance the safety and health of the DHS workforce, including development of deployment health guidelines and policies; health protection guidelines in dangerous work environments; facilitated health screening programs; and mechanisms to support a physical fitness culture to help ensure that workforces are physically able to support the Department's missions while minimizing health threats and work-related disability.

Operational Medicine Support activities provide support to the thousands of DHS medical personnel throughout the country, including remotely deployed personnel such as border agents in the Southwest desert, DHS aviation personnel engaged in counter-narcotics and counter-smuggling operations, and rescue swimmers engaged in United States Coast Guard (USCG) search and rescue. Programs include a credentialing and medical oversight framework.

### **Office of International Affairs and Global Health Security**

The Office of International Affairs and Global Health Security (OIAGHS) enhances OHA executive decision-support to DHS leadership by coordinating international engagement and ensuring that health related global lessons learned and best practices are applied domestically. These best practices are collected and applied through the Lessons without Borders Initiative (Lw/oB). This initiative provides a framework for information sharing between national and international governmental, non-governmental, academic and private sector organizations to improve knowledge and decision-making on global health security issues. This strengthens the Department's ability to meet its mandate for the emergency management of natural or manmade threats, including Pandemic Influenza, chemical, biological, radiological or nuclear incidents. Additionally, OIAGHS coordinates all international OHA-related activities with the DHS Policy Office of the Assistant Secretary for International Affairs. This includes an all-hazard, multi-sector approach to countering trans-border health threats and natural or man-made catastrophic disasters.

### **Key Accomplishments**

In FY 2009, the Office of Component Services developed specialty protocols for Tactical Emergency Medical Personnel, initiated programs for credentialing of DHS health care personnel, and initiated a medical quality management program for the Department.

The 2009-H1N1 pandemic resulted in thousands of requests for medical and health information by DHS components. OCS provided extensive pandemic influenza support

to the workforce and will maintain this effort throughout FY 2010 as the current pandemic continues.

The OCS plan for FY 2010 includes finalizing Austere Medicine Protocols for use by DHS emergency medical personnel operating in remote and austere environments.

OCS will also enhance workforce health protection and wellness-related activities in FY 2010 by developing model wellness newsletters and policy-based health protection guidelines for situations such as disaster related deployment and international travel.

OCS plans to build upon the suite of DHS-wide medical protocols in FY 2011 by developing standardized medical care protocols for general EMS response.

Additionally, OCS's broad objectives for FY 2011 include implementation of a DHS-wide employee and organizational resilience program. OCS also aims to develop a credentialing program throughout DHS to ensure adequate credentialing of medical personnel and set minimum standards for medical providers within the Department. Furthermore, OCS plans to implement a medical quality management program to set standards and metrics for measuring quality of care, provide insight into training and certification needs, and reduce the liability risk of the Department.

Management and administration goals for FY 2011 include enhancing the range of services provided to OHA personnel and installing additional internal controls to improve program management.

**Department of Homeland Security**  
**Office of Health Affairs**  
**Planning and Coordination**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: Planning and Coordination**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	<b>5,523</b>
<b>2010 Enacted</b>	-	-	<b>3,726</b>
2011 Adjustments-to-Base	-	-	(1,450)
<b>2011 Current Services</b>	-	-	<b>2,276</b>
<b>2011 Total Request</b>	-	-	<b>2,276</b>
Total Change 2010 to 2011	-	-	(1,450)

OHA requests \$2.276 million for the Planning and Coordination PPA, of which \$1.549 million will fund the Office of Medical Readiness (OMR) and \$0.727 million will fund the Food, Agricultural and Veterinary Defense (FAVD) Division. This is a decrease of \$1.45 million from FY 2010, which is attributed to a reduced number of Public Health Service Officers (PHSOs).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

*Office of Medical Readiness*

The Office of Medical Readiness (OMR) develops policies, plans, and programs to enhance medical preparedness and response aspects of all-hazards planning, exercises, and training; oversees weapons of mass destruction incident management support; promotes the integration of state and local medical response capabilities; aligns DHS emergency preparedness grants with medical preparedness; and leads the DHS role in addressing medical first responder requirements to prepare for and respond to catastrophic incidents, while serving as the principal DHS representative for the medical first responder community. OMR is comprised of three divisions.

The Contingency Plans and Policy Division provides direction and subject matter expertise to the Federal interagency planning process to ensure health and medical impacts resulting from catastrophic incidents, both man-made and naturally occurring, are fully integrated. In its role in planning and policy support, the division provides ongoing and 24/7 on-call crisis action planning support to ensure health related aspects of crisis action planning are accomplished. Personnel within this division represent OHA

on selected sub-Interagency Policy Committees (sub-IPCs) addressing Federal policies related to biological threats and capabilities development. This division is also the OHA lead for informing the National Health Security Strategy development process, integrating all DHS feedback into the development of this national strategy.

The Incident Coordination Division provides situational awareness, incident management expertise, and coordination of DHS efforts in responding to health-related issues during disasters, mass casualty incidents, and national special security events. The division assures that the Assistant Secretary/Chief Medical Officer has constant visibility on situations and incidents which have the potential to impact the health and welfare of the Nation. The division provides health experts at the National Operations Center (NOC) and the FEMA National Response Coordination Center (NRCC), to inform DHS leadership on all health related issues arising from current operations. The division also provides medical and public health expertise to various exercise and training programs. Personnel from this Division provide support to the FEMA Incident Management Assistance Teams (IMAT) by deploying OHA staff with the teams to provide on the ground situational awareness of medical conditions before and during incidents and to provide any necessary medical care to team members.

The Health Security Coordination Division serves as the primary point of contact within OHA to the medical first responder community. The division leads the Department's role in improving medical first responder readiness for catastrophic incidents and facilitates the integration of emergency medical services (EMS) into federal, state, local, tribal and territorial disaster planning and preparedness activities. The division also leads interagency alignment of health preparedness grants working in coordination with FEMA to ensure health and medical issues are appropriately addressed in DHS grant programs. The Division supports Department-wide efforts to develop public health and medical standards for first responders, as well as training and education programs to enhance national preparedness and response capabilities.

Additionally, the division also provides support on EMS and medical first responder issues to the United States Fire Administration, FEMA EMS technical working groups, the DHS Science and Technology First Responder Officer, DHS State and Local Law Enforcement Office and the DHS Office of Intelligence and Analysis.

### **Key Accomplishments**

In FY 2009 OMR initiated the Health Security Intelligence Enterprise (HSIE) to incorporate public health and health care personnel into state and local fusion centers. OMR worked with DHS partners to develop a series of ten regional anthrax tabletop exercises to be executed in late 2009 and throughout 2010, and developed and conducted an anthrax table top exercise in collaboration with New York City.

OMR supported incident operations for the spring 2009-H1N1 influenza outbreak, standing up a Decision Support Cell to maintain situational awareness for DHS leadership and Components. Also in FY 2009, OMR developed and disseminated

guidance for medical first responders and law enforcement officers during the initial wave of 2009 H1N1 influenza in collaboration with other Federal agencies.

In FY 2010, OMR will continue to support DHS crisis action planning efforts that have health related impacts, provide medical expertise to incident operations, and enhance national medical and public health preparedness and response capabilities.

OMR plans to develop in FY 2010, in coordination with FEMA and other partners, guidance for continuity of operations for first responder systems, a fire-based EMS Medical Directors Manual that will guide medical directors on how to function in their role and how to integrate and coordinate with applicable fire and medical arenas, and an EMS & Fire Service Funding Manual that will provide comprehensive documentation of all available federal, state, and local funding resources for the first responder community.

OMR's objectives for FY 2011 are a continuation of its FY 2009 and 2010 efforts and include providing health and medical readiness expertise to the interagency planning and policy development process; providing support to DHS training, exercising and operations activities; and initiation of training activities to support the integration of public health and the healthcare community into the national network of state and local fusion centers.

Additionally in FY 2011, OMR plans to continue expansion of the web-based interagency Compendium of Medical and Public Health Preparedness, Allocation, Skills Development and Standards (CoMPASS), developed in FY 2009, to include equipment.

### *Food, Agricultural and Veterinary Defense*

The OHA Food, Agricultural and Veterinary Defense (FAVD) division provides oversight and management of DHS veterinary, food and agriculture security activities. FAVD provides expertise, technical support, and leadership to effectively coordinate DHS efforts in the event of a catastrophic food or agricultural incident, and works to enhance national preparedness and response capabilities in advance of an event.

### **Key Accomplishments**

In FY 2009, FAVD completed development of the Strategic Plan (for Federal Bio Planning Against Biological Attacks) for catastrophic Foreign Animal Disease and Food Contamination Scenarios, and began development of a Benchmarking Toolkit to allow state, local, and tribal organizations to measure their preparedness and response capabilities against established food and agricultural catastrophic scenarios.

FAVD's plan for FY 2010 includes contributing to national capability development activities related to food and agricultural preparedness and response; initial development of a Food Sector Benchmarking Toolkit and deployment of the Food and Agriculture Readiness Measurement Toolkit (FARM) to States; and enhancing food, agricultural and veterinary content on the DHS Lessons Learned Information Sharing System.

FAVD will work with Federal partners, including the Department of Agriculture and HHS, to develop an international food supply chain risk assessment, and assist states in preparing and implementing a food emergency response plan for all hazards.

In FY 2011, FAVD will complete development of a Defense of Food and Agriculture “Dashboard” and Collaboration Tool, and complete revision of the model Food Emergency Response Plan Template (in association with the National Association of State Departments of Agriculture, USDA and HHS).

FAVD aims to provide a fully functional Food Sector Benchmarking Tool (FARM Toolkit) for use by the States, local, and Tribal nations in FY 2011, and initiate development of a benchmarking toolkit for Livestock and Poultry Disease Emergency Response or Public Health Surveillance and Epidemiological Investigation.

**Department of Homeland Security**  
**Office of Health Affairs**  
**BioWatch**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: BioWatch**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	<b>80,552</b>
<b>2010 Enacted</b>	-	-	<b>89,513</b>
<b>2011 Current Services</b>	-	-	<b>89,513</b>
2011 Program Change	-	-	83,992
<b>2011 Total Request</b>	-	-	<b>173,505</b>
Total Change 2010 to 2011	-	-	83,992

OHA requests \$173.505 million in FY 2011. The \$83.992 million additional funding requested in FY 2011 will procure 476 Gen-3 detectors and will fund deployment and long lead support activities.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

BioWatch is the only federally-managed, locally-operated, nationwide bio-surveillance system designed to detect the intentional release of select aerosolized biological agents. The program has operated in more than 30 high-threat metropolitan areas since early 2003. BioWatch protects millions of people by focusing on early detection of a biological attack. Early detection is critical to the successful treatment of affected populations and provides public health decision makers more time in responding to, mitigating, and recovering from a bioterrorist event. BioWatch is the only program that exercises and evaluates our collective abilities to provide a detect-to-warn notification system that alerts the U.S. civilian population to a biological attack.

Current detection capabilities fielded by DHS, termed Gen-1 / Gen-2, consist of outdoor aerosol collectors whose filters are manually retrieved for transport to and subsequent analysis in a BioWatch Laboratory of the Laboratory Response Network (LRN) facility. This system, while extremely beneficial, is labor-intensive and the data results can take as long as 12 to 36 hours. The filter collection and analysis process results in a window between 12-36 hours after a release to detect the presence of a biological agent. Detection 12-36 hours post release is inadequate to support the decision needs of indoor facility managers due to the nature of these facilities – many are busy transportation centers such as airports, subways, train stations and arenas. BioWatch detection

capabilities must be augmented to significantly reduce detection time if we are to provide an appropriate detection strategy for indoor venues. The transition to an automated detection system, called Generation 3 (Gen-3) will improve time to detect from this 12-36 hour window to between 4-6 hours, will increase population coverage, and will provide greater cost effectiveness from greater automation.

BioWatch has identified critical gaps in population coverage in existing jurisdictions, high-throughput transportation hubs, and in non-BioWatch Urban Area Security Initiative (UASI) jurisdictions. Accordingly, with the availability of Gen -3 technology, DHS has determined that it is prudent to expand the BioWatch coverage will begin to fill in these critical gaps over the next three years. BioWatch plans to increase the percentage of the population covered within existing BioWatch jurisdictions; increase the number of jurisdictions by approximately 40 percent; and deploy autonomous detection capability to over 100 critical facilities nationwide. The FY 2011 request provides the first substantial improvement toward this coverage.

### **Key Accomplishments**

The BioWatch program maintained Gen-1 / Gen-2 capability in over 30 jurisdictions nationwide in FY 2009, and supported National Security Special Events (NSSEs) and local special events including the 56th Presidential Inauguration.

BioWatch sponsored an exercise program that included exercises in six BioWatch jurisdictions for both outdoor and subway events in FY 2009. The exercises comprised a combination of notification drills, tabletop exercises and functional exercises to assess the jurisdiction's BioWatch preparedness.

Additionally in FY 2009, BioWatch proceeded with the Gen-3 procurement process and established capability to evaluate the performance of new assays in candidate Gen-3 and existing BioWatch detection technologies. Gen-3 procurement included initiating the Gen-3 Field Test Program, providing funding to government testing facilities and an independent test agency for testing and test support for the Gen-3 Field Test Program, and awarding contract(s) for prototype Gen-3 detector systems, supplies, and technical support to implement the Gen-3 Field Test Program (Phase I).

In FY 2010 and FY 2011 BioWatch will continue to maintain Gen-1 / Gen-2 capability in over 30 jurisdictions nationwide as well as supporting National Security Special Events (NSSEs) and local special events.

Additional plans for FY 2010 include updating the BioWatch Outdoor Guidance, integrating BioWatch-specific plans into local/state/regional Emergency Operations Plans (EOPs) and support materials, and initiating development of the BioWatch Response Concept of Operations (CONOPS) for outdoor and indoor BAR responses.

Gen-3 procurement activities planned for FY 2010 include conducting a Field Test Program for prototype units for Gen-3 autonomous detectors; establishing criteria for the

approval of assays and the methodology for certifying tested complete planning and initiate long-lead deployment activities required to conduct indoor OT&E on production units, in conjunction with the CDC; completing planning and initiating long-lead activities required to prepare for the indoor deployment of a Gen-3 detectors to critical transportation facilities; and, completing assay testing/validation on the prototype Gen-3 vendor supplied assays.

BioWatch objectives for FY 2011 include exercises and assessments to strengthen response capabilities and assess preparedness in BioWatch jurisdictions.

The program will increase coverage of the BioWatch Jurisdictional Coordinator Program in FY 2011, and complete the BioWatch Response CONOPS for outdoor and indoor BAR responses that include Incident Action Plans for potential BAR-triggered jurisdiction-led bioterrorist incidents.

In FY 2011, BioWatch plans a number of Gen-3 initiatives, including procuring 476 Gen-3.0 autonomous detectors and the long lead logistics support requirements to operate and maintain the Gen-3 system.

First article testing, production readiness reviews, configuration audits of the Gen-3 detector production line, and delivery of the first Gen-3 detectors from the production line is also scheduled for FY 2011. These units will be used to support operational test jurisdictions. Operational testing and evaluation (TO&E) of production Gen-3 systems is also planned for FY 2011, including chamber characterization testing on the first 10 production units to ensure they perform as required.

BioWatch will continue to work with jurisdictions in FY 2011 to ensure each is prepared to receive and employ the Gen-3 detectors after the successful completion of OT&E.

**Department of Homeland Security**  
**Office of Health Affairs**  
**National Biosurveillance Integration Center**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: National Biosurveillance Integration Center**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	<b>9,121</b>
<b>2010 Enacted</b>	-	-	<b>13,000</b>
2011 Adjustments-to-Base	-	-	(6,000)
<b>2011 Current Services</b>	-	-	<b>7,000</b>
<b>2011 Total Request</b>	-	-	<b>7,000</b>
Total Change 2010 to 2011	-	-	(6,000)

The National Biosurveillance Integration Center (NBIC) requests \$7 million in FY 2011, which will fund NBIC technical support services, NBIS Information Technology operations and improvements, biosurveillance private sector data acquisitions and coordination efforts with federal, state, local and tribal governments. Of the \$6 million reduction in the base, \$1 million is attributed to a reduction in the number of agency detailees/liaison officers assigned to the NBIC and \$5 million is a reduction from the one time cost for the North Carolina Collaboratory for Bio-Preparedness project.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

NBIC was established to rapidly identify and monitor biological events of national concern. NBIC collaborates with federal and state partners to collect, analyze, and share human, animal, plant, food, and environmental biosurveillance information from a myriad of monitoring systems to produce alerts and other situational awareness products. A primary goal of NBIC is to reduce the impact of a major biological or disease event.

NBIC collects and analyzes information from open sources as well as Sensitive but Unclassified, Secret, Top Secret, and Top Secret Sensitive Compartmented Information. The first NBIC situational report was distributed to all eleven (11) Federal partners during the 2008 Salmonella saintpaul outbreak (an event involving data sharing between Customs and Border Protection and HHS/Food and Drug Administration). As the managing partner of the National Biosurveillance Integration System (NBIS), the NBIC organizes data and information and shares that primarily amongst a set of federal partners to determine what bio-events reach reporting thresholds and then publishes reports using

the Biosurveillance Common Operating Picture (BCOP) available to both federal and state/local officials.

### **Key Accomplishments**

In response to the 2009 H1N1 Influenza outbreak, NBIC, in coordination with HHS and the CDC, engaged the DHS Office of Infrastructure Protection and the National Infrastructure Simulation and Analysis Center (NISAC) to forecast the potential spread of 2009-H1N1 and its possible impacts on critical infrastructure and key resources during the 2009-10 influenza season. NBIC distributed key event information regarding 2009 H1N1 influenza via the Biosurveillance Common Operating Picture (BCOP).

Additional FY 2009 efforts included expanding the IT system processing capability; engaging private sector agencies and organizations in the public health, food and agriculture, transportation and logistics, and banking and finance sectors.

In FY 2009, NBIC continued to encourage federal departments and agencies to participate, and encouraged NBIC member agencies to enter into Interagency Agreements to provide detailees to NBIC to provide in-depth subject matter expertise and analytic perspectives and approaches to analyze and report on biological events. This effort will continue in FY 2010.

NBIC plans to significantly evolve and improve the visual analytic and decision support capabilities of the Biosurveillance Common Operating Picture (BCOP) in FY 2010 by providing access to in-depth scientific data, situational awareness, digital and analog depictions, and modeling and simulation results into a User Defined Operational Picture (UDOP). This UDOP will provide a full, comprehensive electronic picture with assessments of current biological events and trends and their potential impacts on homeland security.

In FY 2011, NBIC will add additional state fusion center and private sector information sources to the NBIC network, and expand the biological common operating network (BCON) to include even more data analytics.

NBIC will also update a number of planning documents and resources in FY 2011, including the NBIC Outreach to Critical Infrastructure and Key Assets plan, NBIS Concept of Operations, and NBIC 5 Year Strategic Plan.

**Department of Homeland Security**  
**Office of Health Affairs**  
**Rapidly Deployable Chemical Detection System**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: Rapidly Deployable Chemical Detection System**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	<b>1,785</b>
<b>2010 Enacted</b>	-	-	<b>2,600</b>
2011 Adjustments-to-Base	-	-	(200)
<b>2011 Current Services</b>	-	-	<b>2,400</b>
<b>2011 Total Request</b>	-	-	<b>2,400</b>
Total Change 2010 to 2011	-	-	(200)

OHA requests \$2.4 million in FY 2011 to operate and sustain current Rapidly Deployable Chemical Detection System (RDCDS) operations, facilitate the development of a proposed chemical detection architecture, and upgrade current operational capabilities of existing systems. The \$200,000 decrease is attributed to a reduction in maintenance needs on the detection units.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

RDCDS consists of a mobile set of chemical sensors that can rapidly identify a variety of potential threat chemicals to ensure a swift and accurate response to a chemical release. RDCDS maintains an operational capability at National Security Special Events (NSSEs) and DHS Special Event Assessment Rating (SEAR) Level I and II activities.

RDCDS personnel from the OHA Chemical Defense Division (CDD) provide health and medical expertise related to chemical preparedness, response, and resilience in support of a Chemical Defense Architecture to ensure an end-to-end approach to Chemical Defense.

CDD's documents the lessons learned and best practices captured during scheduled demonstration projects, which will serve as future guidance for other communities to design chemical detection and defense architectures tailored to their individual requirements and resource availability. The lessons learned, along with initiatives of DHS components and other federal agencies, will be incorporated into the design of the Chemical Defense Architecture. Specifically, the future guidance documents from these endeavors will facilitate linking detection technologies to threat, risk & vulnerability assessments, preparedness efforts and rapid response actions that save lives (e.g.,

deciding on protective actions such as evacuation, providing human decontamination, and disseminating accurate information to emergency response personnel and quickly administering appropriate medical countermeasures).

### **Key Accomplishments**

In FY 2009, the RDCDS capability was deployed at a National Security Special Event (NSSE). In addition, CDD re-aligned and defined the RDCDS program strategy to ensure an end-to-end approach to chemical defense that includes chemical detection.

CDD lent its expertise to a number of chemical defense efforts in DY 2009, including initiating and co-leading an interagency Mass Human Decontamination working group, co-leading an interagency Chemical Detection Technology Development Strategy working group to establish an R&D roadmap for future chemical detection, and creating a technical and operational specifications guidance document for TSA to use in the purchase and deployment of chemical detection systems.

CDD's plan for FY 2010 builds upon prior chemical defense activities, including RDCDS and support to NSSEs. CDD will develop standards for the purchase and deployment of chemical detection systems utilizing technical and operational specifications.

CDD will continue to provide health and medical expertise related to chemical preparedness, response, and resilience, and will begin building a Chemical Defense Architecture. Architecture development in FY 2010 will include establishing a DHS working group on chemical preparedness and response, and conducting cooperative operational demonstrations in several local venues with key local, state and federal emergency response stakeholders.

The Mass Human Decontamination working group will review current research and capability gaps and develop a roadmap for future Mass Human Decontamination efforts and a research and development roadmap for future chemical detection activities.

CDD's broad objectives for FY 2011 include enhancing community outreach and education for chemical event preparedness; establish training for first responders, first receivers and public health personnel on identifying toxic syndromes due to a chemical release; and continued deployment of RDCDS at NSSEs and high-risk events.

In addition, RDD will refine the Chemical Defense Architecture in FY 2011, engaging with the interagency to incorporate established chemical defense capabilities and build a more robust chemical defense posture.

## IV. Program Justification Changes

**Department of Homeland Security  
Office of Health Affairs  
BioWatch  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Increase 1:** BioWatch  
 PPA: BioWatch  
 Program Increase: Positions 0.0, FTE 0.0, Dollars \$83992.0

### Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	89,513
Program Increase							-	-	83,992
<b>Total Request</b>	-	-	<b>77,670</b>	-	-	<b>89,513</b>	-	-	<b>173,505</b>

### Description of Item

The \$83.992 million increase is the initial investment to deliver automated biosurveillance capabilities for DHS, states, and localities. The request will procure 476 Gen-3 detectors and fund the deployment and long lead support for these detectors. The detectors will enable the program to establish indoor coverage in candidate facilities within those jurisdictions.

### Justification

Current Gen-1 / Gen-2 detection capabilities consist of outdoor aerosol collectors whose filters are manually retrieved for transport to and subsequent analysis in a Laboratory Response Network (LRN) facility. This system, while extremely beneficial, is labor-intensive and the data results are significantly time-delayed. The analysis process takes between 12-36 hours post release to process and detect the presence of a biological agent. Detection 12-36 hours post release is inadequate for indoor use because most indoor sensors will be placed in areas where people who passed through the area will have traveled from the release sight, possibly contaminating additional persons, during the 36 hours from release.

Additionally, BioWatch has identified critical gaps in population coverage in existing jurisdictions, and has determined a need to deploy detection capabilities within high-throughput transportation hubs and into new UASI jurisdictions. Accordingly, as it begins to deploy automated Gen 3 units, DHS has determined that it is prudent to expand

the BioWatch coverage significantly over the next three years. Not only will funds be used for procurement and deployment, requested funds will also support site planning and preparation activities as well as program management costs for the multi-year, nationwide deployment.

Impact on Performance (Relationship of Increase to Strategic Goals)

The BioWatch program supports the Secretary's goal of ensuring resilience to disasters by providing the capability to detect execution of operations by terrorists and other malicious actors, and is aligned to the OHA responsibility to lead the Department's biodefense activities. An effective and timely detection capability is critical to achieving this goal.

With the FY 2011 request, the BioWatch Gen-3 system will decrease time to detect from 12-36 hours to 4-6 hours, allowing localities to rapidly conduct response and mitigation efforts. The FY 2011 request will also allow the BioWatch program to increase the percentage of the population covered within existing BioWatch jurisdictions, and deploy autonomous detection capability to over 100 critical facilities nationwide, while also providing greater cost effectiveness. With the FY 2011 request, the BioWatch Gen-3 system will decrease time to detect from 12-36 hours to 4-6 hours, allowing localities to rapidly conduct response and mitigation efforts. The FY 2011 request will also allow the BioWatch program to begin to increase the percentage of the population covered within existing BioWatch jurisdictions, and deploy autonomous detection capability to over 100 critical facilities nationwide, while also providing greater cost effectiveness and savings.

#### PPA Mission Statement

The Office of Health Affairs (OHA) serves as the Department of Homeland Security's principal authority for all medical and public health matters. OHA provides medical, public health, and scientific expertise in support of the DHS mission to prepare for, respond to, and recover from all threats. The Salaries and Expenses (S&E) PPA funds all FTEs within OHA. The S&E PPA also provides programmatic funding for the Office of Component Services, which is responsible for establishing policy, standards, requirements and metrics for the Department's health and safety programs, and provides protective and operational medical oversight, credentialing, and medical quality management across DHS, and the Office of International Affairs and Global Health Security, which oversees the Department's global health security initiatives, including the international aspects of pandemic influenza planning and international lessons learned from public health crises.

#### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	7,000	11,000	10,000	(1,000)

The FY 2011 request includes a decrease of \$1,000,000 for salaries and benefits associated with the 104 FTP / 95 FTE as part of the DHS Balanced Workforce Strategy.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.8 Special Service Pay	-	187	705	518

The FY 2011 request includes an increase of \$517,995 associated with the Public Health Service Officers.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
12.1 Civilian personnel benefits	1,994	4,088	3,000	(1,088)

The FY 2011 request includes a decrease of \$1,088,000 for benefits associated with the 104 FTP / 95 FTE.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
21.0 Travel and transportation of persons	436	411	436	25

The FY 2011 request includes an increase of \$24,979 for travel associated with the increase in Federal personnel.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.1 Rental payments to GSA	4,000	-	2,000	2,000

The FY 2011 request includes an increase of \$2,000,000 for GSA Rent associated with the movement of personnel.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.1 Advisory and assistance services	7,228	105	5,734	5,629

The FY 2011 request includes an increase of \$5,628,982 associated with advisory and assistance services due to the realignment of other services and an increase to the Working Capital Fund.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	-	14,000	-	(14,000)

The FY 2011 request includes a decrease of \$14,000,000 associated with other services due to a one time cost in other services.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.3 Purchases of goods & svcs. from Gov't accounts	9,192	470	5,546	5,076

The FY 2011 request includes an increase of \$5,075,856; the majority of which is for the Working Capital Fund charges.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
26.0 Supplies and materials	123	150	132	(18)

The FY 2011 request includes a decrease of \$18,306 for supplies and materials associated with efficient use of office supplies, technology supplies, and publications.

PPA Mission Statement

The Planning and Coordination PPA is composed of the programs within the Office of Medical Readiness (OMR) and the Food, Agriculture, Veterinary Defense (FAVD) division.

The experts within OMR provide advice and guidance on health and medical issues to the Secretary of DHS and the Administrator of FEMA through the Assistant Secretary for Health Affairs/CMO. OMR provides health and medical support to DHS operations for incident management, and provides direction and subject matter expertise to the federal interagency planning process to ensure health impacts are fully integrated into federal plans. OMR experts also develop guidance on the health and medical aspects of federal grant programs, and lead the development of the National Biodefense Architecture.

The Food, Agriculture, and Veterinary Defense (FAVD) division leads the coordination of the Department's programs to ensure the security of our Nation's food, agriculture, human and animal health. FAVD experts support the development of the federal CONOPS for Foreign Animal Diseases and the development of the multistate/regional plans for catastrophic events.

Summary Justification and Explanation of Changes

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>11.8 Special Service Pay</b>	-	242	179	(63)

The FY 2011 request includes a decrease of \$63,025 for special service pay of IPAs, detailees, and PHS Officers associated with support of development and coordination of medical readiness and response operating plans with interagency partners and costs of IPAs, detailees, and PHS Officers to assist in program support and analysis.

**PPA Mission Statement**

The BioWatch Program promotes the DHS mission of detection of biological attacks by managing an early warning system to rapidly detect dangerous pathogens in the air. This program deploys detection devices in over thirty major metropolitan areas throughout the nation. The BioWatch Program provides public health experts with a warning of a biological agent release before exposed individuals become clinically symptomatic (“ill”). This “detect-to-treat” approach provides public health officials an opportunity to respond aggressively to eliminate or substantially mitigate the potentially catastrophic impact on the population of a biological agent release.

**Summary Justification and Explanation of Changes**

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.8 Special Service Pay	-	247	811	564

The FY 2011 request includes an increase of \$564,060 for Public Health Service Officers to assist with mission goals and increased requirements involved with the public health arena.

PPA Mission Statement

The National Biosurveillance Integration Center (NBIC) provides early detection, characterization, and situational awareness of biological events of potential national significance. NBIC operates by acquiring, integrating, analyzing, and disseminating biosurveillance information from human, animal, plant and environmental data. NBIC collaborates with federal and state partners to collect, analyze, and share human, animal, plant, food, and environmental biosurveillance information from a myriad of monitoring systems. NBIC provides a Biosurveillance Common Operating Picture (BCOP) to senior decision-makers and partner agencies. The BCOP provides a consistent, integrated picture of biosurveillance situational awareness throughout the country.

Summary Justification and Explanation of Changes

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>11.8 Special Service Pay</b>	-	239	156	(83)

The special service pay is expected to decrease by \$83,036 associated with staffing requirements of the NBIC Watchdesk with PHS Officers from HHS and IPAs and detailees from other Federal agencies which support NBIS.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>21.0 Travel and transportation of persons</b>	78	96	60	(36)

In FY 2011 OHA expects travel support for NBIC to decrease \$35,394 as a result of Federal, PHS Officer, IPA, and detailee decreases.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.1 Advisory and assistance services</b>	8,975	10,737	6,730	(4,007)

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.1 Advisory and assistance services</b>	<b>8,975</b>	<b>10,737</b>	<b>6,730</b>	<b>(4,007)</b>

The FY 2011 request decreases by \$4,007,716 for advisory and assistance services associated with bringing aboard additional NBIS partner detailees for subject matter expertise.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.2 Other services</b>	<b>-</b>	<b>1,850</b>	<b>-</b>	<b>(1,850)</b>

The FY 2011 request decreases by \$1,850,000 for other services associated with bringing aboard additional NBIS partner detailees for subject matter expertise.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.3 Purchases of goods &amp; svcs. from Gov't accounts</b>	<b>67</b>	<b>78</b>	<b>54</b>	<b>(24)</b>

The FY 2011 request decreases by \$24,077 for technical support services and external program outreach coordination with other Federal agencies.

**Office of Health Affairs**  
**Rapidly Deployable Chemical Detection System**  
**Funding Schedule**  
(Dollars in Thousands)

<b>PPA: Rapidly Deployable Chemical Detection System</b>	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
11.8 Special Service Pay	-	85	95	10
21.0 Travel	43	82	89	7
25.1 Advisory and assistance services	55	119	232	113
25.3 Purchases from Gov't accts.	1,688	2,314	1,984	(330)
<b>Total, Object Class</b>	<b>1,786</b>	<b>2,600</b>	<b>2,400</b>	<b>(200)</b>
Unobligated Balance, start of year	-	815	-	(815)
Unobligated Balance, end of year	815	(815)	-	815
<b>Total, Adjustments</b>	<b>815</b>	<b>-</b>	<b>-</b>	<b>-</b>
<b>Total, Rapidly Deployable Chemical Detection System</b>	<b>2,601</b>	<b>2,600</b>	<b>2,400</b>	<b>(200)</b>

**PPA Mission Statement**

The Rapidly Deployable Chemical Detection System is a mobile set of chemical point detection sensors that can be deployed across the nation and set up in hours prior to an event and is intended for use at large, high profile gatherings such as National Special Security Events (NSSE) or DHS Special Event Assessment Rating (SEAR) Level events. This system of systems can identify a variety of threat chemicals and can decrease the initial period of uncertainty that could occur following chemical incidents. Technology and operations already used for RDCDS will become the nexus for creating an overarching chemical defense and chemical detection architecture.

**Summary Justification and Explanation of Changes**

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>11.8 Special Service Pay</b>	-	85	95	10

The FY 2011 request includes an increase of \$10,006 for special service pay of IPAs, detailees, and PHS Officers.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>21.0 Travel and transportation of persons</b>	43	82	89	7

The FY2011 request of includes an increase of \$6,702 for travel associated with field testing to evaluate the effectiveness and efficiency of the RDCDS system.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.1 Advisory and assistance services	55	119	232	113

The FY2011 request of includes an increase of \$113,174 for advisory and assistance services associated with field testing to evaluate the effectiveness and efficiency of the RDCDS system.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.3 Purchases of goods & svcs. from Gov't accounts	1,688	2,314	1,984	(330)

The FY2011 request includes a decrease of \$330,475 which will fund the purchase of goods and services from government accounts, which will cover additional funding provided to government agencies, such as EPA and the national labs with which RDCDS partners, to augment current aerial chemical surveillance with chlorine gas detection capabilities.

Fiscal Year 2011  
Strategic Context  
Congressional Justification Submission

**FY 2011 CONGRESSIONAL JUSTIFICATION STRATEGIC CONTEXT**

**OFFICE OF HEALTH AFFAIRS (OHA)**

**TABLE OF CONTENTS**

I. STRATEGIC CONTEXT FOR FY 2011 BUDGET	
A. Mission and Description of Component.....	OHA-1
B. Major Programs and Key Strategic Goals.....	OHA-2
C. Resources Requested and Performance Impact.....	OHA-4
D. Performance Highlights, Resources, and Alignment to Strategic Goals.....	OHA-5
E. Digest Tables by FYHSP Programs .....	OHA-8

## **I. Appropriation Overview**

### **A. Mission Statement for Office of Health Affairs:**

The Office of Health Affairs (OHA) serves as the Department of Homeland Security's principal authority for all medical and health matters. OHA provides health, medical, and scientific expertise to support the DHS mission of preparing for, responding to, and recovering from all threats.

OHA serves as the principal advisor to the Secretary and the Federal Emergency Management Agency (FEMA) Administrator on medical and public health issues. OHA leads the Department's workforce health protection and medical oversight activities, leads and coordinates the Department's biological and chemical defense activities, and provides medical and scientific expertise to support DHS' preparedness and response efforts.

OHA is divided into four offices:

Office of the Assistant Secretary: The Office of the Assistant Secretary (OAS) is headed by the Chief of Staff. The Office of the Chief of Staff provides direct support to the Assistant Secretary, and provides policy, external affairs, and executive secretariat services to all entities within OHA. The Management Operations Division, which is lead by the Director of Operations, supports the Chief of Staff and oversees the Chief Financial Officer, the Chief Administrative Officer, and the Chief Human Capital Officer.

Also within the Office of the Assistant Secretary (OAS) is the Office of International Affairs and Global Health Security (OIAGHS). OIAGHS oversees the Department's global health security initiatives, including the international aspects of pandemic influenza planning and international lessons learned from public health crises. OIAGHS maintains high-level liaison with senior foreign partners, international private sector representatives, technical and professional associations, and other Federal agencies to facilitate sustainable solutions for global health security issues that may have national implications for homeland security.

Office of WMD-Biodefense: This office is headed by the Deputy Assistant Secretary for WMD-Biodefense and oversees the Department's biodefense, biosurveillance, and chemical detection activities. WMD-Biodefense activities include BioWatch, the Rapidly Deployable Chemical Detection System, the National Biosurveillance Integration Center, and food, agricultural, and veterinary defense.

Office of Medical Readiness: This office is led by an Associate Chief Medical Officer and provides medical and public health expertise to Federal planning, medical first responder coordination, incident coordination, health and medical preparedness grants coordination, and engages with State and local agencies, non-profit organizations and the private sector.

Office of Component Services: This office is headed by an Associate Chief Medical Officer and is responsible for establishing policy, standards, requirements and metrics for the Department's health and safety programs, and provides protective and operational medical oversight, credentialing, and medical quality management across DHS.

## **B. Major Programs and Key Strategic Goals**

The Office of Health Affairs activities and programs fall under one FYHSP program: Medical and Biodefense Programs. OHA plays a vital role in ensuring that relevant human, plant, animal and environmental health information is consolidated, analyzed and shared with interagency partners, and that the Nation's biodefense activities are closely coordinated. OHA is responsible for the biological monitoring and early detection systems that are deployed in the Nation's major cities and for creating and managing the National Biosurveillance Integration System. Additionally, OHA provides real-time, incident-specific management guidance for the medical consequences of disasters, works with partner agencies to ensure medical readiness for catastrophic incidents, and supports the DHS mission through department-wide standards and best practices for the occupational health and safety of its employees.

**BioWatch** - The BioWatch program provides early detection capabilities to detect pathogen-specific nucleic acid in the air. BioWatch currently operates in over 30 cities in close partnership with state and local public health agencies, the Environmental Protection Agency, the Department of Defense, the Department of Health and Human Services, and the Federal Bureau of Investigation. Current operations include: collecting and analyzing filters, supporting local partners through exercising BioWatch notification and response protocols, and working collaboratively with local partners on Biodefense response planning.

To reduce detection time, BioWatch is working to incorporate next-generation autonomous biodetection systems (called Generation-3) through a comprehensive test and evaluation and acquisition process. Once deployed, the Generation-3 systems will reduce the time to detect an incident from 10 - 34 hours down to 4-6 hours, providing earlier warning and allowing more time to mitigate the consequences of a biological incident by initiating appropriate medical countermeasures. In FY10, OHA will complete the prototype unit field testing and data analysis for candidate autonomous detection technology platforms in preparation for system procurement, and will begin operational testing on production units in FY 2011. Testing and evaluation efforts will ensure that a viable next-generation autonomous detection capability is available. This effort supports the Department in preventing terrorism and enhancing security.

**Rapidly Deployable Chemical Detection System** – The Rapidly Deployable Chemical Detection System (RDCDS) is part of a larger effort to provide leadership and direction to a comprehensive chemical defense program. In FY 2010, OHA efforts will build upon prior chemical defense activities, including RDCDS and support to National Special Security Events (NSSEs). The program will develop standards for the purchase and deployment of chemical detection systems utilizing technical and operational specifications, and will continue to provide health and medical expertise related to chemical preparedness, response, and resilience, and will begin building a Chemical Defense Architecture.

Broad objectives for FY 2011 include enhancing community outreach and education for chemical event preparedness; establish training for first responders, first receivers and public health personnel on identifying toxic syndromes due to a chemical release; and continued deployment of RDCDS at NSSEs and other high-risk events. The long-term goal of RDCDS is to ensure chemical detection systems are in place throughout the Nation to protect the population from chemical events. Through its efforts to coordinate with State and local partners, RDCDS will support the Department in preventing terrorism and enhancing security.

**National Biosurveillance Integration Center** – The National Biosurveillance Integration Center (NBIC) provides a homeland security-relevant biosurveillance common operating picture (BCOP) to senior leaders and partner agencies regarding natural disease outbreaks, accidental or intentional uses of biological agents, and emergent biohazards. NBIC supports planning, preparedness, and response efforts at the State and local level. NBIC plans to significantly evolve and improve the visual analytic and decision support capabilities of the Biosurveillance Common Operating Picture (BCOP) in FY 2010 by providing access to in-depth scientific data, situational awareness, digital and analog depictions, and modeling and simulation results into a User Defined Operational Picture (UDOP). This UDOP will provide a full, comprehensive electronic picture with assessments of current biological events and trends and their potential impacts on homeland security.

Efforts in FY11 will focus on engaging State and local partners to participate in NBIC. Incorporating critical partners into NBIC will further protect the Nation from terrorism and help in managing risks to critical infrastructure.

**Planning and Coordination** – Planning and coordination includes programs under the OHA Office of Medical Readiness and Food, Agriculture, and Veterinary Defense.

The Office of Medical Readiness (OMR) develops policies, plans, and programs to enhance medical preparedness and response aspects of all-hazards planning, exercises, and training; oversees weapons of mass destruction incident management support; promotes the integration of state and local medical response capabilities; aligns DHS emergency preparedness grants with medical preparedness; and leads the DHS role in addressing medical first responder requirements to prepare for and respond to catastrophic incidents, while serving as the principal DHS representative for the medical first responder community.

The OHA Food, Agricultural and Veterinary Defense (FAVD) division provides oversight and management of DHS veterinary, food and agriculture security activities. FAVD provides expertise, technical support, and leadership to effectively coordinate DHS efforts in the event of a catastrophic food or agricultural incident, and works to enhance national preparedness and response capabilities in advance of an event. FAVD works with intergovernmental partners to enhance all-hazards emergency response in the food, agricultural, and veterinary arena.

**Salaries and Expenses** – Salaries and expenses includes programs under the OHA Office of Component Services (OCS) and the Office of International Affairs and Global Health Security (OIAGHS).

OCS provides medical guidance, oversight, support and standards for all DHS components. OCS efforts include development of strategy, policy, requirements and metrics for the medical aspects of a Department-wide occupational health and safety program.

OCS is working to develop standardized medical protocols for use by DHS medical personnel, and is implementing a Department-wide employee and organizational resilience program. OCS also aims to develop a credentialing program throughout DHS to ensure adequate credentialing of medical personnel and set minimum standards for medical providers within the Department. Furthermore, OCS plans to implement a medical quality management program to set standards and metrics for measuring quality of care, provide insight into training and certification needs, and reduce the liability risk of the Department.

The Office of International Affairs and Global Health Security enhances OHA executive decision-support to DHS leadership by coordinating international engagement and ensuring that health related global lessons learned and best practices are applied domestically.

### **C. Resources Requested and Performance Impact**

The Office of Health Affairs requests 104 FTP/95 FTE, and \$212.734 million in FY11.

#### **Current Services:**

**BioWatch** – The BioWatch program provides the capability to detect execution of operations by terrorists and other malicious actors, and is aligned to the OHA responsibility to lead the Department’s biodefense activities. An effective and timely detection capability is critical to achieving this goal. The FY 2011 budget request will maintain Generation-1 and Generation-2 baseline capabilities in approximately 30 jurisdictions throughout the Nation, providing early detection of biological airborne agents. OHA will also initiate a field test program for Generation-3 autonomous detectors.

**Rapidly Deployable Chemical Detection System (RDCDS)** – RDCDS provides the capability to detect execution of operations by terrorists and other malicious actors. In FY10 OHA will develop standards for the purchase and deployment by states and locals of chemical detection systems utilizing technical and operational specifications. The FY11 budget request supports ongoing program operation and maintenance, deployment to NSSE and high risk events, and the refinement of a broad chemical defense architecture.

**National Biosurveillance Integration Center (NBIC)** – In FY10, NBIC will continue its analysis and collection of biosurveillance data. OHA will reach out to State, local, tribal, territorial, private sector, and international partners to encourage participation in NBIC. The FY11 request supports ongoing program operation and maintenance, integrates the Biosurveillance Common Operating Picture (BCOP) with information technology architecture, and provides access to additional data resources across the biological and surveillance communities.

**Planning and Coordination** – Planning and coordination programs provide mission support.

In FY 2010, OMR will continue to support DHS crisis action planning efforts that have health related impacts, provide medical expertise to incident operations, and enhance national medical and public health preparedness and response capabilities. OMR's objectives for FY 2011 are a continuation of its FY 2009 and 2010 efforts and include providing health and medical readiness expertise to the interagency planning and policy development process; providing support to DHS training, exercising and operations activities; and initiation of training activities to support the integration of public health and the healthcare community into the national network of state and local fusion centers.

FAVD's plan for FY 2010 includes contributing to national capability development activities related to food and agricultural preparedness and response; initial development of a Food Sector Benchmarking Toolkit and deployment of the Food and Agriculture Readiness Measurement Toolkit (FARM) to States; and enhancing food, agricultural and veterinary content on the DHS Lessons Learned Information Sharing System. The FY 2011 budget request will allow OHA to maintain oversight and management of DHS veterinary, food and agriculture security activities, including completing a Defense of Food and Agriculture "Dashboard" and Collaboration Tool, revising the model Food Emergency Response Plan Template (in association with the National Association of State Departments of Agriculture, USDA and HHS).

**Salaries and Expenses** – OHA will continue its component services activities with the FY 2011 budget request. Goals for FY 2011 include building upon the suite of DHS-wide medical protocols in FY 2011 by developing standardized medical care protocols for general EMS response, and implementation of a DHS-wide employee and organizational resilience program. OCS will develop a credentialing program throughout DHS to ensure adequate credentialing of medical personnel and set minimum standards for medical providers within the Department, and implement a medical quality management program to set standards and metrics for measuring quality of care, provide insight into training and certification needs, and reduce the liability risk of the Department.

Program increases:

**BioWatch** – OHA requests an additional \$83,992 for BioWatch over the current services level of \$89,513. The FY11 request will support prototype unit field testing and data analysis for candidate autonomous detection technology (Generation-3) in preparation for system procurement, and will begin operational testing on production units in FY 2011. Funds will also support the initial production procurement of up to 476 Generation-3 autonomous detectors for deployment into cities and operational testing and evaluation. The Generation-3 system will decrease time to detect, allowing localities to rapidly conduct response and mitigation efforts while also providing greater cost effectiveness. The FY11 request will support the full operational capability of the BioWatch Quality Assurance Program initiated in FY10. This quality assurance program will involve all program aspects from the laboratory operations, reagent production, exercises, and field collection operations. In addition the FY11 request includes funding for the enhancements to the existing Generation-1 /Generation-2 collector networks to increase the fraction of the population covered in these BioWatch jurisdictions.

## **D. Performance Highlights, Resources, and Alignment to Strategic Goals**

For each mission-oriented program, the program performance goal, total dollars and FTE, and Government Performance and Results Act (GPRA) performance plan measure/s are shown below.

<b>Program: Medical and Biodefense Programs</b>						
<b>Performance Goal:</b> Bolster the Nation's biodefense readiness by enhancing the national architecture to rapidly detect, characterize, and respond effectively to a large-scale biological event.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	None	12,980	116,500	157,191	139,250	212,734
<b>FTE</b>	None	22	49	80	84	95

### **Performance Plan Measures**

<b>Measure:</b> Number of agencies who have agreed to provide information to the National Biosurveillance Integration System (NBIC).						
<b>Description of Measure:</b> The goal of the National Biosurveillance Integration Center (NBIC) is to increase the number of Federal, State, local agencies and private entities that share biological information. This measure demonstrates how many Federal agencies are actively sharing biological information by providing data feeds into the National Biosurveillance Integration System (NBIS). Using the input from these Federal data feeds as well as data feeds from state and local entities, NBIC is able to make potential or emerging biological threat information available to its member agencies to improve response to biological events. NBIC makes this information available to member agencies regardless of whether or not they provide input into the system. Agency participation and information exchange involves adequate consideration of major issues and documentation of the exchange details pertaining to privacy rights, system compatibility issues, and information security.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	Baseline	5	10	10	12	12
<b>Actual:</b>	0	7	7	7	-	-

<b>Measure:</b> Number of biological monitoring units employed in high-risk indoor facilities within BioWatch jurisdictions.						
<b>Description of Measure:</b> This performance measure captures the number of monitoring units, designed to detect the release of biological agents, within the facilities or complexes of BioWatch jurisdictions. A BioWatch jurisdiction includes the largest metropolitan areas in the U.S. The higher number of units employed, the larger number of people protected from a potential biological attack.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	66	116	FOUO	FOUO
<b>Actual:</b>	None	None	33	FOUO	-	-

<b>Measure:</b> Percent of the population in BioWatch jurisdictions covered by outdoor biological monitoring units.						
<b>Description of Measure:</b> This measure calculates the percent of the population in the BioWatch jurisdictions that is covered by outdoor biological monitoring units. Population covered by these units can be warned and identified for treatment prior to becoming symptomatic as a consequence of an outdoor release of biological agent. A BioWatch jurisdiction includes the largest						

metropolitan areas in the U.S. This measure is an estimate based on performance (i.e., probability of detection) and range (i.e., protection area) of the monitoring units. This measure includes the population within BioWatch jurisdictions and estimates the coverage provided by biological monitoring units.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	FOUO	FOUO	FOUO	FOUO
<b>Actual:</b>	None	None	FOUO	FOUO	-	-

**Measure:** Estimated time between an indoor monitoring unit exposure to a biological agent and the declaration of a confirmed positive sample result.

**Description of Measure:** This performance measure calculates the time between an indoor monitoring unit exposure to a biological agent and the declaration of a confirmed positive sample result by the local laboratory official. There are a number of factors that influence the time gauged by this measure such as the number of units and the type of technology. For instance, the higher the number of autonomous indoor biological monitoring units employed, the shorter the time will be between the release of a biological agent and the declaration of a confirmed positive sample result. An autonomous indoor biological monitoring unit is a type of sensor that collects airborne particles and performs sample analysis. By performing the sample analysis at the monitoring site, automated detection systems significantly reduce the time between a biological release and detecting confirming that an event has occurred.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	<17 hours	< 33 hours	< 33 hours	< 33 hours
<b>Actual:</b>	None	None	33 hours	<36 hours	-	-

**Measure:** Estimated time between an outdoor monitoring unit exposure to a biological agent and the declaration of a confirmed positive sample result.

**Description of Measure:** This performance measure calculates the time between an outdoor monitoring unit exposure to a biological agent and the declaration of a confirmed positive sample result by the local laboratory official. There are a number of factors that influence the time gauged by this measure such as the number of units and the type of technology. For instance, the higher the number of autonomous outdoor biological monitoring units employed, the shorter the time will be between the release of a biological agent and the declaration of a confirmed positive sample result. **iii. Status of Congressionally Requested Studies, Reports, and Evaluation**

**Department of Homeland Security  
Federal Emergency Management Agency**

<b>Fiscal Year</b>	<b>Due Date</b>	<b>Reference/Citation</b>	<b>Requirement</b>	<b>Status</b>
2009	2/4/2009	PKEMRA	Annual report on Catastrophic Resources	Report to be provided as part of the National Preparedness Report (NPR). NPR is now undergoing leadership review at FEMA -- ETA is 1st Quarter 2010
2009	4/6/2009	P.L. 110-329	Report on training and preparedness capabilities in U.S. Territories	Report to be provided as part of the National Preparedness Report (NPR). NPR is now undergoing leadership review at FEMA -- ETA is 1st Quarter 2010
2009	4/6/2009	P.L. 110-329	Report on Disaster Preparedness and capabilities of Emergency Medical Services	Report to be provided as part of the National Preparedness Report (NPR). NPR is now undergoing leadership review at FEMA -- ETA is 1st Quarter 2010
2009	4/9/2009	P.L. 110-329	Comprehensive 5-year Capital Improvement Plan for Mt Weather per House Report.	in clearance
2009	10/4/2009	P.L. 110-329	Report on federal preparedness 2nd Annual Update	Report to be provided as part of the National Preparedness Report (NPR). NPR is now undergoing leadership review at FEMA -- ETA is 1st Quarter 2010
2009	10/15/2009	P.L. 110-329	DRF Quarterly Report on obligations against the expenditure plan and justifications for any changes in spending	in clearance
2010	12/11/2009	H.Rpt.111-298	Report on progress in working with transit agencies to expand grant funds for FY 2006, 2007, and 2008	in clearance

2010	12/15/2009	PKEMRA	Recruitment Bonuses Report	in clearance
			Report on how the agency currently reviews policies and guidance and the process used to modify policies and guidance. The report to include how the agency intends to amend its process for modifying grant guidance and policies to better obtain and incorporate public and stakeholder input. And to include detailed description of the impact of other participants in the policy process, such as DHS leadership, the Office of Management and Budget, and other White House offices. This report should build on the Stakeholder Engagement Plan provided in response to the requirement in the statement accompanying the Consolidated Security, Disaster Assistance, and Continuing Appropriations Act of 2009 (P.L. 110-329), which provided an explanation of the adjudication process on public comments for grant programs	
2010	12/28/2009	H.Rpt.111-298		in clearance
			Report regarding the plan for acquisition of alternative temporary housing units and procedures for expanding repair of existing multi-family rental housing units, semi-permanent, or permanent housing options, as authorized under section 689i(a) of the Post-Katrina Emergency Management Reform Act of 2006	upcoming
2010	12/28/2009	H.Rpt.111-298		upcoming
2010	12/28/2009	P.L.111-83	Emergency Management Performance Grants Spend Plan	in clearance
2010	12/28/2009	H.Rpt.111-298	State and Local Spend Plan for administrative funds	in clearance
			DRF Spend Plan on use of \$105.6M for transfer to M & A (\$105.6 million for "management and Administration" to remain unavailable until submission)	with Program Office
2010	12/28/2009	P.L.111-83		
2010	12/28/2009	P.L.111-83	Spend Plan on DRS detailing the use of FY 2010 funds for Disaster Readiness and Support.	in clearance
2010	12/28/2009	P.L.111-83	AFG Spend Plan	in clearance
2010	1/15/2010	P.L.111-83	Monthly DRF Report	upcoming
2010	1/15/2010	PKEMRA	1st Quarter Staff Vacancy Report	upcoming
2010	1/15/2010	PKEMRA	1st Quarter Title III/691(d) Acquisitions Report	upcoming
2010	1/15/2010	PKEMRA	1st Quarter NCR Evacuations Report	upcoming
			1st Quarterly DRF Reports- detailing obligations against spend plan	upcoming
2010	1/15/2010	P.L.111-83		upcoming
			Report on how economic factors contribute to cost-share decisions and how FEMA plans to deal with cost-share adjustments during the recession	upcoming
2010	2/1/2010	H.Rpt.111-157		upcoming

2010	2/1/2010	H.Rpt.111-157	Report on whether cost efficiencies can be achieved by collocating JFO offices for disasters, especially for disasters that affect multiple states in the same region	upcoming
2010	2/1/2010	H.Rpt.111-298	Report on status on progress made towards the 5-year Risk Mapping, Assessment, and Planning Strategy – To be submitted with the FY2011 budget request	upcoming
2010	2/1/2010	H.R.2982	FEMA shall report monthly on denials for housing in DR-1841-KY, and elaborate on the reasons for such denials	upcoming
2010	2/4/2010	PKEMRA	National Preparedness Report Annual Update	upcoming
2010	2/5/2010	S.Rpt.111-31	Report on update to US Fire Service Needs Assessment	upcoming
2010	2/15/2010	P.L.111-83	Monthly DRF Report	upcoming
2010	3/1/2010	H.R.2982	FEMA shall report monthly on denials for housing in DR-1841-KY, and elaborate on the reasons for such denials	upcoming
2010	3/15/2010	P.L.111-83	Monthly DRF Report	upcoming
2010	4/1/2010	H.R.2982	FEMA shall report monthly on denials for housing in DR-1841-KY, and elaborate on the reasons for such denials	upcoming
2010	4/1/2010	H.Rpt.111-298	Spend Plan on \$150,000 to support staff travel to foreign countries: describing funds spent by that date, as well as how the remainder of funds will be spent during the fiscal year. The report should clearly describe how FEMA will apply and share the specific best practices garnered by the time of the report and what specifically will be sought on future trips.	upcoming
2010	4/15/2010	H.Rept 111-298 and S.Rept. 111-31	Provide Nationwide Plan Review Update, to include status of catastrophic planning and mass evacuation planning in all 50 states and 75 largest urban areas - the update should include the same certifications and status of plans for evacuations included in the Nationwide Plan Review dated June 16, 2006	upcoming
2010	4/15/2010	P.L.111-83	Monthly DRF Report	upcoming
2010	4/15/2010	PKEMRA	2nd Quarter Staff Vacancy Report	upcoming
2010	4/15/2010	PKEMRA	2nd Quarter Title III/691(d) Acquisitions Report	upcoming
2010	4/15/2010	PKEMRA	2nd Quarter NCR Evacuations Report	upcoming
2010	4/15/2010	P.L.111-83	2nd Quarterly DRF Reports- detailing obligations against spend plan	upcoming

2010	5/1/2010	H.Rpt.111-157	FEMA to work with OHA to report on disaster preparedness capabilities of EMS providers to include gap analysis	upcoming
2010	5/1/2010	H.Rpt.111-298	Report on detailed information on all MWEOC capital improvement funding. To a historical accounting of funding for MWEOC beginning with fiscal year 1997 for each fiscal year. Further included shall be a review by the DHS Office of General Counsel of all authorities used to execute that funding, including the authority to administer the MWEOC Working Capital Fund. The report should clearly list any amounts transferred to the fund from DHS entities as well as other federal sources in each fiscal year	upcoming
2010	5/1/2010	H.Rpt.111-298	Report on the possible uses of NVTC, including consideration of utilizing NVTC to enhance its translations services	upcoming
2010	5/1/2010	H.Rpt.111-298	National Digital Elevation Acquisition and Utilization plan for the purposes of supporting flood map updates. FEMA shall collaborate with the United States Geological Survey, the National Oceanic and Atmospheric Administration, the National Aeronautics and Space Administration, and States that have experience in acquiring and incorporating high resolution elevation data in the flood plain map updates	upcoming
2010	5/1/2010	H.Rpt.111-298	Provide to the Committees an update to the U.S. Fire Service Needs Assessment. The update shall be consistent with the last assessment completed in February 2006 in its scope and methodology	upcoming
2010	5/1/2010	H.R.2982	FEMA shall report monthly on denials for housing in DR-1841-KY, and elaborate on the reasons for such denials	upcoming
2010	5/15/2010	P.L.111-83	Monthly DRF Report	upcoming
2010	6/1/2010	PKEMRA	REPORT on National Disaster Housing Strategy Update	upcoming
2010	6/1/2010	PKEMRA	REPORT on National Disaster Recovery Framework	upcoming
2010	6/1/2010	H.R.2982	FEMA shall report monthly on denials for housing in DR-1841-KY, and elaborate on the reasons for such denials	upcoming
2010	6/15/2010	P.L.111-83	Monthly DRF Report	upcoming
2010	7/1/2010	H.R.2982	FEMA shall report monthly on denials for housing in DR-1841-KY, and elaborate on the reasons for such denials	upcoming
2010	7/15/2010	P.L.111-83	Monthly DRF Report	upcoming
2010	7/15/2010	PKEMRA	3rd Quarter Staff Vacancy Report	upcoming
2010	7/15/2010	PKEMRA	3rd Quarter Title III/691(d) Acquisitions Report	upcoming
2010	7/15/2010	PKEMRA	3rd Quarter NCR Evacuations Report	upcoming

2010	7/15/2010	P.L.111-83	3rd Quarterly DRF Reports- detailing obligations against spend plan	upcoming
2010	8/1/2010	H.R.2982	FEMA shall report monthly on denials for housing in DR-1841-KY, and elaborate on the reasons for such denials	upcoming
2010	8/15/2010	P.L.111-83	Monthly DRF Report	upcoming
2010	9/1/2010	H.R.2982	FEMA shall report monthly on denials for housing in DR-1841-KY, and elaborate on the reasons for such denials	upcoming
2010	9/15/2010	P.L.111-83	Monthly DRF Report	upcoming
2010	10/15/2010	PKEMRA	4th Quarter Staff Vacancy Report	upcoming
2010	10/15/2010	PKEMRA	4th Quarter Title III/691(d) Acquisitions Report	upcoming
2010	10/15/2010	PKEMRA	4th Quarter NCR Evacuations Report	upcoming
2010	10/15/2010	P.L.111-83	4th Quarterly DRF Reports- detailing obligations against spend plan	upcoming

## I. Appropriation Overview

### A – Mission Statement for Operations, Management, and Administration

The FEMA Management and Administration (M&A) appropriation provides core mission funding for the development and maintenance of an integrated, nationwide capability to prepare for, mitigate against, respond to, and recover from the consequences of major disasters and emergencies regardless of cause, in partnership with other federal agencies, State, local, and Tribal governments, volunteer organizations, and the private sector. The account supports core operations for all FEMA organizations, providing resources for mission activities and administrative support. M&A resources are directed to both regional and headquarters operations.

### B – Budget Activities:

Activities are organized according to the following PPA structure:

- Operating Activities
- National Capital Region Coordination
- Urban Search and Rescue

#### **B.1 Operating Activities**

Operating Activities includes the essential functions for all of FEMA's major mission organizations and directly supports FEMA's primary mission to reduce the loss of life and property and to protect the Nation from all hazards including natural disasters, acts of terrorism, and other man-made disasters. Operating Activities leads and supports the Nation through a risk-based, comprehensive emergency management system of preparedness, protection, response, recovery, and mitigation.

In FY 2010 and FY 2010, the Agency will work to improve the outcomes of disasters through more effective and integrated Preparedness, Protection, Response, Recovery, and Mitigation activities. The Agency will focus on enhancing coordination between headquarters and regional offices in all aspects of disaster management, as well as continue to operationally re-empower regional offices, recognizing that FEMA's regional operations have the lead for supporting State and local emergency management activities. FEMA will also continue to emphasize the promotion and improvement of personal/citizen preparedness, with the focus on increasing individual resiliency; i.e., their ability to quickly recover from a disaster. Moreover, the Agency is placing greater emphasis on underserved populations, including children, the elderly, and the disabled, which often do not receive adequate focus and attention in disaster management efforts. Finally, with a significant number of employees nearing retirement age in the coming

years, FEMA will prioritize recruiting, retaining, and better developing the next generation of diverse emergency management professionals to lead the Agency into the future.

The Operating Activities also includes the Office of the Administrator and the Administrative Management Staff who: coordinate between Headquarters and Regional Offices all policy and strategic planning, managerial, resource, and administrative actions; maintain programs to address public information issues; and build partnerships with and among State, and local governments, non-governmental organizations, business, and industry. Operating Activities also provides the corporate infrastructure (IT, finance, HR, procurement, facilities) essential to FEMA's pursuit of an enhanced business approach to achieving results and providing support capabilities designed and scaled to enhance FEMA's mission success. FEMA will continue to integrate management and administration missions that transferred to FEMA in FY 2008.

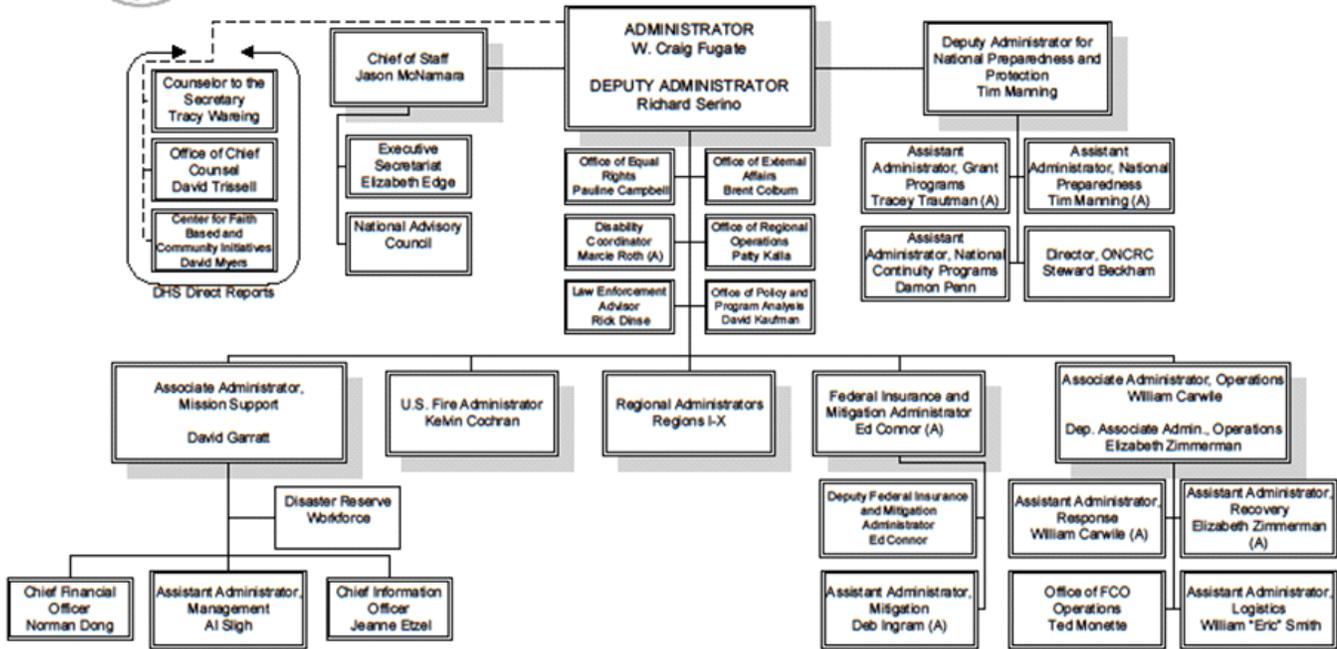

In December 2009, FEMA implemented a new organizational structure designed to help the Agency more effectively achieve its emergency management mandate. As shown in figure one, the new organizational structure reflects the following key components:

- Chief of Staff (for Office of the Administrator)
- National Preparedness and Protection
- Operations
- Federal Insurance and Mitigation
- U.S. Fire Administration
- Mission Support

One primary objective of the FEMA reorganization is for form to follow function. Under this new structure, the Agency will be able to strengthen key functions that had been previously fragmented across multiple organizational divisions. By establishing a more rational construct of Agency operations, FEMA will become a better partner in supporting the disaster management efforts of our citizens and first responders.

# FEMA

Effective 12/3/2009

(A) denotes acting incumbent

Note: Mission Support has been further organized into the Office of Associate Administrator, the Office of the Chief Financial Officer, the Office of the Chief Information Officer, the Office of the Chief Human Capital Officer (which includes the Disaster Reserve Workforce Division), the Office of the Chief Procurement Officer, the Office of the Chief Security Officer, and the Office of the Chief Administrative Officer (which includes the Facilities and Support Services Division, the Records Management Division, and the Occupational Safety, Health, and Environment Division).

## Operations:

- **Recovery Directorate (formerly Disaster Assistance Directorate)**

The Recovery Directorate ensures that individuals and communities affected by disasters of all sizes, including catastrophic and terrorist events, are able to return to normal with minimal

suffering and disruption of services. Program activities focus on improving efficiency and expediting delivery of disaster assistance to eligible individuals, to State, local, Tribal governments, and to eligible private nonprofit organizations. Key programs include, but are not limited to: The Individual and Households Program; the Public Assistance Program; Other Needs Assistance; the Crisis Counseling Assistance and Training Program; Disaster Unemployment Assistance; Disaster Legal Services; donations management; voluntary agency coordination; and management of the National Processing Service Centers. Recovery Directorate is FEMA's agent in the implementation of the National Disaster Housing Strategy, the National Disaster Framework, the National Catastrophic Infrastructure Recovery Plan, Emergency Support Function (ESF) #6 (Mass Care, Emergency Assistance, Housing, and Human Services), and Emergency Support Function (ESF) #14 (Long-Term Community Recovery). FEMA is engaging its stakeholders to develop a National Disaster Recovery Framework which will serve as a companion to the National Response Framework and will guide the Recovery Directorate's approach to managing recovery assistance in future years.

- **Response Directorate (formerly Disaster Operations Directorate)**

The Response Directorate provides the core federal disaster response capabilities necessary to save lives, minimize suffering, and protect property in communities throughout the Nation that have been overwhelmed by the impact of a major disaster or an emergency, regardless of cause. Response Directorate develops operational all-hazards disaster operations plans, coordinates Federal disaster operational, planning activities, executes disaster response programs, integrates Federal, State, Tribal, local government and non-government disaster response programs, and ensures disaster emergency communications capabilities. Core Federal disaster response capabilities are executed by the Response Directorate through three primary program areas: Field Operations, Operations Management and Disaster Emergency Communications. Disaster Operations is responsible for several activities such as sustaining situational awareness; managing a command, communication and coordination system comprised of national and regional command and coordination centers; and maintaining national and regional rapid support and disaster response teams. Response Directorate is also responsible for the Incident Management Assistance Teams (IMATS).

- **Logistics Directorate (formerly Logistics Management Directorate)**

Logistics Directorate is the major program office responsible for policy, guidance, standards, execution and governance for logistics support, services and operations. LD's focus is to institutionalize command and coordination of strategic logistics planning, operations and management while pushing operational control and execution down to the most effective level of execution. LD plans to move the agency beyond simply providing commodities (i.e. meals, water, and tarps) but toward a holistic management approach.

