<b>Total Request</b>	<b>2</b>	<b>1</b>	<b>7,000</b>	<b>28</b>	<b>15</b>	<b>49,461</b>	<b>28</b>	<b>28</b>	<b>71,011</b>

**Description of Item**

This request funds the third year of the ICE-wide co-location strategy to consolidate ICE personnel and operations scattered across multiple buildings in 55 metropolitan areas, resulting in improved operational efficiencies and long-term cost savings. The Secretary has made ICE co-location a top Departmental priority, noting that failure to consolidate ICE’s legacy INS and Customs facilities since the merger impedes its effectiveness and efficiency as well as efforts to build a cohesive unified agency.

The FY 2006 House Congressional Appropriations Committee Report 109-79 cited “ICE’s need to co-locate all of ICE’s legacy personnel...Physical co-location is needed to unify personnel and manage a cohesive workforce...within a significantly shorter period than five to seven years.” In 2008, ICE identified 237 locations in 55 U.S. metropolitan areas suitable for co-location. Of these cities, ICE identified 27 possible prospectus-level (two in Northern Virginia) projects and 29 non-prospectus-level projects. Eight of the non-prospectus-level projects are scheduled to begin in FY 2010.

Given the imminent expiration of *72 percent of ICE leases by 2014*, representing 475 leases in 3.9 million square feet of space, this initiative represents a unique opportunity, since renewing existing leases would come at a steep cost, while failing to address integration issues or the many shortcomings with existing office space. Co-location

continues to offer the best strategy for containing future growth in lease costs, with additional savings through consolidated administrative and security functions.

### *Approach*

To develop the plan, ICE engaged a real estate consultant and worked closely with GSA.

As part of the development of the ICE co-location plan, an analysis of five acquisition alternatives was developed for each city and incorporated into ICE's co-location plan:

- GSA inventory: This preferred alternative would house ICE in existing GSA-owned buildings.
- Market inventory: The next most preferred alternative would locate ICE in existing space in each city.
- Federal construction: In the relatively small number of cities where the first two options are not feasible, new buildings would be developed for ICE but the buildings would be Federally owned and operated.
- Inventory consolidation: This alternative would have ICE consolidate in space it already leases.
- Special: In rare cases, special circumstances require a customized solution which is not easily captured in any of the above alternatives.

The analysis included a financial summary of the alternatives showing the cash flow for estimated tenant costs, construction costs, and full-service rent based on the size of the consolidation and the consolidation year. The consolidation year was selected by examining operational needs, expiring leases, current projects, and program needs to determine the most efficient year to co-locate in a city.

A preferred acquisition solution for each city was selected from among the alternatives based on cost estimates for each and local real estate conditions.

### *Non-Personnel Costs (\$19.938 million)*

- ICE will implement six additional non-prospectus projects in FY 2011 with an anticipated completion timeline of one to three years.
- The funds will be used to acquire and occupy office space in secure facilities that meet ICE mission and law enforcement requirements.
- Funds will also be used for interior construction ("build-out" costs), voice and data cabling, furniture, fixtures, equipment, and outfitting expenses for special spaces such as holding cells and secured spaces.
- Given the long-term nature of the effort, and higher net cost that will result from any lease option ICE pursues, the plan is based on a consistent need for recurring funds each year.

### **Justification**

The budget includes a \$19.938 million request to further ICE’s plan to co-location 351 leases in 55 U.S. metropolitan areas to support operational effectiveness.

- This funding would allow ICE to fund 6 additional non-prospectus-level projects in FY 2011. ICE would be able to consolidate 35 leases in the following locations:

1	Minneapolis	MN
2	Las Vegas	NV
3	St Louis	MI
4	Fresno	CA
5	Austin	TX
6	Guam	

- The request builds upon the FY 2010 funding that was provided to consolidate leases in the following cities: El Centro, CA; Portland, OR; Spokane, WA; Columbus, OH; Reno, NV; Jacksonville, FL; Salt Lake City, UT; and Raleigh, NC.

*ICE Leases*

ICE currently has 655 (6.4 million square feet) leases; however, 475 leases (72%) will expire in the next four years (by 2014) impacting 3.9 million square feet. The co-location plan will reduce 351 leases of these leases (248 locations) to 55.

For example:

- In Houston, TX, ICE is currently housed in eight different locations with the Office of Investigations in six of those eight locations.
- In Phoenix, AZ, ICE is currently housed in six different locations with the Office of Investigations and Detention and Removal in four of those six locations.
- In Burlington, VT, ICE is currently housed in seven different locations with the Office of Investigations in five of those seven locations.
- In New York, NY, ICE is currently housed in seven different locations with the Office of Investigations in four of those seven locations.
- In El Paso, TX, ICE is currently housed in seven different locations with the Office of Investigations in four of those seven locations.
- In San Francisco, CA, ICE is currently housed in nine different locations with the Office of Investigations in three of those nine locations.
- In San Antonio, TX, ICE is currently housed in five different locations with the Office of Investigations in three of those five locations.

This consistent inefficiency across ICE’s real property portfolio directly affects operations.

### *ICE Rent*

ICE will realize a significant annual increase in its rent over the next four years. The average rental rate for the majority of leases set to expire is approximately \$25.40 per square foot. The median market rental rate is \$36.75 per square foot, resulting in a 31% increase per square foot when the existing leases are renewed. If ICE remains in its current existing space and renews its existing leases, ICE will incur an estimated \$60 million increase in lease costs over the next four years. These costs would be offset by the strategic implementation of co-location. Co-location builds efficiencies in space by using a shared space work environment. The ICE rent will continue to grow as the agency develops due to an increase in work force, however by properly designing efficient and sustainable buildings the cost of this rent would be reduced from the alternative of having to continue to duplicate costly special spaces by adding additional facilities within each city to accommodate growth.

### *ICE Growth and Current Initiatives*

The ICE mission is to protect national security by enforcing our national customs and immigration laws and is the largest investigative agency in DHS. In an effort to keep up with the growing need for security on the nation's borders, ICE has significantly expanded its workforce by over the past four years. The growth in personnel associated with increased enforcement initiatives has strained existing ICE infrastructure, but will be mitigated by the right sizing inherent to co-location.

The cost to build out specialty space, such as holding cells and processing areas, costs on average \$300 per square foot. It is important that this type of space not be duplicated in metro areas. Co-location is based on shared space among all of the ICE programs for these types of spaces.

Co-location addresses operational inefficiencies, barriers to building one ICE culture, and other deficiencies in the many older buildings where Federal employees are presently located. It also supports efforts to raise the morale of ICE's employees. In addition to funding the build-out of ICE space, the plan would also update IT infrastructure.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

This initiative supports the DHS Goal #5: Strengthen and unify DHS Operations and Management as it will allow ICE to consolidate personnel and manage a cohesive workforce. The program increase will help to advance ICE co-location efforts and to realize potential savings associated with FPS security, administrative support costs, rent through shared building support spaces and shared utility costs, costs for above-standard build-out, GSA overhead, and operational efficiencies.

**Department of Homeland Security  
U.S. Immigration and Customs Enforcement  
Salaries and Expenses  
Headquarters Managed IT Investment  
Justification of Program Changes**

**Program Increase 1:** Data Center Migration  
PPA: Headquarters Managed IT Investment  
Program Increase: Positions 0.0, FTE 0.0, Dollars \$10,400

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request

Current Services Level							-	-	-
Program Increase							-	-	10,400
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>10,400</b>

**Description of Item**

FY 2011 data center development funding, managed through the DHS Working Capital Fund (WCF), will be used for the continuation of system and application migration to the two DHS enterprise data centers for central DHS management in FY 2011. This includes: (1) discovery, migration planning, and scheduling activities specifically related to systems/applications that will transition to the DHS data centers in FY 2010; (2) purchase of new equipment for placement in the DHS data centers as part of migration/transition efforts; (3) installation of equipment racks at the DHS data centers; (4) migration-related build-out of DHS data center infrastructure; (5) transition of disaster recovery/backup/COOP (continuity of operations) capability to DHS data centers; and (6) installation of infrastructure support as part of system migrations at the DHS data centers.

The ICE FY 2011 data center migration (DCM) funding request of \$10.4 million will provide for the following activities:

*Non-Personnel Costs (\$10.4 million):*

- Migrate 17 ICE sites (10 in the Washington, D.C. area, 7 outside) - \$4.4 million
- Migrate ICE mainframe assets - \$3.3 million
- Test equipment and conduct disaster recovery exercises - \$1.2 million
- Conduct project planning, execution, and oversight - \$1.5 million

**Justification**

The data center consolidation efforts will standardize IT resource acquisitions across DHS components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation are enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

Data Center Migration (DCM) supports Maturing and Unifying DHS. The DCM project focuses on transition of data center operations from multiple facilities to the new DHS consolidated data centers. The migration of disparate and complex ICE data center infrastructure is necessary to ensure compliance with the DHS enterprise infrastructure program consolidation effort; provide survivability of the data center, a common operating environment, and integrated logistics support processes.

**Department of Homeland Security  
U.S. Immigration and Customs Enforcement  
Salaries and Expenses  
Domestic Investigations  
Justification of Program Changes**

**Program Increase 1:** Border Enforcement Security Task Forces (BESTs)  
PPA: Domestic Investigations  
Program Increase: Positions 45.0, FTE 23.0, Dollars \$10,000

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							45	23	10,000
<b>Total Request</b>	-	-	-	-	-	-	<b>45</b>	<b>23</b>	<b>10,000</b>

**Description of Item and Justification**

With the requested funding, ICE OI will establish BESTs in three additional locations (Massena, NY; San Francisco, CA; and Honolulu, HI) to prevent smuggling and illegal entry of persons, with a priority on terrorist groups, gang members, and criminal aliens. Vulnerabilities along the Northern Border such as Massena, NY, include many remote regions with limited situational awareness and law enforcement presence, limited low-altitude radar coverage in many areas, high-volumes of legitimate cross-border traffic, and the adaptability of transnational criminal networks to law enforcement operations. The seaport BESTs in San Francisco and Honolulu will focus on vulnerabilities such as, vessels and their cargo which can potentially contain weapons of mass destruction, potential access to sensitive areas by stowaways, potential threats from foreign crewmembers and undocumented aliens; and the potential exploitation of vulnerabilities in seaport security.

Investigative efforts of the BESTs target human smuggling, narcotics and contraband smuggling, weapons smuggling and counter-proliferation, money laundering, bulk cash smuggling, criminal gangs, critical infrastructure protection, identity theft and benefit fraud, commercial fraud and intellectual property rights enforcement, and any other vulnerabilities that pose an immediate or imminent threat to public safety or national security. BEST is a critical cornerstone of the Secure Border Initiative program. It integrates Federal, foreign, State and local law enforcement efforts and partners in the field that are focused on the identification, disruption and dismantling of cross-border criminal organizations. It also fulfills the President's commitment to Security Prosperity Partnership Goal Six.

\$7.602 million of this increase will fund 45 positions (23 FTEs):

- 27 GS-1811-7/13 Special Agents
- 06 GS-1811-14 Supervisory Special Agents/ASAC/DSAC
- 03 GS-1801-13/14 Criminal Research Specialists
- 03 GS-1802-5/7 Investigative Assistants
- 03 GS-0301-13 Mission Support Specialists
- 03 GS-0343-14 Management and Program Analysts

The remaining \$2.398 million in general expenses will fund facility requirements for new BESTs, travel, training, and associated costs.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

BEST activities support the following goals:

Goal 2.1 Effectively Control U.S. Air, Land, and Sea Borders; and Goal 2.3 Disrupt Criminal Organizations

**Department of Homeland Security  
U.S. Immigration and Customs Enforcement  
Salaries and Expenses  
Domestic Investigations  
Justification of Program Changes**

**Program Increase 1:** Intellectual Property Rights Enforcement  
PPA: Domestic Investigations  
Program Increase: Positions 25.0, FTE 13.0, Dollars \$5,000

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							25	13	5,000
<b>Total Request</b>	-	-	-	-	-	-	<b>25</b>	<b>13</b>	<b>5,000</b>

**Description of Item**

This request will fund a total of 25 positions for the IPR Center, The IPR Center is a collaborative effort by U.S. Government agencies to stop intellectual property right violations that threaten our economic stability, restrict the competitiveness of U.S. industry, and endanger public health and safety. The IPR Center brings together key U.S. agencies engaged in combating intellectual property crime.

\$4.268 million of this increase will fund 25 positions:

- 03 GS-1811-14/15 Supervisory Special Agents/Unit Chiefs
- 16 GS-1811-7/13 Special Agents
- 02 GS-1801-13/14 Criminal Research Specialists
- 02 GS-1802-5/7 Investigative Assistants
- 01 GS-0301-13 Mission Support Specialists
- 01 GS-0343-14 Management and Program Analysts

The remaining \$0.732 million in non-personnel resources will fund facilities, travel, and training.

**Justification**

The IPR Center integrates domestic and international law enforcement intelligence with private industry information relating to IPR crime and works closely with foreign law

enforcement in the exchange of tactical intelligence and joint operations. Intelligence is disseminated for appropriate investigative and tactical use.

The IPR Center utilizes a three-pronged approach of interdiction, investigation and outreach/training to combat IP crime. To accomplish this, the Center is organized around three units: Operations, Programs, and Outreach & Training. In addition, a Government of Mexico Attaché embedded at the IPR Center coordinates targeting, interdiction, and enforcement efforts to identify and dismantle cross-border organizations that manufacture and distribute counterfeit items harmful to both U.S and Mexico markets. Particular emphasis will be placed on major criminal organizations and those using the Internet to facilitate IPR crime.

During FY 2009, ICE generated more than 1,944 investigations involving counterfeit, unapproved or harmful merchandise. ICE and CBP conducted more than 14,841 seizures of counterfeit merchandise, with a domestic value of more than \$260.7 million.

Further, the IPR Center coordinates with the World Customs Organization and the U.S. Departments of Commerce, Justice and State, to conduct training and provide support for anti-counterfeiting efforts with foreign customs administrations and law enforcement agencies.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

The IPR Center supports the following goals:

- Goal 2.1 Effectively Control U.S. Air, Land, and Sea Borders;
- Goal 2.2 Safeguard Lawful Trade and Travel; and
- Goal 2.3 Disrupt Criminal Organizations.

In addition, the increases for FY 2011 will allow ICE to address critical infrastructure vulnerabilities through a holistic investigative approach leveraging Title 8 and export enforcement authorities as well as analytical capabilities unique to ICE.

Funding this initiative will increase effectiveness in addressing vulnerabilities that could be exploited by criminals and other persons of suspect violating our national intellectual property rights laws and bringing in goods and materials that would adversely harm the American public and economic infrastructure.

**Department of Homeland Security  
U.S. Immigration and Customs Enforcement  
Salaries and Expenses  
Domestic Investigations  
Justification of Program Changes**

**Program Increase 1:** Office of Investigations Mission Support  
PPA: Domestic Investigations  
Program Increase: Positions 167.0, FTE 84.0, Dollars \$15,000

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							167	84	15,000
<b>Total Request</b>	-	-	-	-	-	-	<b>167</b>	<b>84</b>	<b>15,000</b>

**Description of Item and Justification**

The Office of Investigations analyzed the impact of having only a limited number of investigative mission support positions to support the Special Agent workforce in field offices across the country. It was determined that the current deficit of investigative mission support positions causes Special Agents to perform 2 to 4 hours a day of non-investigative work. Adding the additional mission support staff included in this request will provide the equivalent of at least 102 Special Agents a year.

OI applied a workforce model to all budgetary requests to ensure that agents have the necessary mission support personnel to support agents in the field. In order to address the existing shortfall in mission support personnel, for the 2011 submission, OI requested funds for 167 positions or 84 FTEs to augment staffing request within OI. The 167 positions will be distributed among all 26 SAC offices nationwide (not including headquarters or Southwest Border positions).

\$12.452 million of this increase will fund 167 positions (84 FTEs):

- 46 GS-1801-7/13 Criminal Research Specialists
- 30 GS-1802-5/7 Investigative Assistants
- 07 GS-301-13 Mission Support Specialists
- 08 GS-301-9/12 Mission Support Specialists
- 03 GS-301-9/11 Mission Support Specialists
- 18 GS-303-5/7 Mission Support Assistants
- 06 GS-301-11 Enforcement Operation Specialists
- 22 GS-326-4 Office Automation Clerks

- 03 GS-301-7/9 Staff Assistants
- 17 GS-301-5/7 Secretaries
- 03 GS-1801-13 Technical Enforcement Officers
- 04 GS-101-13 Victim Witness Specialists

The remaining \$2.548 million in non-personnel resources will fund facility requirements for the new personnel.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

OI mission support promotes DHS Strategic Management mission and the following goals:

- Goal 2.1 Effectively Control U.S. Air, Land, and Sea Borders,
- Goal 2.3 Disrupt Criminal Organizations; and
- Goal 3.2 Prevent Unlawful Immigration.

In addition, adding more mission support to the field will make available agents to do more investigative work as many agents are doing administrative collateral duties that should be done by a professional mission support staff.

In the event that this initiative is not funded there will be potential adverse consequences as agents will be doing more administrative functions, thus taking time away from investigating transnational border crime.

**Department of Homeland Security  
U.S. Immigration and Customs Enforcement  
Salaries and Expenses  
DRO - Custody Operations  
Justification of Program Changes**

**Program Increase 1:** Detention and Removal Operations  
PPA: DRO - Custody Operations  
Program Increase: Positions 0.0, FTE 0.0, Dollars \$20,000

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	20,000
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>20,000</b>

Justification

The FY 2011 increase will allow ICE to maintain the detention space it needs in support of its enforcement programs. No additional detention beds are being requested. ICE must detain aliens in facilities that strike the right balance between the civil nature of their detention and the risk of flight and the danger that they present. Part of that mandate includes the medical processing and oversight of adherence to detention standards.

In FY 2011, costs will increase that necessitate this funding increase. For example, ICE will

- Ensure an independent review of medical complaints and denials of requests for medical services and develop a medical care risk assessment system to place detainees with medical and mental health issues in appropriate facilities; and
- Substantially increase direct federal oversight of facilities that detain aliens in ICE custody.

Also, historically, medical care costs have risen at rates higher than inflation.

But, simultaneously, to manage overall costs, ICE is working to become more efficient to reduce detention costs and minimize the average length of stay. For example, ICE is reducing the average daily cost of a detention bed by:

- utilizing facilities with lower daily per diem rates by moving detainees out of facilities with high detention costs;
- possibly suspending detention operations at certain facilities that no longer fit within the DRO cost reduction strategy and simultaneously studying whether future use of each facility is necessary; and

- re-evaluating the minimum number of detainees required on certain detention facility contracts to cut operational costs.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

DRO Custody Operations supports the following goals:

Goal 3.1 Strengthen and Effectively Administer the Immigration System; and  
Goal 3.2 Prevent Unlawful Immigration

In addition, funding this enhancement will

- Ensure sufficient and appropriate bed space is available based on detention category, characteristics, and conditions of release.

Enhance partnership with other Federal detention agencies for better use of their resources to include facilities and training.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

For necessary expenses for enforcement of immigration and customs laws, detention and removals, and investigations; and purchase and lease of up to 3,790 (2,350 for replacement only) police-type vehicles; [\$5,342,134,000]\$5,439,100,000, of which not to exceed \$7,500,000 shall be available until expended for conducting special operations under section 3131 of the Customs Enforcement Act of 1986 (19 U.S.C. 2081); of which not to exceed \$15,000 shall be for official reception and representation expenses; of which not to exceed \$1,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security; of which not less than \$305,000 shall be for promotion of public awareness of the child pornography tipline and anti-child exploitation activities; of which not less than \$5,400,000 shall be used to facilitate agreements consistent with section 287(g) of the Immigration and Nationality Act (8 U.S.C. 1357(g)); and of which not to exceed \$11,216,000 shall be available to fund or reimburse other Federal agencies for the costs associated with the care, maintenance, and repatriation of smuggled aliens unlawfully present in the United States: Provided, That none of the funds made available under this heading shall be available to compensate any employee for overtime in an annual amount in excess of \$35,000, except that the Secretary, or the designee of the Secretary, may waive that amount as necessary for national security purposes and in cases of immigration emergencies: Provided further, That of the total amount provided, \$15,770,000 shall be for activities in fiscal year [2010]2011 to enforce laws against forced child labor, of which not to exceed \$6,000,000 shall remain available until expended: [Provided further, That of the total amount available, not less than \$1,500,000,000 shall be available to identify aliens convicted of a crime who may be deportable, and to remove them from the United States once they are judged deportable, of which \$200,000,000 shall remain available until September 30, 2011: Provided further, That the Secretary, or the designee of the Secretary, shall report to the Committees on Appropriations of the Senate and the House of Representatives, not later than 45 days after the end of each quarter of the fiscal year, on progress in implementing the preceding proviso and the funds obligated during that quarter to make that progress: ]Provided further, That the Secretary shall prioritize the identification and removal of aliens convicted of a crime by the severity of that crime: [Provided further, That funding made available under this heading shall maintain a level of not less than 33,400 detention beds through September 30, 2010: ]Provided further, That of the total amount provided, not less than [\$2,545,180,000]\$2,618,237,000 is for detention and removal operations, including transportation of unaccompanied minor aliens: Provided further, That of the total amount provided, \$7,300,000 shall remain available until September 30, [2011]2012, for the Visa Security Program: Provided further, That none of the funds provided under this heading may be used to continue a delegation of law enforcement authority authorized under section 287(g) of the Immigration and Nationality Act (8 U.S.C. 1357(g)) if the Department of Homeland Security Inspector General determines that the terms of the agreement governing the delegation of authority have been violated:

[Provided further, That none of the funds provided under this heading may be used to continue any contract for the provision of detention services if the two most recent overall performance evaluations received by the contracted facility are less than “adequate” or the equivalent median score in any subsequent performance evaluation system: ]Provided further, That nothing under this heading shall prevent U.S. Immigration and Customs Enforcement from exercising those authorities provided under immigration laws (as defined in section 101(a)(17) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(17))) during priority operations pertaining to aliens convicted of a crime[: Provided further, That none of the funds provided under this heading may be obligated to collocate field offices of U.S. Immigration and Customs Enforcement until the Secretary of Homeland Security submits to the Committees on Appropriations of the Senate and the House of Representatives a plan for the nationwide implementation of the Alternatives to Detention Program that identifies: (1) the funds required for nationwide program implementation; (2) the timeframe for achieving nationwide program implementation; and (3) an estimate of the number of individuals who could be enrolled in a nationwide program].(Department of Homeland Security Appropriations Act, 2010.)

### PPA Mission Statement

ICE Management and Administration (M&A) resources provide for top-level agency-wide management in the following areas: the Offices of the Assistant Secretary (OAS), Professional Responsibility (OPR), State and Local Coordination (OSLC), the Chief Diversity Officer, the Chief Financial Officer (OCFO), Acquisition Management, Human Capital, and Freedom of Information Act. The M&A activities include executive and overall leadership direction, strategic planning, policy development, and administrative support for the human, financial, information, and physical resources required to facilitate the operational capabilities of a productive ICE workforce.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	82,698	110,207	114,717	4,510

Permanent Positions includes salaries and benefits for 69 new FTEs in FY 2011, totaling an increase of

\$4,510 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.3 Other than full-time permanent	993	1,323	1,424	101

Other than Permanent includes regular salaries and wages paid to civilian employees for part-time, temporary, or intermittent employment.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.5 Other personnel compensation	9,072	12,090	12,762	672

Other Personnel Compensation includes compensation above the basic rates paid directly to civilian employees, such as overtime, holiday pay, night work differential, and hazardous duty pay, supervisory differential, cash incentive awards, and royalties.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
12.1 Civilian personnel benefits	29,259	38,992	40,668	1,676

Benefits include cash payments to other funds for the benefit of Federal civilian employees or direct payments to these employees, including life insurance, health insurance, employee retirement, work injury disabilities or death and professional liability insurance, recruitment, retention, or other incentives, and other allowances and payments.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
21.0 Travel and transportation of persons	4,974	6,628	7,634	1,006

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2011 request includes an increase of \$1,006 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
22.0 Transportation of things	234	312	335	23

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2011 request includes an increase of \$23 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.1 Rental payments to GSA	8,248	10,992	12,131	1,139

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2011 request includes an increase of \$1,139 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.2 Rental payments to others	3	4	5	1

Other Rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2011 request includes an increase of \$1 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.3 Communications utilities and miscellaneous charges	3,875	5,163	6,057	894

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phone (land line). The FY 2011 includes an increase of \$894 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
24.0 Printing and reproduction	4	5	5	-

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2011 request includes no change for these activities.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.1 Advisory and assistance services	13,185	17,571	19,912	2,341

**PPA Mission Statement**

The ICE Office of the Chief Information Officer (OCIO) provides information technology services and products that enable ICE and DHS to meet their mission. The OCIO is committed to providing excellent and efficient service to our customers in order to fulfill their IT needs. In order to meet these goals, the OCIO has developed a number of critical IT initiatives that will help ICE to modernize its IT systems, adapt and conform to modern IT management disciplines, as well as provide IT solutions throughout ICE.

**Summary Justification and Explanation of Changes**

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change

**PPA Mission Statement**

In the Office of Investigations (OI), our broad Homeland Security mission is to defend the Nation by enforcing trade and immigration laws through investigations that target the people, money, and materials that support terrorist and other criminal activities. We work under that mandate by dividing our investigative effort into three broad investigative categories: National Security, Financial and Trade, and Smuggling and Public Safety. These three categories represent the general priorities we use to guide our efforts in our daily activities. Each priority can be broken down into many different subcategories and, in fact, are operationally interrelated in a great many cases.

**Summary Justification and Explanation of Changes**

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	585,778	632,764	656,488	23,724

Permanent Positions includes salaries and benefits for 374 new FTEs in FY 2011, totaling an increase of \$23,724 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.3 Other than full-time permanent	12,892	13,927	14,581	654

Other than Permanent includes regular salaries and wages paid to civilian employees for part-time, temporary, or intermittent employment.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.5 Other personnel compensation	139,031	150,182	155,537	5,355

Other Personnel Compensation includes compensation above the basic rates paid directly to civilian employees, such as overtime, holiday pay, night work differential, and hazardous duty pay, supervisory differential, cash incentive awards, and royalties.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
12.1 Civilian personnel benefits	292,124	315,556	323,379	7,823

Benefits include cash payments to other funds for the benefit of Federal civilian employees or direct payments to these employees, including life insurance, health insurance, employee retirement, work injury disabilities or death and professional liability insurance, recruitment, retention, or other incentives, and other allowances and payments.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
21.0 Travel and transportation of persons	29,670	32,050	35,555	3,505

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2011 request includes an increase of \$3,505 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
22.0 Transportation of things	5,726	6,186	6,476	290

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2011 request includes an increase of \$290 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.1 Rental payments to GSA	113,481	122,584	130,342	7,758

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2011 request includes an increase of \$7,758 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.2 Rental payments to others	87	94	99	5

Other Rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2011 request includes an increase of \$5 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
23.3 Communications utilities and miscellaneous charges	27,219	29,402	31,783	2,381

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phone (land line). The FY 2011 includes an increase of \$2,381 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
24.0 Printing and reproduction	6	7	7	-

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2011 request includes no change for these activities.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.1 Advisory and assistance services	58,138	62,802	67,752	4,950

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e., the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2011 request includes an increase of \$4,950 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	161,907	174,891	187,107	12,216

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2011 includes an increase of \$12,216 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.3 Purchases of goods & svcs. from Gov't accounts	4,559	4,925	5,156	231

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2011 request includes an increase of \$231 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.4 Operation and maintenance of facilities	2,111	2,280	2,387	107

Operation and Maintenance of Facilities include all payments for such when done by contract with the private sector or another Federal Government account. The FY 2011 request includes an increase of \$107 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.6 Medical care	976	1,055	1,104	49

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.6 Medical care	976	1,055	1,104	49

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2011 request includes an increase of \$49 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.7 Operation and maintenance of equipment	18,252	19,716	22,343	2,627

Operation and Maintenance of Equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2011 request includes an increase of \$2,627 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
26.0 Supplies and materials	20,465	22,106	23,145	1,039

Supplies and Materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use; (b) converted in the process of construction or manufacture; (c) used to form a minor part of equipment or property; or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2011 request includes an increase of \$1,039 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
31.0 Equipment	48,602	52,500	56,966	4,466

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2011 request includes an increase of \$4,466 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
41.0 Grants/Subsidies/Contributions	308	333	349	16

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2011 request includes an increase of \$16 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
42.0 Insurance Claims and Indemnity	561	606	635	29

Indemnity includes insurance claims and benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. The FY 2011 request includes an increase of \$29 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
91.0 Unvouchered	5,170	-	5,847	5,847

Unvouchered includes expenditures made lawfully for confidential purposes, including authorized payments made by law enforcement to informants, which are not subject to detailed vouchering or reporting. The FY 2011 request includes an increase of \$262 thousand.

**PPA Mission Statement**

Office of International Affairs (OIA) expands the investigative efforts of the Office of Investigations to over 50 foreign locations. The OIA represents the international assets of all ICE programs and collaborates with U.S. Citizenship and Immigration Services, U.S. Customs and Border Protection, and other DHS components. The OIA liaises with foreign governments and international partners to facilitate the enforcement of U.S. customs and immigration laws beyond our borders in an effort to interdict criminals and prevent or disrupt criminal activity. OIA also executes the operational mandate of Section 428 of the Homeland Security Act through ICE's Visa Security Program.

**PPA Mission Statement**

The Visa Security Program (VSP) is the first line of defense in preventing terrorists and other criminals from gaining access to the United States through a legally obtained visa. The integration of experienced ICE law enforcement officers in the visa issuance process enhances this program as a counterterrorism tool through the generation of new watch list entries, “not yet known” terrorist or criminal suspects, valuable intelligence reports and investigative leads, and identification of patterns at high risk locations that traditional screening systems do not detect.

**PPA Mission Statement**

Intelligence - Collect, analyze and share information on critical homeland security vulnerabilities that could be exploited by terrorist and criminal organizations. The Office of Intelligence focuses on data and information related to the movement of people, money and materials into, within and out of the United States to provide accurate and timely reporting to ICE leadership and field agents in support of enforcement operations. ICE's intelligence functions are managed by a highly trained team of professionals with expertise in data and threat analysis, languages, financial investigations, counterterrorism and a number of other areas. ICE intelligence professionals process information from a variety of sources to provide assessments of patterns, trends and new developments in a wide range of law enforcement areas. These include the following areas: Terrorism, Human Smuggling and Trafficking, Money Laundering and Financial Crime, Drug Smuggling, Criminal Aliens, Air and Marine Smuggling, Cyber Crimes, Identity Fraud and Document Fraud, and Arms Trafficking.

## Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	27,437	33,056	37,152	4,096

Permanent Positions includes salaries and benefits for 54 new FTEs in FY 2011, totaling an increase of \$4,096 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change

**PPA Mission Statement**

Immigration enforcement authorities apprehend potentially removable aliens. In many cases, these aliens must be detained while they go through immigration proceedings and until they are removed. Often the number of apprehensions exceeds the detention space available and DRO must prioritize which cases will be detained. Custody Operations provides safe, secure, and humane confinement for these aliens. It also ensures that aliens in ICE custody appear for their immigration hearings, and then for their subsequent removal.

**Summary Justification and Explanation of Changes**

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change

**PPA Mission Statement**

The Criminal Alien Program (CAP) ensures that aliens are not released back into the community before they are removed from the United States. Through the CAP, ICE officers interview incarcerated aliens to determine whether they are amenable to immigration proceedings. If a case receives a final order of removal, ICE officers will immediately take that alien into custody upon completion of his or her criminal sentence and then prepare that case for removal

# BUDGET REQUEST AND SUPPORTING INFORMATION

## U.S. Immigration and Customs Enforcement Automation Modernization

### I. Appropriation Overview

#### A – Mission Statement for Automation Modernization

In FY 2008, the U.S. Immigration and Customs Enforcement (ICE) Automation Modernization account was expanded to include Atlas IT Infrastructure, TECS Modernization, and Detention and Removal Operations Modernization (DROM). In FY 2009, the Automation Modernization account was further expanded to include the Atlas Tactical Communications and Modernization of Financial System projects. In FY 2010, the Automation Modernization account again expands to include other IT transformational initiatives: ICE Law Enforcement Systems Modernization (LESM), which now includes the TECS Modernization project, and Electronic Health Records (eHR). By FY 2011, the Automation Modernization account will further expand to include Atlas Cyber Security Modernization and the ICE Decision Support Program. Placing all IT modernization initiatives under the Automation Modernization account will allow ICE to standardize IT investment management and delivery.

The Automation Modernization account will allow ICE to improve information sharing with the Department of Homeland Security (DHS) and other partner organizations. These initiatives will strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices.

#### B – Budget Activities:

##### *Atlas*

The Atlas program integrates enforcement capability rooted in a “One DHS” vision that includes sharing information, coordinating systems for identifying threats, forging DHS-wide standards, and weaving together networks. To this end, the Atlas program seeks to create and sustain a secure, scalable IT environment that supports ICE law enforcement programs. Prior to 2008, the Atlas Program consisted of eight major projects with 21 sub-projects. By January 2009, ten sub-projects were completed. To better align with the DHS IT strategic direction and to allow for more efficient management, the remaining sub-projects were realigned and Atlas was further expanded to include several new IT initiatives. The Atlas program currently consists of three projects with 11 associated sub-projects. These projects improve infrastructure, consolidate and standardize IT

equipment, improve IT products and services, and increase the security of equipment.

A description of current Atlas projects follows:

- **Atlas IT Infrastructure** – This project was initiated to improve information-sharing across DHS and ICE, strengthen information availability; provide a fully secure IT environment, improve workforce productivity, and migrate ICE infrastructure to the DHS *One Network*.
- **Tactical Communications** - This project is designed to modernize mission-critical tactical communications for ICE. This project will replace legacy tactical communications equipment and infrastructure with digital, encrypted, narrowband, Project 25 (P25)-compliant systems. ICE will design, engineer, acquire, integrate, program, install, test, and optimize their tactical wireless communications systems nationwide. Additionally, the TC project will provide infrastructure and subscriber unit training for ICE agents and officers, ensuring users understand how to use the modernized communications systems to support their mission-critical operations.
- **Cyber Security Modernization** – This project will create a robust IT environment in which authentication is rigid. This rigidity greatly increases ICE’s capability to identify threats and respond in an effective manner to those threats. It also increases ICE’s ability to control security assurance and risk management decisions. This increased security control ensures ICE will better protect its sensitive information, assure that critical IT resources are available to its workforce when needed, and maintain information integrity.

### ***ICE Law Enforcement Systems Modernization***

This initiative includes the following projects:

- **TECS Modernization** – This system will modernize the existing TECS functions that are specific to ICE. These include Investigative Case Management (including Bank Secrecy Act data access, Money Laundering reporting and tracking, and Telephone Link analysis), Intelligence Reporting and Dissemination, Management Reporting and Workflow, Security and Oversight, Shared Services, Data Management, Infrastructure Acquisition and Deployment. TECS modernization is a joint U.S. Customs and Border Protection (CBP) and ICE initiative.
- **Mobile Automated Biometric Identification System (IDENT)** – This project gives ICE agents the ability to identify and process an individual in the field using mobile processing units. Currently, suspected illegal aliens are transported to brick and mortar facilities for fingerprint identification. Mobile IDENT provides near real-time identification of aliens, decreases transportation costs, and

increases officer safety by reducing the number of instances of alien transport.

- **ICE Pattern Analysis and Information Collection System (ICEPIC)** - ICEPIC provides the capability to generate statistics, enact geospatial data, and link analysis for criminal and terrorist activities. ICEPIC is also the part of the information sharing initiative that allows the integration of all law enforcement data into a single repository and allows the data to be shareable to Local, State and Federal law enforcement agencies.
- **ICE ACCESS** – This initiative provides the resources to help ICE’s State and local partners in the ICE ACCESS program and will integrate ICE information on gangs with U.S. Department of Justice’s gang database.
- **Law Enforcement Information Sharing System (LEISS)** - ICE is the steward for DHS in the Law Enforcement-Shared Mission Community (LE-SMC) space and is responsible for development, coordination, and support of policies, procedures, and processes that facilitate the mission and DHS Secretary’s priorities for information sharing.
- **Intelligence Support** – This initiative will fund improvements to ICE’s information technology for its intelligence programs. This includes the migration of Data Analysis and Research for Trade Transparency System (DARTTS) and Cyber Crimes Center (C3) into the enterprise solution. This initiative will fund the maintenance of hardware and software for cyber-crime investigations, the National Child Victim Identification System (NCVIS), e-crimes, overt and covert networks, and an upgrade to the Digital Forensic Lab.
- **International Affairs Modernization** – This initiative will fund the overdue modernization of the tools currently being used to screen visa applicants at consular offices overseas.
- **Forensic Document Lab (FDL)** – This project will fund the expansion of the technology infrastructure for the FDL Automated Document Library System. The FDL provides tools and information to ICE agents performing criminal investigations. The modernization of the FDL will ensure applications and tools are available to the agents and improve information sharing capabilities. The modernization of the FDL will ensure the systems are incorporated into the enterprise.

### ***DRO Modernization (DROM)***

This initiative supports the system upgrades and improvements of Detention and Removal Operations (DRO), as well as supporting the requirements of DHS in providing a secure border. DROM will effect improvements in the areas of real-time dynamic data reporting, detainee management, management of detention beds and tracking detainees, bed-space availability management, and transportation management for detention and

removals. Through the system upgrades and improvements, ICE OCIO continues to support DRO with effective, responsive, and accurate computer and control systems that advance the DRO mission.

### ***Electronic Health Records (eHR)***

The Division of Immigration Health Services (DIHS) serves as the health authority for ICE on all matters related to detainee healthcare. DIHS provides direct patient care at 24 facilities (housing approximately 50-60% of the detainee population) and authorizes managed care services to the remaining ICE detainees housed at over 350 contracted detention facilities without on-site DIHS staff nationwide. The eHR initiative will provide enhanced medical documentation quality across all DIHS and Intergovernmental Service Agreement (IGSA) facilities; faster dissemination and improved exchange of detainee health information; and improved data quality and access to support trend analysis, as well as the identification of national and global public health threats.

### ***Modernization of Financial System***

The Modernization of Financial System initiative supports the DHS enterprise-wide initiative of consolidating a number of financial systems. This initiative will support ICE's transition to the new DHS financial system, assist ICE in achieving and sustaining unqualified financial audit opinions, and performing effective financial management.

### ***ICE Decision Support Program (IDSP)***

The ICE Decision Support Program (IDSP) facilitates business and organizational decision-making activities across the ICE enterprise. This project is the sponsor of the ICE Integrated Decision Support (IIDS) System, which provides ICE law enforcement users with information sharing capabilities by addressing information sharing and applications interoperability. IIDS is the program's vehicle for providing self-service reporting and analysis at users' fingertips, allowing decision makers to spend less time looking for answers and more time making strategic decisions.

This initiative will assist law enforcement agents and ICE decision makers in collecting and generating data to aid them in their investigative, intelligence, and case management activities.

## **C – Budget Request Summary:**

### **FY 2011 Request for Automation Modernization:**

ICE requests \$84,700,000, including 36 Full-time Equivalents (FTEs), to continue the modernization of its information technology and systems infrastructure for the following program initiatives, as well as continue FY 2010 efforts.

The following describes the allocation of the \$84,700,000 for the Automation Modernization projects:

- Atlas IT Infrastructure (\$9.0 million): The FY 2011 request of \$9.0 million will fund the second year of the planned four-year Local Area Network (LAN) Connectivity Upgrade sub-project to modernize the network infrastructure at approximately 750 ICE locations. ICE will accomplish this by upgrading legacy local area networks (LANs) to provide increased performance, security, and reliability. LAN infrastructure provides the "last hundred feet" connecting each user's desktop to the DHS OneNet. It is therefore a critical component required to access most ICE mission-critical applications (such as investigative information databases and detention management systems). The Atlas IT Infrastructure project is projected to upgrade 200 switches at various sites throughout the continental U.S. in FY 2011.
- Atlas Tactical Communications (\$8.0 million): This request will be used to acquire Project 25-compliant tactical communications equipment to modernize tactical communications systems in the Chicago Region (states of Illinois, Kentucky, Indiana, Missouri, Kansas, and Wisconsin). The modernization in the Chicago Region will include infrastructure and subscriber equipment, as well as system and subscriber training for ICE law enforcement personnel, ensuring they understand how to use the modernized communications systems to support their mission-critical operations.
- Atlas Cyber Security Modernization (\$8.0 million): This request will be used to continue implementation of recommended security solutions identified as a result of risk assessments, and improve intelligence fusion capability, centered on connectivity to the Joint Worldwide Intelligence Communications System (JWICS), Homeland Secure Data Network (HSDN), and a state-of-the-art Security Operations Center (SOC); integrating Single Sign-On (SSO) capability into the ICE enterprise; establish the basic Enterprise Operations Center (EOC) facility footprint for a purchased/leased facility; build-out and equip the Service Desk, the Network Operations Center, Security Operations Center and the Law Enforcement Service Center; and provide the common technical infrastructure and space necessary for the future build out of National Law Enforcement Communications Center, ICE Reporting and Operations Center and Sensitive Compartmented Information Facility in subsequent years.
- ICE Law Enforcement Systems Modernization (\$38.7 million): This request funds a number of case management (including the TECS Modernization initiative), information sharing, and operational support service projects that will improve dissemination of intelligence information across DHS and the Intelligence Community. The request increases the sharing of information with Federal, State, local, tribal and international law enforcement agencies. The TECS Modernization initiative focuses on immigration and customs law enforcement, concentrating on the business activities of investigative case management,

intelligence reporting and dissemination, including management reporting and workflow. ICE will assume the responsibility for modernizing and maintaining the functionality of the TECS modules considered essential to the ICE mission.

- DRO Modernization (\$9.0 million): This request will be used to develop and deploy the final release of the Detainee Location Tracking (DLT) System and Central Reservation System (CRS) as part of the Bed Space, Tracking, and Transportation (BST&T) Management Solution. Funding will also provide for the Transportation Management System (TMS) module. As part of the BST&T system, TMS addresses the DRO needs for improved transportation management. TMS will provide consistent automation of transportation transactions, provide decision support for complex moves, streamline communication and work flow, and provide the ability to measure and monitor transportation efficiency. The transportation solution will also include expanding web services to allow the Electronic Travel Document (eTD) application to communicate with other internal or external applications. Funds will also be used to continue the project management and current support services necessary for ensuring consistent management processes and practices across the DROM program.
- Electronic Health Records (\$7.0 million): This request will be used to begin the design and development of a system that enhances and supports the documentation and coordination of medical services provided to ICE detainees while in custody. The system will support ambulatory clinic processes, coordination of off-site specialty medical services and monitoring of medical services. This will enable faster exchange of detainee health information for supporting the continuity of care and improve data quality and identification of national and global public health threats.
- Financial System Modernization (\$3.0 million): This request will be used to continue ICE's efforts to ensure near-term viability of ICE's current financial system and preparation for migration of the current financial systems to the DHS enterprise solution.
- ICE Decision Support Systems (\$2.0 million): This request will be used for various activities including the development of a new extraction, transformation and loading process for the integration of data from LESM data sources to the Enterprise Data Warehouse (EDW); further development of executive dashboards for SEVIS II and BS&T; and funding for the continued support for the Business Intelligence (BI) tool Hyperion, the middleware WebSphere and the EDW to sustain the reporting needs of the existing customer community.

II. Summary of FY 2011 Budget Estimates by Program/Project Activity  
(PPA)

**Department of Homeland Security  
U.S. Immigration and Customs Enforcement  
Automation Modernization**

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U.S. Immigration and Customs Enforcement  
Automation Modernization  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Automation Modernization**

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2009 Actuals</b>	<b>7</b>	<b>12</b>	<b>59,456</b>
<b>2010 Enacted</b>	<b>36</b>	<b>19</b>	<b>90,000</b>
2011 Adjustments-to-Base	(36)	(19)	(90,000)
<b>2011 Current Services</b>	<b>-</b>	<b>-</b>	<b>-</b>
2011 Program Change	36	36	84,700
<b>2011 Total President's Budget</b>	<b>36</b>	<b>36</b>	<b>84,700</b>
Total Change 2010 to 2011	-	17	(5,300)

U.S. Immigration and Customs Enforcement requests \$84.7 million for this activity. This is a \$5.3 million decrease from the FY 2010 enacted level.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

FY 2011, the Automation Modernization account requests \$84.7 M, including 36 Full Time Equivalents. Funding is allocated as follows:

<b>Automation Modernization Project</b>	<b>FY 2011 Funding Request (\$ Millions)</b>
ICE Law Enforcement Systems Modernization (including TECS Modernization)	\$38.7
Atlas Tactical Communications	\$ 8.0
Atlas IT Infrastructure	\$ 9.0
DRO Modernization	\$ 9.0
Electronic Health Records	\$ 7.0
Financial Systems Modernization	\$ 3.0
ICE Decision Support Systems	\$ 2.0
Atlas Cyber Security Modernization	\$ 8.0
<b>Automation Modernization Total FY 2011 Funding:</b>	<b>\$84.7</b>

## **Key Accomplishments**

### FY 2009 – Accomplishments

In FY 2009, Congress appropriated \$57.0 million to further expand Automation Modernization activities including the Financial System Modernization initiative, TECS Modernization, Atlas IT Infrastructure, Atlas Tactical Communications, and DROM. The Automation Modernization programs have achieved the following to date in FY 2009:

#### Atlas (\$23.0 million)

- **Atlas IT Infrastructure (\$13.0 million)**
- Improved information sharing between ICE and its law enforcement partners by incorporating two additional data collection systems into one database.
- Replaced the primary web hosting platform for DHS data centers, and built IT infrastructure to provide seamless communications across heterogeneous platforms.
- Upgraded obsolete and failing file and print servers at 155 ICE sites.
  
- **Tactical Communications (\$10.0 million)**
- Acquired equipment for mobile communications system and hub upgrades, and acquired P25-compliant tactical communications equipment to modernize tactical communications systems in the first of 20 ICE regions (Georgia, North Carolina, and South Carolina); and
- Acquired, integrated, and deployed one mobile law enforcement communications system and one wireless communications kit for ICE emergency/crisis response and special operations.
  
- **Cyber Security Modernization (accomplished with prior year funds)**
- Instituted enterprise audit log management for all major ICE systems; and
- Deployed a framework to access 20 different ICE IT applications with a single sign-on.
  
- **Data Center Migration (accomplished with prior year funds)**
- Analyzed data center alternatives for lower cost options (to be facilitated by DHS).

#### LESM - TECS Modernization (\$15.7 million)

- This investment includes the following:
- Perform Project Management Office support services
- Gather and define requirements
- Establish development environment
- Develop high-level TECS architecture and design
- Provide Enterprise Data Warehouse and decision support services
- Gathered requirements for the following projects: Investigative Case Management (including Bank Secrecy Act data access, Money Laundering reporting and

- tracking, and Telephone Link analysis), Intelligence Reporting and Dissemination, Management Reporting and Workflow, Security and Oversight, Shared Services, and Data Management.
- Established an initial planning capability by securing project management office support to manage requirements and develop the business case;
  - Initiated and utilized results of business requirements analysis to conduct a formal Alternatives Analysis and lay down the foundation for program execution;
  - Developed TECS architecture and ICE high-level design, and established a development, integration and testing environment;
  - Developed and assessed the alignment of the program to the DHS Enterprise Architecture;
  - Developed Acquisition Decision Event 1 documents (i.e., Mission Needs Statement and Capability Development Plan); and
  - Developed Acquisition Decision Event 2A and 2B documents (Analysis of Alternatives, Acquisition Plan, Acquisition Program Baseline, Concept of Operations, Integrated Logistics Support Plan, Life Cycle Cost Estimate, Operational Requirements Document, and Testing and Evaluation Master Plan).

*DROM (\$11.3 million)*

- Initiated development of the Detainee Location Tracking (DLT) and Central Reservation System (CRS) modules of the Bed Space, Transportation, and Tracking (BST&T) Management System;
- Expanded ICE Data Warehouse data capacity and reporting capability to support DRO, and expanded web services to allow the eTD application to communicate with other internal or external applications;
- Expanded ENFORCE Alien Removals Module (EARM) to include the ENFORCE Apprehension and Detention Module (EADM); and
- Initiated planning and requirements definition phase for a DROM Document Management System and the Electronic Detainee Visitor Log (eVisitor) application.

*Modernization of Financial System (\$7.0 million)*

- Acquired an Invoice Payment solution for ICE that will be able to integrate with the Department's Enterprise Solution;
- Acquired an Obligations Document management solution for ICE that will be able to integrate with the Department's Enterprise Solution;
- Acquired a Financial Reporting Database that will interface with various ICE financial data sources such as its current financial system (and future DHS Resource Management Transformation Office (RMTO) solution), its payment system, its asset management systems and external financial sources);
- Provided project management support for the financial systems modernization effort;
- Conducted a gap analysis showing discrepancy between current system processing and the DHS Enterprise Solution, and propose resolution of discrepancies; and

- Acquired ICE Fed Traveler Services to support standardizing electronic travel (e-Travel) processing throughout DHS.

### FY 2010 - Projected Accomplishments

In FY 2010, ICE will further expand Automation Modernization activities to include the following initiatives: ICE LESM (which includes TECS Modernization) and eHR. ICE will also continue to develop current services projects that were started in FY 2009.

#### Atlas

The Atlas Program continues to improve information-sharing across the DHS and ICE organizations; strengthen information availability; provide a fully secure IT environment; and improve workforce productivity. Atlas initiatives address infrastructure deficiencies that must be corrected before other Automation Modernization programs can fully deploy planned capabilities.

The following are projected FY 2010 accomplishments:

- Continue modernizing an additional 290 ICE sites with new file and print servers;
- Integrate two additional data collection systems into the ICE data warehouse;
- Initiate modernization of 30% of local office networks to improve the performance of all networked IT systems, leading to increases in workforce productivity;
- Complete the implementation of the IT access audit log management initiative;
- Implement vulnerability scanning tools to quickly detect and respond to IT security breaches; and
- Oversee the migration of ICE IT assets from the Department of Justice to DHS Data Centers.

#### LESM

The TECS modernization effort will support the investigative arm of ICE and update a 20-year-old legacy system, giving ICE improved capabilities. These improvements will allow for better case management, money laundering tracking and reporting, telephone analysis, intelligence reporting and dissemination, Bank Secrecy Act data access, and statistical performance reporting. Critical to this project is the fact that the legacy system is part of a larger system maintained by CBP, which is undergoing rapid modernization. Projected accomplishments for FY 2010 include:

- **TECS Modernization** – The completion of the requirements definition phase and begin design and development of specific projects from the following: Investigative Case Management, Intelligence Reporting and Dissemination, Management, Management Reporting and Workflow, Security and Oversight, Shared Services, Data Management, Infrastructure Acquisition and Deployment.

- **Mobile IDENT** – The development of the Mobile IDENT proto-type booking service and pilot at three Special Agent In Charge (SAC) offices for user acceptance and gap analysis.
- **ICEPIC** - The hardware upgrade and migration to the enterprise data center as well as the support of the national rollout to all SAC offices.
- **ICE ACCESS** - This initiative will provide requirements gathering with local and State agencies and the U.S. Department of Justice for gang information sharing and data integration. A design strategy will be delivered to plan for the design and development of an integrated solution for the following year.
- **Law Enforcement Information Systems Sharing** – The completion of enhancements for the sharing of images and photos and the continuation of rollout to five additional information sharing partners.
- **Border Enforcement Security Task (BEST) Force Expansion** – The gathering and analysis of the requirements and design for the modernization of BEST information technology.
- **Intelligence Support** –The requirements gathering and design for moving the Data Analysis & Research for Trade Transparency (DARTT) system into the enterprise environment; and the requirements and design for the modernization of Cyber Crimes Center systems and National Child Victim Identification System (NCVIS).
- **International Affairs Modernization** –The requirements gathering and design of the Office of International Affairs (OIA) systems including Parole Case Tracking System (PCTS), Visa Security System (VSP), World Customs Organization Information Sharing (WCO) and Human Resources Dashboard (HRD).
- **Forensic Document Lab** –The requirements and design for the modernization of the information technology infrastructure and moving into the enterprise environment.

### DROM

The major goal of DROM is to create an efficient and streamlined process to minimize the length of detention, increase bed utilization efficiency, and increase removal of aliens ordered removed from the U.S. As a result, DROM projects will enable DRO personnel to better manage, track, and report on the movement of aliens through the immigration enforcement lifecycle.

The following are the FY 2010 projected accomplishments:

- Expand EARM to include the eTD, Fugitive Case Management System (FCMS) and Alternatives to Detention Program (ATDP);
- Transition EARM into Full Operating Capability (FOC) status;

- Deploy the BST&T DLT Module and provide training to remaining Areas of Responsibility (AORs) and detention facilities;
- Deploy BST&T, DLT, and CRS Modules to achieve Initial Operating Capability (IOC) status; initial delivery will include the point-in-time inventory capability to establish a strong foundation and framework for the subsequent phases of work;
- Begin development and integration of the final BST&T Module, the Transportation Management System (TMS);
- Continue expanding the eTD system as Memoranda of Understanding (MOUs) are executed for target countries to use eTD for issuing electronic travel documents; and
- Award development contracts for the DRO Document Management System and eVisitor Log.

#### Electronic Health Records (eHR) System

DIHS provides direct patient care at DRO facilities and oversees managed care services for detainees housed in State, local, and contract detention facilities. DIHS was part of the Department of Health and Human Services (HHS) until October 1, 2007, when it was transitioned to ICE DRO. Prior to 2007 DIHS provided health services through an interagency agreement between ICE and HHS.

ICE is currently assessing DIHS IT infrastructure and systems to ensure adherence with DHS IT standards and alignment with mission and program goals.

The following are the FY 2010 projected accomplishments:

- Award contracts for design and development of a comprehensive certified eHR system including several subsystems;
- Establish an initial planning capability by securing project management office support to manage requirements and expedite documentation;
- Initiate and utilize results of Acquisition Planning and Validation Study to establish the foundation for program execution;
- Develop eHR high-level program control process to establish a comprehensive program management processes to development, integration and testing environment; and
- Develop and assess the alignment of the program to the DHS Enterprise Architecture.

#### Modernization of Financial System

The goal of the Modernization of Financial System project is to ensure compliance with the DHS financial systems consolidation effort while continuing to modernize ICE financial operations in ways that complement the DHS solution. The objective is to manage the successful migration of ICE FFMS supported financial operations into the consolidated DHS Transformation and Systems Consolidation (TASC) solution.

The following are the FY 2010 projected accomplishments:

- Procure hardware for the Invoice Management System
- Procure hardware for the Obligations Document Repository

- Procure Hardware/Software for Financial Reporting Repository
- Conduct Fed Traveler/Core Financial System Interface Enhancements (replace batch with online interface),
- Establish PMO Support for OFM Modernization.

#### FY 2011 - Projected Accomplishments

In FY 2011, ICE will further expand Automation Modernization activities to include the following initiatives: Atlas Cyber Security Modernization; Atlas Tactical Communications; and the ICE Decision Support Program. ICE will also continue to complete projects that were started in FY 2009.

#### Atlas

The Atlas Program will continue to provide integrated sound program management support for the FY11 initiatives, and the ongoing multi-year program activities that were funded in prior years, plan future program activities, and ensure program adherence to cost, schedule, and performance goals. Planned accomplishments for the specific Atlas projects are as follows:

#### **Atlas IT Infrastructure (\$9 million)**

In FY 2011, the Atlas IT Infrastructure project will continue modernization of field office networks to replace many legacy ICE LANs that do not have sufficient data transmission capabilities and improve the performance of all networked IT systems.

#### **Atlas Tactical Communications (\$8 million)**

In FY 2011, the Tactical Communications project will acquire P25-compliant tactical communications equipment to modernize tactical communications systems in the fourth region, the Chicago Region (states of Illinois, Kentucky, Indiana, Missouri, Kansas, and Wisconsin). The modernization in the Chicago Region will include infrastructure and subscriber equipment, as well as system and subscriber training for ICE agents and officers, ensuring they understand how to use the modernized communications systems to support their mission-critical operations.

#### **Atlas Cyber Security Modernization (\$8 million)**

In FY 2011, the Atlas Cyber Security Modernization project will:

- Improve intelligence fusion capability to give ICE the required intelligence information needed to identify state-sponsored attacks that otherwise may go undetected and to implement cross domain solutions to facilitate information sharing with Federal, State, and local partners;
- Continue integrating Single Sign-On (SSO) capability into the ICE enterprise
- Establish the basic EOC facility footprint for the future build out of the Service Desk, the Network Operations Center, Security Operations Center, National Law Enforcement Communications Center, Law Enforcement Service Center, ICE Reporting and Operations Center and Sensitive Compartmented Information Facility in subsequent years; and
- Provide a Configuration Management Program and Mobile Code Signing capability.

LESM (\$38.7 million)

Projected accomplishments for FY 2011 include the following project milestones:

- **TECS:** Continue design and development of specific projects from the following: Investigative Case Management, Intelligence Reporting and Dissemination, Management, Management Reporting and Workflow, Security and Oversight, Shared Services, Data Management, Infrastructure Acquisition and Deployment.
- **Mobile IDENT** – Launch a web interface capability. Replace existing technology to include upgrading workstations supporting Mobile IDENT.
- **ICEPIC** – Development of a reporting database to include mapping to the TECS Modernization efforts. Enable and expand link analysis, global name resolution, and geospatial capabilities within ICEPIC.
- **ICE ACCESS** – Build upon requirements developed in FY 2010. Integrate infrastructure requirements within ICEPIC.
- **Law Enforcement Information Sharing Service (LEISS)** – Complete development for two factor authentication. Expose law enforcement data to first responders and emergency management teams within ICE and potentially across department. Continue the rollout to five additional information sharing partners.

DROM (\$9 million)

In FY 2011, DROM will:

- Complete deployment of BST&T DLT and Central Reservation System (CRS) Modules;
- Continue development and integration of the final BST&T Module, TMS, and achieve initial operating capacity (IOC); and
- Complete development and integration of eVisitor Log.

Electronic Health Records System (\$7 million)

In FY 2011, the eHR Program office will design and develop the eHR “Core Capabilities” and deploy the system to the 24 DIHS facilities within two releases (utilizing FY 2010 funding). Projected accomplishments for FY 2011 include the following project milestones:

- Configure and develop interfaces, complete testing and prototype testing, and initiate deployment of a eHR application to support ICE medical operations at DIHS-staffed detention facilities; and
- Begin deployment of appropriate eHR capability to over 24 DIHS staffed facilities and the 350 Intergovernmental Service Agreements (IGSA) and Contract Detention Facilities (CDF) housing ICE detainees.

Financial System Modernization (\$3 million)

- Develop system integration plans for the interfacing of ICE's non-core financial systems with Department's Enterprise Solution.
- Prepare detailed migration plans to transition ICE's current financial processing system into the Department's Enterprise Solution.
- Prepare detailed test and evaluation scenarios to verify system functionality and determine level of compliance.
- Cleanse ICE's current financial systems data to ensure smooth migration to the Department's Enterprise Solution.

ICE Decision Support Program (\$2 million)

Projected accomplishments for FY 2011 include the following project milestones:

- Integrate information from additional enforcement systems into the ICE data warehouse;
- Integrate data from the Law Enforcement Modernization project into the ICE Enterprise Data Warehouse (EDW) and provide reporting capabilities;
- Integrate data from DROM/BST&T modules into the ICE EDW and provide reporting capabilities;
- Develop & Implement Executive Dashboards (SEVIS II & BST&T);
- Continue integration of ICE internal and external data into the ICE EDW; and
- Continue to support Secure Communities initiated application developments by integrating additional data into the ICE EDW.

## IV. Program Justification Changes

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Automation Modernization**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Law Enforcement Systems Modernization  
PPA: Automation Modernization  
Program Increase: Positions 17, FTE 17, Dollars \$38,700  
Strategic Goal(s) & Objective(s): 5.1 Strengthen and Unify DHS Operations and Management  
Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 President's Budget		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							17	17	38,700
<b>Total Request</b>	<b>5</b>	<b>3</b>	<b>15,700</b>	<b>17</b>	<b>9</b>	<b>49,800</b>	<b>17</b>	<b>17</b>	<b>38,700</b>

### Description of Item

The ICE Law Enforcement Systems Modernization initiative includes a number of case management, information sharing and operational support service projects that will improve ICE law enforcement personnel's access to law enforcement information. The ICE Law Enforcement Systems Modernization investment provides funding of \$38.7 million, to include 17 FTEs, allocated according to the following:

*Personnel costs (\$1.8 million, 17 Positions, 17 FTEs):*

- 12 - IT Specialists (\$1.4M)
- 5 - Contracting Specialists (\$.4M)

*Non-Personnel Costs (\$36.9 million):*

- TECS Modernization (\$26.0 million) – This system will modernize the existing TECS functions which are specific to ICE. These include Investigative Case Management, Intelligence Reporting and Dissemination; Bank Secrecy Act data access; Money Laundering reporting and tracking; and Telephone Link analysis. The modernization of the functions will enhance ICE's ability to share law enforcement information with both Federal and non-Federal entities. TECS modernization is a joint CBP and ICE initiative. CBP commenced its modernization effort in FY 2005; ICE began its modernization effort in FY 2008. ICE must ensure that it is ready to move to the modernized system at the same time as CBP decommissions the existing TECS platform or ICE will be required to shoulder the entire Operations and maintenance costs of the legacy TECS platform (estimated to be between \$25 and \$40 million annually).

Other Law Enforcement Systems Modernization (\$10.9 million):

- Mobile IDENT (\$2.4 M) – This project will give ICE agents the ability to identify and process an individual in the field using mobile processing units. Currently suspected illegal aliens are transported to brick and mortar facilities for fingerprint identification (IDENT). Mobile IDENT decreases transportation costs and increases officer safety by reducing the number of instances of alien transport.
- ICEPIC (\$3.0 M) - DHS is embarking on a Regional Sharing Service (RSS) initiative that will deploy the required information sharing technologies and operating policies in compliance with the Information Sharing Environment's (ISE) architecture framework. The data exchange between ICEPIC and external agencies will be Global Justice XML Data Model (GJXDM) and National Information Exchange Model (NIEM) compliant. It will improve information sharing between ICE and other law enforcement agencies, including its State and local partners.
- ICE ACCESS (\$2.4 M) – This initiative provides the resources to help ICE's state and local partners in the ICE ACCESS program and will integrate ICE information on gangs with U.S. Department of Justice's database.
- LEISS (\$3.1 M) - ICE is the steward for the Department in the Law Enforcement-Shared Mission Community (LE-SMC) space and responsible for development, coordination and support of policies, procedures, and processes that facilitate the mission and DHS Secretary priorities for information sharing.
- BEST Expansion (\$0.0 M) – This initiative supports IT integration and information sharing for the Office of Investigations' Border Enforcement Security Task Forces, multi-agency task forces with State, Federal, and local participation to combat border crime.

Justification

Approval of the LESM initiative will provide ICE with improved interoperability with DHS and other Federal law enforcement and homeland security intelligence analysis toolsets; enhanced quality law enforcement information sharing within, and external to DHS; and improved collection of more consistent, timely, and accurate performance information on law enforcement activities and outcomes. It will expand the ability of DHS to collect data using Federal standardized data formats and support investigators with a primary source for information sharing within the ISE (Information Sharing Environment) and national Law Enforcement (LE) community.

The TECS modernization effort will support the investigative arm of ICE and update a 20-year-old legacy system, giving ICE improved capabilities for case management, money laundering tracking and reporting, telephone analysis, intelligence reporting and dissemination, Bank Secrecy Act data access, information sharing of subject record data, and statistical/performance reporting.

LESM funding will also support the following projects:

- Mobile Automated Biometric Identification System (IDENT) – This project gives ICE agents the ability to identify and process an individual in the field using mobile processing units. Currently, suspected illegal aliens are transported to brick and mortar facilities for fingerprint identification. Mobile IDENT decreases transportation costs and increases officer safety by reducing the number of instances of alien transport.
- ICE Pattern Analysis and Information Collection System (ICEPIC) - ICEPIC provides the capability to generate statistics, enact geospatial data, and link analysis for terrorist activities. ICEPIC is also the part of the information sharing initiative that allows the integration of all law enforcement data into a single repository and allows the data to be shareable to Local, State and Federal law enforcement agencies.
- ICE ACCESS – This initiative provides the resources to help ICE’s State and local partners in the ICE ACCESS program and will integrate ICE information on gangs with U.S. Department of Justice’s gang database.
- Law Enforcement Information Sharing System (LEISS) - ICE is the steward for DHS in the Law Enforcement-Shared Mission Community (LE-SMC) space and is responsible for development, coordination, and support of policies, procedures, and processes that facilitate the mission and DHS Secretary priorities for information sharing.

The proposed increase will result in a significant increase in the quantity and quality of criminal cases presented for prosecution, as well as an increase in the number and types of data/information shared with Federal, State, local, and tribal entities. The resulting overall enhanced enforcement activity will create a deterrent effect and increase the discovery of violations and speed the identification of offenders for arrest and prosecution.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

ICE will collaborate with CBP to define the Service Oriented Architecture (SOA) for the entire TECS/Case Management (CM) solution. The TECS/CM architecture will align with services defined in the DHS Enterprise Architecture (EA) Service Reference Model (SRM). The architecture will make maximum use of services previously created by other DHS and Federal agencies, as well as ensure that new services developed by the TECS/CM program are reusable with DHS. Additionally, the ICE ACCESS project will enable the integration with DOJ, state and local agencies further improving information sharing efforts and providing increased officer safety.

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Automation Modernization**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 2:** Atlas Tactical Communications  
PPA: Automation Modernization  
Program Increase: Positions 0, FTE 0, Dollars \$8,000  
Strategic Goal(s) & Objective(s): DHS Goal 3 – Protect Critical Infrastructure; DHS Objective 3.1 – Protect and Strengthen the Resilience of the Nation’s Critical Infrastructure and Key Resources  
Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 President's Budget		
	Pos	FTE	Dollar s (\$000)	Pos	FTE	Dollar s (\$000)	Pos	FTE	Dollar s (\$000)
Current Services Level							-	-	-
Program Increase							-	-	8,000
<b>Total Request</b>	-	-	<b>10,000</b>	-	-	-	-	-	<b>8,000</b>

Description of Item

*Non-Personnel Costs (\$8.0 million):*

- Tactical Communications P25 Upgrade (\$7.0M) - Resources will be used to upgrade tactical communications in one ICE operational region. ICE will complete the upgrade through the replacement of legacy tactical communications infrastructure and radio subscriber equipment with state-of-the-art, digital, encrypted, narrowband, P25-compliant wireless infrastructure and subscriber equipment.
- Program Management Office (PMO) Support (\$1.0M)- Used to staff contractor PMO to provide integrated support for the ongoing FY11 initiatives, plan future program activities, and ensure program adherence to cost, schedule, and performance goals.

Justification

Through the deployment of state-of-the-art tactical communications and upgrade to P25 compliant technologies, this initiative will provide improved communications, interoperability and coordination for ICE personnel during field operations. Coordinated implementation efforts will reduce infrastructure dependency, address areas of poor coverage and interoperability, provide economies of scale, and improve mission effectiveness. Front-line law enforcement personnel will realize the benefits of interoperable P25-compliant tactical communications systems equipped with secure, digital, spectrum efficient technology.

Impact on Performance (Relationship of Increase to Strategic Goals)

The Atlas Tactical Communications initiative executes the actions required to provide this

modernized communications infrastructure, improving ICE law enforcement and homeland security personnel's tactical communications capabilities in key locales (e.g., interior of the country, cities, and major transport routes), and among law enforcement and public safety organizations who collaborate to mitigate future threats. As the Atlas Tactical Communications initiative represents an investment in voice and data communications technologies, the end product establishes a 24 hour a day communications system nationwide, complete with support services. A centrally managed and coordinated approach to this initiative ensures implementation of common, standards-compliant technologies, fostering interoperability within ICE and with DHS, other Federal agencies, and State and local partners for event management and crisis response.

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Automation Modernization**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 3:** Atlas IT Infrastructure  
PPA: Automation Modernization  
Program Increase: Positions 1, FTE 1, Dollars \$9,000  
Strategic Goal(s) & Objectives: 5.1 Strengthen and Unify DHS Operations and Management  
Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 President's Budget		
	Pos	FTE	Dollar s (\$000)	Pos	FTE	Dollar s (\$000)	Pos	FTE	Dollar s (\$000)
Current Services Level							-	-	-
Program Increase							1	1	9,000
<b>Total Request</b>	<b>1</b>	<b>1</b>	<b>13,000</b>	<b>1</b>	<b>1</b>	<b>12,200</b>	<b>1</b>	<b>1</b>	<b>9,000</b>

Description of Item

DHS must be able to share information with Federal, State, local, and homeland security partners. This initiative will improve information-sharing across the DHS and ICE organizations, strengthen information availability, provide a fully secure IT environment, improve workforce productivity, and migrate ICE infrastructure to the DHS One Network. Meeting these program goals will directly improve the quality, speed and extent to which ICE can enforce trade and immigration laws, control our borders, prevent terrorist acts, and respond to national emergencies.

*Personnel costs (\$0.1 M, 1 Position, 1 FTE)*

- 1 - Contracting Specialist (\$.1M)

*Non-Personnel Costs (\$8.9 million):*

- Local Area Network (LAN) modernization initiative (\$4.8M) – Provides funding to continue the four-year project to modernize network infrastructure at approximately 750 ICE locations by upgrading legacy local area networks (LANs) to provide increased performance, security, and reliability. LAN infrastructure provides the "last hundred feet" connecting each user's desktop to the DHS OneNet. It is therefore a critical component required to access most ICE mission-critical applications (such as investigative information databases and detention management systems). The AITI project is projected to upgrade 200 switches at various sites in CONUS for FY11.
- Emergency Servers/Atlas Infrastructure (\$3.1M) – Provides funding for continued operations of servers and switches in support of the consolidation effort as well as emergency servers and switches. This also includes servers and switches needed for reliability, security, and performance expansion and enhancement at various sites. There are a number of sites that have been and will be serviced by the Atlas IT Infrastructure

project that will change in size, mission, and configuration during the length of the project and thus will need to be revisited to ensure appropriate security, reliability, and performance.

- Program Management Office (PMO) / Mission Support (\$1.0M) – Project level contribution to the Atlas Program Management Office funds for the contractor positions dedicated to the effective management of program investments. The PMO Support will continue to ensure adherence to cost, schedule, and performance goals for the Atlas program and report as required to the governing oversight entities.

### Justification

Atlas activities planned in FY 2011 address infrastructure deficiencies that must be corrected before other Automation Modernization programs can fully deploy planned capabilities. Without these investments:

- ICE will be unable to complete the foundation of its DHS-wide law enforcement information sharing strategy, which is critical to support cost efficient expansion of ICE's enforcement mission through several related ICE and DHS IT modernization efforts;
- Ongoing Atlas Automation Modernization projects that rely on the current government and contractor PMO support to perform required project management and reporting will experience increased cost, delayed schedule and reduced performance.

### Impact on Performance (Relationship of Increase to Strategic Goals)

Atlas IT Infrastructure will automate inadequate reporting capabilities to drastically improve the quality, speed, and extent to which ICE can investigate violations of law, prevent acts of terrorism, and remove detained aliens by completing a multi-year investment to integrate ICE data and share ICE data with other enforcement agencies.

The ICE mission information sharing project improves sharing of investigative and enforcement data within ICE, with other DHS components and with other Federal, State, local and tribal law enforcement partners. Therefore, this project is a cornerstone in the national strategy to share law enforcement information and secure our homeland.

Description of Item

The Office of Detention and Removal Operations Modernization (DROM) Program was established to oversee the systems upgrades and improvements of DRO business processes for the detention and removal of illegal aliens from the United States. The DROM program is designed to improve the following:

The DROM program is designed to improve:

- **Real-time dynamic reporting on statistics and metrics** - for events from apprehension through the detention and removal process;
- **Detainee management** – including the ability to identify the status of an individual alien’s case from apprehension to removal;
- **Management of detention beds and detainees** - including the ability to track, count and manage detainees, including a system that stores all alien’s data for providing DRO personnel with necessary information to expedite the removal process;
- **Bed-space availability management system** - to provide real-time visibility into the availability of beds by location, by relative likelihood of availability, by alien characteristic or classification, and to explore the capability of any potential system to make reservations and cancellations; and
- **Transportation management** - for the scheduling and routing of detainees for detention and removal, and to improve fleet management and coordination of transportation events and needs.

The DROM investment provides funding of \$9.0 million, to include 14 positions, allocated as follows:

*Personnel costs (\$1.6 million, 14 Positions, 14 FTEs)*

- 11 - IT Specialists (\$1.3M)
- 3 - Contracting Specialists (\$.3M)

*Non-personnel costs (\$7.4 million):*

- **Bed Space and Transportation System (BST&T) (\$6.3 Million)** – This system will create an automated bed space management process to track detainee movements and identify detainees during transfers through the use of mobile biometric identification devices. Funding will support development of the Transportation Management System module (TMS) which will provide consistent automation of transportation transactions, provide decision support for complex moves, streamline communication and work flow, and provide the ability to measure and monitor transportation efficiency.
- **Systems Support (\$1.1 Million)** – These resources will provide Project Management Office support for cost, schedule, and performance.

Justification

A critical component in achieving the SBI goal of eliminating “catch and release” policies is to dramatically improve bed space utilization through improved communication and coordination between DRO and apprehending entities. The lack of visibility into available bed space and contrasting bed space management processes across the different DRO field offices has created many impediments to improving resource and bed space utilization. Most notably, DROM is an integral part of augmenting existing booking and removal case management systems to address specific requirements called for in the Secure Communities Initiative (SCI) Strategic Plan, such as automated detainer distribution, enhanced custody transfer coordination, and expanded use of electronic travel documents.

Noted as being a major driver of detention and removal cases in the DRO Secure Communities Initiative Strategic Plan, the DROM Program allows SCI to leverage efficiencies generated through technology modernization projects. The DROM projects support the SC program by providing the automated systems necessary to ensure criminal aliens are not released into the community due to a lack of detention space.

This initiative will support the systems upgrades and improvements of DRO business processes for the detention and removal of illegal aliens from the United States, as well as support the requirements of the Secure Border Initiative (SBI). DROM will effect improvements in the areas of real-time dynamic data reporting, detainee management, management of detention beds and tracking detainees, bed-space availability management, and transportation management for detention and removals. The DROM Investment provides solutions to improve DRO performance and provide enhanced operational capability in the following areas targeted for improvement:

- **Real-time dynamic reporting on statistics and metrics** for events from apprehension through the detention and removal process enhancing ability to monitor and control DRO operations (aggregate and individual aliens); the systems will contain data on all removable illegal aliens, including fugitives and criminal aliens. DRO systems will have

the ability to link operational performance to financial budgets and plans. Additionally, efforts to create an operational data warehouse to support ad-hoc reporting on DRO operations will be feasible with the deployment of new applications capable of standardizing the data for analysis

- **Case management**, providing DRO the ability to identify the status of an individual alien's case from apprehension to removal (e.g. awaiting credible-fear review, awaiting travel-document issuance) and identify an individual alien's case status to improve efficiencies in the removal process; this will reduce significant liability-potential for DRO and its managers in this area, as the day-to-day operations for bed space, transportation, and detainee location tracking will be automated and consistent across DRO facilities. Data, including invoice verification, will be kept in a standardized system, eliminating duplication of information. Finally, interoperability between DRO and most of the detention facilities that it uses will be achieved.
- **Management of detainees** to expedite the removal process by providing the capability to track the location of, count and manage detainees, including the DRO system that will store alien data (e.g., property management) for providing DRO personnel with necessary information; the DROM systems deployment will be highly effective in managing an increasing detainee population that has to this point further aggravated an already overburdened manual system with limited resources.
- **Bed-space availability management system** that provides DRO real-time visibility into the availability of beds by location, by relative likelihood of availability, and by alien characteristic or classification, and integrated with a central reservation system to make reservations and cancellations to maximize efficiencies in identifying and assigning available beds, and to shorten the average duration for detention, thereby increasing throughput across the enterprise. This will eliminate reliance on existing manual, ad-hoc methods of tracking bed space which result in unnecessary transportation costs and pose an increased risk to DRO officers and the general population should inadequate housing be available.
- **Transportation management** for scheduling and routing detainees for detention and removal to improve fleet management, coordination of transportation events and needs, and monitor and evaluate transportation performance. DRO will be able to improve the integration of inbound, outbound and inter-facility transportation management, thus increasing the ability to provide proactive planning and decision-making. Additionally, there will be integration between proposed systems.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

The DROM project improves the process of apprehending, detaining, and removing illegal aliens. New systems built to support the booking process allow simultaneous, streamlined booking of multiple aliens. As a result, physical booking workflows will no longer have to mimic inefficient systems requirements and can instead focus on meeting more important business needs such as officer safety and improved speed. Along with major speed

improvements, redesigned workflows also lead to significant quality and accuracy improvements. Data entry error rates concerning subject biographical information will decline as a result of process improvements made possible by new system capabilities and improvements.

The DROM project will improve ICE's ability to share immigration and detention data and ultimately, the capability to track and identify an individual alien throughout the apprehension, detention and removal process and will improve the management and oversight of detention bed and transportation resources.

DROM will also have a significant impact on ICE's interaction with state and local enforcement. State and local law enforcement authorities are becoming increasingly important DROM stakeholders due to the information shared from the detention and removals data through EARM. These authorities may identify, process, and when appropriate, detain immigration offenders they encounter during their regular, daily law-enforcement activity. DROM Enhancements enable ICE to provide more accurate and timely information which is crucial to the success of this program with state and local partners. This capability is key in allowing ICE to comply with Section 287(g) of the Immigration and Nationality Act aimed at multiplying the ICE forces through enhanced cooperation and communication with state and local law enforcement.

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Automation Modernization**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 5:** Electronic Health Records  
PPA: Automation Modernization  
Program Increase: Positions 4, FTE 4, Dollars \$7,000  
Strategic Goal(s) & Objectives: 5.1 Strengthen and Unify DHS Operations and Management

Funding Profile

Program Increase							4	4	7,000
<b>Total Request</b>	-	-	-	4	2	5,000	4	4	7,000

Description of Item

The Division of Immigration Health Services (DIHS) serves as the health authority for ICE on all matters related to detainee health care. DIHS provides direct patient care at 24 detention facilities and authorizes managed care services to ICE detainees housed at over 350 contracted detention facilities nationwide. Its detainee population has increased by more than 30 percent since 2004, and the number of facilities that DIHS staffs and oversees expanded from 12 sites in 2004 to 26 sites. This growth significantly increased the complexity of the DIHS role to provide effective and reliable health care service to ICE detainees in support of the ICE mission.

*Personnel costs (\$0.4 million, 4 Positions, 4 FTEs):*

- 2 – IT Specialists (\$.2M)
- 2 – Contracting Specialists (\$.2M)

*Non-personnel costs (\$6.6 million):*

- Key System Interfaces (\$1.4 M) – Funding will support partial development of interfaces with key DHS systems, such as EARM, as well as with key external systems, such as the Bureau of Prisons’ Sentry system.
- Development of eHR Core Module (\$4.7M) – Funding will support initial development of an integrated electronic medical records system with basic core functionality for clinic support.
- eHR Planning and Program Control Support (\$0.5M) – Resources to provide Project Management Office (PMO) support. Includes resources to develop consistent management processes and practices; assist with Capital Planning and Investment

Control (CPIC) requirements; respond to queries from oversight entities; and apply standardized cost, schedule, performance and risk management practices for the project.

### Justification

Medical encounters of these detainees are recorded in paper-based systems and disparate IT applications throughout the ICE environment. The applications are not integrated and information is not readily available between sites. The system lacks critical components currently available in Health Information Technology (HIT) certified by the federally endorsed, Commission on the Certification of Health Information Technology (CCHIT) and compliance with other applicable HIT guidelines.

The FY 2011 request will allow DRO to begin the design and development of the DIHS eHR system. The eHR will provide the needed capability for DRO to increase the speed and efficiency of submittal and approval of treatment authorization requests (TARs), and interface with other Federal systems (e.g. ENFORCE, the Bureau of Prisons' Sentry, and Plexus) necessary to track detainees across multiple instances of detention.

### Impact on Performance (Relationship of Increase to Strategic Goals)

An eHR that is customized for the needs of detention facilities is necessary in order to maximize efficiencies, reduce medical errors and standardize the care provided to detainees.

Upon successful implementation of this project, the following achievements can be observed:

- Improved services to detainees through faster and timely dissemination of information.
- Appropriate, accurate information to guide medical decisions is available at the time and place of care.
- Improved coordination with DRO staff to ensure medical conditions (i.e. diagnosis and treatment decisions, special needs, and medical alerts) are factored into immigration case management.
- Increased process compliance through improved service delivery and clinical operations to reduce negative patient outcomes (e.g. medication errors, unexpected detainee deaths, and limited access to healthcare).

<b>Total Request</b>	-	-	<b>7,000</b>	-	-	<b>3,000</b>	-	-	<b>3,000</b>

Description of Item

*Non-Personnel costs (\$3.0 million):*

- Identification of Financial Reporting Repository extract, transformation and load requirements for the TASC solution;
- Implementation support of ICE non-core financial systems; and
- Identification of integration requirements of non-core financial systems (Fed Traveler, Invoice Payment, Real Property, Financial Reporting Repository with the TASC solution).

Justification

The Modernization of Financial System initiative supports IT infrastructure optimization and will support the Congressional mandate to consolidate the number of financial systems within DHS. This initiative will support ICE's migration to the new DHS financial system and will result in improved financial services, which in turn will assist ICE in achieving and sustaining unqualified financial audit opinions and performing effective financial management.

The FY 2011 program increase will support the migration of ICE financial systems to the DHS TASC Baseline. This initiative is the continuation of a new initiative from FY 2009. It supports the replacement of FFMS with the DHS TASC system. Additionally, this initiative modernizes ICE's non-core financial systems:

- Replaces the legacy Travel Manager system with the new Fed Traveler DHS standard;
- Replaces ICE's File-OnQ based payment system with a robust commercial-off-the-shelf (COTS) invoice payment solution;

- Provides a business intelligence tool for the Office of Financial Management through a financial reporting repository; and
- Migrates some MS Access-based financial office systems to a SharePoint solution.

The modernized systems will provide greater customer self-service automation (Fed Traveler and OFM Office applications), greater functionality, efficiency and automation support (Invoice Payment), and enhanced reporting (Financial Reporting Repository). They will ensure effective compliance to the Federal Information Security Management Act (FISMA) and Financial Systems Integration Office (FSIO).

#### Impact on Performance (Relationship of Increase to Strategic Goals)

The Modernization of Financial System Initiative supports DHS Goal - 5 Strengthen and Unify DHS Operations and Management, DHS Objective - 5.1 Improve Departmental Governance and Performance, and is the ICE portion of the DHS enterprise-wide initiative of consolidating a number of financial systems. This initiative will support ICE's migration to the new DHS financial system and will result in improved financial services, which in turn will assist ICE in achieving and sustaining unqualified financial audit opinions and performing effective financial management. The FY 2011 program increase will support ICE's migration to the new Department of Homeland Security's financial system, the TASC Baseline.

Funding this request will ensure that ICE will be able to sustain support for the annual financial statements, audits, and strengthen the resource management reports necessary for the effective stewardship of the resources entrusted to ICE and the customers we serve. Funding will also ensure that ICE will be able to reduce the reliance on a sole source vendor with a proprietary system for its reporting needs.

Description of Item

*Non-Personnel costs (\$2.0 million):*

- LESM Decision Support (\$1.0 million) – This project consists of the development of a new extraction, transformation and loading process for the integration of data from LESM data sources to the EDW. The data will be cleansed into an efficient, standard format to be used for the development of standard reports, statistics, analytics, queries and an executive dashboard via IIDS.
- Executive Dashboards (\$0.7 million) – This project entails developing executive dashboards for SEVIS II and Bed Space and Transportation (BS&T). These dashboards will provide executives with a state of the art user interface for key performance indicators.
- PMO Support (\$0.2 million) – The requested funds will be used to acquire contractor resources to assist with programmatic activities to support the goals and objectives of the IDSP program. This will include development of program documentation, financial analytical reports, project metrics, and standardization of project management processes.
- IIDS (\$0.1 million) – These resources will fund the continued support for the Business Intelligence (BI) tool Hyperion, the middleware WebSphere and the EDW to sustain the reporting needs of the existing customer community. Data from disparate sources have been created to develop comprehensible charts, pivots, reports, statistics and dashboards. Funding for resources is required to maintain IIDS up and running to allow users to report on extensive statistics on a daily, weekly, monthly, quarterly and yearly basis. For example, statistics used for weekly ICE Office of Detention and Removal Operations (DRO) reports are refreshed weekly every Monday morning and data is not altered during the following week unless specifically requested by the user.

## Justification

The ICE Decision Support Program (IDSP) facilitates business and organizational decision-making activities across the ICE enterprise. The program is the sponsor of the ICE Integrated Decision Support (IIDS) System which provides ICE law enforcement users with information sharing capabilities by addressing information sharing and applications interoperability. The IIDS application implements business and organizational decision support services by using interactive business intelligence tools intended to enhance law enforcement data sharing.

The program's goal is ultimately to assist law enforcement agents and ICE decision makers in collecting and generating data to aid them in their investigative, intelligence, and case management activities. IIDS is the program's vehicle in providing self-service reporting and analysis at everyone's fingertips that allow decision makers to spend less time looking for answers and more time making strategic decisions.

### ICE Decision Support Program Characteristics:

- Information Sharing across the ICE enterprise
- Automated, repeatable, model-based procedures for assisting users and managers with coming to an informed decision
- Data Governance to ensure consistent metadata, business rules, and data content throughout the enterprise.
- Standardized Reporting
- Improved Data Quality

The IDSP is also responsible for providing development and support for the maintenance of the ICE Enterprise Data Warehouse (EDW). The EDW provides decision support services across the ICE enterprise to stakeholders in all ICE operational units. Data from across the enterprise is integrated, transformed, cleansed and maintained in the EDW. Access to the data is delivered through multiple presentation layers (e.g., dashboard, reports, statistics, analytics, queries and ad-hoc reporting capabilities). Current and anticipated presentation layers include but are not limited to the following:

- The IIDS executive dashboard
- Office of the Assistant Secretary Decision Support
- The Secure Communities Decisions Support
- Detention and Removal Operations Decision Support
- Office of Investigations Decision Support
- Office of Intelligence Decision Support
- Additional presentation layers as required to support emerging ICE mission requirements

To provide the foundation for the collection and collaboration of information, the ICE Modernization Program (ATLAS), ICE Mission Information Enterprise Query (IMI-EQ) Project procured the hardware (including data storage devices), software and provided partial funding for the initial development necessary to create a common data repository to produce standard and

ad hoc reports. The remaining funding for the initial development was provided by the ICE Office of Detention and Removal Operations (DRO). Consequently, IIDS was initially deployed primarily to the DRO on August 19, 2008. Since its launch, the user community has grown to include the following program offices:

- DRO Executive Information Unit
- DRO Detention Management Division
- DRO Removal Management Division
- DRO Criminal Alien Division
- DRO Field Operations Division (canned reports)
- Office of State and Local Coordination
- Office of the Assistant Secretary
- Secure Communities Interoperability
- Fugitive Operation Support Center

New initiatives are underway to provide historical, current, and predictive views of business operations to support ICE organizations. This FY 2011 funding request is specifically targeted at the IIDS effort to support various program reporting needs. This investment will provide FY 2011 funding in the amount of \$3.0 million.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

The ICE Decision Support Program initiative supports DHS Goal - 5 Strengthen and Unify DHS Operations and Management and DHS Objective - 5.2 Advance Intelligence and Information Sharing and will improve information sharing efforts across ICE. The decision support initiative outlined herein supports the larger information sharing goals of the department, as well as strengthening and unifying the operations and management of ICE's mission areas. Specifically, it delivers support to law enforcement officers by capturing and sharing investigative and intelligence data throughout the lifecycle of a case from a single point of access. It creates intelligence and investigation statistics for management, congressional and White House reports.

The most significant improvement to be gained by funding the IDSP will be development towards standardized metrics through ICE Operational Reports, Trend Analysis Reporting, and Statistical Reports. Additional performance gains will be realized through new decision support functionality that includes Ad-Hoc Reporting, the assurance of a Sole Data Source, and Reduce Data Integrity Issues, thus ensuring the highest data quality and reporting information sources available to ICE leadership and the IDSP customers. In addition, it will also reduce time gathering and data massaging from separate, stovepipe applications/databases, as well as reduce the time spent on data reconciliation.

Current Services Level							-	-	-
Program Increase							-	-	8,000
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>8,000</b>

Description of Item

This funding request is specifically targeted at creating a robust IT environment where individual systems are hardened, authentication is hardened, and ICE has increased capability to identify threats and react in much more effective manner.

*Non-Personnel costs (\$8.0 million):*

- Intelligence fusion capability (\$2.3 M): Improve intelligence fusion capability, centered on connectivity to the Joint Worldwide Intelligence Communications System (JWICS), Homeland Secure Data Network (HSDN), and state-of-the-art SOC capabilities to give ICE the required intelligence information needed to identify state-sponsored attacks that otherwise may go undetected. This capability will also implement cross domain solutions to facilitate information sharing with Federal, State, and local partners.
- Enterprise Cyber Identity Management (\$1.0 M): Continue integrating Single Sign-On (SSO) capability into the ICE enterprise, which will give ICE the ability to provide Project Management Office and Engineering support to maintain and expand service offerings for SSO Stewardship, Public Key Infrastructure (PKI) stewardship, as well as support for HSPD-12 across the department.
- Enterprise Operations Center (EOC) (\$3.0 M): Establish the basic EOC facility footprint for a purchased/leased facility; buildout and equip the Service Desk, the Network Operations Center, Security Operations Center; the Law Enforcement Service Center; provide the common technical infrastructure; and space necessary for the future build out of, National Law Enforcement Communications Center, ICE Reporting and Operations Center and Sensitive Compartmented Information Facility in subsequent years. The ICE EOC will be instituted in coordination with, and serve as backup to, the DHS enterprise-wide operations center being implemented by U.S. Customs and Border Protection, the

DHS network steward, which is charged with coordinating the DHS enterprise-wide operations center.

- Immediate Security Solutions (\$0.7 M): Continue implementation of recommended security solutions identified as a result of risk assessments, ICE's Top 25 security concerns, and other findings and recommendations.
- Project Management Office (PMO) Support (\$1.0 M): Partial contribution for shared support between the four Atlas Automation Modernization projects, used to staff the contractor PMO to provide integrated sound program management support for the FY11 initiatives, the ongoing multi-year program activities that were funded in prior years, plan future program activities, and ensure program adherence to cost, schedule, and performance goals.

### Justification

The Atlas Cyber Security Modernization Initiative will ensure that ICE can protect its sensitive information, provide information integrity, and ensure that its computer enterprise is available to support its missions. It will also ensure that DHS will realize the security and efficiency benefits of a Single Sign-On, PKI and HSPD-12 environment to protect and share information within the Department and with mission partners. Overall, ICE will be able to protect itself against known and suspected threats and attacks, promote increased awareness of security violations, fully integrate information assurance awareness and training activities across the ICE enterprise, improve customer satisfaction, and raise the security baseline, reducing the overall risk to the ICE and DHS environment.

### Impact on Performance (Relationship of Increase to Strategic Goals)

This expanded Cyber Defense capability will support the entire ICE computer enterprise. In order to handle the demands imposed by the DHS SOC, each DHS component, including ICE, is required to have its own cyber defense capabilities. All DHS Components are required to build secret compartmentalized information facilities (SCIF) in their SOC/CSIRC facilities, backup facilities, and HQ environments so that necessary intelligence information can be received by cleared personnel to protect ICE IT assets against known or suspected attacks. The certification and accreditation (C&A) effort will integrate hardening guidelines into all ICE systems and applications across the enterprise, thereby protecting assets against known vulnerabilities and reducing the overall risk to DHS. The Cyber Identity Management Services will provide benefit throughout all DHS components with Single Sign-On access to DHS applications, reduced helpdesk calls, and use of HSPD-12 Personal Identity Verification (PIV) cards for access management

### PPA Mission Statement

In FY 2011, ICE has included several information technology (IT) transformational initiatives into the Automation Modernization program: ICE Law Enforcement Systems Modernization, ATLAS Program – Infrastructure, Cyber Security Modernization, Tactical Communications, Detention and Removals Operations (DRO) Modernization program, and the replacement of ICE’s Financial System. The Automation Modernization program will allow ICE to improve information sharing across the Department of Homeland Security (DHS) and ICE organizations, strengthen information availability, improve detainee tracking and preparation of travel documents, provide a fully secure IT environment, and enhance financial management and audit practices.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 President's Budget	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	1,447	2,190	3,363	1,173

Permanent Positions includes salaries and benefits for 17 new FTEs in FY 2011, totaling an increase of \$1,173 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 President's Budget	FY 2010 to FY 2011 Change
<b>11.3 Other than full-time permanent</b>	128	193	325	132

Other than Permanent includes regular salaries and wages paid to civilian employees for part-time, temporary, or intermittent employment.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 President's Budget	FY 2010 to FY 2011 Change
<b>11.5 Other personnel compensation</b>	9	14	134	120

Other Personnel Compensation includes compensation above the basic rates paid directly to civilian employees, such as overtime, holiday pay, night work differential, and hazardous duty pay, supervisory differential, cash incentive awards, and royalties.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>12.1 Benefits</b>	360	545	982	437

Benefits include cash payments to other funds for the benefit of Federal civilian employees or direct payments to these employees, including life insurance, health insurance, employee retirement, work injury disabilities or death and professional liability insurance, recruitment, retention, or other incentives, and other allowances and payments

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 President's Budget	FY 2010 to FY 2011 Change
<b>21.0 Travel and transportation of persons</b>	28	42	40	(2)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2011 request includes a decrease of \$2 thousand.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Immigration and Customs Enforcement Construction**

### **I. Appropriation Overview**

#### **A – Mission Statement for Construction**

The Construction Program provides housing, processing, medical, administrative, and support facilities needed to assist and meet the needs of Detention and Removal activities. The Construction account funds are available until expended.

#### **B – Budget Activities:**

The ICE Construction Program has the authority to plan, design, and construct: housing, and processing, medical, administrative, and support facilities to support the detention of aliens, as well as perform repair and alteration of existing structures.

#### **C – Budget Request Summary:**

ICE's Office of Asset Management (OAM) has been recovering and redirecting previous multi-year funds to accomplish critical repairs for the last two years. Critical projects include: adding additional space in processing, medical, administrative, and support facilities; capitol improvement projects to replace critical systems that are approaching their maximum life expectancy; and projects to replace critical systems that are approaching their maximum life expectancy.

## II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

Note: FY 2009 actual obligations include \$16.8 million in carryover funds.

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**U.S. Immigration and Customs Enforcement**  
**Construction**  
**Program Performance Justification**  
(Dollars in Thousands)

**PPA: Construction**

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2009 Actuals</b>	<b>9</b>	<b>9</b>	<b>20,704</b>
<b>2010 Enacted</b>	-	-	<b>4,818</b>
2011 Adjustments-to-Base	-	-	(4,818)
<b>2011 Current Services</b>	-	-	-
<b>2011 Total Request</b>	-	-	-
Total Change 2010 to 2011	-	-	(4,818)

U.S. Immigration and Customs Enforcement does not request funding for Construction in FY 2011. This is a \$4.8 million decrease from the FY 2010 enacted level.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

ICE relies on a mix of Service Processing Centers (SPCs) that it owns and operates, as well as more than 300 Inter-governmental Service Agreement facilities owned by State and local governments and contractor-owned and operated facilities to house individuals who have entered the United States illegally and are undergoing adjudication. At present, approximately 89 percent of the detainee population is housed at contractor or state or local government-owned and operated facilities, with the remaining 11 percent housed at seven ICE-owned SPCs. The SPCs are located in: Aguadilla, Puerto Rico; Batavia, New York; El Centro, California; El Paso, Texas; Florence, Arizona; Miami, Florida; and Los Fresnos, Texas.

The number of illegal alien detainees held in the DHS/ICE system has risen significantly in recent years, with a corresponding increase in the cost for housing and serving this population.

ICE has included in the Budget a general provision that would allow the Secretary to sell surplus facilities if such sales are deemed to be in the best interest of the Federal government. While privatization is being studied there still remains the responsibility to provide safe and secure facilities for detainees and the ICE detention staff.

In FY 2009, ICE used \$16.8 million in carryover balances from Construction Program funding, and \$3.9 million in Construction funds that were appropriated in FY 2009 for alterations and repairs to existing ICE-owned SPCs.

In FY 2010, ICE is using carry-forward funding and appropriations of \$4.8 million to perform repairs and alterations based on health and safety issues, to maintain ICE-owned facilities.

In FY 2011, as additional requirements for medical, processing, dining, and warehousing grow due to increased populations at the SPCs, ICE constantly scrubs prior activity in the Construction account to determine if any recoveries can be made due to lower than anticipated projects costs. Remaining and recovered funds will be used for critical repairs, to maintain the present level of functionality of the SPCs as well as maintain a small emergency buffer in case of unanticipated failures to critical mechanical/electrical systems or natural disasters. In FY 2011, projects will be limited to health, life, and safety issues.

#### IV. Program Justification Changes

Not applicable

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

[For necessary expenses to plan, construct, renovate, equip, and maintain buildings and facilities necessary for the administration and enforcement of the laws relating to customs and immigration, \$4,818,000, to remain available until expended: Provided further, That none of the funds made available in this Act may be used to solicit or consider any request to privatize facilities currently owned by the United States Government and used to detain illegal aliens until the Committees on Appropriations of the Senate and the House of Representatives receive a plan for carrying out that privatization.] (Department of Homeland Security Appropriations Act, 2010.)

## **G. Capital Investment and Construction Initiative Listing**

The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 and other immigration statutes authorize ICE to detain illegal aliens who are charged with immigration violations, have entered the United States illegally, or have been ordered to leave the country. These aliens can be detained while their immigration proceedings are administered, which in turn facilitates their proper and expedient removal from the country. ICE's Office of Detention and Removal (DRO) administers a national detention program that uses funding appropriated specifically for the care of these aliens and includes the transportation, housing, subsistence, medical care, and guard service necessary to provide safe and humane environments for the detainee population and detention staff. The responsibility begins when a detainee enters DRO custody and continues until the alien can be released into the community or removed from the United States.

The ICE Construction Program provides housing, processing, medical, administrative, and support facilities needed to support the detention of aliens. These expansion projects are part of an ongoing capital investment program that is intended to meet the growing national demand for detention capacity. ICE continues to address the need for bed space and support facilities required to handle the processing and removal of aliens during immigration proceedings, relative to the total number of potentially removable aliens in the country.

Carry-forward funds will be used for maintenance of existing ICE owned SPC.

### **Facility Repair & Alterations**

#### **1. Project Description, Justification, and Scope**

Repair and alteration projects are continually identified at existing ICE owned facilities. These projects are not capital construction projects, but are repair and alteration projects necessary to maintain government owned facilities and ensure they comply with life safety requirements and code compliance.

#### **2. Significant Changes**

In FY 2010, carryover funds and appropriations within the no-year Construction account will be used for emergency repairs and alterations. Only critical repairs will be funded; all upgrades will be prioritized.

#### **3. Project Schedule**

	<b>Work Initiated</b>	<b>Work Completed</b>	<b>Physical Start</b>	<b>Physical Complete</b>	<b>Total Estimated Cost (000)</b>	<b>Total Project Cost (000)</b>
FY 2011 Budget Request	\$0	\$0	10/01/2009	9/30/2010	\$0	\$0

**4. Schedule of Project Funding  
(Dollars in Thousands)**

	<b>Prior</b>	<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>Total</b>
Obligation (actual and planned)	\$34,057	\$5,000	\$4,818	\$0	\$43,875
Expenditure (actual and planned)	\$34,057	\$5,000	\$4,818	\$0	\$43,875

Repair and alteration projects are not capital construction projects and are not illustrated in the same manner as capital construction projects. Breakdown of projects related to expenditures is modified to reflect segments of repair and alteration.

**5. Method of Performance**

All detention-related projects are currently planned, managed, and monitored within the ICE Office of Asset Management. ICE/OAM entered into a MOU with the United States Army Corps of Engineers (USACE) to provide environmental documentation, planning, design, construction, procurement, and management of services to include construction design, planning, and project management.

**6. Budget Allocation to Programs**

	<b>Allocated Budget (Thousands)</b>
<b>Program</b>	<b>FY 2011</b>
Construction	\$0
<b>Total</b>	<b>\$0</b>

**7. Compliance with Applicable Public Laws, Regulations, Standards, and Executive Orders**

The United States Army Corps of Engineers (USACE) is responsible for the compliance of all applicable laws, code compliance, regulations and standards for all ICE projects. The services being provided by USACE are managed and monitored by ICE/OAM. ICE projects must comply with the following life-safety codes and standards:

- Local building codes or the latest edition of one of the model building codes, including Uniform Building Code (UBC); Building Officials & Code Administrators International (BOCA); Standard Building Code (SBC); and International Building Code 2000 (IBC)
- National Fire Protection Association (NFPA) Standard 101 Life Safety Code
- National Electric Code

ICE Facilities must also comply with the ICE Detention Design Guidelines (2002 edition), and the ICE Detention Construction Guidelines (2004 edition).

Handicapped accessibility codes and standards apply to ICE facilities as follows:

- Facilities must comply with the Uniform Federal Accessibility Standards, Federal Standard 795
- Facilities should comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG)

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. Immigration and Customs Enforcement (ICE) Student Exchange and Visitor Program**

### **I. Appropriation Overview**

#### **A – Mission Statement for Student Exchange and Visitor Program**

The Student and Exchange Visitor Program's (SEVP) mission is to enhance national security by collecting, maintaining, and providing reliable information on foreign students, exchange visitors, and the schools and exchange programs that host them. SEVP is an enforcement tool to assist in keeping our Nation safe while facilitating the participation of students and exchange visitors in the academic programs in the United States.

#### **B – Budget Activities:**

SEVP administers the School Certification Program and manages the Student and Exchange Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, and J visa classifications) in the United States. SEVP also provides outreach and training for SEVIS users. SEVIS is used by the Compliance Enforcement Unit (CEU) to identify foreign students and exchange visitors who fail to enroll or maintain status at their schools. The CEU also uses SEVIS to identify schools and exchange visitor programs that are not in compliance with regulatory requirements.

#### **C – Budget Request Summary:**

ICE requests \$120.0 million and 387 positions, 387 FTE, for SEVP in FY 2011. This is the same as FY 2010. The requested funds will provide the resources needed to fund base requirements for salaries and benefits and operational expenses.

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U.S. Immigration and Customs Enforcement  
Student Exchange and Visitor Program  
Program Performance Justification**  
(Dollars in Thousands)

#### PPA: Student Exchange and Visitor Program

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2009 Actuals</b>	<b>34</b>	<b>34</b>	<b>81,002</b>
<b>2010 Enacted</b>	<b>387</b>	<b>387</b>	<b>120,000</b>
<b>2011 Current Services</b>	<b>387</b>	<b>387</b>	<b>120,000</b>
<b>2011 Total Request</b>	<b>387</b>	<b>387</b>	<b>120,000</b>
Total Change 2010 to 2011	-	-	-

U.S. Immigration and Customs Enforcement requests \$120.0 million for this activity. There is no change from the FY 2010 enacted level. In FY 2011, this PPA is estimated to pay \$0.4 million in service-wide costs (e.g., rent, working capital fund).

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Department of Homeland Security (DHS), U.S. Immigration and Customs Enforcement (ICE) Student and Exchange Visitor Program (SEVP) works to enhance national security. The program accomplishes this by collecting, maintaining, and providing reliable information on foreign students, exchange visitors, and the schools and exchange programs that host them. SEVP facilitates the participation of students and exchange visitors in the academic programs in the United States and works to ensure that the programs are not used to illegally allow entrance into the country.

SEVP administers the Student and Exchange Visitor Information System (SEVIS). SEVIS collects, maintains and provides information on foreign students, exchange visitors and their dependents on F, M, and J visas while studying in the United States. SEVIS also maintains information on the schools and program sponsors authorized to use SEVIS and host foreign students and exchange visitors. SEVIS assists in the identification of those who are not in compliance with visa rules and immigration law and who may be a threat to national security.

SEVIS is ICE's core technology in this critical homeland security mission. It is the first web-based system that provides real-time, up-to-date information on F, M, and J visa

holders. The system can be accessed at any time making it an effective law enforcement tool used by agencies within the Department of Homeland Security, Department of State, and Department of Justice. SEVIS is used by the Compliance Enforcement Unit (CEU) to identify foreign students and exchange visitors who fail to enroll or maintain status at their schools. SEVP and CEU also use SEVIS to identify schools and exchange visitor programs that are not in compliance with regulatory requirements. Information maintained in SEVIS is instrumental in supporting ICE's role in conducting human smuggling investigations that identify and prosecute criminal organizations involved in the transporting and harboring of illegal aliens into the United States.

All prospective students and exchange visitors are required to pay a SEVP processing fee electronically or by check using the Form I-901 (currently fees are \$200 for F and M visa holders, \$180 for J visa holders and \$35 for some exchange visitors) prior to seeking a visa at consulates and embassies overseas. This fee, in addition to the fees collected from schools seeking certification to host nonimmigrant students, provides the full funding for SEVP, including CEU agents that support enforcement of SEVP policies and regulations. Statutory and regulatory guidance requires SEVP to review its fee structure every two years to ensure that the cost of the services that are provided are fully captured by fees assessed on those receiving the services. The last fee study was completed in FY 2007; a new fee study initiated in FY 2009 is scheduled for completion by the end of the 2<sup>nd</sup> Quarter of FY 2010 for the FY 2011-2012 program fees.

### **Key Accomplishments**

SEVP operations are dependent on revenue meeting forecasts. In FY 2009, even though fees were increased, there was a revenue shortfall due to application volumes falling below projections, likely due in part to the depressed world economy; SEVP implemented a contingency plan to accommodate the shortfall. SEVP was proactive to ensure enhanced performance as planned but delayed some planned hiring activities for FY 2009 until FY 2010 and FY 2011 to ensure spending did not exceed available funds.

FY 2009 significant SEVP accomplishments included:

- Implementation of the revised fee rule;
- Continued development of a newly configured SEVIS II system that is based on tracking and monitoring individuals rather than records (SEVIS II will be highly interoperable with all of ICE's stakeholders eliminating critical vulnerabilities);
- Increased outreach to the academic and student communities with SEVP Response Center, a dedicated customer information and queries resolution that handles more than 2100 calls monthly;
- Developed and implemented a reorganization plan to establish the management, organization and grade structure to effectively integrate 88 additional FTE for recertification and field liaison activities;
- Developed and implemented a systematic hiring plan to prioritize hiring new positions and fill existing vacancies;
- Developed recertification process and deployment plan for 24 FTE for recertification;

- Developed a revenue contingency plan to monitor fee receipts, project revenue shortfalls and identify potential savings based on current revenues;
- Initiated a new fee study which is scheduled for completion by the end 2<sup>nd</sup> Quarter FY 2010 for the FY 2011-2012 program fees;
- Completed a 14 city national tour in support of the FY 2009 fee rule resulting in less than 114 comments to this rule;
- Promulgated an Interim Final Rule extending optional practice training to 29 months for those F-1 students in Science, Technology, Education and Mathematics fields;
- Promulgated a Final Rule on extending Optional Practical Training;
- Developed a plan for the digitization of all SEVIS school files with anticipated implementation in January 2011;
- Developed a comprehensive strategy to assume management of eight flight schools previously authorized by the Department of State to provide professional flight training to J visa nonimmigrants;
- Led a significant inter-governmental effort involving various federal components, certified schools and the 56 state Department of Motor Vehicles offices to identify a prescribed information sharing program and a process for exceptions processing;
- Implemented a Strategic Communications program that positions the SEVP director into relationships with key national decision makers such as university and college presidents and provosts; and
- Continued development of SEVP Automated Management System.

FY 2010 planned accomplishments include:

- Hiring of 24 FTE to staff recertification positions within SEVP;
- Hiring of 64 FTEs which will provide assistance to SEVP's stakeholders to improve SEVP's ability to effectively ensure optimal compliance by the academic community with immigration regulation;
- Formulation of comprehensive revision of the sections of 8 CFR 214 under SEVP's authority to clarify the specifications for nonimmigrant students (F and M visas) and exchange visitors (J visas), explain the school certification criteria with more detail, incorporates all comments/questions received since the implementation of SEVIS incorporate significant refinements in policy and procedures, supporting the transition to SEVIS II and deletes obsolete provisions and language;
- Completing fee study and formulating fee rule for FY 2011-2012 program fees with recommendations regarding potential fee adjustments based on revised application volume projections and future program requirements;
- Development of a Border Commuter Regulation that will provide implementing instructions for use of the F3 and M3 visas;
- Completion of the first phase of automated Standard Operating Plans for SEVP; and
- Deployment of SEVP Automated Management System.

For FY 2011, SEVP is not seeking additional resources for staffing increases or new initiatives but a fee study is underway to determine the correct fee amounts to fund SEVP activities. Rather, SEVP will continue to work on the existing initiatives and further execute activities and programs newly established in FY 2009. Also, SEVP will continue working on the development of SEVIS II.

Below is a more detailed analysis of the accomplishments and goals for the ongoing compliance enforcement, SEVIS II, recertification and liaison initiatives that were newly established in FY 2009.

**Compliance Enforcement:** The budget supports expansion of SEVIS compliance enforcement efforts that are essential to support ICE and DHS strategic objectives to prevent the unlawful exploitation of our Nation's people and institutions by nonimmigrant's violating laws within the homeland, and to enforce nonimmigrant compliance with our immigration, customs, and criminal laws.

FY 2009 significant accomplishments included:

- The Compliance Enforcement Unit (CEU) analyzed 149,114 SEVIS leads in FY 2009, in contrast to 99,546 analyzed in FY 2008. This represents an increase of 50%. The CEU also responded to 132 requests for analysis to support major criminal cases. This is 81% higher than the 73 requests for analytical support in FY 2008. To support these efforts, approximately \$4,880,000 in SEVIS funding was spent on CEU analytical and support contracts.
- ICE Field Agents initiated 3,488 SEVIS investigations in FY 2009, up from 2,317 in FY 2008. This represents an increase of 51% from FY 2008 to FY 2009.
- In FY 2009, SEVIS investigations resulted in 1,033 SEVIS-related arrests, up 27% from the 815 SEVIS arrests made in FY 2008.
- ICE Agents expended 181,990 hours toward SEVIS compliance investigations in FY 2009. This represents a 27% increase from the 142,916 hours expended in FY 2008.
- Approximately \$350,000 in SEVIS funding was spent on surveillance, tracking, utility and specialized IT equipment to support major SEVIS visa fraud investigative activities by field offices.
- Approximately \$105,000 of SEVIS funding was spent to support major visa fraud cases investigating criminal exploitations of SEVIS.

FY 2010 planned accomplishments include:

- The CEU will increase all categories of leads, referrals and arrests by ten percent. To support these cases, SEVP will purchase specialized equipment for surveillance, tracking, utility and IT resources for compliance cases requiring positive identification of foreign nationals during field encounters including mobile biometric identification equipment.
- The CEU will increase major criminal investigative activities involving sensitive national security concerns and major criminal fraud cases by more than ten percent. Key areas where funding will be used include, but are not limited to:

analysis, surveillance, undercover operations, collection of evidence, and prosecutions.

- Increase capability to provide higher-level specialized analytical support for SEVIS major criminal investigations.

For FY 2011, SEVP and OI will hire the remaining 99 out of 129 FTE for CEU activities funded by the fee increase in FY 2009. Hiring of these additional resources was deferred to FY 2011 as part of the revenue contingency plan because of the shortfall in fee receipts beginning in FY 2009. It is expected that the number of new major visa fraud cases will continue to increase in FY 2011. Also, a number of the current major criminal cases are expected to mature to the completion phase.

**SEVIS II:** Fundamental to the attainment of any DHS and ICE strategic objective to detect and deter threats to our homeland through terrorist exploitation of legitimate student entry pathways into the Homeland is SEVP's ability to collect information and track legitimate non-immigrant students and certified schools. This tracking can only be accomplished through the SEVIS system.

The current SEVIS system does not adequately meet the needs of the national security, law enforcement, and educational institution communities, which all rely heavily on SEVIS data and its interoperability. The SEVIS II initiative supports the DHS Strategic Goal of Prevention, Objective 2.2, Enforce Trade and Immigration Laws. It will meet the needs of the intelligence and enforcement communities increasing the ability to track and monitor individuals; integrate seamlessly with other intelligence systems; and provide real-time critical individual-based information. A newly configured and deployed SEVIS II system based on tracking and monitoring individuals rather than records that is highly interoperable with all of our stakeholders will eliminate critical vulnerabilities.

FY 2009 significant accomplishments included:

- Accommodated the use of biometric information to positively identify students and exchange visitors;
- Improved queries quality via name checks and biological information;
- Provided primary end users (port of entry and departure, and investigators) with the ability to accomplish real-time verification of data; and
- Enhanced search capability, and improved tracking and monitoring systems of other key national security and law enforcement agencies.

FY 2010 planned accomplishments include:

- Continue design and development of SEVIS II system that is based on tracking and monitoring individuals rather than records;
- Work with ICE OCIO to re-baseline the SEVIS II Lifecycle Cost Estimate (LCCE) and development and deployment schedule;
- Present re-baselined SEVIS II project to the DHS Acquisition Review Board (ARB) for formal approval of revised development schedule and LCCE;
- Work with U.S. Citizenship and Immigration Services (USCIS) Transformation Program Office to ensure that key components of SEVIS II development,

including Account Setup, and critical interfaces to USCIS systems are coordinated and delivered in accordance with the revised SEVIS II development schedule;

- Continue full engagement with academic and program sponsor community to ensure that system performance requirements are met and their interests and requirements are fully incorporated into SEVIS II;
- Continue outreach and partnership with Department of State and other DHS partners with the SEVIS II system; and
- Continue operations and maintenance of SEVIS.

In FY2011, SEVP will continue development activities for SEVIS II in accordance with the re-baselined cost and schedule. SEVP will continue to work closely with key program stakeholders in the academic and program sponsor communities and SEVIS II partners to share information and collaborate on development issues. SEVP will continue to operate and maintain SEVIS to fully meet mission requirements until SEVIS II is fully deployed and operational.

**Recertification:** The Enhanced Border Security and Visa Entry Reform Act of 2002 mandated that DHS conduct recertification of certified educational institutions every two years. SEVP recertification is a review of an educational institution previously certified to affirm that the educational institutions remains eligible and is complying with regulatory recordkeeping, retention, and reporting requirements. The focus of recertification is past performance coupled with a review to ensure that the educational institution maintains its basic eligibility for initial certification. The process may include an on-site visit or review. Approximately 9,200 educational institutions have been certified by SEVP.

FY 2009 significant accomplishments included:

- Completed position descriptions for personnel needed to initiate the recertification process and forwarded to Workforce Management for posting;
- Completed documentation of recertification standard operating procedures and related job aids; and
- Prepared for data migration (from SEVIS I to SEVIS II) associated with recertification of all SEVIS certified schools.

FY 2010 planned accomplishments include:

- Hiring of additional staff to provide a recertification program capability for SEVP;
- Coordinating expanded efforts with the new liaison unit and the already established compliance enforcement unit; and
- Coordinating with SEVP's stakeholders, to include the Department of State, to ensure timely and thorough recertification reviews.

For FY 2011, it is expected that the 33 FTEs for this initiative will be refining their work processes and enabling thorough and timely recertification reviews of educational institutions.

**Liaison:** The purpose of the SEVP Liaison initiative is to improve dialog and provide assistance between SEVP and the stakeholder communities it serves. Liaisons will proactively provide training as required, disseminate information on policy changes and conduct follow-up visits with stakeholders as needed. Liaisons will be fully trained in all aspects of the Student and Exchange Visitor Program and will be central to ensuring communication between the program and its stakeholders. Liaisons will undergo a comprehensive training program prior to their assignment so that the program can work toward consistency in its policies and procedures. Through the liaisons, SEVP hopes to see improved data integrity in SEVIS. Liaisons will be co-located in ICE Special Agent In-Charge offices across the United States. They will provide assistance to the more than 9,000 schools approved by SEVP as well as stakeholders. The budget request to fund the hiring and deployment of the liaison representatives will enable SEVP to improve its ability to effectively ensure optimal compliance by the academic community with immigration regulations.

Although staffing of the Liaison initiative was deferred due to budget constraints, FY 2009 significant accomplishments included:

- Continued development and refinement of Liaison territories structure and resubmitted request for approval of revised territory (SAC/RAC) offices;
- Development of Liaison training tools; and
- Development of comprehensive remote office and automation support.

FY 2010 planned accomplishments include:

- Hiring additional staff to establish a liaison function for SEVP. These positions and related support costs will provide support to educational institutions that desire to host foreign students and exchange visitors. By statute, these institutions require initial certification by SEVP and subsequent recertification every two years; and
- Coordinating expanded efforts with the new liaison unit and the already established compliance enforcement unit.

For FY 2011, the 64 FTEs for this initiative will have developed a fully functioning and robust liaison program that coordinates on a routine basis with other OI, ICE, DHS, and educational institution stakeholders.