- **Office of Federal Coordinating Officer (FCO) Operations (formerly part of Office of Administrator)**

The mission of the Office of FCO Operations is to lead, train, equip, and manage FEMA's Federal Coordinating Officers to ensure their availability for rapid deployment in response to any disaster; to deliver training to develop and sustain FCO professional competencies; and to coordinate FCO assignments to meet the on-scene needs of FEMA and its emergency management partners.

### **Federal Insurance and Mitigation Directorate (formerly Mitigation Directorate)**

The mission of the Mitigation Directorate is to protect lives and prevent property loss from natural hazard events. Activities are designed to promote sound risk management decisions by individuals, private and public sector entities, State, local, and Tribal governments, and Federal agencies. This is accomplished through three core competencies and one support activity: (1) Analyzing Risk through identification and assessment; (2) Reducing Risk through land use, building codes, and the Hazard Mitigation Grant Program; (3) Environmental Planning and Historic Preservation; (4) Regional and Disaster Support activity.

### **National Preparedness and Protection Programs - National Continuity Programs (NCP)**

FEMA's NCP is the lead agent for preparing for and implementing Executive Branch continuity programs, including continuity of government, continuity of operations, and national contingency plans. Today's changing threat environments and recent emergencies, including localized acts of nature, accidents, technological emergencies, and military and/or terrorist attack-related incidents, including the potential for terrorist use of weapons of mass destruction (WMD), have emphasized the need for continuity capabilities and plans that ensure continuity of mission essential functions across the Federal Executive Branch in any crisis or emergency.

### **Administrator:**

- **Office of the Administrator**
  - Center for Faith-Based and Community Initiatives
  - Law Enforcement Advisor
  - Office of the Executive Secretariat
  - National Agency Coordination (NAC)
  
- **Office of External Affairs**
  - International Affairs
  - Public Affairs
  - Legislative Affairs
  - Private Sector Initiatives
  - Ready Campaign
  
- **Disability Coordinator**
- **Office of Regional Operations**
- **Office of Policy and Program Analysis**
- **Office of Equal Rights**
- **Office of Chief Counsel**

### **Office of Mission Support:**

- **Office of Associate Administrator**
- **Office of the Chief Financial Officer**
- **Office of the Chief Information Officer**

- **Office of the Chief Human Capital Officer**
- **Disaster Reserve Workforce Division**
- **Office of the Chief Procurement Officer**
- **Office of the Chief Security Officer**
- **Office of the Chief Administrative Officer**
- **Facilities and Support Services Division**
- **Records Management Division**
- **Occupational Safety, Health, and Environment Division**

### **B.2 National Capital Region Coordination (NCRC)**

The Office of National Capital Region Coordination (NCRC) provides leadership in integrating homeland security activities in the National Capital Region (NCR). NCRC also has a critical role in events (e.g., 2009 Presidential Inauguration), drills, and exercises that occur in the NCR. The work of NCRC and its regional partners often serves as a model for multi-jurisdictional efforts across the country.

### **B.3 Urban Search and Rescue**

The Urban Search and Rescue National Response System and the Task Forces across the country provide coordinated, national, and all-risk capability for locating, extricating, and stabilizing victims of structural collapse resulting from natural and man-made causes, including those involving terrorism and weapons of mass destruction. The Urban Search and Rescue Task Forces are among the many specialized teams managed by the Response Directorate.

## **C – Budget Request Summary:**

The FY 2011 M&A budget request reflects the amounts required to sustain basic core mission functionality and efficacy, as well as continue funding the recent-year improvements to both operational response and internal operating capacity (most recently funded in FY 2009) , and to support the Agency’s priorities Through this requested funding level, the Agency will continue to strengthen its ability to support all hazards preparedness, protection, response, recovery, and mitigation requirements; to support State and local emergency management functions, and to enhance internal structures and systems required to effectively support FEMA’s ability to fulfill its emergency management mission.

### **Staffing**

In FY 2010, the FEMA budget request sought to rectify a structural pay issue and to provide full funding for all of the positions established within the M&A appropriation. The Administration recognizes and appreciates the support of the Congress in helping FEMA build and maintain the internal staffing capacity required to fulfill its emergency management mandate. Building on this foundation, FEMA is now aggressively conducting a strategic workforce planning initiative

that will position the Agency to determine the skills and staffing levels required to support the organizational capacity it is working to achieve.

In the wake of Hurricane Katrina, FEMA expanded its temporary workforce of Cadre On-Call Response Employee (CORE) employees to support both new mission requirements and expanded mission requirements, including programs supporting logistics management, individual assistance to disaster survivors, and disaster telecommunications, as well as business support functions across the workforce. These temporary but full-time employees have been paid for in the Disaster Relief Fund both through direct charge disaster and non-disaster specific allocations. These positions are essential to the way FEMA meets its mission and as such most appropriately should be funded in the M&A appropriation, which supports the base funding requirements across all of FEMA's mission areas. As such, FEMA has proposed to move 233 full-time temporary CORE positions to full-time permanent federal positions, with 213 of those going into the M&A appropriation. After this action is completed, FEMA will no longer use its temporary CORE workforce or base FEMA programs. Only the direct-disaster charging CORE FTE will remain in the Disaster Relief Fund.

The President's FY 2010 request for M&A allowed for funding at 85 percent staffing level, and relied upon a transfer of \$35 million from the Disaster Relief Fund to provide the incremental funding required for full staffing. This transfer mechanism is eliminated in FY 2011 as the requested budget authority within the M&A appropriation would fully support this appropriation's base staffing requirements.

### Facilities

In FY 2010, the FEMA budget request sought to rectify a structural pay issue and to provide full funding for all of the positions established within the M&A appropriation. The Administration recognizes and appreciates the support of the Congress in helping FEMA build and maintain the internal staffing capacity required to fulfill its emergency management mandate. Building on this foundation, FEMA is now aggressively conducting a strategic workforce planning initiative that will position the Agency to determine the skills and staffing levels required to support the organizational capacity it is working to achieve.

In the wake of Hurricane Katrina, FEMA expanded its temporary workforce of Cadre On-Call Response Employee (CORE) employees to support both new mission requirements and expanded mission requirements, including programs supporting logistics management, individual assistance to disaster survivors, and disaster telecommunications, as well as business support functions across the workforce. These temporary but full-time employees have been paid for in the Disaster Relief Fund both through direct charge disaster and non-disaster specific allocations. These positions are essential to the way FEMA meets its mission and as such most appropriately should be funded in the M&A appropriation, which supports the base funding requirements across all of FEMA's mission areas. As such, FEMA has proposed to move 233 full-time temporary CORE positions to full-time permanent federal positions, with 213 of those going into the M&A appropriation. After this action is completed, FEMA will no longer use its temporary CORE workforce or base FEMA programs. Only the direct-disaster charging CORE FTE will remain in the Disaster Relief Fund.

The FY 2010 Enacted for M&A relied upon a transfer of \$105.6 million from the Disaster Relief Fund to provide the incremental funding required for full staffing. This transfer mechanism is eliminated in FY 2011 as the requested budget authority within the M&A appropriation would fully support this appropriation's base staffing requirements.

#### Mount Weather Emergency Operations Center

The President's FY 2011 budget request reflects \$12 million in funding for Mount Weather Emergency Operations Center of which \$11.068 million is for capital improvements, a reduction of \$24.3 million from the FY 2010 enacted budget. The Administration remains committed to accelerating the pace of implementation of projects consistent with the capital improvement plan. But in making this request, the Administration also recognizes that more than \$100 million in current and prior-year funding remains to be executed for Mount Weather Capital Improvements. As a result, the Administration will be able to accelerate project implementation into FY 2011 even with a lower amount of funding for the fiscal year.

**Management and Administration:** FEMA requests \$902.996 million, 3,521 positions, and 3,275 FTE. This represents a net increase of \$105.346 million, and an increase of 1,208 positions, and 1,205 FTE as compared to FY 2010. The change from FY 2010 is explained by a series of adjustments as described below.

**(1) PPA – Operating Activities:** FEMA requests \$867.947 million, 3,493 positions, and 3,248 FTE. This represents a net increase of \$109.792 million, 1,208 positions, and 1,205 FTE as compared to FY 2010. The 1,208 positions represent the movement of CORE positions into this appropriation and the annualization of FTE supported in FY 2010 by DRF transfer. The FTE increase accounts for those corresponding positions, the annualization of prior year positions, and the annualization of an FY 2010 contractor to PFT conversion. Program changes include \$5.9 million for continued data center migration, \$23.3 million for the facilities initiative, a reduction of \$24.3 million from the Mount Weather Emergency Operations Center, and a reduction of \$4.5 million from the Urban Search and Rescue Program.

**(2) PPA – National Capital Region Coordination:** FEMA requests \$7.049 million, 20 positions, and 19 FTE. This represents a net increase of \$0.054 million, 0 positions, and 0 FTE as compared to FY 2010.

**(3) PPA – Urban Search and Rescue:** FEMA requests \$28 million, 8 positions, and 8 FTE. This represents a net decrease of \$4.5 million, 0 positions, and 0 FTE as compared to FY 2010.

## II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

Total Change 2010 to 2011	1,208	1,205	109,792

FEMA requests \$867.947 million, 3,493 positions, and 3,248 FTE. This represents a net increase of \$109.792 million, 1,208 positions, and 1,205 FTE as compared to FY 2010.

#### **CURRENT SERVICES PROGRAM DESCRIPTION**

The following activities directly support FEMA’s primary mission to reduce the loss of life and property and protect the Nation from all hazards, including natural disasters, acts of terrorism, and other man-made disasters, by leading and supporting the Nation in a risk-based, comprehensive emergency management system of preparedness, protection, response, recovery, and mitigation. FEMA Operating Activities will continue to build on FY 2009 and FY 2010 successes in the areas of:

- Creating “engaged partnerships” with State and local governments.
- Facilitating and supplying an effective unified command across all levels of government.
- Engaging hurricane-prone States to gain a better understanding of their vulnerabilities.
- Improving logistics and communications capabilities to improve response.
- Enhancing disaster assistance capabilities for recovery efforts.

The Operating Activities PPA also includes the Office of the Administrator and FEMA-wide Administrative Management who: coordinate between Headquarters and Regional Offices all policy, managerial, resource, and administrative activities; maintain programs to address public information issues; and build partnerships with and among State and local governments, non-governmental organizations, businesses, and industries.

M&A provides FEMA with basic mission funding, which is complemented by disaster-specific and readiness resources from the Disaster Relief Fund and other program-specific appropriations.

**1. Operations:**

• **A) Recovery Directorate (formerly Disaster Assistance Directorate):**

The following Recovery Directorate programs/functions receive core staffing and operating expenses support from the M&A appropriation. Disaster readiness and direct victim assistance requirements are funded from appropriations for the Disaster Readiness and Support Activities account, the Disaster Relief Fund, and the Disaster Assistance Direct Loan Program. Funding is also provided for the Emergency Food and Shelter Program, also under Recovery Directorate's domain of responsibilities.

**Recovery Programs FY 2011 Funding Summary**

(\$ in 000s)

<u>Activity</u>	<u>Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
Executive Oversight	1,575	5,257	6,832	41	38

National Disaster Recovery Framework	<u>1,636</u>	<u>0</u>	<u>1,636</u>	<u>0</u>	<u>0</u>
<b>Subtotal</b>	<b>22,293</b>	<b>70,215</b>	<b>92,508</b>	<b>648</b>	<b>602</b>

• **Program Coordination, Planning and Support**

Program coordination, planning, and support activities include, but are not limited to:

- National Disaster Recovery Framework (NDRF)
- Exercise coordination
- Disaster After Actions Reviews (AAR) and Remedial Management Program (RAMP)
- Continuity of Operations (COOP)
- Analysis and reporting
- Mobile Response Team development
- Innovation and Technology development
- Contract management
- Policy and general inquiry correspondence
- Human Resources and administration
- Professional development
- Logistics, resource management, and strategic planning
- Finance and budgeting
- Equipment

- Regional funding to support recovery activities

On September 29, 2009, the President requested the Secretaries of Homeland Security (DHS) and Housing and Urban Development (HUD) to co-chair a White House Long-Term Disaster Recovery Working Group composed of the Secretaries and Administrators of more than 20 departments, agencies, and offices. The objective of this high-level, strategic initiative is to provide current operational guidance for disaster recovery organizations as well as make recommendations for future strategic improvements to the Nation's approach to disaster recovery management.

An intensive multimedia stakeholder outreach effort was launched during the months of October, November, and December involving State, local, and Tribal government representatives, as well as a wide array of private organizations and private non-profit organizations from across the Nation to inform this unprecedented initiative. As Stakeholder Forums and other outreach efforts continue through mid December, the process of analyzing the data that has been collected over the last two months is already underway. The final report will be transmitted to Congress in June.

FEMA has been actively engaged in Catastrophic Disaster Planning for its Disaster Assistance programs for a number of years. FEMA has made significant progress in the last six years, and particularly after Hurricane Katrina and the enactment of the Post Katrina Emergency Management Reform Act, in increasing its capability to provide assistance to individuals and public organizations after a large or catastrophic event. FEMA's experience with the very active 2004 and 2005 Hurricane Seasons highlighted a number of critical planning and capability requirements for Disaster Assistance, which are the focus of current and planned catastrophic disaster planning initiatives. Key areas of recent and ongoing Individual Assistance program improvements include mass care and emergency assistance procedures and capabilities, donations and volunteer management procedures, registration intake systems, applicant processing, identity and occupancy verification, controls to limit fraud and abuse, coordination with other agencies, and evaluation and testing of alternative housing solutions. We continue to further develop and implement priority elements of the National Disaster Housing Strategy. During this time, we have also made strides in interagency planning and coordination to assist communities with long-term recovery, to address contaminated debris, debris volume estimation, and streamlining the Public Assistance Program processing for very large events through planning, training, and technology improvements. We continue to develop, test, and refine the above improvements, as well as continue contingency planning for delivering all types of disaster assistance during and after chemical, biological, radiological, nuclear, pandemic influenza, and cyber events.

Because the delivery of disaster assistance programs depends on a seamless working relationship with State and local governments, consistent interaction with these stakeholders is essential. To that end, Recovery staff participates in a number of annual conferences, meetings, workshops, and training venues with internal and external partners on a wide range of initiatives, including activities related to, for example, ESF#6, ESF #14, the National Shelter System, the National Reunification Family Locator System, the PA Pilot, and Donations Management.

- **FY 2009 Accomplishments:**

- Began training Regional, Federal, State, local, and non-governmental stakeholders on new ESF #6 mass care, sheltering and feeding tools. This included implementation of a mass care sheltering and feeding operational strategy for use at the local level.
- Implemented a cooperative agreement with the National Center for Missing and Exploited Children.

- **FY 2010 Planned Accomplishments:**

- By April 1, 2010, the White House Long-Term Disaster Recovery Working Group will provide the President with a Report containing strategic recommendations (budgetary, organizational, legislative...etc.) to improve long-term catastrophic disaster recovery management. The Report will include a final draft National Disaster Recovery Framework. The Framework will articulate operational guidance to achieve a more effective coordination, and more timely delivery of recovery assistance under current authorities. An intensive national review process will follow culminating with the publication of the final version of the National Disaster Recovery Framework by June 1, 2010. The final Framework published on June 1, 2010 will include an implementation plan with deliverables for the next several years.

- **FY 2011 Planned Accomplishments:**

- FEMA will continue implementation of the National Disaster Recovery Framework, including development of Standard Operating Procedures and training for new Recovery Support Functions.
- FEMA will test overarching National Disaster Recovery Framework structures and principles in the National Level Exercise 2011 and begin development of a Recovery only exercise for implementation in FY 2013.

- **Public Assistance Program (PA) M&A Budget**

The PA Grant Program provides assistance to States, local governments, and certain nonprofit organizations to alleviate suffering and hardship resulting from major disasters or emergencies declared by the President. It provides reimbursement for debris removal, emergency protective measures and the repair, replacement, or restoration of disaster-damaged, publicly owned facilities and the facilities of certain private non-profit organizations.

- **Fire Management Assistance Grant Program (FMAGP)**

FEMA provides Fire Management Assistance Grants to State and local governments, including Tribal nations, to minimize immediate adverse effects, and to manage and control wild land-fires that threaten to cause major disasters. FMAGP provides a 75 percent federal cost-share reimbursement to States for actual costs.

- **Community Disaster Loan Program**

FEMA provides Community Disaster Loans to any local government or other political subdivision of the State that has suffered a substantial loss of tax or other revenues because of a major disaster. Communities can use the loans to maintain existing governmental functions or to expand such functions to meet disaster related needs.

- **FY 2009 Accomplishments:**

- The Public Assistance Division completed the draft of the PA Catastrophic Disaster Recovery Concepts of Operations
- The Public Assistance Division received 127 second appeals in FY09 and adjudicated 74 appeals
- Processed 24 Community Disaster Loans totaling \$60,547,400:

- **FY 2010 Planned Accomplishments:**

- Implement and deliver special needs training to State partners to ensure life sustaining assistance is provided to disaster victims in congregate care facilities.
- Procure up to four (4) new PA Technical Assistance Contracts (TACs) to provide continued architect-engineer, consultant, and other related professional services in support of the PA Program and the PA Division's other programs, which include the Fire Management Assistance Grant Program and the Community Disaster Loan Program.
- Procure up to two new PA Appeals contract to assist Headquarters and Regional staff with the adjudication of 1st and 2nd appeals
- Implement the PA Program Quality Assurance/Quality Control Plan and accompanying tool to enable the PA Division to monitor 10 critical metrics at the JFO, Regional, and National levels to ensure productivity and quality.

- **FY 2011 Planned Accomplishments:**

- Improve and sustain operation of the EMMIE system for the efficient processing of an annual average of over \$2.5 billion in Public Assistance funding.
- Revise and streamline Public Assistance Program guidance to reflect lessons learned from recent disaster activity, and ensure Grantees and Sub-Grantees have clear and consistent guidance for efficient and effective program implementation after major disasters and emergencies.
- Implement the PA Program Quality Assurance/Quality Control Plan and accompanying tool to enable the PA Division to monitor 10 critical metrics at the JFO, Regional, and National levels to ensure productivity and quality.
- Sustain operation of newly awarded PA Technical Assistance Contracts to provide critical support to disaster field operations in implementing the Public Assistance Program.

- **Individual Assistance Programs (IA)**

Individual Assistance ensures that individuals and families that have been affected by disasters have access to the full range of FEMA programs in a timely manner and that the best possible level of service is provided to applicants in the administration of these programs. IA programs and functions include:

- The Individual and Households Programs
- Other Needs Assistance
- Disaster Unemployment Assistance
- Crisis Counseling and Training Program
- Disaster Legal Services
- National Family Reunification Locator System
- National Emergency Child Locator System
- Donations Management
- Voluntary Agency Coordination
- Joint Housing Solutions Group
- National Disaster Housing Strategy
- Case Management
- National Shelter System

- **FY 2009 Accomplishments:**

- Improved FEMA's plans and capabilities for managing mass evacuations and the resulting displaced populations, including additional State and local plans and development and expansion of evacuee tracking systems.

- Launched the FEMA National Shelter System. Implementation will begin at the State level. System will have enhanced data sharing capabilities and will provide expanded, accurate data to Federal, State, and local users.
  - Piloted a new in-person recertification protocol for individual assistance. This new protocol will reduce or eliminate the need for often-confusing and less reliable recertification via the postal system, and increase the reliability and surety of the process.
- **FY 2010 Planned Accomplishments:**
    - Begin development of the Emergency Assistance Information System (EAIS), which will integrate existing mass care software and information systems and will enable States to manage mass care information requirements (NSS, NECLC, and NEFRLS) through one system.
    - Enhance the National Mass Evacuation Tracking System (NMETS) to establish more fulsome electronic capabilities and deliver training to State and local emergency managers.
    - Develop an interagency agreement with the U.S. Army Corps of Engineers (USACE) to provide FEMA with USACE technical expertise in the areas of emergency preparedness, construction, temporary roof repair, cost-estimating, electrical engineering, public works, design and site engineering, mission assignment development and oversight, NEPA compliance, mass care, contract management and other areas of USACE proficiency.
  - **FY 2011 Planned Accomplishments:**
    - Complete implementation of E-Signature, which captures disaster survivors' signatures electronically to allow for faster and more efficient process applications for assistance as well as improving data storage.
    - Begin Phase One of the E-Correspondence project, which includes the development of incoming and outgoing e-mail correspondence with disaster survivors through NEMIS and the addition of links to view documents through the internet. Electronic correspondence accelerates information exchange with disaster survivors and decreases delays in providing financial assistance by reducing time constraints associated with generating paper correspondence and using standard mail delivery.

- **Disaster Assistance Support Center**  
The Disaster Assistance Support Center (DASC) is responsible for supporting headquarters, the Disaster Assistance Directorate, regional disaster assistance offices, and field units. DASC is composed of three branches: Analysis, Reports and Technology Solutions (ARTS), Strategic Resources Management (SRM) Branch, and Correspondence. The DASC centralizes and manages the support operations for FEMA's Recovery Directorate. Core functions include analysis, innovation, strategic thinking, and operational effectiveness.
- **National Processing Service Centers (NPSC)**  
The NPSC's are FEMA's disaster assistance processing facilities and are responsible for: registering applicants for disaster assistance, verifying losses through on-site inspections; processing applications to determine assistance eligibility; and responding to applicant inquiries. In FY 2009, approximately 300 temporary positions became full time positions in the NPSCs. Funding from the M&A appropriation supports these positions as well as other activities, such as technology requirements needed to maintain a call center, equipment, and training.

## **FY 2009 Accomplishments:**

- Completed the advertisement, review, selection, and hiring process for 280 out of 284 Permanent Full Time (PFT) positions. The addition of these permanent positions provides greater stability to NPSC operations.
- Conducted a sixth formal assessment of FEMA's Individuals and Households Program as part of the requirements of the Improper Payments Information Act of 2002 to determine if improper payments occurred, to assess the reasons for improper payments, and to develop Corrective Action Plans (CAP) to mitigate the risk of future occurrence of erroneous payments. The review of IHP payments made in FY 2008 yielded an estimate of improper payments of 1.86 percent of the total population, which is below the 2.5 percent error rate standard.
- Established the Appeals and Recoupment Groups and established the new Audit Group. These groups are in response to IG, GAO and internal FEMA Lessons Learned to isolate these activities and establish a unit whose primary responsibility would be to follow up with all audit recommendations from other groups and conduct internal audits that result from those processes.
- Implemented the Disaster Assistance Improvement Project (DAIP), which is a high priority project to attempt to combine disaster registration processes for different Federal agencies.

## **• FY 2010 Planned Accomplishments:**

- Modify the DARAC (Direct Assistance) portion of NEMIS to implement previously deferred changes, increase usability of the Recertification and Setup Work Order processes, connect to the Logistics system in order to reduce reliance on manual entry of unit information and decrease the reliance on developer intervention during disaster operations. Additional planned enhancements include data reliability, increase usability of the Unit Assignment, Site Map/Inspection and Maintenance Work Order processes.
- Create a link between NSS and Registration Intake (RI) so applicants can access shelter referrals and call center agents can choose the shelter an applicant is living in during the RI process. This will improve FEMA's ability to locate evacuated disaster victims.
- Complete implementation of electronic call recording software, which will allow the QC Department to increase the number of calls they monitor and help improve the employee coaching experience.

- Implement secure, pen-based e-signature software to replace paper-based process of obtaining applicant's signatures on the 90-69 B and D forms. It will ensure quick response and avoid delays in payments and further action on behalf of the applicant.

- **FY 2011 Planned Accomplishments:**

- Complete implementation of the E-Signature initiative, which captures disaster survivors' signatures electronically to allow for faster and more efficient process applications for assistance as well as improving data storage.
- Complete Phase 1 of E-Correspondence project which includes the development of incoming and outgoing e-mail correspondence with disaster survivors through NEMIS and the addition of links to view documents through the internet. Electronic correspondence accelerates information exchange with disaster survivors and decreases delays in providing financial assistance by reducing time constraints associated with generating paper correspondence and using standard mail delivery.

- **Disaster Declarations Unit**

The Declarations Unit is responsible for processing a myriad of Gubernatorial requests for Presidential major disaster or emergency declarations and all other related actions to include appeals and cost share adjustments under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (the Stafford Act). Our mission each Fiscal Year (FY) is to ensure that each Gubernatorial request is processed as expeditiously as possible.

Each Fiscal Year, the number of requests for major disaster declarations, emergency declarations, cost share adjustments, and Fire Management Assistance Grants increases from the previous Fiscal Year. FY 2010 will be no different. Since the beginning of this fiscal year, we have not only been processing multiple requests for severe storms, flooding, tornadoes, earthquakes, tsunamis, fires, hurricane, and drought, but have also been gearing up for the potential of processing 57 requests in response to an outbreak of human influenza pandemic in the United States and its' Trust Territories.

- **National Disaster Housing Task Force (NDHTF)**

The NDHTF assess the need for housing in affected communities and identify available rental properties and other options. The National Task Force also works to resolve policy issues, conflicting authorities, and opposite regulations. Its overall goal is to remove barriers and impediments to the delivery of housing for disaster victims

- **Executive Oversight**

Resources include Salaries & Benefits and management oversight justification.

- **B) Response Directorate (formerly Disaster Operations Directorate):**  
 FEMA's Response Directorate, formerly known as the Disaster Operations Directorate, provides and coordinates the core Federal operational capabilities needed to save lives, minimize suffering, and protect property in a timely and effective manner in communities overwhelmed by acts of terrorism, natural disaster, or other emergencies. Response encompasses the following programs.

**Response Programs FY 2011 Funding Summary**

(\$ in 000s)

	<u>Activity</u>	<u>Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
Office of Assistant Administrator for Operations		12,492	5,121	17,613	45	42
	Operations Division	7,849	34,903	42,752	307	285
	Planning Division	27,748	11,154	38,902	98	91
Disaster Emergency Communications		17,344	31,070	48,414	273	254
	Business Management	<u>2,967</u>	<u>2,731</u>	<u>5,698</u>	<u>24</u>	<u>22</u>
	<b>Subtotal</b>	<b>68,400</b>	<b>84,979</b>	<b>153,379</b>	<b>747</b>	<b>694</b>

NOTE: When a disaster threatens or occurs, many costs associated with program functions are supported through the Disaster Relief Fund.

- **Office of the Assistant Administrator for Operations**  
 The Office of the Assistant Administrator consists of a small support staff that provides direct support to the Assistant and Deputy Assistant Administrators for Response in their daily tasks, as well as a Policy Office and a Training, Exercise, and Doctrine Office.

**Assistant Administrator for Operations Programs FY 2011 Funding Summary**

(\$ in 000s)

	<u>Activity</u>	<u>Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
Assistant Administrator for Operations		202	1,366	1,568	12	11
	Policy Office	20	1,024	1,044	9	8
	Training Unit	3,790	797	4,587	7	7
	Exercise Unit	2,591	341	2,932	3	3
	Doctrine Unit	4,298	455	4,753	4	4
	Regional Support	<u>1,591</u>	<u>1,138</u>	<u>2,729</u>	<u>10</u>	<u>9</u>
	<b>Subtotal</b>	<b>12,492</b>	<b>5,121</b>	<b>17,613</b>	<b>45</b>	<b>42</b>

- **Policy Office**  
 The Directorate's Policy Office enables the successful execution of Response Directorate programs and activities through the review of existing and development of new policies, guidance, and strategies in coordination with internal and external partners. This Office coordinates strategic planning activities and leads the development of new policies and guidance to ensure that the goals, objectives, and mission of the Directorate are accomplished. In addition to policy development, this Office is responsible for coordinating the Directorate's responses to requirements from external partners including the White House, Congress, General Accountability Office, the Department of Homeland Security, the Office of Inspector General, other Federal Departments and Agencies, and other FEMA components.
- **Training, Exercise, and Doctrine Office**  
 The Training, Exercise and Doctrine Office, working for the Assistant Administrator for Response, develops and manages disaster operational training, exercises, and doctrine in order to ensure effective and consistent response to any incident. Key activities of each of the components of the office are described below:

  - **Training Unit**  
 Continuously improves Response Directorate Disaster Workforce readiness by training, credentialing and developing professional capabilities and resources aligned with Response Directorate's operational response at the Field, Regional and National level. Enhance FEMA's core capabilities through professional development opportunities for all Response staff and teams. Develops individuals and teams that think joint intuitively and achieves a training unity of effort across teams, organizations and Regions.
  - **Exercise Unit**  
 Manages FEMA's planning and participation in national and regional exercises. Ensures the Homeland Security Exercise and Evaluation Program (HSEEP) guidance is followed for exercise planning efforts. Executes FEMA's internal exercise program to test and validate FEMA's ability to accomplish its mission. Supports an evaluation process to identify strengths and areas for improvement observed during exercises.
  - **Doctrine Unit**  
 Conducts a comprehensive review and revision of Response Directorate guiding documents; identifies voids and creates new documents in order to develop the materials that guide FEMA response operations at the Incident, Regional and National level. Reviews, revises, updates and/or develops disaster operations doctrinal materials & establishes a hierarchy of doctrine documents. Designs and implements a comprehensive and permanent program for continual development and maintenance of FEMA disaster operations doctrinal materials that guide FEMA response operations at the incident, regional and headquarters level.

- **Regional Support**

The Regional Support initiative will consolidate and quantify to establish baseline funding to the ten FEMA Regional Response organizations. Additionally, centers of excellence will be established in specific regional offices to better prepare response and readiness efforts, identify best practices and establish standard operating policies.

- **FY 2009 Accomplishments: N/A – not in existence in FY 2009**
- **FY 2010 Planned Accomplishments**
  - Conduct review and analysis of Response Directorate's courses to align with new doctrine, and update and/or develop between 10-15 courses based on this review
  - Establish and implement base funding for all regional offices based on operating activity and needs (Facility, Staff, Infrastructure)
  - Initiate Regional Response Coordination Center Working group to design a facility model to be implemented by size need in each region
  - Execute and evaluate 15 operational exercises and 10 discussion based exercises that test and validate our response teams capabilities
  - Participate in National Level Exercise 2010/ Eagle Horizon 2010/ Cyber Storm 2010/ Liberty RadEx 2010
  - Conduct review of existing Response Directorate doctrinal materials to identify gaps
  - Produce 10 Response Directorate doctrinal documents to enhance the capabilities of FEMA staff and the overall emergency management profession
- **FY 2011 Planned Accomplishments**
  - Assess/validate/revise courses developed in 2010
  - Finalize and implement credentialing plans and position task books
  - Implement training, exercise and doctrine polices
  - Execute and evaluate 15 operational exercises and 10 discussion based exercises that test and validate our response teams capabilities
  - Participate in National Level Exercise 2011/ Eagle Horizon 2011
  - Test and validate doctrine developed in FY 2010
  - Revise, maintain and reissue core doctrine based upon lessons learned from real-world events or exercises. Identify areas requiring the development of new doctrinal materials

- **Operations Division**

Through the command and control use of specialized operational centers and teams, the Operations Division manages and coordinates capabilities in support of emergency and disaster response, exercises, and special events to ensure appropriate readiness for response.

**Operations Division Programs FY 2011 Funding Summary**

(\$ in 000s)

	<u>Activity</u>	<u>Program</u>	<u>S &amp; B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
Operations Division Management Office		870	455	1,325	4	4
Response Coordination Branch		15	7,511	7,526	66	61
National Response Coordination Center (NRCC)		426	455	881	4	4
Regional Response Coordination Centers		1,000	7,625	8,625	67	62
Response Watch Center (RWC)		1,335	2,618	3,953	23	21
FEMA Operations Center (FOC)		1,391	2,619	4,010	23	21
Situation Monitoring Unit		625	455	1,080	4	4
Future Operations Section		10	455	465	4	4
Incident Management Assistance Team (IMAT)		2,177	11,609	13,786	102	95
Urban Search and Rescue (US&R) Task Forces		<u>0</u>	<u>1,101</u>	<u>1,101</u>	<u>10</u>	<u>9</u>
	<b>Subtotal</b>	<b>7,849</b>	<b>34,903</b>	<b>42,752</b>	<b>307</b>	<b>285</b>

- **Operations Centers:**

- **Response Coordination Branch (RCB)**

The RCB is responsible for supporting the FEMA Regions by coordinating National level immediate and long term response actions based on maintaining constant awareness of all-hazards events that may affect the citizens of the United States. The RCB is comprised of the Response Watch Center, FEMA Operations Center, NRCC, the Future Operations Section and Situation Monitoring Unit.

- **National Response Coordination Center (NRCC)**  
 The NRCC is a multi-agency coordination center that functions as the operational component of the DHS National Operations Center (NOC). The NRCC coordinates Federal disaster response operations and emergency management program implementation for natural and manmade disasters, including catastrophic and significant disaster events. The NRCC supports disaster response and resource planning; monitors potential or developing events that could become significant; supports regional and field component operations; and makes decisions on and coordinates national-level disaster response activities and resource prioritizations and allocations for DHS and FEMA.
- **Regional Response Coordination Centers (RRCC)**  
 The RRCCs are regionally-based multi-agency coordination centers that perform a complementary role to the NRCC at the regional level. Operating in the ten FEMA Regions, each RRCC performs a situational awareness mission, identifies and coordinates response requirements, supports response operations, performs capabilities analysis, and reports on the status of Federal disaster response operations. The RRCCs deploy liaison officers and the Incidents Management Assistance Teams (IMATs) to initiate Federal support, facilitate initial delivery of goods and services to save lives and property and stabilize local infrastructures, and facilitate prioritizing “in theater” interagency resource allocation and coordination. The RRCCs can support multiple concurrent disaster operations within their regions.
- **Response Watch Center (RWC)**  
 The RWC maintains all-hazard situational awareness links 24/7 with the Regional Response Coordination Centers (RRCC), State Emergency Operations Centers (EOC), selected local EOCs, regional DHS components (HQ and field), National and Regional Department and Agency Emergency Support Functions (ESFs), State Fusion Centers, Joint Terrorism Task Forces, Department of Defense Operations Centers, and other key Federal, State and Local operational nodes.
- **FEMA Operations Center (FOC)**  
 The FEMA Operations Center supports FEMA, Executive Branch Departments and Agencies with several classified and unclassified programs. The FOC, in coordination with the National Operations Center, facilitates distribution of warnings, alerts, notifications, and bulletins to the Federal, State and local emergency management community using a wide variety of communications systems such as the National Warning System (NAWAS), the Washington Area Warning System (WAWAS), and the National-level Emergency Notification System (ENS). The FOC supports the NRCC/RWC through the implementation of a myriad of notifications to all Federal Departments and State EOCs as well as activating emergency management staff. The FOC’s multi-faceted communications and operations capabilities enable it to receive, generate, and/or disseminate critical, time-sensitive

information to senior decision makers at all government levels. The FOC receives, analyzes, and disseminates all-hazards information within FEMA and DHS and to other Departments and Agencies as well as to disaster response team members. The FOC executes National Security programs as directed. The FOC serves as the interim National Operations Center (NOC) during times of crisis or emergency situations that degrade or prevent the NOC from functioning.

- **Hurricane Liaison Team**

This team operates at the National Hurricane Center to provide real time analysis and reporting of hurricane and weather-related information and communication among the National Hurricane Center, FEMA headquarters/regions and the Federal, State, Tribal, and local governments' emergency management and disaster response system components, and provides an additional access point for critical interagency technology transfer to enhance the Agency's hurricane disaster response capability.

- **Situation Monitoring Unit**

Established in 2009, the primary mission of the Situation Monitoring Unit (SMU) is to provide situational awareness and information sharing for all-hazard planning and response operations related to counterterrorism, anti-terrorism, counter-intelligence, criminal threats, and operational security.

- **Future Operations Section**

The Future Operations Section serves as a support element to the Regional and National Response Coordination Centers along with the Activation Teams and FEMA senior leadership by providing analysis of threats (both natural and manmade) that present a potential for Federal support and/or assistance. This includes pre-identification of threats, identification of planning requirements (to be passed to Future Planning for development), coordination with internal and external stakeholders and the development of executable operations plan for FEMA leadership's consideration.

- **Operational Teams:**

- **Incident Management Assistance Teams (IMAT)**

The primary mission of an IMAT is to rapidly deploy to an incident or incident-threatened venue, provide leadership in the identification and provision of Federal assistance, and coordinate and integrate inter-jurisdictional response in support of the affected State(s), Tribe(s) or U.S. territory(s). These teams support efforts to meet the emergent needs of State, Tribal and local jurisdictions; possess the capability to provide initial situational awareness for Federal decision-makers; and support the initial establishment of a unified command. Moreover, these teams are able to establish an effective federal presence within 12 hours of notification, support the State, coordinate Federal activities, and provide initial situational

awareness, and are self-sufficient for a minimum of 48-hours to augment potentially scarce local resources.

- **Urban Search and Rescue (US&R) Task Forces**

US&R Task Forces provide the coordinated, national, all-risk capability for locating, extricating, and stabilizing victims of structural collapse resulting from natural and manmade causes, including those involving terrorism and weapons of mass destruction. See the Urban Search and Rescue PPA for more detail. Incident Support Teams (IST) are pre-existing elements that serve as the management cells for US&R Task Forces.

- **FY 2009 Accomplishments:**

- Completed the computer upgrades at the National Response Coordination Center (NRCC)/Watch at primary Coop Site and Audio-Visual (A/V) upgrades in FEMA Headquarters' NRCC conference room
- Completed Phase 1 (Planning) Regional Watch Standardization effort.
- Expanded the Emergency Notification System (ENS) to serve additional DHS components and began installation of the third ENS system in the Denver MERS Operations Center
- Completed Phase 1 (Planning) upgrades to the Special Compartmented Information Facility (SCIF) at FEMA Headquarters and Phase 1 (Planning) upgrades to the SCIF at primary COOP Site
- Deployed IMAT teams in support of disasters and National Security Special Events including the 2009 Presidential Inauguration, the North Dakota Flooding, and the American Samoa Earthquake Tsunami

- **FY 2010 Planned Accomplishments:**

- Complete Phase 2 (Installation) of Regional Watch Standardization.
- Initiate Phase 1 (Planning) for the secure response watch location at primary COOP site and complete Phase 1 (Planning) of Secure Watch / NRCC Construction at FEMA HQ.
- Develop and implement a National Information Management Sharing System and Common Operational Picture.
- Complete Phase 2 (Installation) of the tertiary Emergency Notification System (ENS) in Denver, CO
- Complete Phase 2 (Installation) upgrades to the Special Compartmented Information Facility (SCIF) at FEMA Headquarters
- Complete Phase 3 upgrades to the SCIF at primary COOP Site

- Complete implementation of remaining six Regional IMATs through internal realignment of Response FTE.
- **FY 2011 Planned Accomplishments:**
  - Finalize NRCC/RRCC Standard Operating Procedures
  - Complete Phase 3 of Regional Watch Standardization.
  - Complete initial Regional implementation of the National Information Management Sharing System and Common Operational Picture.
  - Begin Phase 2 (Installation) for the secure response watch location at the COOP site at Mt. Weather and Phase 2 (Installation) of Secure Watch / NRCC Construction at FEMA HQ.
  - Continue to expand the Emergency Notification System (ENS) to eventually include most or all DHS components.
  - Phase 3 (Completion) of the tertiary Emergency Notification System (ENS) in Denver.
  - Implement HLT employee credentialing framework and task books.
  - Complete implementation of National IMAT Team Central through internal realignment of Response FTE.

- **Planning Division:**

**Planning Division Programs FY 2011 Funding Summary**

(\$ in 000s)

	<u>Activity</u>	<u>Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
	CBRNE Branch	601	1,252	1,853	11	10
Improvised Nuclear Device (IND) Resp. & Rec. Program		5,900	0	5,900	0	0
Nuclear Incident Response Team (NIRT)		2,150	0	2,150	0	0
Domestic Emergency Support Team (DEST)		500	0	500	0	0
Pre-Positioned Equipment Program (PEP)		7,000	0	7,000	0	0
Nuclear/Radiological Incident Prevention Program (NRIPP)		450	0	450	0	0
National Planning Branch		1,203	1,366	2,569	12	11
Regional Planning		<u>9,944</u>	<u>8,536</u>	<u>18,480</u>	<u>75</u>	<u>70</u>
	<b>Subtotal</b>	<b>27,748</b>	<b>11,154</b>	<b>38,902</b>	<b>98</b>	<b>91</b>

- **Chemical Biological Radiological Nuclear Explosive (CBRNE) Branch**  
The CBRNE Branch provides the program management and oversight for all specialized CBRNE focused response programs and teams within the Response Directorate. In addition, the CBRNE Branch provides specific CBRNE subject

matter expertise to all components within Disaster Response in the areas of training development, policy development, planning support, and emergency response procedures.

- **Improvised Nuclear Device (IND) Response and Recovery Program**  
In FY 2010, FEMA will formally establish an IND Response and Recovery Program. The purpose of the program will be to integrate and/or coordinate the activities of multiple Federal departments and agencies to support State and local needs following an IND attack. The program will also focus on the enhancement of capability gaps identified by an assessment conducted by a DHS Requirements Planning Team during FY2008 and will determine the optimal approach for managing them. The Program will also work to align organizational/strategic direction that affects project and program goals and objectives and work collectively with the intra and inter-agency to resolve issues within a structure where roles and responsibilities for response and recovery to an IND incident are shared.
- **Nuclear Incident Response Team (NIRT)**  
NIRT teams are specialized teams managed day-to-day by the Department of Energy (DOE) / National Nuclear Security Administration (NNSA) and the Environmental Protection Agency (EPA). They are operationally controlled by DHS/FEMA when activated to provide expert technical advice and support in disaster response operations and other needs involving nuclear weapons incidents, radiological incidents, lost or stolen radioactive material incidents, and acts of nuclear terrorism. The FEMA Administrator also has responsibilities to establish standards and certify when those standards have been met; conduct joint and other exercises and train and evaluate performance; and provide funds to the DOE and the EPA, as appropriate, for homeland security planning, exercises and training, and equipment.
- **Domestic Emergency Support Team (DEST)**  
The DEST is a specialized interagency team designed to expeditiously provide expert advice, guidance and support to the FBI On-Scene Coordinator (OSC) during a Weapons of Mass Effect (WME) incident or credible threat. The DEST is comprised of crisis and consequence management components and augments the FBI's Joint Operations Center with tailored expertise, assessment and analysis capabilities. FEMA is identified as the Program Manager for the DEST and also deploys as part of the team.
- **Pre-Positioned Equipment Program (PEP)**  
FEMA has hazardous materials response equipment pre-positioned at nine sites across the United States that is used to reconstitute first-responders equipment during emergencies. The program will be expanded to include a tenth site by the end of calendar year 2009. Response Directorate expects to complete the roll-out of an eleventh and final site in calendar year 2011.

- **Nuclear/Radiological Incident Prevention Program (NRIPP)**  
 During the Top Officials 4 (TOPOFF 4) exercise in 2007, it became apparent that the Federal Government did not have a defined plan for radiological search/survey operations to respond to a non-specific radiological or nuclear threat within the United States. This planning gap was addressed during the development of the Federal Interagency Improvised Nuclear Device Concept of Operations Plan (IND CONPLAN), which identifies FBI and FEMA as the co-leads for the Survey/Search Coordination Committee. The Survey/Search Coordination Committee will develop an incident specific search/survey plan during a credible radiological or nuclear threat, in coordination with DOJ/FBI, the Office of the Director of National Intelligence, the Department of Energy/National Nuclear Security Administration, and the Department of Defense. In FY10 FEMA will establish NRIPP to develop and maintain a database of radiological detection assets, outline procedures for and facilitate the Survey/Search Coordination Committee, coordinate the development of a search/survey plan during a credible threat period, and maintain situational awareness of the deployment of detection assets.
  
- **National Planning Branch**  
 In depth operational planning encompasses the full spectrum of the planning process, ensuring continuity between long-range planning, current operations planning, and field element incident action planning. The Response Directorate is working to align existing Federal response planning initiatives such as GAP; catastrophic planning, evacuation planning, and emergency communications planning into a coordinated operational planning effort. National Planning efforts include:

  - Detailed and critical current and future disaster response operational analyses, preparation of contingency and concept of operations plans, and crisis action planning to ensure that the agency can lead and improve national all-hazard disaster responses.
  - Provide national and regional operational planning guidance and coordination.
  - Coordinate at the operational level the execution of all hazard contingency plans.
  - Provide forecasting and analysis of potential events.
  - Coordinate with FEMA's National Preparedness Directorate, Recovery Directorate, Mitigation Directorate, and DHS components, including the DHS Office of Operations Coordination and Planning. FEMA will lead the coordinated operational planning for the Federal Government.
  - Special events activities support the readiness capabilities and planning for designated National Special Security Events to ensure an effective response to possible emergencies, to ensure public health and safety, and to protect property against threats or human-caused disasters.
  - Develop and execute operational exercises through response-oriented consultation, advisement, and program expert knowledge as well as coordinating with other agencies to provide critical interaction and participation in National-level response exercises.

- **Regional Disaster Planning**

Develop coordinated and integrated regional plan which link to national all-hazards plans. Regional Planning serves as the point of contact for the regions in the Response Directorate, and often deploy to the regions to further develop pre-event relationships, protocols, response processes, and a mutual understanding of other agencies roles, issues, and needs, including:

- Lead the development of DHS and FEMA hazard-specific contingency plans.
- Mature federal-level catastrophic disaster response plans, in partnership with States and local communities.
- Increase plan action ability to respond with little or no advance notice or warning.
- Mature design and implementation plans reflecting rapid response times with massive support.
- Increase asset caches and implementation plans reflecting the need for a significantly higher level of response assets.
- Fully integrate Federal response efforts with State, Tribal and local governments and private sector and critical infrastructure representatives.
- Initiatives in Florida, California, Hawaii, Guam, and the eight Midwest States of the New Madrid Seismic Zone, will significantly enhance Federal disaster response planning activities by focusing solely on specific types of catastrophic disasters.
- GAP Analysis Program:
  - Perform gap analysis to enhance response and short-term recovery at the Federal, State, and local levels.
  - Further identify and eliminate shortfalls that exist between estimated requirements, standards, and performance measures and the actual response and short-term recovery capabilities maintained at all levels of government and with nongovernmental organizations and the private sector.
  - Engage local, Tribal, and State governments in an on-going process of self-awareness to determine potential disaster requirements and existing capabilities to meet those requirements in pre-defined critical areas.
  - Increase pre-disaster awareness of response and short-term recovery gaps.
  - Facilitate the elimination of response and short-term recovery gaps. Strengthen local, Tribal, and State capabilities, thereby reducing reliance on the Federal Government for immediate disaster response and short-term recovery needs.

- **FY 2009 Accomplishments:**
  - Supported Regional Operational Planners development of plans in accordance with IPS and CPG 101 to include Northern California Catastrophic Earthquake CONPLAN and OPLAN; Hawaii and Pacific Catastrophic Incident CONPLAN and Catastrophic Hurricane OPLAN; FEMA RIV Federal Interim Contingency Guide for Florida Catastrophic Planning; Nevada All-Hazards CONOPS and Northwest Nevada Earthquake Response CONPLAN; and continued in the development of specific State and regional plans to address an incident in the New Madrid Seismic Zone.
  - Completed distribution of the Data Collection and Analysis Tool (DCAT) to all FEMA regions to be used for gap analysis; Improved DCAT based on a crosswalk with Florida catastrophic planning project to identify how DCAT calculations compared to planning efforts already conducted. Enhanced inter-operability of DCAT by supporting and working with existing efforts such as Catastrophic Planning Branch, Disaster Emergency Communications, Search and Rescue, Grant Programs, National Preparedness, Disaster Assistance, Logistics Directorates and external partners.
  - Initiated the NIRT Program and established legislated requirements with DOE and EPA. Initiated 8 projects in the area of improving NIRT equipment, homeland security training, and exercises.
  - Supported planning and participation in National Level Exercise (NLE) 09, a National Intelligence/FBI led national level exercise (Tier I) focused on the prevention of a TUE attack
  - Supported planning and participation in Empire 09, a Tier II, Department of Energy/National Nuclear Security Administration Exercise (DOE/NNSA) designed to evaluate the technical response and management of a domestic Radiological incident
  - Completion of the following plans: Federal interagency Terrorist Use of Explosives CONPLAN (April 2009); Federal Emergency Management Agency Pandemic Influenza Plan (April 2009); Federal Interagency Hurricane CONPLAN (May 2009); Federal Emergency Management Agency Hurricane Plan (July 2009); and Federal Emergency Management Agency 2009-H1N1 Plan (October 2009).
  
- **FY 2010 Planned Accomplishments:**
  - Develop Federal plans, both Regionally- and Nationally-focused, that synchronize with Urban Area/regional plans developed from the Urban Area Security Initiative's Regional Catastrophic Preparedness Grant Program. Develop joint State-regional Operational Plans (OPLAN) for: (1) Regions IV, V, VI, and VII

for a catastrophic New Madrid Seismic Zone earthquake; (2) Region IX for a catastrophic earthquake in southern California; (3) Region IX Typhoon in Guam; (3) Region VIII Wasatch Fault Earthquake in Utah. Develop regional all-hazard CONPLANS for Region I-X. Initiative development of joint State-regional Hurricane OPLANS for Region's I-VI.

- Support planning and participation in NLE 2010 a Tier I Exercise, designed to evaluate the technical response and management of a domestic Improvised Nuclear Device (IND) incident in an urban environment, and
- Finalize IND National Strategy for Response and Recovery to an IND attack and IND Program Management Plan
- Support planning and exercise participation in NLE 2010, a national level exercise (Tier I) focused on the response and recovery from an improvised nuclear device (IND) attack.
- Develop a Survey/Search Operations Plan by FY 2010 that will minimally address how the interagency will plan and prioritize survey/search operations and exchange situational information relevant to the planning process.

- **FY 2011 Planned Accomplishments:**

- Complete catastrophic planning efforts in Florida, California, Hawaii and Guam, Utah and Hurricane Planning for Region I-VI.
- Support planning and exercise participation in NLE 2011, New Madrid Seismic Zone exercise.
- Complete Review of all National IND Policy and Doctrine
- Review FY10 NIRT tasks and develop a strategy path forward for standardizing and improving the NIRT program both at DOE and EPA
- Identify and prioritize research and development needs for survey/search operations
- Validate the completed local, State and Federal (Regional and National) suite of vertically and horizontally synchronous operational plans to address a catastrophic earthquake across eight Midwest States through the 2011 National Level Exercise (formerly known as TOPOFF), to commemorate the 200th anniversary of the NMSZ earthquake, the greatest seismic event in recorded U.S. history.

- **Disaster Emergency Communications Division**

The Disaster Emergency Communications (DEC) Division develops and implements the capability to provide voice, data, and video communications services before, during, and immediately after an incident in support of emergency managers at all levels of governments. Additionally, the DEC Division provides operations-based

planning and coordination services affecting a broad array of response organizations. These services include support of the Regional Emergency Communications Coordination Working Groups (RECCWG), the Mobile Emergency Response Support (MERS) Program, and Regional and State operational disaster emergency communications planning efforts.

**Disaster Emergency Communications Programs FY 2011 Funding Summary**

(\$ in 000s)

	<u>Activity</u>	<u>Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
Disaster Emergency Communications Management Office		915	683	1,598	6	6
Communications Integration Branch (CIB)		100	683	783	6	6
Reg. Emerg. Comm. Coord. Working Group (RECCWG)		410	0	410	0	0
Tactical Emergency Communications Branch		<u>15,919</u>	<u>29,704</u>	<u>45,623</u>	<u>261</u>	<u>242</u>
	<b>Subtotal</b>	<b>17,344</b>	<b>31,070</b>	<b>48,414</b>	<b>273</b>	<b>254</b>

- **Disaster Emergency Communications Management Office**  
 DEC Management Office provides business operations and contract management to ensure all programs can effectively meet their missions of operations-based planning and coordination services affecting a broad array of response organizations. These services include support of the Regional Emergency Communications Coordination Working Groups (RECCWG), the Mobile Emergency Response Support (MERS) Program, and Regional and State operational disaster emergency communications planning efforts
- **Communications Integration Branch (CIB)**  
 The Communications Integration Branch establishes plans to ensure that the DEC Division is prepared to respond and is well integrated with emergency responders during response and recovery efforts. This section of the DEC Division works to build communications policies that provide the scope and methods for using FEMA capabilities alongside partners and customers. The CIB planners work with the other DEC staff to determine how the actions of external partners might affect communications capabilities and will coordinate plans with external emergency communications providers to build a comprehensive communications support structure.
- **Regional Emergency Communications Coordination Working Group (RECCWG) National Program Oversight**  
 As defined in the Title XVIII of the Department of Homeland Security Appropriations Act of 2007, RECCWGs assess emergency communications capabilities within their respective FEMA Regions; facilitates disaster preparedness through the promotion of multi-jurisdictional and multi-agency emergency communications networks; and ensures activities are coordinated with all emergency communications stakeholders within the FEMA Region.

- **Tactical Emergency Communications Branch (TECB)**  
The TECB and MERS provide technical influence and oversight for the Response Directorate's emergency communications capability to include fixed, transportable, and mobile equipment and systems. Building on appropriate standards recommended in the National Emergency Communications Plan (NECP) and standards bodies, the TECB establishes emergency communications technical standards to build equipment standardization and system interoperability among the tactical/technical components of DEC Division's capability within and outside the Response Directorate.
- **FY 2009 Accomplishments:**
  - Established all 10 mandated Regional Emergency Communications Coordination Working Groups (RECCWG) that consists of Federal, State, and local representatives, and other non-government agencies to address interoperable emergency communication concerns.
  - Developed 27 State, 15 Emergency Support Functions, and 4 regional emergency communications plans that allow FEMA to be better prepared to preposition and deploy communications resources during catastrophic incidents.
  - Developed 11 Pre-scripted Mission Assignments with the Federal Communications Commission (FCC), National Communications System (NCS), United States Coast Guard (USCG), Department of Defense (DOD), and United States Forest Service (USFS) to facilitate rapid response for communications requirements.
- **FY 2010 Planned Accomplishments:**
  - Develop a communications coordination framework for FEMA Headquarters
  - Develop an effective command and control communications framework for the Administrator and Regional Administrators
  - Support the coordination and delivery of secure communications solutions to headquarters and the Regions
  - Work with States to enhance State and regional emergency communications plans
- **FY 2011 Planned Accomplishments:**
  - Optimize processes and systems to facilitate integration and coordination and improve interaction between the operational components.
  - Enhance integration among the operational components of the Department, using standardized processes that support a unified DHS/FEMA mission.
  - Establish an additional, geographically remote, alternate operations center (FAOC) and complete a robust training program for the center.

- Establish a secure conferencing system capability to support DHS senior leader discussions at the classified level.
- **Business Management Division**  
The Business Management Division was established to support three major areas of the Response Directorate: Facilities, Assets, and Contracts Management; Human Resources Management; and Financial Management.

**Business Management Programs FY 2011 Funding Summary**

(\$ in 000s)

	<u>Activity</u>	<u>Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
Facilities, Assets, and Contracts Management		943	910	1,853	8	7
Human Resources Management		67	797	864	7	7
Financial Management Branch		<u>1,957</u>	<u>1,024</u>	<u>2,981</u>	<u>9</u>	<u>8</u>
	<b>Subtotal</b>	<b>2,967</b>	<b>2,731</b>	<b>5,698</b>	<b>24</b>	<b>22</b>

- **Facilities, Assets, and Contracts Management Branch**  
Facilities, Assets, and Contracts Management Branch (FACMB) provides contract oversight for the Response Directorate, develops and manages pre-scripted Mission assignments, surveys and manages space and moves for all full-time employees (including CORE, Contractor, and PFT), and centrally manages the purchase of equipment and supplies.
- **Human Resources Management Branch**  
Human Resources Management Branch serves as the Response Directorate representative for the Human Capital Division in regards to all HR-related issues to include: time and attendance, hiring initiatives, position description and development, and HR policy and procedure advisement.
- **Financial Management Branch**  
The Financial Management Branch processes actions such as, program funds transfers, fund allocations, travel obligations, and budget formulation. FMB ensures that actions are completed successfully in accordance with the Response Directorate's mission and core capabilities.

**C) Logistics Directorate (formerly Logistics Management Directorate):**

The mission of the Logistics Directorate (LD) is to effectively plan, manage and sustain national logistics response and recovery operations, in support of domestic emergencies and special events – to serve as the National Logistics Coordinator (NLC). LD is organized around four core competencies: Logistics Operations; Logistics Plans and Exercises; Distribution Management; and Property Management. LD’s capabilities include the management of resources such as the logistics DAE cadre, supplies, services and equipment needed to respond to an all-hazards event. Many of the commodities purchased for a disaster, as well as the contracts which help FEMA stand ready to support disaster, are funded in the Disaster Relief Fund appropriation (Fund 6).

**Logistics Programs FY 2011 Funding Summary**

(\$ in 000s)

<u>Activity</u>	<u>Program</u>	<u>S &amp; B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
Logistics Management M&A	426	3,496	3,922	27	25
Plans and Exercises	459	1,981	2,440	16	15
Distribution Management	561	9,297	9,858	108	100
Property Management	1,865	3,175	5,040	32	30
Logistics Transformation	5,597	588	6,185	4	4
Business Management	1,225	1,866	3,091	16	15
Operation Activities	<u>1,357</u>	<u>4,626</u>	<u>5,983</u>	<u>51</u>	<u>47</u>
<b>Subtotal</b>	<b>11,490</b>	<b>25,029</b>	<b>36,519</b>	<b>254</b>	<b>236</b>

- **Logistics Management M&A (Office of Assistant Administrator)**  
Effectively plans, manages and sustains the National logistics response and recovery operations in support of domestic emergencies and special events – to act as the National Logistics Coordinator (NLC) or Single Logistics Integrator for National incident support. The main activities funded under the Office of Assistant Administrator are establishing National emergency procedures and fostering transparency through collaboration, coordination and technology enhancements to expand Region and State level logistics capabilities.
- **FY 2009 Accomplishments:**
  - Developed reconciliation processes and procedures for inventories of Initial Response Resource (IRR) for commodities which resulted in achieving an average rate of 95% or better.
- **FY 2010 Planned Accomplishments:**
  - Establish an agency-wide Single Point Ordering process, directive and interim tracking system to support disaster response and recovery field operations. This web-based application will be used to request supplies, equipment, services or commodities to include visibility of

the status or location of all requests and orders from the point of inception through the final delivery to the end user.

- **FY 2011 Planned Accomplishments:**

- Implement FEMA's Single Point Ordering process and tracking system to provide support for disaster response and recovery field operations.
- Continue implementing the Logistics Calculator Assessment Tool within the regions to build upon expertise gained and continue building towards States being self-sustaining in disaster planning.

- **Logistics Operations**

Manages and executes national logistics command and coordination, tracking and reporting for all-hazards operations utilizing the National Logistics Coordinator concept. The division operates the Logistics Management Center (LMC), which serves as the central reporting element for the National Response Coordination Center (NRCC) on all logistical operational activities and actions. Logistics Operations manages the storage, maintenance and deployment of Temporary Housing Units (THUs) and Mobile Disaster Recovery Centers (MDRCs) to ensure we are adequately prepared for disaster response. The main activities funded under the Logistics Operations Division are travel for staff to the various THU sites and field offices throughout the country, and management and oversight of the THU and MDRC Program to ensure we are adequately prepared to ship temporary housing units and deploy MDRCs during a disaster. Other activities include daily operations and management of the LMC, which is logistics 24/7 responses, and coordination center, and training and supplies for Logistics Operations PFT staff.

- **FY 2009 Accomplishments:**

- Completed development of virtual Point of Distribution (POD) course for POD operations; 5000 State responders and volunteer organizations have completed training

- **FY 2010 Planned Accomplishments:**

- Dispose of the majority of excess temporary housing units (THUs) and close up to eight THU sites.

- **FY 2011 Planned Accomplishments:**

- Close and deactivate remaining THU storage sites according to the Logistics Operations Division schedule.

- **Plans and Exercises**

Develops and determines strategic baseline planning criteria to provide cohesive and synchronized logistics plans and exercises to achieve both short and long term readiness requirements. The Division ensures deliberate planning efforts and

coordinated CONOPS, OPLANS and Interagency Plans, resulting in repeatable processes that optimize National logistics response and recovery operations in support of domestic emergencies and special events. Plans and Exercises Division is responsible for operations analysis, lessons learned and adaptive planning during incident support. The main activities funded under the Plans and Exercises Division include travel and training related to exercise development and execution, senior staff visits to Regional operations offices and plans meetings on initiatives such as RPAT, RISC, JFO and LMRS. Other activities include training and supplies for Plans and Exercises PFT staff.

- **FY 2009 Accomplishments:**

- Created collaborative planning and operational National Response Framework (NRF) partnerships with other Federal agencies.

- **FY 2010 Planned Accomplishments:**

- In collaboration with EMI and Joint Staff (J4 Logistics)/Army Logistics University (ALU), develop and conduct a 4 ½ day Interagency Logistics Course. This course will primarily introduce key logistics elements to FEMA's disaster logistics mission and exchange of best business practices applicable to disaster operations.

- **FY 2011 Planned Accomplishments:**

- Maintain LD Regional Planning Assistance Teams (RPAT) to assist and support Regional logistics representatives in planning and improving regional logistics plans and refine the Resource Requirements Calculator (RRC) as a support program to RPAT to assist Regional logistics representatives and further support major regional logistics operations.

- **Distribution Management**

Manages a comprehensive supply chain, warehouse, and transportation operation using a strategic alliance of FEMA partner agencies to distribute supplies, equipment and services rapidly, effectively and efficiently to support emergencies. The main activities funded under the Distribution Management Division include travel for staff to the eight distribution centers located throughout the county and overseas, as well as management and oversight of the warehouses and the transportation services to ensure we are adequately prepared to rapidly ship initial response resource (IRR) commodities during a disaster. Other activities include training and supplies for Distribution Management PFT staff.

- **FY 2009 Accomplishments:**

- Effectively and efficiently provided life sustaining commodities such as meals, water, cots, blankets, and Hygiene Kits to disaster survivors

of Hurricane Gustav, the Atlanta flooding and the American Samoa tsunami.

- **FY 2010 Planned Accomplishments:**
  - Transition to a new prototype distribution center (DC) in Atlanta and complete market survey for the selection for the New DC Caribbean.
- **FY 2011 Planned Accomplishments:**
  - Transform LD's distribution centers by completing facility negotiation and build-out, updating standard operating procedures at DCs, facilitating physical facility moves, updating metrics analysis improvement, piloting full operating capability and rolling out a DC model location.
- **Property Management**

Provides management oversight, internal controls, and technical reviews in the areas of property accountability for the Temporary Housing Unit program and the Distribution Centers' property and equipment. The division assists LD's Distribution Management and Logistics Operations Divisions in the reutilization, donation and/or disposal of excess disaster supplies. The main activities funded under the Property Management Division include travel for staff to the various sites (both THU and Distribution Centers) to conduct inventory reviews, as well as supplies and training for PFT staff.
- **FY 2009 Accomplishments:**
  - Supported disasters in Kentucky, Arkansas, Missouri, Oklahoma, North Dakota and other locations in Regions I, IV, V, VI, VII and VIII during the winter Ice Storms and Floods
- **FY 2010 Planned Accomplishments:**
  - Completed rollout of the integrated Logistics Supply Chain Management System (LSCMS) throughout the Regional and Distribution network.
- **FY 2011 Planned Accomplishments:**
  - Lead efforts to integrate the five main elements of supply chain functionality – request, order, fulfillment, shipping and receiving through the Logistics Supply Chain Management System (LSCMS). LSCMS is the supply chain execution and visibility solution for the FEMA Logistics Directorate to provide operational readiness inventory information for the Directorate through near real time system usage by staff, reporting functionality and the ability to provide In Transit Visibility of shipments and assets as they move through the supply chain.

- **Logistics Transformation**

Coordinates and manages emerging transformation initiatives and concepts such as the National Logistics Coordinator (NLC) Concept, Key Readiness Contracts and the Demonstration Program: Logistics Capability Calculator (LCC), as well as Logistics Management Transformation Initiatives (LMTI). LD is the Single Integrator for Strategic Logistics Support and coordinates all domestic emergency logistics planning, management and sustainment capabilities through the NLC Concept. Key Readiness Contracts and Interagency Agreements (IAA) provide an enhanced logistics capability including supplies and services, transportation and asset viability. The Demonstration Program: Logistics Capability Calculator (LCC) is a congressionally-directed program to form innovative public and private logistical partnerships to improve readiness, increase response capacity and maximize the management and impact of homeland security resources. The demonstration program is directed at increasing State logistics planning and execution capabilities and collaboration with the Federal government. The concept addresses the necessary systems (both automated and manual processes) needed to facilitate critical logistics information flow and mutual visibility among Federal, State, Tribal and local governments, EMAC, NGOs and the private sector. Logistics Management Transformation Initiatives (LMTI) is the overarching initiative to help transform LD into a more effective and responsive organization with improved readiness and response capability. LMTI has conducted a comprehensive analysis and assessment of current logistics core competencies and is now supporting numerous transformational initiatives within LD, while ensuring fiscal prudence, accountability and supporting the NLC concept. The main activities funded under the Logistics Transformation Division include contract services in support of Logistics Transformation initiatives, travel to continue demonstration of the LCAT/LCC through March 2010, and travel, training and supplies for PFT staff.

- **Business Management**

Provides comprehensive Logistics-related fiscal, personnel, administrative, and coordination services to achieve optimum mission requirements and capabilities. The Business Management Division consists of the Human Capital and Training Branch, and the Budget, Programs and Analysis Branch. Functions of Business Management include managing and integrating human resources management and strategies into the overall strategic objectives for LD, advising Directorate leadership on human capital requirements and professional training development for operational mission and programs and providing comprehensive financial management services to include budget formulation and oversight and financial document tracking for five divisions and ten regions. The division also manages the headquarters DAE Logistics cadre, which consists of over 500 DAEs, and serves as the National cadre manager for ten regions. In this capacity, the division ensures consistent policies are in place for management and training of DAEs, including oversight and implementation of FEMA's credentialing program. The main activities funded under the Business Management Division include

centralized supply purchases for the entire directorate, payment of Blackberry and copier services for the entire directorate and training and travel for PFT staff.

- **Logistics Regional Operation Activities**

The main activities funded under Logistics Regional Operations include travel for regional logistics PFT staff to attend various conferences and seminars as directed by headquarters, travel throughout regions to conduct planning for disaster events as required by headquarters, and provide IT equipment and supplies for PFT logistics staff.

Management and Administration funds for Disaster Logistics are complemented by disaster readiness support through the disaster-specific resources from the Disaster Relief Fund.

- **D) Office of Federal Coordinating Officer (FCO) Operations (formerly part of Office of Administrator)**

The Stafford Act directs a Federal Coordinating Officer (FCO) to do the following; 1) make an initial appraisal of the types of relief most urgently needed; 2) establish field offices as the FCO deems necessary; 3) coordinate the administration of relief from other organizations, and; 4) take other such action as directed by the President.

**Office of the Federal Coordinating Office Programs FY 2011 Funding Summary**  
(\$ in 000s)

<u>Activity</u>	<u>Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>FTP</u>	<u>FTE</u>
FCO Programs	50	0	50	0	0

Upon declaration of a major disaster or emergency, the FEMA Administrator appoints an FCO who is charged with initiating all actions necessary to assure that Federal assistance is provided in accordance with the declaration, applicable laws, regulations and the FEMA-State agreement. This may include designation as Disaster Recovery Manager, exercising all authority to direct DRF funding in response to a disaster.

- **E) Federal Insurance and Mitigation Directorate (formerly Mitigation Directorate):**

The Mitigation Directorate creates safer communities by reducing loss of life and property, and preventing potential disaster losses. This is accomplished through three core competencies and one support activity: (1) Analyzing Risk through identification and assessment; (2) Reducing Risk through land use, building codes, and the Hazard Mitigation Grant Program; (3) Environmental Planning and Historic Preservation; and, (4) Regional and Disaster Support activity.

These core competencies and support activity work jointly to create safer communities by reducing the likelihood of future losses, enabling individuals to recover more rapidly from floods and other disasters, and minimizing the financial

impact on the U.S. Treasury, States, local and Tribal communities in the event of a disaster.

**Mitigation Programs FY 2011 Funding Summary**

(\$ in 000s)

<u>Activity</u>	<u>Program</u>	<u>S &amp; B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
Earthquake	8,977	1,274	10,251	11	10
National Hurricane	2,156	459	2,615	4	4
Dam Safety	10,281	436	10,717	3	3
Mitigation M&A & Building Science	2,042	9,023	11,065	76	71
Environmental & Historic Preservation	1,511	2,618	4,129	21	20
Disaster Management Support	<u>280</u>	<u>8,155</u>	<u>8,435</u>	<u>75</u>	<u>70</u>
<b>Subtotal</b>	<b>25,247</b>	<b>21,965</b>	<b>47,212</b>	<b>190</b>	<b>178</b>

- **Analyzing Risk**

- **National Hurricane Program:** Established in 1985, the National Hurricane Program (NHP) works to improve the Nation’s overall hurricane resilience by optimizing the performance of the comprehensive emergency management system for the risks of hurricanes and tropical cyclones. The NHP has 2 principal areas of focus. First, it builds emergency management capability by facilitating or advocating programs, policies, procedures and general dialog both horizontally across the functional areas of emergency management – preparedness, protection, response, recovery and mitigation – as well as vertically through the levels of government and the private sector. Second, the NHP provides technical information, tools, and products that assist State and local governments in developing effective hurricane emergency management plans. The program is a multi-agency partnership, involving FEMA, the National Oceanic & Atmospheric Association (NOAA), the National Weather Service (NWS), the U.S. Department of Transportation (DOT), the U.S. Army Corps of Engineers (USACE), and other Federal agencies.

The NHP conducts hurricane evacuation studies that guide the decision-making process for protecting the public when a hurricane threatens an area. These studies help State and local communities establish population protection plans by determining the probable effects of a hurricane, analyzing transportation systems, predicting public response to the threat and advisories, identifying appropriate shelters, and providing clearance times for safely sheltering or evacuating the threatened public. NHP uses output from the Sea, Lake, and Overland Surge from Hurricanes (SLOSH) when conducting the hurricane evacuation studies. This computerized model developed by the Federal Emergency Management Agency (FEMA), United States Army Corps of Engineers (USACE), and the National Weather Service (NWS) is able to

estimate storm surge depths resulting from historical, hypothetical, or predicted hurricanes by taking into account a storm's pressure, size, forward speed, forecast track, wind speeds, and topographical data.

- **FY 2009 Accomplishments:**
  - Secured resource support for Post Storm Assessments in Texas, Louisiana, Mississippi and Alabama of the effects of Hurricanes Ike and Gustav. Preliminary reports will be available for these studies before the 2010 hurricane season.
  - Completed the initial update of HURREVAC software, and released a beta version of HURREVAC 2010 and developed (in partnership with the USACE) the HURRIVAC 2010 Conversion Plan.
  - Provided hurricane preparedness training to over 75 local emergency management officials at the National Hurricane Center.
  - Hosted the annual Interagency Coordinating Committee of Hurricanes (ICCOH) and served as facilitator for the Emergency Support Function Leadership Group (ESFLG) Hurricane Tabletop Exercise and Workshop.
  
- **FY 2010 Planned Accomplishments:**
  - Complete Post-Storm Assessments for Hurricanes Ike and Gustav: These assessments are of the planning assumptions (and underlying methodologies) of the Hurricane Evacuation Studies (HES) for the areas affected by the storms – hazard, vulnerability, behavioral, transportation and sheltering. The results of these studies should be available to update the HES products for the study areas prior to the 2010 hurricane season, and will help update or refine HES methodology for future studies starting in FY 2010.
  - Complete hurricane evacuation studies that affect coastal counties in four States. Study updates are driven by improved understanding of the wind, rain, or surge hazard from hurricane events, population growth in the affected area, significant improvements to the transportation system, and availability of shelters. These studies provide technical information that is used to safely evacuate those coastal populations that may be impacted by potential storm surge inundation from Category 1-5 hurricanes.
  - Work with the National Emergency Management Association to establish a Hurricane Task Force that will support broader “Local, State, Tribal, and Federal Preparedness Task Force” activities.
  - Launch a national non-commercial service announcement (NCSA) hurricane preparedness/awareness campaign in partnership with the Association of State Broadcasters Associations.

- **FY 2011 Planned Accomplishments:**
  - Complete hurricane evacuation studies that affect coastal counties in four additional States based on the need to update hurricane evacuation studies and capture changes in population since the last study. These studies provide technical information that is used to safely evacuate those coastal populations that may be impacted by potential storm surge inundation from Category 1-5 hurricanes.
  
- **National Dam Safety Program:**

As the lead federal agency for the National Dam Safety Program (NDSP), FEMA is responsible for coordinating efforts to reduce risks to life and property from dam failure throughout the United States. The National Inventory of Dams currently lists approximately 79,500 dams in the United States. Of this, 5 percent are Federally owned, 5 percent are State owned, 20 percent are owned by local government, 2 percent are owned by public utilities and the remaining are privately held. The NDSP is a collaborative effort among States, Federal agencies, private sector, and other stakeholders to secure the safety of these dams through research, training, and public awareness. The NDSP provides financial assistance to States' dam safety programs to support dam safety activities including: inspecting and monitoring dams; training dam safety staff and inspectors; data analysis and research to support the improvement of State Dam Safety Programs; preparation of Emergency Action Plans (EAPs); and public awareness campaigns on the risks associated with dam failure.
  
- **FY 2009 Accomplishments:**
  - Worked with States to increase their development of Emergency Action Plans with funding provided through the FY 2008 Grant Assistance Program.
  - Established an Interagency EAP Work Group to increase EAP development nationwide.
  - Initiated a unique research project to evaluate the potential impact of increasing public awareness for those who are downstream of high hazard dams and the subsequent impact on EAP development within the States. The increased FY 2009 program funding level enabled State programs to make significant progress in EAP development, increase the number of dam inspections, and support the initiation of State specific public awareness and outreach activities.

- **FY 2010 Planned Accomplishments:**
  - Dam Incident Emergency Interoperability: This collaborative effort between FEMA and NOAA to develop a prototypical operating environment to integrate services and data sharing across Federal agencies. This will improve the ability of the National Weather Service (NWS) to provide real time dam related flooding information to State and local emergency.
  - Development of standard and consistent inundation maps: FEMA will prepare guidelines on the development of standard and consistent inundation maps that will strengthen a key component of the EAP process that impacts the ability of local governments to mitigate and prepare for a dam failure.
  - Dam Hazard Consequences Assessment Pilot Studies: FEMA will fund one pilot study to assess the consequences of a community vulnerable to potential hazards associated with dam failure. The results from this study will be used to develop guidance to help communities execute a dam failure consequence assessment that will enhance their ability to prepare for and mitigate the impact of dam failure. This will ensure a much more involved and prepared public and community at risk from an incident at a dam.
  - Develop a public awareness & outreach strategy and products to support outreach and risk communication to the public who live within the failure inundation area downstream of the dam.
  - Fund two additional Dam Hazard Consequences Assessment Pilot Studies that will be compiled and analyzed with the FY 2010 study for inclusion in a FEMA publication that captures lessons learned, best practices and provides recommendations for a process a community can follow to effectively assess the impacts of dam incidents on life, property and the environment.
  
- **FY 2011 Planned Accomplishments:**
  - Provide dam safety assistance grants to the States to support the development of EAPs, dam inspections, condition assessments and public awareness and outreach activities.
  - Increase the number of high hazard potential dams that have current EAPs, significantly improving local communities' ability to respond to dam failure and reduce the risks to life and property.
  - Continue to invest in training activities for State dam safety and emergency management officials and expand the use of technologies to increase the public's awareness of and preparedness for the risk of dam failure or operating malfunction.
  - Improve dam safety data collection process and monitoring of State dam safety programs.
  - Develop and implement strategies to uniformly assess the condition of dams in the Nation.

- **Reducing Risk**

- **National Earthquake Hazards Reduction Program**

- Established by Congress in 1977, the National Earthquake Hazards Reduction Program (NEHRP) works to reduce risks to life and property resulting from earthquakes. NEHRP is a collaborative effort among FEMA, the National Institute of Standards and Technology (NIST), the National Science Foundation (NSF), and the United States Geological Survey (USGS). The NEHRP agencies work together to reduce the Nation's vulnerability to earthquakes by researching the causes and effects of earthquakes and using the results to produce technical guidance for developing earthquake resistant design and construction standards. NEHRP also develops techniques to educate the public about earthquake hazards and mitigation.

- FEMA manages initiatives that reduce the risk of loss of life and damage to buildings and other structures as a result of earthquakes. Approximately 50 percent of the requested funds will be used to translate research into technical guidance publications and best practices on seismic safety, building design and construction, building codes and standards, and reducing economic losses. In addition, \$2 million will be used to assist State and local governments in building capabilities for determining potential damage and reducing the effects of earthquakes before they occur. The remaining funds will support FEMA's work with National codes and standards organizations to develop and improve seismic building standards. FEMA will also continue its efforts to educate the public, design professionals, contractors, building regulators and decision makers at all levels about the risks of earthquakes and how to reduce those risks.

- **FY 2009 Accomplishments:**

- Completed the 2009 edition of the NEHRP Recommended Provisions, which are the basis of the earthquake design requirements in the Nation's model building codes.
    - Implemented Quake Smart, an initiative to raise awareness of earthquake risks within the private sector in areas of high-seismic risk. Conducted four business forums in California, Nevada, Indiana and Missouri.
    - Conducted four business forums in California, Nevada, Indiana, Missouri, areas of high-seismic risk, to raise awareness of earthquake risks and encourage mitigation and preparedness in the business community.
    - Re-established a program of State Assistance for 29 States and Territories to support and enhance their State Earthquake Hazard Mitigation Programs related to planning, assessment, and support for building code adoption and enforcement.

- **FY 2010 Planned Accomplishments:**
  - Develop national-level business partnerships as part of an effort to help businesses take action to mitigate earthquake risks to their business, customers and employees through outreach and education campaigns.
  - Expand the Quake Smart business awareness initiative to identify a national or regional corporate partner that will join with FEMA in developing a business mitigation program. This partnership will be a significant step forward from the awareness and outreach activity going on as part of Quake Smart, an initiative that promotes business awareness of the earthquake risk and promotes mitigation actions for businesses in areas of high-seismic risk. The goal of Quake Smart is for these businesses to know their risks, make a plan to address those risks and take action to reduce them.
  - Conduct a series of business forums in selected communities in areas of high-seismic risk to raise awareness of earthquake risks and encourage mitigation and preparedness in the business community.
  
- **FY 2011 Planned Accomplishments:**
  - Complete the first phase of a comprehensive methodology for performance-based seismic design for new and existing buildings as directed in the National Earthquake Hazards Reduction Program (NEHRP) Reauthorization (P.L. 108-360).
  - Initiate the development of performance-based seismic design criteria. These design criteria will allow building owners, regulators and designers to select the level of seismic performance they can expect from their building based on their level of seismic hazard, improving the performance of their building above code minimum and reducing future earthquake losses. The first phase of this project is the development of a Performance Assessment Methodology, which will allow users to assess the performance of their new or existing building.
  
- **Environmental Planning and Historic Preservation**

The Office of Environmental Planning and Historic Preservation (OEHP) uses funds to manage FEMA's compliance with all environmental planning and historic preservation laws, executive orders and regulations, across all FEMA programs. Specifically, OEHP is the functional authority on FEMA's environmental and historical preservation (EHP) compliance, and must manage all EHP policy, legal sufficiency, systems, human capital (including the EHP Disaster Workforce), outreach and performance management aspects of these requirements. The mission of the environmental planning and historic preservation program is to help communities reduce the impact that disasters and emergency management decisions and operations have on the Nation's natural and cultural resources.

FEMA's Environmental and Historic Preservation Strategic Plan was developed to strategically address and support the substantial growth in both disaster declarations and overall program growth. In support of the strategic plan, OEHP has focused on performance metrics in two key areas: timeliness of EHP non-disaster project reviews and disaster workforce readiness. The metrics will be expanded to include reliability which consists of legal sufficiency, quality of EHP compliance and impacts on EHP resources, and cost effectiveness. OEHP will use the results of regular compliance audits and assessments to measure this performance.

- **FY 2009 Planned Accomplishments:**

- Completed and implemented environmental management directive, guidance and training for the disaster workforce.
- Completed revisions to its outreach strategy to clearly define and communicate the roles, responsibilities and expectations of its partners in the OEHP compliance process. The outreach strategy establishes an enhanced means of communication, critical issues and talking points to facilitate regular communication and interaction on EHP issues.
- Formed a national level EHP Advisory Committee, which will serve to provide senior-level program management participation and direction in the implementation of the EHP strategic objectives across FEMA.

- **FY 2010 Planned Accomplishments:**

- Development of an EHP Training Strategy: FEMA will build from the existing capabilities and staffing level Gap Analysis to provide new and updated training to OEHP staff and others required to have EHP competencies including Agency officials, Program managers and staff, and FEMA partners. The Strategy will be developed in FY 2010 for implementation in FY 2011.
- Interfacing the Environmental-Historic Preservation Management System (EMIS): The external component of EMIS will be interfaced with FEMA program systems to improve system response time, data volume, and expand the number of concurrent users.
- Implementing Section 106 of the National Historic Preservation Act: OEHP work with the President's Advisory Council on Historic Preservation, the National Conference of State Historic Preservation Officers, and Tribal governments and organizations to develop Nation-wide approaches for review of Agency actions under Section 106 of the National Historic Preservation Act. This is a critical effort toward standardizing and streamlining the Section 106 review process and consultation and documentation requirements for typical Agency actions and grant-funded projects.

- **FY 2011 Planned Accomplishments:**
  - Continue to develop policies, programmatic agreements and protocols to simplify and standardize the EHP compliance process and facilitate compliance. OEHP will implement its strategy to strengthen EHP capabilities with State, Tribal, and territory partners.
- **Regional and Disaster Support**  
 The Regional and Disaster Support (RDS) Branch of Mitigation incorporates mitigation and insurance opportunities into catastrophic disaster planning, strengthens regions, standardizes tasks carried out in the Joint Field Offices (JFO). The main goals of Regional & Disaster Support are:

1. Equip the Hazard Mitigation Disaster Workforce with standards, training and job aides to consistently deliver mitigation disaster assistance.
2. Coordinate Mitigation disaster operations, national disaster policy analysis, and crosscutting program and administrative issues in support of the Regions and the Disaster Field organization.
3. Manage the Mitigation Disaster Workforce.

RDS works to ensure a prepared disaster workforce by providing materials used to hire and train personnel. RDS develops performance indicators, prepares qualifying plans for disaster positions, produces job aides, and creates curriculum plans and training courses. Systems integration, information sharing across JFOs, and disaster planning for mitigation operations will increase standardization and maximize the potential of rebuilding stronger and safer communities.

- **FY 2009 Accomplishments:**
  - Established a direct communication system with the Hazard Mitigation (HM) Cadre that allow headquarters to disseminate information that assist members with administrative issues, keeps them up to date on program policy, guidance and training and provides a venue to share best practices for the field.
  - Conducted monthly Disaster Workforce Group meetings to stay abreast of staffing and analyze staffing capacity and readiness. The workforce staffing analysis is coordinated with regional cadre managers to review staff recruitment and retention efforts which are reported quarterly.
  - Completed the update of the Mitigation Field Operations Guide and the Hazard Mitigation Task Books which describes what each of the 25 Mitigation disaster position is required to do in the field.
- **FY 2010 Planned Accomplishments:**
  - Develop the Mitigation Advisor Support Tool (MAST). This automated system will provide mitigation technical recommendations to disaster applicants, increase customer service, integrate program information, and track applicant interest.

- Develop Credentialing Plans: These plans will define the requirements and qualifications specific to the 26 Hazard Mitigation disaster positions and aligned with the skill levels within the HM cadre.
- **FY 2011 Planned Accomplishments:**
  - Use the completed credentialing plans to develop and define the roles and responsibilities of the Disaster Operations positions in the Regions and implement the Field Operations Guide in the Joint Field Offices.
  - Expand the Mitigation Advisory Support Tool (MAST) to include evaluation of outreach efforts in order to document and replicate successes and identify areas for improvement with the overall goal of increasing, implementation of mitigation measures in the post-disaster recovery and rebuilding.
- **Management and Other Activities**  
Resources includes Salaries & benefits and management oversight activities

- **F) National Preparedness and Protection Programs – National Continuity Programs**

**National Continuity Programs FY 2011 Funding Summary**  
(\$ in 000s)

	<u>Activity Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>FTP</u>	<u>FTE</u>
Management & Administration	21,290	1,685	3,369	12	11
Continuity Of Government	12,894	2,767	15,661	21	20
Continuity Of Operations	5,472	3,477	8,949	29	27

<b>Subtotal</b>	<b>86,389</b>	<b>12,236</b>	<b>98,625</b>	<b>96</b>	<b>89</b>

- **Continuity Planning and Operations**

FEMA leads the effort to coordinate Federal Executive Branch continuity programs to ensure performance of National Essential Functions during a catastrophic emergency. Inherent in FEMA’s role as the lead agent for Executive Branch continuity is the responsibility to formulate guidance for agencies to use in developing viable, executable continuity plans; facilitate interagency coordination; and monitor and assess the status of individual and collective department and agency continuity capabilities across the Executive Branch.

The NCP provides plans, procedures, guidance, training, and evaluation resources to ensure the continuation of the essential functions of the Department of Homeland Security (DHS), Federal Emergency Management Agency (FEMA), and Federal Executive Branch departments and agencies in the event key facilities are threatened or become unusable, requiring the relocation of selected personnel and functions. By ensuring these essential government functions continue under all hazard conditions, the program preserves the American way of life.

- **FY 2009 Accomplishments:**

- Performed 10 Regional Continuity Program Assessments to review the region’s ability to activate, mobilize, and perform primary mission essential functions.
- Conducted significant continuity training outreach. This effort included 121 Continuity resident and independent study courses to 42,875 in one year to continuity professionals across the country, including the Determined Accord Tabletop Exercise, which was updated to focus on H1N1 pandemic characteristics. This effort included conducting 42 tabletop exercises across the Nation.
- Completed 39 major continuity exercises (i.e. Eagle Horizon 2009; Determined Sentry 2009 (telework); Vigilant Accord 2009 (devolution). With the onset of the H1N1 outbreak, the Determined Accord (pandemic

influenza) tabletop exercise materials were modified to reflect the current virus and provided to the Federal Executive Branch as the primary training tool for pandemic continuity planning/preparation.

- Developed a new Concept of Operations (CONOPS) to reflect the October 2008 revision to the NSPD-51/HSPD-20. The new CONOPS provides standardized daily operational processes, and requires participating departments and agencies to generate reports that assess the Federal Executive Branch (FEB)'s continuity readiness posture.
- **FY 2010 Planned Accomplishments:**
  - Conduct continuity training outreach to Federal, State, territorial, Tribal, and local government jurisdictions by delivering more than 125 Continuity resident and independent study courses to more than 23,500 professionals across the country. Coordinate FEMA's Continuity of Operations Strategic Planning Conference for States, Territories, and the District of Columbia. This second annual conference will be held March 16-18, 2010, in Galveston, Texas.
  - Develop, coordinate, and conduct a Devolution exercise, as well as, Eagle Horizon 2010 national continuity exercise. Conduct Federal Department and Agency External Assessments of those who participate in Eagle Horizon 2010. This effort is projected to include as many as 62 D/As and over 10,000 participants.
  - Develop virtual or independent study courses for our Devolution, Building Design for Homeland Security, and Planners Workshop courses. By conducting these virtual courses, a greater number of Federal and Non-Federal employees will be provided access to our continuity-based training materials.
  - Finalize Operation Rendezvous (OPRON) CONOPS, which describes the relocation and near real-time geospatial tracking of FEMA officials from the National Capital Region (NCR) to emergency location sites in the event of a disaster. Conduct a series of proof-of-concept studies and exercises of OPRON to examine the effectiveness in communications, coordination, asset tracking functions, and other processes and procedures outlined in the CONOPS. Identify risks and develop mitigation strategies.
- **FY 2011 Planned Accomplishments:**
  - Develop, coordinate, and conduct Eagle Horizon 11 interagency continuity exercise. Conduct Department and Agency Internal Continuity Assessments and FEMA Regional Continuity Assessments based on Continuity objectives included in the exercise.
  - Conduct continuity training outreach to Federal, State, territorial, Tribal, and local government jurisdictions and the private sector by delivering more than 130 Continuity resident and independent study courses to more than 24,000 continuity professionals across the country. (FEMA's March 2011 Continuity of Operations Strategic Planning Conference for States, Territories, and the District of Columbia. This third annual conference is planned for Miami, Florida.)

- Develop virtual or independent study courses all of our continuity-based courses. By continuing to increase the number of virtual courses offered, a greater number of Federal and Non-Federal employees will be provided access to our continuity-based training materials.
  - In conjunction with NCP COOP Division, institute recurring Operations-driven exercises (e.g., OPRON, reconstitution) to evaluate the effectiveness of existing plans to support the various Elements of a Viable Continuity Capability as defined in NSPD-51/HSPD-20.
- **Contingency Programs**  
NCP operates and maintains contingency communications and applications designed to assist the Federal Executive Branch departments and agencies' in providing the status of their ability to perform their Priority Mission Essential Functions (PMEFs) in support of the National Essential Functions (NEFs). These resources (RRS, CLS, DACN) are used to conduct assessments and track/test capabilities at all times under all conditions, including natural disasters, man-made incidents, terrorism, and war. These resources will also ensure senior leadership within the Federal Executive Branch (FEB) communicate appropriate situational awareness of all FEB departments and agencies and their ability to perform essential functions.
- **FY 2009 Accomplishments:**
    - Integrated, exercised, and validated the status of the long haul National continuity communication systems during a joint National Level Exercise (NLE) and Department of Defense Interoperability Communications Exercise (DICE).
    - Initiated an upgrade program with the installation of approximately 21 percent of the long range continuity High Frequency (HF) radios systems with FEMA regions, State EOCs and MERS Detachments.
    - Completed the design and testing of the Readiness Reporting System for deployment in early 2010.
  - **FY 2010 Planned Accomplishments:**
    - Perform the installation of an additional 26 percent of the High Frequency (HF) radios systems with FEMA regions, State EOCs, and MERS Detachments.
    - Deploy the Readiness Reporting System to provide state of the art reporting and assessment of the FEB's departments and agencies ability to perform their essential functions.
    - Develop the baseline system for the Internet Protocol Locator system providing significant enhancements through the utilization of updated technology.
  - **FY 2011 Planned Accomplishments:**

- Perform the installation of an additional 26 percent of the High Frequency (HF) radios systems which should finish the update program in 2012.
  - Complete the development, testing, and fielding of the Internet Protocol Locator system and retire the legacy system.
  - Develop an enhanced web based version of the RRS with increased functionality in operational assessment and reporting.
- **Integrated Public Alert & Warning (IPAWS) Emergency Alert and Communication Functions**  
 The IPAWS mission is to execute Executive Order 13407, issued on June 2006, which calls for “an effective, reliable, integrated, flexible, and comprehensive system to alert and warn the American people in situations of war, terrorist attack, natural disaster, or other hazards to public safety and well being.” IPAWS is America’s next-generation infrastructure of alert and warning networks expanding upon the traditional audio-only radio and television Emergency Alert System. IPAWS will provide one message over more media to more people before, during, and after a disaster and will ensure that under all conditions the President of the United States can alert and warn the American people. IPAWS will provide integrated services and capabilities to Federal, State and local authorities and enable them to alert and warn their respective communities via multiple communications methods. IPAWS will broaden the percentage of the United States population with resilient emergency alert coverage.
- **FY 2009 Accomplishments:**
    - Formalized Common Alerting Protocol (CAP) v1.2 IPAWS Profile through the Organization for the Advancement of Structured Information Standards and initiated development of the CAP to Emergency Alert System Implementation Guide.
    - Established Conformity Assessment Program to evaluate vendor equipment compliance to CAP v1.2 protocol and the CAP IPAWS profile.
    - Jointly established, with the Alliance for Telecommunications Industry Solutions and Telecommunications Alliance the Commercial Mobile Alerting System interface specifications.
  - **FY 2010 Planned Accomplishments:**
    - Officially adopt the Common Alerting Protocol (CAP).
    - Begin development of the IPAWS Aggregator and Gateway to disseminate alert and warning messages.
    - Commence construction of new Primary Entry Point expansion stations.
  - **FY 2011 Planned Accomplishments:**
    - Deploy initial operational capability of IPAWS Aggregator and Gateway supporting Commercial Mobile Alerting System federal alert testing with cellular industry.

- Complete construction of Primary Entry Point expansion stations facilitating direct alert and warning coverage to 90 percent of the United States population.
  - Incorporate exercise of the National Emergency Alert System into the National Exercise Program
- **Mount Weather Emergency Operations Center (MWEOC)**  
The MWEOC facility, located in Mount Weather, VA, provides the infrastructure to support COOP, Incident Management, and all hazards activities for multiple Executive Branch Departments and agencies, to include the DHS/FEMA HQ COOP site. In addition, it provides operational space for FEMA Emergency Relocation Group (ERG) members to perform their essential functions. ERG members serve as the FEMA HQ emergency personnel that are responsible for performing the Agency's mission essential function.
- **FY 2009 Accomplishments:**
    - Awarded the Social Security Administration COOP Building design/construct contract.
    - Began Area A power plant, mechanical infrastructure, and several other classified projects.
    - Designed Health Unit.
  - **FY 2010 Planned Accomplishments:**
    - Complete Area A power plant, health unit, decontamination station, and mechanical infrastructure projects.
    - Begin design and construction of Multipurpose Building, Emergency Services Building, and Logistics Center.
    - Design Maintenance Building.
  - **FY 2011 Planned Accomplishments:**
    - Complete SSA COOP Building, Emergency Services Building, and Logistics Center
    - Complete bullet trap at shooting range.
    - Construct Maintenance Building
- **The MWEOC facility**  
Resources include Salaries & benefits, corporate accounts and management oversight activities.

## **G) Administrator**

- **Office of the Administrator**  
The Administrator has the ultimate responsibility for providing the leadership and direction that enables FEMA to accomplish its mission, to support our citizens, and first responders to ensure that as a nation we work together to build, sustain,

and improve our capability to prepare for, protect against, respond to, recover from, and mitigate all hazards. The office includes

**Office of the Administrator Programs FY 2011 Funding Summary**

(\$ in 000s)

	<u>Activity</u>	<u>Program</u>	<u>S &amp; B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
Faith-Based and Community Initiatives		868	659	1,527	5	5
Law Enforcement Advisor		150	463	613	3	3
Office of the Executive Secretariat		979	478	1,457	4	4
	M & A	<u>737</u>	<u>3,024</u>	<u>3,761</u>	<u>21</u>	<u>20</u>
<b>Administrator's Programs</b>		<b>2,734</b>	<b>4,624</b>	<b>7,358</b>	<b>33</b>	<b>32</b>

- **DHS Center for Faith-Based and Community Initiatives (Center)**  
 Established by Executive Order in March 2006. It is one of 12 such centers across the federal family, each relating to the White House Office of Faith Based and Neighborhood Partnerships. While the Center is located in FEMA, it works across the department’s components and with other Federal partners to foster and empower effective partnerships with faith-based and community organizations. In coordination with FEMA leadership and its relevant directorates, the Center communicates with its stakeholders about FEMA’s programs, essential functions, and activities. The Center provides staffing support to the NRCC, and through ongoing strategic communications, it ensures that faith-based and voluntary organizations can operate efficiently and effectively during a disaster. Through special studies and projects, the Center identifies areas where faith-based and community organizations who serve vulnerable populations can be strengthened so that they can provide more effective and coordinated activities in preparation, response, recovery, and mitigation of all hazards.
- **FY 2009 Accomplishments:**
  - The Center facilitated the inclusion of the Mid America Islamic Council into the Missouri Governor’s Faith-Based and Community Service Partnership for Disaster Recovery initiative.
  - The Center sponsored, with the HHS faith-based center, a region-wide one-day preparedness workshop in San Francisco that was attended by 120 people. The Center promoted the use of faith-based voluntary organizations to rebuild towns and native villages in Alaska devastated by the Yukon River spring floods and ice jam disaster, saving tax payers millions of dollars and contributing to long-term community recovery.
  - The Center initiated the involvement of 35 State and local government liaisons with the White House Office of Faith-Based and Neighborhood Partnerships via a one-day symposium in Washington, D.C.

- The Center reached and educated more than 3,000 faith-based and community groups on H1N1 preventative practices through distribution of electronic and hard copies of the HHS *H1N1 Guide for Community and Faith-Based Groups*; issue-specific conference calls with HHS/CDC; speaking engagements; and periodic email communications.
- **FY 2010 Planned Accomplishments:**
  - In FY 2010, the Center will have developed relationships with State Voluntary Organizations Active in Disasters (VOADs) in all 10 FEMA regions. This will include: developing a plan, in partnership government, faith-based, community, and private sectors to strengthen State VOADs; complete Phase I and begin Phase II of its “Building Resiliency with Diverse Communities” project in Miami-Dade County; conduct two regional preparedness workshops for faith-based and community organizations; and participate in the development of the Long Term Disaster Recovery Report to the President and the Long Term Disaster Recovery Framework.
- **Law Enforcement Advisor**  
Enhances communication and coordination between FEMA and State, local, and Tribal law enforcement. The Law Enforcement Advisor is an integral part of FEMA’s senior leadership team – participating in planning meetings and consequence management during a crisis.
- **Office of the Executive Secretariat (OES)**  
Serves as the primary point of contact for FEMA’s Office of the Administrator for coordinating departmental tasking, briefing material, and official correspondence. The OES is the central coordination point within FEMA responsible for ensuring proper and expeditious action on all tasks and correspondence addressed to and from FEMA.
- **Other Activities**  
Provide Agency oversight and management including communication with elected officials and citizens. The National Advisory Council (NAC) advises the Administrator of the Federal Emergency Management Agency (FEMA) on all aspects of emergency management. The National Advisory Council incorporates State, local, Tribal, and private sector input in the development and revision of a number of FEMA programs and documents, including the National Incident Management System (NIMS), the National Response Framework (NRF) and other related plans and strategies. To assist in developing this advice to the Administrator, the NAC forms subcommittees to review issue areas. Currently there are seven NAC Subcommittees: NIMS, NRF, Post-Disaster Housing, Stafford Act, Special Needs, Public/Private Partnerships, and Target Capabilities List.

- **FY 2009 Accomplishments:**

- In FY 2009, the NAC held three meetings in Dallas, Texas; Washington, DC; and Grand Forks, North Dakota that helped the NAC make 44 recommendations during FY 2009.
- Of the 26 of recommendations finalized, FEMA has accepted all and is currently working to implement 11 recommendations in the near future. The topics of these recommendations includes: Stafford Act Public Assistance and Individual Assistance regulatory and policy issues, NRF, Public/Private Partnership, Urban Search and Rescue, enhancing support to Special Needs populations, Post-Disaster Housing, and NIMS.

- **FY 2010 Planned Accomplishments:**

- In FY 2010, the NAC will hold their first meeting after the start of the new calendar year (January or February 2010). In the interim, the NAC Subcommittees will continue to meet and follow up on issues previously identified. FEMA anticipates several issues will evolve in new recommendations at the NAC's first meeting in FY 2010. The number of council recommendations has increased each year since its establishment.

- **FY 2011 Planned Accomplishments:**

- NAC will continue to meet and address issues identified in PL 109-295 and by FEMA's Administrator.

- **Office of External Affairs**

The Office of External Affairs provides leadership, message coordination, internal communication, analyses, outreach/relationship building, external affairs training and decision-making support on Agency policies, plans, programs, key initiatives, and actions that affect stakeholders and the American public. The OEA provides operational services to FEMA's mission for Intergovernmental Affairs, International Affairs, Legislative Affairs, Private Sector Initiatives, and Public Affairs.

## Office of External Affairs Programs FY 2011 Funding Summary

(\$ in 000s)

<u>Activity</u>	<u>Program</u>	<u>S &amp; B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
Intergovernmental Affairs	45	1,520	1,565	13	12
International Affairs	630	583	1,213	4	4
Public Affairs	2,500	4,923	7,423	38	35
Legislative Affairs	370	2,279	2,649	17	16
Private Sector Initiatives	220	901	1,121	7	7
Ready Campaign	2,093	377	2,470	3	3
Management and Other Activities	<u>1,308</u> <span style="color: green;">■</span>	<u>2,284</u> <span style="color: green;">■</span>	<u>3,592</u>	<u>17</u> <span style="color: green;">■</span>	<u>15</u>
<b>Subtotal</b>	<b>7,166</b>	<b>12,867</b>	<b>20,033</b>	<b>99</b>	<b>92</b>

- **Intergovernmental Affairs**

Serves as FEMA’s primary national-level liaison for Tribal, State, and local officials and the associations that represent their interests. The division supports senior FEMA leadership by coordinating meetings and communication with intergovernmental partners and facilitates partner participation in the FEMA policy development process.

- **International Affairs**

Supports information exchanges (technical assistance and other subject matter expertise) with: foreign emergency management agencies and multilateral organizations; offers and receives best practices and solutions following international disasters; implements the agency’s international agreements; manages FEMA’s involvement in the civil side of the North Atlantic Treaty Organization (NATO); supports the resolution of international issues during domestic disasters; facilitates participation in international training and exercises; and supports the U.S. Department of Homeland Security (DHS) in international policy work related to emergency management.

- **Public Affairs**

Coordinates FEMA’s public message and serves as the primary point of contact with the media and the American public to communicate FEMA’s actions, activities, responsibilities, policies, and initiatives. Public Affairs coordinates with all FEMA offices to: disseminate information; track and manage all contacts with the media; maintain FEMA’s public communications, such as press releases and the FEMA Web page; and educate FEMA employees through internal communications and meetings.

- **Legislative Affairs**

Serves as FEMA’s primary liaison to congressional committees, members of Congress, and their staff. The division responds to congressional committee oversight and other inquiries from individual members and their congressional staff; notifies Congress about agency initiatives, policies, and programs;

coordinates the development of congressional testimony and briefings for FEMA senior officials; and develops and implements strategies to advance the FEMA's legislative initiatives and other interests relating to Congress.

- **Private Sector Initiatives**

FEMA's primary liaison to the corporations, trade associations, academia, and other non-governmental organizations that make up the nation's private sector. During all phases of disaster management, the division works to enhance a culture of preparedness by building a private sector network and assisting the development of functional relationships between FEMA and representatives of major private sector organizations. The division advises senior leadership on emergency management issues that are topmost within the private sector. It also supports the identification of private sector ideas and practices that FEMA programs can use to improve agency processes to deliver better service to customers.

- **Ready Campaign**

A national public service advertising campaign designed to educate and empower Americans to prepare for and respond to emergencies including natural disasters and potential terrorist attacks. Launched in 2003, the goal of the campaign is to get the public involved and ultimately to increase the level of basic preparedness across the Nation. The campaign works closely with the Citizen Corps program, which is the local-level effort to increase the preparedness of the American public and businesses.

- **Management and Other Activities**

Administers External Affairs' business operations, Disaster Operations, and Cadre Management (DO) to include salaries & benefits, staff development, corporate accounts and management oversight activities. DO provides leadership, training, coordination, and support of FEMA's External Affairs function during incidents requiring a Federal response to fully execute all functional responsibilities necessary to lead public disaster communications in a unified manner. DO also supports External Affairs' cadre management to include recruiting and training, as well as provides staffing support and communications coordination during disaster operations.

- **FY 2009 Accomplishments:**

- Broadened outreach to traditionally underserved communities by holding 4 constituency leader conference calls with over 542 participants total. The subject of the calls ranged from an introduction of Administrator Fugate and his vision for FEMA to specific information on declared disasters and how to access federal assistance.

- Implemented and executed a five year US-Mexico Work Strategy and a US-Canada Work Strategy that builds capacity for emergency preparedness and response.
  - Organized a Social Media conference to build relationships and share best practices to improve emergency information operations. This conference established FEMA as a federal leader in social media, information sharing best practices, exchanging subject matter contact information, and developing new social mediums among the Federal government partners, to include but not limited to YouTube, Facebook, Flick'R, MySpace, Twitter and Blogs.
  - As part of the Ready Campaign, FEMA expanded web capabilities by creating two new online tools: (1) an interactive widget that provides users with updates on emergency situations, local emergency contact information, an instructional video, emergency kit checklists, and guidelines on how to better prepare for an emergency; (2) the Ready Classroom through a partnership with Discovery Education that provides elementary and middle school teachers with resources to integrate natural disaster preparedness information into their curriculum.
- **FY 2010 Planned Accomplishments:**
    - Host meetings and listening sessions with National groups whose constituencies are often-times adversely affected by disaster. FEMA will Host FEMA 101 Summit with the Black Leadership Forum, scheduled for winter 2010. Engage Tribal Nations by holding listening sessions to better understand the issues that face tribes during disasters. These sessions will then aid to revise FEMA's Tribal policy to comply with the Presidential Memorandum on Tribal Consultation (IGA has the Agency's only Tribal liaison at headquarters).
    - Migrate all FEMA Web sites to a single content management system to improve usability of the FEMA website, and develop disaster-specific sections to better serve disaster survivors and impacted communities.
    - Sponsor National Preparedness Month (NPM) and get schools, businesses and communities involved in promoting emergency preparedness in order to better prepare their stakeholders. The Ready Campaign will actively promote the September awareness month through its web site, listserv, Twitter account, FEMA Facebook page, and various internal offices. The Campaign will also create a toolkit that includes tools, resources, and templates to assist organizations in promoting emergency preparedness. Finally, the Campaign promotes emergency preparedness during NPM through events and media opportunities.

- **FY 2011 Planned Accomplishments:**

- Conduct a cross border knowledge exchange with Canada to promote mutual aid and emergency preparedness efforts along the U.S./Canada border (October 2010)
- Redesign web intranet pages to create a two-way dialogue with employees, soliciting ideas, and feedback in a user-friendly forum.
- As part of the Ready Campaign, develop PSAs targeted for small and medium sized businesses.

- **Disability Coordinator**

The Disability Coordinator provides guidance and leadership to the Agency, Federal partners, and States on integrating the access and functional needs of children and adults with disabilities. This includes all efforts associated with preparing for, protecting against, responding to, recovering from and mitigating all hazards. Access and functional needs include physical, communications and programmatic access and assistance to maintain independence and preserve health and safety.

**Disability Coordinator Programs FY 2011 Funding Summary**

(\$ in 000s)

<u>Activity</u>	<u>Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>FTP</u>	<u>FTE</u>
Disability Coordinator	150	0	150	0	0

Guidance and leadership is provided via two way communication utilizing email to a distribution list of over 300 constituency leaders in all 50 States and territories as well as meetings with partners and stakeholders to discuss information to improve integration of planning response and recovery for children and adults with disabilities.

- **FY 2009 Accomplishments:**

- Developed a national database of over 300 disability issue stakeholders and constituent group leaders to improve communication and increase successful integration of the preparedness, response and recovery needs of children /adults with disabilities in every community.
- In September 2009, constituent leaders, States, and Federal partners drafted Guidance to States on Providing Functional Need Supports and Services to States for General Population Shelters to assist States in complying with their obligations under the Americans with Disabilities Act, Rehabilitation Act, Fair Housing Act, Stafford Act, and other applicable laws. This document will guide States and local governments as they develop emergency plans to meet the needs of all of their citizens.
- In an effort to support FEMA's 10 Regional Offices, conducted monthly teleconferences with regional disability points of contact to identify

requirements for the availability and distribution of durable medical equipment including mobility, sensory, communications, pediatric, service animal, and other equipment which supports the access and functional needs of children and adults with disabilities

- **FY 2010 Planned Accomplishments:**

- Establish Disability Advisory Working Group for monthly discussions of disability issues via teleconference. Additionally, establish an annual face-to-face meeting to provide a forum for stakeholders on disability issues to identify priorities and gaps in meeting the access and functional needs of children/adults with disabilities and the communities they live in. This forum is also used to create solutions that are driven by the needs of those individuals and their communities.
- Establish a Training Working Group which will meet via teleconference to identify priorities for the development of training for FEMA and non-FEMA emergency managers, first responders, and others on integrating the access and functional needs of children and adults with disabilities wherever appropriate.
- Revise and distribute guidance to States on integrating the access and functional needs of children and adults with disabilities into community preparedness guidance. Additionally, complete functional needs sheltering guidance for States.

- **FY 2011 Planned Accomplishments:**

- Work with Disability Advisory Working Group to identify strategies to expand outreach and communication with stakeholders to increase individual and community preparedness, response and recovery outcomes.
- Work with Agency leads on developing and prioritizing training and guidance to integrate the access and functional needs of children and adults with disabilities across all agency functions.
- Provide training on community preparedness and functional needs sheltering utilizing guidance developed and distributed to States, local communities and other stakeholders.

- **Office of Regional Operations**

Serves as the Agency's office through which all policy, managerial, resource, and administrative actions that affect or impact the Regions receive effective coordination between Headquarters and the Regional offices. The Office of Regional Operations (ORO) also ensures that FEMA policies, programs, administrative, and management guidance are implemented in the regions in a manner consistent with the Agency's overall goals

## Office of Regional Operations FY 2011 Funding Summary

(\$ in 000s)

	<u>Activity</u>	<u>Program</u>	<u>S &amp; B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>

	<b>Subtotal</b>	<b>9,085</b>	<b>10,022</b>	<b>19,107</b>	<b>74</b>	<b>68</b>

- **FY 2009 Accomplishments:**

- Enhanced Senior Leadership communication between FEMA Headquarters and the 10 Regional Offices.
- Expanded FEMA's capability to work with State partners on operational planning capabilities.
- Initiated and supported professional development focused on senior staff within each Regional Office.

- **FY 2010 Planned Accomplishments:**

- Serve as the centralized source of information needed by Headquarters and Regional partners regarding the organization, staffing, personnel, facilities, priorities, and activities of the Regional Offices.
- Support the Regional Offices in budget-program integration through development and administration of regional budgets and regional performance measures.
- Establish a process to ensure the Regional Offices have visibility of and an equal opportunity to participate early in the development and review of draft policies, programs, administrative, and management guidance for the Agency.

- **FY 2011 Planned Accomplishments:**

- Expand ORO’s ability to serve as the centralized source of information needed by Headquarters and Regional partners regarding the organization, staffing, personnel, facilities, priorities, and activities of the Regional Offices.
- Establish a centralized means for any FEMA employee to view online the current delegation of authority memos and signature authority forms for all ten Regions.
- Support Regional forums for interagency and intergovernmental coordination, information sharing, and planning.

- **Office of Policy and Program Analysis (OPPA)**

OPPA provides leadership, analysis, coordination, and decision-making support on Agency policies, plans, programs, and key initiatives. Additionally, the Office of Policy and Program Analysis (OPPA) supports and strengthens overall Agency performance by providing objective planning and analysis that ensures FEMA policies and programs are continuously improved and integrated to effectively meet current and future challenges.

**Office of Policy and Program Analysis Programs FY 2011 Funding Summary**

(\$ in 000s)

	<u>Activity</u>	<u>Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>FTP</u>	<u>FTE</u>
OPPA Programs		5,144	4,046	9,190	27	25

- **Policy**

The mission of the Policy Division is to lead and coordinate development of policies that support effective and efficient delivery of Agency programs across the full spectrum of preparedness and emergency management, and represent agency interests in departmental, national, and international policy making. Key functions include:

- Support Agency leadership in the identification, development, and implementation of the Agency's policy priorities including leading major policy efforts such as development of national strategies, frameworks, or doctrine as directed.
- Develop, oversee, and coordinate the Agency policy process.
- Represent the Agency on Department of Homeland Security (DHS)-level policy matters.
- Chair the FEMA Policy Working Group involving representatives from all FEMA Offices and Directorates used to coordinate policy development.
- Coordinate, track, and analyze Agency responses to GAO and OIG reports and recommendations.

- Provide policy oversight and input for Agency testimony/responses to legislative report requirements, questions, and correspondence.

- **Program Analysis & Evaluation**

The mission of the Program Analysis & Evaluation Division is to give the agency an independent analysis and evaluation capability that enhances decision making, program performance transparency, and accountability. Key functions include:

- Analyze and evaluate resource requests to identify programmatic alternatives and priorities for resource allocation consistent with strategic and long-range planning goals and objectives.
- Work with FEMA programs to ensure their budget planning submissions to the Chief Financial Officer (CFO) reflect FEMA's budget planning guidance.
- Support the CFO's presentation and defense of budgetary and programmatic estimates to DHS, the Office of Management and Budget (OMB), and Congress by ensuring they are linked to quantifiable performance measures.
- Conduct analyses as required by the Administrator to evaluate program initiatives and provide recommendations regarding the efficacy of initiatives.
- Coordinate activities among FEMA programs and DHS Program Analysis and Evaluation Division to develop information related to OMB programmatic reviews and management initiatives, e.g., OMB's Program Assessment Rating Tool (PART) and the President's Management Agenda.
- Track performance against annual and strategic objectives.
- Conduct economic impact analyses of FEMA regulations.
- Provides the agency's leadership with objective, comprehensive analyses of current and proposed FEMA programs and provides recommendations concerning program operations and alignment of objectives and resources with strategic priorities.

- **Strategic Planning**

The mission of the Strategic Planning & Analysis Division is to help the agency make innovative and informed decisions about FEMA's long-term direction, and to facilitate integrated strategic planning, analysis, and decision-making. Key functions include:

- Establish and maintain a strategic risk assessment framework to inform Agency planning and programming and ensure linkage to the DHS-level framework.
- Lead development of the Agency's strategic plan and annual planning guidance and ensure alignment with DHS' strategic plans and priorities.
- Provide assistance to Directorates and Offices within FEMA for the development and implementation of program-level strategic plans that support the Agency's strategic direction.

- **Defense Production Act Program**

The mission of the Defense Production Act (DPA) Program Division of the Office of Policy and Program Analysis is to provide guidance and support to DHS and other Federal agencies to develop plans and programs to expedite and expand the supply of critical resources from the private sector for homeland security, emergency preparedness, response, recovery and mitigation activities and critical infrastructure protection and restoration. The DPA Program is responsible for implementing FEMA's DPA responsibilities, which include:

- Advising the National and Homeland Security Councils on issues of National security resource preparedness and on the use of DPA authorities.
- Providing for the central coordination of DPA plans and programs by Federal departments and agencies.
- Providing DPA guidance and procedures under the DPA for Federal departments and agencies
- Establishing procedures to resolve conflicts and issues that may arise in implementing DPA authorities and functions.
- Reporting periodically to the President concerning DPA program activities.

- **FY 2009 Accomplishments:**

- Coordinated full implementation of the restructuring of FEMA including allocating staff resources in FEMA Headquarters and the Regions.
- Launched a comprehensive analysis of the Grant Programs Directorate to determine the funding level the Directorate requires to operate. Have received initial report – will expand analysis.
- Completed a comprehensive review of Disaster Operations Directorate's Mobile Emergency Response Support (MERS) Program/Detachments to help ensure that service delivery of the MERS Detachments is provided to relevant emergency management personnel effectively and efficiently during times of National disasters. This review has enabled FEMA to better understand the MERS programs strengths and weaknesses which in turn will help FEMA in capitalizing on the strengths and mitigating the weaknesses.

- **FY 2010 Planned Accomplishments:**

- Update the FY 2008-2013 Strategic Plan to address administration priorities and continue to instill strategic thinking throughout FEMA.
- Launch new "Policies Portal" on the FEMA website to increase visibility of FEMA policies and make it easy for stakeholders to access FEMA policies.

- Formalize the Risk Management Group to: develop a common approach for addressing risk management with a focus on natural hazards; establish a FEMA doctrine, strategy, and governance structure for managing risk; and link the risk strategy to the FEMA Strategic Plan goals and objectives, as well as understand impacts of their recommendations on the budget process.
- Expand analysis that produces economic analysis of proposed new/ revised public and individual assistance rules and regulations that will allow FEMA to support disaster and emergency victims effectively.

- **FY 2011 Planned Accomplishments:**

- Monitor implementation of FEMA Strategic Plan and priorities within the component strategic plans, and update the Plan as necessary to ensure a clear strategic direction for resource allocation and decision making.
- Continue to support development of voluntary agreements by FEMA and other DHS components to facilitate private sector involvement in emergency preparedness planning and response activities and critical infrastructure protection and restoration.

- **Office of Equal Rights**

The Office of Equal Rights (OER) serves the Agency and the Nation by promoting affirmative employment, and a discrimination-free workplace, and equal access to FEMA programs and benefits. OER encompasses the following activities and elements:

**Office of Equal Rights Programs FY 2011 Funding Summary**

(\$ in 000s)

	<u>Activity</u>	<u>Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>FTP</u>	<u>FTE</u>
Equal Rights Programs	699	2,656	3,355	26	24	

- **Federally Assisted and Federally Conducted Programs and Investigations**

Entitles any person eligible to receive disaster aid or other services from FEMA receives those benefits without discrimination. The Civil Rights Program provides Technical Assistance and Complaints Resolution services. Technical assistance is provided through policy guidance to the agency in meeting Civil Rights mandates. In disaster operations, the staff works closely with community organizations to resolve tensions and eliminate potential complaints. The office also provides assistance to FEMA and the national emergency management community in the effort to make publications, programs, and facilities accessible to people with disabilities. Complaints resolution is provided for anyone who believes they have been discriminated against in receiving services or benefits from FEMA.

- **Equal Employment Opportunity (EEO) Program**

The EEO Program enforces all Federal discrimination laws that cover all FEMA personnel, including DAEs and applicants for employment. Through the EEO program, OER provides a variety of services: including equal rights training for managers, supervisors, and employees; developing and maintaining an informal and formal EEO discrimination complaint process; investigating formal complaints of discrimination, increasing resolution of complaints through Alternative Dispute Resolution (ADR); and proactively recruiting employees and Special Emphasis programs.

- **Executive Oversight**

Resources include Salaries & benefits, corporate accounts and management oversight activities.

- **FY 2009 Accomplishments:**

- Launched an independent study course for managers/supervisors that included disability awareness training with a focus on reasonable accommodations.
- Initiated manager/supervisor two day EEO course covering reasonable accommodations and management responsibility regarding harassment and retaliation training, across the Agency.
- Maintained capabilities and skills of all EEO investigators, EEO counselors, and Equal Rights Officers through required annual training that provided the trainee with the most current developments in EEO practice, law, and guidance, as well as enhanced and developed counseling skills.

- **FY 2010 Planned Accomplishments:**

- Expand the scope of the independent study training to include Title Six (external civil rights) awareness to managers/supervisors and employees. Further enhance training offered on diversity and harassment.
- Develop a one-day training class for supervisors in a field setting that focuses on supervisory accountability and integrity, managing a temporary workforce, resolving conduct and performance issues, and managing personnel during demobilization..
- Develop a plan of action and conduct compliance reviews focusing on a specific disaster from a previous year to assess implementation of policy and procedures in a non-discriminatory manner in the IA Program.

- **FY 2011 Planned Accomplishments:**

- Enhance audit plans and conduct compliance reviews focusing on a specific disaster from a previous year to assess and strengthen policy and procedures that focuses on an element of agency programs.
- Implement newly developed Title Six, diversity and harassment training to supervisors and employees.

- **Office of Chief Counsel**

The Office of Chief Counsel (OCC) provides professional legal services to the Administrator, FEMA senior leadership, and the DHS General Counsel on all legal and policy matters before the Agency and its organizational elements to support and facilitate the mission and reduce obstacles to the achievement of DHS and FEMA goals. OCC provides legal assistance to the Agency’s diverse mission elements including: services related to acquisition, grants, and property management; budgetary and fiscal law; ethics, anti-fraud and contractor integrity; human capital management, labor relations, and equal opportunity; information, intellectual property and privacy matters; legislation and regulations and policy coordination; and litigation and claims. FY 2009 litigation and claims activity included, but was not limited to: 24 GAO protests; 6 Contract Disputes Act appeals before the Civilian Agency Board of Contract Appeals and 4 appeals before the U.S. Court of Federal Claims; 19 claims filed with the Merit System Protection Board; 23 unemployment compensation cases in various States; 1,271 general tort claims under the Federal Tort Claims Act (FTCA) and over 60,000 formaldehyde-related administrative tort claims; and over 917 cases in Federal courts involving Equal Employment Opportunity (EEO), the National Flood Insurance Program, FTCA, Stafford Act, contract, Endangered Species Act, historic preservation, Freedom of Information Act, and fraud). OCC provides legal assistance to Joint Field Offices through its Disaster Field Attorney Cadre, to Gulf Coast transitional recovery offices through CORE attorneys, and to FEMA regional offices with staff in Washington, DC. FEMA’s Alternative Dispute Resolution program is also a part of the OCC.

**Office of Chief Counsel Programs FY 2011 Funding Summary**

(\$ in 000s)

<u>Activity</u>	<u>Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
Counsel Programs	547	9,070	9,617	60	56

- **FY 2009 Accomplishments:**

- Established an electronic shared workspace (ESW) to support OCC operations. This web-based application will be used to provide cross-division/office coordination and access to work product and research applications, including work among the field and regional counsel

offices, in furtherance of strengthening FEMA's internal business support systems.

- OCC staff completed over 6,100 hours of training or more than 82 hours per capita representing a 35 percent increase from FY 2008 in furtherance of building out FEMA's core competencies and professional development of the FEMA workforce.

- **FY 2010 Planned Accomplishments:**

- OCC continues implementation of ESW through the creation of data management systems for litigation, tort claims, and all OCC correspondence/matters. The development of these new systems will allow increased visibility by staff and management of OCC work product and avoid duplication, ensure consistency and timely delivery of legal advice.
- Increase permanent full-time staff from 47 positions to 51 positions, an increase of 8 percent, in furtherance of building out FEMA's core competencies and establishing an adequate workforce baseline.

- **FY 2011 Planned Accomplishments:**

- OCC continues implementation of ESW through the creation of data management systems for litigation, tort claims, and all OCC correspondence/matters. The development of these new systems will allow increased visibility by staff and management of OCC work product and avoid duplication, ensure consistency and timely delivery of legal advice.

**H) Office of Mission Support:**

- **Office of Associate Administrator**

The Office of Associate Administrator provides operational services and leadership oversight to FEMA’s mission.

**Office of Associate Administrator Programs FY 2011 Funding Summary**

(\$ in 000s)

<u>Activity</u>	<u>Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
Executive Offices	5,266	6,347	11,613	48	45
<b>Subtotal</b>	<b>5,266</b>	<b>6,347</b>	<b>11,613</b>	<b>48</b>	<b>45</b>

- **Office of the Chief Financial Officer**

The Office of the Chief Financial Officer supports the FEMA mission by providing financial management information, fiscal services, and financial policy support to FEMA’s management and oversight organizations. The OCFO is comprised of two line operating divisions: the Budget Planning and Analysis Division and the Financial Management Division. The operating divisions are supported by five staff functions: Risk Management and Compliance; Financial Policy; Appropriations Liaison; Financial Systems and Management Reporting; and Business Operations. The OCFO also has oversight of FEMA payments to the DHS Working Capital Fund and Permanent Change of Station (PCS) moves.

**Chief Financial Officer Programs FY 2011 Funding Summary**

(\$ in 000s)

<u>Activity</u>	<u>Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
Financial Programs	32,194	24,988	57,182	223	206
Centrally Managed/Working Capital	39,013	0	39,013	0	0
<b>Subtotal</b>	<b>71,207</b>	<b>24,988</b>	<b>96,195</b>	<b>223</b>	<b>206</b>

- **Financial Management**

This Division performs all accounting services for 115 FEMA Appropriations. It reconciles accounts and ensures accuracy of trial balances for the preparation of financial statements and accompanying footnotes. It also manages debt collection activities. Division personnel perform the invoice approval and payment processes for all mission assignments, reimbursable activities, and other intergovernmental payments. They ensure timely and accurate recording of grant obligations and process final closeouts in the financial system, as well as coordinating with internal and external entities to

ensure compliance with DHS/FEMA policies, legislation and directives related to financial controls.

- **Budget Planning, Analysis, and Appropriations Liaison**

This Division performs an ongoing role in the planning, formulation, justification, analysis, and execution of FEMA's operating, mitigation and disaster budgets. Budget has the primary responsibility for making recommendations to the Administrator and presenting FEMA's budget proposal to the Department, OMB, and Congress. After budgets are approved by the Congress and signed into law by the President, Budget monitors the Agency's execution activities for conformance with executive and legislative intent. It provides assistance to the House and Senate Appropriations Committees in fostering visibility and understanding of FEMA's budget request for future year funding and budget execution as well as program management and oversight of current year and prior year funding.

- **Financial Systems and Reporting Division**

Provides technical support to implement and maintain the OCFO financial management systems/interfaces. The staff also furnishes accurate, relevant, and timely financial information to clients across the Agency, the Department, and Congress.

- **Financial Policy Unit**

Financial Policy develops agency-wide policies, procedures and standards for all financial areas and promulgates these and related government-wide financial management requirements throughout the Agency.

- **Risk Management and Compliance Unit**

This Division is responsible for developing and implementing the Agency's Internal Controls program as defined by OMB Circular A-123. The Staff manages the Agency's Audits and liaisons across the Agency through the Internal Controls Board.

- **Administration Unit**

This function supports the day-to-day operations of the OCFO through coordination and execution of strategic planning, knowledge management, human capital management, Continuity of Operations (COOP) activities, leadership and staff development, procurement, and management of the OCFO operational budget.

- **FY 2009 Accomplishments:**

- Led the FEMA effort to establish an Internal Controls Board and to remediate known material weaknesses identified in the FY 2008 financial statements audit, reducing from four material weaknesses to two, and resulting in receiving the DHS Chief Financial Officer's

Award for Excellence to recognize FEMA as the DHS Agency achieving the most improvement in remediation of audit issues.

- Improved the manpower management process by strengthening management controls for hiring actions in the Agency. Led an Agency-wide data reconciliation effort to establish an accurate database of all positions within FEMA, which provided the basis for directorate level staffing plans that are now linked to funding.
- Streamlined processes and procedures for OCFO approval of personnel actions (SF-52s) resulting in reduction in the time to process the actions from more than 12 days to less than three days.
- Published 17 financial management policy directives and standard operating procedures to improve efficiency and controls of the OCFO

- **FY 2010 Planned Accomplishments:**

- Broaden implementation of the RM Online automated budget tool across program offices and regions to assist in the interpretation and application of program/organizational requirements in the formulation and execution of the budget process.
- Complete the merger of the two instances of the FEMA financial system (IFMIS) to improve the quality of financial information and strengthen internal controls.
- Complete the implementation of the first phase of the new FedTraveler travel system.
- Lead the FEMA effort to strengthen financial accountability by remediating any material weaknesses identified in the FY 2009 financial statements audit and promoting a more proactive approach to audit readiness throughout the Agency.
- Conduct pilot project with Region IV to enhance financial controls and increase financial management and budget execution capabilities in the Regions.

- **FY 2011 Planned Accomplishments:**

- Enhance the agency budget tool to provide an interactive collaborative environment where the system, leveraging powerful web agents, provides enhanced analytical capabilities giving managers and analysts the tools they need to better manage resources, analyze trends, make educated choices, and effect tangible changes.
- Expand the regional financial management pilot project to roll out financial management controls and enhance financial management and budget execution capabilities across the Regions.
- Establish a program to develop a project plan for implementation of a new financial management system.
- Enhance the financial data warehouse and increase capabilities for Federal Funding Accountability and Transparency Act (FFATA)

reporting. The enhancements will allow FFATA reporting from a single data source.

- **Office of the Chief Information Officer**

The Office of the Chief Information Officer supports FEMA’s mission by maintaining and enhancing the Agency’s Information Technology (IT) infrastructure and developing and enhancing key systems to support operating programs. The requested funding supports mission operations that provide operations and maintenance support for applications and programs across FEMA; IT governance and administrative support for programs and office across the FEMA enterprise; and Information Security support and oversight for programs and offices across the enterprise. Funding also supports FEMA plans to build on its FY 2010 successes of consolidating two production data centers (SAVVIS and Plano, TX) into the DHS Enterprise Data Center in Southern VA.

FEMA will continue to work towards the migration of all enterprise application systems from the FEMA Mount Weather Facility and two other commercial data centers that are currently hosting FEMA mission support applications. FEMA will continue to migrate enterprise support services to the planned DHS service offerings (email and shared workspace) environments accomplishing economies of scale. These efforts along with the accomplishments from FY 2010 will reduce the cost associated with maintaining and operating multiple disparate data centers and improve the support of the FEMA mission by providing enterprise class services.

**Chief Information Officer Programs FY 2011 Funding Summary**

(\$ in 000s)

	<u>Activity</u>	<u>Program</u>	<u>S &amp; B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
Information Technology Programs		71,076	45,255	116,331	359	334

- **FY 2009 Accomplishments:**

- Strengthened the security of FEMA’s IT environment by achieving and maintaining a FISMA score of 90 percent for each reporting period, one of only three DHS components to achieve this goal with a final score of 92 percent.
- Provided reliable, integrated, and secure communication and information systems by maintaining 99.9 percent critical system uptime.
- Improved FEMA’s IT infrastructure by implementing all FEMA/DHS agreed milestones for transitioning to OneNet, and establishing two new test environments to improve software testing.

- **FY 2010 Planned Accomplishments:**

- Implement new mission systems and enhance existing systems, to improve delivery of services across FEMA in both disaster and non disaster environments to provide improved connectivity, enhanced audio visual support and video teleconferencing and prevent data loss or theft.
- Continue consolidation to DHS data centers as determined by DHS and other stakeholders

- **FY 2011 Planned Accomplishments:**

- Deploy new business systems completed in FY 2010 to address identified weaknesses and deficiencies.
- Deploy new mission systems completed in FY 2010 to improve underlying IT foundation FEMA wide.
- Continue system and application migration to the two DHS Enterprise Data Centers for central DHS management.

- **Office of the Chief Human Capital Officer**

The Office of the Chief Human Capital Officer plays a critical role in managing the Agency’s most important asset -- its people. Human Capital Management is responsible for a broad range of activities focused on building, developing, and retaining a high performing, diverse workforce. The Human Capital Division’s FY 2011 budget will support mission accomplishment by acquiring top notch talent and developing employees through building engagements, supporting managers, building partnerships, incentivizing employees through a strong labor relations program, provide performance awards and recognitions supporting a work life program that includes benefits and retirement counseling, maintaining an employee assistance program, implementing a telework program, and various other programs.

**Chief Human Capital Officer Programs FY 2011 Funding Summary**

(\$ in 000s)

	<u>Activity</u>	<u>Program</u>	<u>S &amp; B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
	Human Capital Programs	5,858	17,089	22,947	151	140
	Disaster Reserve Workforce	<u>458</u>	<u>3,435</u>	<u>3,893</u>	<u>30</u>	<u>28</u>
	<b>Subtotal</b>	<b>6,316</b>	<b>20,524</b>	<b>26,840</b>	<b>181</b>	<b>168</b>

**Human Capital Programs**

Human Capital is responsible for a broad range of activities, including identifying and recruiting the best available talent, and partnering with managers to retain, develop and motivate FEMA’s people to reach their fullest potential. Human Capital Management encompasses workforce planning, employment and recruitment, pay and performance, training, organizational development,

employee and labor relations, awards, leave, workplace programs, employee grievances and appeals.

### **Disaster Reserve Workforce Division**

Disaster Reserve Workforce Division (DRWD) was established in March 2008 to transform the legacy Disaster Assistance Employee (DAE) program into an all-hazard Disaster Reserve Workforce and was recently moved under OHC. DRWD coordinates policy affecting the Disaster Reserve Workforce (DRW) and oversees the Agency-wide deployment tracking process and credentialing of all FEMA employees deployed for disaster response and recovery operations. It also coordinates and implements the Surge Capacity Force Concept of Operations Plan as mandated by section 624 of the Post Katrina Emergency Management Reform in coordination with the Disaster Operations Directorate and DHS. DRWD's personnel are funded in the M&A appropriation, while the vast majority of the program is funded in the DRF appropriation. Accomplishments for the program are thus exhibited in both Congressional Justifications.

- **FY 2009 Accomplishments:**

- Executed the first full year of the "BEST Workforce" initiative to improve employee engagement, by performing action planning in work group sessions across FEMA. Based upon the results of the Q12 survey, Human Capital trained 200+ managers through the Great Manager Program, and through the Strengths Performance Coaches to educate FEMA employees and managers on applying employees' strengths to help them work more effectively, efficiently, and enjoyably.
- Worked to standardize DRW cadre-specific credentialing plans to be National Incident Management Systems (NIMS) -compliant. Six plans were approved and five in are in the final approval process awaiting executive signature.
- Implemented major Disaster Reserve Workforce compensation policy changes to include: (1) granting employees, for the first time, sick leave access and compensation; (2) granting and clarifying holiday compensation reimbursement; (3) issuing over 29 administrative policy guidance documents enhancing the work environment for Disaster Reservists. .

- **FY 2010 Planned Accomplishments:**

- Complete the first phase of the strategic workforce planning initiative, with an engagement with the Homeland Security Studies and Analysis Institute (HSSAI) to define the baseline workforce of the current FEMA workforce. This baseline assessment is intended to quantify the current workforce in terms of numbers, locations, work performed, and some assessment of capabilities of the current workforce.
- Continue the "BEST Workforce" initiative employee engagement which directly affects individual and organizational performance in achieving

FEMA's mission. Specifically, train managers in senior levels of leadership across the agency down to division directors through the Great Manager Program, provide the StrengthsFinder Assessment to employees across the Regions, train additional Strengths Performance Coaches to educate employees and teams on how to use their strengths to be more effective at work, conduct the second annual Q12 survey to assess employee engagement, and facilitate impact planning at the work group level across the agency to make improvements and increase employee engagement and organizational performance.

- Migrate the new credentialing framework to the remaining DRW of 23 Cadres to include, seven additional Cadre Specific Planning sessions; 20 Cadre Migration Reviews; 16 initial Cadre Review Boards; nine first level annual cadre reviews; and six second level Cadre Reviews Boards.
- Complete the hiring of DRW staff to full-operating capability representing a 50 percent increase in the full-time staffing level of the program achieving a fully on-going operational capability for the program.

- **FY 2011 Planned Accomplishments:**

- Complete subsequent phases of the strategic workforce planning initiative, which will focus on recording required mission capabilities, identification of manpower requirements to achieve these capabilities and the development and execution of workforce strategies to realize the manpower requirements and capabilities articulated.
- Continue the "BEST Workforce" initiative to improve employee engagement which directly affects individual and organizational performance in achieving FEMA's mission (Goal of increasing Employee Engagement by 10 percent from FY10 to FY11).
- Commence the development of planning to extend the Agency-wide Credentialing Program to include full time employees.
- Maintain and support a constant level of Disaster Reservist training to ensure advancement through credentialing proficiency levels.
- Develop and codify implementing guidance for the FEMA SURGE Capacity Force (SCF).
- Introduce the next-generation FEMA automated deployment and reporting system.

- **Office of the Chief Procurement Officer**

The Office of the Chief Procurement Officer is organized to provide a full range of acquisition services and business solutions to FEMA's programs, partners and stakeholders. The Office of the Chief Procurement Officer is responsible for all contracting and related activities to fulfill the Agency's mission. As one of the business organizations of the Agency, Acquisition Management supports the procurement and contract management programs' policies, procedures, operations, contract planning, awards, administration, and closeouts. Also, Office of the Chief Procurement Officer manages FEMA's Commercial Services

Management analyses (the successor to the Competitive Sourcing Program), including the annual FAIR Act inventory and Business Process Re-engineering Reviews. This funding request provides funding for the acquisition staff, program, and operational support of the division. The funding will allow the Division to focus on such things as contract award and contract close out—an important FEMA initiative, the development and management of a new electronic procurement system, and conduct contract data and verification analysis.

**Chief Procurement Officer Programs FY 2011 Funding Summary**

(\$ in 000s)

	<u>Activity</u>	<u>Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>
Procurement Programs		4,461	22,930	27,391	189	176

• **FY 2009 Accomplishments:**

- Sustained and improved business processes by leveraging e-business technologies such as Automated Acquisition Management System (AAMS), the Federal Business Opportunities (FBO) website portal, the electronic Subcontracting Reporting System (e-SRS), the Eligibility Procurement Listing System (EPLS), as well as the reverse auctioning service, popularly referred to as FedBid. In FY 2009, FEMA avoided costs of over \$2.5 million on 266 transactions. It should also be noted that small businesses get a large percentage of the purchase resulting from this method (33 percent in FY 2009).
- Established a tiered Contracting Officer Technical Representative (COTR) development program, offered six courses, and graduated 18 DHS-certified COTRs to Tier II and III to match COTR competencies to contract complexity.
- Awarded in excess of 97 percent of the hurricane contracts before hurricane season, giving the Agency greater flexibility and speed of response with ready resources for responding to disasters.

• **FY 2010 Planned Accomplishments:**

- Complete automation of the Procurement Request (Form 40-1) contract financing and processing project.
- Realign the reporting chain of field contracting specialists in accordance with DHS directives.
- Develop an automated IT system and begin migration of contract files to an electronic contract file management system as recommended by the DHS OIG.
- Continue to expand the Acquisition Disaster Assistance Employee (DAE) cadre to a total of at least 60 members in keeping with OIG recommendations.