### PPA Mission Statement

The Student and Exchange Visitor Program (SEVP), which is a division of U.S. Immigration and Customs Enforcement (ICE) administers the School Certification Program and manages the Student and Exchange Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, J visa classification) in the United States. SEVIS is designed to keep our nation safe while facilitating the participation of students and exchange visitors seeking to study in the United States.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	10,766	15,950	15,950	-

Permanent Positions includes salaries and benefits for 0 new FTEs in FY 2011 and no increase.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.3 Other than full-time permanent	17	26	26	-

Other than Permanent includes regular salaries and wages paid to civilian employees for part-time, temporary, or intermittent employment.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.5 Other personnel compensation	118	175	175	-

Other Personnel Compensation includes compensation above the basic rates paid directly to civilian employees, such as overtime, holiday pay, night work differential, and hazardous duty pay, supervisory differential, cash incentive awards, and royalties.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change

## **Breached Bond Detention Fund**

### **I. Appropriation Overview**

#### **A – Mission Statement for Breached Bond Detention Fund**

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of \$8,000,000 posted under the INA, which are recovered by the Department of Justice, are deposited as offsetting collections into this fund.

#### **B – Budget Activities:**

Amounts deposited into the fund, which remain available until expended, can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

#### **C – Budget Request Summary:**

For FY 2011, ICE requests 13 positions, 13 FTE, and \$75,000,000 for new collections and corresponding spending authority. ICE uses this money as part of its overall detention budget and in FY 2011 will allow ICE to fund an estimated 1,541 detention beds and related costs such as healthcare and compliance oversight.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond/Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of the first \$8,000,000 are deposited as offsetting collections into this fund. Amounts deposited into the fund, which remain available until expended, are used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

All collections in excess of the first \$8,000,000 are deposited as offsetting collections into the Breached Bond Detention fund. Amounts deposited into the fund, which remain available until expended, are used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

ICE uses these resources to support bed space and related costs such as healthcare and compliance oversight. These funds also support 13 staff including bond control specialists, immigration enforcement agents, and administrative personnel.<sup>1</sup>

---

<sup>1</sup> Previously, this FTE figure was reported as 63 FTE in the President's Budget FY 2010 request; the revised total of 13 FTE reflects an analysis of active positions currently funded by Breached Bond.

### PPA Mission Statement

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond/Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of \$8,000,000 posted under the INA, which are recovered by the Department of Justice, are deposited as offsetting collections into this fund. Amounts deposited into the fund, which remain available until expended, can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>11.1 Total FTE &amp; personnel compensation</b>	778	779	779	-

Permanent Positions includes salaries and benefits for 0 new FTEs in FY 2011 with no change from FY 2010.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change

**Immigration Inspection User Fees**

## **I. Appropriation Overview**

### **A – Mission Statement for Immigration Inspection User Fees**

The ICE Immigration User Fee account is a repository for fees collected from passengers arriving on commercial aircraft and vessels at U.S.-operated air and sea ports of entry as codified in 8 U.S.C 1103, 1356, section 286, the Immigration and Nationality Act. These fees are used to recover some of the costs of ICE operations to deter, detect, detain, adjudicate, and remove passengers attempting to make an unauthorized landing or to unlawfully bring aliens into the United States through air and sea ports. These ICE activities encompass: expanding, operating, and maintaining information systems for nonimmigrant control; detecting fraudulent documents used by passengers traveling to the United States; investigating crimes relating to admissibility and establishing the government's legal position regarding all detentions and representing the government in all legal proceedings involving immigration and admissibility; transportation of detained aliens to immigration legal proceedings who arrive at air and sea ports of entry; providing detention and removal services for inadmissible aliens arriving on commercial aircraft or vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry; and providing training and technical assistance to commercial airline and vessel personnel regarding detection of fraudulent documents; and program oversight and management.

### **B – Budget Activities:**

The Immigration Inspection User Fee will fund 276 ICE positions.

### **C – Budget Request Summary:**

ICE requests 276 positions, 276 FTE, and \$116,387,475 in new collections and corresponding spending authority for FY 2011. The increase from FY 2010 represents a projected increase in fee collections based on increased passenger volume and will allow for the funding of 1,380 detention beds.

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U.S. Immigration and Customs Enforcement  
Immigration Inspection User Fees  
Program Performance Justification**  
(Dollars in Thousands)

#### PPA: Immigration Inspection User Fees

	<u>Perm. Pos</u>	<u>FTE</u>	<u>Amount</u>
<b>2009 Actuals</b>	<b>187</b>	<b>139</b>	<b>106,285</b>
<b>2010 Enacted</b>	<b>276</b>	<b>276</b>	<b>109,800</b>
2011 Adjustments-to-Base	-	-	6,587
<b>2011 Current Services</b>	<b>276</b>	<b>276</b>	<b>116,387</b>
<b>2011 Total Request</b>	<b>276</b>	<b>276</b>	<b>116,387</b>
Total Change 2010 to 2011	-	-	6,587

U.S. Immigration and Customs Enforcement requests \$116.4 million for this activity. This is a \$6.6 million increase from the FY 2010 enacted level, which is for an adjustment in the estimated collection of fees.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Immigration User Fee account was established as a repository for fees collected from passengers arriving at air and sea ports-of-entry on airlines and vessels for immigration inspection and fines imposed to prevent unauthorized landing and unlawful bringing of aliens into the United States, penalties for document fraud, and liquidated damages and expenses collected. The fees cover the cost of providing detention and removal services, investigations, legal proceedings, and intelligence services for the detection of fraudulent documents, supporting immigration inspection and detection of inadmissible aliens arriving on commercial aircraft and vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry. All deposits into the Immigration User Fee account are available until expended. U.S. Customs and Border Protection projects a six percent increase over FY 2010 in air travel and corresponding passenger volume and fee collections during FY 2011.

### PPA Mission Statement

The Immigration User Fee account was established as a repository for fees collected from arriving airline passenger for immigration inspection and fines imposed to prevent unauthorized landing and unlawful bringing of aliens into the United States, penalties for document fraud, and liquidated damages and expenses collected. The fees cover the cost of providing detention and removal services for inadmissible aliens arriving on commercial aircraft and vessels and for any inadmissible alien who has attempted illegal entry in to the United States through avoidance of immigration inspection at air or sea ports-of-entry. All deposits into the Immigration User Fee account are available until expended.

## Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>11.1 Total FTE &amp; personnel compensation</b>	<b>9,883</b>	<b>10,210</b>	<b>10,823</b>	<b>613</b>

Permanent Positions includes salaries and benefits for 0 new FTEs in FY 2011, with an increase of \$613 thousand.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>11.3 Other than full-time permanent</b>	<b>207</b>	<b>214</b>	<b>227</b>	<b>13</b>

Other than Permanent includes regular salaries and wages paid to civilian employees for part-time, temporary, or intermittent employment.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>11.5 Other personnel compensation</b>	<b>2,091</b>	<b>2,160</b>	<b>2,290</b>	<b>130</b>

Other Personnel Compensation includes compensation above the basic rates paid directly to civilian employees, such as overtime, holiday pay, night work differential, and hazardous duty pay, supervisory differential, cash incentive awards, and royalties.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>12.1 Benefits</b>	<b>4,422</b>	<b>4,568</b>	<b>4,842</b>	<b>274</b>

Benefits include cash payments to other funds for the benefit of Federal civilian employees or direct payments to these employees, including life insurance, health insurance, employee retirement, work injury disabilities or death and professional liability insurance, recruitment, retention, or other incentives, and other allowances and payments

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>21.0 Travel and transportation of persons</b>	<b>182</b>	<b>188</b>	<b>199</b>	<b>11</b>

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2011 request includes an increase of \$11 thousand.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>22.0 Transportation of things</b>	<b>108</b>	<b>111</b>	<b>118</b>	<b>7</b>

Transportation of Things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2011 request includes an increase of \$7 thousand.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>23.2 Rental payments to others</b>	<b>3</b>	<b>3</b>	<b>3</b>	<b>-</b>

Other Rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2011 request includes no changes from the previous year.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>23.3 Communications utilities and miscellaneous charges</b>	<b>87</b>	<b>90</b>	<b>96</b>	<b>6</b>

Communications, Utilities, and Miscellaneous Charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services, including Blackberry/pager/cellular phone (land line). The FY 2011 includes an increase of \$6 thousand for these activities.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.1 Advisory and assistance services</b>	<b>4,450</b>	<b>4,597</b>	<b>4,873</b>	<b>276</b>

Advisory and Assistance Services include services acquired by contract from non-Federal sources (i.e., the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2011 request includes an increase of \$276 thousand.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.2 Other services</b>	<b>29,833</b>	<b>30,821</b>	<b>32,667</b>	<b>1,846</b>

Other Services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2011 includes an increase of \$1,846 thousand for these activities.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>

## **A. Mission and Description of U.S. Immigration and Customs Enforcement**

U.S. Immigration and Customs Enforcement (ICE) is the largest investigative arm of the Department of Homeland Security (DHS). ICE's mission is to protect America and uphold public safety by targeting the people, money, and materials that support terrorists and criminal activities. The ICE organization is composed of law enforcement divisions and several support divisions. The four main operations of ICE are investigations of customs and immigration violations, criminal alien enforcement, international investigations, and detention and removal operations. These operations are carried out by the Office of Investigations (Domestic), Office of International Affairs, and Detention and Removal Operations, with support by the Office of Intelligence, Office of the Principal Legal Advisor, Office of Professional Responsibility, Office of Secure Communities/Comprehensive Identification and Removal of Criminal Aliens, and the offices of mission support.

The *Office of Investigations (OI)* enforces trade, immigration, and customs laws. OI investigates a wide range of criminal activities including: illegal immigration; weapons trafficking (including weapons of mass destruction and nuclear, biological, chemical, and radiological agents); narcotics and contraband smuggling; human smuggling and trafficking; money laundering and other financial crimes; fraudulent trade practices and intellectual property rights violations; child pornography; and child sex tourism.

The *Office of International Affairs (OIA)* enhances and promotes the ICE mission of protecting the United States by using an international, multi-faceted, law enforcement approach and partnering with foreign and domestic counterparts to combat criminal and terrorist activities.

The *Office of Detention and Removal Operations (DRO)* processes, detains, and removes criminal aliens, aliens residing illegally in the United States, and non-immigrants apprehended for infraction of immigration laws (including administrative violations). DRO is responsible for the safe and humane treatment of detained aliens while in ICE custody. This includes the safe and secure transportation from the point of apprehension through each phase of their immigration proceedings including removal of the alien from the United States. In addition to managing the detained alien population, the Criminal Alien Program (CAP) identifies criminal aliens who are incarcerated in Federal, State, and local facilities. CAP prepares criminal aliens for immigration proceedings and ensures that they are not released into the community. DRO also manages the ICE Fugitive Operations program that locates and captures aliens who have violated conditions of release and subsequently absconded.

The *Office of the Principal Legal Advisor (OPLA)* provides the legal advice, training, and services required to support the ICE mission. As the legal representative for the U.S. Government at immigration court hearings, OPLA attorneys handle a variety of immigration-related issues that range from contested removals to custody determinations to applications for administrative relief. Additionally, OPLA provides legal advice in customs-related enforcement actions, represents the Government in Merit System Protection Board and Equal Employment Opportunity hearings, provides ethics advice, handles matters involving commercial and administrative law, and litigates the removal of human rights abusers and aliens that threaten the national security of the United States.

The *Office of Professional Responsibility (OPR)* is assigned a broad range of mission responsibilities. Among the most important duties tasked to OPR is the investigation of allegations of misconduct involving employees of ICE and Customs and Border Protection (CBP). In addition to maintaining its ability to conduct internal investigations, OPR conducts independent inspections and reviews of ICE offices, operations and processes so as to provide executive management with an independent review

of the agency's organizational health and assess the effectiveness and efficiency of the overall ICE mission. OPR ensures that all ICE applicants are properly screened prior to entering on duty by appropriately assessing the security clearance level needed for all ICE Federal and contract employees. Finally, the OPR Security Management Unit provides appropriate oversight for all physical, communication and operational security requirements governing ICE employees and facilities worldwide.

The *Office of Intelligence* collects, analyzes, and distributes information on critical homeland security vulnerabilities that could be exploited by terrorist and criminal organizations. Intelligence utilizes data and information on the movement of people, money, and materials into, within, and out of the United States to provide accurate and timely reporting to ICE leadership and field agents. Intelligence Operations' Field Intelligence Groups (FIGs) are the agency's primary vehicle for intelligence analysis in support of field operations and enforcement. FIGs link headquarters and field components to facilitate intelligence collection, integration, analysis, and dissemination.

*Secure Communities/A Comprehensive Plan to Identify and Remove Criminal Aliens (SC/CIRCA)* is a plan to improve community safety by transforming the way the Federal government cooperates with State and local law enforcement agencies to identify, detain, and remove criminal aliens held in custody and at large. The Office of SC/CIRCA is working to revolutionize immigration enforcement by using technology to share information between law enforcement agencies and by applying risk-based methodologies to focus resources on assisting local communities in the removal of those criminal aliens representing the greatest threat to community safety.

The *Mission Support* offices includes the Office of the Assistant Secretary, Office of the Chief Financial Officer, Office of Acquisition Management, and Office of the Chief Information Officer. Their functions are:

- Office of the Assistant Secretary (OAS) is responsible for the advancement of the agency's objectives outlined in the ICE strategic plan. This includes both operational and management support to meet day-to-day organizational needs, as well as long-term agency goals. The operational division provides leadership and coordination for all of ICE's operational components, to address operational challenges, and to support ICE's continued growth and development as a premier law enforcement agency. The management division provides coordination of all administrative and managerial components of ICE. OAS is responsible for OSLC program management, Human Capital, Congressional Relations, Public Affairs, Training and the Freedom of Information Act office.
- Office of the Chief Financial Officer (OCFO) works to effectively manage cost controls and to determine the availability and efficient use of resources and services. OCFO implements mechanisms to develop performance-budget integration, strategic and competitive sourcing, financial management, and capital asset management to support ICE's mission.
- Office of Acquisition Management (OAQ) is a customer-focused organization with an enterprise-wide, strategic approach to procurement. OAQ operates as a full business partner with internal and external organizations and serves as a strategic asset dedicated to improving the agency's overall business performance. The mission of OAQ is to create quality business solutions that accomplish ICE's mission goals.

- The Office of the Chief Information Officer (OCIO) provides information technology services and products that enable ICE and DHS to meet their respective missions. In order to meet these goals, OCIO has developed a number of critical IT initiatives that will help ICE to modernize its IT systems, adapt and conform to modern IT management disciplines, and provide IT solutions throughout ICE.

## **B. Major Programs and Key Strategic Issues**

ICE continues to move forward and maintain focus on changing threats and the strategic issues facing our Nation, and is improving community safety by transforming the way the federal government cooperates with state and local law enforcement agencies to identify, detain and remove all criminal aliens held in custody.

**Investigations (OI)** - ICE received \$2,183.798 million for Investigations activities in FY 2010.

The Office of Investigations (OI) enforces customs and immigration laws through the investigation of activities, persons, and events that may pose a threat to the safety or security of the United States and its citizens.

### **Key Accomplishments/Planned Accomplishments**

In addition to ongoing activities, OI accomplished the following in FY 2009:

- Executed operations in seven additional Border Enforcement Task Force (BEST) locations in FY 2009 to bring the total number to 17; new BEST seaport operations in Los Angeles/Long Beach, Miami, and New York/New Jersey; southwest border BEST operations in Las Cruces and Deming, New Mexico; northern border BEST operations in Detroit, Michigan; and an overseas BEST in Mexico City;
- Managed the Armas Cruzadas Surge Operation consisting of a three month enforcement period to utilize all available assets to conduct enforcement activities which will maximize weapons interdictions including targeting of known weapons proliferation networks and conducting roving southbound operations with CBP at the ports of entry (POEs);
- Temporarily enhanced Southwest Border investigative resources to address border violence along the U.S./Mexico border and focus on cross border and threats in the region including contraband smuggling, money laundering and bulk cash smuggling, human smuggling and trafficking, transnational criminal gangs, and tunnel detection;
- Coordinated with Census, the State Department, and U.S. Customs and Border Protection (CBP) to put in place the necessary regulation changes so that the serial numbers on all firearms exported from the U.S. will be captured at the time of export;
- In coordination with CBP, implemented HQ-initiated Fraud Investigative Strike Team Operations to ten ports/ICE offices;
- Project Canadian Operations Linked to Telemarketing (COLT), identifying, disrupting and dismantling organizations perpetrating this fraudulent scheme and seizing the proceeds as well as returning money to victims of such crimes.

In addition to ongoing activities, OI plans to accomplish the following in FY 2010:

- Permanently expand investigative resources at the Southwest Border to address border violence along the U.S./Mexico border and focus on cross border and threats in the region including contraband smuggling, money laundering and bulk cash smuggling, human smuggling and trafficking, transnational criminal gangs, and tunnel detection;
- Expand the BEST program to additional seaport locations in San Juan, Puerto Rico, New Orleans, Louisiana, Charleston, South Carolina, Boston, Massachusetts, Houston, Texas, and Honolulu, Hawaii;
- Coordinate with CBP to expand the "security bond" initiative targeting the illegal diversion of commercial goods transported globally via the in-bond process;

In FY 2011, OI will:

- Expand Operation Armas Cruzadas to incorporate additional agency partners and increase the scope of targeting, interdiction, and investigation of the smuggling of weapons from the U.S. into Mexico to reduce the flow of weapons trafficking through U.S. borders;

**International Affairs** - ICE received \$154.007 million for international activities in FY 2010.

The Office of International Affairs (OIA) conducts criminal investigations of legal violations involving contraband smuggling, immigration violations, money laundering, arms/technology trafficking, child sexual exploitation (child pornography and child sex tourism), and cyber crimes overseas. OIA Attaché offices also acquire law enforcement intelligence and information; support other Department of Homeland Security (DHS) missions (e.g., DHS security initiatives and trade programs such as the Container Security Initiative (CSI), and the Trade Transparency Units [TTUs]); conduct international training; and act as the in-country ICE liaison with foreign governments and Embassy Staff.

The Attachés are responsible for the enforcement of health and safety issues related to products imported to the United States, including tainted or prohibited foodstuffs, unsafe toys, and other consumer products. OIA initiates investigative activities abroad and acquires law enforcement intelligence and information to support the ICE mission. OIA coordinates with foreign counterparts to share information under negotiated bilateral agreements and Customs Mutual Assistance Agreements. The Attaché offices also refer foreign leads to domestic ICE investigation offices and handle ICE investigative leads. OIA conducts and coordinates international training of law enforcement counterparts overseas resulting in enforcement outcomes and coordinates training through International Law Enforcement Academies (ILEA). OIA represents the ICE and DHS interests to international organizations, and acts as the in-country ICE liaison with foreign governments and U.S. Embassy staff to strengthen international law enforcement communications and relationships.

OIA also supports other DHS programs such as CSI. The Attaché offices investigate and enforce laws for other Federal agencies that have a Memorandum of Understanding (MOU) with DHS, and any other matters as directed by the Secretary of DHS. OIA may also serve as senior DHS representatives in some overseas locations. In addition to supporting the goals of DHS, OIA's activities also support the goals set forth by the DOS in the areas of regional stability, counter-terrorism, homeland security, weapons of mass destruction, international crime and drugs, economic prosperity, and public diplomacy.

Authorized by the Homeland Security Act of 2002, the Visa Security Program (VSP) and Security Advisory Opinion Unit (SAOU) reduce the potential for criminals, terrorists, and persons of interest to

exploit the legal visa process to enter the U.S. by detecting and interdicting the applicants, processes, and locations where fraudulent visas may be obtained. The VSP and SAOU foster coordinated decision making across DHS and the Department of State (DOS) to utilize law enforcement expertise and analysis to maximize the enforcement benefit of the visa process.

In implementing the VSP, OIA is working closely with DOS to enhance national security by providing an additional level of review and security needed to identify terrorists, other criminals, and persons of special interest from foreign locations before they enter the U.S.

The Visa Security Program enhances the security of visa issuance at high-risk overseas posts by deploying highly skilled and experienced law enforcement officers who conduct in-depth investigative reviews of visa applications that raise security concerns, investigate concerns relating to visa fraud and other criminal activity which can exploit the visa system, and provide advice and training on security issues to DOS consular officers, thereby enhancing their ability to screen security risks as they adjudicate visas and refuse or revoke applications when warranted. The VSP has expanded to 14 posts in 12 countries as of the close of Fiscal Year 2009 third quarter, has screened over 692,000 visa applicants resulting in recommendations leading to the denial of over 650 visa applicants.

#### Key Accomplishments/Planned Accomplishments

In FY 2009, OIA/International Investigations:

- Opened new Attaché offices in several strategic locations, including Brussels, Belgium, Cartagena, Colombia, Guayaquil, Ecuador, and Amman, Jordan;
- Established the RIA Unit within OIA to work with DRO and DOS to negotiate and maintain removal agreements with foreign countries. This unit develops approaches for working with recalcitrant countries which do not allow the repatriation of their citizens and works with other U.S. Government agencies to negotiate various mutual assistance agreements and other international agreements;
- Deployed Assistant Attachés for Removals to six additional Attaché offices overseas to coordinate with host governments to facilitate removals of aliens under orders from the U.S.;
- Received authority to establish an Attaché office in Kabul, Afghanistan in support of the “civilian surge” initiative;
- Supported the Southwest Border Initiative Surge to combat the ongoing and increasing cross-border violence by sending 12 additional personnel on temporary assignment to four existing offices in Monterrey, Hermosillo, Juarez, and Tijuana to increase in operational investigations, seizures, arrests, and investigative leads to domestic field offices;
- Established a Border Enforcement Security Task Force (BEST) in Mexico City in cooperation with Mexican law enforcement agencies to facilitate the exchange of information and rapid bilateral investigation of violations on both sides of the border through coordination with the 15 existing Southwest border BESTs and the Armas Cruzadas Virtual Web Portal;
- As part of the Merida Initiative, sent 14 criminal investigators and 1 intelligence analyst to teach Basic Investigative Methods to approximately 1,350 students and continued to support the training;
- Entered into a Memorandum of Agreement with Jamaica, which established Project Jamaican Operations Linked to Telemarketing (JOLT) that serves to identify, disrupt, and dismantle the severe increase in Jamaican based telemarketing fraud operations that prey on U.S. citizens, many of whom are senior citizens;
- Conducted a joint DHS bilateral Bulk Cash Smuggling (BCS) operations utilizing real-time exchange of cash declaration information and intelligence to combat the threat of international BCS by assisting foreign customs administrations in targeting cash couriers. FY09 HAW

- operations in Italy, Spain, the United Kingdom, Taiwan, Israel, and the Kingdom of Bahrain resulted in dozens of currency seizures totaling more than \$600,700,000 in U.S. currency;
- Co-sponsored, with Australian Customs, the Asia Pacific Economic Cooperation (APEC) Workshop on Detecting and Deterring Cash Couriers and Bulk Cash Smugglers in Sydney, Australia for 80 participants from 20 APEC economies, featuring presentations from international customs and law enforcement experts, case studies, and practical exercises and visited the Sydney International Airport to see how Australian Customs targets illicit cash couriers;
  - Coordinated an unprecedented multilateral BCS operation with Group of Eight (G8) member countries, targeting illicit cash couriers traveling on commercial airlines to locations in the Middle East and Asia resulting in simultaneous BCS interdictions and forced declarations in airports in member countries, examination of approximately 515 international flights, and at least 63 cash seizures with an approximate aggregate value of \$3 million U.S.; joint US/Australian South East Asia Regional BCS training representing 8 nations and 26 government agencies that resulted in simultaneous BCS interdiction and training at airport locations in 2 different countries and a cash seizure at one airport and multiple forced declarations at the other;
  - Deployed 13 Biometric Data Collection Kits and trained over 200 Philippine National Police personnel on their use and benefits in the fight against global terrorism, which led to the identification of over 120 individuals that were added to the Terrorist Identities Datamart Environment;
  - Facilitated the removal of high level/value detainees, i.e., Nazi guard Ivan Demanjuk, Irish Republic Army member Pol Brennan, Palestinian Liberation Organization (PLO) member Khaled Aljaseem;
  - Successfully investigated an international alien smuggling and document fraud organization in Colombia;
  - Produced the Annual Report of the Task Force on the Prohibition of Importation of Products of Forced or Prison Labor from the People's Republic of China (PRC), a mandatory annual report summarizing the activities of the China Prison Labor Task Force established by Congress to promote the effective enforcement of section 307 of the Tariff Act of 1930 with respect to the PRC and chaired by the Assistant Secretary of ICE;
  - Provided Export Control and Related Border Security (EXBS) training to authorities in 6 countries and over 180 foreign law enforcement officials;
  - Provided BCS overseas training to over 1,245 foreign law enforcement officers in 27 countries;
  - Coordinated ILEA training for approximately 850 local and national police, customs and immigration officers and prosecutors from 56 countries. Conducted cultural repatriations of 450 objects to five different countries.

In FY 2010, OIA/International Investigations will:

- Deploy a Senior ICE executive at INTERPOL headquarters in Lyon, France;
- Deploy Assistant Attaché for Removals to 3 additional Attaché office locations overseas to coordinate with host governments to facilitate removals of aliens under orders from the U.S.;

In FY 2011, OIA/International Investigations will:

- Augment its current presence in Mexico to a total of 40 U.S. direct-hire enforcement personnel by adding personnel to existing offices. This includes 12 special agents funded by an FY 2010 enhancement and 3 special agents funded by a reprogramming of base appropriated funds.

In FY 2009, OIA/VSP:

- Expanded Visa Security Program (VSP) operations to two new highest-risk visa adjudicating posts consistent with the VSP Expansion Plan;
- Exceeded the Government Performance and Results Act (GPRA) performance target for the number of visas recommended for refusal based on derogatory information, by recommending denial for 1,027 visa applicants;
- Expanded SAO Unit (SAOU) operations to CBP's National Targeting Center-Passenger (NTC-P) facility to increase collaboration between ICE and CBP and support our common goal to prevent terrorists and criminal suspects from entering the U.S.;
- Collaborated with DOS in revising the rules governing the sharing of TECS data with DOS' Consular Lookout and Support System (CLASS). Initial revisions to the rules in FY 2009 provided over 500,000 records related to international war criminals and other individuals inadmissible under U.S. law to DOS, to prevent those individuals from receiving visas to travel to the United States; and
- Trained 63 ICE Special Agents as Visa Security Officers (VSOs).

In FY 2010, OIA/VSP will:

- Open two Visa Security Units (VSUs) in high-risk locations; conducting in-depth visa applicant reviews/investigations, and providing advice and training to DOS Consular Officers. ICE is mandated by Congress to use the remaining two-year enhancement funds of \$3.437 million it received for expansion by the close of FY 2010 pursuant to its Expansion Plan or the funds will be lost;

In FY 2011, OIA/VSP will:

- Support investigative initiatives by identifying emerging patterns and national security threats of increased risk from terrorists, criminals, and other ineligible visa applicants; and

**Detention and Removals Operations (DRO)** – In FY 2010 ICE received \$3,313.945 million for DRO activities.

In FY 2009, ICE undertook a review of how to improve the current system of detention which resulted in the announcement of several major reforms to ICE's detention system. These reforms are intended to address the vast majority of complaints about the current immigration and detention system, while allowing ICE to maintain a significant, robust detention capacity to carry out serious immigration enforcement. ICE is committed to taking the steps that will lead the agency away from the present decentralized, jail-oriented approach to a system wholly designed for and based on ICE's needs.

Steps will include housing detainees in a set of facilities designed, located and operated for immigration detention purposes and increasingly relying on ICE employees instead of contractors for more of the core operational decisions and no longer relying primarily on excess capacity in penal institutions. These reforms will bring improved custodial conditions, ICE oversight, medical care, and fiscal prudence.

In FY 2010, through the newly created Office of Detention Policy and Planning (ODPP), ICE has initiated the following Detention Reform activities: (1) Revision of immigration detention standards to reflect the conditions appropriate for various immigration detainee populations while keeping costs neutral; (2) Systematic review of high cost detention space to maximize the use of less expensive detention resources, and efforts to encourage the private sector to develop innovative and less expensive civil detention facilities; (3) Improving detention by reviewing contracts for all detention

facilities to identify opportunities to centralize all detention contracts managed by field offices. ICE plans to achieve a cost savings via centralized procurement management and its work with the Office of the Federal Detention Trustee. In addition, ICE is refining a risk assessment instrument that will improve custody decisions and ensure bed space is being used prudently. ICE is also developing a medical care risk assessment system to assist in the appropriate placement of detainees with medical and mental health issue to avoid unnecessary and costly transfers.

In FY 2010, ICE launched two initiatives with the objective of reducing the Average Length of Stay (ALOS) for the detained population to a target of 28 days in FY 2011 from 33.6 days in FY 2010. The reduction in ALOS will allow ICE to increase the number of aliens it can detain to potentially 430,000 in FY 2011 while utilizing the same number of beds.

In FY 2010, ICE will continue to integrate and harmonize all of its efforts to identify, prosecute and remove criminal aliens across its program offices. Secure Communities has promoted key enforcement initiatives that have led to record levels of criminal alien removals. Specifically, through Secure Communities oversight, DRO's Fugitive Operations and Criminal Alien Program and OI's LESC, ICE aims to reduce the population of criminal aliens in the United States. These efforts have been successful, but in FY 2010 ICE will work to make them even more successful and efficient. One way under consideration is the possible integration of Secure Communities into the DRO program. This shift would ensure the programs' efforts are centralized and streamlined. With Secure Communities linked more directly to DRO operations, ICE would be able to apply a risk-based approach consistently across all funding sources. This would further the ICE priority to identify and remove criminal aliens and strengthen the overall effort to do so.

The National Fugitive Operations Program (NFOP) is responsible for reducing the fugitive alien population in the United States. At the end of FY 2008, there were an estimated 557,761 fugitive aliens at large in the United States, according to the DRO Deportable Alien Control System (DACs). As of August 24, 2009, there were 540,505 fugitive aliens-at-large. ICE works to reduce the fugitive alien population by using Fugitive Operations Teams (FOTs), which consist of:

- One Supervisory Detention and Deportation Officer (SDDO);
- Four Deportation Officers (DOs);
- One Immigration Enforcement Agent (IEA); and
- One Deportation and Removal Assistant (DRA).

DRO created the Fugitive Operation Support Center (FOSC) to enhance the efficiency and effectiveness of the NFOP. The FOSC reviews and updates ICE fugitive alien cases in the Enforce Alien Removal Module (EARM), provides comprehensive leads to the FOTs, closes cases as appropriate, and facilitates the overall efforts to arrest fugitives. As a component of the NFOP, the goal established for the FOSC is to eliminate 26,000 cases from the fugitive population each fiscal year.

The Criminal Alien Program (CAP) conducts ICE-wide operations to identify and arrest criminal aliens who are incarcerated within federal, state, and local prisons and jails. ICE ensures that all efforts are made to arrest and remove these individuals from the community by securing a final order of removal prior to the termination of their period of imprisonment. The identification and processing of incarcerated criminal aliens, prior to release from jails and prisons, decreases or eliminates the time spent in ICE custody, reducing the overall cost to the U.S. Government. Additionally, integral to the

effective execution of this program is the aggressive prosecution of criminal offenders identified by DRO officers.

National security and public safety are ICE's first priorities. To that end, ICE detains all aliens who pose a threat to community safety or national security, as well as those ICE is required to detain under U.S. immigration law. The Alternatives to Detention (ATD) Program enables ICE to remove people from detention who, if monitored on ATD, will appear for hearings and removal. ATD is comprised of two primary programs: the Intensive Supervision Appearance Program (ISAP) and the Enhanced Supervision/Reporting (ESR) Program. Also funded within the ATD program is a separate Bond Management Unit.

Appropriations to the Transportation and Removal Program fund safe and secure transportation of aliens in ICE custody and removals of aliens from the United States, as ordered by an immigration judge.

The Removal Management Division (RMD) formulates all DRO transportation and removal policy, planning, and requirements, and oversees and supports Field Offices' execution of transportation and removal funding through four units: (1) Travel Document Unit; (2) Removal Coordination Unit; (3) Flight Operations Unit; and (4) Case Management Unit, including oversight of the DRO Cuban Unit and Post Order Custody Review (POCR) operations. RMD, through these units, ensures the Transportation and Removal Program funds are efficiently and effectively used.

#### Key Accomplishments/Planned Accomplishments

In FY 2009, DRO/Custody Operations began taking the steps toward reforming the immigration detention system and implementing initiatives to achieve greater program efficiency. These include:

- Created the Office of Detention Policy and Planning (ODPP) to improve the design and long-term oversight of the detention system, to ensure more uniform conditions of confinement and medical care and to design and create a civil detention system tailored to the needs of ICE;
- Discontinued use of family detention at the T. Don Hutto Family Residential Facility in Texas;
- Hired an expert in healthcare administration and a medical expert to provide an independent review of medical complaints and denials of requests for medical services;
- Recruited 23 ICE detention managers to work in DRO, supporting the Field Office Directors and stationed in 23 significant facilities, to substantially increase direct federal oversight.
- Formed two advisory groups of local and national organizations interested in ICE's detention system. These groups will provide feedback and input to the Assistant Secretary. One will focus on general policies and practices, while the other will focus on detainee health care.

In FY 2009, DRO/Fugitive Operations had the following successes:

- Of the ICE fugitives arrested in FY 2009, 11,289 were criminal aliens. Of the non-fugitive arrests, 4,655 were criminal aliens. In FY 2008, these figures were 5,652 criminal fugitives and 2,267 non-fugitive criminals.
- In FY 2009, ICE Fugitive Operations teams more than doubled the number of criminal arrests made in FY 2008.
- ICE reduced the fugitive case backlog. At the end of FY 2009, ICE's fugitive case backlog was 534,497 fugitive aliens, which is 23,265 fewer fugitives than the backlog recorded on October 1, 2008. PLEASE CONFIRM THESE NUMBER

- All of the 104 funded Fugitive Operations Teams (FOTs) are operational and conducting enforcement activities across the United States. Presently, each of the 24 DRO Field Offices has at least one operational FOT.
- In FY 2009, 26,571 fugitive aliens were arrested and 8,523 non-fugitive aliens were arrested.
- In FY 2009, the FOOSC resolved 37,022 fugitive cases, assisting in the reduction of the fugitive backlog.

In FY 2009, DRO/CAP:

- In FY 2009, CAP DRO encountered, through interviews or screenings, over 771,000 people and issued over 232,796 charging documents;
- In FY 2009, CAP DRO had 14,587 cases were presented to the U.S. Attorney's office for criminal prosecution and, of those, 9,598 cases were accepted;
- Strategically allocated 336 Secure Communities-funded positions to enhance existing JCART, VCAS, and CAP nationwide based on the risk-based assessment;
- Deployed 67 VTC units, including three Bureau of Prison sites; and

In FY 2009, DRO/TRP:

- Operated seven charters outside of the Americas returning 495 alien passengers to Albania, Cambodia, Egypt, Indonesia, Jordan, Morocco, Nigeria, Pakistan, the Philippines, Palestinian Authority, and Liberia while also supporting the policies of "catch and return" and increased interior enforcement operations. FOU moved nearly 200,000 aliens, domestic and foreign; by increasing the number of ICE chartered aircraft and simultaneously augmenting JPATS aircraft.
- Coordinated and effected the commercial removal of 21,163 aliens. In addition, RMD moved 220,083 aliens through ICE managed aircraft during FY2009. By comparison, ICE movements for all of FY 2008 totaled 67,219.
- Transported 16,529 aliens through use and success of the Pennsylvania Transportation Hub (PATH) program to transport a total of 16,529 aliens.

In FY 2010 and 2011, DRO/Custody Operations will continue efforts towards improving the quality and care for detainees, increasing program efficiencies, and addressing priorities as follows:

- Implement an electronic policy management system to centralize publication of policies, facilitate development and modification of new policies, and allow collaboration across DRO and with other ICE programs;
- Sustain American Correctional Association (ACA) accreditation for all DRO-operated facilities.

In FY 2010 and FY 2011, DRO/Fugitive Operations:

- Conduct fugitive alien enforcement operations by 104 FOTs to target criminal aliens and those found to be a threat to community safety or national security;

In FY 2010, DRO/CAP will:

- Strategically allocate 80 additional Secure Communities funded positions nationwide;
- Continue the deployment of VTC systems to CAP programs throughout the country;
- Work to increase the level of screening nationally to achieve 100 percent in all identified facilities. This will enhance the mission of pursuing a final order of removal prior to the termination of a person's sentence. Upon completion of criminal sentences, aliens are transferred into ICE custody to remove them from the United States; and

In FY 2010 and 2011, DRO/ATD will:

- Conduct a feasibility study to implement “kiosk-type” technology nationwide. This initiative would assist the field office with the enormous task of supervising non-removable aliens who do not pose a risk to the community, by reducing face-to-face meetings with aliens to potentially realign many man-hours to perform in other critical DRO mission areas; and
- Continue with the staggered opening of ISAP program nationwide with the goal of increasing coverage of ATD services to up to 82 new locations and increase the participant capacity up to 24,000.

In FY 2010, DRO/TRP will:

- Increase removals 1% over the same time period in FY09 to meet the FY10 goal of 391,677 removals (including Voluntary Returns);
- Increase the overall number of FOU transported passengers by 1% over the same time period in FY09 to meet the FY10 goal of 230,116;
- Deploy the Electronic Travel Document (eTD) program to one additional country by the end of FY10;
- Employ four ICE charter aircraft operating six days per week to support foreign removals;
- Use the ICE chartered aircraft as a long-range platform capable of supporting special removal missions to South America, Eastern Europe, Africa, Middle East and Pacific Rim;
- Use JPATS contract aircraft to support shorter-range domestic movements with four airplanes—two each located in Alexandria, Louisiana and Phoenix, Arizona; and
- Place Immigration Enforcement Agents and Division of Immigration Health Services medical personnel on all DRO-managed aircraft, both foreign and domestic.

In FY 2011, DRO/CAP will:

- Utilize three Interoperability Response Centers (IRCs) to assist with the deployment of Interoperability throughout the country. CAP special programs will strategically allocate 60 Secure Communities funded contractors between the three IRCs.

In FY 2011, DRO/TRP will:

- Coordinate the movement of more than an estimated 240,000 aliens through the use of eight large and one medium sized aircraft in FY 2011. Accordingly, DRO plans to log 13,000 flight hours or more.

**Automation and Modernization** - ICE received \$90.000 million for Automation and Modernization (AM) activities in FY 2010.

The ICE Automation Modernization account focuses on specific, discrete IT activities that help ICE achieve its mission, including the Financial System Modernization, DROM, TECS Modernization, and Atlas IT Infrastructure and Tactical Communications.

### Key Accomplishments/Planned Accomplishments

#### FY 2009 – Accomplishments

In FY 2009, Congress appropriated \$57.0 million to further expand Automation Modernization activities including the Financial System Modernization initiative, TECS Modernization, Atlas IT Infrastructure, Atlas Tactical Communications, and DROM. The Automation Modernization programs have achieved the following to date in FY 2009:

## Atlas

### Atlas IT Infrastructure

- Improved information sharing between ICE and its law enforcement partners by incorporating two additional data collection systems into one database;
- Replaced the primary web hosting platform for DHS data centers, and built IT infrastructure to provide seamless communications across heterogeneous platforms; and
- Upgraded obsolete and failing file and print servers at 155 ICE sites.

### Tactical Communications

- Acquired equipment for mobile communications system and hub upgrades, and acquired P25-compliant tactical communications equipment to modernize tactical communications systems in the first of 20 ICE regions (Georgia, North Carolina, and South Carolina); and
- Acquired, integrated, and deployed one mobile law enforcement communications system and one wireless communications kit for ICE emergency/crisis response and special operations.

### Cyber Security Modernization (accomplished with prior year funds)

- Instituted enterprise audit log management for all major ICE systems; and
- Deployed a framework to access 20 different ICE IT applications with a single sign-on.

### Data Center Migration (accomplished with prior year funds)

- Analyzed data center alternatives for lower cost options (to be facilitated by DHS).

## LESM - TECS Modernization

- Gathered requirements for the following projects: Investigative Case Management (including Bank Secrecy Act data access, Money Laundering reporting and tracking, and Telephone Link analysis), Intelligence Reporting and Dissemination, Management Reporting and Workflow, Security and Oversight, Shared Services, and Data Management;
- Established an initial planning capability by securing project management office support to manage requirements and develop the business case;
- Developed TECS architecture and ICE high-level design, and established a development, integration and testing environment;

## DROM

- Initiated development of the Detainee Location Tracking (DLT) and Central Reservation System (CRS) modules of the Bed Space, Transportation, and Tracking (BST&T) Management System;
- Expanded ICE Data Warehouse data capacity and reporting capability to support DRO, and expanded web services to allow the eTD application to communicate with other internal or external applications;
- Expanded ENFORCE Alien Removals Module (EARM) to include the ENFORCE Apprehension and Detention Module (EADM); and
- Initiated planning and requirements definition phase for a DROM Document Management System and the Electronic Detainee Visitor Log (eVisitor) application.

## Modernization of Financial System

- Acquired an Invoice Payment solution for ICE that will be able to integrate with the Department's Enterprise Solution;
- Acquired an Obligations Document management solution for ICE that will be able to integrate with the Department's Enterprise Solution;

- Acquired a Financial Reporting Database that will interface with various ICE financial data sources such as its current financial system (and future DHS Resource Management Transformation Office (RMTO) solution), its payment system, its asset management systems and external financial sources);
- Acquired ICE Fed Traveler Services to support standardizing electronic travel (e-Travel) processing throughout DHS.

### FY 2010 - Projected Accomplishments

In FY 2010, ICE will further expand Automation Modernization activities to include the following initiatives: ICE LESM (which includes TECS Modernization) and eHR. ICE will also continue to develop current services projects that were started in FY 2009.

#### Atlas

The following are projected FY 2010 accomplishments:

- Continue modernizing an additional 290 ICE sites with new file and print servers;
- Integrate two additional data collection systems into the ICE data warehouse;
- Initiate modernization of 30% of local office networks to improve the performance of all networked IT systems, leading to increases in workforce productivity;
- Complete the implementation of the IT access audit log management initiative;
- Implement vulnerability scanning tools to quickly detect and respond to IT security breaches; and
- Oversee the migration of ICE IT assets from the Department of Justice to DHS Data Centers.

#### LESM

The TECS modernization effort will support the investigative arm of ICE and update a 20-year-old legacy system, giving ICE improved capabilities. Projected accomplishments for FY 2010 include:

- TECS Modernization – The completion of the requirements definition phase and begin design and development of specific projects from the following: Investigative Case Management, Intelligence Reporting and Dissemination, Management, Management Reporting and Workflow, Security and Oversight, Shared Services, Data Management, Infrastructure Acquisition and Deployment.
- Mobile IDENT – The development of the Mobile IDENT proto-type booking service and pilot at three Special Agent In Charge (SAC) offices for user acceptance and gap analysis.
- ICEPIC - The hardware upgrade and migration to the enterprise data center along with the creation of the COOP for 24-7 support, as well as the support of the national rollout to all SAC offices.
- ICE ACCESS - This initiative will provide requirements gathering with local and state agencies and the U.S. Department of Justice for gang information sharing and data integration. A design strategy will be delivered to plan for the design and development of an integrated solution for the following year.
- Law Enforcement Information Systems Sharing – The completion of enhancements for the sharing of images and photos and the continuation of rollout to five additional information sharing partners.
- Border Enforcement Security Task (BEST) Force Expansion – The gathering and analysis of the requirements and design for the modernization of BEST information technology.
- Intelligence Support –The requirements gathering and design for moving the Data Analysis & Research for Trade Transparency (DARTT) system into the enterprise environment; and the requirements and design for the modernization of Cyber Crimes Center systems and National Child Victim Identification System (NCVIS).

- International Affairs Modernization –The requirements gathering and design of the Office of International Affairs (OIA) systems including Parole Case Tracking System (PCTS), Visa Security System (VSP), World Customs Organization Information Sharing (WCO) and Human Resources Dashboard (HRD).
- Forensic Document Lab –The requirements and design for the modernization of the information technology infrastructure and moving into the enterprise environment.

### DROM

The following are the FY 2010 projected accomplishments:

- Expand EARM to include the eTD, Fugitive Case Management System (FCMS) and Alternatives to Detention Program (ATDP);
- Transition EARM into Full Operating Capability (FOC) status;
- Deploy the BST&T DLT Module and provide training to remaining Areas of Responsibility (AORs) and detention facilities;
- Deploy BST&T, DLT, and CRS Modules to achieve Initial Operating Capability (IOC) status; initial delivery will include the point-in-time inventory capability to establish a strong foundation and framework for the subsequent phases of work;
- Begin development and integration of the final BST&T Module, the Transportation Management System (TMS);
- Continue expanding the eTD system as Memoranda of Understanding (MOUs) are executed for target countries to use eTD for issuing electronic travel documents; and
- Award development contracts for the DRO Document Management System and eVisitor Log.

### Electronic Health Records (eHR) System

The following are the FY 2010 projected accomplishments:

- Award contracts for validation study, and design and development of a comprehensive certified eHR system including several subsystems;
- Establish an initial planning capability by securing project management office support to manage requirements and expedite documentation;
- Initiate and utilize results of Acquisition Planning and Validation Study to establish the foundation for program execution;
- Develop eHR high-level program control process to establish a comprehensive program management processes to development, integration and testing environment; and
- Develop and assess the alignment of the program to the DHS Enterprise Architecture.

### Modernization of Financial System

The following are the FY 2010 projected accomplishments:

- Conduct Fed Traveler/Core Financial System Interface Enhancements (replace batch with online interface)

### FY 2011 - Projected Accomplishments

In FY 2011, ICE will further expand Automation Modernization activities to include the following initiatives: Atlas Cyber Security Modernization; Atlas Tactical Communications; and the ICE Decision Support Program.

### LESM

Projected accomplishments for FY 2011 include the following project milestones:

- Mobile IDENT – Launch a web interface capability. Replace existing technology to include upgrading workstations supporting Mobile IDENT.
- ICEPIC – Development of a reporting database to include mapping to the TECS Modernization efforts. Enable and expand link analysis, global name resolution, and geospatial capabilities within ICEPIC.
- Law Enforcement Information Sharing Service (LEISS) – Complete development for two factor authentication. Expose law enforcement data to first responders and emergency management teams within ICE and potentially across department. Continue the rollout to five additional information sharing partners.

#### DROM

In FY 2011, DROM will:

- Complete deployment of BST&T DLT and Central Reservation System (CRS) Modules;
- Complete development and integration of eVisitor Log.

#### Electronic Health Records System

In FY 2011, the eHR Program office will design and develop the eHR “Core Capabilities” and deploy the system to the 24 DIHS facilities within two releases (utilizing FY 2010 funding). Projected accomplishments for FY 2011 include the following project milestones:

- Configure and develop interfaces, complete testing and prototype testing, and initiate deployment of a eHR application to support ICE medical operations at DIHS-staffed detention facilities; and
- Begin deployment of appropriate eHR capability to over 24 DIHS staffed facilities and the 350 Intergovernmental Service Agreements (IGSA) and Contract Detention Facilities (CDF) housing ICE detainees.

#### Financial System Modernization

- Develop system integration plans for the interfacing of ICE’s non-core financial systems with Department’s Enterprise Solution.
- Prepare detailed migration plans to transition ICE’s current financial processing system into the Department’s Enterprise Solution.
- Prepare detailed test and evaluation scenarios to verify system functionality and determine level of compliance.
- Cleanse ICE’s current financial systems data to ensure smooth migration to the Department’s Enterprise Solution.

#### ICE Decision Support Program

Projected accomplishments for FY 2011 include the following project milestones:

- Integrate information from additional enforcement systems into the ICE data warehouse;
- Integrate data from the Law Enforcement Modernization project into the ICE Enterprise Data Warehouse (EDW) and provide reporting capabilities;
- Integrate data from DROM/BST&T modules into the ICE EDW and provide reporting capabilities;
- Develop & Implement Executive Dashboards (SEVIS II & BST&T);

## C. Resources Requested and Performance Impact

### Current Services

ICE's total budget request for FY 2011 is \$5,835.2 million, which includes the Salaries and Expenses, Automation, and Construction accounts and Breached Bond, User Fee, and SEVP fee authority.

### Program Increases

In FY 2011, ICE will focus on core infrastructure needs. These key investments will bolster ICE's enforcement and efficiency efforts.

- **Detention and Removal Operations .....\$20.0M (0 FTE)**  
This request will help detention and removal operations to maintain current bed space. The funding will covers such items as contract costs, medical care, and oversight.
- **Co-Location of ICE Facilities.....\$19.9M (0 FTE)**  
This request funds the third year of the ICE-wide co-location strategy to consolidate ICE personnel and operations scattered across multiple buildings in select metropolitan areas with the intended result of improved operational efficiency and long-term cost savings.
- **Office of Investigations Mission Support.....\$15.0M (84 FTE)**  
This request will fund a total of 84 mission support FTE to help alleviate administrative functions performed by agents and allow them to focus on their primary function, investigation of transnational and border crime. This funding will help narrow the current gap to ensure that agents have the necessary mission support personnel to support agents in the field.
- **Data Center Migration.....\$10.4 M (0 FTE)**  
This request is targeted at migrating data center operations, active online data, and other IT assets from two Department of Justice (DOJ) data centers and multiple processing centers to two new DHS data centers while ensuring near continuous operations of mission-critical IT systems through contingency infrastructure, planning, and testing, to provide systems and data integrity that align with the DHS goal of ensuring that two new DHS Data Centers support fully redundant IT systems.
- **Border Enforcement Security Task Forces (BESTs).....\$10.0M (23 FTE)**  
This request will establish BESTs in three additional locations (Massena, NY; San Francisco, CA; and Honolulu, HI) to prevent smuggling and illegal entry of persons, with a priority on terrorist groups, gang members, and criminal aliens.
- **Intellectual Property Rights Enforcement.....\$5.0M (13 FTE)**  
This request will fund a total of 13 FTE for the ICE-led National Intellectual Property Rights Coordination Center (IPR Center), a collaborative effort bringing together key US government agencies, to stop intellectual property rights (IPR) violations that threaten our economic stability, restrict the competitiveness of US industry, and endanger the public's health and safety. Additionally, ICE will focus on disrupting criminal organizations through the internet to facilitate IPR crime and provide support for anti-counterfeiting efforts.
- **Information Technology Improvements.....\$84.7M (36 FTE)**

- Atlas IT Infrastructure (\$9.0 million): The FY 2011 request of \$9.0 million will fund the continuing four-year project to modernize network infrastructure at approximately 750 ICE locations by upgrading legacy local area networks (LANs) to provide increased performance, security, and reliability.
- Atlas Tactical Communications (\$8.0 million): This request will be used to acquire Project 25-compliant tactical communications equipment to modernize tactical communications systems in the Chicago Region (states of Illinois, Kentucky, Indiana, Missouri, Kansas, and Wisconsin).
- Atlas Cyber Security Modernization (\$8.0 million): This request will be used to continue implementation of recommended security solutions identified as a result of risk assessments, and ICE's Top 25 security concerns.
- ICE Law Enforcement Systems Modernization (\$38.7 million): This request funds a number of case management (including the TECS Modernization initiative), information sharing, and operational support service projects that will improve dissemination of intelligence information across DHS and the Intelligence Community. The request increases the sharing of information with Federal, state, local, tribal and international law enforcement agencies.
- DRO Modernization (\$9.0 million): This request will be used to develop and deploy the final release of the Detainee Location Tracking (DLT) System and Central Reservation System (CRS) as part of the Bed Space, Tracking, and Transportation (BST&T) Management Solution. Funding will also provide for the Transportation Management System (TMS) module.
- Electronic Health Records (\$7.0 million): This request will be used to begin the design and development of a system that enhances and supports the documentation and coordination of medical services provided to ICE detainees while in custody.
- Financial System Modernization (\$3.0 million): This request will be used to continue ICE's efforts to ensure near-term viability of ICE's current financial system and preparation for migration of the current financial systems to the DHS enterprise solution.
- ICE Decision Support Systems (\$2.0 million): This request will be used for various activities including the development of a new extraction, and transformation and loading process for the integration of data from Law Enforcement Systems Modernization (LESM) data sources to the Enterprise Data Warehouse (EDW).

#### **D. Performance Highlights, Resources, and Alignment to Strategic Goals**

For each mission-oriented program, the program performance goal, alignment to DHS Secretary's Priority mission areas, total dollars and FTE, and Government Performance and Results Act (GPRA) performance plan measure/s are shown below. Additional measures are also displayed, as appropriate, to provide a more thorough context of expected performance results.

<b>Program: Automation Modernization</b>						
<b>Performance Goal:</b> Provide timely delivery of mission IT services in direct support of the ICE mission, goals, objectives, and programs.						
<b>Secretary's Priority:</b> Enforcing and Administering Our Immigration Laws						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	None	\$15,000	\$30,700	\$57,000	\$90,000	\$84,700
<b>FTE</b>	None	7	7	18	19	36

### Performance Plan Measures

<b>Measure:</b> Percent increase in ICE investigative and enforcement systems incorporated into Decision Support Systems						
<b>Description of Measure:</b> This measure indicates the extent which ICE law enforcement personnel have access to and can retrieve enforcement information from a single integrated - source of enforcement data. Integrated information will enable users to find relevant and timely information from the best sources, along with improving information search and indexing capabilities.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	8%	20%	36%	80%	90%	100%
<b>Actual:</b>	22%	22%	73%	81%	N/A	N/A

<b>Measure:</b> Percent of modernized information technology services available to users						
<b>Description of Measure:</b> Measures percent of progress toward IT modernization available to ICE users (e.g. E - mail services, desktop equipment refresh, and DHS Wide Area Network), which encompasses program modernization activities spanning seven years. This outcome is aligned directly with Atlas stated goals: establish a standard IT environment across ICE by ensuring conformance to the Homeland Security Enterprise Architecture (EA), which will facilitate communication; promote information sharing and collaboration by enabling ICE to increase resource sharing capabilities between ICE users and program areas throughout ICE and the DHS community; and enhance workforce productivity by building a technological foundation to empower the ICE staff with the tools necessary to achieve mission requirements.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	40%	59%	76%	85%
<b>Actual:</b>	None	None	40%	62%	N/A	N/A

<b>Program: Detention and Removal Operations</b>						
<b>Performance Goal:</b> Remove from the United States all aliens with a final order of removal.						
<b>Secretary's Priority:</b> Enforcing and Administering Our Immigration Laws						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$1,749,457	\$2,525,090	\$2,758,701	\$3,120,652	\$3,333,730	\$3,323,637
<b>FTE</b>	5,140	6,735	7,485	8,968	9,555	9,650

### Performance Plan Measures

<b>Measure:</b> Number of foreign - born nationals interviewed or screened for removal from the United States.						
<b>Description of Measure:</b> The Criminal Alien Program measures performance by the level of identification of foreign born nationals in jails and prisons. The program goal is to identify all foreign - born nationals incarcerated in all jails and prisons in the United States. This is done by through interviews of foreign - born national or the screening of a foreign - born nationals						

biographical information. One - on - one interviews are done by an Immigration and Customs Enforcement agent/officer to determine if that subject is removable from the U.S. A screening is the investigation of the status of a foreign - born national using the biographical data reported to other law enforcement agencies upon being arrested or through immigration databases. CAP projects a 5% increase each year due to the Secure Communities Interoperability Initiative. This program is scheduled for completion in 2013; there is no projected funding for additional full time employees. Targets for this measure are set based on planned staffing levels.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	370,000	388,500
<b>Actual:</b>	None	None	None	None	N/A	N/A

**Measure:** Number of illegal aliens removed from the United States

**Description of Measure:** This measure represents the total number of illegal aliens removed from the United States by the Detention and Removal program during the fiscal year. An illegal alien is someone who is in the United States in violation of immigration laws. Compulsory and confirmed movement of an inadmissible or deportable alien out of the United States based on an order of removal constitutes an alien removed.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	140,130	154,143	None	342,251	391,667	395,584
<b>Actual:</b>	185,944	226,677	264,503	387,790	N/A	N/A

**Measure:** Percent of detention facilities in compliance with the National Detention Standards

**Description of Measure:** This measure gauges the percent of detention facilities used by the Detention and Removal Operations program that are in compliance with National Detention Standards. The National Detention Standards were originally issued in September 2000 to facilitate consistent conditions of confinement, access to legal representation, and safe and secure operations across the immigration detention system. The standards have been updated into a performance based format known as the Performance Based National Detention Standards. Through an aggressive inspections program, the program ensures facilities utilized to detain aliens in immigration proceedings or awaiting removal to their countries do so in accordance with the Performance Based National Detention Standards. Compliance with the standards provides the public with assurance that detainees in the program's custody are detained in safe and secure environment and under appropriate conditions of confinement.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	100%	100%	100%
<b>Actual:</b>	None	None	79%	90%	N/A	N/A

**Measure:** Percent of illegal aliens removed from the U.S. based on the number of illegal aliens processed for immigration law violations during the same period

**Description of Measure:** This measure reflects the percent of illegal aliens removed from the U.S. during a fiscal year compared to the number of illegal aliens processed for immigration law violations during the same time period. The term "removal" includes removals from the U.S. under all types of orders, including orders by immigration judges, expedited and voluntary removals, and stipulated removals, as well as returns of immigration violators to their country of origin prior to or as a result of the waiving of a hearing before an immigration judge. This measure reflects the impact of program activities to ensure those in the country illegally do not remain.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	68%	74%	75%
<b>Actual:</b>	None	None	None	73.5%	N/A	N/A

<b>Program: International Affairs</b>						
<b>Performance Goal:</b> Reduce international criminal and terrorist activities by partnering with foreign and domestic counterparts.						
<b>Secretary's Priority:</b> Enforcing and Administering Our Immigration Laws						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$139,719	\$140,791	\$107,551	\$133,541	\$143,558	\$154,772
<b>FTE</b>	391	441	441	275	288	309

### Performance Plan Measures

<b>Measure:</b> Number of visa applications in which the Visa Security Program discovered derogatory information and provided the information to the Department of State.						
<b>Description of Measure:</b> This measure captures the instances in which the Visa Security Program (VSP) discovered derogatory information on a visa applicant as a result of applicant screening and in - depth vetting by Visa Security Officers (VSO). Derogatory information includes any information that makes a visa applicant ineligible to receive a visa. All information found by the VSO during screening process is provided to the Department of State (DOS) for final adjudication of visa applications.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	955	1050
<b>Actual:</b>	None	None	None	None	N/A	N/A

<b>Measure:</b> Percent of visa applications screened at high - risk visa adjudicating posts						
<b>Description of Measure:</b> This measure indicates the percent of visa applications that undergo review by an Immigration and Customs Enforcement (ICE) Special Agent compared to the total number of visa applications received at all high - risk visa adjudicating posts. Review of visa applications by the program is an added layer of defense in the adjudication of visa applications processed by the State Department to prevent potential terrorists or known criminals from obtaining visas for travel to the U.S. ICE, where posted, ensures that visa applicants are screened against DHS databases prior to Department of State visa issuance						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	21%	FOUO	FOUO
<b>Actual:</b>	None	None	None	FOUO	N/A	N/A

<b>Program: Investigations</b>						
<b>Performance Goal:</b> Prevent the exploitation of systemic vulnerabilities in trade and immigration that allow foreign terrorists, other criminals, and their organizations to endanger the American people, property, and infrastructure.						
<b>Secretary's Priority:</b> Enforcing and Administering Our Immigration Laws						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$1,528,794	\$1,535,748	\$2,071,265	\$1,969,504	\$2,167,524	\$2,272,078
<b>FTE</b>	7,840	8,384	9,056	9,644	10,227	9,676

### Performance Plan Measures

<b>Measure:</b> Percent of closed investigations which have an enforcement consequence (arrest, indictment, conviction, seizure, fine, or penalty).						
<b>Description of Measure:</b> More effective immigration and customs enforcement will contribute to enhanced homeland security as well as to greater deterrence. One method for measuring this						

effectiveness is to determine the extent to which criminal investigations are completed successfully, i.e., closed with an enforcement consequence. However, although many criminal cases arise that are worth pursuing, the potential of an investigation is not known at its inception; therefore, it is to be expected that many cases will be closed each year without an enforcement consequence when it is determined that the investigation is no longer viable. In addition to getting criminals off the street, successful investigations also expose and remove, or contribute to the elimination of, vulnerabilities in various aspects of customs and immigration, i.e., the ways in which criminals manage to evade safeguards that are supposed to prevent their illegal activity, and areas in which such safeguards are lax or do not exist.

<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	38.5%	36.5%	36.6%	47%	48%	49.9%
<b>Actual:</b>	36.4%	35.8%	46.3%	47.7%	N/A	N/A

#### E. High Priority Performance Goals

ICE estimates that 1.3 million to 2.65 million removable criminal aliens currently reside within the United States. During FY 2009, ICE removed over 136,000 of these criminal aliens, but must dramatically improve its enforcement operations to more adequately target the entire criminal alien population. This High Priority Performance Goal will focus on our efforts to detain and quickly remove dangerous criminal aliens from the United States through our Secure Communities program. Secure Communities is a comprehensive DHS initiative to modernize the criminal alien enforcement process. It supports public safety by strengthening efforts to identify and remove the most dangerous criminal aliens from the United States. The Security communities program goals are to identify criminal aliens through modernized information sharing, and prioritize enforcement actions to ensure apprehension and removal of dangerous criminal aliens.

#### High Priority Performance Measures:

FYHSP Program Name	Program Performance Goal	Performance Measure	Secretary's Priority
Detention and Removal Operations	Improve the efficiency of the process to detain and remove illegal immigrants from the United States	Number of aliens charged or convicted of a Level 1 offense identified through integrated record checks	Enforcing and Administering Our Immigration Laws
Detention and Removal Operations	Improve the efficiency of the process to detain and remove illegal immigrants from the United States	Criminal aliens convicted of a Level 1 offense removed as a percent of total alien removals	Enforcing and Administering Our Immigration Laws
Detention and Removal Operations	Improve the efficiency of the process to detain and remove illegal immigrants from the United States	Percent of criminal alien programs achieving priority targets	Enforcing and Administering Our Immigration Laws

**Aviation Security:**

## **I. Appropriation Overview**

### **A – Mission Statement for Aviation Security:**

The Aviation and Transportation Security Act (ATSA), Public Law 107-71, enacted on November 19, 2001, established the Transportation Security Administration (TSA) to protect the transportation system and ensure the freedom of movement for people and commerce. The Aviation Security Appropriation consists of programs whose primary focus is to secure aviation transportation. The path to achieving this mission has evolved in the years since the September 11th attacks. Enhancements in aviation security have included emphasis in explosives detection training and technology, modifications to the prohibited items list, and changes to TSA security screening protocols.

### **B – Budget Activities:**

The Aviation Security appropriation includes two distinct components: (1) Transportation Security Officer (TSO) Operations and Equipment and (2) Aviation Direction and Enforcement.

TSO Operations and Equipment - TSO Operations and Equipment includes the Programs, Projects and Activities (PPAs) that support the pay, training, outfitting, and operating costs for the TSO workforce. Funding is also included for checkpoint support, purchase, installation, and maintenance of screening equipment, to include explosives detection systems (EDS) and explosives trace detection machines (ETD).

Aviation Direction and Enforcement - Aviation Direction and Enforcement includes activities that ensure that TSA continues to build a strong security regulation and enforcement presence on-site at the Nation's commercial airports. Funding requested under this decision unit supports air cargo and airport/airline regulation compliance through inspections, international programs, and the airport management and direction staff and airport administrative support.

Terrorism in the aviation domain is an enduring and highly adaptive threat. Terrorists study our vulnerabilities to learn how to exploit our procedural and technological security gaps to increase the lethality and political impact of their attacks. Aviation continues to be a target of coordinated terrorist activity. Examples include the attempted attack of a flight from Amsterdam to Detroit on Christmas Day in 2009, an alleged terrorist plot to detonate liquid explosives onboard multiple aircraft departing from the United Kingdom for the United States in August 2006, and terrorists' intended attacks on U.S.-bound flights originating from multiple foreign airports in December 2003. This request supports efforts to mitigate the risk to the Aviation domain.

### **C – Budget Request Summary:**

The Transportation Security Administration requests 60,663 positions, 53,608 Full-Time Equivalent (FTE), and \$5,559,894 in appropriated funding. Also included in the appropriation is \$250,000 in mandatory fee collections (0 positions/FTE). The total adjustment-to-base includes an increase of 60 positions, 134 FTE, and a decrease of \$420,100,000 in appropriated funding. The total program changes include net increases of 6,567 positions, 4,192 FTE, and \$765,954,000 to enhance security operations. Program changes include:

- Reduce Screening Partnership Program as a result of contract efficiencies (0 positions/FTE and \$10 million)
- Increase Transportation Security Officers at the checkpoint and expand the number of Behavior Detection Officers (BDOs) along with associated training, uniform, and consumable costs (5,705 positions, 3,760 FTE and \$296.858 million) (\$235.062 million Transportation Screener PC&B / \$61.796 million Screening Training and Other)
- Increase Checkpoint Support adding advanced imaging technologies to 500 lanes, expanding the program to cover just under 50% planned lanes and approximately 50-60% of passengers and adding approximately 800 portable Explosive Trace Detection units (10 positions, 5 FTE, and \$231.200 million).
- Accelerate EDS Procurement/Installation (0 positions/FTE and \$82.502 million)
- Eliminate the Operation Integration PPA, absorbing costs within EDS and Checkpoint (0 positions/FTE and \$21.481 million)
- Increase to Aviation Regulation to enhance international security (74 positions, 37 FTE, and \$38.844 million); expand explosives detection canine program by 275 proprietary teams (523 positions, 262 FTE, and \$69.149 million); and increase Canine Cooperative Agreements Stipend (0 positions/FTE and \$3.880 million)
- Corresponding increases to Airport Management and Support for increases in airport rent and utilities to accommodate additional staffing and imaging technologies, transit subsidies, and other personnel and operating costs in support of aviation security program increases (255 positions, 128 FTE, and \$73.162 million).

## II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

### Department of Homeland Security Transportation Security Administration

<b>2011 Total Request</b>	-	-	<b>142,678</b>
Total Change 2010 to 2011	-	-	(6,965)

The Transportation Security Administration requests \$142.7 million for this activity. This is a decrease of \$7.0 million from FY 2010. The change is a result of a \$3.0 million increase for pay inflation and a \$10.0 million decrease from contract efficiencies.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Screening Partnership Program (SPP) was established by ATSA to permit an airport operator to request screening services through a private screening company. Private screening contractors must perform equal to or better than federal screening operations under federal oversight following the same operating procedures. The Screening Partnership Program satisfies a mandate in ATSA to establish a program after a two year pilot program, (PP5). Key lessons learned from evaluation studies and input from internal subject matter experts and external stakeholders assisted in designing the Screening Partnership Program.

The current airports in the program are:

- San Francisco International Airport (SFO)
- Kansas City International Airport (MCI)
- Greater Rochester International Airport (ROC)
- Jackson Hole Airport (JAC)
- Tupelo Regional Airport (TUP)
- Sioux Falls Joe Foss Field Regional Airport, SD (FSD)

- Key West International Airport (EYW)
- 34th Street Heliport in New York City, NY
- Charles Schulz – Sonoma County Airport, CA (STS)
- Roswell Industrial Airport in Roswell, NM (ROW)
- Dawson Community Airport (GDV)
- Wokal Field (GGW)
- Havre City-County Airport (HVR)
- Lewiston Municipal Airport (LWT)
- Frank Wiley Field (MLS)
- Clayton Airport (OLF)
- Sidney-Richland Regional Airport (SDY)

Significant accomplishments in FY 2009 include:

- Awarded a contract for seven Montana airports (MT7) to provide private screening service operations;
- Completed the re-compete contract for ROW and transitioned incumbent contractor to new contractor at ROW;
- Increased the Behavior Detection Officer (BDO), Aviation Direct Access Screening Program (ADASP) / Playbook and Travel Document Checker (TDC) FTE at SPP airports;
- Deployed Visible Intermodal Prevention and Response (VIPR) teams to SPP airports;
- Implemented security requirements in existing contracts as changes are made to Standard Operating Procedures (SOP) or as new security programs are developed; and
- Supported the deployment of H1N1 screening protocols.

FY 2010 planned accomplishments include:

- Re-compete, award and transition contracts for screening services to eight airports: SFO, MCI, ROC, JAC, TUP, FSD; EYW & STS;
- Monitor the Quality Assurance Surveillance Plan to ensure the objectivity of the metrics;
- Implement security requirements in existing contracts as changes are made to Standard Operating Procedures (SOP) or new security programs are developed.

In FY 2011, planned accomplishments include:

- Re-compete contracts for screening services at two airports: EYW and STS;
- Execute possible option years: SFO, MCI, ROC, JAC, TUP, FSD, ROW, and MT7; BTM, GPI and WYS;
  - Continue with FY 2010 areas of emphasis.

(Dollars in Thousands)**

**PPA: Passenger & Baggage TSO PC&B**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>50,187</b>	<b>45,341</b>	<b>2,714,330</b>
<b>2010 Enacted</b>	<b>49,468</b>	<b>44,930</b>	<b>2,758,575</b>
2011 Adjustments-to-Base	(422)	(352)	4,027
<b>2011 Current Services</b>	<b>49,046</b>	<b>44,578</b>	<b>2,762,602</b>
2011 Program Change	5,705	3,760	235,062
<b>2011 Total Request</b>	<b>54,751</b>	<b>48,338</b>	<b>2,997,664</b>
Total Change 2010 to 2011	5,283	3,408	239,089

The Transportation Security Administration requests \$3.0 billion for this activity. This is an increase of \$239.1 million from FY 2010. The \$4.0 million adjustment to base consists of pay inflation, the annualization for 109 Bomb Appraisal Officers (BAOs) received in FY 2010, and the realignment of the BAO program from Screener PC&B to Airport Management. The \$235.1 million program increase reflects increasing the number of Transportation Security Officers (TSOs) at the checkpoint in order to support the accelerated deployment of advanced imaging technology (AIT) and expanding the number of Behavior Detection Officers (BDOs).

TSA’s request to realign the BAO program is based on the following:

- The BAOs report directly to the Federal Security Directors (FSDs).
- The mission of the BAO program is to deter terrorist or criminal operations against aviation, which involves the use of explosive devices. This mission is a much more limited scope than that of the Transportation Security Officers.
- In contrast to TSOs, the number of BAOs is not determined by the Staffing Allocation Model (SAM) model. The deployment of BAOs is determined through risk assessment and maximum coverage patterns.
- Due to the fact that BAOs must have the Explosive Ordinance Disposal or civilian-equivalent training as a pre-requisite, this program is not generally a step in TSO career progression.

**CURRENT SERVICES PROGRAM DESCRIPTION**

Passenger and baggage screening protects commercial air travelers by preventing dangerous or deadly objects that individuals are attempting to smuggle onto aircraft, either on their person or

in their carry-on or checked baggage. The TSA screening process must strike the appropriate balance between preventing security breaches and maintaining the efficient movement of law-abiding passengers through the security checkpoints. After passenger check-in, TSOs use various types of electronic detection and imaging machines, including X-ray machines; explosives trace detection equipment, walk-through metal detectors (WTMD), advanced imaging technology (AIT), and hand-held metal detectors. At the checkpoints, TSOs perform some physical searches of carry-on baggage and pat-down searches of airline passengers, crew and airport employees in conjunction with the use of behavior recognition techniques and the validation of travel documents.

### **TSO Workforce and Attrition**

By law, all TSOs -- both private and federal -- are required to be U.S. citizens; pass a background investigation; and have a high school diploma, a general equivalency diploma, or sufficient experience. They must undergo extensive training and be certified to screen passengers and use the detection equipment. TSOs are subject to periodic training and testing, failure to pass any phase of training or a certification examination is grounds for employment termination.

TSOs are just one of the layers of security needed to thwart the threats to the aviation system. TSA has added more specialized security positions with different skill sets such as Travel Document Checkers (TDCs) and Behavior Detection Officers (BDOs) to enhance the level of security provided and to move security beyond the checkpoint environment. These additional layers of security have proven to be successful in implementation. TSA has seen the benefits of these new positions in providing a career path for TSOs, which has had a direct impact on reducing attrition and enabling TSA to retain a more tenured TSO workforce. TSA also established a TSO Referral system to attract TSO candidates and facilitate recruitment and increase retention. This program was based on an idea from TSA's employee-driven Idea Factory.

TSA determines and allocates FTE to the airports through the Staffing Allocation Model (SAM). This model is constantly refined to most effectively allocate and manage the TSO workforce. Through the efficient allocation of resources, TSA reduced overtime expenditures by approximately 55 percent since FY 2003, utilized 'Split-Shifts' rotations, and increased work hours dedicated for training.

The TSO budgeted FTE levels are broken down as follows:

<b>TSO Budgeted FTE by Job title</b>						
<b>Job title</b>	<b>Band</b>	<b>FY07 FTE</b>	<b>FY08 FTE</b>	<b>FY09 FTE<sup>1/</sup></b>	<b>FY10 FTE</b>	<b>FY11 FTE</b>
TSOs	D, E	32,176	32,180	31,536	29,792	32,417
Lead/Master TSOs <sup>2/</sup>	F	5,490	5,490	5,490	6,090	6,615
Supervisory/Expert TSOs <sup>2/</sup>	G	4,360	4,360	4,360	4,610	4,960
BDOs	F,G,H,I	589	2,011	2,860	2,986	3,196
BAOs <sup>3/</sup>	H, I	118	297	297	352	Realigned to Airport Mgmt
Managers	H, I	1,045	1,100	1,100	1,100	1,150
<b>TOTAL</b>		<b>43,778</b>	<b>45,438</b>	<b>45,643</b>	<b>44,930</b>	<b>48,338</b>

<b>TSO FTE Allocated to Security Duties</b>						
<b>Job Duty</b>	<b>FY07 FTE</b>	<b>FY08 FTE</b>	<b>FY09 FTE<sup>1/</sup></b>	<b>FY10 FTE <sup>2/</sup></b>	<b>FY11 FTE</b>	
TDC	-	2,001	2,001	2,001	2,001	
ADASP	726	1,279	1,654	1,654	1,654	
BDOs	589	2,011	2,860	2,986	3,196

<b>TOTAL</b>	<b>43,778</b>	<b>45,438</b>	<b>45,643</b>	<b>44,930</b>	<b>48,338</b>	

<sup>1/</sup> TSO Workforce is composed of approximately 11,000 PT TSOs and 37,000 FT TSOs (of which over 3,000 are Split Shift Employees).

<sup>2/</sup> The increase in FY 10 and FY 11 is to more accurately reflect TSOs outside the entry level/journeyman position. Prior to this budget submission, these line items were titled "Lead TSOs" and "Supervisory TSOs". The workforce has been expanded to include "Master" and "Expert" TSO. The responsibilities of the TSOs have increased over the years, becoming more specialized with additional technology requirements (liquid bottle scanners) and additional responsibilities.

<sup>3/</sup> TSA is requesting the BAO program be realigned to Airport Management PPA

In FY 2009, TSA had a record low attrition rate:

<b>Attrition Type</b>	<b>Work Schedule</b>	<b>FY04</b>	<b>FY05</b>	<b>FY06</b>	<b>FY07</b>	<b>FY08</b>	<b>FY09</b>
<b>Voluntary</b>	<b>Full-Time ONLY</b>	<b>13.6%</b>	<b>13.4%</b>	<b>12.6%</b>	<b>11.6%</b>	<b>10.8%</b>	<b>5.30%</b>
<b>Voluntary</b>	<b>Part-Time ONLY</b>	<b>57.8%</b>	<b>44.1%</b>	<b>38.6%</b>	<b>37.4%</b>	<b>31.8%</b>	<b>15.50%</b>
<b>Voluntary</b>	<b>TOTAL</b>	<b>18.0%</b>	<b>17.4%</b>	<b>16.5%</b>	<b>17.4%</b>	<b>15.8%</b>	<b>7.70%</b>

## **Career Progression Program**

This program enables widespread career growth and professional development opportunities for high-performing TSOs, while reducing attrition and adding additional security. The career progression structure allows TSA to distinguish and retain the more experienced and top performing TSOs. Test results show a positive correlation between longevity and performance, including detection ability, screening efficiency and customer service. As threats evolve and increase in complexity, the advanced skills of the TSA workforce are necessary to stay ahead of terrorist capabilities.

Program benefits include:

- Providing for the promotions of TSOs to E Band, a TSO compensation scale above the existing entry-level D Band. TSOs are eligible based on a minimum of two year's experience, specific level of performance and additional training/duties.
- Increasing the number of available positions for specialized technical career tracks. Master and Expert TSOs are BDOs or Security Training Instructors (STI) compensated at higher band levels. BDOs screen passengers by observation techniques (SPOT) to identify potentially high-risk individuals based on involuntary physical and physiological reactions. STIs perform training instruction based on national and local training programs.
- Deploying new skill sets and training to TSOs which dramatically increase their abilities. Programs such as the Aviation Direct Access Screening Program (ADASP) / Playbook, Visible Intermodal Prevention and Response (VIPR) Program, SPOT, and TDC program have enhanced TSOs' security expertise.
- Formally creating Coordination Center Officers. These TSOs assist with facilitating smooth communications and analyzing information on threats and responding to crises. Coordination Center Officers also ensure directives from management are met in a timely and accurate fashion.

## **Workforce Initiatives**

Through the SAM process, TSA has been able to identify operational and efficiency gains made possible through better scheduling, the increased use of part-time and split-shift employees, technology improvements and management practices. These gains led to the expansion of security initiatives, largely accomplished within existing resources, which have significantly strengthened air transportation security. The workforce initiatives include:

- Travel Document Checker (TDC) Program - This program ensures that only passengers with authentic boarding passes can access the sterile areas of airports and board aircraft. Specially trained TSOs, using black lights and magnifying loupes, are positioned in front of the checkpoint to check passengers' boarding passes and identification. It also allows TSA to better control passenger flow in and around the

checkpoints while allowing TSOs access to for sensitive security information regarding threats, watch lists, false documents etc.

- Screening of Passengers by Observation Techniques (SPOT) - This essential behavior recognition and analysis program adds an important layer of security in all areas of an airport. It provides a non-intrusive means of identifying potentially high-risk individuals who exhibit behaviors that deviate from an established environmental baseline, which could possibly suggest intentions of terrorism and/or criminal activity. This request includes increasing the number of BDOs by 350.
- Visible Intermodal Prevention and Response (VIPR) teams - These teams consist of TSOs, BDOs, Transportation Security Inspectors (TSIs) and Federal Air Marshals (FAMs). Their duty is to screen passengers, look for suspicious behavior and act as a visible deterrent in multiple transportation sectors, including buses, mass transit and airports. New technology, including the use of mobile radiological screening equipment has expanded the reach and capability of TSA's VIPR teams.
- Aviation Direct Access Screening Program (ADASP) / Playbook – This is an enhanced layer of security in response to a possible threat posed by airport and aircraft operator employees or other individuals and vehicles entering or present within a Security Identification Display Area (SIDA), Air Operations Area (AOA), secured, or sterile area. The ADASP program is currently being integrated into Playbook, which is designed as a comprehensive, flexible deployment system of countermeasures that are coordinated at the local airport level in order to respond quickly to emergency conditions or hostile acts. It's supported through local decision-making between the Airport Operator and the Federal Security Director (FSD), playbook involves working collaboratively with stakeholders and coordinating the assets of TSA, local law enforcement, and other Department of Homeland Security (DHS) agencies to improve an airport's overall security posture. The objective of ADASP/Playbook is to establish uniform procedures and standards for TSOs to screen individuals, their accessible property and vehicles upon entering a direct access point screening location, and conduct visual inspections of aircraft.
- The Aviation Screening Assessment Program (ASAP) - This program measures TSO screening performance using realistic and standardized assessment scenarios. The primary purpose of ASAP is to provide statistical data to determine reasons for failure within the checkpoint and checked baggage screening process. ASAP test results provide critical information to TSA leadership that helps with the improvement of aviation security and the identification of vulnerabilities across screening operations. Through continuous data analysis, recommendations and potential impacts are provided to various stakeholders in the organization. Each ASAP cycle is six-months long with the number of assessments required per cycle based on the factors to be evaluated. A total of 6,600 assessments will be executed by the end of FY 2010.

## Workers' Compensation

TSA continues to aggressively reduce U.S. Department of Labor Office of Workers' Compensation Program (OWCP) costs through strategies of prevention, education, case management, and nurse intervention. TSA field operations are required to develop a local safety program targeted at inspections, hazard recognition and analysis, hazard abatement, and injury documentation. The Office of Occupational Safety, Health and Environment (OSHE) provided field support to the nation's airports to develop their safety programs, and eleven safety courses aimed at injury prevention are posted on TSA's Online Learning Center. TSA's national nurse case management program at 21 airports has successfully assisted TSOs in returning to employment in a shorter time. The Periodic Roll Initiative (PRI), established in April 2007 is a joint effort with the Nurse Case Management team where all of the long term disability (Periodic Roll) cases are examined for opportunities to return employees back to work when medically feasible.

In addition, the President's Safety, Health, and Return to Employment Initiative (SHARE) requires Federal agencies to reduce the Total Case Rate (TCR) and Lost Time Case Rate (LTCR) by three percent each Fiscal Year from the FY 2003 baseline. TSA has exceeded its goal of reducing the number of TSO injuries and illnesses. The Total Case Rate (TCR) was reduced from a rate of 29.06 total cases per 100 employees in FY 2005 to 7.55 in FY 2009, a decrease of 74.2 percent. The Lost Time Case Rate (LTCR) Decreased from 12.89 cases per 100 employees in FY 2005 to 3.53 cases in FY 2009, a decrease of 72.6 percent.

In FY 2011, TSA will seek to continue the trend of reducing numbers of TSO injuries and illnesses.

	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	Percent Change FY 2005 - FY 2008
<b>Total Case Rate (TCR)</b>	22.89	36.27	29.06	16.46	13.93	10.15	7.55	-74.02%
<b>Lost Time Case Rate (LTCR)</b>	--	--	12.89	8.94	7.19	5.14	3.53	-72.61%

These initiatives have led to a \$10.9 million decrease in OWCP costs between FY 2009 and FY 2011 (from \$55.5 million for FY 2009 to an estimated \$44.6 million for FY 2011). TSA anticipates that these efforts will mitigate injuries in the out-years.

## Accomplishments and Enhancements

Significant accomplishments in FY 2009 include:

- Reduced wait times to under 20 minutes. Over 99% of wait times are less than 20 minutes;
- Tripled the number of IED Checkpoint drills;

- Trained approximately 55,000 TSA employees on ENGAGE! (for employees working at the checkpoint) and/or COACH!! training (supervisory training), an extensive retraining program that brought together the latest thinking from intelligence, explosives detection, and inhuman factors that can affect security.
- Transitioned to the use of STIs for recertification training, in lieu of contractors for a reduction of costs in the out-years without degrading the program.
- Screened more than 570 million people and more than 420 million bags. This year, TSOs prevented passengers from bringing onto planes more than 830 guns.
- As a result of BDO and TDC referrals, 518 people were arrested.

FY 2010 planned accomplishments include:

- Utilizing advanced communication systems for TSOs throughout the airport;
- Expanding the use of STIs for re-certification training;
- Initial distribution and piloting of Credential Authentication Technology/Boarding Pass Scanning System (CAT/BPSS) devices at TDC stations;
- Supporting BDOs participation in TSA's Performance Accountability and Standards System (PASS); and
- Executing 6,600 ASAP assessments at airports.

FY 2011 planned accomplishments:

- Continue deployment of CAT/BPSS devices to TDC stations;
- Complete 6,600 ASAP assessments at airports;
- Accelerate the implementation of advanced imaging technology (AIT), which provides the capability to detect dangerous materials, including non-metallics. By the end of FY 2011, TSA plans to have deployed over 1,000 machines throughout the aviation sector.
- Expand security coverage at our nation's airports by increasing the number of BDOs by 350.

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:  
Screening Training and Other  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Screening Training and Other**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>56</b>	<b>46</b>	<b>220,624</b>
<b>2010 Enacted</b>	<b>56</b>	<b>55</b>	<b>204,713</b>

<b>2011 Current Services</b>	<b>56</b>	<b>55</b>	<b>202,847</b>
2011 Program Change	-	-	61,796
<b>2011 Total Request</b>	<b>56</b>	<b>55</b>	<b>264,643</b>
Total Change 2010 to 2011	-	-	59,930

The Transportation Security Administration requests \$264.6 million for this activity. This is an increase of \$59.9 million from FY 2010. The \$1.9 million adjustment to base consists of a \$1.3 million non-recr of FY 2010 funding, \$.104 million increase for pay inflation and a \$.720 million decrease as part of the Bomb Appraisal Officer (BAO) realignment to Airport Management previously discussed in the Screener PC&B PPA. The program change includes \$21 million for consumables relating to the purchase of additional Explosive Trace Detection (ETD) devices and the balance is the training and related consumable/non-payroll expenses associated with the FY 2011 increase in TSOs and BDOs.

**CURRENT SERVICES PROGRAM DESCRIPTION**

This activity provides the resources to support new and recurring training requirements for the TSO workforce, as well as other direct costs associated with TSO operations.

The following table provides the components of this PPA.

\$ in millions

	<b>FY 2010</b>	<b>FY 2011</b>
TSO Training	\$99.2	\$134.0
Screener Supplies/Janitorial/Uniforms	62.3	87.4
National Deployment Office	25.0	25.0
Environmental Programs	12.1	12.1
Model Workplace Program	2.0	2.0
Tort Claims	4.1	4.1
<b>Total</b>	<b>\$204.7</b>	<b>\$264.6</b>

**Transportation Security Officer (TSO) Training: \$134.0 million:** TSO training is comprised of a compendium of courses that includes basic training for initial hires, on-the-job training (OJT), lead and supervisor technical training, recurrent training, advanced technical skills training, remedial training, and return-to-duty training. All new hires receive a combination of instructor-led, hands-on, and web-based training. Recurrent and specialized training courses are provided by either classroom instruction or the TSA On-Line Learning Center (OLC).

TSA uses a measurement and evaluation process to ensure that training programs meet established objectives and standards. Training effectiveness is assessed using a four-level model measuring trainee reaction, learning, behavior, and results. TSA also conducts assessments to ensure that a high level of instructional quality is maintained.

The following programs are funded through this activity:

- **New Hire Training Program (NHTP):** The bulk of the security training funding provides for classroom instruction on checkpoint procedures, including travel document checking. The checked baggage screening procedures module includes on-screen-resolution protocol (OSARP) training for all new hires depending upon the equipment in place at their duty location. NHTP provides web-based training, 40 hours of instructor-led training, and hands-on equipment-specific labs at the home/hub airport. To coincide with the introduction of emerging technologies into the mainstream passenger screening process, TSA develops and subsequently delivers training to support those technologies.
- **Recurrent Training:** All TSOs are required to undergo recurrent security training to ensure they maintain proficiency of skills learned during basic training. Additionally, the recurrent courses are designed to keep the workforce up-to-date with procedural changes; new technologies introduced into the screening operations; equipment used by the TSOs in the performance of their duties; and, new threat items. This training is often delivered on a weekly basis and is used to target the TSOs' individual training needs (e.g. X-ray Image Interpretation). Recurrent training courses are also required for BDOs, BAOs and the TDCs programs.
- **Checkpoint Evolution Training:** This new checkpoint strategy incorporates an intelligence-based focus on the interaction and communication with passengers, enlisting them as active participants in the security process. Every TSO working at the checkpoint underwent re-training that consolidated the latest thinking in intelligence, explosives detection, and human factors that can affect security. With the goal of making TSOs more analytical and less "check-list oriented." The NHTP and recurrent training curriculums incorporates elements of this initiative as a theme focusing on four main elements: security-driven imperative to engage passengers; calming of the checkpoint to enhance early detection of hostile intent; increase of unpredictability; and reduction of congestion through passenger engagement at multiple points throughout their journey.

Currently, there are two required instructor-lead training courses for checkpoint evolution. All TSA personnel take the first course and all supervisory personnel (Lead TSOs and above) complete the second course. This second course provides mid-level managers with skills necessary to help reinforce the training and provide guidance to TSOs. By FY 2011, the TSA will have developed the next phase of training that continues to promote the concept of critical thinking and instills the ideals of COACH! and ENGAGE!

- **Travel Document Checker (TDC) Program:** This curriculum provides training for all TSOs assigned to check travel documents and verify identification for individuals seeking access to the screening checkpoint. The curriculum includes training on Standard Operating Procedures, detecting fraudulent documents, utilizing document checking technology, and recognizing acceptable forms of identification. The training will continue to be updated and enhanced as new information is available.
- **Transportation Security Managers (TSM) Technical Training Course:** The technical and leadership competence of TSMs is critical to TSA objectives that serve to protect the traveling public by preventing any deadly or dangerous objects from being transported onto aircraft or other modes of transportation. TSA will develop and deploy a course to strengthen TSMs' technical and managerial skills and provide tools needed to successfully manage the daily responsibilities and challenges and respond and assess all unresolved issues at checkpoint, checked baggage, and SPOT locations.
- **Behavior Detection Officer (BDO) Program:** This curriculum provides training in behavior observation and analysis at the checkpoint for the purpose of identifying passengers exhibiting behaviors indicative of stress, fear and deception. This program, known as Screening Passengers by Observation Techniques (SPOT), is performed by BDOs at all major airports. The curriculum for this program will continue to be upgraded to include additional requirements in behavior detection and reflect new techniques in deception prevention.
- **Security Training Instructor (STI):** This training supports the creation of a permanent TSA in-house instructor certification program. In the past, TSOs performed instructor functions as a collateral duty under the TSA Approved Instructors (TAI) program. The STI program provides more stability and consistency since TSOs become virtually full-time instructors while creating a career progression opportunity. The STI will perform instructional duties 80% of the time and perform security screening duties the remaining 20%. In 2009, STIs provided Basic Screener Training (BST) to 90% of the newly hired TSOs, while the contractor provided 10%. This shift of training delivery responsibilities from headquarters (HQ) to the airports provides flexibility to the field and allows HQ to focus on improving curriculum by using the latest adult learning techniques and technology.
- **Supervisor Technical Training Course (STTC):** The technical and leadership competence of Supervisory Transportation Security Officers (STSOs) is a critical

component of workforce effectiveness and retention. TSA developed and deployed a course to strengthen STSOs' technical and general supervisory skills and provide tools needed to successfully manage the daily responsibilities and challenges faced at the checkpoint and/or checked baggage screening locations. TSA modified this course to include its Lead TSOs (LTSOs), as they also fulfill a critical role in the overall TSO management change. TSA conducts additional STSO Train-the-Trainer courses to enable airports to provide ongoing training to their STSOs and LTSOs at their home airports. TSA plans to develop recurrent training to support the STTC.

- Emerging Technology Training/Aids and Tools: This training supports the evaluation and deployment of emerging screening technologies for passenger, carry-on, and checked baggage screening. Some of these emerging technologies include Advance Imaging Technology (AIT), Advanced Technology (AT), Bottled Liquid Scanners (BLS), Stand Off Detection (SOD), and Auto Explosives Detection Systems. TSA employs a variety of automated training and testing tools to enhance TSO skills, including simulated computer based courses, and training videos. TSA continues to use the latest cutting edge technologies to provide sophisticated scenario-based training.
- Performance Reviews: All TSOs, Lead TSOs, and Supervisory TSOs must participate in an Annual Proficiency Review to ensure that they meet all of the qualifications and performance standards required to perform their duties as required of ATSA. TSOs will continue to be certified annually based on overall performance as defined by the Performance Accountability and Standards System (PASS). In 2009, PASS Technical Proficiency testing focused on image recognition, proper screening techniques, and the ability to identify, detect, and locate prohibited items. Technical proficiency is measured in the following ways:
  - Measuring Image Proficiency -- One image quiz per year administered using the x-ray simulation;
  - Measuring Practical Skills -- A series of Practical Skills Evaluations, including the detection of prohibited items, of all TSOs per year; and
  - Measuring On-Screen Alarm Resolution Protocol (OSARP) Proficiency – One OSARP quiz per year administered using the Employee Assessment Management System (EAMS) software.

Since inception, TSA relied on contractors to conduct practical skills evaluations on its workforce. In FY 2009, this effort was significantly restructured to be conducted by STIs. Over 40,000 TSOs were successfully recertified by TSA employee evaluators using an end-to-end paperless evaluation and reporting system. Additionally, the evaluation criteria itself was restructured into a more focused results-based measure centered on a TSO's ability to find prohibited/threat items. TSA also created more realistic object recognition assessments to accommodate for the evolving technology deployed at airports.

Significant accomplishments for the Screener Training Program in FY 2009 included:

- Provided training for 3,096 new TSOs, trained and certified 70 STIs, redesigned the Bomb Appraisal Officer (BAO) certification course and trained and certified 58 BAO's for placement at airports and trained and certified 732 BDOs;
- Awarded new five-year Specialized Security Training contract;
- Developed advanced imaging technology, advanced technology x-ray, bottled liquid scanner and new explosive trace detection training, and trained all airports where this equipment is deployed;
- Deployed improvised explosives device (IED) training to improve TSO's x-ray recognition and detection of IEDs and implemented the IED Accessory Kit program that provides variability and flexibility with IED kits used for IED recognition training and testing; and
- Trained approximately 55,000 field operations employees in 5 months in unpredictable security skill training.

FY 2010 planned accomplishments include:

- Develop and implement recurrent training for STIs, BDOs, BAOs, and TDC Programs as well as develop and implement a technical training course for Transportation Security Managers;
- Develop Credential Authentication Technology, Shoe Scanner, Exit Lane Breach Technology and Auto EDS training and will train all airports where the equipment is deployed;
- Launch advanced imaging technology and advanced technology x-ray simulation software for use during image analysis training and testing;
- Continue to transition the day-to-day operations of the Practical Skills Evaluation process to STIs/STSOs.
- Integrate ENGAGE! and COACH!! training into new hire and recurrent training materials and launch next phases of Evolution training to field operations workforce.

In FY 2011, TSA will continue to sustain technical training for the aviation security workforce. A fundamental principle of TSA's training mission is to fully engage the workforce both in the classroom and on the job by the use of an interactive learning environment. Both use simulations and action learning techniques and employ new learning products in resident courses and distributed learning.

TSA will continue to analyze the feasibility of using digital video recording tools to upload TSO real-life performance at the checkpoint into an electronic and automated evaluation system. Airport personnel would be able to review the information with the employee and conduct remediation and "re-evaluation" as necessary to ensure that poor performers are able to successfully achieve minimal performance standards or higher.

TSA will test and evaluate the effectiveness of new screening technologies for passengers and baggage. Advanced imaging technology (including millimeter wave and x-ray backscatter), reduced-size EDS for use at checkpoints and possibly as a combined solution for checked

baggage and checkpoint baggage screening, shoe and bottled liquid scanners, and advanced technology X-ray provide increased capabilities. As these new technological advances in screening are tested and implemented, new training modules will be developed and existing training updated to ensure TSOs are knowledgeable, skilled and prepared.

In FY 2011, TSA will provide at the request level basic and advanced training for over 5,000 new TSOs and 350 new BDOs along with career development. The training funding increase requested is directly correlated with the increase in TSO/BDO staffing.

**Supplies/ Janitorial/ Uniforms/ and Other: \$87.4 million:** Consumable supplies are critical materials used by TSOs to ensure effective screening of passengers, carry-on and checked baggage. These consumable supplies include: disposable gloves, sample swabs or traps, sample wands, daily calibration tokens, sticks or traps, moisture removers, filters, printer paper, and ribbons, reactant materials, special solutions, label seals to identify bags inspected by TSOs, TSA logo inspected tape to reseal cardboard boxes and packages after inspection, and baggage inserts to notify passengers that TSA has opened their bag for inspection and providing contact information in the event of a problem.

TSA began issuing bottled liquids scanning equipment to airports in FY 2007. This equipment requires a sensing element in order to detect traces of certain chemical agents that must be periodically replaced. In FY 2011, TSA will provide almost 550 portable explosive trace detection (ETD) units to checkpoints that will require the use of consumable items for swabbing used in the testing.

TSA continues to support janitorial services contracts for passenger checkpoint and baggage screening areas to ensure a safe, debris-free work environment for TSOs and convey a positive image of TSA work areas to the traveling public. TSA currently provides janitorial reimbursement at over 90 federalized airports and reimbursement requests are increasing at a rate of approximately 22 airports per year.

TSA continues to provide uniforms to new hires as well as provide replacement uniforms to all TSOs through the annual allowance program. The new TSO's TSA plans to hire in FY 2011 will result in increased uniform and supply costs.

**National Deployment Office (NDO): \$25 million:** The NDO provides additional TSOs and BDOs to Federal Security Officers (FSDs) for screening support during crisis response and recovery operations, seasonal demands, special events or other activities that require higher-than-normal security related staffing levels. Each request for NDO support is analyzed from a cost/benefit/risk perspective to ensure the optimal use of limited resources is achieved. The NDOs responsibilities include deploying TSOs, Transportation Security Inspectors (TSIs) and BDOs in support of Visible Intermodal Prevention and Response (VIPR) Teams. VIPR teams deploy to enhance and augment local transportation security operations in the non-aviation modes of rail, mass transit, bus and/or ferry modes. For disaster response operations, the NDO is responsible for deploying 12 Transportation Security Advance Teams (TSAT), which include 156 personnel, and 41 Transportation Screening Security Teams (TSST), which include 895

personnel. TSA continues to review methods for reducing costs associated with the NDO program.

Significant accomplishments for the NDO in FY 2009 included:

- Conducted security operations to support the field in the following areas:
- Disaster response and recovery operations
- Seasonal Augmentation
- Risk Mitigation Operations (VIPR)
- Special Events (Presidential Inauguration and G-20 Summit)
- Equipment
- Pilot programs
- Training
- Hiring Shortfalls
- Expanded Air Service
- Practical Skills Evaluations
- Identity Verification Call Center
- Transportation Worker Identification Credential Program
- COACH!! and ENGAGE!
- Deployed to 142 locations, providing 1,343 National Deployment Force (NDF) Officers delivering 61,042 days of support.
- Provided Crisis Response Deployments

In FY 2010 and FY 2011, NDO will continue to support the movement of security operations personnel in support of the VIPR teams, security pilot programs, disaster response operations, practical skills evaluations and other emerging operational requirements.

**Environmental Program: \$12.1 million:** This program provides for the disposition of hazardous materials and abandoned personal property collected by TSA at checkpoints, as well as the maintenance of the environmental management system. TSA has an extensive and complex program to safely and securely identify, sort, store, and protect assets; as well as remove and dispose of hazardous and voluntarily abandoned property. TSA's national hazardous materials disposal program protects the traveling public from exposure to hazardous materials and complies with Federal, State, and Local environmental regulations and laws.

Significant accomplishments for Environmental Programs in FY 2009 included:

- Won the 2009 "Federal Electronics Challenge" (FEC) Gold Award. This award recognizes outstanding environmental stewardship in all three life cycle phases of electronics acquisition, energy efficient utilization, and disposal;
- Conducted the 2<sup>nd</sup> Biennial TSA Environmental Management Coordinator (EMC) Training Seminar. This training Seminar was developed and executed to re-enforce and update program training as well as to convey and discuss lessons learned from the FY 2008 TSA/EPA Regulatory Workshop. In addition to providing training to EMCs, the seminar leveraged knowledge and best practices from EMCs nationwide

to continue to increase the efficiency of TSA operations in the face of increasing volumes of hazardous voluntarily abandoned property; and

- Completed 238 environmental compliance audits. TSA is well ahead of the GRPA requirement to perform environmental audits at all facilities and operations every three years.

FY 2010 planned accomplishments include:

- Complete a comprehensive review and update the Hazardous Materials Management Program training courses to ensure compliance;
- Continue to implement and maintain the environmental management system and the disposal of hazardous materials and abandoned personal property collected by TSA at checkpoints; and
- Complete a case study to evaluate alternative disposal methods for hazardous voluntarily abandoned property at small TSA airport operations. If successful, TSA may be able to increase the efficiency of the National Hazardous Materials Management contract by eliminating airport operations that will no longer require the services of the contract.

In FY 2011, TSA will complete the implementation of an Environmental Due Diligence Audit program to support TSA's increased direct lease and potential real property purchase activities. This program will ensure TSA's potential environmental liabilities are managed.

**Model Workplace Program: \$2 million:** This program identifies and implements the best employment ideals and practices to make TSA an employer of choice. The cornerstone of the program is TSA's Integrated Conflict Management System (ICMS). The ICMS builds and sustains an environment in which issues, ideas, and concerns are raised and addressed, and conflict is managed effectively. The system provides skills, structure, and support to cooperatively solve problems necessary for good relationships, teamwork, and organizational effectiveness.

Significant accomplishments for FY 2009 included:

- Achieved over 90 percent success rate in airports reaching ICMS Level 1 and 2 Standards and provided guidance and support to assist the Federal Air Marshal Service;
- Published Level 3 ICMS Standards and began creation of an assessment plan to collect, track and analyze the metric; and
- Conducted HQ ICMS design workshop and developed roll out plan to include establishing HQ Employee Advisory Council.

FY 2010 planned accomplishments include:

- Implement assessment plan and metrics for measuring ICMS Level 3 Standards;
- Begin certifying airports and FAM offices – achieve 25 percent compliance rate; and
- Develop, qualify, and mentor Conflict Management Internal Practitioners.

In FY 2011, Model Workplace Program Office (MWPO) plans to continue to fully embed ICMS throughout TSA seeking to achieve a 90 percent compliance rate for Level 1, 2, and 3 Standards and to define Level 4 standards.

**Tort Claims: \$4.1 million:** TSA currently screens over 50 million bags per month and over 35 million passengers per month. Occasionally, during the screening process, a screener may damage or misplace passengers' property. TSA reimburses passengers that have experienced loss or damage due to the negligence of a TSA employee.

**Department of Homeland Security

Total Change 2010 to 2011	25	19	231,287

The Transportation Security Administration requests \$360.0 million for Checkpoint Support activities. This is an increase of \$231.3 million over FY 2010 for technologies for explosives detection at airport checkpoints. An adjustment-to-base increase of 15 FTP and \$87,000 reflect positions to support the American Recovery and Reinvestment Act (ARRA) in addition to a program change of 10 FTP.

**CURRENT SERVICES PROGRAM DESCRIPTION**

The following table provides the components of this PPA.

(dollars in millions)

	<b>FY 2010</b>	<b>FY 2011</b>
Checkpoint Technology	\$117.3	\$344.1
Advanced Surveillance Program	6.0	6.0
Payroll	5.4	9.9
<b>Total</b>	<b>\$128.7</b>	<b>\$360.0</b>

The checkpoint support program provides the resources required to test, evaluate, integrate, and deploy passenger screening and carry-on baggage screening capabilities. This involves technologies, training, checkpoint reconfigurations, closed circuit television surveillance equipment, operational integration of systems, and safety and optimization services at approximately 2,225 passenger checkpoint lanes in our Nation's airports. TSA developed a

strategic plan to enhance screening through improved checkpoint technology which will refine passenger security for aviation. This initiative extends beyond the airport checkpoint and considers the end-to-end passenger experience to improve security and increase efficiency. Focus is on three key elements: improved explosives detection, enhanced hostile intent detection, and extended presence in the passenger journey.

Current technologies that have been deployed include Threat Image Protection (TIP) Ready X-Ray machines (TRX); enhanced walk-through metal detectors (WTMD) that screen persons for metallic weapons such as guns or knives; explosives trace detectors (ETD), which are used to test for explosive residue on selected carry-on items or can be used as a portable device that allows for increased security and an added layer of random screening within the sterile area; bottle liquids scanners (BLS), which screen bottles to determine if they contain explosives or benign liquids; Credential Authentication Technology (CAT), which is used to verify a passenger's travel documents; Automatic Wait Time (AWT) technology, which allows the TSA to monitor wait times at checkpoints; Chemical Analysis Devices (CAD), which are small devices used to identify suspect substances; advanced imaging technology (AIT) consisting of millimeter wave, backscatter x-ray, and other technologies capable of providing images of threat objects on a person's body; and Advanced Technology systems (AT), which are X-ray systems with advanced visual detection capabilities, using multi-view capabilities or automated explosives detection capabilities.

The TSA received ARRA funding to be used at the checkpoint in order to procure and install checkpoint explosives detection equipment. The TSA will use these funds to accelerate the large scale deployment of AT systems, Universal Conveyor Systems (UCS), BLS, AIT, CAT, CAD, and Next Generation Explosive Trace Detectors (NextGen ETDs). By the end of FY 2010, enough AT and BLS will be procured to complete the current nationwide requirements of these systems. ARRA procurements of AIT, UCS, CAT, CAD and NextGen ETD will provide a significant percentage of coverage toward full operating capability of these systems.

FY 2009 significant accomplishments included:

- Conducted Lab Testing on Advanced Technology X-ray systems (AT2) manufactured by 3 vendors, AIT systems from 2 vendors, BLS from 5 vendors, and 1 NextGen ETD vendor.
- Conducted Operational Testing on AIT systems manufactured by 2 vendors, BLS from 2 vendors, and 1 NextGen ETD vendor.
- Procured 44 AT Systems; 400 NextGen ETD; 150 AIT, 500 BLS.
- Deployed 512 AT, 12 AIT, and 89 ETD.

FY 2010 planned accomplishments include:

- Establish a Qualified Products List for AT2 with increased liquids detection capabilities;
- Achieve full operating capability (FOC) for BLS;
- Procure and deploy Credential Authentication Technology/Boarding Pass Scanning Systems (CAT-BPSS);

- Conduct laboratory and operational testing and evaluation for AWT and Shoe Scanner Devices (SSD); and
- Conduct test and evaluation (T&E) support for AT Carry-on Screening, AIT, BLS and NextGen ETD systems, Security Technology Integrated Program (STIP), CAT-BPSS, SSD, and Enhanced Metal Detection (EMD).

FY 2011 planned accomplishments include:

- Continue procurement and deployment for AIT and AWT;
- Continue modifications to the CAT-BPSS to provide ID verification capabilities for law enforcement, airline and airport IDs;
- Procure and deploy SSD that will allow passengers to avoid the inconvenience of removing their shoes for security screening;
- Procure and deploy Portable ETD that will allow for the increased security and an added layer of random screening within the sterile area;
- Continue evaluation and modification of AT2 systems to increase detection capabilities to allow liquids and laptops to remain in carry-on bags for screening;
- Continue evaluation and modification of AIT to provide automated detection capabilities to increase throughput and further remove operator subjectivity from the security decision process. Assessments will continue on new technologies in support of the checkpoint area, as well as enhancing existing T&E capabilities. TSA will also continue to evaluate technologies planned for checkpoint, improvements to existing screening technologies, and products emerging from DHS Science and Technology's R&D program; and
- Establish a new set of technology qualification groups based on Innovative Technology Review Process (ITRP) data and information on next generation technologies to include:
  - Emerging spectrum-based inspection technologies;
  - Advanced EMD including echo-imaging; and
  - Next generation x-ray based systems.

**Checkpoint Technology: \$344.1 million:** This request includes \$344.1 million to test, procure and deploy improved technology systems to further extend explosives and prohibited item detection coverage at aviation checkpoints. It includes funding to test, purchase, and install new screening equipment and update existing equipment. Funds will also be used for program, engineering, technical support and travel, original equipment manufacturer training, warehousing, consumables, and refurbishing equipment, to provide functionality and performance enhancements, as well as for life-cycle replacements for units reaching the end of their useful life.

TSA analyzes integration of new and modified systems and concepts of operation to ensure operational effectiveness and suitability prior to full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment under the proposed concept of operations, in the field under a variety of environmental conditions. In particular, this includes:

- Operational test and evaluation as part of the acquisition process for items procured by TSA, including Early Utility Assessments, Initial Operational Test and Evaluation, and Follow-on Operational Test and Evaluation over the project lifecycle;
- Operational test and evaluation in support of regulatory and policy decisions;
- Pilots, concept demonstrations, and field experimentation in support of mission area analyses, concept of operations development, process optimization and improvement, and workforce / vector characterizations; and
- Testing and evaluation capabilities development, to improve the quality and utility of evaluation products.

Equipment purchases may include AT, AIT, AWT, BLS, CPI, SSD, CAT, CAD, NextGen ETD, technology integration solutions, and additional units or upgrades to legacy equipment. This equipment will enable TSA to detect a greater range of threats more quickly and with greater accuracy than existing equipment. TSA will be deploying additional AIT systems that will build off current capabilities such as auto detection algorithms, networking and multiplexing.

This effort will also incorporate, as appropriate, alternative configurations that improve security and throughput while reducing congestion at “soft target” locations like airport lobbies. These enhancements may include remote screening centers, improved divestiture and reorganization zones, or special lanes for no/single carry-on baggage. Funds will also be used for the movement of equipment, small scale construction, and to purchase any ancillary equipment such as roller tables, lift carts, and fatigue mats needed for a particular project.

<sup>1</sup> Percentage of FOC based on FY14 estimates. Current nationwide requirements are being met.

**Advanced Surveillance Program: \$6.0 million:** The Advanced Surveillance Program (ASP) utilizes the existing infrastructure owned and operated by the local airport authority for remote monitoring, threat detection and assessment in a partnership agreement to provide enhanced situational awareness to local TSA. In FY 2011, \$6.0 million of funding is requested for these activities. These systems, collectively known as advanced surveillance systems, have proven to be a key component in the “best practices” of the security industry world-wide for many years.

They provide threat identification, situational awareness, deterrence, loss prevention, investigative and legal activities along with standard management functions. ASP promotes a cooperative partnership and sharing of information between Federal and local authorities and provides invaluable coordination for command and control as well as first responders in the event of an incident or threat. The EDS Procurement and Installation program requests additional funding to support ASP in baggage handling areas.

**Payroll: \$9.9 million:** The request provides \$9.9 million to support 66 full time positions.

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:

Total Change 2010 to 2011	15	14	(404,468)

The Transportation Security Administration requests \$373.8 million for this activity. This reflects a decrease of \$404.5 million below FY 2010 due to an adjustment-to-base decrease of \$487.0 million for FY 2010 non-recurring funds as well as a program change increase of \$82.5 million for optimal baggage screening equipment. Additionally, an adjustment-to-base increase of 15 FTP reflects positions to support the American Recovery and Reinvestment Act (ARRA).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The following table provides the components of this PPA.

(dollars in millions)

	<b>FY 2010</b>	<b>FY 2011</b>
Installation	\$809.8	\$500.7
Purchase of Checked Baggage Equipment	202.8	103.6
Payroll	15.7	19.5
<b>Total<sup>1/</sup></b>	<b>\$1,028.3</b>	<b>\$623.8</b>

<sup>1/</sup> Includes mandatory funding of \$250M

TSA requests \$373.8 million, excluding the \$250 million mandatory funding, to support the installation of additional in-line systems for airports selected in accordance with the EDS Strategic Plan. TSA has made steady progress in deploying systems at high priority airports over the past several years.

In 2006, TSA developed a Strategic Plan for achieving optimal screening solutions. Implementation of these optimal solutions will provide for decreased life cycle costs for the EDS program. This plan uses a top-down prioritization model to perform a systematic and comprehensive assessment of screening alternatives at airports and prioritizes projects by balancing security and economic factors. These results feed into a deployment model that identifies the optimal schedule for deploying equipment to airports given funding, equipment availability and other key assumptions. Continuing system deployment efforts are necessary to maintain compliance at the nation's airports.

TSA has made steady progress in deploying systems at high priority airports in the past several years. By the end of FY 2010, it is projected that 200 airports will have one or more operational in-line systems. Currently, there are 285 Category X through Category III airports. Of this number, 158 (55%) have been equipped with completed in-line systems. Forty-two (33%) of the remaining 127 airports in these categories will have some completed in-line systems by the end of FY 2010.

In-line EDS screening systems provide more reliable baggage delivery, greater efficiency, and increased flexibility to accommodate traffic growth. TSA benefits from operational improvements associated with this type of automation. For instance, working conditions for screeners improve with in-line systems. Alarms can be resolved in quieter, dedicated spaces properly designed for the alarm resolution function. On-the-job injuries are reduced as a result of better-designed alarm resolution areas since fewer alarms mean fewer bags are lifted by Transportation Security Officers (TSOs). These are just some examples of the broad reaching benefits of in-line systems.

The FY 2011 request will be used to test, evaluate, select, deploy, and maintain the electronic baggage screening technology systems. The program is responsible for ensuring that 100% of all checked baggage is screened with explosives detection system capability or a suitable alternative. The two primary technologies acquired and deployed under the Electronic Baggage Screening Program (EBSP) are EDS equipment and Explosives Trace Detection (ETD) devices. Continuous improvements are required to increase equipment reliability, reduce downtime, extend service life, and eliminate screener safety hazards in order for EBSP to substantially improve the effectiveness and efficiency of the deployed screening equipment. TSA's activities related to purchasing and installing EDS and ETD systems consist of some or all of the following, depending on the equipment and specific location: 1) operational testing and evaluation, 2) equipment purchase 3) site survey and design, 4) site preparation, 5) facility modification, 6) warehousing and shipping, 7) equipment installation, integration, and multiplexing, 8) independent verification and validation testing, and 9) program support.

**Program progress relative to EDS/ETD deployment and facility modifications**

	Total Number of TSA Airports*	Entire Airport Completed	Some Screening Areas with Completed Systems	Total Number of Airports with Some Completed Systems	Percentage of Airports with Some Completed Systems**
CAT X	28	15	11	26	93%
CAT I	56	30	13	43	77%
CAT II	77	51	18	69	90%
CAT II	124	62	0	62	50%
Total	285	158	42	200	70%

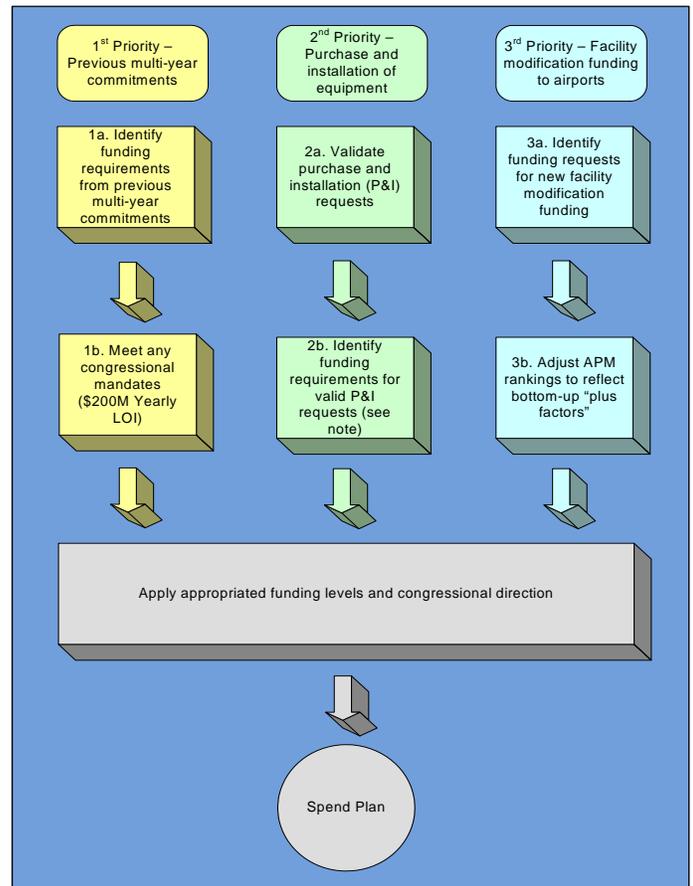

\*Based on TSA Threat Category listing as of April 1, 2009

\*\*Category X and I projected to reach 100% by FY 2018

## Facility Modification Project Prioritization

Facility modification priorities necessarily occur after resources are allocated to other program commitments. First, the program must assign resources to previously committed multi-year agreements for facility modifications. This is followed by the purchase and installation of EDS equipment to support new airport terminals, to ensure security compliance, to fulfill existing airport agreements and to ensure equipment is available for new projects. Funding for new facility modification projects follows in priority.

To prioritize facility modification projects, several factors are considered beyond the risk-based Airport Prioritization Model (APM) ranking, including the cost share the airport is willing to assume, the scoring of the airport's funding application, and the readiness of the airport to apply funding (i.e., schedule). In this process, TSA first runs a top-down model to generate the APM scores and concurrently reviews airport funding applications submitted. TSA then scores the additional factors and generate a prioritization list. The figure that follows indicates how that process is conducted. Lastly, a factor for readiness is then applied to ensure that funds are directed to airports that are ready to apply them.

## EDS

EDS is the main technology used in the checked baggage screening process. This equipment automates what was previously a manually-intensive baggage inspection, allowing faster bag throughput (up to 300 percent) and improved threat detection capabilities. EDS machines are the largest and most expensive security screening equipment in the TSA inventory.

Most of the currently deployed EDS technology developed prior to the Aviation and Transportation Security Act (ATSA) was based on standards set forth by Congress in the Aviation Security Improvement Act of 1990. Since large-scale deployment of EDS systems by TSA in 2002 and 2003, manufacturers have made improvements to lower alarm rates and increase throughput capacity for this equipment. The EDS program saw new technological introductions in the form of the Reveal CT-80, GE 9400 and 9800, and the L-3/Analogic XLB

and King Cobra. Newly entrant EDS machines and significant upgrades to existing EDS technology are constantly under development.

These technologies will offer a variety of enhancements that will improve screening capabilities, increase throughput, and reduce equipment footprint. Engineering and economic modeling of dynamic risk-based Advanced Technology-EDS hybrid systems are in process. Additionally, TSA efforts to contain costs by using reduced size EDS to combine checkpoint and checked baggage operations at low efficiency/high cost airports are being explored. In FY 2011, TSA will procure and deploy equipment offering significant improvements to screening efficiency.

### **ETD**

ETD machines are used both as a primary screening method and a secondary screening method (i.e., resolving EDS alarms). ETDs are the second largest component of equipment cost within the program. ETDs are designed to detect explosives residue left on an item and/or bag. Since the enactment of the ATSA in November 2001, TSA has implemented the 100 percent checked baggage screening requirement; however some solutions in place may not be sustainable as passenger loads increase. TSA plans to replace 100 percent ETD checked baggage screening solutions with EDS or reduced sized dual-use EDS where appropriate. These changes began in FY 2009.