- **FY 2011 Planned Accomplishments:**

- Refine the composition and role of the Disaster Acquisition Response Team (DART) based on practical experience.
- Complete the implementation of the electronic contract file system as recommended by the DHS OIG.
- Establish commodity councils (Integrated Project Teams) to explore the benefits of streamlining processes in order to acquire commodities and services for the Agency at the most cost-effective pricing

- **Office of the Chief Security Officer**

The Office of the Chief Security Officer provides professional and comprehensive security services in support of all FEMA personnel, external customers, fixed facilities, and disaster operations nationwide. Also designs programs and activities to protect FEMA personnel, facilities, information, and equipment in accordance with national security requirements. Office of the Chief Security Officer encompasses the following elements: Physical Security, Personnel Security, Disaster Security Operations, Technical Security Countermeasures Program, Administration Security Services, Information Security, Operations Security, Special Security Programs, Internal Security & Investigations, and Security Training. These security services support all FEMA personnel, external customers, fixed facilities, and disaster operations nationwide. It also includes two employees assigned to the North American Treaty Organization (NATO) support programs.

**Office of the Chief Security Officer Programs FY 2011 Funding Summary**

(\$ in 000s)

	<u>Activity Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>FTP</u>	<u>FTE</u>
Security Programs	10,513	7,980	18,493	77	72

- **FY 2009 Accomplishments:**

- Initiated the deployment plans for Contingency Credentialing Readiness to support Disaster sites by deploying to pilot regional sites and pilot disaster deployment.
- Conducted over 200 investigations into allegations of FEMA employee misconduct involving both criminal and administrative actions being taken against those whose cases were substantiated.

- **FY 2010 Planned Accomplishments:**

- Develop and deploy Contingency Credentialing Readiness Mobile Issuance Centers to provide large scale badge issuance support

(PIV and FAC) to short or long-term gatherings of FEMA employees and contractors (i.e. training, conferences, etc.).

- Develop Fixed Facility Visitor Access Control System that validates Contingency Credentialing Readiness PIV (Smartcard) from FEMA partners and other government agencies to assure Personal Identity Verification and integration into the FEMA PACS.
- Implementation of Credit Bureau Reports in July 2010 for Adjudications Unit, providing faster service for Entry on Duty (EOD) process.

- **FY 2011 Planned Accomplishments:**

- Continue Physical Access Control System (PACS) upgrade for all FEMA facilities to meet Contingency Credentialing Readiness requirements.

- **Office of the Chief Administrative Officer**

**Office of the Chief Administrative Officer Programs FY 2011 Funding Summary**

(\$ in 000s)

<u>Activity</u>	<u>Program</u>	<u>S&amp;B</u>	<u>Total</u>	<u>Pos.</u>	<u>FTE</u>

- **Facilities and Support Services Division (FSSD)**

The Facilities and Support Services Division works to acquire and maintain adequate facilities and space and to provide support services that enable staff to effectively complete their work to achieve FEMA's mission for the National Capital Region (NCR) and Regional Operations. The work of FSSD encompasses the following activities: Customer Service; Facilities Operations and Maintenance; Repairs and Alterations; Regional Facility Acquisition and Capital Planning Support; Space Management; Real Property Asset Management; Personal Property; Fleet Management; Publishing; Reproduction and Graphics; Mail Operations; Develop Space Requirements; and Plan Space Optimization Projects.

- **FY 2009 Accomplishments:**

- Developed an Energy Conservation Program in accordance with the Energy Policy Act of 2005, EISA 2007, DHS 120 Day

Efficiency Review, and Executive Order 13423 & 13514—Federal Leadership in Environmental, Energy, and Economic Performance.

- Completed Phase II in constructing the National Exercise Simulation Center (NESC).
- Developed a five-year capital plan for relocating Regions 2, 4, 6, 8, 9, and 10.

- **FY 2010 Planned Accomplishments:**

- Manage the equipment, inventory, and shelter-in-place supplies for the Occupant Emergency Planning (OEP) for all NCR facilities in accordance with CFR 41-102-74.230. The OEP manager is responsible for developing, implementing, and maintaining OEP Plans.
- Define the program of requirements and costs for development of projects listed in the five year plan for relocating/consolidating Regions 2, 4, 6, 8, 9, and 10.
- Define space needs and determine preliminary requirements for consolidating NCR facilities including planning for the DHS St. Elizabeth's facility.

- **FY 2011 Planned Accomplishments:**

- Perform the market survey and submit formal solicitation for offers in preparation for building out facilities for Regions 2, 4, 6, 8, 9, and 10.
- Define space needs and determine final requirements for consolidating NCR facilities including planning for the DHS St. Elizabeth's facility.
- Introduce the next-generation FEMA deployment and reporting system

- **Records Management Division**

The Records Management Division administers the Agency's statutory programs that include Records Management, Privacy Act, Freedom of Information Act, Information Quality Act, Paperwork Reduction Act, and Federal Advisory Committee Act (FACA). This Office administratively supports programs such as Correspondence Management, Forms Management, Directives Management, Research Service, and the National Archives and Records Administration (NARA) Reimbursable Program. It also administers the enterprise systems for the collection, preservation, management, safeguarding of records, correspondence, and historical research material.

- **FY 2009 Accomplishments:**
  - Modeled the Agency's General Records Schedule to the Federal Enterprise Architecture (FEA).
  - Implemented the FOIA Backlog Reduction System (FBRS)
  - Assisted Directorates in developing a file plan to implement FEMA's Enterprise Records Management System (FERMS).
  
- **FY 2010 Planned Accomplishments:**
  - Improve the Personal Identifying Information (PII) breach assessment and response process by providing agency wide training and developing process to be used to monitor internal office moves.
  
- **FY 2011 Planned Accomplishments:**
  - Continue to improve the Personal Identifying Information (PII) breach assessment and response process.
  - Revise the FEMA Vital Records Program.
  
- **Occupational Safety, Health, and Environment Division**  
Occupational Safety, Health, and Environment Division supports and enhances Agency operations by providing leadership, oversight, guidance, and support in the protection of human health and the environment to FEMA programs, facilities, and operations throughout the country. This is accomplished through the management and deployment of the National Safety Cadre, Collateral Duty Safety Officer Training, Management Evaluation Technical Assistance Reviews, Life Safety and Fire Engineering Plan Reviews, and Environmental Regulatory Compliance Review.
  
- **FY 2009 Accomplishments:**
  - Updated the National Safety Cadre credentialing plan to support the disaster workforce credentialing plan.
  
- **FY 2010 Planned Accomplishments:**
  - Reduce FEMA's backlogged FOIA requests by 40 percent of current legacy (requests received prior to August 2008) and 50 percent current backlog.
  - Finalize and implement mandatory employee and supervisor safety training.
  - Increase the National Safety and Health Disaster Cadre workforce by 50 percent to maintain a fully-staffed Cadre.

- **FY 2011 Planned Accomplishments:**

- Conduct a 100 percent inventory of FEMA record assets.

- **Office of Business Management**

The Office of Business Management (OBM) was established in FY 2009 to assist Program Offices within the former Management Directorate organization in applying program and project management principles and techniques, as well as with business process reengineering, and information management. Among its objectives:

- Further mature FEMA's business processes
- Create a FEMA project management center of excellence
- Align FEMA business systems with DHS policy and procedures by drafting the "FEMA Acquisition Policy, Directive and Guidebook" in compliance with DHS Directive 102-01 and DHS Instruction Guidebook 102-01-001
- OBM established the Environmental program management office. The Environmental office manages the Storage Tank Management program by:
  - Responding to EPA Information Requests
  - Terminating liability by "closing" non-operational tanks
  - Reducing liability of operational tanks by designing and implementing a life-cycle storage tank management program

- **FY 2009 Accomplishments:**

- The Environmental PMO designed and implemented life-cycle management methodologies, practices, tools, techniques, templates, standards and processes for the Storage Tank Management Program (STMP).
- Established governance structure to ensure stakeholder involvement and accountability.

- **FY 2010 Planned Accomplishments:**

- The Environmental PMO will continue efforts to design and implement life-cycle management methodologies, practices, tools, techniques, templates, standards and processes for the STMP by:
  - Provide periodic updates on the status and resource contingent plans to complete the final 40 CFR Part 280 regulated storage tanks historic and current information request action in the 4th Quarter.

- Terminating liability by beginning tank closure efforts on 14 high priority underground tanks and increasing closure research activity to encompass non-operational AST's
  - Reduce liability of operational tanks by expanding baseline equipment assessments to include the remaining UST's, AST's and Rolling Stock, implementing recurring/ periodic assessment of equipment in accordance with a regulatory requirements, and implementing a long-term emergency response and contamination response capacity
- **FY 2011 Planned Accomplishments:**
    - Execute the next iterative steps in the process of design and implementation of the Storage Tank Management life-cycle methodologies, practices, tools, techniques, templates, standards and processes by:
      - Closing out the US EPA Information Request
      - Terminating liability by securing regulatory "closure" for the remaining non-operational tanks.
      - Reduce liability of operational tanks by designing and implementing a life-cycle storage tank management program that: plans to focus equipment assessments to periodic/recurring assessments and testing efforts; maintain a long-term emergency response and contamination response capacity; continue to identify needed repairs of operational tanks, continue to provide a robust quality assurance and government inspection program; and iteratively install a permanent inventory and life-cycle data management schematic for all operational storage tanks.
      - The STMP plans to close-out and transition various life-cycle sustainment products to the functional owners to include
      - Complete closure and US EPA RFI on underground storage tanks containing regulated hazardous materials.

2011 Adjustments-to-Base	-	-	54
<b>2011 Current Services</b>	<b>20</b>	<b>19</b>	<b>7,049</b>
<b>2011 Total Request</b>	<b>20</b>	<b>19</b>	<b>7,049</b>
Total Change 2010 to 2011	-	-	54

FEMA requests \$7.049 million, 20 positions, and 19 FTE. This represents a net increase of \$0.054 million, 0 positions, and 0 FTE as compared to FY 2010.

**CURRENT SERVICES DESCRIPTION**

Established by Congress in the Homeland Security Act of 2002, the Office of National Capital Region Coordination (NCRC) provides leadership in integrating homeland security activities in the National Capital Region (NCR). NCRC's responsibilities include organization and participation in multi-jurisdictional coordination activities with Federal, State, local, regional, private sector and nonprofit partners. Key NCRC activities are described below.

• **Strategic and Catastrophic Planning:**

NCRC supports State and local efforts to maintain, evolve and implement their priorities including catastrophic planning in the NCR and surrounding jurisdictions. Additionally, NCRC continues efforts with regard to the coordination of Federal planning; various gap analyses; and, the integration of Federal plans with State and local efforts (working with FEMA Region III where appropriate). NCRC will continue to participate in and leverage the numerous exercises and events (e.g., NSSEs, July 4<sup>th</sup>, demonstrations, State funerals) that occur annually in the NCR to enhance planning and "lessons learned" efforts.

• **Federal Coordination:**

The high concentration of Federal Government facilities, assets, and personnel in the NCR makes the coordination of Federal activities especially important. NCRC will

continue its crosscutting work within FEMA/DHS and with other Federal partners from the Legislative, Judicial and Executive branches to allow for a more coordinated Federal response to no-notice events in the National Capital Region. This effort enables unity of effort, provides decision support, facilitates the sharing of regional situational awareness and enhances integrated planning, thereby addressing significant gaps identified by DHS and FEMA leadership, our NCR security partners and Congress.

- **Multi-jurisdictional Interoperability and Information Sharing:**

NCRC organizes and supports efforts to ensure integration and interoperability between key Federal, State, regional and local authorities and security partners. The focus of NCRC and its homeland security partners is situational awareness -- voice and data interoperability supporting program efforts -- and identity management processes. In addition to supporting the credentialing efforts of State and local partners, NCRC will continue supporting broader FEMA efforts to credential Federal Emergency Response Officials (F/EROs) per P.L. 110-53.

- **Regional Risk:**

NCRC will continue providing information, analysis and management support for regional risk reduction that will assist NCR leaders in making sound risk decisions, building on its earlier groundbreaking development of a risk Wikipedia for use by homeland security partners.

- **Regional Governance Participation and Coordination:**

The NCRC Director actively participates in the region's unique governance structures and processes, representing the DHS Secretary and FEMA Administrator as a principal member of the Senior Policy Group (SPG), for example, and coordinating regularly with Regional Emergency Support functions, the Metropolitan Washington Council of Governments and its related committees, and others to improve preparedness in the NCR. (The SPG is the senior regional decision-making body for homeland security, and is comprised of the Homeland Security Advisors and Directors of Emergency Management from Virginia, Maryland and the District of Columbia (DC).

On the Federal level, the NCRC Director chairs the Joint Federal Committee (JFC), which represents the Legislative, Judicial and Executive Branches and serves as an important means to develop, coordinate, and implement inter-agency activities and plans for the NCR. NCRC also leads the JFC First Responder and Emergency Manager Subcommittees, which support coordination and outreach with Federal Emergency Managers and First Responders.

- **FY 2009 Accomplishments:**

- Played an unprecedented role in the planning for the 2009 Presidential Inauguration, leading key consequence management planning activities including a Planning Assumptions Workshop; synchronization and gap analysis planning between FEMA and the District of Columbia, Maryland and Virginia; a Table Top Exercise (TTX) with over 100 participants from the NCR; development and implementation of the Interagency Consequences Management CONPLAN; and,

- an After Action Report with an improvement plan and the first ever Inaugural NSSE Consequence Management Standard Operating Procedure manual to help the next planning effort.
- Strengthened interoperability by integrating additional Federal (DHS) situational awareness and information sharing systems and instituting better direct communications between the District of Columbia and FEMA's operations centers.
  - Initiated the NCR pilot program (as FEMA's Executive Agent) for credentialing of Federal Emergency Response Officials (F/EROs), from which FEMA will build its broader national effort in FY 2011, and continued providing technical support to State and local partners in the NCR.
  - Completed the annual report to Congress, per Homeland Security Act of 2002, Section 882, and quarterly reports on the status of NCR/West Virginia/Pennsylvania evacuation planning.
- **FY 2010 Planned Accomplishments:**
    - Assess and integrate Federal Preparedness initiatives (e.g., JFC Emergency Managers Subcommittee and National Preparedness Month) and other activities within the NCR, and support and coordinate NCR catastrophic planning, H1N1 planning integration and various gap analyses.
    - Continue to strengthen interoperability, supporting NCR partners in requirements development for various State, local and regional initiatives and providing Federal coordination to enhance their interoperability with DHS systems and other Federal systems.
    - Increase Federal participation in key NCR systems (e.g., DC Net).
    - Complete the NCR F/ERO pilot program, to inform broader FEMA efforts to credential Federal Emergency Responders in FY 2011 (per P.L. 110-53).
  - **FY 2011 Planned Accomplishments:**
    - Continue development of more robust NCR-specific situational awareness and coordination capabilities (Federal Coordination Center; ISAVE) and provide Agency Representatives to various operations centers when needed (e.g., NSSEs, July 4<sup>th</sup> and other special events).
    - Support FEMA in implementing P.L. 110-53 with regard to credentialing of Federal Emergency Response Officials nationwide (per P.L. 110-53).

<b>2011 Total Request</b>	<b>8</b>	<b>8</b>	<b>28,000</b>
Total Change 2010 to 2011	-	-	(4,500)

FEMA requests \$28 million, 8 positions, and 8 FTE. This represents a net decrease of \$4.5 million, 0 positions, and 0 FTE as compared to FY 2010.

**CURRENT SERVICES DESCRIPTION**

The National Urban Search and Rescue (US&R) system is comprised of 28 task forces that provide a coordination, national, all-risk capability to assist State and local governments in responding to structural collapse incidents when the President declares a major disaster emergency under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act). These task forces are highly trained and possess the necessary expertise to extricate and medically treat victims in heavy rescue situations.

Each task force consists of two 35-person teams, four canines, and comprehensive equipment cache. US&R task force members work in four areas of specializations: Search, to find victims trapped after a disaster; Rescue, which includes safely digging victims out of tons of collapsed concrete and metal; Technical, made up of structural specialists who make rescues safe for the rescuers; and Medical, which cares for the victims before and after a rescue.

In addition to search-and-rescue support, FEMA provides hands-on training in search-and-rescue techniques and equipment, technical assistance to local communities, and in some cases Federal grants to help communities better prepare for urban search-and-rescue operations.

- **FY 2009 Accomplishments:**

- Conducted six Operational Readiness Evaluations to ensure the readiness of the 28 US&R Task Forces.
- Distributed approximately \$28 million in readiness grants to the US&R Task Forces to provide the USAR system crucial funding for equipment and training.
- Developed and delivered 12 functional US&R courses.
- Activated the Red IST and Two US&R Task Forces in support of the Presidential Inauguration. Two additional US&R Task Forces were placed in Alert status.

- **FY 2010 Planned Accomplishments:**

- Conduct six Operational Readiness Evaluations to ensure the readiness of the 28 US&R Task Forces.
- Distribute approximately \$28 million in readiness grants to the USAR Task Forces to provide the US&R system crucial funding for equipment and training.
- Develop and deliver 11 functional US&R courses.

- **FY 2011 Planned Accomplishments:**

- Conduct six Operational Readiness Evaluations to ensure the readiness of the 28 US&R Task Forces.
- Distribute approximately \$24 million in readiness grants to the US&R Task Forces to provide the US&R system crucial funding for equipment and training.
- Develop and deliver 8 functional US&R courses.

## IV. Program Justification Changes

**Department of Homeland Security  
Federal Emergency Management Agency  
Operations, Management, and Administration  
Operating Activities  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Data Center Migration  
PPA: Operating Activities  
Program Increase: Positions 0.0, FTE 0.0, Dollars \$5900.0

Funding Profile

	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	-
<b>Total Request</b>	-	-	-	-	-	-	-	-	-

**Description**

FY 2011 data center development funding, to be managed through the DHS Working Capital Fund (WCF), will be used for the continuation of system and application migration to the two DHS Enterprise Data Centers for central DHS management in FY 2011. This includes:

- Discovery, migration planning, and scheduling activities specifically related to systems/applications that will transition to the DHS Data Centers in FY 2010
- Purchase of new equipment for placement in the DHS Data Centers as part of migration/transition efforts
- Installation of equipment racks at the DHS Data Centers
- Migration-related build-out of DHS Data Center infrastructure
- Transition of disaster recovery/backup/COOP (Continuity of Operations) capability to DHS Data Centers
- Installation of infrastructure support as part of system migrations at the DHS Data Centers
- Migration of USCIS hardware, systems/applications to occupy rack space at the DHS Data Centers.

**Justification**

The Data Center consolidation efforts will standardize IT resource acquisitions across DHS Components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation are enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

**Description of Item**

The Federal Emergency Management Agency (FEMA) mission is to support our citizens and first responders to ensure that as a nation we work together to build, sustain and improve our capability to prepare for, protect against, respond to, recover from and mitigate all hazards. FEMA accomplishes this mission by leading and supporting the Nation in a risk-based comprehensive management system of preparedness, protection, response, recovery, and mitigation.

One of FEMA’s critical functions is to build and maintain an operational capacity for emergency response and to increase the overall preparedness of the country. This function is met by retaining and recruiting a diverse and talented workforce and acquiring the facilities needed to support and accomplish the preparedness mission. An integral component of mission success is providing safe, secure, and mission enabling facilities, and supporting core competencies, such as operational planning and incident management.

**Justification**

In the past several years, FEMA has responded to an average of 60 or more emergencies or major disasters per year. It is critical that adequate resources are appropriated to maintain and repair the facilities that are vital to the success of the mission. Without appropriately sized and located facilities, mission effectiveness is greatly reduced. Towards that end FEMA requires \$187.6 million over the five-year period from FY 2011 (\$23.3 million) through FY 2015 for regional facilities acquisitions and repairs, and capital improvements to FEMA’s entire real estate portfolio.

*Regional Facilities (\$11.435 million):*

FEMA needs additional facilities to provide adequate space for staff that has increased from 2,131 permanent full time (PFT) employees to 4,443 in FY 2009, with a significant emphasis on increasing the number of staff in regional offices and enhancing mission capability. FEMA regional staff currently works in crowded offices, and nationwide FEMA's facilities require improvements to meet safety requirements and support core mission functions. The lack of adequate and safe facilities will impair FEMA's ability to attract and retain the talented staff required for its mission, thereby compromising its ability to meet its overall mission.

The enhancements to FEMA's mission capability required an increase to staffing levels to support the new capabilities and different types of facility space required to support assigned mission functions. The large staff increase has placed extreme stress on FEMA's existing facilities portfolio.

The regional staff increases have resulted in space shortages in all the regions since the current offices were acquired to house a much smaller number of staff. Five of the 10 Regional Offices already are, or soon will be, housed in more than one facility.

FACILITIES ACQUISITION						
FACILITY	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	5 Yr. Total
Philadelphia, PA (Regional Office Relocation)	\$8,200,000					\$8,200,000
Kansas City, MO (Close-out Cntr /COOP/Warehouse)	\$1,235,000					\$1,235,000
TBD (New COOP)	\$2,000,000					\$2,000,000
Atlanta, GA (New consolidated Regional Office)		\$33,750,000				\$33,750,000
Thomasville, GA (Construction of MERS Vehicle Storage)		\$300,000				\$300,000
Denver, CO (New Regional Office/MERS)		\$11,220,000				\$11,220,000
Oakland, CA (New Regional Office)		\$9,854,000				\$9,854,000
Hato Rey, PR (Convert to Standard Lease)		\$2,526,000				\$2,526,000
Denton, TX (Construct 10,000 SF owned office building)		\$3,600,000				\$3,600,000
New York, NY (New Regional Office)			\$9,350,000			\$9,350,000
Seattle, WA (New Regional Office)				\$9,350,000		\$9,350,000
<b>Facility Acquisition Total:</b>	<b>\$11,435,000</b>	<b>\$61,250,000</b>	<b>\$9,350,000</b>	<b>\$9,350,000</b>	<b>\$0</b>	<b>\$91,385,000</b>

*Facilities Repairs and Capital Improvements (\$11.849 million):*

FEMA performs facility condition assessments on at least ten percent of its portfolio, on a square footage basis, every fiscal year to generate estimated costs for repair needs. FEMA-owned facilities have a condition assessment at least every five years. For leased facilities, FEMA requests and uses Building Evacuation Report (BER) generated by GSA to determine the level of funding required to properly repair and maintain GSA-leased facilities, although it performs condition assessments on leased facilities as well. The condition assessment reports and BER reports for leased and owned facilities generate repair projects and cost estimates that are entered into the Real Property Management System (RPMS) database. The RPMS is actively managed to track the status of repair projects, document their completion, and to develop funding requests for out-years.

Based on the repair estimates documented in RPMS, FEMA projects it can raise its FCI ten percentage points between FY 2011 to FY 2015 with the funding requested in the five

year PDO document. . FEMA requires additional resources above its current base funding to address critical infrastructure requirements and an historic lack of facility investments.

Allowing for inflation and with the facilities acquisitions ultimately increasing the Agency real estate portfolio, this request for facilities repairs and capital improvement funding should allow funding to remain within the accepted business practice range of two to four percent of the agency’s real estate portfolio.

<b>REPAIRS and CAPITAL IMPROVEMENTS</b>

**Impact on Performance (Relationship of Increase to Strategic Goals)**

DHS strategic objective 5.3.2 of the DHS Strategic Plan “Ensuring Resilience to Disasters”

This initiative directly supports FEMA’s mission to provide enhanced preparedness capability to handle its all hazards responsibility related to natural and man-made disasters. Failure to fund this initiative will directly impact FEMA’s mission by reducing preparedness in several ways.

Failure to provide adequate funding for Agency facilities will result in both increased workplace health and safety risks for FEMA employees (especially from Priority 1 facility issues) and increase out-year repair and maintenance costs as major building systems fail.

Also, a shortage of quality, professional office space makes it more difficult for the Agency to attract and retain the diverse and highly skilled workforce is needs to support mission enhancements. In addition, a dispersed facilities footprint for regional offices causes operational inefficiency, loss of productive hours, and does not support cohesion among staff and organizational components, issues that would not exist if each office consolidated into a single facility. Without replacing outdated and non-efficient mechanical equipment and architectural building components, equipment, major facility systems, and building components will have a higher rate of failure and will not provide the facility infrastructure needed to support training programs and critical emergency response capability.

**Description of Item**

The MWEOC facility, located in Mount Weather, VA, provides the infrastructure to support COOP, Incident Management, and all hazards activities for multiple Executive Branch Departments and agencies, to include the DHS/FEMA HQ COOP site. In addition, it provides operational space for FEMA Emergency Relocation Group (ERG) members to perform their essential functions. ERG members serve as the FEMA HQ emergency personnel that are responsible for performing the Agency’s mission essential function.

**Justification**

The Mount Weather Capital Improvement Fund has approximately \$100 million of balances that would finance planned capital improvement projects through FY 2011. Given these high balances and the inability for the fund to execute a significant amount of budget authority beyond those balances in FY 2011, the reduction from FY 2010 enacted would bring this fund to a level of new budget authority it could execute in FY 2011 of \$11.9 million.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

DHS strategic objective 5.3.2 of the DHS Strategic Plan “Ensuring Resilience to Disasters”

This request will not slow the pace of projects through FY 2011.

**Department of Homeland Security  
Federal Emergency Management Agency  
Operations, Management, and Administration  
Urban Search and Rescue  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Decrease 2:** Reduction to Urban Search and Rescue  
PPA: Urban Search and Rescue  
Program Decrease: Positions 0.0, FTE 0.0, Dollars \$-4500.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							8	8	32,500
Program Decrease							-	-	(4,500)
<b>Total Request</b>	-	-	-	-	-	-	<b>8</b>	<b>8</b>	<b>28,000</b>

**Description**

The Urban Search and Rescue is reduced by (\$4.5) million programmatically in FY 2011 from FY 2010. The total decrease equals (\$4.5) million from the FY 2010 enacted level.

**Justification**

The reduction in the Urban Search and Rescue Program is based on several factors including the substantial level of funds awarded over the past five years and a reprioritization of FEMA resources. Even at the reduced level, FEMA will continue to improve the programs’ effectiveness as a national program to enhance overall preparedness.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

DHS strategic objective 5.3.2 of the DHS Strategic Plan “Conduct effective disaster response operations”

The Urban Search and Rescue Program currently support the strategic goal to build a nimble, effective emergency response system and a culture of preparedness. The reduction in funding will result in a minimal impact on the overall Urban Search and Rescue Program performance.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Federal Emergency Management Agency  
Management and Administration  
Appropriation Language**

For necessary expenses for management and administration of the Federal Emergency Management Agency, [\$797,650,000] **\$902,996,000**, including activities authorized by the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.), the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), the Cerro Grande Fire Assistance Act of 2000 (division C, title I, 114 Stat. 583), the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7701 et seq.), the Defense Production Act of 1950 (50 U.S.C. App. 2061 et seq.), sections 107 and 303 of the National Security Act of 1947 (50 U.S.C. 404, 405), Reorganization Plan No. 3 of 1978 (5 U.S.C. App.), the Homeland Security Act of 2002 (6 U.S.C. 101 et seq.), and the Post-Katrina Emergency Management Reform Act of 2006 (Public Law 109-295; 120 Stat. 1394): Provided, That not to exceed \$3,000 shall be for official reception and representation expenses[: Provided further, That the President's budget submitted under section 1105(a) of title 31, United States Code, shall be detailed by office for the Federal Emergency Management Agency]: Provided further, That of the total amount made available under this heading, not to exceed [\$36,300,000] **\$12,000,000** shall remain available until September 30, [2011] **2012**, for capital improvements at the Mount Weather Emergency Operations Center: Provided further, That of the total amount made available under this heading, [\$32,500,000] **\$28,000,000** shall be for the Urban Search and Rescue Response System, of which not to exceed \$1,600,000 may be made available for administrative costs; and [\$6,995,000] **\$7,049,000** shall be for the Office of National Capital Region Coordination[: Provided further, That for purposes of planning, coordination, execution, and decision-making related to mass evacuation during a disaster, the Governors of the State of West Virginia and the Commonwealth of Pennsylvania, or their designees, shall be incorporated into efforts to integrate the activities of Federal, State, and local governments in the National Capital Region, as defined in section 882 of Public Law 107-296, the Homeland Security Act of 2002].(Department of Homeland Security Appropriations Act, 2010.)

#### Explanation of Change:

No significant changes are proposed.

### PPA Mission Statement

Operating Activities includes the essential functions for all of FEMA's major mission organizations and directly supports FEMA's primary mission to reduce the loss of life and property and to protect the Nation from all hazards including natural disasters, acts of terrorism, and other man-made disasters. Operating Activities leads and supports the Nation through a risk-based, comprehensive emergency management system of preparedness, protection, response, recovery, and mitigation.

## Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	236,244	187,921	280,743	92,822

Salaries and Benefits includes costs for 3,248 FTEs. The FY 2011 request includes an increase of \$92,822,000 for FY 2011.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change

**PPA Mission Statement**

National Capital Region Coordination (NCRC) program advances homeland security, including all hazards preparedness, in the National Capital Region (NCR). The program serves as a model for other regions of the country. NCRC focuses on developing and refining a common regional approach to homeland security that result in the integrated strategies and interoperability among Federal, State, local, regional and private/non-profit stakeholders. NCRC's primary responsibilities include coordinating and participating in programs and initiatives aimed at enhancing the homeland security posture of the region. NCRC also plays valuable roles in events, drills, and exercises that occur annually in the NCR. NCRC also serves as a principal in the NCR's regional governance structure and coordinates with the NCR's Regional Emergency Support Function (R-ESFs) to improve preparedness in the NCR.

**PPA Mission Statement**

The National Urban Search and Rescue System is comprised of 28 task forces that provide a coordinated, national, all-risk capability to assist State and local governments in responding to structural collapse incidents when the President declares a major disaster or emergency under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act). These task forces are highly trained and possess the necessary expertise to extricate and medically treat victims in heavy rescue situations. Funding is used to operate and train the existing task forces, maintain the equipment caches, and replace/repair equipment that has been used in training and actual disasters.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **State and Local Programs**

## **I. Appropriation Overview**

### **A – Mission Statement for State and Local Programs**

Through grants, training, exercises, and other support, State and Local Programs enables FEMA to fulfill its role as the principal component of the Department of Homeland Security (DHS) responsible for assisting state and local governments in prevention, protection against, response to, and recovery from incidents of terrorism and other events. State and Local Programs funds are administered by two different organizations within FEMA: the Grants Programs Directorate (GPD) and the National Preparedness Directorate (NPD).

### **B – Budget Activities:**

In support of the National Preparedness Guidelines and the National Strategy for Homeland Security of 2007, FEMA's FY 2011 budget for State and Local Programs is divided into four major categories: the State and Regional Preparedness Program, which includes the Emergency Management Performance Grant (EMPG) and Firefighter Assistance Grant programs; the Metropolitan Statistical Area (MSA) Preparedness Program; the Training, Measurement, and Exercise Program; and Management and Administration (M&A) of the State and Local Program, which is a percentage of the other three program categories.

#### **Grant Programs Directorate (GPD)**

GPD is responsible for administering the State and Regional Preparedness Program and the Metropolitan Statistical Area (MSA) Preparedness Program.

#### **State and Regional Preparedness Program:**

The State and Regional Preparedness Program includes four grant programs that provide resources to support preparedness projects that build State and local capabilities as outlined in the National Preparedness Guidelines, the Target Capabilities List, and the National Strategy for Homeland Security of 2007:

- *State Homeland Security Program (SHSP)* - This program awards grants to all 50 States, the District of Columbia, Puerto Rico, and four U.S. territories on the basis of risk and need. In an effort to reform the organization of State and Local Programs, the President's Budget proposes to consolidate some of the smaller grant programs and incorporate them as allowable expenses into several larger

programs. SHSP is one of those larger programs. For instance, investments typical of the Driver's License Security Grant Program, the Citizen Corps Grant Program, and the Interoperable Emergency Communications Grant Program will be treated as allowable expenses within SHSP. In many cases, the investments that are currently permitted under SHSP significantly overlap with what was permitted under the smaller programs.

- *Firefighter Assistance Grants Program* – This program is comprised of Assistance to Firefighter Grants (AFG), Staffing for Adequate Fire and Emergency Response (SAFER) Grants, and Fire Prevention and Safety Grants (FP&S). The combination provides support to fire departments and non-affiliated emergency medical services (EMS) to improve the readiness and capability of local first-responders during all-hazards emergencies including firefighting and EMS operations. Firefighter Assistance Grants are an integral part of the Department of Homeland Security's grant programs that assist States, territories, tribal, and local jurisdictions to protect against, prevent, plan for, and respond to acts of terrorism and other catastrophic events.
- *Regional Catastrophic Preparedness Grant Program (RCPGP)* - The FY 2011 RCPGP is intended to support coordination of regional all-hazard planning for catastrophic events, including the development of integrated planning communities, plans, protocols, and procedures to manage a catastrophic event.
- *Emergency Management Performance Grants (EMPG)* - This program provides grants that address emergency response and recovery activities. The EMPG program provides resources to assist State and local governments to sustain and enhance all-hazards emergency management capabilities.

### **Metropolitan Statistical Area (MSA) Preparedness Program:**

The Metropolitan Statistical Area Preparedness Program includes:

- *Urban Area Security Initiative (UASI)* - This program provides funding to support regional collaboration on enhanced security and terrorism readiness in the Nation's highest-risk urban areas. In an effort to reform the organization of State and Local Programs, the President's Budget proposes to consolidate some of the smaller grants and incorporate them as allowable expenses into several larger programs. UASI is one of those larger programs. For instance, investments typical of the Metropolitan Medical Response System and the Interoperable Emergency Communications Grant Program will be treated as allowable expenses within UASI. In many cases, the investments that are currently permitted under UASI significantly overlap with what was permitted under the smaller programs. UASI will also provide up to \$200 million for those urban areas slated to host terror-related trials. This funding will assist law enforcement and first responders in those effected metropolitan areas, as they will be required to provide additional security for the events.

- *Transit Security Grant Program* The TSGP provides grant funding to support mass transit agencies within the Nation’s key high-threat urban areas in their efforts to enhance security measures for critical transit infrastructure, including bus, rail, and ferry systems. This program also provides funding to Amtrak for continued security enhancements for intercity rail operations between key, high-risk urban areas throughout the United States. A risk-based approach is used to allocate TSGP funding to eligible mass transit and intra-city bus systems on a regional basis to address priorities identified in the National Preparedness Guidelines, the NIPP, and the National Strategy for Transportation Security (NSTS), with particular focus on high-risk and high consequence transit systems.
  - *Port Security Grant Program* – The PSGP provides grant funding to port areas for the protection of critical port infrastructure from terrorism. PSGP funds are primarily intended to assist ports in enhancing port-wide risk management capabilities, enhanced domain awareness, capabilities to prevent, detect, respond to, and recover from attacks involving Improvised Explosive Devices (IEDs) and other non-conventional weapons, as well as training and exercises. PSGP funds are allocated to the Nation’s highest risk port areas to address priorities identified in National Preparedness Guidelines (NPG), the National Infrastructure Protection Plan (NIPP), and the National Strategy for Maritime Security.
  - *Buffer Zone Protection Program* - The BZPP provides funds to build security and risk-management capabilities at the State and local levels that will help protect critical infrastructure from acts of terror. Specifically, the program helps to implement Buffer Zone Plans (BZPs) by providing funds to support planning and equipment acquisition. BZPs help identify preventive and protective measures that make it more difficult for terrorists to conduct surveillance or launch attacks within the immediate vicinity of high-risk critical infrastructure assets. BZPs are developed in cooperation between DHS and State and local officials, and help increase the preparedness capabilities of the jurisdictions responsible for the security of surrounding communities.

**National Preparedness Directorate (NPD)**

NPD is responsible for administering the Training, Measurement, and Exercise Programs, which include exercises, training, technical assistance, and evaluations. In FY 2011, this will include the National Exercise Programs (NEP), National Domestic Preparedness Consortium, Continuing Training Grants, and Technical Assistance (TA) and Evaluations and Assessment Programs.

## **Training, Measurement, and Exercise Programs:**

Training, Measurement, and Exercise Programs provide resources to support homeland security preparedness activities for State and local capabilities as outlined in the National Preparedness Guidelines and Homeland Security Act of 2002. For FY 2011, there are six programs included in Training, Measurement, and Exercise Programs:

- *National Exercise Program (NEP)* - NEP provides an organized approach to setting priorities for exercises, reflecting those priorities in a multi-year schedule of preparedness-related security exercises that serve the strategic and policy goals of the U.S. Government, and addressing findings from those exercises in a disciplined, interagency process.
- *Continuing Training Grants Program* - This program provides first responders with a comprehensive Weapons of Mass Destruction (WMD) training program that improves their capacity to prevent, protect against, respond to, and recover from acts of terrorism.
- *National Domestic Preparedness Consortium* – Including the Center for Domestic Preparedness, this program identifies training needs for all response disciplines responsible for terrorism and other catastrophic event prevention, deterrence, and incident response. The Consortium specifically focuses on enhancing first responders' capability to prepare for, respond to, protect against, and recover from incidents involving chemical, biological, radiological, nuclear, or explosive (CBRNE) agents.

*Technical Assistance (TA) and Evaluation and Assessment Program* - The TA portion is a capabilities-based program structured to build and sustain State and local capacity in priority preparedness activities. The TA services developed and delivered to State and local homeland security personnel address the full spectrum of the goals, priorities, and capabilities outlined in the National Preparedness Guidelines. The Evaluations and Assessment portion provides for the successful performance of preparedness policy, planning, and assessments to synchronize and integrate the preparedness activities conducted across the Federal government and among the State and local stakeholders.

## **C – Budget Request Summary:**

In FY 2011, FEMA requests 664 positions, 616 FTE, and \$4,000,590,000 for State and Local Programs, excluding AARA emergency funding provided in P.L. 111-5. This represents a decrease of \$164,610,000 from FY 2010. While the proposed budget reflects a decrease for certain grant programs, it provides significant Federal funding to support state and local government programs that help prevent or respond to threats or incidents of terrorism and other events.

Proposed funding levels for specific PPAs are as follows:

**PPA 1 – State and Regional Preparedness Program (\$2,040,000,000):** In FY 2011, FEMA requests \$2.040 billion for Homeland Security Prevention and Protection Programs, which includes the State Homeland Security Program (SHSP), Emergency Management Performance Grants (EMPG), the Regional Catastrophic Preparedness Grants Program (RCPGP), and Firefighter Assistance Grants (including AFG, SAFER, and FP&S).

**PPA 2 – MSA Preparedness Program (\$1,750,000,000):** In FY 2011, FEMA requests \$1.750 billion for grants under the Urban Area Security Initiative (UASI), the Port Security Grants Program (PSGP), the Transit Security Grants Program (TSGP), and the Buffer Zone Protection Program (BZPP).

**PPA 3 – Training, Measurement, and Exercise Programs (\$210,590,000):** In FY 2011, FEMA requests \$210.5 million for Training, Measurement, and Exercise Programs, which include the National Exercise Program (NEP), Continuing Training Grants Program (CTGP), National Domestic Preparedness Consortium (NDPC), and Technical Assistance (TA) and Evaluations and Assessment Program.

**PPA 4 – Management and Administration (\$):** In FY 2011, FEMA requests that out of the above three PPAs, not to exceed 4.7% be made available for Management and Administration to GPD and NPD to support the full range of grant administration, related preparedness activities, program administration activities, and FEMA's support organizations for infrastructure and administrative activities, including contributions to the Departmental working capital contributions. This amount will be transferred post-enactment to the Management and Administration appropriation.

### III. Current Services Program Description by PPA

**Department of Homeland Security  
Federal Emergency Management Agency  
State and Local Programs  
State & Regional Preparedness Program  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: State & Regional Preparedness Program**

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2009 Actuals</b>	-	-	-
<b>2010 Enacted</b>	-	-	<b>2,353,700</b>
2011 Adjustments-to-Base	-	-	(312,700)
<b>2011 Current Services</b>	-	-	<b>2,040,000</b>
<b>2011 Total Request</b>	-	-	<b>2,040,000</b>
Total Change 2010 to 2011	-	-	(313,700)

FEMA requests \$2,040,000,000 for this activity. This is a decrease of \$313,700,000 from FY 2010. In FY 2011, the Administration proposes to again realign the Firefighter Assistance Grants Program and the Emergency Management Performance Grants Program into the State and Local Programs appropriation.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The State and Regional Preparedness Program include four grant programs: the State Homeland Security Program (SHSP), Emergency Management Performance Grants (EMPG), Regional Catastrophic Preparedness Grants Program (RCPGP), Firefighter Assistance Grants Program (including AFG, SAFER, and FP&S).

**State Homeland Security Program (SHSP) - \$1,050 billion**

The SHSP is a primary funding source for building homeland security capabilities that align with the National Preparedness Guidelines (NPG) at the State and local levels. States and localities use SHSP funds to build a wide range of homeland security capabilities. Most capabilities specific to terrorism are also applicable to large-scale

natural disasters and public health emergencies. Grant allocations are based on an analysis of risk and effectiveness, but each State and territory is assured a minimum allocation. Projects funded under SHSP support building and sustaining capabilities at the State and local levels through planning, equipment acquisition, training, and exercise activities and helps States to implement the strategic goals and objectives included in State homeland security strategies. The SHSP supports activities within all four homeland security mission areas, as well as the National Priorities identified in the National Preparedness Guidelines. In FY 2011, \$50 million of this funding will be used for the Operation Stonegarden Grant Program.

The accelerated funding cycle, under which guidance and applications must be developed and released in a matter of weeks, has impeded the program's ability to require grantees to develop a coordinated grant allocation strategy that can be used to track program resources. This methodology establishes a more deliberate and up-front planning process. As such, greater time is allotted for State application development and review. DHS anticipates making grant awards by the 3rd quarter of FY 2011, similar to FY 2010.

#### **Operation Stonegarden Grant Program (OPSG) (\$50 million)**

The OPSG provides funding to designated localities to enhance cooperation and coordination between Federal, State, local, and tribal law enforcement agencies in a joint mission to secure the United States borders along routes of ingress from International borders. Funding for OPSG in 2011 prioritizes State, local, and tribal governments that continue to bear the brunt of the Southwest Border security threat. Local units of government at the county level or equivalent and federally recognized tribes may apply for funding from DHS through the State Administrative Agency (SAA).

#### **Emergency Management Performance Grants (EMPG) - \$345 million**

The EMPG program provides resources to assist State and Local governments to sustain and enhance all hazards emergency management capabilities. States have the opportunity to use EMPG funds to further strengthen their ability to support emergency management activities while simultaneously addressing issues of national concern as identified in the National Priorities of the National Preparedness Guidelines. The award allocation method will incorporate risk methodology.

#### **Firefighter Assistance Grants - \$610 million**

The Firefighter Assistance Grants program actually consists of three individual programs. The Assistance to Firefighter Grants (AFG) program, the Staffing for Adequate Fire and Emergency Response (SAFER) program, and the Fire Prevention and Safety (FP&S) program are all part of the Firefighter Assistance Grants program.

AFG awards grants directly to fire departments and non-affiliated EMS organizations throughout the United States to support one-year projects improving the effectiveness and safety of the Nation's first-responders in homeland security, firefighting, and EMS operations. Under its authorizing legislation, AFG must also expend a minimum of five percent of appropriated funds for fire prevention activities under FP&S.

FEMA's Grant Programs Directorate (GPD) administers the program, in cooperation with the United States Fire Administration (USFA). The entire AFG process is fully automated in an e-grant system. Applicants apply online, grants are awarded electronically, grantees manage their grants online (payment requests, amendments, etc.), and grants are monitored and closed out electronically.

### **Regional Catastrophic Preparedness Grants - \$35 million**

The Regional Catastrophic Preparedness Grant Program (RCPGP) focuses on highest risk Urban Areas and surrounding regions where its impact will have the most significant effect on our Nation's collective security and resilience. The grant complements ongoing state and urban Area efforts, address Post-Katrina Emergency Management Reform Act mandates, and support initiatives underway within FEMA's Disaster Operations, Disaster Assistance, Mitigation and Logistics Directorates, the DHS Incident Management Planning Team, the DHS Office of Infrastructure Protection and other Federal planning and preparedness agencies.

### **Recent and Planned Accomplishments**

FY 2009 Accomplishments:

In FY 2009 over \$3 billion in grant funding was awarded to our nation's first responders, which included the following programs:

- Over \$1.7 billion for the Homeland Security Grant Program.
- Over \$300 million for the Emergency Management Performance Grant Program.
- \$90 million for Operation Stonegarden Grant Program (includes \$30 million supplemental)
- \$48 million for the Driver's License Security Grant Program.
- \$48 million for the Interoperable Communications Grant Program.
- \$33 million for the Emergency Operations Center.
- \$31 million for the Regional Catastrophic Preparedness Grant Program.
- Brought together more than 100 state and local homeland security experts to evaluate State and Urban area applications.
- Conducted After-Action conferences with grantees to solicit feedback on the FY 2009 grant process.
- Developed a fire station construction program under the America Recovery and Reinvestment Act (ARRA). The \$210 million appropriated funds resulted in 6,025 electronically submitted applications for \$9.9 billion in federal funds. Approximately 90 awards were made from these applications.

#### FY 2010 Planned Accomplishments

- In conjunction with the National Preparedness Directorate's Task Force, stakeholders and Administration representatives, review all FEMA grant programs for the FY 2011 cycle.
- Work with the FEMA Administrator's Reporting Requirements Working Group to establish how to move forward on measuring grant effectiveness.
- Continue monitoring and enhancement of internal evaluation capabilities to further guide program planning and targeting technical assistance efforts.
- Began implementation and monitoring of ARRA fire station construction grants.

#### FY 2011 Planned Accomplishments

- As a result of review efforts in FY 2010, release revised program guidance packages that reflect the Administration's priorities, as well as reduce the burden on grantees.
- Continue monitoring and enhancement of internal evaluation capabilities to further guide program planning and targeting technical assistance efforts.
- Initiate a second strategic review of AFG and the AFG strategic plan.
- Implement improvements to the processing of SAFER Grants in order to expedite actions and accelerate grantee management activities.
- Building on the work on the work done by the Reporting Requirements Working Group, establish a comprehensive assessment system with single point of entry for all data collection efforts within FEMA, include the measurement of grant effectiveness.

**Department of Homeland Security  
Federal Emergency Management Agency  
State and Local Programs  
Metropolitan Statistical Area (MSA) Preparedness Program  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Metropolitan Statistical Area (MSA) Preparedness Program**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	-
<b>2010 Enacted</b>	-	-	<b>1,549,000</b>
2011 Adjustments-to-Base	-	-	201,000
<b>2011 Current Services</b>	-	-	<b>1,750,000</b>
<b>2011 Total Request</b>	-	-	<b>1,750,000</b>
Total Change 2010 to 2011	-	-	201,000

\*The table above excludes ARRA funding of \$300 million provided in P.L. 111-5. FEMA requests \$1,750,000,000 for this activity. There is an increase of \$201,000,000 from FY 2010.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This PPA is made up of grant programs under the Urban Area Security Initiative (UASI), the Port Security Grants Program (PSGP), the Transit Security Grants Program (TSGP), and the Buffer Zone Protection Program (BZPP).

**Urban Area Security Initiative Grants (UASI) - \$1.1 billion**

The UASI addresses the unique multi-disciplinary planning, operations, equipment, training, and exercise needs of high-threat, high-density urban areas, and assists them in building and sustaining capabilities to prevent, protect against, respond to, and recover from threats of acts of terrorism. This program provides funding to high-risk urban areas based on risk and effectiveness.

In FY 2011, program participants may use UASI funding to achieve or enhance all of the 37 capabilities outlined in the National Preparedness Guidelines and Target Capabilities List, as long as they enhance the capability to prevent, protect against, respond to, or recover from acts of terrorism. Proposed investments under the UASI program should focus on the National Priorities and the most urgent State and local priorities. In FY

2011, up to \$200 million of this funding will be used for additional security resulting from terror-related trials.

### **Port Security Grant Program (PSGP) - \$300 million**

The PSGP provides grant funding to port areas for the protection of critical port infrastructure from terrorism. PSGP funds are primarily intended to assist ports in enhancing port-wide risk management capabilities, enhanced domain awareness, capabilities to prevent, detect, respond to, and recover from attacks involving Improvised Explosive Devices (IEDs) and other non-conventional weapons, as well as training and exercises.

PSGP funds are allocated to the Nation's highest risk port areas to address priorities identified in National Preparedness Guidelines (NPG), the National Infrastructure Protection Plan (NIPP), and the National Strategy for Maritime Security. The pool of eligible port applicants has been expanded to reflect the changes required by the SAFE Port Act, which states that all entities covered by an Area Maritime Security Plan (AMSP) may submit an application for consideration. PSGP funds support the development of an integrated risk-based decision-making process for each port area patterned after the risk management framework articulated in the NIPP. At the recommendation of the U.S. Coast Guard, in several cases, multiple port areas have been grouped together to reflect geographic proximity, shared risk, and a common waterway.

### **Rail/Transit Security Grant Program (TSGP) - \$300 million**

The TSGP provides grant funding to support mass transit agencies within the Nation's key high-threat urban areas in their efforts to enhance security measures for critical transit infrastructure, including bus, rail, and ferry systems. This program also provides funding to Amtrak for continued security enhancements for intercity rail operations between key, high-risk urban areas throughout the United States. A risk-based approach is used to allocate TSGP funding to eligible mass transit and intra-city bus systems on a regional basis to address priorities identified in the National Preparedness Guidelines, the NIPP, and the National Strategy for Transportation Security (NSTS), with particular focus on high-risk and high consequence transit systems.

### **Buffer Zone Protection Program (BZPP) - \$50 million**

The BZPP provides funds to build security and risk-management capabilities at the State and local levels that will help protect critical infrastructure from acts of terror. Specifically, the program helps to implement Buffer Zone Plans (BZPs) by providing funds to support planning and equipment acquisition. BZPs help identify preventive and protective measures that make it more difficult for terrorists to conduct surveillance or launch attacks within the immediate vicinity of high-risk critical infrastructure assets. BZPs are developed in cooperation between DHS and State and local officials, and help increase the preparedness capabilities of the jurisdictions responsible for the security of surrounding communities.

## **Recent and Planned Accomplishments**

**FY 2009 accomplishments:** In FY 2009 over \$3 billion in grant funding was awarded to our nation's first responders, including the following programs:

- Nearly \$400 million for the Port Security Grant Program.
- Nearly \$400 million for the Transit Security Grant Program.
- \$48 million for the Buffer Zone Protection Program.
- \$15 million for the Non-Profit Security Grant Program
- Conducted programmatic monitoring on States and Urban Areas.
- Awarded over \$500 million in American Recovery and Reinvestment Act (ARRA) funds for Port Security, Transit Security and Fire Station Construction.

### **FY 2010 Planned Accomplishments:**

- Institutionalize the program alignment, metrics/reporting systems and capabilities based on planned accomplishments from FY 2009.
- Continue monitoring and enhancement of internal evaluation capabilities to further guide program planning and targeting technical assistance efforts.
- Provide additional feedback to state and local partners on the outcome of the Department's risk analysis through customized risk and effectiveness profiles.
- Continue to transition key grant programs and functions to the region and establish the regions as key component in the overall grant process
- Work with the FEMA Administrator's Reporting Requirements Working Group to establish how to move forward on measuring grant effectiveness

### **FY 2011 Planned Accomplishments:**

- In collaboration, with the National Preparedness Directorate, update the existing Homeland Security State/Urban Area strategies as necessary.
- Continue monitoring and enhancement of internal evaluation capabilities to further guide program planning and targeting technical assistance efforts.
- Release revised program guidance packages that may reflect a consolidation of programs, thereby reducing the burden on grantees.

**Department of Homeland Security  
Federal Emergency Management Agency  
State and Local Programs  
Training Measurement and Exercise Program  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Training Measurement and Exercise Program**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	-
<b>2010 Enacted</b>	-	-	<b>262,500</b>
2011 Adjustments-to-Base	-	-	(51,910)
<b>2011 Current Services</b>	-	-	<b>210,590</b>
<b>2011 Total Request</b>	-	-	<b>210,590</b>
Total Change 2010 to 2011	-	-	(51,910)

FEMA requests \$210,590,000 for this activity. There is a decrease of \$51,910,000 from FY 2010.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This PPA consists of grants, exercises, technical assistance, and training programs that includes: the National Exercise Program, Continuing Training Grant Program, National Domestic Preparedness Consortium, and the Technical Assistance and Evaluation and Assessment Program.

**National Exercise Program (NEP) - \$42 million**

The National Exercise Program (NEP) establishes a national, interagency-wide program to coordinate homeland security preparedness-related exercise activities. The NEP provides an organized approach to set priorities for exercises, reflects those priorities in a multi-year schedule of exercises that serves the strategic and policy goals of the U.S. Government, and addresses findings from those exercises in a disciplined interagency process.

The NEP is based on the following:

- *National Level Exercises:* Cabinet Officers and other key officials will be required to participate in five exercise events annually. One of these will be an

operations-based exercise (i.e., full scale or functional/command post), the National Level Exercise (NLE). NLEs will test existing policies, plans, and capabilities in concert with intergovernmental, private sector, and international partners, where appropriate.

*1. Proposed National Level Exercises:*

- 1. FY 10 – Domestic Terrorism – Improvised Nuclear Device*
- 2. FY 11 – Domestic Non-Terrorism – Major Earthquake*
- 3. FY 12 – International / Defense Crisis – Cyber Attack*
- 4. FY 13 – Domestic Non-Terrorism – Major Hurricane*

In addition, four discussion-based exercises (i.e., tabletops or seminars), known as Principal Level Exercises (PLE), will be conducted each year to address emerging issues.

- *Interagency Ownership:* The Domestic Readiness Group (DRG) Exercise and Evaluation Sub-Policy Coordination Committee (E&E Sub-PCC) will recommend priorities, schedules, and corrective action issues to the Deputies Committee. A multi-agency NEP Executive Steering Committee, chaired by DHS, will provide day-to-day coordination of the program and frame issues for the full E&E Sub-PCC (and the DRG as appropriate).
- *Five-Year Exercise Schedule:* A multi-year schedule of exercises and exercise topics will be presented to the Deputies no later than June 30 of each year, in advance of the budget call. Existing DHS and Department of Defense (DOD) exercise scheduling conferences will be used. The schedule will be driven by U.S. Government-wide strategic priorities.
- *Corrective Action Program (CAP):* To ensure meaningful exercise outcomes, a NEP CAP process will identify, analyze, prioritize, assign, and track progress on issues identified in NEP exercises.
- *Alignment of Other Exercises:* The NEP does not replace other exercise programs, although some individual Department and Agency exercises may be incorporated into NEP exercises where they align closely with the goals and objectives. With only one NLE (rather than two), more schedule time is available for Department and Agency internal preparatory activities, which may be used to prepare for future NEP events, given the five-year schedule, or to address other organizational priorities.
- *Lessons Learned Information Sharing (LLIS):* LLIS.gov is a web-based tool which serves as the national network of lessons learned, best practices, innovative ideas, and preparedness information for homeland security and emergency response professionals. With a community of over 46,000 members, LLIS.gov is also a network that enables those professionals to share their knowledge and expertise in a secure, online environment.

## **Recent and Planned Accomplishments**

### **FY 2009 Accomplishments:**

- Conducted National Level Exercise 2009 prevention exercise; produced after action documentation
- Implemented the Corrective Action Program (CAP) to identify areas for improvement and assigned agency contacts to track completion.
- Conducted four Principal-Level exercises, over 100 Regional, State and Local exercises.

### **FY 2010 Planned Accomplishments:**

- Conduct National-Level Exercise 2010 and plan Exercise 2011.
- Refine and improve data collection and evaluation processes used during exercises and real world events.
- Continue to analyze and integrate the functionality of the legacy CAP, RAMP, and LLIS systems. Conduct stakeholder meetings to define and prioritize requirements.
- Develop or enhance elements of the new RAMP to address data collection, analysis, reporting, trend analysis, and tracking for exercises and real world events.
- Refine LLIS.gov by identifying enhancements to system functionality and the user interface, and by generating, validating and disseminating Lessons Learned, Best Practices, Good Stories, and Practice Notes.

### **FY 2011 Planned Accomplishments:**

- Conduct National-Level Exercise 2011.
- Reform the National Exercise Program with a focus on smaller-scale, more efficient exercises that are based on validating plans.
- Conduct four Principal-Level Exercises.
- Continue the Regional Exercise Support Program and Terrorism Prevention Exercise Program (NEP Tier IV), promoting regional collaboration.
- Utilize the National Exercise Simulation Center (NESC) for National-level, Regional, State and local exercises.

### **National Domestic Preparedness Consortium (NDPC) (\$114 million)**

The NDPC consists of the following members:

- Center for Domestic Preparedness (CDP), Anniston, AL
- The Energetic Materials Research and Testing Center (EMRTC), New Mexico Institute of Mining and Technology (New Mexico Tech), Socorro, NM.
- The National Center for Bio-Medical Research and Training (NCBRT), Louisiana State University (LSU), Baton Rouge, LA.
- The National Emergency Response and Rescue Training Center (NERRTC) at Texas A&M University, College Station, TX.
- The U.S. Department of Energy's (DOE) Nevada Test Site (NTS)/Counter Terrorism Operations Support (CTOS).

The NDPC provides first responders with a comprehensive Weapons of Mass Destruction (WMD) training program that improves their capacity to prevent, protect against, respond

to, and recover from acts of terrorism. In administering this program, the Training and Exercise Integration (TEI) Division within the National Integration Center oversees, coordinates, and strives to institutionalize the development and delivery of comprehensive training that targets members of the responder community, providing WMD knowledge to enhance their skills and abilities. Ensuring the quality and consistency of training of first responders is a key element in FEMA's preparedness mission.

Each of the NDPC components focuses on development and delivery of products and services according to their institutional expertise. The Consortium specifically focuses on enhancing first responders' capability to prepare for, respond to, protect against, and recover from incidents involving chemical, biological, radiological, nuclear, or explosive (CBRNE) agents. Under this arrangement, the NDPC demonstrated results in the Nation's unified effort to bring all levels of government, business, and the emergency response community to enhanced levels of preparedness.

- **Center for Domestic Preparedness (\$62.5 million).** Funds for the Center for Domestic Preparedness (CDP), a component of FEMA's National Integration Center (NIC), are allocated to provide specialized terrorism preparedness training for State, local, and tribal emergency responders on capability-building skills tied to national priorities, especially those related to Weapons of Mass Destruction (WMD). The CDP maintains a campus of 124 acres and approximately 900,000 square feet of training and support facilities. This one of a kind national asset is the only federally chartered WMD training facility. The CDP offers a unique environment providing advanced, hands-on, all-hazards preparedness training to State, local, and tribal emergency responders. The facilities operated by the CDP offer a unique capability that enables responders to train using toxic nerve agents while ensuring an optimized and safe learning environment for students. Within the funding provided for FY 2011, \$5.5 million is to be used to operate the Noble Training Facility (NTF), which is the only hospital facility in the United States dedicated solely to training hospital and healthcare professionals in disaster preparedness and response operations. In addition to developing and delivering emergency responder training at various levels for a broad range of emergency response disciplines, the CDP also participates in efforts to standardize and decentralize this training for State, local, and tribal responders.

## **Recent and Planned Accomplishments**

### **FY 2009 Accomplishments**

- Conducted 98,970 direct and in-direct course completions. The advanced hands-on training enables responders to prevent, respond to, and recover from real world incidents involving acts of terror, hazardous materials, and manmade disasters.
- Developed a two-day Pandemic Influenza orientation course for delivery to the FEMA Incident Management Assistance Teams in preparation for potential H1N1 response requirements. The course was developed in collaboration with FEMA's

Disaster Operations and distributed to all FEMA regions within a two week expedited cycle.

- Provided training material and certificates in support of NIMS implementation at the state, tribal and local level for 1,872 ICS course deliveries by state and tribal approved authorized trainers to 28,833 state, local, and tribal emergency preparedness professionals.

#### **FY 2010 Planned Accomplishments**

- Enhance existing training venues (Noble Training Facility and COBRA Training Facility), by adding advanced CBRNE technology to training programs, enhancing scenarios by incorporating simulations as appropriate, and upgrading realistic training venue environments that further challenge the responder students' planning, decision-making skills, and the implementation of operational tactics.
- Identify and further expand training partnerships internal and external to DHS and FEMA that support the mission of the CDP and other agencies focused on State, local, and tribal emergency response capabilities to incidents of terrorism or natural disaster involving CBRNE or mass casualties.
- Focus mobile training efforts and increase capabilities by providing police academies, fire academies, community colleges, universities, and major metropolitan departments with opportunities to participate in the CDP's mentor program with the goal being to institutionalize CDP training and development of a local training delivery capability through partnerships designed to meet annual refresher and sustainment training requirements.

#### **FY 2011 Planned Accomplishments**

- Increase recognition and value of the Center's Noble Training Facility through accreditation, certification, and endorsement of leading healthcare regulatory, accreditation, and credentialing organizations.
- Expand healthcare training opportunities for State, local and tribal agencies by offering two healthcare courses through the Center's mobile training teams and developing two web-based courses for healthcare and public health professionals.
- Develop and implement one advanced performance-oriented CBRNE training course specifically designed for a task force or strike team response to, and mitigation of, hazards associated with terrorism, natural disasters, or accidents that incorporate target capabilities-based training objectives and operational activities within the COBRA Training Facility.
- Implement a quarterly integrated training exercise as a capstone end-of-course event for resident training that incorporates multiple target capabilities, incident command, and daytime and nighttime operational activities based on National Planning Scenarios that covers a minimum of two operational periods.
- Expand non-resident training capabilities by 10% by strategically building partnerships with State Administrative Agency (SAA) and FEMA Region training points of contact for the purpose of providing comprehensive training approaches that meet identified training needs in preparation for National Special Security Events and other risk-based requirements.

**Continuing Training Grant (CTG) Program (\$21.5 million)** Funds for the CTG are administered through the HSNTP and are managed by the Training and Exercise Integration Division within the National Integration Center (NIC). CTG programs traditionally meet the continuing training needs of responder communities and consist of current training partners that have previously received grant funding to provide training and education. In addition to providing training across various responder disciplines, CTG also includes programs that deliver homeland security curricula in the form of executive education programs and accredited master's degree education, such as the Center for Homeland Defense and Security (CHDS) at the Naval Postgraduate School in Monterey, CA.

### **Recent and Planned Accomplishments**

*Training and Exercise Integration (TEI) Division*

#### **FY 2009 Accomplishments**

- Training Delivery – Through the HSNP, TEI trained 125,943 responders in Fiscal Year 2009 in resident, non-resident, train-the-trainer and blended learning programs, and reached out to more than 151,000 responders with preparedness information through satellite broadcasts. TEI completed reviews of 14 courses, 63 instructor audits and 24 desk audits in FY09. Conducted site visits and/or attended course pilots for 100% of current training providers.
- Learning Management Systems Consolidation and Enhancement - Continued improvement to the Registration and Evaluation System (RES), to include Geographic Information System (GIS) capability, new issue tracking tools, and custom reporting functionality for end users.

#### **FY 2010 Planned Accomplishments**

- Learning Management Systems Consolidation & Enhancement - Enhance the Registration and Evaluation System (RES). Implement standardized form usable across FEMA training organizations. Develop a searchable online course catalog for FEMA training and partner with DHS to include FEMA training in an online compendium of homeland security training available across the Nation. Continue working group process to develop documentation on standardized business practices and finalize technical requirements for systems integration for FEMA training entities.
- Training Delivery - Train an additional 110,000 responders in resident, non-resident, Train-the-Trainer and blended learning programs. Develop and deliver an additional 12 live response satellite broadcasts that address relevant FEMA issues and programs. Analyze products from 2009 NDPC Strategy and update as necessary. Conduct course audits in ten percent of TEI approved classes.
- National Training Program Support - Conduct a series of roundtable discussions with senior leaders and training professionals across the Nation about the National

Training Program, define and prioritize requirements, and draft a national training strategy. Continue alignment of existing training courses and development of an appropriate framework for training.

### **FY 2011 Planned Accomplishments**

- Learning Management Systems Consolidation & Enhancement - Continue to enhance and integrate the Registration and Evaluation System (RES). Begin design and development of consolidated learning systems using standardized business practices for FEMA training entities.
- Training Delivery - Train an additional 125,000 responders in resident, non-resident, Train-the-Trainer and blended learning programs. Develop and deliver an additional 12 live response satellite broadcasts that address relevant FEMA issues and programs. Analyze products from 2010 NDPC Strategy and update as necessary. Conduct course audits in ten percent of TEI approved classes. Continue conducting course review and certification of 100% of courses developed by TEI Training Partners.
- National Training Program Support - Finalize national training strategy and begin implementation. Coordinate and publish a series of documents which provides policy, guidance, and smart practices related to training design, development, delivery, and evaluation. Convene meetings with stakeholders to provide ongoing management and maintenance. Continue alignment of existing training courses and development of an appropriate framework for training.

### **Technical Assistance (TA) and Evaluation and Assessment Program (\$33 million)**

The Homeland Security Planning & Technical Assistance Program (HSPTAP) is a capabilities-based program structured to build and sustain State and local capacity in priority preparedness activities. Under this vision, the TA services developed and delivered to State and local homeland security personnel address the full spectrum of the goals, priorities, and capabilities outlined in the National Preparedness Guidelines. As capability gaps are identified, the TA program develops services that can address those needs and build priority capabilities in the most critical areas. Throughout all of the technical assistance programs, planning guidance and support is a common thread. The TA program is designed to be an agile program that addresses present day areas of greatest State and local need.

The program is committed to transferring and institutionalizing knowledge at the State and local level and provides a dynamic menu of services responsive to national priorities. The TA program is performance-based and effectively leverages limited resources. TA support is provided through lessons learned and best practices, planning guidance and templates, and direct support through workshops, subject-matter expert access, and planner support.

Technical assistance support requirements are characterized into three areas:

- Planning Services
- Prevention
- Grants Management

The Technical Assistance Program's processes will also serve as a conduit for direct support from other Directorates within FEMA, and potentially other components within the Department.

**Response & Recovery TA** – The enhancement of response and recovery capabilities at all levels of government is critical to national preparedness. Planning services are provided in support of all threats and hazards. The programs under this category draw on the subject-matter expertise resident within FEMA and the Department overall, as well as from throughout the emergency response community. The primary focus for this support is on planning for catastrophic events, as well as enhancing overall planning to provide for improved deliberate and crisis action planning at the State and local level. Additionally, these services will support the development of planning guidance and planning standards or measures. Finally, these services will be leveraged to provide support to specialized planning projects, such as the Regional Catastrophic Preparedness Program and the Task Force for Emergency Readiness (TFER).

- **Planning Services TA** – The enhancement of planning and planning capabilities at all levels of government is critical to national preparedness. Planning services are provided in support of all threats and hazards, as well as across all Target Capabilities. The programs under this category draw on the subject-matter expertise resident within FEMA and the Department overall, as well as from throughout the emergency response community. The primary focus for this support is on planning for catastrophic events, as well as enhancing overall planning to provide for improved deliberate and crisis action planning at the State and local level. Additionally, these services will support the development of planning guidance and planning standards or measures. Finally, these services will be leveraged to provide support to specialized planning projects, such as the Regional Catastrophic Preparedness Program and the Task Force for Emergency Readiness (TFER).
- **Prevention/Protection TA** - The establishment of a network of fusion centers to facilitate effective nationwide information sharing is a top priority that requires close collaboration among Federal, State, and local partners. To facilitate the development of a national fusion center capability, the U.S. Department of Homeland Security (DHS) FEMA National Preparedness Directorate (NPD) and the U.S. Department of Justice's (DOJ) Bureau of Justice Assistance (BJA) have partnered to develop the *Fusion Process Technical Assistance Program*. This program has been developed in support of the DHS Office of Intelligence and Analysis (I&A) and in coordination with the Office of the Director of National Intelligence (ODNI); the Office of the Program Manager, Information Sharing Environment (PM-ISE); the Federal Bureau of Investigation (FBI); and experts

from the State and local community— including the Global Justice Information Sharing Initiative (Global), the Criminal Intelligence Coordinating Council (CICC), and the Global Intelligence Working Group (GIWG). The joint DHS FEMA NPD/DOJ Fusion Process Technical Assistance Program provides several direct support and subject matter expert (SME) services focusing on fusion centers. This includes assistance to State and local jurisdictions on developing, implementing, and operating fusion centers. The program also provides support to identifying best practices in integrating protection activities, in partnership with the DHS Office of Infrastructure Protection, with prevention. Finally, the program supports the integration of planning guidance and support to prevention / protection efforts.

- **Grants Management Technical Assistance** - We are requesting that a separate budget line item for Grants Management Technical Assistance (TA) be continued. The *Grants Management Technical Assistance Program* facilitates grants management through focused technical assistance for all FEMA's grantees on pressing issues and concerns faced in the management of FEMA grants. The main objectives of Grants Management TA are to: (1) help participants in developing/revising effective policies, procedures, and practices in critical areas of grants management; (2) facilitate problem-solving in addressing specific grants management issues; (3) apply proven business practices that will create greater efficiency in the use of human capital to meet grants management priorities (i.e., monitoring, strategic planning, organization, program implementation, drawdown, staff training, auditing, and performance measurement); (4) improve participants' ability to conduct successful Federal and State programmatic and financial monitoring; (5) prepare participants for performance and financial audits; (6) improve participants' decision-making skills by focusing on more performance-oriented solutions which are consistent with State strategies and priorities; and (7) improve collaboration among policy, program, and financial staff as an effective means to integrate grants management operations.