**Purchase: \$103.6 million:** The FY 2011 request includes \$103.6 million to support the purchase of 152 EDS for deployment in our nation's airports. The procurement will consist of medium throughput, high throughput, and reduced size EDS. Purchases in FY 2011 are planned to support projects where facility modifications will be completed from prior year funded projects and recapitalization of existing equipment as required.

**Installation: \$500.7 million:** The FY 2011 request includes \$500.7 million for installation. The installation funding supports the multi year- Letter of Intent (LOI) requirement and the installation of electronic baggage screening equipment in the Nation's airports. Installation costs, along with purchase costs, are a component of the total cost of equipment deployment. The cost of installing EDS and ETD systems consists of some or all of the following, depending on the equipment and specific location: 1) site survey and design, 2) site preparation/ facility modification, 3) warehousing and shipping, 4) testing, and 5) program support.

\$100 million for continuation of recapitalization efforts is already underway for standalone systems and for recapitalization of inline systems. Recapitalization of in-line systems is more complex and costly, as baggage conveyors must be removed for access to the EDS units, conveyor controls must be revised to support integration with the new EDS units, and conveyor belts may need to be upgraded to ensure efficient operation of the integrated systems. TSA has begun inline recapitalization by deploying teams to our oldest sites and sites with known deficiencies to evaluate the full scope of the recapitalization effort, and to determine alternatives for and scope of interim baggage screening during the recapitalization.

The funding also supports the Security Technology Integrated Program (STIP). The STIP effort benefits EDS by: 1) providing enhanced security, 2) improving resource management, and 3) assisting in decreasing operational costs by increasing equipment reliability and reducing downtime.

Installation also funds the Advanced Surveillance Program (ASP). ASP provides: 1) remote visibility into the baggage resolution and screening areas, 2) provides an additional layer of security into the locations that TSA screens checked baggage to reduce the risk of threats from being introduced into checked baggage, and 3) creates overall situational awareness to support oversight control for loss prevention. The Checkpoint Support program also requests funds to support ASP in the checkpoint environment.

Installation funding is also used to evaluate the impact of new security technologies, procedures, and policies. TSA analyzes integration of new and modified systems and concepts of operation to ensure operational effectiveness and suitability prior to full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment under the proposed concept of operations, in the field under a variety of environmental conditions. In particular, this includes:

- Operational test and evaluation as part of the acquisition process for items procured by TSA;
- Operational test and evaluation in support of regulatory and policy decisions in areas such as air cargo;
- Pilots, concept demonstrations, and field experimentation in support of mission area analyses, concept of operations development and workforce characterization; and
- Testing and evaluation capabilities development, to improve the quality and utility of evaluation products.

**Payroll: \$19.5 million:** The request provides \$19.5 million to support 122 full time positions.

FY 2009 significant accomplishments include:

- Initiated competitive procurement process for all 3 classes of EDS machines, High Volume, Medium Volume, and Reduced Size EDS (RS-EDS);
- Installed 74 RS-EDS and 80 MS-EDS to support both stand-alone and in-line checked baggage inspection systems; and
- Executed facility modifications at 23 of the planned 38 airports nationwide.

FY 2010 planned accomplishments include:

- Complete competitive procurement process of all 3 classes of EDS machines and award contracts based on this competition;
- Complete certification and testing of new EDS detection, throughput, and false alarm rate standards;

- Fund facility modifications at 15 airports nationwide with appropriated FY 2010 funds;
- Procure EDS machines to support ongoing in-line projects and re-capitalization of legacy EDS machines including in-line systems; and
- Conduct T&E support for CBIS i.e. Dual Use AutoEDS, Security Technology Integrated Program (STIP).

FY 2011 planned objectives/accomplishments include:

- Procure and field all three classes of EDS machines to support optimal screening solutions;
- Initiate Tier 2 competition for EDS machine contracts based on higher detection standards and lower FA rates; and
- Fund facility modifications at airports nationwide with appropriated FY 2011 funds.

These targets are maintained through both the recapitalization of aging equipment and the acquisition of reliable new equipment. The proposed reductions will not affect TSA's commitment or ability to maintain these targets.

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:  
Screening Technology Maintenance & Utilities [EDS/ETD Maintenance]  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Screening Technology Maintenance & Utilities [EDS/ETD Maintenance]**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	<b>305,393</b>
<b>2010 Enacted</b>	-	-	<b>316,625</b>
2011 Adjustments-to-Base	-	-	15,500
<b>2011 Current Services</b>	-	-	<b>332,125</b>
<b>2011 Total Request</b>	-	-	<b>332,125</b>
Total Change 2010 to 2011	-	-	15,500

The Transportation Security Administration requests \$332.1 million for this activity. This represents an increase of \$15.5 million over FY 2010. The adjustments-to-base of \$15.5 million primarily includes maintenance for new PSP equipment procured in FY 2009 and FY 2010. This equipment represents new technologies that do not replace existing equipment and are, therefore, net increases to the maintenance requirement as warranties expire.

**CURRENT SERVICES PROGRAM DESCRIPTION**

The following table provides the components of this PPA.

(dollars in millions)

	<b>FY 2010</b>	<b>FY 2011</b>
Checked Baggage Equipment Maintenance	\$255.4	\$248.8
Checkpoint Equipment Maintenance	51.2	74.2
Utilities	6.0	6.0
Disposal	4.0	3.1
<b>Total</b>	<b>\$316.6</b>	<b>\$332.1</b>

This funding supports the maintenance and associated utilities of Transportation Security Equipment (TSE) in the Nation’s airports. Maintenance is essential to preserve the operational capability of security technology equipment. Equipment failures can increase when maintenance is neglected or delayed. When equipment fails, TSOs are deprived from using their advanced

technological capabilities for screening baggage and passengers to detect unauthorized weapons, explosives, incendiaries, and other destructive devices, items, or substances. Material availability of security screening equipment preserves airport efficiency and minimizes impact on the traveling public.

Once warranties expire (normally 12 months), all TSA checkpoint and checked baggage screening equipment requires maintenance throughout its life cycle. Most maintenance is performed by contractor Field Service Technicians (FST) working for Original Equipment Manufacturers (OEM) or a 3<sup>rd</sup> party Maintenance Service Provider (MSP). Preventive maintenance is performed according to the manufacturer's recommended schedule (e.g., monthly, annually, etc). Corrective maintenance support is provided 24 hours a day, 7 days a week to perform unplanned corrective repairs in the field. Maintenance contracts include labor costs for all preventive and corrective maintenance, as well as material costs for repair parts or consumables (e.g., ETD swabs).

FY 2009 significant accomplishments include:

- Provided preventive and corrective maintenance to over 13,500 pieces of security equipment;
- Modified EDS contracts to measure contract performance at the airport-level (vs. fleet wide) to better align with operational requirements;
- Competitively awarded a new contract to provide maintenance for Passenger Screening Program (PSP) equipment; and
- Safely and efficiently disposed of over 2,500 pieces of obsolete or unserviceable transportation security screening equipment.

FY 2010 planned accomplishments include:

- Sustain high levels of operational availability achieved in FY 2009 for TSE equipment;
- Acquire and test Maintenance Ticketing Application to facilitate Remote Maintenance Monitoring capability for security screening equipment; and
- Replace aging or unreliable EDS technologies with reduced size EDS with lower maintenance prices.

FY 2011 planned accomplishments include:

- Provide cost effective, mission enhancing maintenance services for the expanded fleet of screening equipment resulting from procurement actions under the FY 2009 ARRA;
- Begin implementing Remote Maintenance Monitoring/Maintenance Ticketing Application; and,
- Reduce EDS average unit maintenance costs due to equipment recapitalization.

**Checked Baggage Equipment Maintenance: \$248.8 million:** This request includes \$248.8 million for preventive and corrective maintenance activities required to maintain the operation of deployed checked baggage screening systems. These costs include maintenance labor; repair parts; packaging and transportation of repair parts; consumables for ETDs; tools and test equipment/ calibration; maintenance training; and related logistics, data management, safety, occupational health, and environmental management functions.

Below is a breakout of projected maintenance costs for baggage screening equipment:

<b>Equipment</b>	<b>Quantity</b>	<b>FY-11 Total Requirement</b>
CTX-5500	341	\$28,233,696
CTX-9000	264	\$28,499,573
CTX-9400	146	\$13,008,328
CTX-9800	18	\$1,727,247
e6000/ 6000FFOV	506	\$58,387,030
e6600	131	\$12,808,222
Reveal CT-80	559	\$22,629,044
XLB	30	\$3,513,607
King Cobra	5	\$367,719
Fusion Dual-Use	7	\$515,634
AN 6980 Dual-Use	17	\$999,821
Subtotal		\$170,689,920
ETD		
400B	3424	\$36,466,487
Itemiser-W	2477	\$23,757,449
Consumables		\$4,312,606
Excepted Maintenance/Call Center/Environment Issues		\$10,199,014
Subtotal		\$74,735,556
Support Services		\$3,331,250
Total Maintenance Requirement		\$248,756,725
Disposal		\$3,075,000
Utilities		\$6,038,678

**Checkpoint Equipment Maintenance: \$74.3 million:** This request includes \$74.3 million for the preventive and corrective maintenance activities required to maintain the operation of deployed passenger screening security equipment. These costs include maintenance labor; repair parts; packaging and transportation of repair parts; consumables for ETDs; tools and test equipment/ calibration; and maintenance training.

Below is a breakout of projected maintenance costs for passenger screening systems:

Equipment	FY11 Quantity	FY11 Requirement
<b>ETD</b>		
IonScan 400B	565	\$6,017,396
Itemiser-W	285	\$2,733,497
HH ETD (Sabre 4000)	249	\$1,521,498
FIDO	213	\$818,599
Next Generation	465	\$4,180,437
Consumables		\$987,824
<b>EMD</b>		
Ceia	1,349	\$812,463

<b>AIT</b>		
L-3	461	\$8,776,778
<b>Universal Conveyor Systems</b>		
TBD	228	\$2,515,196
<b>Bottle Liquid Scanners (BLS/ ILD)</b>		
TBD	1,300	\$6,829,063
<b>Cast &amp; Prosthesis Imagers</b>		
Spectrum	36	\$321,491
<b>Standoff Detection</b>		
QinetiQ	22	\$785,868
<b>Credential Authentication Technology</b>		
TBD	800	\$1,260,750
Checkpoint Equipment		\$72,389,096

Maintenance		
Support Services		\$1,865,500
Total Checkpoint Maintenance Requirement		\$74,254,596

**Utilities: \$6.0 million:** This request includes \$6.0 million in utility payments associated with operation of security equipment and is a recurring cost borne by TSA.

**Disposal: \$3.1 million:** This request includes \$3.1 million to provide disposal of equipment. Security equipment is decommissioned when evolving operational requirements (e.g. higher screening throughput), technological advancements (e.g. improved detection capability) or supportability problems (e.g. frequent failures) dictate the need for replacement. Sometimes equipment is redeployed to satisfy screening requirements at other airports. Security equipment that is not redeployed is considered for disposal in accordance with the TSA National Disposal Plan and all applicable laws and regulations governing the disposal of hazardous materials. This budget includes funding to dispose of excess security equipment through an agreement with the Defense Reutilization and Marketing Service (DRMS) to provide disposition/disposal services, including hazardous property.

**Cost reduction initiatives:** TSA is pursuing several initiatives to reduce the unit price of equipment maintenance, including:

- Expansion of competition in the security equipment industry;
- Competitive award of new maintenance contracts;
- Development of a Remote Maintenance Monitoring (RMM) capability;
- Life cycle replacement of aging and unreliable machines;
- Improved reliability and maintainability specifications for new security equipment;
- and
- Review of excess capacity for potential machine decommissioning.

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:  
Operation Integration  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Operation Integration**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>

Total Change 2010 to 2011	600	302	114,299

The Transportation Security Administration requests \$368.4 million for this activity, an increase of \$114.3 million from FY 2010. The increase includes \$2.4 million for adjustments-to-base and \$111.9 million for program changes. Program increases include \$94.2 million associated with the enhanced international security support at 15 offices in high risk areas (74 positions, 37 FTE, and \$38.8 million); funding for 275 additional proprietary canine teams to expand explosives detection at the checkpoint (523 positions, 262 FTE, and \$69.1 million); and increases to local law enforcement cooperative agreement stipends (\$3.9 million) to enhance aviation security.

**CURRENT SERVICES DESCRIPTION:**

Aviation Regulation is responsible for providing law enforcement and regulatory presence at airports to ensure compliance with required security measures and response to security incidents. It also provides an international component to foster consistency in worldwide security requirements.

The following table provides the components of this PPA. (dollars in millions)

	<b>FY 2010</b>	<b>FY 2011</b>
Regulatory Inspection and Enforcement	\$105.5	\$126.8
International Programs	18.8	58.1
Repair Station Inspections	3.4	3.4
Airport Law Enforcement & Assmts	81.2	81.4
National Explosive Detection Canine Training Program (NEDCTP)	33.6	86.9
Transportation Sector Network Management (TSNM)	11.6	11.8
<b>Total</b>	<b>\$254.1</b>	<b>\$368.4</b>

**Regulatory Inspection and Enforcement: \$126.8 million:** The mission of the regulatory inspection program is broad and involves the evaluation of the security integrity of more than 450 U.S. airports, 550 foreign airports, and a combined total of over 1,500 domestic and international carriers that operate in the United States. These inspectors also conduct periodic inspections of over 7,500 indirect air carriers operating in the U.S.

The following chart provides historical and current information on the total number of TSA Inspectors (TSIs):

### TSA Inspectors

	Full-Time Permanent Positions					
	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011

<b>TOTAL</b>	<b>1,047</b>	<b>1,121</b>	<b>1,558</b>	<b>1,585</b>	<b>1,849</b>	<b>2,124</b>

*1/ Increase of 275 inspectors/canine handlers in support of additional proprietary teams*

*2/ Increase of 50 inspectors in P.L. 111-83, conversion of 35 legacy canine teams to proprietary canine teams*

*3/ Increase of 100 inspectors in P.L. 111-83; Increase of 79 inspectors for the 15 additional VIPR teams*

Aviation TSIs (TSI-As) have an essential role in executing local annual inspection plans based on the national inspection plan. As part of their inspection responsibility TSI-As review records and files pertaining to criminal history records checks performed pursuant to federal law. The inspectors also review records and files to ensure compliance of indirect air carriers; private passenger and/or cargo charters; and airmen and aircrew with security requirements. In addition to inspections, TSI-As also perform testing to determine compliance with Transportation Security Regulations. The TSI-As investigate incidents related to violations of TSA regulations, security directives, and approved security programs. Inspectors deliver technical briefings and provide assistance to the aviation industry in interpreting agency policies to ensure compliance with rules. Inspections are both scheduled and random and may include one or all of the critical security elements required by TSA.

To ensure the adequacy and integrity of security at airports, TSIs evaluate the types of fences, lighting, and locks being used, among many other important security measures through visual and hands-on inspection as well as by walking the grounds and interacting with airport personnel. Based on these assessments inspectors will recommend enhancements, where appropriate, for non-regulated airports/facilities, including general aviation landing facilities and airports, and for aircraft operators. Areas of emphasis for inspection and/or assessment include: access control systems, security identification systems, surveillance systems, law enforcement response capabilities, physical security of aviation facilities and aircraft.

Inspectors are given the authority to initiate enforcement actions against airports, air carriers, and indirect air carriers where compliance violations have occurred or corrections have not been made. This includes misconduct of employees that threaten the security of an airport and/or aircraft. Inspectors must be well trained and knowledgeable in the principles of investigation and civil enforcement in order to assist the agency Chief Counsel in the preparation of formal enforcement actions against those who violate security requirements.

Significant accomplishments in FY 2009 include:

- Completed over 11,000 airport inspections, 35,000 aircraft operator inspections, and 5,600 foreign air carrier inspections to ensure compliance with current requirements, as well as conducted follow up inspections to address previously identified compliance issues and completed over 2,200 flight school inspections;
- Participated in over 15,000 Aviation Screening Assessment Program (ASAP) tests, VIPR activities across all modes of transportation, Aviation Direct Access Screening Program (ADASP)/Playbook activities at all airports, and other high visibility activities;
- Conducted week-long full scale airport and aircraft operator inspections (Airport Strikes) in Washington, DC, Los Angeles, Miami, the Hawaiian Islands, Dallas, San Francisco, Atlanta, Newark, Indianapolis, San Juan, Denver, and New York and flight school inspections (Flight School Strikes) in South Florida and Texas;
- Conducted Special Emphasis Inspections (SEI) on Access Control, Selectee Procedures, No-Fly Procedures, and SIDA badges. SEIs were also incorporated into the national inspection plan so that individual airports could locally implement additional SEIs on airport security coordinators, access control, and other various topics; and
- Assisted DHS in the development of the Notice of Proposed Rulemaking (NPRM) for Aircraft Repair Stations.

FY 2010 planned accomplishments include:

- Conduct one baseline comprehensive inspection of all airports, aircraft operators, and foreign air carriers at domestic airports. Perform follow up inspections as needed based on findings from the comprehensive inspections;
- Continue support of the ASAP, VIPR and ADASP/PLAYBOOK activities;

- Expand Airport Strikes to monthly multi-week efforts focusing on comprehensive inspections and testing at high-threat airports; and
- Evaluate comments from the Aircraft Repair Station NPRM and work with DHS to implement the final rule. Pending implementation, begin to conduct repair station inspections in accordance with the final rule.

In FY 2011, TSA will continue FY 2010 activities along with expanding the Aviation Inspector program by adding 275 additional proprietary canine teams. The use of canines in the airport passenger environment is an effective and efficient way to screen people in mass amounts to assist with explosive screening and coordinated work with Behavior Detection Officers (BDOs) to drive behavior changes enhancing security at the checkpoint and other passenger screening areas.

**International Programs: \$58.1 million:** TSA promotes alignment and consistency between the security requirements of the U.S. and foreign governments. TSA takes a leadership role as a permanent U.S. member in the regional and international organizations concerned with transportation security [i.e., International Civil Aviation Organization (ICAO), the Group of Eight (G8) Transportation Security Subgroup, and the European Civil Aviation Conference (ECAC)]. Through interaction with foreign officials at the bilateral, multilateral and regional levels, best practices in transportation security can be advanced to achieve TSA's vision of a secure, global transportation system.

TSA strives to lead worldwide improvements in transportation security using a multi-layered approach, which includes:

- TSA representatives responsible for liaison activity and representation with over 100 foreign governments, on-site liaison activity and representation in 19 foreign countries;
- Eight international industry representatives responsible for liaison activity and representation with over 240 foreign air carriers;
- Active leadership within the regional and international community that comprises the world's transportation security expertise engaged in policy development; and
- An expanding capacity building program for nations needing assistance in order to meet international standards.

The FY 2011 request includes an increase of \$38.8 million to provide funding for 74 additional positions to enhance and manage international programs at 15 existing offices in high risk areas, to provide equipment and training to host nations to mitigate vulnerabilities, and to ensure compliance with aviation security standards. The increase would also include increases to the number of visits made by TSA's Aviation Security Sustainable International Standards Teams (ASSIST), and support technical and automated systems used by Foreign Airport Assessment program for risk management. This request also includes additional desk officer and regional analysts to support field operations in the Western Hemisphere, Europe, Africa, Middle East and Asia Pacific.

#### *Transportation Security Representatives*

TSA Representatives (TSARs) serve as on-site coordinators for the TSA response to terrorist incidents and threats to U.S. assets at foreign transportation modes. The TSARs serve as principal

advisors on transportation security affairs to U.S. Ambassadors and other embassy officials responsible for transportation issues to ensure the safety and security of the transportation system.

TSA has developed a comprehensive staffing scorecard to determine the number of countries that should be assigned to each TSAR. The scorecard accounts for the number of Last Point of Departure (LPD) airports in a given country, the vulnerabilities at those airports, the number of carriers and weekly flights from the airports, threat level in the country, the level of cooperation between the host government and the United States, the amount of assistance needed (and likelihood of sustainment of any help provided), and the level of priority of the country for TSA and the U.S. government.

Significant accomplishments in FY 2009 include:

- Supported Department of Defense AFRICOM with a TSAR detail
- Networked US Centers for Disease Control policy with foreign officials for the containment of the H1N1 virus in aviation
- Led aviation security assessment in advance of Delta Airlines air service from new African locations
- Placed a Senior Civil Aviation Security Advisor in Kabul, Afghanistan, to assist the country with re-establishing commercial aviation service. The advisor works closely with national level foreign government authorities and U.S. mission officials to promote consistency between international security standards, foreign government requirements and ICAO regulatory programs for the Islamic Republic of Afghanistan's National Civil Aviation Security Program. This temporary position will remain in place through FY 2010 and is funded by the U.S. Agency for International Development.

Planned accomplishments in FY 2010:

- Fully establish and select personnel for three new TSAR positions established in FY 2009 – one each in Brasilia, Brazil; Johannesburg, South Africa; and Nassau, The Bahamas. These TSARs will address the increasing air traffic, harmonization and capacity building efforts, and potential risks noted in each region.
- Place a TSAR in Nairobi, Kenya formally manned by a Department of Transportation (DOT) under a Reimbursable Agreement with DOT.
- Implement the scorecard to re-align the country assignments for each TSAR and identify additional TSAR location needs.

In 2011, TSA plans to accomplish the following:

- Staff three new TSARs as a result of an emerging need at strategic locations around the world– one each in Dakar, Senegal; Dubai, United Arab Emirates; and New Delhi, India to address potential risks and harmonization and/or capacity building efforts.

The FY 2011 Request provides funding for TSARs to be placed the following locations.

TSARs			
Locations	Number	Locations	Number
Amman	1	Madrid	1
Athens	1	*New Delhi	1
Bangkok	1	Nairobi	1
Beijing	1	Manila	1
Berlin	1	Mexico City	1
Brazil	1	Ottawa	1
Brussels	1	Paris	1
Buenos Aries	1	Rome	1
Caribbean (Miami)	3	Singapore	1
*Dakar	1	Sydney	1
*Dubai	1	Tokyo	1
Johannesburg	1	Warsaw	1
London	2		
<b>Total</b>	<b>16</b>	<b>Total</b>	<b>12</b>

\*New in FY 2011

#### *Pre-Clearances*

At thirteen airports (8 in Canada, 2 in the Bahamas, 1 in Bermuda, 1 in Aruba, and 1 in Ireland), Customs and Border Protection (CBP) officers pre-clear passengers and baggage for entry into the United States. Inspection procedures involve immigrations, customs, and agriculture screening and are the same as those conducted at ports of entry in the U.S. Pre-cleared international flights arrive at a U.S. domestic gate and passengers deplane directly into the sterile area at more than 60 U.S. airports. In order to permit these passengers to bypass TSA screening, TSA must ensure that the screening measures applied to passengers and their carry-on baggage at the pre-clearance foreign airport is equivalent to those measures performed at domestic U.S. airports. Determination of comparability entails extensive negotiation with the host government and frequent observations of operations.

Significant accomplishments in FY 2009 include:

- Established Pre-Clearance operations in Shannon, Ireland.

Planned accomplishments in FY 2010 and FY 2011:

- Establish Pre-Clearance operations in Dublin, Ireland.

#### *Aviation Security Sustainable International Standards Team (ASSIST)*

The primary focus of ASSIST is to assist host nation officials in building aviation security programs abroad. ASSIST deploys single and multifaceted TSA assistance teams that seek to meet aviation security needs of host nation, effectively build sustainable institutions and practices through international alliances. In addition to conducting training courses in support of the International Civil Aviation Organization (ICAO) and the Organization of American States, TSA

developed and fielded an organic capability to provide a sustainable increase in aviation security at locations that demonstrate a need for the help and the ability to ensure long-term sustainment of the improvements. The greatest emphasis is placed on Africa, Latin America and Asia Pacific, in light of the exponential increases in traffic from these regions to the United States and the concerns about security of U.S. passengers and goods.

Significant accomplishments in FY 2009 include:

- Conducted the inaugural ASSIST visit to its first partner nation, St. Lucia, in January 2009 and follow up visits focused on training in emergency communications, Improvised Explosive Device (IED) familiarization, essential instructor skills and basic screener training.
- Liberia, the second nation to partner with TSA under ASSIST, received a survey visit in April 2009. TSA conducted Essential Instructor Skills and Basic Screening Skills Training soon thereafter. This training has been followed with monthly visits to assess the impact of training and other technical assistance.

Planned accomplishments in FY 2010:

- Partner with Georgia, Palau, Liberia and Guatemala to develop a template library of ASSIST documents with model programs, policies and management directives related to aviation security management.

Planned accomplishments in FY 2011:

- Develop additional training to further the teaching of screening skills, train airport and aviation management, and enhance local capacity to design and deliver appropriate interventions.
- Provide on-going training and capacity development to partner nations.
- Increase the number of visits made by ASSIST teams. This will serve to expand the quality of training and will build stronger relationships within various regions.

### *Cargo Security*

Air cargo security, especially those measures applied to goods carried on passenger aircraft, continues to accelerate in importance for DHS. TSA has initiated several efforts to ensure that cargo destined for the United States is subjected to the required level of screening.

Significant accomplishments in FY 2009 include:

- Formed an International Air Cargo Workgroup to develop a comprehensive program for foreign-to-United States transportation of goods. Focusing on cargo carried on both passenger and all-cargo aircraft, the Workgroup designed a risk-based rating and scheduling tool for the International Regulatory Activities Plan (IRAP) to prioritize air cargo facility inspections.

Planned accomplishments in FY 2010:

- Convene the Workgroup and focus on the full spectrum of cargo security issues such as determining acceptance of other countries' cargo programs, identifying best practices for dissemination to other cargo experts, and developing a Country Information Tool package for use by TSARs in support of meetings with foreign civil aviation authorities. TSA continues to express to ICAO an interest in developing international standards for all-cargo operations, but this has not yet received endorsement by the full ICAO membership.
- Partner with Australia to conduct an Air Cargo Security Workshop within the rubric of the Asia-Pacific Economic Council (APEC).

Planned accomplishments in FY 2011:

- Expand outreach efforts regarding all-cargo security and will place added emphasis on the development of international standards with which all ICAO Member States must comply.

*International Industry Representatives*

International Industry Representatives (IIRs) serve as the principal representative for TSA. The role of the IIR has become increasingly involved as more stringent rules, requirements, and procedures have been imposed on foreign air carriers serving the United States from foreign locations. The IIRs have the responsibility for ensuring air carrier compliance with TSA regulations and that program goals and initiatives are met. IIRs continue to meet, liaise and provide the necessary tools for approved foreign air carriers and foreign all-cargo air carriers to operate to the U.S. Currently, there are over 240 regulated, or soon to be regulated, non-U.S. air carriers assigned to eight IIRs in FY 2010.

Significant accomplishments in FY 2009:

- Reassigned one existing IIR from Frankfurt to Warsaw, Poland.

Planned accomplishments in FY 2010:

- Staff two new overseas IIRs positions in Beijing and Dubai, United Arab Emirates.

In FY 2011, TSA is requesting an additional ten (10) IIRs to keep pace with the continued growth of international (foreign) air carriers serving the U.S. and to help facilitate the outreach to these air carriers. The table below shows the proposed FY 2011 distribution of IIRs:

<b>Locations of IIRs</b>	<b>Number of IIRs</b>
*Dakar	1
Dubai	1
Beijing	1
Dallas	1
Frankfurt	3
*Headquarters	5
*Johannesburg	1
Miami	1
*Nassau	1
*Ottawa	1
*Santiago	1
Singapore	1
<b>Total</b>	<b>18</b>

**\*New in FY 2011**

Also, the FY 2011 request allows for expansion of global international security programs for multi-modal venues (maritime, land, and rail) which will require TSA outreach and partnering.

#### *Transportation Security Specialists*

TSA's Global Policies and Plans program guides TSA's development of policy affecting international operations and stakeholders. This includes planning international projects and diplomatic approaches, strategic planning, and ensuring consistent messaging to international industry members concerning policy and change. TSA also assigns a point of contact to the Department of State, Office of Foreign Mission's Escort Screening Courtesies program to assist with facilitating the movement of dignitaries who are either eligible for escort privileges or to whom expedited screening courtesies are provided.

The Foreign Airport Assessment Program and Air Carrier Inspection Program at foreign airports differ significantly from domestic compliance operations. During airport assessments conducted in foreign countries, Transportation Security Specialists (TSSs) focus on application of International Standards and

Recommended Practices (SARPs) defined by ICAO, to which nearly 190 countries are signatories. TSA is congressionally mandated under 49 U.S.C. 44907 to assess all airports from which there is service to/from the United States against these SARPs. A thorough foreign airport assessment requires approximately one week at the site and an additional four weeks for completion of the report. TSSs also inspect the operations of both domestic and foreign air carriers with U.S. service from these airports to insure compliance with TSA security directives; emergency amendments and Title 49 U.S.C. § 44916. Carrier inspections occur up to two times annually with airport assessments occurring at least once every three years and more frequently according to risk based scheduling.

In FY 2011 TSA is requesting thirty four (34) new TSSs. The requested FTE and associated funding increase will enable TSA to conduct all needed airport assessments, air carrier inspections, and in the very near future, foreign repair station audits.

<b>TSS Location</b>	<b>Number</b>
Miami	25
Dallas	19
Los Angeles	17
Singapore	7
Frankfurt	21
HQ	1
<b>Total</b>	<b>90</b>

TSA is working towards automating the Foreign Airport Assessment Program to allow for more timely submission of results as well as to perform more substantive analysis and comparison through a risk management methodology. The tool will be available to all personnel so they can see the work completed throughout the year. Automation of the program allows for more timely submission of results in addition to the ability to perform more substantive analysis and comparison through a risk management methodology. TSS will be able to input the data more quickly and therefore spend more time analyzing the results. Through this tool, TSA will be better able to track trends and identify areas in need of more specific training and assistance.

TSA is also developing a Foreign Airport Dashboard to provide a database and summarize information on foreign airports for easy access and timely information sharing when incidents occur. Specific information included in the database includes airport name; assessments; equipment; FAMS flight coverage; threat information; carriers; frequency of flights; and types of aircraft used. In 2011, TSA is requesting additional resources to support technical and automated systems used by the Foreign Airport Assessment Program.

Significant accomplishments in FY 2009 include:

- Conducted over 115 airport assessments and more than 800 air carrier assessments;
- Initiated a thorough review of the Foreign Airport Assessment Program Standard Operating Procedures
- Deployed inspectors to evaluate security conditions at six new-service airports in Africa in support of Delta Air Lines’ planned operations. At several of the sites, the extensive vulnerabilities precluded issuance of approval for the new service and TSA has agreed to provide assistance and training to help the airports improve their security postures.

Planned accomplishments for FY 2010 include:

- Operational testing and fielding of an automation project that will facilitate data entry, case management, and analysis of the Foreign Airport Assessment Program;

- Establishment of an unclassified Foreign Airport Dashboard to easily identify areas of strengths or concerns and facilitate information dissemination among TSA personnel in multiple offices;
- Expanded outreach efforts to Latin America, Asia-Pacific, and the Middle East;
- Creation of an air carrier startup policy and establish a formal pre-clearance support team; and
- Expansion of explosives detection pilot programs based on threat reporting.

Planned accomplishments for FY 2011:

- Establish and distribute post-assessment training syllabi to airports demonstrating egregious non-compliance in critical SARPs.
- Create a regionally focused annual assessment of security vulnerabilities, to be shared with trusted partner countries with an objective of providing tailored assistance to troubled airports.
- Implement the Foreign Airport Dashboard

**Repair Station Inspection Program: \$3.4 million:** TSA is required under Vision 100 (49 U.S.C. 44924) to establish security regulations for foreign and domestic aircraft repair stations and to conduct audits of foreign repair stations. The Notice of Proposed Rule Making (NPRM) proposes security requirements for repair stations that are certificated by the Federal Aviation Administration (FAA) and codifies TSA's inspection authority.

Without the implementation of these regulations, the FAA is prevented from issuing new foreign repair station certifications, as provided in Section 1616 of the Implementing Recommendations of the 9/11 Commission Act of 2007. The FAA and industry are concerned that new certifications cannot be granted.

This program serves to ensure the security of maintenance, overhaul, repair and assembly work conducted on air carrier aircraft and components at foreign and domestic repair stations. This will be achieved through specific inspection activities including security reviews and audits, vulnerability assessments and surveys. Implementation of the Vision 100 legislation for repair stations, will allow FAA to certify new part 145 FAA foreign repair stations and for existing facilities to retain FAA certification.

On November 17, 2009, TSA issued a NPRM for aircraft repair station security that among other things, clarifies the agency's inspection authority and imposes security requirements for both domestic and foreign repair stations, notably pertaining to control access for aircraft and aircraft components, challenge, inspections, verification of employee background information, designation of a security coordinator, and establishment of a contingency plan. As they take effect, these security requirements will impose expanded responsibilities and demands on aviation security inspectors. The Repair Station Program office will continue efforts to finalize this rulemaking. Efforts will include:

- Conducting voluntary reviews for security enhancement of foreign and domestic repair stations

- Inspecting for compliance of approximately 4,100 domestic repair stations and 700 foreign repair stations
- Identifying security gaps through security analysis and action programs
- Continuing development and dissemination of security best practices to aircraft repair stations owners/operators
- Development of Repair Station Security Program guidance document (RSSP-GD), the security assessment tool (RSSP-SAT), and the requirements checklist (RSSP-RC)

The Repair Station Inspection program uses a risk-based methodology to schedule foreign airport assessments and foreign air carrier inspections. Currently, all air carriers are inspected once annually unless they have a high “Airport Vulnerability” rating. This rating is used to determine the frequency of assessment and inspection planning based on the outcome of threat, vulnerability and consequence analysis. This methodology allows TSA to efficiently utilize its workforce by visiting airports with a higher likelihood of being a target for criminal or terrorist acts, while taking into account analysis of the protective measures in place and the potential impact for loss.

In absence of a final rule, this program engages industry through a voluntary audit program. This voluntary program involves a three-tier approach for conducting audits:

- Scheduling visits using the risk-based prioritization in conjunction with TSA Foreign Airport Assessment Program;
- Outreach to U.S. Air Carriers to capture the foreign repair stations they contract; and
- Contacting corporations having multi-station ownership for information on their foreign repair stations.

Significant accomplishments in FY 2009 include:

- Conducted familiarization visits to 177 of the prioritized list of the 720 active Foreign Repair Stations
- Completed 639 voluntary reviews for security enhancement of domestic repair stations
- Researched, cataloged, and prioritized 4,900 domestic and foreign repairs stations and developed a list of “best practices” to disseminate to repair stations
- Developed an audit plan to implement upon publication of final rule
- Developed regulation and standard security training.

FY 2010 planned accomplishments include:

- Publishing the NPRM and conducting associated outreach and information sessions with industry and stakeholders;
- Collecting and analyzing comments to the NPRM and developing Final Rule for submission through DHS to the Office of Management and Budget; and
- Continuing familiarization visits with priority sites that had not been previously contacted.

In FY 2011, TSA plans to achieve full implementation of the repair station program to assess and inspect all repair stations both foreign and domestic.

**Airport Law Enforcement & Assessments: \$81.4 million:** In accordance with the Aviation and Transportation Security Act (ATSA) of 2001, TSA established cooperative agreements with state and local law enforcement agencies to provide uniformed officers at passenger security checkpoints under the flexible response authorities granted to TSA. These agreements provide financial assistance to partially reimburse airports at screening points throughout the U.S for post 9/11 law enforcement hours. They ensure a consistent law enforcement presence is always available to deter suspicious activity and respond quickly in the event of a breach of security at designated checkpoints. In addition to these agreements, 82 airports have Assistant Federal Security Directors (AFSDs) for Law Enforcement to further coordinate TSA's security efforts with local law enforcement. In FY 2010, two new airports in Texas added AFSDs for Law Enforcement, bringing the total number of participating airports to 84.

Through the Cooperative Agreements and adjusting allocations to account for prior year expenditures, TSA has been able to significantly increase the number of airports participating in the Law Enforcement Officer (LEO) program while maintaining the existing level of base program resources. TSA has also instituted more effective program management and oversight to ensure that the resources awarded best meet the program's intended purpose of improving the level of security at our nation's airports.

For FY 2009, TSA funded approximately 330 Cooperative Agreements that included the following LEO patrol and response hours:

<b>Airport Category</b>	<b>Hours</b>
<b>Cat I</b>	504,128
<b>Cat II</b>	443,913
<b>Cat III</b>	371,025
<b>Cat IV</b>	294,759
<b>Cat X</b>	728,405
<b>Total</b>	<b>2,342,230</b>

From FY 2008 to FY 2009, poor economic conditions contributed to a decrease in air service, resulting in reduced participation in the program. Potential economic strengthening and federalization of new airports in FY 2010 are expected to increase participation back to FY 2008 levels.

In FY 2010, TSA will continue to improve program efficiencies and maximize the use of available program funds by reviewing participant's actual annual expenditures and adjusting award levels accordingly. This review process will include site visits to a select number of airports during the course of the fiscal year, which will ensure appropriate use and expenditure of program funding by airport participants.

The FY 2011 request will operate the program at FY 2010 levels.

The FY 2011 funding request for Joint Vulnerability Assessments (JVAs), Man-Portable Air Defense System (MANPADS) Vulnerability Assessments and TSA's Outreach Training Program to Federal, State and Local Law Enforcement Authorities maintains current services.

Joint Vulnerability Assessments (JVAs) are a joint effort undertaken by TSA and FBI with the purpose of assessing current and potential threats to commercial air transportation facilities within the United States. The process is a direct result of the increasing threats to aviation which prompted Congress to pass Section 310 of the Federal Aviation Reauthorization Act of 1966 requiring the Federal Aviation Administration (FAA) and the FBI to conduct joint threat and vulnerability assessments of security at U.S. airports. This responsibility was transferred to TSA under ATSA.

Man-Portable Air Defense System (MANPADS) Vulnerability Assessments are designed to enhance security of air transportation by minimizing the potential for missile or stand-off weapons attack against aircraft. The program is designed to deter, detect and mitigate the MANPADS threat.

TSA also conducts international MANPADS Assist Visits to partner with international allies on joint international assessments that are appropriate and mutually beneficial to the U.S. Government and the host nation. These visits are similar to the domestic MANPADS Vulnerability Assessments and are conducted at foreign airports to help identify and define potential launch locations in areas surrounding the airport by using known terrorist methodology and weapon employment tactics and capabilities.

**National Explosives Detection Canine Training Program (NEDCTP): \$86.9 million:** TSA's NEDCTP develops, trains, deploys, and certifies explosives detection canine teams to deter and detect the introduction of explosive devices into the transportation system. Each team is comprised of a specially trained canine and either a TSA or State and local law enforcement handler. Bomb threats cause disruption of air, land, and sea commerce and pose an unacceptable danger to the traveling public. Explosives detection canine teams are proven and reliable resources in the detection of explosives and are a key component in a balanced counter-sabotage program. The use of highly trained explosives detection canine teams is also a proven deterrent to terrorist activities directed towards transportation systems, and provides a timely and mobile response in support of the operations of facilities, rail stations, airports, passenger terminals, seaports, and surface carriers. Fostering partnerships throughout the Federal government, State and local law enforcement, and the international community is a key element of NEDCTP's mission.

Through cooperative agreements, TSA provides funding for training, certification and maintenance of the explosives detection capable canines, training for the handlers, and partial reimbursement of handlers' salaries and other costs. The FY 2011 request seeks to increase the current stipend TSA provides, through established cooperative agreements, to each State and local participant by approximately \$10,500. This proposed enhancement is necessary to more appropriately distribute the escalating inflationary and operational costs borne by NEDCTP program participants. Local law enforcement agencies deploy these valuable canine teams and provide DHS with a mobile response platform for specific threats to the transportation systems.

<b>Projected FY 2011 Funded Canine Teams</b>					
<b>Funding Source</b>	<b>Legacy Aviation</b>	<b>Proprietary OSO</b>	<b>FAM</b>	<b>Mass Transit</b>	<b>Total</b>
<b>Base Funding</b>	473	23	22	117	635
<b>Supplemental</b>	50	120			170
<b>FY 2011 Enhancement</b>		275			275
<b>Total</b>	523	418	22	117	<b>1080</b>

In FY 2009, the NEDCTP began the training and deployment of 92 teams that were funded in FY 2008. TSA conducted a total of eight training classes in FY 2009. TSA funded a total of 750 teams in Aviation, Air Cargo, and Surface systems. These teams enhance the layer of security to other modes of transportation within their area of responsibility in addition to the airport.

In FY 2010, the NEDCTP will continue the training and deployment of the 92 teams and 35 additional TSA proprietary teams that were redirected to proprietary handlers due to budgetary constraints with State and local law enforcement participants.

The FY 2011 request includes funding for an additional 275 proprietary teams, as a result of the Christmas Day attack. Out of these 275 teams, 112 teams will be placed at 28 CAT X airports and 163 teams will be placed at 56 CAT I airports. The request also includes the necessary general operating expenses for support including additional explosive training aid storage magazines.

**Transportation Security Network Management (TSNM) \$11.8 million:** TSNM coordinates aviation security efforts with airlines, airports, and within the general aviation community.

*Commercial Airlines*

This activity develops new policy, as well as reviews existing policy for needed modification or elimination based on the evolving threat to commercial airlines. The program provides regulatory oversight of commercial airlines including management of the Aircraft Operator Standard Security Program, the Private Charter Program, and associated Security Directives. The office includes 20 Principal Security Inspectors (PSIs) assigned to between one and sixteen airlines each. PSIs act as the TSA representative and provide the industry with supporting interpretations, clarification, and assessments of the regulations and the level of carrier compliance. The PSIs conduct over 250 comprehensive audits each fiscal year covering all mandated security requirements implemented

system-wide by the airlines corporate offices. Included in the audits are reviews of security training programs provided to the flight deck, crew cabin, and ground security coordinators.

In FY 2011, the Commercial Airlines Sector plans to strengthen its relationship with the U.S. Airlines that are certified to operate under the full Aircraft Operator Standard Security Program to provide a stronger support not only on regulatory oversight of commercial airlines on the full Program and on the Private Charter Program but also provide the industry with supporting interpretations, clarification and assessments of the regulations and the level of carrier compliance. As the number of commercial airlines increase each year, PSIs located at Commercial Airlines Sector will also increase the number of comprehensive audits covering all security requirements.

### *Commercial Airports*

The Commercial Airports activity builds meaningful relationships with the commercial airport industry and oversees the development of policies and programs that enhance security at the Nation's commercial airports. The program works to develop national airport security programs that guide security plans by regulated entities. The program also ensures a robust communications system for relaying TSA guidance and information to transportation security stakeholders.

Significant accomplishments in FY 2009 include:

- Issued a Security Directive for increased security in airport badge procedures with the recommendation of the introduction of the use of biometrics for access control systems as well as participation in stakeholder biometric consortium sessions and workshop events.

Planned accomplishments in FY 2010:

- Coordinating (with the Office of Transportation Threat Assessment & Credentialing) development and implementation of consensus-based biometric identification and access control standards for domestic commercial airports.
- Facilitating implementation of methods and technologies to screen airport employees more effectively and efficiently.

The two planned accomplishments in FY 2010 summarize a series of actions that collectively, constitute major planned undertakings requiring technological acquisition and integration by airports, inter-agency interoperability. Also required is coordination at the Federal, State, and local levels, and extensive private sector outreach and information exchange.

In addition, a larger role in coordinating the exchange of sensitive airport vulnerability information developed by the Federal Air Marshal Service (FAMS) and the Federal Bureau of Investigation (FBI) through the Joint Vulnerability Analysis (JVA) program is planned. "*Recommended Security Guidelines for Airport Planning, Design and Construction*" is a touchstone reference used by airport operators, commercial vendors, and other government agencies to support planning and implementation of commercial airport security enhancements. Technology, procedures, policies,

requirements, and capabilities have improved and continue to grow quickly in this field. The Guidelines will be updated in FY 2010, for public release in early FY 2011.

### *General Aviation (GA)*

General Aviation (GA) is responsible for all types of aviation other than regularly scheduled commercial passenger and cargo operations and military aviation. This includes corporate operators, recreational and private aircraft, and charter operations; private and public use of general aviation airports, airmen, and airspace. The program works collaboratively with industry and government stakeholders to develop innovative methods to enhance security and develop, disseminate, and consistently apply a framework of appropriate and feasible security standards. TSNM serves as the “one-stop” shop for all GA security matters. The program uses a threat based and risk management approach to develop strategies, policies, plans, and programs to reduce the security risks and vulnerabilities associated with GA operations.

Significant accomplishments in FY 2009 include:

- Issued the Large Aircraft Security Program (LASP) Notice of Proposed Rulemaking (NPRM) October 30, 2008, with the formal comment period closing on February 27, 2009, following a 60-day extension granted by TSA to further facilitate industry input and encourage additional comments;
- During the formal comment period in January 2009, TSA conducted five public meetings throughout the country to solicit input/feedback from the GA community;
- Processed more than 7,000 comments, as well as actively engaged industry stakeholders in comment sessions to discuss key issues of concerns. These meetings provided TSA with additional insight for the potential development of alternative solutions that appear to be more reasonable and feasible to implement for industry while maintaining an effective level of security.

FY 2010 Planned Accomplishments:

- Modify the existing LASP rulemaking and implement a Supplemental NPRM for GA aircraft;
- Redefine the requirements of the GA Data Management System;
- Develop a pilot project, leveraging the Secure Fixed Based Operator concept for domestic operations;
- Work with Customs and Boarder Protection (CBP) and the Federal Aviation Administration (FAA) to analyze feasibility of aligning the Automatic Detection and Processing Terminal (ADAPT) tool with the Air and Marine Surveillance System (AMOSS) and incorporate Electronic Advanced Passenger Information System (EAPIS) into AMOSS/ADAPT;
- Implement a vulnerability assessment survey tool for GA airports, and
- Develop/implement a GA marketing and educational program for the GA industry to enhance security awareness.

FY 2011 Planned Accomplishments:

- Implement the GA Management System;
- Explore additional databases that will enhance available knowledge of GA operations and operators, and
- Align and merge the AMOSS and ADAPT systems.

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:  
Airport Management, IT, and Support  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Airport Management, IT, and Support**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>2,243</b>	<b>2,104</b>	<b>454,647</b>
<b>2010 Enacted</b>	<b>2,390</b>	<b>2,285</b>	<b>453,924</b>
2011 Adjustments-to-Base	455	438	50,229
<b>2011 Current Services</b>	<b>2,845</b>	<b>2,723</b>	<b>504,153</b>
2011 Program Change	255	128	73,162
<b>2011 Total Request</b>	<b>3,100</b>	<b>2,851</b>	<b>577,315</b>
Total Change 2010 to 2011	710	566	123,391

The Transportation Security Administration requests \$577.3 million for this activity. This is a net increase of \$123.4 million from FY 2010. This change includes \$50.2 million for adjustments-to-base and \$73.2 million for program increases associated an increase to the Federal Security Director staff costs and associated non pay costs for TSA’s FY 2011 increase in positions.

**CURRENT SERVICES PROGRAM DESCRIPTION**

\$ in millions

	<b>FY 2010</b>	<b>FY 2011</b>
Federal Security Director (FSD) and Staff Costs - Field and HQ	\$287.5	\$349.7
Transportation Security Operations Center (TSOC)	28.3	28.6
Airport Parking, Transit, and Fleet	23.1	25.2
Airport Rent and Furniture	115.0	173.8
<b>Total</b>	<b>\$453.9</b>	<b>\$577.3</b>

**Federal Security Directors (FSD) Staff and Headquarters PC&B and Non PC&B: \$349.7 million:** This funding supports the salaries and benefits of Federal Security Directors (FSDs) and their staff, as well as travel, training, and contract requirements support. In addition, the funding provides for headquarters positions that direct the policy, analysis, and administration of aviation screening. FSDs and staff are critical to supporting the front line operations of the TSOs. To streamline the administrative operations and gain efficiency at the airports, larger airports have been designated as hubs. These hubs provide security direction, administrative support, and

staffing/personnel as needed to smaller, lower staffed airports (spokes). For example, Boston-Logan International Airport is the hub for 7 spoke airports (Bedford-Hanscom, Barnstable, Martha's Vineyard, Nantucket, Provincetown, Westover and Worcester airports).

FSDs and staff travel frequently between the hubs and spoke airports. Funding for airport management and staff provides the proper direction, support, and staff at the spokes to ensure efficient and effective operations.

FSDs and staff develop operational strategies to make the screening process more efficient for the traveling public especially during peak travel seasons. They continue to be the central reference point on policy development, information technology, training, performance management, finance, and human resources to support the mission of TSA.

TSA adapts to a dynamic and changing environment with industry accepted scheduling and modeling programs. These applications allow TSA to efficiently determine and schedule the TSO workforce at the nation's diverse airports. By accurately predicting, executing and measuring the number of TSOs required, TSA ensures that the public has a positive experience while maintaining the proper number of TSOs at each airport.

Beginning in FY 2011, this activity also includes funding for TSA's Bomb Appraisal Officers (BAO) and Explosives Security Specialists (ESS). The BAO program strengthens the security of the Nation's transportation systems by providing frequent interaction and formal training to TSOs to increase their ability to recognize potential Improvised Explosive Devices (IEDs) and IED components. BAOs are highly skilled individuals who have undergone training in the disposal of explosive ordinance. This program provides preventative measures against IEDs while reducing costly airport delays and closures. The BAO Program currently operates at 123 airports.

The need for BAOs in all major airports requires specialized security training for those individuals selected to perform this duty. These in-house explosives experts provide rapid response for advanced resolution of alarms and instruction to TSOs to better identify potential Improvised Explosive Devices (IED) and IED components.

ESS are TSA's multi-modal explosives specialists, assigned to selected FSDs to provide subject matter expertise to TSA and its stakeholders on chemical, biological, nuclear, radiological, and explosive threats to the nation's infrastructure. Although ESS are assigned to selected FSD staffs they have regional responsibilities making them available to all FSDs within their region to assist in multi-modal explosives security issues. ESS conduct explosives vulnerability assessments in all transportation modes, participate in aviation related Joint Vulnerability Assessments and Man Portable Air Defense Systems Vulnerability Assessments. They assist in the development of mitigation plans, conduct tailored explosives recognition and response training, and develop exercises for all transportation modes. ESS are also post blast investigators providing transportation specific expertise to the Federal Bureau of Investigation Explosives Unit and the National Transportation Safety Board during investigations where explosives are suspected or confirmed.

**Transportation Security Operations Center (TSOC): \$28.6 million:** The TSOC is located at the Transportation Security Administration's Freedom Center in Northern Virginia. The TSOC provides 24/7/365 coordination, communications, collaboration of intelligence and domain awareness for all DHS transportation-related security activities worldwide. The TSOC correlates and fuses real-time intelligence and operational information, ensuring unity of action in the prevention of, and response to, terrorist-related incidents across transportation modes. The TSOC is co-located and closely aligned with TSA's Continuity of Operations (COOP) and Emergency Preparedness activities.

In FY 2009, TSA continued to improve TSOC's program capabilities and capacity. The TSOC initiated the final testing of ACTIVU, which is a content management display system that enables users in geographically diverse sites to view the same displayed content, allows for better information sharing and will aid in event management. ACTIVU is a common operating platform which enables TSOC to provide field elements with a common operation picture. In addition, the TSOC also expanded the use of the Automatic Detection and Processing Terminal, which provides enhanced aviation situational awareness for TSA.

The FY 2010 planned accomplishments include:

- Establishing the National Airspace Coordination Center (NASCC);
- Expanding the use and deployment of the common operating platform ACTIVU ;
- Developing a top flight exercise and training facility focusing on incident management and watch officer training;
- Implementing improvements in the TSOC to accommodate continuity of operations (COOP) requirements and to provide office space for an additional 150 personnel to more efficiently meet the agency's facilities/space needs; and
- Improving video teleconference capabilities in order to reduce travel cost.

The FY 2011 request continues the program at FY 2010 operating levels. FY 2011 goals include establishing a disaster recovery site and leveraging TSA's expanded exercise and training facilities to include four national level exercises and a watch officer certification process.

**Airport Parking, Fleet Services, and Transit Benefits: \$25.2 million:** This program provides for transit benefits and airport parking for field staff and vehicles.

The Employee Parking Assistance Program (EPAP) provides parking, shuttle service, and financial services for participating TSA employees. The support enables 24/7 staffing of the mission critical TSO workforce at 28 participating airports by ensuring sufficient parking, shuttle service to and from reporting terminals and fee collection services from participants.

FY 2009 accomplishments include expansion of EPAP to include SMF and a comprehensive analysis of EPAP and recommendations for improved program management.

In FY 2010 the EPAP program will focus efforts on acquisition planning to reduce contracting costs, as well as implementing improved program management practices.

In FY 2011, the EPAP will continue to explore and execute program improvements and efficiencies to support the participating airports in alignment with operational mission priorities.

Field Vehicles and transit benefits: Funding will be used to replace aged/high mileage vehicles. Since its inception, TSA has replaced a minimal number of vehicles; thus, there are a significant number of old/high mileage vehicles in service. Funding will also be used to provide transit benefits for field office employees. Significant accomplishments in FY 2009 include the continued efforts to increase percentage of alternative fuel vehicles and related fuel utilization.

FY 2010 planned accomplishments include continuing to improve acquisition planning to promote efficiency and ensure compliance with environmental and energy requirements and improving fleet information management.

FY 2011 continued efforts will include reviewing and refining the accident program in order to ensure customer service, identify trends, and operational risks and increasing awareness of the transit benefits program and promote maximum participation.

In FY 2011, program increases to transit subsidy is directly correlated to the increases in the aviation security workforce including over 5,000 TSO/BDO positions and over 250 FSD staff positions.

**Airport Rent and Furniture: \$173.8 million:** Funding is requested for rent payments and furniture for TSA's field offices (including FSD and TSO staff locations). In support of its field operations, TSA leases over 3.5 million square feet of space with more than 700 leases at more than 450 airport locations. On-airport space is used for mission-critical direct TSO support, such as break rooms, lockers, and training facilities. These airport leases are typically short-term, requiring frequent re-negotiation. The annual rent is set by the local airport authority based on formulas to recapture operating costs, capital improvements and major repairs. Annual increases are generally far greater than the change in the Consumer Price Index or any other general economic measure. Airport rent is far more expensive and far less predictable than general office space in other commercial buildings.

An analysis of trend data from 2006 through 2009 yielded projections for the next four fiscal years. This analysis demonstrates that the base facility rent is expected to increase by an overall average of 8% to 10% annually from FY 2009 through FY 2015.

In FY 2009, TSA continued the "Workplace 2009" program to develop alternatives to house TSA's new field office requirements within the existing space footprint. TSA maintained its DHS departmental leading real estate customer service model, which is based on electronic customer surveys and feedback, and earned a real property "Innovation" agency award from the General Services Administration.

In FY 2010 and FY 2011, TSA plans to complete the update of the program requirements for field space and furniture, involving field customers and Security Operations as prime stakeholders. TSA is an integral team member in the planning and design of security at airports through assistance with checkpoint redesigns and perimeter security. TSA FSDs and their staff will

continue to build relationships with airport officials, airlines, local law enforcement, and Joint Terrorism Task Force officials.

For FY 2011, TSA will maintain its real estate portfolio and continue to strive for highly efficient space layouts based upon its operational mission and the daily duties of its work force. In FY 2011, program increases for rent are in direct support space requirements for the additional TSO/BDO screener workforce, 275 proprietary canine teams, and space requirements for new Advanced Imaging Technology (AIT) machinery. Additional space is needed because privacy concerns require that the AIT screening room be located separately from the AIT equipment.

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:  
FFDO and Flight Crew Training  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: FFDO and Flight Crew Training**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>30</b>	<b>28</b>	<b>30,989</b>
<b>2010 Enacted</b>	<b>30</b>	<b>29</b>	<b>25,127</b>

<b>2011 Total Request</b>	<b>30</b>	<b>29</b>	<b>25,694</b>
Total Change 2010 to 2011	-	-	567

The Transportation Security Administration requests \$25.7 million for this activity. This is a net increase of \$567 thousand from FY 2010 for adjustments to the base.

**CURRENT SERVICES PROGRAM DESCRIPTION**

The FFDO program was created by the Arming Pilots Against Terrorism Act of 2003 (APATA – P.L. 107-296), which authorizes the deputation of qualified airline pilots to act as Federal law enforcement officers in order to defend the flight decks of aircraft against acts of criminal violence or air piracy. This voluntary program provides a combination of law enforcement training in firearms proficiency, self-defense tactics, authority, use-of-force, and decision-making in defense of both commercial and cargo aircraft.

The Crew Member Self Defense (CMSD) Program was established via the Vision 100 – Century of Aviation Reauthorization Act (FAA Reauthorization Act) in 2004. The Act requires TSA to develop and make available to flight and cabin crewmembers a voluntary, advanced self-defense training program as another means of safeguarding the civil aviation system.

	<b>FY 2010</b>	<b>FY 2011</b>
Federal Flight Deck Officer	\$23.4	\$23.9
Crew Member Self Defense	\$1.7	\$1.8
<b>Total</b>	<b>\$25.1</b>	<b>\$25.7</b>

In June 2009, TSA opened a new FFDO Training Center in Dallas, TX. The new training center enables TSA to meet increased FFDO recurrent training requirements and provides improved

access to required training for volunteers living throughout the West and Midwestern regions of the United States. In FY 2009, TSA provided basic FFDO training to 1,246 new volunteers. Recurrent training (FFDO recertification) was delivered to 1,481 volunteers at the Atlantic City, New Jersey and Dallas, Texas facilities for FFDOs who are in their fourth and fifth year of service. The program will also provided required bi-annual firearms re-qualification training to FFDO program volunteers.

In FY 2009, TSA operated 25 CMSD training facilities at or near Category X and Category I airports. More than 850 crew members participated in this voluntary program in FY 2009. All crew members that participate in CMSDT are asked to complete a survey that captures their level of satisfaction with the course. In FY 2009, crew members ranked their satisfaction with the training at 4.9 out of 5.0, which indicates that despite lower than expected attendance the course is well-received from those that participate. To address lower than expected training attendance the program continues to assess new areas to determine the viability of additional sites.

In FY 2009, TSA transferred \$1 million from the CMSD program base of funds to the FFDO program in order to better manage and prioritize existing resources. The transferred funds were used for the completion of mission critical training equipment purchases and will be used in the future to better support FFDO program operations.

In FY 2010, TSA plans to permanently transfer \$1.5 million from the CMSD program base enacted amount of \$3.2 to the FFDO program in order to best meet recurrent training requirements for the thousands of existing FFDOs who are reaching their fourth and fifth years within the program. This fund transfer will also support initial training of an estimated 550 FFDOs in FY 2010, which will exceed the historical attrition rate. Approximately 3,400 volunteers will receive recurrent training. The program will also continue to provide required bi-annual firearms re-qualification training to FFDO program volunteers. In addition, TSA plans to improve communications with FFDO volunteers by developing a field infrastructure plan using FAMS Field Offices and completing the implementation of an e-mail and web portal system for FFDOs.

In FY 2010, TSA will continue to provide Crew Member Self-Defense Training based on historic attendance and participation levels. Additionally, as a means of increasing crew member participation in Crew Member Self-Defense Training, TSA will begin using FAMS Field Offices to increase the number of locations where this training is available.

In FY 2011, TSA plans to offer initial FFDO training to an estimated 650 new volunteers which will exceed the historical attrition rate. TSA will also continue to train and maintain the existing population of FFDO volunteers through recurrent training and firearms re-qualification. Recurrent training (recertification) will be available for approximately 4,000 volunteers.

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:  
Air Cargo  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Air Cargo**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>669</b>	<b>608</b>	<b>157,568</b>
<b>2010 Enacted</b>	<b>762</b>	<b>709</b>	<b>122,849</b>
2011 Adjustments-to-Base	(6)	17	(7,135)
<b>2011 Current Services</b>	<b>756</b>	<b>726</b>	<b>115,714</b>
2011 Program Change	-	-	1,840
<b>2011 Total Request</b>	<b>756</b>	<b>726</b>	<b>117,554</b>
Total Change 2010 to 2011	(6)	17	(5,295)

The Transportation Security Administration requests \$117.6 million for this activity. This is a decrease of \$5.3 million from FY 2010. This adjustment to base consists of \$11.3 million of non-recurring funding, the pay inflation and the annualization of 50 cargo inspectors whose funding was received in FY 2010.

**CURRENT SERVICES DESCRIPTION:**

The Aviation and Transportation Security Act (ATSA) of 2001 charges TSA with the enforcement of statutory and regulatory requirements for ensuring the security of transportation systems and passengers when cargo is transported by air. Section 1602 of the Implementing the Recommendations of the 9/11 Commission Act of 2007 (9/11 Act), which amended 49 U.S.C. 44901(g)(1), requires TSA to:

- Establish a system to screen 50 percent of cargo transported on passenger aircraft by February 3, 2009, and 100 percent by August 3, 2010;
- Provide a level of security commensurate to that of passenger baggage; and
- Meet inspection benchmarks.

TSA has also been mandated to conduct Vulnerability Assessments at 28 Category X airports to assess security vulnerabilities at specific airports and system-wide. In the first quarter of FY 2010, TSA has completed all 28 Category X airport vulnerability assessments.

The following table provides the components of this PPA.

	<b>FY 2010</b>	<b>FY 2011</b>
Air Cargo Policy and Programs	\$39.1	\$28.0
Air Cargo Inspectors	70.5	74.4
National Explosive Detection Canine Training Program (NEDCTP)	13.3	15.2
<b>Total</b>	<b>\$122.9</b>	<b>\$117.6</b>

**Air Cargo Policy and Programs: \$28.0 million:** The program is responsible for securing the air cargo supply chain including cargo, conveyances, and people. The air cargo transportation system consists of 450 domestic airports, 300 air carriers, and approximately 4,400 indirect air carriers and shippers. An estimated 32 billion pounds of cargo is shipped within the United States by air annually. TSA focuses on two primary security threats related to the air cargo transportation system: (1) introduction of an explosive device on a passenger aircraft, and (2) the hijacking of an all-cargo aircraft (roughly 88 of cargo shipped of transported cargo) resulting in its use as a weapon of mass destruction.

TSA concluded that this mandate from the 9/11 Act could not be achieved by relying solely on aircraft operators to conduct screening without creating significant delays and missed flights, which would impede the flow of commerce. Screening capacity at a single point in the supply chain is not sufficient to accomplish 100 percent screening. TSA has initiated the following to aid industry in achieving the 100 percent screening requirements:

- Narrow Body Aircraft Screening Amendment - October 1, 2008. This requires 100 percent screening of cargo placed on these aircraft used in passenger service and originating in the U.S. This covers 95 percent of passenger flights, 85 percent of passengers, and 25 percent of cargo on passenger flights that originate within the U.S.
- The Certified Cargo Screening Program (CCSP) – TSA implemented the CCSP in January 2009. CCSP allows screening of cargo early in the air cargo supply chain by a trusted, vetted and validated facility. TSA certifies and regulates shippers, indirect air carriers, and other entities as Certified Cargo Screening Facilities (CCSFs) to screen cargo prior to its being tendered for transport on passenger aircraft.

TSA developed the philosophy behind the CCSP by working closely with the U.S and international agencies and associations to incorporate key aspects of commensurate security programs. Currently, air carriers have primary responsibility for air cargo screening. CCSP extends screening through the air cargo supply chain (i.e. shippers, manufacturers, and freight forwarders) thus reducing impediments to flow of commerce by encouraging screening at the point of entry into the supply chain (e.g. prior to consolidation).

As part of the CCSP, TSA is conducting an Independent Air Carrier (IAC) Screening Technology Pilot (STP). Approximately 65 percent of passenger air cargo volume originates at 18 airports,

and a significant amount is tendered by a concentrated number of large IACs at each airport. STP objectives are to:

- Assist industry in achieving the screening requirements of the 9/11 Act by creating screening capacity at the IACs;
- Measure the effectiveness of select screening technologies on various commodity classes; and
- Evaluate chain-of-custody procedures for screened cargo as it moves from the IAC to the air carrier.

The Screening Technology Pilot (STP), in its current format will cease by August 2010. All funds for the STP were obligated by the close of FY 2009.

IACs participating in the STP must:

- Have a facility located in one of the 18 major cargo gateways;
- Have a minimum annual volume of 200 consolidations (ULDs) tendered to passenger aircraft;
- Verify CCSP facility security and chain of custody standards through TSA audits; and
- Sign an Other Transactional Agreement (OTA) to receive funding from TSA.

**Air Cargo Inspectors: \$74.4 million:** Air Cargo Inspectors enforce statutory and regulatory requirements and provide guidance to industry on securing air cargo. Inspectors ensure that air carriers (passenger and all-cargo) and indirect air carriers meet their operational responsibility by implementing the security requirements issued by TSA. This includes maintaining a TSA-approved security program that describes the security policies, procedures, and systems that must be implemented in order to comply with TSA security requirements. These requirements include measures related to the acceptance, handling, and inspection of cargo; training of employees in security and cargo inspection procedures; testing employee proficiency in cargo inspection; and access to cargo areas and aircraft.

TSA-approved security programs include:

- (1) Aircraft Operators Standard Security Program (AOSSP) - domestic passenger air carriers that transport passengers and cargo;
- (2) Indirect Air Carrier Standard Security Program (IACSSP) - domestic indirect air carriers;
- (3) Full All-Cargo Aircraft Operator Standard Security Program, - domestic air carriers engaged in the transportation of cargo in an all-cargo aircraft with a maximum certified takeoff weight of more than 45,500 kg (100,309.3 lbs);
- (4) Twelve-Five Standard Security Program - certain domestic operators of aircraft weighing more than 12,500 pounds in scheduled or charter service that carry passengers, cargo, or both;
- (5) Model Security Program (MSP) - foreign passenger air carriers that transport passengers and cargo;

- (6) All-Cargo International Security Program (ACISP) - each foreign air carrier engaged in the transportation of cargo to, from, within, or over-flying the U.S. in all-cargo aircraft with a maximum certified takeoff weight of more than 45,500 kg (100,309.3 lbs);
- (7) All-Cargo Twelve-Five International Security Program - each foreign air carrier engaged in the transportation of cargo to, from, within, or over-flying the U.S. in an all-cargo aircraft with a maximum certified takeoff weight of more than 12,500 lbs but no more than 45,500 kg (100,309.3 lbs); and
- (8) Certified Cargo Screening Program Order - shippers, third party logistics companies, independent cargo screening facilities, and other non-IAC entities which screen air cargo.

TSA inspectors carry out planned and random inspections of foreign and domestic air carriers and indirect air carriers (IACs). In addition, inspectors conduct monthly cargo strikes (week-long compliance blitzes in a single metropolitan area) at airports and IAC facilities. TSA also promotes the full compliance with security requirements through outreach programs and collaboration with industry.

In FY 2009, the program was able to leverage 454 inspectors to more than double the amount of air cargo inspections conducted in all of FY 2008 (21,600 in FY08 and 42,000 by July 2009). A small cadre of inspectors conducted vulnerability assessments and provided assistance for certified shipper validations. During surge and periods of elevated threat, cargo inspectors supported and participated in VIPR activities.

In FY 2010, TSA received funding to increase the number of inspectors by 50. The additional cargo inspectors will oversee the implementation of CCSP and will also be involved in the validation of new program entrants by overseeing TSA Approved Validation Firms (TAVF) and if required, may also conduct the validations directly. The FY 2011 request annualizes the additional inspectors.

International Cargo Inspections: In addition to domestic inspections, TSA has developed a program to ensure the security of inbound cargo from outside the U.S. Currently, screening international cargo poses challenges and constraints unique to the international air cargo environment. These constraints are due to limited control over foreign supply chain activities, scale of diversity among supply chains, and diplomatic considerations. A joint effort with Customs and Border Protection (CBP) and its international partners is actively working to strengthen air cargo security through the development of a global air cargo security strategy. This strategy will include establishing a risk assessment regime using CBP's Automated Targeting System (ATS) and TSA's Vulnerability Assessment methodology.

Global security standards will strengthen over time through collaboration with the International Civil Aviation Organization (ICAO), as well as information sharing and standardization with strategic foreign partners.

In FY 2010, TSA will have ten International Cargo Transportation Security Inspectors deployed to four international field offices in Los Angeles, Dallas Fort Worth, Miami, and Frankfurt, Germany. These inspectors examine cargo operations at last points of departure to the U.S. to establish a baseline by which compliance can be measured. In FY 2010, TSA intends to partner

with Australia to conduct an Air Cargo Security Workshop within the Asia-Pacific Economic Corporation (APEC).

**National Explosives Detection Canine Training Program (NEDCTP): \$15.2 million:** Canines provide a valuable tool to assist in the screening of air cargo. TSA has funded 473 local law enforcement officer-led (LEO) canine teams at 78 airports. LEO teams spend approximately 25 percent of their time in a cargo environment and associated facilities. In addition, TSA was provided funding for 170 additional cargo specific canine teams, split between LEO canine teams and proprietary (Federal handler teams) led by TSA cargo inspectors dedicated to screening passenger air cargo at high volume air carrier facilities. In FY 2009 there were 84 proprietary cargo canine teams, and 50 LEO canine teams deployed. The remaining 36 proprietary teams will be trained and deployed in FY 2010. The full complement of 170 TSA canine teams will provide considerable screening capabilities for air cargo and will greatly assist in achieving the 100% screening of all passenger air cargo. The proprietary canine teams screen air cargo at 20 domestic airports with the greatest volume of passenger air cargo. The teams focus their efforts on screening large, bulk configurations as well as individual cargo pieces when appropriate.

<b>Projected FY 2011 Funded Canine Teams</b>					
<b>Funding Source</b>	<b>Legacy Aviation</b>	<b>Proprietary OSO</b>	<b>FAM</b>	<b>Mass Transit</b>	<b>Total</b>
<b>Base Funding</b>	473	23	22	117	635
<b>Supplemental</b>	50	120			170
<b>FY 2011 Enhancement</b>		275			275
<b>Total</b>	523	418	22	117	<b>1,080</b>

Through cooperative agreements, TSA provides funding for training, certification and maintenance of the explosives detection capable canines, training for the handlers, and partial reimbursement of handlers' salaries and other costs. The FY 2011 request seeks to increase the current stipend TSA provides, to each state and local participant by approximately \$10,500. This proposed enhancement is necessary to more appropriately distribute the escalating inflationary and operational costs borne by NEDCTP program participants. Local law enforcement agencies deploy these valuable canine teams and provide DHS with a mobile response platform for specific threats to the transportation systems.

## **Air Cargo Accomplishments:**

### Significant accomplishments in FY 2009 include:

- In February 2009, achieved 50% screening of all cargo on passenger aircraft departing from the U.S.
- Performed approximately 55,000 inspections of foreign and domestic air carriers, indirect air carriers, and certified cargo screening facilities and conducted roughly 800 regulatory investigations of foreign and domestic air carriers, IACs, and CCSFs.
- Conducted more than 11,000 covert tests for air cargo security.
- Published the Air Cargo 100% Screening Interim Final Rule (IFR) which was effective November 16, 2009 (requires 100% screening by August 2010).
- Completed 1st of 4 phases of cargo screening technology qualification testing to evaluate existing and emerging technologies and their appropriate use on commodity types and cargo configurations.
- Trained and certified TSA Approved Validation Firms to facilitate certification under the CCSP

### FY 2010 Planned Accomplishments:

- As of December 2009, certified approximately 500 CCSFs as well as completed vulnerability assessments on all 28 Category X airports.
- By August 2010, achieve 100% screening of all cargo on passenger aircraft departing from the U.S.
- In addition, CCSP will be implemented by August 2010 to facilitate the screening of cargo to be transported on passenger aircraft.
- By August 2010, complete the Indirect Air Carrier Screening Technology Pilot to evaluate the operational feasibility of certain screening technologies in the air cargo environment.
- Pilot utilization of CBP's Automated Targeting System to conduct risk screening on international inbound cargo of passenger aircraft.
- Continue working with international stakeholders to harmonize air cargo security standards and advance the "supply chain screening" approach toward 100% screening of international inbound cargo on passenger aircraft.

### In FY 2011 TSA intends to accomplish the following:

- Continue maturation of the CCSP by certifying more facilities to conduct screening of cargo to be transported on passenger aircraft. In the Air Cargo 100% Screening IFR, TSA projected 15,000 facilities in CCSP over a 10 year period (2009-2019).
- Ongoing qualification of TSA approved technologies and screening protocols for X-Ray, Explosives Trace Detection, and metal detection and their uses on commodity types and cargo configurations, particularly skidded cargo. Continue evaluation of emerging technologies.

- Expand international inspection outreach efforts regarding all-cargo security and will place added emphasis on the development of international standard with which all ICAO member states must comply.
- Regulatory investigations of foreign and domestic air carriers, IACs, and CCSFs as needed to enforce security requirements;
- Full program development and implementation of Targeting System to conduct risk screening on international inbound cargo of passenger aircraft.
- Continue working with international stakeholders to harmonize air cargo security standards and advance the “supply chain screening” approach toward 100% screening of international inbound cargo on passenger aircraft.
- Continue Vulnerability Assessments on high cargo volume Category 1 airports and reassessments at select high volume Category X airports.
- By October 2011, publish the Air Cargo 100% Screening Final Rule.

<b>2011 Total Request</b>	-	-	-
Total Change 2010 to 2011	-	-	-

This offsetting collection supports General Aviation flights into Reagan National (DCA) as provided by the Vision 100 Act. TSA levies a \$15 fee for each person onboard the flight for security threat assessments and flight authorization services. In addition, a \$296 fee per roundtrip is charged to flight operators for the screening personnel and equipment used to support such flights at DCA. These fee collections cover program costs associated with the legislated mandate requiring the establishment of a security program to allow General Aviation flights into and out of DCA. Per P.L. 111-83, beginning in FY 2010, this fee was moved from the Aviation Security to the Transportation Threat and Credentialing appropriation.

## IV. Program Justification Changes

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:  
Screening Partnership Program [Privatized Screening]  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 1:** Reduce SPP as a Result of Contract Efficiencies  
PPA: Screening Partnership Program [Privatized Screening]  
Program Decrease: Positions 0.0, FTE 0.0, Dollars (\$10,000.0)

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Decrease							-	-	(10,000)
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>(10,000)</b>

**Description of Item**

The Screening Partnership Program (SPP) allows an airport operator to provide screening services through a private screening company. The contractor must perform under federal oversight and the contracted screeners must perform at equal or higher performance levels than federal TSOs.

**Justification**

TSA is able to operate the SPP with reduced funding levels due to efficiencies gained through contract re-negotiations.

**Impact on Performance (Relationship of Increase to Strategic Goals):** This action will have no immediate impact on the current participants in SPP, but may prevent TSA from having readily available resources to fund new airport candidates for federalization, increasing the time required to implement such actions.

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:  
Operation Integration  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 2:** Merge Operation Integration into EDS/Checkpoint  
PPA: Operation Integration  
Program Decrease: Positions 0.0, FTE 0.0, Dollars (\$21,481.0)

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Decrease							-	-	(21,481)
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>(21,481)</b>

**Description of Item**

The FY 2011 Request reflects a \$21.5 million reduction for the elimination of the Operation Integration PPA.

**Justification**

In FY 2011, TSA proposes to sustain program initiatives within technology programs in individual PPAs, and eliminate the separate Operation Integration PPA account

Aviation security programs will continue to meet passenger, baggage, and cargo screening requirements for evaluating the impact of new security technologies, procedures, and policies. This work will continue to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment under the proposed concept of operations, in the field under a variety of environmental conditions. Initiatives will continue to support security programs covering passenger, baggage, cargo, and airport infrastructure as well as a program addressing surface transportation protection.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

Work under this program will continue under the oversight of TSA's Office of Security Technology and will be supported by benefitting programs from their base funding.

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 3:** Increase Canine Teams and Stipend Increase  
PPA: Aviation Security:  
Program Increase: Positions 523.0, FTE 262.0, Dollars \$74943.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

Program Increase-Aviation Regulation-Additional Canines							523	262	69,149
Program Increase-Aviation Regulation- Co-Operative Agreement Amount							-	-	3,880
Program Increase- Air Cargo- Co-Operative Agreement Amount							-	-	1,840
Program Increase-Airport Management-Additional Canines							-	-	74
<b>Total Request</b>	<b>282</b>	<b>193</b>	<b>70,000</b>	<b>282</b>	<b>271</b>	<b>66,000</b>	<b>805</b>	<b>533</b>	<b>140,943</b>

The Current Services levels represent the total funding for the TSA Canine program only.

**Description of Item**

This initiative includes additional proprietary canine teams and an increase in funding for state and local law enforcement agreements. The total cost for this initiative is \$78.0 million, of which \$74.9 million is in Aviation, \$1.3 million in Surface Transportation Security, and \$1.3 million in Transportation Security Support. (See Surface Transportation Security Increase # 1 and Transportation Security Support Program Increase # 2)

- The total cost to increase the number of proprietary canine teams is \$71.0 million with 523 FTP/262 FTE in Aviation Regulation, and \$1.9 million in Support costs.
- The total cost to increase the stipend for the Co-Operative agreements to State/Local teams is \$7.0 million with \$3.9 million to Aviation Regulation, \$1.8 million to Air Cargo, and \$1.3 million to Surface.

TSA’s canine program develops trains, deploys, and certifies explosives detection canine teams to deter and detect the introduction of explosive devices into the transportation system. Explosives detection canine teams are proven and reliable resources in the detection of explosives and are a key component in a balanced counter-sabotage program.

The NEDCTP provides funding for training, certification and maintenance of the explosives detection capable canines, training for the handlers, and partial reimbursement of handlers’ salaries

and other costs through cooperative agreements. Local law enforcement agencies deploy these valuable canine teams and provide DHS with a mobile response platform for specific threats to the transportation systems.

### **Justification**

TSA is requesting \$69.1 million for an additional 275 proprietary canine teams. TSA currently has funding to support a total of 805 canine teams, comprised of 165 Proprietary (Federal Handler) teams and 640 Legacy (State/Local) teams. The FY 2011 request includes funding for an additional 275 proprietary teams as a result of evolving threats to aviation security such as the Christmas Day 2009 attack. From these 275 teams, 112 teams will be placed at 28 CAT X airports and 163 teams will be placed at 56 CAT I airports. The request also includes the necessary general operating expenses for support including additional explosive training aid storage magazines.

The proprietary canine teams are currently located in Airport baggage and Air Cargo environments. The use of canines in the airport passenger environment is an effective and efficient way to screen people in mass amounts. The request for additional teams would also include general operating expenses for support including additional explosive training aid storage magazines. These teams coordinate with TSA Behavior Detection Officers to drive behavior changes in possible assailants in passenger terminal and checkpoint areas.

The increase of \$5.7 million for the NEDCTP program is to provide a stipend increase of \$10,500 to each team in Aviation Regulation and Air Cargo.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

An increase in funding will allow the TSA's canine teams to provide additional coverage in the nation's airports. The teams will also be better able to detect and deter terrorist activities directed towards transportation systems, as well as provide for more timely responses should attempted attacks occur.

**Department of Homeland Security  
Transportation Security Administration  
Aviation Security:  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 4:** International Security  
PPA: Aviation Security:  
Program Increase: Positions 74.0, FTE 37.0, Dollars \$39350.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request

Program Increase-Airport Management									506
<b>Total Request</b>	-	-	-	-	-	-	<b>74</b>	<b>37</b>	<b>39,350</b>

The Current Services levels represent the Office of Global Strategies funding.

**Description of Item**

The total cost to enhance International Programs is \$40.0 million, with 74 FTP/37 FTE and \$39.4 million in Aviation Security and \$650 thousand in Transportation Security Support. (See Transportation Security Support Program Increase # 2)

The purpose of the Office of Global Strategies (OGS) is to develop and promote the implementation of effective/enhanced global transportation security processes and structures worldwide, while ensuring compliance with international and TSA standards. OGS seeks to work proactively with foreign partners and overseas transportation operations affecting the United States by representing TSA in a variety of international and domestic settings, including major transnational aviation-related organizations, regional bodies dealing with transportation security, bilateral cooperative efforts with various nations, as well as interagency transportation security matters internationally.

TSA requests an additional \$38.8 million in FY 2011 to:

- Field and support an additional 74 personnel to manage international programs at 15 existing offices around the globe. These positions will be strategically placed in high risk areas such as the Middle East and Africa;
- The 74 new positions include 34 TSS; 10 IIRs, and a Rapid Response Team (10 FTP) and associated support personnel.
- Provide equipment and training to host nations to mitigate vulnerabilities and ensure compliance with aviation security standards;
- Triple the number of visits made by ASSIST teams, and;

- Support technical and automated systems used by Foreign Airport Assessment program for risk management.

**Justification**

As a result of evolving threats to aviation security such as the failed Christmas Day attack in 2009, TSA is requesting an increase in funding to provide an increased international presence. These additional resources will strengthen alignment and consistency between the security requirements of the U.S. and foreign governments.

**Impact on Performance (Relationship of Increase to Strategic Goals)**

The addition of field personnel will enable TSA to conduct congressionally mandated inspections and respond to heightened threats through onsite deployments designed to ensure threat mitigation measures are applied by local authorities.

**Description of Item**

This initiative is for a total increase of \$363.2 million for Passenger Security Enhancements, of which \$357.2 million is in Aviation Security and \$6 million in Transportation Security Support. Included in Aviation Security is \$231.2 million for advanced imaging technology (AIT) and Explosive Trace Detection (ETD) equipment for the checkpoint, \$21 million for ETD consumables, 10 FTP/5 FTE for support related to the new equipment, \$22.5 million for space and modifications of airport AIT viewing rooms, and \$82.5 million to accelerate the purchase for Explosives Detection Systems (EDS) of checked baggage screening. The Support appropriation includes \$6 million of Whisper Communications. (See Transportation Security Support Program Increase # 2)

**Justification**

TSA must implement passenger security enhancements to respond to evolving threats to aviation security such as the Christmas Day 2009 incident. The FY 2011 request will support critical operations above the current services levels.

Funding in the above PPAs will accelerate the purchase and deployment of technologies to detect dangerous materials, including non-metallic materials, a person may attempt to smuggle onto an aircraft under their clothing.

An increase of \$6 million in the Support Appropriation, Information Technology PPA, is for the purchase of radios for Transportation Security Officers to use with new AIT equipment.

### **Impact on Performance (Relationship of Increase to Strategic Goals)**

The EDS Strategic Plan outlined a process for achieving optimal screening solutions at the top 250 commercial airports. This number has been increased to 285 in order to incorporate Category III airports. By the end of FY 2010 it is projected that 200 airports will have one or more operational in-line systems. The ARRA infusion of \$689 million coupled with a program increase in FY 2010 Appropriation \$487 million will facilitate acceleration of in-line systems, which provide higher detection rates and increased baggage throughput. In FY 2011, the discretionary program will accelerate the purchase of Explosives Detection equipment and ensure ARRA projects are completed without incurring delays.

The FY 2011 request of 500 AIT units, combined with 500 units to be installed by the end of 2010, will provide coverage at 60% of the total lanes at Category X through II. The deployment of these units will support screening of about 50% of all airline passengers. The ETD request of 811 units will improve TSA's ability to detect residue from explosive materials on people at lanes not covered by AIT.

<b>Total Request</b>	-	-	-	-	-	-	<b>5,960</b>	<b>3,888</b>	<b>285,144</b>

**Description of Item**

This initiative is for a total increase of \$372.7 million, of which \$325.9 million is from Aviation Security and \$46.8 million is from Transportation Security Support. The total Aviation increase of \$325.9 million includes, 1) expansion of the Transportation Security Officer (TSO) workforce by 5,355 FTP/3,550 FTE and \$218.9 million to fully support the deployment of advanced imaging technology (AIT) at airport checkpoints; 2) increase to the Behavior Detection Officer (BDO) Program by 350 FTP/210 FTE and \$16.2 million to expand the use of screening of passengers by observation technique (SPOT) at additional airports; 3) an increase of \$40.8 million to Screener Training and Other for training and uniform requirements of new staff as well as the purchase of additional consumable materials with the acquisition of new portable explosives trace detection systems; and 4) increase to Airport Management and Support of 255 FTP/128 FTE and \$50.1 million to absorb the additional payroll, human resource, finance and other duties which conforms to TSA's Federal Security Director staffing model and previous proportional growth at airports along with corresponding increases to rent and transit subsidy. In addition, 55 positions, 28 FTE, and \$46.9 million is also requested in the Aviation Support appropriation in support of this program increase. The Support appropriation includes 55 positions, 28 FTE, and \$46.8 million to support this operational increase. (See Transportation Security Support Program Increase # 2)

**Justification**

TSA requests an increase of \$218.9 million to support the accelerated deployment of AIT machines in FY 2011. This staffing increase is necessary to successfully operate the AIT machines without diminishing the current allocation of resources. Additional TSOs will provide divestiture information, operate the machines and perform resolution screening at the checkpoint. TSA's request reflects an expected average AIT staffing requirement.

TSA requests an increase of \$16.2 million and 210 FTE to support the addition of 350 new BDOs. TSA's Screening of Passengers by Observation Technique (SPOT) is a behavior and analysis program in which personnel are trained to identify anomalous behaviors that deviate from an established environmental baseline. SPOT personnel are known as BDO who observe the security checkpoint to identify passengers that are emphasizing non-verbal, potentially high-risk behaviors. In FY 2009, SPOT referred 69,426 passengers for additional screening resulting in 6,093 law enforcement officer calls yielding 355 arrests.

The enhancement of TSO staff requires an associated increase in field support, which includes managers, FSD staff, and administrative positions. The deployment of AIT technology will also entail additional TSO training, consumables and real estate expenses.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

The enhancement of the TSO and BDO workforce supports DHS Goal 1: Protect our Nation from Dangerous People; Objective 1.3: Strengthen Screening of Travelers and Workers; DHS Goal 2: Protect our Nation from Dangerous Goods; and Objective 2.3: Prevent and Detect Chemical and Explosive Attacks.

The deployment of AIT at many of the nation's checkpoints will provide a level of unparalleled security that marks a departure from traditional technology and screening practices. AIT technology gives TSA the capability of detecting metallic and non-metallic dangerous materials hidden on a person. The units TSA plans to have deployed by the end of FY 2011 will provide AIT coverage at 60% of lanes at Category X through Category II airports. This deployment will support screening of about 62% of all air passengers.

SPOT provides FSDs with an additional layer of security, based on proven behavior observation and analysis techniques, to make timely security risk assessments. SPOT/BDO adds an additional measure of unpredictability due to the fact that they can be deployed almost anywhere within the airport environment and are not just confined to the footprint of the checkpoint.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Transportation Security Administration  
Justification of Proposed Changes in Aviation Security  
Appropriation Language**

For necessary expenses of the Transportation Security Administration related to providing civil aviation security services pursuant to the Aviation and Transportation Security Act (Public Law 107-71; 115 Stat. 597; 49 U.S.C. 40101 note), [\$5,310,850,000] **\$4,507,658,000**, to remain available until September 30, [2011] **2012**, of which not to exceed \$10,000 shall be for official reception and representation expenses: *Provided*, That of the total amount made available under this heading, not to exceed [\$4,475,117,000] **\$3,710,957,000** shall be for screening operations; and not to exceed [\$835,733,000] **\$796,701,000** shall be for aviation security direction and enforcement: *Provided further*, That security service fees authorized under section 44940 of title 49, United States Code, shall be credited to this appropriation as offsetting collections and shall be available only for aviation security: *Provided further*, That any funds collected and made available from aviation security fees pursuant to section 44940(i) of title 49, United States Code, may, notwithstanding paragraph (4) of such section 44940(i), be expended for the purpose of improving screening at airport screening checkpoints, which may include the purchase and utilization of emerging technology equipment; the refurbishment and replacement of current equipment; the installation of surveillance systems to monitor checkpoint activities; the modification of checkpoint infrastructure to support checkpoint reconfigurations; and the creation of additional checkpoints to screen aviation passengers and airport personnel: *Provided further*, That the sum appropriated under this heading from the general fund shall be reduced on a dollar-for-dollar basis as such offsetting collections are received during fiscal year [2010] **2011**, so as to result in a final fiscal year appropriation from the general fund estimated at not more than [\$3,081,909,000] **\$2,278,717,000**: *Provided further*, That any security service fees collected in excess of the amount made available under this heading shall become available during fiscal year [2011] **2012**: *Provided further*, That notwithstanding section 44923 of title 49, United States Code, the share of the cost of the Federal Government for a project shall not exceed 90 percent, and all funding provided by section 44923(h) of title 49, United States Code, may be distributed in any manner deemed necessary to ensure aviation security: *Provided further*, That Members of the United States House of Representatives and United States Senate, including the leadership; and the heads of Federal agencies and commissions, including the Secretary, Under Secretaries, and Assistant Secretaries of the Department of Homeland Security; the United States Attorney General and Assistant Attorneys General and the United States attorneys; and senior members of the Executive Office of the President, including the Director of the Office of Management and Budget; shall not be exempt from Federal passenger and baggage screening. (*Department of Homeland Security Appropriations Act, 2009.*)

#### Explanation of Change:

No substantive changes proposed.

**INITIATIVE #1**

**TSA – ELECTRONIC BAGGAGE SCREENING PROGRAM (EBSP)**

**Project Description, Justification and Scope**

The Electronic Baggage Screening Program (EBSP) implements a national checked-baggage screening system to protect against criminal and terrorist threats, while minimizing transportation industry and traveling public burdens. TSA provides life-cycle procurement, deployment, integration, and maintenance of security equipment at over 450 U.S. airports. This program includes: (1) maintaining first generation Explosives Detection Systems (EDS), and Explosives Trace Detection (ETD) devices deployed after 9/11; (2) improving efficiency and effectiveness by acquiring and deploying next generation inline explosives detection technology, and by relocating lobby equipment at some airports; and (3) Efforts to establish operational, functional, performance and integration requirements for TSA security screening equipment.

While the Congressionally-mandated requirement for 100 percent screening of aviation-checked baggage by electronic or other approved means has been achieved, the program must continue to research, evaluate, and deploy refinements to EDS and ETD technology and associated systems, that allow for improvements in: (1) throughput (checked bags per hour), (2) false alarm rate, (3)

system availability, and (4) total cost of ownership for baggage screening (cost per checked bag). Equipment must be also be relocated from airport lobby areas to baggage room areas.

The following programs are funded under EBSP:

a) Operation Integration (OI): TSA analyzes integration of new technologies into existing systems to ensure operational effectiveness and suitability before full system production and deployment. The purpose of this work is to test, evaluate, and analyze pre-production or production representative systems under realistic conditions, including operation by those who will use the equipment in the field in a variety of environmental conditions. The division conducts:

- Operational test and evaluation as part of the acquisition process for items procured by TSA
- Pilots, demonstrations, and field experimentation in support of mission area analyses, concept of operations development and workforce characterization

5. Cost Estimate Detail and Changes  
(Dollars in Thousands)

Description of Milestone	Initial Total Cost (\$mil)	Planned Total Cost (\$mil)	Actual Total Cost (\$mil)	Explanation of Difference Between Current and Previous Estimate
Year: 05 Program initiation (MNS, draft ConOps); Deployed NEXGEN units; Deployed LOI systems; Developed Strategic Program Plan	1,541,130	1,541,130	1,541,130	
Year: 06 Deployed NEXGEN to improve system detection capabilities and improve throughput; Expedited EDS deployment in accordance with Strategic Plan; Deployed LOI systems; Updated Strategic Plan, LCCE, CBA, Deployment Schedule	706,024	706,024	693,428	Airport scheduling delays slowed deployment of equipment.
Year: 07 Perform program management, system deployment, operations and maintenance, and tech management in accordance with draft final deployment plan	774,400	774,400	725,950	Airport scheduling delays slowed deployment of equipment.
Year: 08 Perform program management, system deployment, operations and maintenance, and tech management utilizing final strategic plan	748,727	748,727	569,062	Airport scheduling delays slowed deployment of equipment.
Year: 09 Perform program management, system deployment, operations and maintenance, and tech management utilizing final strategic plan	1,417,500	1,417,500	1,020,850	Acquisition of EDS Equipment delayed due to competitive award
Year: 10 Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan, and for Recapitalization of existing airport systems for sustained operations and compliance; and	1,131,563	1,131,563	0.000	

perform operations and maintenance utilizing final strategic plan.				
Year: 11 Perform program management in accordance with the final strategic plan; execute engineering initiatives for continuous quality and improvements; perform facility modification, purchase of EDS, and installation of EDS for Airport Optimal Solutions utilizing final strategic plan, and for Recapitalization of existing airport systems for sustained operations and compliance; and perform operations and maintenance utilizing final strategic plan.	868,702	868,702	0.000	

\*STIP and ASP are not included

#### 6. Method of Performance

EBSP is a 20 year program. Expenditures are approved based on an overall strategic plan that is submitted to Congress annually. Operational performance will be measured based on the following criteria:

- 100 percent electronic screening of checked baggage for explosives at all commercial airports nationwide.
- Number of airports with integrated in-line systems
- Cost per bag screened
- Number of false alarms on Electronic Detection Systems

#### 7. Related Annual Funding Requirements

(Dollars in Thousands)

	FY 2011	
	Current Estimate	Previous Estimate
N/A (All operations and maintenance are included in program cost estimates.)	N/A	N/A
Total	N/A	N/A

#### 8. Budget Allocation to Programs

Program	Allocated Budget (\$000)	
	FY 2010	FY 2011
EDS/ETD Purchase & Install	1,050,000	610,832
Screening Technology Maintenance & Utilities	177,268	257,870
Total	1,227,268	868,702

\*STIP and ASP are not included

## 9. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders

This program is mandated under the Aviation and Transportation Security Act (PL No. 107-71) which requires screening of checked baggage by EDS.

## **Initiative #2**

### ***TSA – Passenger Screening Program (PSP)***

#### **1. Project Description, Justification and Scope**

The Passenger Screening Program provides the resources required to deploy and maintain passenger screening and carry-on baggage screening equipment and processes at approximately 2,225 passenger checkpoint lanes at airports nationwide, in order to minimize the risk of injury or death of people, or damage of property due to acts of terrorism. The Passenger Screening Program's role consists of the identification, evaluation, field testing, procuring, deploying, integrating, maintaining, disposing and replacing of existing and emerging technologies necessary to meet those requirements. The ever-changing threat environment necessitates investment in new and improved technology to increase threat detection capabilities needed to provide the traveling public with optimal security screening benefits.

After the attacks on 9/11, Congress directed TSA to screen all passengers and their carry-on articles for explosives and components of weapons of mass destruction, as well as other prohibited items. At the time choices in technology were limited to legacy systems, namely metal detectors and basic x-ray equipment, all of which had significant shortfalls in the detection of explosives and non-metallic threats on people and in their carry-in articles. Since then, the Passenger Screening Program has replaced the legacy systems with Enhanced Metal Detectors and TIP Ready X-ray systems, providing an expanded level of security and threat detection at the checkpoint. Explosives Trace Detector usage was expanded to more sites and higher quantities and recently, Bottled Liquids Scanners, Whole Body Imagers, and Advanced Technology Systems have been deployed, providing additional levels of explosives security at the checkpoints. The Passenger Screening Program continues evaluating and deploying the next generation of detection systems that address existing weaknesses in detection capabilities, detect new threats, and reduce false alarm rates.

#### **2. Significant Changes**

No significant changes in these programs from the information provided in the 2010 Congressional Justification.

### 3. Project Schedule

<b>23.3 Communications utilities and miscellaneous charges</b>	<b>166</b>	<b>166</b>	<b>166</b>	<b>-</b>

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2011 request has no change.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>24.0 Printing and reproduction</b>	<b>336</b>	<b>336</b>	<b>336</b>	<b>-</b>

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. This object class includes expenditures for the reproduction and distribution of TSO training materials. The FY 2011 request has no change.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.1 Advisory and assistance services</b>	<b>67,772</b>	<b>61,675</b>	<b>61,675</b>	<b>-</b>

Advisory and assistance services include services acquired by contract from non-Federal sources (private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal government. The FY 2011 request has no change.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.2 Other services</b>	<b>37,095</b>	<b>35,000</b>	<b>69,434</b>	<b>34,434</b>

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Base funds support the continuance of contracts that provide logistical and programmatic support for TSO training and workforce career progression programs. These funds also provide for training courses sponsored by the Model Workplace program. The FY 2011 request includes a net increase of \$34,434 million associated with movement of Bomb Appraisal Officer Training to the Airport Management PPA, increased training funds correlating with the additional number of TSO's who will require training, and \$1,250,000 non-recurred from this object class for one time FY 2010 increase.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.3 Purchases of goods &amp; svcs. from Gov't accounts</b>	<b>6,455</b>	<b>6,455</b>	<b>6,455</b>	<b>-</b>

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2011 request has no change.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.4 Operation and maintenance of facilities</b>	<b>5,742</b>	<b>5,742</b>	<b>5,742</b>	<b>-</b>

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2011 request has no change.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.6 Medical care</b>	<b>1</b>	<b>1</b>	<b>1</b>	<b>-</b>

Medical care includes payments to contracts for medical services, but excludes Federal employees who are reportable under OPM regulations as federal employees.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.7 Operation and maintenance of equipment</b>	<b>63</b>	<b>63</b>	<b>63</b>	<b>-</b>

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2011 request has no change.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>26.0 Supplies and materials</b>	<b>39,202</b>	<b>39,202</b>	<b>64,282</b>	<b>25,080</b>

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2011 request includes an increase of \$25,080 million due to the enhancement of the TSO workforce and related consumables associated with the purchase of 1,000 AITs.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>31.0 Equipment</b>	<b>9,202</b>	<b>8,000</b>	<b>8,000</b>	<b>-</b>

This category is comprised primarily of training equipment used to demonstrate equipment use and to test the capabilities of TSOs. The FY 2011 request has no change.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>32.0 Land and structures</b>	<b>689</b>	<b>639</b>	<b>639</b>	<b>-</b>

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2011 increase reflects an adjustment for non-pay COLA.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>42.0 Insurance Claims and Indemnity</b>	<b>641</b>	<b>641</b>	<b>641</b>	<b>-</b>

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. The FY 2011 request has no change.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>44.0 Refunds</b>	<b>(424)</b>	<b>(424)</b>	<b>(424)</b>	<b>-</b>

Payments of amounts previously collected by the Government.

**PPA Mission Statement**

The Checkpoint Support PPA provides the resources required to deploy passenger screening, carry-on baggage screening and electronic surveillance equipment. This equipment is a vital component of TSA's efforts to secure our nation's air transportation. The FY 2011 request reflects support for the implementation of the evolving strategy to improve detection capability for weapons and explosives, and to further develop the capability to detect hostile intent.

**Summary Justification and Explanation of Changes**

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>11.1 Total FTE &amp; personnel compensation</b>	<b>4,064</b>	<b>4,002</b>	<b>7,476</b>	<b>3,474</b>

Salaries and benefits includes costs for 59 FTEs. The FY 2011 request reflects an increase of \$4,442,000 due to pay annualization, pay inflation and annualization of ARRA positions.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>

**PPA Mission Statement**

EDS/ETD Purchase and Installation is the purchase of electronic baggage screening equipment for deployment and the installation of electronic baggage screening equipment in our nations airports. The deployment of this equipment is a key component of TSA's ability to ensure the security of the air transportation system. Installation is an integral cost associated with the deployment of equipment that enhances the security of our air transportation system.

**Summary Justification and Explanation of Changes**

**PPA Mission Statement**

The purpose of Aviation Regulation and Other Enforcement is to provide activities that ensure that TSA continues to build a strong security regulation and enforcement presence on-site at the nation's commercial airports. Funding requested under this decision unit supports airport regulation compliance through domestic and international inspections, K-9 units, international outreach programs to ensure alignment and consistency in security requirements of the United States and those of the other nations to ensure transportation system integrity; and reimbursements provided to State and local law enforcement for support provided at commercial airport checkpoints.

**Summary Justification and Explanation of Changes**

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>11.1 Total FTE &amp; personnel compensation</b>	<b>91,585</b>	<b>96,342</b>	<b>127,037</b>	<b>30,695</b>

Salaries and benefits includes costs for 1,434 FTEs. The FY 2011 request includes an increase of 302 FTE from FY 2010. The net increase of \$36,866 reflects the pay annualization and pay inflation, as well as the costs associated with the FTE increase.

**PPA Mission Statement**

This PPA supports approximately 2,006 FTE at the airports and HQ, including the staff of the 153 Federal Security Directors (FSDs), the offices under Security Operations that direct the policy, analysis, and the administration of aviation screening and airport security. In addition, this PPA supports aviation functions at the TSA's Transportation Security Operations Center. These offices and positions are critical to supporting the front line operations of our TSOs.

**Summary Justification and Explanation of Changes**

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>11.1 Total FTE &amp; personnel compensation</b>	<b>183,818</b>	<b>185,717</b>	<b>231,830</b>	<b>46,113</b>

Salaries and benefits includes costs for 2,851 FTEs. The FY 2011 request reflects an increase of \$66,998 million associated with additional FTE for FSD and Staff, program increases in TSOs, BDOs, FAMS, Intel, OGS and pay annualizations and inflations; as well as the addition of Bomb Appraisal Officer and Explosive Security Specialist FTE.

**PPA Mission Statement**

TSA is mandated to provide the Federal Flight Deck Officer (FFDO) and Flight Crew Training programs to deputize qualified airline pilots as federal law enforcement officers and to train flight crew members to defend the flight decks and cabins of aircraft against acts of criminal violence or air piracy. This voluntary program provides training in firearms proficiency, self-defense tactics, authorities, and decision making to defend the cockpit.

**PPA Mission Statement**

The Air Cargo program operates through compliance activities, regulatory efforts, outreach initiatives and technology implementation. TSA uses a threat-based risk management approach based on two threats: introduction of an explosive device on a passenger aircraft, and the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

**Summary Justification and Explanation of Changes**

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change

## **BUDGET REQUEST AND SUPPORTING INFORMATION**

### **Surface Transportation Security:**

## **I. Appropriation Overview**

### **A – Mission Statement for Surface Transportation Security:**

The Transportation Security Administration (TSA) is mandated to protect the surface transportation system and ensure the freedom of movement for people and commerce. This mission is accomplished largely by a consortium of Federal, State, local, and private entities optimizing resources in a risk-based approach to security. In addition to coordination, TSA provides surface inspectors and other screening and detection programs.

Various statutes and executive directives require that transportation risk reduction activities be determined and implemented collaboratively in accordance with strategic plans developed with security partners. These combined efforts play an essential role in DHS' mission to prevent terrorist acts within the U.S., to reduce vulnerability to terrorism, and to minimize the damage from potential attacks. The surface domain includes:

- Approximately 751 million passengers traveling on commercial buses each year and over 9 billion passenger trips on publically operated mass transit per year.
- Over 140,000 miles of railroad track (of which 120,000 miles are privately owned); 3.8 million miles of roads (46,717 miles of interstate highway and 114,700 miles of National Highway System roads); 582,000 bridges over 20 feet of span; 54 tunnels over 19,685 feet in length, and nearly 2.2 million miles of pipeline.
- Nearly 800,000 shipments of hazardous materials transported every day (95 percent by truck).
- The Marine Transportation System (MTS) consisting of waterways, ports, and their connections, as well as commercial and recreational vessels, vehicles, and system users such as importers and exporters. This system is geographically vast, with 95,000 miles of shoreline, 25,000 miles of rivers and canals and is the primary transportation mode providing connectivity between the U.S. and global economies; 99 percent of overseas trade by volume enters or leaves the U.S. by ship.

There is a very real ongoing threat to transportation security, including surface modes within the transportation sector network, as evidenced by the World Trade Center bombing in 1993 and the Murrah Building bombing in 1995, both of which occurred on U.S. soil, as well as the bombings in Madrid in March of 2004, London in July 2005, and Mumbai, India in 2006 and 2008. Given these events and continued threats, TSA, its government partners, industry owners and operators have increased their vigilance by continuing to exchange real-time information and by focusing on threat detection and preparedness measures to improve security and resilience of the transportation system.

In addition, TSA plays a pivotal role in the President's Executive Order to Strengthen Surface Transportation Security through the identification of security gaps, development of appropriate security guidelines, and requirements to mitigate these gaps. In August 2007, DHS was directed by the 9/11 Commission Act to take specific measures to strengthen specific modes of transportation by conducting modal security assessments, requiring modal security plan development, providing guidelines for modal security training and conducting exercise activities to reinforce the modal security plans. The TSA Surface Budget request for FY 2011 reflects continuing efforts in these areas.

### **B – Budget Activities:**

This appropriation includes two major programs – Surface Transportation Security Staffing and Operations and Surface Transportation Security Inspectors and Canines.

**Surface Transportation Security Staffing and Operations** - Provides coordination among all surface security stakeholders to implement a regulatory framework and administration policy to develop national security strategies, plans, and programs that identify innovative solutions and best practices through pilot programs and evaluation of system assessments, which then can be used to assess risk and assist with prioritization of security resources.

**Surface Transportation Security Inspectors and Canines** - Employs a cadre of inspectors and canine teams to assess compliance, national program delivery, and provide outreach on security assets in the surface transportation system. These resources interact daily within the transportation network to enhance security measures and are available for surge operations during times of heightened security. These inspectors and canine teams are an integral part of TSA's Visible Intermodal Prevention and Response (VIPR) program.

### **C – Budget Request Summary:**

The Transportation Security Administration requests 820 positions, 787 FTE, and \$137,558,000 for FY 2011. The total adjustment-to-base is 194 FTE and \$30,636,000.

Program changes include total a reduction of \$3,594,000:

- Reduction in Staffing and Operations funding to support critical operations in FY 2011 (0 positions, 0 FTE, and -\$2,695,000)
- Reduction in Surface Transportation Inspectors and Canine funding to support critical operations in FY 2011 (0 positions, 0 FTE, and -\$2,179,000)
- An increase in the National Explosive Canine Detection Program stipends to keep up with increasing support costs (0 positions, 0 FTE, and \$1,280,000)

2011 Adjustments-to-Base	-	-	349
<b>2011 Current Services</b>	<b>171</b>	<b>165</b>	<b>42,642</b>
2011 Program Change	-	-	(2,695)
<b>2011 Total Request</b>	<b>171</b>	<b>165</b>	<b>39,947</b>
Total Change 2010 to 2011	-	-	(2,346)

The Transportation Security Administration requests \$39.9 million for staffing and operations to coordinate security efforts in non-aviation modes including mass transit, rail, pipeline, maritime, highway and motor carrier, and postal and shipping sectors. This represents a reduction of \$2.3 million in operating expenses to support Agency critical operations in FY 2011.

**Program Description:**

TSA, in accordance with Aviation and Transportation Security Act (ATSA), is responsible for assessing security threats, vulnerabilities, and consequences in all surface transportation modes, identifying needed security enhancements for surface transportation and related infrastructure, developing security plans, and issuing and enforcing regulations to improve modal security, to ensure that each transportation mode is protected. Homeland Security Presidential Directives (HSPD) 7 and 8 expand TSA's security responsibilities to include coordination of preparedness, response, and recovery activities for all hazards threatening the critical infrastructure and systems that comprise the Transportation Systems Sector. The objective is to identify and prioritize high risks and to find effective and efficient security solutions to reduce these risks.

The key strategic plans and requirements documents driving TSA's security efforts are the Executive Order to Strengthen Surface Transportation, the Intelligence Reform and Terrorism Prevention Act (IRTPA) of 2004, the National Infrastructure Protection Plan, the 9/11 Commission Act of 2007, and the DHS Strategic Plan. The following activities are supported by Staffing and Operations:

**Multi-modal Activities:**

National Transportation Strategies and Plans: TSA develops multiple strategies and plans for the protection of transportation assets, such as the National Strategy for Transportation Security, the Transportation Systems Sector-Specific Plan, strategic modal security plans as required by the IRTPA, and national strategies for public transportation, railroads, and a pipeline system recovery plan as required by the 9/11 Act. The development and planning process for each strategy and plan requires extensive coordination and outreach to engage Federal, State, local, tribal and territorial governments, owners and operators of transportation infrastructure, private sector stakeholders, and non-profit employee representative organizations. TSA strives to minimize the overlap in planning requirements and provide a unified process for its stakeholders.

9/11 Regulations: In response to the 9/11 Commission Act of 2007, TSA is issuing a regulation that requires owners and operators of multiple modes of transit to implement security training programs. TSA issued a Notice of Proposed Rulemaking (NPRM) to implement legislation that prepares frontline employees of freight rail, transit agencies, passenger rail, and over-the-road-bus (OTRB) operators for potential security threats and conditions. This rulemaking was merged with an additional NPRM that identifies security training requirements for motor carriers transporting Highway Security-Sensitive Materials (HSSM). TSA expects the NPRM to be published in the Federal Register in FY 2010.

In addition, the 9/11 Act mandates that freight rail employers, public transportation agencies, passenger rail carriers, and OTRB operators develop comprehensive security plans and conduct vulnerability assessments. TSA is preparing a second rulemaking to cover these modes of surface transportation, as well as motor carriers transporting HSSM. The second NPRM will address provisions in the Act requiring security threat assessments for frontline public transportation and railroad employees. In order to maintain consistency across both modes and rules wherever possible, the second rule will cover the same population of entities and frontline employees covered by the Security Training Programs for Surface Mode Employees NPRM. TSA expects to issue the NPRM for surface mode security plans and threat assessments during FY 2010. Both surface rules are scheduled to be implemented in FY 2011.

Grant Oversight and Management: TSA provides subject matter expertise and programmatic support to the National Preparedness Division at FEMA to issue guidance,

evaluate and approve grant applications for bus, trucks, ports, mass transit, ferry, and passenger rail systems. The grants are awarded based on risk.

Intermodal Security Training Exercise Program (I-STEP): TSA's I-STEP meets the requirements of the 9/11 Commission Report by creating a security exercise program in the mass transit, freight rail, maritime and OTRB sectors. I-STEP provides exercise technology, services, training and tools to conduct and evaluate multi-modal transportation security training exercises. I-STEP training exercises align with national guidance and directives on exercises including the National Incident Management System and the National Response Framework. In FY 2009, TSA completed 16 exercises for multiple surface modes (mass transit, freight rail, bus, truck, and pipeline). In FY 2010, TSA plans to complete 16-20 exercises. Additionally, TSA and the United States Coast Guard (USCG) collaborate on multi port, intermodal exercises on a regional level in the maritime sector. The continuation of I-STEP will further enhance public transportation agencies' ability to prevent, mitigate, respond to, and recover from terrorist incidents in FY 2010 and FY 2011.

Stakeholder Collaboration: TSA interfaces with stakeholders in multiple modes by distributing security awareness training. For example, TSA provides security awareness information to operators as part of the HAZMAT Motor Carrier Security Self-Assessment Training Program, to the school transportation industry as part of the School Transportation Security Awareness Program, and to the motor coach industry through Operation Security Transport. Furthermore, Transit Watch, Highway Watch, and other joint campaigns in the transportation system, which emphasize the importance of vigilance and timely report of security concerns, foster public awareness and education. TSA will continue to provide these stakeholder services in FY 2011.

Baseline Assessment for Security Enhancement (BASE) Program: TSA has implemented a continuous improvement process via comprehensive security assessments conducted by TSA Transportation Security Inspectors-Surface (TSIs-Surface) under the BASE program. Assessments evaluate posture in 17 Security and Emergency Management Action Items foundational to an effective security program. The results inform security enhancement priorities and review of projects under Transportation Security Grant Program (TSGP) for mass transit and passenger rail agencies. The most effective security practices cited in BASE assessments are shared throughout the transit and rail community and spur networking among security professionals and expand implementation.

Beyond conducting assessments, TSA's more than 160 Surface inspectors serve as direct liaisons to mass transit and passenger rail security officials. In this capacity, they facilitate security enhancement efforts, respond to reports of threats and suspicious incidents, and foster regional security collaboration.

In FY 2011, TSA will continue to evaluate and share the results of the security data gathered by the TSIs-Surface in the field to ensure the effectiveness of the security program.

Corporate Security Reviews: TSA conducts Corporate Security Reviews (CSRs) in multiple modes of transportation on a continuous basis to evaluate standards and identify security gaps in reviewed systems. CSRs allow TSA and the system operators and owners to develop first-hand knowledge of security planning and execution at critical systems, establish communication between key security personnel, identify and share smart practices, and make recommendations for security improvements. During a CSR, teams of TSA modal experts evaluate and collect physical and operational preparedness information on critical assets and key point-of-contact lists, review emergency procedures and security plans, provide domain awareness training, and offer an opportunity to share security practices.

**Transit Activities (Mass Transit, Passenger Rail, and Bus):**

Stakeholder Collaboration: TSA Mass Transit officials coordinate with key stakeholders through the Regional Transit Security Working Group. The purpose of the working group is to identify regional priorities, and resolve security needs. In FY 2010, TSA plans to focus on Tier 1 Transit Security Grant Program (TSGP) areas (New York City, Boston, Washington, DC, Philadelphia, Chicago, Los Angeles, San Francisco, and Atlanta), with potential extensions to Tier 2 locations. In addition, TSA partnered with the Federal Transit Administration to conduct five Connecting Communities Workshops to enhance security and safety by sharing transit policies, procedures, resources, and best practices with local first responders to transit emergencies. The program uses realistic scenarios, including terrorism, to focus discussion on emergency preparedness, management, and response. TSA will continue to provide these services in FY 2011.

Security Standards Development: TSA engages with the American Public Transportation Association (APTA) Security Standards Policy and Planning Committee in conjunction with multiple stakeholders to develop consensus-based security standards for mass transit and passenger rail systems, such as risk assessments and emergency drills and exercises. Six recommended practices were developed, approved, and distributed to the transit community. The practices address the deployment of close circuit television, placement of trash receptacles, security and emergency preparedness planning, continuity of operations planning, first responder familiarization, and security and emergency management aspects of special event service. Six additional standards/guidelines are expected to follow throughout FY 2010. In addition, TSA collaborates with the DHS Standards Executive and the American National Standards Institute on the development of security technology standards. Progress is anticipated in FY 2010 in producing standards and guidance to assist mass transit and passenger rail security professionals in making well-informed decisions on procuring technical systems to enhance security. Published standards in multiple areas will occur throughout FY 2010 and during the 1<sup>st</sup> quarter of FY 2011.

Transit Bus Command and Control: To reduce the risk of vehicle hijacking and theft, TSA has worked to develop a system that allows for buses to be remotely disabled and also requires keyless driver authentication in order for a transit bus to be functional. In

the event of a hijacking or theft, alarms are sent wirelessly to a command or dispatch center, if an unauthorized user attempts to operate the bus. In FY 2009, TSA started a full field operational testing (FOT) of this system under actual operational conditions. In FY 2010, TSA will analyze test results and apply lessons learned to determine the need for further testing of specific capabilities, inform the development of operating procedures, and produce an overall assessment of the effectiveness of this system to assist mass transit and passenger rail agencies. In FY 2011, the system is expected to be commercially available and eligible for procurement through the TSGP.

Layered Security Operational Test Bed: This collaborative security engagement tests the effectiveness of operational and technological solutions applied in a layered approach at mass transit and passenger rail facilities. The effort commenced with the Port Authority Trans Hudson (PATH) interstate rail system in FY 2007. TSA facilitated a workshop with operating and security officials of the Port Authority and DHS Science and Technology Directorate (S&T) to assist PATH in identifying operational and technological security requirements for its five year strategic plan. TSA partnered with PATH in FY 2009 to test technological and operational solutions to prevent terrorism in mass transit and passenger rail systems. In FY 2010 and FY 2011, TSA plans to continue development and extension to other systems and diverse public transportation environments, e.g., rail terminals and stations, system infrastructure, bus terminals and stations.

### **Freight Rail Activities:**

Corporate Security Reviews (CSRs) Freight Rail: TSA conducts CSRs on Class I, II and III railroads to ensure security levels are maintained. Currently, there are seven Class I, and over 400 Class II and III rail carriers operating in the United States. In FY 2009, TSA conducted three CSRs with three transportation companies that are the controlling entities of 90 short line railroads. In FY 2010, TSA plans to conduct CSRs on all seven Class I railroads. In FY 2011, TSA will continue to conduct CSRs on short line railroads and terminal railroads in high threat urban areas.

Infrastructure Vulnerability Assessments: TSA developed a comprehensive critical infrastructure vulnerability assessment program to identify and rank critical assets, evaluate threat, vulnerability, and consequences, and quantify costs for hardening structures and replacement. TSA plans to conduct assessments (finite element modeling or blast analysis) on critical structures to identify weaknesses in the structure, report on recommended structural hardening activities for existing and newly built structures, and identify best practices and engineering standards. In FY 2010 and FY 2011, the TSA Freight Rail Division plans to perform risk assessments on approximately 35 bridges.

High Threat Urban Area (HTUA) Vulnerability Assessments: TSA leads a team composed of Federal, State, and industry subject matter experts to conduct risk assessments of selected high Threat Urban Area (HTUA) rail corridors. On-site assessments consist of a detailed examination of the railroad(s) operations and procedures within the HTUA. TSA completed vulnerability assessments on 14 rail corridors, and

restructured the program to allow for compressed assessments of the remaining 32 HTUA rail corridors. Assessments will continue in FY 2010 and FY 2011. Additionally, in FY 2011, TSA will begin the review of HTUAs not on the original list of 46 areas.

Toxic Inhalation Hazard Transportation Risk Reduction: TSA, in cooperation with industry stakeholders, established the Toxic Inhalation Hazard (TIH) risk reduction program to objectively measure the security risk associated with the rail transportation of TIH materials through HTUAs. The program's objective is to reduce the dwell time of rail cars carrying TIH materials, and implement positive security measures by rail carriers. TSA measures and reports the level of risk reduction of TIH materials. In FY 2009, TSA achieved the DHS Secretary's goal to reduce the risk posed by transporting TIH by rail in HTUAs by an estimated 59 percent; TSA reduced the risk from TIH materials by an estimated 62 percent. In FY 2010 and 2011, TSA will continue to conduct TIH risk surveys.

### **Pipeline Activities:**

Critical Facility Inspections: As required by the 9/11 Act, TSA must develop and implement a plan for inspecting of the 100 "most critical pipeline" systems. TSA has collected critical facility information from the 100 "most critical" pipeline systems. These systems have hundreds of facilities associated with their operation. TSA has begun inspections, which focus on physical security. In August 2009, TSA completed 159 facility inspections. Critical facility inspections will continue throughout FY 2010 and FY 2011. TSA anticipates completing facility inspections for all 100 pipeline systems in FY 2012.

Pipeline Corporate Security Reviews (CSRs): TSA conducts twelve annual CSRs of the top 100 natural gas and hazardous liquid transmission pipelines and natural gas distribution systems within the United States. This allows the program to revisit a company within the top 100 approximately every five years. Through December 2009, TSA has completed 98 CSRs for companies operating one or more of the essential pipeline systems. In FY 2010, TSA plans to conduct 12 CSRs.. These visits will allow TSA to assess the present status of the company's security efforts and gauge progress from previous reviews.

Stakeholder Collaboration: The TSA Pipeline Security Division, in conjunction with Natural Resources Canada, hosts International Pipeline Security Forums annually. The two day conference enhances government and industry pipeline security domain awareness and provides opportunities for discussion of major pipeline security issues, both domestic and international. Forum events will continue in FY 2010 and FY 2011.

### **Maritime Activities:**

Security Enhancement and Capability Augmentation Program (SEACAP): SEACAP enhances the capability to deter, detect, and prevent explosives from being introduced as a weapon on ferries and at cruise line terminals. SEACAP builds upon existing

technology pilots which provide a platform and programmatic infrastructure for improving current security screening for high capacity maritime passenger vessel operations. In FY 2010, SEACAP will continue to conduct baseline screening assessments and screening deployment exercises. Possible sites for technology deployments in FY 2010 include New Orleans, LA and Bar Harbor, ME. In addition, TSA plans to conduct three to four pilot tests at selected maritime or port facilities in FY 2010 and FY 2011.

Security Training, Operational Readiness and Maritime Community Awareness Program (STORMCAP): Through STORMCAP, TSA develops and disseminates enhanced security training, community awareness products and operational guidance to enhance maritime security. In FY 2009, TSA released the Maritime Screening Guide. In FY 2010, STORMCAP plans to release a training CD-ROM for Crowd Control Techniques, and a training CD-ROM on Anti-hijacking and piracy. TSA will also coordinate and host a series of Explosive Security Seminars for first responders in high-risk ports across the nation. The seminars will present concepts on responding to threats and share regional best practices on an actual event of Improvised Explosive Device/Vehicle Borne Improvised Explosive Device in a port environment. TSA will continue to provide awareness products throughout FY 2011.

#### **Highway and Motor Carrier Activities:**

Highway Corporate Security Reviews: TSA conducts highway modal industry CSRs to establish and reaffirm security baselines. TSA conducts CSRs on states' Departments of Transportation (DOTs) to assess their security posture, security programs, and activities implemented for bridge and tunnel assets. TSA completed CSRs on 47 of the 51 DOTs, and plans to complete the remaining four DOTs by the end of FY 2010. In addition, TSA conducts CSRs of trucking companies, transportation authorities, school districts (buses), and motor coach companies. In FY 2010, TSA plans to continue conducting CSRs of previously unvisited owners and operators of transportation assets, and at critical corporations where revisits are justified by high threat or vulnerability. By FY 2011, TSA plans to complete approximately 200 CSRs on highway transportation organizations. Other sub-modes of the highway sector such as over-the-road buses, school buses, and hazmat trucks may also voluntarily participate in the CSR program with TSA in FY 2011.

Highway Industry Assessments: TSA conducts Highway Industry Assessments of HAZMAT trucking, school buses, general freight, and food and agriculture industries to identify industry best practices, quantify assets, and provide recommendations for increases in security activities and business practices. Through the assessments, TSA increases its awareness of industry security practices and business practices that will be impacted by changes in security awareness, regulation, and program development. In FY 2009, TSA completed an assessment of the school bus industry and began to work on the HAZMAT Trucking, Motor Coach and General Freight Assessments, which it will continue through FY 2010. In FY 2011, TSA is scheduled to complete the motor coach,

food and agriculture, and HAZMAT trucking industry assessments. In addition, in FY 2011, TSA plans to initiate the general freight and aggregate industry reports.

**Stakeholder Collaboration:** TSA coordinates closely with industry stakeholders and is sponsoring a series of regional highway security conferences for Highway and Motor Carriers and infrastructure owners and operators. TSA also participates in the Critical Infrastructure Partnership Advisory Council (CIPAC) meetings that are held with each of the four highway modal industry groups of trucking, motor coach, school bus and infrastructure.

The following chart displays the mitigation activities that TSA has conducted to reduce the risk resulting from threats, vulnerabilities and consequences specific to each transportation mode.

### SURFACE TRANSPORTATION INITIATIVE MATRIX

	Threat, Vulnerability, Consequence	Baseline Standards	Assessments	Close Gaps
<b>Freight Rail</b>	<p>Completed six rail corridor assessments in HTUAs: New Jersey, New Orleans, DC, Houston, Buffalo and Cleveland, Los Angeles on-going, Chicago, Baltimore and Philadelphia planned.</p> <p>Identified TIH rail car standstill time as highest risk potential.</p>	<p>TSA has a goal to reduce the risk of TIH standstill time in HTUAs by 25% each year, beginning in 2007</p> <p>TSA identified 27 focus action items including security awareness training and employee identification</p>	<p>TSA is developing a database driven system to identify specific locations where TIH risk is greatest.</p> <p>TSA inspectors will verify attended/unattended status and proximity to high risk structures. TSA has conducted over 2600 field interviews focused on security awareness and procedures at 151 rail facilities with front line management and other personnel.</p>	<p>TSA issued an NPRM on 12/21/06 to strengthen the security of the rail systems in HTUAs.</p> <p>TSA reached an agreement with the rail industry to reduce the unattended standstill car time in HTUAs beginning in 2007.</p> <p>TSA is developing an IED training course for rail employees.</p>
<b>Mass Transit</b>	<p>100 surface transportation security inspectors (STSI) are conducting field rail and transit assessments.</p> <p>Assessments focus on transit operating procedures and high risk/high consequence assets.</p> <p>FTA has conducted 37 vulnerability assessments since 9/11 and shares information with TSA; G&amp;T has also funded additional assessments.</p>	<p>Developed baseline standards for the industry that are derived from six fundamental principals</p>	<p>TSA has conducted 24 base assessments of passenger rail systems. Goal is completion of 100 largest systems by the end of the year.</p> <p>41 'Transportation Security Fundamentals' self assessments have been completed by the Top 50 transit agencies and the remainder of the Top 50 are due by 1/31/07. Self assessment results will be confirmed by STSIs in follow-up activities.</p>	<p>Focus on high risk/high consequence assets.</p> <p>Partnering with National Laboratories to complete assessments of prioritized list of transit tunnels.</p> <p>Deployed 43 canine teams. By the end of FY 07, will have 56 canine teams deployed to 13 major transit systems.</p> <p>Conducted 25 VIPR exercises.</p> <p>Utilizing IPP grants to drive improvement in six fundamentals of security.</p>
<b>Highway</b>	<p>15 risk assessments of Motor Carriers, including 2 Petrol, 8 TIH, 3 Ammo.</p> <p>Focused on TIH and hazardous materials of concern, including explosives, flammables and other poisonous materials.</p>	<p>TSA is working with chemical companies to develop security standards for TIH and chemicals of concern.</p> <p>The standards will address items such as vehicle standards, attendance, alarm systems, and security route and stop areas.</p>	<p>TSA conducts Highway CSRs and assessments. Assessments are targeted at companies hauling TIH and chemicals of concern.</p> <p>Missouri pilot – State DOT has conducted 950 assessments (5% were HAZMAT carriers)</p> <p>Plan for pilot project on 20 security plan self assessments is nearing field testing with participants solicited in FL, NY, OH, TX.</p>	<p>Currently considering several voluntary incentive programs and regulatory options.</p> <p>Streamlining list of hazardous materials for which a Security Threat Assessment is required.</p>
<b>Pipeline</b>	<p>Identified and ranked high risk pipeline systems based on analysis of total equivalent energy transported.</p> <p>TSA is conducting a pipeline infrastructure study to identify highest risk regions of the nation.</p>	<p>TSA will revise existing pipeline security guidelines in FY07</p> <p>TSA has developed best practices based on Corporate Security Review (CSR) results.</p>	<p>TSA has conducted 58 pipeline CSRs and 4 assessments of cross-border (US-Canada) pipeline systems.</p> <p>8 additional CSRs and 1 cross-border assessment will be accomplished in FY07.</p> <p>TSA uses these CSRs to develop assessments of actual practice versus baseline standards.</p>	<p>Conducted an International Pipeline Security Forum to raise industry security awareness and discuss best practices.</p> <p>Prepared employee security awareness training program for all pipeline industry employees.</p> <p>Conduct site specific visits to evaluate security practices.</p>

<b>2011 Total Request</b>	<b>649</b>	<b>622</b>	<b>97,611</b>
Total Change 2010 to 2011	-	194	29,388

The Transportation Security Administration requests \$97.6 million for FY 2011 to support the Surface Transportation Security Inspection Program (STSIP) and explosive detection canine programs. The increase from FY 2010 of \$29.4 million is for pay annualization and COLA, annualization of the additional 15 Surface VIPR teams and the 100 additional surface transportation security inspectors, and additional funds for explosive detection canine teams.

**PROGRAM DESCRIPTION:**

**Surface Transportation Security Inspection Program (STSIP):**

The STSIP is a unique and critically important federal inspection program with expanding responsibilities in U.S. surface transportation security. With initial emphasis on freight railroads, mass transit and passenger rail, the STSIP has set out to enhance security preparedness in an industry that is the largest transporter of passengers in the country.

The following chart provides historical and current information on the total number of Surface, Aviation, and Cargo Transportation Security Inspectors (TSIs) across TSA.

## TSA Inspectors

	Full-Time Permanent Positions					
	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
TSI - Aviation Domestic	681	657	778	755	755	1030 <sup>1</sup>
TSI - Aviation Int'l	39	39	45	45	45	45
<b>Total, Aviation Inspectors</b>	<b>720</b>	<b>696</b>	<b>823</b>	<b>800</b>	<b>800</b>	<b>1075</b>

<b>TOTAL</b>	<b>1,047</b>	<b>1,121</b>	<b>1,558</b>	<b>1,585</b>	<b>1,849</b>	<b>2,124</b>

*1/ Increase of 275 inspectors/canine handlers in support of additional proprietary teams*

*2/ Increase of 50 inspectors in P.L. 111-83, conversion of 35 legacy canine teams to proprietary canine teams*

*3/ Increase of 100 inspectors in P.L. 111-83; Increase of 79 inspectors for the 15 additional VIPR teams*

Surface Transportation Security Inspectors (TSI-Ss) are deployed through a risk-based approach and provide coverage of key passenger rail and mass transit rail facilities in their regions, as well as 61 High Threat Urban Areas (HTUAs), as defined by DHS. The location and number of inspectors is also determined by transit ridership, proximity to Toxic Inhalation Hazard (TIH) shipment locations (freight rail), critical infrastructure ratings, and HTUA ranking. TSI-S personnel continue to provide stakeholder liaison functions, situational awareness of security conditions and, during surface transportation incidents, convey valuable first-hand information to Federal Security Directors (FSDs), security, policy and intelligence offices, and TSA leadership.

The legislation underlying 49 CFR, provides TSA's Surface Inspectors with regulatory authority to ensure a secure chain of custody of security-sensitive material rail cars occurs between rail carriers and shippers/receivers at points of origin, delivery, and interchange. It also requires the designation of a rail security coordinator (RSC) by freight and passenger railroad carriers, rail transit systems, and certain hazardous materials facilities. TSA Surface Inspectors will verify the paperwork at the covered facilities to ensure compliance, including reporting requirements for incidents, potential threats, and significant security concerns, and location tracking requirements.

In addition, TSI-Ss are responsible for:

- Conducting threat and vulnerability inspections, reviews, and assessments which are used to determine the capability of a potentially targeted transportation system/asset to reduce the risk from a specified threat;
- Conducting Security Action Item (SAI) assessments for railcars carrying TIH materials and shippers;

- Serving as panel members on the Transit Security Grant Program (TSGP) to review project proposals, assess grant applications, and assist in developing a process for awarding grants;
- Providing Terrorist Activity Recognition and Reaction (TARR) training to public transit entities;
- Responding to surface transportation security incidents (i.e. train derailments, possible improvised explosive devices (IED), major truck accidents, etc.) to gather real-time, on-scene information;
- Responding to natural disaster incidents to assist surface transportation entities in their recovery efforts and provide FSDs with localized, surface transportation specific information/updates from these catastrophic events;
- Staffing transit agency and freight rail operations centers in times of increased threat, heightened alert, or during a catastrophic event; and
- Planning and participating in TSA Visible Intermodal Prevention and Response (VIPR) deployments, on an increasing scale.

Assessments and Inspections: Upon the issuance of the rail and mass transit regulation under 49 CFR 1580, Surface Transportation Security Inspectors will conduct compliance inspections throughout the rail and mass transit domain. In FY 2009, TSI-Ss completed 119 compliance inspections. The STSI program office anticipates 700 inspections will be completed in FY 2010, with up to an additional 1,000 in FY2011. The increase of 100 new inspectors in FY 2010 increases the number of inspections to be conducted in FY 2011.

In 2009, the STSIP expanded its assessment and inspection activities in the field to include highway and motor carriers and completed 54 CSRs. In FY 2010, the STSI program plans to complete over 200 additional CSRs, with an additional 1,400-1,500 in FY 2011. Transportation Security Network Management (TSNM) anticipates that it will issue two regulations in FY 2011, which will include regulatory compliance requirements to take effect in FY 2012.

Baseline Assessment for Security Enhancement (BASE) Program: The STSI program works in conjunction with the Federal Transit Administration (FTA) as part of the Baseline Assessment for Security Enhancement (BASE) Program. The STSI program conducted 78 BASE reviews, of which 48 were on the Nation's top 50 Mass Transit Systems. In FY 2010, the STSI program office anticipates completing the BASE reviews on the top 51-100 transit agencies, as well as conducting revisit (re-bases) reviews on agencies originally reviewed in FY 2008. In FY 2011, the STSI program office plans to conduct BASE reviews on the top 1-50 transit agencies, and conduct the revisit reviews for those agencies reviewed in FY 2009. Additionally, TSA anticipates the TSGP will require a BASE to be completed as a prerequisite for any federal transit grant awards.

High Threat Urban Area (HTUA) Vulnerability Assessments: STSI personnel act as team leads on a team composed of Federal, State, and industry subject matter experts to conduct risk assessments of selected High Threat Urban Area (HTUA) rail corridors.

On-site assessments consist of a detailed examination of the railroad(s) operations and procedures within the HTUA. Assessments lead to security enhancements and mitigation strategies to address the handling and protection of Toxic Inhalation Hazards (TIH) rail shipments through the HTUA. In FY 2011, the STSI program office anticipates a complete review of the original 46 HTUAs. Inspections will continue in FY 2010 and FY 2011.

Station Criticality Assessments (SCA): TSI-Ss have conducted SCAs, which are an in-depth assessment of critical infrastructure facilities and transit stations since 2006. SCAs have gained importance with the recent terrorist attacks in Sri Lanka and Mumbai, India, as well as the expansion of the Visible Intermodal Prevention and Response (VIPR) initiative. The assessments provide detailed information on a variety of station related intelligence, such as the locations of exits, telephones, electrical power, station managers, etc. The information has been extremely useful in VIPR planning, and is also relevant for first responders, intelligence planners and security personnel.

Security Analysis and Action Program (SAAP): When conducting assessments, TSI-Ss provide a systematic examination of a regulated party's transportation operations. The purpose of the evaluation is to gather information, complete a full risk assessment to include threat, vulnerability, and consequence, identify best practices, and benchmark transportation security operations against established security guidelines and recommendations. In particular, evaluations:

- Provide regulated parties with an objective view of possible security gaps and vulnerabilities in order to better manage risk of terrorist attack;
- Identify new security innovations and best practices;
- Determine whether transportation security activities and related programs comport with TSA identified smart practices; and
- Assess whether the measures implemented are suitable to achieve overall security objectives.

Analyses may include participants from other federal agencies, state and local authorities, and/or private stakeholders as appropriate. In the future, the STSI program plans to increase the use of a risk-based methodology in the mass transit and rail domain through the deployment of an automated risk assessment tool (under development).

### Surface Transportation Security Inspection Program Summary

Program Component	Description & Transportation Mode	FY 2011 Estimate of Assessments / Inspections
Assessments and Inspections	Compliance Inspections in Rail and Mass Transit Modes	1000
	Comprehensive CSRs for Highway and Motor Carriers	1400
Baseline Assessment for Security Enhancement (BASE) Program	Assessments of Mass Transit Systems	128
High Threat Urban Area (HTUA) Vulnerability Assessments	Risk Assessments of HTUA Rail Corridors.	46
Station Criticality Assessments (SCA)	In-depth assessment of critical infrastructure facilities and transit stations. This includes locations of exits, telephones, electrical power, station managers, etc.	125
Security Analysis & Action Program (SAAP)	Systematic examination of a regulated party's transportation operations. This includes completing a full risk assessment to include threat, vulnerability, and consequences; best practices; and benchmark transportation security operations against established security guidelines and recommendations.	This program is under revision and will be replaced with an automated risk assessment methodology

#### **Toxic Inhalation Hazard Transportation (TIH) Risk Reduction:**

TSA, in conjunction with the private sector, has also developed a list of 24 Security Action Items (SAIs) and three Supplemental Security Action Items (SSAIs). These security guidelines identified best practices, which freight railroads and their employees should implement to reduce the risk associated with the transportation of toxic inhalation hazard (TIH) materials.

TSA conducted 3,151 TIH Security Surveys in FY 2009. In FY 2010, 3,200 surveys are planned, and 4,000 surveys are planned in FY 2011.

TSA also conducts Rail Corridor Assessments (RCAs), which focus on assessing the vulnerabilities of high-population areas where TIH materials are moved by rail in significant quantities. The RCAs provide site-specific mitigation strategies and lessons learned, and supported the development of the SAIs. These vulnerability assessments have also led to the implementation of a TIH Risk Reduction Project. Implemented in 2007, the Project focuses on objectively measuring the risk reduction associated with the rail transportation of TIH materials through 46 High Threat Urban Areas. As of October

2009, the objectively-measured risk has been reduced 80 percent as compared to the base measurement year (2006). The agency will continue to measure the ongoing risk associated with the movement of TIH shipments by rail, with the goal of a 10 percent risk reduction over the previous year.

TSA plans to conduct a minimum of 23 Rail Corridor Assessments, which take approximately 4-6 weeks to complete, depending on the HTUA and complexity of the railroad operations within the corridor.

### **Visible Intermodal Prevention and Response (VIPR):**

The objective of VIPR deployments in mass transit and passenger rail systems is to augment capabilities that disrupt and deter potential terrorist activity and is most effectively advanced through periodic random deployments, unpredictably executed in timing, location, and types of activities. The nature of the activities and their unpredictability are essential to their deterrent effect as they maintain a dynamic and changing security program that will disrupt any observation, reconnaissance, and/or planning activities, thus precluding the detection and exploitation of patterns in security measures.

VIPR operations teams consist of TSA personnel that may include Transportation Security Inspectors (TSIs), Transportation Security Officers (TSOs), Federal Air Marshals (FAMs), Behavioral Detection Officers (BDOs), Bomb Appraisal Officers (BAOs), Explosives Detection Canine teams, and Federal, state and local law enforcement officers. Uniformed VIPR team members provide a visible and official security presence apparent to all who use or are observing the mass transit or passenger rail system. VIPR activities bolster the system's efforts to prevent an adversary from orienting on and breaching a pattern in security activities. TSA partners with the transit agency's security professionals to provide parameters for visible anti-terrorism security activities.

As a result of additional resources and an increased federal, state and local stakeholder awareness of, and commitment to VIPR deployments, the total number of VIPR deployments has increased from four to five per week in 2007 to approximately 40 to 50 per week in 2009. In Fiscal Year 2009, TSA conducted 1,498 Surface VIPR operations, accounting for 55 percent of the total number of operations. Of the Surface operations, 1,047 were conducted in mass transit and passenger rail properties.

In FY 2010, TSA plans to provide additional emphasis on surface deployments and achieve a nationwide deployment footprint for Surface VIPR operations by creating 15 new dedicated Surface VIPR Teams across the Nation.

The FY 2011 request annualizes the FY 2010 funding TSA received for the 15 new VIPR teams, which includes 323 FTP/310 FTE, 79 of which are TSI-S positions.

**National Explosive Detection Canine Team Program (NEDCTP):**

The NEDCTP supports the Nation’s largest passenger transportation systems in mass transit and, in FY 2009, expanded into the maritime domain (ferry systems). This program in partnership with State and local law enforcement agencies fulfills the need to provide effective, low-cost security measures within the mass transit/commuter rail sector. These full-time teams are highly effective, rapidly deployable, and critical to the ability of the Nation’s largest passenger transportation systems to preempt terrorist attacks by deterring, detecting, and preventing explosives from being introduced as weapons.

Through cooperative agreements, TSA provides funding for training, certification and maintenance of the explosive detection capable canines, training for the handlers, and partial reimbursement of handlers’ salaries and other costs. Reimbursement in FY 2010 and previous fiscal years was \$40,000 per team. The FY 2011 request seeks to increase the current stipend TSA provides by approximately \$10,500. This proposed enhancement is necessary to more appropriately distribute the escalating inflationary and operational costs borne by NEDTCP participants, particularly since the current stipend level has remained unchanged since 1997. Local law enforcement agencies deploy these valuable canine teams and provide DHS with a mobile response platform for specific threats to the transportation systems.

At the end of FY 2009, TSA had funded 750 teams in the Aviation and Mass Transit sectors. Of the 750 teams, 99 support Mass Transit Systems/Maritime. The NEDCTP program executed 18 cooperative agreements for TSA certified Explosives Detection Teams for mass transit.

<b>Projected FY 2011 Funded Canine Teams</b>					
<b>Funding Source</b>	<b>Legacy Aviation</b>	<b>Proprietary OSO</b>	<b>FAM</b>	<b>Mass Transit</b>	<b>Total</b>
<b>Base Funding</b>	473	23	22	117	635
<b>Supplemental</b>	50	120			170
<b>FY 2011 Enhancement</b>		275			275
<b>Total</b>	<b>523</b>	<b>418</b>	<b>22</b>	<b>117</b>	<b>1080</b>

*\*\*Due to personnel needs, 1 FTE for the FAM Proprietary Teams is used to help manage the program.\*\**

In FY 2010, the program anticipates increased participation and plans to reach optimal budgeted team levels of 117 for Mass Transit.

In FY 2011, the NEDCTP anticipates the budgeted team levels to remain at 117.

## IV. Program Justification Changes

**Department of Homeland Security  
Transportation Security Administration  
Surface Transportation Security:  
Staffing and operations  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 1:** Reduce General Expenses for TSNM and TSOC  
PPA: Staffing and operations  
Program Decrease: Positions 0.0 FTE 0.0 Dollars \$-2695.0

### Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	42,642
Program Decrease							-	-	(2,695)
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>39,947</b>

### Description of Item

Transportation Security Network Management (TSNM) and Transportation Security Operations (TSOC) is responsible for coordinating security efforts in non-aviation modes which includes mass transit, rail, pipelines, maritime, highway and motor carrier, and postal and shipping sectors.

### Justification

TSA identified efficiencies to support other critical operations in FY 2011. In order to sustain effective security operations, TSA will reduce the general expenses by \$2.7 million from TSNM and TSOC.

### Impact on Performance (Relationship of Increase to Strategic Goals)

This reduction will result in TSNM and TSOC streamlining general expenses within program operations.

**Department of Homeland Security  
Transportation Security Administration  
Surface Transportation Security:  
Rail Security Inspectors and Canines  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Increase in NEDCTP Stipend Funds  
PPA: Rail Security Inspectors and Canines  
Program Increase: Positions 0.0 FTE 0.0 Dollars \$1280.0

Funding Profile

Program Increase							-	-	1,280
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>6,280</b>

**Description of Item**

The National Explosive Canine Detection Program (NEDCTP) supports the Nation’s largest passenger transportation systems in mass transit. This program in partnership with State and local law enforcement agencies fulfills the need to provide effective, low-cost security measures within the mass transit/commuter rail sector.

**Justification**

The increase of \$1.3 million for the NEDCTP program is to provide a stipend increase of \$10,500 to each team.

**Impact on Performance (Relationship of Increase to Strategic Goals):**

This increase will allow the explosive detection canine teams to be more highly effective and more rapidly deployable, increasing the ability of the Nation’s largest passenger transportation systems to preempt terrorist attacks by deterring, detecting, and preventing explosives from being introduced as weapons.

**Department of Homeland Security  
Transportation Security Administration

Program Decrease							-	-	(2,179)
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>96,331</b>

**Description of Item**

TSA employs inspectors and assists State and local law enforcement agencies through the canine program, to assess compliance, national program delivery, and provide outreach on security assets in the surface transportation system. The Office of Security Operations (OSO) Inspection program is a unique and critically important federal inspection program with expanding responsibilities in the U.S. surface transportation security. The National Explosive Detection Canine Team Program (NEDTCP) supports the Nation’s largest transportation systems in mass transit and maritime to fulfill the need to provide effective, low-cost security measures through the use of the canine teams.

**Justification**

TSA identified efficiencies to support other critical operations in FY 2011. In order to sustain effective security operations, TSA will reduce the general operating expenses of OSO and NEDCTP by \$2.2 million.

**Impact on Performance (Relationship of Increase to Strategic Goals)**: This reduction will result in OSO and NEDCTP streamlining general expenses within program operations.

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
Transportation Security Administration  
Justification of Proposed Changes in Surface Transportation Security  
Appropriation Language**

For necessary expenses of the Transportation Security Administration related to providing surface transportation security activities, [\$128,461,000] **\$137,558,000** to remain available until September 30, [2011] **2012**. (Department of Homeland Security Appropriations Act, 2011.)

**Explanation of Changes:**

No substantive changes proposed.

### PPA Mission Statement

Surface Transportation Security Operations and Staffing is charged with managing TSA's efforts to mitigate the risk and provide security direction to all non-aviation transportation systems. This responsibility covers rail, mass transit, highways, buses, trucking, ferries, and pipelines. The Surface Transportation Security Operations and Staffing office also works with industry, State and local governments, and other Federal agencies in developing standards and regulations to ensure the security of these vital transportation systems.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>11.1 Total FTE &amp; personnel compensation</b>	<b>15,107</b>	<b>17,548</b>	<b>17,797</b>	<b>249</b>

The FY 2011 increase reflects pay annualization and COLA.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>12.1 Civilian personnel benefits</b>	<b>4,262</b>	<b>6,490</b>	<b>6,590</b>	<b>100</b>

The FY 2011 increase reflects pay annualization and COLA.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>21.0 Travel and transportation of persons</b>	<b>1,121</b>	<b>1,644</b>	<b>1,701</b>	<b>57</b>

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2011 request includes an increase in travel to continue to coordinate security efforts in non-aviation modes.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>23.3 Communications utilities and miscellaneous charges</b>	<b>106</b>	<b>127</b>	<b>127</b>	<b>-</b>

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. PDA and cell phone air time are the major items being charged to this object class.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>24.0 Printing and reproduction</b>	<b>4</b>	<b>29</b>	<b>31</b>	<b>2</b>

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2011 request includes a slight increase of \$2,000 to sustain current services.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.2 Other services</b>	<b>17,836</b>	<b>15,962</b>	<b>13,154</b>	<b>(2,808)</b>

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The funds will be used to support security efforts in non-aviation modes including Pipelines, Maritime, Mass Transit, Rail, Highway and Motor Carrier and Postal and Shipping. The FY 2011 reduction of \$2,808,000 represents a decrease in general expenses for TSNM and TSOC.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.3 Purchases of goods &amp; svcs. from Gov't accounts</b>	<b>-</b>	<b>128</b>	<b>142</b>	<b>14</b>

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The funds will be used to support partnership activities with other government agencies. The FY 2011 request includes a slight increase of \$14,000 to continue to sustain current services.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>26.0 Supplies and materials</b>	<b>167</b>	<b>365</b>	<b>405</b>	<b>40</b>

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. This PPA will use these funds to acquire office supplies, education materials, training materials and any other supplies and materials. The FY 2011 request includes an increase of \$40,000.

## BUDGET REQUEST AND SUPPORTING INFORMATION

### Transportation Threat Assessment & Credentialing:

## I. Appropriation Overview

### A – Mission Statement for Transportation Threat Assessment & Credentialing:

The mission statement for this program is, “to reduce the probability of a successful terrorist or other criminal attack to the transportation system through application of threat assessment methodologies that are intended to identify known or suspected terrorist threats working or seeking access to the Nation’s transportation system.”

This appropriation supports compliance with:

- National Strategy for Homeland Security,
- USA PATRIOT ACT of 2001 (P.L. 107-56),
- Aviation Transportation Security Act of 2001 (P.L. 107-71),
- Maritime Transportation Security Act of 2002 (P.L. 107-295),
- Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176),
- Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-408), and
- 9/11 Commission Act of 2007 (P.L. 110-53).

These laws provide direction to the Federal Government to protect homeland security, placing special emphasis on deterrence, prevention, interdiction of threats, aggression, and unlawful acts directed toward the United States. The Homeland Security Presidential Directive-11 (HSPD-11), issued August 27, 2004, directed the Department of Homeland Security (DHS), in coordination with other Federal agencies, to “enhance terrorist-related threat assessment through comprehensive, coordinated procedures.”

The objective of HSPD-11 is to more effectively detect and interdict individuals known to engage in terrorist activities or those who are reasonably suspected to be doing so, or who have been engaged in terrorist activities. To that end, the broad range of existing government and private sector security measures and initiatives will be augmented by a comprehensive, coordinated and integrated threat assessment environment. Implementation of HSPD-11 must facilitate the efficient movement of people, cargo, and conveyances and minimize any negative impacts on related activities. The Presidential Directive requires that these goals be achieved without compromising personal or institutional privacy and with due respect for other rights and freedoms quintessential to the American way of life.

TSA supports this directive by consolidating the management of all vetting and credentialing programs within the Office of Transportation Threat Assessment and Credentialing (TTAC). The Office of TTAC manages the following screening programs: Secure Flight, Transportation Worker Identification Credential (TWIC), Hazardous Materials Commercial Driver’s License Endorsement Threat Assessment Program (HTAP), Alien Flight Student Program (AFSP), and [*Crew and*] Other Vetting Programs.

This appropriation also includes other fee-funded vetting programs, two of which were realigned from Aviation Security in the FY 2010 appropriation. These programs include:

- General Aviation at Ronald Reagan National Airport (previously in Aviation Security)
- Indirect Air Cargo (previously in Aviation Security)
- Certified Cargo Screening Program
- Large Aircraft Security Program
- Secure Identification Display Area (FBI Criminal History Record Check (CHRC) only)
- Other Security Threat Assessments to include Private Charter Standard Security Program (PCSSP); Twelve-Five Standard Security Program (TFSSP); and Maryland Three Program (FBI CHRCs only)
- Sensitive Security Information (SSI)

All programs that comprise this appropriation are designed to enhance security for many components of the transportation sector (air, land, sea); and much of the risk-analysis being performed is scalable for use in other sectors of this dynamic network.

TSA's vetting responsibilities have grown significantly in recent years and TSA has responded with the development and implementation of efficient, reliable, and cost-effective terrorist-related screening programs. TTAC currently vets and adjudicates approximately 400,000 cases a week by reviewing and assessing biographic information, and close to 25,000 cases a week based on biometric checks against criminal databases. Additionally, TTAC perpetually vets over 7 million people per day, adjudicates over 12,000 cases per week and responds to over 750 redress requests a week.

## **B – Budget Activities:**

### Secure Flight

This program moves airline passenger watch list matching, currently conducted by the airline industry, into one program managed and operated by the Federal government. This consolidation meets the provisions outlined in the Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-458) and the recommendations of the 9/11 Commission. For the purpose of preventing terrorists from boarding an aircraft or accessing the sterile area of the airport, the Secure Flight program uses an automated process to match Secure Flight Passenger Data (SFPD) against records contained in the No-Fly and Selectee portions of the Terrorist Screening Database (TSDB). Initially, the Secure Flight program concentrated on airline passengers traveling on domestic flights within the U.S. and its territories. U.S. Customs and Border Protection (CBP) currently conducts watch list matching for passengers flying into and out of the U.S. through its Advance Passenger Information System (APIS). Per the Secure Flight Final Rule (effective December 29, 2008), both programs will work towards a transition plan for these international flights to be screened through the Secure Flight program and to ensure that domestic and international watch list matching is consistent and uniformly effective.

Secure Flight began program implementation with the first domestic aircraft operator on January 27, 2009. Secure Flight will gradually phase-in additional air carriers until all domestic and international flights (into or out of the U.S.) process passenger data against the TSDB. When fully implemented, Secure Flight will screen more than 2.5 million passengers daily.

#### Transportation Worker Identification Credential (TWIC)

TWIC establishes an integrated, credential-based, identity verification program through the use of biometric technology. In order to gain unescorted access to the secure areas of U.S. ports, transportation workers are required to undergo a satisfactory security background check before they are issued a TWIC card. The TWIC card is intended to work as an integrated part of any existing or newly-developed access control system deployed by the transportation sectors. TSA conducted a prototype of the TWIC program at 28 port sites primarily focused in three geographic areas (Los Angeles and Long Beach, California; Wilmington, Delaware and Philadelphia, Pennsylvania; and Florida). The Prototype Phase concluded in June 2005, with sustained Prototype operations for a limited number of sites through March 2006. TSA and United States Coast Guard (USCG) have considered the lessons learned during Prototype in developing the TWIC process model and in writing the Notice of Proposed Rulemaking (NPRM) and Final Rule, which was issued on January 25, 2007. The TWIC enrollment process began in October 2007 and within 22 months, TSA enrolled more than 1.3 million workers, including longshoremen, truckers, and port employees who require access into secure areas of U.S. ports. On April 15, 2009, USCG began enforcing the TWIC requirement for workers who need unescorted access to secure areas of U.S. ports. Operational costs of the program are entirely funded from fee revenue.

#### Hazardous Materials Endorsement Threat Assessment Program (HTAP)

The USA PATRIOT Act prohibits states from issuing a license to transport hazardous materials (hazmat) in commerce unless a determination has been made that the individual does not pose a security risk (49 U.S.C. § 5103a). The Act further requires that this risk assessment include checks of criminal history records, legal status, and relevant intelligence databases. TSA implemented the HTAP to meet this mandate and conducts a security threat assessment on anyone applying to obtain, renew, or transfer a hazardous materials endorsement (HME) on their state-issued commercial drivers license (CDL). The TSA security threat assessment (STA) includes a fingerprint-based criminal history records check (CHRC), a legal status check, and checks for ties to terrorism. The program also fulfills statutory requirements under the Safe Explosives Act. Operational since January 31, 2005, the program has enrolled more than 1.3 million drivers and is entirely funded by fee revenue.

#### Alien Flight Student Program (AFSP)

Established under the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176), AFSP reviews and assesses biographic and biometric information of non-U.S. citizens or any other individual (specified by the Secretary of Homeland Security) applying for training in the operation of any aircraft (having a maximum certificated takeoff weight of more than 12,500 pounds) at both domestic and international Federal

Aviation Administration (FAA) certified flight schools. These persons are subject to an STA based on background and terrorist-based checks. Since its transfer to TSA from the Federal Bureau of Investigation (FBI) in July 2004, this program was expanded to conduct background checks of non-U.S citizens seeking flight training in aircraft weighing under 12,500. This action was taken to mitigate a critical security weakness in the legislation. On April 13, 2009, a notice in the Federal Register was published, allowing TSA the authority to charge a fee to recurrent flight school students for security threat assessments conducted by the agency.

#### [Crew and] Other Vetting

This activity incorporates personnel and operational cost of vetting operations that are not a part of any of the programs described above, as well as TTAC administrative costs, such as the vetting infrastructure and other related information technology costs. These initiatives include:

- Aviation Credential Interoperability Solution (ACIS) to establish biometric identification
- Aviation Workers (AW) vetting including Secure Identification Area (SIDA) and other airport badge holders Crew Vetting Program (CVP)
- Other Aviation Vetting Programs including DCA Access Standard Security Program (DASSP); Private Charter Standard Security Program (PCSSP); Twelve-Five Standard Security Program (TFSSP); Maryland Three Program and Airspace Waivers (ASW)
- FAA/Airmen Certificate Vetting (through reimbursable agreement)
- Vetting Modernization

#### Other Vetting Fees

This category incorporates new and existing fees that were shifted from the Aviation Security and Transportation Security Support appropriations to the TTAC appropriation. These fee programs provide revenue to fund STA's and program/system functionality. These initiatives include:

- General Aviation at Ronald Reagan National Airport
- Indirect Air Cargo
- Certified Cargo Screening Program
- Large Aircraft Security Program
- Secure Identification Display Area (FBI CHRCs only)
- Other Security Threat Assessments to include Private Charter Standard Security Program (PCSSP); Twelve-Five Standard Security Program (TFSSP); and Maryland Three Program (FBI CHRCs only)
- Sensitive Security Information (SSI)

**C – Budget Request Summary:**

For FY 2011, the Transportation Security Administration requests 226 positions, 216 FTE, and \$173,724,000 in appropriated funding; and 47 positions, 46 FTE, and \$37,220,000 in discretionary fee collections. Also included in this appropriation are 6 positions, 6 FTE, and \$4,000,000 in mandatory fee collections. The total adjustments-to-base include 10 FTE and \$1,725,000 in appropriated funding; and \$6,400,000 decrease in fee estimates.

## II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

<b>2011 Current Services</b>	<b>113</b>	<b>108</b>	<b>84,637</b>
<b>2011 Total Request</b>	<b>113</b>	<b>108</b>	<b>84,637</b>
Total Change 2010 to 2011	-	-	274

TSA requests \$84.6 million for the Secure Flight program, which includes an increase of \$274,000 for pay inflation.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Secure Flight's mission is to enhance the security of domestic and international commercial air travel in the United States through the use of improved watch list matching. The program's goals are to:

- Identify known and suspected terrorists;
- Prevent individuals on the No Fly List from boarding an aircraft;
- Provide enhanced screening of individuals on the Selectee List to determine if they are permitted to board an aircraft;
- Facilitate passenger air travel; and
- Protect individuals' privacy.

Transitioning watch list matching to TSA raises the baseline standard of the technology and automation used in the watch list matching process. Secure Flight streamlines the process and makes watch list matching more consistent through the consolidation of this responsibility. This also limits the distribution of the watch list, thereby minimizing the possibility for compromised watch list data. By bringing the watch list matching function into the Federal government, the DHS Traveler Redress Inquiry Program (TRIP) is able

to provide a more consistent application of an integrated redress process for passengers who believe they have been misidentified as a threat. Further, the Secure Flight program expedites law enforcement notification by reducing the time it takes to identify potential matches – from days to minutes.

TSA is committed to engaging the individuals and organizations that will be affected by the Secure Flight program. TSA has adopted a strong security partner engagement approach that includes interactively communicating with key stakeholders, working closely with airlines through the deployment process, and providing materials for public awareness and education.

To date, Secure Flight has achieved the following accomplishments:

- The Secretary of Homeland Security certified on September 24, 2008 that the TSA Secure Flight Program had completed the 10 requirements set forth in Section 522(a) of the *DHS Appropriations Act, 2005* (P.L. 108-334). The Government Accountability Office (GAO) audited the Secure Flight program and briefed majority and minority staff of the House Senate Appropriations Subcommittees on Homeland Security, affirming that TSA has satisfied the critical issues and other conditions in order to begin initial operations.
- The Secure Flight Final Rule was published on October 28, 2008 and became effective on December 29, 2008.
- The proposed Secure Flight changes to the Aircraft Operator Standard Security Program and the Model Security Program were posted on November 7, 2008.
- Parallel testing with three aircraft operators was completed in December 2008 and the system was ready for initial operational capability on January 15, 2009.
- Secure flight received system accreditation and Authority to Operate (ATO) on January 7, 2009.
- The Secure Flight program received Acquisition Review Board approvals at both TSA and DHS for initial operating capability (IOC) and full operating capability (FOC). These approvals through business investment and enterprise architecture reviews gave the program the required approvals to begin production operations with aircraft operators.
- Secure Flight began an initial implementation with volunteer, domestic airlines on January 27, 2009 and was approved for a phase-in implementation of all domestic airlines by DHS in July 2009. A phased-in implementation of international carriers began in October 2009.
- On August 15, 2009, all airlines began collecting domestic passengers' full names as on government-issued IDs, dates of birth and gender at the time of reservation.

At the current service level of \$84.6 million, the Secure Flight program will:

- Continue the roll-out of the Secure Flight program.
- Complete the full implementation slated by CY 2010, with passengers on all covered flights being vetted by the end of CY 2010.

The most significant factor that poses a challenge to the program in meeting scheduled completion dates is the ability of aircraft operators to complete the required technical and operational changes. Presently, TSA remains on track to meet key Secure Flight milestones and remains committed to the implementation schedule.

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>77</b>	<b>77</b>	<b>36,175</b>
<b>2010 Enacted</b>	<b>113</b>	<b>98</b>	<b>87,636</b>
2011 Adjustments-to-Base	-	10	1,451
<b>2011 Current Services</b>	<b>113</b>	<b>108</b>	<b>89,087</b>
<b>2011 Total Request</b>	<b>113</b>	<b>108</b>	<b>89,087</b>
Total Change 2010 to 2011	-	10	1,451

The Transportation Security Administration requests \$89.1 million to provide funding for the [*Crew and*] Other Vetting Programs. This includes an increase of 10 FTE and \$1.3 million to annualize the additional personnel provided in FY 2010 to support vetting infrastructure improvements as well as \$200,000 for pay increase/COLA.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This PPA will provide funding for the administrative and operational needs of the following activities:

<b>[<i>Crew and</i>] Other Vetting Funding (in millions)</b>	<b>FY 2010</b>	<b>FY 2011</b>
Aviation Credential Interoperability Solution <sup>1</sup>	1.9	1.9
Aviation Workers <sup>2</sup>	4.3	4.3
Crew Vetting Program	6.7	6.7
Other Aviation Vetting Programs <sup>2</sup>	0.4	0.4
Admin and Operations <sup>1</sup>	10.6	10.7
Infrastructure Modernization <sup>1</sup>	63.7	65.1
<b>Total</b>	<b>87.6</b>	<b>89.1</b>

<sup>1</sup> Includes annualized 9/11 Act funding in base

<sup>2</sup> Reference description write-ups below for programs included

**Aviation Credential Interoperability Solution (ACIS)** – This initiative is envisioned to lay the foundation for a common, secure biometric identity solution for the aviation community. TSA is continuing development of ACIS concepts around biometrics for the airport industry and facilitating airport implementation of biometric technologies.

**Aviation Workers (AW) vetting (including SIDA and other badge holders):** The AW Program includes those individuals who apply for, or are issued, personnel identification media at U.S. domestic airports. Prior to receiving any identification media, aviation workers must undergo a successful name-based STA, and if applicable, a Criminal History Records Check (CHRC). The program reviews approximately 450,000 aviation workers annually.

**Crew Vetting Program (CVP):** CVP screens flight crewmembers on domestic and international flights flying into, out of, or over the continental United States prior to an airport's release of an aircraft for takeoff. Flight crewmembers undergo a name-based STA to determine if they have a terrorist nexus and, if so, TSA would notify the air carrier that the individual cannot have access to United States airspace. The program reviews approximately 2,000,000 flight crewmembers annually.

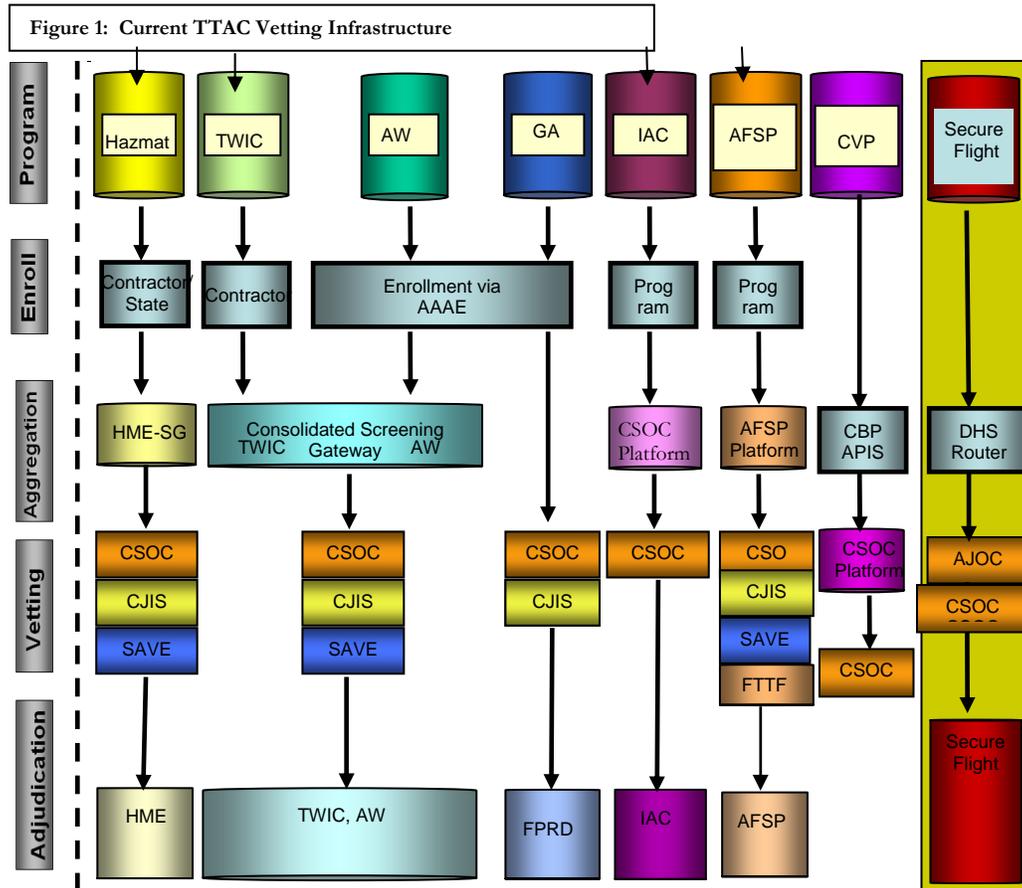

**Other Aviation Vetting Programs:** Other Aviation Vetting Programs includes DCA Access Standard Security Program (DASSP); Private Charter Standard Security Program (PCSSP); Twelve-Five Standard Security Program (TFSSP); Maryland Three Airports Program, and Airspace waivers program. These programs all require a name-based security threat assessment. Some also require a fingerprint based CHRC. These programs collectively review approximately 156,000 crew members, pilots and waiver applicants annually.

**Administration and Operations (A&O):** This A&O breakout includes the administrative general expenses for TTAC. It also includes all payroll costs for administrative staff and the programs that fall under Other Vetting, excluding the Infrastructure Modernization. The Infrastructure Modernization payroll costs are included within the TIM sub-group.

**TTAC Infrastructure Modernization (TIM):** The TIM program will deliver a unified and scalable enterprise architecture to improve vetting and credentialing services to current and future TSA screening populations. The program will reduce the cost, risk, and time associated with implementing new business capabilities, on-boarding new populations, while improving the robust nature of the architecture, and on-going operations and maintenance services. Also, the TIM program will eliminate redundant background checks by working in tandem with TSA's Universal Fee Rule (UFR) initiative.

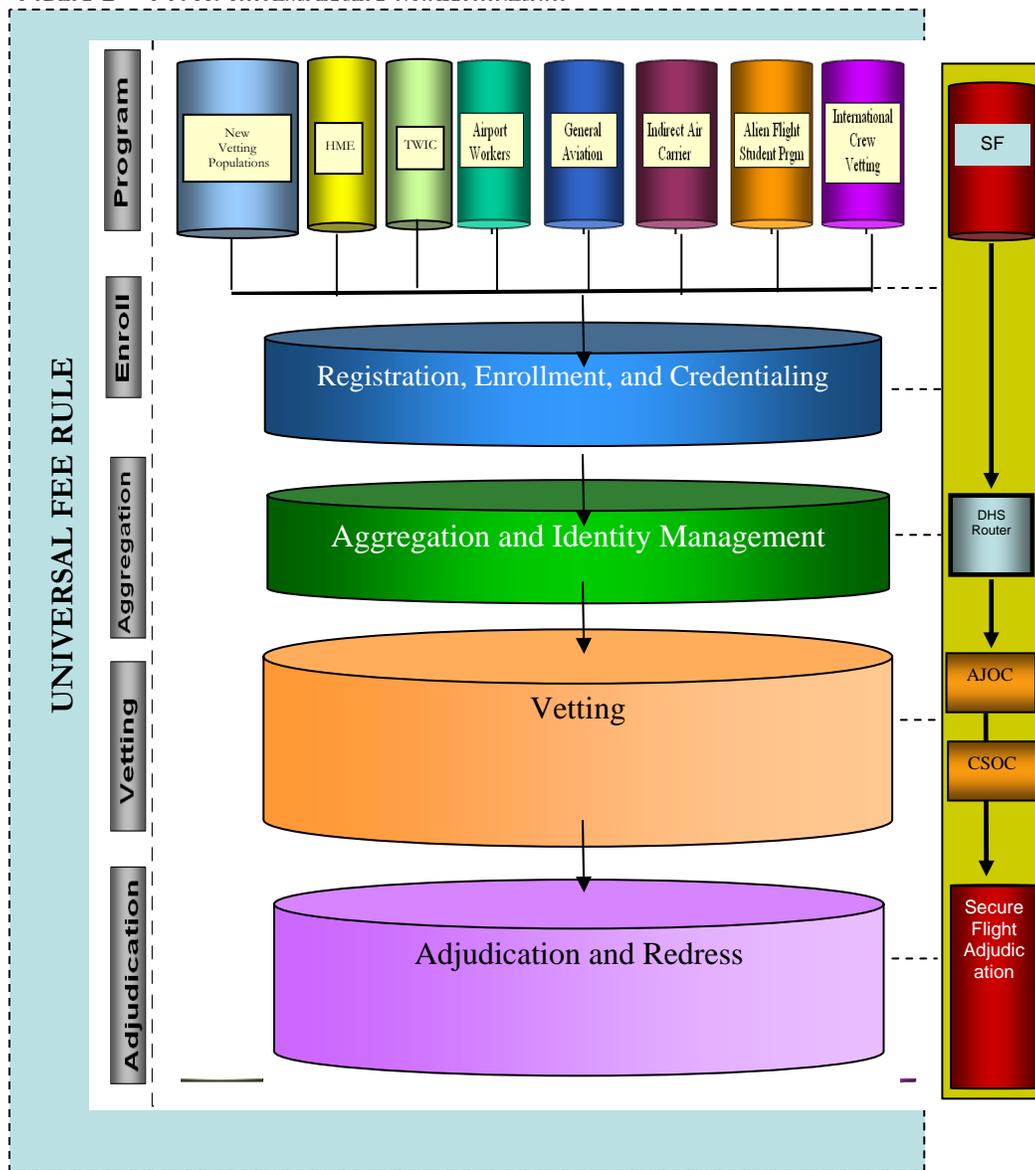

In the past, TSA's vetting programs were quickly implemented to support statutory requirements to respond to screening related security threats. As a result, four years later, TSA is now reliant on multiple implementations of disparate architectures and business

processes developed to support what was then viewed as the unique attributes of individual threat assessment programs (see figure 1 below).

The TIM program will enable policy, business, systems and data integration and drive the development of a person-centric information architecture in accordance with the DHS Credentialing Framework Initiative (CFI). This will be accomplished by consolidating enrollments, identity management services, customer relationship management, credentialing processes, vetting and adjudication and integrating program specific IT systems and business processes (see figure 2 on the next page).

Figure 2 – TTAC Infrastructure Modernization

In concurrence with this modernization effort, TSA is currently working toward the implementation of a common (universal) fee structure that will capitalize on the capabilities of an improved vetting infrastructure. The new universal fee framework would establish comparable security threat assessment services for all vetting activities with a common fee structure. The unified vetting processes and fee structure would reduce redundant vetting and fee remittance for applicants that cross multiple regulated populations. An analysis of the universal fee structure is currently in the developmental phase and is estimated to become effective, at the earliest, during FY 2013. Any such implementation would be conducted through the Federal Rulemaking process. Once the new infrastructure is implemented, TSA will begin phasing in programs that are currently: 1) funded through appropriations, 2) programs that are funded through existing

fees, and 3) programs that will require security threat assessments on newly regulated populations. TSA is working to coordinate the timing of the universal fee structure to coincide with the delivery of the modernization capabilities.

The major contracts for software development and equipment are scheduled to be awarded in FY 2010 and the new system is projected to be completed during FY 2013. During FY 2010 the program will conduct a proof of principle pilot to assess and develop risk mitigation strategies for the complex systems and business integration challenges that lay ahead with the full implementation of the TIM solution. With the implementation of TIM, TSA will soon be in position to support emerging vetting and credentialing population requirements with the following new mission capabilities:

- Business to Government (B2G) Partner Portal Services – a web portal for directly processing enrollment requests and sharing status information with airport badging offices.
- 3rd Party/External System Interface Management Services – a system-to-system (S2S) interface with the US-VISIT IDENT biometrics system for processing airport biometrics (fingerprints).
- Integrated Customer Relationship Management Services – enables improved security threat assessment workflow and more responsive customer service.
- Enterprise Service Management – supports the transformation of the new and legacy system components into reusable services.
- Enterprise Performance Reporting Management Service – provides monitoring and performance management capability to support end-to-end applicant processing.

Starting in FY 2011, Phase II of the infrastructure modernization will result in improved data analysis and information sharing services. TSA will transition from a transportation sector-specific credential/privilege viewing and management of applicant information to a person-centric applicant case and threat assessment management systems. The TIM Program will target the delivery of new and enhanced mission capabilities. Within the identity management services, IDENT biometric vetting and Biometric ID verification will be extended; and the business process reengineering services will include establishing Joint TTAC Customer Service Operations Center and Joint TTAC and Office of Intelligence Threat Assessment Operations Center. Phase II will target the delivery of new and enhanced mission capabilities within the core mission capabilities areas of Adjudication, Reporting and Analysis Services; and Technical Infrastructure consolidation and shared services.

The TIM program aligns with TSA's strategy for innovative use of analytical and detection technologies and techniques to collect and manage information regarding potential threats to persons, cargo, and commerce in the transportation arena and to

disseminate relevant transportation security and intelligence information to appropriate entities in a timely and functional manner. The modernization effort will support Vetting and Credentialing programs across the Department affecting the security of critical infrastructure. To that end, TSA's modernization is being coordinated with the Department's other ongoing information technology modernization efforts and will interact with numerous other systems such as: Treasury Enforcement Communication System (TECS), U.S. Citizens and Immigration's Systematic Alien Verification for Entitlements (SAVE), U.S. Visit's Automated Biometric Fingerprint Identification System (IDENT), and the FBI's Criminal Justice Information System (CJIS).

**[Crew and] Other Vetting program accomplishments:**

The numerous small vetting programs included in [Crew and] Other Vetting are in operations and maintenance mode and will continue to vet the various populations each fiscal year.

Significant accomplishments in FY 2009 include:

- Continuous vetting of over 8,000,000 distinct individuals in several critical sectors of credentialed or benefit-holding aviation sectors,
- Vetting of more than 13,800,000 individuals on flight crew manifest submissions,
- Vetting of approximately 4,000,000 Airmen Certification Holders, and
- Developed a detailed assessment of the existing TTAC business processes.
- Developed a conceptual "To-Be" business architecture that frames the scope of the modernization program.
- Developed a high-level implementation roadmap to organize TTAC's approach to achieving infrastructure modernization.
- Launched the development of Universal Security Threat Assessment Fee Rule.
- Used results of initial assessments to focus on areas of enrollment and adjudication to target and frame the scope of a Proof of Principle project.
- Drafted the Proof of Principle (Prototype) development acquisition package for risk mitigation.

FY 2010 and FY2011 planned accomplishments:

- Continue defining business processes and system improvements required to accommodate all and new applicant and population screening programs.
- Continue system development and add remaining capabilities.
- Perform testing and evaluation prior to transitioning of populations in FY 2012.

**Department of Homeland Security  
Transportation Security Administration  
Transportation Threat Assessment & Credentialing:  
Transportation Worker Identification Credential (TWIC) - Direct Appropriation  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Transportation Worker Identification Credential (TWIC) - Direct Appropriation**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	<b>6,521</b>
<b>2010 Enacted</b>	-	-	-
<b>2011 Current Services</b>	-	-	-
<b>2011 Total Request</b>	-	-	-
Total Change 2010 to 2011	-	-	-

In FY 2008, TWIC received a two-year appropriation of \$8.1 million for a card reader pilot project. The \$8.1 million is obligated and TSA expects to draft a final pilot report by the end of 2010. This will conclude the pilot and fee funding will sustain the TWIC program.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The TWIC program enhances security by providing a tamper-resistant biometric credential to maritime workers requiring unescorted access to secure areas of port facilities and vessels regulated under the Maritime Transportation Security Act of 2002 (MTSA), (P.L. 107-295). When fully implemented, the program will ensure that the identity of each TWIC holder has been verified; that a satisfactory security background check has been completed on that identity; and that each credential issued is positively linked to the rightful holder through the use of biometric technology.

The TWIC Program is being implemented in the maritime environment in accordance with the spirit and requirements of the Aviation and Transportation Security Act of 2001 (P.L. 107-71) and MTSA. The program will provide a common, consistent biometric credential at over 3,200 facilities and on over 10,000 vessels.

TWIC’s personal identity verification standards and credential issuance closely adhere to those of Homeland Security Presidential Directive 12 (HSPD-12) and its implementing standard, Federal Information Processing Standard (FIPS) 201. The TWIC program is on the leading edge of newly released biometric standards and was first to adopt those common biometric standards in the Federal Government. Adhering to these standards will ensure interoperability among physical access control systems that may incorporate different vendor products and technologies. TWIC specifically follows biometric

standards of the American National Standards Institute (ANSI) for its pattern-based fingerprint format operational biometric.

The program continues to work with the National Institute of Standards and Technology (NIST) to ensure compliance with appropriate national standards and to develop technology specifications to support the overall program. Most recently, the program worked with a federal advisory committee, the U.S. Coast Guard's (USCG) National Maritime Security Advisory Committee (NMSAC), to establish recommendations for contact-less biometric and credential readers that would enhance throughput and provide better durability. The NMSAC technology recommendations were published in the Federal Register and public comment was solicited. At the conclusion of the TWIC reader pilot, the program finalized the reader specifications, published a notice of availability in the Federal Register and posted the specification on the TSA Web site.

A Final Rule was issued on January 25, 2007 and addressed over 1,900 comments from the public. The final rule includes important changes from the prototype, such as the ability to provide a discount for Free and Secure Trade (FAST) card holders, documented merchant mariners, and truckers with Hazardous Material Endorsements. The TWIC blueprint was updated to align the system with the Final Rule. These key changes to the program had to be tested to ensure the TWIC technology systems met program requirements and could support nationwide deployment. The program began TWIC cardholder enrollment in the fall of 2007.

After establishing the first enrollment site in Wilmington, Delaware in the fall of 2007, TSA has used a phased-in approach, at each Captain of the Port (COTP) zone, to roll out the program across the nation. Over 150 fixed enrollment centers were established to complete initial enrollments of all maritime workers in 18 months. On April 15, 2009, the USCG began enforcing nationwide the requirement to have a TWIC for all mariners and individuals requiring unescorted access to secure areas of facilities, vessels, and Outer Continental Shelf (OCS) facilities. However, the USCG allowed workers, who were approved for a TWIC and waiting to obtain their card, to continue to work unescorted until May 14, 2009 at select ports.

TSA has enrolled over 1.4 million workers as of December 9, 2009. After completing the initial enrollment of all maritime workers as reflected in anticipated revenues for FY 2010 and FY 2011, the program will move into a sustainment mode, and continue to support enrollment centers nationwide for new maritime workers, workers requiring a replacement card, and workers renewing their TWIC. TSA and USCG work closely with the industry to expedite the enrollment process, working with maritime stakeholders, at the national and local levels, to provide program updates and promote awareness and support for the program. The TWIC deployment contractor has an extensive outreach effort which includes in-person meetings with local port stakeholders and targeted communications materials distributed at each port (well in advance of deployment). Additionally, the program has the TWIC Stakeholder Communications Committee, comprised of maritime stakeholders spanning unions, associations, and government. This

group continues to provide invaluable feedback and recommendations that TSA and USCG act upon accordingly.

The TWIC Program has established applicant fees to sufficiently recover the cost of providing this security service. The standard TWIC Fee is \$132.50 per applicant. A reduced TWIC fee of \$105.25 has also been established for those applicants that previously completed a comparable security threat assessment. The card replacement fee is \$60.00. The credential is valid for five years and revenue generated from these security fees will only be used to support the TWIC program.

In FY 2008, Congress provided \$8.1 million in two-year appropriated funding for TSA to implement an access control technology pilot to test contact-less biometric technologies within the TWIC program. The \$8.1 million has been obligated, and TSA expects to draft a final pilot report by the end of 2010, augmented with data collected from pilot sites where reader installations were not completed until mid-2010. The Early Operational Assessment (EOA) effort began in April 2009 with Initial Technical Testing (ITT) scheduled for completion in December, 2009. System Test and Evaluation (ST&E) began in November 2009. Thirteen percent of the planned 213 readers have been activated at several pilot sites. The remaining readers will be activated during the 2<sup>nd</sup> and 3<sup>rd</sup> quarters of FY 2010. No additional funding is requested to complete the pilot test.

Of the \$8.1 million appropriation, \$2.0 million is supporting the program's administrative efforts for the pilot. This work includes: development of bench test protocols and test cards to evaluate readers for their capability to read TWICs; conducting functional and environmental reader testing; and, the implementation of the Integrated Test Agent (ITA) which will plan, conduct, and report on the pilot test. The remaining \$6.1 million provides funding for work and test equipment at test participant facilities and vessels. This work includes: test equipment and software; the development of site-specific test plans and on-site data collection and coordination by the ITA; and travel necessary to support sites.

Total Change 2010 to 2011	-	-	(3,000)

The Transportation Security Administration estimates fee collection of \$12.0 million in the Hazardous Materials Endorsement Threat Assessment Program (HTAP).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The HTAP is a key component of the DHS/TSA layered approach to transportation security. The program was established to fulfill the statutory requirements of both the USA PATRIOT and Safe Explosives Acts to further protect against the threats to transportation posed by terrorists, dangerous criminals, and illegal aliens that may attempt to transport hazardous materials in commerce.

As directed by Congress, TSA established fees to fund the HTAP threat assessment. The fee is comprised of three elements: 1) the cost for collecting and processing fingerprint and application information; 2) the fee the FBI charges to run the fingerprints against the criminal history records; and 3) a TSA program fee to cover costs to administer the program, including conducting the security threat assessments. Payment of the Federal fee is a requirement to undergo the TSA Security Threat Assessment.

TSA charges \$38 for the collection of information, \$17.25 for the FBI fingerprint-based CHRC, and \$34 for the TSA program fee for a total fee of \$89.25. The \$34 TSA program fee is charged to every applicant regardless of the state of issuance. Non-TSA Agent States charge various collection, processing, and fingerprinting fees; the average total fee in non-TSA Agent States is approximately \$89.

States must forward biographic and biometric (fingerprint) information to TSA in an approved and established format to facilitate the security threat assessment process. TSA allowed States to elect to perform the biographic and biometric collection, or utilize a TSA-contracted agent to perform these functions on their behalf. Currently, 12 states collect the required biographic information and biometric data through their individually established and maintained programs and 38 states and the District of Columbia have elected to utilize the TSA-contracted agent. Additionally, drivers registered in a state serviced by the TSA Agent may be fingerprinted in any other state serviced by the TSA Agent.

The HTAP has processed over 1,350,000 applications, and currently processes over 95 percent of applications in five days or less. The HTAP has a robust redress process, including appeals, waivers, and Administrative Law Judge review. In FY 2009, the program conducted threat assessments on 297,473 applicants, a continued increase from the program's inception that confirms the vital role of improving the safety and protection of passengers and freight traveling on our Nation's highways. The request provides full funding from fee revenue to cover TSA's operational costs for this program.

<sup>1</sup> The FY 2009 actuals are shown here as reference information and were incurred under the Aviation Appropriation.

The Transportation Security Administration requests \$100,000 in fee collection authority to support General Aviation.

**CURRENT SERVICES PROGRAM DESCRIPTION**

This offsetting collection supports General Aviation flights into Reagan National (DCA) as provided by the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176). TSA levies a \$15 fee for each person onboard the flight for security threat assessments and flight authorization services. In addition, a \$296 fee per roundtrip is charged to flight operators for the screening personnel and equipment used to support such flights at DCA. These fee collections cover security threat assessment and program costs associated with the legislated mandate requiring the establishment of a security program to allow General Aviation flights into and out of DCA.

<sup>1</sup> The FY 2009 actuals are shown here as reference information and were incurred under the Aviation Appropriation

The Transportation Security Administration requests \$1.4 million in fee collection authority to support Indirect Air Cargo (IAC).

**CURRENT SERVICES PROGRAM DESCRIPTION**

This program provides for fee collections supporting security threat assessments of security workers in the air cargo supply chain. TSA levies a \$28 per assessment fee to offset costs of the assessments and program management costs. The total FY 2011 collections from these fees are estimated to be \$1,400,000. This fee is collected in accordance with the Final Rule on Air Cargo Security Requirements and as authorized by the FY 2004 DHS Appropriations Act (P.L. 108-90). The decrease in estimated fees from FY 2010 to FY 2011 is a result of a decrease in the estimated population of the IAC program applicants.

The Transportation Security Administration requests \$5.2 million in fee collection authority to support the Certified Cargo Screening Program (CCSP).

**CURRENT SERVICES PROGRAM DESCRIPTION**

This initiative provides for fee collections to fund security threat assessments of certified cargo shippers. The CCSP rulemaking is in progress and the fee is anticipated to begin in FY 2010. The CCSP fee is \$19 per applicant. This program will utilize existing shipping infrastructure to help TSA meet cargo screening mandates.

Total Change 2010 to 2011	-	-	(400)

The Transportation Security Administration requests \$1.2 million in fee collection authority to support the Large Aircraft Security Plan (LASP).

**CURRENT SERVICES PROGRAM DESCRIPTION**

This program change provides for the fee collections to fund security threat assessments for the large aircraft security program. The original LASP Notice of Proposed Rulemaking (NPRM) included language to require all U.S. operators of aircraft over 12,500 maximum gross take-off weight (MTOW) to adopt and implement a TSA-approved security program. The rule is currently undergoing analysis and revision by TSA with additional feedback from industry regarding alternatives to the rule's proposed requirements, and a Supplemental NPRM is expected. The decrease in estimated fees from FY 2010 to FY 2011 is a result of a decrease in the estimated population of the LASP program.

Total Change 2010 to 2011	-	-	-

The Transportation Security Administration estimates \$4.0 million in fee collection for the Alien Flight Student Program (AFSP).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

AFSP conducts terrorist, immigration, and criminal-background checks on all foreign students applying for flight training in the United States or abroad at FAA certified flight training locations. Applicants are subject to a security threat assessment (STA) in accordance with Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176). AFSP applicants identified as a “threat to aviation or national security” under this program will be denied training.

The program reviews and assesses both biographic and biometric information to identify individuals who pose a security threat. Prior to the September 11, 2001 attacks, there were no systematic security checks performed on foreign students applying for flight training in the United States or abroad.

Section 612 of the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176) transferred the function for screening AFSP applicants from the Attorney General to the Secretary of Homeland Security (and subsequently delegated to the TSA). The Act also gives the Secretary of Homeland Security the authority to establish a fee to offset costs of vetting on first-time AFSP applicants. Beginning May 13, 2009, TSA was given the authority to also impose a fee on recurrent training candidates.

AFSP processed 24,814 basic and 5,440 recurrent flight training fee applications, for a total of 30,254 fee applications in FY 2009. Based on the number of recurrent flight applicants each year, which prior to May 2009 did not pay a fee, TSA anticipates the

number of recurrent flight training applications with a fee to quadruple in FY 2010, to approximately 20,000. Approximately 45,000 flight training fee applications are expected in FY 2010 and 47,000 fee applicants in FY 2011.

The program also began migrating 10-print fingerprints data to a common DHS platform, which will allow for the leveraging of program data to other DHS components. This effort is of particular interest to DHS Immigration and Customs Enforcement's Student and Exchange Visitor Information System and will enhance both programs' capability to more closely monitor attendance and status of students in training.

AFSP currently collects a fee of \$130 per basic applicant. This fee includes \$112.75 for extensive TSA international and domestic threat assessments, and \$17.25 for an FBI criminal history records check. On May 13, 2009, AFSP also began collecting a fee of \$70 per recurrent applicant. The fee includes extensive TSA international and domestic threat assessments and application processing.

### PPA Mission Statement

The mission of the Secure Flight Program is to significantly improve the Federal Government's ability to prevent terrorists from boarding aircraft, help move passengers through airport screening more quickly, and reduce the number of individuals selected for secondary screening, while fully protecting passengers' privacy and civil liberties.

#### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>11.1 Total FTE &amp; personnel compensation</b>	<b>6,612</b>	<b>12,800</b>	<b>14,560</b>	<b>1,760</b>

The increase provides for the cost of living adjustment for Secure Flight.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>11.3 Other than full-time permanent</b>	<b>2</b>	<b>200</b>	<b>225</b>	<b>25</b>

The increase provides for the cost of living adjustment for Secure Flight.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>11.5 Other personnel compensation</b>	<b>196</b>	<b>270</b>	<b>290</b>	<b>20</b>

The increase provides for the cost of living adjustment for Secure Flight.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>12.1 Civilian personnel benefits</b>	<b>1,503</b>	<b>2,886</b>	<b>3,650</b>	<b>764</b>

The increase provides for the cost of living adjustment for Secure Flight.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>21.0 Travel and transportation of persons</b>	<b>34</b>	<b>200</b>	<b>200</b>	<b>-</b>

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>22.0 Transportation of things</b>	<b>4</b>	<b>1</b>	<b>1</b>	<b>-</b>

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>23.2 Rental payments to others</b>	<b>2,952</b>	<b>4,500</b>	<b>4,500</b>	<b>-</b>

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2010 request includes an increase for increased rent related to the roll out of the Secure Flight platform.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>23.3 Communications utilities and miscellaneous charges</b>	<b>299</b>	<b>837</b>	<b>900</b>	<b>63</b>

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, and utility services. TSA is dependent upon communications lines and utilities to run the Secure Flight platform. The increase of \$63K in FY 2011 is to account for an increase of communication and utility costs.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.1 Advisory and assistance services</b>	<b>20,483</b>	<b>19,000</b>	<b>17,500</b>	<b>(1,500)</b>

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. The FY 2011 request includes a decrease of \$1,500K as the final roll out of Secure Flight will be completed.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.2 Other services</b>	<b>10,116</b>	<b>18,590</b>	<b>20,611</b>	<b>2,021</b>

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services will be the primary vehicle by which the Secure Flight program will be implemented and operated in regard to connectivity with air carriers and the processing of security checks. The FY 2011 request includes an increase of \$2,021K as a result of the O&M costs and completion of the Secure Flight platform, and non-pay inflation.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.4 Operation and maintenance of facilities</b>	<b>172</b>	<b>18,076</b>	<b>19,980</b>	<b>1,904</b>

Provides for the operation and maintenance of information technology systems used to support the Secure Flight program. The FY 2011 increase of \$1,904K is a result of the completion of the Secure Flight platform in FY 2010.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>26.0 Supplies and materials</b>	<b>52</b>	<b>220</b>	<b>220</b>	<b>-</b>

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>31.0 Equipment</b>	<b>25,572</b>	<b>6,783</b>	<b>2,000</b>	<b>(4,783)</b>

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. These costs include equipment that will be purchased for the Secure Flight program outside of contracts for rollout and sustainment of the program. The FY 2011 request includes a decrease of \$4,783 as a result of the completion of the Secure Flight platform in FY 2010.

**PPA Mission Statement**

The mission of the Screening Administration and Operations is to help support the identification of individuals deemed as potential terrorists or who pose a security threat to either aviation or national security.

**Summary Justification and Explanation of Changes**

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>11.1 Total FTE &amp; personnel compensation</b>	<b>8,150</b>	<b>9,984</b>	<b>11,307</b>	<b>1,323</b>

The increase provides for the annualization of FTE and the cost of living adjustment.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>11.5 Other personnel compensation</b>	<b>271</b>	<b>694</b>	<b>780</b>	<b>86</b>

The increase provides for the annualization of FTE and the cost of living adjustment.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>12.1 Civilian personnel benefits</b>	1,751	3,328	3,370	42

The increase provides for the annualization of FTE and the cost of living adjustment.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>21.0 Travel and transportation of persons</b>	8	229	235	6

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2011 increase of \$6K reflects increased travel needs for the [Crew and] Other Vetting Programs.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>22.0 Transportation of things</b>	14	40	45	5

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things. The FY 2010 increase of \$5,000 reflects an increase in transportation needs for the Other Vetting/SAO Program.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>23.2 Rental payments to others</b>	-	1,000	1,050	50

Rent includes all payments to a GSA managed source for rental space, land, and structures. The FY 2011 request includes an increase of \$50K for additional rental space needed for the [Crew and] Other Vetting Programs.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>23.3 Communications utilities and miscellaneous charges</b>	25	243	250	7

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, and utility services. TSA is dependant upon communications lines and utilities to run the vetting systems. The FY 2010 increase of \$7,000 includes inflation and reflects an increase for the Other Vetting/SAO Program.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.1 Advisory and assistance services</b>	-	10,850	10,875	25

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these services to provide program management, technical and logistical support as well as evaluations. The FY 2011 increase of \$25K reflects an increase for the [Crew and] Other Vetting Programs.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.2 Other services</b>	21,416	44,043	44,000	(43)

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services are used extensively in the systems operation and case adjudication of the Alien Flight Student program. These contracts will also support SIDA, 12/5 Charter Pilots, MD-3 Airports and the Temporary Flight Restriction programs. [Crew and] Other Vetting Programs has a planned decrease of \$43K.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.7 Operation and maintenance of equipment</b>	932	128	200	72

Supports the operation and maintenance of information technology systems used to perform name checks for SIDA, 12/5 Charter Pilots, MD-3 Airports, and the Temporary Flight Restriction program. The FY 2011 increase of \$72K reflects an increase in O&M of equipment.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>26.0 Supplies and materials</b>	110	-	-	-

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>31.0 Equipment</b>	3,098	17,097	16,975	(122)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2011 decrease of \$122K reflects a decrease for the [Crew and] Other Vetting Programs.

The mission of the TWIC Program is to establish an integrated, credential-based, identity verification program through the use of biometric technology to grant workers unescorted access to secure areas within the nation's transportation system.

**Summary Justification and Explanation of Changes**

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>21.0 Travel and transportation of persons</b>	-	26	200	174

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel is necessary to conduct on-site reviews and meetings with maritime port operators and other TWIC program stakeholders. The increase of \$174K properly accounts for travel needs.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>22.0 Transportation of things</b>	181	23	250	227

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things. The increase of \$227K is to properly account for transportation of things in the TWIC program.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.1 Advisory and assistance services</b>	<b>742</b>	<b>20</b>	<b>700</b>	<b>680</b>

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these types of contracts to assist in the development and implementation of the TWIC program. The increase of \$680K is a result of additional assistance services needed by the TWIC program.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.2 Other services</b>	<b>30,596</b>	<b>4,534</b>	<b>2,254</b>	<b>(2,280)</b>

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services will include the adjudication of cases where individuals are denied a TWIC card. The decrease of \$2,280K is because of the continued decrease in contractor staffing needed after the initial surge of enrollments, and Government personnel will complete the majority of vetting and adjudication services.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.3 Purchases of goods &amp; svcs. from Gov't accounts</b>	<b>9,669</b>	<b>160</b>	<b>-</b>	<b>(160)</b>

Includes contracts with federal agencies for background check services including the FBI for fingerprint based checks and/or name based checks for these vetting programs. The decrease is a result of the completion of the initial surge of TWIC applicants.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.7 Operation and maintenance of equipment</b>	<b>-</b>	<b>91</b>	<b>1,900</b>	<b>1,809</b>

Supports the operation and maintenance of information technology systems used for the TWIC program. The increase of \$1,809K is a result of the TWIC program being in the O&M stage in FY 2011.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>26.0 Supplies and materials</b>	<b>8</b>	<b>81</b>	<b>81</b>	<b>-</b>

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>31.0 Equipment</b>	<b>884</b>	<b>1,250</b>	<b>1,000</b>	<b>(250)</b>

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. These costs include equipment that will be purchased for the TWIC program outside of contracts for implementation and sustainment of the program. The decrease is a result of the completion of the initial surge of TWIC applicants.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>12.1 Civilian personnel benefits</b>	-	56	56	-

Salary and Benefits provides for the cost of living adjustment.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>25.2 Other services</b>	-	2,306	1,106	(1,200)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The fee reduction is due to a decrease in new population from FY 2010 to FY 2011 who require security threat assessments. Once the security threat assessment is completed on the base population, only new applicants subject to a security threat assessment are from industry growth and turnover. Thus, the decrease is directly related a maturing program that has provided service to and collected fees from most of the base population and is servicing only growth and turnover of the regulated population.

Transportation Threat Assessment & Credentialing:  
Secure Identification Display Area Checks  
Funding Schedule  
(Dollars in Thousands)**

PPA: Secure Identification Display Area Checks	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
25.2 Other services	-	10,000	8,000	(2,000)
<b>Total, Object Class</b>	-	<b>10,000</b>	<b>8,000</b>	<b>(2,000)</b>
<b>Total, Secure Identification Display Area Checks</b>	-	<b>10,000</b>	<b>8,000</b>	<b>(2,000)</b>
<b>Full Time Equivalents</b>	-	-	-	-

**PPA Mission Statement**

This funding supports security fee collections to fund other security threat assessments that are required for very small transportation populations not mentioned above.

**Summary Justification and Explanation of Changes**

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.2 Other services</b>	-	<b>10,000</b>	<b>8,000</b>	<b>(2,000)</b>

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. For the Secure Identification Display Area Checks, the fee reduction is due to a decrease in population from FY 2010 to FY 2011. In this mature program, the base population has completed security threat assessments, so only turnover population and applicant renewals are subject to security threat assessments. It appears that the aviation industry is experiencing the effects of the economic decline and the regulated population is experiencing an overall decline. Thus, there is less employee turnover and limited, if any, new entrants into the population.

<b>BUDGET REQUEST AND SUPPORTING INFORMATION</b>
--

**Transportation Security Support:**

## **I. Appropriation Overview**

### **A – Mission Statement for Transportation Security Support:**

The Transportation Security Administration (TSA) is an agency of over 50,000 personnel, with approximately \$7.4 billion in budget authority, substantial regulatory and law enforcement authority, and a nationwide presence. The management and support of the organization is accomplished by a transportation security support staff in Washington, D.C. and five strategically located Mission Support Centers (MSCs). TSA has developed and will maintain a flat organizational structure that emphasizes front-line service delivery with well-trained managers.

### **B – Budget Activities:**

**Intelligence** - The Office of Intelligence (INTEL) receives, assesses, and distributes intelligence information to support TSA's mission of securing the transportation system. INTEL also conducts strategic operational and tactical risk-based security planning.

**HQ Administration** - Headquarters Administration provides all aspects of the support infrastructure required to sustain TSA's nation-wide operations. These activities include serving as the central point on policy development, performance management, facilities management, financial management, acquisition, protecting civil rights, legal advice, internal conduct and audits, and providing a safe and healthful work environment for employees.

**Human Capital Services** - The Office of Human Capital Services (OHCS) includes all services that support the recruitment, assessment, servicing, and payroll of TSA's employees at headquarters, field, airports, and other locations. The Office maintains oversight of all human resources contractual activities, and provides advice and counsel to senior managers on personnel issues.

**Information Technology** - Information Technology provides the IT infrastructure and services to maintain connectivity, provide productivity tools, and support Headquarters and field corporate applications.

### **C – Budget Request Summary:**

The Transportation Security Administration requests 1,668 positions, 1,558 FTE, and \$1,052,369,000 in appropriated funding for Transportation Security Support in FY 2011. The total adjustments-to-base include 13 FTE and reduction of \$3,577,000. The program changes include a total increase of 86 positions, 44 FTE, and \$54,166,000:

- Increase Intelligence: 31 positions, 16 FTE, and \$6,620,000,
- Increase Headquarters Administration: 55 positions, 28 FTE, and \$21,612,000
- Increase Human Capital Services: 0 positions, 0 FTE, and \$22,871,000
- Increase Information Technology: 0 positions, 0 FTE, and \$11,160,000
- Reduce corporate training: 0 positions, 0 FTE, and \$1,000,000, and
- Reduce information technology across-the-board: 0 positions, 0 FTE, and \$7,097,000.

### III. Current Services Program Description by PPA

**Department of Homeland Security  
Transportation Security Administration  
Transportation Security Support:  
Intelligence  
Program Performance Justification  
(Dollars in Thousands)**

#### PPA: Intelligence

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>155</b>	<b>124</b>	<b>23,007</b>
<b>2010 Enacted</b>	<b>180</b>	<b>167</b>	<b>28,203</b>
2011 Adjustments-to-Base	15	19	2,965
<b>2011 Current Services</b>	<b>195</b>	<b>186</b>	<b>31,168</b>
2011 Program Change	31	16	6,620
<b>2011 Total Request</b>	<b>226</b>	<b>202</b>	<b>37,788</b>
Total Change 2010 to 2011	46	35	9,585

The Transportation Security Administration requests \$37.8 million for the Office of Intelligence. The adjustments-to-base include \$95,000 in pay annualization, \$231,000 in pay inflation, 6 FTE and \$770,000 for annualization of FY 2010 program increase, 13 FTE and \$1.9 million for program realignment, and 16 FTE and \$6.6 million for program increase.

#### **CURRENT SERVICES PROGRAM DESCRIPTION**

The Office of Intelligence (INTEL) provides TSA an organic capability to review, synthesize, and analyze transportation specific intelligence and provide comprehensive and cogent analytic products. It is the only Federal intelligence entity focused solely on the transportation sector. INTEL coordinates closely and shares information with DHS Intelligence & Analysis (DHS-I&A), the Intelligence Community (IC), the intelligence sections of law enforcement agencies, and the transportation industry. To facilitate collaboration and provide rapid analysis and notification of threats, the office assigns Field Intelligence Officers (FIOs) at key transportation nodes and places liaison officers at key IC and law enforcement agencies.

INTEL is critical to TSA's overall risk-based security strategy and the intelligence products generated provide the threat framework utilized to prioritize security resources. These products are regularly used by TSA senior leadership, the Federal Security Directors (FSDs), the Federal Air Marshal Service (FAMS), and the transportation industry to guide decisions. INTEL operates and maintains 24/7 intelligence capabilities at TSA Headquarters and the TSA Freedom Center to disseminate warnings and notifications of credible and immediate threats. INTEL also assists in coordinating domestic and international civil aviation and other modal security intelligence activities with other government agencies.

In order to perform its mission, INTEL provides and maintains Top Secret and Secret Collateral classified information technology infrastructures for interfacing via voice, video, and data with the IC, state & local law enforcement, field sites, and industry partners. One such system is the TSA Remote Access to Classified Enclaves (TRACE) solution which provides secure access to classified and unclassified threat information in a timely manner to multiple remote locations.

Significant accomplishments in FY 2009 included:

- Served as the key hub interface between the commercial aviation sector and Federal agencies ensuring individuals designated as threats to security are identified and prohibited from traveling or are thoroughly screened before traveling.
- Led TSA in the development of a comprehensive Knowledge Management System to automate and assist in quickly and accurately reviewing and analyzing the entire range of intelligence material available to INTEL analysts.
- Assumed responsibility for TSA's Risk Assessment and Analysis Program. This program serves as one of the core elements responsible for developing risk analyses of individual transportation modes and a comprehensive risk analysis of all transportation modes combined.
- Completed the construction and equipping of the permanent TSA Continuity of Operations Sensitive Compartmented Information Facility (SCIF), and additional SCIFs at the Annapolis Junction and Colorado Springs Secure Flight facilities.
- Established a federal transportation Information Sharing and Analysis Center (ISAC), which will serve as the hub for future collaboration with existing transportation sector ISACs.
- Completed the conversion of contractors to a near total Federal workforce. This conversion reduced 38 contract positions and resulted in a savings of over \$500,000 that was redirected into other critical information sharing needs.
- Expanded INTEL Watch Operations Support for the TSA Behavior Detection Officers (BDO) program and Secure Flight for TSA Headquarters, Annapolis Junction and Colorado Springs Operations Center.

FY 2010 planned accomplishments include:

- Development of TSA's capability to provide comprehensive risk analyses, made up of quantifiable threat, vulnerability and consequence factors, to assist and enable TSA senior leadership and the operations elements in decision concerning the application of low density – high demand assets to critical transportation sector security needs.
- Lead TSA in developing a nationwide, desktop, secure video teleconferencing capability for use by both INTEL and the Office of Security Operations. This capability will establish face to face communication for both day-to-day and crisis operations.
- Complete the first comprehensive risk analysis assessment, which includes information concerning all U.S. transportation sectors through TSA INTEL Risk Analysis (RMS) element. Additionally, RMS will revisit each of the previous transportation modal assessments to similar threats and critical vulnerabilities applicable to all modes of transportation.
- Expand the FIO program to improve INTEL's ability to provide accurate and timely intelligence products and threat warnings to more than 30 additional FSDs.

FY 2011 planned accomplishments include:

- Expand FIO program to increase field notification of threats and warnings to cover 100 percent of Category X and 73 percent of Category I airports. The FY 2011 locations will be selected based on close coordination with TSA operational elements to meet critical security needs.
- Enhance and expand the network of state, local and industry partners fully involved and engaged with the newly created TSA ISAC.
- Develop and refine the risk assessment and analysis program to provide TSA leadership, TSA operational elements and transportation stakeholders with the most relevant and usable information and recommendations.
- Lead TSA in developing and implementing classified communications architecture and capability by completing a comprehensive TRACE to HSDN conversion plan and expanding the deployment of TANDBERG systems to enable secure video-teleconferencing between TSA HQ and key airports nationwide.

Total Change 2010 to 2011	40	22	22,470

The Transportation Security Administration requests \$271.4 million for this activity. The adjustments-to-base include \$642,000 for pay annualization, \$1.4 million for pay inflation, 7 FTE and \$850,000 for annualization of the FY 2010 program increase, reduction of 15 FTP/13 FTE and \$2.1 million for realignments, and 55 FTP/28 FTE and \$21.6 million for program increase.

**CURRENT SERVICES PROGRAM DESCRIPTION**

The following table provides the components that make up this PPA.

(Dollars in Millions)

	<b>FY 2010</b>	<b>FY 2011</b>
Personnel	\$135.9	\$141.1
Leadership	2.1	3.2
Internal Management and Controls	57.5	72
Workforce Support	18.8	20.9
Facilities Management & Physical Security	34.6	34.2
<b>Total</b>	<b>\$248.9</b>	<b>\$271.4</b>

Headquarters Administration supports numerous functions required to provide leadership, management, and logistics support to TSA operations.

**Personnel:** \$141.1 million in personnel costs are included in this PPA for the Offices of the Assistant Secretary and Deputy Assistant Secretary, Inspection, Chief Counsel, Finance and Administration, Legislative Affairs, Acquisition, Special Counselor, Security, and Strategic Communications and Public Affairs.

**Leadership:** \$3.2 million in operating expenses are provided to develop the policy and management architecture to guide overall activities, ensure compliance with laws and regulations, develop and monitor performance metrics, and manage external relationships with Congress, the Administration, other oversight entities, and private sector partners. Executive leadership offices include the Office of the Administrator, Deputy Administrator, Legislative Affairs, and Strategic Communications and Public Affairs.

**Internal Management and Controls:** \$72 million in operating expenses support the day-to-day management of a \$7.4 billion budget and over 50,000 personnel. Offices overseeing internal management and controls include:

- Inspection – Conducts covert testing to assess systematic vulnerabilities across all modes of transportation. Investigates allegations of employee misconduct within TSA and conducts proactive compliance inspections of TSA program components. Provides financial and operational reviews to assess the integrity of TSA programs. Conducts insider threats reviews.
- Acquisition – Executes contracts and other agreements for the supplies and services needed by TSA to accomplish its mission; and provides TSA with subject matter expertise in the areas of acquisition, field office acquisition guidance, grants management, requirements development, and program management.
- Chief Financial Officer (CFO) – Obtains the necessary resources to support TSA’s critical mission and ensures the resources are used efficiently by providing effectual financial systems and robust internal controls over funds. Provides planning guidance to align the TSA budget with DHS goals and objectives.
- Chief Administrative Officer (CAO) – Reduces operational and financial risk by ensuring control of all sensitive and capitalized assets. This is an on-going initiative which provides policy, guidance, training, inventory support, information management, and compliance reporting.
- Chief Counsel – Delivers legal services to all TSA mission areas, components, and staff, covering all substantive legal areas applicable to TSA. These include a comprehensive and inclusive array of services from legal and policy development, ethics, negotiating and drafting international agreements, drafting and reviewing legislation, Congressional testimony, and regulations and rulemaking.
- Security – Oversees and administers the agency-wide physical, personnel, and internal security policies and procedures, thereby ensuring a safe and secure workplace for its employees, and effectively determining the pre-employment suitability of all TSA personnel, to include contractors.

Significant accomplishments in FY 2009 included:

- Inspection –
  - Conducted 2,800 covert tests at airports: Tests included core-enhanced tests, focused tests, field tests of new advanced technology equipment, other transportation mode tests, and extensive cargo testing;
  - Completed more than 140 airport inspections to evaluate management effectiveness, morale of the workforce, communications, and ensure Federal Security Director (FSD) offices are adhering to management directives and standard operating procedures;
  - Conducted seven inspections of Federal Air Marshal Service (FAMS) field offices, five inspections of FAMS Headquarter offices, and five special inquires (special investigations) to evaluate operational program, procedures, and policies;
  - Completed risk assessments of TSA operations and executed 10 internal reviews to evaluate processes and address potential weaknesses;
  - Performed eight audits of airline security fees remitted to TSA to determine compliance with regulatory requirements and identify possible liability; and
  - Developed the Airport Community Engagement Strategy to address insider threats and piloted at 14 airports.
- Acquisition – Strengthened contract administration through:
  - Emphasized oversight of the Contracting Officer Technical Representative;
  - Improved OMB Exhibit 300 submissions and ensured weaknesses were addressed, and enhanced quality assurance and contract oversight;
  - Implemented the recommendations of the Lean Six Sigma study to improve the procurement process, including the Procurement Request Package Process and Proposal Evaluation Process;
  - Formalized TSA’s requirements process, which included drafting procedures, issuing policies, and providing guidance to examine, stabilize, and review mission needs and capabilities; and
  - Implemented a successful transition to the Federal Acquisition Regulation (FAR) that included training, communication, policy and guidance.
- Chief Administrative Officer –
  - Issued policies and guidance on inventory controls to ensure accountability of TSA’s sensitive capitalized property and conducted approximately 200 inventory site visits;
  - Undertook methods to further ensure a low loss, damaged, and destroyed property rate; and
  - Initiated development of a records management accountability and compliance system to mark and manage electronic records (i.e., electronic tagging (*eTagging*)).
- Chief Financial Officer --
  - Developed, presented, and defended TSA’s annual budget requests (FY 2010/FY 2011) in meetings with the Department, the Office of Management and Budget (OMB), and Congress; and

- Continued efforts to ensure a TSA-wide culture of fiscal and performance responsibility and accountability and improve financial audit results. Efforts included: strengthening fiscal policies and procedures, providing financial training and tools, enhancing the management and internal controls programs, and improving the quality and integrity of financial data.
- Chief Counsel –
  - Chaired the TSA Information Protection Commission, examining and evaluating information protection practices throughout TSA and creating the Information Protection Oversight Board as a semi-permanent entity;
  - Drafted legislative proposals to authorize special testing of air cargo;
  - Worked closely with the DHS Office of General Counsel to develop rulemaking proceedings for Secure Flight, Air Cargo, Rail Rule and the Large Aircraft Rule; and
  - Provided more than 1,000 ethics opinions, reviewed and certified nearly 200 Public Financial Disclosure reports and more than 2,000 Confidential Financial Disclosure Reports. Trained all of Headquarters SF-278 and OGE-450 filers and deployed new electronic training module for ethics training.
- Security –
  - In direct support of the Department of Homeland Security’s department wide efficiency review, converted 20 contractors to 21 federal positions for employee vetting and credentialing. With this conversion, TSA streamlined operations, eliminated redundancies;
  - Continued to provide security services with additional improvements in background investigation cycle time and through the implementation of new security technologies aimed at reducing the risk of unauthorized access to airports and other TSA facilities; and
  - Launched initiative to upgrade 10,000 Transportation Security Officers (TSOs) to Secret security clearance eligibility. Upgrading these positions allows TSA to provide mission-critical intelligence data to frontline personnel, enhancing their ability to perform their duties. As of December 15, 2009, the TSO Upgrade Project Team has processed 904 upgrade requests.

FY 2010 planned accomplishments include:

- Inspection –
  - Increase number of covert testing team leaders by four to expand the covert testing of airports and intermodal transportation security systems;
  - Expand air cargo covert testing to include the TSA Known Shipper Program and Certified Shipper Program;
  - Conduct more than 140 airport inspections and various re-inspections to reach goal of inspecting all airports over a three year period;
  - Conduct seven inspections of FAMS field offices, seven inspections of FAMS Headquarter units, and seven inspections of other Headquarter offices annually in order to achieve the goal of inspecting all field and Headquarter offices on a 3-year cycle. The inspections independently evaluate offices for

- compliance with TSA and DHS directives, standard operating procedures, and policies; and
- Conduct risk assessments of TSA operations and execute 10 internal reviews and 15 audits of airline security fees remitted to TSA.
  - Acquisition –
    - Continue to build and develop an acquisition workforce through the implementation of recruitment, retention and employee development plans, and participation in the DHS Acquisition Professional Career Program;
    - Continue process improvements identified through Lean Six Sigma efforts, formalize TSA Test & Evaluation (T&E) policy to include requirements for a program Test and Evaluation Master Plan (TEMP) and implement systematic reviews of test results as part of the Investment Review Board (IRB) process; and
    - Initiate strategic sourcing efforts, including the development of a comprehensive plan for enterprise-wide requirements.
  - Chief Administrative Officer –
    - Complete and reconcile the annual inventory of all capitalized and sensitive property (to include IT assets) with a loss, damage, or destruction (LDD) ratio of less than two percent and implement the corrective action plan for Property and Equipment Accounting and conduct approximately 250 inventory site visits;
    - Further utilize asset management control program to include software revision, administratively controlled property module, and more effective tracking of the local movement of TSA property; and
    - Pilot and deploy eTagging for improved electronic records management accountability and compliance.
  - Chief Financial Officer –
    - Ensure that improvements put into place over the past three years are firmly integrated into the day-to-day business processes by continuing testing of management controls; providing on-going training; and expanding financial reporting to provide enhanced analytical capabilities to facilitate monitoring, tracking and resource decision making; and
    - Present, and defend TSA's annual (FY 2011/FY2012) budget request in meetings with the Department, OMB, and Congress.
  - Chief Counsel –
    - Continue to provide litigation support to the agency before federal courts, Equal Employment Opportunity Commission (EEOC) and the Merit System Protection Board (MSPB);
    - Provide legal advice and guidance on TSA's transition to a four-tiered performance measurement/employee performance rating system;
    - Issue or review regulations on Canine Searches and Cargo Screening, Credential Authentication Technology/Boarding Pass Scanning System Pilot, Stand-Off Detection Passive Millimeter Wave Screening SOP, Freight Rail Security, Large Aircraft Security Program, Aircraft Repair Station Security, Fee Increases for Transportation Worker Identification Credential (TWIC)

Maritime, and draft rule on Protection of Sensitive Security Information (SSI) in Federal Civil Court proceedings; and

- Finalize regulations for rail security and air cargo security.
- Security –
  - Increase the level of background investigations for all newly hired TSOs to a Minimum Background Investigation rather than the current National Agency Check and Inquiry based on their designated position sensitivity level;
  - Initiate re-investigations for employees who have been employed at TSA for at least five years through a three-year phased approach, beginning in FY 2010; and
  - Continue to conduct upgrade re-investigations on the remainder of approximately 9,000 TSOs to grant Secret security clearance eligibility.

FY 2011 planned accomplishments include:

- Inspection – Increase of 242 FTP, 12 FTE and \$6.3 million to support the enhanced security at the checkpoint.
  - Increase number of covert testing team leaders dedicated to multi-modal covert testing and participation in security exercises and expand covert testing of aviation security operations and air cargo programs;
  - Begin new cycle of FSD inspections to evaluate management effectiveness, morale of the workforce, communications, and ensure FSD offices are adhering to management directives and standard operating procedures;
  - Conduct risk assessments of TSA operations and execute 20 internal reviews and airline audits to address potential weaknesses.
- Acquisition –
  - Strengthen contract oversight, including consistent file and process reviews of the end-to-end procurement process; and
  - Formulate Acquisition Logistics guidance and policy, develop documentation requirements for the Integrated Logistics Support Plan, and implement the strategic sourcing plan.
- Chief Administrative Officer –
  - Deploy eTagging fully and pilot/integrate it into a deployable electronic records management system (eRMS).
- Chief Financial Officer –
  - Continue to present and obtain critical resources to effectively and efficiently support TSA's mission;
  - Continue to sustain an unqualified (clean) audit opinion on the FY 2010 Financial Statements, sustain improvements and prepare TSA for transition to the next generation of DHS financial and administrative systems.
- Chief Counsel – Increase 25 FTP, 13 FTE, and \$2.9 million to support the enhanced security at the checkpoints.
  - Provide strategic legal guidance to TSA on several high-dollar, high-risk acquisitions to support enhanced security measures, including defending the agency at bid and award protests;
  - Provide legal advice to the FAMS on use of deadly force and ethics.

- Write Security Directives and regulations/rulemaking for all aspects of transportation security; and
- Adjudicate the imposition of civil penalties and represent TSA in civil penalty actions.
- Security –
  - Continue to conduct re-investigations of approximately 25,000 current employees who have been employed at TSA for at least five years and require periodic background re-investigations; and
  - Continue to reduce the processing time for the background investigation and thus quicken the pace of the hiring process, clear re-investigation backlogs, and strengthen security through more thorough Minimum Background Investigations.

**Workforce Support:** \$20.9 million in operating expenses supports all aspects of sustaining approximately 50,000 employees and ensuring an excellent working climate and a safe and healthful environment while performing TSA’s mission. In addition, these programs ensure fair and lawful treatment of employees and the public. Offices that provide workforce support include:

- Special Counselor includes Offices of Audit Liaison, Executive Secretariat, Freedom of Information Act (FOIA), Civil Rights and Civil Liberties (OCRL), Ombudsman, Privacy, SSI, and Transportation Security Redress –
  - Audit Liaison is the TSA point of contact for audits performed by the Government Accountability Office (GAO) and the DHS Office of the Inspector General (OIG);
  - Executive Secretariat manages the preparation and coordination of correspondence with DHS, Congress, and the public, briefing materials for the Secretary and Deputy Secretary, and congressional Questions for the Record and Reports to Congress. It also operates the TSA Contact Center which responds to traveler inquiries;
  - FOIA responds to FOIA and Privacy Act requests from the public, Congress, and other government agencies;
  - OCRL provides Equal Employment Opportunity services including education, traditional counseling, mediation, and formal complaint investigation;
  - Ombudsman provides neutral and confidential problem resolution services to employees and the public for issues involving TSA;
  - The Privacy Office ensures that TSA complies with all privacy laws and regulations;
  - Transportation Security Redress provides an appeal forum for individuals identified as a threat or a potential threat to transportation security; and
  - SSI ensures that TSA complies with all laws and regulations regarding the recognition, identification, and safeguard of SSI.
- Chief Administrative Officer includes Occupational Safety and Health and Environment (OSHE), Property Management, Real Estate Services, and Information Management Programs –

- OSHE works to bring facilities into compliance, provide a safe and healthful working environment and reduce injuries and illness;
- Property Management provides accountability of all personal property owned by TSA, manages the fleet and transportation program, transit benefits, and HQ parking;
- Real Estate Services provides facilities services for field workspace locations by managing office and airport space allocations; lease acquisitions; design, construction and renovation of tenant space; furniture acquisition; and HQ building management and facilities support; and
- Information Management Programs manages the release of official agency records, management directives, and official forms.

Significant accomplishments in FY 2009 included:

- Special Counselor –
  - Continued streamlining of the process for delivering requested documents to GAO and OIG in a timely manner;
  - Continued to manage contacts from the public and official agency documents, including letters and Questions for the Record from Congress, and Reports to Congress;
  - Held TSA’s Annual Coalitions Meeting and hosted community outreach meetings with leaders from the disability and multi-cultural communities; and expanded relationships with minority-serving institutions by establishing a multi-year rotational assignment;
  - Improved reporting by providing quarterly updated site-specific contact data to TSA management via SharePoint; and launched a moderated intranet forum for employees on workplace policies and practices;
  - Developed and refined information sharing methods and responsiveness to ensure that programs tracking passengers are consistent with civil rights laws and policies; and
  - Continued the TSA-wide SSI Awareness campaign through improved guidance, targeted site visits, and an expanded training conference and implementation of the Controlled Unclassified Information (CUI) framework in conjunction with SSI.
- Chief Administrative Officer –
  - Completed the formal occupational safety and health inspections of all TSA airport operational and administrative facilities;
  - Initiated and piloted the Safety Information System (SIS) Case Management Module (one-step) and presented nine SIS Hand-on Training courses;
  - Exceeded the goal for the Safety, Health, and Return to Employment (SHARE) injury rate by three percent; and
  - Piloted and presented a total of 16 TSA 600-Collateral Duty Safety Officers’ Applied Courses for TSA operations.

FY 2010 planned accomplishments include:

- Special Counselor –
  - Further develop the persons with disability and multi-cultural program and continue outreach efforts with the disability and multi-cultural communities.
  - Expand alternative dispute resolution program and programs offered in observance of Conflict Resolution Day to include a specific emphasis on workplace bullying;
  - Expand SSI education and awareness programs and continue to implement CUI; and
  - Enhance the hosting center support and the Redress Case Management System operation.
- Chief Administrative Officer –
  - Implement the SIS Case Management Module (one-step) TSA wide;
  - Meet the requirements of the SHARE initiative by reducing the total injury case rates and lost time case rates; and
  - Complete formal Occupational Safety and Health Inspections of all Federalized airport facilities and program evaluations.

FY 2011 planned accomplishments include:

- Special Counselor – Increase of 6 FTP, 3 FTE and \$317,000 to support DHS Traveler Redress Inquiry Program (DHS TRIP).
  - Deploy kiosks in CAT X and CAT 1 airports, which will allow persons to apply for redress in real time in an electronic, secure, and streamlined fashion.
  - Utilize technology and automated business processes to provide effective and timely management of OCRL cases and EEOC-mandated reporting requirements; and
  - Continue to raise employee awareness of options available to informally resolve disputes by hosting TSA's observance of Conflict Resolution Day;
- Chief Administrative Officer –
  - Continue to meet the requirements of the SHARE Initiative by reducing the total injury case rates and lost time case rates;
  - Expand the Health Unit Program and services to field units; and
  - Complete the formal Occupational Safety and Health Inspections and program evaluation of all TSA facilities.

**Facilities Management and Physical Security** – \$34.2 million is necessary for operating expenses managed by the Chief Administrative Officer including facility and management support for HQ, the Freedom Center, the Franconia Warehouse, and the Mission Support Centers (MSCs). The Franconia warehouse is used to stage TSA equipment prior to deployment, store special purpose consumables, and temporary storage of property and equipment during construction projects. The MSCs are the central field service support mechanism for TSA across transportation modes. They

provide TSA field personnel with support within designated areas, located in San Francisco, CA; Atlanta, GA; Dearborn, MI; Philadelphia, PA; and Coppell, TX.

Significant accomplishments in FY 2009 included:

- Continued co-location of TSA with the Federal Protective Services/Immigration and Custom Enforcement personnel at the Philadelphia MSC;
- Completed the state-of-the-art Transportation Systems Integration Facility (TSIF) project to facilitate enhanced baggage and passenger screening innovation at DCA; and
- Completed design for 12,500 square feet of un-built space at the Freedom Center in Northern Virginia.

FY 2010 planned accomplishments include continued support of tenant activity and mission critical requirements and identification of additional energy cost saving HQ projects.

FY 2011 planning includes the implementation of furniture modification requests at TSA HQ to support mission critical requirements.

Transportation Security Administration  
Transportation Security Support:  
Human Capital Services  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Human Capital Services**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>188</b>	<b>181</b>	<b>192,543</b>
<b>2010 Enacted</b>	<b>231</b>	<b>222</b>	<b>226,338</b>
2011 Adjustments-to-Base	-	-	14,538
<b>2011 Current Services</b>	<b>231</b>	<b>222</b>	<b>240,876</b>
2011 Program Change	-	-	21,871
<b>2011 Total Request</b>	<b>231</b>	<b>222</b>	<b>262,747</b>
Total Change 2010 to 2011	-	-	36,409

The Transportation Security Administration requests \$262.7 million for Human Resources (HR) services for Headquarters and field offices. The adjustments-to-base include \$180,000 for pay annualization, \$411,000 for pay inflation, \$15,000 for annualization of program increase, \$13.9 million for realignment of Human Capital (HC) Systems and support from the Information Technology PPA to this PPA, and \$21.9 million for program change.

**CURRENT SERVICES PROGRAM DESCRIPTION**

The following table provides the components that make up this PPA.

(Dollars in Millions)

	<b>FY 2010</b>	<b>FY 2011</b>
Personnel	\$32.3	\$36.1
HR Services and Administration	54.6	
Recruitment and Assessment	96.5	
HR Access -- Recruitment, Assessment, & Personnel Administration		182.2
Other HC Services	29.6	31.0
Leadership Training & Development	13.3	13.4
<b>Total</b>	<b>\$226.3</b>	<b>\$262.7</b>

The Office of Human Capital Services (OHCS) maintains oversight of all human resources contractual activities, develops policies, guidance and programs that are used to identify and promote the best and most efficient HR practices allowing TSA to establish

and administer programs necessary to create and sustain a diverse and highly skilled workforce.

**Personnel:** \$36.1 million in personnel costs are included in this PPA to support all HR activities at headquarters.

**HR Access:** The request includes \$182.2 million to provide HR Services to employees in the field and Headquarters. The OHCS provides human capital functions through the acquisition of the HRAccess Program to meet the Federal human capital service excellence mission of TSA. This contract combined the services provided by three separate contractors to one service provider who has expertise in Federal human capital services, program management, business and financial management, and systems and process integration enabling it to perform the full range of human capital operations, seamlessly in an end-to-end process supporting the entire life cycle of the TSA employee. HR Access manages \$10 million of the HC systems and support that is realigned from the Information Technology PPA.

HRAccess aligns with the Enterprise Architecture of the Department of Homeland Security and leverages available e-systems that create efficient services and processes. As a result, TSA benefits from improved customer service both through feedback and stakeholder communications, innovative approaches utilizing automated solutions and Federal best practice applications, and improved efficiency through system/process integration resulting in reduced overhead.

FY 2009 accomplishments included:

- Completed process mapping of all HR operations to include hiring process for Transportation Security Officers (TSOs), Management, Administrative, & Professional (MAPs) positions, and Federal Air Marshals (FAMs);
- Created a TSO Realistic Job Preview (RJP) linked to the application, which provides approximately 12 minutes of TSO testimonial describing the duties/responsibilities of a screener;
- Developed an Integrated Hiring Solution (IHS) with an automated process to include notifications to candidates and hiring managers via an integrated candidate and manger dashboard;
- Began development of a Table of Organization for the Office of Security Operations;
- Developed of Job Analysis Tool (JAT; Position Description) Library resulting in standardized job descriptions written in plain language;
- Developed MAP Recruiting – a comprehensive recruitment plan using marketing concepts, potential sourcing avenues, advertising samples, effective job posting placements, and TSA engagement activities, such as university contacts, job fairs, online resources, virtual career fairs, and professional networking organizations;
- Rolled out a new TSO application that includes 28 disqualifiers to allow for an earlier self select-out process and moved quick-check earlier in the hiring process with the goal to refine the candidate pool with higher acceptance rate, higher

quality candidates, improved job expectations and eliminating candidate bottlenecks; and

- Implemented eOrientation for new TSOs which streamlined and reduced the orientation process to two to three hours.

FY 2010 planned accomplishments include:

- Complete a Table of Organization for Security Operations and commence development of a Table of Organization for the rest of TSA; and
- Streamline automated awards and recruiting processing systems to reduce input errors and speed processing; and
- Refine Full Operational Metrics to evaluate the HRAccess vendor performance as related to delivery of services and costs under the HRAccess contract. Specific metrics include evaluating the rates of:
  - TSO hiring actions that are processed in compliance with Federal law and TSA business rules;
  - MAP hiring actions that are processed within TSA established business rules and meet OPM 45 day requirement;
  - TSES certified applicants that meet the 90 day OPM deadline from date of application to date of certification;
  - Personnel transactions processed according to Federal Regulations and Guidelines;
  - Helpdesk first call resolutions; and
  - Improvement in overall customer satisfaction.

In FY 2011, an integrated data warehouse will be fully functional. Additionally HRAccess program will continually refine the new integrated system to realize efficiencies and cost savings to the government. OHCS will also review the service levels being delivered and the methodologies, tools, and staffing levels being employed by the HRAccess vendor with the objective of identifying further opportunities for improvements.

**Other Human Capital Services:** The \$31.0 million is requested for benefits, mandatory programs, employee relations, program management support of Human Capital systems, and management of the Worker's Compensation program. The benefits include the Employee Assistance Program, LifeCare, flu vaccinations, and retirement assistance. Mandatory programs include drug and alcohol testing and Unemployment Compensation.

The Workers' Compensation Program oversees the Workers' Compensation chargeback from the Department of Labor and the Nurse Case Management Program. The Program established the Periodic Roll Initiative (PRI) in April 2007. The initiative is a joint effort with the Nurse Case Management team in which all of the long term disability (Periodic Roll) cases are examined for opportunities to return employees back to work when medically feasible.

MedLink is utilized to schedule and provide MRI and CT Scans for TSA employees with work-related injuries. Using MedLink's service expedites the scheduling of MRI and CT Scans at a reduced cost. This service schedules appointments with local radiology and diagnostic imaging centers at the earliest possible date, providing the employee's physician with an image and image study within 24 hours of testing. This enables the physician to provide accurate and timely diagnosis for quality care and medical treatment.

FY 2009 accomplishments included:

- Completed the review and assessment all 965 periodic roll cases to determine: 1) if the employee is able to return to duty (full or limited), the case was medically resolved, or 2) the case required continued monitoring due to long term disability;
- Resolved a total of 609 periodic roll cases, as of March 31, 2009, which represents 63 percent of the original claims noted at the beginning of this initiative. The projected annual salary savings equates to \$18.3 million, offset by increases in the federal salaries and the cost of medical care; and
- Conducted 173 diagnostics tests using MedLink from October 2008 to March 2009 were conducted for a cost savings of \$52,422.

FY 2010 planned accomplishments include:

- Continue focused efforts to clear periodic roll cases while addressing new injury claims through medical management within the Nurse Case Management Program protocol;
- Continue use of the MedLink services; and
- Implement a Prescription Network (Pharmacy Benefit Management or PBN). TSA plans to provide a prescription service network for employees to utilize in conjunction with the Nurse Case Manager Service. The nationwide pharmacy prescription network will be designed specifically for workers' compensation claims. The PBN will provide prescription medication through a network provider for reduced costs to the agency. This will also provide oversight to ensure that the medication billed as part of the Workers' Compensation injury is directly related to the injury. Additional benefits provided by the prescription network will include:
  - A proven first fill program with no out-of-pocket expense for the injured staff member and no financial risk for the TSA,
  - Point-of-Sale Drug Utilization Review,
  - Two (2) levels of clinical review to protect the agency and the injured staff member, and
  - Opportunity for the program to assess proper dosing, frequency, drug interactions, and medication use related to the identified injury.

In FY 2011, Workers' Compensation Program will continue to review and assess any remaining periodic roll cases and all newly added periodic roll cases and continue to use

MedLink. The newly implemented prescription network will be reviewed and assessed for performance improvements and program enhancements.

**Leadership Training and Development Program:** \$13.4 million is requested for training and development of Headquarters and Field staff. OHCS works closely with TSA leadership to develop and administer programs to prepare for the future leadership needs of TSA and fulfill the succession planning mandate assessed by the Office of Personnel Management and DHS. This requires identifying the most critical current and future senior leadership requirements, preparing a pipeline of talented and motivated leaders at all levels who will be ready to take on new challenges and identifying the best external sources of recruitment when internal sources are insufficient to meet critical needs.

All employees benefit from better-prepared, better-trained leaders who ensure that TSA accomplishes its important mission and advances the goal of becoming a highly effective and agile organization, and an employer of choice. The Succession Plan provides the opportunity for current leaders to make an investment in the development of future leaders and in the long-term success of TSA. TSA's program to develop bench strength for the most senior positions has been launched in three phases so far, designated below as Senior Leadership Development Program (SLDP) 1, 2, and 3. These first three phases each targeted different pools of critical positions.

Professional development training provides mission-related training that is either beneficial for an employee in his/her current position or for professional development that will increase the employee's ability to contribute to TSA's mission in another capacity. The TSA Career Resident Program is a formal career development program designed to attract exceptional candidates with diverse backgrounds into targeted entry level positions.

FY 2009 accomplishments included:

- Substantially redesigned Mid-Level Development Program that is right-sized to projected turnover in targeted critical positions; contained well-defined program components, and improved program support tools;
- Graduated the first class of 57 Senior Leadership Development Program (SLDP1) participants and evaluated the program components;
- Completed all program development activities for SLDP2 participants and many activities for SLDP3, as well as first stages of program evaluation for SLDP2;
- Completed the conversion of 12 self-study leadership training courses from print-based workbooks to web-based training. By converting to web-based training, TSA will substantially reduce production and distribution costs, while increasing the audience size from 800 in FY 2009 to more than 12,000 in 2010;
- Continued to offer *Foundations of Leadership* (1,060 course completions), *Transition to Security Manager* (95 completions), and *Leading From the Middle* (75 completions); and

- Initial selection and development of participants for the TSA Career Resident Program, which included exceeding participation goal by 100 percent.

FY 2010 planned accomplishments include:

- Develop and test new learning and development tools for aspiring mid-level managers with new class of Mid-Level Leadership Development Program (MLDP09);
- Graduate SLDP2 and TSES classes, accomplish OPM certification for graduates of SLDP3, which is a Candidate Development Program (CDP), and evaluate both programs;
- Begin evaluation and redesign analysis for *Transition to Security Manager* and *Leading from the Middle*;
- Update corporate succession plan, including identification of critical positions and related competencies, projection of near-term turnover and internal/external selection ratios, evaluation of internal and external feeder pools, and recommendation of specific succession strategies;
- Offer at least 3,000 seats of cutting edge, synchronous e-learning to first line supervisors on supervisory topics such as leave, medical; Family Leave Act; and charges and specifications;
- Develop and pilot *Essential Leadership Skills for Lead Transportation Security Officers*;
- Complete a comprehensive review of all leadership training programs and skills-focused training to ensure complete alignment with strategic goals and elimination of redundancies; and
- Continue and conduct ongoing evaluation of current TSA Career Resident Program class, and conduct planning of next rollout including exploring opportunity for a national program.

In FY 2011, OHCS will roll out new and/or revised learning and development programs and learning tools based on the results of prior evaluation and senior leadership input. OHCS will complete the FY 2010 cohort of the Mid-Level leadership Development Program and will begin to design selection criteria and activities for the FY 2011-2012 cohort. It is anticipated 600 first line supervisors and 200 mid-level supervisors will receive leadership training through redesigned programs. The Career Residency Program will expand to a national level and will continue to work to attract multi-talented and diverse individuals.

**Department of Homeland Security  
Transportation Security Administration  
Transportation Security Support:  
Information Technology  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Information Technology**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>141</b>	<b>125</b>	<b>476,880</b>
<b>2010 Enacted</b>	<b>155</b>	<b>149</b>	<b>498,310</b>
2011 Adjustments-to-Base	-	-	(21,938)
<b>2011 Current Services</b>	<b>155</b>	<b>149</b>	<b>476,372</b>
2011 Program Change	-	-	4,063
<b>2011 Total Request</b>	<b>155</b>	<b>149</b>	<b>480,435</b>
Total Change 2010 to 2011	-	-	(17,875)

The Transportation Security Administration requests \$480.4 million to support information technology (IT) for Headquarters and field offices. This is a decrease of \$17.9 million from FY 2010. The adjustment-to-base decrease of \$21.9 million consists of a \$13.9 million decrease due to the realignment of an IT system to the Human Capital Service PPA, an \$8.8 million decrease of non-recr funding for Data Center Migration, a \$107,000 increase for pay annualization, a \$251,000 increase for pay inflation, and a \$402,000 increase for the annualization of FY 2010 program increase. The FY 2011 program change is a \$4.1 million increase to the IT base for Whisper Communications technology and IT support related to increased staff levels.