## **Recent and Planned Accomplishments**

### **FY 2009 Accomplishments**

- Provided over 120 TA deliveries to States and Localities addressing all topic areas to support capability enhancement.
- Released national planning guidance for State and Local jurisdictions - Comprehensive Preparedness Guide (CPG) 101.
- Co-sponsored the 2009 National Fusion Center Conference, the CIKR Capabilities for Fusion Centers Workshop, and the Regional Fusion Center workshops with the FEMA Regions and I&A.

### **FY 2010 Planned Accomplishments**

- Expand programs and activities to increase planning and technical assistance across all mission areas, to include coordinating prevention and protection information into response, recovery, and mitigation planning.
- Conduct the Nationwide Plan Review and complete five additional CPGs as prioritized to address preparedness requirements.
- Support national fusion center initiatives, including the 2010 National Fusion Center Conference and stand up of the DHS Joint Fusion Center Program Management Office (PMO).

### **FY 2011 Planned Accomplishments**

- Expand available technical assistance programs to provide increasingly specialized support to state and local governments.
- Expand national-level planning guidance across all mission areas. Increase direct support programs to expedite the revision of State Emergency Operations Plans and the development of Regional Base Plans.
- Continue to partner with interagency representatives, to include Emergency Support Function leads, to ensure planning requirements are addressed across all mission areas.
- Continue to partner with interagency partners, including the FBI, DHS Intelligence and Analysis (I&A), and the Office of the Director of National Intelligence (ODNI) to support development and implementation of new services in support of the achievement of baseline capabilities.

The National Preparedness Directorate (NPD) Evaluations and Assessments program works to measure the effectiveness of preparedness programs and develop policy in support of its all-hazards preparedness mission. These efforts gather, analyze, and interpret national and program-specific data in the context of national preparedness strategy and guidance documents, as well as supporting threat, vulnerability, and needs assessments.

- **Comprehensive Assessment System.** In support of various requirements to develop a comprehensive assessment system, in FY 2009 NPD conducted a comprehensive review of six major assessment systems developed by DHS/FEMA in the last decade and collected preparedness data from several FEMA, DHS, and Federal Departments/Agencies. The results of this analysis are being used to inform the development and implementation of a single, nationally-integrated system and process capable of assessing the level of national preparedness. In FY 2010 and FY 2011, the Preparedness Policy, Planning, and Analysis division will expand this work in the development of a comprehensive assessment system using the technical architecture of several legacy assessment systems.
- **National Preparedness Policy.** NPD evaluates and updates existing policies and guidance related to the development and implementation of a National Preparedness System and Goal. Policies and guidance will include, among

others, the National Preparedness Guidelines, the National Planning Scenarios, and supporting documents.

- **Performance Measures and Metrics.** NPD continually tracks data on a large number of program metrics and milestones at the request of DHS, OMB and the Congress. These metrics and milestones are reported quarterly and allow FEMA to demonstrate the effectiveness and efficiency of NPD programs and provide data to inform assessment projects.
- **Reporting Requirements**
  - **Federal Preparedness Report (FPR).** The FPR is an annual report on current national preparedness levels in planning, organization, equipment, training, exercises, and evaluation that includes data drawn from all levels of government. The FPR represents an ongoing effort to conduct a comprehensive assessment of national preparedness at the Federal, State, and local levels. **State Preparedness Report (SPR).** Each State or territory receiving Federal assistance must submit an annual report on its level of preparedness to FEMA. FEMA collects the reports from all 56 States and territories and reviews and analyzes them in order to produce substantive analysis on nationwide trends, identify areas for increased attention, and inform broader assessments of national preparedness.
  - **Additional Reporting Requirements.** The National Preparedness Report (NPR) drafted by NPD in FY 2009 was a first of its kind analytical capstone designed to fulfil five congressionally mandated preparedness reporting requirements while providing a heightened level of preparedness data evaluation. The NPR includes the Federal Preparedness Report, Catastrophic Resource Report, Emergency Support Function (ESF) Report, and Emergency Medical Services (EMS) Report; and includes a summation of the State Preparedness Reports submitted annually by the States to FEMA. The consolidation of the five subordinate reports into one capstone document is intended to allow integration and much improved analysis of the disparate information contained in those reports and to decrease the reporting burden on Federal, State and local respondents. NPD will continue to meet reporting requirements in either a capstone report or in separate reports in FY 2011.
- **Prevention Preparedness Policy and Analysis.** It is a critical priority for the Nation to help States, local jurisdictions, and Federal partners in achieving prevention-related national priorities identified in the National Preparedness Guidelines. The Prevention Preparedness Policy and Analysis goal is to design and build State and local prevention programs, appropriately allocate prevention resources, and create prevention capabilities. To achieve this goal, the program will identify the major planning tasks, deliverables, priorities, and milestones, as well as provide policy oversight for prevention technical assistance, training, exercises, and evaluations and assessments. The activities within this program also include serving as an executive agent managing and maintaining the Universal Adversary Program, the National Planning Scenarios (NPS), and the

NPS Universal Adversary (UA) (prevention) prequels for DHS on behalf of interagency and intergovernmental clients.

- **National Preparedness Task Force.** NPD is leading the administrative effort of a Local, State, Tribal and Federal Preparedness task force. The task force is intended to review and revise as necessary the fundamental ways we assess preparedness. It is charged with making recommendations for all levels of government regarding disaster and emergency guidance and policy; federal grants; and federal requirements, including measuring efforts. The task force will evaluate which policies and guidance need updating and the most appropriate way to collectively assess our capabilities and capability gaps.

## **Recent and Planned Accomplishments**

### **FY 2009 Accomplishments**

- Collected preparedness data from State partners as well as from other FEMA components, DHS, and other Federal Departments/Agencies through the CAS Working Group, the Emergency Support Function (ESF) Survey, and the State Preparedness Reports for analysis for briefings to Congress and FEMA leadership. Drafted the first the National Preparedness Report (NPR), now in review.
- Developed first quantitative, web-based State Preparedness Report (SPR) Survey, now in review. Held a series of workshops and webinars with State/Territory and FEMA Regional Stakeholders to develop the PrepCAST, an online web portal with consolidated access to the National Incident Management System Capability Assessment Tool (NIMSCAST) and the new web-based SPR Survey Tool and the analytical tools to provide users with a single, integrated capabilities-based system. Pilot tested the SPR Survey Tool through webinars and the Grant Preparedness Directorate's Cost to Capabilities (C2C) pilot initiative.
- Completed the development of 18 Target Capabilities in an updated format to reflect feedback and lessons learned from the user community to be risk-based, measurable, and user-friendly. Updated drafts were developed through federal, State, and local government working groups involving over 650 practitioners from across the country using NIMS Resource Typing Work Groups, the FEMA Regions, and other forums with subject-matter expertise.

### **FY 2010 Planned Accomplishments**

- Substantially revise or develop a new SPR Survey Tool based on recent guidance to reduce user burden and reduce subjectivity of reporting. Release final version of FY09 SPR Survey Tool for State/territorial SPR submissions. Complete design for PrepCAST as a single portal for several FEMA surveys begun in FY 2009. Design a single annual questionnaire for State and local reporting that combines several existing and pilot FEMA surveys that would use PrepCAST.

- Collect preparedness data for analysis for reporting requirements and for briefings to Congress and FEMA leadership. Submit to Congress required reports including the Federal Preparedness Report, State Preparedness Reports Summation, Catastrophic Resource Report, Emergency Support Functions Report, and Emergency Medical Services Report. Develop new performance measures for each budget line. Increase the number of analyzable data sources in the Comprehensive Assessment System that feed into NPD's analysis and double the number of ways NPD assesses preparedness.
- Modify national preparedness goals to reflect any revision or successor to Homeland Security Presidential Directive-8 and the recommendations of the new National Preparedness Task Force.

### **FY 2011 Planned Accomplishments**

- Implement reporting requirements and methods of measuring preparedness that will result from the deliberations of the National Preparedness Task Force. NPD anticipates it will need to integrate a broader universe of State and local preparedness and grant reporting requirements than it planned for in FY 2010 and substantially revise and streamline or start from scratch on a new method of measurement.
- Finalize revisions to the National Preparedness Goal and Target Capabilities List or its successor and establish a maintenance and management process for continuously evaluating, updating, revising, or modifying the guidelines based upon lessons learned, changes in policy or doctrine, and the understanding of risks and capabilities in coordination with appropriate Federal, State, and local subject matter experts and practitioners.
- Establish a maintenance and management process for evaluating, updating, revising, or modifying the suite of national preparedness policies and guidance, including the National Preparedness Guidelines and the National Planning Scenarios to meet the needs of preparedness and operational programs and policies.
- Update attack tree and prequel-scenarios and perform red-team analysis to regularly inform the development of Federal interagency strategic plans, concept plans, and DHS operational plans under the National Planning System. Complete the revision of attack trees and prequel scenarios documentation for the 12 terrorism-related National Planning scenarios.
- Collect preparedness data for analysis for reporting requirements and for briefings to Congress and FEMA leadership. Submit to Congress required reports including the Federal Preparedness Report, State Preparedness Reports Summation, Catastrophic Resource Report, and Emergency Medical Services Report. Increase the number of analyzable data sources in the Comprehensive Assessment System including data from a new program in development to train third party observers of real world events and exercises.

**Department of Homeland Security  
Federal Emergency Management Agency  
State and Local Programs  
Management and Administration  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Management and Administration**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	-
<b>2010 Enacted</b>	<b>664</b>	<b>616</b>	-
<b>2011 Current Services</b>	<b>664</b>	<b>616</b>	-
<b>2011 Total Request</b>	<b>664</b>	<b>616</b>	-
Total Change 2010 to 2011	-	-	-

FEMA requests for program management and administration, not to exceed 4.7 percent of total funding for State and Local Programs/Firefighter Assistance Grants. These funds will be transferred to the Management and Administration account after enactment. This would fund 664 positions, and 616 FTE for this activity.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Management and Administration (M&A) includes traditional operational and program management support resources for the Grants Programs Directorate (GPD) and National Preparedness Directorate (NPD). This account covers the salaries and benefits for headquarters and regional staff, travel, rent, printing and supplies, related preparedness activities, administration activities, and contributions to the DHS Working Capital Fund.

**National Preparedness Program - 391 Pos/362 FTE**

- **Incident Management Systems Integration (IMSI)**  
NPD serves as the Executive Agent for the National Response Framework (NRF) in support of the National Integration Center. IMS coordinates and brokers agency and interagency planning initiatives in support of operational response and recovery objectives for the NRF and the National Incident Management System (NIMS). The IMS plays a critical role in coordinating the various components of the NRF to ensure that the NRF remains linked to and based upon the NIMS.

## **Recent and Planned Accomplishments**

### **FY 2009 Accomplishments**

- Completed the revision and national distribution of NIMS doctrine and associated guides dealing with credentialing, law enforcement, standardized incident management forms, field operations guide and resource management and typing guidelines; initiated design and development of a doctrine and publication management system.
- Developed and revised NIMS and NRF training materials.
- Conducted NRF and NIMS outreach efforts, including: implementation of the Title IX Program to establish the accreditation and certification processes for the Private Sector Preparedness Voluntary Accreditation and Certification Program; development and implementation of a national mutual aid system to include supporting the creation of formalized, comprehensive, exercised, intrastate mutual aid systems in all, strengthen partnerships in the FEMA regions and oversee the outreach and education programs with FEMA, DHS and other Federal components, State, local, tribal, hospital, and healthcare partners.

### **FY 2010 Planned Accomplishments**

- Review, revise, and distribute the National Incident Management System (NIMS) doctrine and associated guides and the National Response Framework (NRF) based on lessons learned and stakeholder input and continue NRF and NIMS outreach efforts to support and facilitate the enhancement of existing and new incident management programmatic and operational standards for consistency with NIMS principles and doctrine.
- Complete and distribute Area Command Guide, Multiagency Coordination Guide and EOC Guide with associated forms to ensure common operating picture within the coordination systems supporting Incident Commanders.
- Implement the Title IX Private Sector Preparedness program through each FEMA Region.
- In FY 2010 IMSI will use the increased funding of \$8 million to enhance mutual aid through investing in enhancing EMAC, increasing incident management interoperability, pilot testing ROSS in a state-wide deployment, as well as completion of key NIMS documents and guidelines on ICS, Training, and Credentialing.
- Establish (in coordination with DHS Office of Intergovernmental Affairs), a Federal, State, Tribal, and Local preparedness task force to make recommendations for all levels of government regarding: disaster and emergency guidance and policy; federal grants; and federal requirements, including measuring efforts.
- Evaluate policies and guidance and determine those that require and the optimal way to do so; which grant programs work the most efficiently and where

programs can be improved; and the most appropriate way to collectively assess capabilities and gaps.

- Produce recommendations (on a rolling basis as well as in a comprehensive written report) by the end of FY10 to include actions and an implementation plan.

### **FY 2011 Planned Accomplishments**

- Review, validate and update the NIMS Typed Resources and NIMS Job Titles with qualifications for mutual aid deployment.
- Review, validate and update the NIMS Job Aids, e.g. ERFOG, ICS Forms, Positions Qualification Guide and the Command and General Staff Position Task Books.
- Review established doctrine publication management system based on lessons learned and revise needed.
- Complete biennial review and revision of the National Incident Management System (NIMS) document, revise the NRF core document, and expand the Title IX Private Sector Preparedness through FEMA regions, identify, assess and/or validate equipment and technologies that will support incident management and disaster preparedness.

- **Emergency Management Institute (EMI)**

The planning and systems aspects of the National Preparedness Directorate are complemented by the EMI which provides training to Federal, State, local, tribal, volunteer, public and private sector officials to strengthen emergency management core competencies, including incident management, operational planning, disaster logistics, emergency communications, disaster assistance, continuity programs, public disaster communications, integrated preparedness, and hazard mitigation. EMI directly supports the implementation of NIMS, the NRF, and the National Preparedness Guidelines (NPG) by conveying necessary knowledge and skills to practitioners. EMI uses a diverse training delivery system that includes residential on-site training; off-site delivery in partnership with emergency management training systems, colleges, and universities; and technology-based mediums to conduct individual training courses for emergency response personnel across the Nation.

### **Recent and Planned Accomplishments**

#### **FY 2009 Accomplishments**

- Conducted the first emergency management orientation for Historically Black Colleges and Universities (HBCU) in support of the White House initiative to provide information on the emergency management profession; provided career information related to FEMA and general EM opportunities, expanded the established emergency management curricula to incorporate the HBCUs as EMI

- Higher Education Consortium members, and support emergency management planning, and disaster responses.
- In partnership with USNORTHCOM, developed and delivered the first-ever U.S.-Mexico Integrated Emergency Management Course/Knowledge Exchange. Thirty-four U.S. and 27 Mexico students participated in this week-long, exercise-based activity to strengthen partnerships with Mexico and interagency partners and support broader U.S. security and prosperity goals.
  - In coordination with other FEMA and DHS components, led the development and delivery of a comprehensive DHS Transition training and exercise program to assist in the transition of new political appointees and senior career executives into the Department. More than 260 appointees and seniors executives from 22 DHS agencies participated in the program. This program is morphing to a more comprehensive DHS senior leadership training activity

### **FY 2010 Planned Accomplishments**

- Participate actively in the continued integration of NIC training and exercise programs and incorporation of HSEEP doctrine into its exercise-based training programs to include programs for the FEMA Regional Response Coordination Centers (RCC). EMI will expand its exercise-based training programs to include a focus on Emergency Operations Center (EOC) and Incident Management Team (IMT) interface at the local, State and Federal levels. EMI will conduct six regional/national based Senior Leadership exercise-based classes regarding pandemic planning.
- Modeling on the HBCU initiative to disseminate emergency management related information to minority institutions of higher education, EMI will build a Tribal college/University (TCU) Program as well as develop increased tribal nation capacity for training and delivery of FEMA activities.
- Develop, using the additional \$1.9 million of funding allocated in FY 10, 18 new courses targeted at its State, Local, and Tribal audiences for resident, field and independent study delivery, as well as fund limited technology upgrades in resident classrooms. These new courses represent the first large new development for State-delivered courses in nearly a decade.

### **FY 2011 Planned Accomplishments**

- Analyze financial and programmatic impact of alternate options for training delivery such as remote delivery and increased mobile offerings that are not resident facility dependent.
- Design a training curriculum to educate and certify planners to support implementation of a national planning system.
- Extend the higher education outreach to Hispanic Serving Institutions (HSIs) by offering the Emergency Management Preparedness, Planning, Training and Education for Colleges and Universities course designed to provide college

and university executives an introduction to emergency management, a basic overview of EMI's Higher Education Program, career information on emergency management, and other information regarding FEMA activities.

- Deploy the Executive Emergency Management Officer Program, a competitive curricula for executive level federal, State, local and tribal emergency management professionals and affiliated organizations. The program will be designed to address the latest developments and new requirements of emergency management and their impact on the field, and will model other executive level programs such as the Federal Executive Institute, the Homeland Security Institute and the Naval Post Graduate School.
- Develop and deploy a revised Master Trainer Program (MTP) based on an analysis of the existing program underway in FY 10. The MTP is a series of courses designed to develop a cadre of training professionals to achieve national capability in emergency management through training at all levels of government and related organizations.

### **Grant Preparedness Program – 273 Pos/254 FTE**

The Grant Program Directorate has three primary functions: 1) Grants Accountability and Oversight; 2) Business Support and Data Analysis; and 3) Program Development and Administration.

- **Grants Accountability and Oversight** – This function manages the business processes necessary for all pre-award activities including the announcing of funding opportunities, accepting and reviewing applications, determining award eligibility, and providing quality control over grants award documents and processing award packages. This function manages all post-award activities, such as monitoring grantees, processing modifications, generating amendments, reviewing grantee financial status reports, and coordinating grant closeout. The function also assists in the coordination and monitoring of key grant-related audit activities, i.e., OIG, GAO, Single Audit Act, and the independent financial auditor.
- **Business Support and Data Analysis** – This function provides a single mechanism to analyze, synthesize, and present grant-related financial data. Responding to increasingly intense scrutiny of FEMA's stewardship of grant and assistance resources, this function will provide the Congress and the White House with information demonstrating accountability and oversight of billions of dollars.
- **Program Development and Administration** – This function serves as the executive agent for development of grant guidance for the annual Homeland Security grant programs; provides programmatic oversight and technical assistance for grant administration, monitoring, and reporting; and is a principal liaison for interagency programmatic collaboration and coordination.

## **Recent and Planned Accomplishments**

### **FY 2009 Accomplishments**

- Monitored state and local grant administration and spending through the development of tools, policies, and report templates.
- Provided outstanding customer service to all grantees as well as internal and external partners via the Customer Service Center.
- The Non-Disaster Grants Management System, which is intended to support the full lifecycle of non-disaster grants within the Department of Homeland Security, went live with pre-award through award functionality for a selected number of programs.

### **FY 2010 and 2011 Planned Accomplishments**

- Manage the suite of FEMA grant programs and monitor state and local grant administration and spending.
- Provide outstanding customer service to all grantees as well as internal and external partners via the Customer Service Center.
- Improve grants management systems in an effort to provide grantees with full-life cycle grants administration support using one system for non-disaster grants.
- Build a robust and standardized data analysis capability through the implementation of innovative systems and technology improvements. These activities quantify the benefits we provide and demonstrate the importance of grants management to Homeland Security priorities.

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Federal Emergency Management Agency  
Justification of Proposed Changes in State and Local Programs  
Appropriation Language**

State and Local Programs  
(including transfer of funds)

For grants, contracts, cooperative agreements, and other activities, [\$3,015,200,000] **\$4,000,590,000** shall be allocated as follows:

(1) *\$2,040,000,000 shall be for the State and Regional Preparedness Program, of which-*

[(1) \$950,000,000](A) **\$1,050,000,000** shall be for the State Homeland Security Grant Program under section 2004 of the Homeland Security Act of 2002 (6 U.S.C. 605): *Provided*, That of the amount provided by this paragraph, [\$60,000,000] **\$50,000,000** shall be for Operation Stonegarden *to address the Nation's Southwest Border security issues: Provided further*, That notwithstanding subsection (c)(4) of such section 2004, for fiscal year [2010] **2011**, the Commonwealth of Puerto Rico shall make available to local and tribal governments amounts provided to the Commonwealth of Puerto Rico under this paragraph in accordance with subsection (c)(1) of such section 2004.

[(2) \$887,000,000 shall be for the Urban Area Security Initiative under section 2003 of the Homeland Security Act of 2002 (6 U.S.C. 604), of which, notwithstanding subsection (c)(1) of such section, \$19,000,000 shall be for grants to organizations (as described under section 501(c)(3) of the Internal Revenue Code of 1986 and exempt from tax section 501(a) of such code) determined by the Secretary of Homeland Security to be at high risk of a terrorist attack.]

[(3)](B) \$35,000,000 shall be for Regional Catastrophic Preparedness Grants.

[(4) \$41,000,000 shall be for the Metropolitan Medical Response System under section 635 of the Post-Katrina Emergency Management Reform Act of 2006 (6 U.S.C. 723).]

[(5) \$13,000,000 shall be for the Citizen Corps Program.]

**(C) \$345,000,000 shall be for Emergency Management Performance Grants, as authorized by the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.), the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et**

seq.), the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7701 et seq.), and Reorganization Plan No. 3 of 1978 (5 U.S.C. App.).

(D) \$610,000,000, to remain available until September 30, 2012, shall be for necessary expenses for the Firefighter Assistance Grants program authorized by the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2201 et seq.), of which \$305,000,000 shall be available to carry out section 33 of that Act (15 U.S.C. 2229) and of which \$305,000,000 shall be available to carry out section 34 of that Act (15 U.S.C. 2229a).

(2) \$1,750,000,000 shall be for the Metropolitan Statistical Area Preparedness Program, of which-

(A) \$1,100,000,000 shall be for the Urban Area Security Initiative under section 2003 of the Homeland Security Act of 2002 (6 U.S.C. 604), of which up to \$200,000,000 is for use in the provision of additional security involved in hosting terror-related trials.

[(6)](B) \$300,000,000 shall be for Public Transportation Security Assistance and Railroad Security Assistance, under sections 1406 and 1513 of the Implementing Recommendations of the 9/11 Commission Act of 2007 (Public Law 110-53; 6 U.S.C. 1135 and 1163), of which not less than \$20,000,000 shall be for Amtrak security: *Provided*, That such public transportation security assistance shall be provided directly to public transportation agencies.

[(7)](C) \$300,000,000 shall be for Port Security Grants in accordance with 46 U.S.C. 70107[, notwithstanding 46 U.S.C. 70107(c)].

[(8) \$12,000,000 shall be for Over-the-Road Bus Security Assistance under section 1532 of the Implementing Recommendations of the 9/11 Commission Act of 2007 (Public Law 110-53; 6 U.S.C. 1182).]

[(9)](D) \$50,000,000 shall be for Buffer Zone Protection Program Grants.

[(10) \$50,000,000 shall be for the Driver's License Security Grants Program in accordance with section 204 of the REAL ID Act of 2005 (49 U.S.C. 30301 note).]

[(11) \$50,000,000 shall be for the Interoperable Emergency Communications Grant Program under section 1809 of the Homeland Security Act of 2002 (6 U.S.C. 579).]

[(12) \$60,000,000 shall be for grants for Emergency Operations Centers under section 614 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5196c) to remain available until expended, of which no less than the amount specified for each Emergency Operations Center shall be provided as follows: \$500,000, Benton County Emergency Management Commission, Iowa; \$100,000, Brazoria County Emergency Management, Texas; \$800,000, Butte-Silver Bow, Montana; \$338,000, Calvert County Department of Public Safety, Maryland; \$425,000, City of Alamosa Fire Department, Colorado; \$600,000, City of Ames, Iowa; \$250,000, City of Boerne, Texas;

\$500,000, City of Brawley, California; \$300,000, City of Brigantine, New Jersey; \$350,000, City of Brookings, Oregon; \$1,000,000, City of Chicago, Illinois; \$1,000,000, City of Commerce, California; \$300,000, City of Cupertino, California; \$1,000,000, City of Detroit, Michigan; \$750,000, City of Elk Grove, California; \$400,000, City of Green Cove Springs, Florida; \$600,000, City of Greenville, North Carolina; \$300,000, City of Hackensack, New Jersey; \$800,000, City of Hartford, Connecticut; \$250,000, City of Hopewell, Virginia; \$254,500, City of La Habra, California; \$600,000, City of Las Vegas, Nevada; \$750,000, City of Lauderdale Lakes, Florida; \$750,000, City of Minneapolis, Minnesota; \$375,000, City of Monterey Park, California; \$400,000, City of Moreno Valley, California; \$1,000,000, City of Mount Vernon, New York; \$1,000,000, City of Newark, New Jersey; \$900,000, City of North Little Rock, Arkansas; \$350,000, City of Palm Coast, Florida; \$750,000, City of Port Gibson, Mississippi; \$500,000, City of Scottsdale, Arizona; \$750,000, City of Sunrise, Florida; \$500,000, City of Tavares, Florida; \$400,000, City of Torrington, Connecticut; \$900,000, City of Whitefish, Montana; \$500,000, City of Whittier, California; \$500,000, City of Wichita, Kansas; \$500,000, Columbia County, Oregon; \$500,000, County of Union, New Jersey; \$400,000, Dorchester County, South Carolina; \$200,000, Fulton County (Atlanta) Emergency Management Agency, Georgia; \$250,000, Howell County Emergency Preparedness, Missouri; \$500,000, Jackson County Sheriff's Office, Missouri; \$750,000, Johnson County, Texas; \$500,000, Kentucky Emergency Management, Kentucky; \$800,000, Lake County, Florida; \$600,000, Lea County, New Mexico; \$1,000,000, Lincoln County, Washington; \$250,000, Lycoming County, Pennsylvania; \$250,000, Macomb County Emergency Management and Communications, Michigan; \$300,000, Mercer County Emergency Management Agency, Kentucky; \$1,000,000, Middle Rio Grande Development Council, Texas; \$250,000, Minooka Fire Protection District, Illinois; \$800,000, Mobile County Commission, Alabama; \$200,000, Monroe County, Florida; \$1,000,000, Morris County, New Jersey Office of Emergency Management, New Jersey; \$750,000, New Orleans Emergency Medical Services, Louisiana; \$1,000,000, North Carolina Office of Emergency Management, North Carolina; \$500,000, North Hudson Regional Fire and Rescue, New Jersey; \$980,000, North Louisiana Regional, Lincoln Parish, Louisiana; \$1,500,000, Ohio Emergency Management Agency, Columbus, Ohio; \$250,000, Passaic County Prosecutor's Office, New Jersey; \$980,000, City of Providence, Rhode Island; \$800,000, San Francisco Department of Emergency Management, California; \$300,000, Sarasota County, Florida; \$650,000, Scotland County, North Carolina; \$500,000, Somerset County, Maine; \$1,500,000, State of Maryland, Maryland; \$158,000, City of Maitland, Florida; \$500,000, Tohono O'odham Nation; \$75,000, Towamencin Township, Pennsylvania; \$275,000, Town of Harrison, New York; \$500,000, Town of Shorter, Alabama; \$750,000, Township of Irvington, New Jersey; \$500,000, Township of Old Bridge, New Jersey; \$247,000, Township of South Orange Village, South Orange, New Jersey; \$500,000, Upper Darby Township Police Department, Pennsylvania; \$165,000, Village of Elmsford, New York; \$350,000, Washington Parish Government, Louisiana; \$900,000, Westmoreland County Department of Public Safety, Pennsylvania; \$1,000,000, Williamsburg County, South Carolina; and \$20,000, Winston County Commission, Alabama.]

[(13) \$267,200,000 shall be for training, exercises, technical assistance, and other programs, of which\_]

**(3) \$210,590,000 shall be for the Training, Measurement, and Exercise Program, of which-**

(A) [\$164,500,000] **\$114,000,000** shall be for the National Domestic Preparedness Consortium in accordance with section 1204 of the Implementing Recommendations of the 9/11 Commission Act of 2007 (6 U.S.C. 1102), of which \$62,500,000 shall be for the Center for Domestic Preparedness; [\$23,000,000] **\$12,875,000** shall be for the National Energetic Materials Research and Testing Center, New Mexico Institute of Mining and Technology; [\$23,000,000] **\$12,875,000** shall be for the National Center for Biomedical Research and Training, Louisiana State University; [\$23,000,000] **\$12,875,000** shall be for the National Emergency Response and Rescue Training Center, Texas A&M University; [\$23,000,000] **\$12,875,000** shall be for the National Exercise, Test, and Training Center, Nevada Test Site; [\$5,000,000 shall be for the Natural Disaster Preparedness Training Center, University of Hawaii, Honolulu, Hawaii;\$5,000,000 shall be for surface transportation emergency preparedness and response training to be awarded under full and open competition;]

[(B) \$1,700,000 shall be for the Center for Counterterrorism and Cyber Crime, Norwich University, Northfield, Vermont; and]

[(C) \$3,000,000 shall be for the Rural Domestic Preparedness Consortium, Eastern Kentucky University:]

**(B) \$21,590,000 shall be for the Continuing Training Grants Program.**

**(C) \$33,000,000 shall be for Technical Assistance and Evaluations and Assessments.**

**(D) \$42,000,000 shall be for the National Exercise Program:**

Provided, That [4] *not to exceed* 4.7 percent of the amounts provided under this heading shall be transferred to the Federal Emergency Management Agency "Management and Administration" account for program administration [, and an expenditure plan for program administration shall be provided to the Committees on Appropriations of the Senate and the House of Representatives within 60 days after the date of enactment of this Act]: [Provided further, That notwithstanding section 2008(a)(11) of the Homeland Security Act of 2002 (6 U.S.C. 609(a)(11)), or any other provision of law, a grantee may use not more than 5 percent of the amount of a grant made available under this heading for expenses directly related to administration of the grant:] *Provided further*, That for grants under paragraphs (1)(A), [through (5)](1)(B), and (2)(A), the applications for grants shall be made available to eligible applicants not later than 25 days after the date of enactment of this Act, [that] eligible applicants shall submit applications not later than 90 days after the grant announcement, and [that] the Administrator of the Federal Emergency Management Agency shall act within 90 days after receipt of an application: *Provided further*, That for grants under paragraphs [(6)](2)(B) through [(11)](2)(D), the

applications for grants shall be made available to eligible applicants not later than 30 days after the date of enactment of this Act, [that] eligible applicants shall submit applications within 45 days after the grant announcement, and [that] the *Administrator of the Federal Emergency Management Agency* shall act not later than 60 days after receipt of an application: *Provided further*, That for grants under paragraphs (1)(A) and (2)(A), the installation of communications towers is not considered construction of a building or other physical facility: *Provided further*, That grantees shall provide reports on their use of funds, as determined necessary by the Secretary: *Provided further*, That (a) the Center for Domestic Preparedness may provide training to emergency response providers from the Federal Government, **including without reimbursement to employees of the Federal Emergency Management Agency for professional development pursuant to 5 U.S.C. 4103**, foreign governments, or private entities, if the Center for Domestic Preparedness is reimbursed for the cost of such training, and any reimbursement under this subsection shall be credited to the account from which the expenditure being reimbursed was made and shall be available, without fiscal year limitation, for the purposes for which amounts in the account may be expended, and (b) the head of the Center for Domestic Preparedness shall ensure that any training provided under (a) does not interfere with the primary mission of the Center to train State and local emergency response providers.

.[Emergency Management Performance Grants]

[For necessary expenses for emergency management performance grants, as authorized by the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.), the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7701 et seq.), and Reorganization Plan No. 3 of 1978 (5 U.S.C. App.), \$340,000,000: *Provided*, That total administrative costs shall not exceed 3 percent of the total amount appropriated under this heading, and an expenditure plan for program administration shall be provided to the Committees on Appropriations of the Senate and the House of Representatives within 60 days of the date of enactment of this Act.]

[Firefighter Assistance Grants]

[For necessary expenses for programs authorized by the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2201 et seq.), \$810,000,000, of which \$390,000,000 shall be available to carry out section 33 of that Act (15 U.S.C. 2229) and \$420,000,000 shall be available to carry out section 34 of that Act (15 U.S.C. 2229a), to remain available until September 30, 2011: *Provided*, That not to exceed 5 percent of the amount available under this heading shall be available for program administration, and an expenditure plan for program administration shall be provided to the Committees on Appropriations of the Senate and the House of Representatives within 60 days of the date of enactment of this Act.] (*Department of Homeland Security Appropriations Act, 2010.*)

## **Explanation of Changes:**

### Justification:

This general provision appeared in the Fiscal Year 2008 and 2009 DHS Appropriation Acts. Unfortunately, it created two unforeseen issues as originally enacted:

It did not include language that would indicate Congressional intent that the authority be permanent. This has created significant long-range planning issues for the Center for Domestic Preparedness (CDP). The response to the new legislative authority has been positive, particularly from foreign governments who have begun sending students to CDP training courses. Those foreign governments, however, often have to plan their students' attendance many months in advance. The annual nature of this authority presently precludes the CDP's ability to plan such training into the following fiscal year until follow-on annual authority is passed by Congress. Thus, this proposed version renews the authority for Fiscal Year 2010 and--for long-range planning purposes--makes it permanent (negating the need to include it in future appropriations) by adding the words "in Fiscal Year 2010 and thereafter."

Because of the restrictive nature of the FY09 reimbursement language, the CDP has been forced to charge tuition to FEMA employees who attend CDP training courses. This does not appear to meet the spirit of the Government Employees Training Act (GETA), 5 U.S.C. § 4103.1 On the other hand, Congress has already made it quite clear that the

---

1 5 U.S.C. § 4103 states the following:

#### Establishment of training programs

(a) In order to assist in achieving an agency's mission and performance goals by improving employee and organizational performance, the head of each agency, in conformity with this chapter, shall establish, operate, maintain, and evaluate a program or programs, and a plan or plans there under, for the training of employees in or under the agency by, in, and through Government facilities and non-Government facilities. Each program, and plan there under, shall--

(1) conform to the principles, standards, and related requirements contained in the regulations prescribed under section 4118 of this title;

(2) provide for adequate administrative control by appropriate authority;

(3) provide that information concerning the selection and assignment of employees for training and the applicable training limitations and restrictions be made available to employees of the agency; and

(4) provide for the encouragement of self-training by employees by means of appropriate recognition of resultant increases in proficiency, skill, and capacity.

Two or more agencies jointly may operate under a training program.

(b) (1) Notwithstanding any other provision of this chapter, an agency may train any employee of the agency to prepare the employee for placement in another agency if the head of the agency determines that such training would be in the interests of the Government.

(2) In selecting an employee for training under this subsection, the head of the agency shall consider--

(A) the extent to which the current skills, knowledge, and abilities of the employee may be utilized in the new position;

(B) the employee's capability to learn skills and acquire knowledge and abilities needed in the new position; and

(C) the benefits to the Government which would result from such training.

(3) [Redesignated]

(c) The head of each agency shall, on a regular basis--

(1) evaluate each program or plan established, operated, or maintained under subsection (a) with respect to accomplishing specific performance plans and strategic goals in performing the agency mission; and

(2) modify such program or plan as needed to accomplish such plans . . .

primary mission of the CDP (and, more importantly, its appropriation), is the training of state, local, and tribal emergency responders<sup>2</sup> and that the training of federal, foreign, and private sector responders shall not interfere with the primary training mission. Because FEMA consists of a relatively small cadre of federal employees when compared to the annual CDP student population, allowing FEMA employees to attend CDP courses without reimbursement should have a negligible impact on its primary mission, while simultaneously meeting the spirit of GETA. Opening up non-reimbursable training to other federal employees (including the approximately 190,000 DHS employees), however, would arguably interfere with the CDP's primary mission via a significant diversion of appropriated dollars for that training as well as creating concerns with the "augmentation principle" of fiscal law.<sup>3</sup>

---

<sup>2</sup> See, e.g., Title I of the Departments of Commerce, Justice, and State, the Judiciary, and Related

Agencies Appropriations Act for FY98, Public Law 105-119, 111 Stat. 2440, November 26, 1997, and

accompanying House Report 105-405 and Senate Report 105-48; Section 1204 of the Implementing

Recommendations of the 911 Commission Act of 2007, Public Law 110-53, 121 Stat. 266, August 3,

2007 (codified at 6 U.S.C. § 1102).

<sup>3</sup> As a general fiscal law rule, "augmentation of appropriations" from other sources is not permitted. "Augmentation" is any action by an agency that increases the effective amount of funds available in an agency's appropriation. Generally, this results in expenditures by the agency in excess of the amount originally appropriated by Congress under its Constitutional "tax and spend" authority. More specifically, an augmentation normally violates one or more of the following provisions:

- Article I, Section 9, Clause 7, of United States Constitution: "No money shall be drawn from the treasury except in consequence of appropriations made by law."
- 31 U.S.C. § 1301(a) (the "Purpose Statute"): "Appropriations shall be applied only to the objects for which the appropriations were made except as otherwise provided by law."

- 
- 31 U.S.C. § 3302(b) (Miscellaneous Receipts Statute): “Except as . . . [otherwise provided] . . . an official or agent of the government receiving money for the government from any source shall deposit the money in the Treasury as soon as practical without any deduction for any charge or claim.”

The use of the CDP appropriation to pay for the training of any non-FEMA federal personnel without appropriate reimbursement could be seen as an improper augmentation of that agency’s budget by using one appropriation to pay costs associated with the purposes of another appropriation. See, e.g., U.S. Equal Employment Opportunity Commission – Reimbursement of Registration Fees for Fed. Executive Board Training Seminar, B-245330, 71 Comp. Gen. 120 (1991).

**PPA Mission Statement**

The State and Local Training Program manages the development and approval of training to prepare emergency responders for a Weapons of Mass Destruction (WMD) terrorism event. This program identifies and addresses training needs of State and local communities and prioritizes those needs to facilitate the identification of existing and new funding for course development. This program also includes the Center for Domestic Preparedness—the only WMD training facility that provides hands-on training to civilian emergency responders in a toxic chemical agent environment—and the National Domestic Preparedness Consortium, which also plays a major role in delivering training to America’s first responders.

**PPA Mission Statement**

The Technical Assistance Program provides direct assistance to State, regional, local, and tribal jurisdictions to improve their ability to prevent, protect against, respond to, and recover from major events, including threats or acts of terrorism. A primary objective of the program is to enhance the capacity of State and local jurisdictions, as well as special needs jurisdictions (e.g. port authorities and mass transit agencies) to develop, plan, and implement effective preparedness strategies for chemical, biological, radiological, nuclear, and explosive (CBRNE) incidents and other major events.

**PPA Mission Statement**

Through Evaluations and Assessments, DHS is working to implement a comprehensive system to measure the effectiveness of DHS programs, including HSPD-8 and the impact on our national readiness. Many of the measures in the National Preparedness Goal will gauge the accomplishment of key milestones and events that will contribute to improved performance. The measures in the Goal all contribute to critical outcomes, and are most appropriately described as indicator measures of national preparedness. This program gathers, analyzes, and interprets national and program specific data. As the focal point for information collection and evaluation, this program reviews and assesses the execution of State Strategies against the supporting threat, vulnerability, and needs assessment data.

<b>BUDGET REQUEST AND SUPPORTING INFORMATION</b>
--

**U.S. Fire Administration**

## **I. Appropriation Overview**

### **A – Mission Statement for U.S. Fire Administration**

The mission of the United States Fire Administration (USFA) is to provide national leadership to foster a solid foundation for fire and emergency services stakeholders for prevention, preparedness, and response.

### **B – Budget Activities:**

USFA coordinates with other federal, state, and local emergency service agencies, the private sector, and with colleges, universities, and other DHS educational consortium participants. In fulfilling its mission, USFA utilizes the assets of the National Fire Academy (NFA), the National Emergency Training Center (NETC), and USFA's National Fire Programs (NFP) Division.

### **C – Budget Request Summary:**

FEMA requests \$45,950,000, 115 positions and 115 FTE for FY 2011. This represents an increase of \$342,000, as compared to FY 2010, for pay inflation.

Total Change 2010 to 2011	-	-	342

FEMA requests \$45,930,000, 115 positions and 115 FTE for FY 2011. This represents an increase of \$342,000, as compared to FY 2010, for pay inflation.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

USFA prepares the Nation's first responders through on-going and, when necessary, expedited training, regarding how to evaluate and minimize community risk, improve protection to critical infrastructure, and be better prepared to react to all hazard and terrorism emergencies. USFA coordinates with other federal, state, and local emergency service agencies, the private sector, and with colleges, universities, and other DHS educational consortium participants. In fulfilling its mission, USFA utilizes the assets of the National Fire Academy (NFA), the National Emergency Training Center (NETC) Facilities and Support Services, and USFA's National Fire Programs (NFP) Division.

**A) National Fire Academy (NFA)**

NFA promotes the professional development of the fire and emergency response community and its allied professionals. To supplement and support state and local fire service training programs, NFA, provides national leadership to foster a solid foundation for prevention, preparedness and response capabilities by developing and delivering the kinds of courses unavailable at the State and local level.

## **Recent and Planned Accomplishments**

### **FY 2009**

- Delivered 3,811 training programs to 116,360 fire and emergency response personnel and allied professionals.
- Completed the migration of existing web-based content for NFA Online, the USFA's new web-based learning management system for distance learning training.
- Began development of new preparedness curriculum; 6-day courses and designated 2-week resident courses.
- Conducted a Congressionally mandated national fire-based Emergency Medical Services curriculum advisory assessment.
- Implemented college student internship program as an adjunct to long-term Federal recruitment, giving students an opportunity to experience work and classes at the NFA.

### **FY 2010**

- Increase the number of students receiving NFA training programs through USFA's technology-based distance learning program. The program includes internet course delivery, blended learning courses, web-based graphic simulations, and other on-line formats such as web casts.
- Improve effectiveness and portability and reduce capital investment in the command and control graphic simulation tools by migrating to commercial off-the-shelf operating systems.
- Implement a contract instructor evaluation program to monitor and assure continuation of NFA's highly reputed instructional staff.
- Increase USFA/NFA's national model fire science and EMS management curriculum by working to standardize fire-related education programs in the U.S. schools that have adopted them.
- Increase the number of States who are moving to adopt the National Professional Development Model from 21 to 24, and increase by two the number of major metropolitan fire departments who adopt the National Professional Development Model.

### **FY 2011**

- Continue to expand fire and emergency response training programs through the use of both on-campus and online distance learning programs, and through the expansion of its fire and emergency services higher education partnership agreements.
- Increase the delivery of NFA courses at the state and local level through the use of state fire training assistance partnership agreements and distance learning methodologies.
- Align NFA curriculum on fulfilling DHS, FEMA, and USFA strategic goals for national preparedness, prevention, response and recovery.
- Execute EZ Training partnership with national and state fire service associations and implement on-going curriculum development.
- Establish national fire command and control simulation pipeline to regularly distribute training simulations to state and local training systems.

## **B) National Emergency Training Center (NETC) Management, Operations and Support Services**

The NETC Management, Operations, and Support Services operate and maintain the NETC in the most efficient and effective manner providing administrative, operational and emergency services in support of the program activities and special groups at NETC.

### **Recent and Planned Accomplishments**

#### **FY 2009**

- Managed, operated, and maintained the NETC, providing administrative, operational, and emergency services in support of the program activities and special groups; student admission, registration, ground transportation, and housekeeping services; and scheduled maintenance, repairs, and replacement of capital assets.
- Enhanced the video-on-demand internal and external distribution capabilities; developed and implemented new technology to support training, exercises, simulations and new emerging threats. Expanded video support and video conference partnerships with other agencies and FEMA organizational elements
- Provided administrative support to the Assistance to Firefighter Grant Program peer review and criteria development sessions held at NETC.
- Upgraded site-wide heating and air conditioning.

#### **FY 2010**

- Manage, operate, and maintain the NETC, providing administrative, operational, and emergency services in support of the program activities and special groups; student admission, registration, ground transportation, and housekeeping services; and scheduled maintenance, repairs, and replacement of capital assets.
- Support all video and internet components of EAS-15 as it relates to FEMA national and regional programs; implement new high definition video technology systems, distribution, and storage retrieval units; expand high tech distribution including Multi-cast, WIMAX, and GPS interface; and support disaster based daily briefings video mobile systems and devices.
- Provide administrative support to the Assistance to Firefighter Grant Program peer review and criteria development sessions held at NETC.

#### **FY 2011**

- Continue to manage, operate, and maintain the NETC in the most efficient and effective manner providing administrative, operational and emergency services in support of the program activities and special groups held at NETC.
- Support all video and internet components of EAS-15 as it relates to FEMA national and regional programs; implement new high definition video technology systems, distribution, and storage retrieval units.
- Provide administrative support to the Assistance to Firefighter Grant Program peer review and criteria development sessions held at NETC.

## **C) National Fire Programs (NFP) Division**

NFP is responsible for the collection, analysis, publication, dissemination, and marketing of information related to the Nation's fire problem and USFA programs. It manages both USFA research efforts in fire detection, prevention, suppression, and first responder health, safety, and effectiveness, as well as programs that increase the capacity of the Nation's fire and emergency services and the public to prevent, mitigate, prepare for, and respond to local, regional, and national emergencies.

### **Recent and Planned Accomplishments**

#### **FY 2009**

- Developed and managed programs that increased capacity of the nation's fire and emergency services and the public to prevent, mitigate, prepare for, and respond to local, regional, and national emergencies.
- Completed research studies on emergency responder safety, department communications, and fire suppression and safety technologies.
- Initiated development of web-based application for the National Fire Incident Reporting System (NFIRS) and completed NFIRS system requirements analysis for overall NFIRS system modernization.

#### **FY 2010**

- Implement web-based application for the National Fire Incident Reporting System (NFIRS) and initiate NFIRS modernization and enhancement tasks.
- Conduct studies of technologies and operations to improve and enhance responder performance and public safety and disseminate resulting information in a variety of formats to reach both professional audiences and the American public.
- Develop, manage, and maintain activities designed to enhance fire and emergency services response to incidents and disasters.
- Establish State and local fire service representation at the National Operations Center.
- Launch "Install.Inspect.Protect." public education campaign in an effort to reduce residential fire deaths and injuries by urging installation and maintenance of smoke alarms.

#### **FY 2011**

- Enhance first responder performance and public safety by conducting studies of emergency response technologies and operations.
- Manage programs that increase the capacity of the Nation's fire and emergency services and the public to prevent, mitigate, prepare for, and respond to local, regional, and national emergencies.
- Continue implementation of NFIRS systems enhancements identified in FY 09 requirements analysis.

### PPA Mission Statement

The mission of the United States Fire Administration (USFA) is to reduce life and economic losses due to fire and related emergencies through leadership, coordination, and support. USFA prepares the Nation's fire responders through ongoing and, when necessary, expedited training, regarding how to evaluate and minimize community risk, improve protection to critical infrastructure, and be better prepared to react to all-hazard and terrorism emergencies of all kinds.

### Summary Justification and Explanation of Changes

25.7 Operation and maintenance of equipment	2,053	1,821	1,821	-

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2011 request reflects no change from FY 2010.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.8 Other services	11	10	10	-

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. The FY 2011 request reflects no change from FY 2010.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
26.0 Supplies and materials	786	583	583	-

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2011 request reflects no change from FY 2010.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
31.0 Equipment	831	980	980	-

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2011 request reflects no change from FY 2010.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
32.0 Land and structures	1,412	-	-	-

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to building, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2011 request reflects no change from FY 2010.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
41.0 Grants/Subsidies/Contributions	4,176	4,384	4,385	1

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2011 request reflects no change from FY 2010.

<b>BUDGET REQUEST AND SUPPORTING INFORMATION</b>
--

**Radiological Emergency Preparedness:**

## **I. Appropriation Overview**

### **A – Mission Statement for Radiological Emergency Preparedness:**

The Radiological Emergency Preparedness Program (REPP) assists State, local, and tribal governments in the development of off-site radiological emergency preparedness plans within the emergency planning zones of Nuclear Regulatory Commission (NRC) licensees of commercial nuclear power facilities. The REPP fund is financed from user fees assessed and collected from NRC licensees to cover budgeted costs for radiological emergency planning, preparedness, and response activities in the following year.

### **B – Budget Activities:**

FEMA requests budget authority of \$33,000,000 in FY 2011 to:

- Conduct activities in conjunction with State, local and industry officials to ensure all elements required to gain and maintain ‘reasonable assurance’ of required levels for public safety determinations related to operating nuclear power generating stations.
- Conduct and Evaluate REPP exercises and drills.
- Conduct joint FEMA/NRC rulemaking and policy development activities as they relate to offsite planning and preparedness.
- Conduct necessary offsite planning and preparedness reviews pertaining to proposed new reactor licensing and construction efforts.
- Conduct radiological courses for federal, state, tribal and local emergency planning, preparedness and response personnel.
- Develop and maintain guidelines and procedures for alert and notification systems installed around nuclear power facilities. Ensure these efforts are coordinated with emerging National policies pertaining to public alert and warning systems.
- Continuously review and update REP guidelines and regulatory supplements to ensure they are standardized and in conformance with the National Preparedness System. Specifically, publish final Radiological Emergency Preparedness Program Manual and Supplemental to NUREG-0654 incorporating program guidance and policy enhancements.
- Maintain an integrated network system to aid federal, state, local and tribal emergency response providers in preparedness, planning, training and exercising.

### **C – Budget Request Summary:**

REPP estimates the Fiscal Year (FY) 2011 offsetting collection authority to be \$33,361,000. A \$361,000 increase over the FY 2010 President’s Budget Request and includes increased funding for fully funded Full-Time positions and 2011 pay inflation.

<b>2011 Current Services</b>	<b>170</b>	<b>170</b>	<b>33,000</b>
<b>2011 Total Request</b>	<b>170</b>	<b>170</b>	<b>33,000</b>
Total Change 2010 to 2011	-	-	3,326

FEMA requests \$33,000,000, and 170 positions, and 170 FTE for the Radiological Emergency Preparedness Program in FY 2011.

#### CURRENT SERVICES PROGRAM DESCRIPTION:

The Radiological Emergency Preparedness Program plans and executes nationally coordinated, locally executed radiological emergency preparedness and response activities. The program assists State and Local governments in the development and conduct of off-site radiological emergency preparedness activities within the emergency planning zones of NRC licensed commercial nuclear power facilities. REPP's historical success lies in its ability to integrate and enhance Federal, State, tribal, and local governments' preparedness planning and response capabilities for all types of radiological emergencies.

Funds for REPP activities are generated through user fees charged to each participating reactor licensee. Funds that are available for obligation in a given year rely on the level of collections received in the prior fiscal year.

#### Terrorism-based Initiatives

Since September 11, 2001, REPP has received requests to participate in exercises, drills, roundtable discussions, issue committees, and working groups associated with nuclear

power plant security, as well as emergency preparedness planning for incidents involving a radiological dispersal device or improvised nuclear device. REPP provides support to those activities given the highest priority.

In addition, REPP has completed a significant number of requests from its Federal department/agency partners and from State, local, tribal, and private sector stakeholders to conduct a comprehensive revision and update of the current REPP policies, guidance, and regulations. Many of these operative program documents are now revised and ready for public comment.

Ongoing terrorism-based drills are increasing the program's nuclear and radiological responsibilities. REPP also actively supports other FEMA, DHS, and Federal partners Improvised Nuclear Device (IND) and Radiological Disbursement Device (RDD) planning and exercises, as these programs have common elements with REPP's primary mission.

In the regional offices, REPP established a 1:1 ratio of site specialists for each plant in order to address the increase in site-specific issues that have surfaced since the 9/11 terrorist attacks. REPP has also noticed that as these plants begin to seek operating license extensions, the number of issues involving opposition from local citizens and intervenor/public interest groups increases dramatically.

#### New Reactor License Applications

The New Reactor License program provides an off-site emergency preparedness plan review, preparation of documents that will be contained in the official Safety Evaluation Reports, delivery of expert testimony if necessary, and production of interim and final "reasonable assurance" findings for the NRC. In FY 2010, REPP anticipates continuing work on at least 15 new reactor license applications generated since the enactment of the Energy Policy Act of 2005. To support the increased workload associated with these new applications, REPP received 40 additional FTEs and supporting resources in FY 2008.

#### Federal Radiological Preparedness Coordinating Committee

The Federal Radiological Preparedness Coordinating Committee (FRPCC), funded by REPP fee collections, coordinates the activities of Federal agencies with responsibilities in the radiological emergency planning and preparedness process. The FRPCC serves as a radiological information clearing house between member agencies. FRPCC subcommittees support vital REPP missions, including Federal Preparedness, Offsite Instrumentation, Environment/Food/Health, Training and Exercises, Protective Action Guides, Public Information, etc. These subcommittees are chaired by the Federal Agency with principle responsibility for the given mission area. The FRPCC is also responsible for updating the Nuclear/Radiological Incident Annex of the National Response Framework, last updated in 2008.

#### Recent and Planned Accomplishments

## FY 2009 Accomplishments

- Supported the NRC with offsite emergency plan reviews to 19 new reactor applications in various states. Completed reviews and certified the offsite plans for six new units.
- Provided support and oversight to conduct, evaluate, and report findings that will be submitted to the NRC on 31 joint, biennial, graded, REP exercises and any associated remedial drills.
- Revised programs of instruction to ensure radiological training course materials are consistent with the National Preparedness and Integrated Planning Systems. Trained federal staff as instructors and initiated a transition from contractor based instructor deliveries to Federal staff as primary instructors.

## FY 2010 Planned Accomplishments

- Provide support and oversight to conduct, evaluate, and report findings that will be submitted to the NRC on 34 joint, biennial, graded REP exercises and any associated remedial drills.
- Continue support to NRC in the review of offsite emergency plans for up to 33 new reactor units.
- Adjudicate and resolve public comments and finalize the Radiological Preparedness Program Manual and NUREG 0654/FEMA-REP-1/Rev.1 Supplement 4.

## FY 2011 Planned Accomplishments

- Publish, market, and implement final Radiological Preparedness Program Manual and NUREG 0654/FEMA-REP-1/Rev.1 Supplement 4 incorporating program guidance and policy enhancements
- Commence update process of NUREG 0654/FEMA-REP-1/Rev.1
- Continue support to NRC in the review of offsite emergency plans for up to 33 new reactor units.
- Provide support and oversight to conduct, evaluate, and report findings that will be submitted to the NRC on 28 joint, graded, biennial REP exercises and any associated remedial drills.
- Update the national Response Framework's Nuclear - Radiological Incident Annex to address long-recovery response efforts.
- Provide Risk Communications guidance to REPP States, local and tribal governments.

#### **IV. Program Justification Changes**

Not Applicable

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Federal Emergency Management Agency  
Justification of Proposed Changes in Radiological Emergency Preparedness  
Program  
Appropriation Language**

The aggregate charges assessed during fiscal year [2010]2011 , as authorized in title III of the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1999 (42 U.S.C. 5196e), shall not be less than 100 percent of the amounts anticipated by the Department of Homeland Security necessary for its Radiological Emergency Preparedness Program for the next fiscal year: *Provided*, That the methodology for assessment and collection of fees shall be fair and equitable and shall reflect costs of providing such services, including administrative costs of collecting such fees: *Provided further*, That fees received under this heading shall be deposited in this account as offsetting collections and will become available for authorized purposes on October 1, [2009]2010, and remain available until expended. (*Department of Homeland Security Appropriations Act, 2010.*)

#### **Explanation of Changes:**

No substantive changes are proposed.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **National Pre-Disaster Mitigation Fund**

## **I. Appropriation Overview**

### **A – Mission Statement for National Pre-Disaster Mitigation Fund**

Section 203 (42 U.S.C. 5133) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (P.L. 93-288) established a federal program that provides “technical and financial assistance to State and local governments to assist in the implementation of pre-disaster hazard mitigation measures that are cost-effective and designed to reduce injuries, loss of life, and damage and destruction of property...” The Pre-Disaster Mitigation Fund (PDM) was created under FEMA as the vehicle for disseminating these grants to State and local governments. Operating independently of the Disaster Relief Fund (DRF), which provides post-disaster mitigation funding, the PDM program offers an annual funding source for qualified mitigation activities that are not dependent upon a declaration of disaster activity by the President.

The Pre-Disaster Mitigation Fund will support the Administration’s effort to expand and improve the coordination of Federal efforts to incentivize state and local government to plan for and implement pre-disaster mitigation strategies. Consistent with disaster recovery best practices, the Budget supports efforts that increase community resiliency to disasters and other vulnerabilities. Through a partnership with the Department of Housing and Urban Development’s (HUD) Sustainable Communities initiative, the goal is to support strategic local approaches to sustainable development by coupling hazard mitigation with related community development goals and activities that reduce risks while protecting life, property, and the environment. FEMA will work to integrate sustainability goals into its Pre-Disaster Mitigation program's grant process. PDM funding will provide grants funding to State, local, and tribal governments to reduce the risks associated with disasters. Resources support the development and enhancement of hazard mitigation plans, as well as the implementation of pre-disaster mitigation projects. Operating independently of the Disaster Relief Fund (DRF), which provides post-disaster mitigation funding, the Pre-Disaster Mitigation program provides a stable, year-to-year funding source for qualified projects that is not dependent upon Presidentially declared disaster activity.

To this end, FEMA, through the PDM program, seeks to

- Coordinate with HUD to incorporate pre-disaster mitigation and sustainability principles into both the PDM program and the Sustainable Communities Initiative, administered by HUD;
- Identify, develop and initiate implementation of training, capacity building, best practices, tools and guidance for these coordinated programs; and
- In partnership with HUD, explore opportunities to integrate the requirements of FEMA’s mitigation planning process into the larger sustainability planning framework.

**B – Budget Activities:**

FEMA’s PDM program provides technical assistance and Federal funding to State, local, and tribal governments to support the development and enhancement of hazard mitigation plans aimed at instituting policies and practices, and mitigation projects that involve physical measures to avoid or reduce damage from natural disasters.

**C – Budget Request Summary:**

FEMA requests \$100 million in FY 2011 for the National Pre-Disaster Mitigation grant program. Funding will be used to provide the \$500,000 per State allocation as required; support the national grant competition; and provide program support and technical assistance to State, local, and tribal governments.

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2009 Actuals</b>	<b>15</b>	<b>11</b>	<b>62,795</b>
<b>2010 Enacted</b>	<b>15</b>	<b>15</b>	<b>100,000</b>
<b>2011 Current Services</b>	<b>15</b>	<b>15</b>	<b>100,000</b>
<b>2011 Total Request</b>	<b>15</b>	<b>15</b>	<b>100,000</b>
Total Change 2010 to 2011	-	-	-

FEMA requests \$100 million in FY 2011 for this activity. Funding will provide for the annualization of 2010 pay increases, the 2011 cost of living allowance and inflation. This represents no change from the FY 2010 Enacted.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Pre-Disaster Mitigation Fund (PDM) program assists State, local, and tribal governments in implementing cost-effective hazard mitigation activities that complement a comprehensive mitigation program. This program provides a funding resource for State, local, and tribal governments seeking to initiate or complete plans and projects that ensure immediate risk reduction to the population, to property, and for at-risk structures, including critical facilities. Often, funding is the primary obstacle that States and local governments must overcome in order to be more proactive in the prevention or reduction of the damage caused by natural hazards. PDM Federal cost share is up to 75% for all eligible proposals except for small and impoverished communities which can be up to 90% of the cost.

The PDM fund supports efforts to raise risk awareness and reduce disaster losses before disasters strike. Grants are awarded to States, territories, tribal governments, and communities for the purposes of hazard mitigation planning and hazard mitigation projects. Grants awarded for mitigation planning are limited in funding levels based on whether the application supports a new plan or updates an existing plan. Grants awarded to support mitigation projects must fall within one of the eligible categories.

Grants for mitigation projects vary and include activities such as: retrofitting structures to resist flood, wind, and earthquake; elevating structures above base flood levels; property acquisition and demolition or relocation for the creation of open space; and minor flood reduction and drainage measures.

Communities that participate in the PDM program are able to identify, plan for, and mitigate repetitive loss situations that negatively impact their residents or present a threat to life and property. Approved projects go through an extensive review process to verify cost effectiveness, engineering feasibility, and environmental and historic preservation site reviews. The final approved projects may eliminate the risk of flooding, reinforce critical infrastructure to protect against damage during a seismic event, or mitigate repetitive damage to homes in a flood prone area. PDM projects specifically related to flood mitigation may provide an additional cost savings by reducing future claims on the National Flood Insurance Program for insured structures.

Since FY 2003, FEMA has received \$854.0 million in appropriated funds for the National Pre-Disaster Mitigation Fund. Grant awards from FY 2003 to FY 2006 were determined through a nationally competitive program leveraging the flexibility included in enacted legislation to allocate grant funds based on this competition. Grant proposals were subject to a national technical review process to ensure project applications met technical guidelines, and a national evaluation process to score and rank applications. In addition to FEMA and other Federal employees, staff from States, territories, tribes, and local communities served as peer reviewers in the national evaluation.

In FY 2007, FEMA began allocating grant funds in accordance with Section 203(f) of the Stafford Act (42 U.S.C. 5133) but continued to use the national competition as the mechanism for the awards program. In addition to the funds appropriated each year, the PDM program reinvests unused funds returned by the grant recipient back into the program to support the next cycle of grant awards.

**FY 2009 accomplishments:**

- Aligned all five mitigation programs into a unified Hazard Mitigation Assistance (HMA) program guidance with the inclusion of Hazard Mitigation Grant Program. This comprehensive approach helped FEMA accomplish the HMA objectives of efficiency and standardization, thus creating a platform for future updates and refinements of program policies and practices to make them more unified and user-friendly.
- Made available to State and local communities the updated Benefit Cost Analysis Toolkit. This software package uses the most up to date computer and software technology and risk information to calculate benefits of performing specific mitigation activities. The software operates with any Windows based computer system and is made available free of charge. Some of the major software features include on demand help functions, tutorial videos imbedded in the software, and instant access to FEMA's websites for additional information. The software was developed with the assistance of local and State mitigation staff, as well as other

government agencies such as the US Army Corp of Engineers, the National Institute of Building Sciences, and the Congressional Budget Office.

**FY 2010 planned accomplishments:**

- Provide opportunities for transparency and partnership with States, territories, and tribal and local governments through the HMA Summit, the External Stakeholders Workgroup, focus groups and training courses.
- Use an enhanced Benefit Cost Analysis Ratio tool that streamlines and modifies the benefit cost analysis program to make it easier for State and local communities to meet the benefit cost analysis requirements of the mitigation grant programs and meet the Office of Management and Budget Circular A-94.

In recent years, the national grant competition has resulted in a list of eligible “pending” but unfunded PDM projects. To date, FEMA has identified 183 projects totaling \$88.5 million that were previously determined to be eligible and could be funded if adequate funds were available. FEMA plans to consider this list of unfunded projects for priority funding in FY 2010 and beyond so that the funds can be quickly obligated and mitigation accomplished. These projects will reduce the Nation’s vulnerability to future hazard events by reducing the loss of life and property and reducing the Nation’s costs of responding to, and recovering from, natural hazard events.

Massachusetts	Maryland	West Virginia	Alabama	Florida	Michigan	Utah
1	4	2	5	31	4	5
\$157,500	\$146,799	\$613,848	\$2,114,068	\$22,138,030	\$307,673	\$2,554,559

Gila River Indian Community	Big Pine Paiute Tribe	Spokane Tribe of Indians	Hoopa Valley Tribe
1	1	1	1
\$105,849	\$49,263	\$72,506	\$67,650

**Total Number Eligible: 183**

**Total Proposed Federal Share: \$88,501,348**

**FY 2011 planned accomplishments:**

- Use an enhanced portfolio approach to assist States, territories, and tribal and local governments in the management of pre-qualified mitigation proposals that are: consistent with State and local mitigation plans and priorities; determined technically-feasible to reduce losses to the identified hazard(s); cost effective and facilitate more expeditious awarding of grants.

- Clarify technical requirements for project specific activities that will streamline and simplify technical requirements making it easier for State and local communities to develop eligible applications and document program requirements.
- Develop strategies and process efficiencies to award funds more expeditiously, thereby increasing obligation rates for the mitigation grant programs. In order to enable stakeholders as well as FEMA to more efficiently and effectively deliver the PDM program, FEMA will continue to evaluate the program requirements and processes to determine where refinements can be made that will improve the overall effectiveness and delivery of the program.

#### **IV. Program Justification Changes**

Not Applicable

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Federal Emergency Management Agency  
Justification of Proposed Changes in National Pre-Disaster Mitigation Fund  
Appropriation Language**

For the Pre-Disaster Mitigation Grant Program under section 203 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5133), ***including administrative costs***, \$100,000,000, to remain available until expended. (Department of Homeland Security Appropriations Act, 2010.)

Explanation of Change:

FEMA proposes to remove the total administrative cost percentage from appropriation language. The 3% for administrative costs would provide an insufficient level of funding for the program to continue to operate effectively. The program currently operates at a very conservative funding level and retaining this percentage rate would require the program to reduce other operating costs critical to the grant review and award process.

### PPA Mission Statement

Funding requested through this account is dedicated to competitive grants for pre-disaster mitigation (PDM). Operating independently of the Disaster Relief Fund (DRF) assures that funding remains stable from year to year and is not subject to spikes in disaster activity. FEMA's PDM program provides technical assistance and Federal funding to State, local, and tribal governments to support the development and enhancement of hazard mitigation plans aimed at instituting policies, practices, and mitigation projects that involve physical measures to avoid or reduce damage from disasters.

## Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	1,041	1,456	1,481	25

Salaries and Benefits support 15 full time permanent positions in FY 2011. The increase above the FY 2010 level will provide for the annualization of the 2010 pay increase and the cost of living adjustment effective January 2011.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.3 Other than full-time permanent	3	-	-	-

See 11.1

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.5 Other personnel compensation	116	83	84	1

See 11.1

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
12.1 Civilian personnel benefits	283	375	381	6

See 11.1

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
21.0 Travel and transportation of persons	422	1,043	1,053	10

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2011 Request reflects an increase in travel based requirements to support the national competition, to conduct conferences, training and meetings with State

and local representatives, and to cover the cost of inflation and fare increases.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
22.0 Transportation of things	2	-	-	-

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.1 Rental payments to GSA	186	188	192	4

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2011 Request includes increases of \$4,000 for lease costs.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.3 Communications utilities and miscellaneous charges	140	21	21	-

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility service.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.1 Advisory and assistance services	1,931	1,637	1,538	(99)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2011 request includes a decrease of \$99,000.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	8,178	8,294	8,291	(3)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2011 Request includes funding to State and local governments for project management support. This effort will continue in FY 2011 based on the demand and level of activity in FY 2009 and FY 2010. The decrease of \$3,000 from the FY 2010 Enacted reflects a net savings in cost for contracted services.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.3 Purchases of goods & svcs. from Gov't accounts	-	56	57	1

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2011 Request provides funding for increases in costs for services.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
26.0 Supplies and materials	40	11	11	-

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
31.0 Equipment	46	84	85	1

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2011 Request provides funding for equipment replacement.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
41.0 Grants/Subsidies/Contributions	50,407	221,425	90,275	(131,150)

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2011 Request reflects the anticipated amount in grant awards.

**Emergency Food and Shelter**

## **I. Appropriation Overview**

### **A – Mission Statement for Emergency Food and Shelter**

The Emergency Food and Shelter Program provides grants to nonprofit and faith-based organizations at the local level through the National Board to supplement their programs for emergency food and shelter.

### **B – Budget Activities:**

EFS funds are used to supplement food, shelter, rent, mortgage, and utility assistance programs for people with non-disaster related emergencies.

The EFS program is administered via a national board of volunteer agencies chaired by FEMA. The National Board qualifies jurisdictions for annual EFS funding awards based on criteria involving current population, unemployment, and poverty levels. Grants are awarded to nonprofit community and government organizations that are chosen by local boards in the qualifying jurisdictions.

### **C – Budget Request Summary:**

The FEMA FY 2011 request for the EFS program is 0 positions, 0 FTE and \$100,000,000. This request represents a \$100,000,000 reduction from FY 2010 enacted.

<b>2011 Total President's Budget</b>	-	-	<b>100,000</b>
Total Change 2010 to 2011	-	-	(100,000)

FEMA requests \$100 million for this activity. This represents a \$100 million reduction from FY 2010.

\*The table above excludes ARRA funding of \$100 million provided in P.L. 111-5 in FY 2009.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The EFS program provides grants to nonprofit and faith-based organizations at the local level to supplement their programs for emergency food and shelter. Nearly 12,000 nonprofit and local government agencies in over 2,500 cities and counties across the United States receive awards.

Funding for this program is distributed by the National Board which consists of designees from six charitable organizations – United Way of America, The Salvation Army, the National Council of Churches of Christ in the USA, Catholic Charities USA, United Jewish Communities, and the American Red Cross. The National Board is chaired by a representative from FEMA.