**CURRENT SERVICES PROGRAM DESCRIPTION**

The following table provides the components of the PPA's Current Services.

(dollars in millions)

	<b>FY 2010</b>	<b>FY 2011</b>
Core Information Technology Program	\$401.3	\$398.3
Personnel/Financial Management Systems	70.6	57.8
e-Government Operating Platform	2.5	0
IT Personnel	23.9	24.3
<b>Total</b>	<b>\$498.3</b>	<b>\$480.4</b>

**Core Information Technology (IT) Program:** A total of \$398.3 million supports the core IT and telecommunications infrastructure for all TSA enterprise-wide IT services that assist in accomplishing TSA mission responsibilities. The core enterprise IT capability is supported through an information technology infrastructure contract that provides TSA the flexibility to manage and adjust IT resources as necessary. The IT business model that TSA has implemented offers the prospect of long-term cost efficiencies and the implementation of state-of-the-art technologies without sacrificing the integrity or security of IT systems.

FY 2009 significant accomplishments included:

- Completed the migration of the TSA's main data center to the DHS consolidated solution;
- Scored 100 percent on the OMB Federal Information Security Management Act (FISMA) scorecard; and
- Awarded the security operations center (SOC) contract to centralize security monitoring for all TSA systems.

FY 2010 planned accomplishments include:

- Reengineering the data storage, backup, and recovery environment at TSA to ensure services are aligned with evolving demand of TSA;
- Transitioning from the current IT managed service contract to a new competitively awarded DHS Enterprise Acquisition Gateway for Leading Edge Solutions (EAGLE) contract; and
- Maintaining a score of 100 percent on the OMB FISMA scorecard.

In FY 2010, TSA will deploy a number of new radios and whisper communications devices to the TSA security workforce. The use of whisper communications will improve efficiency of operations, enhance current communications, and expedite the screening of passengers. In FY 2011, TSA will continue to service and update the large land mobile radio (LMR) and checkpoint communication equipment base, and routinely evaluate the needs of the screener workforce to enhance communication capabilities wherever possible.

TSA has planned objectives in FY 2011 to strengthen its IT security posture of TSA and reevaluate current network and IT infrastructure resources for optimum efficiency. TSA is working with DHS to align current IT capabilities including network, infrastructure, IT security, information sharing, applications development, and engineering support requirements to DHS strategic objectives. To accomplish this goal, TSA has aligned a number of core IT services with the existing DHS EAGLE contract to further improve mission support and operational efficiency across DHS. The alignment will help deliver enhanced business-focused IT services and a more robust telecommunications infrastructure for all TSA employees. The funding in FY 2011 will also assist TSA in developing an IT environment which promotes collaboration throughout TSA and the DHS component agencies. Enhancements to the IT environment include:

- Transitioning and optimizing current data circuits to the GSA Network contract;
- Evaluating and testing solutions for a proposed cloud computing environment; and
- Consolidating and centralizing IT system monitoring.

The TSA IT infrastructure supports the technology assets of airport, Headquarters, and TSA Freedom Center personnel. The personnel equipment requires a large wide area network to support the information needs of the TSA user base. TSA will provide support for the large distributed user base through robust IT engineering efforts, infrastructure operations, and enterprise application services. Resources are allocated for ongoing operations and maintenance for the TSA data centers, operation centers, failover resources, applications, operating platform management, database management, application systems, system performance monitoring, and configuration management. Support includes:

- National Help Desk support, which includes software, licensing and software distribution support;
- Headquarters and Airport IT support;
- Security Incident Response;
- Checked baggage and passenger screening data;
- Performance management data analysis;
- Equipment maintenance and legacy systems support;
- Wireless infrastructure support and maintenance; and
- Technical architecture compliance and enterprise architecture-related support.

A primary objective for TSA is to provide limited failover capabilities in the event that IT systems at the primary Data Center, HQ server facility, or the Freedom Center server facility are lost or become inoperable for an extended period of time. TSA will reevaluate the current storage and retrieval capabilities to improve the time and availability of data in the event of a system failure.

Federal Information Security Management Act (FISMA) compliance is a main objective of the TSA IT community. IT security will allocate resources to perform audit and assessment reviews to test the compliance of IT systems, including the physical review of sites that house TSA's IT systems. TSA IT security enhancements will allow the agency to continue to maintain full FISMA compliance. Certification and accreditation (C&A) management will develop, implement and enhance the continuous monitoring phase of the IT Security Life Cycle.

The growing needs of the TSA communication security (COMSEC) user base requires TSA to continually enhance secure communications to stakeholders and help desk capability. The service area includes the continued modernization of secure communication units as well as infrastructure protection which includes but is not limited to:

- Firewalls;
- Intrusion detection and prevention;
- Antivirus;
- Content monitoring; and
- Managed Security Services.

The Electronic Time and Attendance System (eTAS) project will streamline and automate the process currently utilized to support collection and data input of timecards and collection of performance metrics for the airport support staff. Current processes and available automation are legacy based, which make the continuance of the same functionality ineffective and cost prohibitive. This effort endeavors to eliminate paperwork, provide cost accounting, and provide management with the tools and resources needed to effectively evaluate cost alternatives with respect to FTE management and technological developments. In FY 2011, TSA will continue operations and maintenance of systems and leverage connectivity to expand automated processes.

The IT core program provides focused and efficient management practices and support services while seeking the achievement of contract results, not contract compliance, in meeting the IT mission solutions needs of TSA. In addition, the IT training program provides staff the necessary resources to improve the alignment of requirements in TSA business portfolios in support of the Agency mission.

**Personnel/Financial Management Systems:** This activity funds \$57.8 million of interagency agreements with Coast Guard and the U.S. Department of Agriculture for the use of their financial management, personnel, and payroll systems. This also funds reimbursements to the Department of Homeland Security for the costs of the Working Capital Fund, related to operational information management support functions.

**IT Personnel:** This PPA includes \$24.3 million to support 155 FTP / 149 FTE for Information Technology support. These personnel consist of IT engineers, application developers, technical specialists, and associated support professionals. They provide the IT infrastructure and services to TSA Headquarters and field locations.

## IV. Program Justification Changes

**Department of Homeland Security  
Transportation Security Administration  
Transportation Security Support:  
Intelligence  
Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Expand FIOs and Technical Adjustment  
PPA: Intelligence  
Program Increase: Positions 31.0, FTE 16.0, Dollars \$6620.0

### Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	155	124	23,007	180	167	28,203	195	186	31,168
Program Increase							31	16	6,620
<b>Total Request</b>	-	-	-	-	-	-	<b>226</b>	<b>202</b>	<b>37,788</b>

### Description of Item

The total cost to enhance technical capability and expand the Field Intelligence Officer (FIO) program is \$7 million with 31 FTP / 16 FTE and \$6.6 million in the Intelligence program, and \$392,000 in the support programs (which is included under Program Increase #2)

The additional funds provide technical enhancements for communications to support operation contingencies, the INTEL networks, storage, and increased Knowledge Management System (KMS) capabilities. The requested positions will support field locations with intelligence expertise regarding threats to transportation. This will provide critical field elements with intelligence expertise to quickly identify and communicate potential threats to transportation.

### Justification

The technical enhancements for communications will support the entire INTEL network. These software and hardware solutions are absolutely essential for modern and effective intelligence communications. The FIO program has proven to be a great success for TSA by enhancing aviation security through facilitating the sharing of information. The 31 additional FIOs will increase TSA's coverage at category X airports from 71 percent to 100 percent and expand coverage at category I airports from 34 percent to 73 percent.

Impact on Performance (Relationship of Increase to Strategic Goals)

INTEL provides classified voice, data, and video systems for TSA and maintains classified IT connectivity to the Intelligence Community and to TSA sites. INTEL maintains the TSA Remote Access to Classified Enclaves (TRACE) to provide geographically separated field units with classified connectivity in near real-time. INTEL also requires large amounts of storage space for products and data as well as the KMS to assist analyst in their activities. These technical enhancements will increase INTEL KMS capability, ensure continuity of operations, and increase secure communication capability.

Currently, the office operates with personnel strategically located across the continental U.S. at significant transportation nodes. The increased FTE requested in FY 2011 will expand this coverage to critical field locations that are currently without this support, making intelligence information operational and making it available to those who need it in a timely fashion. The requested increase will enable the intelligence program to meet its planned milestones to expand the use of analysis to identify potential weaknesses in the transportation system and provide corresponding mitigation strategies.

The below table illustrates the FTE distribution across category X, I, and II airports.

	Total Airport	FIO FY10	% Covered FY10	FIO FY11	% Covered FY11	With Additional 31 requested	% Covered FY11 + 31 additional
Category X	28	20	71%	20	71%	28	100%
Category I	56	12	21%	19*	34%	41	73%
Category II	77	0	0%	0	0%	1	1%
<b>TOTAL</b>	<b>161</b>	<b>32</b>	<b>20%</b>	<b>39</b>	<b>24%</b>	<b>70</b>	<b>43%</b>

Current Services Level	188	181	192,543	231	222	226,338	231	222	240,876
Program Decrease							-	-	(1,000)
<b>Total Request</b>	-	-	-	-	-	-	<b>231</b>	<b>222</b>	<b>239,876</b>

Description of Item

The FY 2011 request includes a reduction of \$1 million from the Human Capital Services PPA.

Justification

In order to sustain critical support of operational programs, TSA proposes to reduce corporate training by \$1 million. This reduction will not directly affect current levels of support.

Impact on Performance (Relationship of Decrease to Strategic Goals)

To accommodate this reduction, TSA will reduce the number of leadership and development training offerings and the number of participants in the Senior Leadership Development Program.

**Department of Homeland Security

Description of Item

The program increases in the Transportation Security Support appropriation directly support the initiatives in aviation security to enhance security at the checkpoints. The program increases are as follows:

Program Increases	HQA	HCS	ITS	Positions
Screening Technology -- Whisper Communication Technology to support AIT, EDS/ETD and portable ETD (See Aviation Security Program Increase #1)			6,000	
Enhanced Airport Security -- Support increase in TSO, BDO and Airport Staffing (See Aviation Security Program Increase #2)	20,315	21,587	4,922	55 FTP, 28 FTE
International Security (See Aviation Security Program Increase #3)	231	269	150	
Information Sharing & Intelligence Coordination (See Transportation Security Support Program Increase #1)	216	113	63	
Canine (See Aviation Security Program Increase #4)	850	902	25	
Total	21,612	22,871	11,160	55 FTP, 28 FTE

## Justification

The Transportation Security Support Appropriation funds transportation security support staff at Headquarters and field locations throughout the United States that provide leadership, management, and support to TSA.

Headquarters Administration provides all aspects of the support infrastructure required to sustain TSA's nation-wide operations. These activities include leadership, internal management and controls, workforce support, and facilities management and physical security. Program increases will fund the following new positions:

- Investigator positions, 12 FTE and \$6.3 to conduct covert testing and internal inspections;
- Attorney positions, 13 FTE and \$2.9 million to provide legal guidance on acquisitions, security directives, and regulatory and rulemaking issues; and
- DHS Traveler Redress Inquiry Program enhancement of 6 positions, 3 FTE and \$317,000.

Human Capital Services includes the services to support the recruitment, assessment, servicing, and payroll of all TSA employees at headquarters and in the field. The increase of \$22.9 million is for recruitment and servicing of new Transportation Security Officers (TSO), Behavior Detection Officers (BDO) and support staff hired in response to the evolving threats to transportation security such as the attempted attack on Christmas Day 2009.

The Information Technology program at TSA provides a suite of IT services to Headquarters and field locations throughout the United States. Funding provided within the PPA supports the core IT functional requirements of the organization, which include the voice and data network, email, file storage, wireless communications, personal computing equipment, and cyber security services for an agency of over 50,000 personnel spanning more than 400 locations. The above items provide TSA with a stable, secure, and reliable IT operating environment. The program increase of \$11.2 million is for whisper communications technology to support the deployment of approximately 1,000 new Advanced Imaging Technology machines in FY 2010 and FY 2011 as well as core IT functions to support the new workforce.

### Impact on Performance (Relationship of Increase to Strategic Goals)

TSA supports DHS Objective 3.1: Protect and strengthen the resilience of the Nation's critical infrastructure and key resources, by focusing resources on the TSO workforce, specifically through ensuring readiness in areas where the threat is greatest. TSA will accomplish this objective by dedicating resources to workforce support, vulnerability assessment, and workplace infrastructure support.

<b>Total Request</b>	-	-	-	-	-	-	<b>155</b>	<b>149</b>	<b>469,275</b>

Description of Item

The FY 2011 request includes a reduction of \$7.1M from the Information Technology (IT) Support PPA.

Justification

TSA proposes to reduce the Information Technology base by \$7.1 million. This reduction will have limited impacts on the security of TSA’s network. The IT environment will remain stable, secure, and reliable with the proposed level of base funding.

The Information Technology program at TSA provides a suite of IT services to Headquarters and field locations throughout the United States. Funding provided within the PPA supports the core IT functional requirements of the organization which include: the voice and data network, email, file storage, wireless communications, personal computing equipment, and cyber security services for an agency of over 50,000 personnel spanning more than 400 locations.

Impact on Performance (Relationship of Decrease to Strategic Goals)

TSA supports DHS Objective 3.1: Protect and strengthen the resilience of the Nation’s critical infrastructure and key resources, by focusing resources on the TSO workforce, specifically through ensuring readiness in areas where the threat is greatest. TSA will accomplish this objective by dedicating resources to workforce support, vulnerability assessment, and workplace infrastructure support.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

#### Department of Homeland Security Transportation Security Administration

#### **Justification of Proposed Changes in Transportation Security Support Appropriation Language**

For necessary expenses of the Transportation Security Administration related to providing transportation security support and intelligence pursuant to the Aviation and Transportation Security Act (Public Law 107-71; 115 Stat.597; 49 U.S.C. 40101 note), [1,001,780,000] **\$1,052,369,000** to remain available until September 30, ~~2011~~ **2012**. (Department of Homeland Security Appropriations Act, 2010)

#### **Explanation of Changes:**

TSA has complied with the provisions included in previous language.

### PPA Mission Statement

Provide Intelligence Analysis, Coordination, and Dissemination -- TSA will continue to provide current and strategic warning regarding threats to U.S. transportation modes and identify trends and changes in targeting. The TSA intelligence unit analyzes intelligence and disseminates information through liaison with intelligence community agencies.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>11.1 Total FTE &amp; personnel compensation</b>	<b>12,199</b>	<b>16,424</b>	<b>20,191</b>	<b>3,767</b>

Salaries and Benefits includes costs for 202 FTE. The FY 2011 request includes \$95,000 for pay annualization, \$231,000 for pay COLA and annualization of FY 2011 program increase of 6 FTE and \$770,000.

Salaries and benefits includes costs for 149 FTEs. The FY 2011 request includes an increase of \$315,000 attributed to pay annualization and pay COLA.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>12.1 Civilian personnel benefits</b>	<b>3,527</b>	<b>4,790</b>	<b>4,853</b>	<b>63</b>

Salaries and benefits includes costs for 149 FTEs. The FY 2011 request includes an increase of \$315,000 attributed to pay annualization and pay COLA.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>21.0 Travel and transportation of persons</b>	<b>73</b>	<b>300</b>	<b>300</b>	<b>-</b>

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2011 request remains static.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>22.0 Transportation of things</b>	<b>49</b>	<b>35</b>	<b>35</b>	<b>-</b>

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2011 request remains static.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>23.1 Rental payments to GSA</b>	<b>1,177</b>	<b>1,100</b>	<b>1,100</b>	<b>-</b>

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2011 request remains static.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>23.3 Communications utilities and miscellaneous charges</b>	<b>50,029</b>	<b>61,600</b>	<b>62,100</b>	<b>500</b>

Communications, utilities, and miscellaneous charges includes all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2011 request includes an increase of \$500,000 for IT equipment and services to support an FY 2011 staff increase.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.1 Advisory and assistance services</b>	<b>172,441</b>	<b>95,650</b>	<b>95,800</b>	<b>150</b>

Advisory and assistance services includes services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2011 request includes an increase of \$150,000.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.2 Other services</b>	<b>122,869</b>	<b>179,849</b>	<b>154,284</b>	<b>(25,565)</b>

Other services includes report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2011 request includes a decrease of \$25,565,000 which reflects an across-the-board PPA reduction and a \$13.9 million PPA realignment for a Human Capital System.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.3 Purchases of goods &amp; svcs. from Gov't accounts</b>	<b>39,799</b>	<b>71,076</b>	<b>73,525</b>	<b>2,449</b>

Purchases from Government Accounts includes costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2011 includes an increase of \$2,449,000 due to Working Capital Fund increases and an FY 2011 staff increase.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.7 Operation and maintenance of equipment</b>	<b>59,598</b>	<b>42,375</b>	<b>34,400</b>	<b>(7,975)</b>

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment when done by contract with the private sector or another Federal Government account. The FY 2011 request includes a decrease of \$7,975,000 which reflects a reduction in non-recur Data Center Migration funds and an increase in equipment O&M to support an FY 2011 staff increase.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>26.0 Supplies and materials</b>	<b>451</b>	<b>650</b>	<b>650</b>	<b>-</b>

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. Some software purchases and computer supplies are included in this object class. The FY 2011 request remains static.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>31.0 Equipment</b>	<b>10,273</b>	<b>21,565</b>	<b>33,813</b>	<b>12,248</b>

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2011 request includes an increase of \$12,248,000 which reflects an increase in Whisper Communications technology and an increase in IT equipment to support an FY 2011 staff increase.

<b>BUDGET REQUEST AND SUPPORTING INFORMATION</b>
--

**Federal Air Marshals:**

## **I. Appropriation Overview**

### **A – Mission Statement for Federal Air Marshals:**

The Federal Air Marshal Service (FAMS) promotes public confidence in our Nation's civil transportation systems through the effective risk-based strategic deployment of Federal Air Marshals (FAMs) and other FAMS law enforcement resources in both air and land based mission-related assignments. The organization's primary focus is to detect, deter, and defeat terrorist or other criminal hostile acts targeting U.S. air carriers, airports, passengers, crew and other transportation modes within the Nation's general transportation systems.

### **B – Budget Activities:**

#### **Management and Administration (M&A)**

The FAMS's mission demands a host of critical planning, operational, and support programs to protect the public from the threat of a terrorist attack or other criminal activity. The FAMS's M&A programs encompass vital enforcement, information management, and infrastructure components necessary to support core operations. Examples include the FAMS's participation in Joint Terrorism Task Force (JTTF) operations and investigations, management and implementation of a sophisticated flight/mission scheduling and notification system, and performance of mission critical workforce management, command and control, information technology, logistics, and related services.

#### **Travel and Training (T&T)**

In order to maintain optimum readiness and perform its primary operational functions, the FAMS requires extensive training and mission travel capabilities. FAMs must undergo continuous training to maintain and expand their expertise in the full-range of skills necessary to operate within the transportation domain, to include specialized tactics, enforcement, surveillance detection, marksmanship, and other skill sets. Furthermore, this PPA funds the FAMS's mission travel activities, which are an integral component to the international and domestic flight coverage activities that are core to the FAMS mission.

**C – Budget Request Summary:**

The Transportation Security Administration (TSA) requests \$950,015,000 in FY 2011, an increase of \$89,904,000 over FY 2010. The total adjustments-to-base are \$4,877,000 which includes a permanent shift of \$5,058,000 to TSA's Aviation Security Appropriation to reflect the organizational transfer and realignment of TSA's Explosives Operations Division to TSA's Office of Security Operations. The program increase totals \$85,027,000 to:

- FY 2011 Mission Coverage Enhancement (\$85,027,000)

II. Summary of FY 2011 Budget Estimates by Program/Project Activity (PPA)

### III. Current Services Program Description by PPA

**Department of Homeland Security  
Transportation Security Administration  
Federal Air Marshals:  
Management and Administration  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Management and Administration**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	<b>728,052</b>
<b>2010 Enacted</b>	-	-	<b>762,569</b>
2011 Adjustments-to-Base	-	-	5,475
<b>2011 Current Services</b>	-	-	<b>768,044</b>
2011 Program Change	-	-	54,856
<b>2011 Total Request</b>	-	-	<b>822,900</b>
Total Change 2010 to 2011	-	-	60,331

The Transportation Security Administration requests \$822.9 million for this activity in FY 2011. The request includes a program increase of \$54.9 million to sustain domestic flight coverage while maintaining the enhanced international flight coverage initiated in response to the threat posed by Al Qaeda and associated groups to U.S. civil aviation. In addition, the proposed funding level reflects a permanent shift of \$4.5 million to the Aviation Security Appropriation to reflect the transfer and realignment of TSA's Explosives Operations Division to the Agency's Office of Security Operations.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Management & Administration (M&A) PPA funds the FAMS's payroll costs and supports all operational and infrastructure requirements with the exception of training and travel expenses. The vast majority of this PPA provides the salaries for FAMs and allows the workforce to provide the vital protective and law enforcement services necessary for both domestic and international air travel and other transportation-related security activities.

The remaining balance of M&A supports the continuing development and maintenance of the Service's infrastructure, internal business processes, and strategic systems that

enable FAMS to seamlessly perform the integrated set of functions that make up their mission. In addition to the activities detailed below, M&A provides funding for workforce management activities (background investigations, permanent change of station (PCS), etc); information technology; leasing and maintenance of facilities in Washington DC area, Atlantic City, NJ, and twenty-one field and four Resident Agent in Charge (RAC) offices across the country; and program infrastructure and logistics support such as vehicles, communications, duty equipment, and physical security.

Key programs of the Management & Administration PPA include:

**Joint Terrorism Task Force (JTTF):** The FAMS is a full participant in the JTTF, a nation-wide counter terrorism enforcement program managed by the Federal Bureau of Investigation (FBI). JTTFs target terrorism-related criminal threats against the United States or its interests. The FAMS has been an active full-time investigative partner in JTTFs providing support since 2002. The FAMS is able to partner with and provide support to the FBI and other law enforcement agencies via this program. The investigation of aviation and other transportation-related threats is the primary focus for FAMS's support to JTTF activities.

**Transportation Information Sharing System (TISS):** The TISS enables the collection, analysis, and dissemination of intelligence information observed by FAMS, TSA personnel, and State/Local law enforcement in the transportation sector. FAMS routinely submit Surveillance Detection Reports (SDRs) when they observe activities that fall below a predetermined threshold of an actionable incident. The FAMS's Tactical Information Branch (TIB) analyzes and investigates these reports and uses the information to identify a nexus of terrorist or criminal related activity, as well as trends, patterns, or associations that may reveal circumstances or subjects that are deemed to be of interest to Department of Homeland Security (DHS) intelligence.

**Visible Intermodal Prevention and Response (VIPR):** Deployments are conducted in all modes of transportation to effectively detect, deter, defeat, and disrupt potential terrorist and/or criminal activity. VIPR operations are planned and implemented through a risk-based approach utilizing existing intelligence, empirical data, security, and threat based assessments and analysis. The operations consist of teams of TSA personnel including FAMS, Transportation Security Inspectors (TSIs), Transportation Security Officers (TSOs), Behavioral Detection Officers (BDOs), Explosive Detection Canine Teams, Bomb Appraisal Officers (BAOs), and Federal, state and local law enforcement officers. The teams are tailored to each transportation mode, the specific needs of each transportation partner, as well as venue. In addition, VIPR deployments incorporate elements of randomness and are unpredictable in frequency, location, and duration. These resources are used to enhance TSA's overall ability to screen passengers, identify suspicious behavior, and act as a visible deterrent in multiple transportation sectors. In FY 2009, FAMS completed the hiring and deployment of 10 teams dedicated to the VIPR program. As a result of additional resources and an increased Federal, state and local stakeholder awareness of, and commitment to VIPR team deployments, the number of VIPR deployments has increased from four to five per week in 2007 to approximately

40 to 50 per week in 2009. Of the VIPR operations completed by TSA during FY 2009, approximately 55 percent were dedicated to the surface domain, including highways, freight rail, pipelines, mass transit, and maritime. The remaining 45 percent were focused in the aviation domain, including air cargo, commercial aviation, and general aviation. In FY 2010 and 2011, FAMS will continue to deploy resources in support of this vital transportation security program.

The following table provides the major component parts of the M&A PPA, with resources shown in millions of dollars.

	FY 2010	FY 2011
Payroll, Compensation and Benefits	\$648.9	\$662.9
Information Technology	45.7	45.7
Operations Infrastructure	68.0	59.4
Total	<b>\$762.6</b>	<b>\$768.0</b>

**Payroll/OWCP – \$662.9M:** This component, which amounts to approximately 77 percent of the total FAMS budget, covers all pay, compensation and benefits, overtime, Law Enforcement Availability Pay (LEAP), awards, and workers’ compensation for the Service’s FAM and civilian work force. The missions that FAMS perform every day support the Service’s core capability and effort in achieving its goal of detecting, deterring, and preventing hostile acts within the aviation and transportation domains. FAMS personnel are arrayed throughout the country and provide the manpower necessary to conduct the Service’s full range of operations. The FAMS continues to effectively utilize its allocated FTE and associated payroll resources.

**Information Technology (IT) – \$45.7M:** The FAMS’s IT capability is critical to providing the Service and individual FAMS with the vital automated tools, systems, and computer security technology necessary to ensure accomplishment of the FAMS mission. In FY 2009, the FAMS completed a technology refresh of personal data assistant (PDA) equipment, which is used by FAMS during mission status as a critical means of communication to share real time tactical information and for business and administrative applications. In FY 2009, the FAMS initiated a partial technology refresh of hardware and associated software needed to support continued operations for the FAMS IT network infrastructure as part of an approved reprogramming of prior year funds. FAMS enterprise access to DHS One Net is expected in FY 2010.

In addition to funding a critical IT network needed for managing the FAMS’s enforcement and business operations, this PPA funds the Mission Scheduling and Notification System (MSNS), the core automated system used by the Service for planning, scheduling, and implementing FAMS’s flight coverage operations. The MSNS uses a risk-based process that selects from over 28,000 daily U.S. commercial airline flights to prioritize deployments of FAMS worldwide. The core of the MSNS consists of SABRE Air Crews and SABRE QIKRES Reservations systems, modified for use by the FAMS, with data being stored in Oracle Databases. The MSNS is critical to the accomplishment of the FAMS’s mission in as much as its loss, or even an extended

interruption, would cause a deterioration of mission coverage. In FY 2010, the FAMS will initiate a hardware refresh for the MSNS and continue work on scheduled software improvements to address quality of life and coverage issues. FAMS plans to continue the hardware refresh in FY 2011, and the scheduled software improvements initiated in FY 2010 are expected to be deployed.

**Operations Infrastructure -- \$59.4M:** The Operations Infrastructure component funds critical operations infrastructure activities including, but not limited to: permanent change of station (PCS); facility build out, leases, utilities, and maintenance; telecommunications; background investigations; and logistics management. In FY 2009, the FAMS finalized the relocation of the Los Angeles Field Office to more efficiently support critical mission operations. In addition, the FAMS developed a successful pilot program that demonstrated the effectiveness of “floating” medical assessment centers in several locations throughout the United States to facilitate the FAM hiring process. In FY 2010 and FY 2011, the FAMS plans to continue to provide current services level support for this critical program area.

**Department of Homeland Security  
Transportation Security Administration  
Federal Air Marshals:  
Travel and Training  
Program Performance Justification  
(Dollars in Thousands)**

**PPA: Travel and Training**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	-	-	<b>90,118</b>
<b>2010 Enacted</b>	-	-	<b>97,542</b>
2011 Adjustments-to-Base	-	-	(598)
<b>2011 Current Services</b>	-	-	<b>96,944</b>
2011 Program Change	-	-	30,171
<b>2011 Total Request</b>	-	-	<b>127,115</b>
Total Change 2010 to 2011	-	-	29,573

The Transportation Security Administration (TSA) requests \$127.1 million for this activity in FY 2011. The request includes a program increase of \$30.2 million to sustain domestic flight coverage while maintaining the enhanced international flight coverage initiated in response to the threat posed by Al Qaeda and associated groups to U.S. civil aviation. In addition, the proposed funding level reflects a permanent shift of \$0.6 million to the Aviation Security Appropriation to reflect the transfer and realignment of TSA's Explosives Operations Division to the Agency's Office of Security Operations. This permanent transfer and realignment in addition to the transfer from the Management and Administration PPA totals \$5.1 million.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The following table provides the major component parts of the Travel and Training (T&T) PPA, with resources shown in millions of dollars.

	<b>FY 2010</b>	<b>FY 2011</b>
Travel	\$83.1	\$82.6
Training	14.4	14.3
<b>Total</b>	<b>\$97.5</b>	<b>\$96.9</b>

The T&T PPA supports the FAMS's core requirements for travel, travel-associated costs, and training.

**Travel – \$82.6M:** This component funds all travel necessary to perform domestic and international mission coverage, mission essential training, and other business-related travel in support of FAMS’s operational and programmatic goals. The FAMS schedules the coverage of high-risk flights according to a concept of operations that incorporates threat and intelligence, consequence, and vulnerability.

In January 2009, the Government Accountability Office (GAO) released a public version of a report requested by members of Congress to examine (1) the FAMS’s operational approach or "concept of operations" for covering flights, (2) the extent to which this operational approach has been independently evaluated, and (3) the processes and initiatives the FAMS established to address workforce-related issues. GAO examined previous studies conducted by the Homeland Security Institute (HSI) that independently assessed and validated the FAMS’s operational approach.

The FY 2009 appropriation increased mission travel to maintain priority coverage of international and domestic flights using available FTE. In FY 2010, in response to the December 25, 2009 attempted bombing of a U.S. aircraft, the FAMS significantly increased its international coverage to detect, deter or defeat additional terrorist attacks.

**Training – \$14.3M:** Through its training programs, the FAMS provides effective learning environments and opportunities for its employees, utilizing current and relevant curricula and training methodologies to enable and challenge FAMS to perform their duties and responsibilities in a highly effective and efficient manner.

Upon entry into the FAMS training program, FAM trainees undergo an intensive 16.5-week training program conducted at the Federal Law Enforcement Training Center (FLETC) in Artesia, New Mexico and at the FAMS Training Center in Atlantic City, New Jersey. The training component provides for all associated training requirements to include FLETC-related expenses, role player contracts, hotel lodging contracts for Atlantic City classes, training supplies, firing range fees, training gear, equipment, and clothing. Once assigned to a field office, FAMs undergo recurrent, in-service training to maintain their necessary skill base and meet firearms certification levels on a quarterly basis. Currently, the FAMS has the highest firearms qualification score of any federal agency (85% or 255/300). At the end of FY 2009, virtually all eligible FAMs met their quarterly firearms qualification and the average rate of accuracy in FAMs’ firearms re-qualification was 95.34%.

In FY 2009, the FAMS achieved Federal Law Enforcement Training Accreditation (FLETA) of the Federal Air Marshal Training Program I (FAMTPI) in Artesia, NM. In FY 2010, FAMS expects to achieve accreditation of the FAMS Instructor Development Course (IDC). In FY 2011, FAMS expects to achieve re-accreditation for the Federal Air Marshal Service Training Center (FAMSTC) and Federal Air Marshal Training Program II (FAMTPII) in Atlantic City, NJ.

In FY 2009, the FAMS initiated the purchase, delivery, and installation of a turn-key functional range equipment upgrade at the FAMS Training Center in Atlantic City, NJ for

the outdoor and indoor ranges. The combined results of this expenditure will provide enhanced firearms training and range operation efficiency and safety as well as allowing more efficient utilization of instructor resources.

In addition in FY 2009, the FAMS approved a plastic molded aircraft seat prototype and initiated the procurement of 260 such seats which will be used to replicate aircraft seats at the FAMS Training Center in Atlantic City, NJ as well as field office training locations across the country. These are durable, rugged, maintainable, and safe seats for both indoor and outdoor training environments that will mitigate recently identified safety and health risks. These seats minimize the retention and permeation of gun powder, mold, tungsten and lead as well as eliminate potential sharp edges found in actual airline seats.

In FY 2010, the FAMS plan to complete the procurement and installation of aircraft cabin training simulators that will reside inside an existing building at FAMSTC located in Atlantic City, NJ. The simulators will replace the outdated L1011 and 727 airframes currently in use at the FAMSTC. The FAMS estimates that the first simulator will be completed and operational by mid-FY 2010 and the second simulator will be completed and operational by mid-FY 2011. In addition, the FAMS plan to complete their validation study to define the related physical performance standards for the Federal Air Marshal SV-1801 job series. Upon completion of the study, the FAMS will receive recommendations on the minimum level of fitness status necessary to ensure safe and efficient job performance.

This PPA component also provides required training for the FAMS workforce. Examples include firearms training, mandated annual contracts/warrant officer training, mandated FAMS instructor training, leadership/management training, and professional/career development courses. In FY 2011, the FAMS plans to continue to provide support for this critical program area.

## IV. Program Justification Changes

**Department of Homeland Security

<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>950,015</b>

Description of Item

Due to the failed Christmas Day 2009 terrorist attack, an increase in coverage of international flights began. In order to sustain coverage capacity in the out years, TSA is requesting an additional \$85 million. The request includes additional positions that will backfill the existing Federal Air Marshals who have been diverted from domestic missions to continue the present international surge mission tempo.

Justification

As a result of the failed Christmas Day 2009 terrorist attack on Northwest Airlines Flight 253, increased FAMS coverage on international flights departing/arriving in sensitive locations was immediately instituted, and is anticipated to continue. This level of international flight coverage significantly exceeds what is supportable in the FAMS's current base of funds and an additional investment of resources is necessary to sustain the increased mission tempo. The monetary expenses incurred for international mission coverage are significant due to higher lodging and per diem costs overseas and the times and distances involved in international travel have a disproportionate impact on domestic flight coverage. The requested program change will enable the FAMS to continue the present mission tempo in international flight coverage in FY 2011, while ensuring that historical domestic flight coverage levels are maintained. This would be accomplished by an increase in Federal Air Marshals and associated infrastructure.

Impact on Performance (Relationship of Increase to Strategic Goals)

This program change directly supports DHS Strategic Goal 3.4 - Protect Transportation Sectors. By maintaining coverage of high-risk international and domestic flights selected using the FAMS's risk-based Concept of Operations (CONOPS), the Federal Air Marshal Service is better able to detect, deter, and defeat terrorist or other criminal hostile acts targeting the Nation's aviation and transportation domain. Furthermore, maintaining mission coverage provides flexibility in efforts to cover high-risk flights, supporting TSA's strategy of increasing the use of flexible and unpredictable security measures to protect critical infrastructure.

<b>11.8 Special Service Pay</b>	<b>1,679</b>	<b>470</b>	<b>704</b>	<b>234</b>

The FY 2011 request includes an increase for the Mission Coverage Enhancement.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>12.1 Civilian personnel benefits</b>	<b>186,611</b>	<b>181,682</b>	<b>196,438</b>	<b>14,756</b>

The FY 2011 request includes an increase for the Mission Coverage Enhancement.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>21.0 Travel and transportation of persons</b>	<b>2,646</b>	<b>2,797</b>	<b>2,441</b>	<b>(356)</b>

Travel in the M&A PPA reflects costs for vehicle leases. The FY 2011 request includes a decrease of \$356,000 for a technical adjustment. There is no program impact associated with this technical change.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>22.0 Transportation of things</b>	<b>258</b>	<b>257</b>	<b>281</b>	<b>24</b>

Transportation of things includes all costs associated with the care of items in the process of being transported, as well as other services associated with the transportation of things. The FAMS uses this object class series for central billing and for the shipment of goods between Headquarters and Field Offices. The FY 2011 request includes an increase of \$24,000 for the Mission Coverage Enhancement.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>23.1 Rental payments to GSA</b>	<b>2,234</b>	<b>3,411</b>	<b>3,656</b>	<b>245</b>

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2011 request includes an increase of \$245,000 for the Mission Coverage Enhancement.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>23.2 Rental payments to others</b>	<b>14,425</b>	<b>16,275</b>	<b>16,126</b>	<b>(149)</b>

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The majority of the FAMS' commercial office leases for Headquarters and field offices are included in this category. The FY 2011 request includes a decrease of \$149,000 for a technical adjustment. There is no program impact associated with this technical change.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>23.3 Communications utilities and miscellaneous charges</b>	<b>13,253</b>	<b>13,872</b>	<b>15,303</b>	<b>1,431</b>

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FAMS uses this object class series for PDA and cell phone air time and general office utilities such as metered gas, electric, water usage, etc. The FY 2011 request includes an increase of \$1,431,000 for the Mission Coverage Enhancement.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>24.0 Printing and reproduction</b>	<b>6</b>	<b>6</b>	<b>10</b>	<b>4</b>

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The majority of costs are for promotional/public relations materials. The FY 2011 request includes an increase of \$4,000 for the Mission Coverage Enhancement.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.1 Advisory and assistance services</b>	<b>15,202</b>	<b>19,330</b>	<b>16,049</b>	<b>(3,281)</b>

Advisory and assistance services primarily include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, State and local governments, tribes, etc.). The FY 2011 request includes a decrease of \$3,281,000 for a technical adjustment. There is no program impact associated with this technical change.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.2 Other services</b>	<b>23,870</b>	<b>27,974</b>	<b>25,277</b>	<b>(2,697)</b>

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25.1. The FAMS uses this series for additional support for the Mission Scheduling and Notification System, support services for other elements (including contractors supporting contracting/procurement efforts) within the Service. The FY 2011 request includes a decrease of \$2,697,000 for a technical adjustment. There is no program impact associated with this technical change.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.3 Purchases of goods &amp; svcs. from Gov't accounts</b>	<b>13,298</b>	<b>14,764</b>	<b>15,834</b>	<b>1,070</b>

Purchases from Government Accounts include costs for purchases from other Federal agencies or accounts that are not otherwise classified. For the FAMS, this includes IT Support for the entire FAMS, facility maintenance support from the FAA, office equipment maintenance and security clearances. The FY 2011 request includes an increase of \$1,070,000 for the Mission Coverage Enhancement.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.4 Operation and maintenance of facilities</b>	<b>3,587</b>	<b>2,160</b>	<b>3,208</b>	<b>1,048</b>

Operation and maintenance of facilities includes all payments for the operation and maintenance of facilities when done by contract with either the private sector or another Federal Government account. The FAMS uses this object class series for custodial services and facility build out/enhancements of current leases. The FY 2011 request includes an increase of \$1,048,000 for the Mission Coverage Enhancement.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.6 Medical care</b>	<b>1,022</b>	<b>-</b>	<b>1,909</b>	<b>1,909</b>

Medical care includes payments to contracts for medical services, but excludes Federal employees who are reportable under OPM regulations as federal employees. The FAMS uses this series for a contract with Federal Occupational Health (FOH). The FY 2011 request includes an increase of \$1,909,000 for the Mission Coverage Enhancement.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.7 Operation and maintenance of equipment</b>	<b>1,775</b>	<b>2,206</b>	<b>5,838</b>	<b>3,632</b>

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal account. The FY 2011 request includes an increase of \$3,632,000 for the Mission Coverage Enhancement.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>26.0 Supplies and materials</b>	<b>1,362</b>	<b>2,047</b>	<b>3,246</b>	<b>1,199</b>

Supplies and materials are defined as commodities that are: (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FAMS uses this series for IT supplies and materials, office supplies and fuel. The FY 2011 request includes an increase of \$1,199,000 for the Mission Coverage Enhancement.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>31.0 Equipment</b>	<b>13,005</b>	<b>8,530</b>	<b>9,640</b>	<b>1,110</b>

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. Included in this total are costs for IT equipment and software, furniture and other office equipment. The FY 2011 request includes an increase of \$1,110,000 for the Mission Coverage Enhancement.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>42.0 Insurance Claims and Indemnity</b>	<b>485</b>	<b>75</b>	<b>1</b>	<b>(74)</b>

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. If a claim is incurred, FAMS will address via the budget execution process (i.e. redistribute funds from another object class). The FY 2011 request includes a decrease of \$74,000 for a technical adjustment. There is no program impact associated with this technical change.

**PPA Mission Statement**

The Travel and Training (T&T) PPA is used to cover all travel and training requirements that support the FAMS program. The Travel portion of the PPA supports the FAMS' requirements for mission travel (per diem, lodging) and associated costs, such as airport parking and automated travel account services. Mission travel resources are essential to the Federal Air Marshals' ability to perform scheduled flight coverage on both domestic and international operations and provide the FAMS the necessary mobility and flexibility to perform their enforcement and counterterrorism missions. T&T funds also support other FAMS travel required for non-mission and training purposes.

T&T also supports the FAMS' comprehensive training requirements to include TP I (Basic Law Enforcement Training) and TP II (FAMS specific training) training of new Federal Air Marshals and all recurrent field training. This PPA provides funding for all associated training requirements, such as Federal Law Enforcement Training Center (FLETC) costs, training-related ammunition, TP II instructor contracts, hotel lodging contracts for Atlantic City classes, training supplies, firing range fees, professional & training gear, equipment and clothing. The T&T PPA also supports the required professional training for FAMS explosives technicians and for other professional development and career training as required.

**Summary Justification and Explanation of Changes**

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
<b>21.0 Travel and transportation of persons</b>	<b>77,693</b>	<b>82,225</b>	<b>99,434</b>	<b>17,209</b>

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The bulk of these costs directly support Federal Air Marshal domestic and international mission travel, which is the primary mission of the Service. Also included in this object class are travel costs related to training, conference attendance and site visits. The FY 2011 request includes an increase of \$17,209,000 for the Mission Coverage Enhancement.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>22.0 Transportation of things</b>	-	10	10	-

Transportation of things includes all costs associated with the care of items in the process of being transported, as well as other services associated with the transportation of things. Under this PPA (T&T), costs are associated specifically with transportation of things related to training (e.g. shipment of equipment from vendors to field offices). No change is expected between the FY 2010 level and the FY 2011 request.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>23.2 Rental payments to others</b>	1,141	921	921	-

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The T&T PPA covers airport parking lot rental (to support mission travel operations) and other rent associated specifically with meeting the Service's training requirements. All other rent is funded through the FAMS' M&A PPA. No change is expected between the FY 2010 level and the FY 2011 request.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.1 Advisory and assistance services</b>	-	-	-	-

Advisory and assistance services include services acquired by contract from non-Federal sources (i.e. the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Prior to FY 2009, FAMS TP II Instructor contract costs were included in this object class. As of the end of FY 2008, the training instructor costs were reclassified to object class 25.2 (Other Services).

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.2 Other services</b>	6,117	8,272	8,180	(92)

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25. The FAMS uses this object class series for FLETC training costs, hotel lodging contracts for TP II training and field recurring range fees for Federal Air Marshals' quarterly requalifications. The FY 2011 request includes a decrease of \$92,000 for a technical adjustment. There is no program impact associated with this technical change.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.3 Purchases of goods &amp; svcs. from Gov't accounts</b>	22	259	12,434	12,175

Purchases from Government Accounts include costs for purchases from other Federal agencies or accounts that are not otherwise classified and include costs associated with maintenance and repair of the Atlantic City training facility. The FY 2011 request includes an increase of \$12,175,000 for the Mission Coverage Enhancement.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>25.6 Medical care</b>	<b>6</b>	<b>17</b>	<b>17</b>	<b>-</b>

This object class series includes medical care. No change is expected between the FY 2010 level and the FY 2011 request.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>26.0 Supplies and materials</b>	<b>2,639</b>	<b>5,169</b>	<b>5,450</b>	<b>281</b>

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FAMS uses this object class series for ammunition, armory supplies and training supplies. The FY 2011 request includes an increase of \$281,000 for the Mission Coverage Enhancement.

	<b>FY 2009 Actuals</b>	<b>FY 2010 Enacted</b>	<b>FY 2011 Request</b>	<b>FY 2010 to FY 2011 Change</b>
<b>31.0 Equipment</b>	<b>2,500</b>	<b>669</b>	<b>669</b>	<b>-</b>

Equipment includes all costs for the purchase of personal property of a durable nature or the initial installation of equipment when performed under contract. The FAMS uses this object class series for training and other equipment, primarily for field office recurrent training and TP II tactical training equipment. No change is expected between the FY 2010 level and the FY 2011 request.

## **A. Mission and Description of the Transportation Security Administration**

U.S. transportation systems move billions of people and trillions of dollars worth of goods that are vital to the Nation's economic prosperity, global competitiveness, and national security each year. The Aviation and Transportation Security Act established the Transportation Security Administration (TSA) to protect these transportation systems and ensure the freedom of movement for people and commerce. The focus of TSA is to identify, prioritize, and mitigate risks, ultimately minimizing the impact of potential incidents. Information sharing among agencies and stakeholders – including intelligence information – is a cornerstone of the risk management model.

TSA has devoted its resources to strengthening the security of the U.S. transportation network. Working with State, local and regional partners, TSA oversees security for highways, railroads, buses, mass transit systems, ports and 450 U.S. airports. TSA has grown from a small cadre of employees into a dedicated workforce of approximately 57,000 people that protect every domestic commercial airport, strengthen the Nation's surface transportation modes and work with international partners around the world.

TSA's specific responsibilities include:

- Ensuring a thorough and efficient screening of all aviation passengers, their baggage and all regulated aviation employees;
- Deploying Federal Air Marshals to detect, deter, and defeat hostile acts targeting air carriers, airports, passengers, and crews;
- Managing security risks of the surface transportation systems by establishing clear lines of communication and collaborative working relationships with Federal, State, local and private stakeholders, providing support and programmatic direction, conducting on-site inspections, and developing security programs; and
- Developing and implementing more efficient, reliable, integrated, and cost effective terrorist-related screening programs.

## **B. Major Activities and Key Strategic Goals:**

In FY 2010, TSA was appropriated \$7.402 billion in order to maintain its critical mission and expand such areas as the deployment of emerging technologies to screen airline passengers and carry-on baggage for explosives and weapons, increase Federal Air Marshal coverage of international flights, hire additional inspectors and expand technology pilots for air cargo screening, and implement new regulations and activities authorized by the 9/11 Act.

Terrorism in the aviation domain is an enduring and highly adaptive threat. Groups and individuals with malicious intent study our vulnerabilities to learn how to exploit procedural and technological gaps to increase the lethality and political impact of their attacks. Through the use and refinement of authorities, capabilities, capacity, and partnerships, TSA continues to make positive strides with respect to domestic flight operations. However, breaching security of the more than 854,000 annual commercial in-bound international flights continues to be a goal of

coordinated terrorist activity. Examples include the attempted attack on Northwest Flight 253, an alleged terrorist plot to detonate liquid explosives onboard multiple aircraft departing from the United Kingdom for the United States in August 2006, and terrorists' intended attacks on U.S.-bound flights originating from foreign airports in December 2003.

As President Obama stated on January 5, 2010, "[A]s they refine their tactics, we'll enhance our defenses, including smarter screening and security at airports, and investing in the technologies that might have detected the kind of explosives used on Christmas." Additionally, the President has ordered concrete steps be taken to protect the American public and specifically charged DHS and TSA with developing new screening and security procedures for all flights, domestic and international; deploying explosive detection teams at all domestic airports; increasing Federal Air Marshals coverage; and deepening cooperation with international partners.

One of the most promising current technologies for detecting small quantities of explosives concealed on passengers is Advanced Imaging Technology (AIT). AIT provides the ability to detect anomalies such as hidden explosives on one's person. To address privacy concerns, current systems have privacy filters to eliminate the ability to image sensitive areas of the human body. Currently, TSA has deployed 40 systems to 19 airports and by December 2010 an additional 457 AIT units will be installed. The request funds the purchase and installment of 500 additional new units in FY 2011. By the end of FY 2011, TSA will have AIT coverage at 60 percent of the total lanes at Category X through II airports. This deployment will support screening of about 50 percent of all air passengers.

At locations where AIT will not be employed, TSA requests funding in FY 2011 to purchase approximately 800 portable Explosive Trace Detection (ETD) units and 275 canine teams to fill the enhanced screening gap. Use of these measures in both primary screening and random screening locations will improve TSA's ability to detect residue from explosive materials on people.

As DHS deploys additional technology, workforce needs also increase. The 3,550 Full Time Equivalents (FTE) increase in Transportation Security Officers (TSO) supports the accelerated deployment of AIT. In order to ensure adequate throughput, additional lanes may have to be staffed and will be supported by these FTE. Further, to ensure the effectiveness of this security layer, TSA will use experienced TSOs that have scored well in the Performance Accountability and Standards System.

The combination of AIT, canine teams, and ETD will be further complemented by enhancement to TSA's Screening Passengers by Observation Techniques program, which is comprised of approximately 3,000 Behavior Detection Officers (BDOs) assigned to 161 airports. In FY 2011, TSA seeks an additional 350 BDOs to enhance coverage at lanes and shifts at high risk Category X and I airports, as well as expanded coverage of smaller high risk airports. BDOs work in teams and observe all persons visible in their operational area (checkpoint and surrounding area). They are trained to identify anomalous/suspicious behavior against a known established environmental baseline.

TSA will also take steps in FY 2010 and FY 2011 to further the deployment and installation of checked baggage technology. The Explosives Detection Systems (EDS) Strategic Plan outlined a process for achieving optimal screening solutions at the top 250 commercial airports. This number has been increased to 285 in order to incorporate Category III airports. By the end of FY 2010 it is projected that 200 airports will have one or more operational in-line systems. The American Recovery Reinvestment Act of 2009 (ARRA) infusion of \$689 million, coupled with a program increase in the FY 2010 Appropriation of \$487 million, will facilitate acceleration of inline systems, which provide higher detection rates and increased baggage throughput. In FY 2011, the discretionary program will accelerate the purchase of Explosives Detection equipment and will ensure that ARRA projects are completed without incurring delays.

In addition to the measures to enhance passenger aviation security, as directed by Secretary Napolitano, TSA will strengthen the presence and capacity of aviation law enforcement. To address the immediate threat in FY 2010, TSA will partner with other DHS components to deploy law enforcement officers to help meet the directive to increase international flight coverage. In FY 2011, TSA will increase the number of Federal Air Marshals to increase flight coverage.

Many of TSA's efforts to protect the aviation domain against those with malicious intent begins even before such individuals step foot into an airport. TSA's Office of Intelligence analyzes transportation specific intelligence and is charged with disseminating warnings and notifications of credible and immediate threats. In FY 2010 and FY 2011 TSA will hire an additional 45 Field Intelligence Officers (FIO). These FIOs will serve as transportation-specific intelligence officers assigned to TSA's largest airports/transportation nodes and as liaisons to select intelligence and law enforcements agencies to facilitate collaboration and the sharing of intelligence. Once fully deployed, TSA will have FIO coverage at 100 percent of Category X airports and 73 percent coverage at Category I airports.

Further, the Homeland Security Presidential Directive-11 (HSPD-11), issued August 27, 2004, directed DHS in coordination with other Federal agencies, to "enhance terrorist-related threat assessment through comprehensive, coordinated procedures." TSA supports this directive by consolidating the management of all vetting and credentialing programs within the Office of Transportation Threat Assessment and Credentialing (TTAC). In the aviation security realm these vetting and screening programs focus on passengers, crew and aviation employees. Such programs include Secure Flight, Alien Flight Student Program, Crew Vetting and several other programs that vet aviation employees.

The cornerstone of DHS' and TSA's efforts to prevent suspected terrorists from boarding an aircraft is TTAC's Secure Flight program. The Secure Flight program uses an automated process to match Secure Flight Passenger Data (SFPD) for domestic travelers against records contained in the No-Fly and Selectee portions of the Federal Bureau of Investigation's (FBI) Terrorist Screening Database (TSDB). Currently, U.S. Customs and Border Protection conducts watch list matching for passengers flying into and out of the U.S. through its Advance Passenger Information System (APIS). However, per the Secure Flight Final Rule (effective December 29, 2008), both programs are working towards transitioning the screening of international flight

passengers through the Secure Flight program, ensuring that domestic and international watch list matching is consistent and uniformly effective. In FY 2010 TSA will continue its roll out of Secure Flight and plans for full implementation -- 100 percent vetting of passengers on all covered flights -- by the end of CY 2010.

To ensure success in protecting aviation passengers, TSA will continue to cultivate relationships with its international partners as well as the airline industry. Currently, TSA coordinates and conducts security assessments at more than 300 foreign airports and repair stations in more than 100 countries, using 70 inspectors and 21 Transportation Security Administration Representatives (TSARs) in 14 countries. Additionally, TSA deploys eight International Industry Representatives (IIRs) to liaise with air carriers and airline industry organizations to coordinate the sharing of aviation security requirements and threat information. In FY 2011, TSA seeks to grow its international presence with the addition of 34 Transportation Security Specialists, 10 IIRs, and a Rapid Response Team. The increase in personnel will allow TSA to increase the number of Foreign Airport Assessments it conducts, better train host nations to mitigate vulnerabilities and ensure compliance with aviation security standards, and conduct congressionally-mandated inspections to ensure threat mitigation measures are applied by local authorities.

While recent headlines have focused on the steps and improvements to our passenger screening capabilities, TSA remains on track to achieve its goal of screening 100 percent of all passenger air cargo departing from the U.S. by August 2010. The air cargo transportation system consists of 450 domestic airports, 300 air carriers, and approximately 4,400 indirect air carriers and shippers. An estimated 16 million tons of cargo is shipped within the United States by air annually. TSA focuses on two primary security threats related to the air cargo transportation system: (1) introduction of an explosive device on a passenger aircraft, and (2) the hijacking of an all-cargo aircraft (which accounts for about 88 percent of all transported cargo) resulting in its use as a weapon of mass destruction. TSA received monies in FY 2010 to hire an additional 50 air cargo inspectors and bring on-line specific air cargo screening technology to meet the 100 percent screening mandate. In addition to domestic inspections, TSA has developed a program to ensure the security of inbound cargo from outside the U.S. In FY 2010, TSA will have ten International Cargo Transportation Security Inspectors deployed to four international field offices. These inspectors will examine cargo operations at last points of departure to the U.S. to establish a baseline by which compliance can be measured.

In addition to TSA's efforts within the aviation domain, protection of our Nation's surface modes of transportation remains a top priority. TSA, its government partners, industry owners and operators have remained steadfast in their efforts to exchange real-time information and focus on threat detection and preparedness measures to improve security and resilience of the transportation system.

In FY 2010 and FY 2011 TSA will continue the role of coordinator among all surface security stakeholders to implement a regulatory framework and administration policy to develop national security strategies, plans, and programs that identify innovative solutions and best practices. Through the employment of a cadre of inspectors and canine teams, TSA will assess

implementation and compliance, as well as provide outreach on security assets in the surface transportation system. These resources interact daily within the transportation network to enhance security measures and are available for surge operations during times of heightened security. These inspectors and canine teams are an integral part of TSA's Visible Intermodal Prevention and Response (VIPR) program.

In addition to the aforementioned aviation vetting and screening programs, TSA is also charged with a similar role in the surface and maritime transportation modes. TSA's Transportation Worker Identification Card (TWIC) program enhances security by providing a tamper-resistant biometric credential to maritime workers requiring unescorted access to secure areas of port facilities and vessels regulated under the Maritime Transportation Security Act of 2002 (MTSA, P.L. 107-295). As of December 9, 2009 TSA has enrolled over 1.4 million maritime workers. The program will ensure that the identity of each TWIC holder has been verified; that a satisfactory security background check has been completed on that identity; and that each credential issued is positively linked to the rightful holder through the use of biometric technology. TSA's Hazardous Materials Endorsement Threat Assessment Program (HTAP) is another key component of the DHS/TSA layered approach to transportation security by protecting against the threats posed by persons that may attempt to transport hazardous materials in commerce. To date, the HTAP has conducted over 1,350,000 FBI fingerprint-based criminal history record checks on applicable applications, and currently processes over 95 percent of applications in five days or less. The HTAP has a robust redress process, including appeals, waivers and Administrative Law Judge review. In FY 2009, the program processed threat assessments on 297,473 applicants, a continued increase from the program's inception that confirms the vital role of improving the safety and protection of passengers and freight traveling on our Nation's highways. TTAC's vetting efforts in all of the transportation modes will be enhanced by TTAC Infrastructure Modernization Program (TIM) currently underway. The TIM program supports TSA's mission by significantly improving the vetting management and adjudication platform currently used for conducting security threat assessments (STA) on various transportation populations. The TIM program's FY 2010 and FY2011 planned accomplishments include defining business processes and system improvements required to accommodate all and new applicant and population screening programs; continuing system development; and, performing tests and evaluations.

### **C. Resources Requested and Performance Impact:**

The Transportation Security Administration's FY 2011 gross budget request of \$8.2 billion reflects a total gross increase of \$508.7 million and 4,561 FTE for transportation security initiatives. The requested funds support the implementation of new screening and security procedures for all flights, domestic and international; deploying enhanced screening technology at domestic airports; increasing Federal Air Marshals coverage; and expanding cooperation with our international partners.

The FY 2011 base funding will support full deployment of additional highly skilled workforce that includes Behavior Detection Officers, Aviation Direct Access Screening Program, Travel Document Checkers, and Visible Intermodal Prevention and Response teams. Current services will also provide

for acceleration of emergent technology and in-line systems and continued implementation of 9/11 Act critical initiatives that include Air Cargo and Security Regulations.

**Major Program Increases:**

**Passenger Aviation Security.....\$769.0M (4,155 FTE)**

TSA requests an increase of \$769.0 million and 4,155 FTE in Passenger Aviation Security.

Major initiatives include the following efforts:

- **Advanced Imaging Technology (AIT)** - \$214.7M and 10 positions (5 FTE) to procure and install 500 advanced imaging technology machines at airport checkpoints to detect dangerous materials, including non-metallic materials, a person may attempt to smuggle onto an aircraft under their clothing. This request, along with planned deployments for 2010, will provide AIT coverage at 75 percent of Category X airports and 60 percent of the total lanes at Category X through II.
- **Transportation Security Officers (TSO)** - \$218.9M and 5,355 positions (3,550 FTE) for new TSOs and screener managers, and associated support costs, to operate additional AITs at airport checkpoints. Passenger screening is a critical element of aviation security to detect and prevent individuals attempting to bring dangerous or deadly objects onto planes from boarding the aircraft.
- **TSO Mission Support** – \$95.7M and 255 positions (128 FTE) to fund the support and airport management costs associated with the 5,355 new TSOs and screener managers. This request includes funding for training, uniform purchases, checkpoint consumables, Federal Security Director staff, rent, recruitment, benefits, and increases in information technology costs.
- **Portable Explosive Trace Detection (ETD)** - \$60.0M to purchase approximately 800 portable ETD machines (\$39.0M) and associated checkpoint consumables (\$21.0M).
- **Whisper Communications** - \$6.0M to purchase radios for TSOs to use at the checkpoint with new AIT equipment.
- **Behavior Detection Officers (BDOs)** – \$20.2M and 350 BDOs (210 FTE) to further enhance TSA’s Screening Passengers by Observation Techniques program. The FY 2011 request seeks an additional 350 BDOs, for a total of 3,350, to enhance coverage at lanes and shifts at high risk Category X and I airports, as well as expand coverage to smaller airports.
- **Explosives Detection Systems (EDS) Purchase and Install** - \$82.5M to accelerate the purchase of explosives detections systems for baggage screening.
- **Canine Teams** - \$71.0M and 523 positions (262 FTE) to fund an additional 275 proprietary explosives detection canine teams, 112 teams at 28 Category X airports and 163 teams at 56 Category I airports.

**International Aviation Security.....\$125.0M (37 FTE)**

TSA requests \$125.0 million and 37 FTE for International Aviation Security to fund the following efforts:

- **Federal Air Marshal Service (FAMS)** - \$85.0M to for additional FAMS travel and training to increase international flight coverage in response to the threat posed by the attempted Northwest Flight 253 bombing. The FAMS primary mission is to detect, deter, and defeat terrorist or other criminal hostile acts targeting U.S. air carriers, airports, passengers, crew and other transportation modes within the Nation’s general transportation systems.
- **Strengthen International Sharing** - \$40.0M and 74 positions (37 FTE) to manage international programs at 15 existing offices around the globe. The 74 new positions, which include 34 Transportation Security Specialists, 10 International Industry Representatives, and 10 positions for Rapid Response Teams, will be strategically placed in high risk areas such as the Middle East and Africa.

**Enhanced Information Sharing.....\$7.0M (16 FTE)**

TSA requests \$7 million and 31 Field Intelligence Officers (16 FTE) to increase staffing at Category X, I, and II airports and provide technical enhancements in communications. With the increase in funding, TSA Field Intelligence Officers will have a presence at 100 percent of Category X airports and approximately 73 percent of Category I airports with Field Intelligence Officers.

**D. Performance Highlights, Resources and Alignment to Strategic Goals**

For each mission-oriented program, the performance goal, alignment to the Secretary’s Priorities, total dollars, full time equivalent (FTE), and Government Performance and Results Act (GPRA) performance plan measure(s) are shown below. Additional measures are also displayed, as appropriate, to provide a more thorough context of expected performance results.

<b>Program: Aviation Security</b>						
<b>Performance Goal:</b> Improve aviation security to reduce the probability of a successful terrorist or other criminal attack to the air transportation system.						
<b>Secretary’s Priority:</b> Preventing and Protecting Against Terrorism						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$4,722,436	\$5,367,844	\$5,275,615	\$5,990,913	\$5,464,040	\$5,809,894
<b>FTE</b>	45,476	47,259	48,897	49,666	49,282	53,608

**Performance Plan Measures**

<b>Measure:</b> Level of baggage security screening assessment results						
<b>Description of Measure:</b> This measure appraises the percent of the time Transportation Security Officers (TSOs) correctly detect threat items concealed in baggage using realistic and standardized assessment scenarios. This information is used to improve screening practices and procedures to reduce the probability of a successful terrorist or other criminal attack to the aviation transportation system. The actual results are classified and are not releasable to the public at this time for security reasons.

<b>Measure:</b> Percent of air cargo screened on commercial passenger flights originating from the United States and territories						
<b>Description of Measure:</b> This measure captures the percent of air cargo screened on commercial passenger flights originating from the United States and territories. The air cargo screening strategy uses a multi - layered, risk - based approach to securing air cargo by permitting indirect air carriers, shippers, and other entities further up the supply chain to screen cargo closer to its point of origin through the Certified Cargo Screening Program and allow air carriers to accept pre - screened certified cargo. Screening methods approved in the Certified Cargo Screening Program include: physical search (Includes opening boxes, removing and opening all inner cartons), X - ray, explosives trace detection, explosives detection system, canine teams, and any other approved detection equipment.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	50%	100%	100%
<b>Actual:</b>	None	None	None	See Note	N/A	N/A

\* Note: TSA achieved the 9/11 Act requirement of screening 50 percent of air cargo transported on domestic passenger aircrafts by February 3, 2009. 100 percent of cargo is screened on more than 95 percent of flights originating in the United States and 100 percent of all baggage is screened for explosives.

<b>Measure:</b> Percent of air carriers in compliance with leading security indicators						
<b>Description of Measure:</b> This measure identifies overall air carrier compliance with leading security indicators. A leading security indicator is a key indicator, that, when taken into account, may be predictive of the overall security posture of an air carrier. These critical indicators are derived from criteria based on factors like a single point of failure, operational vs. administrative, and human factor related. The indicators are guided by security rules, regulations, and standards. Identifying compliance with the key indicators assesses air carriers' vulnerabilities. Assessing air carriers vulnerabilities is part of an overall risk reduction process. Measuring compliance with standards is a strong indicator of system security.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	N/A	96%	96%	97%	98%	98%
<b>Actual:</b>	N/A	97.79%	96%	98%	N/A	N/A

<b>Measure:</b> Percent of airports in compliance with leading security indicators						
<b>Description of Measure:</b> This measure identifies overall airport compliance with leading security indicators. A leading security indicator is a key indicator, that, when taken into account, may be predictive of the overall security posture of an airport. (These critical indicators are derived from criteria based on factors like a single point of failure, operational vs. administrative, and human factor related). The indicators are guided by security rules, regulations, and standards. Identifying compliance with the key indicators assesses airport vulnerabilities. Assessing airport vulnerabilities is part of an overall risk reduction process. Measuring compliance with standards is a strong indicator of system security.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	98%	95%	96%	96%	97%
<b>Actual:</b>	95.68	95.55%	95%	95%	N/A	N/A

### Additional Measures

<b>Measure:</b> Percentage of screeners scoring above the national standard level of Threat Image Projection (TIP) performance						
<b>Description of Measure:</b> The measure reflects the percentage of screeners performing above the standard. Transportation Security Officers (TSOs) receive ongoing training and performance assessments to ensure that their skills are being developed to address the variety of threats that may be presented. As threats change and evolve, the TIP program develops new images and training to address the expanded needs of the TSO workforce, allowing TSA to maintain a high level of screener performance that ensures aviation security. SSI: Sensitive Security Information						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	SSI	SSI	SSI	SSI	SSI	SSI
<b>Actual:</b>	SSI	SSI	SSI	SSI	N/A	N/A

<b>Measure:</b> Improve protection of aircraft cockpits through requalification certification FFDOs						
<b>Description of Measure:</b> Measures the total percentage of FFDOs who attended required bi-annual re-qualification firearm certification training. Note: Re-qualifications are measured per calendar quarter and only reported at the end of each quarter.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	90%	90%	93.5%	94%	94.5%	95%
<b>Actual:</b>	97.75%	93.2%	93.1%	95%	N/A	N/A

<b>Measure:</b> Level of the Customer Satisfaction Index (CSI - A) for Aviation Operations						
<b>Description of Measure:</b> The CSI - A is a composite index incorporating data on security confidence, passenger surveys, and compliments/complaint data on screener performance. TSA aspires to provide effective screening operations with minimum disruption to the traveling public. CSI - A is scaled where 0 is very dissatisfied, 25 is dissatisfied, 75 is satisfied, and 100 is very satisfied.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	81	82	83	83.5	84	84.5
<b>Actual:</b>	81	81	77	78.7	N/A	N/A

<b>Measure:</b> Percent of countries with direct flights to the U.S. who are provided aviation security						
<b>Description of Measure:</b> The measure reports the amount of interaction the United States has with countries providing Last - Point - of - Departure (LPD) service to the U.S. An LPD country is a country with at least one port providing direct traffic to a specific destination - usually a foreign airport with direct passenger and/or cargo flights to a U.S. destination airport. The U.S. interacts with countries providing LPD service with the goal to share aviation security policy and practices at either the national or airport level.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	100%	Baseline	100%	100%	100%	100%
<b>Actual:</b>	N/A	86%	100%	99%	N/A	N/A

<b>Measure:</b> Percent of countries/territories with no direct flights to the U.S. who are provided aviation security assistance						
<b>Description of Measure:</b> The measure reports the amount of interaction (output) the United States has with countries with no direct service to the US in the area of aviation security policy and practices.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011

<b>Actual:</b>	N/A	21%	45%	38%	N/A	N/A

<b>Measure:</b> Percent reduction in the federal share of LEO costs provided by U.S. commercial airports						
<b>Description of Measure:</b> Law Enforcement: Annual Measure GOAL: Reduce the reliance on federal funds for law enforcement support at the screening checkpoints through Reimbursement Agreements (RAs) with airports while increasing the number of airports with RAs. RAs are contracts for a negotiated rate of reimbursement for each fiscal year, executed on October 1. FY 2007 is the final option year of the current RAs						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	89%	85%	85%	75%	68%	60%
<b>Actual:</b>	89%	85%	80%	80%	N/A	N/A

<b>Measure:</b> Level of public confidence in the ability of the flight crew to keep air travel secure and to defend the aircraft and passengers from individuals with hostile intentions (as measured on a scale of 1 - 5)						
<b>Description of Measure:</b> The annual Bureau of Transportation Statistics (BTS) Omnibus Survey is an annual household survey used to measure customer satisfaction and confidence of transportation systems. Participants are randomly selected by the Department of Transportation using a statistical model. The survey is administered to the American public, and response is voluntary. Selected participants who choose to provide feedback will provide insight into the public's confidence of transportation systems. The scores range from 1 to 5, with 5 representing total confidence. Confidence in the flight crew is an indication that the training program is improving aviation security by adding another layer of protection.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	3.17	3.19	3.20	3.21	3.24	3.25
<b>Actual:</b>	3.17	3.17	3.34	3.03	N/A	N/A

<b>Measure:</b> Percent of eligible flight crew members with Federal Flight Deck Officer (FFDO) certification						
<b>Description of Measure:</b> This measure pertains to the Federal Flight Deck Officer (FFDO) program, a Flight Crew Training program administered by the TSA/OLE - FAMS. The specific metric is the percentage of eligible flight crew members that have been trained and deputized as FFDOs, and who may therefore provide a final, deadly - force deterrent to an attempted hostile breach of the flight deck that could result in the military interdiction of a flight, and the loss of an aircraft, its passengers, and crew.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	10.5%	12.0%	13.5%	15%	16.5%

**Performance Plan Measures**

<b>Measure:</b> Percent level in meeting Federal Air Marshal Service (FAMS) coverage target for each individual category of identified risk						
<b>Description of Measure:</b> This measure reflects the performance levels of Office of Law Enforcement, Federal Air Marshal Service (OLE/FAMS) coverage of targeted critical flights based upon impact (geographical location), vulnerability (aircraft destructive potential), threats, and intelligence relative to the availability of resources. Coverage is provided by specially trained armed law enforcement officers referred to as Federal Air Marshals (FAMs). These FAMs are deployed to fly missions on commercial U.S. aircraft for both domestic and international flights that have been identified as Targeted Critical Flights under 10 individual risk categories that are found in the OLE/FAMS Concept of Operations. Coverage is provided using a risk - based management approach for mission planning.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	100%	100%	100%	100%	100%	100%
<b>Actual:</b>	101.7%	96.2%	98.1%	109.2%	N/A	N/A

<b>Measure:</b> Average annual rate of accuracy in Federal Air Marshals' firearms re - qualification.						
<b>Description of Measure:</b> Federal law enforcement officer candidates must graduate from the Federal Law Enforcement Training Center (FLETC) with a score of 210 out of a possible 300 on FLETC's Practical Pistol Course (PPC). To graduate from Phase II of the Federal Air Marshal Training Program (FAMTP - II), a FAM candidate must achieve a higher standard, which is quantified as 255 out of 300 (85 percent) on the firearms proficiency course of fire. To remain a FAM, an employee must demonstrate the same standard of excellence by scoring at least 255 out of 300 on recurring quarterly tests. Precision requirements drive a FAM's ultimate ability to defeat an attempted attack.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011

<b>Actual:</b>	SS	SS	SS	SSI	N/A	N/A

<b>Measure:</b> Improve confidence in our Nation's civil aviation system through risk - based deployment of Federal Air Marshals to detect, deter, and defeat hostile acts targeting U.S. air carriers, airports, passengers, and crews						
<b>Description of Measure:</b> As required by the Aviation and Transportation Security Act (PL 107 - 71), the Transportation Security Administration's Office of Law Enforcement and Federal Air Marshal Service places Federal Air Marshals on high - risk flights. This measure assesses whether these efforts improve the confidence of the U.S. public in the ability of this professional staff to defend aircraft and passengers against hostile acts. Respondents chose from one of five options to describe their confidence "in the ability of the Federal Air Marshals to defend an aircraft and its passengers from individuals with hostile Intention:" 1) no confidence, 2) a small amount of confidence, 3) a moderate amount of confidence, 4) a great deal of confidence, or 5) total confidence). The percentage of responses to each option is then weighted to produce a score.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	Baseline	3.5	3.65	3.78
<b>Actual:</b>	None	None	3.33	3.45	N/A	N/A

<b>Measure:</b> Percentage of FAMs providing the targeted number of flying days per year						
<b>Description of Measure:</b> The measure is expressed as the percentage of mission deployed FAMs who were in mission status for within plus/minus ten percent of the expected annual number of mission days. FAMS best demonstrates cost efficiency by optimizing the allocation of its personnel - that is, improving the rate at which they serve in mission status at levels tied to management's focus on long - term and annual performance goals.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011

**Performance Plan Measures**

<b>Measure:</b> Percent of mass transit and passenger rail agencies that have effectively implemented industry agreed upon Security and Emergency Management Action items to improve security						
<b>Description of Measure:</b> This measure reflects the percent of the 100 largest mass transit, light and passenger rail, bus, and other commuter transportation agencies that have taken recommended steps to improve security. The program evaluates the 100 largest mass transit and passenger rail agencies based on passenger volume through the Baseline Assessment for Security Enhancement (BASE) program. The BASE program assesses whether comprehensive Security and Emergency Management Action Items that are critical to an effective security program, including security plans, training, exercises, public awareness, and other security areas, are in place. Transportation Security Inspectors conduct the assessments in partnership with the mass transit and passenger rail security chiefs and directors approximately every 18 - 24 months to measure progress in the enhancement of security. Results of the security assessments also ensure grant funding priorities align with identified needs for mass transit security enhancements.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	50%	40%	35%	40%
<b>Actual:</b>	None	None	23%	23%	N/A	N/A

<b>Measure:</b> Percent reduction in risk from toxic inhalation hazard bulk cargoes in rail transportation						
<b>Description of Measure:</b> The Toxic Inhalation Hazard (TIH) Risk Reduction Program strives to reduce the risk posed by TIH materials, the most toxic chemicals transported by rail in the U.S., including chlorine and anhydrous ammonia. Through a partnership with American and Canadian railroads, Transportation Security Administration (TSA) gathers railcar movement data, focusing on the time a loaded rail car is standing unattended in a DHS - designated High Threat Urban Area (HTUA). This period of time is referred to as "dwell time". The program uses a risk calculation comprised of four elements: 1) the amount of "dwell time" in hours; 2) the specific HTUA; 3) the Population Proximity Factor (PPF); and 4) whether the car is attended or unattended. The level of risk will be compared to the baseline risk level, which is calculated from the period prior to the adoption of TSA/Department of Transportation issued Security Action Items developed to enhance the security of TIH shipments.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	50%	55%	61%	67%
<b>Actual:</b>	None	None	56.3%	58.57%	N/A	N/A

**Additional Measures**

<b>Measure:</b> Number of high risk Pipeline corporate systems on which Pipeline Corporate Security Reviews will be conducted						
<b>Description of Measure:</b> TSA is assessing and elevating the security posture of the pipeline mode through the Pipeline Corporate Security Reviews (PCSRs). The focus of the PCSRs is on the high consequence (based on energy throughput) corporate pipelines, which carry approximately 84 percent of the nation's energy throughput. The objectives of an onsite security review are to develop first-hand knowledge of security planning and execution at critical pipeline systems, establish communication with key pipeline security personnel, and identify and share smart practices. TSA's Pipeline Division conducts PCSRs in partnership with the pipeline systems staff. As industry wide security gaps are identified through the PCSR process, the TSA pipeline security division develops programs to address gaps throughout the pipeline industry.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	25 (25%)	37 (37%)	53 (53%)	69 (69%)
<b>Actual:</b>	None	None	25 (25%)	40 (40%)	N/A	N/A

<b>Measure:</b> Number of rail inspections conducted per 1000 inspector hours						
<b>Description of Measure:</b> Compliance/Surface: This measure illustrates the efficiency of inspection activities by quantifying the number of inspections conducted per inspector within a certain time frame. It is important to note that surface transportation inspection processes and requirements are continually evolving and maturing. As a result, this may require adjustments to future targets.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	N/A	53.4	60	62	64	66
<b>Actual:</b>	N/A	53.4	91	57	N/A	N/A

<b>Measure:</b> Percent of highway infrastructure systems that have undergone a Corporate Security Review (CSR)						
<b>Description of Measure:</b> TSA assesses security posture of state DOTs (and the District of Columbia) through the Highway and Motor Carrier Corporate Security Review Program (CSR). The Highway and Motor Carrier Division CSRs are an "instructive" review that provide TSA with a general understanding of each state Department of Transportation's ability to protect its key physical and critical assets. During a CSR, teams of TSA modal experts evaluate and collect physical and operational preparedness information, critical assets, key point - of - contact lists, review emergency procedures and domain awareness training, and provide an opportunity to share smart practices. The on - site voluntary reviews serve to establish data against which to evaluate minimum security standards and identify coverage gaps within states to reduce risk.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	39 (76.5%)	43 (84.3%)	47 (92.2%)	51 (100%)	N/A

### Performance Plan Measures

<b>Measure:</b> Percent of customers satisfied with the intelligence products provided						
<b>Description of Measure:</b> This measure shows the overall level of customer satisfaction with intelligence products produced and disseminated by the program.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	N/A	85%	85%	90%	80%	80%
<b>Actual:</b>	N/A	89.6%	80%	80%	N/A	N/A

### Additional Measures

<b>Measure:</b> Percent decrease in worker's compensation claims						
<b>Description of Measure:</b> This measure tracks improvements that have been made in reducing the amount of money that has been paid in worker's compensation. Traumatic Injury Leave is authorized when an employee sustains a work - related traumatic injury and the injured workers physician certifies that the employee is unable to work or TSA fails to provide limited duty work during the first 45 days following the injury. The percent decrease represents salary compensation paid to employees for lost time associated with traumatic injuries.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	5%	5%	7%	7%
<b>Actual:</b>	None	None	39%	24%	N/A	N/A

<b>Measure:</b> Percent of customers utilizing the Transportation Security Intelligence Service Remote Access to Classified Enclaves (TRACE) intelligence sharing program						
<b>Description of Measure:</b> This measure shows the percentage of total deployed TRACE systems that record a connection. The connectivity is based on the site fully authenticating through the TRACE network and opening a product while connected to the website.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	50%	50%	90%	92%	94%	96%
<b>Actual:</b>	38%	22%	84%	87%	N/A	N/A

<b>Measure:</b> Percentage of systems certified based on Federal Information System Management Act (FISMA), as accepted by DHS and accredited as designated by CIO						
<b>Description of Measure:</b> This measure ensures that all IT systems are certified and able to provide quality support to the Nations transportation systems. A certified IT system undergoes a security accreditation, which is the official management decision given by a senior agency official to authorize operation of an information system and to explicitly accept the risk to agency operations, agency assets, or individuals based on the implementation of an agreed - upon set of security controls. This measure is reported based on FISMA year - end of July 31st as opposed to fiscal year - end of September 30th.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	100%	100%	100%	100%	100%	100%
<b>Actual:</b>	100%	100%	100%	100%	N/A	N/A

<b>Measure:</b> Reduce cost and schedule variance for information technology infrastructure projects						
<b>Description of Measure:</b> This efficiency allows both Government and contractor Program Managers (PM) to have visibility into technical, cost, and schedule planning, performance, and progress of the contract effort. TSA's target is to achieve 75% programs meeting cost and schedule goals by less than 10% variance.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	99.99%	99.99%	99.99%	99.99%	99.99%	99.99%
<b>Actual:</b>	99.99%	99.99%	99.99%	99.99%	N/A	N/A

<b>Program: Transportation Threat Assessment and Credentialing</b>						
<b>Performance Goal:</b> Reduce the threat to national security and transportation security by individuals engaged in various activities to harm the U.S. transportation systems.						
<b>Secretary's Priority:</b> Securing and Managing our Borders						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011

<b>FTE</b>	83	172	172	201	252	268

### Performance Plan Measures

<b>Measure:</b> Percent of individuals undergoing a Transportation Threat Assessment and Credentialing (TTAC) security threat assessment						
<b>Description of Measure:</b> This measure indicates the percent of Transportation Threat Assessment and Credentialing (TTAC) population receiving a Security Threat Assessment. Thorough vetting will decrease vulnerabilities of sensitive transportation systems by limiting access of potentially dangerous individuals who are identified by TTAC vetting and credentialing programs. The populations currently include international flight crews, aviation workers, hazardous material drivers, and non - U.S. citizens receiving flight instruction at Federal Aviation Administration certified flight schools in the U.S. and abroad. In the future, TTAC programs will also cover domestic airline passengers, surface, and maritime workers.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011

<b>Measure:</b> Ratio of false positives to total names processed						
<b>Description of Measure:</b> This measure assesses how well the program is restricting access to people who do (or do not) present a threat to the nation's transportation system.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>		Baseline	+/- .8%	+/- .6%	+/- .4%	+/- .2%
<b>Actual:</b>		.58%	.55%	0.497%	N/A	N/A

**E. High Priority Performance Goals**

**High Priority Performance Goal:** Improve security screening of transportation passengers, baggage, and employees while expediting the movement of the traveling public.

This High Priority Performance Goal focuses on two areas: Aviation Security and Surface Transportation Security. The Aviation Sector remains a top terrorist target. TSA must screen one hundred percent of all passengers, baggage, and regulated aviation employees while minimizing the impact to the traveling public. In addition, TSA is mandated to screen 100 percent of air cargo on domestic carriers by August 3, 2010, while providing a level of security commensurate to that of passenger baggage. The Transportation Security Administration is also mandated to protect the nation's surface modes through compliance, inspection, and deterrence activities. There is a very real ongoing threat to the non-aviation modes within the transportation sector including pipelines, highway and motor carrier, maritime, mass transit, rail, and postal and shipping sectors. Guided by the President's Executive Order to Strengthen Surface Transportation Security and other statutory provisions, DHS plays a pivotal role in the surface environment by working with service providers and regulatory agencies to identify security gaps, set security standards to mitigate these gaps, and ensure compliance.

**High Priority Performance Goal Measures**

<b>FYHSP Program Name</b>	<b>Program Performance Goal</b>	<b>Performance Measure</b>	<b>Secretary's Priority</b>
Aviation Security	Reduce the probability of a successful terrorist or other criminal attack to the air transportation system by improved aviation security.	Passenger security screening assessment results (classified measure)	Preventing and Protecting Against Terrorism

Aviation Security	Reduce the probability of a successful terrorist or other criminal attack to the air transportation system by improved aviation security.	Percent of air cargo screened on commercial passenger flights originating from the United States and territories	Preventing and Protecting Against Terrorism
Aviation Security	Reduce the probability of a successful terrorist or other criminal attack to the air transportation system by improved aviation security.	Baggage security screening assessment results (classified measure)	Preventing and Protecting Against Terrorism
Aviation Security	Reduce the probability of a successful terrorist or other criminal attack to the air transportation system by improved aviation security.	Maintain passenger wait times of less than twenty minutes	Preventing and Protecting Against Terrorism
Surface Transportation Security	To protect the surface transportation system while ensuring the freedom of movement for people and commerce.	Advanced Imaging Technology units to be purchased	Preventing and Protecting Against Terrorism
Surface Transportation Security	To protect the surface transportation system while ensuring the freedom of movement for people and commerce.	Reduced Size Electronic Detection System units to be purchased	Preventing and Protecting Against Terrorism
Surface Transportation Security	To protect the surface transportation system while ensuring the freedom of movement for people and commerce.	Bottle Liquid Scanners units to be purchased	Preventing and Protecting Against Terrorism

**Notes:**

- 1) Homeland Security activities includes the following programs: Migrant Interdiction, Ports, Waterways and Coastal Security and Defense Readiness.
- 2) Non-Homeland activities include the following programs: Search and Rescue, Marine Safety, Aids to Navigation, Ice Operations, Marine Environmental Protection, Living Marine Resources, Drug Interdiction and Other Law Enforcement.
- 3) Funds account for all scorekeeping adjustments
- 4) For comparability purposes, FY 2009 Operating Expenses (OE) includes \$251,503,000 transferred from DoD in support of Overseas Contingency Operations (OCO) and HEC sustanment; FY 2010 Enacted OE includes \$241,503,000 and 872 FTE appropriated to the Coast Guard for OCO and \$54,000 and 247 FTE transferred from NSF for Polar Icebreaker operations; FY 2011 Request includes requested \$254,461,000 for OCO via DoD transfer.
- 5) FY 2009 Actual includes American Recovery and Reinvestment Act (ARRA) funding as follows: \$13,179,000 in Acquisition, Construction, and Improvements, and \$142,000,000 in Alteration of Bridges.

# U. S. Coast Guard

## Operating Expenses

### I. Appropriation Overview

#### **A. Mission Statement for Operating Expenses:**

The OE request supports all 11 statutorily mandated Coast Guard mission-programs, and in turn, these mission programs directly support the Coast Guard's role as the Nation's principal Federal agency providing maritime safety, security, and stewardship, and supporting the Department of Homeland Security's (DHS) strategic goals and objectives.

#### **B. Budget Activities:**

Operating Expenses appropriation funds the annualization of prior-year, part-year funding, pay and non-pay cost of living increases, and operating and maintenance funding for prior-year Administration and Congressional line items.

#### **C. Budget Request Summary:**

The Coast Guard requests \$6.651 billion and 48,490 FTE in FY 2011. Total adjustments-to-base are \$111.342 million and 134 FTE. In particular, new funding will support the mandatory pay increase (1.4% military and 1.4% civilian); GSA rent and security charge increases; increased costs for government services; and the operation, maintenance, and crewing of replacement assets.

Additionally, total funding continues support for operation and maintenance costs associated with programs such as shore facilities and Aids-to-Navigation (ATON), Response Boat-Medium, Rescue 21, Nationwide Automatic Identification System (NAIS), Defense Messaging System, and the Rescue Swimmer Training Facility.

Management and technology efficiencies include Headquarters management and Logistics Transformation product line efficiencies; DHS balanced workforce strategy; consolidation of Maritime Intelligence Fusion Centers; mission support personnel reductions; and, decommissioning of the National Strike Force Coordination Center.

Program decreases totaling \$24.280 million and 235 FTE are identified to allow for the re-allocation of resources to critical recapitalization projects. Decreases include rotary wing and deployable force capacity, and Coast Guard Investigative Service (CGIS).

Of the total 47,928 positions, 48,490 FTE, and \$6.651 billion requested in this budget, a decrease of 773 positions, 101 FTE, and an increase of \$87.062 million is reflected in this account.

Base adjustment increases include:

- Annualizations of prior-year funding – \$44.155 million
- FY 2011 pay increase and annualization of FY 2010 pay raise for both military and civilian members – \$57.190 million

- DoD parity: military pay and allowances, health care, and Permanent Change of Station (PCS) – \$86.187 million
- Operational Adjustment Increases (includes GSA rent and security charges, Government services) – \$11.359 million
- Operating and Maintenance funds for new assets, including follow-on costs related to Shore Facilities and ATON, Response Boat-Medium, Rescue 21, Nationwide Automatic Identification System, Defense Messaging System, Rescue Swimmer Training Facility, and Surface and Air Asset Follow-on – \$79.983 million

Base Re-Allocations (non-Add) include:

- Military FTP and FTE Transfer to Civilian – [\$9.990 million]
- PPA Funding Technical Transfers – [\$7.610 million]

Base adjustment decreases include:

- Termination of One-Time Costs – (\$63.727 million)
- Prior Year Management Annualizations – (\$24.252 million)
- Management and Technology Efficiencies including logistics transformation product line efficiencies, Headquarters management efficiencies, Manned Covert Surveillance Aircraft follow-on, DHS Balanced Workforce Strategy, consolidation of Maritime Intelligence Fusion Centers (MIFCs), decommissioning of National Strike Force Coordination Center, and Mission Support Personnel – (\$40.904 million)
- Asset Decommissionings including four HU-25 Aircraft, four High Endurance Cutters (HEC) and one Medium Endurance Cutter – (\$38.649 million)

Program change decreases include:

- Rotary Wing Capacity – \$5.503 million
- Deployable Force Capacity – \$18.202 million
- CG Investigative Service (CGIS) – \$0.575 million

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**U. S. Coast Guard**  
**Operating Expenses**  
**Program Performance Justification**  
(Dollars in thousands)

#### PPA I: MILITARY PAY AND ALLOWANCES

	Perm Pos	FTE <sup>1</sup>	Amount
<b>2009 Actual</b>	<b>41,342</b>	<b>41,499</b>	<b>3,172,244</b>
<b>2010 Enacted</b>	<b>41,450</b>	<b>41,811</b>	<b>3,253,130</b>
2011 Adjustments-to-Base	(647)	(252)	118,167
<b>2011 Current Services</b>	<b>40,803</b>	<b>41,559</b>	<b>3,371,297</b>
2011 Program Change	(465)	(233)	(13,535)
<b>2011 Request</b>	<b>40,338</b>	<b>41,326</b>	<b>3,357,762</b>
Total Change 2010-2011	(1,112)	(485)	104,632

The Coast Guard requests \$3.358 billion for this activity, an increase of \$104.632 million above the FY 2010 enacted level.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

Requests funding for expenses related to compensation and benefits for active duty military personnel. This category includes pay, allowances, employer's share of FICA, Social Security credits, and other expenses associated with compensating military personnel. Costs related to compensation are calculated by using the Coast Guard's Standard Personnel Cost (SPC) tables. These tables are updated annually and provide a detailed calculation for each billet, broken down by rank/rate, location – in the United States (INCONUS) or out of the country (OCONUS – which includes AK and HI), medical costs and permanent change of station (PCS) expenses. Calculations for medical cost estimates are the same for each billet. Calculations for PCS moves and base pay are based upon rank and location of billet. Pay estimates account for OMB published pay inflation factors for the fiscal year in question.

Significant accomplishments in FY 2009 included:

- Responded to over 23,000 Search and Rescue cases and saved over 4,700 lives.
- Interdicted nearly 3,700 undocumented migrants attempting to illegally enter the United States.
- Removed 160 metric tons of cocaine and 71,234 pounds of marijuana bound for the U.S. via the Transit Zone.
- Completed over 14,000 inspections of U.S. flagged certificated vessels.
- Conducted nearly 11,000 Port State Control safety and environmental exams on foreign vessels entering U.S. ports.

---

<sup>1</sup> The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year.

- Completed over 25,000 container and 17,000 facility inspections.
- The first National Security Cutter (NSC), USCGC BERTHOLF, disrupted a multi-vessel drug transfer during its first operational patrol in the Eastern Pacific.
- Established five National Centers of Expertise to improve marine safety performance and industry dialogue regarding vintage vessels, towing vessels, liquefied gas vessels, outer continental shelf, and casualty investigations.
- Executed inaugural Operation Dry Water boating safety and BUI enforcement campaign in forty-nine states and U.S. territories.
- Patrol Forces Southwest Asia (PATFORSWA) provided continued support of National Security interests in the Arabian Gulf.
- Inspected over 48,000 Transportation Worker Identification Credentials (TWICs) in port facilities throughout the U.S.

FY 2010 planned accomplishments include:

- Increase Marine Safety capability and capacity.
- Improve airborne use of force capability.
- Continued operation of Biometrics at Sea initiative.
- Sustain Seahawk Charleston Interagency Operations Center.
- Improve financial management oversight.
- Support Overseas Contingency Operations (OCO).
- Support scientific research and Coast Guard operations in the Arctic Region

In FY 2011 active duty military personnel will ensure the service remains agile, adaptable, and ready to serve the Nation's maritime interests. The Service was founded as a military, multi-mission, maritime service and continues to be ready, aware, and responsive across all of the Coast Guard's 11 mission-programs.

As one of the Nation's five Armed Services, dedicated Coast Guard personnel conduct missions that protect the public, the environment, and U.S. economic interests – in the Nation's ports and waterways, along the coast, on international waters and in any maritime region required to support homeland security. The unique, multi-mission character of the Coast Guard requires personnel to serve as sailors, emergency responders, humanitarians, regulators, law enforcement personnel, stewards of the environment, and guardians of the coast – military, multi-mission, and maritime. Coast Guard forces are flexible, rapidly deployable, and able to respond to crises with a full range of capabilities. Coast Guard forces capitalize upon their multi-mission synergies to prevent maritime incidents, protect the U.S. Maritime Domain, and respond to and recover from incidents that may occur.

Requested new funding will support the anticipated FY 2011 pay raise and the basic allowance for housing increase for all military service members, while annualizing military average monthly end strength introduced in FY 2010. Additionally, the funding will support military personnel to operate and maintain newly acquired assets (e.g., National Security Cutter, Fast Response Cutter, Maritime Patrol Aircraft, etc.).

This FY 2011 request reduces the size of the military workforce by 485 FTE (1,112 positions) primarily associated with decommissioning of legacy assets and realignment of forces.

PPA II: CIVILIAN PAY AND BENEFITS

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actual</b>	<b>7,167</b>	<b>6,564</b>	<b>644,614</b>
<b>2010 Enacted</b>	<b>7,251</b>	<b>6,780</b>	<b>700,646</b>
2011 Adjustments-to-Base	342	386	56,650
<b>2011 Current Services</b>	<b>7,593</b>	<b>7,166</b>	<b>757,296</b>
2011 Program Change	(3)	(2)	(41)
<b>2011 Request</b>	<b>7,590</b>	<b>7,164</b>	<b>757,255</b>
Total Change 2010-2011	339	384	56,609

The Coast Guard requests \$757.255 million for this activity, an increase of \$56.609 million above the FY 2010 enacted level.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Requests funding for expenses related to compensation and entitlements for federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e.g., Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial operations, and "Non-Ceiling" (NC) employees (e.g., cooperative education students, student aids, summer interns, and federal junior fellows). Costs related to compensation are calculated using the Coast Guard's Standard Personnel Cost (SPC) tables. These annually updated tables provide a detailed calculation for each billet, broken down by pay grade and location – in the United States (INCONUS) or out of the country (OCONUS – which includes AK and HI). Calculations for base pay are based upon position, location of position, and OMB economic assumptions for the fiscal year in question.

Significant accomplishments in FY 2009 included:

- Responded to over 23,000 Search and Rescue cases and saved over 4,700 lives.
- Interdicted nearly 3,700 undocumented migrants attempting to illegally enter the United States.
- Removed 160 metric tons of cocaine and 71,234 pounds of marijuana bound for the U.S. via the Transit Zone.
- Completed over 14,000 inspections of U.S. flagged certificated vessels.
- Conducted nearly 11,000 Port State Control safety and environmental exams on foreign vessels entering U.S. ports.
- Completed over 25,000 container and 17,000 facility inspections.
- The first National Security Cutter (NSC), USCGC BERTHOLF, disrupted a multi-vessel drug transfer during its first operational patrol in the Eastern Pacific.
- Established five National Centers of Expertise to improve marine safety performance and industry dialogue regarding vintage vessels, towing vessels, liquefied gas vessels, outer continental shelf, and casualty investigations.
- Executed inaugural Operation Dry Water boating safety and BUI enforcement campaign in forty-nine states and U.S. territories.
- Patrol Forces Southwest Asia (PATFORSWA) provided continued support of National Security interests in the Arabian Gulf.

- Inspected over 48,000 Transportation Worker Identification Credentials (TWICs) in port facilities throughout the U.S.

The civilian personnel are an integral part of the Coast Guard and its 11 mission-programs. The Coast Guard continues to complement its military workforce by recruiting diverse, well-educated, and energetic civilians needed to meet current and future demands.

FY 2010 planned accomplishments include:

- Increase Marine Safety capability and capacity.
- Continued operation of Biometrics at Sea initiative.
- Sustain Seahawk Charleston Interagency Operations Center.
- Improve financial management oversight.
- Support Overseas Contingency Operations (OCO).
- Support scientific research and Coast Guard operations in the Arctic Region

In FY 2011, requested funding will provide dedicated civilian personnel who contribute daily to the Coast Guard's 11 mission-programs. Civilian personnel stand side-by-side with military personnel to fulfill the roles of maritime first responders and help maintain mission effectiveness, prepare for emergencies and contingencies, and ensure Maritime Domain Awareness. These dedicated personnel support and conduct the missions that protect the public, the environment, and U.S. economic interests – in the Nation's ports and waterways, along the coast, on international waters, and in any maritime region required to support national security.

Funding requested will support the anticipated FY 2011 pay raise for all civilian personnel and annualize civilian FTE introduced in FY 2010.

The FY 2011 request increases the size of the civilian workforce by 384 FTE (339 positions) primarily associated with the DHS Balanced Workforce Strategy and new asset follow-on.

PPA III: TRAINING AND RECRUITING

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actual</b>	...	...	<b>200,783</b>
<b>2010 Enacted</b>	...	...	<b>206,840</b>
2011 Adjustments-to-Base	...	...	(2,527)
<b>2011 Current Services</b>	...	...	<b>204,313</b>
2011 Program Change	...	...	(444)
<b>2011 Request</b>	...	...	<b>203,869</b>
Total Change 2010-2011	...	...	(2,971)

The Coast Guard requests \$203.869 million for this activity, a decrease of \$2.971 million below the FY 2010 enacted level.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The training and recruiting PPA provides funding for the Coast Guard’s professional training and education programs, as well as operation and maintenance of the seven major Coast Guard training centers and the Coast Guard Academy and Leadership Development Center.

Significant accomplishments in FY 2009 included:

- Accessed 3,169 recruits through recruit training; graduated 3,127 enlisted apprentices from “A” schools; and commissioned 496 officers from the Coast Guard Academy, Officer Candidate School, and Direct Commission Program.
- Trained 2,006 members in advanced maritime law enforcement, 979 members in counter terrorism activities, 1,267 members in leadership skills, and provided 65,749 advanced Coast Guard classroom training courses (i.e., the number of individual seats available in Coast Guard “C” school courses).
- Graduated 218 members from post-graduate schools meeting advanced training and knowledge requirements.

FY 2010 planned accomplishments include:

- Accessing 3,575 recruits through recruit training; graduating 2,897 enlisted apprentices from our “A” schools; and commissioning 355 officers from the Coast Guard Academy, Officer Candidate School and Direct Commission Program.
- Training 2,530 members in advanced maritime law enforcement, 1,302 members in counter terrorism activities, 2,745 members in leadership skills, and providing 69,341 advanced Coast Guard classroom training courses.
- Graduating 205 members from post-graduate schools to meet advanced training and knowledge requirements.

The FY 2011 request provides funding for all Coast Guard recruiting operations, given projected attrition and growth, to ensure sufficient numbers of qualified individuals for the military workforce. Coast Guard recruiting is a national endeavor. As such, recruiters cover broad

geographic areas with diverse socio-economic demographics to compete for the best qualified candidates.

Additionally, this request includes funding for tuition, travel, and per diem for formal training and education performed as temporary additional duty (TAD) by military service members and civilian personnel. It also ensures the training infrastructure is adequately resourced to provide Coast Guard personnel with the tools and competencies necessary for assigned missions. Training is provided by the Coast Guard, commercial providers, DoD, and other agencies. This training and education is usually conducted by dedicated resident staffs in classrooms, but may also include exportable training, correspondence courses, and/or computer-based training.

From entry-level personnel through senior leadership, the Coast Guard focuses its training resources to embed those competencies that will maximize operational capabilities. The FY 2011 budget provides funding for increased training requirements related to new platforms, such as the National Security Cutter (NSC) and the new Rescue Swimmer Training Facility (RSTF) that includes a Modular Egress Training Simulator (METS).

PPA IV: OPERATING FUNDS AND UNIT LEVEL MAINTENANCE

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actual</b>	...	...	<b>1,275,467</b>
<b>2010 Enacted</b>	...	...	<b>1,154,720</b>
2011 Adjustments-to-Base	...	...	(40,675)
<b>2011 Current Services</b>	...	...	<b>1,114,045</b>
2011 Program Change	...	...	(7,774)
<b>2011 Request</b>	...	...	<b>1,106,271</b>
Total Change 2010-2011	...	...	(48,449)

The Coast Guard requests \$1.106 billion for this activity, a decrease of \$48.449 million below the FY 2010 enacted level.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Requests funding for units, facilities, and activities that are under the direct operational and administrative control of the Coast Guard’s Headquarters, Atlantic Area or Pacific Area Commanders. These include Base Support Units (BSUs), High and Medium Endurance Cutters (WHECs/WMECs), Communication Stations, Maritime Safety and Security Teams (MSSTs), support commands, and Area Offices as applicable, for supplies, materials, and services that allow the Coast Guard to sustain an operations tempo with an immediate response capability for Coast Guard missions. Maintenance of cutter hulls, mechanical systems, electrical equipment, and small boats; procurement of supplies and materials utilized for unit “housekeeping” and administration, spare parts, fuel, and energy; funding of personnel support programs; and other materials consumed all contribute directly to mission effectiveness.

Significant accomplishments in FY 2009 included:

- Responded to over 23,000 Search and Rescue cases and saved over 4,700 lives.
- Interdicted nearly 3,700 undocumented migrants attempting to illegally enter the U.S.
- Removed 160 metric tons of cocaine and 71,234 pounds of marijuana bound for the U.S. via the Transit Zone.
- Completed over 14,000 inspections of U.S. flagged certificated vessels.
- Conducted nearly 11,000 Port State Control safety and environmental exams on foreign vessels entering U.S. ports.
- Completed over 25,000 container and 17,000 facility inspections.
- The first National Security Cutter (NSC), USCGC BERTHOLF, disrupted a multi-vessel drug transfer during its first operational patrol in the Eastern Pacific.
- Established five National Centers of Expertise to improve marine safety performance and industry dialogue regarding vintage vessels, towing vessels, liquefied gas vessels, outer continental shelf, and casualty investigations.
- Executed inaugural Operation Dry Water boating safety and BUI enforcement campaign in forty-nine states and U.S. territories.
- Patrol Forces Southwest Asia (PATFORSWA) provided continued support of National Security interests in the Arabian Gulf.

- Inspected over 48,000 Transportation Worker Identification Credentials (TWICs) in port facilities throughout the U.S.

FY 2010 planned accomplishments include:

- Achieve Initial Operational Capability of the Response Boat Medium (RB-M).
- Increase Marine Safety capability and capacity.
- Improve airborne use of force capability.
- Continue operation of Biometrics at Sea initiative.
- Sustain Seahawk Charleston Interagency Operations Center.
- Improve financial management oversight.
- Conduct Overseas Contingency Operations (OCO).
- Expand the Rescue 21 National Distress Response System.
- Support scientific research and Coast Guard operations in the Arctic Region.

The FY 2011 request supports the annualization of new operations introduced in FY 2010, as well as follow-on funding to operate and maintain Shore Facilities and Aids to Navigation (ATON), Response Boat-Mediums (RB-M), new Rescue 21 equipment, and multiple surface and air assets including the third National Security Cutter, Fast Response Cutters, and HC-144A Maritime Patrol Aircraft (MPA).

PPA V: CENTRALLY MANAGED ACCOUNTS

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actual</b>	...	...	<b>277,337</b>
<b>2010 Enacted</b>	...	...	<b>334,766</b>
2011 Adjustments-to-Base	...	...	11,606
<b>2011 Current Services</b>	...	...	<b>346,372</b>
2011 Program Change	...	...	(541)
<b>2011 Request</b>	...	...	<b>345,831</b>
Total Change 2010-2011	...	...	11,065

The Coast Guard requests \$345.831 million for this activity, an increase of \$11.065 million above the FY 2010 enacted level.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Requested funding represents centrally managed accounts which provide service to the entire Coast Guard. Larger central accounts include: the Federal Telephone System (FTS), Standard Workstation recapitalization, Coast Guard Data Network (CGDN), postal expenses, satellite communications, General Services Administration (GSA) rent, ammunition replenishment, and the DHS Working Capital Fund.

Significant accomplishments in FY 2009 included:

- Enhancement and sustainment of the standard computer infrastructure including new technology to support the more secure VISTA operating system and initiation of the Federal Desktop Core Configurations for computer security.
- Increased information sharing through implementation of enhanced web portal and social network capabilities (e.g., CG Portal).

FY 2010 planned accomplishments include:

- Continue expansion of CG Portal capabilities in conjunction with secure Common Access Card (CAC) authentication to expand access to more Coast Guard communities including the Reserves.

The FY 2011 request funds:

- Increased satellite communications airtime costs and increased postal expenses.
- Lease renewal at various Coast Guard units.

PPA VI: INTERMEDIATE AND DEPOT LEVEL MAINTENANCE

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actual</b>	...	...	<b>858,273</b>
<b>2010 Enacted</b>	...	...	<b>913,786</b>
2011 Adjustments-to-Base	...	...	(31,879)
<b>2011 Current Services</b>	...	...	<b>881,907</b>
2011 Program Change	...	...	(1,945)
<b>2011 Request</b>	...	...	<b>879,962</b>
Total Change 2010-2011	...	...	(33,824)

The Coast Guard requests \$879.962 million for this activity, a decrease of \$33.824 million below the FY 2010 enacted level.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This request provides service-wide funding for the Coast Guard’s base level operating expense (OE) funded maintenance for the service’s shore facilities, vessels, and aircraft. The Coast Guard maintains its aircraft, vessels, and shore infrastructure using in-house maintenance and repair infrastructure in conjunction with contracted depot-level maintenance activities. A mature project planning and execution program exists within the Coast Guard to provide routine unit-level and depot-level maintenance. Where expertise or infrastructure does not exist organically within the Service, the Coast Guard uses contracted resources to provide the requisite maintenance support.

The Coast Guard’s maintenance planning process involves every level of the organization including: (1) field level input provided in casualty, mishap, and annual unit engineering reports; (2) engineering/support provider input in the form of regional maintenance data/trend analysis, observations of experienced support/engineering personnel, and prioritization of issues/needs; and (3) Coast Guard Headquarters involvement in the collation of CG-wide data/trend analysis, input from the Atlantic and Pacific Area Commanders and their support providers, and development of corrective strategies.

FY 2009 accomplishments included:

- Program Depot Maintenance for: HC-130H (6); HH-60J (6); HH-65C (20); HU-25 (4).
- Completed the following dry-docks: WYTL 65 (3); WPB 87 (16); WPB 110 (8); WLR/WLIC (7); WTGB 140 (3); WLM 175 (3); WLB 225 (4); WMEC 210/270 (5); and WHEC 378 (5).

FY 2010 planned accomplishments include:

- Program Depot Level maintenance for: HC-130H/J (6); HH-60J (8); HH-65C(19); HU-25 (4), and HC-144A (1).
- Planned 2010 dry-docks: WYTL 65 (11); WPB 87 (71); WPB 110 (40); WLR/WLIC (15); WTGB 140 (6); WLM 175 (5); WLB 225 (5); WMEC 210/270 (13); and WHEC 378 (5).
- Continue to focus efforts towards reducing the shore facility deferred maintenance backlog to reduce failures and avoid increasing out-year costs.

The FY 2011 request funds:

**Aircraft.** Includes service-wide funding to support the maintenance and repair of Coast Guard aircraft not appropriated in the Coast Guard Acquisition, Construction, and Improvements (AC&I) appropriation. This category includes: materials, services, and supplies necessary for depot-level repair, maintenance, modification, and overhaul of aircraft and aircraft equipment, including associated avionics; transportation of aircraft and aeronautical materials and equipment; and procurement and overhaul of aircraft ground handling and support equipment. Request also includes funding for general expenses related to inventory and engineering design, alteration and modification services in support of Coast Guard aircraft.

This funding request supports depot-level aircraft repair. Coast Guard rotary wing aircraft are continuously rotated out of operational service to allow for programmed depot maintenance (PDM) at the Aviation Logistics Center (ALC) in Elizabeth City, NC. This funding also provides for contractor support to conduct PDM on the service's HC-130Hs. All PDM is based upon established service standards. The purpose of the aircraft PDM program is to (1) provide periodic inspection of areas of an aircraft which are not accessible without extensive disassembly, (2) perform heavy maintenance which is beyond the capability of operating units, and (3) incorporate changes and modifications which are too extensive to perform at the operating unit level.

**Vessels.** Includes service-wide funding to support the maintenance and repair of Coast Guard vessels not appropriated in the Coast Guard AC&I appropriation. In particular, funding requested will support the procurement, installation, replacement and support of standard hull, mechanical, electrical, and electronic systems. Request also includes funding for general expenses related to inventory and engineering design, alteration and modification services in support of Coast Guard vessels.

Coast Guard vessels are regularly scheduled for programmed depot maintenance based upon established class maintenance plans (CMP). In addition to ship repair work provided by the Coast Guard Yard in Curtis Bay, MD, the Coast Guard routinely uses ship repair facilities/contractors to complete depot level maintenance via competitive contracts. The Coast Guard manages vessel base OE legacy asset maintenance funding using Standard Support Levels (SSLs) established for each vessel class of asset at the time of asset acquisition and adjusted annually for inflation. Actual expenditures vary from the SSL as the Coast Guard's maintenance managers shift resources to deal with their most immediate fleet maintenance challenges, often using funds from another vessel's SSL or outside sources to ensure availability of the most critical Coast Guard assets.

**Shore Infrastructure.** Includes service-wide funding for depot-level, nonrecurring facility maintenance to ensure the safety and integrity of the shore infrastructure, maximize facility economic life, and avoid large recapitalization expenses. This request includes funding for repairs, rebuilding, renovation, alterations, improvement, and other services provided by the Coast Guard's Civil Engineering program not appropriated in the Coast Guard's AC&I appropriation. This category includes support of: Coast Guard-owned land; buildings (e.g., replacement of roofs and mechanical systems); and structures (e.g., repairs to waterfront, communications and navigation system towers, roads and runways). It also includes: support for fixed Aids to Navigation (AtoN) structures (ashore and offshore) and major non-consumable equipment used to support the shore plant (e.g., emergency generators, fuel systems, and pressure vessels). This shore OE funding also supports the Coast Guard's Unaccompanied Personnel Housing (i.e. barracks), family housing, clinics, and morale/well-being and recreational facilities.

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U. S. Coast Guard  
Operating Expenses  
Program Performance Justification  
(Dollars in thousands)**

**Increases** **\$278,874**

**A. Annualization of Prior Year Funding** .....**\$44,155**

<b>PPA Breakdown - Annualization of Prior Year Funding</b>		<b>Total (\$000)</b>

<b>Total</b>	<b>241</b>	<b>78</b>	<b>44,155</b>

**B. Mandatory Personnel Entitlements**

**1. Annualization of FY 2010 Pay Raise .....\$20,552**

<b>PPA Breakdown - Annualization of FY 2010 Pay Raise</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel</b>		
	Military Pay and Allowances	16,873
	Permanent Change of Station	134
<b>PPA II: Civilian Personnel</b>		
	Civilian Pay and Allowances	3,545
		<b>20,552</b>

Request one quarter funding to annualize the FY 2010 military (3.4%) and civilian (2.0%) pay raise.

**2. FY 2011 Pay Increase .....\$36,638**

<b>PPA Breakdown - FY 2011 Pay Increase</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel</b>		
	Military Pay and Allowances	21,072
	Permanent Change of Station	194
<b>PPA II: Civilian Personnel</b>		
	Civilian Pay and Allowances	15,372
		<b>36,638</b>

Request funds the FY 2011 military and civilian (1.4%) pay raise.

**3. Military Allowances .....\$86,187**

<b>PPA Breakdown - Military Allowances</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel</b>		
	Military Pay and Allowances (Basic Allowance for Housing)	40,212
	Military Health Care	44,000
	Permanent Change of Station	1,975
		<b>86,187</b>

Provides funding to maintain current services and ensures parity of military pay, allowances, and health care with the Department of Defense (DoD). This request includes funding for Basic Allowance for Housing (BAH) changes, which are scheduled to take effect on January 1, 2011, childcare benefits for Coast Guard members, and Permanent Change of Station (PCS) costs above non-pay inflation. Also, military health care costs are forecasted using actuarial projections and include funding for Coast Guard clinics, TRICARE, pharmaceuticals, use of DoD military treatment facilities and Public Health Service physicians serving at Coast Guard medical facilities.

**C. Non-pay Operational Adjustments**

**1. GSA Rent and Security Charges Increase.....\$6,656**

<b>PPA Breakdown - GSA Rent and Security Charges Increase</b>		<b>Total (\$000)</b>
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	6,656
		<b>6,656</b>

This request funds additional General Services Administration (GSA) lease space requirements. The GSA Rent account is a demand account that reflects costs resulting from occupancy agreements established between the Coast Guard and GSA to meet specific operational and shore facility requirements. The GSA Rent account is a "bill" that must be paid. Facility space requirements include administrative office space and other unique space such as waterfront facilities and hangar space.

The GSA Security Charges increase reflects costs from current and new occupancy agreements established with GSA to meet specific shore facility security requirements. In addition to office and other unique space requirements, the security charges associated with GSA facilities provide 24 x 7 manned security, which is payable to the Federal Protective Service. This increase is based on projection of a \$.75/sqft generalized security cost and a yearly escalation effect of 2.5% on building specific security charges.

**2. Government Services Increase.....\$4,703**

<b>PPA Breakdown - Government Services Increase</b>		<b>Total (\$000)</b>
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	4,703
		<b>4,703</b>

Provides funding for three essential communication services: satellite communications, Defense Information System Network (DISN), and postal. \$782K is requested to support increasing fees paid to Defense Information Systems Agency (DISA) and DoD for commercial satellite services, including Inmarsat-B and iridium. Inmarsat-B is essential for underway connectivity on cutters over 179-foot, while iridium is a critical communication system on all cutters. \$3.75 million is required to fund DISN service fees, including secure networks required for DOD communications. Funding is also requested for anticipated postal increases.

**D. Operating and Maintenance Funds for New Assets**

**1. Shore Facility and Aids to Navigation (ATON) Follow-On.....\$4,275**

<b>PPA Breakdown - Shore Facility and Aids to Navigation (ATON) Follow-On</b>		<b>Total (\$000)</b>
<b>PPA III: Training and Recruiting</b>		
	Recruiting and Training Centers	180
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Atlantic Area	400
	5th District	156
	7th District	200
	11th District	317
	Headquarters Directorates	443
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	32
<b>PPA VI: Depot Level Maintenance</b>		
	Electronics Maintenance	17
	Civil/Ocean Engineering and Shore Facility Maintenance	2,530
		<b>4,275</b>

This request funds the operation and maintenance of Acquisition, Construction and Improvement (AC&I) shore facility projects completed prior to FY 2011. Funding is required for daily operating costs for energy, utility services, grounds maintenance, routine repairs, and housekeeping. Funding also supports major non-recurring maintenance and repairs (i.e., system component renewals, preventive maintenance, emergency response repairs, scheduled inspections, etc.) anticipated throughout the life of the facility.

This funding provides resources required to maintain and operate the new assets/improvements acquired through the execution of the following AC&I mission essential projects. Shore facility follow-on costs are calculated using established professional civil engineering standards. Facilities Include:

- Sector San Francisco: Command Center Facility
- Integrated Support Command (ISC) Miami: Fast Response Cutter Support Facility
- Station Marathon: Family Housing
- Aviation Training Center Mobile: MPA Flight Training Systems Facility
- Sector Delaware Bay: Consolidate/Expand Station/ATON/WPB Facilities
- Training Center Yorktown: Water Distribution System

This request also provides follow-on funding to operate and maintain the Aids to Navigation (ATON) acquired within the Coast Guard's FY 2010 AC&I appropriation. These costs include the operation and maintenance of the ATON's day/night/sound/electronic signal, power system, and support structure.

**2. Response Boat - Medium (RB-M) Maintenance Follow-On .....\$2,043**

<b>PPA Breakdown - Response Boat - Medium (RB-M) Maintenance Follow-On</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (9 FTP, 5 FTE)</b>		
	Military Pay and Allowances	284
	Military Health Care	39
	Permanent Change of Station	98
<b>PPA III: Training and Recruiting</b>		
	Training and Education	200
	Recruiting and Training Centers	10
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Atlantic Area	114
	Pacific Area	114
	5th District	3
	7th District	1
	8th District	3
	11th District	1
	14th District	1
	Headquarters Directorates	430
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	180
<b>PPA VI: Depot Level Maintenance</b>		
	Electronics Maintenance	428
	Civil/Ocean Engineering and Shore Facility Maintenance	90
	Vessel Maintenance	47
		<b>2,043</b>

Provides funding for FY 2011 maintenance and energy costs associated with delivery of 18 RB-Ms (total of 58 hulls). This request also includes electrical support personnel and associated Personal Protective Equipment funding to support the platform's increased electronics capability and safe operation.

The RB-M project provides a standard platform to replace the aging 41-foot Utility Boat (UTB) fleet, which has reached the end of its useful service life. The RB-M also replaces other medium-sized Non-Standard Boats located at multi-mission shore stations. Continued introduction of this new platform to the fleet will significantly increase operational capability and improve crew safety.

The RB-M's speed, range, communications systems, electronics, and sensor capabilities represent marked improvements over the UTB it replaces. As a much more capable platform, additional funding is required to fully leverage these enhanced capabilities across multiple missions.

**3. Rescue 21 Follow-On .....\$7,062**

<b>PPA Breakdown - Rescue 21 Follow-On</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (2 FTP, 1 FTE)</b>		
	Military Pay and Allowances	82
	Military Health Care	9
	Permanent Change of Station	22
<b>PPA III: Training and Recruiting</b>		
	Training and Education	7
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Headquarters Directorates	6,639
	Headquarters Units	3
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	10
<b>PPA VI: Depot Level Maintenance</b>		
	Civil/Ocean Engineering and Shore Facility Maintenance	290
		<b>7,062</b>

This follow-on funding is for Rescue 21, the Coast Guard's primary system for performing the functional tasks of command, control, and communications in the inland and coastal zones for Coast Guard operations including search and rescue and homeland security missions. Rescue 21 will meet both the safety requirements needed for the expanding Marine Transportation System (MTS), as well as International Convention for the Safety of Life at Sea (SOLAS) standards. Rescue 21 also provides modernized command and control capabilities and improved MDA, both critical to the performance of Coast Guard missions.

The Rescue 21 system reached Initial Operating Capability (IOC) in December 2005. At the conclusion of FY 2009, Rescue 21 is operational along 28,000 nautical miles of coastline with six more locations to be added in FY 2010. Additional work in FY 2011 will bring total coastline coverage to nearly 40,000 nautical miles.

This follow-on funding supports five distinct cost categories that sustain Rescue 21: Equipment operation and maintenance, Circuit Connectivity, Property & Power, Training, and Technology Refresh. This funding level is required to maintain scheduled implementation of this critical search and rescue system.

**4. Nationwide Automatic Identification System (NAIS) Follow-On .....\$763**

<b>PPA Breakdown - Nationwide Automatic Identification System (NAIS) Follow-On</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (9 FTP, 5 FTE)</b>		
	Military Pay and Allowances	295
	Military Health Care	39
	Permanent Change of Station	102
<b>PPA II: Civilian Personnel (3 FTP, 2 FTE)</b>		
	Civilian Pay and Allowances	190
<b>PPA III: Training and Recruiting</b>		
	Training and Education	51
	Recruiting and Training Centers	11
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	5th District	2
	Headquarters Directorates	10
	Headquarters Units	18
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	45
		<b>763</b>

This request provides funding for the operations and maintenance of Nationwide Automatic Identification System (NAIS) deployed by FY 2011. Personnel requested include IT security analysts to protect the system from cyber threats, watchstanders to monitor performance, initiate casualty control, and upgrade software, as well as training instructors and program and policy management coordinators. Funds also support operation and maintenance costs including network management, data storage, and program management. Specifically, maritime domain awareness in Command Centers will decline without proper O&M due to the eventual erosion of system availability and increasing vulnerability to spoofing, jamming, and radio frequency overload.

The Maritime Transportation Security Act of 2002 (46 USC 70013) directed DHS to implement a persistent maritime surveillance system to collect, integrate, and analyze information concerning certain vessels operating within, or bound for waters subject to the jurisdiction of the United States. NAIS is essential to fulfilling this legislative mandate and serves as a centerpiece of the Coast Guard and DHS's effort to build MDA. This initiative also contributes to the successful execution of the National Strategy for Maritime Security, Homeland Security Presidential Directive (HSPD-13), and provides critical navigation safety and collision avoidance capability in accordance with the International Convention for the Safety of Life at Sea (SOLAS).

**5. Defense Messaging System (DMS) Follow-On .....\$1,458**

<b>PPA Breakdown - Defense Messaging System (DMS) Follow-On</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (1 FTP, 1 FTE)</b>		
	Military Pay and Allowances	106
	Military Health Care	9
	Permanent Change of Station	15
<b>PPA II: Civilian Personnel (2 FTP, 2 FTE)</b>		
	Civilian Pay and Allowances	208
<b>PPA III: Training and Recruiting</b>		
	Training and Education	6
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Headquarters Directorates	436
	Headquarters Units	50
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	20
<b>PPA VI: Depot Level Maintenance</b>		
	Electronics Maintenance	608
		<b>1,458</b>

Provides funding for operation, maintenance, and recapitalization of the Defense Messaging System (DMS) servers and associated infrastructure to support web-based DMS to all Coast Guard military messaging users and 24 x 7 Local Control Center operations. DMS allows secure record messaging for interoperability with DoD, other government agencies, and Allied military forces.

**6. Rescue Swimmer Training Facility Follow-On.....\$1,883**

<b>PPA Breakdown - Rescue Swimmer Training Facility (RSTF) Follow-On</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (9 FTP, 5 FTE)</b>		
	Military Pay and Allowances	311
	Military Health Care	39
	Permanent Change of Station	107
<b>PPA II: Civilian Personnel (3 FTP, 2 FTE)</b>		
	Civilian Pay and Allowances	129
<b>PPA III: Training and Recruiting</b>		
	Training and Education	1,176
	Recruiting and Training Centers	38
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Headquarters Directorates	29
	Headquarters Units	7
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	47
		<b>1,883</b>

Provides funding for necessary personnel to operate the AC&I funded Rescue Swimmer Training Facility (RSTF) and its Modular Egress Training Simulator (METS), or dunker, as well as recurring training costs. The RSTF will directly support Aviation Survival Technician (Rescue Swimmer) training and qualification standards, as well as egress certification/recertification for aircraft pilots and crew. Additionally, this request provides funding to fulfill the new Coast Guard Boat Forces requirement for egress certification of all enclosed cabin small boat crews.

**7. Surface and Air Asset Follow-On.....\$62,499**

<b>PPA Breakdown - Surface and Air Asset Follow-On</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (278 FTP, 142 FTE)</b>		
	Military Pay and Allowances	10,125
	Military Health Care	1,304
	Permanent Change of Station	3,275
<b>PPA II: Civilian Personnel (58 FTP, 31 FTE)</b>		
	Civilian Pay and Allowances	2,969
<b>PPA III: Training and Recruiting</b>		
	Training and Education	4,827
	Recruiting and Training Centers	1,506
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Atlantic Area	709
	Pacific Area	3,414
	7th District	2,624
	8th District	168
	Headquarters Directorates	9,232
	Headquarters Units	391
	Other Activities	16
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	4,836
<b>PPA VI: Depot Level Maintenance</b>		
	Aircraft Maintenance	4,455
	Electronics Maintenance	5,203
	Vessel Maintenance	7,445
		<b>62,499</b>

**WMSL 752 Follow-on:** Provides unit operations and maintenance funding for the third National Security Cutter (NSC) scheduled for delivery in 4th quarter FY 2011.

**WMSL Logistics Support:** Provides support and maintenance personnel funding necessary for three NSCs located in Alameda, CA.

**Training System Personnel:** Provides follow-on funding for permanent personnel at Training Center Petaluma to meet National Security Cutter (NSC) training requirements. These personnel will operate/maintain the C4ISR schoolhouse and technical simulation systems, develop curricula, and perform human performance/training analysis to ensure training objectives are met.

**FRC Crews 7 and 8 (Miami):** Provides personnel to operate and maintain the seventh and eighth Fast Response Cutters (FRC) scheduled for delivery in early 2012. Advance arrival of the crews is critical to ensure appropriate training and crew readiness prior to delivery of the cutter.

**FRC O&M for 1 through 5 follow-on (Miami):** Provides O&M funding for the first five FRCs scheduled for delivery in FY 2011 and homeported in Miami, FL. The FRC will be larger and more capable than the 110-foot patrol boat with advanced electronics and enhanced capabilities. This platform sustains the Coast Guard's high-speed, blue-water patrol capability for prosecuting Coast Guard missions. The FRC will also provide improved interoperability, C4ISR, common operating picture (COP), and sensors to enhance surveillance and identification.

**FRC Shoreside Support:** Provides initial FRC shore-side maintenance personnel to support six FRCs in Miami and six FRCs in Key West scheduled for delivery beginning in FY 2011.

**HC-144A Aircraft and Simulator Follow-on:** Provides funding for aircrew training, depot level maintenance, and support as new aircraft become operational. Also included in this funding is personnel and operating and maintenance for HC-144A aircraft #12, and personnel for aircraft #13. This funding also provides personnel and operating and maintenance for the HC-144A aircraft Operational Flight Training System (Simulator) at ATC Mobile, AL.

**Transition Aviation Training Center Mobile and Air Station Miami:** Provides necessary funding to support a change in aircraft type, allowance, and programmed utilization rates at Aviation Training Center Mobile and Air Station Miami (ATC Mobile will transition from four HU-25 aircraft to four HC-144A aircraft in FY 2009-2014 and A/S Miami will transition from six HU-25 aircraft to seven HC-144A aircraft in FY 2010-2015). This funding also provides resources necessary to forward deploy aircraft for maritime surveillance missions as envisioned in the HC-144A Concept of Operations (CONOP).

**Armed Helicopters for Homeland Security Follow-on:** Provides recurring funds to maintain Airborne Use of Force (AUF) Kit "A" equipment for (22) HH-65C helicopters. A Kit "A" helicopter fleet allows an on-site upgrade to an AUF-capable posture when equipped with an AUF crew and Kit "B" equipment install. Combined with prior year appropriations, this initiative will complete the Coast Guard's Armed Helicopter for Homeland Security project. The Service will outfit all HH-60J and HH-65C helicopters with Kit "A's." In addition, the Coast Guard will have (46) helicopters that will be AUF configured (i.e. Kit "A" + Kit "B" = weapons, gun mounts, personnel protective equipment, and armory support) and assigned to units which support strategic ports.

**C4ISR Follow-on:** Provides funding to maintain new high speed Ku-band satellite communications systems installed on major cutters prior to FY 2011. This request will allow major cutters to transmit and receive secure information via SIPRNet and Coast Guard Data Network, enabling the Coast Guard to fully leverage deployed capability and strengthening critical command and control capability for homeland security and defense operations.

**E. Base Re-Allocations (Non-Add)**

**1. Transfer Military FTP and FTE to Civilian.....[\$9,990]**

<b>PPA Breakdown - Transfer Military FTP and FTE to Civilian</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-103 FTP, -103 FTE)</b>		
	Military Pay and Allowances	(8,443)
	Military Health Care	(883)
	Permanent Change of Station	(527)
<b>PPA II: Civilian Personnel (103 FTP, 103 FTE)</b>		
	Civilian Pay and Allowances	9,990
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(137)
		<b>0</b>

Transfers 103 military FTP/FTE to civilian FTP/FTE. This request is based upon the conversion of military positions to civilian positions. These conversions are in accordance with GAO guidance to change military positions funded in PPA I (Military Pay and Allowances) with inherently civilian job functions to civilian positions funded in PPA II (Civilian Pay and Allowances).

**2. PPA Funding Technical Transfers (\$7.610 million base re-allocation) .....[\$7,610]**

<b>PPA Breakdown - PPA Funding Technical Transfers (\$7.610 million base re-allocation)</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel</b>		
	Permanent Change of Station	10
<b>PPA II: Civilian Personnel</b>		
	Civilian Pay and Allowances	(819)
<b>PPA III: Training and Recruiting</b>		
	Training and Education	60
	Recruiting and Training Centers	(380)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Atlantic Area	(52)
	Pacific Area	(22)
	1st District	815
	5th District	(10)
	8th District	(41)
	11th District	(6)
	14th District	(15)
	Headquarters Directorates	(4,265)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	1,668
<b>PPA VI: Depot Level Maintenance</b>		
	Aircraft Maintenance	1,875
	Electronics Maintenance	3,182
	Civil/Ocean Engineering and Shore Facility Maintenance	(2,000)
		<b>0</b>

This request implements recurring technical base adjustments to reallocate funding to the appropriate PPA for compliance with Coast Guard financial policy. All requested adjustments retain the original intent and purpose of the funding appropriated; however, the PPA to properly execute these items is different than originally appropriated.

Requested adjustments include reallocation of funding to the Centrally Managed Accounts PPA (PPA5) for service wide support contracts from the Operating Funds and Unit Level Maintenance PPA (PPA4) and the Training and Recruiting PPA (PPA3). This request also includes transferring and centralizing SAROPS and NAV system maintenance funds to Depot Level Maintenance PPA (PPA6) from PPA3 to more appropriately characterize the purpose of these base funds.

This request also includes reallocation of funding from Civilian Personnel PPA (PPA2) to Operating Funds and Unit Level Maintenance PPA (PPA4) to account for unit level savings generated by civilian position adjustments.

All of the requested transfers are consistent with Coast Guard financial management policy and retain the intent/purpose or the appropriated funding.

Decreases

(\$167,532)

A. Termination of One Time Costs ..... (\$63,727)

	Civil/Ocean Engineering and Shore Facility Maintenance	(1,003)
		<b>(24,252)</b>

This line item annualizes FY 2010 part-year reductions from various asset decommissionings.

<b>FY 2010 Line Items</b>	<b>FTE (Mil)</b>	<b>FTE (Civ)</b>	<b>Recurring Amount Annualized (\$000)</b>
Decommission Three HU-25 Aircraft	(39)	0	(8,971)
Decommission One HC-130H Aircraft	(14)	0	(3,281)
LORAN-C Termination	(117)	(7)	(12,000)
<b>Total</b>	<b>(170)</b>	<b>(7)</b>	<b>(24,252)</b>

**C. Management and Technology Efficiencies**

**1. Logistics Transformation Product Line Efficiencies ..... (\$2,301)**

<b>PPA Breakdown - Logistics Transformation Product Line Efficiencies</b>		<b>Total (\$000)</b>
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	1st District	(167)
	5th District	(167)
	7th District	(167)
	8th District	(167)
	9th District	(167)
	11th District	(167)
	13th District	(167)
	14th District	(167)
	17th District	(167)
	Headquarters Units	(798)
		<b>(2,301)</b>

This initiative captures efficiencies resulting from Coast Guard logistics transformation efforts. Efficiencies are achieved through centralization and management of Coast Guard standard boats under a single Product Line Manager, consolidation of multiple part numbers to reduce total inventory, pursuit of procurement economies, and monitoring of demand. This initiative also achieves savings by increasing the periodic servicing interval on Defender Class Boat (RB-S) engines. An independent study determined the frequency of routine engine maintenance could be increased from the manufacturer’s recommended interval, without adversely affecting engine performance. Moving all asset support to a product line model is critical to managing life-cycle costs and improving configuration control and operational readiness. This initiative will improve the efficiency and effectiveness of Coast Guard maintenance operations.

**2. Headquarters Management Efficiencies..... (\$16,654)**

<b>PPA Breakdown - Headquarters Management Efficiencies</b>		<b>Total (\$000)</b>
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Headquarters Directorates	(13,469)
	Headquarters Units	(3,185)
		<b>(16,654)</b>

This management efficiency leverages efficiencies across Headquarters and Headquarter Units to generate savings for reinvestment in higher priority needs such as current operations and recapitalization.

**3. Manned Covert Surveillance Aircraft Follow-On ..... (\$3,201)**

<b>PPA Breakdown - Manned Covert Surveillance Aircraft Follow-On</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-12 FTP, -12 FTE)</b>		
	Military Pay and Allowances	(1,047)
	Military Health Care	(103)
	Permanent Change of Station	93
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(1,173)
	Recruiting and Training Centers	(35)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	7th District	(131)
	Headquarters Directorates	(97)
	Other Activities	(2)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(35)
<b>PPA VI: Depot Level Maintenance</b>		
	Aircraft Maintenance	(671)
		<b>(3,201)</b>

The Coast Guard proposes termination of operating and maintenance (O&M) funding for the Manned Covert Surveillance Aircraft (MCSA) because delivery of the aircraft has been delayed until at least FY 2012. O&M funding will likely be requested in a future budget consistent with the aircraft's final delivery schedule.

**4. DHS Balanced Workforce Strategy ..... (\$14,500)**

<b>PPA Breakdown - DHS Balanced Workforce Strategy</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (115 FTP, 115 FTE)</b>		
	Military Pay and Allowances	7,885
	Military Health Care	884
	Permanent Change of Station	355
<b>PPA II: Civilian Personnel (185 FTP, 185 FTE)</b>		
	Civilian Pay and Allowances	17,237
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(1,201)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Headquarters Directorates	(40,124)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	464
		<b>(14,500)</b>

Consistent with the DHS Balanced Workforce Strategy, the Coast Guard is committed to building a strategic human capital planning capability that is supported by a structured total workforce approach;

one that seeks efficiencies, cost-effective performance improvements and a more appropriate balance of in-house and contract resources. The Coast Guard proposes insourcing professional services contracts to government service using 300 new full time positions. This initiative will save approximately \$14.5M in operating expenses, increase the organization’s organic capacity to perform professional services, and enhance government performance.

**5. Consolidate Maritime Intelligence Fusion Centers (MIFCs).....(\$502)**

<b>PPA Breakdown - Consolidate Maritime Intelligence Fusion Centers (MIFCs)</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-11 FTP, -6 FTE)</b>		
	Military Pay and Allowances	(429)
	Military Health Care	(47)
	Permanent Change of Station	82
<b>PPA II: Civilian Personnel (-1 FTP, -1 FTE)</b>		
	Civilian Pay and Allowances	(39)
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(10)
	Recruiting and Training Centers	(8)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Atlantic Area	(18)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(33)
		<b>(502)</b>

This initiative combines the Coast Guard’s two Maritime Intelligence Fusion Centers (MIFCs) Atlantic (LANT) and Pacific (PAC) into a single geographically-dispersed command, eliminating 12 full-time positions. Currently, MIFC LANT and PAC provide intelligence analysis and production capabilities to operational and tactical commanders for all Coast Guard statutory missions. Consolidation makes efficient use of intelligence support, law enforcement technical collection (LETC) linguist capability, security and administration oversight, and information sharing with foreign partners from MIFC LANT and PAC regions.

**6. Decommission National Strike Force Coordination Center ..... (\$309)**

<b>PPA Breakdown - Decommission National Strike Force Coordination Center</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-5 FTP, -3 FTE)</b>		
	Military Pay and Allowances	(271)
	Military Health Care	(21)
	Permanent Change of Station	160
<b>PPA II: Civilian Personnel (-4 FTP, -2 FTE)</b>		
	Civilian Pay and Allowances	(191)
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(6)
	Recruiting and Training Centers	(2)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Headquarters Directorates	50
	Headquarters Units	86
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(114)
		<b>(309)</b>

This initiative decommissions the Coast Guard’s National Strike Force Coordination Center (NSFCC) in Elizabeth City, NC. Decommissioning the NSFCC provides the opportunity to align functional responsibilities within the Deployable Operations Group and the Coast Guard’s Office of Incident Management and Preparedness. Eliminating redundant fiscal, logistics and administrative support already provided through the Deployable Operations Group will generate efficiencies. Specifically, nine positions will be eliminated and the remaining 17 relocated. Four positions currently assigned to the Public Information Assist Team will remain but be reassigned to the Atlantic Strike Team in Fort Dix, NJ. The remaining thirteen positions will relocate to Washington, DC to support program management functions from the Headquarters level and through the Deployable Operations Group.

**7. Mission Support Personnel ..... (\$3,437)**

<b>PPA Breakdown - Mission Support Personnel</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-27 FTP, -15 FTE)</b>		
	Military Pay and Allowances	(1,062)
	Military Health Care	(129)
	Permanent Change of Station	185
<b>PPA II: Civilian Personnel (-7 FTP, -7 FTE)</b>		
	Civilian Pay and Allowances	(624)
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(469)
	Recruiting and Training Centers	(253)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Atlantic Area	(6)
	Pacific Area	(10)
	1st District	(4)
	5th District	(1)
	7th District	(3)
	11th District	(1)
	Headquarters Directorates	(592)
	Headquarters Units	(18)
	Other Activities	(1)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(449)
		<b>(3,437)</b>

This reduction represents a proportional draw down of Coast Guard enterprise-wide mission support personnel consistent with operational decreases planned in FY 2011.

**D. Asset Decommissionings**

**1. Four HU-25 Aircraft.....(\$7,688)**

<b>PPA Breakdown - Four HU-25 Aircraft</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-62 FTP, -32 FTE)</b>		
	Military Pay and Allowances	(2,243)
	Military Health Care	(265)
	Permanent Change of Station	413
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(264)
	Recruiting and Training Centers	(37)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	1st District	(64)
	7th District	(219)
	Headquarters Directorates	(1,331)
	Other Activities	(5)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(57)
<b>PPA VI: Depot Level Maintenance</b>		
	Aircraft Maintenance	(3,616)
		<b>(7,688)</b>

In FY 2011, the Coast Guard will retire four HU-25 fixed-wing aircraft. Three aircraft will be immediately replaced by new HC-144A aircraft. The fourth HU-25 will be retired from service at Coast Guard Air Station Cape Cod, reducing aircraft allowance at this station from four to three until a replacement arrives. Three aircraft provide the minimum manning required to maintain 24 x 7 Search and Rescue capability.

**2. Four High Endurance Cutters (HEC).....(\$28,167)**

<b>PPA Breakdown - Four High Endurance Cutters (HEC)</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-764 FTP, -383 FTE)</b>		
	Military Pay and Allowances	(22,844)
	Military Health Care	(3,276)
	Permanent Change of Station	4,527
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(642)
	Recruiting and Training Centers	(499)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Pacific Area	(2,208)
	Headquarters Directorates	2,028
	Headquarters Units	(4)
	Other Activities	(51)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(1,450)
<b>PPA VI: Depot Level Maintenance</b>		
	Electronics Maintenance	(448)
	Vessel Maintenance	(3,300)
		<b>(28,167)</b>

In FY 2011, the Coast Guard will decommission four High Endurance Cutters (HEC). The average age of the HEC fleet is 42 years. A disproportionate share of the depot level maintenance budget is being used to sustain these aging assets. With two NSCs anticipated to be operational by 2011, the Coast Guard is positioned to begin decommissioning these legacy assets.

**3. Medium Endurance Cutter (MEC).....(\$2,794)**

<b>PPA Breakdown - Medium Endurance Cutter (MEC)</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-86 FTP, -43 FTE)</b>		
	Military Pay and Allowances	(2,609)
	Military Health Care	(369)
	Permanent Change of Station	579
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(73)
	Recruiting and Training Centers	(55)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Pacific Area	(221)
	Headquarters Directorates	560
	Other Activities	(5)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(200)
<b>PPA VI: Depot Level Maintenance</b>		
	Electronics Maintenance	(36)
	Vessel Maintenance	(365)
		<b>(2,794)</b>

In FY 2011, the Coast Guard will decommission the Medium Endurance Cutter ACUSHNET. ACUSHNET is well past its useful service life and has unique systems that are costly and difficult to sustain.

**IV. Program Justification of Changes**

**Department of Homeland Security  
U. S. Coast Guard  
Operating Expenses  
Justification of Program Changes  
(Dollars in thousands)**

**Program Decreases** **(\$24,280)**

**A. Rotary Wing Capacity** ..... **(\$5,503)**

<b>PPA Breakdown - Rotary Wing Capacity</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-68 FTP, -34 FTE)</b>		
	Military Pay and Allowances	(2,490)
	Military Health Care	(292)
	Permanent Change of Station	743
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(119)
	Recruiting and Training Centers	(38)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	5th District	(47)
	7th District	(88)
	9th District	(294)
	Headquarters Directorates	(903)
	Other Activities	(5)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(105)
<b>PPA VI: Depot Level Maintenance</b>		
	Aircraft Maintenance	(1,865)
		<b>(5,503)</b>

The budget request improves the efficacy of domestic air operations by realigning rotary wing capacity to provide four medium-range H-60 helicopters to the Great Lakes region. To facilitate this delivery of enhanced multi-mission capability, two H-60 helicopters from Operations Bahamas Turks & Caicos (OPBAT) and two H-60s from Maritime Security Response Team (MSRT) in Chesapeake, VA will be permanently relocated to Coast Guard Air Station (CGAS) Traverse City, MI. Upon arrival of the four H-60s, five H-65 helicopters presently stationed at CGAS Traverse City will be removed from active service.

The Great Lakes region is characterized by extreme weather conditions including heavy icing throughout the year. The H-65 lacks de-icing capabilities and is poorly suited for heavy weather missions. The H-60 brings “all weather” capabilities to the region as well as nearly twice the range and endurance of the H-65. The proposal also seeks to discontinue two seasonal Coast Guard Air Facilities at Muskegon, MI and Waukegan, IL due to limited demand for services and improved endurance from the H-60.

**B. Deployable Force Capacity..... (\$18,202)**

<b>PPA Breakdown - Deployable Force Capacity</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-395 FTP, -198 FTE)</b>		
	Military Pay and Allowances	(13,172)
	Military Health Care	(1,711)
	Permanent Change of Station	3,453
<b>PPA II: Civilian Personnel (4 FTP, 2 FTE)</b>		
	Civilian Pay and Allowances	355
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(35)
	Recruiting and Training Centers	(247)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Atlantic Area	(12)
	Pacific Area	(17)
	1st District	(11)
	14th District	(11)
	Headquarters Directorates	(1,225)
	Headquarters Units	(5,048)
	Other Activities	(24)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(417)
<b>PPA VI: Depot Level Maintenance</b>		
	Electronics Maintenance	(104)
	Civil/Ocean Engineering and Shore Facility Maintenance	45
	Vessel Maintenance	(21)
		<b>(18,202)</b>

The budget request decommissions five Maritime Safety and Security Teams (MSSTs). The seven remaining MSSTs will deploy regionally to mitigate the highest prevailing port security risks in the Nation’s critical ports. MSSTs will continue to escort vessels, patrol critical infrastructure, perform counter terrorism activities, enforce laws aboard high interest vessels, and respond to unanticipated surge operations (e.g., mass migration response, hurricane response, terrorist attack, etc.) consistent with regional threats.

As part of this initiative, the Coast Guard will reinvest partial MSST savings in the Law Enforcement Detachment (LEDET) program to address increased demand for LEDET services in support of Coast Guard missions. The FY 2011 investment increases the roster of all 17 existing LEDETS from 11 to 12 members per team, and creates one new 12-person LEDET. LEDETs are high return-on-investment National assets that augment Defense operations in support of Combatant Commanders and counter drug operations in the Caribbean and Eastern Pacific.

**C. CG Investigative Service (CGIS)..... (\$575)**

<b>PPA Breakdown - CG Investigative Service (CGIS)</b>		<b>Total (\$000)</b>
<b>PPA I: Military Personnel (-2 FTP, -1 FTE)</b>		
	Military Pay and Allowances	(72)
	Military Health Care	(9)
	Permanent Change of Station	15
<b>PPA II: Civilian Personnel (-7 FTP, -4 FTE)</b>		
	Civilian Pay and Allowances	(396)
<b>PPA III: Training and Recruiting</b>		
	Training and Education	(4)
	Recruiting and Training Centers	(1)
<b>PPA IV: Operating Funds and Unit Level Maintenance</b>		
	Headquarters Directorates	(80)
	Headquarters Units	(9)
<b>PPA V: Centrally Managed Accounts</b>		
	Central Accounts	(19)
		<b>(575)</b>

The budget request eliminates seven Investigator positions at Coast Guard Investigative Service (CGIS) regional field offices and two positions on CGIS staff. This initiative supports on-going efforts to focus DHS investigative resources and reduce inefficiencies created by overlapping jurisdictions. CGIS will focus efforts on statutory investigations not handled by other investigative components, including, Uniform Code of Military Justice (UCMJ) violations, non-emergency radio call investigations, and environmental crimes.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security**  
**U. S. Coast Guard**  
**Justification of Proposed Changes in Operating Expenses**  
**Appropriation Language**

For necessary expenses for the operation and maintenance of the Coast Guard, not otherwise provided for; purchase or lease of not to exceed 25 passenger motor vehicles, which shall be for replacement only; purchase or lease of small boats for contingent and emergent requirements (at a unit cost of no more than \$700,000) and repairs and service-life replacements, not to exceed a total of \$26,000,000; minor shore construction projects not exceeding \$1,000,000 in total cost at any location; payments pursuant to section 156 of Public Law 97-377 (42 U.S.C. 402 note; 96 Stat. 1920); and recreation and welfare; [\$6,805,391,000] **\$6,650,950,000**, of which [\$581,503,000] **\$340,000,000** shall be for defense-related activities; of which \$24,500,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)); of which not to exceed \$20,000 shall be for official reception and representation expenses: *Provided [further]*, That none of the funds made available by this Act shall be for expenses incurred for recreational vessels under section 12114 of title 46, United States Code, except to the extent fees are collected from yacht owners and credited to this appropriation. (Department of Homeland Security Appropriations Act, 2010)

## PPA Mission Statement

This PPA requests funding for expenses related to compensation for active duty military personnel. This category also includes pay, allowances, employer's share of FICA, Social Security credits and other expenses associated with compensating military personnel. Requested funding will compensate our military personnel as they serve as the Nation's First Responder across all of the Coast Guard's 11 missions.

### Summary Justification and Explanation of Changes

#### Salaries and Benefits

2009 Actual	2010 Enacted	2011 Request	2010 to 2011 Change
\$ 2,617,201	\$ 2,840,800	\$ 2,789,646	\$ (51,154)

Salaries and benefits funds provide for compensation directly related to duties performed for the Coast Guard by active duty military personnel. The FY 2011 request includes funding for the proposed pay raise (currently predicted at 1.4% for military and civilians), medical benefits, and other mandatory personnel entitlements. Personnel increases are accounted for through the annualization of FTE introduced in FY 2010, as well as personnel to operate new systems and assets, including the National Security Cutter, Fast Response Cutter, HC-144A, Response Boat-Medium (RB-M), and the Rescue Swimmer Training Facility. Personnel reductions include the decommissioning and retirement of multiple operational units and assets including five Maritime Safety and Security Teams (MSSTs), five major cutters, and nine aircraft.

#### Travel

2009 Actual	2010 Enacted	2011 Request	2010 to 2011 Change
\$ 103,145	\$ 96,700	\$ 100,584	\$ 3,884

Requested funds cover the travel costs of Coast Guard military service members, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2011 request includes travel costs associated with the operation of new assets.

#### Transportation of things

2009 Actual	2010 Enacted	2011 Request	2010 to 2011 Change
\$ 65,326	\$ 62,430	\$ 65,674	\$ 3,244

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2011 request includes PCS costs associated with the decommissioning of multiple operational units.

#### Other services

2009 Actual	2010 Enacted	2011 Request	2010 to 2011 Change
\$ 15,668	\$ 7,891	\$ 1,319	\$ (6,572)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2011 decrease reflects the obligation of Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD is not included in 2011 display).

**Medical care**

	2009 Actual		2010 Enacted		2011 Request		2010 to 2011 Change
	\$ 346,482	\$	359,734	\$	396,872	\$	37,138

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, funding supports medical care costs for military service members. The FY 2011 request includes actuary-forecasted cost increases.

**Operation and maintenance of equipment**

	2009 Actual		2010 Enacted		2011 Request		2010 to 2011 Change
	\$ 3,694	\$	1,703	\$	398	\$	(1,305)

The FY 2011 decrease is due to reductions associated with decommissioning and retirement of multiple operational units and assets including five Maritime Safety and Security Teams (MSSTs), five major cutters, and nine aircraft.

**Subsistence and support of persons**

	2009 Actual		2010 Enacted		2011 Request		2010 to 2011 Change
	\$ 1,894	\$	874	\$	874	\$	-

The FY 2011 request has no change.

**Supplies and materials**

	2009 Actual		2010 Enacted		2011 Request		2010 to 2011 Change
	\$ 17,800	\$	8,213	\$	1,918	\$	(6,295)

The FY 2011 decrease is due to reductions associated with decommissioning and retirement of multiple operational units and assets and the obligation of Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD is not included in 2011 display).

**Insurance claims and indemnity**

	2009 Actual		2010 Enacted		2011 Request		2010 to 2011 Change
	\$ 1,034	\$	477	\$	477	\$	-

The FY 2011 request has no change.

## PPA Mission Statement

This PPA requests funding for expenses related to compensation and entitlements for federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e.g., Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial positions, and "Non-Ceiling" (NC) employees (e.g., cooperative education students, student aids, summer interns and federal junior fellows) and civilian employees not otherwise covered by other PPAs.

### Summary Justification and Explanation of Changes

#### Salaries and Benefits

2009 Actual	2010 Enacted	2011 Request	2010 to 2011 Change
\$ 637,246	\$ 693,278	\$ 749,887	\$ 56,609

Salaries and benefits funds provide for compensation directly related to duties performed for the Coast Guard by Federal civilian employees. The FY 2011 request includes funding for the proposed pay raise (currently predicted at 1.4%), medical benefits, and other mandatory personnel entitlements.

#### Travel

2009 Actual	2010 Enacted	2011 Request	2010 to 2011 Change

## PPA Mission Statement

Requests funding for the Coast Guard's professional training and education programs, and operation and maintenance of the six Coast Guard Training Centers and the Coast Guard Academy. Provides funding for tuition, travel and per diem for formal training and education performed as Temporary Assigned Duty (TAD) for military and civilian personnel. "Formal training and education" is defined as structured, curriculum-based instruction and applied exercises for the attainment and retention of skills and knowledge required to accomplish specific job tasks. Requested funding will ensure a level of capabilities and competencies commensurate with the response posture the Coast Guard has displayed in recent years, such as operational response to Hurricane Katrina, Operation Iraqi Freedom, 9/11 terrorist attacks and other events requiring a rapid response capability.

### Summary Justification and Explanation of Changes

#### Travel

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	42,144	\$	41,527	\$	43,195	\$	1,668

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Increases in travel in FY 2011 include funding to fulfill the new Coast Guard Boat Forces requirement for egress certification of all enclosed cabin small boat crews, as well as personnel training requirements associated with HC-144A operations.

#### Other rent

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	2,811	\$	2,772	\$	2,761	\$	(11)

Other rent includes all payments to a non-federal source for rental space, land and structures.

#### Communication, utilities, and misc charges

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	12,850	\$	13,213	\$	12,683	\$	(530)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

#### Printing and reproduction

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	663	\$	654	\$	660	\$	6

Includes printing and reproduction costs.

**Advisory and assistance services**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 16,986	\$	18,178	\$	15,616	\$	(2,562)

Advisory and assistance services include services acquired by contract from non-federal sources (e.g., private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2011 decrease reflects the net result of decreases in contractor support due to insourcing initiatives, multiple asset decommissionings, the reduction of mission support personnel and the obligation of Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD is not included in 2011 display).

**Other services**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 52,204	\$	56,027	\$	50,785	\$	(5,242)

Other services include report contractual services with non-federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2011 decrease reflects the net result of decreases in contractor support due to insourcing initiatives, multiple asset decommissionings and the obligation of Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD is not included in 2011 display).

**Purchases of goods & svcs. from gov't accounts**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ -	\$	5,594	\$	4,938	\$	(656)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements.

**Operation & maintenance of facilities**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 5,682	\$	5,666	\$	5,666	\$	-

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2011 request has no change.

**Operation and maintenance of equipment**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	4,738	\$	5,621	\$	5,806	\$	185

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft) and supporting systems. The FY 2011 request reflects funding increases to support the operation of the HC-144A flight simulator.

**Subsistence and support of persons**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	2,690	\$	2,653	\$	2,653	\$	-

The FY 2011 request has no change.

**Supplies and materials**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	55,416	\$	57,801	\$	55,500	\$	(2,301)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2011 decrease is primarily the result of the obligation of Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD is not included in 2011 display).

**Equipment**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	4,216	\$	2,950	\$	3,228	\$	278

This object class covers the purchase of capitalized and non-capitalized assets. For example, this object class enables the Coast Guard to purchase furniture for the cadets at the Coast Guard Academy and survival suits for the rescue swimmers deployed to the frigid waters of Alaska. The FY 2011 request supports operation of the HC-144A flight simulator.

## PPA Mission Statement

Requests funding to units, facilities and activities that are under the direct operational and administrative control of the Coast Guard's Atlantic Area and Pacific Area Commanders. These include High Endurance Cutters (WHECs), Medium Endurance Cutters (WMECs), Polar Icebreakers, Communications Stations, Sector Commands, Stations, Marine Safety and Security Teams (MSSTs), various support units, and Area offices as applicable. Request includes funding to sustain normal operating costs that include energy, parts and supplies for routine maintenance of operational assets and shore facilities and administrative supplies.

### Summary Justification and Explanation of Changes

#### Travel

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	140,046	\$	144,255	\$	127,526	\$	(16,729)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The decrease in FY 2011 is the result of multiple asset decommissionings, enterprise-wide travel reductions associated with the Headquarters Efficiency Review, the obligation of Overseas Contingency Operations funding (anticipated OCO transfer from DoD is not included in 2011 display) and the obligation of FY 2009 unobligated funding in FY 2010.

#### Transportation of things

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	2,934	\$	2,706	\$	4,478	\$	1,772

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2011 increase is primarily the result of increased transportation costs associated with multiple asset decommissionings.

#### Other rent

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	24,738	\$	23,299	\$	24,424	\$	1,125

Other rent includes all payments to a non-federal source for rental space, land and structures. Funding supports lease renewals for facilities (e.g., office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). The increase in FY 2011 is due to Rescue 21 follow-on funding.

#### Communication, utilities, and misc charges

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	88,007	\$	29,279	\$	10,387	\$	(18,892)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. The decrease is primarily the result of multiple asset decommissionings and the obligation of Icebreaking Services and Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD and reimbursement from NSF for icebreaking services are not included in 2011 display).

**Printing and reproduction**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 4,462	\$	4,149	\$	3,092	\$	(1,057)

The FY 2011 decrease is primarily the result of a reduction in Headquarters program and policy service delivery.

**Advisory and assistance services**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 104,588	\$	118,210	\$	63,481	\$	(54,729)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2011 decrease reflects the net result of contractor decreases due to insourcing initiatives, changes in Headquarters program and policy service delivery, and the obligation of Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD is not included in 2011 display).

**Other services**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 372,436	\$	374,894	\$	352,904	\$	(21,990)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2011 decrease is due primarily to the obligation of Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD is not included in 2011 display).

**Purchases of goods & svcs. from gov't accounts**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 1,156	\$	317	\$	782	\$	465

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The increase in FY 2011 is primarily due to the annualization of FY 2010 funding.

**Operation & maintenance of facilities**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	38,757	\$	37,957	\$	34,098	\$	(3,859)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2011 decrease reflects changes to rotary-wing capacity and the obligation of Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD is not included in 2011 display).

**Medical care**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	4,578	\$	4,253	\$	4,253	\$	-

The FY 2011 request has no change.

**Operation and maintenance of equipment**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	10,191	\$	28,850	\$	33,050	\$	4,200

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft) and supporting systems. The FY 2011 increase is due to follow-on costs for Rescue 21 and the annualization of funding for FY 2010 initiatives.

**Subsistence and support of persons**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	44,406	\$	43,016	\$	40,122	\$	(2,894)

The FY 2011 decrease is a result of the obligation of Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD is not included in 2011 display).

**Supplies and materials**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 409,796	\$	419,289	\$	383,497	\$	(35,792)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2011 decrease is a result of the obligation of Overseas Contingency Operations funding (anticipated OCO transfer from DoD is not included in 2011 display) and the obligation of FY 2009 unobligated funding in FY 2010.

**Equipment**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 27,714	\$	24,832	\$	22,636	\$	(2,196)

This object class covers the purchase of capitalized and non-capitalized assets. The decrease is the result of the termination of Manned Covert Surveillance Aircraft (MCSA) follow-on funding and the obligation of Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD is not included in 2011 display).

**Insurance claims and indemnity**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 1,658	\$	1,541	\$	1,541	\$	-

The FY 2011 request has no change.

## PPA Mission Statement

This request provides funding for accounts centrally managed at Coast Guard Headquarters such as: Federal Telephone System (FTS) accounts, Standard Workstation recapitalization, ammunition replenishment, recapitalization of buoys, GSA Rent, postal expenses and Mass Transit benefits. Request ensures critical support elements are provided to the workforce, allowing them to execute their roles in supporting Coast Guard operations. Lease of adequate office space, effective communications (computers, phones, etc) and operational gear (ammunition) are all part of those critical support requirements.

### Summary Justification and Explanation of Changes

#### Travel

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 1,050	\$ 998	\$ 998	\$ -

The FY 2011 request has no change.

#### GSA rent

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 84,838	\$ 89,619	\$ 90,724	\$ 1,105

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The majority of FY 2011 increases are a result of changes in GSA rental costs and additional space requirements.

#### Communication, utilities, and misc charges

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 77,654	\$ 138,803	\$ 130,211	\$ (8,592)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. Decreases in FY 2011 are the net result of obligation of Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD is not included in 2011 display) and increases from follow-on costs for newly acquired surface and air assets.

#### Printing and reproduction

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 1,581	\$ 1,503	\$ 1,503	\$ -

The FY 2011 request has no change.

**Advisory and assistance services**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 4,326	\$	9,663	\$	1,720	\$	(7,943)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2011 decrease is due to the obligation of FY 2009 unobligated funding in FY 2010 for the Operations Systems Center in Martinsburg, WV.

**Other services**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 59,905	\$	58,864	\$	68,709	\$	9,845

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2011 increase is due to security charges for GSA facilities and Government Services increases for communications and postal services.

**Purchases of goods & svcs. from gov't accounts**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 3,882	\$	4,011	\$	4,250	\$	239

Purchases from Government Accounts include costs for purchases from other Federal government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements (e.g., MIPR). Increases in FY 2011 are due to Government Services increases for communications and postal services.

**Operation & maintenance of facilities**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 527	\$	501	\$	701	\$	200

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities.

**Operation and maintenance of equipment**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 3,720	\$	5,880	\$	6,898	\$	1,018

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats, and aircraft) and supporting systems. The FY 2011 increase is due to annualization of FY 2010 funding, cost increases for the contract insourcing initiative, and logistics support for the NSC.

**Supplies and materials**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 12,536	\$	21,660	\$	12,149	\$	(9,511)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2011 decrease is primarily due to the obligation of Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD is not included in 2011 display).

**Equipment**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 25,626	\$	25,622	\$	26,359	\$	737

This object class covers the purchase of capitalized and non-capitalized assets. For example, this object class enables the Coast Guard to purchase furniture for cadets at the Coast Guard Academy and survival suits for rescue swimmers deployed to the frigid waters of Alaska. The FY 2011 increase reflects follow-on funding requirements for newly acquired surface and air assets.

## PPA Mission Statement

Request provides service-wide funding to support the major maintenance and repair of Coast Guard aircraft not appropriated in the Coast Guard Acquisition, Construction & Improvements (AC&I) appropriation. This includes materials, services and supplies necessary for depot-level repair of buildings, structures, ground, towers, runways, aids to navigation, aircraft and aircraft equipment.

### Summary Justification and Explanation of Changes

#### Travel

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 20,856	\$ 20,084	\$ 20,084	\$ -

The FY 2011 request has no change.

#### Transportation of things

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 2,731	\$ 2,630	\$ 2,681	\$ 51

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

#### Other rent

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 257	\$ 1,229	\$ 1,239	\$ 10

Other rent includes all payments to a non-federal source for rental space, land and structures.

#### Communication, utilities, and misc charges

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 2,409	\$ 22,669	\$ 22,579	\$ (90)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters and aircraft, utility costs, postal costs and cutter, boat and aircraft fuel requirements. The FY 2011 decrease is due to the termination of one time FY 2010 costs.

#### Printing and reproduction

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 515	\$ 496	\$ 536	\$ 40

The FY 2011 request increases slightly due to HC-144A follow-on funding.

### Advisory and assistance services

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 123,679	\$	126,100	\$	119,589	\$	(6,511)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. FY 2011 decreases are primarily due to the obligation of Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD is not included in 2011 display).

### Other services

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 280,742	\$	271,748	\$	273,086	\$	1,338

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2011 increase is due to Fast Response Cutter and C4ISR follow-on costs.

### Operation & maintenance of facilities

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 135,006	\$	136,494	\$	132,155	\$	(4,339)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities. FY 2011 decreases reflect the net result of obligation of Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD is not included in 2011 display) and increases from follow-on costs for surface and air assets and shore infrastructure.

### Operation and maintenance of equipment

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$ 83,252	\$	172,903	\$	90,887	\$	(82,016)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g., cutters, boats and aircraft) and supporting systems. The FY 2011 decrease reflect the net result of changes in rotary-wing capacity, the termination of one time FY 2010 costs, the obligation of FY 2009 unobligated funding for HEC maintenance, and the obligation of Icebreaking Services and Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD and reimbursement from NSF for icebreaking services are not included in 2011 display).

**Supplies and materials**

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 164,102	\$ 169,355	\$ 160,994	\$ (8,361)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats and aircraft, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. FY 2011 decreases are primarily due to the obligation of Overseas Contingency Operations funding in FY 2010 (anticipated OCO transfer from DoD is not included in 2011 display).

**Equipment**

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 32,018	\$ 42,369	\$ 44,100	\$ 1,731

This object class covers the purchase of capitalized and non-capitalized assets. For example, this object class enables the Coast Guard to purchase furniture for the cadets at the Coast Guard Academy and survival suits for the rescue swimmers deployed to the frigid waters of Alaska. The FY 2011 increase reflects the net result of procurement of equipment to support armed helicopter requirements for Homeland Security and changes in rotary wing capacity.

**Land and structures**

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 12,706	\$ 12,032	\$ 12,032	\$ -

The FY 2011 request has no change.

<b>Net Change from prior year base to budget year estimate:</b>	<b>648</b>	<b>707</b>	<b>(101)</b>

1) The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year.

2) 168 FTE/FTP Public Health Service (PHS) officers were removed from the FY 2009 enacted presentation to properly document the arrangement per OMB A-11 Section 85.7; Department of Health and Human Services (HHS) is the servicing account in the reimburseable FTE arrangement with the Coast Guard.

**U. S. Coast Guard**  
**Environmental Compliance and Restoration**

**I. Appropriation Overview**

**A. Mission Statement for Environmental Compliance and Restoration:**

The Environmental Compliance and Restoration (EC&R) appropriation provides funding for environmental cleanup, sustainment and restoration of current and formerly contaminated Coast Guard facilities, and engineering remedies on Coast Guard assets for the purpose of complying with environmental laws and preventing contamination and environmental damage. The EC&R funding request supports all of the Coast Guard's 11 statutorily mandated mission-programs. These mission-programs, in turn, directly support the Coast Guards role as the principal Federal agency charged with ensuring maritime safety, security, and stewardship.

EC&R funding ensures the Coast Guard maintains its responsibilities in environmental stewardship. Failure to meet restoration or compliance responsibilities could subject the U.S. Government to fines, penalties, or shutdown of operational assets by environmental regulators.

**B. Budget Activities:**

Environmental Compliance and Restoration activities include site investigation and remediation activities at older shore facilities slated for property divestiture or transfer. This predominantly involves divestiture of lighthouses under authority of the National Historic Lighthouse Preservation Act.

**C. Budget Request Summary:**

The Coast Guard requests 25 positions, 24 FTE, and \$13.329 million in FY 2011 to provide for environmental remediation and restoration of Coast Guard facilities, including Air Station Kodiak AK, Support Center Elizabeth City, NC, the Coast Guard Yard in Curtis Bay, MD and Coast Guard training centers in Petaluma, CA and Yorktown, VA.

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U. S. Coast Guard  
Environmental Compliance and Restoration  
Program Performance Justification  
(Dollars in Thousands)**

#### PPA I: ENVIRONMENTAL COMPLIANCE AND RESTORATION

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actual</b>	<b>25</b>	<b>23</b>	<b>\$11,317</b>
<b>2010 Enacted</b>	<b>25</b>	<b>24</b>	<b>13,198</b>
2011 Adjustments-to-Base	...	...	131
<b>2011 Current Services</b>	<b>25</b>	<b>24</b>	<b>13,329</b>
2011 Program Change	...	...	...
<b>2011 Request</b>	<b>25</b>	<b>24</b>	<b>13,329</b>
Total Change 2010-2011	...	...	131

The Coast Guard requests \$13.329 million for this activity. This is an increase of \$131.000 thousand above the FY 2010 enacted level.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Coast Guard Authorization Act of 1989 (P.L. 101-225) created the Coast Guard Environmental Compliance and Restoration (EC&R) Program and Appropriation. The purpose of the EC&R Appropriation is to carry out a program of environmental compliance and restoration at all current and former Coast Guard facilities. It involves the identification, investigation, and cleanup of contamination from hazardous substances and pollutants; and hard engineering fixes (i.e., physical changes) to Coast Guard buildings and structures in order to comply with environmental laws and keep environmental liabilities from developing.

Significant accomplishments in FY 2009 included:

- Continued environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, as well as engineering fixes on Coast Guard assets to comply with environmental laws and regulations.

FY 2010 planned accomplishments include:

- Continue environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, as well as engineering fixes on Coast Guard assets to comply with environmental laws and keep environmental damage from developing.

- Perform comprehensive environmental investigations and clean-up actions at sites with existing written agreements, at former and current Long Range Navigation Stations (LORAN Stations) and at sites with leaking underground fuel storage tanks (UST's).
- Support EC&R costs incurred as a result of Coast Guard vessel disposal, including the 123-foot ISLAND Class cutters.
- Begin partnership with the National Park Service to remove dangerous goods and materials from Great Lakes light houses, including contaminated soils, lead based paints, asbestos, PCBs, and petroleum products. The USCG will also create a system that will recover heavy oil from the sea floor, and develop detection and response techniques for oil spills in ice in fresh water (Great Lakes Restoration Initiative).

FY 2011 planned accomplishments include:

- Continue environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, as well as engineering fixes on Coast Guard assets.
- Environmental investigations and remediations of current and former Lighthouses scheduled for divestiture and Long Range Navigation-C (LORAN-C) stations. Clean-up of Leaking USTs and fuel systems. Upgrades to the Coast Guard's aging facilities and cutters, such as upgrades to oil-water-separators and other critical environmental compliance equipment. Continuation of ongoing remediation projects at Air Station Kodiak, AK; Support Center Elizabeth City, NC; the Coast Guard Yard, MD; and Coast Guard training centers in Petaluma, CA and Yorktown, VA.
- Support EC&R costs incurred as a result of Coast Guard vessel disposal, including the 123-foot ISLAND Class cutters and the proposed decommissioning of four high endurance cutters and one medium endurance cutter.

### PPA Mission Statement

Environmental Compliance and Restoration (EC&R) will provide for (1) environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, and (2) engineering fixes on Coast Guard assets to comply with environmental laws and keep environmental damage from developing. Failure to meet restoration or compliance responsibilities could subject the Coast Guard to fines, penalties, or shutdown of operational assets by environmental regulators. In addition, Coast Guard EC&R funding supports site investigation and remediation activities at older shore facilities slated for property divestiture or transfer actions; this primarily includes divestiture of lighthouses in support of the National Historic Lighthouse Preservation Act.

## Summary Justification and Explanation of Changes

### Salaries and Benefits

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 2,910	\$ 3,039	\$ 3,170	\$ 131

Salaries and Benefits include costs for 24 FTE. The FY 2011 request includes an increase to account for inflation and planned internal personnel reprogramming issues.

### Travel

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 78	\$ 157	\$ 94	\$ (63)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The 2011 request is based on anticipated project needs and schedules.

### Other services

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 7,912	\$ 15,934	\$ 9,561	\$ (6,373)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The decrease in FY 2011 reflects the assumption that all FY 2009 carryover will be obligated in FY 2010.

### Purchases of goods & svcs. from gov't accounts

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 50	\$ 101	\$ 60	\$ (41)

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies.

### Operation & maintenance of facilities

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 262	\$ 528	\$ 317	\$ (211)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental service (e.g., hazardous materials disposal) associated with the operation of Coast Guard facilities.

**Operation and maintenance of equipment**

	<b>2009</b>		<b>2010</b>		<b>2011</b>		<b>2010 - 2011</b>
	<b>Actual</b>		<b>Enacted</b>		<b>Request</b>		<b>Change</b>
	\$	3	\$	6	\$	4	\$ (2)

The 2011 request is based on anticipated projects and schedules.

**Supplies and Materials**

	<b>2009</b>		<b>2010</b>		<b>2011</b>		<b>2010 - 2011</b>
	<b>Actual</b>		<b>Enacted</b>		<b>Request</b>		<b>Change</b>
	\$	102	\$	205	\$	123	\$ (82)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use.

**U. S. Coast Guard**  
**Reserve Training**

**I. Appropriation Overview**

**A. Mission Statement for Reserve Training:**

As the principal federal agency charged with maritime safety, security and environmental stewardship, the Coast Guard protects vital economic and security interests of the United States from internal and external risks and threats. Our reserve forces are critical to enabling the Coast Guard to fulfill objectives associated with its 11 mission-programs. The Reserve Training appropriation provides trained units and qualified personnel for service in times of war or national emergency. Moreover, the Coast Guard Reserve may be called upon to provide units and personnel to augment active Coast Guard forces during times of crisis domestically or worldwide.

**B. Budget Activities:**

The Reserve Training appropriation directly supports training, operation and administration of the Coast Guard Reserve Program. Coast Guard Reserve Forces provide qualified and trained personnel for active duty in event of conflict, national emergency, or natural and manmade disasters. The reservists maintain their readiness through mobilization exercises and duty alongside regular Coast Guard members during routine and emergency operations. Reservists will continue to serve as a cost-effective surge force for response to man-made and natural disasters.

**C. Budget Request Summary:**

The Coast Guard requests 536 positions, 536 FTE, and \$135.675 million in FY 2011. This request provides necessary resources for the training, operation and administration of the Coast Guard Reserve Program while ensuring Reserve Component response readiness. The total program change and base adjustment is \$2.043 million.

<b>2011 Request</b>	<b>536</b>	<b>536</b>	<b>106,591</b>
Total Change 2010-2011	...	...	2,043

The Coast Guard requests \$106.591 million for this activity. This is an increase of \$2.043 million over the FY 2010 enacted level.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

This request for Pay, Benefits and Allowances funds salaries, benefits and other compensation for both military and civilian full-time staffs supporting members of the Coast Guard's Selected Reserve, as well as for reservists who participate in training activities. The Coast Guard Reserve is the Coast Guard's surge-capacity military workforce and provides a cost-effective method of augmenting response to major contingencies, such as natural and man-made disasters, maritime homeland security, national security and other events.

The Coast Guard Reserve is a cornerstone of service readiness and pivotal to the success of daily mission execution. The Coast Guard Reserve was an invaluable contributor to the national responses to Hurricanes Katrina and Rita, and continues to support the Department of Defense's (DoD) Overseas Contingency Operations with deployed service to Operation Enduring Freedom and Operation Iraqi Freedom. Our reservists provide an outstanding return on investment by providing valuable augmentation of the active duty workforce through Inactive Duty Training and Active Duty Training periods.

Our request for funding supports 536 FTE representing both military and civilian members who manage all recruiting, formal training, personnel and resource/program oversight. No additional FTE are requested.

Significant accomplishments in FY 2009 included:

- Served an integral role during supplemental-funded contingency operations for DoD's Overseas Contingency Operations, Operation Iraqi Freedom and Operation Enduring Freedom, with over 680 reservists mobilized on involuntary and voluntary Active Duty Special Work (ADSW) orders in support of contingency operations.
- Supported seaport security, stood watches in command centers, law enforcement operations, anti-terrorism/force protection missions, inspections of commercial vessels, and domestic military out-load (MOL) security.
- Provided search and rescue capability and relief for natural disasters. Reservists continued to serve on active duty in the Midwestern and Gulf states for post-disaster support.
- Participated as crewmembers at 11 Coast Guard units on the Great Lakes in support of "Operation Summerstock" that augmented search and rescue capabilities during the high operational tempo of the summer months.
- Increased full-time support to Commanders in the field for the training and readiness of reserve personnel.

FY 2010 planned accomplishments include:

- Serve an integral role for DoD's Overseas Contingency Operations, Operation Iraqi Freedom and Operation Enduring Freedom.
- Train additional reservists for deployable expeditionary support and provide safety and security teams for deployment within the United States.
- Train for mobilization to support national security and disaster response.
- Support DHS Headquarters Operations, United States African Command (AFRICOM), and Deployable Operations Group (DOG) operations.
- Increase full-time support to Commanders in the field for the training and personal readiness of reserve personnel.

FY 2011 planned accomplishments include:

- Serve an integral role during DoD's Overseas Contingency Operations, Operation Iraqi Freedom and Operation Enduring Freedom.
- Train additional reservists for deployable expeditionary support and provide safety and security teams for deployment within the United States.
- Train for mobilization to support national security and disaster response.
- Realign full-time support billets to further increase full-time support to Commanders in the field for the training and personal readiness of reserve personnel.

PPA II: OPERATIONS, MAINTENANCE AND ADMINISTRATION

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actual</b>	...	...	<b>31,277</b>
<b>2010 Enacted</b>	...	...	<b>29,084</b>
2011 Adjustments to Base	...	...	...
<b>2011 Current Services</b>	...	...	<b>29,084</b>
2011 Program Change	...	...	...
<b>2011 Request</b>	...	...	<b>29,084</b>
Total Change 2010-2011	...	...	...

The Coast Guard requests \$29.084 million for this activity.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This request for Operations, Maintenance and Administration funds services and facilities to train reservists, administer the Reserve program and portion of organizational costs shared by the Reserve Training appropriation operation and maintenance. For example, reservists attend many of the same classroom-based training sessions as members of the active component, and the Reserve Training appropriation provides overhead and course-specific funding. Similar Reserve Training cost sharing applies in other arenas as well.

By providing funding for enterprise-wide services used by reservists, the Reserve Training appropriation ensures equipment and facilities necessary to attract and maintain a high-caliber reserve force without eroding the resource base of the active duty military workforce. Coast Guard reservists serve in multiple mission areas as boarding officers, small boat coxswains, contingency planners and marine inspectors. The Coast Guard Reserve is an extraordinary force multiplier upon which our nation can confidently rely in times of exceptional need, embodying the very essence of the Coast Guard's motto: Semper Paratus (Always Ready).

Significant accomplishments in FY 2009 included:

- Maintained readiness and mobilization skills through training and exercises during routine and emergency operations.
- Mobilized, trained and maintained skills required to support defense operations throughout the world.
- Optimized the delivery of training, readiness and operational support.
- Developed a methodology for measuring training capacity.
- Improved reserve readiness in the field by realigning 202 full-time support positions for more direct support to the operational commands where reservists are assigned and trained.
- Increased the number of Reserve Program Administrators that provided full-time support to reserve force training and support.
- Improved mobilization and demobilization processes for reservists that ensured enhanced reserve-specific functionality in Coast Guard administrative systems.
- Developed and provided training to full-time support personnel who supported reserve readiness training and administration at operational commands.

FY 2010 planned accomplishments include:

- Maintain readiness and hone mobilization skills through training and exercises during routine and emergency operations.
- Mobilize, train and maintain skills required to support defense operations throughout the world.
- Optimize the delivery of training, readiness and operational support.
- Improve reserve readiness in the field by providing additional full-time support positions to increase direct support to the operational commands where reservists are assigned and trained.
- Develop and provide training to full-time support personnel who will be supporting reserve readiness training and administration at operational commands.
- Improve reserve readiness and training with further development of formal and on-line training for the full corps of full-time support personnel supporting reserve readiness throughout the Coast Guard.
- Improve efficiency of reserve specific functions in Coast Guard data and personnel management systems.

FY 2011 planned accomplishments include:

- Maintain readiness and hone mobilization skills through training and exercises during routine and emergency operations.
- Mobilize, train and maintain skills required to support defense operations throughout the world.
- Optimize the delivery of training, readiness and operational support.
- Improve reserve readiness in the field by providing additional full-time support positions to increase direct support to the operational commands where reservists are assigned and trained.
- Develop and provide training to full-time support personnel who will be supporting reserve readiness training and administration at operational commands.
- Improve reserve readiness and training with further development of formal and on-line training for the corps of full-time support personnel supporting reserve readiness throughout the Coast Guard.

\*The Coast Guard manages the military workforce by end strength, not Full Time Equivalent (FTE). The military FTE represented in these numbers are monthly end strengths averaged over the year. Public Health Service (PHS) officers were removed from this presentation to properly document the arrangement per OMB A-11 Section 85.7; Department of Health and Human Services (HHS) is the servicing account in the reimbursable FTE arrangement with the Coast Guard.

\*\*The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular pay grade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

**PPA Mission Statement**

This PPA request funds expenses for compensation of active duty military service members and civilian personnel who support the Reserve Training program. This category also includes pay, allowances, employer's share of FICA, Social Security credits and other expenses. Requested funding will compensate our 536 full-time personnel.

**Summary Justification and Explanation of Changes**

**Salaries and Benefits**

	<b>2009</b>		<b>2010</b>		<b>2011</b>		<b>2010 to 2011</b>
	<b>Actual</b>		<b>Enacted</b>		<b>Request</b>		<b>Change</b>
	\$ 98,825	\$	104,548	\$	106,591	\$	2,043

Salaries and Benefits provides compensation directly related to Coast Guard active duty military and civilian personnel duties. This includes costs for 536 FTE. The increase in the FY 2011 request is due to the proposed pay raise (1.4% civ and 1.4% mil).

## Acquisition, Construction and Improvements

### I. Appropriation Overview

#### **A. Mission Statement for Acquisition, Construction and Improvements:**

Acquisition, Construction and Improvement (AC&I) provides for the acquisition, construction, rebuilding, and improvement of vessels, aircrafts, shore facilities, aids to navigation (ATON) systems and facilities, and command, control, communications and computer systems and related equipment. Funds appropriated for AC&I are managed by Coast Guard acquisition project managers who oversee these projects and apply best practices, in accordance with the Coast Guard's Major Systems Acquisitions Manual (MSAM), to optimize the return on recapitalization investments.

AC&I supports all statutorily-mandated Coast Guard mission-programs. These mission-programs in turn directly support the Coast Guard's role as the nation's principal Federal agency responsible for maritime safety, security, and stewardship.

#### **B. Budget Activities:**

The Acquisition, Construction and Improvements (AC&I) appropriation funds the acquisition of new capital assets, construction of required facilities and physical improvements to existing facilities and assets. The appropriation covers Coast Guard-owned and operated vessels, shore facilities and other items such as command, control, communications and computer equipment. Through processes documented in the Coast Guard's Major Systems Acquisition Manual (MSAM), acquisition managers are required to follow a continuum of activities ranging from pre-acquisition concept development to deployment and sustainment. Activities and documentation produced throughout the acquisition lifecycle define the budgets and budget-related project activities.

#### **C. Budget Request Summary:**

The Coast Guard requests \$1.381 billion in FY 2011 for the following projects:

- Response Boat-Medium - \$42.000 million
- Integrated Deepwater Systems - \$1.113 billion
- Rescue 21 - \$36.000 million
- Shore facilities and aids to navigation - \$69.200 million
- Military Housing - \$13.965 million
- AC&I personnel related support - \$107.561 million

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**U. S. Coast Guard**  
**Acquisition, Construction and Improvements**  
**Program Performance Justification**  
(Dollars in thousands)

#### PPA I: VESSELS AND CRITICAL INFRASTRUCTURE PROJECTS

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actual</b>	...	...	<b>\$105,484</b>
<b>2010 Enacted</b>	...	...	<b>121,000</b>
2011 Adjustments-to-Base	...	...	...
<b>2011 Current Services</b>	...	...	<b>121,000</b>
2011 Program Change	...	...	(79,000)
<b>2011 Request</b>	...	...	<b>42,000</b>
Total Change 2010-2011	...	...	(79,000)

The Coast Guard requests \$42.000 million, \$79.000 million less than FY 2010 enacted.

#### **PROGRAM DESCRIPTION:**

##### **Primary operational resource supported: Surface assets**

The vessel program provides funding to recapitalize and/or improve the Coast Guard's fleet of aging boats and cutters. With many of the Coast Guard's cutters operating at or beyond their planned service life, these recapitalization and sustainment projects are critical toward ensuring the mission effectiveness of the Coast Guard's surface fleet. FY 2011 funding supports the Response Boat-Medium (RB-M) project. Out-year funding under this program will support future year survey and design work on in-service cutters leading to follow-on sustainment projects, similar to the Mission Effectiveness Projects (MEP) currently underway at the Coast Guard Yard.

##### **Significant accomplishments in FY 2009:**

- Ordered 36 RB-Ms (hulls #31-66).
- Received 11 RB-Ms ordered with prior funding and supported a total of 14 delivered RB-Ms.
- Received the first RB-M from the second production facility in Green Bay in fourth quarter FY 2009.
- Continued Operational Test and Evaluation (OT&E) focused on the first six RB-Ms purchased with prior funding.
- Continued development and fielding of logistics system to support the contractor opening the second production facility.

##### **FY 2010 planned accomplishments:**

- Order 39 RB-Ms (hulls #67-105).
- Receive 22 RB-Ms ordered with prior year funding and support a total of 36 delivered RB-Ms.

- Complete OT&E, move out of Low Rate Initial Production (LRIP) and into production, attain Initial Operating Capability with delivery of the first RB-M following LRIP.
- Reach a production rate of 30 boats per year by the end of the fiscal year.

**FY 2011 planned accomplishments:**

- Order 10 RB-Ms (hulls #106-115).
- Receive 20-30 RB-Ms ordered with prior year funding and support a total of 56-66 delivered RB-Ms.

**PPA II: INTEGRATED DEEPWATER SYSTEMS (IDS)**

	Perm Pos	FTE	Amount
<b>2009 Actual</b>	...	...	\$702,498
<b>2010 Enacted</b>	...	...	1,154,280
2011 Adjustments-to-Base	...	...	...
<b>2011 Current Services</b>	...	...	<b>1,154,280</b>
2011 Program Change	...	...	(41,778)
<b>2011 Request</b>	...	...	<b>1,112,502</b>
Total Change 2010-2011	...	...	(41,778)

The Coast Guard requests \$1.113 billion, \$41.778 million less than FY 2010 enacted.

**PROGRAM DESCRIPTION:**

**Primary operational resource supported: All**

The Integrated Deepwater System (IDS) program is the primary recapitalization and sustainment effort for the Coast Guard’s aging fleet of air and surface assets. IDS is comprised of new cutter and small boat acquisitions, existing cutter sustainment, new fixed-wing aircraft acquisitions, and both fixed and rotary wing aircraft sustainment projects. Through strategic investment in state-of-the-market Command, Control, Communications and Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) equipment and design, this program also provides the necessary infrastructure to link these assets together forming an integrated suite of surface, air and shore platforms to conduct maritime safety and security missions. Further, through funding for program management, systems engineering and logistics, the Coast Guard’s acquisition directorate and technical authorities are now serving as the systems integrator for these projects and are developing a sound logistics infrastructure to support the new assets. IDS is comprised of three separate sub-categories:

- Aircraft
- Surface
- Other

**Significant accomplishments in FY 2009:**

**AIRCRAFT**

- HC-144A – Funded production, missionization, and initial sparing of Maritime Patrol Aircrafts (MPA) - #9 - #11 and nine Mission System Pallets (MSP); accepted MPAs #6, #7, and #8. Achieved Initial Operating Capability.

- HH-65 – Continued a service-life extension to refurbish the airframe, wiring and components; add new radar and new C4ISR suite; and install an integrated cockpit.
- HH-60 – Continued a service-life extension to refurbish the airframe, wiring, and components; add new radar and new C4ISR suite; and install an integrated cockpit. Delivered first MH-60T equipped with a fully integrated Electro-Optical/Infrared (EO/IR) Sensor System (ESS).
- HC-130H – Continued avionics modernization package development and center wing box replacement to extend fleet service life.
- HC-130J – Completed missionization and took delivery of aircraft #4 and negotiated missionization of aircraft #5 and #6; achieved IOC.
- UAS – Performed pre-acquisition analysis.

## **SURFACE**

- NSC – *CGC BERTHOLF* (NSC-1) was accepted by the Coast Guard and is conducting operational missions. Completed builder's trials and accepted *WAESCHE* (NSC-2) into special commission status; laid keel for *STRATTON* (NSC-3).
- OPC – Completed preliminary Operational Requirements Document (pORD).
- FRC – Completed preliminary design review (PDR) and obtained acquisition decision event (ADE) 2A approval.
- MEP - Completed five 210-foot WMECs and three 110-foot WPBs.

## **OTHER**

- Logistics - Continued development of CG-LIMS system.
- Logistics - Completed facility upgrades at the first three FRC homeports; facility upgrades at the second NSC homeport; environmental assessments of IDS homeports and aviation sites; and detailed engineering evaluations.
- C4ISR – Achieved Authority to Operate (ATO) Classified Systems on NSC-1 and the MSP on the HC-144A.

## **FY 2010 planned accomplishments:**

### **AIRCRAFT**

- HC-144A – Contract for the production of MPA #12, #13 and #14 and a flight training simulator. Accept delivery of MPAs #9 - #11 and six MSPs.
- HH-65 – Continue a service-life extension to refurbish the airframe, wiring and components; add new radar and C4ISR suite; and install an integrated cockpit.
- HH-60 – Continue a service-life extension to refurbish the airframe, wiring, and components; add new radar and C4ISR suite; and install an integrated cockpit.
- HC-130H – Attain full operating capability for radar replacement, continue avionics modernization and center wing box replacement to extend fleet service life.
- HC-130J – Complete missionization of aircrafts #5 and #6, including the installation of air-certified observer seats.
- UAS – Using established partnerships and prior year funds, continue pre-acquisition activities in alignment with on-going RDT&E-funded research to identify the optimal characteristics for a cutter-based UAS.

## **SURFACE**

- NSC – Award fixed-price incentive fee contract for production of NSC-4. Award long-lead time materials (LLTM) contract for NSC-5.

- FRC – Complete critical design review (CDR) and award contract option for seven Low Rate Initial Production (LRIP) hulls #2 - #8.
- OPC – Develop Concepts of Operations (CONOPS) and Operational Requirements Document (ORD).
- MEP – Complete the mission effectiveness project (MEP) on three 210-foot and two 270-foot WMECs (five cutters in total) and three 110-foot WPBs.

#### **OTHER**

- Logistics - Continue development of CG-LIMS systems.
- Logistics - Begin work on MPA Hanger for CGAS Cape Cod.
- Logistics - Continue to support NSCs with facility upgrades in Alameda, CA and at the second NSC homeport; facility upgrades at the first three FRC homeports; construction of an FRC trainer at Yorktown, VA; environmental assessments of IDS homeports and aviation sites; and detailed engineering evaluations.
- C4ISR – Planned delivery of Segment 2, the second C4ISR baseline; begin Ku band upgrades on WHECs/WMECs; begin Integrated Waveform Military Satellite Communications upgrades on WMECs.

#### **FY 2011 planned accomplishments:**

##### **AIRCRAFT**

- HC-144A – Fund production of MPA #15. Accept delivery of MPAs #12 - #13.
- HH-65 – Use prior year appropriations to continue obsolete component upgrades.
- HH-60 – Continue a service-life extension to refurbish the airframe, wiring, and components; add new radar and C4ISR suite; and install an integrated cockpit.
- HC-130H – Continue avionics modernization and center wing box replacement to extend fleet service life.
- HC-130J – Order logistics spares to support 4,000 annual flying hours requirement.
- UAS – Continue pre-acquisition activities, such as UAS airspace safety, data management, and modeling/simulation studies.

##### **SURFACE**

- NSC – Fully fund production of NSC-5.
- OPC – Continue pre-acquisition work through the request for proposal (RFP).
- FRC – Fund contract option for LRIP hulls #9 - #12.
- MEP – Fund remainder of one 11-month 270 foot MEP availability, as well as two additional 270' MEPs. Unfunded in FY 2011, the 110-foot Patrol Boat MEP will execute prior year funds to complete the MEP on a total of 17 WPBs.

#### **OTHER**

- Logistics - Continue installation of CG-LIMS systems.
- Logistics - Continue construction work on aircraft hangar in Cape Cod, MA and build-out facility upgrades for FRC and NSC.
- C4ISR – Continue critical system updates for safety, Information Assurance (IA), and diminishing manufacturing source.

## PPA IV: OTHER EQUIPMENT

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actual</b>	...	...	<b>\$137,999</b>
<b>2010 Enacted</b>	...	...	<b>129,500</b>
2011 Adjustments-to-Base	...	...	...
<b>2011 Current Services</b>	...	...	<b>129,500</b>
2011 Program Change	...	...	(93,500)
<b>2011 Request</b>	...	...	<b>36,000</b>
Total Change 2010-2011	...	...	(93,500)

The Coast Guard requests \$36.000 million, \$93.500 million less than FY 2010 enacted.

### **PROGRAM DESCRIPTION:**

#### **Primary operational resource supported: Command, Control, Communications, Computers and Information Technology**

Funding procures hardware and software, including the initial acquisition, development or construction of any system, software or equipment costing over \$1 million per usable segment or item, or \$10 million total project cost. It also includes the improvement, renovation, upgrade, replacement or alteration of equipment or hardware that exceeds \$1 million per usable segment or item, or \$10 million total project cost, regardless of the cost per site. In FY 2011, funding will support continued progress on build-out of Rescue 21 (R21). Out-year funding for Nationwide Automatic Identification System (NAIS) and Interagency Operations Centers (IOCs) will further Administration goals of improving maritime safety, security and resiliency within the nation's ports. Using a combination of prior year and out-year funds, these projects will complete the deployment and standardization of information systems that will be used to enhance our knowledge of the vessels operating in and near U.S. waters and support collaboration with DHS and other entities through a shared common operating picture.

#### **Significant accomplishments in FY 2009:**

- Five R21 sectors deployed on time or early per the project schedule. At the end of September 2009, Rescue 21 is deployed to 21 of 39 Sectors for a total of 28,266 miles of coastline coverage.
- Continued work on remaining R21 Full Rate Production Sectors.
- Began work on R21 Western Rivers: proof of concept and development of prototype.
- Continued R21 work in Alaska: including completion of the Acquisition Plan, research and testing to develop components and configurations for the standard Remote Fixed Facility (tower) and Sector Command Center console.
- Awarded contract for the design and installation of the permanent core data network and infrastructure for NAIS.
- Conducted operational testing and evaluation on the WatchKeeper software for Interagency Operations Centers (IOCs) and deployed WatchKeeper to Charleston, SC.

**FY 2010 planned accomplishments:**

- Five additional R21 sectors are scheduled to be deployed (Southeastern New England; Northern New England; Corpus Christi, TX; San Francisco, CA and San Diego, CA). By September 30, 2010, Rescue 21 will be operational along 35,748 miles of coastline.
- Deploy the NAIS core system upgrade to the Coast Guard's Operations Systems Center, Navigation Center and three sectors: Mobile, AL; Hampton Roads, VA and Delaware Bay (Philadelphia, PA).
- Complete WatchKeeper Operational Testing and Evaluation and deploy to: Mobile, AL; Hampton Roads, VA and Delaware Bay (Philadelphia, PA)..

**FY 2011 planned accomplishments:**

- Six R21 sectors (Detroit, MI; Los Angeles/Long Beach, CA; Honolulu, HI; San Juan, PR; Guam; Buffalo, NY) are scheduled to be deployed. By September 30, 2011, Rescue 21 will be operational along 39,796 miles of U.S. coastline.
- Continue deployment of the R21 Western Rivers Subsystem.
- Complete site surveys for all R21 sites within two Sectors to co-locate NAIS equipment with R21 infrastructure

**PPA V: SHORE FACILITIES AND AIDS TO NAVIGATION**

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actual</b>	...	...	<b>\$89,384</b>
<b>2010 Enacted</b>	...	...	<b>27,100</b>
2011 Adjustments-to-Base	...	...	...
<b>2011 Current Services</b>	...	...	<b>27,100</b>
2011 Program Change	...	...	42,100
<b>2011 Request</b>	...	...	<b>69,200</b>
Total Change 2010-2011	...	...	42,100

The Coast Guard requests \$69.200 million, \$42.100 million more than FY 2010 enacted.

**PROGRAM DESCRIPTION:**

**Primary operational resource supported: Shore units and Aids-to-Navigation (ATON)**

The AC&I shore facilities, ATON capital investment and Military Housing program provides funding for the acquisition, construction, rebuilding, and improvement of the Coast Guard's shore facilities, ATON and related equipment.

**Significant accomplishments in FY 2009:**

- Completed initial survey and design for nine facilities/projects.
- Commenced Phase III of the Cordova, Alaska housing project which will complete 6 duplex units (12 housing units).
- Commenced the recapitalization of Chase Hall's North Annex A.
- Commenced the renovation of the runway lighting at Air Station Cape Cod (Massachusetts Military Reservation).
- Commenced construction of the addition to the Telecommunications Systems Directorate (TSD) building.

- Purchased housing for Station Montauk, NY.
- Commenced construction of a 23,000 square-foot consolidated Station, Aids to Navigation Team (ANT) and Coastal Patrol Boat (CPB) facilities for Station Cape May.
- Completed Phase II of the Rescue Swimmer Training Facility at Aviation Technical Training Center (ATTC), Elizabeth City, NC project by providing the Modular Egress Training Simulator (dunker); dunker tank; enclosure with deck space, mechanical support space; classrooms and labs.
- Completed Aids to Navigation work at the following sites: Pleasant River, ME, Port Canaveral and Port Manatee, FL, Mobile, AL, Gulfport, MS, Port Charles, LA, Anaheim Bay and Mission Bay, CA, Puget Sound, WA, and Sumner Strait, AK.

**FY 2010 planned accomplishments:**

- Complete initial survey and design for seven facilities/projects.
- Commence the renovation and construction of a new Station and Marine Safety Unit at Cleveland Harbor, OH.
- Commence survey and design project for the Coast Guard Academy pier.
- Complete Aids to Navigation work at the following sites: Port Canaveral, FL – Outbound Ranges; Belle Pass/Port Fuchon, LA – Inbound Ranges ; Anaheim Bay Ranges, CA; Anaheim Bay, CA – Buoys to Beacons; Napa River, CA; Sacramento/San Joaquin Rivers, CA; Houston Ship Channel Ranges, TX; St. Mary's River, MI – Buoys to Beacons; Mobile Channel Ranges, AL.

**FY 2011 planned accomplishments:**

- Construct minor AC&I shore facility projects.
- Commence renovations to Chase Hall Phase III – Annex B at the Coast Guard Academy in New London, CT.
- Commence renovations to Thrun Hall Phase II at Aviation Logistics Center in Elizabeth City, NC.
- Commence pier rehabilitation for the *Coast Guard Cutters JUNIPER, WILLOW, and IDA LEWIS* in Newport, RI.

**PPA VII: PERSONNEL AND RELATED SUPPORT**

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actual</b>	<b>820</b>	<b>704</b>	<b>\$92,109</b>

<b>2011 Request</b>	<b>893</b>	<b>785</b>	<b>107,561</b>
Total Change 2010-2011	...	50	2,361

The Coast Guard requests \$107.561 million, \$2.361 million more than FY 2010 enacted.

**PROGRAM DESCRIPTION:**

**Primary operational resource supported: All**

Acquisition, Construction and Improvements (AC&I) has a specific annual appropriation to fund “personnel compensation and benefits and related costs. Annual AC&I personnel compensation appropriation, rather than the multi-year project funds, must be used to fund all AC&I related personnel costs. The primary initiatives include contract support for financial management services, contracting support services, training and workforce certification. The funding allows the Coast Guard to maintain an effective acquisition process by providing AC&I resources that are not project-specific. Resources are needed to maintain core competencies and capabilities necessary to execute assigned workload while meeting various requirements established in the Chief Financial Officer Act, Clinger-Cohen Act, DHS certification level requirements and OMB Circular A-76.

Total Change 2010-2011	...	...	13,965

**PROGRAM DESCRIPTION:**

**Primary operational resource supported: All**

This program provides funding from the Coast Guard Housing Fund to recapitalize and/or improve the Coast Guard’s military family housing facilities to enhance the quality of life of the workforce. These funds will be used to plan, execute, administer contracts, acquire, and construct military family housing to provide greater access to suitable and affordable housing for Coast Guard members and their families assigned to areas where there are documented shortages.

**FY 2011 planned accomplishments:**

- Commence projects to acquire Military Family Housing for members assigned to high-cost housing areas in Florida and New York.

**IV. Program Justification of Changes**

**Department of Homeland Security  
U. S. Coast Guard  
Acquisition Construction and Improvements  
Justification of Program Changes  
(Dollars in Thousands)**

**Program Increase:** Acquisition, Construction and Improvements

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security**  
**U. S. Coast Guard**  
**Justification of Proposed Changes in Acquisition, Construction, and Improvements**  
**Appropriation Language**

For necessary expenses of acquisition, construction, renovation, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto; and maintenance, rehabilitation, lease and operation of facilities and equipment, as authorized by law; [~~\$1,537,080,000~~]**\$1,381,228,346**, of which \$20,000,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)); *of which **\$13,965,546** shall be derived from the Coast Guard Housing Fund, established pursuant to 14 U.S.C. 687, and shall remain available until expended for military family housing*; of which [~~\$121,000,000~~]**\$42,000,000** shall be available until September 30, [2014]**2015**, to acquire, *effect major* repairs, renovate, or improve vessels, small boats, and related equipment; of which [~~\$129,500,000~~]**\$36,000,000** shall be available until September 30, [2012]**2013**, for other equipment; of which [~~\$27,100,000~~]**\$69,200,000** shall be available until September 30, [2012]**2013**, for shore facilities and aids to navigation facilities[, including not less than \$300,000 for the Coast Guard Academy Pier and not less than \$16,800,000 for Coast Guard Station Cleveland Harbor]; of which [~~\$105,200,000~~]**\$107,560,800** shall be available for personnel compensation and benefits and related costs; and of which [~~\$1,154,280,000~~]**\$1,112,502,000** shall be available until September 30, [2014]**2015**, for the Integrated Deepwater Systems program[: Provided, That of the funds made available for the Integrated Deepwater Systems program, \$269,000,000 is for aircraft and \$730,680,000 is for surface ships: Provided further, That the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives, in conjunction with the President's fiscal year 2011 budget, a review of the Revised Deepwater Implementation Plan that identifies any changes to the plan for the fiscal year; an annual performance comparison of Integrated Deepwater Systems program assets to pre-Deepwater legacy assets; a status report of such legacy assets; a detailed explanation of how the costs of such legacy assets are being accounted for within the Integrated Deepwater Systems program; and the earned value management system gold card data for each Integrated Deepwater Systems program asset: Provided further, That the Secretary shall submit to the Committees on Appropriations of the Senate and the House of Representatives, in conjunction with the fiscal year 2011 budget request, a comprehensive review of the Revised Deepwater Implementation Plan, and every 5 years thereafter, that includes a complete projection of the acquisition costs and schedule for the duration of the plan: Provided further, That the Secretary shall annually submit to the Committees on Appropriations of the Senate and the House of Representatives, at the time that the President's budget is submitted under section 1105(a) of title 31, United States Code, a future-years capital investment plan for the Coast Guard that identifies for each capital budget line item\_]

[(1) the proposed appropriation included in that budget;]

[(2) the total estimated cost of completion;]

[(3) projected funding levels for each fiscal year for the next 5 fiscal years or until project completion, whichever is earlier;]

[(4) an estimated completion date at the projected funding levels; and]

[(5) changes, if any, in the total estimated cost of completion or estimated completion date from previous future-years capital investment plans submitted to the Committees on Appropriations of the Senate and the House of Representatives:]

[Provided further, That the Secretary shall ensure that amounts specified in the future-years capital investment plan are consistent, to the maximum extent practicable, with proposed appropriations necessary to support the programs, projects, and activities of the Coast Guard in the President's budget as submitted under section 1105(a) of title 31, United States Code, for that fiscal year: Provided further, That any inconsistencies between the capital investment plan and proposed appropriations shall be identified and justified: Provided further, That subsections (a) and (b) of section 6402 of the U.S. Troop Readiness, Veterans' Care, Katrina Recovery, and Iraq Accountability Appropriations Act, 2007 (Public Law 110-28) shall apply to fiscal year 2010].(*Department of Homeland Security Appropriations Act, 2011.*)

### **Explanation of Changes:**

Transfers **\$13,965,546** made available from the Coast Guard Housing Fund for the acquisition, construction, and maintenance of military family housing to improve the quality of life for military families.

Making AC&I available to “*effect major repairs*” keeps us from falling in to the trap that OE is not available for “minor repairs” associated with regular dockside and dry-dock availabilities.

Note 1 - FY 2012-15 funding levels are subject to change based upon adjustments to our year fiscal guidance and finalization of the FY 2011-15 Future Year Homeland Security Program. FY 2010 Enacted total does not include rescission of \$800,000 per P.L. 111-83.

Note 2 - For display purposes of this exhibit, Polar Icebreaker Sustainment and HEC Sustainment, are shown as separate projects. Both of these projects were appropriated under the Surface category of Integrated Deepwater System Program per the FY 2010 Department of Homeland Security Appropriations Act, P.L. 111-83.

Note 3 - Total project costs and estimated completion dates based on DHS Acquisition Program Baseline (APB) when available. The pre ADE-2 designation denotes those individual projects that are in pre-acquisition phases and have not yet reached Acquisition Decision Event 2 (ADE-2), the point at which an individual APB is required.

\*The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year.

\*\*The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular paygrade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Response Boat - Medium (RB-M)**

**\$42,000**

**Project Description, Justification and Scope**

This funding places 10 boats on order, supports logistics development and continues the Response Boat-Medium project.

The Response Boat - Medium (RB-M) project was established to procure 180 new small boats to replace the aging 41-foot Utility Boats (UTB) (and other large non-standard boats) with assets more capable of meeting the Coast Guard's multi-mission operational requirements, including Search and Rescue; Marine Safety; Marine Environmental Protection; Living Marine Resources; Ports, Waterways, and Coastal Security; and Defense Readiness.

RB-M 45601 from Station Little Creek, VA on Potomac River, Sept 2008

The legacy 41' UTB, built by the Coast Guard from 1973 to 1980, is a key asset for multi-mission, station-based Coast Guard operations within coastal zones. Although designed specifically for Search and Rescue (SAR) missions, the 41' UTBs have been employed as multi-mission assets.

Coast Guard mission requirements, particularly in terms of maritime security have changed markedly since the 41' UTB was built. The RB-M offers a number of opportunities for improvements over the existing fleet of 41' UTBs and other boats in performance, human system interface and operational availability. Several program requirements and extensive field commander input indicates a need for an RB-M that is substantially faster (e.g., 40+ knots vs. 26 knots) than the 41' UTB to support new homeland security operations. Such capability will also improve multi-mission effectiveness for Search and Rescue, Undocumented Migrant Interdiction, Illegal Drug Interdiction, Other Law Enforcement, Ports, Waterways, and Coastal Security (PWCS) and Defense Readiness missions.

Integrated navigation and sensing systems compliant with modern international radio-telephone standards provide the RB-M with improved communications and search capability compared to the 41 foot UTB, improving mission effectiveness. Interoperability of the RB-M with Rescue 21 equipment enhances overall command and control as well as crew safety in coastal zones. Moreover, crew interface with the boat and equipment will be improved in a number of areas. For example,

- Self righting capability provides improved survivability in higher sea states
- Self-fendering allows more efficient boarding and towing operations
- Improved survivor recovery arrangement improves crew effectiveness
- Secure seating for each crewmember in an environmentally controlled cabin enables greater mission endurance with less crew fatigue

Methods to achieve the above include emphasizing the ability to maintain and replace RB-M components quickly by providing improved depot level maintenance support. Further efficiencies are gained by providing maintenance relief vessels to substitute for station boats during major maintenance and casualty repairs. The RB-M is also being built to dimensions that will allow for commercial

**Response Boat - Medium (RB-M)**

**\$42,000**

overland transportation to support deployed surge operations, and technical data will be formatted to support the ongoing organizational logistics transformation.

**PROJECT HISTORY**

The RB-M Acquisition Strategy is two-phased: Phase I – a full and open competitive Request For Proposal (RFP), selected three contractors to build test boats, followed by developmental testing and evaluation to validate RB-M requirements. Phase II – a competitive RFP limited to the three Phase I contractors, for production and logistics support for approximately 180 boats that meet the Coast Guard’s multi-mission requirements.

The RFP for the test boats was released August 9, 2002 and contracts for three test boats were awarded on May 2, 2003. The test boats were delivered October 29, 2003. The Coast Guard conducted extensive in-water developmental testing and evaluation after accepting the Phase I test boats. Personnel from Coast Guard multi-mission stations who operate and maintain small boats on a daily basis participated in the in-water testing. The Naval Surface Warfare Center Carderock Division – Combatant Craft Department – conducted the technical analysis of the data gathered from the acceptance, performance, mission effectiveness, and supportability testing. The evaluation results were used to validate government requirements and verify industry’s ability to meet those requirements using non-developmental state of the market technology at a reasonable price. Select portions of the Phase I test results were also furnished to the Phase I contractors for additional research and development, and for use in developing their Phase II proposals.

On June 21, 2006, the RB-M contract for Phase II of the acquisition, design, construction, outfit and delivery of the RB-M system, was awarded to Marinette Marine Corporation (MMC) of Marinette, WI. Marinette Marine’s primary subcontractor for design and construction of the initial RB-Ms is Kvichak Marine Industries (KMI) in Kent, WA. Detailed design was completed in June 2007 and construction started on the first RB-M in July 2007. The first boat was delivered in March 2008 initiating Operational Testing and Evaluation (OT&E).

During Low Rate Initial Production (LRIP) RB-Ms are delivered at a rate of approximately one per month to field units representing the most diverse operational and environmental conditions possible to ensure OT&E is representative of all conditions the RB-M will encounter once fully deployed. Preliminary OT&E results have shown that the LRIP assets meet all of the Critical Operational Parameters identified in the Operational Requirements Document (ORD).

The FY 2008 appropriation provided funding to place sufficient orders to warrant opening a second production facility in Green Bay, WI. This facility opened in September 2008 and delivered its first RB-M (hull # 11) in Q4 FY 2009. During OT&E RB-Ms remain in Low Rate Initial Production, delivering approximately one RB-M per month. Approval of the OT&E report, expected in early FY 2010, will mark the end of LRIP and the project will proceed into full production. When in full production both the MMC Green Bay, WI facility and the Kvichak Marine Kent, WA facility will deliver at least 15 RB-Ms annually for a total of no less than 30 boats per year.

*U. S. Coast Guard - FY 2011 Congressional Justification*

**Response Boat - Medium (RB-M)**

**\$42,000**

As of December 2009, 19 RB-Ms have been delivered to US Coast Guard Stations:

<b>FY</b>	<b>Delivered</b>	<b>Location</b>	<b><sup>1</sup>OT&amp;E primary asset</b>
2008 (3)	Apr'08	Little Creek, VA <sup>1</sup>	<sup>1</sup> First six RB-Ms designated as primary OT&E assets

**KEY EVENTS**

**Significant accomplishments in FY 2009 include:**

- Ordered 36 RB-Ms (hulls #31-66)
- Received 11 RB-Ms ordered with prior funding and supported a total of 14 delivered RB-Ms
- Received the first RB-M from the second production facility in Green Bay in Q4 FY 2009
- Continued Operational Test and Evaluation (OT&E) focused on the first six RB-Ms purchased with prior funding
- Continued development and fielding of logistics system deferred in prior years to support placing sufficient boat orders to initiate the contractor opening the second production facility

**FY 2010 planned accomplishments include:**

- Order 39 RB-Ms (hulls #67-105)
- Receive 22 RB-Ms ordered with prior year funding and support a total of 36 delivered RB-Ms
- Complete OT&E, move out of LRIP and into full production, attain Initial Operating Capability with delivery of the first RB-M following completion of LRIP
- Reach a full production rate of at least 30 boats per year by the end of the fiscal year

**FY 2011 planned accomplishments include:**

- Order 10 RB-Ms (hulls #106-115)
- Receive 20-30 RB-Ms ordered with prior year funding and support a total of 56-66 delivered RB-Ms

*U. S. Coast Guard - FY 2011 Congressional Justification*

**Response Boat - Medium (RB-M)**

**\$42,000**

**Method of Performance**

The RB-M Project Management Team has implemented an Earned Value Management System (EVMS) that meets ANSI/EIA Standard 748. During the Capability Development and Demonstration Phase of the acquisition process an earned value management framework was implemented for effective project

U. S. Coast Guard - FY 2011 Congressional Justification

**Response Boat - Medium (RB-M)**

**\$42,000**

management and controls. The RB-M Project is applying the lessons learned from other agency acquisition programs and using those insights in managing the cost, schedule, and technical performance during the project life-cycle.

The Project also requires Integrated Baseline Reviews (IBR) following boat orders. The first IBR was held jointly with the contractor in November 2006 to provide a mutual understanding of risks inherent in contractors' performance plans and underlying management control systems. Subsequent IBRs are held after each delivery order is placed to evaluate risk and determine an appropriate delivery schedule based on manufacturing capability. The IBR and EVMS are essential elements of the RB-M Project's risk management approach. The IBRs address the integrated master schedule (IMS), integrated master plan (IMP), and include discussions with contractor control account managers (CAM) to ensure alignment between the contractor and the Government. The most recent IBR was held in May 2009 to review and establish the production and delivery schedule for RB-Ms #31-36.

**Budget Allocation to Mission-Program**

(Dollars in Thousands)

**Maritime Patrol Aircraft (MPA) HC-144** **\$40,000**

---

**Project Description, Justification and Scope**

This request funds one (1) Maritime Patrol Aircraft (MPA) HC-144A. These funds will address the Coast Guard's MPA flight hour gap by providing 1,200 additional MPA hours every year per aircraft, once missionized.

**CAPABILITY ACQUIRED/MAINTAINED:**

The HC-144A is equipped with communication, navigation and surveillance systems allowing the aircraft to operate worldwide within the range of its performance parameters, in civilian and military airspace, in support of its Congressionally-mandated missions.

Purchased in compliance with the Buy American Act, the HC-144A is the perfect complement for the Coast Guard fleet of long-range, heavy-lift HC-130 aircraft. Its high-efficiency turbo prop design allows extended surveillance and quick response capability. The sophisticated surface search radar can detect targets of interest from over 100 miles away. Once closer to the target of interest, the Electro-Optical/Infrared (EO/ IR) sensor can further classify and identify it in virtually all weather conditions, allowing the Coast Guard to quickly locate high interest vessels and mariners in distress.

The modern cockpit design provides pilots with superior situational awareness, reduced workload and increased safety, allowing them to better concentrate on the mission. Human factors engineering is also evident in the tactical workstations of the mission system pallet. Systems operators can collect, compile, and transfer vital information in real time to operational commanders on ship or on shore hundreds of miles from the aircraft. Satellite radios provide for clear and uninterrupted voice and data exchange, and advanced electronic support measures that can automatically detect friendly / unknown vessels and their 'fingerprints' add another layer of defense to the homeland security mission.

The HC-144A also provides great mission flexibility. The hydraulically-operated rear ramp allows for easy roll-on/ roll-off provisions. This quick-change feature allows ground crews to re-configure the aircraft from maritime patrol to medical evacuation to passenger/ freight transport. Its medium size and high-lift wing design allow take-off and landing on short, unpaved landing areas, further enhancing the Coast Guard's abilities to aid first responders in all types of national, state and local emergencies.

**PERFORMANCE:**

The HC-144A is a transport and surveillance, fixed-wing aircraft that is used to perform Search and Rescue (SAR) missions, enforce laws and treaties, including illegal drug interdiction, marine environmental protection, military readiness, homeland security and International Ice Patrol missions, as well as cargo and personnel transport. It can perform aerial delivery of SAR equipment, such as rafts, pumps, and flares, and can be used as an On-Scene Commander platform. As the medium-range maritime patrol aircraft, the asset delivers maritime domain awareness essential to achieving mission success in the following Congressionally-mandated missions:

**MARITIME SAFETY:**

- Search and Rescue (SAR) – The aircraft is outfitted with a capable C4ISR suite that includes a multi-mode surface and air search radar (MMR), and an Electro Optical/Infrared (EO / IR) sensor device able

**Maritime Patrol Aircraft (MPA) HC-144**

**\$40,000**

to detect and observe a wide range of targets. The aircraft has a line-of-bearing indicator and distress call monitoring for all distress frequencies. It is also equipped with search windows, and the crew is outfitted with night vision devices to further enhance their ability to detect, classify, and identify targets. With a rear cargo loading ramp that can be opened in-flight, the HC-144A is capable of aerial delivery of equipment (i.e. life rafts, communications kits, and de-watering pumps) and personnel. With an endurance of 9 hours, the asset can also serve as an On-Scene Commander platform, guiding and assisting rotary wing assets.

- Marine Safety – International Ice Patrol (IIP) – Although the HC-144A does not have the extended range of the C-130 aircraft, it can remain airborne for 9 hours, and, utilizing the same sensors described above, is able to detect and relay the location of icebergs in support of the IIP mission.

**MARITIME SECURITY:**

- Undocumented Migrant Interdiction Operations (MIO) – The C4ISR suite, including the same sensors described in the SAR mission, are employed to provide surveillance, detection, classification and identification in the undocumented MIO mission. With multiple communications, including UHF/VHF, HF, MILSATCOM and INMARSAT, the asset can share important information with other operational units and command centers. This information contributes to the Common Tactical Picture (CTP) and Common Operating Picture (COP) through a networked Command and Control (C2) system that provides for data sharing via INMARSAT.

- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment is used to support undocumented MIO is also utilized to support the DRUG mission. Through effective use of the CTP/ COP, the HC-144A is able to direct Coast Guard surface assets to intercept and prosecute suspect vessels.

- Other Law Enforcement (OLE) – The use of all sensors and communications equipment are utilized for the OLE mission. The sharing of information and data through the use of the C2 system and the CTP/ COP results in increased maritime domain awareness.

**PROTECTION OF NATURAL RESOURCES:**

- Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response – In conjunction with visual surveillance, the HC-144A C4ISR suite can be employed to monitor and map oil-covered water surfaces. The MMR can detect differences in backscatter between water and oil-covered water due to the dampening effects of oil on small wind-generated waves, while the EO/ IR sensor can detect the small temperature variation between clear and oil-covered water. The COP provides the capability to navigate to previously-marked pollution areas and update them based on current C4ISR and visual indications.

- MEP – Lightering Zone Enforcement (LZE) – Similarly, LZE is not a primary mission for the HC-144A, but it is capable of monitoring Lightering Zones for oil and other hazardous chemical discharges.

- Living Marine Resources Enforcement (LMR) – The HC-144A employs all sensors (MMR, EO, and IR) to provide surveillance of protected and/ or closed offshore areas to ensure the protection of LMR. In addition to the sensors and communications capabilities already described, the HC-144A is equipped with an Automatic Identification System (AIS) to monitor surface vessels. The AIS information

U. S. Coast Guard - FY 2011 Congressional Justification

**Maritime Patrol Aircraft (MPA) HC-144**

**\$40,000**

collected includes the ship's name, position, course, and speed. The use of AIS makes the job of vessel identification more efficient, permitting the aircraft to remain at altitude instead of having to make a low pass to visually identify a vessel.

**NATIONAL DEFENSE:**

• Defense Readiness - The HC-144A plays a limited role in current national defense missions but can provide support through surveillance and transport roles to the following areas:

- Port Operations, Security, and Defense (POSD)
- General Defense Operations (GDO)
- Peacetime Military Engagement (PME)
- Maritime Intercept Operations (MIO)
- Environmental Defense Operations (EDO)

**OTHER:**

• Non-IDS Aviation Demand (NDAD) – The HC-144A supports NDAD primarily in a logistics transport role.

**COST ESTIMATE OF WORK TO BE FUNDED IN FISCAL YEAR 2011:**

ITEM	QUANTITY	TOTAL (\$K)
MPA Aircraft	1	\$40,000
	Total	\$40,000

**FUNDING HISTORY**

	FY	TOTAL (\$K)
Conceptual Development/Design	2002	\$12,538
Procured MPA #1 and #2; three Mission System Pallets (MSP)	2003	\$141,443
Procured MPA #3	2004	\$24,853

**Method of Performance**

An Earned Value Management System (EVMS) is used for the system integrator contract work under each of the Delivery Task Orders (DTOs). The Dekker Trakker software program, which meets ANSI/EIA Standard 748, is employed to resource load schedules, track progress and record expenses. Moreover, Dekker iPursuit is also used to view monthly Cost Performance Reports. The iPursuit program also allows for extensive insight into the data used to generate Cost Performance reports. For example, it can provide a breakdown of cost and schedule variances by Work Breakdown Structure (WBS).

**Budget Allocation to Mission-Program**

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**HH-60 Conversion and Sustainment Projects** **\$32,000**

**Project Description, Justification and Scope**

This request continues the funding of multiple conversion and sustainment projects for the Coast Guard's fleet of 42 HH-60J Jayhawk, Medium Range Recovery (MRR) helicopters. The individual project descriptions are as follows:

1. HH-60T Avionics Upgrade – Replaces obsolete HH-60J avionics with modernized electrical wiring, and electrical connectors. Upgrades include the addition of up to 5 Multi-Functional Displays (MFD) screens that increase pilots' situational awareness, a digital weather radar, a Traffic Collision Avoidance System (TCAS), the display of primary flight instruments on the Pilot's Flight Display (PFD), a radar altimeter with verbal low altitude alarm to enhance safety during night hovering, and improved Search and Rescue (SAR) software for hoist camera images. This project will have additional benefits in that the non-recurring engineering development costs on the HH-60T Avionics Upgrade will be reinvested in the HH-65C Avionics Upgrade project.
2. HH-60J Service Life Extension Project (SLEP) (Re-Wire) – Replaces legacy electrical wiring/connectors not addressed by the avionics upgrade in order to maintain structural and electrical integrity and remove any remaining Navy weapons systems wiring. This phase is performed when each aircraft is inducted into the third Programmed Depot Maintenance (PDM) cycle.
3. HH-60J Radar/ Electro Optical/Infra-Red (EO/IR) sensor – Replaces HH-60J RDR-1300 monochrome weather-search radar with a Multimode Radar (MMR) and an enhanced EO/IR sensor common to Coast Guard helicopter platforms. These systems will allow for common operational picture/maritime domain awareness data exchange capabilities.
4. HH-60J Engine Sustainment – Provides a targeted standardized configuration for the Auxiliary Power Units (APUs), Hydro-Mechanical Units (HMUs) and obsolescence/support issues associated with the Digital Electronic Control Unit to increase the projected mean time between engine failures. Project phase also initiates a performance-based logistics support system and the recapitalization of high-time engines that are beyond their economic overhaul limit.

**CAPABILITY ACQUIRED/MAINTAINED:**

The Sikorsky HH-60J Jayhawk is the Coast Guard's medium-range recovery helicopter. Two T700-GE-401C engines, each rated at around 1600 shaft horsepower, provide adequate power for a gross takeoff weight of 22,000 pounds. The HH-60J is very well-suited for operations in challenging weather conditions. A flight management and navigation system provides the aircrews with Global Positioning System (GPS) navigation and some auto-pilot capabilities. All-weather operation is rounded out with weather radar and an effective anti-ice system that allows cold weather operation in the Northeast U.S. and Alaska. The aircraft is also equipped with night-vision compatible displays that allow aircrews to complete missions in almost zero-light conditions.

The HH-60J is larger and more powerful than the Coast Guard's HH-65 helicopter. Because of the extended-capacity fuel tanks, the HH-60J is often called upon for SAR missions far offshore. It is capable of flying up to 300 miles offshore, staying on scene for approximately 45 minutes, picking up six or more survivors, and then returning to shore with adequate fuel to divert to another landing area if required. All weather flight capabilities are provided by a basic flight-management system.

**HH-60 Conversion and Sustainment Projects**

**\$32,000**

A complete replacement of the HH-60J avionics system is currently underway at the Coast Guard Aircraft Repair and Supply Center (AR&SC), Elizabeth City, NC. Taking advantage of the U.S. Army and U.S. Navy Common Avionics Architecture System (CAAS) cockpit, the HH-60J will receive the same capabilities as DoD and other components, enhancing interoperability with partners. The CAAS cockpit will integrate current technology to upgrade the flight-management, navigation, and automatic-pilot features. It will also increase operational availability and reduce maintenance and supply costs. Another project involves the installation of an upgraded multi-mode radar and EO/IR sensors that will provide the HH-60J with a common command, control and surveillance system to integrate with the Coast Guard's Common Operating Picture (COP).

**PERFORMANCE:**

Once converted, there will be 42 HH-60Js located within the continental United States and Alaska providing support to the following Congressionally-mandated missions:

**MARITIME SAFETY:**

- Search and Rescue (SAR) – The HH-60J will be outfitted with a capable C4ISR suite that includes a multi-mode surface and air search radar (MMR), and EO/IR sensor to find and observe a wide range of targets. The aircraft will have a line-of-bearing indicator and distress call monitoring on various distress frequencies. It will also be equipped with Global Positioning System (GPS) and the crew will be outfitted with night vision devices to further enhance the crew's ability to detect, classify, and identify targets.

**MARITIME SECURITY:**

- Undocumented Migrant Interdiction Operations (MIO) – The C4ISR suite, including the same sensors described in the SAR mission, will be employed to provide surveillance, detection, classification, and identification in the undocumented MIO mission. With multiple communications, including UHF/VHF, HF, the HH-60J will be able to share important information with other operational units and command centers. This information will contribute to a Common Tactical Picture (CTP) and COP through a networked Command and Control (C2) system that provides data sharing capability.

- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that will support undocumented MIO will also be used to support the DRUG mission. Through effective use of the CTP/COP, the HH-60J will be able to direct Coast Guard surface assets to intercept and prosecute suspect vessels.

- Other Law Enforcement (OLE) – All sensors and communications equipment will be used for the OLE mission. Sharing information and data through the use of the C2 system and the CTP/COP will result in increased maritime domain awareness.

**PROTECTION OF NATURAL RESOURCES:**

- Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response – Visual surveillance and the C4ISR suite on the HH-60J will be employed to monitor and map oil-covered water surfaces. The MMR can detect differences in backscatter between water and oil-covered water due to the dampening effects of oil on small wind-generated waves, while the EO/IR sensor can detect the small temperature variation between clear and oil-covered water. The COP provides the capability to

**HH-60 Conversion and Sustainment Projects**

**\$32,000**

navigate to previously-marked pollution areas and update them based on current C4ISR and visual indications.

- MEP – Lightering Zone Enforcement (LZE) – The HH-60J is capable of monitoring lightering zones for oil and other hazardous chemical discharges.
- Living Marine Resources Enforcement (LMR) – The HH-60J will employ all sensors (MMR, EO/IR) to provide surveillance of protected and/or closed offshore areas and ensure the protection of LMR.

**NATIONAL DEFENSE:**

- Defense Readiness – The HH-60J plays a limited role in current national defense missions but can provide support through surveillance and transport roles to the following areas:
  - Port Operations, Security, and Defense (POSD)
  - General Defense Operations (GDO)
  - Peacetime Military Engagement (PME)
  - Maritime Intercept Operations (MIO)
  - Environmental Defense Operations (EDO)

**COST ESTIMATE OF WORK TO BE FUNDED IN FISCAL YEAR 2011:**

ITEM	QUANTITY	TOTAL (\$K)
HH-60 Avionics Upgrade	8	\$8,600
HH-60 SLEP	8	\$1,300

**Method of Performance**

The method of performance metrics has changed significantly due to the shift of the Lead System Integrator (LSI) responsibility to the U.S. Coast Guard. The USCG will now manage all H60 Conversion Projects system integration issues internally. An Earned Value Management System (EVMS) is currently being developed for use at AR&SC. As outlined in the H60 Conversion Projects and Avionics Program Management Plans, and until such time an EVMS is established at AR&SC, the Project Manager will use a mixture of monthly financial and project status reports, as well as weekly conference calls and project management staff meetings to measure project performance.

**HC-130H Conversion and Sustainment Projects** **\$25,000**

---

**Project Description, Justification and Scope**

This request funds the following projects:

- 1) HC-130H Avionics I Upgrade
- 2) Center Wing Box (CWB) replacement

The Lockheed HC-130H is the Coast Guard's long-range surveillance aircraft. This four-engine, turbo-prop aircraft is used extensively throughout the United States, the Pacific, and the Caribbean in support of search and rescue, homeland security, law enforcement, pollution prevention, and ice patrol missions.

FY 2011 funding will continue the development of the new digital cockpit, with multi-function displays that will provide aircrews with increased situational awareness and reduced cockpit workload. Additionally, funding will provide two replacement center wing boxes, which is critical for extending the aging asset's service life.

**CAPABILITY ACQUIRED/MAINTAINED:**

The HC-130H is powered by four Allison T56-A15 engines driving Hamilton Standard four-bladed propellers. When all fuel tanks are filled, the aircraft is capable of extended range (>2600 miles in low-altitude flight). With reduced fuel loads, the aircraft can carry a 40,000 pound payload. A large cargo compartment area, easily accessed through a large rear ramp, can accommodate a wide range of cargo. The aircraft's high-lift capability allows takeoff and landings from short, unimproved runways.

To keep the HC-130H fleet in service, upgrades to the avionics, sensors and fuselage are required. The avionics suite on the HC-130H has been in service since the aircraft were delivered in the early 1980s. A digital cockpit with multi-function displays and reliable engine and propeller indicators will provide aircrews with increased situational awareness and reduced cockpit workload; critical for long range operations.

**PERFORMANCE:**

With its flight-management and sensor systems, the HC-130H is a very capable maritime patrol aircraft, equipped with a powerful surface search radar that can detect surface targets from over 50 miles away. Once closer to a target, the sensor operator uses the Forward-Looking Infrared Radar (FLIR) and Electro Optical (EO) sensor to classify and identify the target, even in night or low-light conditions. A flight-management system that includes an automatic-pilot and precise Global Positioning System (GPS) navigation equipment allows the pilot to concentrate on the details of the mission while being ensured of pinpoint accuracy of position and the position of the target vessels. Large scanner windows on either side of the cargo compartment provide aerial observers with a bird's eye view of the search areas during visual conditions. The HC-130H supports the following Congressionally-mandated missions:

**MARITIME SAFETY:**

- Search and Rescue (SAR) – The HC-130H has a C4ISR suite that includes a multi-mode surface and air search radar (MMR), EO device, and Infrared (IR) sensor to find and observe a wide range of targets. The aircraft has a line-of-bearing indicator and distress call monitoring on various distress frequencies.

**HC-130H Conversion and Sustainment Projects**

**\$25,000**

It is also equipped with search windows and the crew has night vision devices to further enhance their ability to detect, classify, and identify targets.

- Marine Safety – International Ice Patrol (IIP) – A side-looking radar installed on the aircraft maps the location and movement of ice flows and icebergs. This information is calculated and transmitted to commercial vessels to increase maritime safety during the winter and spring months in the North Atlantic regions.

**MARITIME SECURITY:**

- Undocumented Migrant Interdiction Operations (MIO) – The C4ISR suite, including the same sensors described in the SAR mission, is employed to provide surveillance, detection, classification, and identification in the undocumented MIO mission. With multiple communications, including UHF/VHF and HF, the HC-130H can share important information with other operational units and command centers.

- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that support undocumented MIO are also utilized to support the DRUG mission. With its interoperable communications suite, the HC-130H can direct Coast Guard surface assets to intercept and prosecute suspect vessels.

- Other Law Enforcement (OLE) – All sensors and communications equipment are used for the OLE mission.

**PROTECTION OF NATURAL RESOURCES:**

- Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response – Visual surveillance and the side-looking radar on the HC-130H are employed to monitor and map oil-covered water surfaces. The MMR can detect differences in backscatter between water and oil-covered water due to the dampening effects of oil on small wind-generated waves, while the EO/IR sensor can detect the small temperature variation between clear and oil-covered water.

- MEP – Lightering Zone Enforcement (LZE) – The HC-130H is capable of monitoring lightering zones for oil and other hazardous chemical discharges.

- Living Marine Resources Enforcement (LMR) – The HC-130H employs all sensors (MMR, EO, and IR) to provide surveillance of protected and/or closed offshore areas and ensure the protection of LMR.

**NATIONAL DEFENSE:**

- Defense Readiness – The HC-130H typically plays a limited role in current national defense missions but can provide support through surveillance and transport roles for the following areas:

- Port Operations, Security, and Defense (POSD)
- General Defense Operations (GDO)
- Peacetime Military Engagement (PME)
- Maritime Intercept Operations (MIO)

**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**HC-130J Fleet Introduction**

**\$4,000**

**Project Description, Justification and Scope**

The requested \$4.0M will fund the initial logistics needed to support 4,000 annual program flight hours for the six C130J's that will be operating by FY2011. The Coast Guard has six C-130J aircraft in its inventory, three of which have been converted to the USCG-specific HC-130J Maritime Patrol configuration and the remaining three will be completed in FY 2009 through FY 2010.

The Lockheed C-130J is the Coast Guard's long-range surveillance aircraft. This four-engine, turbo-prop aircraft is used extensively throughout the United States, the Pacific Ocean and the Caribbean Sea in support of search and rescue, homeland security, law enforcement, pollution prevention, logistics and personnel transport.

**CAPABILITY ACQUIRED/MAINTAINED:**

The Coast Guard's C-130J is based on the proven C-130 series aircraft design. The C-130J's new engines, propellers, avionics and cargo handling equipment set this new aircraft apart from its predecessor. The C-130J will assume the traditional duties of the C-130H, which include search and rescue, homeland security, pollution prevention, logistics and personnel transport.

With Allison AE2100 engines and Dowty six-bladed propellers, the C-130J boasts advanced performance over the H model, including a 20 percent increase in speed, a 40 percent increase in range and a 40 percent higher cruising altitude. It can climb higher and faster than the H model, yet takeoff and land on shorter runways.

A completely redesigned cockpit with an integrated digital flight management system allows the C130J to be operated by a two-person flight deck crew as compared to the four to five person crew in the C-130H model. Dual heads up displays provide pilots with essential flight information and increase aircraft safety during low-level maneuvers, including takeoffs and landings in reduced visibility. A high-resolution ground mapping radar, integrated with on-board Global Positioning System (GPS) and inertial navigation system, provides aircrews with precise navigation and situational awareness. An enhanced cargo handling system provides loadmasters the ability to automatically calculate weight and balance data and quickly change cargo compartment configuration to accommodate different payloads.

The C-130J Missionization project configures the aircraft with equipment needed to perform traditional Coast Guard operational missions. The C-130J Missionization Project leverages the technology developed by Integrated Coast Guard Systems for the HC-144A Maritime Patrol Aircraft (MPA). The missionization suite includes a surface search radar, a Forward-Looking Infrared (FLIR)/Electro Optical (EO) sensor, and satellite and emergency response radios; all controlled through a flight-deck mounted operator station.

**PERFORMANCE:**

With its flight management and sensor systems, the C-130J is a very capable maritime patrol aircraft. It is equipped with a powerful surface search radar that can detect surface targets from over 50 miles away. Once closer to the target, the sensor operator will use the FLIR/EO sensor to classify and identify the target, even in night or very low-light conditions. A flight management system that includes an

**HC-130J Fleet Introduction**

**\$4,000**

automatic-pilot and precise GPS navigation equipment allows the pilot to concentrate on the details of the mission, while being ensured of pinpoint accuracy of the aircraft position and the position of the target vessels. The C-130J supports the following strategic goals and mission programs:

**MARITIME SAFETY:**

- Search and Rescue – The C-130J is outfitted with a comprehensive Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) suite that includes a multi-mode surface and air search radar (MMR), Electro-Optical (EO) device, and Infrared (IR) sensor to find and observe a wide range of targets. The aircraft will have a Line of Bearing indicator and Distress Call Monitoring for distress frequencies.

**MARITIME LAW ENFORCEMENT:**

- Illegal Migrant Interdiction Operations (MIO) – The C4ISR suite, including the same sensors described in the Search and Rescue mission, provide surveillance, detection, classification, and identification. With multiple communications, including UHF/VHF and HF, the C-130J will be able to share important information with other operational units and command centers. This information will contribute to a Common Tactical Picture (CTP) and Common Operational Picture (COP) through a networked Command and Control (C2) system that provides for data sharing.

- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that will support undocumented migrant interdictions are also used to support the counter drug mission. Through effective use of the CTP/COP, the C-130J is able to direct Coast Guard surface assets to intercept and prosecute suspect vessels.

- Living Marine Resources (LMR) Enforcement – The C-130J employs all sensors (MMR, EO, and IR) to provide surveillance of protected and/or closed offshore areas and ensure the protection of LMR.

- Other Law Enforcement (OLE) – All sensors and communications equipment are used for the OLE mission. Sharing information and data, through the use of the C2 system and the CTP/COP, results in increased Maritime Domain Awareness.

**MARITIME SAFETY AND ENVIRONMENTAL PROTECTION:**

- Marine Environmental Protection (MEP) – Visual surveillance and the C4ISR suite on the C-130J are employed to monitor and map oil-covered water surfaces. The MMR can detect differences in backscatter between water and oil-covered water due to the dampening effects of oil on small wind-generated waves, while the EO/IR sensor can detect the small temperature variation between clear and oil-covered water. The COP provides the capability to navigate to previously marked pollution areas and update them based on current C4ISR and visual indications.

- Ports, Waterways, and Coastal Security (PWCS) – The C-130J is able to conduct thorough and sustained surveillance of an assigned area of operations, and dispatch appropriate assets to investigate any threat to security. The C-130J participates in maritime interdiction operations, provides outer-harbor security, conducts search and rescue, and other operations in support of PWCS.

**NATIONAL DEFENSE** – The C-130J plays a limited role in current National Defense Missions but can provide support through surveillance and transport roles in the following areas:

**Method of Performance**

An Earned Value Management System (EVMS) is used for the system integrator contract work under each of the various Delivery Task Orders (DTOs). The Dekker Trakker software program that meets ANSI/EIA Standard 748 is being used. Dekker Trakker is the tool that is used by the Systems Integrator to resource load schedules, track progress and record expenses. An additional Earned Value viewing tool also being used is Dekker iPursuit which allows personnel to see monthly Cost Performance Reports. The iPursuit program also allows for extensive insight into the data used to generate the Cost Performance Reports. For example, it can provide a breakdown of cost and schedule variances by Work Breakdown Structure (WBS).

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**National Security Cutter (NSC)**

**\$538,002**

**Project Description, Justification and Scope**

This request funds contract award for NSC #5. The Legend Class NSCs will replace the fleet of 378' High Endurance Cutters (WHEC), which are operating beyond their economic service life and are increasingly more expensive to maintain. The NSC will provide enhanced capability that is essential for prosecuting missions in today's threat environment.

**CAPABILITY ACQUIRED/MAINTAINED:**

The NSC is a critical surface component of the Coast Guard's asset recapitalization that will be capable of an extended on-scene presence, long transits and forward deployment. It will be equipped with communication, navigation and surveillance systems that allow the cutter and its deployed air and boat assets to operate worldwide within the range of its performance parameters, and conduct a daily search of potentially 56,000 square miles of ocean in support of all Congressionally-mandated missions.

The NSC is the largest of the new surface assets (418' length overall) with vastly improved capabilities over the legacy 378' High Endurance Cutter, and will be the most sophisticated and capable cutter the Coast Guard has ever operated. It will have a range of approximately 12,000 nautical miles (NM) and an underway endurance of 60 days. The cutter will be capable of patrolling alone or with multiple U.S. Coast Guard vessels, U.S. Navy vessels, or vessels from other nations' navies or coast guards.

The NSC will conduct patrols on the high seas and coastal approaches employing a robust command and control capability for the task unit commander or on-scene commander. The cutter will be capable of performing all maritime DHS missions, defense operations with the U.S. Navy, such as Ports, Waterways and Coastal Security, as well as maritime intercept operations, port operations, security and defense operations, and peacetime military engagements. When engaged in these missions, the NSC will be capable of detecting, classifying, and tracking surface Targets of Interest (TOI) in sizes ranging from makeshift rafts to large commercial vessels, and air TOIs as small as single-engine civil aircraft.