Local jurisdictions (city or county) are eligible for EFS support when they have the highest need for emergency food and shelter services as determined by unemployment and poverty rates. In FY 2008, the National Board established three measures to determine highest need eligibility: (1) Those with 13,000 or more residents unemployed and an unemployment rate of at least 3.5 percent; (2) Those with between 300 and 12,999 residents unemployed and an unemployment rate of at least 5.5 percent; or (3) Those with 300 or more unemployed and a poverty rate of at least 11 percent.

Funding may also be provided to jurisdictions that do not meet the initial eligibility requirements through a state set-aside. The National Board reserves a portion of appropriated funds and distributes funding to states based on a discretionary determination that allows for a constant level of funding based on a ratio of per capita state set-aside to per capita direct funding. The state set-aside allows states to address pockets of homelessness and poverty or address the immediate needs of a locality that might be going through a high economic impact event, such as a plant closing.

### **Recent and Planned Accomplishments**

In FY 2009, the services rendered are estimated at 70.1 million meals and 5.4 million nights of lodging. In FY 2009, the funds were also used to provide approximately 209,061 rent/mortgage payments and 226,822 utility bill payments. All 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the Northern Mariana Islands, and the Virgin Islands, received funds in FY 2009.

In FY 2010, the services to be rendered are estimated at 70.1 million meals and 5.4 million nights of lodging. In FY 2010, the funds will also be used to provide approximately 209,061 rent/mortgage payments and 226,822 utility bill payments.

In FY 2011, the services rendered are estimated at 35 million meals and 2.7 million nights of lodging. The FY 2011 funds are estimated to also support approximately 104,531 rent/mortgage payments, and 113,411 utility bill payments.

<b>Total Request</b>	-	-	<b>200,000</b>	-	-	<b>200,000</b>	-	-	<b>100,000</b>

Description of Item

FEMA requests a reduction of \$100,000,000 in the EFS program for FY 2011.

Justification

The FY 2011 request for EFS reflects a refocus of agency-wide resources on FEMA's primary mission of preparing for and coordinating disaster response and recovery efforts while still providing substantial support for the non-disaster EFS program.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Federal Emergency Management Agency  
Justification of Proposed Changes in Emergency Food and Shelter  
Appropriation Language**

To carry out an emergency food and shelter program pursuant to Title III of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11331 et seq.), [\$200,000,000] *\$100,000,000*, to remain available until expended: *Provided*, That total administrative costs shall not exceed 3.5 percent of the total amount available under this heading. (*Department of Homeland Security Appropriations Act, 2011*).

### PPA Mission Statement

The Emergency Food and Shelter (EFS) Program provides grants to nonprofit and faith-based organizations at the local level through the National Board to supplement their programs for emergency food and shelter.

In FY 2010, the services rendered are estimated to be 35 million meals and 2.7 million nights of lodging. The FY 2010 funds are estimated to also support approximately 104,531 rent/mortgage payments, and 113,411 utility bill payments.

The FEMA FY 2011 request will continue to provide funding to supplement local efforts to provide meals, shelter, and emergency assistance for mortgage, rent, and utility payments.

**Disaster Relief Fund**

## **I. Appropriation Overview**

### **A – Mission Statement for Disaster Relief Fund**

Pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act, the Disaster Relief Fund (DRF) provides a no-year base against which FEMA can direct, coordinate, manage, and fund eligible response and recovery efforts associated with domestic major disasters and emergencies. Through the DRF, FEMA can fund authorized federal disaster support activities as well as eligible State, Territorial, Tribal, and local actions, such as providing emergency protection and debris removal. The DRF also funds:

- The repair and rebuilding of qualifying disaster-damaged infrastructure;
- Hazard mitigation initiatives;
- Financial assistance to eligible disaster survivors;
- Fire Management Assistance Grants for qualifying large urban wildfires.

### **B – Budget Activities:**

Major disasters and emergencies may be the result of natural or man-made hazards, and are normally declared by the President in response to gubernatorial requests for assistance. States request Federal assistance to supplement their available resources and certify that a given disaster is beyond their capacity or capability to respond. The DRF also supports fire management assistance activities for the mitigation, management, and control of fires on public and private lands.

FEMA coordinates three major disaster assistance programs:

- Federal Assistance to Individuals and Households;
- Public Assistance;
- Hazard Mitigation assistance.

Non-declaration-specific readiness and support activities are also funded under the DRF. These activities provide indirect support across FEMA (and to our Federal partners) and are managed separately as Disaster Readiness and Support (DRS) activities.

Effective November 4, 2008, FEMA was authorized to transfer DRF funding to the U.S. Agency for International Development (USAID) to implement disaster-specific Relief and Reconstruction Plans in the Federal States of Micronesia and the Republic of the Marshall Islands through the Compacts of Free Association.

## **C – Budget Request Summary:**

FEMA requests 45 full-time positions, 3,383 FTEs, and \$1,950,000,000 for the Disaster Relief Fund in Fiscal Year (FY) 2011. This represents an increase of \$350,000,000 and a decrease of 233 positions and 217 FTE compared to FY 2010 enacted amounts. The 233 positions represent the remaining non-disaster-specific Cadre of On-call Response Employee (CORE) positions performing mission critical functions similar to those performed by employees in the Management and Administration (M&A) appropriation. Those positions will be converted to full-time-permanent positions in M&A and the DRF will no longer contain any non-disaster specific CORE positions, but will only support direct-charge disaster CORE positions.

Coupled with prior year recoveries and carry forward funds, the DRF is projected to support the five-year average obligation level for non-catastrophic disaster activity (excluding extraordinary events, such as the series of 2004 hurricanes in Florida, Hurricanes Katrina and Rita in 2005, the California Wildfires of 2007, and Hurricanes Gustav and Ike in 2008). The five-year average obligation level for non-catastrophic disaster activity is \$ 4,320,000,000. This request supports that level of activity through a combination of \$1,950,000,000 of new budget authority and \$2,370,000,000 from a combination of an estimated unobligated balance carryover from FY 2010 into FY 2011 and projected recoveries of prior year obligations in FY 2011.

The President is submitting, concurrent with the Fiscal Year 2011 request, a \$3.6 billion supplemental for the Disaster Relief Fund. These funds are needed due to continuing obligations associated with previous catastrophic storms (Hurricanes Katrina, Rita, and Wilma in 2005 and 2006, 2007 California Wildfires, and Hurricanes Gustav and Ike in 2008, among others).

II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

**Department of Homeland Security  
Federal Emergency Management Agency  
Disaster Relief Fund**

Summary of FY 2011 Budget Estimates by Program Project Activity

FY 2011 Request  
(Dollars in Thousands)

Program Project Activity	FY 2009		FY 2010		FY 2011		Increase(+) or Decrease(-) for FY 2011					
	Actuals		Enacted		Request		Total Changes		Program Changes		Adjustments-to-Base	
	FTE	Amount	FTE	Amount	FTE	Amount	FTE	Amount	FTE	Amount	FTE	Amount
Disaster Relief Fund	7,067	11,375,469	3,600	1,600,000	3,383	1,950,000	(217)	350,000	-	340,931	(217)	9,069
<b>Subtotal, Enacted Appropriations and Budget Estimates</b>	<b>7,067</b>	<b>11,375,469</b>	<b>3,600</b>	<b>1,600,000</b>	<b>3,383</b>	<b>1,950,000</b>	<b>(217)</b>	<b>350,000</b>	<b>-</b>	<b>340,931</b>	<b>(217)</b>	<b>9,069</b>

<b>Net, Enacted Appropriations and Budget Estimates:</b>	<b>7,067</b>	<b>11,375,469</b>	<b>3,600</b>	<b>1,600,000</b>	<b>3,383</b>	<b>1,950,000</b>	<b>(217)</b>	<b>350,000</b>	<b>-</b>	<b>340,931</b>	<b>(217)</b>	<b>9,069</b>

### III. Current Services Program Description by PPA

**Department of Homeland Security  
Federal Emergency Management Agency  
Disaster Relief Fund  
Program Performance Justification**  
(Dollars in Thousands)

#### PPA: Disaster Relief Fund

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2009 Actuals</b>	<b>45</b>	<b>7,067</b>	<b>11,375,469</b>
<b>2010 Enacted</b>	<b>45</b>	<b>3,600</b>	<b>1,600,000</b>
2011 Adjustments-to-Base	-	(217)	9,069
<b>2011 Current Services</b>	<b>45</b>	<b>3,383</b>	<b>1,609,069</b>
2011 Program Change	-	-	340,931
<b>2011 Total Request</b>	<b>45</b>	<b>3,383</b>	<b>1,950,000</b>
Total Change 2010 to 2011	-	(217)	350,000

Note: The DRF, per the Stafford Act, has no permanent positions. The 45 positions above are temporary full time positions associated with the Federal Coordinating Officers (FCOs). FY 2010 Enacted was \$1,600,000,000 with transfers of \$16 million (to OIG) and \$105.6 million (to M&A).

FEMA requests \$1.95 billion for this activity. This is a net increase of \$350 million from FY 2010 enacted to support the five-year average obligation level for non-catastrophic disaster activity. The decrease of 217 FTE represents the transfer of 233 non-disaster-specific CORE positions to the M&A appropriation in FY 2011 (\$23.3 million of funding for this is provided for in the M&A Appropriation). FY 2010 Enacted was \$1,600,000,000 with transfers of \$16 million (to OIG) and \$105.6 million (to M&A).

The President is submitting, concurrent with the Fiscal Year 2011 request, a \$3.6 billion supplemental for the Disaster Relief Fund. These funds are needed due to continuing obligations associated with previous catastrophic storms (Hurricanes Katrina, Rita, and Wilma in 2005 and 2006, 2007 California Wildfires, and Hurricanes Gustav and Ike in 2008, among others).

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The *Robert T. Stafford Disaster Relief and Emergency Assistance Act* (Stafford Act), 42 U.S.C. 5121-5207 (Public Law 93-288, as amended), authorizes the President to provide

Federal assistance to supplement state and local governments' disaster response, recovery, readiness, and mitigation efforts. Under Section 504 of the Homeland Security Act, as amended, FEMA's Administrator has been delegated the responsibility for administering the Stafford Act's Federal assistance programs. The DRF provides funding for the following Stafford Act declarations or activities: (1) major disaster; (2) emergency; (3) fire management assistance; (4) pre-declaration surge; and (5) Disaster Readiness and Support.

FEMA funds Stafford Act programs and disaster support activities in two categories: Direct Disaster Programs and Disaster Readiness and Support (DRS) activities. Direct Disaster Programs are those which support FEMA's responsibility to respond to, recover from, and mitigate the specific impacts of presidentially declared major disasters and emergencies. DRS activities are generalized, non-disaster-specific initiatives (e.g., training) that provide disaster readiness and preparedness support across FEMA.

### **Direct Disaster Programs**

Individual Assistance (IA), Public Assistance (PA), and Hazard Mitigation Grant Program (HMGP) are FEMA's primary Direct Disaster programs. These programs are managed and administered by the Recovery and Mitigation Directorates within FEMA.

These programs constitute the majority of the resources provided by the Federal Government (through FEMA) to directly address the short, medium, and long-term impacts of a disaster on individuals and communities. Disaster assistance under the authorities of the Stafford Act can be provided to states (and further provided to local or tribal governments), the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

### **Individual Assistance (IA)**

The DRF provides funding for the following Individual Assistance Programs:

#### **Individual and Households Programs (IHP) – funded at 100% by the Federal government**

- **Temporary housing** (rent and lodging expense): Funding to rent alternate housing or a temporary housing unit when rental properties are not available.
- **Repair**: Funding is provided for homeowners to repair damage (to their primary residence) from the disaster that is not covered by insurance. A flood insurance purchase and maintenance requirement may be placed on the home if the home is in a Special Flood Hazard Area. Repair assistance is intended to repair the home to a safe, sanitary and functional living condition.
- **Replacement**: Funds are made available to homeowners to assist with the replacement of destroyed primary residence that is not covered by insurance.

The goal is to help the homeowner with the cost of replacing their destroyed home.

- **Permanent Housing Construction:** Funds are made available for the construction of a home, or FEMA will provide direct assistance with the construction. This type of assistance only occurs in insular areas or remote locations specified by FEMA, where no other type of housing assistance is possible, or where other temporary housing options are unavailable or infeasible. Construction shall follow current minimal local building codes and standards (where they exist), or minimal acceptable construction industry standards in the area. Construction will aim toward average quality, size, and capacity, taking into consideration any unique needs (such as disability requirements) of the occupant.

### **Other Needs Assistance (ONA)**

Other Needs Assistance is available for necessary expenses and serious needs of survivors of the declared disaster. Assistance provided by the ONA program is cost-shared between FEMA (75 percent) and the State (25 percent).

Assistance is provided to individuals contingent on their ability or inability to secure a loan from the U.S. Small Business Administration (SBA). If SBA determines that an applicant cannot afford a loan, SBA will automatically refer the applicant to the ONA program for assistance.

ONA can be provided for disaster-related serious needs in five categories:

- **Repair or Replacement of Personal Property:**
  - Clothing
  - Household Items (i.e., home furnishings, appliances)
  - Specialized Tools or Job-related Protective Clothing and Equipment
  - Educational materials (i.e. books)
  - Cleaning Supplies (i.e., wet/dry vacuum, air purifier, dehumidifier)
- **Transportation:** Repair or replacement of a vehicle that is deemed unusable due to disaster-related damage.
- **Medical and Dental Expenses:** Medical treatment or the purchase of medical equipment required due to physical injuries resulting from a disaster.
- **Funeral and Burial Expenses:** Funeral services, burial, or cremation and other funeral expenses related to a death caused by the disaster.
- **Other Items:** The State and FEMA can agree to pay for specific disaster-related costs that are not listed above. Some examples are generators, moving and storage expenses, and the cost of a National Flood Insurance Program Group Flood Insurance Certificate.

## **Crisis Counseling Assistance and Training Program (CCATP)**

The Crisis Counseling Program supports short-term interventions with individuals and groups experiencing psychological effects resulting from large-scale disasters. These interventions involve the counseling goals of assisting disaster survivors in understanding their current situation and reactions, mitigating additional stress, assisting survivors in reviewing their options, promoting the use or developments of coping strategies, providing emotional support, and encouraging linkages with other individuals and agencies that may help survivors recover to their pre-disaster level of functioning. Supplemental funding for crisis counseling is available to State Mental Health Authorities through two grant mechanisms: (1) the Immediate Services Program; and (2) the Regular Services Program, which provide funds for up to nine months following a major disaster declaration.

## **Disaster Unemployment Assistance (DUA)**

The Disaster Unemployment Assistance program provides individuals who have become unemployed because of a disaster and unable to secure regular unemployment benefits with unemployment benefits and re-employment services.

## **Legal Services**

Legal services may be provided to low-income individuals unable to secure such services adequate to meet their needs as a consequence of a major disaster.

## **Public Assistance (PA)**

The Public Assistance program offers assistance to state, local, and tribal governments after a declared major disaster or emergency for eligible disaster-related damage. In addition, certain private non-profit organizations that operate facilities and provide services to the public typically provided by a government agency may receive public assistance. PA is a cost-shared (75% Federal, 25% non-Federal) grant program. However, States may request, and the President may grant a higher Federal cost share in situations in which the disaster has had a significant economic impact on the state.

Public Assistance provides funding to grantees for the repair and restoration of damaged public and eligible private non-profit facilities, for emergency measures taken to protect lives and property, and in support of disaster-related debris removal. When Public Assistance is authorized, such assistance may be provided under one or more of the following seven categories:

- Category A – Debris Removal
- Category B – Emergency Protective Measures
- Category C – Repair of Roads and Bridges
- Category D – Water Control Facilities

- Category E – Public Buildings
- Category F – Public Utilities
- Category G – Other Facilities

### **Hazard Mitigation Grant Program (HMGP)**

The Hazard Mitigation Grant Program provides state, local, and tribal governments with cost-shared grants (75% Federal, 25% non-Federal) to reduce the risk of potential damage, hardship, loss, and suffering in an area affected by a major disaster. Ultimately, the HMGP reduces future need for Federal disaster assistance by reducing the impact of and increasing the resistance to natural hazards.

HMGP funding is made available to states based on 15% of the total Federal funds spent in the Public and Individual Assistance programs (minus administrative expenses) for each major disaster costing up to \$2 billion; 10% for disasters between \$2 billion and \$10 billion; and 7.5% for major disasters between \$10 billion and not more than \$35.33 billion.

HMGP projects vary and may include retrofitting structures to resist flooding, winds and earthquakes; elevating structures above base flood levels; property acquisition and demolition or relocation for open space; and minor flood reduction and drainage measures.

HMGP grants are required to be cost effective. In 2005, the Multi-hazard Mitigation Council (MMC), a part of National Institute of Building Sciences, published a report that analyzed the overall impact of FEMA’s Hazard Mitigation Programs. The findings show that money spent on reducing the potential damage of natural hazards is a sound investment and is cost effective. *On average, a dollar spent on hazard mitigation activities will save the Nation approximately \$4 in future payouts for damage caused by natural hazards.*

### **Other Direct Disaster Programs**

- **Fire Management Assistance**

FEMA provides assistance for the mitigation, management, and control of any fire on public or private forest or grassland that threatens such destruction as would constitute a major disaster. Items eligible for funding under the Fire Management Assistance Grant Program (FMAGP) include equipment, labor costs, emergency work, and temporary repair work directly related to firefighting activities associated with the declared fire.

- **Compacts of Free Association**

The DRF provides funding for disaster relief and reconstruction activities in the Federated States of Micronesia and the Republic of the Marshall Islands pursuant to the Compacts of Free Association. This funding is provided through a direct transfer of DRF funds to the United States Agency for International Development.

## **Disaster Closeout Initiative**

In FY 2010, FEMA is undertaking an aggressive disaster closeout effort within the agency that includes issuing and enforcing standard closeout policies; following consistent closeout practices across all Regions, and streamlining and simplifying the closeout process as much as possible. Each Region and Headquarters office will be increasingly proactive and aggressive in closing out older disasters.

FEMA established a Disaster Closeout Work Group to evaluate and consider all ideas and options, including those contained in a recent OIG report, to improve the disaster closeout process.

The Disaster Closeout Work Group will:

- Confer with senior program officials at Headquarters and the Regions to assess the enforcement authorities provided under 44 CFR 13.43 and ensure consistent compliance with established policies and practices across all Regions;
- Confer with senior program officials at Headquarters and the Regions to evaluate existing time standards and determine whether changes need to be made;
- Canvass the Regions for best practices (processes and tracking systems) for closeout efforts; and
- Document and publish standard doctrine for closeout activities.

The OCFO and Acquisition Management have issued policies to close out contract files and de-obligate un-liquidated obligations (ULOs), as well as aggressively pursue the reduction of un-liquidated obligation that have been deemed stale or invalid.

## **Direct Disaster Recent and Planned Accomplishments**

### **In FY 2009:**

- The DRF supported 62 major disaster declarations and 10 emergency declarations involving 33 states. In addition, fifty-two fire management assistance grants were awarded for eligible fires in 11 states.
- FEMA handled more than 1.4 million disaster assistance applications and provided more than \$245 million in assistance to individuals.
- Over 5,750 State and local governments received over \$1B in assistance under the Public Assistance and Fire Management Assistance Grant Programs for debris removal, emergency protective measures, and the repair or replacement of public damaged facilities.
- FEMA's National Processing Service Centers (NPSCs) initiated the purchase and implementation of Call Recording Software for their Quality Control Management System. This critical software provided call center staff with immediate and objective feedback on a regular basis, which will help to

improve customer service across the call center enterprise. The call recording software also enables the NPSCs to quickly identify incoming call trends and implement corrective actions as required.

**In FY 2010:**

- FEMA will continue to execute its principal mission to supplement state and local efforts to respond to, recover from, and mitigate the specific impacts of presidentially declared major disasters and emergencies.
- FEMA will develop and expand the Logistics Supply Chain Management System (formerly Total Asset Visibility, or TAV). This system integrates a suite of capabilities to provide request visibility, order visibility, order management, in-transit visibility, and eventual delivery of assets and commodities. The Logistics Supply Chain Management System is designed to provide significantly enhanced visibility, awareness, and accountability of disaster resources throughout the supply chain.
- FEMA will significantly reduce the number of used Temporary Housing Units in storage.
- FEMA will right-size the FEMA-managed distribution Storage Network and capabilities.
- FEMA will complete the standardized credentialing plan (“basically qualified”) project for all 230 disaster job titles staffed by FEMA disaster workers.
- FEMA will redefine requirements and implement an updated Interagency Agreement with the Internal Revenue Service to provide surge Registration Intake staff following a large or catastrophic event.

**In FY 2011:**

- FEMA will continue to execute its principal mission to supplement state and local efforts to respond to, recover from, and mitigate the specific impacts of presidentially declared major disasters and emergencies.
- Continue implementation of Disaster Closeout Initiative to accelerate close-out of legacy federal disasters.

**Disaster Readiness and Support (DRS)**

FEMA reassessed its ability to respond to large-scale, complex, presidentially-declared major disasters and, rather than waiting for disasters to occur and reacting with costly and inefficient response actions, saw the need for a more proactive and robust advance-readiness posture. The successor to the legacy Disaster Support activities (DSA), Disaster Readiness and Support activities (DRS) funding was established to bolster FEMA’s general steady-state effectiveness and readiness.

FEMA manages disaster readiness support costs throughout the year. These expenses are essential for: (1) timely disaster response; (2) responsive customer service; and (3) cost-effective program oversight and delivery.

The DRS funds key activities and initiatives, such as:

- Strategic pre-positioning and management of disaster commodities
- Improved inventory of specialized assets
- Standby support to enable FEMA to increase response and recovery capacity as quickly as needed.

DRS activities support FEMA's all-hazards mission. They include initiatives and resources formerly funded from the DRF's legacy DSA, as well as post-Katrina readiness contracts. Many of these costs are predictable on an annual basis and allow FEMA to support a cross-section of disasters utilizing an infrastructure of processing and distribution centers and information technology systems. In addition, the DRS includes certain costs to help FEMA pre-position for disasters, including the establishment of large commodity and transportation service contracts that can be activated in the event of a major disaster.

These efforts (including better communications, a more effective intake process, more efficient delivery systems for disaster commodities, and improved oversight of disaster aid through our technical assistance contractors) will continue to improve the quality of FEMA support to disaster survivors.

FEMA has increased transparency and budgetary discipline of the DRS through the implementation of detailed spending plans and through monthly program reviews. The monthly program review process emphasizes a more efficient program administration and budgetary accountability. As a result, FEMA is better equipped to maintain its critical disaster support activities and infrastructure; and ensure the timely delivery of disaster assistance.

FEMA anticipates that the 2011 DRS spend plan will fund activities similar to those funded in 2010 less the funding for the 233 CORE positions transitioning to the M&A appropriation.

## **OPERATIONS**

### **Response Directorate (formerly Disaster Operations Directorate)**

The Response Directorate coordinates and provides the core Federal disaster response capability needed to save lives, reduce suffering, and protect property in communities throughout the nation that have been overwhelmed by the impact of a major disaster or emergency, regardless of cause. Three core program activities funded by the DRS account are: Hurricane Planning Response Team; the GAP Analysis Initiative; and establishment of the Disaster Emergency Communications Division.

Formerly known as the Gulf Coast Warm Cell, the Hurricane Planning Response Team leads the charge to ensure mass evacuation guidelines, standards, and requirements are established and effective, in a hurricane scenario.

The GAP analysis initiative was implemented during the 2007 hurricane season, to provide a snapshot of asset gaps at the local, State, and national level and to determine the level of Federal support potentially needed to respond to a category 3 hurricane. The initial focus was on seven key areas in the 18 most hurricane prone states. In 2009, the analysis was expanded to strengthen the capabilities of those States to reduce their reliance on Federal support by developing creative solutions that leverage the capabilities of State and local jurisdictions and the private sector. In FY 2010 funding responsibility for GAP shifted to the M&A appropriation.

Disaster Emergency Communications Division (DECD) is taking a leading national role in the management, oversight, and development of emergency communications capabilities and doctrine. Response Directorate is developing and implementing the capability to provide voice, data, and video communications services before, during, and immediately after an incident in support of emergency managers at all levels of governments. The directorate will aggressively respond to disasters and other emergency situations and support the needs of emergency responders. The DECD is engaging across the Federal government, State and local agencies, and other partners to help establish consistent doctrine, plans, tactics, techniques, and procedures that ensure effective communications interoperability, standards, and capabilities during coordinated response operations.

The National Program oversight Regional Emergency Communications Coordination Working Group (RECCWG), as defined in the Title XVIII of the Department of Homeland Security Appropriations Act of 2007, assess emergency communications capabilities within their respective FEMA Regions; facilitate disaster preparedness through the promotion of multi-jurisdictional and multi-agency emergency communications networks; and ensure activities are coordinated with all emergency communications stakeholders within the FEMA Region.

## **Response Directorate Recent and Planned Accomplishments**

### **During FY 2009:**

- Hurricane Planning Response Team:
  - Expanded the concept, process and procedures established in Gulf Coast Planning Initiative to the Atlantic Coast.
  - Incorporated aspects of the Mitigation hurricane evacuation studies and risk assessment modeling into plans and programs
  - Refined organizational constructs such as the Evacuation Liaison Team, Movement Coordination Branch (aviation, bus, and rail) into the National Incident Management System (NIMS).

- GAP Analysis Program:
  - Released guidance on the implementation of GAP to all FEMA Regions and states. With the release of this guidance, the program rolled out to all states with a risk-based, all-hazards approach.
  - Developed and promulgated a new user-friendly GAP Data Collection and Analysis Tool. The tool reduces subjectivity and provides standardized data, from which the GAP Management Office can produce ad-hoc reports and support response operations.
  
- Disaster Emergency Communications:
  - Established all ten mandated Regional Emergency Communications Coordination Working Groups (RECCWG) that consist of Federal, State, and local representatives, and other non-government agencies to address interoperable emergency communication concerns;
  - Developed 27 State, 15 Emergency Support Function (ESF), and 4 regional emergency communications plans that allow FEMA to be better prepared to preposition and deploy communications resources during catastrophic incidents;
  - Developed 11 Pre-scripted Mission Assignments with the Federal Communications Commission (FCC), National Communications System (NCS), United States Coast Guard (USCG), Department of Defense (DoD), and United States Forest Service (USFS) to facilitate rapid response for communications requirements;
  - Developed a National Response Network Strategy for enabling interoperable emergency communications through the use of Internet Protocol (IP) based networks;
  - Participation in multiple emergency communications exercises to include the Defense Interoperability Communications Exercise (DICE), Vigilant Accord, and Eagle Horizon.

**During FY 2010:**

- Hurricane Planning Response Team will:
  - Update evacuation studies and risk assessments
  - Exercise organizational constructs in National Level Exercises
  
- Disaster Emergency Communications will:
  - Promote interoperable communications at the Federal, State, local, and Tribal levels and support resilient communications capabilities for response efforts. Resilient communications will incorporate secure voice, video, and data capabilities.
  - Develop a communications coordination framework to provide an effective resilient command and control communications framework for the Administrator and Regional Administrators that includes delivery of secure communications solutions;

- Promote communications interoperability with state and local response organizations through Regional Emergency Communications Coordinating Work Groups (RECCWGs)

**During FY 2011:**

- Hurricane Planning Response Team will:
  - Expand upon the All-Hazards Evacuation and Transportation work from the 2010 planning initiative
  - Implement damage Assessment Plans (Information Requirements)
  - Enhance the Target Capabilities (Citizen Evacuation) for State & local governments
  - Incorporate Population Movement into the New Madrid Seismic Zone Earthquake Planning
- Disaster Emergency Communications will:
  - Work with the National Communications System to enhance long-term communications restoration;
  - Implement the National Response Network/RoIP Strategy for enabling interoperable emergency communications through the use of Internet Protocol (IP) based networks.

**Logistics Directorate (formerly Logistics Management Directorate)**

The mission of the Logistics Directorate (LD) is to effectively plan, manage and sustain national logistics response and recovery operations, in support of domestic emergencies and special events – to serve as the National Logistics Coordinator (NLC).

**Major Programs**

- The temporary housing unit (THU) program will continue closing sites as the excess inventory disposal process progresses, to allow focus on core business of THU readiness.
- Distribution Centers (DCs) will develop a plan for implementing and integrating the appropriate mix of internal and external support capabilities. The Atlanta and Caribbean DCs will be relocated, and the Atlanta DC will serve as a prototype for all future Distribution Centers.
- LD's Transformation and Initiatives and Property Management Program will continue the development and expansion of the Logistics Supply Chain Management System/Total Asset Visibility (LSCMS/TAV) System. LSCMS/TAV integrates a suite of systems to provide oversight and management of: requisitions; orders; goods in transit; and delivery of assets and commodities. The long-term vision for the LSCMS/TAV program is to engage external emergency management stakeholders –

from State, Local and Tribal governments and other Federal agencies and vendors – in the entire FEMA supply chain. The Logistics Capability Assessment tool and associated Resource Requirements Calculator will be implemented across a comprehensive cross section of states and regions to assess state logistics readiness and response capabilities.

**Logistics Operations, Temporary Housing Unit (THU) Program** – The THU Storage Sites Program supports the Recovery Directorate’s Direct Housing Program. The program represents a life-cycle and performance-based business model, and supports THU sites with contracts for various support services. The DRS supports the base costs, including land leases, for FEMA’s THU readiness and storage sites and satellite locations. Readiness sites are used to store and maintain temporary housing in ready for dispatch condition that can be deployed and utilized to house citizens in need after a disaster. Storage sites currently contain temporary housing unit sites that are excess to FEMA’s needs. The THU program will continue closing sites as the excess inventory disposal process progresses, to allow focus on core business of THU readiness.

**Distribution Centers (DCs)** – Essential improvements are underway for a Distribution Center Strategic Plan, in response to PKEMRA’s mandate to establish a professional logistics capability. LD is working toward a comprehensive and performance-based business model which fully utilizes the capabilities and assets of our business partners and commercial industry. The result will be an organic capability that is determined based on a National Inventory Plan, as well as a “virtual capability” from all partners.

During a disaster operation, the DCs support FEMA disaster responders with critical equipment and supplies, including emergency meals, bottled water, generators, cots, blankets, tarps, blue roof sheeting and other disaster commodities. These life-saving and life-sustaining resources provided to citizens in times of disaster can be distributed through state and county distribution points in time of need. A portion of these supplies have been pre-positioned in the hurricane-prone states in Regions I, II, IV and VI. Through mutual agreement the DCs also store pre-positioned medical caches in support of HHS’s National Disaster Medical Systems. FEMA and HHS work collaboratively to issue the caches when requested.

The DRS supports base costs, including rent, for FEMA’s eight DCs (located in Atlanta, GA; Berryville, VA; Fort Worth, TX; Frederick, MD; San Jose, CA (Moffett Field); Hawaii; Guam; and Puerto Rico). Additionally, FEMA stocks commodities in the dual purpose Temporary Housing and Distribution Center located in Cumberland, MD.

The OCONUS (Outside Continental United States) DCs have an expanded mission. FEMA Distribution Center Hawaii provides FEMA owned Humanitarian Daily Rations (HDRs) to the Department of State and United States Pacific Command in support of foreign disaster assistance, provided the action will not adversely affect FEMA’s ability to meet domestic disaster relief responsibilities. FEMA DC Guam stores Department of Defense owned HDRs at no cost to the Department of Defense in exchange for the authority to withdraw Department of Defense-owned HDRs for FEMA purposes.

**Property Management** – The DRS supports the management oversight, internal control and technical reviews in the areas of property accountability, reutilization and disposal of the agency’s personal property assets, such as disaster supplies and equipment. DRS Property Management manages the Logistics Supply Chain Management System (LSCMS), which is the supply chain execution and visibility solution for the FEMA Logistics Directorate. The solution encompasses five main areas of supply chain functionality: request, order, fulfillment, shipping and receiving. The solution provides operational readiness inventory information for the Directorate through near real time system usage by staff and also reporting functionality and the ability to provide In Transit Visibility of shipments and assets as they move through the supply chain. The LSCMS system, combined with GPS and mapping technology, provides visibility into FEMA's supply chain. Currently, the LSCMS system is able to track the movement of more than 200 assets and commodities with primary focus on the "Big 8" commodities such as water, ice, emergency meals (MREs), plastic sheeting, tarps, cots, blankets and generators.

### **LD Recent and Planned Accomplishments**

#### **FY 2009:**

- Instituted THU readiness tracking metrics for asset readiness and THU disposal.
- Accomplished initial build-out of six Incident Support Base Kits; FEMA teams now equipped to execute ISB mission.
- Completed development of virtual Point of Distribution (POD) course for POD operations; 5000 state responders and volunteer organizations have completed training
- Implemented standardized concepts of operation for managing and executing the THU, Base Camp and Incident Support Base (ISB) missions.
- Completed Phase 1A of LSCMS, culminating in award of in major contract which will build on existing applications using the Manhattan Supply Chain Management Suite of COTS products.

#### **FY 2010:**

- Complete relocation of Atlanta Distribution Center and Caribbean Distribution Center with integration of future personnel structure, processes, and technology; the Atlanta DC will serve as a prototype facility for all future Distribution Centers.
- Dispose of the majority of excess temporary housing units (THUs) and close up to eight THU sites.
- Upgrade Incident Support Base (ISB) response kits, including SATCOM capability.
- Implement the Logistics Capability Assessment tool and associated Resource Requirements Calculator across a comprehensive cross section of states and regions to assess state logistics capabilities.
- Complete Phase 1B of Logistics Supply Chain Management System (LSCMS; formerly TAV) which entails expanding the Training Manager Maintenance Module

and GPS Messaging to remaining regions as well as implementing the Performance Reporting Module.

**FY 2011:**

- Complete upgrade of the Distribution Centers with integration of future personnel structure, processes and technology.
- Secure leases for relocation of Hawaii Distribution Center.
- Achieve full operational capability of new Western THU readiness site.

**Recovery Directorate (formerly Disaster Assistance Directorate)**

The Recovery Directorate works to ensure that individuals and communities affected by disasters of all sizes, including catastrophic and terrorist events, are able to return to normal with minimal suffering and disruption of services. Program activities focus on improving efficiency and expediting delivery of disaster assistance to eligible individuals, to state, local, and tribal governments, and to eligible private nonprofit organizations. This is accomplished through a commitment to streamline procedures to improve program policy, to minimize error, and to modernize service delivery technology.

Annual costs for the following contracts, staff, and activities will be funded through the DRS (actual deployment costs in response to a disaster declaration will continue to be funded from the specific disasters):

- Staffing  
DRS funding is utilized for the salaries and benefits for approximately 67 temporary employees nationwide that support a wide variety of Disaster Assistance related programs, including, but not limited to: The Individual and Public Assistance Programs; Technical Assistance Contract implementation, long-term community recovery; and disaster information management.
- Contract Support
  - Individual Assistance Technical Assistance (IA-TAC)
  - Public Assistance Technical Assistance (PA-TAC)
  - Housing Inspection Services (HIS)
  - Mail Operations
  - Enterprise Application Development Integration and Sustainment (EADIS)
  - Corporate Lodging Consultants (CLC)
  - Surge Staffing for Registration Intake
- National Processing Service Centers (NPSCs)  
The DRS supports base costs, including rent and security, for FEMA's three NPSCs located in Maryland, Texas, and Virginia. The NPSC facilities provide FEMA call center and benefits processing capabilities to register and process disaster survivors' applications.

DRS funding for the NPSCs also supports the following:

- Developers to make continuous updates to IA program changes in the NEMIS system to ensure that processing complements the most up to date policies.
  - What is expected to be a one- time cost for equipment that supports an Interagency Agreement with the Internal Revenue Service (IRS) to provide surge staffing for Registration Intake as needed. Specifically, meeting FEMA technical requirements for IRS facilities that perform this function. When the IAA is utilized pursuant to a disaster declaration, funding will be charged to the declaration's costs under the DRF.
- Other Interagency Agreements
    - Crisis Counseling Assistance and Training Program (CCATP). The Center for Mental Health Services (CMHS) under the U.S. Department of Health and Human Services provides critical technical support in the management of FEMA's Crisis Counseling Assistance and Training Program (CCP). FEMA annually funds three PFT positions, contract support, travel, equipment supplies and administrative costs through an IAA. When the program is actually "turned on" pursuant to a disaster declaration, funding will be charged to the declaration's costs under the DRF.
    - Disaster Unemployment Assistance (DUA). The Employment and Training Administration, within the Department of Labor (DOL), administers the Disaster Unemployment Assistance (DUA) Program on FEMA's behalf. As such, FEMA annually funds DOL through an IAA to perform this function. When the program is actually "turned on" pursuant to a disaster declaration, funding will be charged to the declaration's costs under the DRF.
  - Maintain a Web-based Public Assistance Program
    - DRS funding is used to maintain a web-based capability for the Public Assistance Program (PA) that allows FEMA staff, PA applicants, and States to perform all PA grant management activities online in addition to supporting the use of state-of-the art technology such as wireless handheld devices. This includes maintaining the use of handheld devices for Public Assistance staff and contractors to perform inspections on damaged facilities. The information then is automatically uploaded into the web-based system, eliminating a paper based process, improve efficiency, and attain cost savings.

## **Recovery Directorate Recent and Planned Accomplishments**

### **In FY 2009:**

- Awarded Individual Assistance Technical Assistance Contracts in support of Individual Assistance Programs.
- Implemented EMMIE Version 1.01 which effectively addresses the lifecycle of a Public Assistance grant(s) including: disbursement of payments; requests for final inspection; and claims processing.

- Deployed DARAC Version 1.91, a NEMIS web based application, that enhanced the capability to manage Direct Housing Missions; providing visibility from the time an applicant is referred to the program through the Pre Placement Interview and eligibility process, Site Inspections to determine feasibility, Work Order Set Up, Staging, Unit Assignment, Recertification, Maintenance and Unit Deactivation.

**In FY 2010:**

- Award new Housing Inspection Services contract that will improve overall efficiency of the housing inspection process.
- Implement multi-language letter capability to improve communication between FEMA and survivors. Once implemented, non-English speaking disaster survivors will receive correspondence regarding assistance in their respective languages.
- Pilot the utilization of a surge staffing contract to perform Registration Intake at the National Processing Service Centers for multiple and/or catastrophic events

**In FY 2011:**

- Build capability for E-mail Correspondence with Disaster Survivors to allow for more effective exchange of information with disaster survivors and reduce related supplies and mail distribution costs.
- Implement EMMIE Version 2.0 for the PA Program. EMMIE Version 2.0 will include the development of software for handheld units that will allow PA Program staff to expeditiously capture information on Preliminary Damage Assessments (PDA's) and debris removal operations that can be directly input into EMMIE for processing.

**Federal Coordinating Officer Operations**

The Federal Coordinating Officer (FCO) program consists of 45 officers that provide critical leadership at FEMA field offices during presidentially – declared disasters and in support of State level planning and preparedness efforts. Primary DRS program costs are travel requirements to maintain credentialing and qualifications, and communication equipment to effectively administer disaster relief from the field. During deployment to disasters, the FCOs are funded by the specific disaster declarations.

**FCO Recent and Planned Accomplishments**

**In FY 2009:**

- Completed a Strategic Plan for FY 2009-FY 2014 emphasizing improving the management of field operations and standardization of the delivery of disaster assistance through the disaster-specific Joint Field Office.

- Served as team leaders for the new national and regional Incident Management Assistance Teams.

**In FY 2010:**

- Bring the cadre up to the strength authorized and ensure the necessary training to have the appropriate numbers of credentialed FCOs match the severity level of disasters to which FEMA responds.

**In FY 2011:**

- Enhance training for specialized Response FCOs and qualified Chemical, Biological, Radiological, Nuclear, and high yield Explosive (CBRNE) FCOs.

**NATIONAL PREPAREDNESS AND PROTECTION**

**National Preparedness Directorate (EMI)**

The Emergency Management Institute (EMI) within the National Preparedness Directorate is responsible for training FEMA's Disaster Workforce (including PFT s, COREs, and DAEs) to perform the tasks as defined in their credentialing plans at the basic, intermediate, and advanced levels. The foundations for the disaster workforce credentialing plans are individual position task books developed by EMI. These position task books reflect the work to be accomplished for each FEMA disaster position (over 300). These tasks are performed at the Joint Field Office, National Response Coordination Center, Regional Response Coordination Center, and in the field (staging areas, command centers, emergency operation centers, etc.). The position task books include an evaluation component to assess performance against tasks performed. EMI works in partnership with FEMA's Disaster Reserve Workforce Division to ensure that training, credentialing plans, and position task books are in sync to guarantee the readiness of FEMA's disaster workforce. When EMI provides training for DAEs in fulfillment of a portion of DRW's DAE Credentialing efforts; when this occurs the costs incurred by/at EWMI include DAE S&B and travel expenses.

**NPD/EMI Recent and Planned Accomplishments**

**In FY 2009:**

- Added 22 new courses to its curriculum for the FEMA disaster workforce.
- Delivered over 200 courses in resident, field, and online with over 50,000 completions.
- Updated 250 Position Tasks Books for FEMA Joint Field Office positions.

**In FY 2010:**

- Add 30 new courses to the curriculum for FEMA's disaster workforce.
- Assist the Disaster Reserve Workforce in the development of credentialing plans.
- Complete an analysis and revise the Managerial Disaster Workforce training requirements and curriculum.

**In FY 2011:**

- Add 30 new to the curriculum for FEMA's disaster workforce.
- Assist the Disaster Reserve Workforce in the development of credentialing plans.
- Will increase participation in integrated exercises to assess the capability of FEMA's disaster workforce.

**MISSION SUPPORT****Office Chief Information Officer (CIO)**

The Office of the CIO provides technical oversight and administrative support to FEMA's mission by maintaining and enhancing the technological infrastructure. The DRS specifically funds several operation and maintenance services key to disaster readiness. The major Information Technology (IT) activities funded by the DRS in FY 2009 included:

- Disaster Assistance Improvement Program (DAIP)
- Network Services
- Document Management and Records Tracking System (DMARTS)
- Disaster Communications
- Disaster Assistance Technical Services (DATS)
- National Processing Service Center (NPSC) and Distribution Center (DC) Support
- Disaster Financial support Capability (DFSC)

**Disaster Assistance Improvement Program (DAIP)**

Post - Hurricane Katrina, more than 800,000 individuals required immediate disaster assistance (shelter, food, clothing, etc.). Federal agencies across the board received millions of requests for assistance – FEMA alone received 2.7 million applications. The influx of applicants ultimately overwhelmed the system, and the President signed Executive Order 13411 requiring FEMA to overhaul its assistance process and unify applications across the federal interagency. DRS funds provide support to the DAIP which has created initial operating capacity for a single access point for more than 40 federally funded forms of assistance (FOAs) and streamlines applicants' information into a unified system.

### Network Services

Network Services are required throughout the life of a disaster or emergency, specifically, computer hardware and software used by FEMA and other Federal partners supporting an event. The network services program manages, directs, and supports the daily operations and maintenance of the FEMA disaster network mission. It provides a safe and secure network via the Security Operations Center. It also provides tier-2 restoration support for FEMA's nationwide voice and data network in the event of failure and the 24/7 help desk support. Additionally, network services include communication services that allow two or more computers or other devices to exchange data.

### Document Management and Records Tracking System (DMARTS)

DMARTS is an enterprise solution for conforming disaster document and records management to DHS Documents Management standards. Its purpose is to provide an enterprise level application that will provide data capture, document management, correspondence tracking, and records management functionality. This system supports FEMA users in locating, accessing, storing, retrieving, managing, and archiving documents, along with creating consistent streamlined supportable processes for the user community.

### Disaster Communications

The Office of the CIO supports telecommunications services for disaster missions. Specifically, satellite airtime for the Mobile Emergency Response System (MERS) and Mobile Disaster Recovery Centers and the communication needs for the FEMA National Processing Service Centers (NPSCs) (local & long distance telephone services, circuits, 800-services, 800-translator service, switch maintenance, router maintenance, and satellite services which support the infrastructure needed to provide voice and data connectivity to the NPSC call center agents).

### Disaster Assistance Technical Services (DATS)

DATS is the framework that supports a range of services provided to the disaster workforce, disaster survivors, and the public. One of the major services provided is the Disaster Assistance Support Center (DASC) which is the primary reception center for new information system requests for FEMA's Recovery Directorate.

### Office of the CIO Support to the NPSCs & Disaster Response

CIO contractor support and equipment are provided so that the NPSCs can provide efficient call center service and timely expedition of disaster survivors' applications. The CIO also provides: (1) IT contractors to be deployed to the Joint Field Offices (JFOs) as part of the IT Disaster Response Team, (2) hardware and software maintenance for fax servers, (3) maintenance and repair of vehicles deployed to the JFOs; (4) maintenance of the asset management tool, (5) network management and troubleshooting, (6) software maintenance and development of the Gold image to reimage disaster laptops, (7) and UPS Maintenance.

### Disaster Financial Support Capability (DFSC)

FEMA's National Emergency Management Information System (NEMIS) provides a comprehensive capability to support the financial elements of the disaster management

process in the form of the Emergency Support (ES) Module. The ES Module provides the front end processing of disaster financial management documents and processes financial transactions and services through FEMA's Integrated Financial Management Information System (IFMIS). The ES Module pre-processes financial transactions from other modules and exports them into IFMIS. The ES Module payment system allows users to process disaster-housing payments and perform recoupment and other administrative tasks associated with disaster payments.

## **CIO / IT Recent and Planned Accomplishments**

### **During FY 2009, the Office of the CIO:**

- Strengthened the security of the IT environment by achieving and maintaining a Federal Information Security Management Act score of 90% for each reporting period, one of only three DHS components to achieve this goal with a final score of 92%.
- Completed the integration of six Federal, State and other organizational entities into the Disaster Assistance Improvement Program.
- Recruited 34 State Library Associations to assist disaster survivors in applying for assistance and recovery
- Provided reliable, integrated, and secure communication and information systems by maintaining 99.9% critical system uptime.
- Provided rapidly deployable voice/data communications capability via Mobile Disaster Recovery Centers and Mobile Registration Intake Centers.

### **During FY 2010, the Office of the CIO will:**

- Implement new mission and business systems and enhance existing systems (e.g. Human Capital system; IFMIS enhancements)
- Continue the integration of Federal, State and other organizations with centrally administered federally funded forms of assistance (FOAs) into the FEMA-managed Disaster Assistance Improvement Program.
- Transition the Disaster Assistance Center, service oriented architecture, and surge capabilities to DHS Data Centers
- Continue the aggressive consolidation of FEMA data centers to DHS data centers.

### **During FY 2011, the Office of the CIO will:**

- Deploy new mission and business systems completed in FY10 to address identified weaknesses and deficiencies and improve FEMA's underlying IT foundation.
- Conduct outreach efforts to identify additional Disaster Assistance Improvement Program integration opportunities with federally funded, state and locally administered FOAs
- Continue the transition to DHS data center as determined by the overall DHS plan/timetable

## **Office of Chief Financial Officer (OCFO) / Centrally Managed (CM) Accounts Recovery Directorate**

The OCFO leads FEMA in financial management and accountability to ensure the effective use of resources and service to stakeholders in the accomplishment of FEMA's mission.

The OCFO oversees planning and response activities of the financial management members of FEMA's emergency teams and management of the national Disaster Comptroller cadre.

### **2-Year CORE Salaries and Benefits**

FEMA maintains a class of employees referred to as Non-Disaster Specific Cadre of Response Employees (NDS COREs) to perform essential duties that cannot reasonably be attributed on a disaster specific basis. These NDS COREs were hired as Temporary Full-Time (TFT) employees with appointments not-to-exceed 2-years. Based on the distribution of work among all of the programs/offices, for FY 2010, 289 2-Year NDS CORE positions are proposed for funding from the DRS. Of these positions, 233 will transfer to the M&A appropriation (as PFTs) and no NDS CORE positions will be funded from the DRS as of FY 2011.

FEMA will continue to utilize the DRS to maintain critical, ongoing administrative and management (corporate) accounts. These costs include the following: rent/leases for specified FEMA spaces occupied by disaster employees; disaster-related postage and shipping charges; disaster financial operations support; unemployment insurance and workmen's compensation for DAE's; and CORE transit subsidy. This account will have oversight within the OCFO.

### **OCFO Recent and Planned Accomplishments**

#### **FY 2009**

- Initial recognition and funding of Non-Disaster Specific (NDS) 2-year CORES

#### **FY 2010**

- Expanded recognition and funding of NDS 2-year COREs
- Inclusion of CORE transit subsidy

#### **FY2011**

- Elimination of NDS 2-year COREs and transfer of positions and requisite funding to the M&A appropriation.

## **Office of the Chief Security Officer (CSO)**

The Office of the Chief Security Officer is responsible for following: Physical Security, Personnel Security, Disaster Security Operations, Technical Security Countermeasures Program, Administration Security Services, Information Security, Operations Security, Special Security Programs and Security Training. These security services support all FEMA personnel, external customers, fixed facilities, and disaster operations nationwide.

DRS funding for this activity includes background investigation and fingerprint processing for all disaster employees and contractor staff assigned to a JFO or disaster facility. Funding also supports contractual services for Federal Protective Service (FPS) at FEMA fixed disaster facilities. Guard services provided at FEMA disaster locations are funded from the disaster declaration.

## **Office of the CSO Recent and Planned Accomplishments**

### **During FY 2009, the Office of the CSO:**

- Conducted background investigations and processed fingerprints for all Stafford Act employees

### **During FY 2010, the Office of the CSO will:**

- Initiate establishment of a 25 member strike team of professional officers, (DAE) employees to deploy initially to any and all declared disaster situations requiring security support.
- Identification and implementation of security guard reductions at FEMA disaster and disaster support locations as a means of realizing cost savings.
- Initiate the deployment plans for Contingency Credentialing Readiness to support Disaster locations by deploying to pilot regional sites and pilot disaster deployment.

### **During FY 2011, the Office of the CSO will:**

- Establish Regional Security Officers for all 10 FEMA Regions. The position ensures that regional assets, resources, personnel, information, and equipment are properly protected and secured commensurate with specific requirements associated with a particular region. Regional Security Officers will also ensure sufficient support to disaster operations within Regional areas.

## **Office of the Chief Human Capital Officer (CHCO)**

The Office of the CHCO is responsible for workforce planning, employment and recruitment, pay and performance, training, organizational development, employee and labor relations, awards, leave, workplace programs, employee grievances and appeals.

The Disaster Reserve Workforce Division (a component of the Office of the CHCO) was established in 2008 and supports FEMA's Reserve Workforce through a centralized framework that strengthens force readiness, coordinates the direction and management of Disaster Assistance Employees' (DAE) resources, and guides the professional development of DAE members. DRW initiatives are coordinated with the Human Capital Division, Emergency Management Institute, each FEMA component and its Cadre Managers, and other key stakeholders who provide critical DAE program support.

Historically, FEMA has relied on Disaster Assistance Employee (DAE) Reservists to staff the majority of positions in the Joint Field Offices (JFO). The current workforce structure has not kept pace with the changing demands and organizational transitions within FEMA and DHS. Professionalizing the Disaster Workforce seeks to identify and resolve persistent problems in three major areas: workforce structure; automated workforce management systems; and training and credentialing of the disaster workforce. The DRS provides funding for a program management office to emphasize Disaster Reserve readiness and tailor best-practices from successful workforce models.

DRW will assist in the credentialing and deployment of responders from FEMA's full-time workforce and the Surge Capacity Force and;

- Develop policy, allocate Agency resources, and maintain systems that adapt the DRW to the evolving needs of FEMA and Disaster Reservists.
- Coordinate force planning, training, credentialing and deployment of the DRW, full-time FEMA employees, and the Surge Capacity Force.
- Prescribe and enforce nationwide standards of Reserve readiness.
- Oversee DRW Advisory Group to achieve unity of effort in DRW management.
- Implement, manage, and improve standardized processes for tracking Reserve availability, deployment, and demobilization.

**Office of the CHCO Recent and Planned Accomplishments  
During FY 2009, the Office of the CHCO:**

- Introduced the "BEST Workforce" initiative to FEMA to change the culture of FEMA, with a 5 year goal of achieving greater employment engagement, higher quality control and better performance management
- Implemented FEMA's first annual employee engagement survey
- Trained 200 plus managers in the Great Manager's program
- Began training FEMA Strengths coaches to serve as subject matter experts (SMEs) and mentors to employees with the goal of using their strengths to be more productive
- Initiated development of a next generation deployment system to improve the disaster responder deployment and tracking systems.
- Collaborated with a cross-programmatic governance team, the Emergency Management Institute (EMI), and cadre managers to complete NIMS-compliant Cadre-Specific Credentialing Plans for the first 8 cadres of the Agency's 23 specialized cadres, with an additional 7 Cadre-Specific Credentialing Plans in the final stages of development.

- Initiated migration of the Disaster Reserve Workforce (first two cadres) to the new credentialing framework.
- Began working with planners and cadre managers at the Headquarters and Regional levels to determine the number and composition of skilled Disaster Reservists required for response and recovery.
- Reviewed, updated, and issued Disaster Reserve Workforce administrative and compensation policies including policies and pay system coding changes for holiday compensation, sick leave, and administrative absence for deployed Disaster Reservists.

**During FY 2010, the Office of the CHCO will:**

- Conduct and implement FEMA's second annual employee engagement survey, with a goal of increasing FEMA's Employee Engagement Grand Mean by 0.10 (from 3.54 to 3.64 on a scale of 1-5) from FY09 to FY10.
- Using new employee survey results, aggressively facilitate action planning and goal setting for work groups to identify sources of engagement and sources of disengagement and make improvements.
- Continue to train managers across the agency through the well-received Great Manager Program.
- Complete training of FEMA Strengths coaches to serve as SMEs and mentors to employees.
- Implement Strengths Finder assessment within the 10 FEMA Regions and encourage discussion between managers and employees about employee workplace strengths.
- Continue development of a next generation deployment system to improve the disaster responder deployment and tracking systems.
  - Complete the cadre-specific credentialing plans for all remaining cadres, and continue migration of the Disaster Reserve Workforce to the new credentialing framework.
  - Continue working with planners and cadre managers to determine the distribution and number of skilled Disaster Reservists required for response and recovery operations.
  - Develop, promulgate, and clarify a wide range of policies for Disaster Reservists to include basic conditions of employment, limited on-line training, and implementation of legislative changes for the Disaster Reserve Workforce, should they be.
  - Develop recruitment strategies, marketing plans and compensation activities which target specific skill sets needed to fully staff the Disaster Reserve Workforce. Complete the build out of staff and funding resources to reach full operating capability within the Disaster Reserve Workforce Division.

**During FY 2011, the Office of the CHCO will:**

- Improve FEMA's employee engagement Grand Mean by another 0.10 (e.g. from 3.65 to 3.75).
- Continue to train the remainder of the 800 managers in FEMA through the Great Manager Program.
- Conduct the third annual BEST Employee Engagement Survey to measure progress in employee engagement.
- Continue using new employee survey results to aggressively facilitate action planning and goal setting for work groups to identify new or continuing sources of engagement and sources of disengagement and make further improvements.
- Begin rollout of Strengths Finder assessment to non-regional PFTs and COREs throughout FEMA.
- Conduct Business Impact Analyses linking employee engagement scores to other metrics to measure return on investment of BEST and to learn how to use employee engagement scores to predict other FEMA outcomes.
- Introduce the next generation FEMA deployment and reporting system.
- Complete the migration of the Disaster Reserve Workforce to the new Credentialing Program framework.
- Begin the migration of full-time FEMA employees to the new credentialing framework.

**Office of the Chief Procurement Officer (CPO)**

The Office of The CPO is responsible for \$2,000,000,000 plus DRF funds to support a full range of acquisition services and business solutions such as finalizing and closing out contracts, maintaining the contract writing system, and enhancing the contract file management system's capability.

**Office of the CPO Recent and Planned Accomplishments**

**During FY 2009, the Office of the CPO:**

- Awarded more than 97% of its Hurricane readiness and support contracts before hurricane season
- Initiated project to automate the requisitioning (40-1) process, moving from the current paper/hard copy and labor intensive system. This new process will: provide improved management/oversight of acquisitions; decrease cost of printing forms; decrease potentials for errors; and allow stakeholders to better track their requisitions.

**During FY 2010, the Office of the CPO will:**

- Improve execution of approximately 11,000 disaster contracts in the critical area of implementation of new statutory requirements and contract oversight.

**During FY 2011, the Office of the CPO will:**

- Improve acquisition business processes by leveraging e-business technologies such as Pro-Trac, FedBid, and other systems.

**The Office of the Chief Administrative Officer (CAO)**

The Office of the CAO is responsible for RFEMA facilities and services support, records management, and Occupational Safety and Health and Environmental (OSHE). Regarding facilities and services, the Office of the CAO provides and maintains, in an efficient and cost effective manner, safe, comfortable and attractive facilities and surroundings. The CAO is responsible for the operation and maintenance of approximately 3.7M square feet of space leased and government owned space. Generally, GSA is responsible for acquiring space to meet FEMA's requirements and leasehold improvements; however, the CAO has full responsibility for the planning, management, and support services activities of leased and owned facilities, and permitted uses of land and structures. The Office of the CAO encompasses the following activities: Support Services; Operations and Maintenance; Repairs and Alterations; Energy Management; Regional Facility Acquisition and Capital Planning Support; Space Management; Real Property Asset Management; Personal Property; Fleet Management; Publishing, Reproduction and Graphics; Transit Subsidy Management; and Mail Management and Operations.

After establishing a new Space Management/Regional Operations Branch at the beginning of FY2009, the Office of the CAO provides full support to Regional Offices, Logistics, MERS, the three national processing centers (NPSC), the Center for Domestic Preparedness, and the National Emergency Training Center for the identification of facility requirements, acquisition and leasing of facilities, identification of repair needs and associated budget requests through facility condition surveys, and the annual funding of repairs. The branch also develops space requirements, plans and implements space optimization projects, and acquires furniture. The branch also develops policy and directives to standardize and control internal operations for all of these functions.

The OSHE Division is responsible for the following:

- Providing vaccinations, stress counseling, health units, respirator medical clearance and support, CPR training, and Automated External Defibrillator (AED) support to Disaster Assistance Employees (DAEs).
- Providing sanitarian services and third party technical reviews.
- Assuring maintenance of analytical equipment including annual calibration of indoor air quality monitors, moisture meters, sound level meters, and VOC monitors.
- Performing annual disaster-specific professional qualification and certification training for Disaster Safety Officers including hazard communication, indoor air quality, HASP implementation, JSA, etc.
- Providing disaster go-kits to the National Disaster Safety Officer Cadre.

- Conducting mandatory disaster site audits to assess overall disaster program effectiveness.

The Records Management Division captures, categorizes, maintains, and (in response to Freedom of Information Act (FOIA) requests) releases Agency and disaster-related records.

**The Office of the CAO Recent and Planned Accomplishments  
During FY 2009, the Office of the CAO:**

- Developed a disaster leasing directive which provided guidance for disaster personnel.
- Provided guidance on disposals of personal property during disaster operations.
- Provided guidance on internal controls over personal property during disaster operations.

**During FY 2010, the Office of the CAO will:**

- Provide printing services for >\$1 million for disaster operations.
- Provide deployable mail kits to ensure FEMA personnel are able to perform their mission to contact disaster survivors.
- Provide mail management training to disaster personnel.
- Provide fleet cards to disaster personnel.

**During FY 2011, the Office of the CAO will:**

- Continue to provide printing services for >\$1 million for disaster operations.
- Provide that deployable mail kits were ready and complete for immediate deployment.
- Continue to provide mail management training to disaster personnel.
- Continue to providing fleet cards to disaster personnel
- Continue to provide guidance on disposals of personal property during disaster operations.
- Continue to provide guidance on internal controls over personal property during disaster operations.

**Other DRS Activities**

**External Affairs**

The DRS funds Media Monitoring & Contact Management activity. This covers the disaster related portion of the annual media monitoring and analysis service and the media contact management and distribution service. It also provides funding for the Individual Assistance Communications contract and communications go kits for use in field operations.

**Mitigation**

The DRS supports: 1) reprinting of publications depleted by disaster activities; 2) replenishment of publications that were used by routine disasters.

**Equal Rights**

Non-disaster specific investigations and EEO activities are funded through the DRS.

## IV. Program Justification Changes

**Department of Homeland Security  
Federal Emergency Management Agency  
Disaster Relief Fund  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** DRF Operations Increase  
PPA: Disaster Relief Fund  
Program Increase: Positions 0.0, FTE 0.0, Dollars \$340931.0

### Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							45	3,383	1,609,069
Program Increase							-	-	340,931
<b>Total Request</b>	<b>45</b>	<b>7,067</b>	<b>11,375,469</b>	<b>45</b>	<b>3,600</b>	<b>1,600,000</b>	<b>45</b>	<b>3,383</b>	<b>1,950,000</b>

### Description

This request seeks to increase the Disaster Relief Fund by \$350 million in FY 2011 over FY 2010 enacted.

### Justification

The increase of \$350 million above FY 2010 enacted will allow this appropriation to support a total level of DRF funding of \$1,950,000,000. Coupled with prior year recoveries and carry forward funds, this will enable the DRF to support the five-year average obligation level for non-catastrophic disaster activity (excluding extraordinary events, such as the series of 2004 hurricanes in Florida, Hurricanes Katrina and Rita in 2005, the California Wildfires of 2007, and Hurricanes Gustav and Ike in 2008). This request supports that level of activity through \$1,950,000,000 of new budget authority and \$2,370,000,000 from a combination of projected recoveries of prior year obligations in FY 2011 and estimated carryover from FY 2010.

### Impact on Performance (Relationship of Increase to Strategic Goals)

Without these funds, the FEMA would not be able to support the 5-year average obligation level for non-catastrophic disaster activity.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

#### **Department of Homeland Security Federal Emergency Management Agency Justification of Proposed Changes in Disaster Relief Fund Appropriation Language**

For necessary expenses in carrying out the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), [\$1,600,000,000]~~\$1,950,000,000~~, to remain available until expended: [*Provided*, That up to \$105,600,000 may be transferred to the Federal Emergency Management Agency “Management and Administration appropriation for management and administration functions”. *Provided*, That the Federal Emergency Management Agency shall submit an expenditure plan to the Committees on Appropriations of the Senate and the House of Representatives detailing the use of the funds for disaster readiness and support within 60 days after the date of enactment of this Act: *Provided further*, That the Federal Emergency Management Agency shall provide a quarterly report detailing obligations against the expenditure plan and a justification for any changes in spending: *Provided further*, That the Federal Emergency Management Agency shall submit the monthly “Disaster Relief” report, as specified in Public Law 110-161, to the Committees on Appropriations of the Senate and the House of Representatives, and include the amounts provided to each Federal agency for mission assignments]: *Provided further*,] *Provided*, That funds provided under this heading shall not be available for transfer pursuant to section 503 of this Act or pursuant to any other transfer authority available to the Secretary of Homeland Security provided in this or any other Act: *Provided further*, That for any request for reimbursement from a Federal agency to the Department of Homeland Security to cover expenditures under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), or any mission assignment orders issued by the Department for such purposes, the Secretary of Homeland Security shall take appropriate steps to ensure that each agency is periodically reminded of Department policies on-

- (1) the detailed information required in supporting documentation for reimbursements; and
- (2) the necessity for timeliness of agency billings. (Department of Homeland Security Appropriations Act, 2010.)

#### **Explanation of Changes:**

The transfer authority from the DRF to M&A is no longer necessary since the M&A appropriation has sufficient resources in 2011 to support its base FTE level. In addition, the Administration seeks to protect the DRF and prevent redirection of these funds for non-disaster purposes by proposing to employ a budget enforcement mechanism that allows for an adjustment by the Budget Committees to the section 302(a) allocation to the

Appropriations Committees found in the concurrent resolution on the budget. To ensure full funding of the DRF request, this adjustment would be permissible only if the bill provided for full funding for the DRF and the language included a provision preventing transfers. That additional language is included here. See additional discussion in the Budget Reform Proposals in the Analytical Perspectives volume.

## B. FY 2010 to 2011 Budget Change

**Department of Homeland Security  
Federal Emergency Management Agency  
Disaster Relief Fund  
FY2010 to FY2011 Budget Change  
(Dollars in Thousands)**

### PPA Mission Statement

Through the Disaster Relief Fund (DRF), FEMA/DHS provides a significant portion of the total Federal response to Presidentially-declared major disasters and emergencies. The Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), (42 U.S.C. 5121-5206) (Public Law 93-288, as amended), authorizes the President to provide Federal assistance to supplement state and local governments' disaster response, recovery, readiness, and mitigation efforts. Under Executive Order 12148, as amended by Executive Order 13286, FEMA's Administrator, formerly DHS' Under Secretary for Emergency Preparedness and Response, has been delegated the responsibility for administering the Stafford Act's Federal assistance programs. The Disaster Relief Fund (DRF) funds the following Stafford Act declarations or activities: (1) major disaster; (2) emergency; (3) fire management assistance; and (4) pre-declaration activities.

Coupled with prior year recoveries and carry forward funds, the DRF is projected to support the five-year average obligation level for non-catastrophic disaster activity (excluding extraordinary events such as: the 2004 hurricanes in Florida and other states, Hurricanes Katrina, Rita, and Wilma in 2005, the California Wildfires of 2007, and Hurricanes Gustav and Ike in 2008).

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	234,739	172,000	175,000	3,000

Salaries and Benefits includes costs for 3,383 FTEs. The FY 2011 request includes a decrease of 217 FTE, and a decrease of \$17,000.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.3 Other than full-time permanent	167,090	88,000	74,000	(14,000)

**BUDGET REQUEST AND SUPPORTING INFORMATION**

**Flood Map Modernization Fund**

**I. Appropriation Overview**

**A – Mission Statement for Flood Map Modernization Fund**

The Flood Hazard Mapping and Risk Analysis Program (formerly the Flood Map Modernization Fund) addresses flood hazard data update needs and preserves the successful Flood Map Modernization investment. This effort began in 2004 as a federally funded initiative to improve and modernize the process for updating, maintaining, storing, and distributing the flood hazard and risk information portrayed on Flood Insurance Rate Maps (FIRMs). Federal statutory requirement directs FEMA to review the flood hazards maps on a five-year cycle and address flood hazard data update needs.

Flood maps are used to determine appropriate risk-based premium rates for the National Flood Insurance Program (NFIP); to complete flood hazard determinations required of the Nation's lending institutions; and, to develop appropriate disaster response plans for Federal, State, and local emergency management personnel. In FY 2009, FEMA began its transition from Map Modernization to a strategy that combines flood hazard mapping, risk assessment tools and Mitigation Planning into one seamless program. This strategic shift allows FEMA to leverage the successes of Map Modernization and further enhance the usability and value of flood hazard mapping.

The Risk Mapping, Assessment, and Planning (Risk MAP) Multi-Year Plan for Fiscal Years 2010 - 2014 details FEMA's strategy for an integrated program that will encourage beneficial partnerships and innovative uses of flood hazard and risk assessment data in order to maximize flood loss reduction. This plan significantly improves the integrated flood risk management approach by weaving county-level flood hazard data developed in support of the National Flood Insurance Program (NFIP) into watershed-based risk assessments. These assessments serve as the foundation for local Hazard Mitigation Plans and targeted risk communication activities.

**B – Budget Activities:**

FEMA manages several risk analysis programs that assess the impact of natural hazards that lead to effective strategies for reducing risk. These programs support the Department of Homeland Security objective to “strengthen nationwide preparedness and mitigation against natural disasters.” Risk MAP is integrating and aligning the individual risk analysis programs into a more effective unified strategy. The vision for Risk MAP is to deliver quality data that increases public awareness and leads to action that reduces risk to life and property.

**Risk MAP Vision**

Through collaboration with State, Local, and Tribal entities, Risk MAP will deliver quality data that increases public awareness and leads to action that reduces risk to life and property

FEMA's Risk MAP Multi-Year Plan: Fiscal Years 2010-2014 outlines the goals, objectives, and strategies for Risk MAP. The major objectives of Risk MAP are:

- Assess Nation's flood risk and use this information to increase public awareness of risk. This consistent, quantitative flood risk assessment will be used to track progress toward reducing flood risk and to target resources.
- Increase public awareness of risk from natural hazards and establish a baseline of local knowledge and understanding of risk management concepts.
- Ensure 80 percent of the Nation's flood hazards data are current – the flood hazard data are new, have been updated, or deemed still valid.
- Provide updated flood hazard data for 100 percent of the populated coastal areas in the Nation.
- Evaluate levee status information to ensure the appropriate flood hazards are depicted on Digital Flood Insurance Rate Maps for counties with levees, including those impacted by expiring Provisionally Accredited Levee status.