The NSC's capabilities include the ability to:

- Provide anti-terrorism/force protection;
- Carry and deploy multiple airframes;
- Carry and deploy multiple Short Range Prosecutor (SRP) and Long Range Interceptor (LRI) cutter boats;
- Conduct boat and flight operations in higher sea states due to improved sea-keeping capability;
- Support the full range of Coast Guard missions and intelligence element operations through greatly improved intelligence gathering and C4ISR capabilities, including use of a Sensitive Compartmented Information Facility (SCIF), all of which enhance the NSC's self-defense capabilities and facilitate operations with networked DHS, DoD, and national assets;
- Maintain presence and perform limited command and control operations in contaminated environments for up to 36 hours;
- Operate with U.S. Navy battle groups with a maximum sustained speed of 28 knots.

**National Security Cutter (NSC)**

**\$538,002**

**PERFORMANCE:**

The NSC is a major contributor to overall Coast Guard performance, particularly when operating at the hub of a cutter/small boat/aircraft force package. NSC intelligence collection, analysis and dissemination, and C4ISR capabilities improve system responsiveness and help to prevent security incidents from developing. NSCs will serve as the hub of multi-unit, multi-mission operations and will be essential to achieving mission success in the following Congressionally-mandated missions:

**MARITIME SAFETY:**

- Search and Rescue (SAR) – The NSC will permit the search for and location of mariners in distress, enabling their recovery from positions of peril; provision of medical advice, assistance, or evacuation; and when necessary, provide them safe transport to shore-side locations. The NSC will also be able to support recovery or control of damage to distressed vessels and other property by controlling or terminating flooding, fighting fires, dewatering, providing mechanical assistance, and towing stricken vessels. The NSC will have stern ramps and a side davit to rapidly launch and retrieve small boats. The NSC will have a Rescue Access Station to embark and load a non-stern ramp capable boat, to deploy a rescue swimmer, and to pick survivors from the water. With a sustained presence, the NSC can also serve as a platform for an on-scene commander guiding and assisting rotary wing assets.

**MARITIME LAW ENFORCEMENT:**

- Undocumented Migrant Interdiction Operations – The NSC C4ISR suite will be employed to provide surveillance, detection, classification, and identification in the undocumented migrant interdiction mission. Through sustained on-scene presence, the NSC will also have the capability of prosecuting TOI, including interdiction, embarkation, and disembarkation, as well as allowing for rescue of a large number of people when an unseaworthy or overloaded craft sinks or capsizes. These rescue situations require the ability to retain persons onboard (sheltering, feeding, and providing basic sanitation and medical services; as well as administrative processing and ensuring security for all concerned).

- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that will support undocumented migrant interdiction operations will also be used for the DRUG mission. Through effective use of the Common Operating Picture (COP), Multi-mission Cutter Helicopter (MCH) aircraft, and the Long Range Interceptor (LRI)/small boats, the NSC will be able to intercept and prosecute suspect vessels.

- Other Law Enforcement (OLE) – The NSC will conduct proactive patrols as well as reactive response to intelligence information, using all sensors and communications equipment to fulfill this mission. Sharing information and data through the use of the Command and Control (C2) system and the COP will result in increased maritime domain awareness. The NSC will have both active and passive sensors to detect and track vessels or aircraft engaged in, or suspected of, illegal activities. It will identify, classify and sort TOIs. After interdicting suspicious vessels, it will enable at-sea boardings and performance of custodial functions associated with seizing vessels or making at-sea arrests.

- Foreign Vessel Inspection – The NSC will conduct surveillance of all operating areas. The installed Automatic Identification System (AIS) will permit rapid identification of foreign vessels, allowing the NSC to inspect foreign vessels at sea for compliance with applicable marine safety requirements and regulators.

**National Security Cutter (NSC)**

**\$538,002**

**PROTECTION OF NATURAL RESOURCES:**

- Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response – The NSC will be able to detect maritime pollution in the U.S. Exclusive Economic Zone (EEZ), based on verification of the type of material in the water, evidence gathering, and documentation. It will allow response to 29 CFR 1910.120 Hazardous Material accidents. Additionally, the NSC will conduct surveillance operations to detect significant discharges of oil or hazardous substances for subsequent monitoring, mitigation, and removal actions. The COP will provide the capability to navigate to previously marked pollution areas and update them based on current C4ISR and visual indications.
- Lightering Zone Enforcement (LZE) – The NSC will survey maritime petroleum cargo lightering zones and lightering operations, enabling the conduct of boardings to enforce applicable lightering regulations.
- Living Marine Resources Enforcement (LMR) – The NSC will aid enforcement of laws and treaties pertaining to LMR, including fisheries and marine mammal protection. The cutter will be able to provide sustained presence throughout the U.S. EEZ and along its boundary, as well as in international maritime areas of interest to the U.S. It will allow for at-sea boardings and inspections to deter illegal or unauthorized LMR activity to document violations and, if directed, arrest and seize vessels engaged in LMR violations. The NSC will also be equipped with AIS to monitor surface vessels that will provide a ship's name, position, course, and speed, and facilitate the job of vessel identification.

**NATIONAL DEFENSE:**

- Defense Readiness – The NSC's defense and security-related capabilities and long range and endurance makes it particularly well-suited for deployments overseas and in regions where it can disrupt security incidents well before they threaten U.S. coastlines.
  - Port Operations, Security, and Defense (POSD) – The NSC will enable the conduct of thorough and sustained surveillance of an assigned area of operations, allowing dispatch of appropriate assets to investigate any threat to security. The NSC will engage in maritime interdiction operations, provide outer-harbor security, escort high-value assets, and conduct SAR and other operations in support of the POSD mission. The primary objective is to ensure that port and harbor areas are maintained free of threats and to support re-supply of other deployed forces. The protection of logistics in support of contingency operations is one of the NSC's highest priorities.
  - General Defense Operations (GDO) – The NSC will integrate with the DoD over the full range of maritime operations including surveillance, visit, board, search, seize and unit defense. It will be capable of operating worldwide with sustained presence resulting from its capability for underway replenishment, including Aircraft Vertical Replenishment. The cutter will provide hard-kill of subsonic anti-ship cruise missiles with Close-in-Weapon-Systems, and soft-kill capability, reduced radar cross-section, reduced infrared signature, and electronic sensor capability. The NSC will employ the 57 mm gun weapons system with optical and infrared fire control to achieve mission kill on high-speed patrol craft beyond intermediate caliber effective range. The NSC will be able to provide berthing and logistics support for additional personnel deployed for defense operations. The NSC will also have the ability to maintain station for an aircraft carrier conducting flight operations and to take station on, maneuver around, and escort commercial shipping steaming at

U. S. Coast Guard - FY 2011 Congressional Justification

**National Security Cutter (NSC)**

**\$538,002**

operational speed. The cutter will have the ability to launch, recover and fuel U.S. Navy and NATO Vertical Take-Off and Landing (VTOL) aircraft, including armed helicopters.

- Peacetime Military Engagement (PME) – The NSC will be able to maintain forward presence, render humanitarian assistance, conduct professional exchanges, and participate in combined operations, training, exercises and other military or diplomatic activities. The PME mission may involve long transits and extended operations with deployments of two to four months, for which the NSC will be well-suited.
- Maritime Intercept Operations (MIO) – The NSC will conduct thorough and sustained surveillance of an assigned area of responsibility and detect and intercept all shipping, operating either independently or integrated with DoD and other agency assets. Additionally, the cutter will be able to dispatch trained boarding or inspection teams, providing for their logistics, support, transportation and protection.
- Environmental Defense Operations (EDO) – The NSC will be able to detect potential threats to the physical environment and investigate those threats. The cutter will conduct operations to mitigate known environmental harm and intercept persons suspected of causing such harm, including mitigation of environmental exploitation designed to disrupt defense operations.

**COST ESTIMATE OF WORK TO BE FUNDED IN FISCAL YEAR 2011:**

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Offshore Patrol Cutter (OPC)**

**\$45,000**

**Project Description, Justification and Scope**

This request supports continued initial acquisition work for the Offshore Patrol Cutter (OPC) to replace the Coast Guard's in-service Medium Endurance Cutter (WMEC) fleet. Funding will permit pre-acquisition activity, to include: awarding Preliminary Contract Designs (PCD) and conducting evaluations, completing request for proposals, commencing proposal evaluations, and completing various trade-off, requirements validation, life-cycle cost, facilities, and training studies. The concept/preliminary designs will be solicited from industry, allowing the Coast Guard to reach DHS Acquisition Decision Event (ADE)-2A (Analyze/Select Phase) during early FY 2011 to support ship production as soon as possible thereafter.

The OPC will be procured using guidance from the Coast Guard's Major Systems Acquisition Manual. Under this process, the OPC reached DHS ADE-0 (Project Authorization Phase) in January 2008 and has entered the Need Phase. Appropriations through FY2010 are being used to fund the following activities: preparation of the Concept of Operations (CONOPS), Operational Requirements Document (ORD), Project Management Plan (PMP), Acquisition Plan (AP), Integrated Logistics System (ILS) Plan, Technology Plan, requirements validation, and initiation of an Alternatives Analysis. This work will define and validate required OPC capabilities, ascertain if they are achievable, and begin to examine alternative solutions for the OPC design. A recommended method of acquisition will also be developed, followed by a clear and rigorous plan to manage the project.

**CAPABILITY ACQUIRED/MAINTAINED:**

The OPC is the second largest cutter the Coast Guard will acquire to recapitalize its surface fleet and will conduct Coast Guard missions on the high seas and coastal approaches. The OPC will eventually replace and enhance the current capability of the Coast Guard Medium Endurance Cutter (WMEC) fleet. The OPC will provide a robust command and control capability for duties as Commander Task Unit (CTU) and On-Scene Commander (OSC), through a Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) suite, while also meeting homeland security mission requirements in place since 9/11. Capabilities and improvements may include:

- Enhanced sea-keeping to permit flight and small boat operations in higher sea states than currently possible with the existing MECs
- Flight support for multiple airframes and accommodations for all variants of DHS and DoD HH-60 helicopters to provide enhanced interoperability with interagency and inter-service counter-terrorism teams
- Advanced communications to facilitate interoperability with DHS, State and local responders as well as DoD and international partners
- Over-the-Horizon (OTH) cutter boat deployment to expand the cutter's ability to carry-out law enforcement boardings and migrant and drug interdictions on the high seas
- Intelligence collection and information sharing equipment
- Full integration with the National Distress Response System modernization program, known as Rescue 21, to provide port commanders with both real-time tracking of the OPC and seamless Common Operational Picture (COP)-Maritime Domain Awareness (MDA) data-sharing, including the Automatic Identification System (AIS).

**Offshore Patrol Cutter (OPC)**

**\$45,000**

- Integrated weapons, including a medium caliber deck gun, and command and control suites to enhance law enforcement and homeland security missions.

**PERFORMANCE:**

The OPC will be a major contributor to overall Coast Guard performance, particularly when operating as the nucleus of a cutter/small boat/aircraft force package. Intelligence collection, analysis and dissemination, and C4ISR capabilities will improve system responsiveness and help to prevent and mitigate security threats. As a multi-mission platform, the OPC will be able to perform all required missions, capable of steaming long transit distances and maintaining an extended on-scene presence, due to an integrated logistics system. These characteristics are well-suited for maritime homeland security roles as well as for performing the full spectrum of law enforcement missions (living marine resources, drug interdiction, and migrant interdiction) and search and rescue operations.

The use of well-equipped aircraft and small boats coupled with increased cutter speed will allow greater capacity for intercept and prosecuting more Targets of Interest (TOI). The OPC's operational capabilities, long range, and endurance make them particularly suited for deployments to remote regions and approaches to the U.S. coastlines, such as the eastern Pacific, Gulf of Alaska, Caribbean Sea and North Atlantic, where they can prevent security incidents and perform Coast Guard missions.

**MARITIME SAFETY:**

- Search and Rescue (SAR) – The OPC will be able to search for and locate distressed mariners and recover them from positions of peril, provide medical advice, assistance, or evacuation, and when necessary, provide subjects safe transport to shore side locations. The OPC will also be able to support recovery or control of damage to distressed vessels and other property by controlling or terminating flooding, fighting fires, dewatering, providing mechanical assistance, and towing stricken vessels. The OPC will have a stern ramp to rapidly launch and retrieve small boats. With a sustained presence, the OPC can also serve as an OSC platform, guiding and assisting rotary wing assets.

**MARITIME SECURITY:**

- Undocumented Migrant Interdiction (MIO) – The OPC C4ISR suite will be employed to provide surveillance, detection, classification, and identification in the undocumented MIO mission. Through a sustained on-scene presence, the OPC will also have the capability of prosecuting TOI, including interdiction, embarkation, and disembarkation, and rescuing a large number of people when an unseaworthy or overloaded craft sinks or capsizes. These rescue situations require administrative processing and the ability to retain persons onboard (sheltering, feeding, and to provide basic sanitation and medical services, as well as security for all concerned).

- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that will support undocumented MIO will also be used for the DRUG mission. Through effective use of the COP, MCH aircraft, and the LRI/small boats, the OPC will be able to intercept and prosecute suspect vessels.

- Other Law Enforcement (OLE) – The OPC will conduct proactive patrols and respond to intelligence information, using all sensors and communications equipment to fulfill this mission. Sharing information and data through the use of the C2 system and the COP will result in increased MDA. The OPC will have both active and passive sensors to detect and track vessels or aircraft engaged in, or

**Offshore Patrol Cutter (OPC)**

**\$45,000**

suspected of, illegal activities. It will identify, classify and sort TOIs. After interdicting suspicious vessels, it will permit at-sea boardings and ease performance of custodial functions associated with seizing vessels or making at-sea arrests.

**PROTECTION OF NATURAL RESOURCES:**

• Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response – The OPC will be able to detect maritime pollution in the U.S. Exclusive Economic Zone (EEZ), based on verification of the type of material in the water, evidence gathering, and documentation. It will enable response to 29 CFR 1910.120 Hazardous Material accidents. Additionally, the OPC will conduct surveillance operations to detect significant discharges of oil or hazardous substances for subsequent monitoring, mitigation, and removal actions. The COP will provide the capability to navigate to previously-marked pollution areas and update them based on current C4ISR and visual indications.

• MEP – Lightering Zone Enforcement (LZE) – The OPC sensors will survey maritime petroleum cargo lightering zones and lightering operations, enabling boardings to enforce applicable lightering regulations.

• Living Marine Resources Enforcement (LMR) – The OPC will enable enforcement of laws and treaties pertaining to LMR, including fisheries and marine mammal protection. The cutter will be able to provide sustained presence throughout the U.S. EEZ and along its boundary, as well as in international areas of interest to the U.S. Through at-sea boardings and inspections OPC crews will deter illegal or unauthorized LMR activity, document violations, and provide the capability to arrest and seize vessels engaged in LMR violations. The OPC will also be equipped with AIS to monitor surface vessels. The information will provide a ship’s name, position, course and speed, and will make the job of vessel identification easier.

**NATIONAL DEFENSE:**

• Defense Readiness – The OPC is anticipated to play a significant role in current national defense missions including:

- Port Operations, Security, and Defense (POSD)
- General Defense Operations (GDO)
- Peacetime Military Engagement (PME)
- Maritime Intercept Operations (MIO)
- Environmental Defense Operations (EDO)

**COST ESTIMATE OF WORK TO BE FUNDED IN FISCAL YEAR 2011:**

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Fast Response Cutter (FRC)**

**\$240,000**

**Project Description, Justification and Scope**

This request funds option period 3, production of FRC hulls #9 - #12, associated contract line items, insurance spares and project management costs. Continued acquisition of the Sentinel Class Patrol Boat is imperative to replacing the aging 110-foot patrol boat fleet and filling the critical patrol boat mission hour gap. The acquisition strategy is structured with annual options for procurement of four or six cutters. The schedule provides for the lead cutter delivery in FY 2011.

**CAPABILITY ACQUIRED/MAINTAINED:**

Patrol boats are a critical Coast Guard response and prosecution asset for all mission areas, and are an integral component to our suite of capabilities. The FRC will provide valuable new capabilities not found on the legacy 110' WPB, including an enhanced command, control, communications, intelligence, surveillance and reconnaissance (C4ISR) suite, and an improved quality of life. The FRC will also have enhanced maritime security capabilities that will support homeland security and homeland defense missions. The FRC will be capable of reaching speeds of approximately 28 knots, providing enhanced response and reaction capability. The FRC will also have critical DHS and DOD communications interoperability improvements, including Military Satellite Communications (MILSATCOM), and local first responder-interoperable radio communications. Where increased weapons capability and deterrence are required, the main gun of the FRC will be used to enhance mission execution.

**PERFORMANCE:**

The FRC sustains a critical part of Coast Guard missions and will be a maritime security workhorse, patrolling in both coastal and high seas areas. Improved interoperability, C4ISR, common operating picture (COP), and sensors enhance surveillance and identification performance over existing capabilities of the legacy 110' patrol boat. With its high readiness, speed, adaptability, and endurance, the FRC will respond quickly and effectively to emerging security and safety issues, essential to achieving mission success in the following Congressionally-mandated missions:

**MARITIME SAFETY:**

- Search and Rescue (SAR) – The FRC will provide the ability to search for and locate distressed mariners and recover them from positions of peril, provide medical assistance or evacuation, and provide safe transport. The FRC will provide the ability to control damage to distressed vessels and other property, provide dewatering equipment and mechanical assistance, and tow stricken vessels. The FRC will allow commanders to integrate, coordinate and assist a large number of SAR assets during surge events during weather anomalies (such as hurricanes or gale-force winds), ocean liner rescue operations, and downed airline rescue operations.

**MARITIME SECURITY:**

- Undocumented Migrant Interdiction (MIO) – The FRC will provide the ability to conduct shipboard migrant interdiction evolutions, including detection, tracking, interdiction, embarkation and disembarkation, rescue administrative processing, and retention onboard. Targets include slow-moving rafts, small sailing vessels, small sport fishing vessels, high-speed, “go fast” type vessels, and small motor freighters attempting to make the voyage to the United States, Puerto Rico, or other U.S. territories. The FRC will be capable of patrolling areas where suspected illegal migration may occur,

**Fast Response Cutter (FRC)**

**\$240,000**

dispatching boarding teams to suspect vessels and subsequently escorting them to their final disposition. When conducting interdiction operations, both proactive and reactive, the FRC will be capable of a sustained presence and have the capability to rescue and shelter a large number of people in the event that the typical unseaworthy or overloaded craft sinks or capsizes during the attempted voyage. The FRC will be capable of embarking a large number of migrants for at least one day, providing physical security, food, water, sanitation, basic medical services, shelter (separate from the ship's crew), and enable administrative processing.

- **Illegal Drug Interdiction (DRUG)** – The FRC will have the capability to conduct illegal drug interdiction, including surveillance, visible deterrence in areas where the possibility of contraband smuggling exists, response to intelligence information and known incidents of drug smuggling, and the ability to dispatch a boarding team. The cutter will be able to intercept and take possession of contraband and the smuggling vessel, allowing the crew to arrest, detain, and transport suspects for further transfer ashore. The FRC will possess the capability for integration and interoperability in communications, speed, sensors, and endurance with DOD and other government agencies. The cutter will have an approximate 28 knot speed capability for rapid interdiction of suspected targets of interest, and be equipped with a deck-mounted gun and small arms.

- **Other Law Enforcement (OLE)** – The FRC will provide enforcement of laws additional to those inherent in the primary mission areas of migrant interdiction, illegal drug interdiction, environmental defense, lightering zone enforcement, living marine resources enforcement and maritime pollution enforcement. This capability will include proactive patrols as well as reactive response to intelligence information. The sensors will be effective both day and night, and in all weather and sea conditions. The FRC will provide the capability to conduct at-sea boardings and, if necessary, taking possession of a suspect vessel and escorting or towing it to port. The cutter will have an integrated architecture of surveillance sensors, operational databases, decision support systems, and communication equipment to collect, process, and disseminate operational information to other Coast Guard units, as well as other agencies in a timely manner.

- **Protecting the U.S. Exclusive Economic Zone (EEZ) from foreign encroachment** – The FRC will have the capability of conducting surveillance of foreign vessels in operating areas and the ability to conduct at-sea boardings.

**PROTECTION OF NATURAL RESOURCES:**

- **Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response** – The FRC will be capable of conducting surveillance and inspection operations to detect significant discharges of oil, hazardous substances, debris, and ballast water for subsequent monitoring, mitigation, and removal actions in the U.S. EEZ. These operations involve verification of type of material in the water, evidence gathering and documentation, and are limited to visual determination of the type of pollutant, thickness, and extent, day or night and in moderate weather conditions.

- **Lightering Zone Enforcement (LZE)** – The FRC will have the capability to survey lightering zones and lightering operations and conduct boardings as necessary.

- **Living Marine Resources (LMR)** – The FRC will enable enforcement of laws and treaties pertaining to LMR, including fisheries and marine mammal protection. The FRC will have the capability of a

U. S. Coast Guard - FY 2011 Congressional Justification

**Fast Response Cutter (FRC)**

**\$240,000**

sustained presence within the U.S. EEZ, enabling at-sea boardings and inspections to deter illegal or unauthorized activity by documenting violations. The FRC may take possession of a suspect vessel and then escort or tow it to port, allowing the crew to arrest, detain, and transport suspects for further transfer ashore.

**NATIONAL DEFENSE:**

• Defense Readiness – The FRC will be designed to provide support to the DOD in a variety of roles and missions. The FRC will have the capability to integrate with the DOD in the full range of maritime operations, including surveillance, visit, board, search, seize, and unit defense. The FRC will conduct national defense maritime operations worldwide in low threat environments.

FRC support for national defense missions will be provided through the following six mission areas:

- Ports, Waterways and Coastal Security (PWCS)
- General Defense Operations (GDO)
- Maritime Interception Operations (MIO)
- Coastal Sea Control Operations (CSCO)
- Military Environmental Response Operations (MERO)
- Theatre Security Cooperation (TSC)

Representative activities that the FRC will be able to conduct in support of national defense include:

- Limited military sealift and commercial shipping escort
- Limited combat search and rescue
- Surveillance and interdiction
- Visit, board, search and seizure
- Force protection of military shipping at U.S. seaports of embarkation and overseas ports of debarkation
- Domestic port security and coastal defense, providing part of the overall capability for the defense of the U.S. homeland
- Other duties as may be assigned; e.g., coastal/riverine interdiction, Special Operations Forces (SOF) insertion/support.

**COST ESTIMATE OF WORK TO BE FUNDED IN FISCAL YEAR 2011:**

This project is being completed in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Cutter Small Boats**

**\$3,000**

**Project Description, Justification and Scope**

This request continues to fund the production of the small boats that will be fielded on the surface assets being acquired through Coast Guard recapitalization. Funding will acquire one Long Range Interceptor (LRI #4) and one Short Range Prosecutor (SRP #11).

**CAPABILITY ACQUIRED/MAINTAINED:**

The LRI is a 36-foot cutter small boat carried by each National Security Cutter (NSC) and Offshore Patrol Cutter (OPC). The LRI provides enhanced capabilities, compared to the legacy cutter boats, such as higher speeds, extended range, better sea-keeping, and greatly improved communications and connectivity to the parent cutter. The LRI can operate beyond sight of the cutter (over the horizon) to deploy boarding parties, pursue and interdict targets of interest, and perform Search and Rescue operations.

The SRP is a 25-foot cutter small boat that also provides enhanced capabilities compared to legacy cutter small boats. The SRP will be carried by the NSC, the OPC, and potentially the Fast Response Cutter (FRC) surface platforms.

**PERFORMANCE:**

Assigned small boats allow a cutter to conduct search and rescue operations, such as removing migrants from an overloaded boat, and law enforcement operations, such as placing a boarding team on a high interest vessel. The LRI provides significantly improved performance over existing cutter small boats based on increased speed, increased passenger (boarding team) carrying capacity, communications, endurance and range. By operating beyond the line of sight of the cutter, the LRI acts as a significant force multiplier, enabling improved identification and prosecution of targets of interest.

**COST ESTIMATE OF WORK TO BE FUNDED IN FISCAL YEAR 2011:**

**Method of Performance**

An Earned Value Management System (EVMS) is used for the system integrator contract work under each of the various Delivery Task Orders (DTOs). The Dekker Trakker software program that meets ANSI/EIA Standard 748 is being used. Dekker Trakker is the tool that is used by the Systems Integrator to resource load schedules, track progress and record expenses. An additional Earned Value viewing tool also being used is Dekker iPursuit which allows personnel to see monthly Cost Performance Reports. The iPursuit program also allows for extensive insight into the data that was used to generate the Cost Performance Reports. For example, it can provide a breakdown of cost and schedule variances by Work Breakdown Structure (WBS). An Earned Value Management System (EVMS) is used for the system integrator contract work under each of the various Delivery Task Orders (DTOs). The Dekker Trakker software program that meets ANSI/EIA Standard 748 is being used. Dekker Trakker is the tool that is used by the Systems Integrator to resource load schedules, track progress and record expenses. An additional Earned Value viewing tool also being used is Dekker iPursuit which allows personnel to see monthly Cost Performance Reports. The iPursuit program also allows for extensive insight into the

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Medium Endurance Cutter Sustainment**

**\$30,000**

**Project Description, Justification and Scope**

This request funds Long Lead Time Material (LLTM) and the Mission Effectiveness Project (MEP) on the 270-foot Medium Endurance Cutter (WMEC) class. Funding will complete MEP work on three 270' cutters. The project includes replacing major sub-systems, such as small boat davits, oily water separators, air conditioning and refrigeration plants, and evaporators. The main propulsion control and monitoring systems will also be upgraded. This work will be performed by the Coast Guard's skilled workforce at the Coast Guard Yard, Curtis Bay, MD. LLTM for 270' WMECs will be procured to ensure subsequent MEP availabilities maintain schedule.

The 270' WMEC cutter class MEP was originally developed as a two-phase project totaling approximately \$14M per cutter (estimated at \$6.5-7.5M per phase). To expedite the project and improve cutter operational availability, the 270' WMEC cutters will have either two-six month availabilities (one six-month dry dock phase followed later by a six-month dockside phase), or one 11-month availability combining both phases. Seven cutters will complete one 11-month availability and six cutters, having already completed phase one, will complete the final 6-month dockside availability.

At project inception, work on 210' and 270' WMECs was planned to be conducted concurrently, however, to maximize the operational capability and safety of the 210s, the decision was made to modify the original schedule by halting the induction of 270s to complete MEPs on the remainder of the 210s. The last 210' will enter the yard for MEP in FY2010, leaving work on the 270s as the primary focus in FY2011.

**CAPABILITY ACQUIRED/MAINTAINED:**

This funding will improve the overall mission effectiveness of the 270' and 210' WMEC cutter classes until they are replaced by applicable assets through Coast Guard recapitalization. Since these cutter classes are not being replaced one for one, they must be retained in operational service until replacement assets become available for missions. Each 270' and 210' WMEC provides 185 days of mission performance; a loss of that capability puts achievement of long-term DHS performance goals at risk. Additionally, the WMEC Mission Effectiveness Project will improve the cutter's operating and cost performance by replacing equipment that has the highest failure rate with more reliable equipment.

**PERFORMANCE:**

**Mission Level Performance:** With the capabilities previously described, the 270' and 210' WMECs will be used to achieve success in the following Congressionally-mandated mission areas:

**Medium Endurance Cutter Sustainment**

**\$30,000**

- Search & Rescue
- Defense Readiness
- Ports, Waterways and Coastal Security
- Illegal Drug Interdiction
- Undocumented Migrants
- Living Marine Resources

System Level Total Ownership Cost: Replacing obsolete equipment will result in greater standardization, capability, and reliability across the two cutter classes. Each cutter will complete the program with new equipment and improved logistical support that will allow for the continued operation of the current WMEC fleet in a more economical manner until their replacements are delivered.

**COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2011:**

ITEM	QUANTITY	TOTAL (\$K)
270' WMEC Mission Effectiveness Project	3 <sup>1</sup>	\$25,500
270' MEP Long Lead Time Material (LLTM)	Lot	\$4,500
	Total	\$30,000

**FUNDING HISTORY:**

**CONTRACTOR:**

Coast Guard Yard, Curtis Bay, MD  
 Type of Contract: Government Work Order

**KEY EVENTS:**

FY

---

<sup>1</sup> Quantity for the 270s was originally defined in phases (each cutter was to undergo two phases). Those cutters that have not undergone any work via MEP are now scheduled for one 11-month availability, vice two separate work phases. This number reflects the remainder of an 11-month availability, plus two complete 11-month availabilities (previously four separate phases), for a total of three 270-foot cutters undergoing MEP.

<sup>2</sup> Not included in the IDS Acquisition Program Baseline; tracked for historical purposes only.

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Government Program Management** **\$45,000**

---

**Project Description, Justification and Scope**

This request provides funding for government program management and oversight. Program management funds provide support for government administration, technical reviews, technology analysis, performance monitoring of the Program, Operational Test and Evaluation, Transition Management and Risk Management. This activity, originally established under the Integrated Deepwater System (IDS) construct, provides support to all Coast Guard Deepwater projects and has become increasingly more critical since the Coast Guard assumed the role of lead system integrator from IDS.

**CAPABILITY ACQUIRED/MAINTAINED:**

The Coast Guard is responsible for ensuring the products delivered by contractors and suppliers meet performance specifications. This requires sound management policies and the processes needed to implement them. Specifically, program management funds provide the Coast Guard with the capability to protect the government's interests during the acquisition and ensure contractors and suppliers deliver required products and services meeting prescribed terms and conditions. The Coast Guard accomplishes this management and oversight through staff located at the Program Management Office and at other contractor/government sites. Personnel working on the CG-9 Acquisition Directorate projects include a mix of military, civilian, and support contractors experienced in all phases of large, complex acquisition programs.

Technology is constantly changing and several technology refreshes or upgrades are planned over the projected life cycle of the Coast Guard Acquisition Projects. Government program management personnel analyze the capability and applicability of these replacement technologies. Support contractors assist this effort and gather and assemble data into the government-designated format to aid informed government decision-making.

Government program management funding also supports performance monitoring of all contracts. This is accomplished through the use of a variety of tools such as the Earned Value Management System (EVMS), periodic reports to DHS and Congress, and use of the Acquisition Performance Management System (APMS). EVMS permits the Coast Guard to closely follow cost and schedule performance of the projects by asset, while the reports and APMS data allow for periodic internal and external reviews of program cost, schedule, and performance criteria.

APMS provides web-based reporting of program performance in all aspects on a near real-time basis, depending upon the particular metric used. In addition, risk management provides the Coast Guard the opportunity to forecast future performance of various assets and the operational performance of the Acquisition Directorate projects from a "what if" perspective. This important analysis is aided by the development of various scenarios by experienced government employees and support contractors based on multiple past acquisition programs as well as operational experience and forecasts.

Government program management funding also supports the Operational Tests and Evaluation (OT&E) done with the U.S. Navy's Commander Operational Test and Evaluation Forces (COMPOPTEVFOR) for the execution of project operational testing. While Developmental Test and Evaluation (DT&E) is

U. S. Coast Guard - FY 2011 Congressional Justification

**Government Program Management**

**\$45,000**

the responsibility of the contractor, OT&E is an inherently governmental responsibility. The U.S. Navy's testing organization, COMOPTEVFOR, serves as the technical advisor to Coast Guard and is responsible for overseeing and contributing to the conduct of tests for the early involvement, review, and assessment of system and asset operational performance. Modeling is one of the methodologies used to monitor system-level performance. Government program management funding is used to fund designated modeling activities. Modeling is also used as a means to assess different alternatives as well as to assess the impact on system-level performance to determine the best mix of asset capability to meet mission objectives.

Government program management funding supports the transition of the assets to the Coast Guard. The government staff serves a liaison during the transition period between the prime contractor's delivery of an asset when it is ready for operational testing up through the time the asset is transferred to the operational user and the Coast Guard support community.

New initiatives have been implemented to improve the investment/acquisition metrics and ensure appropriate internal controls are in place while complying with increasingly complex financial management controls and processes. As an example, all CG-9 program/project managers have developed annual project performance plans detailing key events and success criteria for assessing risk and performance against approved documents and plans. The analysis of these plans are funded by the government program management request.

This request also funds administrative, travel and training costs directly associated with government personnel working on the acquisition projects in the CG-9 Acquisition Directorate.

**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Systems Engineering and Integration** **\$29,000**

---

**Project Description, Justification and Scope**

This request funds system engineering design and integration work across all of the Coast Guard's recapitalization projects. This request impacts every aspect of the Coast Guard enterprise—encompassing the integration of human capital management; information technology; capital investment planning for air and surface platforms; logistics; command, control, computers, intelligence, surveillance, and reconnaissance and most importantly the fleet operator. Systems Engineering and Integration (SE&I) includes the following activities:

- Systems Engineering
  - o System architecture development
  - o Operational performance analysis
  - o Cost reduction efforts
  - o Enterprise level requirements management
- Enterprise level system integration
- Interface management
- Configuration management
- Technical data management
- Technical assessment
- Decision analysis

**CAPABILITY ACQUIRED/MAINTAINED:**

Systems Engineering and Integration (SE&I) is essential for interoperability at the unit, system and organizational levels, both internal and external to the Coast Guard. Effective systems integration ensures systems can operate together while minimizing the cost of asset acquisition, operations and maintenance, and the risk inherent in a complex acquisition program. Additionally, SE&I maximizes the ability of assets to interoperate with each other and with those of other agencies (i.e., DHS, DoD, other government agencies, and state and local responders).

The Coast Guard is fielding an integrated system of aviation, cutter, and shore assets that are interoperable through a comprehensive C4ISR detection and communications structure. Without SE&I these assets and sub-systems would be implemented in an inefficient and ineffective manner. One example demonstrating the need for SE&I involves the delivery of upgraded capabilities to in-service cutters, including a Classified Local Area Network (CLAN), upgraded satellite communications, Automatic Identification System (AIS), and law enforcement radios, providing significantly increased capabilities and Maritime Domain Awareness to in-service cutters. SE&I properly applied to these upgrades emphasizes a system-wide view of the project, resulting in recognition of corresponding upgrades to be accomplished at shore-side command centers. This approach to integration ensures the cutters can send and receive important operational information, further improving Maritime Domain Awareness and Operational Performance. Failure to utilize SE&I could have potentially resulted in upgrading the cutters alone, marginalizing the benefits of the C4ISR upgrades.

System engineering evaluations will be performed across system, subsystem, and component levels to analyze products and capabilities for interoperability, integration, modularity, and system commonality.

U. S. Coast Guard - FY 2011 Congressional Justification

**Systems Engineering and Integration** **\$29,000**

These efforts culminate in the ability to determine and document predicted total system performance for numerous configurations and scenarios. Systems engineering has the responsibility for the overall technical configuration development process.

**PERFORMANCE:**

SE&I is essential to improving operational performance of all Coast Guard assets and directly supports mission success in all Congressionally-mandated missions. SE&I also provides identification of possible cost reduction approaches.

**COST ESTIMATE OF WORK TO BE FUNDED IN FISCAL YEAR 2011:**

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**C4ISR**

**\$30,500**

**Project Description, Justification and Scope**

This request funds design and development of C4ISR (Command, Control, Computers, Communications, Intelligence, Surveillance, and Reconnaissance) integrated hardware and software systems on a multiple asset basis, e.g., NSC (National Security Cutter), FRC (Fast Response Cutter), MPA (Maritime Patrol Aircraft), and MSP (Mission System Pallet).

C4ISR is the eyes, ears and cognitive recognition system allowing the Coast Guard to see, hear, comprehend and communicate what is happening in America's maritime regions. This is accomplished using modern electronic components, such as interoperable radio and satellite communication systems and improved optical/radar sensors, that can improve sightings in total darkness and detect maritime targets in all weather conditions. In addition, it uses an interoperable network to bring all operational and intelligence data together, transforming the data into a Common Operating Picture (COP).

This request funds the following in support of C4ISR hardware and software design for the NSCs, FRCs, MPAs, and MSPs:

- *Initial development* of hardware and software command and control upgrades for in-service cutters.
- *Labs*, which are necessary for the Coast Guard to continue development of Segment 2 already on contract, assume the Systems Integrator (SI) role and provide proper oversight and integration. They also reduce lifecycle costs by controlling configuration management, decrease impacts to users by reducing or eliminating tests on operational platforms, and reduce schedule by providing a dedicated platform. Labs include: (1) development labs; (2) acceptance and test labs and (3) support labs for both air and surface assets.
- *Execution Support*. As the Coast Guard continues to increase oversight and manage systems integration with multiple vendors, execution support is needed to continue to assist government personnel in overseeing software development, synthesizing requirements, and other program management and systems engineering functions.
- *Information Assurance*, including TEMPEST (i.e. electronic emission certification) and conformance with the DoD Information Assurance Certification and Accreditation Process (DIACAP). Due to emerging threats and global increase in information warfare threats, information assurance is critical for new and continued connection to both the DoD and DHS networks.
- *Engineering Change Proposals/Updates*. These efforts provide updated software loads for NSC1 and 2, as well as needed upgrades to the Mission Systems Pallets. Software loads need continual grooming due to impacts of external changes such as Information Assurance (IA), interoperability architecture changes and to protect against diminished manufacturing sources, hardware changes, and interface changes. This also provides for needed changes to the communications suite for cutters and aircraft that have been delivered or are in the production phase.

U. S. Coast Guard - FY 2011 Congressional Justification

**C4ISR**

**\$30,500**

KEY EVENTS

**Significant accomplishments in FY 2009 include:**

- Authority to Operation (ATO) Classified Systems on NSC-1 and for Mission System Pallet on MPA.
- Awarded contract for Segment 2 (Migrate system integrator role from ICGS to the Coast Guard).

**FY 2010 planned accomplishments include:**

- Deliver Segment 2 design requirements.
- Begin Ku band upgrades on High and Medium Endurance Cutters (HECs/MECs).
- Begin Integrated Waveform Military Satellite Communications upgrades on MECs.

**FY 2011 planned accomplishments include:**

- Critical system updates for safety, IA, and diminishing manufacturing source.

SUMMARY OF FUNDING HISTORY

C4ISR ACQUISITION INCREMENTS		SEGMENTS 1, 2, 3, 4*	SEGMENT 5: Upgrades (to existing)**	
C4ISR Project Components		New Vessels / Aircraft	In-Service Cutters	Infrastructure
ICGS as Lead System Integrator		(S1:FY'02-09; S2:FY'06-11)

FY 2008	\$89,630	\$83,730	\$400	\$5,500
FY 2009	\$88,100	\$77,600	\$10,500	
FY 2010	\$35,000	\$35,000		
<b>Grand Totals</b>	<b>\$612,931</b>	<b>\$507,231</b>	<b>\$39,496</b>	<b>\$66,204</b>

C4ISR SEGMENTS . . .

\*1 -Baseline core system capability, Integrated CG Sys. (ICGS) as Lead System Integrator (LSI) on NSC, MPA, MSP

\*2 -Improved interoperability, transition from ICGS to gov't provided software (CG as SI) on NSC, FRC, MPA, MSP

\*3 -Continue open system architecture transition; USCG as SI on NSC, FRC, OPC, MPA (MRS, LRS), MSP (MRS only)

\*4 -Continue open system, add network centric design solution; USCG as SI on NSC, FRC, OPC, MPA, MSP

\*\*5 -Upgrades to in-service/legacy endurance cutters and shore facilities (training & cmd ctrs, comms stations)

\*\*\* Labs: simulators, initial training, testing & support (for new vessel and aircraft assets)

**Method of Performance**

An Earned Value Management System (EVMS) is used for the system integrator contract work under each of the Delivery Task Orders (DTOs). The Dekker Trakker software program, which meets ANSI/EIA Standard 748, is employed to resource load schedules, track progress and record expenses. Moreover, Dekker iPursuit is also used to view monthly Cost Performance Reports. The iPursuit program also allows for extensive insight into the data used to generate Cost Performance reports. For example, it can provide a breakdown of cost and schedule variances by Work Breakdown Structure (WBS).

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Deepwater Logistics**

**\$50,000**

**Project Description, Justification and Scope**

This request supports the delivery of new and modernized ships, aircraft, and information systems through the continued development of logistics across Coast Guard platforms and shore commands, the Coast Guard Logistics Information Management System, as well as the funding of shore facility upgrades necessary to field and support these assets. The funding request includes three significant areas: 1) Integrated Logistics Support (ILS); 2) CG-LIMS development; and 3) Facilities upgrades (in preparation of receiving new and modernized assets).

Integrated Logistics Support (ILS) – \$3,800 will continue the process of confirming all logistics functional elements (e.g., Maintenance Planning, Supply Support, Facilities, Support Equipment, Packaging, Handling Storage & Transportation, Manpower/Personnel, Training & Training Support, Technical Data, Computer Resources, and Design Interface) for Deepwater Projects are considered and addressed to ensure mission readiness and overall supportability for the life cycle of delivered assets. This system support development effort is necessary for the successful fielding of assets and achievement of targeted operational effectiveness goals. Funding will support the execution of tailored asset Logistics Readiness Reviews (LRR) for the Fast Response Cutter (FRC) Sentinel Class Patrol Boat and CG-C2 systems.

Coast Guard Logistics Information Management System (CG-LIMS) – \$6,000 will continue CG-LIMS development and phased deployment to Coast Guard operational assets and support facilities. CG-LIMS is planned for phased implementation by increments. Increment 1 provides configuration and maintenance management functionality for the HC-144A Maritime Patrol Aircraft (MPA) aviation product line. Once fully implemented, this and subsequent increments will replace subsystems of the legacy Aviation Logistics Management Information System (ALMIS). Each increment will have a low rate initial production phase limiting the number of product lines at implementation, followed by full rate production to incorporate the remaining product lines as appropriate until CG-LIMS fully replaces the functionality of each legacy system.

Facility and Infrastructure Upgrades – \$40,200 funds the completion of upgrades associated with construction of a new hangar to accommodate four Maritime Patrol Aircraft (MPA) at Air Station Cape Cod, MA, and maintenance support facilities for the MPA's Mission System Pallet, as well as critical hangar modifications at Air Station Miami, FL to support MPA systems. In addition, this line item funds necessary infrastructure improvements (e.g., pier and shore power modifications) in Miami, FL and Key West, FL to support the homeporting of six new Sentinel Class cutters at each location. The infrastructure improvements for the second National Security Cutter (NSC) and third FRC homeports are also funded. Finally, this request funds projects critical to supporting the development and fielding of new assets, such as the expansion of the Coast Guard Command and Control Center (C2CEN) to accommodate personnel associated with Deepwater system maintenance and operations and construction of a new building at Coast Guard Training Center Yorktown, VA to house hull, mechanical, and electrical training systems for the NSC and FRC.

CAPABILITY ACQUIRED/MAINTAINED:

**Deepwater Logistics**

**\$50,000**

Establishing a responsive ILS system will benefit the organization by reducing life cycle costs and increasing operational effectiveness. To achieve these goals, the Coast Guard must continue with a two-part development approach: 1) integrating enterprise-wide processes across the logistics functional elements to assist in moving the Coast Guard towards an efficient centralized business model; 2) incorporating sound Human Systems Integration (HSI) processes to improve human performance and reduce operational costs.

Investing in CG-LIMS is central to the Coast Guard's enterprise-wide system. CG-LIMS can provide the ability, using collected data, to bring the right information to the right people at the right time. It is intended to streamline parts ordering and management, facilitate maintenance functions, sustain configuration control, and provide an innovative training delivery system. Interconnected processes accessed via an on-line support infrastructure will improve each Coast Guard unit's operational effectiveness by providing responsive maintenance support, establishing and maintaining inventory levels, and facilitating automation in spare parts ordering, all while remaining CFO compliant.

Capabilities being acquired through CG-LIMS include:

- Tracking assets
- Identifying and Documenting Corrective Maintenance
- Scheduling Maintenance
- Performing Maintenance
- Conducting Supply Operations
- Managing Inventory Control Point Activity
- Effecting Engineering Changes
- Conducting Enterprise Data Mining
- Technical Information Management
- Total Asset Visibility Reporting

Another significant component of logistics is the physical facilities and infrastructure preparation necessary for home sites and support infrastructures for these assets. These facilities fall into two categories: 1) current Coast Guard or other existing facilities requiring modification to be used for new or converted assets; and 2) newly-acquired facilities, including land and the associated buildings for crew offices, training buildings, and hangars to house and support the new ships, aircraft, and their crews.

**PERFORMANCE:**

ILS planning and implementation is essential to achieving mission success and life cycle supportability in all statutory missions. By ensuring the proper support infrastructure is in place, new assets will be able to perform as designed and maintain their operational capabilities in a cost effective manner.

A centrally-managed, integrated, enterprise-wide logistics information management system that leverages government and industry standards and best practices will provide a hard link between mission support and mission performance. By implementing a logistics system capable of supporting improved business processes and organizational structures, the Coast Guard will optimize operational support, reduce costs across the organization, provide real time financial data, and align with DHS Enterprise Architecture. CG-LIMS is necessary for the Coast Guard to continue to accomplish its missions and remain agile in an ever-changing operational environment. It will assist the Coast Guard in achieving a

*U. S. Coast Guard - FY 2011 Congressional Justification*

**Deepwater Logistics**

**\$50,000**

clean financial audit opinion by providing transparent, traceable financial information from a single logistics system interfaced with the core accounting system.

The shore facility upgrade projects listed are each critical to the overall success of the respective asset system. These time-critical projects for new or upgraded facilities will enable recapitalized assets to be housed in their intended locations and permit the necessary support of the assets and training of assigned personnel. These schedules may have to be adjusted to accommodate any changes to the delivery schedules for the supported asset.

**COST ESTIMATE OF WORK TO BE FUNDED IN FISCAL YEAR 2011:**

ITEM	QUANTITY	TOTAL (\$K)
Integrated Logistics Support (ILS) Continuation	Job	\$3,800

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Technology Obsolescence Prevention (TOP)** **\$1,000**

**Project Description, Justification and Scope**

This request funds the program management portion of the Technological Obsolescence Program for two National Security Cutters, 39 in-service WHECs/WMECs, one Fast Response Cutter, and eight Mission Systems Pallets. Technological obsolescence results when newer technologies appear and older technologies become unsupported or unavailable. Unless planned for and managed, obsolescence emerges suddenly and solutions are thus more costly due to lack of proper systems engineering and alternative analysis. Thus, a Technical Obsolescence Prevention program serves as a cost avoidance measure, saving design, development and integration costs while avoiding sudden loss of mission capability.

Technical obsolescence includes both hardware and software. Rapid changes of technology include new media for storing digital information, software operating systems, and communications equipment. Once obsolescence is identified, the TOP Program analyzes alternatives and costs. Some factors include upgrade costs, interfacing system constraints, training concerns, forecasted next upgrade, and time to implement.

In general, TOP supports enterprise Command, Control, Computers, Communications, Intelligence, Surveillance, and Reconnaissance (C4ISR) systems on Coast Guard enterprise assets. The TOP program generally adheres to industry-based replacement rates for system types. For example, if a certain computer that has a five-year cycle is placed in service in 2005, it would be slated for replacement in 2010.

*TOP Replacement Periods*

<b>Replacement Period</b>	<b>5 Years</b>	<b>10-15 Years</b>	<b>15-20 Years</b>
Equipment Description	Software; Computers and Networking Equipment	Communication Equipment	Sensors and Weapon Systems

*Performance:* TOP minimizes or eliminates the impact that hardware and/or software obsolescence can have on performance by identifying and managing risks that result from obsolescence. TOP maintains or improves the technology performance level with indifference to changes at the hardware/software level.

*Funding History*

<b>Fiscal Year</b>	<b>2008</b>	<b>2009</b>	<b>2010</b>	<b>Total</b>
Funding (\$K)	\$700	\$1,500	\$1,900	\$4,100

*Contract(s):* TBD – Contractor and Subcontractors; Various – Type of Contract and Contract Options.

**Significant Changes**

No significant change. FY 2011 funding reflects anticipated procurement schedule.

Obsolescence alternative analysis and resolution	300
<b>FY 2011 Cost Estimate Project Total:</b>	<b>1,000</b>

**Method of Performance**

An Earned Value Management System (EVMS) is used for the system integrator contract work under each of the Delivery Task Orders (DTOs). The Dekker Trakker software program, which meets ANSI/EIA Standard 748, is employed by CG-9 to resource load schedules, track progress and record expenses. Moreover, Dekker iPursuit is also used to view monthly Cost Performance Reports. The iPursuit program also allows for extensive insight into the data used to generate Cost Performance reports. For example, it can provide a breakdown of cost and schedule variances by Work Breakdown Structure (WBS).

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

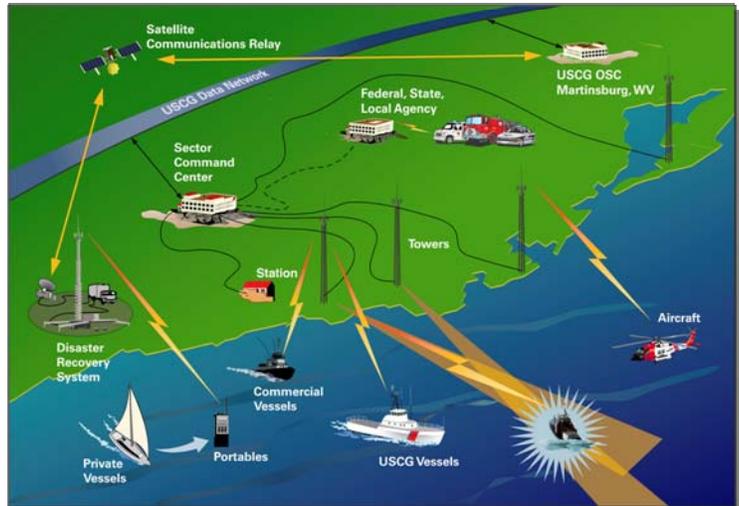

**Rescue 21**

**\$36,000**

**Project Description, Justification and Scope**

This request funds continuation of the Full Rate Production contract with General Dynamics C4 Systems (GDC4S). At the end of December 2009, Rescue 21 was deployed to 24 of 39 planned Sectors/Groups, standing watch and saving lives along 34,912 miles of U.S. coastline.

The Rescue 21 project replaces the U.S. Coast Guard's legacy National Distress and Response System (NDRS), which enhances the U.S. Coast Guard's mission execution through improved communications, command and control capabilities in the coastal zone. The basic NDRS components include radios, transceivers, towers for antennas, and an interconnecting network. It is the foundation for coastal Search and Rescue (SAR), and is a critical enabler of efficient and effective command and control for all missions in coastal zones.

*Benefits of Rescue 21 include:*

- Eliminates many existing communication coverage gaps ("dead zones") while ensuring continuous, enhanced VHF-FM marine radio coverage out to 20 nautical miles from shore within the coastal zone;
- Features digital voice recording capability with immediate playback, improving the ability to review and resolve garbled or unclear transmissions - critical to search and rescue planning and response;
- Provides improved direction finding capability for more timely response to mariners in distress and an ability to distinguish "hoax" calls from actual distress calls;
- Increases the number of voice channels from one to five, allowing watch standers to conduct multiple operations, while offering protected (secure) communications for homeland security missions when needed;
- Enhances Maritime Domain Awareness (MDA) by maintaining communications with mariners, and facilitating the timely flow of information between the Coast Guard and other government and law enforcement agencies; and
- Supports DHS Goal 4: Build a nimble, effective emergency response system and a culture of preparedness.
- Provides Digital Selective Calling capability to meet the international Global Maritime Distress and Safety System (GMDSS) requirements for Sea Area 1 per the Safety of Life at Sea (SOLAS) treaty.

**FY 2011 will specifically accomplish the following work:**

*Rescue 21 Ground Subsystem (GSS) Deployment (partial) – Full Rate Production (FRP) Group III, Western Rivers (partial)*

- Outside Continental U.S. Islands and Continental U.S., including Great Lakes, Sectors

**Rescue 21**

**\$36,000**

- Completes deployment at Sectors Detroit, MI; Los Angeles/Long Beach, CA; Honolulu, HI; San Juan, PR; Guam; and Buffalo, NY
- Continues deployment at Sectors Lake Michigan and Sault Ste Marie, MI
- Western Rivers
  - Continues deployment at Sectors Ohio River Valley, Upper Mississippi River, and Lower Mississippi River

**At the end of December 2009, Rescue 21 is operational in 24 of 39 Sectors and is standing watch and saving lives along 34,912 miles of U.S. coastline at the following Sectors/Groups:**

- Seattle, WA
- Port Angeles, WA
- Astoria, OR
- Portland, OR
- North Bend, OR
- Humboldt Bay, CA
- Corpus Christi, TX
- Houston-Galveston, TX
- New Orleans, LA
- Mobile, AL
- St. Petersburg, FL
- Key West, FL
- Northern New England
- Boston, MA
- Southeastern New England
- Long Island NY/CT
- New York, NY
- Delaware Bay
- Baltimore, MD
- Hampton Roads, VA
- North Carolina
- Charleston, SC
- Jacksonville, FL
- Miami, FL

**At the end of FY 2010, the following additional Sectors/Groups are scheduled to be operational, for a total of 35,748 miles of Rescue 21 coastline coverage:**

- San Francisco, CA
- San Diego, CA

**At the end of FY 2011, the following additional Sectors are scheduled to be operational, for a total of 39,796 miles of Rescue 21 coastline coverage:**

- Detroit, MI
- Honolulu, HI
- Guam
- Los Angeles/Long Beach, CA
- San Juan, PR
- Buffalo, NY

**Production Contractor:**

- General Dynamics C4 Systems (GDC4S) of Scottsdale, AZ is the Rescue 21 Phase II Contractor. The Phase II contract is a delivery order based Indefinite Delivery, Indefinite Quantity (IDIQ) contract with award term incentives. The contract has a base period of eight years, plus one five-year award terms and one six-year award term. GDC4S is responsible for complete system maintenance and operates a 24/7 Customer Care Center (CCC) to respond to system discrepancies.

*Subcontractors:*

- Motorola, Inc. (Schaumburg, IL) – Radio subsystems
- Consolidate Analysts Centers, Federal, Inc (CACI) (Manassas, VA) – Direction finding subsystems
- General Dynamics Information Technology (GDIT) (Needham, MA) – Remote fixed facilities planning team member and construction management
- Stanley Associates, Inc. (Charleston, SC) – Fixed facility infrastructure and cutover

*U. S. Coast Guard - FY 2011 Congressional Justification*

**Rescue 21**

**\$36,000**

- Chelton Inc. (Lewisville, TX) – Co-site interference mitigation subsystems
- CellXion (Bossier City, LA) – RFF shelters
- MWH Americas, Inc. (Farmington Hills, MI) – Environmental services, planning team member
- Rhode & Schwarz (Columbia, MD) – Direction finding subsystems
- Western Maritime (San Diego, CA) – Direction finding calibration vessel testing
- Andrew Systems (IL) – Third party inspections and system support and maintenance
- MJM (TN) – Third party inspections and system support and maintenance

**Significant Changes**

No significant change. FY 2011 funding reflects anticipated procurement schedule.

**\$36,000**

---

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Minor AC&I Shore Construction Projects** **\$3,300**

**Project Description, Justification and Scope**

This program provides funds to complete minor AC&I shore facility construction projects. These projects are typically less complex and require less advance planning than major shore projects. These funds will be used to complete minor projects that have costs estimates which exceed the construction authority provided in the Operating Expense (OE) appropriation. For example, this may include:

- emergency repair projects which have cost estimates that are greater than 50% of the plant replacement value;
- minor facility improvements, which cost more than one million dollars, that are needed to adapt to changing/increased missions (FY09 Marine Inspector Billet Growth).

**Significant Changes**

The minor AC&I shore construction projects program was last funded in FY2005.

**Project Schedule**

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Renovate Chase Hall Barracks Phase III, CG Academy** **\$21,000**

**Project Description, Justification and Scope**

This project continues prior efforts to renovate and improve the Chase Hall Barrack by improving habitability and bringing them into compliance with fire and life-safety standards. Chase Hall has significant life-safety issues that must be addressed. In addition, this comprehensive renovation enhances enrollment efforts, modernizes the campus and ensures the Academy remains competitive with other institutions of higher learning. This phase will specifically renovate Annex B.

In June 2008, the Coast Guard Academy completed the new Chase Hall E Annex, the first stage of a comprehensive mid-life renovation project to Chase Hall which provided the living space necessary to continue with renovations of Annexes A thru D. Each phase of renovation addresses significant life-safety deficiencies such as new fire detection and fire suppression systems, new fire rated doors, ceiling and wall assemblies, improved paths of egress with new lighting horns and strobes and new electrical and mechanical rooms. In addition, each phase of renovation introduces modern amenities to include IT upgrades, public address speakers, new interior finishes and new heating, ventilation and air conditioning (HVAC). The total area for all phases is approximately 343,000 GSF.

**Significant Changes**

No significant change.

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Shore Infrastructure Survey and Design** **\$5,000**

**Project Description, Justification and Scope**

The Coast Guard's FY 2011 Survey and Design (S&D) budget request includes funding essential to future year Acquisition, Construction and Improvement (AC&I) shore projects. Coast Guard shore facility AC&I funding has only a three-year period of availability. A pre-project survey and design ensures timely execution of shore facility AC&I appropriations.

Funding will provide in-house capability for planning and engineering studies, project design, master plans, appraisals, real property requirements and other architectural/engineering efforts. Completing proper planning and design helps to ensure AC&I projects are properly assessed, planned and prioritized prior to seeking project appropriations. The projects supported by this request contribute to the long-range plans and support of operational units.

**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Thrun Hall Phase II**

**\$12,000**

**Project Description, Justification and Scope**

This project will complete the replacement of the Unaccompanied Personnel Housing (UPH) at Support Center Elizabeth City, NC. This UPH is functionally obsolete; is in poor condition, beyond economic rehabilitation; and is located within the airstation's runway "object free zone". Built in 1966 as a 500 person barracks, Thrun Hall does not meet current life-safety codes and berthing standards. Further, the co-located Coast Guard Aviation Technical Training Center (ATTC) training mission is currently limited by the capacity of the Thrun Hall barracks. The project will construct a new UPH building of adequate capacity in a more suitable location within the ATTC portion of the Elizabeth City complex.

This phase of the project will provide facilities for the Electronics Support Detachment (ESD) and Personnel Support that were located in the existing UPH and will demolish existing facilities.

**Significant Changes**

**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Shore AC&I Newport, RI Pier** **\$23,500**

**Project Description, Justification and Scope**

This funding will rehabilitate an existing pier face to provide over 800+ linear feet of moorings for the Coast Guard Cutters *JUNIPER*, *WILLOW* and *IDA LEWIS*. In addition to the waterfront improvements, this project will create the necessary pierside support facilities including: parking lot, buoy lay-down area, office, maintenance storage and fencing.

The U.S. Navy is in the process of condemning the cutters' current moorings due to progressive deterioration. By co-locating these buoy tenders, and their supporting functions, at the new pier location, the Coast Guard will be able to achieve operations and maintenance benefits through proximity to support and supplies. In addition, this project will preserve current synergies achieved by co-locating these assets with the Navy. This funding leverages a separate US Navy project to stabilize the wharf.

**Significant Changes**

No significant changes.

**Waterways ATON Infrastructure** **\$4,400**

**Project Description, Justification and Scope**

This request provides funding to establish, repair and improve Aids to Navigation on Federal waterways. Funding from this project enhances interstate transportation and waterway recreation through lower cost preventative maritime safety measures. Regular annual project funding enables the Coast Guard to be proactive in planning AtoN replacements as well as be responsive to emergent needs.

This request will help fund projects that are critical to safe and efficient maritime transportation.

**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**AC&I Core**

**\$510**

**Project Description, Justification and Scope**

This funding is necessary to cover costs associated with project overhead activities for major acquisition projects. The primary initiatives include contractor support services, records storage and training. The funding allows the Coast Guard to maintain an effective acquisition process by providing AC&I resources that are not project-specific. Resources are needed to maintain core competencies and capabilities necessary to execute assigned workload while meeting various requirements established in the Chief Financial Officer Act, Clinger-Cohen Act and OMB Circular A-76.

**U. S. Coast Guard**  
**Acquisition, Construction & Improvements**  
**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Direct Personnel Costs** **\$107,051**

**Project Description, Justification and Scope**

This request funds the salaries, compensation and support costs (including annual pay raise and COLA) for personnel who manage, execute and administer multi-year funded projects within the Acquisition, Construction and Improvements (AC&I) Program. The personnel will support projects requested in this budget submission, as well as prior year funded AC&I projects, by performing planning, design, engineering, contracting, project management, quality assurance and logistics support activities. This ensures the products and services acquired through the AC&I program are completed on time, on budget and in compliance with performance requirements.

The requested funding level will support a total of 785 FTE (an increase of 50 FTE from the FY2010 Enacted level). The additional FTE will be used to implement management, project staff and technical authorities as the Coast Guard takes on the systems integrator role for the Deepwater program. These positions are critical to enhance the Coast Guard's acquisitions program as it continues to implement strategies in the Coast Guard's *Blueprint for Acquisition Reform* and the *Blueprint for Continuous Improvement*.

**FY 2011 Congressional Justification**  
(Dollars in Thousands)

**Military Housing** **\$13,965**

**Project Description, Justification and Scope**

Project Description, Justification and Scope

This new project provides for the recapitalization, improvement and/or acquisition of housing to support Military families. The FY2011 request will fund the following Military Housing initiatives:

**Upper Keys – Recapitalization of Military Family Housing (\$11,965)**

This request funds part of a multi-phase effort to provide a total of 42 new family housing units in the upper Florida Keys, an area with documented housing shortages. Nine units, a variety of duplexes and single family dwellings built to withstand hurricane conditions, are currently under construction at a cost of approximately \$7.3M. This next useful segment of funding will build on prior year efforts to fund the acquisition and construction of approximately fifteen more housing units for Coast Guard families assigned to the Upper Keys. These funds will provide greater access to affordable and suitable housing for Coast Guard members and their families assigned to this high-cost housing area.

**Station Montauk – Acquire Military Family Housing (\$2,000)**

This request funds the final phase of a two-phase effort to provide a total of six homes, through open-market acquisition, for families living in this high-cost housing area. Fiscal year 2009 appropriations enabled the Coast Guard to purchase three homes in this area. Requested funding will allow the Coast Guard to purchase three additional homes for military families and members assigned to Station Montauk, New York.

**Significant Changes**

No significant changes.

## Summary Justification and Explanation of Changes

### Travel

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 577	\$ 642	\$ 333	\$ (309)

Travel includes all costs of transportation of persons, subsistence of travelers and incidental travel expenses in accordance with Federal travel regulations. The FY 2011 request reflects the anticipated need and specifically funds transport of personnel in support of training, project management and oversight of the Response Boat - Medium Project.

### Transportation of things

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 186	\$ 257	\$ 133	\$ (124)

Transportation of things includes all costs of the care of such things while in process of being transported and other services incident to the transportation of things. Specifically, funding provides for shipment of goods, equipment, supplies and materials to support completion of AC&I projects. The FY 2011 request reflects the anticipated need.

### Other rent

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 125	\$ 128	\$ 67	\$ (61)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g., office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). The FY 2011 request reflects the anticipated need.

### Communication, utilities, and misc charges

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 294	\$ 257	\$ 133	\$ (124)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities and cutters, utility costs, including shore facility utilities, cutter and boat fuel requirements, and postal costs. The FY 2011 request reflects the anticipated need.

### Advisory and assistance services

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 25,811	\$ 27,221	\$ 14,125	\$ (13,096)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2011 request reflects the anticipated need.

**Other services**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	33,927	\$	35,696	\$	18,524	\$	(17,172)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2011 request reflects the anticipated need.

**Supplies and materials**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	(6,199)	\$	10,786	\$	5,597	\$	(5,189)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters and boats, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2011 request reflects the anticipated need.

**Equipment**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	43,325	\$	45,583	\$	23,655	\$	(21,928)

This object class covers the purchase of capitalized and non-capitalized assets. The FY 2011 request reflects the anticipated need.

**Land and structures**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	7,429	\$	7,832	\$	4,066	\$	(3,766)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2011 request reflects the anticipated need.

## Summary Justification and Explanation of Changes

### Travel

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$	3,842	\$	8,198	\$	7,573	\$ (625)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2011 request reflects the anticipated need.

### Transportation of things

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$	1,236	\$	3,279	\$	3,029	\$ (250)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2011 request reflects the anticipated need.

### Other rent

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$	829	\$	1,640	\$	1,515	\$ (125)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). The FY 2011 request reflects the anticipated need.

### Communication, utilities, and misc charges

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$	1,958	\$	3,279	\$	3,029	\$ (250)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. The FY 2011 request reflects the anticipated need.

### Advisory and assistance services

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
	\$	171,893	\$	347,588	\$	321,098	\$ (26,490)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2011 request reflects the anticipated need.

**Other services**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	225,942	\$	455,799	\$	421,063	\$	(34,736)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2011 request reflects the anticipated need.

**Supplies and materials**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	(41,287)	\$	137,723	\$	127,228	\$	(10,495)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2011 request reflects the anticipated need.

**Equipment**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	288,533	\$	582,045	\$	537,688	\$	(44,357)

This object class covers the purchase of capitalized and non-capitalized assets. The FY 2011 request reflects the anticipated need.

**Land and structures**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	49,494	\$	100,013	\$	92,392	\$	(7,621)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2011 request reflects the anticipated need.

## Summary Justification and Explanation of Changes

### Travel

2009	2010	2011	2010 - 2011
Actual	Enacted	Request	Change
\$ 22	\$ 9	\$ 21	12

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. There are no requests for Aircraft projects in FY 2011.

### Transportation of things

2009	2010	2011	2010 - 2011
Actual	Enacted	Request	Change
\$ 7	\$ 3	\$ 8	5

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Specifically, funding supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. There are no requests for Aircraft projects in FY 2011.

### Other rent

2009	2010	2011	2010 - 2011
Actual	Enacted	Request	Change
\$ 5	\$ 2	\$ 4	2

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.) There are no requests for Aircraft projects in FY 2011.

### Communication, utilities, and misc charges

2009	2010	2011	2010 - 2011
Actual	Enacted	Request	Change
\$ 11	\$ 3	\$ 8	5

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities and aircraft, utility costs including shore facility utilities and aircraft fuel requirements, and postal costs. There are no requests for Aircraft projects in FY 2011.

**Advisory and assistance services**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	991	\$	369	\$	887	\$	518

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2011 request reflects the anticipated need.

**Other services**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	1,302	\$	483	\$	1,164	\$	681

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2011 request reflects the anticipated need.

**Supplies and materials**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	(238)	\$	146	\$	352	\$	206

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2011 request reflects the anticipated need.

**Equipment**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	1,663	\$	617	\$	1,486	\$	869

This object class covers the purchase of capitalized and non-capitalized assets. The FY 2011 request reflects the anticipated need.

**Land and structures**

	2009 Actual		2010 Enacted		2011 Request		2010 - 2011 Change
\$	286	\$	107	\$	256	\$	149

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2011 request reflects the anticipated need.

## Summary Justification and Explanation of Changes

### Travel

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 489	\$ 1,171	\$ 1,202	\$ 31

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Increased funding in FY 2011 is a result of additional project funding and the execution of FY 2009 supplemental funding.

### Transportation of things

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 157	\$ 469	\$ 481	\$ 12

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Increased funding in FY 2011 is a result of additional project funding and the execution of FY 2009 supplemental funding.

### Other rent

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 106	\$ 234	\$ 240	\$ 6

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). Increased funding in FY 2011 is a result of additional project funding and the execution of FY 2009 supplemental funding.

### Communication, utilities, and misc charges

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 249	\$ 469	\$ 481	\$ 12

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Increased funding in FY 2011 is a result of additional project funding and the execution of FY 2009 supplemental funding.

### Advisory and assistance services

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 21,871	\$ 49,663	\$ 50,947	\$ 1,284

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Increased funding in FY 2011 is a result of additional project funding and the execution of FY 2009 supplemental funding.

### Other services

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 28,748	\$ 65,124	\$ 66,807	\$ 1,683

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. Increased funding in FY 2011 is a result of additional project funding and the execution of FY 2009 supplemental funding.

### Supplies and materials

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ (5,253)	\$ 19,679	\$ 20,186	\$ 507

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. Increased funding in FY 2011 is a result of additional project funding and the execution of FY 2009 supplemental funding.

### Equipment

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 36,712	\$ 83,162	\$ 85,311	\$ 2,149

This object class covers the purchase of capitalized and non-capitalized assets. Increased funding in FY 2011 is a result of additional project funding and the execution of FY 2009 supplemental funding.

### Land and structures

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 6,297	\$ 14,287	\$ 14,659	\$ 372

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Increased funding in FY 2011 is a result of additional project funding and the execution of FY 2009 supplemental funding.

## Summary Justification and Explanation of Changes

### Salaries and Benefits

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 80,101	\$ 92,024	\$ 100,411	\$ 8,387

Salaries, benefits, and support for the military and civilian personnel who administer AC&I contracts are funded by the AC&I appropriation. FY 2011 request includes funding for the proposed pay raise (1.4% for military and 1.4% for civilians), medical benefits, other mandatory personnel entitlements.

### Travel

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 66	\$ 66	\$ 36	(30)

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2011 request reflects the anticipated need.

### Transportation of things

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 21	\$ 26	\$ 14	(12)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Specifically, funding supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves.

### Other rent

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 14	\$ 13	\$ 7	(6)

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.).

### Communication, utilities, and misc charges

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 33	\$ 26	\$ 14	(12)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs.

**Advisory and assistance services**

2009	2010	2011	2010 - 2011
Actual	Enacted	Request	Change
\$ 2,938	\$ 2,793	\$ 1,516	\$ (1,277)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2011 request reflects the anticipated need.

**Other services**

2009	2010	2011	2010 - 2011
Actual	Enacted	Request	Change
\$ 3,862	\$ 3,663	\$ 1,988	\$ (1,675)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions. The FY 2011 request reflects the anticipated need.

**Supplies and materials**

2009	2010	2011	2010 - 2011
Actual	Enacted	Request	Change
\$ (706)	\$ 1,107	\$ 600	\$ (507)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2011 request reflects the anticipated need.

**Equipment**

2009	2010	2011	2010 - 2011
Actual	Enacted	Request	Change
\$ 4,932	\$ 4,677	\$ 2,538	\$ (2,139)

This object class covers the purchase of capitalized and non-capitalized assets. The FY 2011 request reflects the anticipated need.

**Land and structures**

2009	2010	2011	2010 - 2011
Actual	Enacted	Request	Change
\$ 848	\$ 805	\$ 437	\$ (368)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2011 request reflects the anticipated need.

## Summary Justification and Explanation of Changes

### Travel

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ -	\$ -	\$ 70	\$ 70

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler.

### Transportation of things

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ -	\$ -	\$ 28	\$ 28

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.

### Other rent

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ -	\$ -	\$ 14	\$ 14

Other rent includes all payments to a non-Federal source for rental space, land, and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.).

### Communication, utilities, and misc charges

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ -	\$ -	\$ 28	\$ 28

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

### Advisory and assistance services

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ -	\$ -	\$ 2,961	\$ 2,961

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

**Other services**

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ -	\$ -	3,882	\$ 3,882

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs and other initiatives focused on improving performance of Coast Guard missions.

**Supplies and materials**

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ -	\$ -	1,173	\$ 1,173

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies.

**Equipment**

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ -	\$ -	4,958	\$ 4,958

This object class covers the purchase of capitalized and non-capitalized assets.

**Land and structures**

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ -	\$ -	851	\$ 851

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease.

**U. S. Coast Guard**  
**Alteration of Bridges**

**I. Appropriation Overview**

**A. Mission Statement for Alteration of Bridges:**

Alteration of unreasonably obstructive bridges supports navigational safety and freedom of mobility to facilitate commerce, emergency response and U.S. Government operations by providing sufficient clearances for the type of vessels that transit beneath bridges. Alterations also deter waterway and highway/railway closures due to accidents.

**B. Budget Activities:**

Funding supports the Coast Guard's Aids to Navigation mission.

**C. Budget Request Summary:**

The Coast Guard is not requesting funding for Alteration of Bridges in FY 2011.

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U. S. Coast Guard  
Alteration of Bridges  
Program Performance Justification  
(Dollars in Thousands)**

#### PPA I: ALTERATION OF BRIDGES

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actual</b>	...	...	<b>\$13,997</b>
<b>2010 Enacted</b>	...	...	\$4,000
2011 Adjustments-to-Base			(\$4,000)
<b>2011 Current Services</b>	...	...	...
2011 Program Change	...	...	...
<b>2011 Request</b>	...	...	...
Total Change 2010-2011	...	...	(\$4,000)

The Coast Guard does not request any funding for this activity in FY 2011.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Alteration of Bridges program funds the Federal government's share of the costs for altering or removing bridges determined to be unreasonable obstructions to navigation. Under the Federal-Aid to Highways Program, unreasonably obstructive highway bridges may be eligible for funding. Under the Truman-Hobbs Act of 1940 (33 U.S.C. 511-523), the Federal government shares, with the bridge owner, the cost of altering railroad and publicly-owned highway bridges obstructing the free movement of vessel traffic.

Significant accomplishments in FY 2009 included:

- CSXT Railroad Bridge across the Mobile River in Mobile, Alabama: Completed the final design, environmental documentation, and bid package, and acquired all necessary permits.
- EJ&E Railroad Bridge across Illinois Waterways in Divine, Illinois: Completed the final design, environmental documentation, and bid package, and acquired all necessary permits.
- Burlington Northern Santa Fe Railroad Bridge across the Upper Mississippi River in Burlington, Iowa: Completed the final design, environmental documentation, and bid package, and acquired all necessary permits.
- Galveston Railroad Bridge across the Gulf Intracoastal Waterway in Galveston, Texas: Completed the final design, environmental documentation, and bid package, and acquired all necessary permits.

- Canadian Pacific Railroad Bridge across the Upper Mississippi River in Lacrosse, Wisconsin: Completed 80 percent of the design of the new bridge.
- Burlington Northern Santa Fe Railroad Bridge across the Upper Mississippi River in Fort Madison, Iowa: Update the design of the new bridge.

There are currently eight bridges that the Coast Guard has determined to be unreasonable obstructions to navigation and has issued orders to alter.

The Coast Guard has deemed an additional 32 bridges as potentially unreasonable obstructions to navigation. These bridges will require a Truman-Hobbs eligibility detailed investigation to definitively determine whether they are unreasonably obstructive.

Alteration of Bridges received \$142 million for “construction ready” bridge alteration projects through the American Recovery and Reinvestment Act (ARRA) of 2009. The proposed projects to receive ARRA funding, the first four bridges listed above, are described in the ARRA AB Expenditure Report submitted to Congress.

#### **IV. Program Justification of Changes**

Not Applicable

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
U. S. Coast Guard  
Justification of Proposed Changes in Alteration of Bridges  
Appropriation Language**

[For necessary expenses for alteration or removal of obstructive bridges, as authorized by section 6 of the Truman-Hobbs Act (33 U.S.C. 516), \$4,000,000, to remain available until expended: Provided, That of the amounts made available under this heading, \$4,000,000 shall be for the Fort Madison Bridge in Fort Madison, Iowa.] (Department of Homeland Security Appropriations Act, 2010.)

**U. S. Coast Guard**  
**Research, Development, Test and Evaluation**

**I. Appropriation Overview**

**A. Mission Statement for Research, Development, Test and Evaluation:**

Research, Development, Test and Evaluation (RDT&E) funding allows the Coast Guard to sustain critical mission capabilities through applied research and partnerships with the Department of Homeland Security (DHS), the Department of Defense (DoD), as well as other federal and private research organizations. The purpose of the R&D Program is to help identify and examine existing or impending problems in the Coast Guard's operational, regulatory, and support programs and make improvements through solutions based on scientific and technological advances. The RDT&E funding requested supports all 11 statutorily-mandated Coast Guard mission programs and offers risk-reduction expertise and services in the pre-acquisition process across all major and non-major acquisition projects. These mission-programs in turn directly support the Coast Guard's role as the principal Federal agency for ensuring maritime safety, security and environmental stewardship.

**B. Budget Activities:**

RDT&E appropriation sustains program infrastructure and core capabilities, knowledge, skills, experience, and facilities to allow the Coast Guard to maintain a balanced portfolio of projects that supports short, medium and long range requirements across all missions. Other activities include formulation and oversight of cooperative agreements with relevant professional in the public and private sectors, such as University Affiliated Research Centers (UARC) and Federally Funded Research & Development Centers (FFRDC) to promote collaboration and leverage expertise and the development of techniques, methods, hardware, and systems that directly contribute to increasing productivity and effectiveness of the Coast Guard's operating missions.

**C. Budget Request Summary:**

The Coast Guard requests \$20.034 million in FY 2011 to develop technologies and systems to improve operational presence and response, as well as perform technology assessments to inform the early stages of the acquisition process. Specific projects include: developing new technologies for the detection and recovery of oil and hazardous materials from the sea floor; developing ballast water treatment methodologies; providing data-sharing and information security technologies to support adaptive force packages; and developing advanced analytical techniques to support the acquisition process. In addition, funding supports program operations and maintenance costs (e.g., salaries, facility rent, utilities) at the Coast Guard Research and Development Center and the R & D Program's continued collaboration and participation with the research community. Healthy partnerships with other government, academic, and private research entities enable the Coast Guard to leverage research and development resources and foster synergies in scientific fields pertinent to the Service's missions.

<b>2011 Request</b>	<b>101</b>	<b>101</b>	<b>25,034</b>
Total Change 2010-2011	...	...	(4,711)

The Coast Guard requests \$20.034 million for this activity. This reflects a \$4.711 million decrease from the FY 2010 enacted level.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The RDT&E Appropriation funds foundational work for decision-makers of future acquisition, operations, regulatory, and support initiatives before long-term commitments are made through the AC&I or OE appropriations. Knowledge and experience are gained through mission validation, gap analysis, modeling and simulation, requirements validation, operational analysis, market research, alternatives analysis, technology maturity assessments, cost estimation, prototyping, operational assessments, testing, and evaluation.

Funding requirements for the RDT&E Program are grouped into two categories: Coast Guard Mission Research and Operations & Maintenance (e.g., salaries, facility rent, utilities, etc.)

Significant accomplishments in FY 2009 included:

- Demonstrated the at-sea capability of the Law Enforcement desktop 10-print biometrics identification system that uses a multi-digit handheld device in support of the Migrant Interdiction mission.
- Provided decision information that supported the Coast Guard acquisition of an improved use of force toolset that maximized mission effectiveness and minimized risk of collateral damage in the port environment.

- Developed guidance tools (models) that applied to warm and cold marine environments and provided probabilistic survival information to Search and Rescue (SAR) watch-standers that was incorporated into SAR planning software and improved the operational guidance and decision support tools that support SAR.
- Evaluated new equipment to detect, and began development of new equipment that recovers, non-buoyant submerged oils that have been spilled into waterways.
- Continued study to identify Unmanned Aerial System (UAS) that could operate off the National Security Cutter (NSC).
- Developed rigorous and defensible test procedures and gathered credible performance data to support Coast Guard decisions on commercial ballast water treatment system certification and ensured compliance with ballast water regulations aimed at reducing the number of incidental introductions of aquatic nuisance species into U.S. waters during normal ship operations.
- Conducted a technology demonstration of the use of tidal currents as a source of electrical power for Coast Guard Station Eastport, Maine.

In FY 2010, the RDT&E Program will conduct research and development in the following areas: net-centric data sharing and information security for inter-agency maritime domain awareness information; portable port security deterrence and detection systems for air, surface, and underwater attack scenarios; improved boarding team member and support unit communication and connectivity technologies; and assessing capability, human-factors, and technological challenges associated with operations in extremely cold weather climates. In addition, the Coast Guard RDT&E Program will conduct legacy mission projects in the following areas: Search and Rescue, Marine Safety, Aids to Navigation, Aquatic Nuisance Species and Oil and Hazardous Material Spill Response.

FY 2010 planned accomplishments include:

#### Infrastructure and Capability Investment

- Modeling & Simulation (M&S)  
Adapt the RDT&E Program's resident M&S expertise to the many on-going acquisition projects and develop, adapt, and/or maintain effective, agile M&S tools to support the decision-making processes of the operational sponsors and acquisition project managers. Perform analyses for acquisition, operational, and regulatory issues to support Directorate program managers. Develop a pipeline of reusable tools, beginning with exploratory studies to determine acquisitions and operational areas where modeling would optimize decision support. In FY 2010, M&S development efforts will focus on the Human Systems Integration model.

Perform Verification, Validation, and Accreditation (VV&A) efforts to ensure that the application of M&S results are appropriate for the intended purpose. Every Coast Guard M&S, whether embedded in operational systems, stand-alone systems or integrated with other M&S systems for distributed simulation is

required to be verified and validated prior to its use. Confidence in a particular model or simulation must be justified before its results are used in decisions involving large sums of money, risk to human life, or the possible loss of critical Coast Guard capabilities. In FY 2010, the RDT&E Program plans to complete verification and validation of the Pre-Acquisition Cost Model (based on the Automated Cost Estimating Integrated Tool cost modeling framework) and the Sensor Performance Model.

M&S reduces the cost of design, development, testing and evaluation throughout the acquisition cycle by harnessing software to perform labor-intensive tasks, freeing resources which would otherwise be required. For operational purposes, M&S aids in the development of the proper asset mix and improves and validates user requirements.

#### Acquisition Program Support

- Unmanned Aerial Systems (UAS)  
The Coast Guard, along with Customs and Border Protection (CBP), is evaluating both land- and cutter-based UAS to provide cost-effective solutions for enhanced maritime surveillance and cutter mission effectiveness. As a critical step in supporting the Coast Guard's UAS Strategy, the RDT&E Program plans to conduct a cutter-based advanced concept technology demonstration (ACTD). To that end, the Program will develop a sound and actionable cutter-based UAS procurement plan and an ACTD execution plan.
- Command Centers  
Use collaborative social networks and their flexibility to reduce the time to formulate a comprehensive port picture identifying and alerting Command Center personnel to potential concerns. Collaborative networking can enhance Situational Awareness and Decision Making by helping watch personnel create knowledge, share it and act on it in ways that will measurably improve the effectiveness and efficiency of the Command Center and its collaborators.
- Emerging Vessel Technologies  
Continue joint research venture between Science and Technology (S&T), the Coast Guard, and industry to investigate viability and applicability of emerging technologies for reduced emissions, alternative propulsion, "green" technologies and modular design in order to support a major acquisition for the future recapitalization and multi-mission modernization of inland, river, and Great Lakes cutter fleets.

## Operational Program Support

- Improved Maritime Domain Awareness (MDA)  
Analyze the Naval Research Laboratory (NRL)-developed Comprehensive Maritime Awareness (CMA) software demonstration and data to determine its potential for improving the Coast Guard's ability to manage, distribute, and fuse INTEL/Sensor derived data that provides timely and accurate information across the CMA information system. Comprehensive Maritime Awareness is a program to improve Maritime Domain Awareness with the vision of sharing maritime information throughout the world to deter use of commercial maritime shipping for terrorism, WMD proliferation, drugs, piracy and human trafficking. CMA is intended to specifically improve maritime awareness and information management techniques through interagency and international information-sharing of large volumes of data.

## Regulatory Program Support

- Oil Spill Detection/Response  
Continue research to develop systems and operational processes to address performance gaps in heavy, viscous oil recovery. The objective is to develop a system to detect, collect, and recover heavy oil from the sea floor. The focus in FY 2010 is to begin development of promising capabilities and techniques for recovering heavy oil on the sea floor. Proof of concept testing and evaluation of the most promising of those capabilities and techniques will follow in future fiscal years.

The ability to recover heavy, viscous oil prior to its impact on the coastline remains an elusive capability. The underwater environment poses major problems including poor visibility, difficulty tracking oil spill movement, colder temperatures, limited containment methods and technologies and the electric or mechanical recovery equipment compatibility with water.

- Ballast Water Treatment Systems  
Continue to develop rigorous and defensible test procedures and gather credible performance data to support Coast Guard decisions on certifying commercial ballast water treatment systems and to ensure compliance with ballast water regulations. Ballast water treatment systems reduce the number of incidental introductions of aquatic nuisance species into U.S. waters during normal ship operations.
- Arctic Operations  
Explore adaptation and modernization of capabilities and concepts of operations (CONOPS) and support of Coast Guard missions in the Arctic environment. Based on an analysis of the peculiarities of performing Coast Guard missions in such climates, develop a knowledge base of efforts, including those by

government, industry, and foreign entities, to support the development of policy and Concept of Operations for cold weather climates.

#### Asset Support Manager Support

- Alternative Energy/Environmental Analysis  
Investigate the feasibility and cost of alternative energy technologies, focusing on Coast Guard shore facilities. Gain a better understanding of the technologies that have a potential for providing alternative power while lowering the facilities' carbon footprints. The Coast Guard needs to develop and utilize renewable/sustainable energy sources that are environmentally friendly or it will continue to be subjected to rising energy costs due to an outdated and inefficient utility infrastructure.
- Coast Guard Fire and Safety Test Future Capabilities  
Conduct mission analysis of the Coast Guard's Fire and Safety Test Detachment (FSTD) and implement best practices. Identify program risks and minimize impact to stakeholders during program transition. The Coast Guard's FSTD current mission focus and organizational structure does not effectively support the new Acquisition Directorate.

#### Great Lakes Restoration Initiative

- Invasive Species  
The Coast Guard will coordinate with the Environmental Protection Agency, U.S. Fish and Wildlife Service, and Maritime Administration to fund the further development of up to five ballast water treatment systems suitable for fresh water ecosystems by supporting the use of laboratory and ship-board testing, verification of treatment technologies, and coordination with the maritime industry.

With FY 2011 funding, the Coast Guard RDT&E Program will update and certify critical modeling and simulation tools, develop the necessary plans to conduct a cutter-based UAS acquisition concept technology demonstration (ACTD) with our UAS partners, as well as conduct research and development in the following areas: prevention and mitigation of oil spills; prevention and mitigation of aquatic invasive species; sensory optimization, automation, and visualization for aviation, surface, and shore assets; surface-fleet pre-acquisition exploration of key technologies; and exploration of concepts and technologies supporting Coast Guard operations in the Arctic regions.

FY 2011 planned accomplishments include:

#### Infrastructure and Capability Investment

- Modeling & Simulation (M&S)  
Improve the RDT&E Program's in-house analysis capability by bringing the

Coast Guard's modeling & simulation tools into the 21<sup>st</sup> Century. Perform analyses for acquisition, operational, and regulatory issues to support Directorate program managers. Develop a pipeline of reusable tools, beginning with exploratory studies to determine acquisitions and operational areas where modeling would optimize decision support. FY 2011 efforts include refining a cost-modeling and simulation capability to improve the Coast Guard's ability to predict acquisition costs and converting existing Coast Guard campaign-modeling algorithms to a next-generation simulation environment that possesses 21<sup>st</sup> Century speed, flexibility, and accessibility designed for the Coast Guard analyst to generate rapid, cogent analysis. M&S is key to properly understanding risk and forecasting performance and outcomes for Coast Guard missions and assets. Currently, the campaign-level M&S tool resides on severely outdated hardware running a Windows 98 operating system.

Refine existing tactical and system models and accredit these tools. Verification, Validation, and Accreditation (VV&A) efforts ensure the application of M&S results is appropriate for the intended purpose. Every Coast Guard M&S, whether embedded in operational systems, stand-alone systems or integrated with other M&S systems for distributed simulation is required to be verified and validated prior to its use. Confidence in a particular model or simulation must be justified before its results are used in decisions involving resources, risk to human life, or the possible loss of critical Coast Guard capabilities. Human Systems Integration Model verification and validation is planned for FY 2011. The Pre-Acquisition Cost and the Sensor Performance models will begin the accreditation process.

#### Acquisition Program Support

- Unmanned Aerial Systems (UAS)  
The Coast Guard, along with CBP, is evaluating both land- and cutter-based UAS to provide cost-effective solutions for enhanced maritime surveillance and cutter mission effectiveness. As a critical step in supporting the Coast Guard's UAS Strategy, the RDT&E Program plans to conduct a land-based advanced concept technology demonstration (ACTD) in FY 2012. To that end the Program will develop a sound and actionable cutter-based UAS procurement plan and an ACTD execution plan.
- Pre-Acquisition Exploration for the Surface Fleet  
Explore the maturity of modern technology areas and build knowledge and experience crucial to reducing risk of future major acquisitions of cutters, including the Offshore Patrol Cutter (OPC), and Inland Rivertenders. To determine technical maturity and applicability, the technology areas planned include: (1) launch and recovery, (2) modern propulsion systems, (3) "green" technologies, and (4) modern materials.

These recapitalization projects are in the pre-acquisition phase. To improve the capabilities delivered while conforming to cost, schedule, and performance

restrictions, several new concepts and modern technologies must be explored early. In FY 2011, the RDT&E Program will analyze and demonstrate propulsion alternatives for cutters that improve operational efficiency during low-speed maneuver and loitering operations.

#### Operational Program Support

- Sensor Optimization, Automation, and Visualization  
Recent and future acquisitions are introducing a new generation of sensors with highly increased capabilities and complexity. Consequently, there is a need for updated Coast Guard search and law-enforcement effectiveness data. The RDT&E Program will: (1) optimize and automate sensor performance of the new generation aviation-, surface-, and shore-based systems to enhance operational missions, (2) improve modeling & simulation tools by providing the real-world data needed to improve M&S accuracy, and (3) enhance the understanding of the results through updated visualization techniques. Sensor Optimization will realize the full potential of these new sensors and assign each sensor its most effective search patterns. Sensor Automation will address the leap in technological complexity of these new systems by making these sensors as fully automatic as possible to allow Coast Guard operators to concentrate on the mission. Sensor Visualization will apply sensor-visualization techniques to expand sensor applicability to a wider range of audiences and uses.

#### Regulatory Program Support

- Oil Spill Detection/Response (Oil Spill Liability Trust Fund)  
Invest in the infrastructure and capabilities development necessary to identify those technologies most effective in preventing, managing and mitigating Maritime Environmental Response incidents involving oil spills that could potentially threaten sensitive maritime and coastal environments or critical coastal infrastructure. Work benefits regulatory program managers in the area of oil spill prevention, detection, and response.

Continue research to develop systems and operational processes to address performance gaps in heavy, viscous oil recovery. The objective is to develop a system to detect, collect, and recover heavy oil from the sea floor. The focus in FY 2011 is to conduct proof of concept testing of promising capabilities and techniques for recovering heavy oil on the bottom. Evaluation of the most promising of those capabilities and techniques would follow in future years.

The ability to recover heavy, viscous oil prior to its impact on the coastline remains an elusive capability. The underwater environment poses major problems including poor visibility, difficulty tracking oil spill movement, colder temperatures, limited containment methods and technologies and the electric or mechanical recovery equipment compatibility with water.

- Ballast Water Treatment Systems  
Complete investigation and development of rigorous and defensible test procedures. Based on credible performance data, recommend procedures and techniques for routine shipboard ballast water treatment compliance testing to support Coast Guard decisions on certifying commercial ballast water treatment systems.

Continue investments and partnerships with entities conducting ballast-water-treatment system testing to test the efficacy of such systems and methods in both salt and fresh water. This work will benefit regulatory program managers in the area of prevention and mitigation of non-indigenous species invasion (e.g., zebra mussels) through vectors such as ballast-water.

Methodologies are needed to test and certify design criteria for ballast-water-treatment systems in a shipboard environment, investigate how to minimize other-than-ballast-water introduction of NIS (e.g., via hull fouling), and determine ways to mitigate effects.

- Arctic Operations  
Explore ways to modernize Coast Guard capabilities and concepts of operations (CONOPS) to successfully accomplish Coast Guard missions within the Arctic region. Insights gained from these activities will inform a Technology Strategy and Technology Plan that can greatly assist both development of policy and doctrine, including validation of operational concepts, identification of capability gaps, analysis of alternative solutions, and development of performance requirements and specifications.

#### Asset Support Manager Support

- Alternative Energy/Environmental Analysis  
Baseline environmental impact analyses of shore-based facilities. Develop business cases for alternative energy technology strategies, based on an understanding of the technologies that have a potential for providing alternative power while lowering the facilities' carbon footprints. The Coast Guard needs to develop and utilize renewable/ sustainable energy sources that are environmentally friendly or it will continue to be subjected to rising energy costs due to an outdated and inefficient utility infrastructure.
- Coast Guard Fire and Safety Test Future Capabilities  
Based on the mission analysis of the Coast Guard's Fire and Safety Test Detachment (FSTD), determine the best use of the facility and personnel. There are several viable options, ranging from closing the unit to changing the mission to acquisition test and evaluation support. The program will begin execution of the final recommendations for the disposition of both the FSTD and the T/V

STATE OF MAINE, the detachments testing environment. The STATE OF MAINE is beyond its useful life as a platform for fire safety testing and its age and condition have the potential to create a future liability for the Coast Guard.

Actions required to return the T/V STATE OF MAINE to the Maritime Administration (MARAD) include removing Coast Guard equipment, preparing the vessel for transit, dredging to enable the vessel's passage to the main channel, and providing a commercial tow to the designated MARAD site.

#### **IV. Program Justification of Changes**

\* Position changes in the table reflect the result of a President's Office of Management and Budget Circular A-76 study completed at the Research & Development Center in 2008.

\*\* The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year.

\*\*\* The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular paygrade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

### PPA Mission Statement

The Coast Guard RDT&E Appropriation serves as a strategic investment in real-world exploration to quickly gain knowledge and experience enhancing the sound early decisions that have a significant effect on a system's overall value and risk profiles. The RDT&E Appropriation funds foundational work for decision-makers of future acquisition, operations, regulatory, and support initiatives before long-term commitments are made through the AC&I or OE appropriations. Knowledge and experience are gained through mission validation, gap analysis, modeling and simulation, requirements validation, operational analysis, market research, alternatives analysis, technology maturity assessments, cost estimation, prototyping, operational assessments, testing, and evaluation.

## Summary Justification and Explanation of Changes

### Salaries and Benefits

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 10,877	\$ 12,065	\$ 12,452	\$ 387

FY 2011 request includes funding for the proposed pay raise (1.4% for military and 1.4% for civilians), medical benefits, other mandatory personnel entitlements.

### Travel

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 1,839	\$ 3,550	\$ 1,575	\$ (1,975)

Requested funds cover the travel costs of Coast Guard military service members, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2011 request reflects the anticipated need for R&D project related travel.

### Lease of Vehicles

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 14	\$ 43	\$ 12	\$ (31)

FY 2011 request reflects the anticipated need for government vehicles leases.

### Transportation of things

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 94	\$ 288	\$ 82	\$ (206)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2011 request reflects the anticipated need for the transportation of things related to R&E research projects.

### GSA rent

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ -	\$ 1,116	\$ 1,150	\$ 34

GSA rent includes all payments for GSA leased facilities for rental space, land and structures. Increased funding in FY 2011 is a result of annual adjustment to the lease for the Research and Development Center's facility in New London, CT.

**Communication, utilities, and misc charges**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	158	\$	500	\$	180	\$	(320)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2011 request reflects the anticipated need for R&D related projects.

**Advisory and Assistance**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	1,942	\$	3,225	\$	1,325	\$	(1,900)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Decreased funding request in FY 2011 reflects shifts in project funding for technology demonstrations, testing and evaluations and their progress.

**Other services**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	236	\$	723	\$	207	\$	(516)

Other services include contractual services with non-federal sources that are not otherwise classified under Object Class 25. The FY 2011 request reflects the anticipated need for R&D projects.

**Operation & maintenance of facilities**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	6	\$	18	\$	5	\$	(13)

Operation and maintenance of facilities includes all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Decreased funding in FY 2011 is the result of reduced maintenance facilities costs.

**Research and development**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	1,870	\$	10,042	\$	1,480	\$	(8,562)

Decreased funding in FY 2011 is primarily a reflection of the assumption that all FY 2010 BA in this two-year account will be obligated in the first year.

**Operation & maintenance of equipment**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	3	\$	9	\$	3	\$	(6)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2011 request reflects the anticipated need for R&D projects.

**Supplies and materials**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	1,439	\$	4,408	\$	1,190	\$	(3,218)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. The FY 2011 request reflects the anticipated need for R&D projects.

**Equipment**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	426	\$	2,775	\$	373	\$	(2,402)

This object class covers the purchase of R&D materials for technology demonstrations, testing and evaluations and their progress. The FY 2011 request reflects the anticipated need for R&D projects.

**U. S. Coast Guard**  
**Medicare-Eligible Retiree Health Care Fund Contribution**

**I. Appropriation Overview**

**A. Mission Statement for the Health Care Fund Contribution:**

The Medicare-Eligible Retiree Health Care Fund Contribution (HFC) funds accrual of the Coast Guard's military Medicare-eligible health benefit contribution to the Department of Defense (DoD) Medicare-Eligible Retiree Health Care Fund. Contributions are for future Medicare-eligible retirees currently serving on active duty in the Coast Guard, as well as retiree dependents and their potential survivors. The authority for the Coast Guard to make this payment on an annual basis was provided in P.L. 108-375, the 2005 Defense Appropriations Act. While this expenditure requires no annual action by Congress, it is scored as discretionary spending.

**B. Budget Activities:**

There are no budget activities directly related to providing this benefit to active duty personnel and their dependents.

**C. Budget Request Summary:**

The Coast Guard estimates that \$265.321 million will be paid to the DoD Medicare-Eligible Retiree Health Care Fund in FY 2011 to support the benefits outlined above. The total adjustment to the base is a decrease of \$685.000 thousand.

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**U. S. Coast Guard**  
**Medicare-Eligible Retiree Health Care Fund Contribution**  
**Program Performance Justification**  
(Dollars in Thousands)

#### PPA I: MEDICARE-ELIGIBLE RETIREE HEALTH CARE FUND CONTRIBUTION

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actual</b>	...	...	<b>\$257,305</b>
<b>2010 Enacted</b>	...	...	<b>266,006</b>
2011 Adjustments-to-Base			(685)
<b>2011 Current Services</b>	...	...	<b>265,321</b>
2011 Program Change	...	...	...
<b>2011 Request</b>	...	...	<b>265,321</b>
Total Change 2010-2011	...	...	(685)

The Coast Guard requests \$265.321 million for this activity. This is \$685.000 thousand below the FY 2010 enacted level.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Medicare-Eligible Retiree Health Care Fund Contribution (HFC) will fund accrual of the Coast Guard's military Medicare-eligible health benefit contribution to the Department of Defense Medicare-Eligible Retiree Health Care Fund. Contributions are for future Medicare-eligible retirees, retiree dependents and survivors in the Coast Guard.

### PPA Mission Statement

The Medicare-Eligible Retiree Health Care Fund Contribution (HFC) will fund accrual of the military Medicare-eligible health benefit contribution to the Department of Defense Medicare-Eligible Retiree Health Care Fund. Contributions are for future Medicare-eligible retirees, retiree dependents and survivors in the Coast Guard.

### Summary Justification and Explanation of Changes

#### Salaries and Benefits

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
	\$ 257,305	\$	266,006	\$	265,321	\$	(685)

Salaries and Benefits include the annual contribution to the military Medicare-Eligible Retiree Health Care Fund. The FY 2011 request includes a decrease of \$685 thousand.

**U. S. Coast Guard**  
**Retired Pay**

**I. Appropriation Overview**

**A. Mission Statement for Retired Pay:**

The Retired Pay (RP) appropriation provides payments as identified under the Retired Serviceman's Family Protection and Survivor Benefits Plans, and other retired personnel entitlements identified under National Defense Authorization Acts. This includes payment for medical care of retired personnel and their dependents.

**B. Budget Activities:**

There are no budget activities directly related to providing this benefit to retired military personnel and their dependents.

**C. Budget Request Summary:**

The Coast Guard requests \$1.401 billion in FY 2011 to support the benefits outlined above. The Coast Guard also requests that any FY 2011 funding remain available until expended. This is consistent with the enacted Department of Homeland Security Appropriations Act of 2010 (P.L. 111-83). The Retired Pay appropriation is scored as a mandatory appropriation in the budget process.

**PPA Mission Statement**

Retired Pay (RP) will provide payments as identified under the Retired Serviceman's Family Protection and Survivor Benefits Plans, payments for career status bonuses, concurrent receipts and combat related special compensation identified under the National Defense Authorization Act.

## Summary Justification and Explanation of Changes

### Salaries and Benefits

2009 Actual	2010 Enacted	2011 Request	2010-2011 Change
\$ 1,092,855	\$ 1,145,560	\$ 1,173,700	\$ 28,140

Requested increase accounts for cost-of-living adjustments for all retirement and most survivor annuities as well as entitlement benefits authorized by the National Defense Authorization Act.

### Medical care

2009 Actual	2010 Enacted	2011 Request	2010-2011 Change
\$ 188,000	\$ 218,398	\$ 227,000	\$ 8,602

Increase accounts for the projections for medical benefits. Once a member becomes eligible for Medicare, the Medicare-Eligible Retiree Health Care Fund (HFC) is responsible for these benefits.

## **U. S. Coast Guard** **Boat Safety**

### **I. Appropriation Overview.**

#### **A. Mission Statement for Boat Safety:**

The Boating Safety (BS) program is designed, through preventive means, to minimize loss of life, personal injury, property damage and environmental impact associated with the use of recreational boats. The program directly supports the Coast Guard's Marine Safety mission by promoting safe and enjoyable use of public U.S. waterways.

In its role as the designated National Recreational Boating Safety (RBS) Program Coordinator, the Coast Guard is charged with managing dedicated user fee funding to support the National Recreational Boating Safety Program provided from the Sport Fish Restoration and Boating Trust Fund (formerly Aquatic Resources Trust Fund). Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts from the preceding fiscal year (i.e., FY 2011 funding will be a percentage of FY 2010 trust fund receipts).

#### **B. Budget Activities:**

Boating Safety activities include overseeing manufacturer compliance with USCG regulations; grantmaking to States and national non-profit boating safety organizations; conducting surveys to measure recreational boating activity; continuing the "Boat Responsibly!" national outreach and awareness initiative; promulgating safety regulations; and measuring life jacket wear rates, including the effectiveness of voluntary and mandatory efforts to increase life jacket usage.

#### **C. Budget Request Summary:**

The FY 2011 budget reflects the anticipated level of funding that would be available from the trust fund for boating safety. This is based on current estimates of FY 2010 trust fund receipts from the Office of Tax Analysis at the Department of the Treasury (adjusted to reflect amendments of current law enacted in P.L. 109-59). The estimated total distribution from the trust fund for boating safety in FY 2011 is \$119.000 million. Of that amount, \$5.500 million is available for use by the Coast Guard to coordinate and execute new and enhanced National RBS Program activities. The balance is authorized for the State RBS Federal Financial Assistance Program established by 46 U.S.C. 13101, et seq., minus not more than five percent for national boating safety activities of national non-profit public service organizations, and not more than two percent for Coast Guard expense to administer State RBS programs. This represents a \$9.889 million decrease from the FY 2010 enacted level.

Budget authority for personnel to conduct investigations and activities related to State recreational boating safety programs is not provided by regular, annual Coast Guard

appropriations. It is available to the Coast Guard through transfers to this account from trust accounts in the Department of the Treasury. These amounts are available until expended, but are limited in purpose and amount in accordance with existing statutes.

<b>2011 Current Services</b>	<b>8</b>	<b>8</b>	<b>128,952</b>
2011 Program Change	...	...	(9,952)
<b>2011 Request</b>	<b>8</b>	<b>8</b>	<b>119,000</b>
Total Change 2010-2011	...	...	(9,889)

The Coast Guard requests \$119.000 million for this activity. This is a decrease of \$9.889 million from the FY 2010 enacted level.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

Significant accomplishments in FY 2009 included:

Achieved the target performance goal of 4,132 casualties or fewer through the following measures:

- Conducted national observation studies that measured life jacket wear.
- Measured the effectiveness of a U.S. Army Corps of Engineers (USACE) project to mandate life jacket wear by all boaters aboard certain boats on USACE waters in southwest Pennsylvania and northern Mississippi. Preliminary results from USACE in northern Mississippi indicate significant increases in life jacket wear rates. The voluntary life jacket wear project in California has not significantly increased wear rates.
- Increased boating safety law enforcement, education and search and rescue efforts by the States through availability of recreational boating safety grant funds. Particularly, worked to have the Sport Fish Restoration and Boating Trust Fund reauthorized.
- Focused on assuring manufacturer compliance with boat construction standards (i.e., identified boats and manufacturers whose boats were involved in accidents where carbon monoxide, flotation, capacity, or fuel systems are causal factors).
- Progressed in promulgating regulations that: (1) require life jacket wear in high-risk recreational boating activities if voluntary measures fail to achieve an acceptable wear rate; (2) require installation and wear of emergency cut-off

devices (mechanical or wireless) on vessels under a certain length; (3) require operators to turn off the vessel when a swimmer in the water is in close proximity to the stern of the vessel; (4) revise and update requirements for state numbering systems and boat accident reporting.

- Began a Boating Under the Influence (BUI) initiative (Operation Dry Water) that reduced the number of casualties where the use of alcohol by a boat's occupants was a causal factor in an accident.
- Began an operator compliance initiative that reduced deaths due to navigation rules violations (i.e., Reckless/Negligent Operation, Excessive Speed, Improper Lookout, Operator Inattention, and Rules of the Road).
- Developed a State program approval systems (i.e., adequate enforcement/sufficient patrol, adequate education, numbering system, casualty reporting system).
- Continued national outreach and awareness initiative, "Boat Responsibly!"

FY 2010 planned accomplishments include:

Achieve the target performance goal of 4,145 casualties or fewer through the following measures:

- Conduct national observation studies that measure life jacket wear. Continue to measure effectiveness of a U.S. Army Corps of Engineers (USACE) project to mandate life jacket wear by all boaters aboard certain sized boats on USACE waters in southwest Pennsylvania and northern Mississippi. Preliminary results from USACE in northern Mississippi indicate significant increases in life jacket wear rates. The voluntary life jacket wear project in California has not significantly increased wear rates. The Coast Guard is studying these results and will consult as appropriate with the National Boating Safety Advisory Council to consider initiating mandatory requirements for life jacket usage in high-risk scenarios and for high risk vessels (i.e., operating boats less than 21 feet in length).
- Continue the Boating Under the Influence (BUI) initiative (Operation Dry Water) to reduce the number of casualties where the use of alcohol by a boat's occupants was a cause of the accident.
- Will conduct national survey on recreational boating. Among other vital information, the survey will provide a participation rate denominator to utilize when measuring the performance goals of the National Recreational Boating Safety Program.
- Conduct an operator compliance outreach initiative to reduce deaths due to navigation rules violations (i.e., Reckless/Negligent Operation, Excessive Speed, Improper Lookout, Operator Inattention, and Rules of the Road).
- Implement and monitor State program approval systems (i.e., adequate enforcement/sufficient patrol, adequate education, numbering system, casualty reporting system).

- Focus on assuring manufacturer compliance with boat construction standards (i.e., identifying boats and manufacturers whose boats are involved in accidents where carbon monoxide, flotation, capacity, or fuel systems are causal factors).
- Progress in promulgating regulations that: (1) require life jacket wear in high-risk recreational boating activities if voluntary measures fail to achieve an acceptable wear rate; (2) if enacted by proposed authorizing legislation, mandate recreational vessel operator education requirements; (3) require installation and wear of emergency cut-off devices (mechanical or wireless) on vessels under a certain length; (4) require operators to turn off the vessel when a swimmer in the water is in close proximity to the stern of the vessel; (5) revise and update requirements for state numbering systems and boat accident reporting.
- If marketing measures prove effective, continuation of additional elements of the national outreach and awareness initiative, “Boat Responsibly!”

FY 2011 planned accomplishments include:

Achieve or meet the target performance goal of 4,180 casualties or fewer through the following measures:

- Conduct national observation studies that measure life jacket wear.
- Continue to measure effectiveness of a U.S. Army Corps of Engineers (USACE) project to mandate life jacket wear by all boaters aboard certain sized boats on USACE waters in southwest Pennsylvania and northern Mississippi. If this project results in a substantial increase in life jacket wear, work with National Boating Safety Advisory Council to consider initiating mandatory requirements for life jacket usage in high risk areas (i.e., operating boats less than 21 feet in length).
- Continue the Boating Under the Influence (BUI) initiative (Operation Dry Water) to reduce the number of casualties where the use of alcohol by a boat’s occupants was a cause of the accident.
- Conduct an operator compliance outreach initiative to reduce deaths due to navigation rules violations (i.e., Reckless/Negligent Operation, Excessive Speed, Improper Lookout, Operator Inattention, and Rules of the Road).
- Implement and monitor State program approval systems (i.e., adequate enforcement/sufficient patrol, adequate education, numbering system, casualty reporting system).
- Focus on assuring manufacturer compliance with boat construction standards (i.e., identifying boats and manufacturers whose boats are involved in accidents where carbon monoxide, flotation, capacity, or fuel systems are causal factors).
- Progress in promulgating regulations that: (1) require life jacket wear in high-risk recreational boating activities if voluntary measures fail to achieve an acceptable wear rate; (2) if enacted by proposed authorizing legislation, mandate recreational vessel operator education requirements; (3) require installation and wear of emergency cut-off devices (mechanical or wireless) on vessels under a certain length; (4) require operators to turn off the vessel when a swimmer in the water is

in close proximity to the stern of the vessel; (5) revise and update requirements for state numbering systems and boat accident reporting.

- If marketing measures prove effective, continuation of additional elements of the national outreach and awareness initiative, “Boat Responsibly!”

### PPA Mission Statement

The Boating Safety (BS) program is designed, through preventive means, to minimize loss of life, personal injury, property damage and environmental impact associated with the use of recreational boats. The program directly supports the Coast Guard's Marine Safety mission by promoting safe and enjoyable use of public U.S. waterways. In its role as the designated National Recreational Boating Safety (RBS) Program Coordinator, the Coast Guard is charged with managing dedicated user fee funding to support the National Recreational Boating Safety Program provided from the Sport Fish Restoration and Boating Trust Fund (formerly Aquatic Resources Trust Fund). Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts from the preceding fiscal year (i.e., FY 2011 funding will be a percentage of FY 2010 trust fund receipts).

## Summary Justification and Explanation of Changes

### Salaries and Benefits

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 853	\$ 1,015	\$ 1,077	\$ 62

The FY 2011 request includes funding for the proposed pay raise (1.4% for civilians), medical benefits, other mandatory personnel entitlements.

### Travel

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 208	\$ 233	\$ 169	\$ (64)

Transportation funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Decreased funding in FY 2011 is a result of less Coast Guard personnel traveling for the RBS program activities.

### Transportation of Things

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 3	\$ 3	\$ 2	\$ (1)

Transportation of things includes all costs of the care of such things while in the process of being transported and other services incident to the transportation of things. Decreased funding in FY 2011 is a result of reduced transportation of things for the RBS program activities.

### Printing and reproduction

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 95	\$ 106	\$ 77	\$ (29)

Decreased funding in FY 2011 request for printing and reproduction of the RBS program activities.

### Advisory and assistance services

2009 Actual	2010 Enacted	2011 Request	2010 - 2011 Change
\$ 945	\$ 1,058	\$ 770	\$ (288)

Decreased funding in FY 2011 request for advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

**Other Services**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	3,825	\$	4,281	\$	3,116	\$	(1,165)

Other services include reported contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Decreased funding in FY 2011 reflects changes in the revenues from trust fund receipts. Non-Federal services for boating safety activities will be reduced across all States.

**Supplies and materials**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	92	\$	103	\$	75	\$	(28)

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Decreased funding in FY 2011 is a result of reduced supplies and materials for the National Recreational Boating Safety (RBS) Program activities.

**Grants, Subsidies and Contributions**

	2009		2010		2011		2010 - 2011
	Actual		Enacted		Request		Change
\$	139,566	\$	156,222	\$	113,714	\$	(42,508)

Under the provisions of the Sportfishing and Recreational Boating Safety Act of 2005 (Subtitle A, Title X, P.L. 109-59), the Coast Guard receives a percentage distribution of total trust fund receipts from the preceding fiscal year (i.e., FY 2011 funding will be a percentage of FY 2010 trust fund receipts).

**U. S. Coast Guard**  
**Oil Spill Recovery**

**I. Appropriation Overview**

**A. Mission Statement for Oil Spill Recovery:**

The Oil Spill Recovery Program operates under the authority of Title I of the Oil Pollution Act of 1990 (OPA), as amended, which provides for the use of the Oil Spill Liability Trust Fund (OSLTF) to pay for federal response to oil spills and claims for uncompensated removal costs and damages resulting from such spills. In Section Seven of Executive Order 12777, the President delegated management responsibility for these uses of the OSLTF to the Secretary of the Department in which the Coast Guard is operating. Upon re-delegation by the Secretary, the Commandant of the Coast Guard delegated responsibility to the National Pollution Funds Center (NPFC), which oversees the OSLTF.

**B. Budget Activities:**

The Oil Spill Recovery Program directly supports our Marine Environmental Protection mission. Program accomplishes the following objectives.

- Provides funding for federal removal actions in response to a discharge or a substantial threat of discharge of oil to navigable waters of the United States
- Compensates claimants for OPA removal costs or damages
- Provides funding to natural resource trustees for Natural Resource Damage Assessment (NRDA)
- Administers the Oil Spill Liability Trust Fund

**C. Budget Request Summary:**

The Coast Guard estimates that expenditures from this account will total \$92.000 million in FY 2011, an increase of \$1.000 million over the FY 2010 enacted level. These estimated expenditures consist of a \$50.000 million expenditure transfer for Federal oil spill response, an estimated \$1.000 million payment to the Prince William Sound Oil Spill Recovery Institute, and \$41.000 million for payment of oil spill removal costs and damages claims, including natural resource damages claims.

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U. S. Coast Guard  
Oil Spill Recovery  
Program Performance Justification  
(Dollars in Thousands)**

#### PPA I: OIL SPILL RECOVERY

	<b>Perm Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actual</b>	...	...	<b>\$139,464</b>
<b>2010 Enacted</b>	...	...	<b>91,000</b>
2011 Adjustments-to-Base			1,000
<b>2011 Current Services</b>	...	...	<b>92,000</b>
2011 Program Change	...	...	...
<b>2011 Request</b>	...	...	<b>92,000</b>
Total Change 2010-2011	...	...	1,000

The Coast Guard requests \$92.000 million for this activity. This is an increase of \$1.000 million from the FY 2010 enacted level.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

- Title I of the Oil Pollution Act of 1990 (OPA), as amended, provides for the use of the Oil Spill Liability Trust Fund (OSLTF) to pay for federal response to oil spills and claims for uncompensated removal costs and damages resulting from such spills. In Section Seven of Executive Order 12777, the President delegated management responsibility for these uses of the OSLTF to the Secretary of the Department in which the Coast Guard is operating. Upon re-delegation by the Secretary, the Commandant of the Coast Guard delegated responsibility to the National Pollution Funds Center (NPFC), which oversees the OSLTF.
- OPA section 5006(b) directs the NPFC to make annual payments to the Prince William Sound Oil Spill Recovery Institute of the interest on a portion of the OSLTF balance.

Significant accomplishments in FY 2009 included:

- Oversaw execution of \$50.000 million in funding for federal response to 500 oil spills.
- Executed payment of \$1.100 million to the Oil Spill Recovery Institute.
- Executed payment of \$88.364 million in claims for uncompensated removal costs and damages, which included natural resource damages, resulting from oil spills.

FY 2010 planned accomplishments include:

- Oversee execution of \$50.000 million in funding for federal response to 500 oil spills.

- Execute payment of an estimated \$1.100 million to the Oil Spill Recovery Institute.
- Pay \$39.900 million in claims for uncompensated removal costs and damages, including natural resource damages, resulting from oil spills.

FY 2011 planned accomplishments include:

- Oversee execution of \$50.000 million in funding for federal response to 500 oil spills.
- Oversee payment of an estimated \$1.200 million to the Oil Spill Recovery Institute.
- Oversee payment of \$40.800 million in claims for uncompensated removal costs and damages, including natural resource damages, resulting from oil spills.

**PPA Mission Statement**

The Oil Spill Recovery fund will provide a source of funds for removal costs and damages resulting from oil spills, or the substantial threat of a spill, into navigable waters of the U.S. In accordance with the provisions of the Oil Pollution Act of 1990, the President may make available up to \$50 million annually from the Fund for oil spill removal activities. The Fund also pays all eligible claims for removal costs and damages resulting from oil spills.

**Summary Justification and Explanation of Changes**

**U. S. Coast Guard**  
**Miscellaneous Funds**

**I. General Gift Fund Overview**

**A. Mission Statement for General Gift Fund**

The Coast Guard General Gift Fund is authorized under 10 U.S.C § 2601 provisions for such funds within the Department of Defense and the Coast Guard. The General Gift Fund is a vehicle that authorizes the Commandant of the Coast Guard to accept gifts and donations for the benefit of activities such as museums, chapels, and other organizations under the jurisdiction of the Coast Guard. A recent legislative change also authorizes the Coast Guard to accept gifts to be used for the benefit of service members who are wounded, injured or taken ill while in the line of duty, as well as for those members' dependents and survivors.

**B. Budget Activities:**

The General Gift Fund indirectly supports Coast Guard activities.

**C. Budget Bequest Summary:**

The Coast Guard estimates \$80.000 thousand in bequests from various sources to the General Gift Fund in FY 2011.

**Miscellaneous Funds**

**II. Yard Fund Overview**

**A. Mission Statement for Yard Fund**

Coast Guard Yard contributes to all eleven statutory Coast Guard missions through completion of mission-essential logistics and engineering support (e.g., cutter drydocking). The Yard Fund is a revolving account supported by the Coast Guard's Operating Expenses and Acquisition, Construction & Improvements appropriations to pay for FTE and materials required for Coast Guard projects and work orders completed by the Coast Guard Yard, located in Curtis Bay, MD.

**B. Budget Activities:**

Yard Fund activities include logistics and engineering support for Coast Guard vessels. These activities indirectly support Coast Guard missions.

**C. Budget Request Summary:**

Not applicable.