### **C – Budget Request Summary:**

FEMA requests \$194 million in FY 2011 for the Flood Hazard Mapping and Risk Analysis Program. This funding will be used to analyze and produce flood hazard data and map products, communicate flood hazard risk and related technical services. In FY 2011, FEMA will focus on reviewing and updating flood hazard data and maps to accurately reflect flood hazards and pursue its strategy to invest more in monitoring the validity of published flood hazard information. These flood hazard data and mapping efforts will support the goals identified in FEMA's Risk MAP Multi-Year Plan for Fiscal Years 2010-2014 and specifically address gaps in flood hazard data to form a solid foundation for flood risk assessments, floodplain management, and actuarial soundness of the National Flood Insurance Program. FEMA will also dedicate funding to address flood hazard data update needs for coastal and riverine flood hazard areas as well as expand and improve utility and accessibility of the flood hazard and flood risk data.

In addition to appropriated funds which support Risk MAP production and technical services, program activities are also funded by fees received from policy holders under the National Flood Insurance Program (NFIP). Both sources of funding are critical to the development and implementation of new maps in communities across the Nation. The work accomplished through the NFIP funding includes some production but primarily enables the program to meet statutory and regulatory requirements for processing map change requests from communities and citizens; respond to stakeholder correspondence; distribute flood hazard data products; establish and maintain cost and schedule controls; track and monitor performance; and, support the development of State and local capabilities to participate in the management and delivery of Risk MAP through the Cooperating Technical Partners (CTP) program and other core program functions.

II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

<b>2011 Total Request</b>	<b>84</b>	<b>70</b>	<b>194,000</b>
Total Change 2010 to 2011	28	14	(26,000)

FEMA requests \$194 million in FY 2011 for this activity, a net decrease of \$26 million from the FY 2010 Enacted. Funding will provide for the annualization of 2010 pay increases, the 2011 cost of living allowance, and support the continuation of activities as described in the Risk MAP Multi Year Plan. The Risk MAP program will use efficiencies achieved from in-sourcing contracted duties to add 28 full-time permanent positions.

As part of Secretary Napolitano's Department-wide Efficiency Review, DHS is determining the most effective balance of contractors to federal employees throughout the Department, and converting contractor positions to federal employees when feasible and appropriate. In FY11, FEMA will convert contractor positions related to its Flood Map Modernization (Risk Map) to full-time and permanent positions.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

##### **Flood Hazard Mapping Foundation**

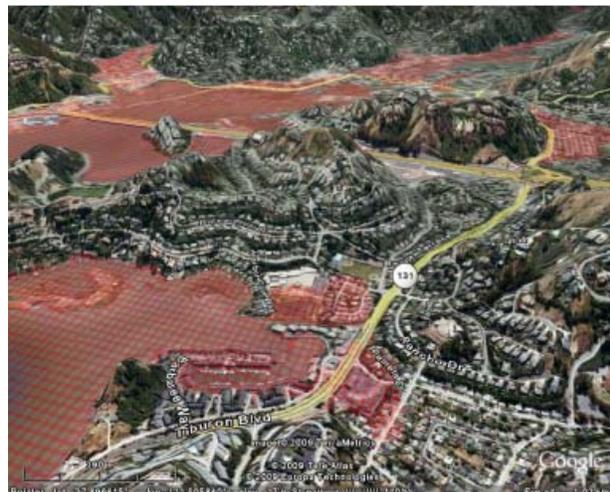

Flood Map Modernization will produce flood maps in a geographic information system format for areas at high flood risk. Flood Map Modernization used appropriated funding

from 2004 through 2008 to support map production that will continue through 2011. In addition, the modernization effort incorporates the latest technology in order to provide the flood hazard data in the most usable format with advanced tools and techniques that will enable FEMA and its State and local partners to produce high-quality data while managing cost and schedule constraints. The updated maps will be compliant with the Floodplain Boundary Standard described in the Multi-Year Flood Hazard Identification Plan (MHIP), which enhances the requirements of FEMA's Guidelines and Specifications for Flood Hazard Mapping Partners. FEMA also partners with State and local governments to help develop their capability for managing and maintaining their flood hazard data.

The Flood Hazard Mapping and Risk Analysis Program will accomplish the following for over 100,000 flood maps by 2011, based on appropriations through FY 2008 (*note that the final flood hazard maps take approximately two to three years to complete after appropriations have been made, to allow due process for communities impacted by changes to flood hazard elevations and designations*):

- Build a digital Geospatial Information System (GIS) platform for flood hazard map production and accessibility.
- Develop flood hazard maps for 92 percent of the Nation's population available through the new platform.
- Ensure 75 percent of the flood hazard boundaries meet the standards for horizontal accuracy.
- Refresh 30 percent of the flood hazard data, ensuring that the maps represent current conditions.

FEMA has created a premier digital flood hazard data platform for the NFIP with floodplain boundaries that are reliable and trusted by stakeholders. The new digital maps are easier to use and provide increased capabilities for automation and analysis. The maps are used an estimated 30 million times each year in making critical decisions by local community officials, emergency managers, homeowners, and financial institutions.

The success of the initial program brought to the forefront a larger need for new flood hazard engineering analyses, improved quality of the flood hazard data, and a level of detail that extends beyond fixing the floodplain boundaries.

### **Risk Mapping, Assessment, and Planning (Risk MAP)**

The Risk MAP Multi-Year Plan (FY 2010-2014) builds on the strong foundation of the Map Modernization program. This plan will significantly improve the integrated flood

risk management approach by weaving county-level flood hazard data into watershed-based risk assessments that serve as the basis for local Hazard Mitigation Plans and targeted risk communication activities. Risk assessments systematically analyze the people and property in a community or watershed potentially impacted by flood hazards to quantify physical, social and economic losses. Targeted risk communication activities include prioritizing flood map updates for highest risk areas and highlighting areas where mitigation activities are most needed based on the results of the watershed risk assessments.

FEMA will build on the benefits of digital flood hazard data by instituting easy web-based access to a powerful data analysis tool that quantifies flood risk in ways that facilitate improved mitigation planning and measure flood risk reduction. The overall goals in the FEMA Risk MAP Multi-Year Plan are:

- 1) Risk MAP Goal 1: Address gaps in flood hazard data to form a solid foundation for flood risk assessments, floodplain management, and actuarial soundness of the National Flood Insurance Program.
- 2) Risk MAP Goal 2: Ensure that a measurable increase of the public's awareness and understanding of risk management results in a measurable reduction of current and future vulnerability to flooding.
- 3) Risk MAP Goal 3: Lead and support States, local and tribal communities to effectively engage in risk-based mitigation planning resulting in sustainable actions that reduce or eliminate risks to life and property from natural hazards.
- 4) Risk MAP Goal 4: Provide an enhanced digital platform that improves management of limited Risk MAP resources, controls information produced by Risk MAP, and enhances communication and sharing of risk data and related products to all levels of government and the public.
- 5) Risk MAP Goal 5: Align Risk Analysis programs and develop synergies to enhance decision-making capabilities through effective risk communication and management.

The Risk MAP is supported by two sources of funding. In addition to the appropriated funds that support production and technical services, fees received from policy holders under the National Flood Insurance Program (NFIP) provide for other program activities. NFIP funding includes some production but primarily enables the program to meet statutory and regulatory requirements for processing map change requests from communities and citizens. NFIP funding allows the program to respond to stakeholder correspondence; distribute flood hazard data products; establish and maintain cost and schedule controls; track and monitor performance; and, support the development of State and local capabilities to participate in the management and delivery of Risk MAP through the Cooperating Technical Partners (CTP) program and other core program functions.

The table below shows the how the two funding sources support flood mapping activity:

Funding Source	Floodplain Management	Flood Mapping / Risk Analysis	Flood Mitigation & Insurance Ops	TOTAL
NFIF Salaries & Expenses	\$ 17,877,481	\$ 10,224,307	\$ 22,145,000	\$ 50,246,788
NFIF Program Funds	\$ 12,354,753	\$ 106,398,459		\$ 118,753,212
NFIF Flood Insurance Operations			\$ 85,000,000	\$ 85,000,000
NFIF Flood Related Grants			\$ 50,000,000	\$ 50,000,000
Flood Hazard Mapping & Risk Analysis (formerly FMMF)		\$ 194,000,000		\$ 194,000,000
<b>TOTAL</b>	<b>\$ 30,232,234</b>	<b>\$ 310,622,766</b>	<b>\$ 157,145,000</b>	<b>\$ 498,000,000</b>
<b>FTE</b>	<b>93</b>	<b>134</b>	<b>103</b>	<b>330</b>

**FY 2009 accomplishments:**

- Risk MAP Goal 1: Initiated approximately 465 Risk MAP projects addressing highest priority engineering data needs, including 69 coastal and 123 levee projects which affect over 2,000 communities. Provided the “Risk MAP FY 2009 Flood Mapping Production Plan” on FEMA’s website, describing approach for selection of FY 2009 flood map update projects.
- Risk MAP Goal 2: Produced an average loss study for the one-percent annual chance flood level for the Nation.
- Risk MAP Goal 3: Ensured 70 percent of the Nation’s population (excluding territories) will be covered by local Hazard Mitigation Plans that are approved or approvable pending adoption.
- Risk MAP Goals 1 – 5: Provided Congress with the “Risk Mapping, Assessment, and Planning Multi-Year Plan: FY 2010-2014” as required under the FY 2009 DHS Appropriations Act (P.L. 110-329).

**FY 2010 planned accomplishments:**

- Risk MAP Goal 1: Initiate additional 400 - 500 Risk MAP projects affecting up to 2,500 communities and addressing highest priority engineering data needs, including coastal and levee areas.
- Risk MAP Goal 2: Create a baseline of local understanding of flood risk and produce a national annualized flood loss study (for multiple flood levels).
- Risk MAP Goal 3: Ensure 75 percent of the Nation’s population (excluding territories) is covered by local Hazard Mitigation Plans that are approved or approvable pending adoption.
- Risk MAP Goal 4: Transition flood hazard data distribution from a paper-map-focused system based on high volume offset printing, to a nearly all digital distribution with limited paper copies printed as needed for affected local governments.
- Risk MAP Goal 5: Develop requirements for new integrated Risk MAP products that augment the Digital Flood Insurance Rate Map delivered in Flood Map

Modernization with additional flood risk information to enable broader risk communication.

**FY 2011 planned accomplishments:**

Funding in FY 2011 for Risk MAP will be used to produce improved flood hazard mapping for the National Flood Insurance Program. FEMA expects that a more fully-informed public coupled with more focused actions will reduce flood risks. The following accomplishments are planned for FY 2011, aligned with each Risk MAP goal:

- Risk MAP Goal 1: Ensure 80 percent of the Nation's flood hazards are current by 2014 – the flood hazard data are new, have been updated, or deemed still valid through Risk MAP review and update process.
  - Reduce the coastal flood hazard data update needs by 40 percent.
  - Reduce the flood hazard data needs related to the resolution of provisionally accredited levees by 61 percent.
  - Reduce the riverine flood hazard data update needs based on other physical, climatologic or engineering methodology changes by 14 percent
- Risk MAP Goal 2: Ensure that a measurable increase of the public's awareness and understanding of risk management results in a measurable reduction of current and future vulnerability to flooding.
  - Achieve a 5% increase in state and local officials understanding of flood risk.
- Risk MAP Goal 3: Lead and support States, local and tribal communities to effectively engage in risk-based mitigation planning resulting in sustainable actions that reduce or eliminate risks to life and property from natural hazards.
  - 76 percent of the U.S. population (excluding territories) have planned mitigation strategies.
- Risk MAP Goal 5: Align Risk Analysis programs and develop synergies to enhance decision-making capabilities through effective risk communication and management
  - Have 10 percent of local hazard mitigation plans approved use quality risk assessment data.

FEMA plans additional investment in updated land elevation data in FY 2011. Using more accurate land elevation data will prove to be a cost effective investment for improving flood hazard data and the quality of the flood hazard data products. In April 2010, FEMA will deliver the National Digital Elevation Acquisition and Utilization Plan as mandated in the FY 2010 DHS Appropriations Act. This plan will outline the requirements for updated digital elevation data based on input from the U.S. Geological Survey, the National Oceanic and Atmospheric Administration, the National Aeronautics Space Administration, and States that have experience in acquiring and incorporating high resolution elevation data in the floodplain map updates.

Ultimately, these investments will produce accurate flood hazard data, integrated watershed flood risk assessments, and stronger hazard mitigation plans. The two primary focus areas are: (1) coastal flood studies; and (2) significant riverine flood hazard data update needs. FEMA's Risk MAP approach will support local risk assessment and planning activities while addressing the flood hazard data update needs, thus enabling our

citizens to increase their awareness of flood risk and ensure good planning to mitigate against these risks.

**A. Coastal Flood Studies:** In FY 2011, FEMA will continue the effort started in 2009 to update the Nation's coastal flood hazard studies. FEMA will allocate \$50 million to initiate updated coastal flood hazard studies in those areas determined to be in most need. This investment will reduce the flood hazard data update needs by 40 percent, representing approximately 4,000 miles of open coast. Future coastal hazard analyses and mapping needs will be selected based on risk, community and State cost share, and cost efficiencies using a consistent hazard study approach.

**B. Significant Riverine Flood Hazard Update Needs:** In FY 2011, FEMA will use \$140 million to update riverine hazard engineering analyses. This also includes other non-coastal flood hazards like ponding and shallow flooding and updates related to the accreditation status of levees. This investment will reduce the riverine flood hazard data update needs by 14% representing 55,000 miles of inland flooding sources.

Part of FEMA's Risk MAP strategy is to invest more in monitoring the validity of published flood hazard information. The principal factors that drive the need for updated flood hazard analyses are:

- Physical changes: such as manmade influences which may include new bridges, culverts, levees, and development in the floodplain.
- Climate changes: such as recent flood disasters or additional stream gauge data.
- Engineering methodology changes: such as improved computer models and better understanding of the physics of water flow.

Keeping pace with these changes is important and failing to do so could lead to unwise land use decisions and construction standards, thereby putting homeowners at increased risk while providing a false sense of security. Conversely, overstated hazards can result in potentially unnecessary construction costs and incorrect insurance rating decisions. Sound reliable flood hazard information is a necessary component of ensuring the fiscal soundness of the National Flood Insurance Program.

As FEMA began work on Risk MAP, the next five-year assessment of NFIP maps was also initiated. FEMA will continue its work with stakeholders to ensure that flood hazard information on FIRMs reflects existing conditions and is aligned with flood risk. This work will involve documenting the engineering gaps that require a map update based on the three principal factors mentioned above. A Watershed Validation Evaluation Strategy will be used to track the assessment process, document engineering gaps and their resolution, and aid in prioritization for using flood risk as a key factor for areas identified for flood map updates.

In FY 2011, FEMA will continue its Watershed Validation Evaluation Strategy for reviewing flood hazard engineering data and map update needs. The results of these

evaluations and other flood hazard data update needs identified throughout the mapping lifecycle will be managed systematically and allow FEMA to effectively quantify the inventory maintenance required.

A portion of this effort will also be focused on the identification of current flood hazards in and around the Nation's levee systems which are located in over one-quarter of the counties for which FEMA is providing new digital flood hazard mapping. Where the Provisionally Accredited Levee (PAL) status for levee systems is expiring or when the necessary data and documentation for levee systems are provided for accreditation, FEMA will update the flood hazard data to reflect these changes. However, by 2011, the status of most provisionally accredited levees will have been resolved. Most levee issues will be addressed in an integrated way with other flood hazard data updates. As a result, FEMA will no longer need to allocate funding specifically for levee related issues.

During the implementation of Risk MAP, sustainable partnerships will continue to be vital. FEMA will maintain its partnerships and seek out new collaborations to support the Risk MAP program. Resources in the form of "cash match" from state and local governments or new data as identified in FEMA's Bluebook are highly valued and are most beneficial for the program. When targeted at known flood hazard data update needs and included in the Partnership Agreement, FEMA will give its highest investment priority to capable partners who provide a 25% cash match. FEMA typically receives these partner contributions through existing successful partnerships within the Cooperating Technical Partners (CTP) Program. While contributions from multiple sources are valuable, FEMA will consider establishing a partnership under the CTP Program in flood map update prioritization and will support those partnerships that are mutually beneficial.

The FY 2011 Request reflects FEMA's plan to realign base funding used for contracted services to support 28 additional full time permanent positions for Risk MAP. These permanent positions will perform duties and activities previously provided by contracted personnel. In-sourcing these functions will improve FEMA's ability to provide oversight, outreach, and delivery of the Risk MAP program. In FY 2009, a resource assessment was done to identify the level and type of staffing needed to successfully implement Risk MAP. The additional 28 positions will address existing gaps in key competency areas: (1) project and contract management; (2) technical expertise in engineering and risk assessment; and (3) outreach and stakeholder engagement.

## IV. Program Justification Changes

**Department of Homeland Security  
Federal Emergency Management Agency  
Flood Map Modernization Fund  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 1:** Program decrease to offset flatline  
PPA: Flood Map Modernization Fund  
Program Decrease: Positions 0.0, FTE 0.0, Dollars \$-26101.0

### Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							84	70	220,101
Program Decrease							-	-	(26,101)
<b>Total Request</b>	-	-	-	-	-	-	<b>84</b>	<b>70</b>	<b>194,000</b>

### Description of Item

This represents an overall reduction of 11.8% in program funding from the FY 2010 Enacted.

### Justification

The Flood Hazard Mapping and Risk Analysis Program will absorb this decrease in funding by applying efficiencies across the program. FEMA has a continuous process improvement strategy for Risk MAP that is expected to produce program efficiencies of approximately 5% which will be reinvested in the program.

In FY 2011, the National Flood Insurance Program anticipates an increase in fee revenue of which a portion will be dedicated to the Risk MAP program for map production. The additional revenue funding will ensure Risk MAP is able to meet two key objectives of its multi-year plan for FY 2010 – FY 2014:

- Ensure 80 percent of the Nation’s flood hazards data are current – the flood hazard data are new, have been updated, or deemed still valid.
- Provide updated flood hazard data for 100 percent of the populated coastal areas in the Nation.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Federal Emergency Management Agency  
Justification of Proposed Changes in Flood Hazard Mapping and Risk Analysis  
[Flood Map Modernization Fund]  
Appropriation Language**

For necessary expenses under section 1360 of the National Flood Insurance Act of 1968 (42 U.S.C. 4101), **\$194,000,000** [\$220,000,000], and such additional sums as may be provided by State and local governments or other political subdivisions for cost-shared mapping activities under section 1360(f)(2) of such Act (42 U.S.C. 4101(f)(2)), to remain available until expended. (Department of Homeland Security Appropriations Act, 2010.)

#### Explanation of Change:

FEMA proposes to change the appropriation title from Flood Map Modernization Fund to Flood Hazard Mapping and Risk Analysis in order to better reflect the focus of future flood map modernization activities. The Risk MAP Multi-Year Plan: Fiscal Years 2010-2014 articulates a fairly significant philosophical and tactical shift in how FEMA delivers information necessary for flood risk reduction and sustainable community development. This significantly improved integrated flood risk management approach weaves county-level flood hazard data developed in support of the National Flood Insurance Program (NFIP) into watershed-based risk assessments that serve as the foundation for local Hazard Mitigation Plans and targeted risk communication activities.

In addition, FEMA proposes to remove the total administrative cost percentage from appropriation language. The 3% for administrative costs would provide an insufficient level of funding for the program to continue to operate effectively. The 3% limit for administrative costs at the FY 2011 Request would ensure a 12% reduction in critical funding from the FY 2010 Enacted level. At this percentage rate, the program would not be able to support its current staff level or increases in costs due to cost of living adjustments and inflation. The program would have to reduce on board staff, forego plans to convert contract funding to additional permanent staff, and eliminate activities vital to the production of maps, community assistance efforts and program delivery. The FY 2011 Request includes \$10 million for salaries and operating expenses which equates to 5.2% of the requested funding.

### PPA Mission Statement

The Flood Map Modernization Fund supports the effort to update and modernize the Nation's flood hazard data inventory. Map Modernization will produce flood maps in geographic information system format for every area where there is flood risk. In addition, the modernization effort is incorporating the latest technology in order to provide the flood hazard data in the most usable format and also to provide modern tools and techniques that will enable FEMA and its State and local partners to produce high-quality data while managing cost and schedule constraints. FEMA's current approach for Flood Map Modernization assumes that a large percentage of the existing flood hazard data is still valid and that revising map information and boundary adjustments are the necessary changes needed to update the flood hazard maps.

## Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	3,062	4,539	5,789	1,250

Salaries and Benefits support 90 full time permanent positions in FY 2011. The increase above the FY 2010 Request will provide for the annualization of the 2010 pay increase as well as the cost of living adjustment effective January 2011. In FY 2011, the program requests 28 additional positions and 14 FTE to in-source functions previously performed under contract.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.3 Other than full-time permanent	29	161	163	2

See 11.1

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.5 Other personnel compensation	208	117	211	94

See 11.1

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
12.1 Civilian personnel benefits	852	1,359	1,677	318

See 11.1

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
21.0 Travel and transportation of persons	820	950	969	19

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2011 Request reflects an increase in travel commensurate to activities performed in FY 2010. Increases in travel result from the additional activities supporting flood mapping efforts throughout the Nation.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
22.0 Transportation of things	1	-	-	-

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.1 Rental payments to GSA	1,074	691	1,057	366

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2011 Request provides for increases in lease costs and additional space for new positions.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.3 Communications utilities and miscellaneous charges	208	78	119	41

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2011 Request provides for communication services for additional staff.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
24.0 Printing and reproduction	2,007	-	-	-

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. There is no change in the FY 2011 funding level as compared to FY 2010.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.1 Advisory and assistance services	46,413	40,899	33,250	(7,649)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2011 Request reflects a decrease in requirements for contracted services.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	150,076	131,757	106,637	(25,120)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2011 Request reflects a decrease in requirements for contracted services as a result of program efficiencies and reduction in program funding level.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.3 Purchases of goods & svcs. from Gov't accounts	1,334	208	318	110

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2011 Request provides for increased cost in DHS working capital fund.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.4 Operation and maintenance of facilities	73	-	-	-

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. There is no change in the FY 2011 funding level as compared to FY 2010.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
26.0 Supplies and materials	17	17	17	-

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. There is no change in the FY 2011 funding level as compared to FY 2010.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
31.0 Equipment	52	150	150	-

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. There is no change in the FY 2011 funding level as compared to FY 2010.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
41.0 Grants/Subsidies/Contributions	41,509	44,000	43,643	(357)

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2011 Request includes a decrease in funding level for mapping activities.

## BUDGET REQUEST AND SUPPORTING INFORMATION

### National Flood Insurance Fund

## I. Appropriation Overview

### A – Mission Statement for the National Flood Insurance Fund:

The National Flood Insurance Fund (NFIF), which was established by the National Flood Insurance Act of 1968 (42 U.S.C. 4001), is a premium revenue and fee-generated fund that supports the National Flood Insurance Program (NFIP). The Act, as amended, authorizes the Federal government to provide flood insurance on a national basis to owners of properties located in vulnerable areas. The National Flood Insurance Reform Act of 1994 (P.L.103-325) made flood insurance mandatory for all federally backed mortgages of properties located in the special flood hazard areas (SFHA). Currently, the NFIP insures more than 5.6 million residential and commercial policyholders totaling approximately \$1.1 trillion in insurance coverage. By supporting flood hazard reduction grant programs and floodplain management efforts, the National Flood Insurance Program estimates that more than \$1.2 billion in flood-related losses are avoided annually.

The NFIP is not just an insurance program. It also works to reduce the cost of flood damage through identifying, analyzing, and reducing flood risk. By encouraging and supporting mitigation efforts, FEMA leads our Nation in reducing the impact of disasters. FEMA applies insurance concepts and methods to reduce the nation's vulnerability to natural hazards and manages the National Flood Insurance Program (NFIP) to provide consumer-oriented flood insurance to accelerate recovery from floods, to mitigate future losses and to reduce personal and national costs of flood disasters. FEMA administers the NFIP so that insurance and floodplain management policies and operations are mutually reinforcing. Further, FEMA works to increase the NFIP policy base so that more people are indemnified by insurance for future flood losses, facilitating their recovery, rebuilding communities and reducing costs to taxpayers.

The National Flood Insurance Program consists of three major functions that focus on reducing flood risk and the impact of flood disasters:

- **Identifying and Analyzing Flood Risk.** The first component of the business strategy requires reliable information about flood risk. FEMA flood mapping activities help identify and analyze flood risk for communities nationwide by updating and maintaining community flood hazard information, including map maintenance and distribution activities that complement the Risk MAP activities. The Flood Mapping component of the strategy produces flood hazard maps, also known as Flood Insurance Rate Maps (FIRMs) that identify areas at risk of flooding. However, flood risk changes over time and many maps no longer reflect current risks, due to land development and changes in the environment. FEMA continues to produce more reliable, up-to-date flood data by using the latest mapping technology

and delivering it in a Geographic Information System (GIS)-based format. Flood hazard information is now available to a wide range of users including: the public, floodplain managers, developers, and the insurance industry. With the new maps, communities can more efficiently manage flood risks, land use, water resources, disaster mitigation, and disaster recovery operations. Property owners can more reliably assess their flood risks and make decisions about flood insurance based on those risks.

- **Reducing Flood Risk.** The second component of the business strategy is to reduce the risk associated with flood events through floodplain management as well as flood-related grants and assistance such as Flood Mitigation Assistance, Repetitive Flood Claims, and Severe Repetitive Loss.

FEMA promotes sound local Floodplain Management to reduce the risk to new or planned buildings and infrastructure, and funding in the form of Flood Related Grants for reducing existing community risk. The NFIP plays a critical role in encouraging communities to adopt and enforce floodplain management regulations and to implement broader floodplain management programs aimed at reducing risk to new or planned buildings and infrastructure. By law, FEMA can only provide flood insurance to those States or communities that adopt and vigorously enforce floodplain management regulations that meet or exceed minimum NFIP requirements. Communities incorporate NFIP requirements into their zoning codes, subdivision ordinances, and/or building codes or they adopt special purpose floodplain management ordinances.

The NFIP requirements include:

- Elevation of new and substantially improved residential structures above the base flood level
- Elevation or dry floodproofing (made watertight) of new or substantially improved non-residential structures
- Regulation of development in floodways, the central portion of a riverine floodplain needed to carry deeper and faster moving water, to ensure that there are no increases in upstream flood elevations
- Additional requirements to protect buildings in coastal areas from the impacts of waves, high velocity, and storm surge

These requirements are the most cost-effective way to reduce the flood risk to new buildings and infrastructure. Structures built to NFIP standards experience 80 percent less damage than structures not built to these standards and have resulted in \$1.2 billion per year in reduced flood losses.

FEMA provides funding to reduce the risk of flood damage to existing buildings and infrastructure by providing Flood Related Grants to states, communities and Tribal Nations. The NFIP funds three programs specifically designed to reduce the fund's loss exposure. The Flood Mitigation Assistance program (FMA) provides funds on an

annual basis so that measures can be taken to reduce or eliminate risk of flood damage to buildings insured under the NFIP. The Repetitive Flood Claims program (RFC) provides funding to reduce or eliminate the long-term risk of flood damage to structures insured under the NFIP that have had one or more flood claim payments. The Severe Repetitive Loss program (SRL) provides funds on an annual basis to reduce the risk of flood damage to residential structures insured under the NFIP that are qualified as severe repetitive loss structures.

- Insuring Flood Risk.** The third component of the business strategy is to insure against flood loss. NFIP provides a vehicle through which homeowners can take an active role in protecting their property against flood losses. Floods are the most common and costly natural disaster in the United States. Fortunately, property owners who live in communities participating in the NFIP can purchase affordable protection to insure against flood losses. Since 1969, the NFIP has paid over \$36 billion dollars in flood insurance claims that have helped hundreds of thousands of families and businesses recover from flood events. Most people who live or own businesses in NFIP participating communities are eligible to purchase federally-backed flood insurance. Even after a property has been damaged by flood previously, owners and renters are still eligible to purchase flood insurance, provided that the community is participating in the NFIP.

Residents who live in Special Flood Hazard Areas are required by law to purchase flood insurance if they have a mortgage from a federally regulated lender. They also must carry the insurance for the life of the mortgage. Residents with property outside high-risk areas can also purchase flood insurance and may be eligible for significant premium rate reductions. Flood Insurance Operations manages the insurance program by supporting various management activities, including underwriting, operations, and claims payments.

The following chart illustrates the steps that can be taken to reduce flood risk:

## **B – Budget Activities:**

Funding for the National Flood Insurance Program is derived from two primary sources:

- Flood insurance premiums (mandatory) which is used to pay out claims and to provide funding to support the operating and administrative costs associated with maintaining the program. FEMA estimates mandatory premium collections of \$3.065 billion in FY 2011.
- Policy fee income (discretionary) which also is paid by flood insurance policy holders which supports floodplain management, flood mapping, insurance operations, flood-related grants, and NFIP management. For FY 2011, FEMA projects fee collections of \$169.0 million, which reflect an increase of \$23 million in additional revenue resulting from increases in the policy fee that went into effect in FY 2010.

The NFIP appropriation supports the following key program elements:

### **NFIP Management and Flood Insurance Operations**

- **NFIP Management** – NFIP management reflects the overall management of the Flood Insurance Program. FEMA applies insurance concepts and methods to reduce the nation's vulnerability to natural hazards and manages the National Flood Insurance Program (NFIP) to provide consumer-oriented flood insurance to accelerate recovery from floods, to mitigate future losses and to reduce personal and national costs of flood disasters. FEMA administers the NFIP so that insurance and floodplain management policies and operations are mutually reinforcing. Further, FEMA works to increase the NFIP policy base so that more people are indemnified by insurance for future flood losses, facilitating their recovery, rebuilding communities and reducing costs to taxpayers.
- **Flood Insurance Operations** - Flood Insurance Operations provides for all aspects of managing the insurance program including: the development and oversight of insurance coverage policy and regulations; analysis and evaluation of insurance risks and claims data used to determine premium rates; and, oversight of insurance companies that write flood insurance policies and adjust claims.

### **Floodplain Management and Flood Mapping**

- **Flood Mapping and Risk Analysis** - Flood Mapping produces flood hazard maps, also known as Flood Insurance Rate Maps (FIRMs) that identify areas at risk of flooding. Land development and changes in the environment change flood risk over time and causes many maps to become outdated. This program enables FEMA to produce reliable, up-to-date flood data by using the latest mapping technology and delivering it in a Geographic Information System (GIS)-based format. With the new maps, communities can more efficiently manage flood risks, land use, water resources, disaster mitigation, and disaster recovery operations. Property owners can

more reliably assess their flood risks and make decisions about flood insurance based on those risks.

- **Floodplain Management** - The National Flood Insurance Program plays a critical role in encouraging communities to adopt and enforce floodplain management regulations. Communities are informed and educated about the benefits of implementing broader floodplain management programs aimed at reducing risk to new or planned buildings and infrastructure. By law, FEMA can only provide flood insurance to those States or communities that adopt and vigorously enforce floodplain management regulations that meet or exceed minimum NFIP requirements. The NFIP works with communities to incorporate these requirements into their zoning codes, subdivision ordinances, and/or building codes. In some cases, communities receive assistance with efforts to adopt special purpose floodplain management ordinances.

### **National Flood Insurance Fund (Mandatory)**

The National Flood Insurance Act of 1968 (42 U.S.C. 4001), as amended, authorizes the Federal Government to provide flood insurance on a national basis. Flood insurance may be sold or continued only in communities that participate in the NFIP and enact and enforce appropriate floodplain management measures. Federally regulated funding institutions cannot provide loans to non-participating communities with an identified flood hazard.

### **Flood Related Grants**

The National Flood Insurance Fund supports flood hazard reduction efforts facilitated through its flood related grants and assistance program: Flood Mitigation Assistance, Repetitive Flood Claims, and Severe Repetitive Loss. These programs reduce the risk of flood damage to existing buildings and infrastructure by providing grants to states, communities and tribal nations. The Flood Mitigation Assistance (FMA) grants provide funds for activities that decrease or eliminate risk of flood damage to structures insured under the NFIP. The Severe Repetitive Loss (SRL) and the Repetitive Flood Claims (RFC) fund activities that decrease the long-term risk of flood damage to residential structures insured under the NFIP that have experienced repetitive losses from previous flood damage.

Table One below shows the how NFIP funding supports the six key activities described above. It also shows how the Flood Map Modernization Fund supports flood mapping activity:

<b>Funding Source</b>	<b>Floodplain Management</b>	<b>Flood Mapping / Risk Analysis</b>	<b>Flood Mitigation &amp; Insurance Ops</b>	<b>TOTAL</b>
NFIF Salaries & Expenses	\$ 17,877,481	\$ 10,224,307	\$ 22,145,000	\$ 50,246,788
NFIF Program Funds	\$ 12,354,753	\$ 106,398,459		\$ 118,753,212
NFIF Flood Insurance Operations			\$ 85,000,000	\$ 85,000,000
NFIF Flood Related Grants			\$ 50,000,000	\$ 50,000,000
Flood Hazard Mapping & Risk Analysis (formerly FMMF)		\$ 194,000,000		\$ 194,000,000
<b>TOTAL</b>	<b>\$ 30,232,234</b>	<b>\$ 310,622,766</b>	<b>\$ 157,145,000</b>	<b>\$ 498,000,000</b>
<b>FTE</b>	<b>93</b>	<b>134</b>	<b>103</b>	<b>330</b>

### **C – Budget Request Summary:**

The FY 2011 budget request for NFIP reflects the following elements:

- Budget authority from mandatory premium collections of \$3.015 billion in FY 2011. This reflects \$50.5 million in additional premium collections from estimated flood policy rate increases. The rate increase is based on the Annual Actuarial Rate Review conducted to ensure that premium rates are adequate to meet projected claims requirements. These funds will be used to pay claims of the National Flood Insurance Program (NFIP) in addition to operating expenses. These funds will also support the Repetitive Flood Claims and the Flood Mitigation Assistance programs. The Severe Repetitive Loss program will not receive new funding in FY 2011 but instead will operate from unobligated balances. Currently, there is \$113 million unobligated and available for this program in FY 2011.
- Discretionary fee authority of \$169.0 million in FY 2011 for the National Flood Insurance Fund. FEMA anticipates \$23 million in additional revenue for FY 2011 resulting from increases in the policy fee that will go into effect by May 1, 2010. This represents an average increase of 14 percent for Special Flood Hazard Area policies. The overall fee increase represents less than 1 percent of the average policy premium of \$560 and brings the total increase in policy fees over the past ten years to \$10. The additional revenue will be used to increase support flood mapping and floodplain management activities. In addition, the policy fee increase will help strengthen management, oversight, and community compliance activities of the National Flood Insurance Program (NFIP) including improving oversight of the 85 Write-Your-Own insurance companies that sell and service 5.6 million NFIP policies.

Table Two shows the fee increases for the various policy categories.

	<b>Previous Fee Rate</b>	<b>Increase (in dollars)</b>	<b>Revised Fee Rate</b>
<b>Preferred Risk Policy (PRP)</b>	\$13	\$7	\$20
<b>Single family and condos</b>	35	5	40
<b>2 - 4 Units</b>	70	10	80
<b>5 - 10 Units</b>	175	25	200
<b>11 - 20 Units</b>	385	55	440
<b>21 or More Units</b>	735	105	840

*\*Group Flood policies are policies that are written to financially disadvantaged people after a Presidential Disaster Declaration and pay no Federal Policy Fee.*

### III. Current Services Program Description by PPA

**Department of Homeland Security  
Federal Emergency Management Agency  
National Flood Insurance Fund  
Program Performance Justification**  
(Dollars in Thousands)

#### PPA: Flood Mitigation and Flood Insurance Operations

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	330	264	39,719
<b>2010 Enacted</b>	<b>310</b>	<b>242</b>	<b>38,680</b>
2011 Adjustments-to-Base	-177	-139	-16,535
<b>2011 Current Services</b>	<b>133</b>	<b>103</b>	<b>22,145</b>
2011 Program Change			
<b>2011 Total Request</b>	<b>133</b>	<b>103</b>	<b>22,145</b>
Total Change 2010 to 2011	-177	-139	-16,535

FEMA requests \$22.1 million in FY 2011 for this activity, a net decrease of \$16.5 million from the FY 2010 Enacted. This adjustment reflects FEMA's proposal to consolidate staffing, operational and program funding dedicated to floodplain management and flood mapping activities under that PPA. Funding will provide for the annualization of 2010 pay increases, the 2011 cost of living allowance, and inflation.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

This PPA supports National Flood Insurance Program (NFIP) management functions, programs, and activities, including the salaries and expenses of program management and implementation staff at FEMA's national and ten regional offices. NFIP management supports the management and administration of the key program activities of NFIP: flood mapping, flood plain management, insurance operations, payment of insurance claims, and flood-related grant programs in a separate PPA.

Flood Insurance Operations activities include:

- Actuarial management to analyze insurance risks, claims data, and financial models in order to evaluate and communicate all aspects of the financial solvency of the program and to set the appropriate premium rates.
- Operations management for more than 5.6 million NFIP flood policies with over \$1.1 trillion of insurance in force, to include issuance, renewal, claims, and resolution of claims appeals.

- Underwriting management to set policy and develop regulations regarding insurance coverage eligibility and the classification of risks.
- Claims management to set policy and develop regulations regarding the adjustment and payment of claims.
- Management of the private insurance companies that write flood insurance policies and adjust claims for the NFIP, including conducting periodic operational reviews.
- Education, training, and technical assistance for private insurance company agents and adjustors.
- Management of the vendors that supply services to the NFIP, such as the Bureau and Statistical Agent and the Direct Servicing Agent.
- Management of flood insurance marketing and public communications, including advertising, community outreach programs and publicity.
- Partnering with stakeholders in the private sector and other government agencies, including lenders who require the purchase of flood insurance for certain loans.

## PPA: Floodplain Management and Flood Mapping

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2009 Actuals</b>	0	0	105,706
<b>2010 Enacted</b>	<b>0</b>	<b>0</b>	<b>107,320</b>
2011 Adjustments-to-Base	177	157	39,535
<b>2011 Current Services</b>	<b>177</b>	<b>157</b>	<b>146,855</b>
2011 Program Change			
<b>2011 Total Request</b>	<b>177</b>	<b>157</b>	<b>146,855</b>
Total Change 2010 to 2011	177	157	39,535

FEMA requests \$146.9 million in FY 2011 for this activity, a net increase of \$39.5 million above the FY 2010 Enacted. This adjustment includes the realignment of \$16.5 million and 209 positions from the NFIP Management and Flood Insurance Operations PPA (formerly Salaries and Expenses) to consolidate staffing and operational costs with floodplain management and flood mapping program funding under the same PPA.

The FY 2011 Request also provides a \$23 million increase in revenue that will be used to support additional floodplain management and flood mapping activities.

### **CURRENT SERVICES PROGRAM DESCRIPTION:**

**FEMA's Flood Mapping and Risk Analysis** program provides the identification and delivery of flood hazard data and communicates flood risk information through flood insurance rate maps and related flood risk assessments products. Under the flood mapping program, grantees and contractors produce the flood insurance rate maps and related flood risk assessments as well as other regulatory letters of map change. FEMA supports this effort by:

1. Assisting community officials in understanding the impacts of flood risk;
2. Overseeing and managing risk analysis grants and contracts;
3. Addressing technical engineering issues and concerns raised by grantees, contractors, individuals and businesses; and,
4. Supporting community adoption of the land use and building code requirements when Flood Insurance Rate Map changes are proposed.

As noted above, FEMA flood mapping activities are funded from two primary sources of funds -- the Flood Map Modernization Fund (FMMF) appropriation and fees received from policy holders under the National Flood Insurance Program (NFIP). This shared funding is critical to the development and implementation of new flood maps in communities across the nation.

The work accomplished through the NFIP includes some production but primarily enables the program to meet statutory and regulatory requirements for processing map

change requests from communities and citizens; respond to stakeholder correspondence; distribute flood hazard data products; establish and maintain cost and schedule controls; track and monitor performance; and, support the development of State and local capabilities to participate in the management and delivery of Risk MAP through the Cooperating Technical Partners (CTP) program and other core program functions.

Since FY 2009, flood mapping activities have surged as new flood maps with updated risk information have been developed. Communities who receive their preliminary maps are given twelve months from the date of receipt to adopt and put them into effect unless there are protracted community appeals and concerns.

**FY 2009 accomplishments include:**

- Provided ongoing map maintenance activities; issued more than 25,000 Letters of Map Change and more than 1,500 Letters of Map Revision.
- Distributed map products to more than 2,050 communities and enhanced the distribution services – including provisions for digital products, subscription services, and links to other hazard data for community officials, homeowners, banks, lenders, real estate agents, and other interested parties.
- Provided program management oversight of grantees and contractors performing flood risk analyses.
- Provided funding to States for the development of the capability and capacity to manage the production of and to maintain flood hazard data. These efforts complemented and supported the Flood Map Modernization Fund activities.

**FY 2010 planned accomplishments include:**

- Provide ongoing map update activities based on submissions from communities and applicants, including approximately 26,000 Letters of Map Change and approximately 1,500 Letters of Map Revision.
- Distribute map products to approximately 3,000 communities and enhance the distribution of digital products, subscriptions, and links to other hazard data provided to community officials, homeowners, banks, lenders, real estate agents, and other interested parties, particularly as FEMA's ceases production of paper map products.
- Provide program management oversight of grantees and contractors performing flood risk analyses.
- Support the expansion of risk analysis capability and capacity among States and other regional governments. When capable, FEMA delegates the management and production of Flood Insurance Rate Map, flood risk analysis, and/or Letters of Map Revision to Cooperating Technical Partners (State, regional, and local governments with the capability and interest in performing these functions.)

**FY 2011 planned accomplishments include:**

- Provide ongoing map update activities based on submissions from communities and applicants and distribute digital products, subscriptions, and links to other hazard data provided to community officials, homeowners, banks, lenders, real estate agents, and other interested parties. FEMA will review more than 26,000 Letters of Map Change

and more than 1,500 Letters of Map Revision in FY 2011. The digital products depicting flood hazards will be used more than 30 million times in FY 2011.

- Provide program management oversight of grantees and contractors performing flood risk analyses as demonstrated through earned value, quality, and other performance metrics.
- Support the expansion of risk analysis capability and capacity among States and other regional governments. When capable, FEMA delegates the management and production of Flood Insurance Rate Map, flood risk analysis, and/or Letters of Map Revision to Cooperating Technical Partners (State, regional, and local governments with the capability and interest in performing these functions.)

**Floodplain Management** programs are designed to identify and assess risk and to reduce risk through land use and building code regulations. Through these programs, FEMA encourages communities and their citizens to take informed and effective mitigation actions before a flood in order to reduce the long-term risk to people and property. Structures built to NFIP standards experience 80% less damage than structures not built to these standards.

The NFIP plays a critical role in encouraging communities to adopt and enforce floodplain management regulations and to implement broader floodplain management programs aimed at reducing risk to new or planned buildings and infrastructure. The National Flood Insurance Act of 1968 states that FEMA can only provide flood insurance to those States or communities that adopt and vigorously enforce floodplain management regulations that meet or exceed minimum NFIP requirements. Communities incorporate NFIP requirements into their zoning codes, subdivision ordinances, and/or building codes. They can also choose to adopt special purpose floodplain management ordinances.

The NFIP requirements include:

- Elevation of new and substantially improved residential structures above the base flood level
- Elevation or dry flood proofing (made watertight) of new or substantially improved non-residential structures
- Regulation of development in floodways, the central portion of a riverine floodplain needed to carry deeper and faster moving water, to ensure that there are no increases in upstream flood elevations
- Additional requirements to protect buildings in coastal areas from the impacts of waves, high velocity wind, and storm surge

These requirements are the most cost-effective way to reduce the flood risk to new buildings and infrastructure. Structures built to NFIP standards experience 80 percent less damage than structures not built to these standards and have resulted in \$1.5 billion in fiscal year 2009 in reduced flood losses.

In addition to various Floodplain Management programs, FEMA also provides operational and administrative support for the Community Rating System. The

Community Rating System (CRS) is a voluntary program implemented in 1990 as an incentive-based program designed to recognize and encourage community floodplain management activities that exceed the minimum NFIP standards. Under the CRS, flood insurance premium rates are adjusted to reflect the reduced flood risk resulting from community activities that meet CRS goals, including reduction of flood losses, accurate insurance rating, and promotion of flood insurance awareness.

Participating communities are rated by Class from 1 to 10, with Class 1 communities receiving the greatest premium rate reductions. Non-participating communities are rated as Class 10. Credits can be applied toward a community's CRS classification for various activities under the following floodplain management headings:

- Public Information - includes outreach to citizens about flood risk management steps they can take to minimize risk.
- Mapping Regulations - enhances the community's floodplain management efforts.
- Flood Damage Reduction - includes removal of flood-prone structures, hardening of critical facilities, etc.
- Flood Preparedness - ensures citizens know evacuation routes and first responders are prepared for floods and flood hazards.

**FY 2009 accomplishments include:**

- Developed a variety of outreach materials to assist all entities of Federal, State, and local governments to effectively maintain sound floodplain management practices, and educate the general public on mitigation actions that may be taken in a pre-disaster environment.
- Provided technical assistance to the 20,900 plus communities participating in the NFIP and monitored the compliance with program requirements.
- Provided grant funds to States and territories to help furnish this technical assistance and monitoring.
- Developed policy, guidance, and regulations to improve implementation of floodplain management at the State and community levels to enhance compliance by communities with NFIP requirements.
- Reduced potential annual flood losses by nearly \$1.5 billion through NFIP insurance and floodplain management activities.

**FY 2010 planned accomplishments include:**

- Increase Community Rating System (CRS) participation by at least 3 percent and class improvements by 5 percent. The program has established annual performance metrics and tracking. In FY 2009, the program achieved the following results and exceeded its targets:
  - 31 communities joined the CRS, raising the total number of CRS communities from 1,089 in FY 2008 to 1,120 in FY 2009.
  - 86 CRS communities achieved class improvements of which 29 communities improved to CRS Class 6 or better.
- Publish proposed rule-strengthening floodplain management in over 20,900 participating communities.

- Reduce potential annual flood losses by up to an additional 7 percent through NFIP insurance and floodplain management activities.
- Support the development of the capacity for State and local governments to manage the production of and to maintain flood hazard data. These efforts complement and support the Flood Map Modernization Fund activities.

**FY 2011 planned accomplishments include:**

- Continue to increase Community Rating System (CRS) participation and class improvements. Performance metrics are currently being determined for FY 2011 based on planned activities.
- Reduce potential annual flood losses by up to an additional 7 percent through NFIP insurance and floodplain management activities.
- Support the development of the capacity for State and local governments to manage the production of and to maintain flood hazard data. These efforts complement and support the Flood Map Modernization Fund activities.

**PPA: National Flood Insurance Fund Offsetting Collections - Mandatory**

	<b>Perm Pos</b>	<b>FIE</b>	<b>Amount</b>
<b>2009 Actuals</b>	0	0	4,695,472
<b>2010 Enacted</b>	<b>0</b>	<b>0</b>	<b>2,965,000</b>
2011 Adjustments-to-Base			50,546
<b>2011 Current Services</b>	<b>0</b>	<b>0</b>	<b>3,015,546</b>
2011 Program Change			
<b>2011 Total Request</b>	<b>0</b>	<b>0</b>	<b>3,015,546</b>
Total Change 2010 to 2011	0	0	50,546

FEMA requests \$3.015 billion in FY 2011 for this activity, an increase of \$50.5 million above the FY 2010 Enacted. This adjustment reflects FEMA’s plan to increase fee rates certain rate categories. Funding will provide for the payment of flood claims and operating costs of the program including: WYO expenses and commissions and taxes of agents and interest expenses.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The National Flood Insurance Act of 1968 (42 U.S.C. 4001), as amended, authorizes the Federal Government to provide flood insurance on a national basis. Flood insurance may be sold or continued only in communities that participate in the NFIP and enact and enforce appropriate floodplain management measures. Federally regulated funding institutions cannot provide loans to non-participating communities with an identified flood hazard.

The NFIP limits the impact of disasters by encouraging property owners and others to manage their risk through flood insurance and other hazard insurance mechanisms. More than 20,800 communities in all States and territories participate in the NFIP. Structures built to NFIP criteria experience 80% less damage through reduced frequency and severity of losses. The floodplain management program requirements are estimated to save over \$1.4 billion per year in flood losses avoided.

Despite the unsettled economy of FY 2009, the NFIP saw a 1 percent growth in policy retention in FY 2009 over FY 2008. FEMA uses three strategies to increase the number of flood insurance policies in force: enhancing lender compliance, simplifying program operations, and expanded marketing. For example, FEMA is enhancing lender compliance by educating financial regulators about the mandatory flood insurance requirement for properties that are located in floodplains and have mortgages from federally regulated lenders to strengthen lender compliance which may result in policy growth. FEMA is simplifying program operations by streamlining forms, making computer systems more efficient, and expanding the use of plain-language insurance

materials. FEMA continues marketing flood insurance nationwide through its FloodSmart education campaign targeting the consumer market.

For FY 2011, FEMA anticipates \$50.5 million in additional premium collections based on estimated flood policy rate increases. The rate changes occur based on the Annual Actuarial Rate Review that determines future premium level needs by combining the estimates of the number of claims based on: (a) theoretical probability curves; and (b) the average severity of those claims by reviewing past loss history with the future expenses.

**FY 2009 accomplishments include:**

- Despite a 1.02% decline in net policy growth due to a down economy program performance includes 5.56 million flood insurance policies, \$2.97 billion in written premium, and over \$1.19 trillion insurance in force.
- Reduced subsidies to pre-Flood Insurance Rate Map (FIRM) properties to 22.2%.
- Saved an estimated \$1.5 billion in annual flood disaster losses
- Expanded program management and oversight of the 85 Write-Your-Own insurance companies that sell and service NFIP policies including the thousands of insurance agents and claims adjusters who deliver the insurance program to individual customers.

**FY 2010 planned accomplishments include:**

- Increase the number of NFIP policies with the active assistance of new and existing program partners by 5 percent.
- Reduce subsidies to pre-Flood Insurance Rate Map (FIRM) properties by 5 percent. The National Flood Insurance Program has the ability to increase the rates on subsidized policyholders administratively. Since Hurricane Katrina, four separate increases for subsidized policyholders have increased the average premium by 34%. The plan to reduce subsidies over the next five years will address the shortfall due to the subsidy currently estimated at \$1 billion (the amount by which long term expected losses and current operating expenses exceeds current premium revenue). Our goal is to reduce that subsidy by 25% over a 5-year period. The goal for FY 2010 is a \$50 million reduction.
- Achieve progress in operating efficiency by improving the NFIP income to combined loss and expense ratio by 1 percent.
- The National Flood Insurance Program (NFIP) held a Listening Session on November 5-6, 2009 in Washington, DC. There were over 175 participants representing a very broad set of stakeholder groups. The NFIP collected many valuable comments dealing with concerns relative to the NFIP, and many ideas on how to improve the products and services being provided. Additional valuable input relative to the NFIP has been collected through the website comment page. A multi-program area workgroup will analyze these comments and draft a path forward. The work group will be work with FEMA leadership to prioritize improvement opportunities.

**FY 2011 planned accomplishments include:**

- Achieve performance goal of increasing the number of NFIP policies by five percent by developing program partnerships and continuing marketing activities including

lender compliance, program simplification, and a comprehensive national marketing program.

- Reduce subsidies to pre-Flood Insurance Rate Map (FIRM) properties through NFIP flood loss reduction grants. The goal for FY 2011 is to reduce the subsidy by an additional 5 percent.
- Achieve progress in operating efficiency by improving the NFIP income to combined loss and expense ratio by 1 percent through a concentrated, detailed actuarial rate review of the NFIP.

**PPA: Severe Repetitive Loss Program (Flood Related Grants)**

	<u>Perm Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2009 Actuals</b>	14	1	69,558
<b>2010 Enacted</b>	<b>18</b>	<b>18</b>	<b>70,000</b>
2011 Adjustments-to-Base			
<b>2011 Current Services</b>	<b>18</b>	<b>18</b>	<b>70,000</b>
2011 Program Change			-70,000
<b>2011 Total Request</b>	<b>18</b>	<b>18</b>	<b>0</b>
Total Change 2010 to 2011	0	0	-70,000

The FY 2011 Request provides no new funding for this program. This represents a \$70.0 million decrease from the FY 2010 Enacted. The Severe Repetitive Loss Program has sufficient unobligated balances to provide for the salaries and expenses needed to fully operate and to continue awarding grants.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Severe Repetitive Loss Mitigation (SRL) Program is a mandatory program which provides funding to reduce or eliminate the long-term risk of flood damage to severe repetitive loss residential structures insured under the NFIP. Section 1361A of the National Flood Insurance Act (42 U.S.C. § 4102a) defines an SRL property as a residential property that is covered under an NFIP flood insurance policy and:

- (a) That has at least four NFIP claim payments (including building and contents) over \$5,000 each, and the cumulative amount of such claims payments exceeds \$20,000; or
- (b) For which at least two separate claims payments (building payments only) have been made with the cumulative amount of the building portion of such claims exceeding the market value of the building.

For both (a) and (b) above, at least two of the referenced claims must have occurred within any 10-year period, and must be greater than 10 days apart. There are approximately 8,800 properties meeting the legislative definition of severe repetitive loss.

The long-term goal of the SRL program is to reduce or eliminate claims under the NFIP through project activities that will result in the greatest savings to the NFIP in the shortest period of time. FEMA may contribute up to 75% Federal funding for the amount approved under the grant award to implement approved activities. Any State or federally recognized Indian Tribal government that has taken actions to reduce the number of

repetitive loss properties, including severe repetitive loss properties, and has a FEMA-approved State Mitigation Plan that specifies how it has and how it intends to reduce the number of such repetitive loss properties, is eligible to receive an increased Federal cost share of up to 90% Federal funding for SRL grants. Unlike the other flood mitigation grant programs, SRL focuses on the most severe repetitive loss residential structures.

**FY 2009 accomplishments include:**

- Awarded \$63.0 million in assistance grants for mitigation activities affecting 410 SRL properties.
- Aligned all four pre-disaster mitigation programs into a unified Hazard Mitigation Assistance (HMA) program guidance and application cycle. This comprehensive approach helped FEMA accomplish the HMA objectives of efficiency and standardization, thus creating a platform for future updates and refinements of program policies and practices to make them more unified and user-friendly.
- Engaged partners and coordinated the SRL program to identify opportunities for future program improvements.

**FY 2010 planned accomplishments include:**

- Align all five mitigation programs (including HMGP) into unified Hazard Mitigation Assistance program guidance.
- Provide opportunities for transparency and partnership with States, territories, and tribal and local governments through the HMA Summit, the External Stakeholders Workgroup, focus groups and training courses.
- Provide up to \$45.0 million in grant funds for mitigation activities affecting approximately 300 properties. These measures are expected to provide a savings to the National Flood Insurance Program of approximately \$90.0 million in reduced claims payments.
- Continue to refine and apply an enhanced cost-effectiveness approach based on past insurance losses to make it easier for State and local communities to demonstrate the cost effectiveness requirements of the mitigation grant programs.
- Continue to identify and implement internal program improvements to increase the effectiveness of the SRL program.

FEMA has determined that there is sufficient carryover funding to deliver and administer the SRL program for FY 2011. Additional funding will be requested to deliver and administer the SRL program in 2012.

**FY 2011 planned accomplishments include:**

- Evaluate the enhanced cost effectiveness approach based on past insurance losses to determine its value to the SRL program and other flood grant programs.
- Use unobligated balances to provide up to \$45.0 million in grant funds for mitigation activities affecting approximately 300 properties.

**PPA: Repetitive Flood Claims Program (Flood Related Grants)**

	<u>Perm Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2009 Actuals</b>	0	0	8,588
<b>2010 Enacted</b>	<b>0</b>	<b>0</b>	<b>10,000</b>
2011 Adjustments-to-Base			
<b>2011 Current Services</b>	<b>0</b>	<b>0</b>	<b>10,000</b>
2011 Program Change			
<b>2011 Total Request</b>	<b>0</b>	<b>0</b>	<b>10,000</b>
Total Change 2010 to 2011	0	0	0

The FY 2011 Request provides no change in funding from FY 2010 Enacted. Funding will support the FY 2011 grant awards program and related operational costs.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Repetitive Flood Claims (RFC) grant program was established by the Flood Insurance Reform Act of 2004 (P.L. 108-264) as a mandatory program that provides funding to reduce or eliminate the long-term risk of flood damage to structures insured under the NFIP that have had one or more flood claim payments. The long-term goal of RFC program is to reduce or eliminate claims under the NFIP through mitigation activities that are in the best interest of the NFIP.

RFC grants are awarded on a national basis without reference to State allocations, quotas, or other formula-based allocations of funds. Funding is restricted to a maximum of \$1.0 million for minor localized flood reduction projects. RFC grants are not limited to residential flood mitigation projects.

**FY 2009 accomplishments include:**

- Awarded \$8.0 million in assistance grants for mitigation activities affecting 44 properties.
- Aligned all four pre-disaster mitigation programs into a unified Hazard Mitigation Assistance (HMA) program guidance and application cycle. This comprehensive approach helped FEMA accomplish the HMA objectives of efficiency and standardization, thus creating a platform for future updates and refinements of program policies and practices to make them more unified and user-friendly.
- Engaged partners through the SRL Focus Workgroup, the External Stakeholder Workgroups, the HMA Summit and HMA stakeholder training to help identify programmatic and process efforts that will enable both stakeholders and FEMA to more efficiently and effectively deliver the RFC program. FEMA will continue to

evaluate the program requirements and processes and the award processes to determine where refinements can be made that improve the overall effectiveness and delivery of the program.

**FY 2010 planned accomplishments include:**

- Align all five mitigation programs into a unified Hazard Mitigation Assistance (HMA) program guidance.
- Provide opportunities for transparency and partnership with States, territories, and tribal and local governments through the HMA Summit, the External Stakeholders Workgroup, focus groups and training courses.
- Provide up to \$10.0 million in grant funds for mitigation activities affecting approximately 40 properties. These measures are expected to provide a savings to the National Flood Insurance Program of approximately \$20.0 million in reduced claims payments.

**FY 2011 planned accomplishments include:**

- Identify and implement program improvements to increase the effectiveness of the RFC program. The enhanced cost-effectiveness approach for the SRL program will be considered for use in the RFC program.
- Continue to provide opportunities for transparency and partnership with States, territories, and tribal and local governments through the HMA Summit, the External Stakeholders Workgroup, focus groups and training courses.
- Provide up to \$10.0 million in grant funds for mitigation activities affecting approximately 40 properties.

2011 Program Change			
<b>2011 Total Request</b>	<b>11</b>	<b>11</b>	<b>40,000</b>
Total Change 2010 to 2011	0	0	0

The FY 2011 Request provides no change in funding from FY 2010 Enacted. Funding will support the FY 2011 grant awards program and related operational costs.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Flood Mitigation Assistance (FMA) grant program is a mandatory program which provides funding to States, federally recognized Indian tribal governments, and communities so that cost-effective measures can be taken to reduce or eliminate the long-term risk of flood damage to buildings, manufactured homes, and other structures insured under the NFIP.

The total amount of FMA grant funds provided during any 5-year period will not exceed \$10.0 million to any State agency or \$3.3 million to any community. The total amount of FMA grant funds provided to any State, including all communities located in the State, will not exceed \$20.0 million during any 5-year period. However, the Administrator may waive these limits for any 5-year period when a major disaster or emergency is declared pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act for flood conditions.

**FY 2009 accomplishments include:**

- Awarded \$28.0 million in assistance grants for mitigation activities affecting 174 properties.
- Aligned all four pre-disaster mitigation grant programs into a unified Hazard Mitigation Assistance (HMA) program guidance and application cycle. This comprehensive approach accomplished HMA objectives of efficiency and standardization, thus creating a platform for future updates and refinements of program policies and practices to make them more unified and user-friendly.
- Reduce potential annual losses to the NFIP by \$56.0 million through FMA grants based on a ratio of \$2 in savings for every \$1 spent supporting mitigation activities.

**FY 2010 planned accomplishments include:**

- Finalize alignment of all five mitigation grant programs (including HMGP) into a unified Hazard Mitigation Assistance (HMA) program guidance.
- Provide opportunities for transparency and partnership with States, territories, and tribal and local governments through the HMA Summit, the External Stakeholders Workgroup, focus groups and training courses.
- Reduce potential annual losses to the NFIP by \$80.0 million through the FMA grants.

**FY 2011 planned accomplishments include:**

- Identify and implement program improvements to increase the effectiveness of the FMA program. The enhanced cost-effectiveness approach for the FMA program will be considered for use in the FMA program.
- Continue to provide opportunities for transparency and partnership with States, territories, and tribal and local governments through the HMA Summit, the External Stakeholders Workgroup, focus groups and training courses.
- Provide up to \$40.0 million in grant funds for mitigation activities.

## IV. Program Justification Changes

**Department of Homeland Security  
Federal Emergency Management Agency  
National Flood Insurance Fund**

**Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease #1: Severe Repetitive Loss Program**

Program Decrease: -\$70,000

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

Program Decrease	-	-	-	-	-	-			-70,000
<b>Total Request</b>							<b>18</b>	<b>18</b>	<b>0</b>

**Description of Item**

The FY 2011 Request does not include new funding for the Severe Repetitive Loss Program.

**Justification**

The Severe Repetitive Loss Program has retained a large unobligated balance that is substantial enough to fully support the program and provide sufficient of funding for awarding grants in FY 2011. Currently, there are \$113 million in unobligated balances for this program in FY 2011. The program will not be impacted by a reduction in funding. In fact, the program will be able refine the method it uses to process grants with the goal of becoming more efficient and timely. This will align the program's funding to its historical rate of obligation.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Federal Emergency Management Agency  
Justification of Proposed Changes in National Flood Insurance Fund  
Appropriation Language**

For activities under the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.) and the Flood Disaster Protection Act of 1973 (42 U.S.C. 4001 et seq.), **\$169,000,000, which shall remain available until September 30, 2012 and shall** be derived from offsetting collections assessed and collected under section 1308(d) of the National Flood Insurance Act of 1968 (42 U.S.C. 4015(d)), which is available for salaries and expenses associated with flood mitigation and flood insurance operations; and, flood plain management and flood mapping: **Provided, That not to exceed \$22,145,000 shall be available for salaries and expenses associated with flood mitigation and flood insurance operations: Provided further, That** any additional fees collected pursuant to section 1308(d) of the National Flood Insurance Act of 1968 (42 U.S.C. 4015(d)) shall be credited as an offsetting collection to this account, to be available for flood plain management and flood mapping: Provided further, That in fiscal year **2011**, no funds shall be available from the National Flood Insurance Fund under section 1310 of that Act (42 U.S.C. 4017) in excess of: (1) \$85,000,000 for operating expenses; (2) **\$1,035,105,000** for commissions and taxes of agents; (3) such sums as are necessary for interest on Treasury borrowings; and (4) \$50,000,000, which shall remain available until expended for flood mitigation actions, of which \$10,000,000 is for repetitive insurance claims properties under section 1323 of the National Flood Insurance Act of 1968 (42 U.S.C. 4030), and of which \$40,000,000 is for flood mitigation assistance under section 1366 of the National Flood Insurance Act of 1968 (42 U.S.C. 4104c) notwithstanding subparagraphs (B) and (C) of subsection (b)(3) and subsection (f) of section 1366 of the National Flood Insurance Act of 1968 (42 U.S.C. 4104c) and notwithstanding subsection (a)(7) of section 1310 of the National Flood Insurance Act of 1968 (42 U.S.C. 4017): Provided further, That amounts collected under section 102 of the Flood Disaster Protection Act of 1973 and section 1366(i) of the National Flood Insurance Act of 1968 shall be deposited in the National Flood Insurance Fund to supplement other amounts specified as available for section 1366 of the National Flood Insurance Act of 1968, notwithstanding 42 U.S.C. 4012a(f)(8), 4104c(i), and 4104d(b)(2)-(3): Provided further, That total administrative costs shall not exceed 4 percent of the total appropriation.(Department of Homeland Security Appropriations Act, 2010)

#### Explanation of Change:

FEMA proposes to modify the language to remove the no less than restriction. The proposed language modifications are also needed to reflect the realignment of staffing and operating costs associated with floodplain management and flood mapping under a single PPA.

<b>Total requirements</b>	<b>\$39,719</b>	<b>\$38,680</b>	<b>\$22,145</b>	<b>(\$16,535)</b>

#### PPA Mission Statement

Resources under this activity support the salaries and expenses of FTE managing the National Flood Insurance Program (NFIP) and flood mitigation programs. In FY 2011, FEMA will continue to support the NFIP and to provide operational and administrative support for the Community Rating System and will enhance oversight of the program.

#### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	2010 to 2011 Change
<b>Salaries and Benefits</b>	<b>\$33,102</b>	<b>\$32,203</b>	<b>\$15,625</b>	<b>(\$16,578)</b>

The FY 2011 Request provides for the annualization of 2010 pay adjustment and the January 2011 increase in personnel compensation as well as a realignment of positions and funding to the Floodplain Management and Floodmapping PPA.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	2010 to 2011 Change
<b>Travel</b>	<b>\$891</b>	<b>\$725</b>	<b>\$1,753</b>	<b>\$1,028</b>

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The increase in travel for the FY 2011 Request level reflects plans for additional conferences, community assistance and audits of WYOs.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	2010 to 2011 Change
<b>GSA rent</b>	<b>\$4,227</b>	<b>\$3,824</b>	<b>\$1,271</b>	<b>(\$2,553)</b>

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2011 Request reflects the decrease in costs for the positions that have been realigned to the Floodplain Management & Floodmapping PPA.

	<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Communication, Utilities, and miscellaneous charge</b>	\$0	\$431	\$143	(\$288)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2011 Request reflects the decrease in costs due to the realignment of positions to the Floodplain Management and Floodmapping PPA.

	<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Advisory and Assistance Services</b>	\$1,272	\$139	\$253	\$114

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2011 Request provides for non pay inflation and the expansion of existing services.

	<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Other Services</b>	\$115	\$58	\$2,519	\$2,461

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2011 increase from the FY 2010 Request is due to non pay inflation and the restoration of contracted personnel, IT and financial services that support the NFIP.

	<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Supplies &amp; materials</b>	\$26	\$52	\$71	\$19

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2011 Request provides for non-pay inflation.

	<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Equipment</b>	\$20	\$90	\$34	(\$56)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2011 Request reflects a decrease in equipment requirements.

**PPA Mission Statement**

Through Floodplain Management programs, FEMA encourages communities and their citizens to take informed and effective mitigation actions before a flood in order to reduce the long-term risk to people and property. Through the delivery of mitigation programs, FEMA leads a national effort to: identify and improve the understanding of communities' hazards and their risks; develop and improve techniques and planning processes which mitigate those risks; provide an environment at the State and local levels that is conducive to applying those techniques and processes; provide financial and technical assistance to facilitate application of those techniques and processes; and support development of incentives and disincentives which make application of those techniques and processes a social, political and/or economic priority.

**Summary Justification and Explanation of Changes**

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Salaries and Benefits</b>	\$0	\$0	\$24,163	\$24,163

The FY 2011 Request provides for the annualization of 2010 pay adjustment and the January 2011 increase in personnel compensation as well as a realignment of positions and funding from the Flood Mitigation and Flood Insurance Operations PPA.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Travel</b>	\$0	\$1,100	\$1,883	\$783

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2011 request provides for non pay inflation.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>2010 to 2011 Change</b>
<b>Transportation of Things</b>	\$2	\$0	\$1	\$1

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2011 Request provides for anticipated costs for shipping and courier services.

	<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>GSA rent</b>	\$0	\$0	\$2,630	\$2,630

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2011 Request reflects the costs for the positions that have been realigned from the Flood Mitigation and Flood Insurance Operations PPA.

	<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>2010 to 2011</b>
	<b>Actuals</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Communication, Utilities, and miscellaneous charge</b>	\$0	\$0	\$297	\$297

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2011 Request reflects the costs for the positions that have been realigned from the Flood Mitigation and Flood Insurance Operations PPA.

	<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Advisory and Assistance Services</b>	\$0	\$0	\$107	\$107

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2011 Request provides for non pay inflation and the expansion of existing services.

	<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Other Services</b>	\$67,760	\$50,921	\$106,671	\$55,750

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The increase in FY 2011 provides for non-pay inflation. The FY 2011 Request reflects the costs of flood map production, technical services and program support. In addition, funding provides for costs associated with the positions that have been realigned from the Flood Mitigation and Flood Insurance Operations PPA.

	<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Purchase from Government Accounts</b>	\$0	\$777	\$792	\$16

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2011 Request provides for non pay inflation.

	<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Supplies &amp; materials</b>	\$0	\$0	\$42	\$42

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2011 Request provides for costs associated with the positions that have been realigned from the Flood Mitigation and Flood Insurance Operations PPA.

	<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Equipment</b>	\$0	\$0	\$12	\$12

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2011 Request provides for costs associated with the positions that have been realigned from the Flood Mitigation and Flood Insurance Operations PPA.

	<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>2010 to 2011</b>
	<b>Actual</b>	<b>Enacted</b>	<b>Request</b>	<b>Change</b>
<b>Grants/Subsidies/Contributions</b>	\$37,747	\$57,544	\$10,057	(\$47,487)

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The decrease in FY 2011 from the FY 2010 Request is due to the reduction in flood mapping services being provided through grant awards from this funding source. Instead flood mapping services are captured under object class 25.2.

### PPA Mission Statement

The National Flood Insurance Act of 1968, as amended, authorizes the Federal Government to provide flood insurance on a national basis. Flood insurance may be sold or continued in force only in communities that enact and enforce appropriate floodplain management measures. Communities must participate in the program within 1 year of the time they are identified as flood-prone in order to be eligible for flood insurance and some forms of Federal financial assistance for acquisition or construction purposes. In addition, Federally regulated funding institutions cannot provide loans to nonparticipating communities with an identified flood hazard.

More than 20,000 communities in all States and Territories participate in the NFIP. Structures built to NFIP criteria experience 80 percent less damage through reduced frequency and severity of losses. The flood mitigation program requirements are estimated to save in excess of \$1 billion per year in flood losses avoided. The NFIP limits the impact of disaster by encouraging property owners and others to manage their risk through flood insurance and other hazard insurance mechanisms.

#### PPA Mission Statement

The Flood Insurance Reform Act of 2004 introduced several new requirements and program initiatives. This included the establishment of the Severe Repetitive Loss Pilot Program, initially authorized at \$40 million annually. The Program provides technical and financial assistance to State and local governments to mitigate severe repetitive loss properties under the National Flood Insurance Program (NFIP). The Program focuses on a subset of the repetitive loss properties – severe repetitive loss properties - that have the largest impact on claims paid from the NFIF. Mitigating potential damages to these properties will result in savings to the NFIF. This program is funded from mandatory, premium collections.

#### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	2010 to 2011 Change
<b>Salaries and Benefits</b>	<b>\$485</b>	<b>\$1,890</b>	<b>\$2,056</b>	<b>\$165</b>

Salaries and Benefits includes costs for 14 FTEs and provides for the annualization of the 2010 pay increase and the proposed January 2011 increase.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	2010 to 2011 Change
<b>Other Services</b>	<b>\$4,730</b>	<b>\$4,750</b>	<b>\$7,944</b>	<b>\$3,194</b>

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2011 Request includes an increase for non-pay inflation and additional contracted services required to award the 2011 grants.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	2010 to 2011 Change
<b>Purchase from Government Accounts</b>	<b>\$0</b>	<b>\$67</b>	<b>\$68</b>	<b>\$1</b>

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2011 Request provides for non pay inflation.

### PPA Mission Statement

The Flood Insurance Reform Act of 2004 introduced several new requirements and program initiatives. This included the establishment of a grant program which provides a mechanism to mitigate properties that have experienced repetitive losses where the State or community does not meet eligibility requirements under the Flood Mitigation Assistance program. Although not necessarily focused on Severe Repetitive Loss Properties, the Act does direct FEMA to give priority to "Worst-Case Properties" that would result in the greatest savings to the NFIF. This program will be funded from mandatory, premium collections.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	2010 to 2011 Change
<b>Travel</b>	<b>\$8</b>	<b>\$54</b>	<b>\$55</b>	<b>\$1</b>

**PPA Mission Statement**

The Flood Mitigation Activities (FMA) support activities to eliminate at-risk structures that are repetitively flooded. Through fee-generated discretionary funds transferred from the National Flood Insurance Fund (NFIF), FMA supports activities to eliminate at-risk structures that are repetitively flooded, and provides flood mitigation assistance planning support to States and communities. In FY 2008, these activities were funded from the National Flood Mitigation Fund appropriation.

**Disaster Assistance Direct Loan Program**

## **I. Appropriation Overview**

### **A – Mission Statement for Disaster Assistance Direct Loan Program**

The Disaster Assistance Direct Loan Program account provides loan authority and subsidy budget authority for disaster assistance direct loans.

### **B – Budget Activities:**

The Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act) authorizes two types of direct loans: 1) Section 319 (State Share) loans to States for the non-Federal portion of cost-shared Stafford Act programs and 2) Section 417 (Community Disaster) loans to local governments that incurred substantial losses of tax and other revenues as a result of a major disaster and require financial assistance in order to perform governmental functions. In accordance with the Federal Credit Reform Act of 1990, this account supports subsidy budget authority and authorizes loan levels for the direct loan programs; however, in FY 2011, no funds are requested for section 417 (Community Disaster) loan subsidy.

### **C – Budget Request Summary:**

Loan subsidy of \$295,000 and a direct loan limitation of \$25 million for section 319 (State Share) loans are requested for FY 2011. No funds are requested for section 417 (Community Disaster Loans) loan subsidy in FY 2011.

*Note: The Loan Limitation amount above does not reflect the loan limitation carryover associated with the supplemental appropriation for Section 419 Special Community Disaster Loans.*

FEMA requests \$25 million in loan authority and \$295,000 in subsidy budget authority for section 319 loans for FY 2011. This represents no change from FY 2010.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Under the Stafford Act, FEMA may make two types of direct loans:

State Share Loans: Under section 319 of the Stafford Act, FEMA may lend or advance to a State or an eligible applicant the portion of assistance for which the applicant is responsible under cost-sharing provisions of the Stafford Act. To be deemed eligible for a loan, the governor of the affected State must demonstrate, where damage is overwhelming and severe, that the State is unable to assume immediately its financial responsibility to meet the cost-share because (1) the State is responding to concurrent, multiple disasters/emergencies or has incurred extraordinary costs as a result of a particular disaster or emergency; and (2) the damages caused by such disaster or disasters are so overwhelming and severe it is not possible for the State to assume immediately its financial responsibility. \$217 million in State Share loans have been approved, with the last loan issued in 1996. There are no outstanding State Share loans.

Community Disaster Loans (CDLs): Under section 417 of the Stafford Act, loans may be authorized to local governments that have suffered a substantial loss of tax and other revenues as a result of a major disaster, and have demonstrated a need for financial assistance in order to perform their municipal operating functions. The loans, not to exceed 25 percent of the annual operating budget of that local government for the fiscal year in which the major disaster occurred, are made at the current Treasury rate for a term of 5 years and may not exceed \$5 million. All or part of such loans may be canceled to the extent that revenues of the local government during the full 3 post-disaster fiscal years are insufficient to meet its operating budget as the result of the disaster. A local government is not eligible for further CDLs during any period in which the jurisdiction is in arrears with respect to required repayment of an existing loan. \$300 million in Traditional Community Disaster loans have been approved, with the last loan issued in 2009.

Community Disaster Loans that were obligated in FY 2009 include:

**IOWA**

City of Cedar Rapids	5,000,000
City of New Hartford	118,811

Total	39,212,291

*Special Community Disaster Loans (SCDLs):* The Community Disaster Loan Act of 2005 (PL 109-88) authorized FEMA to transfer \$750 million from the Disaster Relief Fund to provide up to \$1 billion in loan authority to assist communities impacted by Hurricanes Katrina and Rita. For these Special Community Disaster Loans, three elements were added to the traditional program under section 417: 1) It removed the \$5 million limit on individual loans; 2) the loans were restricted “to assist local governments in providing essential services;” and 3) the loan cancellation provision of section 417(c)(1) of the Stafford Act was inapplicable.

The Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery, 2006 (PL 109-234) appropriated an additional \$278,800,000 to support \$371,733,000 in SCDLs. However, certain eligibility criteria were different from those in the 2005 Act: 1) the maximum loan amount was increased to 50 percent of the applicant’s operating budget the fiscal year of the disaster; 2) the loan analysis could only consider “tax revenue” loss and not “other revenues” as allowed for in the 2005 Act; and 3) applicants were required to demonstrate actual loss in tax revenues of 25 percent or greater. The loan cancellation provision continued to be inapplicable.

The U.S. Troop Readiness, Veterans' Care, Katrina Recovery, and Iraq Accountability Appropriations Act, 2007 (PL 110-28) removed the loan cancellation prohibitions contained in the 2005 and 2006 Acts. This statutory change now gives FEMA discretionary authority, limited by the language in section 417(c)(1) of the Stafford Act, to cancel SCDLs issued pursuant to either the 2005 or 2006 Acts.

From October 2005 to September 2006, FEMA approved 152 SCDLs totaling \$1,270,501,241 to 109 eligible applicants in Mississippi and Louisiana.

In accordance with the Federal Credit Reform Act of 1990, three accounts are used to record cash flow data for direct loans:

- Disaster Assistance Direct Loan Program Account. This is the budget account into which an appropriation is made to cover the subsidy costs of a direct loan, and from which such costs are disbursed into the financing account.
- Disaster Assistance Loan Liquidating Account. This budget account records all cash flows to and from FEMA for pre-1992 direct loans made under the State Share and Community Disaster loan programs. There is no longer any activity in this account.
- Disaster Assistance Direct Loan Financing Account. The loan financing account is a non-budgetary account that records all cash flows to and from FEMA resulting from CDLs and State Share direct loans obligated in 1992 and beyond. This account holds balances, receives the subsidy cost payment from the program account, and includes all other cash flows resulting from post-1991 direct loans. The funds in this account are a means of financing and are not included in the budget totals. Loans are obligated from this account, using the subsidy budget authority from the Disaster Assistance Direct Loan Program Account and borrowing authority from the Department of the Treasury.

### PPA Mission Statement

The Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act) authorizes two types of direct loans: 1) Section 319 (State Share) loans to States for the non-Federal portion of cost-shared Stafford Act Programs and 2) Section 417 (Community Disaster) loans to local governments that incurred substantial losses of tax and other revenues as a result of a major disaster and require financial assistance in order to perform governmental functions. In accordance with the Federal Credit Reform Act of 1990, this account supports subsidy budget authority and authorizes loan levels for the direct loan programs.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
33.0 Loans	57,463	43,295	295	(43,000)

Loans provide loan subsidies for two types of direct loans: 1) Section 319 (State Share) loans and 2) Section 417 (Community Disaster) loans. The FY 2011 request reflects no change from FY 2009.

	B. Major Activities and Key Strategic Goals.....	FEMA -2
	C. Resources Requested and Performance Impact.....	FEMA -8
	D. Performance Highlights, Resources, and Alignment to Strategic Goals.....	FEMA -9
	E. Digest Tables by FYHSP Programs .....	FEMA -17

## A. Mission and Description of Component

The Federal Emergency Management Agency (FEMA) was created as an independent agency in 1979 by an Executive Order of the President. The Homeland Security Act of 2002 realigned FEMA under the new Department of Homeland Security (DHS). *FEMA's mission is to support our citizens and first responders to ensure that, as a nation, we work together to build, sustain, and improve our capability to prepare for, protect against, respond to, recover from, and mitigate all hazards.*

FEMA manages and coordinates the federal response to and recovery from major domestic disasters and emergencies of all types, under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, and in accordance with the National Response Framework and established regulations and policies. The Agency coordinates programs to improve the effectiveness of emergency response providers at all levels of government to respond to terrorist attacks, major disasters, and other emergencies. Through the Disaster Relief Fund, FEMA provides individual and public assistance to help families and communities affected by declared disasters to rebuild and recover. FEMA also supports state and local government programs designed to help prevent or respond to threats or incidents of terrorism and other catastrophic events, as well as administers hazard mitigation programs that reduce the risk to life and property from floods and other hazards. FEMA stands ready around-the-clock to provide rapid technical, materiel, and/or financial assistance in emergency situations whenever state and local capabilities are overwhelmed or seriously threatened. At any Presidentially-declared disaster location, FEMA leads the federal response and recovery effort by providing emergency management expertise and coordinating critical support resources from across the country.

The Post-Katrina Emergency Management Reform Act of 2006 (PKEMRA) assigned additional functions and requirements to FEMA. In addition to incorporating National Preparedness Programs and DHS Grant Programs within FEMA, PKEMRA called for FEMA to (among other new requirements):

- Improve the Agency's core capabilities and strengthen their regions;
- Expand FEMA's mission beyond mitigation, response, and recovery to include preparedness and protection;
- Establish a National Emergency Child Locator Center;
- Establish a National Emergency Family Registry and Locator System;
- Conduct pilot disaster housing and debris removal programs;
- Engage new constituencies, such as the law enforcement community;
- Establish a national emergency management system; and,
- Implement a national preparedness system.

FEMA's major mission components include Preparedness and Protection, Response and Recovery, and Mitigation. In addition to its headquarters in Washington, D.C., FEMA has ten regional offices, three area offices, six Logistics Distribution Centers, six Mobile Emergency Response Support detachments, three National Processing Service Centers, and various temporary disaster-related facilities/sites that carry out the agency's operations throughout the United States and its territories.

## B. Major Activities and Key Strategic Goals

As a component of the Department of Homeland Security, FEMA has developed strategic goals that align with the Secretary's vision and goals for the Department and the Quadrennial Homeland Security Review (QHSR) mission areas.

In FY2009, FEMA worked in close coordination with state and local authorities to respond to severe storms in Arkansas, Kentucky, Missouri, and multiple other States, including record flooding in North Dakota and Minnesota. In addition, FEMA worked hard to accelerate and improve recovery efforts in the Gulf Coast region over the past year. Prior year investments, which were targeted at improving operational capacity and capability, have significantly improved the Agency's ability to fulfill its disaster support mission. Key improvements include implementing Incident Management Assistance Teams (IMATs); reconfiguring and improving logistics to improve asset visibility as well as operational coordination; and establishing national contracts for critical evacuation support resources, such as ambulances.

In FY2010 and FY2011, the Agency will work to improve the outcomes of disasters through more effective and integrated Preparedness, Protection, Response, Recovery, and Mitigation activities. The Agency will focus on enhancing coordination between headquarters and regional offices in all aspects of disaster management, as well as continue to operationally re-empower regional offices, recognizing that FEMA's regional operations have the lead for supporting state and local emergency management activities. FEMA will also continue to emphasize the promotion and improvement of personal/citizen preparedness, with the focus on increasing individual resiliency; i.e., their ability to quickly recover from a disaster. Moreover, the Agency is placing greater emphasis on underserved populations, including children, the elderly, and the disabled, which often do not receive adequate focus and attention in disaster management efforts. Finally, with a significant number of employees nearing retirement age in the coming years, FEMA will prioritize recruiting, retaining, and better developing the next generation of diverse emergency management professionals to lead the Agency into the future.

### PREPAREDNESS

FEMA's National Preparedness Directorate (NPD) works to ensure that the Nation is prepared for disasters of all kinds. NPD is focused on improving the Nation's ability to plan, train, exercise, evaluate, and assess the success of our preparedness activities. It also implements Homeland Security Presidential Directives #5 and #8 by establishing policies that strengthen national preparedness for terrorist attacks, natural disasters, and other emergencies.

In FY2009, NPD accomplishments included the following:

- The release of the Comprehensive Preparedness Guide (CPG) 101, which provides guidance to State, local and tribal communities on how to plan for disasters.
- A revised National Incident Management System (NIMS), which provides a comprehensive, systematic approach to incident management.

In FY2010 and FY2011, NPD intends to accomplish the following:

- Assess the effectiveness of state and local plans through another Nationwide Plan Review (the first review was conducted in FY2006).

- Prioritize the assessment of Federal, State and local preparedness levels by developing and implementing a Comprehensive Assessment System to assess the nation's performance through qualitative and quantitative metrics.
- Lead an effort to consolidate overlapping and often duplicative reporting requirements that have been levied on State and local governments over the years. FEMA will continue an agency-wide review of existing data collection systems in order to reduce the reporting burden placed on State, Territory, Tribal, and Local governments while, simultaneously, ensuring the receipt of accurate, comprehensive, and useful information.

FEMA's Grant Programs Directorate (GPD) plays an important role in national preparedness efforts by providing financial support to assist Federal, state, and local governments to prepare, prevent, plan for, and respond to acts of terrorism and major disasters. GPD also serves as the executive agent for development of grant guidance, including the formulation of the risk methodology used to support nationwide grant allocations. The grant programs administered by GPD include the Homeland Security Grant Program, the Port and Transit Security Grant Programs, Assistance to Firefighters Grant Program, and Emergency Management Performance Grants.

In FY2009, GPD accomplishments included the following:

- Awarded over \$3 billion dollars in homeland security grants, including approximately \$840 million to protect from acts of terrorism the nation's ports, rail and mass transit systems, trucking industry, intercity bus systems, and other critical infrastructures.
- Initiated the Cost-to-Capability (C2C) Initiative in June 2009 to demonstrate how homeland security and preparedness grant programs improve the Nation's ability to respond to all-hazard threats.
- Expanded its outreach efforts to engage stakeholders in a dialogue on its Grants Management programs and processes throughout the FY 2009 application cycle.

In FY2010, and continuing with implementation in FY11, GPD intends to accomplish the following:

- Establish and implement a Local, State, Tribal, and Federal Preparedness Task Force required by the Department of Homeland Security Appropriations Act of FY2010. This Task Force will be charged with generating actionable recommendations on issues such as preparedness policies and guidance that need updating; determining which grant programs work most efficiently and where programs can be improved; and establishing the most appropriate way to collectively assess our capabilities and our capability gaps.
- Continue monitoring and enhancing internal evaluation capabilities to further guide program planning, as well as release revised program guidance packages that may reflect program consolidation to reduce the burden on grantees as well as monitor the evaluations of technical assistance efforts.
- Continue the effort to consolidate all of the non-disaster grants management system and other DHS grants and financial assistance management systems into a single grants management system.

The United States Fire Administration (USFA) supports national preparedness efforts by promoting the professional development of the fire and emergency response community and its allied professionals.

In FY2009, USFA accomplishments included the following:

- Delivered 3,811 training programs to 116,350 fire and emergency response personnel, both on and off campus, through its diverse delivery system and network of national training partners.
- Completed the development of a newly integrated and streamlined Course Schedule Instructor Database; began using a new on-line collaboration tool to facilitate meetings, briefings and training delivery demonstration projects; and developed a web version of the National Fire Incident Reporting Systems client Data Entry Tool.
- Distributed a monthly INFOGRAM to 35,000 first responders and periodic Critical Infrastructure Protection bulletins to a vetted audience of 11,000 emergency services leaders.

In FY2010 and FY2011, USFA intends to accomplish the following:

- Expand fire and emergency response training programs through the use of both on-campus and online distance learning programs.
- Increase the delivery of courses at the state and local level through the use of State fire training assistance partnership agreements and distance learning methodologies. In addition, USFA will develop six new on- and off-campus courses and continue to update existing courses to address modern leadership, management, and technical practices.
- Collaborate with the Assistance to Firefighter Grants Program Office to utilize the National Fire Incident Reporting System to assist in improving delivery of both Staffing for Adequate Fire and Emergency Response and Assistance to Firefighters Grants.

## **PROTECTION**

FEMA's National Continuity Programs Directorate (NCP) is the Federal Lead Agent for developing, coordinating, and assessing continuity of national operations to help guarantee the survival of an enduring constitutional government in response to national emergencies. In this role, NCP is responsible for providing direction, guidance, and planning assistance to Federal, state, local, tribal, and territorial governments to help ensure they are capable of performing their essential functions during any situations that may disrupt normal operations.

In FY2009, NCP accomplishments included the following:

- As part of the conversion to the Integrated Public Alert and Warning System (IPAWS), FEMA initiated the collection of all applicable IPAWS public alert and warning systems data used by Federal, state, territorial, tribal, and local agencies at 1,932 emergency operations centers.
- Deployed Digital Emergency Alert System (EAS) in 8 states and Puerto Rico, to provide emergency operation centers with an alternate means of distributing alerts and warnings.

In FY2010 and FY2011, NCP intends to accomplish the following:

- Publish an Inventory Assessment Report of public alert and warning system capabilities and resources.
- Manage major systems upgrades to the FEMA National Radio System to replace logistically unsupportable legacy equipment and improve interoperability.
- Develop, coordinate, and conduct the Eagle Horizon 2010 National Continuity exercise to authoritatively assess the efficacy of department and agency continuity programs.

- Increase the capability to send alerts to end-user devices, including alerts to those that do not speak English and those who are deaf or hard of hearing.
- Integrate alert and warning networks to link state, tribal, and local emergency operations centers with Federal partners to facilitate recovery activities and help return individuals and communities affected by Federally-declared disasters to normal function as quickly and efficiently as possible.
- Manage capital improvements at the Mount Weather Emergency Operations Center, including mechanical infrastructure improvements, safety enhancements, and improvements to information technology sites.

## **RESPONSE**

FEMA's Disaster Response Directorate provides the core Federal operational capabilities needed to support efforts to save lives, minimize suffering, and protect property in a timely and effective manner in communities overwhelmed by natural disasters, acts of terrorism, or other emergencies. Disaster Response offers a unique capability that ensures that Federal emergency response systems and capabilities are properly poised to support Federal decision makers and immediately receive and react to requirements necessary to support states overcome by an emergency or major disaster.

In FY2009, Disaster Response accomplishments included the following:

- Implemented additional Incident Management Assistance Teams (IMATs) at the national and regional-levels to improve management and coordination of the national response for catastrophic incidents.
- Improved disaster workforce management by standardizing the hiring, training, and credentialing of FEMA's disaster response cadres.
- Updated the National Response Framework (NRF) Catastrophic Incident Supplement based on empirical damage and societal impact data collected for the New Madrid Seismic Zone Catastrophic Disaster Planning Initiative, completed state Catastrophic Earthquake Annexes for the five remaining New Madrid Seismic Zone states (for a total of eight plans), and developed four Federal Regional Earthquake Annexes.

In FY2010 and FY2011, Disaster Response intends to accomplish the following:

- Use FEMA's enhanced operational planning capacity to develop vertically and horizontally-integrated response plans compliant with the National Incident Management System and the NRF.
- Expand FEMA's focus on catastrophic disaster response planning through Federal planning, both regionally- and nationally-focused, that synchronizes with urban area/regional planning accomplished as part of the Homeland Security Grant Program, and prepare for the 2011 National-Level Exercise (NLE-2011) based on the complete suite of New Madrid Seismic Zone (NMSZ) Plans.
- Develop and issue a *Strategy for Improving the National Response and Recovery from an IND Attack* by early 2010.
- Working in coordination with other DHS components, develop Urban Shelter-in-Place guidance in FY2011, including scientifically based guidance for post Radiological/Nuclear incident shelter-in-place and evacuation.

FEMA's Logistics Directorate (LD) supports Federal response activities by providing logistics operations, logistics planning, distribution management, and property management for FEMA and its emergency management partners. LD provides FEMA with the foundation to re-define disaster logistics and move beyond the simple provision of commodities to a more comprehensive management approach.

In FY2009, Logistics Directorate accomplishments included the following:

- Utilized funding increases to help institutionalize command and control of strategic logistics planning, operations, and management functions, while pushing operational control to the most effective level of execution. This included bolstering both regional and headquarters staffing with additional logistics planners, logistics operational specialists, and National Emergency Housing Unit Site Managers.
- Incorporated a comprehensive Third Party Logistics environment into the FEMA logistics structure. This will allow FEMA, as a focal point for disaster logistics management, to outsource the most basic types of supply chain management functions; i.e., warehousing and transportation services that can be scaled and customized to emergent needs based on existing conditions and the demands and delivery service requirements for products and materials.
- Implemented the next phase of the Total Asset Visibility (TAV) system, developing expanded asset visibility of inventories and requests across all FEMA regions and asset categories.

In FY2010 and FY2011, Logistics Directorate intends to accomplish the following:

- Leverage the Logistics Management Transformation Initiative (LMTI) to drive transformation actions and further maturity of FEMA's logistics capabilities and responsiveness. The focus of LMTI is to continue the transition of FEMA Logistics to a 21<sup>st</sup> century enterprise utilizing both private and public sector best practices and models.
- Develop and implement enterprise-based systems and tools, such as the Logistics Supply Chain Management System (LSCMS), which represents a complete end-to-end logistics management system that will enable FEMA to manage each segment of the supply chain and at the same time generate essential management reports from data input through the warehousing, request, ordering, shipment/transportation, and receiving processes.

## **RECOVERY**

FEMA's Disaster Recovery Directorate works to ensure that individuals and communities affected by disasters, including catastrophic events and terrorist attacks, receive rapid, situation-appropriate, and accurately targeted disaster assistance through the Agency's Individual Assistance and Public Assistance programs. Supported by three primary and more than a dozen supporting Federal Government agencies, FEMA continues to coordinate long-term recovery activities with state, regional, local and private sector efforts under the aegis of NRP Emergency Support Function 14, Long-Term Community Recovery. In addition, FEMA leads Federal agencies, state and local governments, and representatives of non-governmental organizations in developing, coordinating, and implementing the PKEMRA-required National Disaster Recovery Framework and National Disaster Housing Strategy.

In FY2009, Recovery Directorate accomplishments included the following:

- Enhanced capabilities for managing mass evacuations and displaced populations, including additional state and local planning and improvement of evacuee tracking systems. For example, through the FEMA National Shelter System, the Agency enhanced data sharing capabilities and the ability to provide expanded, accurate data to Federal, state, and local users. The Agency also improved the National Emergency Family Registry Locator System to facilitate the reunification process and enable non-U.S. citizens to utilize the system.
- To improve the intake of applications for individual assistance, FEMA also piloted a new in-person recertification protocol intended to reduce or eliminate the need for recertification via the postal system (which is often confusing for survivors), and increase the reliability and surety of the process.

In FY2010 and FY2011, the Recovery Directorate intends to accomplish the following:

- Strengthen the Agency's disaster recovery management infrastructure including implementing Emergency Management Mission Integrated Environment (EMMIE) Version II for Public Assistance, which will allow staff to quickly capture information on damaged facilities and directly input the data into EMMIE for processing.
- Begin development of the Emergency Assistance Information System, which will integrate existing mass care software and information systems and enable states to manage multiple mass care information requirements through a single system.
- By FY2011, develop a national strategy and capability to provide sustainable (non-congregate) sheltering for disaster survivors, with the planning goal of identifying and providing sustainable sheltering for up to 500,000 disaster survivors within 60 days of a disaster.

## **MITIGATION**

FEMA's Mitigation Program works to strengthen mitigation nationwide to reduce the Nation's risk to natural disasters or other emergencies, and to facilitate adoption and enforcement of up-to-date design and construction practices through state and local building codes. Mitigation supports activities that result in sound risk management decisions by individuals and both private- and public-sector entities. Mitigation programs are conducted through three core activities: risk analysis, risk reduction, and insurance against flood risk. These programs work together to reduce the loss of life and property, to improve resiliency by enabling individuals to recover more rapidly from floods and other disasters, and to lessen the financial burden on taxpayers.

In FY2009, Mitigation accomplishments included the following:

- Established a program with 29 states and territories in areas of high-seismic risk to strengthen, enhance, and maintain State earthquake hazard reduction programs. FEMA enhanced its Building Science programs, which provide information about proven safe construction methods and are designed to improve the understanding of hazards such as wind storms and floods and their impacts, and support implementation of cost-effective mitigation measures to reduce those impacts.

In FY2010 and FY2011, Mitigation intends to accomplish the following:

- Continue working with local communities to review, refine, and update the flood hazard data reflected on Flood Insurance Rate Maps. The Risk MAP (Mapping, Assessment, and

Planning) Program will build upon the Flood Map Modernization Program to provide sound flood hazard data, align flood map updates with flood risk assessments to support stronger hazard mitigation planning, and enable broader flood risk communications crucial to a national reduction in flood risk.

**KEY STRATEGIC GOALS**

FEMA will strive to improve the linkages between the priorities of Preparedness, Protection, Response, Recovery, and Mitigation, as well as better balance Headquarters and Regional responsibilities, in terms of operational mission management.

FEMA Regions will continue to have an expanded and more empowered role in executing the agency’s mission, as they are uniquely and geographically best positioned to coordinate jurisdictional-level activities with their geographically respective Federal counterparts, state and local governments, public and private sectors, and individual citizens.

FEMA will promote personal preparedness and increase community resiliency through public education, awareness, community restoration, engagement, planning, and outreach. FEMA will also create safer communities by clearly and consistently communicating all-hazard risk information and promoting mitigation, sound risk management decisions, and physical and economic loss reduction measures.

Recognizing the compelling needs for improving the Nation’s ability to respond to major disasters and, in particular, those of catastrophic magnitude, FEMA will continue to work diligently to establish stronger vertical and horizontal partnerships and improved levels of coordination.

**C. Resources Requested and Performance Impact**

The FY 2011 FEMA budget request reflects the funding required to sustain the existing improvements in operational response and internal capacity mandated by PKEMRA. The FY 2011 budget request reflects \$7.24 billion in net discretionary budget authority. FEMA has proposed a modest increase of \$23.3M to support neglected facilities. While the proposed budget reflects a modest decrease for certain grant programs and other activities, it upholds the Federal commitment to support state and local government programs that help prevent or respond to threats or incidents of terrorism and other catastrophic events, and enables FEMA to effectively meet its emergency management mandate.

**FY 2011 Initiatives:**

- **Facilities Improvements** .....\$23.3M (0 FTE)

FEMA will reach the point in FY2011 where the capacity of our facilities will be unable to absorb projected and necessary staffing increases and mission responsibilities. FEMA also faces a critical need for adequate resources to maintain and repair our aging and deteriorating national facilities. To address these needs, FEMA has developed a five-year capital plan, of which \$23.3 million is required in FY2011 to begin critical regional facility acquisitions and repairs, as well as support critical and long-overdue capital improvements to FEMA’s entire real estate portfolio.

Of the \$23.3 million, \$11.4 million would be allocated to additional facilities to provide adequate space for a force strength that has increased from 2,131 permanent full time employees (prior to PKEMRA) to over 4,000 in FY2010, with much of this plus-up occurring in regional offices with facilities that lack any expansion capability. As a result, the 10 regional offices are now extremely cramped for space, and FEMA regional staff are often forced to work in over-crowded conditions. Nationwide, FEMA's facilities require upgrades to meet safety requirements. These working conditions not only impact personnel productivity, but impair FEMA's ability to attract and retain quality staff.

The remaining \$11.9 million would be allocated to facility repairs and capital improvements. The accepted business practice for Federal facilities is to set aside sufficient funding at the level of 2-4% of the agency real estate portfolio. This enhancement request would elevate the base funding of \$9.6 million to a total \$21.5 million in FY2011 and place it within the accepted business practice range.

D. Performance Highlights, Resources, and Alignment to Strategic Goals

For each mission-oriented program, the program performance goal, total dollars and FTE, and Government performance and Results Act measures are shown below.

<b>Program: Disaster Recovery</b>						
<b>Performance Goal:</b> Help individuals and communities affected by federally - declared disasters return to normal function quickly and efficiently, while planning for catastrophic disaster recovery operations.						
<b>Secretary's Priority Supported:</b> Ensuring Resilience from Disasters.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$20,730,361	\$5,104,310	\$11,595,049	\$1,590,222	\$1,521,152	\$2,087,832
<b>FTE</b>	6,995	3,191	3,227	7,925	4,758	5,079

Performance Plan Measures

<b>Measure:</b> Percent of customers satisfied with Individual Recovery Assistance						
<b>Description of Measure:</b> This measure indicates the percent of Americans affected by disaster or other emergency who express satisfaction with the Individual Disaster Recovery Assistance provided by FEMA. Recovery assistance helps individuals affected by disasters and emergencies return to normal quickly and efficiently.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	90%	91%	92%	93%	91%	91%
<b>Actual:</b>	91%	92.2%	92.7%	90%	N/A	N/A

<b>Measure:</b> Percent of customers satisfied with Public Recovery Assistance						
<b>Description of Measure:</b> This measure reflects the percent of communities affected by disaster or other emergencies who indicate satisfaction with the Public Disaster Recovery Assistance provided by FEMA on a customer survey. Disaster Recovery Assistance includes debris removal, emergency protective measures, and repair or replacement of damaged infrastructure. FEMA conducts a series of Program Evaluation and Customer Satisfaction Surveys each Fiscal Year to gather data on customer satisfaction with performance in specific program areas, including Public Recovery efforts that are used to track improvement in operations and identify areas in need of attention. These areas surveyed include: Overall Program and Process, Project Worksheet Process, Information Dissemination, Public Assistance Administrative Burden, Timely Service and Staff Performance						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	88%	88%	90%	90%	90%	91%
<b>Actual:</b>	88%	88%	90%	0%	N/A	N/A

<b>Measure:</b> Percent of disaster households up to a capacity of 500,000 able to be temporarily housed within 60 days						
<b>Description of Measure:</b> Develop a national strategy and capability to provide sustainable (non - congregate) sheltering for up to 500,000 disaster households within 60 days of the disaster. This goal directly facilitates the recovery of individuals and communities impacted by large disasters						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	20%	40%
<b>Actual:</b>	None	None	None	None	N/A	N/A

<b>Program: Disaster Response</b>						
<b>Performance Goal:</b> Provide the core Federal operational capabilities needed to save lives, minimize suffering, and protect property in a timely and effective manner in communities overwhelmed by acts of terrorism, natural disaster, or other emergencies.						
<b>DHS Secretary's Priority Supported:</b> Ensuring Resilience from Disasters.						

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$1,115,945	\$465,967	\$223,181	\$224,199	\$230,927	\$241,418
<b>FTE</b>	801	986	1,070	414	409	414

**Performance Plan Measures**

<b>Measure:</b> Percent of response teams reported at operational status.						
<b>Description of Measure:</b> This measure gauges the percent of three types of FEMA's response teams indicating they are ready to respond quickly and effectively to acts of terrorism, natural disasters, and other emergencies. Operational readiness is defined as having the necessary staffing, equipment, and training required for response to a disaster or incident. The measure tracks the readiness of three types of teams: the 28 task forces of Urban Search and Rescue (USR); the five Mobile Emergency Response Support (MERS) detachments; and the six Incident Management Assistance Teams (IMATs).						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	85%	88%	91%	94%	97%	100%
<b>Actual:</b>	85%	88%	93%	94%	N/A	N/A

<b>Program: Grants Program</b>						
<b>Performance Goal:</b> Enhance the Nation's preparedness by increasing the capability of States, territories, and local jurisdictions to prevent, protect, respond, and recover from terrorism and all - hazard incidents.						
<b>DHS Secretary's Priority Supported:</b> Ensuring Resilience from Disasters						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$2,683,809	\$3,354,555	\$3,825,286	\$4,323,319	\$3,778,827	\$3,459,893
<b>FTE</b>	184	216	234	1,179	614	1,180

**Performance Plan Measures**

<b>Measure:</b> Percent of grantees reporting significant progress toward the goals and objectives identified in their State homeland security strategies						
<b>Description of Measure:</b> This measure reflects grantees' progress toward the goals and objectives identified in their State homeland security strategies. These strategies detail jurisdictions' plans to strengthen their preparation for and response to acts of terrorism, as well as natural and man - made threats. Grantees can also provide written comments on the program and highlight "best practices" and major initiatives in the State as a result of grant funding. Progress toward homeland security strategies provides an over - arching assessment of grantees' ability to coordinate emergency management efforts.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	Baseline (25%)	26%	69%	35%	40%
<b>Actual:</b>	None	67%	26%	31%	N/A	N/A

<b>Measure:</b> Percent of significant progress toward implementation of National Preparedness Priorities.						
<b>Description of Measure:</b> Outcome measure which indicates the degree of progress states are making on national priorities set forth in the National Preparedness Goal. States will make progress on different priorities at different rates. An increase indicates improvement and also indicates an improvement in the area of building the culture of preparedness based on progress against a common set of priorities. Implementation is monitored by Preparedness Officers.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	25%	73%	52%	55%
<b>Actual:</b>	None	77%	51.6%	42%	N/A	N/A

<b>Measure:</b> Percent of States and territories accredited by the Emergency Management Accreditation Program						
<b>Description of Measure:</b> The Emergency Management Accreditation Program (EMAP) is a voluntary review process for State and local emergency management programs. The goal of EMAP is to provide a meaningful, voluntary accreditation process for State, territorial, and local programs that have the responsibility of preparing for and responding to disasters. By offering consistent standards and a process through which emergency management programs can demonstrate compliance, EMAP will strengthen communities' capabilities in responding to all types of hazards and encourage an examination of jurisdictions strengths and weaknesses, pursuit of corrective measures, and communication and planning among different sectors of government and the community.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	Baseline	40%	38%	40%
<b>Actual:</b>	None	None	None	37%	N/A	N/A

<b>Measure:</b> Percent reduction in firefighter injuries in jurisdictions receiving Assistance to Firefighter Grants funding compared to the national average.						
<b>Description of Measure:</b> This measure compares the percent reduction in fighter injuries in jurisdictions that receive Assistance to Firefighter Grants (AFG) to the average percent reduction in firefighter injuries nationwide. The measure specifically focuses on line - of - duty firefighter injuries, not any injury that a firefighter may have.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	15.5%	18%	21%	22%	25%
<b>Actual:</b>	None	44.3%	18%	N/A	N/A	N/A

<b>Program: Logistics Management</b>						
<b>Performance Goal:</b> Improve the response to domestic emergencies and special events by ensuring logistics management capabilities exist to provide the full - range of necessary assets.						
<b>DHS Secretary's Priority Supported:</b> Ensuring Resilience from Disasters						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$4,062,146	\$33,831	\$171,265	\$192,977	\$198,768	\$207,798
<b>FTE</b>	1,566	155	168	138	137	138

**Performance Plan Measures**

<b>Measure:</b> Percent accuracy of inventory of disaster response supplies						
<b>Description of Measure:</b> The federal government financial balance sheets are reconciled on an annual basis. This reconciliation requires the physical inventory of all supplies and equipment at least once annually, or at an interval acceptable to generally accepted accounting procedures. The standard for physical inventories of strategic stocks and capital equipment has been established as annual. Historically, property inventories were conducted but inventories of consumable supplies were only conducted to aid in purchases of additional goods. This contributed to occasional overstock, poor record keeping, and the inability to obtain an accurate and complete financial audit. This measurement is the average accuracy rate of twelve monthly cyclic inventories over a year period, rather than one annual inventory. In addition, a 100% physical inventory will be taken annually.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	95%	95%
<b>Actual:</b>	None	None	None	None	N/A	N/A

<b>Measure:</b> Percent of shipments arriving with the requested materials in good condition at the requested location by the accepted delivery date.						
<b>Description of Measure:</b> This measurement evaluates the percent of shipments from either FEMA Distribution Centers or ordered from logistics partners such as Defense Logistics Agency, US Army Corp of Engineers or General Services Administration that arrive at the specified location by the agreed upon delivery date. The measurement is a percentage measurement derived by dividing the number of shipments that are received on time by the total number of shipments						

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	80%	85%
<b>Actual:</b>	None	None	None	None	N/A	N/A

<b>Program: Mitigation</b>						
<b>Performance Goal:</b> Reduce the impact of natural hazards on people and property through the analysis and reduction of risks and the provision of flood insurance.						
<b>DHS Secretary's Priority Supported:</b> Ensuring Resilience from Disasters						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$4,648,200	\$3,701,083	\$4,198,069	\$3,976,654	\$3,987,143	\$3,996,558
<b>FTE</b>	1,322	962	1,044	553	457	570

**Performance Plan Measures**

<b>Measure:</b> Estimated value of potential property losses, disasters, and other costs avoided						
<b>Description of Measure:</b> This measure reports the estimated dollar value of losses to the American public which are avoided or averted through a strategic approach of natural hazard risk management. Losses are avoided to property (buildings and infrastructure) through the provision of: 1) Financial and technical assistance to States, territories, tribes, and communities to implement pre - identified, cost - effective mitigation measures (via Hazard Mitigation Assistance grants); 2) Sound floodplain management; and 3) State - of - the - art building science technologies, guidance and expertise for natural and man - made hazards (Disaster Resistant Building Sciences), thus protecting American citizens from disasters through assistance, education, and technology. A Multi - Hazard Mitigation Council reported that mitigation saves society an average of four dollars for every dollar spent.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	\$2.27B	\$2.40B	\$2.10B	\$2.2B	\$2.3B	\$2.3B
<b>Actual:</b>	2.30B	2.61B	2.53B	\$3.12B	N/A	N/A

<b>Measure:</b> Percent of the national population whose safety is improved through the availability of flood risk data in Geospatial Information System (GIS) format.						
<b>Description of Measure:</b> This measure reports the cumulative percent of the national population that has updated digital flood risk data available online for their community. This digital data replaces old - fashioned paper flood maps. There are some communities, representing eight percent of the population, with little to no flood risk that will not be mapped.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	50%	60%	70%	80%	92%	93%
<b>Actual:</b>	47.7%	60%	71%	80%	N/A	N/A

<b>Program: National Continuity Programs</b>						
<b>Performance Goal:</b> Ensure all Federal Departments and Agencies have fully operational Continuity of Operations and Continuity of Government capabilities.						
<b>DHS Secretary's Priority Supported:</b> Ensuring Resilience from Disasters						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$129,342	\$157,770	\$165,770	\$190,099	\$195,804	\$204,699
<b>FTE</b>	227	309	334	113	109	113

**Performance Plan Measures**

<b>Measure:</b> Percent of Federal departments and agencies with fully operational Continuity of Operations (COOP) capabilities						
<b>Description of Measure:</b> The National Continuity Program works with Federal departments and agencies to develop and exercise plans that ensure the continuation of federal operations and the continuity and survival of an enduring constitutional government. COOP capable is being able to perform essential functions from an alternate location. Agencies perform self - assessments of COOP plans using the COOP						

self - assessment tool. This ensures the agencies are aware of their COOP capability. The program collects the results of exercises and self - assessments to measure the percentage of departments and agencies that have in place the necessary plans and capabilities.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	95%	100%	100%	100%	75%	80%
<b>Actual:</b>	95%	100%	100%	89%	N/A	N/A

**Measure:** Percent of United States with resilient emergency alert coverage

**Description of Measure:** FEMA is transforming the Emergency Alert System from audio-only notification to a system that can reliably send alerts by voice, text, or video to all Americans, including those with disabilities or who cannot understand English. EO 13407 states "It is the policy of the United States to have an effective, reliable, integrated, flexible, and comprehensive system to alert and warn the American people in situations of war, terrorist attack, natural disaster, or other hazards to public safety and well - being (public alert and warning system), taking appropriate account of the functions, capabilities, and needs of the private sector and of all levels of government in our Federal system, and to ensure that under all conditions the President can communicate with the American people." This program will increase the percentage of U.S. residents that will be able to receive an emergency alert message from a broadcast station designed to withstand an emergency for greater than 30 days.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	66%	69%
<b>Actual:</b>	None	None	None	None	N/A	N/A

**Program: National Preparedness**

**Performance Goal:** Improve the Nations ability to prepare for, respond to, and recover from acts of terrorism, natural disasters, or other emergencies through exercise facilitation, implementation of the National Incident Management System, and the provision of emergency management training.

**DHS Secretary's Priority Supported:** Ensuring Resilience from Disasters

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$210,551	\$393,238	\$487,152	\$389,568	\$401,259	\$282,143
<b>FTE</b>	340	517	561	313	303	312

**Performance Plan Measures**

**Measure:** Percent increase in knowledge, skills, and abilities of State and local homeland security preparedness professionals receiving training

**Description of Measure:** This measure evaluates the gain in knowledge, skills, and abilities of students through pre and post course assessments of State and local homeland security professionals after the completion of training, which demonstrates strengthened first responder preparedness and mitigation with respect to acts of terrorism, natural disasters, and other emergencies. Measuring these improvements indicates the impact of training services on the Nation's preparedness level.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	38%	27%	27%	28%	28%	29%
<b>Actual:</b>	27%	25%	27%	28%	N/A	N/A

**Measure:** Percent of Federal, State, local and tribal governments compliant with the National Incident Management System (NIMS)

**Description of Measure:** This measure tracks the percent of critical partners who are compliant with the National Incident Management System (NIMS). Critical partners include Federal agencies, State, local and tribal governments. Federal Agencies are required to identify a point of contact within their agency to act as a liaison with NIMS Integration Center, create a NIMS Implementation Plan, incorporate NIMS into their respective Emergency operations Plans, and train all appropriate personnel in the NIMS standard training curriculum. States are required to submit self - certification of compliance based on 23 compliance

requirements in the NIMCAST system. FEMA's Headquarters office monitors and verifies NIMS compliance for the 50 States and U.S. Territories.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	100%	100%	100%	100%	100%	N/A
<b>Actual:</b>	100%	100%	95%	100%	N/A	N/A

<b>Measure:</b> Percent of Radiological Emergency Preparedness Program communities with a nuclear power plant that are fully capable of responding to an accident originating at the site.						
<b>Description of Measure:</b> This measure reports the percent of U.S. communities surrounding a nuclear power plant that are prepared and capable of responding to and recovering from an accident or terrorist attack. This assessment is based on first responder performance in exercises conducted at the facilities.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	100%	100%	100%	100%	100%	N/A
<b>Actual:</b>	100%	100%	100%	100%	N/A	N/A

<b>Measure:</b> Percent of respondents reporting they are better prepared to deal with disasters and emergencies as a result of training						
<b>Description of Measure:</b> This measure reports the percent of students attending training at the Emergency Management Institute (EMI) and in FEMA's Employee Development program who responded to a survey indicating that they are better prepared to deal with disasters and emergencies as a result of the training they received. Training is conducted at the EMI dedicated training facility in Emmitsburg, MD, and also at the Noble Training Center in Anniston, AL, as well as online. This training provides Federal, State, local and tribal officials having key emergency responsibilities with the knowledge and skills needed to strengthen nationwide preparedness and respond to, recover from, and mitigate against acts of terrorism, natural disasters, and other emergencies.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	91%	90%	92%	93%	94%
<b>Actual:</b>	None	89%	92.9	92%	N/A	N/A

<b>Program: U.S. Fire Administration</b>						
<b>Performance Goal:</b> Reduce the effect of fire and all hazard emergencies by supporting and enhancing the delivery of state and local fire and emergency services and promoting public preparedness.						
<b>DHS Secretary's Priority Supported:</b> Ensuring Resilience from Disasters						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$699,109	\$41,349	\$43,300	\$44,979	\$45,588	\$47,655
<b>FTE</b>	148	114	43	127	126	127

### Performance Plan Measures

<b>Measure:</b> Percent of supervisors of students trained who believe their staff are better prepared as a result of National Fire Academy training						
<b>Description of Measure:</b> The measure assesses the increase in the level of students trained as reported by individual first - line supervisors. These supervisors observe and report through an on - line survey how training skills are being used on - the - job and whether or not their subordinate is better prepared to respond to disasters and emergencies as a result of the National Fire Academy training they received.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	80%	81%
<b>Actual:</b>	None	None	None	None	N/A	N/A

<b>Measure:</b> The per capita loss of life due to fire in the U.S.						
<b>Description of Measure:</b> This measure analyzes the reduction in the rate of loss of life from fire - related events by one percent per year. It examines the fatalities in the U.S. per million population using modified targets based on the review of historical data. The National Fire Protection Association (NFPA) reports data in September for the previous year. NFPA Survey data are analyzed to produce the report on fire related civilian fatalities.						

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	13.5	13.1	13.0	12.9	12.7	12.6
<b>Actual:</b>	12.4	13.1	11.4	10.9	N/A	N/A

E. High Priority Performance Goals

**High Priority Performance Goal (Secretary’s Priority Area: Area 5 – Ensuring Resilience to Disasters) –** Strengthen disaster preparedness and response by improving FEMA’s operational capabilities and strengthening State, local and private citizen preparedness.

FEMA strives to both build its capacity to be an effective leader of the federal response to disasters, as well as enabling the capabilities of its state and local partners. Key to planning for and responding to a disaster is having a comprehensive strategy for logistics management, improved disaster sheltering strategies, and strengthening of operational capabilities for State and local governments based upon an event driven methodology.

With regard to its partnerships with state and local entities, FEMA strives to better define what constitutes an ideal level of capability for these partners. In order to ensure the Federal, State, local and tribal first responder community is able to carry out their roles to the highest degree, it is vital that FEMA NPD (National Preparedness Directorate) be able to provide the most relevant and effective training possible. Training evaluation helps integrate and streamline training services provided to the first responder community by measuring preparedness through improved performance.

High Priority Performance Goal Measures

Component	FYHSP Program Name	Program Performance Goal	Performance Measure	DHS Objective Supported	Secretary’s Priority	Secretary’s Priority Goal
FEMA	Recovery	Help individuals and communities affected by federally declared disasters return to normal function quickly and efficiently, while planning for catastrophic disaster recovery operations.	<b>Percent of disaster households up to a capacity of 500,000 able to be temporarily housed within 60 days</b>	4.2	4 - Resilience from Disasters	4.D. - Rapidly Recover
FEMA	Response	Improve the response to domestic emergencies and special events by ensuring logistics management capabilities exist to provide the full-range of necessary assets.	<b>Percent of shipments arriving with the requested materials in good condition at the requested location by the requested delivery date</b>	4.2	4 - Resilience from Disasters	4.C. - Effective Emergency Response
FEMA	Preparedness	Improve the Nation’s ability to prepare for, respond to, and recover from acts of terrorism, natural disasters, or other emergencies through exercise facilitation, implementation of the National Incident Management System, and the provision of emergency	<b>Percent of respondents reporting they are better prepared to deal with disasters and emergencies as a result of training</b>	4.1	4 - Resilience from Disasters	4.B. - Enhance Preparedness

		management training.

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **Salaries and Expenses:**

## **I. Appropriation Overview**

### **A – Mission Statement for Salaries and Expenses:**

The U.S. Citizenship and Immigration Services (USCIS) will secure America’s promise as a nation of immigrants by providing accurate and useful information to our customers, granting immigration and citizenship benefits, promoting an awareness and understanding of citizenship, and ensuring the integrity of the immigration system.

USCIS has established six goals: (1) ensure the security and integrity of the immigration system, (2) provide efficient customer-oriented immigration benefits and information services, (3) increase understanding of citizenship and its privileges and responsibilities, (4) ensure flexible and sound immigration policies and programs that meet the needs and obligations of the nation, including our international treaties on humanitarian protection and trade, (5) strengthen the infrastructure necessary to achieve USCIS’ mission, and (6) operate as a high-performance organization and position USCIS as an employer of choice.

USCIS is a component of the Department of Homeland Security (DHS) that facilitates legal immigration for people seeking to enter, reside, or work in the United States. USCIS possesses the authority to grant or deny immigration benefits – approving over six million immigration benefits each year. These immigration benefits range from work authorization documents to asylum and refugee applications, to petitions for immediate relatives to immigrate to the United States.

The Salaries and Expenses account encompasses all of the discretionary funding of USICS. The most significant program funded through this account has been E-Verify. E-Verify is an automated system that allows U.S. employers to electronically verify names, dates of birth (DOB), and social security numbers (SSN), along with immigration information for non-citizens, against Federal databases to ensure the employment eligibility of both citizen and non-citizen new hires.

Starting in FY 2010, funding was enacted covering a portion of the cost of refugee, asylum, and military naturalization operations, an allocated share of the International Operations Division, the cost of processing Adjustment of Status (I-485) applications for refugees, which are exempt from fees by law, and a share of indirect overhead expenses tied to these activities. The purpose of these appropriations was to eliminate certain fee surcharges on applications for activities unrelated to the cost of providing services on those applications. These activities were previously funded within the Immigration Examinations Fee Account (IEFA).

**B – Budget Activities:**

The salaries and expenses appropriation funds activities related to maintaining operational support of E-Verify, including expanded activities approved in FY 2010. Funding is also requested to continue Immigrant Integration initiatives started in FY 2010 to help immigrants adjust to life in the United States. In addition, USCIS is requesting appropriated resources to support the Refugee and Asylum programs. New funding is requested to eliminate “surcharges” on immigration application fees for SAVE and the Office of Citizenship, both were previously funded in FY 2010 within the IEFA account.

**C – Budget Request Summary:**

USCIS requests 1,289 positions, 1,289 FTE and \$385,800,000 for the FY 2011 Salaries and Expenses Request. The total change from the FY 2010 President’s Budget is a net increase of 986 FTE and an increase of \$161,800,000. This amount includes increases of \$34,000 to SAVE, \$7,000,000 to the Office of Citizenship, \$23,400,000 to Data Center Development and a decrease of \$10,000,000 to the REAL ID program.

Total Change 2010 to 2011	182	182	34,000

USCIS is requesting funding for SAVE through the Salaries and Expenses budget for FY 2011.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The SAVE program helps state, local, or federal agencies determine a non-citizen's eligibility for public benefits by checking their immigration status. As of January 2010, the SAVE program has a total 347 registered agencies. This includes 185 state agencies, 36 DMVs, 98 local agencies, and 28 federal agencies. Through December 31, 2009, there were 2.6 million SAVE queries run through the system. Large agency customers include the Social Security Administration, the U.S. Department of Housing and Urban Development, the U.S. Department of Education, and the California Department of Motor Vehicles.

**FY 2009 Accomplishments:**

- AAMVAnet Pilot for DMV access to SAVE for REAL-ID.
- Retired multiple access methods and migrated customers to the efficient Web-3 access method Achieved 25% growth in customer base, expanding to 300 agencies.
- Created and implemented a Memorandum of Agreement (MOA) to strengthen and standardize program requirements for enhancing overall program compliance.

FY 2010 Planned Activities:

- Develop and implement a Customer Relationship Management Plan.
- Develop an implementation plan to address surges in business activities due to new and pending legislation.
- Develop system requirements for registration re-engineering and profile-based system (PBS) / SAVE modernization.
- Establish Independent Validation and Verification (IV&V) for oversight of AAMVA Verification of Lawful Status (VLS) and REAL ID projects.

FY 2011 Planned Activities:

- Implement full-scale registration re-engineering and profile-based system (PBS) / SAVE modernization.
- Conduct assessment of source data to enhance program efficiency.
- Conduct a large-scale independent SAVE Program evaluation.
- Conduct a Six Sigma root cause analysis of SAVE referrals to minimize additional verification.

USCIS requests \$103,400,000, 338 positions, and 338 FTE for this activity.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

E-Verify is a program that provides participating employers an automated system to run employment authorization checks for newly hired employees against DHS, Social Security Administration (SSA) and Department of State databases.

The E-Verify program was established by the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA) and is based on the Employment Eligibility Verification Form (Form I-9). The Form I-9 was created for employers to use when verifying the identity and employment eligibility of employees in accordance with the Immigration Reform and Control Act of 1986 (IRCA), which mandated that all U.S. employers verify that employees hired after November 6, 1986 are both work-eligible and in possession of valid work authorization documents. With a few exceptions, the Form I-9 must be completed for all newly-hired employees regardless of citizenship or national origin.

E-Verify is the best available means for confirming an employee's authorization to work in the United States. Employers enter information from the Form I-9 into the internet-based E-Verify program and electronically check that information against federal government databases. This is accomplished through use of the Verification Information System (VIS). VIS consists of an integrated database that both pulls verification data from other related agency systems as well as processes verification requests. USCIS has

added database system capacity to match anticipated future query growth and developed a plan to migrate VIS to a government controlled data center.

E-Verify has a photo tool feature to combat false positives related to identity theft through immigration document fraud. The tool allows an employer to match the employee-provided document photo (for the Form I-9) to the photo on file with that document's issuing agency. The photo tool helps combat against the use of counterfeit or photo-substituted documents to verify employment eligibility through E-Verify. The photo tool currently includes Permanent Resident Card ("Green Card") and Employment Authorization Document (EAD) photographs, both DHS-issued identity documents.

Over the last few years, voluntary program use has increased significantly. E-Verify maintains an outreach campaign to increase the number of employers using the program and also developed a customer contact center to provide additional channels of communication for E-Verify users. As of December 15, over 175,000 employers at over 650,000 worksites nationwide were enrolled in E-Verify and an estimated 200,000 employers will be enrolled by the end of FY 2010, representing over six million business locations and running an estimated 12 million E-Verify queries.

To detect and deter improper system use E-Verify has a Monitoring and Compliance (M&C) unit. M&C staff identify behaviors that indicate potential system misuse, such as document fraud (multiple social security numbers or A-Numbers in the system), and discrimination (prescreening, verifying existing workforce). M&C reviews this data to identify pertinent incidences and patterns. In addition, M&C has developed Standard Operating Procedures (SOPs) to conduct compliance through a series of escalating actions ("touches") to include letters, calls, referrals to enforcement agencies, and other actions. E-Verify has established relationships with our enforcement partners—U.S. Immigration and Customs Enforcement (ICE) and the Office of Special Counsel for Immigration Related Unfair Employment Practices (OSC) in the Department of Justice—and refers cases of immigration related non-compliance that fall under their jurisdiction. USCIS signed a Memorandum of Understanding (MOU) with ICE in December 2008 formalizing an information exchange for enforcement and partnership assistance involving egregious cases. Furthermore, USCIS is currently working with OSC to establish a similar MOU to govern information sharing and case referral. The E-Verify program has responded to over 140 external data requests from ICE and OSC as of August 2009.

To enhance monitoring analysis and compliance activity capabilities, E-Verify has implemented a Compliance Tracking and Management System (CTMS) tool, and is establishing business requirements for a Data Analysis System (DAS) capable of automatically detecting discrimination and fraud patterns using data discovery techniques. The CTMS has enabled M&C staff to assign cases to staff, group cases by incident, employer and other identifiers, and safely store Personally Identifiable Information (PII) in compliance with the Privacy Act. Once fully implemented, the DAS tool will employ algorithms and statistical techniques to detect incidents of potential misuse, abuse, fraud, discrimination, and other types of non-compliant behavior. DAS

will generate initial compliance actions (emails and letters to employers) and record the data in the CTMS to develop cases and maintain auditable data on instances of system misuse.

The E-Verify M&C unit is also leveraging other compliance assistance techniques such as a call center, outreach, and education. These techniques will give employers the tools and information they need to self-monitor their E-Verify usage. The E-Verify program receives an average of 10,000 calls per month via the toll-free call center. In addition, E-Verify undertakes advertising and outreach events geared toward educating prospective employers about correct E-Verify usage. The program is also partnering with the DHS Office of Civil Rights and Civil Liberties to develop a bilingual video for employers and employees on proper E-Verify use.

To accommodate E-Verify employer growth, M&C has a staffing plan based on the number of non-compliant employers that they project to touch. The staffing formula is also adjustable and determines staffing levels based on the touch rate proportion and types of touches (emails, desk audits, etc.) proposed. As of December, there were 13 E-Verify M&C personnel in the metropolitan Washington, DC area and 28 in Buffalo, NY. The Buffalo regional office will accommodate 32 M&C personnel once fully staffed in FY 2010.

#### FY 2009 Accomplishments:

- The E-Verify program launched the Compliance Tracking and Management System (CTMS) in June 2009. CTMS will be the key tool in incident communication, case tracking, workflow or operating procedure management, and M&C branch activity results tracking.
- A contact center operation: offers multiple contact methods for program participants; provides telephone and IT infrastructure; provides Interactive Voice Response System (IVR) services, transaction processing, management information, and decision support systems; and, supplies the facilities necessary to operate an inbound/outbound contact center.
- E-Verify expanded marketing to increase public and employer awareness of the program. Traditional advertising methods, including newspaper/magazine, radio, outdoor (billboard), and direct mail advertisements, as well as online banner advertisements and internet keyword searches were used where appropriate.
- DHS and the Department of State (DOS) signed an MOU allowing passport data to be included in the E-Verify system. This has decreased the number of TNCs issued to naturalized and derivative citizens who are not reflected as such in SSA databases, but are in DOS databases.
- E-Verify continued to work with the American Association of Motor Vehicle Administrators (AAMVA), an IT resource for nearly all DMVs, to augment its IT system with driver's license data from all 50 state DMVs. System design and implementation are in progress and will be in place in FY 2010. The E-Verify program is determining which state DMVs are interested in serving as "pilot" states for E-Verify driver's license verification.

- E-Verify began planning for the migration of VIS to a new environment allowing for a scalable and comprehensive infrastructure with full data recovery and continuity of operations plan (COOP) capabilities as mandated by DHS and USCIS.
- Starting September 8, 2009, employers with federal contracts or subcontracts that contain the Federal Acquisition Regulation (FAR) E-Verify clause were required to use E-Verify to determine the employment eligibility of employees performing direct, substantial work under federal contracts and all new hires, including employees not working on a federal contract. Federal contractors or subcontractors who have a contract with the (FAR) E-Verify clause also have the option to verify their entire workforce, including all existing employees.
- Ongoing analysis by independent evaluator Westat based on first quarter FY 2009 data (October through December 2008), found 96.9 percent of employees are automatically confirmed as work authorized, requiring no employee/employer action. This represents an improvement over the 96.1 percent statistic previously reported for the April through June 2008 time period.

#### FY 2010 Planned Activities:

- The E-Verify program will focus on enhancing the program's monitoring and compliance capability, and continuing to improve business practices.
- E-Verify will aim to automate the monitoring and compliance process by the end of FY 2010 through DAS, thereby improving the ability to detect non-compliance patterns and trends. DAS employs algorithms and statistical techniques to detect incidents of potential misuse, abuse, fraud, discrimination, and other types of non-compliant behavior. DAS implementation will interface with the Case Tracking and Management System (CTMS) and serve as a force multiplier.
- E-Verify will undergo CTMS 508 Remediation to enhance CTMS compliance with Section 508.
- E-Verify acquire U.S. passport photo access for E-Verify photo tool usage. The inclusion of passport photos will help prevent passport document fraud aimed at obtaining E-Verify employment authorization. The capability to verify U.S. passport photos will be used as part of the employment authorization (Form I-9 process).
- E-Verify will integrate MOUs into a new knowledge management system to modernize the employer registration process.
- E-Verify will work to add additional state DMVs in driver's license data with DHS, pending a formal MOU with a state regarding the sharing of data. This would prevent one possible avenue of identity theft currently used to deceive the system. Incorporating driver's license photos into the photo tool would represent a significant system enhancement, since new hires most often present this document to prove their identities.

### FY 2011 Planned Activities:

- E-Verify will continue to improve the data matching success rate by using more sophisticated algorithms when matching data from disparate sources. This will ultimately reduce the rate of inaccurate results within the initial verification process.
- E-Verify will further enhance VIS by developing and implementing an E-Verify portal to provide a single user interface for the program's products and services. The portal will provide a customer centric "look and feel," search capabilities, role-base personalization, and single sign-on capabilities. The portal will ensure 508 Compliance in accordance with the Americans with Disabilities Act.
- E-Verify will work to deploy a Self Check function to allow employees to verify their own employment eligibility outside of the hiring process, and then proactively resolve any issues.
- E-Verify will enhance E-Verify monitoring and compliance activities through analytical capabilities that will support more robust fraud detection and improved analytic processes.
- E-Verify will implement a Customer Master File initiative to enable E-Verify Customer Support functions to gain a complete lifecycle view of all customer interactions.
- E-Verify will enhance the security of E-Verify by leveraging an identity assurance function that will authenticate users that run queries, while developing a prototype for employees being run through the system.
- E-Verify will continue developing system enhancements in response to customer feedback, surveys, mission requirements and capacity needs. E-Verify will also further upgrade security tools, processes, and encryption, including scheduling security audits and vulnerability assessments.
- E-Verify will continue marketing outreach to increase public and employer awareness of the E-Verify program, as well as provide employees with information regarding employee rights. Marketing efforts will include reaching out to prospective and current users through a variety of customized outreach venues and marketing techniques.
- E-Verify will plan for development of a tutorial system that permits participants to select more relevant or specific training content based on the company profile or user profile, thereby ending the tutorial structure that is based on access method and user role structures.
- E-Verify will be developing a new MOU for web service access, re-write the current MOUs in simplistic and concise language, and update the MOUs to reflect current security and privacy protocols.
- E-Verify will work to revise and enhance VIS capabilities in a two phases. The Registration Reengineering will allow a more user friendly interface and the automation of the current manual registration process within SAVE.
- E-Verify will implement a two phase project within SAVE, the Profile Based System Phase I and II that will allow SAVE to better serve both the agency and the agencies applicant for benefits. SAVE will determine, on a case-by-case basis,

the agencies' inputs and SAVE's results to make a determination whether an applicant is eligible for a benefit.

- E-Verify will implement VER Work Process System (SVS Reengineering), a case management system that allows Status Verifiers (MPAs) to review, research, and resolve manual and electronic SAVE and E-Verify cases that cannot be resolved in automated Primary Verification.
- E-Verify will explore several potential developments aimed at reducing false negatives. One example: eventual inclusion of the updated ICE database that houses student visa data—SEVIS II—which will reduce the number of tentative non-confirmations (TNCs) by verifying that non-immigrant students and exchange visitors are authorized to work.
- E-Verify will implement the final phase of the VIS migration to Stennis, MS and the VIS test and development environment migration to DHS/USCIS TECC (Transformation Engineering Consolidation Center) data center in Manassas, VA.
- E-Verify will continue marketing outreach to increase public and employer awareness of the E-Verify program, as well as provide employees with information regarding employee rights. Marketing efforts will include placing local advertisements for various outreach and training events, as well as national advertisements.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The REAL ID Act requires that a state must verify the information on source documents before it can issue a REAL ID-compliant driver’s license or identification card to applicants.

REAL ID will facilitate the development and deployment of information sharing and verification capabilities that will enable states to verify data against other state and federal databases as required by the REAL ID Act. USCIS is working with Mississippi, the Lead State, and other states to upgrade existing data communications networks to meet the requirements of the REAL ID Act. In addition, USCIS is working with federal agency database owners to enhance the capabilities of these databases to support the verification requirements of the REAL ID Final Rule. The scope of effort for this program is limited to enhancements to existing state and federal databases and communications networks and does not involve the development of any new databases or facilities. In addition, none of these funds will be used “to create any new system of records from the data accessible by such information technology system, or to create any means of access by Federal agencies to such information technology system other than to fulfill responsibilities pursuant to the REAL ID Act of 2005.”

The program includes enhancements to the following data verification and communication systems:

- The Commercial Driver Licensing Information System (CDLIS) – the system that currently supports the issuance of commercial driver’s license in 51 U.S. jurisdictions. The purpose of CDLIS is to help ensure that only one driver license card is issued to one driver. CDLIS is operated by the American Association of Motor Vehicle Administrators (AAMVA) under the mandate of the Federal Motor Carrier Safety Administration. *[State-to-State Verification Project]*
- The Systematic Alien Verification for Entitlement (SAVE) system – USCIS will work with states to improve the capabilities of the USCIS system that verifies lawful immigration status. *[REAL ID Program Support and SAVE-VLS Modernization Projects]*
- The Social Security On-line Verification System (SSOLV) – USCIS will work with states and the Social Security Administration to identify and fund enhancements to the system that currently verifies social security numbers for all 50 states and District of Columbia. *[SSOLV Upgrade Project]*
- The Electronic Verification of Vital Events (EVVE) System operated by the Association of Public Health Statistics and Information Systems (NAPHSIS) – funding will be provided to NAPHSIS and other vendors as needed to support the requirements of the REAL ID Final Act. *[Birth Verification Project]*
- USCIS, other DHS, and Department of State (DOS) systems needed to support verification of U.S. passports, U.S. visas, Consular Reports of Birth Abroad, and other DOS documents identified in the REAL ID Final Rule. *[Passport/Visa Verification Project]*
- AAMVAnet – the communications network owned and operated by AAMVA. AAMVAnet currently supports most of the verification requirements of the REAL ID Final Rule and provides a common, cost-effective communications and data verification interface to all state and federal agencies. *[Included in the scope of work for all program projects.]*

In FY 2008 DHS provided \$17 million in grant funding to the State of Mississippi to lead the effort to define, develop and deploy the capabilities needed to support the identity information verification requirements of the REAL ID Act. In January 2009, the five states of Mississippi, Kentucky, Indiana, Florida, and Nevada established a non-profit corporation (DIVS – DL/ID Information Verification Systems, Inc.) to provide program oversight, management and governance of the requirements definition process, development and deployment of the electronic verification capabilities as required by both Federal and state regulations. DIVS has participated in the alternative of analysis process, completed the requirements generations process and submitted those documents to DHS for review and approval. DHS is working with DOT, Mississippi, DIVS, other states, and other Federal agencies to review and approve the recommended information verification program requirements prior to moving forward to the system design and development phase. Development and deployment of these additional capabilities will likely extend through FY 2014 though DHS anticipates obligating all funds needed for completion by FY 2012.

A total of \$60 million has been appropriated for this purpose between FY 2009 and FY 2010. During FY 2010, USCIS with DHS support will finalize a detailed expenditure plan for these resources and will begin to obligate funds in support of this center.

FY 2010 Planned Activities:

- Select USCIS REAL ID Program Management Team (2 FTEs and contractor support).
- Approve the state-to-state systems requirement documents.
- Procurement of the state-to-state project.
- Completion of the design specifications for the state-to-state project.
- Completion of requirements for improvements to SAVE Program for verification of immigration status.
- Completion of requirements for enhancements to verification of SSNs and DOS documents.

FY 2011 Planned Activities:

- Completion of development and testing for the state-to-state verification project.
- Procurement for pilot testing and state deployment of state-to-state verification capabilities.
- Design and development of capabilities for immigration status, passport/visa, SSN, and birth verification enhancement projects.