**U. S. Coast Guard**  
**Miscellaneous Funds**

**II. Supply Fund Overview**

**A. Mission Statement for Supply Fund**

The Supply Fund, in accordance with 14 U.S.C. § 650, finances the procurement of uniform clothing, commissary provisions, general stores, technical material, and fuel for vessels over 180 feet in length. The fund is normally financed by reimbursements from the sale of goods.

**B. Budget Activities:**

Supply Fund activities include funding the procurement of uniforms, commission provisions, stores, materials, and fuel. These activities indirectly support Coast Guard missions.

**C. Budget Request Summary:**

Not applicable.

**United States Coast Guard**

**TABLE OF CONTENTS**

I. STRATEGIC CONTEXT FOR FY 2011 BUDGET	
A. Mission and Description of the U.S. Coast Guard .....	USCG-3
B. Major Programs and Key Strategic Issues.....	USCG-4
C. Resources Requested and Performance Impact.....	USCG-10
D. Performance Highlights, Resources, and Alignment to Strategic Goals.....	USCG-13
E. Digest Tables by FYHSP Programs .....	USCG-27

## A. MISSION AND DESCRIPTION

The U. S. Coast Guard is the principal Federal agency responsible for maritime **safety, security and stewardship** in U.S. ports and inland waterways, along the coasts, on the high seas and in other regions where our nation's maritime equities are at stake. As such, the Coast Guard protects the nation's vital economic and security interests throughout the maritime domain, including the marine transportation system, our natural and economic resources, and our maritime borders. Coast Guard personnel are trained to address all threats and all hazards, in accordance with the law and in alignment with National and Department of Homeland Security (DHS) goals, objectives, and missions including:

- Preventing and Protecting Against Terrorism;
- Securing and Managing Our Borders;
- Enforcing and Administering Our Immigration Laws;
- Safeguarding and Securing Cyberspace; and
- Ensuring Resilience to Disasters.

### **The Coast Guard Value Proposition: *Here to Protect, Ready to Rescue***

The Coast Guard delivers value to the public through the execution of its 11 statutorily-mandated mission programs. Execution of these complementary missions ensures fulfillment of the Coast Guard's primary roles of maritime safety, security, and stewardship. These roles and missions are *enduring* – long-standing responsibilities accrued over two centuries of service.

Coast Guard assets and personnel provide the Nation with an agile force that efficiently maximizes limited resources and return on investment. While each Coast Guard mission has a direct linkage to one of these three primary roles, many also overlap to support others. This complementary and multi-faceted character transcends all aspects of the Coast Guard, enabling personnel and assets to perform various safety, security, and stewardship missions and quickly change focus to the most pressing (i.e., highest risk) need. For example, assets performing patrols of our Exclusive Economic Zone (EEZ) to protect living marine resources can be rapidly redirected to rescue a mariner in distress, or respond to a border security threat.

## **U. S. Coast Guard Snapshot**

### **Mission Programs:**

Search and Rescue  
Marine Safety  
Aids to Navigation  
Domestic Ice Operations  
Marine Environmental Protection  
Living Marine Resources  
Drug Interdiction  
Undocumented Migrant Interdiction  
Other Law Enforcement  
Ports, Waterways, and Coastal Security  
Defense Readiness

### **Major Commands:**

Atlantic Area Command – Portsmouth, VA  
Pacific Area Command – Alameda, CA  
1<sup>st</sup> District – Boston, MA  
5<sup>th</sup> District – Portsmouth, VA  
7<sup>th</sup> District – Miami, FL  
8<sup>th</sup> District – New Orleans, LA  
9<sup>th</sup> District – Cleveland, OH  
11<sup>th</sup> District – Alameda, CA  
13<sup>th</sup> District – Seattle, WA  
14<sup>th</sup> District – Honolulu, HI  
17<sup>th</sup> District – Juneau, AK  
Coast Guard Headquarters – Washington, D.C.

### **Workforce (per FY11 President's Request):**

Military	42,000
Civilian	9,121
Selected Reserves	8,100
Auxiliary	30,047

### **Major Assets (per FY11 President's Budget):**

Major Cutters	39
Patrol Boats	119
Icebreakers	13
Buoy Tenders	76
Helicopters	139
Fixed Wing Aircraft	52
Boats	1,700

Moreover, the Coast Guard's ability to conduct surge operations and leverage partnerships in response to nationally significant safety, security, or environmental threats is critical to disaster recovery and exemplifies the resiliency of the Service and the Department. At a time when "whole of government" approaches are critical to achieving national objectives across a broad spectrum of strategic challenges from Overseas Contingency Operations in Iraq and Afghanistan to hurricane, terrorism, and pandemic preparedness, It must be recognized that the Coast Guard remains a unique and invaluable instrument of national safety and security, providing the primary federal maritime presence to prevent and protect against terrorism, enforce laws, secure and manage the border, conduct response operations, ensure resilience from disasters, and protect the environment.

It is this multi-mission flexibility and interagency cooperation, combined with the dedication of the Coast Guard workforce, which has yielded over 200 years of operational excellence, and will enable the Coast Guard to continue to supply valuable service to the Nation in the 21<sup>st</sup> century.

## B. MAJOR PROGRAMS AND KEY STRATEGIC GOALS AND CHALLENGES

### *Key Strategic Issues*

#### *Reducing Operational Capacity Today to Preserve it for Tomorrow*

##### **Recapitalization**

The FY 2011 President's Budget seeks funding for recapitalization of increasingly outdated and unreliable assets (e.g. cutters, aircraft, boats, and C4ISR) and infrastructure. This is the Department's top budget priority for the Coast Guard. ***Recapitalization is vital to preserving future surface, air, and shore asset capability, and is an essential investment for the Nation.***

What the Coast Guard builds today will secure the Nation's borders, rescue those in peril, preserve our economic resources and vitality, and protect the environment for decades to come.

##### **Mitigating Near-Term Impacts of Service Reductions through Risk Management**

The FY 2011 President's Budget request leverages targeted reductions in operational capacity, efficiencies, and consolidation initiatives to support continued recapitalization of aging assets and infrastructure. ***The Coast Guard will deliver service to the American public in FY 2011 at reduced capacity.*** Operational commanders will partially mitigate near-term risks through deliberate, risk-based resource allocation, and will continue to meet the nation's highest order steady-state maritime safety, security, and stewardship needs. However, because the Coast Guard will be reducing the overall level of service it provides the Nation, performance will be diminished in a variety of areas. Reductions in performance are driven by fiscal constraints, not fundamental changes in Coast Guard mission program requirements or performance goals.

##### **Sustaining Long-Term Mission Performance**

While the Coast Guard will manage risk to deliver service regardless of operational capacity, projected FY 2011 mission program performance levels will fall well short of achieving Coast Guard, DHS, and National goals and objectives.

##### *Performance Goals and Measures Remain Unchanged*

Coast Guard performance goals are outcome oriented statements that describe the value delivered to the goal's beneficiaries and the American public. Performance measures are used to gauge performance and assess progress in meeting the performance goal. Consistent with general

principles of performance management, goals and measures are not adjusted based on projected resource levels, however year to year targets may be adjusted with changing funding constraints.

### *Performance Targets*

Coast Guard performance measures have associated “targets” that project a future level of performance for the Future Years Homeland Security Program (FYHSP) time horizon. Per DHS/OMB guidance, Coast Guard performance targets are “aggressive but achievable,” consistent with projected FY 2011 operating capacity, and therefore subject to change based on available resources. The Coast Guard’s FY 2011 performance targets have been updated accordingly.

Of note, *‘Aggressive’ and ‘achievable’ targets do not necessarily equal acceptable performance toward Coast Guard, DHS, and National performance goals.* For example, the Coast Guard has lowered its FY 2011 Drug Interdiction target from 18.5% in FY 2010 to 15.5% in FY 2011 commensurate with the targeted operational reductions proposed in the FY 2011 President’s Budget (e.g., advanced cutter and aircraft decommissionings). This reduction in performance does not change the Coast Guard performance goal of reducing the flow of illegal drugs from entering the United States via non-commercial maritime shipping sources or the Office of National Drug Control Policy’s (ONDCP) National goal of 40% removal. Section D provides a comprehensive overview of performance targets through FY 2011.

In general, the long-term performance impacts associated with the operational reductions proposed in the President’s Budget ultimately depend on the pace and stability of future recapitalization (e.g., the performance loss associated with the advanced decommissioning of cutters and aircraft will be mitigated through the timely future delivery of new replacement assets).

### *Major Programs*

**Search and Rescue (SAR):** The Coast Guard SAR mission program performance goal is to save people in imminent danger on our Nation’s oceans and waterways, and directly contributes to the DHS mission of *Ensuring Resilience to Disasters*. In FY 2009, the Coast Guard achieved its SAR mission-program performance target of saving at least 76% of persons in imminent danger. The Coast Guard transitioned to a new measure, the percent of people in imminent danger saved in the maritime environment, to better show lives unaccounted for or persons still missing when SAR operations cease. The Coast Guard also enhanced its ability to detect and locate persons in distress through technology improvements such as Rescue 21, which now covers nearly 40,000 miles of the Nation’s coastline, and the installation of advanced equipment on response assets, such as the 406 mega-Hertz direction finders on additional aircraft and Digital Selective Calling capability on additional cutters and small boats. The SAR program expects continued operational improvements in FY 2010 with additional SAR-related technology upgrades. Enhancing Command Center performance will be a top priority in FY 2010. While the decommissioning of High Endurance Cutters (HEC) and air assets will reduce overall SAR and operational surge capacity, the FY 2011 budget request preserves basic SAR requirements (i.e., minimum required asset readiness) through asset reallocation and risk management, and supports investment in enhanced SAR capability such as Rescue 21 and the Response Boat-Medium (RB-M).

**Ports, Waterways, and Coastal Security (PWCS):** The Coast Guard PWCS mission program performance goal is to manage terror-related risk in the U.S. maritime domain to an acceptable level. This mission program directly supports the DHS mission of *Preventing and Protecting Against Terrorism*. The Coast Guard met its FY 2009 PWCS performance target by reducing 31%

of the maritime terrorism risk over which the Coast Guard has influence. This is attributable to across-the-board improvements in maritime security regimes, maritime domain awareness, and security and response operations. Specifically, the Coast Guard International Port Security program verified the effectiveness of anti-terrorism measures and security in 35 foreign ports. Additionally, maritime domain awareness of global shipping traffic was improved through enhancements in the Nationwide Automatic Identification System (AIS) and the start-up of the Long Range Identification and Tracking (LRIT) system. While primarily a safety and collision avoidance system, the Coast Guard also leverages AIS capability to support maritime security operations. Lastly, the Coast Guard focused its allocation of resources on activities such as waterborne patrols and escorts, high interest vessel boardings, and on higher risk maritime critical infrastructure and key resources.

In FY 2011, the Coast Guard plans to decommission five of twelve (42%) Maritime Safety and Security Teams (MSSTs). Reducing MSST capacity represents a trade-off between near-term operational risk and continued recapitalization of surface and aircraft fleets to preserve long-term multi-mission capability and readiness. While the Coast Guard improves security and response operations by continually assessing its PWCS strategy and operational guidance to the field, these decommissionings will decrease operational capacity and performance. To help manage risks associated with this reduction, the Coast Guard will implement a regionalized deployable force construct, with resources apportioned to operational commanders based on the highest prevailing risks in the Nation's ports. Unity of effort is expected to improve as the Coast Guard continues to partner with TSA to publish TWIC regulations and better secure and manage our borders. The continued alignment of Coast Guard exercises with the Homeland Security Exercise and Evaluation Program as prompted by recent updates to all 43 Area Maritime Security Plans continues to help ensure the resilience of the Nation's ports to disasters.

**Drug Interdiction:** The Coast Guard Drug Interdiction mission program performance goal is to reduce the flow of illegal drugs entering the United States via non-commercial maritime shipping sources. This mission program directly supports the DHS mission of *Securing and Managing our Borders*. In FY2009, the Coast Guard removed 15.0% of the cocaine coming to the United States through the transit zone (per the Consolidated Counterdrug Database cocaine non-commercial maritime cocaine estimate for FY 2009), falling short of its target of 15.7%. The Coast Guard removed less cocaine in FY 2009 than in FY2008 (by 4%), yet achieved its third highest total removals on record with 160.1 MT of cocaine removed. The first NSC, USCGC BERTHOLF, disrupted a multi-vessel drug transfer in the Eastern Pacific during its first operational patrol in July 2009. The Coast Guard will continue to aggressively pursue recapitalization of its aging major cutter and aircraft fleet in FY 2010 and FY 2011 in part to close the growing gap in major cutter and maritime patrol aircraft available to support the National Drug Control Strategy's transit zone cocaine removal rate goal. In FY 2010, the Coast Guard will expand Airborne Use of Force (AUF) capability to improve the interdiction and "end game" prosecution of drug traffickers using go-fast vessels along littoral routes. The decommissioning of 33% of the HEC fleet and the reduction and realignment of rotary wing assets, to include reduced Operation Bahamas, Turks, and Caicos (OPBAT) presence in FY 2011, will adversely impact the Coast Guard's ability to achieve projected performance consistent with the ONDCP's cocaine removal rate goal. While the Coast Guard will attempt to mitigate a portion of these losses by bolstering Law Enforcement Detachment (LEDET) and AUF capacity, these performance impacts, as well as the Nation's long-term ability to secure its maritime borders, must ultimately be addressed through recapitalization, particularly the National Security Cutter (NSC), Offshore Patrol Cutter (OPC), and Maritime Patrol Aircraft (MPA) programs supported in the FY 2011 budget request.

**Marine Safety:** The Coast Guard's Marine Safety mission program performance goal is to reduce maritime fatalities and injuries in our Nation's oceans and waterways. In FY 2009, the Coast Guard met its Marine Safety mission-program performance targets for Commercial Mariner Safety, Recreational Boating Safety, and Commercial Passenger Safety. The Coast Guard's Marine Safety program ensures the safe operation and navigation of over 20,000 U.S. and foreign flagged vessels, inspects over 70,000 domestic vessels, and carries out more than 11,000 port state control (foreign vessel) examinations annually. The Coast Guard continues to reduce the occurrence of marine casualties and enhance service to mariners, industry, and the public. In FY 2009, the Coast Guard participated in Operation Dry Water, an intensified effort to detect intoxicated boaters and enforce Boating Under the Influence (BUI) laws with the goal of protecting thousands of recreational boaters and reducing death and injuries. With funding provided in FY 2009 and FY 2010, the Coast Guard continues to add civilian marine inspectors and investigators to address industry growth, improve inspector training and capacities, and bolster career paths for personnel with marine science and engineering backgrounds. The Coast Guard recently established seven National Centers of Expertise focused on Vintage Steam Vessels; Marine Casualty Investigations; Chemical-LNG Bulk transport; Towing Vessels; Cruise Ships; Offshore Oil Exploration; and Mariner Suspension and Revocation Proceedings. All of these actions are part of the Coast Guard's Marine Safety Performance Plan (2009-2014), which systematically expands the core experience and capabilities of the Marine Safety Program personnel to better manage and ensure compliance on U.S. and foreign vessels operating in U.S. waters and reduce the risk of casualties, deaths and injuries to targeted goals. The FY 2011 President's Budget supports multiple DHS missions including *Ensuring Resilience to Disasters* and continues investment in the Marine Safety Performance Plan which is vital to the economic health of the Nation.

**Undocumented Migrant Interdiction:** The Coast Guard Migrant Interdiction mission program performance goal is to eliminate the flow of undocumented migrants via maritime routes to the United States. The program aims to deter, detect, and interdict undocumented migrants and transnational smugglers far from the United States shoreline to reduce the flow of undocumented migrants. In FY 2009 the Coast Guard and its other domestic and international partners interdicted 84.4% of undocumented migrants attempting to enter the U.S. via maritime means. The improved outcome is in part due to the reduced number of Cubans smuggled by professional smugglers operating 'go-fasts.' In FY 2009 the smaller Cuban flow has been via slower moving *rusticas*, increasing maritime detection and interdiction success for the Coast Guard and its partners. As a result of reduced migrant flow, in part due to Coast Guard deterrence, the Coast Guard anticipates maintaining baseline performance in FY 2011 despite a reduction in operational capacity. However, the FY 2011 advanced HU-25 aircraft retirement, descoping of OPBAT operations, and advanced major cutter decommissionings will ultimately reduce Coast Guard presence and impact deterrent and interdiction capability. A robust and deployable major cutter, MPA, and patrol boat fleet is essential to maintaining sufficient deterrent presence along traditional maritime migrant routes as well as the ability to quickly respond to mass migration incidents. Consistent with FY 2011 budget priorities, continued recapitalization of the NSC, OPC, FRC, and MPA programs is critical to supporting the DHS missions of *Securing and Managing Our Borders and Enforcing and Administering our Immigration Laws*, and sustaining long-term performance in this program.

**Marine Environmental Protection (MEP):** The Coast Guard MEP mission program performance goal is to reduce oil spills and chemical discharge incidents and mitigate impacts when they occur. This mission program directly supports the DHS mission of *Ensuring Resilience to Disasters*. In FY 2009, the Coast Guard met its MEP performance targets as the five year average of chemical

discharge incidents per 100 million short tons shipped decreased to 17.8 (less than the 25.9 target) and the five year average number of oil spills per 100 million short tons shipped decreased to 11.8 (less than the 13.0 target). In FY 2009, the Coast Guard performed over 17,300 facility inspections and 25,400 container inspections, identifying over 5,200 deficiencies. In addition, the Coast Guard investigated and responded to almost 3,600 pollution incidents, disseminated guidance to better incorporate volunteer organizations into oil spill clean-up operations, and Initiated a Front End Analysis for the Federal On Scene Coordinator Representative roles and responsibilities. The Coast Guard will validate the National Incident Command concept during the 2010 Spill of National Significance exercise. This continued refinement of the National Incident Management System will aid the resilience of maritime communities to disasters, and help mature the Nation's homeland security enterprise. In FY 2010, the Coast Guard will continue to develop a national mandatory Ballast Water Management (BWM) program to support the implementation of a discharge standard. The purpose of the BWM program is to prevent new aquatic species which may be dangerous or harmful to the environment from entering U.S. and international waterways.

**Defense Readiness:** The Coast Guard Defense Readiness mission program performance goal is to improve national security and military strategies by ensuring assets are at the level of readiness required to support Combatant Commanders (COCOMs). These efforts contribute to the DHS missions of *Securing and Managing Our Borders and Preventing and Protecting Against Terrorism*. In FY 2009, the Coast Guard fell short of its performance target as only 31% of Coast Guard assets included in COCOM operational plans were at the required level of readiness (target was 100%). In FY 2010 and FY 2011, Coast Guard assets and personnel will continue to deploy and provide support to the COCOMs. Specifically, the Coast Guard will continue to provide major cutter deployments, Port Security Units, and other forces to support maritime security operations in the U.S. Central Command area of operations. These forces offer unique capabilities in support of Overseas Contingency Operations (OCO), and are a critical component in preventing and protecting against terrorism. The FY 2011 advance decommissioning of multiple HECs, the Coast Guard's primary deployable surface asset for COCOM support, and the readiness challenges associated with maintaining an aging fleet, will continue to put achievement of future performance goals at risk. While the Coast Guard will employ assets on a risk-informed basis, long-term operational gaps must be mitigated through continued recapitalization, specifically the NSC program supported in the FY 2011 President's Budget.

**Living Marine Resources:** The Coast Guard Living Marine Resource (LMR) mission program performance goal is to achieve sustained fisheries regulation compliance. The mission program strives to provide effective presence and professional at-sea enforcement for the conservation and management of living marine resources and their environments, and the associated securing and managing of our borders. The Coast Guard conducted 5,423 living marine resource boardings in FY 2009. Of these boardings, 177 resulted in the detection of at least one significant living marine resource violation yielding an observed compliance rate of 96.7%, just short of the target of 97%. In FY 2010 and FY 2011 the Coast Guard, in support of the Department's objective to protect our Exclusive Economic Zone under its *Securing and Managing Our Borders* mission, will explore strategies to improve LMR program management by increasingly targeting high precedence fisheries. Such initiatives are critically important to mitigating existing major cutter and aircraft capacity gaps. As the Coast Guard decommissions one third of the HEC fleet and retires aircraft prior to delivery of replacement capability, it will be challenged in FY 2011 to provide required effective presence to achieve goals of detection and deterrence of violations of federal fisheries

regulations. Accordingly, the Coast Guard has lowered its primary performance target in FY 2011 to 96%. Consistent with FY 2011 budget priorities, continued recapitalization is critical to ensuring long-term performance in this program, particularly the NSC, OPC, MPA, and FRC programs supported in the FY 2011 budget request. The Coast Guard also intends to deploy a new performance measure to incorporate Coast Guard boarding activity into its higher level performance outcome.

**Aids to Navigation (ATON):** The ATON mission program performance goal is to facilitate safe and efficient movement of goods and people through the Marine Transportation System (MTS). The program provides reliable navigation systems, marine information, and a wide variety of navigation-enabling services to protect the Nation's transportation sector. In FY 2009, the mission met the majority of its Aid to Navigation performance targets including achieving the international standard for reliable ATON systems. In FY 2009, the Coast Guard continued to decrease its backlog for waterways short-range aids (SRA) improvements. Funding this program improves transportation safety on U.S. waterways through new construction, improvements or refurbishment of existing infrastructure. Moreover, Coast Guard ATON assets play a critical role in surging resources to areas impacted by emergencies and major disasters and facilitating the reconstitution of ports and resilience to disasters. The safety and efficiency of the MTS remains vital to continued U.S. economic prosperity. For example, waterborne commerce accounts for approximately 78% of U.S. international trade by volume and 45% by value. According to the American Association of Port Authorities, some 13.3 million U.S. jobs depend on the movement of goods through the Nation's deep-draft seaports, and business activities related to waterborne commerce contribute approximately \$3.15 trillion overall to the U.S. economy.

**Ice Operations:** The Ice Operations mission program performance goal is to support national interests by providing icebreaking and ice-related information services to facilitate transport of people and goods. Ice operations provide domain awareness and support securing the Nation's borders; specifically, these multi-mission platforms operate in ice-laden waters, conduct scientific research, and project presence in remote border areas. In FY 2009, the ice operations mission-program successfully met its performance target. The Coast Guard has long maintained an icebreaking capability in the Great Lakes and in northeastern ports and waterways in support of national interests. America's waterways support critical commerce through regions that face the challenge of heavy ice laden waters throughout much of the winter. Currently, the Coast Guard's domestic icebreaking program supports 11 distinct trade routes and breaks ice jams, providing flood control as an ancillary public benefit. Currently, CGC POLAR SEA is the Nation's only operational heavy icebreaking capability with an expected service life until 2014. With AC&I funding appropriated in FY 2010 the Coast Guard is continuing the reactivation of CGC POLAR STAR from caretaker to operational status. Completion of the reactivation project in FY 2012 is expected to extend POLAR STAR's service life by seven to 10 years. Excluding the CGCs HEALY and MACKINAW, the Coast Guard's assets for icebreaking are nearing the end of their estimated service life and experiencing unexpected equipment failures, leading to increased operational cost and lost operational days. As such, during FY 2010 the Coast Guard will assess the best and most effective ways to meet current and future needs of other Government agencies, industries, and communities reliant upon the services provided by the Ice Operations mission and national priorities in the Arctic detailed in National Security Presidential Directive-66/Homeland Security Presidential Directive-25.

**Other Law Enforcement:** The Coast Guard's Other Law Enforcement (OLE) mission program performance goal is to enhance the security of the U.S. Exclusive Economic Zone (EEZ) and

relevant areas of the high seas by detecting, deterring, and combating illegal, unreported, and unregulated (IUU ) fishing by foreign fishing vessels. This mission directly supports the DHS mission of *Securing and Managing our Borders*. In FY 2009 the Coast Guard achieved its performance target by detecting 112 incursions into the U.S. EEZ (target was less than 195 detected incursions). The majority of incursions were Mexican *lanchas* (small motorboats) in the Gulf of Mexico EEZ. There were 85 detected incursions of these small, elusive vessels in FY 2009, which was well below the past three years' average of 105. The Coast Guard remains challenged to maintain surveillance and interdiction for incursions in the expansive and remote Western Central Pacific (WCP) EEZ and will continue to leverage international and domestic partnerships to aid in coverage of this area. In FY 2010, the Coast Guard will also place observers on U. S. Naval vessels to partially mitigate detection capacity gaps in the WCP EEZ. As the Coast Guard advances the decommissioning of HECs and retirement of aircraft to sustain continued recapitalization, it will be challenged in FY 2011 to maintain its EEZ incursion interdiction rate, particularly in the WCP. Consistent with FY 2011 budget priorities, continued recapitalization is critical to sustaining long-term performance in this program, particularly the NSC, OPC, and MPA programs supported in the FY 2011 President's Budget.

#### C. RESOURCES REQUESTED AND PERFORMANCE IMPACT

***The Coast Guard will reduce operational capability today to preserve it for tomorrow.***

***The Coast Guard's FY 2011 budget request leverages targeted reductions in operational capacity, efficiencies, and consolidation initiatives to support the Service's top budget priority - continued recapitalization of aging assets and infrastructure. Recapitalization is vital to preserving future surface, air, and shore asset capability and mission performance, and remains an essential investment for the Nation despite a period of fiscal constraint. The Coast Guard's ability to field versatile platforms and personnel with broad authorities is one of the U. S. Government's most important strengths in the maritime environment, and is critical to effectively managing limited resources to best serve the Nation's interests.***

Recapitalization: Acquisition, Construction, and Improvement (AC&I)

#### **Air and Surface Fleets**

Preservation of the Coast Guard's maritime capability through the recapitalization of surface and air assets, particularly cutters, the Response Boat-Medium (RB-M), and fixed-wing Maritime Patrol Aircraft (MPA), is a strategic imperative for DHS and the Coast Guard. The timely replacement of High Endurance Cutters (HECs) through the National Security Cutter (NSC) project is the Coast Guard's top recapitalization priority.

The FY 2011 President's Budget continues HEC recapitalization by funding NSC #5 production. While service demands require the continued employment of these aging and increasingly unreliable assets (average age of the HEC fleet is 42 years) well beyond their useful service life, the President's Budget proposes advancing the decommissioning of a limited number of HECs prior to arrival of replacement assets to reinvest operating and maintenance costs in recapitalization initiatives critical to the future readiness and viability of the Coast Guard, particularly the NSC program. In the long term, reducing the strategic maritime risk associated with these decommissionings ultimately depends on sustained major cutter recapitalization as requested in the President's Budget.

Other FY 2011 recapitalization priorities include the HC-144A MPA, Fast Response Cutter (FRC), and RB-M, all of which will replace aging assets (i.e., HU-25 Falcon, 110-foot Island Class Patrol Boat, and 41-foot Utility Boat, respectively) approaching the end of their service lives. Six HC-144A MPA are currently operational and are saving lives and securing the maritime border in the 8<sup>th</sup> District. The first FRC will commence operations in Miami, FL in FY 2011.

The FY 2011 President's Budget also seeks funding for critical Logistics and Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) investments needed to support the operation of surface and air assets.

### **Aging Shore Infrastructure, Including Military Housing**

The President's FY 2011 Budget seeks funding to address the Service's most urgent shore infrastructure recapitalization requirements. Much of the Coast Guard's shore infrastructure is located in the harsh marine environment and requires reconstruction or replacement to restore operational capabilities lost through years of deterioration resulting in a backlog of hundreds of millions of dollars in shore improvement and repair projects. Continued investment in aging Coast Guard facilities is critical to sustaining operations and mitigating occupational safety risks.

For example, the President's Budget seeks funding to rehabilitate an existing pier face for three Coast Guard Buoy Tenders homeported in Newport, RI. The current moorings are in the process of being condemned by the U.S. Navy due to progressive deterioration. The President's Budget also seeks funding for the construction, renovation, and improvement of Coast Guard military family housing.

### **Delivering Services Through Responsible Risk Management: Operating Expenses (OE)**

In addition to reinvesting efficiencies, consolidation initiatives, and operational reductions to sustain recapitalization, the FY 2011 President's Budget supports the operation and maintenance of Coast Guard capability, including personnel pay and allowances, training and recruiting, operating funds for newly acquired assets delivered through Coast Guard recapitalization programs, and unit and depot level maintenance. It also includes a targeted deployable law enforcement capability enhancement to mitigate emergent terrorism and border security risks.

### **Efficiency and Consolidation Initiatives**

The FY 2011 President's Budget also reinvests savings associated with targeted management and technology efficiencies and consolidation initiatives. The Coast Guard will continue to leverage available efficiencies to maximize service delivery and provide the nation with the highest possible return on investment. Proposed efficiency highlights include small boat logistics management improvements, contract insourcing, Headquarters management efficiencies, and the consolidation of intelligence fusion centers under a single operational command.

### **Targeted Operational Reductions**

Proposed operational reductions in the FY 2011 President's Budget include the scheduled decommissioning of aging assets, the advance decommissioning of assets slated for near-term recapitalization, and deliberate, risk-based reductions to operational capacity. Reductions are limited

to areas where efficiencies can be achieved and/or risks can be partially mitigated through reinvestment, re-allocation of resources, or planned recapitalization.

For example, the President's Budget proposes decommissioning four HECs in FY 2011, 33% of the fleet. Although HECs provide critical long-range maritime patrol capability for DHS and the Nation, including primary interdiction capability in drug trafficking transit zones, high seas search and rescue and law enforcement, and defense operations in support of Overseas Contingency Operations (OCO) and theater security cooperation, these assets will eventually be replaced with NSCs. Specifically, two NSCs (25% of the planned fleet) will be partially operational in FY 2011, with two more operational by FY 2014. While decommissioning two HECs prior to arrival of replacement assets reduces near-term operational capacity and performance, the Coast Guard will address associated risks through the strategic re-allocation of remaining assets, and a proposed increase in Law Enforcement Detachment (LEDET) capacity. While service demands require the continued employment of these assets well beyond their useful service life, advancing the decommissioning of a limited number of HECs is a responsible trade-off between near-term operational risk and performance, and the critical need to ensure new assets (i.e., NSCs) are available to provide national maritime capability in the future.

The FY 2011 President's Budget also proposes decommissioning five of the Coast Guard's twelve (42%) Maritime Safety and Security Teams (MSSTs). Reducing MSST capacity is a risk-based decision to optimally allocate resources within current fiscal constraints. MSST operating and maintenance funds will be reinvested to allow continued recapitalization of the Coast Guard's multi-mission surface and aircraft fleets. The risk and performance impacts of this reduction will be partially mitigated through implementation of a regionalized MSST operational construct, with deployable resources apportioned to operational commanders to mitigate the highest risks in the Nation's ports.

Additionally, the President's Budget seeks to execute a risk-based realignment of existing rotary wing (i.e., helicopter) capacity to the Great Lakes region at a lower domestic cost basis to enable further investment in future capability through recapitalization. While this initiative decreases the Service's overall helicopter capacity through reductions in targeted areas (e.g., Operations Bahamas, Turks, and Caicos – OPBAT), it reallocates existing highly capable aircraft to a location where they will be more operationally effective in executing assigned missions. Further, this reallocation will allow the Coast Guard to achieve some savings through the closure of two seasonal Air Facilities as proposed in the President's Budget.

### **Targeted Capacity Enhancement: Deployable Law Enforcement Teams**

The FY 2011 President's Budget seeks funding to mitigate emergent maritime security risks through an increase in deployable Law Enforcement Detachment (LEDET) team capacity. LEDETs perform critical Law Enforcement functions and primarily support the Drug Interdiction and Defense Readiness missions while embarked on naval assets. In FY 2009, the deployment of Coast Guard LEDETs aboard U.S. Navy and partner nation warships accounted for over 50% of total cocaine removals. The LEDET reinvestment assists in mitigating a portion of the overall loss of HEC capability specific to the Drug Interdiction mission, as well as the overall reduction in deployable force capacity associated with MSST decommissionings. However, leveraging the full benefit of increased LEDET capacity is dependent on the future availability of U. S. Navy and partner nation warship platforms.

## Leveraging New Assets to Provide Enhanced Maritime Safety and Security Capability

The FY 2011 President's Budget seeks funding to operate newly acquired assets delivered through Coast Guard recapitalization programs. In general, replacement assets such as the NSC, MPA, FRC, and Response Boat-Medium (RB-M) provide vastly improved capability over the aging legacy assets they are replacing. Additionally, replacing assets such as HECs with new, more reliable capability (i.e., NSCs) helps reduce the risk of significant unplanned maintenance liabilities.

The increased range, endurance, surveillance, and command and control capability associated with these assets will improve the Coast Guard's ability to manage near-term operational risks as it leverages FY 2011 resources to recapitalize. In the long-term, timely replacement of aging legacy assets will enable the Coast Guard to provide increased overall performance to the Nation.

### D. PERFORMANCE HIGHLIGHTS, RESOURCES, AND ALIGNMENT TO STRATEGIC GOALS

For each mission-program, the program performance goal, alignment to Secretary's Priorities, total dollars and FTE, and Government Performance and Results Act performance measure(s) are shown below. Additional measures are also displayed, as appropriate, to provide a more thorough context of expected performance results.

<b>Program: Defense Readiness</b>						
<b>Performance Goal:</b> Improve our national security and military strategies by ensuring assets are at the level of readiness required by the combatant commander.						
Secretary's Priority: Preventing Terrorism and Enhancing Security						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011*
<b>\$ Thousands</b>	\$511,076	\$691,435	\$594,412	\$935,119	\$864,261	\$646,470
<b>FTE</b>	2,076	4,038	3,618	3,505	4,390	3,517

\* FY 2011 does not include Overseas Contingency Operations (OCO) funding.

#### Performance Plan Measures

<b>Measure:</b> Defense readiness assessment of all U.S. Coast Guard high endurance cutters, patrol boats, and port security units.						
<b>Description of Measure:</b> Through the Defense Readiness program, the Coast Guard provides National Defense capabilities and resources in support of the National Military Strategy including: Maritime Interception/Interdiction Operations; Port Operations Security and Defense; Combating Maritime Terrorism; Military Environmental Response Operations; Coastal Sea Control Operations; and Theater Security Cooperation when requested by the Department of Defense. Coast Guard Patrol Boats (PBs), High Endurance Cutters (HECs), and Ports Security Units (PSUs) participate in the Navy Status of Readiness and Training System assessment program and in combatant commander operations. This measure is the percent of time that all PBs, HECs, and PSUs are ready at a Status of Resources and Training Systems (SORTS) category 2 or better (a minimum state of readiness to support Combatant Commander plans). The performance targets are set to achieve SORTS 2 or better status for the number of PBs, HECs, and PSU needed to fulfill Geographic Combatant Commander (GCC) requirements.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	31.0%	38.6%
<b>Actual:</b>	None	None	None	None	N/A	N/A

<b>Measure:</b> Readiness assessment of all U.S. Coast Guard patrol boats.						
<b>Description of Measure:</b> Through the Defense Readiness program, the USCG is prepared to provide core competencies such as Maritime Interception/Interdiction Operations; Port Operations Security and Defense; Maritime Operational Threat Response Operations; Combating Maritime Terrorism; Rotary Wing Air Intercept Operations; Military Environmental Response Operations; Peacetime Engagement; Coastal Sea Control Operations; and Theater Security Cooperation when requested by the Department of Defense. Coast Guard Patrol Boats participate in the Navy Status of Readiness and Training System assessment program and in combatant commander operations. This measure is the percent of time that Patrol Boats are ready at a SORTS category 2 or better (a minimum state of readiness to support COCOM plans). The performance targets are set to achieve SORTS 2 or better status for the number of Patrol Boats needed to meet GCC requirements.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	39%	36%
<b>Actual:</b>	None	None	None	None	N/A	N/A

<b>Measure:</b> Readiness assessment of all U.S. Coast Guard port security units.						
<b>Description of Measure:</b> Through the Defense Readiness program, the U.S. Coast Guard is prepared to provide core competencies such as Maritime Interception/Interdiction Operations; Port Operations Security and Defense; Maritime Operational Threat Response Operations; Combating Maritime Terrorism; Rotary Wing Air Intercept Operations; Military Environmental Response Operations; Peacetime Engagement; Coastal Sea Control Operations; and Theater Security Cooperation when requested by the Department of Defense. Coast Guard Port Security Units (PSUs) participate in the Navy Status of Readiness and Training System assessment program and participate in combatant commander operations. This measure is the percent of time that PSUs are ready at a SORTS category 2 or better (a minimum state of readiness to support COCOM plans). The performance targets are set to achieve SORTS 2 or better status for the number of PSUs needed to fulfill GCC requirements.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	50%	50%
<b>Actual:</b>	None	None	None	None	N/A	N/A

### Additional Measures

<b>Measure:</b> Readiness assessment of all U.S. Coast Guard High Endurance Cutters.						
<b>Description of Measure:</b> Through the Defense Readiness program, the U.S. Coast Guard is prepared to provide core competencies such as Maritime Interception/Interdiction Operations; Port Operations Security and Defense; Maritime Operational Threat Response Operations; Combating Maritime Terrorism; Rotary Wing Air Intercept Operations; Military Environmental Response Operations; Peacetime Engagement; Coastal Sea Control Operations; and Theater Security Cooperation when requested by the Department of Defense. Coast Guard High Endurance Cutters (HECs) participate in the Navy SORTS assessment program and in combatant commander operations. This measure is the percent of time that HECs are ready at a SORTS category 2 or better (a minimum state of readiness to support the Combatant Commander). The performance targets are set to achieve SORTS 2 or better status for the number of HECs needed to meet GCC requirements.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	30.7%	30.0%
<b>Actual:</b>	None	None	None	None	N/A	N/A

<b>Measure:</b> USCG Defense Program Efficiency.						
<b>Description of Measure:</b> "Units" are those incorporated into Combatant Commander plans, including HECs, PBs, and PSUs. "C2" is a readiness measure denoting the unit's ability to carry out assigned missions. This measure is the program's performance divided by the program's operating cost, expressed as "Percent SORTs Readiness per M".						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	.15%/ M or 2.5%/ M	.22%/ M or 2.5%/ M	.24%/ M or 2.5%/ M	.22%/ M or 2.55%/ M	2.36%/ M	2.31%/ M
<b>Actual:</b>	.12%/ M	.07% / M	.14% / M	1.46% / M	N/A	N/A

<b>Program: Drug Interdiction</b>						
<b>Performance Goal:</b> Reduce the flow of illegal drugs entering the United States via non - commercial maritime shipping sources.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$1,243,465	\$1,280,433	\$1,189,403	\$1,293,691	\$1,378,958	\$1,441,444
<b>FTE</b>	6,333	6,159	5,799	5,967	6,101	6,119

### Performance Plan Measures

<b>Measure:</b> Removal rate for cocaine from non - commercial vessels in maritime transit zone.						
<b>Description of Measure:</b> Percent of Cocaine removed (seized by the U.S. Coast Guard, and jettisoned, scuttled, or destroyed as a result of U.S. Coast Guard law enforcement action) in relationship to the Non - Commercial Maritime Movement of cocaine.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	N/A	15.7%	18.5%	15.5%
<b>Actual:</b>	None	None	New Measure	15.0%	N/A	N/A

### Additional Measures

<b>Measure:</b> Cocaine Removal Rate / Operating Expenses of the Drug Interdiction Program.						
<b>Description of Measure:</b> "Removal Rate" is the percentage of cocaine shipped through maritime routes that was intended to enter the U.S., but did not because of the efforts of the U.S. Coast Guard. The Cocaine Removal Rate reflects the amount of cocaine lost to the smuggler through seizures (documented in the DEA administered Federal - wide Drug Seizure System), jettison, burning, and other non - recoverable events (vetted through the Inter Agency Consolidated Counter - Drug Database) divided by the non - commercial maritime cocaine flow through the transit zone (documented in Defense Intelligence Agency's annual Interagency Assessment of Cocaine Movement report). Operating expenses of the Drug Interdiction Program are the actual OE expenditures, as calculated through the Coast Guard's Mission Cost Model, of the Drug Interdiction program. This measure shows the rate of cocaine removed per 100 million dollars of program operating expenditures.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	3.2% Removal Rate per 100 Million of program Operational Expenditures	3.6% Removal Rate per 100 Million of program Operational Expenditures	3.7% Removal Rate per 100 Million of program Operational Expenditures	3.2% Removal Rate per 100 Million of program Operational Expenditures	2.4% Removal Rate per 100 Million of program Operational Expenditures	2.1% Removal Rate per 100 Million of program Operational Expenditures
<b>Actual:</b>	None	2.4%	4.4%	2.6%	N/A	N/A

<b>Measure:</b> Metric Tons of Cocaine Removed.						
<b>Description of Measure:</b> Metric tons of cocaine seized by the Coast Guard and cocaine jettisoned, scuttled, or destroyed by smugglers as a result of Coast Guard law enforcement action.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	130	130	134	180	159.7
<b>Actual:</b>	None	161.4	166.9	160.1	N/A	N/A

<b>Measure:</b> Percent Non - Commercial Maritime Conveyance.						
<b>Description of Measure:</b> The percent of world cocaine flow toward the U.S. by Non - Commercial Maritime conveyance. As noted by the Office of National Drug Control Policy's 2007 strategy, four consecutive record setting years of illicit drug seizures in the transit zone have forced narcotics traffickers to adjust from well established routes and methods to those they believe will be less susceptible to interdiction. Therefore, a downward trend in this measure would reflect success of enforcement efforts within the areas the Coast Guard influences in the transit zone.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	88%	87%	86%	85%	88%
<b>Actual:</b>	None	None	86.2%	87.2%	N/A	N/A

<b>Program: Living Marine Resources</b>						
<b>Performance Goal:</b> Achieve sustained fisheries regulation compliance on our Nations Oceans.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$765,756	\$972,050	\$921,504	\$950,888	\$1,040,771	\$1,073,618
<b>FTE</b>	4,208	4,849	4,252	4,461	4,554	4,540

### Performance Plan Measures

<b>Measure:</b> Percent of commercial fishing vessel boardings at sea in which no significant violations of domestic fisheries regulations are detected						
<b>Description of Measure:</b> This measure reflects the percent of boardings at sea by the U.S. Coast Guard during which no significant violations of domestic fisheries regulations are detected. The Living Marine Resources (LMR) program's mission is to provide at-sea enforcement that advance national goals for the conservation and management of LMR and their environments through enforcement of federal regulations that provide stewardship of living marine resources and their environments. The U.S. Coast Guard is the lead federal agency for "at-sea" enforcement of U.S. fisheries and marine protected species regulations. The LMR program's primary focus is to compel compliance with federal fisheries and other LMR regulations on domestic fishing vessels.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	97%	97%	97%	97%	97%	96%
<b>Actual:</b>	96.6%	96.2%	95.3%	96.7%	N/A	N/A

### Additional Measures

<b>Measure:</b> LMR Compliance Rate/Operating Expenses of the LMR Program.						
<b>Description of Measure:</b> This measure shows the percentage of U.S. Coast Guard - boarded domestic fishing vessels without significant Federal regulation violations per 10 million of program operating expenses as calculated by the Coast Guard's Mission Cost Model. "Compliance Rate" is the percent of fishermen complying with federal regulations. Operating expenses of the LMR Program are the actual OE expenditures, as calculated through the Coast Guard's Mission Cost model, of the LMR program.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	2.1% Compliance Rate per 10 million dollars of program operational expenditures	2.1% Compliance Rate per 10 million dollars of program operational expenditures	2.1% Compliance Rate per 10 million dollars of program operational expenditures	2.0% Compliance Rate per 10 million dollars of program operational expenditures	1.6% Compliance Rate per 10 million dollars of program operational expenditures	1.6% Compliance Rate per 10 million dollars of program operational expenditures
<b>Actual:</b>	2.1 %	1.04%	1.64%	2.4%	N/A	N/A

<b>Program: Marine Environmental Protection (MEP)</b>						
<b>Performance Goal:</b> Reduce oil spills and chemical discharge incidents and mitigate impacts when they occur.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$336,562	\$298,329	\$290,311	\$323,489	\$322,417	\$320,614
<b>FTE</b>	1,356	1,222	1,118	1,142	1,143	1,159

### Performance Plan Measures

<b>Measure:</b> Five-year average number of chemical discharge incidents per 100 million short tons shipped.						
<b>Description of Measure:</b> This measure is a lagging indicator of U.S. Coast Guard Marine Environmental Protection Program impact on the long-term trend of chemical discharge incidents. It is a simple moving average of U.S. Coast Guard investigated chemical discharge incidents into navigable waters of the United States for the current and four previous fiscal years, divided by the five-year average annual foreign and domestic short tons (100 million) of Chemical and Chemical Products shipped in U.S. waters.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	<=26.6	<=25.9	<=22.8	<=22.0
<b>Actual:</b>	None	None	19.7	17.8	N/A	N/A

<b>Measure:</b> Five-year average number of oil spills per 100 million short tons shipped.						
<b>Description of Measure:</b> This measure is a lagging indicator of U.S. Coast Guard Marine Environmental Protection Program impact on the long-term trend of significant oil spills. It is a simple moving average of U.S. Coast Guard investigated oil spills greater than 100 gallons discharged into navigable waters of the United States for the current and four previous fiscal years, divided by the five-year average annual foreign and domestic short tons (100 million) of Oil and Oil Products shipped in U.S. waters.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	<=13.5	<=13.0	<=12.1	<=11.6
<b>Actual:</b>	None	None	12.7	11.8	N/A	N/A

**Additional Measures**

<b>Measure:</b> Marine environmental protection long-term efficiency ratio.						
<b>Description of Measure:</b> This measure is the ratio of performance changes to cost changes. A value greater than 1.000 indicates performance efficiency –that is performance gains more favorable than cost changes. A value of 1.050, for example, would indicate a performance gain of about 5.0% more favorable than cost changes.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011

<b>Actual:</b>	None	None	4,070	4,038	N/A	N/A

### Additional Measures

<b>Measure:</b> Marine Safety Efficiency Ratio.						
<b>Description of Measure:</b> This efficiency measure is an indicator of the relative change in long - term Marine Safety Program performance versus the relative change in long-term average cost. It is the prior period to current period ratio of the five-year average annual number of Mariner, passenger, and boating deaths and injuries divided by the current period to prior period ratio of 5 year operating expense (OE) for the program. A value greater than 1.000 less the average rate of inflation indicates performance efficiency performance gains greater than real cost changes.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011

<b>Program: Migrant Interdiction</b>						
<b>Performance Goal:</b> Eliminate the flow of undocumented migrants via maritime routes to the United States.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$503,870	\$873,692	\$625,086	\$763,621	\$857,904	\$868,880
<b>FTE</b>	2,467	4,392	3,410	3,388	3,498	3,591

### Performance Plan Measures

<b>Measure:</b> Percent of undocumented migrants who attempt to enter the U.S. via maritime routes that are interdicted						
<b>Description of Measure:</b> The U.S. Coast Guard has been charged through Executive Orders and Presidential Decision Directive to enforce the Immigration and Nationality Act. Performance is measured by the percent of undocumented migrants of all nationalities who are interdicted while attempting to enter the U.S., its possessions, or territories via maritime routes. The measure is computed by dividing the number of successful landings by the number of migrants who attempt illegal immigration. Subtracting this percentage from 100% gives the migrant interdiction rate. Migrant interdictions and landings are reported by U.S. Coast Guard units and other law enforcement agencies.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	67%	65%	69.9%	74%	73.9%
<b>Actual:</b>	None	65.2%	62.7%	84.4%	N/A	N/A

**Additional Measures**

<b>Measure:</b> Migrant Interdiction Rate / Operating Expenses of Migrant Interdiction Program.						
<b>Description of Measure:</b> This measure shows the percentage of all nationalities of undocumented migrants interdicted by Federal entities while attempting to enter the U.S. via maritime routes per 10 million of program operating expenses as calculated by the Coast Guard's Mission Cost Model. Migrant interdictions and landings are reported by USCG units and other law enforcement agencies.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	3.3%	2.4%	2.2%	2.3%	1.48%	1.49%

<b>Program: Other LE (law enforcement)</b>						
<b>Performance Goal:</b> Reduce the number of illegal vessel incursions into the U.S. Exclusive Economic Zone.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$107,742	\$160,423	\$136,907	\$152,992	\$171,969	\$184,528
<b>FTE</b>	703	758	579	639	654	635

**Performance Plan Measures**

<b>Measure:</b> Number of incursions into the U.S. Exclusive Economic Zone.						
<b>Description of Measure:</b> This program's mission is to provide effective and professional at-sea enforcement to advance national goals for the conservation and management of living marine resources (LMR) and their environments. The program's primary focus is to prevent illegal encroachment of the U.S. Exclusive Economic Zone by foreign fishing vessels thereby protecting U.S. sovereignty from foreign fishing encroachment. The program has both a maritime security and stewardship nexus.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	199	199	< 195	< 195	< 190	< 185
<b>Actual:</b>	164	119	81	112	N/A	N/A

### Additional Measures

<b>Measure:</b> Interdiction rate for foreign fishing vessels detected violating the U.S. Exclusive Economic Zone.						
<b>Description of Measure:</b> This measure is the percentage of detected illegal foreign fishing vessel incursions into the U.S. Exclusive Economic Zone that are interdicted by the U.S. This measure shows the U.S. Coast Guard's pursuit of enforcement activities (i.e. vessel seizure or demarche) vice simply detecting incursions. As this rate increases, a deterrent effect is expected, along with a reduction in the total number of vessel incursions.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	12%	9%	9%	9%	15%	15%
<b>Actual:</b>	None	19.2%	16%	14.3%	N/A	N/A

<b>Measure:</b> Interdiction Rate/Operating Expenses of the Other LE Program.						
<b>Description of Measure:</b> This measure shows the rate of Coast Guard - interdicted illegal foreign fishing vessels per 10 million of program operating expenses as calculated by the Coast Guard's Mission Cost Model. "Interdiction rate" is the percentage of time a completed interdiction process results in a successful endgame. A successful endgame includes seizure and/or prosecution, or sufficient documentation of an incursion to allow the vessel's flag state to take action. Operating expenses of the LMR Program are the actual OE expenditures, as calculated through the Coast Guard's Mission Cost model, of the Other LE program.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011

### Performance Plan Measures

<b>Measure:</b> Annual Transportation Worker Identification Credential compliance rate						
<b>Description of Measure:</b> This measure reports the percent of Maritime Transportation Security Act (MTSA) regulated facilities that are found in compliance with the Transportation Worker Identification Card (TWIC) regulations during Coast Guard inspections. The Security and Accountability for Every (SAFE) Port Act of 2006 requires the Coast Guard to conduct at least two MTSA security inspections on regulated facilities each year; one announced and one unannounced.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	N/A	80%	85%
<b>Actual:</b>	None	None	None	N/A	N/A	N/A

<b>Measure:</b> Percent reduction in all maritime security risk over which the U.S. Coast Guard has influence.						
<b>Description of Measure:</b> This is a risk-based outcome measure that begins with an assessment (by maritime security representatives) of fifteen likely high-consequence maritime terrorist attack scenarios. Threat, vulnerability, and consequence levels are estimated for each of the fifteen scenarios, which generates a proxy (index) value of “raw risk” that exists in the maritime domain. Next, U.S. Coast Guard interventions (security and response operations, regime and awareness activities) for the fiscal year are scored against the scenarios with regard to the decreases in threat, vulnerability and consequence that each has been estimated to have afforded. (The analysis then focuses on those areas within the U.S. Coast Guard’s roles and strategic mandates.) The resulting measure is a proxy measure of performance.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	14%	15%	15%	21%	>19%	>19%
<b>Actual:</b>	17%	15%	20%	31%	N/A	N/A

<b>Measure:</b> Percent reduction of maritime terrorism risk resulting from U.S. Coast Guard efforts to prevent a terrorist entering the U.S. via maritime means						
<b>Description of Measure:</b> This measure is an estimate of the percent of terrorist-related maritime risk reduction of the illegal entry of a terrorist(s) through the maritime domain (as a percent of the risk that the U.S. Coast Guard has the ability to impact). This is one of the fifteen likely high-consequence maritime terrorist attack scenarios used to calculate overall risk reduction measure. This is a risk-based measure that involves the scoring (by maritime security subject matter experts) with respect to threat, vulnerability and consequence of the illegal entry of a terrorist(s) into the United States with intent and capability to carry out terror attacks within the United States where vessels en route from foreign countries are used as a means of conveyance. Such scoring generates an index of “raw risk” that exists in the maritime domain. Next, U.S. Coast Guard incremental interventions (awareness, operational and regulatory-based) that have taken place throughout the fiscal year are scored with regard to the effectiveness that each has been estimated to have afforded.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	21%	21%	29%	27.9%
<b>Actual:</b>	None	21%	29%	42%	N/A	N/A

<b>Measure:</b> Percent reduction of maritime security risk resulting from U.S. Coast Guard efforts to prevent a weapon of mass destruction entering the U.S. via maritime means						
<b>Description of Measure:</b> This measure is an estimate of the percent of terrorist-related maritime risk reduction of the illegal entry of a Weapon of Mass Destruction (WMD)/materials into the United States through the maritime domain (as a percent of the risk that the U.S. Coast Guard has the ability to impact). This is one of the fifteen likely high-consequence maritime terrorist attack scenarios used to calculate overall risk reduction. This is a risk-based measure that involves the scoring (by maritime security subject matter experts) with respect to threat, vulnerability and consequence of the illegal entry of a WMD/materials into the United States to support ongoing terrorist operations where vessels en route from foreign countries are used as a means of conveyance. Scoring generates an index of “raw risk” that exists in the maritime domain. U.S. Coast Guard incremental interventions (awareness, operational and regulatory-based) that have taken place throughout the fiscal year are scored with regard to the effectiveness that each has been estimated to have afforded.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	4%	3%	12%	11.8%
<b>Actual:</b>	None	4%	12%	17%	N/A	N/A

<b>Measure:</b> Risk reduction due to consequence management.						
<b>Description of Measure:</b> This measure indicates the estimated percent of terrorist-related maritime risk reduction due to consequence management (as a percent of the risk that the U.S. Coast Guard (USCG) has the ability to impact.) This is a risk-based outcome measure involving the scoring (by maritime security representatives) of likely high-consequence maritime terrorist attack scenarios with respect to threat, vulnerability, and consequence. Scoring generates an index of "raw risk" existing in the maritime domain. USCG incremental interventions (both operational and regulatory-based) that have occurred throughout the fiscal year are scored against the attack scenarios with regard to the percent decrease in threat, vulnerability and consequence each has been estimated to have afforded. The resultant measure shows the change in "raw risk" (due, in large part, to things outside of the USCG's ability to control) and the reduction in total risk the USCG estimates that it has affected.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	4.2%	4.1%	6%	6%	4%	>3%
<b>Actual:</b>	6%	4.2%	5%	9%	N/A	N/A

**Additional Measures**

<b>Measure:</b> MTSA Annual Required Inspection Rate.						
<b>Description of Measure:</b> This performance measure quantifies the Coast Guard's completion rate of required security plan compliance inspections as prescribed by the Maritime Transportation Security Act of 2002 and the Security and Accountability For Every (SAFE) Port Act of 2006.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011

<b>Program: Search and Rescue (SAR)</b>						
<b>Performance Goal:</b> Save people in imminent danger on our Nations oceans and waterways.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$831,948	\$928,782	\$1,145,565	\$1,190,659	\$1,148,632	\$1,097,735
<b>FTE</b>	4,652	5,004	5,228	5,610	5,630	5,644

## Performance Plan Measures

<b>Measure:</b> Percent of people in imminent danger saved in the maritime environment.						
<b>Description of Measure:</b> This is a measure of the percent of people who were in imminent danger on the oceans and other waterways and whose lives were saved by the Coast Guard. The number of lives lost before and after the Coast Guard is notified and the number of persons missing at the conclusion of search operations is factored into this percentage. Several factors compound the difficulty of successful response including untimely notification to the Coast Guard of distress, incorrect reporting of the distress site location, severe weather conditions at the distress site, and distance to the scene. The percent of lives saved is the best outcome measure for search and rescue because it includes lives lost before and after the Coast Guard is notified and persons missing, thereby encouraging the investment in supporting awareness or communication systems and safe boater programs that increase the possibility a search and rescue mission will end with lives saved.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	76%	76%	76%	77%
<b>Actual:</b>	None	None	76.8%	77.3%	N/A	N/A

<b>Measure:</b> Percent of Search and Rescue assets on scene within two hours						
<b>Description of Measure:</b> Time on scene is measured from the time the Coast Guard is notified until the time at which a rescue unit arrives on scene. The standard to be met is 2 hours. This includes 30 minutes of preparation time that provides for underway preparations such as engine warm-ups, completion of underway checklist, risk management checks, and mission planning and another 90 minutes from underway to on scene based on moderate environmental conditions which allow for operation of the rescue unit at their top cruise speeds. The measure is calculated by dividing the number of times any one response unit on a SAR sortie arrives on scene within 2 hours of notification by the number of times any one response unit on a SAR sortie arrives on scene within 2 hours of notification plus the number of times any one response unit on a SAR sortie arrives on scene more than 2 hours after notification.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	None	85%	85%
<b>Actual:</b>	None	None	None	None	N/A	N/A

## Additional Measures

<b>Measure:</b> % Lives Saved/Operating Expenses of the SAR Program.						
<b>Description of Measure:</b> This measure shows the percent of lives saved divided by the operating expenses of the SAR Program. Targets are based on outcome measure targets divided by projected OE funding per the Fiscal Year 2009 - 2014 RAP.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	.13%	.09%	.12%	.14%	.16%	.10% lives saved / 1 million
<b>Actual:</b>	.13%	.09%	.12%	.14%	N/A	N/A

<b>Measure:</b> Percent of property in danger of loss saved.						
<b>Description of Measure:</b> This is a measure of the percent of property in imminent danger on the oceans and other waterways and saved by the U.S. Coast Guard through the coordinated national SAR system. The amount of property lost and missing at the conclusion of SAR operations is factored into this percentage. Several factors compound the difficulty of successful response including untimely notification, incorrect position, and conditions at the distress location. To calculate the result we use the following equation: $PS / (PS+PL+PUF)$ where: PS = "property saved", PL = "property lost" and PUF = "property unaccounted for" as defined and input into the Marine Information for Safety and Law Enforcement (MISLE) database.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	None	None	Baselining	70%	70%

<b>Program: Waterways Management: Aids to Navigation</b>						
<b>Performance Goal:</b> Minimize disruptions to the movement of goods and people, while maximizing recreational enjoyment and environmentally sound use of our navigable waters.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>\$ Thousands</b>	\$1,155,535	\$1,321,449	\$1,445,041	\$1,522,654	\$1,415,056	\$1,430,217
<b>FTE</b>	7,526	8,549	7,809	8,112	7,919	7,860

### Performance Plan Measures

<b>Measure:</b> Federal Short - Range Aids to Navigation Availability.						
<b>Description of Measure:</b> This measure indicates the hours that short range Aids to Navigation are available. The aid availability rate is based on an international measurement standard established by the International Association of Marine Aids to Navigation and Lighthouse Authorities (IALA) (Recommendation O 130) in December 2004. A short range Aid to Navigation is counted as not being available from the initial time a discrepancy is reported until the time the discrepancy is corrected. Aids to Navigation prevent adverse navigation outcomes that can cause disruptions to maritime commerce.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	None	97.5	97.5%	97.5%	97.5%	97.5%
<b>Actual:</b>	None	None	98.3%	98.0%	N/A	N/A

<b>Measure:</b> Five-year average number of Collisions, Allisions, and Groundings (CAG).						
<b>Description of Measure:</b> This measure evaluates the long-term trend of the Coast Guard Waterways Management Program in preventing collisions, allisions (vessels striking fixed objects), and groundings. Those three adverse outcomes involving the navigation of commercial vessels can result in disruptions to maritime commerce. In general, collisions tend to be more sensitive to the Marine Transportation Systems component of the Program, allisions to the Bridge Administration component, and groundings to the Navigation Systems component.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	1,748	1,664	<=1,756	<=1,871	<=1,858	<=1,911
<b>Actual:</b>	1,765	1,823	1,857	1,878	N/A	N/A

**Additional Measures**

<b>Measure:</b> Waterways Management Long-term Efficiency Ratio.						
<b>Description of Measure:</b> This measure is the ratio of performance changes to cost changes. A value greater than 1.000 indicates performance efficiency gains greater than cost changes. A value of 1.050, for example, would indicate a performance gain about 5.0% more favorable than cost changes. The relative change in long-term Waterways Management Program performance versus relative change in long-term cost.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011

\*Includes \$54M transfer from NSF (OE) and \$32.5M POLAR STAR reactivation (AC&I).

**Performance Plan Measures**

<b>Measure:</b> Number of days critical waterways are closed due to ice.						
<b>Description of Measure:</b> This measure is an indicator of Coast Guard Icebreaking impact on preventing disruptions to maritime commerce due to ice. The measure tallies the annual number of days critical Great Lakes waterways are closed with the St. Mary's River as the reference point. A closure is a period of 24 or more hours during which a waterway is closed by a Vessel Traffic Service or Captain of the Port, or blocked by a beset vessel. Closure day targets are negotiated with Great Lakes Marine Transportation System stakeholders, and are relative to winter severity. Those standards are 2 days in an average winter, and 8 days in a severe winter.						
<b>Fiscal Year:</b>	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
<b>Target:</b>	2(avg), 8 (severe)

# BUDGET REQUEST AND SUPPORTING INFORMATION

## Salaries & Expenses

### I. Appropriation Overview

#### A – Mission Statement for Salaries & Expenses

The United States Secret Service performs two critical homeland security missions: protection and criminal investigations. U.S. Secret Service protects the President and Vice President, their families, visiting heads-of-state/government, and other designated individuals, such as the Secretary of Homeland Security; investigates threats against these protectees; protects the White House, Vice President's Residence, Foreign Missions and other designated buildings within the Washington, D.C. area; and designs, coordinates, and implements operational security plans for designated National Special Security Events (NSSEs). The U.S. Secret Service investigates violations of laws relating to counterfeiting of obligations and securities of the United States; financial crimes such as access device fraud, financial institution fraud, identity theft, and computer fraud; computer-based attacks on our nation's financial, banking, and telecommunications infrastructure; and provides critical forensic support for associated investigations of cases involving missing and exploited children.

#### B – Budget Activities:

##### Protection

In FY 2009, 189 heads of state/government and 60 spouses attended the 64<sup>th</sup> United Nations General Assembly in New York, in addition to domestic protectees. The Secret Service continues to constantly adapt security plans to meet the protective needs for the ever-changing number of protectees and to mitigate emerging threats.

**Protection of Persons and Facilities** - The primary purpose of the Secret Service's domestic protection activity is to protect our nation's leaders. To accomplish this, this program operates to ensure protectees' personal safety, and to protect the buildings and grounds where these individuals reside and work (e.g., the White House Complex and the Vice President's residence). Since the September 11, 2001 attacks, there has been a significant increase in the number of protectees receiving varying levels of protection from the Secret Service. Currently, the Service provides protection to 34 protectees: 24 permanent protectees are authorized under 18 USC § 3056; ten provisional protectees are authorized pursuant to Presidential Memoranda. Included in the totals above is the protection of the Secretary of the Department of Homeland Security (DHS). The Secretary of the Treasury is also receiving protection, on a reimbursable basis. The Service estimates that 7,808,320 basic pay hours of protection for persons and facilities will be worked during FY 2011.

Part of the protection of persons and facilities program is the protection of foreign heads-of-state/government visiting the United States. Foreign dignitary protection includes: 1) protection for visiting heads-of-state/government and their spouses, as well as other distinguished visitors to the U.S. as directed by the President; and 2) external security for foreign diplomatic embassies and missions in the Washington, DC area (and other limited areas consistent with statute). The Secret Service provides protection to these individuals and foreign missions by strategically placing human and physical assets (agents, tactical support, technical security, explosives detection and weapons-of-mass destruction detection and countermeasures) at these foreign missions and using these assets during foreign dignitary visits to the United States. All efforts are directed toward ensuring that foreign dignitaries and foreign missions receive the optimal level of protection.

The foreign dignitaries who visit the U.S. often are high-profile individuals and deemed to have medium to high threat levels. Today's environment necessitates the implementation of complex security operations that involve multiple jurisdictions and functions.

The Service has the sole statutory authority to provide a dedicated police presence and response to foreign embassies, chanceries and residences. When a "surge" in protective responsibilities in this area occurs, the Secret Service turns to other entities (i.e., Metropolitan Police Department) for assistance in dealing with such issues as demonstration control. Currently, the Secret Service protects 537 foreign missions located in the Washington, DC area.

**Protective Intelligence Activities** - The Service's protective intelligence program is responsible for overseeing the investigation and evaluation of all protective intelligence subjects and for the receipt, analysis, and dissemination of all protective intelligence information. This mission is accomplished by the review, coordination, control and referral of information about individuals, groups and activities that pose a potential threat to persons and property protected by the Secret Service.

**National Special Security Events (NSSEs)** - By statute and Presidential Decision Directive-62 (PDD-62), the Secret Service is designated as the lead agency for designing, coordinating, and implementing operational security plans for NSSEs. As with campaign events, special agents coordinate with the military and federal, state, county, local, and international law enforcement organizations to ensure the success of security operations for NSSEs.

The Secret Service plans and implements security designs for designated NSSEs to ensure the physical protection of the President, the public and other Secret Service protectees who participate in NSSEs.

The events of September 11<sup>th</sup>, 2001 demonstrated that our adversaries are capable of attacking our nation on a grand scale and employing extensive research and surveillance methodologies, acquiring substantial skills and instruction, and striking their targets without warning.

**Presidential Candidate/Nominee Protection** – The Secret Service provides protection to major presidential and vice presidential candidates. It also provides protection to their spouses within 120 days of a general presidential election. Protective details are activated only after established criteria are considered. Campaign protection is a mandatory workload increase, and funding is needed for these presidential campaigns three out of every four fiscal years. The Service has no base budget funding for this activity. All campaign funding that is added to the Service’s base budget is non-recurred following a presidential campaign and inauguration.

**White House Mail Screening** - The Secret Service screens White House mail to ensure it is free of harmful toxins or other dangerous materials. Due to the discovery of anthrax in letters mailed to political leaders and members of the press, the Secret Service initiated a program to provide additional screening for mail destined for the White House Complex. This program is indicative of the close partnership the Service maintains with the White House regarding the implementation of security measures. Mail is now being delivered to a facility where it is undergoing a series of tests and is analyzed to ascertain if any chemical, biological, radiological contamination, or explosive material is present. At times, additional shifts are required to screen significant increases in mail volume.

**Headquarters, Management and Administration:** The Headquarters, Management and Administration program develops and administers Secret Service-wide policies, plans, and procedures in budget, finance, accounting, financial systems, statements, and relocation and travel services. It exercises accountability over the collection and disposition of the Secret Service's financial resources and examines and processes documents for payment of contracts, purchase orders, invoices and recurring expenses, including reservations and payments for travel and relocation services. Administration also provides management and program analysis support to all operational and administrative programs involving studies of organizational structuring, workflow efficiencies, and staffing allocations. It maintains organization charts and functional responsibility statements for all Secret Service offices. In addition, it establishes, develops, implements, and manages the strategic planning process for the Secret Service and coordinates Secret Service participation in all DHS and government-wide management improvement and evaluation programs. These tasks serve to assist the Service’s leadership in formulating the vision and direction of the Secret Service.

This program also purchases goods via procurement services within the scope of the law and provides value-added procurement solutions to ensure that government assets and resources are managed wisely.

The program promotes fairness, consistency, and efficiency in the utilization of staffing, scheduling, and travel logistics through the Service’s Logistics Resource Center. It analyzes staffing needs and travel logistics alternatives to provide for more informed decision-making by balancing cost considerations with operational needs.

The Administrative Operations Division (AOD) plans, develops, and administers policies and procedures, and performs related activities for a variety of real and personal property

management areas in support of the U.S. Secret Service Headquarters and field elements. AOD functions include space and facilities management, personal property and supply management, vehicle fleet management, mail distribution and screening and printing management. AOD acts as the single acquisition agent between the U.S. Secret Service and the General Services Administration (GSA) and the Department of State (DOS) for the acquisition, construction and renovation of U.S. Secret Service owned or leased real property.

In addition, AOD organizes and coordinates facilities and property management support activities in support of the Secret Service's protective activities and designated NSSEs; manages and coordinates administrative operations and services functions related to the planning, preparation, establishment, and deactivation of permanent and temporary protective sites; plans, develops, and administers policies and procedures for environmental management, energy conservation and other related programs for the U.S. Secret Service and provides building maintenance management and general repairs and limited labor services support to all Headquarters offices.

**Rowley Training Center** - This program encompasses personnel at the Service's James J. Rowley Training Center (JJRTC), including instructors, tactical and weapons systems specialists, curricula design staff, computer and web-based faculty/technicians, executive training advisors, administrative support, and maintenance staff. The Service has a separate appropriation, the Acquisition, Construction, Improvements and Related Expenses account which is used to maintain the facility.

The Service's current Strategic Plan provides the following primary objectives with regard to future mission-driven training protocols:

- Enhance JJRTC to provide an academic environment that promotes in-depth critical thinking and innovative strategies in the areas of physical protection, site event security, threat/risk assessments, protection intelligence/counterterrorism techniques, emergency preparedness, criminal investigations, protection of critical financial infrastructure, and executive/management development.
- Maximize training opportunities by using emerging technologies, such as 3-D modeling, computer-generated simulation training, and distance learning.
- Develop and implement training programs consistent with the Secret Service's core mission for federal, state, and local law enforcement partners in the areas of electronic crimes, counterterrorism/protection, cyber/counterfeit investigations, threat/risk assessment, and operational security for National Special Security Events.
- Establish partnerships with academic institutions and professional associations to assess, confirm, and ensure innovative training methodologies.

The Rowley Training Center supports protection and criminal investigations, the two critical homeland security missions mandated for the Secret Service.

**Domestic Field Operations** - In order to accomplish its investigative responsibilities, the Secret Service maintains a network of 142 offices nationwide. Agents assigned to these domestic offices are responsible for investigating violations of laws relating to counterfeiting of obligations and securities of the United States (currency, treasury checks, etc.), and to financial crimes that include, but are not limited to, access device fraud, financial institution fraud, identity theft, computer fraud, as well as investigating computer-based attacks on our nation's financial, banking, and telecommunications infrastructure.

**International Field Office Administration and Operations** - The Secret Service maintains a total of 22 foreign offices and one domicile office in 18 countries. Similar to their domestic counterparts, agents assigned to these offices are responsible for investigating violations of criminal statutes falling under the Secret Service's investigative mission. Because they do not have arrest authority, agents liaise with their foreign law enforcement counterparts in order to meet their investigative responsibilities. Additionally, these agents augment any protective mission falling within their geographic area of responsibility. Relationships established in foreign countries from conducting criminal investigations greatly enhance the Secret Service's ability to provide a safe and secure environment for the people it protects while they travel overseas.

**Electronic Crimes Special Agent Program (ECSAP) and Electronic Crimes Task Forces (ECTF)**- In response to the emerging trends involving the use of computers and their peripheral devices, the Secret Service established the Electronic Crimes Special Agent Program, or ECSAP. Special Agents involved with the ECSAP are computer investigative specialists, qualified to conduct examinations on many types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, and other electronic media. Currently, 1,148 special agents have received at least one of the three levels of ECSAP training.

In addition to the ECSAP, the Secret Service has established a domestic network of 28 domestic and one foreign Electronic Crimes Task Forces (ECTFs). The concept of the ECTF model is truly unique since it brings together not only federal, state and local law enforcement officials from a specific region, but also prosecutors, as well as individuals from private industry and academia. These task forces provide a productive framework and collaborative crime-fighting environment in which the resources of its participants are combined to effectively and efficiently make a significant impact in preventing and detecting electronic crimes.

**Support for Missing and Exploited Children** – Funding for missing and exploited children includes forensic and related support of investigations involving missing and exploited children.

### **C – Budget Request Summary:**

The U.S. Secret Service requests 7,016 positions, 7,014 FTE, and \$1,555,042,000 for FY 2011; an increase of \$76,373,000 and a decrease of 41 positions and 38 FTE from the FY 2010 Enacted budget. This level of funding is required for and includes the following:

- Program increases totaling \$50,000,000 and 3 FTE. This includes a \$36,000,000 and 3 FTE increase for information integration and transformation and \$14,000,000 increase for the 2012 Presidential campaign.
- Program decreases totaling (\$16,800,000) and (46) FTE. This includes a (\$9,600,000) and (46) FTE reduction in third year Omnibus (PL 111-8) staffing costs, a (\$3,200,000) reduction to the Presidential primary limousine program, and a (\$4,000,000) reduction to domestic field operations.
- Adjustments to the base include \$8,000,000 for Uniformed Division (UD) modernization, 2<sup>nd</sup> year funding of \$198,000 and 2 FTE for information integration and transformation, 3<sup>rd</sup> year funding of \$190,000 for international field offices, 3<sup>rd</sup> year funding of \$184,000 for cyber infrastructure protection, 3<sup>rd</sup> year funding of \$1,230,000 for the former president Bush post-presidency detail, 3<sup>rd</sup> year funding of \$1,328,000 for enhanced White House protection, \$9,662,000 for 3<sup>rd</sup> year Omnibus (PL 111-8) staffing, \$2,900,000 for White House mail facility equipment, and cost increase of \$19,481,000 for annualization of the 2010 pay raise and FY 2011 pay adjustments and \$12,600,000 for data center consolidation.

### III. Current Services Program Description by PPA

**Department of Homeland Security  
U.S. Secret Service  
Salaries & Expenses  
Protection of persons and facilities  
Program Performance Justification**  
(Dollars in Thousands)

**PPA: Protection of persons and facilities**

	<b>Perm. Pos</b>	<b>FTE</b>	<b>Amount</b>
<b>2009 Actuals</b>	<b>3,800</b>	<b>3,398</b>	<b>742,778</b>
<b>2010 Enacted</b>	<b>3,800</b>	<b>3,800</b>	<b>755,521</b>
2011 Adjustments-to-Base	-	-	31,321
<b>2011 Current Services</b>	<b>3,800</b>	<b>3,800</b>	<b>786,842</b>
2011 Program Change	(46)	(46)	5,200
<b>2011 Total Request</b>	<b>3,754</b>	<b>3,754</b>	<b>792,042</b>
Total Change 2010 to 2011	(46)	(46)	36,521

The United States Secret Service requests \$792.0 million and 3,754 FTE for this program. This is an increase of \$36.5 million over the FY 2010 Enacted level and includes pay inflation, funding for Uniformed Division modernization, and program increases for WHCA Interoperability and the COLD database and program decreases for 3<sup>rd</sup> year Omnibus (PL 111-8) staffing costs and the presidential primary limousine program.

A total of 200 special agent and administrative, professional, technical positions were hired through the end of FY 2009 with funding from the Omnibus Appropriations Act of 2009 to augment the protective mission. The proposed position reduction will come from existing vacant positions within the ranks of the administrative, professional, technical workforce.

**CURRENT SERVICES ACTIVITY DESCRIPTION:**

The Secret Service secures the physical safety of the President, Vice President, their families, and other individuals as designated by statute, and of facilities under Secret Service protection from all threats. The Service also secures the physical safety of visiting heads-of-state/heads-of-government, and their spouses, and other distinguished visitors to the United States as directed by the President. In addition, U.S. Secret Service

provides external security to foreign diplomatic embassies and missions in the Washington, DC area (and other limited areas, consistent with statute).

In order to protect our Nation's leaders, the Secret Service operates to ensure protectees' physical safety and to protect the buildings and grounds where they reside and work. The requested amount addresses the strategic challenges facing the Service - including terrorists' sustained motivation to attack U.S. interests (including its leaders) and the increasing technological sophistication of the threat environment.

### **Uniformed Division**

The U.S. Secret Service Uniformed Division (UD) began as the White House Police, and was originally created as a separate and distinct organization by Public Law 67-300, approved September 14, 1922. The White House Police came under the direct supervision of U.S. Secret Service in 1930. The mandate of the White House Police, incorporated in Title 3 of the U.S. Code, involves duties in connection with the protection of the Executive Mansion and grounds in the District of Columbia; any building in which White House offices are located; and the President and members of his immediate family. The members of the UD assigned to the White House Branch perform many functions that thrust them into the public light. These officers process thousands of staff members, other workers, members of the press and those individuals with appointments into the White House Complex on a daily basis. Officers assigned to this Branch provide protection to the White House Complex through the effective use of fixed posts, foot beats, bicycle patrols and police cruisers. Technicians assigned to the Counter Sniper Unit, Canine Unit and the Emergency Response Team also provide their expertise to our mission on a daily basis in and around the White House Complex. The Special Operations Section of the UD is an additional unit responsible for tours of the White House Mansion and for the coordination of special events such as the Easter Egg Roll, Presidential Receptions, and Inaugural events. The White House Vehicle Inspection Team and the Counter Surveillance Unit also help achieve the UD goal of providing a safe and protected environment.

The UD provides a safe and secure environment for the President, his immediate family, the Vice President, their staff members and myriad other White House employees that work there each day. In addition to these responsibilities, personnel assigned to the White House Branch perform similar functions at the Treasury Building, the New Executive Office Building, the Eisenhower Executive Office Building, and other locations which house Presidential Offices. In addition to the White House Branch, other publicly visible components of the UD are the Naval Observatory Branch and Foreign Missions Branch. At the end of FY 2009, there were 1,344 filled Uniformed Division positions; nearly achieving the authorized level of 1,400 positions.

Significant accomplishments in FY 2009 include the following:

- Continued to provide protection to protectees while they made domestic and foreign stops.
- Protected 189 heads-of-state/government and 60 spouses at the 64<sup>th</sup> United Nations General Assembly.
- Protected 22 heads of state/government and 15 spouses at the G20 summit in Pittsburgh, Pennsylvania in September 2009.
- Opened operations at the newly relocated JOC in September 2009.
- Continued to implement operational security for designated NSSEs.

Significant planned accomplishments in FY 2010 include the following:

- Continue to provide Protection for the President and Vice President, their families, visiting heads-of-state/government, other designated individuals, the White House and other buildings within the Washington, DC area.
- Continue to implement operational security for designated NSSE.
- Implementation of a new scheduling system.

Significant planned accomplishments in FY 2011 include the following:

- Continue to provide Protection for the President and Vice President, their families, visiting heads-of-state/government, other designated individuals, the White House and other buildings within the Washington, DC area.
- Continue to implement operational security for designated NSSE.

<b>2011 Total Request</b>	-	-	<b>1,000</b>
Total Change 2010 to 2011	-	-	-

The United States Secret Service requests \$1.0 million for this activity.

**CURRENT SERVICES ACTIVITY DESCRIPTION:**

The Secret Service plans and implements security designs for designated National Special Security Events (NSSEs). In addition, the Secret Service ensures the physical protection of the President, the public, and other Service protectees who participate in NSSEs.

Security at NSSEs is strategically crucial to homeland security in that NSSEs, by definition, involve persons, institutions, and landmarks that are integral to the governance of the nation, vital to national and/or global economic stability, or symbolically important to American citizens. The requested amount provides funding for the design, planning, and implementation of operational security plans for NSSEs.

The United States Secret Service requests \$17.9 million and 24 FTE for this activity. This is a \$14 million increase over the FY 2010 Enacted level. In addition, this request shifts \$3.867 million and 24 FTE from investigative activities to support staffing requirements for the Presidential campaign.

**CURRENT SERVICES ACTIVITY DESCRIPTION:**

Significant accomplishments in FY 2009 included the following:

- Provided protection for Presidential and Vice-Presidential candidates during the final month of the 2008 Presidential Campaign.
- Provided protection of the post-election President and Vice President-elect along with security for the Inaugural events.

Significant planned accomplishments in FY 2011 include the following:

- Provide training to candidate protective detail personnel.
- Procure supplies and equipment to support candidate/nominee protective operations.
- Procure critical protective vehicles and equipment for the campaign.

<b>2011 Total Request</b>	-	-	<b>25,315</b>
Total Change 2010 to 2011	-	-	2,900

The United States Secret Service requests \$25.3 million for this activity. This is an increase of \$2.9 million over the FY 2010 Enacted level for equipment.

**CURRENT SERVICES ACTIVITY DESCRIPTION:**

Due to the heightened potential of biological and chemical threats, the Secret Service implemented a security program to screen all incoming mail, equipment, supplies, and agricultural products destined for the White House Complex. The goal of this security enhancement is to identify lethal threats at a remote location away from the White House Complex, and contain, mitigate, and investigate any vulnerability posed by these threats.

At the present time, the Secret Service is utilizing temporary facilities and personnel provided by the U.S. Army to assist in the screening. Once the mail and other items are transported to the screening facility by the Executive Office of the President (EOP), security personnel and technical specialists at the facility utilize strict protocols to sample the mail for contamination and monitor the environment for potentially hazardous substances. Any items containing unknown substances are subjected to analysis at an on-site laboratory and are quarantined at the facility until any potential hazards have been positively identified and subjected to appropriate mitigation procedures. Following a determination that the screened items pose no security risks to the White House Complex and Secret Service protectees, they are released to the EOP for administrative processing and distribution.

The Secret Service and GSA have received funding to design and construct a permanent White House Mail facility. In March 2008, the groundbreaking ceremony for this facility was held to mark the commencement of construction on the new facility. The Secret Service continues to work with GSA, the design-build construction team, and numerous technical experts to ensure that the new building meets all safety and operational requirements.

Significant accomplishments in FY 2009 included the following:

- Continued to screen all incoming mail, packages and gifts destined for the White House complex for select chemical, biological, radiological, nuclear and explosive (CBRNE) contamination.
- Procurement of laboratory equipment, specialized detection equipment, security equipment, information technology, work stations and all other support equipment required to commence operations at the new White House mail screening facility.
- Development of facility standard operating procedures, incident response procedures and work with appropriate agencies to establish incident response agreements.

Significant planned accomplishments in FY 2010 include the following:

- Complete building commissioning and installation of all government furnished equipment to include laboratory equipment, processing equipment, CBRNE detection equipment, security and access control equipment.
- Complete hiring and training of new facility FTE's (Chemist, Facility Operations Specialist, Administrative Budget Coordinator, Industrial Hygienist and Logistics Management Specialist). Award contracts for the operations contractor and program management contractor to support the new White House mail screening facility.
- Continue to screen all incoming mail, packages and gifts destined for the White House complex for select chemical, biological, radiological, nuclear and explosive (CBRNE) contamination at both the current mail screening facility and commence transition of operations to the new mail screening facility.

Significant planned accomplishments in FY 2011 include the following:

- Continue to screen all incoming mail, to include packages and gifts, destined for the White House complex for select chemical, biological, radiological, nuclear and explosive (CBRNE) contamination.

- Continue to perform research and development to ensure that the program is utilizing all pertinent detection technologies available and that current intelligence information is monitored to ensure possible threats are mitigated.
- Transition the facility laboratory to an independent Secret Service laboratory. The initial facility laboratory services were initiated with aid from Department of Defense personnel, Edgewater Chemical Biological Center (ECBC).

Total Change 2010 to 2011	(22)	(22)	(3,480)

The United States Secret Service requests \$257.4 million and 1,683 FTE for this activity. This is a decrease of \$3.5 million and 22 FTE from the FY 2010 Enacted level and includes pay inflation, a (22) FTE shift to the Presidential Candidate Nominee Protection PPA to support staffing requirements for the 2012 Presidential campaign, and a program decrease for domestic field offices.

**CURRENT SERVICES ACTIVITY DESCRIPTION:**

The United States Secret Service investigates violations of laws relating to counterfeiting of obligations and securities of the United States, and financial crimes that include, but are not limited to, financial institution fraud, identity theft, access device fraud, money laundering and electronic crimes. Domestic field resources are focused on achieving the Department of Homeland Security strategic objective of economic security. The requested amount funds field offices nationwide in a strategic context which addresses the spread of the Internet and other consumer-friendly technologies that facilitate electronic commerce, and the increasing criminal exploitation of those technologies.

Significant accomplishments in FY 2009 included the following:

- Maintained current investigative operations while continuing to pursue efficiencies within program areas.

- The Secret Service made 5,808 financial crimes arrests (5,035 domestic / 770 foreign / 3 court pending) and 2,946 counterfeit arrests (2,506 domestic / 430 foreign / 10 court pending)

With regards to Cyber / Financial Crimes Investigations, the Secret Service:

- Opened 5,582 cases and closed 5,117 cases
- 99% conviction rate for the 5,808 suspects that were arrested
- Conducted 650 seizures totaling \$142M in criminal proceeds
- Conducted 7,629 computer forensic exams in CY2009
- Prosecuted financial and cybercrime cases involving \$443M in actual loss
- Prevented \$1.8B in potential loss
- Above figures do not include Heartland Payment Systems (\$65B in potential loss) and the TJX case (\$20B in potential loss) because these cases remain open

Currency seized was \$108.8M (\$7.6M domestic / \$101.2 foreign) and the total amount passed was \$73.3M (\$69M domestic / \$4.3M foreign).

Significant planned accomplishments in FY 2010 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas.
  - The growth and complexity of electronic criminal threats to our nation's financial payment systems, financial institutions and banking has increased exponentially. It is critical that the Secret Service is equipped with a superior level of investigative manpower and resources, both domestic and international, to keep pace with the onslaught of organized transnational cyber and online criminals, their methods, and the widening array of emerging cyber technologies.
- Key priorities for the Secret Service are to enhance its capabilities to prevent and mitigate attacks against the U.S. critical infrastructures including:
  - Expand Electronic Crimes Task Forces (ECTFs)
  - Expand Financial Crimes Task Forces (FCTFs)
  - Expand training efforts through the Electronic Crimes Special Agent Program (ECSAP).
  - Increased focus on Cyber Intelligence

Significant planned accomplishments in FY 2011 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas.
  - The growth and complexity of electronic criminal threats to our nation's financial payment systems, financial institutions and banking has increased exponentially. It is critical that the Secret Service is equipped with a superior level of investigative manpower and resources, both domestic and international, to keep pace with the onslaught of organized transnational cyber and online criminals, their methods, and the widening array of emerging cyber technologies.
  - Key priorities for the Secret Service are to enhance its capabilities to prevent and mitigate attacks against the U.S. critical infrastructures including:

<b>2011 Current Services</b>	<b>74</b>	<b>74</b>	<b>31,171</b>
<b>2011 Total Request</b>	<b>74</b>	<b>74</b>	<b>31,171</b>
Total Change 2010 to 2011	-	-	466

The United States Secret Service requests \$31.2 million and 74 FTE for this activity. This is an increase of \$0.5 million over the FY 2010 Enacted level and includes pay inflation as well as third year annualization of staffing for the international field offices program.

**CURRENT SERVICES ACTIVITY DESCRIPTION:**

The Secret Service provides a comprehensive, internationally coordinated response to new threats to the integrity of U.S. currency and other transnational crimes.

International field resources are focused on achieving the DHS strategic objective of economic security (e.g. combating foreign counterfeiting of U.S. currency). The requested amount funds 22 international offices and one domicile office in 18 countries in a strategic context of the worldwide spread of the Internet and other consumer-friendly technologies that facilitate electronic commerce, the increasing criminal exploitation of those technologies, and dollarization.

Significant accomplishments in FY 2009 included the following:

- Maintained current investigative operations while continuing to pursue efficiencies within program areas.
- The Secret Service made 5,808 financial crimes arrests with 770 from foreign offices. In addition, the Secret Service made 2,946 counterfeit arrests with 430 from foreign offices.

- The total amount of counterfeit currency seized was \$108.8M, with \$101.2M of that amount attributed to overseas seizures. Additionally, the total amount of counterfeit currency passed totaled \$73.3M with \$4.3M passed overseas.

Significant planned accomplishments in FY 2010 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas.
- The main obstacles encountered by agents investigating transnational crimes are jurisdictional limitations. To fundamentally address this issue, appropriate levels of liaison and partnerships must be established with foreign law enforcement counterparts. Currently, the Secret Service operates 22 offices abroad. Over the next five years, the Office of Investigations will explore additional foreign office openings based on the operational needs of the Secret Service and appropriate strategy to combat today's organized transnational criminal groups. This will significantly impact the Service's capabilities in pursuing, arresting, and prosecuting the criminals that are operating in an increasingly "global" world.
- Expand overseas presence with an initial focus on the continued effort to open the Tallinn, Estonia office; the NSDD-38 is currently under review at DHS OIA.

Significant planned accomplishments in FY 2011 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas.
- The main obstacles encountered by agents investigating transnational crimes are jurisdictional limitations. To fundamentally address this issue, appropriate levels of liaison and partnerships must be established with foreign law enforcement counterparts. Currently, the Secret Service operates 22 offices abroad. <b>2011 Total Request</b>	<b>315</b>	<b>315</b>	<b>57,158</b>
Total Change 2010 to 2011	(2)	(2)	617

The United States Secret Service requests \$57.2 million and 315 FTE for this activity. This is an increase of \$0.6 million over the FY 2010 Enacted level and includes pay inflation and a shift of (2) FTE to the Presidential Candidate Nominee Protection PPA to support staffing requirements for the 2012 Presidential campaign.

**CURRENT SERVICES ACTIVITY DESCRIPTION:**

Through the Electronic Crimes Special Agent Program (ECSAP), the Service trains special agents to detect network intrusions and conduct examinations on all types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, scanners, and other electronic equipment. Through Electronic Crimes Task Forces (ECTF), the Service forms partnerships with private industry, academia, other federal law enforcement, and state and local law enforcement to prevent, detect, mitigate, and aggressively investigate attacks on our nation's financial infrastructures.

The ECSAP and ECTF's combat those who seek to defraud financial institutions, private industry, or individuals through electronic or digital media. The requested amount funds these entities in an environment characterized by a rise in electronic financial transactions and associated criminal activity.

Significant accomplishments in FY 2009 included the following:

- Provided 180 new agents with ECSAP training.

- Expanded the training provided by the National Computer Forensics Institute (NCFI) to our state and local partners.
- Maintained current investigative operations while continuing to pursue efficiencies within program areas.

Significant planned accomplishments in FY 2010 include the following:

- Continue to foster exceptional relationships with other federal, state, and local law enforcement agencies by building on proven investigative techniques and expanding methodologies that have already been developed and deployed.
- Maintain current investigative operations while continuing to pursue efficiencies within program areas.

Significant planned accomplishments in FY 2011 include the following:

- Continue to foster exceptional relationships with other federal, state, and local law enforcement agencies by building on proven investigative techniques and expanding methodologies that have already been developed and deployed.
- Maintain current investigative operations while continuing to pursue efficiencies within program areas.

<b>2011 Total Request</b>	<b>20</b>	<b>20</b>	<b>8,366</b>
Total Change 2010 to 2011	-	-	-

The United States Secret Service requests \$8.4 million and 20 FTE for this activity. There is no change from the FY 2010 Enacted level.

**CURRENT SERVICES ACTIVITY DESCRIPTION:**

Language contained in the Violent Crime Reduction Trust Fund legislation in 1995 directed the U.S. Secret Service to provide forensic support to the National Center for Missing and Exploited Children. Since that time, forensic support has included polygraph examinations, handwriting examinations, voiceprint comparisons, audio and video enhancements, age progressions/regressions, and fingerprint research and identification.

Requested funding provides state of the art forensics support for investigations involving missing and exploited children and grant funds for activities related to the investigations of missing and exploited children. In a strategic context characterized by predators determined to abuse the nation's children, the Secret Service's technologies provide critical support to associated investigations.

The United States Secret Service requests \$253.2 million and 336 FTE for this activity. This is an increase of \$32.1 million over the FY 2010 Enacted level and includes pay inflation, pay annualization for positions to be hired in FY 2010 to support the Information Integration and Transformation program, and program increases for U.S. Secret Service Cyber Security, Database Architecture, and Information Assurance.

**CURRENT SERVICES ACTIVITIES DESCRIPTION:**

Administration is responsible for:

- Tracking, monitoring, executing, and reporting the financial activities of the Secret Service;
- Improving the efficiency and productivity of personnel;
- Conducting analyses of program objectives and strategies to examine operational and cost factors impacting the continued viability of ongoing activities and the feasibility of proposed initiatives;
- Procuring quality goods and services in a timely fashion; and
- Administering the design, construction, acquisition, assignment, maintenance, and disposal of Service properties.

## **Administrative Operations**

This activity plans, develops and administers policies and procedures and performs related activities for a variety of real and personal property management areas in support of the U.S. Secret Service Headquarters and field offices.

Functions include Protective and Investigative Facilities Management; JJRTC Facilities Management; Mail and Print Operations Management; Property Management; Warehouse and Disposal Management; and Fleet Management.

Acts as the primary acquisition agent between the Secret Service and GSA; Department of State; the U.S. Army Corps of Engineers and other Federal Government and Department of Defense organizations for the acquisition, construction and renovation of Secret Service owned or leased real property.

Organizes and coordinates facilities and property management activities in support of the Secret Service's protective missions as well as designated NSSEs; and manages and coordinates administrative operations and services functions related to the planning, preparation, establishment, and deactivation of permanent and temporary protective sites. This activity provides building maintenance management, general repairs, engineering, architectural and design services, as well as labor services in support of all U.S. Secret Service Memorial Headquarters Directorates and Divisions.

Significant accomplishments in FY 2009 include the following:

- Continued division support for the close-out of Campaign 2008 and UN General Assembly (UNGA-64) major event support sites
- Established and closed out residence Command Posts for selected protectees impacted by the transition to a new Administration
- Initiated site preparation and provided operational support resources for the Inauguration and G-20 Economic Summit major event support sites
- Supported the transition site renovations for FPOTUS Bush and FVPOTUS Cheney sites, as well as the close-out of residential security sites for campaign candidates Sen. McCain and Gov. Palin.

Significant planned accomplishments in FY 2010 include the following:

- Initiate planning and preparation to provide major event infrastructure support for the next annual UN General Assembly (UNGA-65) and other events as announced.

Significant planned accomplishments in FY 2011 include the following:

- Initiate planning and preparation to provide major event infrastructure support for the next annual UN General Assembly and other events as announced.

## **Financial Management**

The financial management activity includes systems development in specific business areas including: core financial accounting and reporting; travel and relocation management; property management; and procurement management. This activity develops appropriate interfaces between these and other administrative systems, and supports system users through training, communications, user procedures, and technical support services.

Significant accomplishments in FY 2009 include the following:

- Migrated to a more efficient infrastructure by replacing outdated equipment and instituting operating system upgrades.
- Supported the implementation of a web-based time and labor distribution system.
- 

Significant planned accomplishments in FY 2010 include the following:

- Provide the infrastructure to integrate time and labor with the enterprise financial application. This will support the improved financial reporting required by Congress, the Office of Management and Budget, and the Secret Service.

Significant planned accomplishments in FY 2011 include the following:

- Continue to provide the infrastructure to integrate time and labor with the enterprise financial application. This will support the improved financial reporting required by Congress, the Office of Management and Budget, and the Secret Service.

## **Program Management**

This activity continues to actively participate in the Department of Homeland Security (DHS) planning and performance measurement processes, including (DHS) Strategic Plan revision, Risk Steering Committee Tier III (and associated working group) meetings, DHS Performance Improvement Officer Council meetings, and the DHS Performance Team Working group and associated activities. It continues to coordinate the Secret Service's submission of timely responses to quarterly reporting requirements for the President's Management Agenda (PMA), and facilitate the Service's achievement of scores above the DHS average. This activity contributes to managing organizational change initiatives by continuously monitoring and coordinating the regular update and publication of official Secret Service policy directives.

Significant accomplishments in FY 2009 included the following:

- Continued to refine the conceptual framework, formal process, and required resources for conducting meaningful program evaluations.
- Implemented and institutionalized a new process for developing a Secret Service Concept of Operations (CONOPS), integral to the strategic planning process.
- Reconfigured the current process for data transfer between Secret Service IT systems, in order to realize increased efficiency and substantial cost savings.
- Modified hard copy distribution protocols for agency directives and forms.
- Took steps to ensure Records Management in the Secret Service is understood and tools are in place to facilitate effective and efficient records management, in order to pave the way for deployment of an Enterprise Records Management System (ERMS) to help manage records electronically.

Significant accomplishments in FY 2010 included the following:

- Continue to take steps to ensure Records Management in the Secret Service is understood and tools are in place to facilitate effective and efficient records management, in order to pave the way for deployment of an Enterprise Records Management System (EMRS) to help manage records electronically.

Significant accomplishments in FY 2010 included the following:

- Continue to take steps to ensure Records Management in the Secret Service is understood and tools are in place to facilitate effective and efficient records management, in order to pave the way for deployment of an Enterprise Records Management System (EMRS) to help manage records electronically; the establishment of a file plan database module, development of user guides, and deployment of an on-line training course following are the major implementation actions presently occurring.

The United States Secret Service requests \$55.2 million and 273 FTE for this activity. This is an increase of \$0.86 million over the FY 2010 Enacted level and includes pay inflation.

**CURRENT SERVICES ACTIVITY DESCRIPTION:**

The James J. Rowley Training Center (JJRTC) is responsible for:

- (1) developing, administering, and coordinating training programs for Secret Service employees, and for other federal law enforcement agencies and law enforcement officials from various state and local police departments;
- (2) providing all basic, in-service, and specialized skills training for special agents, Uniformed Division officers, special officers and other professional personnel;
- (3) providing training for the executive, managerial, supervisory, administrative support, cyber/IT solutions, and foreign language needs for all Secret Service components;
- (4) providing specialized operational training for the Service's tactical elements (counter-assault, counter-sniper, and emergency response teams), which include the core components of the protective methodology;
- (5) evaluating, selecting, and training all Secret Service explosive detection canines/tactical canines;
- (6) administering and coordinating fitness, control tactics, vehicle operation training, emergency medicine, and water safety programs;
- (7) conducting research and testing of munitions, and related equipment technology; and

(8) administering the acquisition, storage, maintenance, and issuance of firearms, operational weapons and ammunition to all Secret Service personnel.

Significant accomplishments in FY 2009 included the following:

- JJRTC provided all basic and in-service training and specialized operational skills training for special agents, Uniformed Division officers, special officers, and other professional personnel.
- JJRTC provided training for executive, supervisory, administrative, cyber/IT solutions, and foreign language training for all Service components.
- JJRTC substantially increased in-service training to Secret Service field offices on a regional basis. This initiative provided a substantial increase in the number of available training opportunities to Secret Service employees and allowed for enhanced training with other local, state and federal law enforcement agencies.

Significant planned accomplishments in FY 2010 include the following:

- JJRTC will continue to provide all basic and in-service training and specialized operational skills training for special agents, Uniformed Division officers, special officers, and other professional personnel.
- JJRTC will continue to provide training for executive, supervisory, administrative, cyber/IT solutions, and foreign language training for all Service components.

Significant planned accomplishments in FY 2011 include the following:

- JJRTC will continue to provide all basic and in-service training and specialized operational skills training for special agents, Uniformed Division officers, special officers, and other professional personnel.
- JJRTC will continue to provide training for executive, supervisory, administrative, cyber/IT solutions, and foreign language training for all Service components.

<b>2011 Total Request</b>	<b>535</b>	<b>535</b>	<b>68,914</b>
Total Change 2010 to 2011	-	-	1,090

The United States Secret Service requests \$68.9 million and 535 FTE for this activity. This is an increase of \$1.1 million over the FY 2010 Enacted level for pay inflation.

**CURRENT SERVICES ACTIVITY DESCRIPTION:**

Subjects (individuals and groups) and activities that pose threats to protectees and protected events are investigated. The Secret Service analyzes threats, investigates threats, and conducts intelligence advances in order to minimize the risk of harm to protected persons, property, and events. The requested amount funds these activities in an environment characterized by terrorists' sustained motivation to attack these targets, and by the increasingly technological sophistication of the threat environment.

Program Increase							-	-	15,000
<b>Total Request</b>	-	-	<b>\$23,800</b>	-	-	-	-	-	<b>15,000</b>

### Description of Item

The White House Communications Agency (WHCA) provides worldwide telecommunications support to Secret Service Protective Operations per PL 94-524, "Presidential Protection Assistance Act of 1976" and PL 104-208, "Department of Defense Appropriations Act of 1997." Between 2003 and 2008, WHCA modernized its telecommunications infrastructure by transitioning to Internet Protocol (IP) for all Voice, Radio, Satellite, Video, Secure Voice, Secure Video, and Wireless communications. This transformation revolutionized WHCA's overall communications capacity and agility while rendering Secret Service systems and devices incompatible with the IP capability. This initiative will allow the Secret Service to implement IP protocols and multi-level secure technologies into the Secret Service planned IT and voice infrastructure in support of the Protective mission.

### Justification

The Secret Service instituted a temporary and partial solution to address this incompatibility of technologies with the White House Communications Agency; however, the agency must address this mission-critical capability gap with a permanent solution for the agency to continue to adequately protect the President and others as required by law. Personnel tasked with providing such protection require immediate

access to data and the ability to communicate with one another over a seamless web of encrypted, secure, and highly available communications.

The Secret Service will modernize its global mobile communications program by combining the existing domestic land mobile radio system with the WHCA shared satellite-based communications system for international protective operations. The transformation plan also provides additional classified capability at Secret Service Headquarters and field offices by adding Homeland Security Data Network (HSDN) terminals to satisfy multi-level security requirements and ensure seamless information sharing with the Intelligence Community (IC) regarding mission critical protective intelligence.

In addition to closing the technology gap for the interoperability disparity with WHCA, this initiative improves efficiencies. Upon completion of the project, the Secret Service will experience improved security, performance, flexibility and reliability of its communications capabilities and IT infrastructure to meet ever demanding mission needs.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

Without funding, the special agents and officers performing their protective and investigative missions run the risk of a breakdown of command and control communications, breach in communications security, loss of situational awareness, or a failure in operational procedures due to a lack of reliable, available, flexible and secure communication systems. When special agents and officers cannot talk to each other or pass mission critical information, operations may fail. During both protective and investigative missions, special agents and officers require communications with partners via various methods of communications. A failure of communications could cause failure of the mission and/or loss of a protectee, which could impact DHS, partners and even the security of United States citizens. Communications is fundamental and funding is required to not only keep pace with technology, but to stay one step ahead of the adversary.

Description of Item

As a result of the passage of the Omnibus Appropriations Act of 2009, the Secret Service was provided no-year funding to hire personnel to support the protective mission. The need for these positions was recognized and approved by the Department of Homeland Security and Congress.

Justification

The justification for the Omnibus hiring was to meet the increasing demands of ongoing protective operations, to include the associated intelligence activity related to protection of the new President. These critical functions required immediate shifts of existing assets in order for the Service to continue to function with the necessary operational and tactical flexibility.

The new FTE allow for greater mediation of emerging terrorist threat capabilities, an appropriate level of protection in a manner consistent with the nature and schedules of the people being protected, and broader operational flexibility Secret Service-wide.

Impact on Performance (Relationship of Decrease to Strategic Goals)

A total of 200 special agent and administrative, professional, technical positions were hired through the end of FY 2009 with funding from the Omnibus Appropriations Act of 2009. The proposed position reduction will come from existing vacant positions within the ranks of the administrative, professional, technical workforce and will include support positions such as Management and Program Analysts, Information Technology Specialists, and Intelligence Research Specialists.

**Department of Homeland Security**  
**U.S. Secret Service**  
**Salaries & Expenses**

**Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 3:** Reduction to primary limousine program  
PPA: Protection of persons and facilities  
Program Decrease: Positions 0.0, FTE 0.0, Dollars \$-3200.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Decrease							-	-	(3,200)
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>(3,200)</b>

Description of Item

The Presidential Primary Limousine essentially becomes the Oval Office when the President is traveling beyond the perimeter of the White House Complex. Presidential Primary Limousines are utilized daily by the President in Washington, DC and wherever the President chooses to travel throughout the world. Presidential Primary Limousines contain highly classified protective systems that are designed to mitigate an extensive array of potential threats and hazards.

These limousines play an important role in the overall protection of the President and are the most sophisticated and secure protective vehicles ever constructed. To achieve this level of protection, each vehicle is hand-built using highly skilled technicians, engineers, and world-class experts in protective countermeasures. At the present time, the Secret Service has nine operational Presidential Primary Limousines.

Justification

The Service’s limousine acquisition plan is based upon six years of front-line Presidential service for each vehicle with a maximum life-span of 10 years before being completely removed from the inventory. The plan also increases the fleet to twelve vehicles; six complete Presidential Primary Limousine “packages”, since a minimum of two vehicles (one package) must be utilized for each Presidential motorcade movement.

Funding is critical to preparing for, and obtaining contracted services, equipment and supplies for the sustainment of the primary limousines. The purchase, delivery, and

deployment of these specialized vehicles require twelve month lead-time from a classified contracted facility.

Impact on Performance (Relationship of Decrease to Strategic Goals)

The Service's limousine acquisition plan is based upon six years of front-line Presidential service for each vehicle with a maximum life-span of 10 years before being completely removed from the inventory. The Service procured one Presidential Primary Limousine in FY 2009. This funding reduction allows for the continued procurement of one limo per year.

**U.S. Secret Service**  
**Salaries & Expenses**  
**Protection of persons and facilities**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 4:** Upgrade to COLD Database  
PPA: Protection of persons and facilities  
Program Increase: Positions 0.0, FTE 0.0, Dollars \$3000.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	3,000
<b>Total Request</b>	-	-	900	-	-	-	-	-	<b>3,000</b>

Description of Item

The Combined Operations Logistics Database (COLD) is a new enterprise application that will automate the notification processes and the tracking of all logistical planning operations supporting protective and investigative missions. The proposed COLD application will allow the Secret Service to identify and document the human and technical resources utilized to support mission operations. The new application enhances information sharing, would automate existing manual processes and provides close to “real time” management data to better project work requirements and operational costs. This application will replace existing antiquated systems that cannot be re-engineered.

Justification

The Secret Service requires a robust logistics planning, tracking and scheduling tool that enables the efficient use of its human and technical resources supporting mission operations. The new COLD application will provide the Secret Service with a modernized capability to analyze its resources, programs and operations close to “real-time”. The logistical planning information necessary to project workforce requirements, automate notifications, and define operational mission costs would be consolidated into one data source and accessed by the new application. Frequent analysis of this information is critical to improving the business processes of the Secret Service. Extensive needs analysis activities and operational requirement reviews have been conducted and the findings will be incorporated into this enterprise application initiative.

### Impact on Performance (Relationship of Increase to Strategic Goals)

The new COLD system will integrate current disparate data sets and automate operational planning and notification processes. This initiative provides the Secret Service with a new capability to analyze information closer to “real time” to more efficiently manage its human and technical resources. The application will collect and report on such items as the number of personnel and resources deployed to support missions, work schedules and special skill requirements.

The development of this new system is critical to supporting mission operations, improving business processes and enhancing decision making. Additionally, it will allow the Service to conduct in depth analysis of its operations with vastly better data sets than are available with the current systems. The proposed investment directly supports the Secret Service’s strategic goal of Protecting the Nation’s Critical Infrastructure and Key Resources. Conversely, if this initiative is unfunded, the Secret Service will continue operating antiquated systems and manual processes.

**Department of Homeland Security**  
**U.S. Secret Service**  
**Salaries & Expenses**  
**Presidential candidate nominee protection**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 5:** 2012 Presidential Campaign  
PPA: Presidential candidate nominee protection  
Program Increase: Positions 0.0, FTE 0.0, Dollars \$14000.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	14,000
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>14,000</b>

Description of Item

Funding is requested for the start-up costs of the 2012 Presidential Campaign. During FY 2011, the Secret Service will provide specialized training for its workforce and will procure screening and detection equipment, armored vehicles, and supplies to support the increase in protective mission requirements. Sufficient lead time is critical to properly conduct service-wide training, acquire specialized protective equipment and pre-position these assets at Secret Service field offices.

Justification

The Secret Service is mandated by law (Title 18 U.S.C. § 3056) to provide protection and security for “major presidential and vice presidential candidates, and their spouses.” During presidential campaigns, the Secret Service experiences a significant increase in its protective workload as it provides protection for the designated candidates/nominees, in addition to its other protective responsibilities.

During FY 2011, Secret Service personnel will need to travel to Washington, DC and other regional locations to receive specialized protective training. The Secret Service plans to train other Department of Homeland Security agents/officers and Department of Defense personnel to assist with campaign protection requirements.

In order to ensure the integrity of protective sites during the presidential campaign, unique protective identification/credentials are required. Specialized credentialing

equipment and supplies will be purchased to produce secure photograph identification/credentials for distribution as needed.

Vehicles will be purchased for use as protective limousine and follow-up security vehicles for protective details. Each vehicle requires communications equipment, emergency lights, and other protective equipment. The vehicles will be strategically and economically positioned at Secret Service field offices throughout the country in preparation for use by candidate/nominee details.

State-of-the-art screening and detection systems, magnetometers and x-ray systems, medical and rescue equipment, and other protective supplies are required to support the increase in mission requirements. This specialized equipment is critical to the overall success of campaign protective operations.

The Secret Service does not have enough of these critical assets now to accommodate the anticipated increase in protective workload requirements. As such, this funding is requested to address the identified needs.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

Title 18 U.S.C. § 3056 mandates the Secret Service to provide protection and security for major presidential and vice presidential candidates, and their spouses. During FY 2011, the Secret Service will provide training to its workforce, and procure equipment and supplies to support candidate/nominee protective operations.

The Secret Service does not have base funding to cover the costs associated with the anticipated increase in protective mission responsibilities during this quadrennial event. Historically, the Secret Service has requested and received a temporary increase to its annual budget to cover Presidential Campaign planning and preparation costs.

If funding is not available in FY 2011, the Secret Service would be unable to properly prepare for the increase in protective mission requirements critical to supporting the 2012 Presidential Campaign.

**Department of Homeland Security**  
**U.S. Secret Service**  
**Salaries & Expenses**  
**Domestic field operations**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Decrease 1:** Reduction to domestic field offices  
PPA: Domestic field operations  
Program Decrease: Positions 0.0, FTE 0.0, Dollars \$-4000.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Decrease							-	-	(4,000)
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>(4,000)</b>

Description of Item

The United States Secret Service investigates violations of laws relating to counterfeiting of obligations and securities of the United States, and financial crimes that include, but are not limited to, financial institution fraud, identity theft, access device fraud, money laundering and electronic crimes. Domestic field resources are focused on achieving the Department of Homeland Security strategic objective of economic security. Funding for domestic field offices nationwide addresses the spread of the internet and other consumer-friendly technologies that facilitate electronic commerce, and the increasing criminal exploitation of those technologies.

Justification

The Secret Service operates 142 domestic field offices. These are necessary to support and carryout the Service's investigative mission. They also provide critical support to the protective mission. Special agents assigned to Secret Service field offices are integral to threat identification and mitigation, as they conduct protective intelligence investigations. Field office special agents also aid in developing and implementing operational security plans to ensure the safety of protectees who conduct business or visit within their districts.

### Impact on Performance (Relationship of Decrease to Strategic Goals)

Proposed reductions include benefits, travel, contractual services, supplies and materials, and equipment. A reduction to domestic field operations will potentially cause the citizens of the United States to incur financial crime loss that will not be prevented and a great amount of counterfeit currency that will not be removed from circulation. Field offices also participate on task forces and other partnerships with state and local law enforcement, private companies and academia. These partnerships provide the Secret Service with information and enable other law enforcement agencies to better tackle electronic crimes.

This cross-cutting reduction will directly impact investigative performance measures including – the Financial Crimes Loss Prevented (Through a Criminal Investigation and by the Secret Service Electronic Crimes Task Forces) and Counterfeit Passed as the Percent of Amount of Genuine U.S. Currency in Circulation.

The temporary FTE shift (22) mentioned in the chart above refers to the resource shift from investigations to the Presidential Candidate Nominee Protection PPA to support staffing requirements for the 2012 Presidential Campaign.

Current Services Level							-	-	2,400
Program Increase							2	1	6,000
<b>Total Request</b>	-	-	-	-	-	2,400	<b>2</b>	<b>1</b>	<b>8,400</b>

Description of Item

The Information Assurance (IA) initiative will provide enterprise protection of the information-sharing environment by consolidating disparate information assurance activities into one comprehensive IT security program. This will include formation of a new comprehensive Certification and Accreditation (C&A) process that provides an independent verification and validation test environment and enables the agency’s use of DHS Enterprise test and evaluation services. This initiative will improve IT security and enhance mission performance by improving organizational practices, policies, and procedures. Effective security ensures that vital services are delivered in a timely manner in all operating conditions.

Justification

Information and information systems serve as fundamental enablers for the Secret Service to meet its business needs and mission goals. This funding is required provide IA capability that is fully compliant with federal guidelines and supports timely C&A of critical equipment and systems.

Impact on Performance (Relationship of Increase to Strategic Goals)

The Secret Service enterprise information infrastructure must be securely managed and protected from any adversarial cyber threat to prevent negative impacts to its data confidentiality, availability, and integrity that directly supports both the protective and investigative missions. The Secret Service is in need of a comprehensive Certification

and Accreditation process and capabilities. These capabilities will benefit the Service by providing an environment in support of future spiral development and testing against implemented capability prior to integration and follow-on operational testing. This benefit will greatly reduce the operational risk of losing critical data and system performance with other DHS shared resources.

Without the full funding, the Secret Service will be unable to emulate the operational environment for integration testing of applications or systems being implemented including: interfaces, associated data, memory, processing power, and display. The Service will be unable to eliminate operational risk to existing production systems.

**Department of Homeland Security  
U.S. Secret Service  
Salaries & Expenses  
Headquarters, management and administration

Program Increase							1	1	6,000
<b>Total Request</b>	-	-	-	-	-	6,400	<b>1</b>	<b>1</b>	<b>12,400</b>

Description of Item

The Cyber Security initiative improves and enhances the Secret Service’s data perimeter security, access and authentication mechanisms, real-time event logging, and Federal Information Security Act (FISMA) compliance. The Secret Service enterprise infrastructure must be securely managed and protected from cyber threats to ensure data reliability, availability, and integrity in support of protective and investigative missions.

Justification

The Cyber Security initiative will provide increased security capabilities across the core of the Secret Service infrastructure. By focusing on key external mandates and aligning critical information technology security infrastructure modernization activities, this investment continues to improve and enhance the Secret Service’s data perimeter security, access and authentication mechanisms, real-time event logging, and Federal Information Security Management Act (FISMA) compliance. The Secret Service enterprise infrastructure must be securely managed and protected from any adversarial cyber threat to prevent negative impacts to its data reliability, availability, and integrity that directly supports both the protective and investigative missions.

Impact on Performance (Relationship of Increase to Strategic Goals)

The lack of full funding of this investment would result in an extension of the project schedule and/or a reduced set of delivered quantitative and qualitative cyber security products. The inability to adequately secure Secret Service IT systems will impact the ability of the Service to succeed in both the protective and investigative missions.

**Department of Homeland Security**  
**U.S. Secret Service**  
**Salaries & Expenses**  
**Headquarters, management and administration**

<b>Total Request</b>	-	-	-	-	-	4,000	<b>2</b>	<b>1</b>	<b>10,000</b>

Description of Item

The Database Architecture initiative provides the foundation for designing, implementing, and ensuring the integrity of the databases supporting all Secret Service protective, investigative, and administrative applications. This multi-year program includes modernization and transformation efforts to augment database infrastructure and tools to improve overall performance, reliability, and provide failover and disaster recovery capabilities.

Justification

This initiative will replace or upgrade existing, outdated database hardware and software components for enterprise-wide database systems and introduce high availability, fault tolerance, optimal performance, and scalability at all layers in the technology stack. The core database upgrade will provide the Secret Service with a robust infrastructure to handle growing data processing needs. The expanded infrastructure will have new database servers, new ETL (extract, transform, and load) servers, database and system monitoring tools, more storage to handle a growing volume of data for existing applications and newer data marts and Business Intelligence repositories.

The current hardware capacity to support any new applications and the increase in volume of data is very limited. The database server hardware is at the end of its lifecycle. This initiative will provide a much needed infusion of funding that will enable a rapid technology refresh of database systems to bring us to standards based, reliable, and supportable technologies that will enable and improve much needed capabilities in the

areas of data security, data quality, system failover, and disaster recovery. Funding will also allow the Database Architecture Branch of the Secret Service to augment its data competencies and tools to better facilitate information sharing capabilities across divisions and field offices within the agency and with the Department of Homeland Security and other external partners.

Impact on Performance (Relationship of Increase to Strategic Goals)

Achieving the commitments in the National Security Strategy (NSS) requires a fundamental change in the way Information Technology (IT) is provided and managed by the Secret Service. The Secret Service cannot transform its data operations to support the DHS Enterprise Data Management Directive 103.01 and the Homeland Security Act 2002 by merely maintaining and expanding the status quo. The Secret Service data environment is fragile and cannot sustain the tempo of current or future operational missions.

The existing hardware infrastructure is more than five years old and is prone to failures. The operating system software code is a couple of versions old and is soon expected to be no longer supported by the manufacturer. A loss of a server or a software component corruption would result in extended downtime and a potential loss of mission-critical data.

**U.S. Secret Service**  
**Salaries & Expenses**  
**Headquarters, management and administration**  
**Justification of Program Changes**  
(Dollars in Thousands)

**Program Increase 1:** Data Center Migration  
PPA: Headquarters, management and administration  
Program Increase: Positions 0.0, FTE 0.0, Dollars \$12600.0

Funding Profile

	FY 2009 Actuals			FY 2010 Enacted			FY 2011 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							-	-	12,600
<b>Total Request</b>	-	-	-	-	-	-	-	-	<b>12,600</b>

Description

FY 2011 data center development funding, to be managed through the DHS Working Capital Fund (WCF), will be used for the continuation of system and application migration to the two DHS Enterprise Data Centers for central DHS management in FY 2011. This includes:

- Discovery, migration planning, and scheduling activities specifically related to systems/applications that will transition to the DHS Data Centers in FY 2010
- Purchase of new equipment for placement in the DHS Data Centers as part of migration/transition efforts
- Installation of equipment racks at the DHS Data Centers
- Migration-related build-out of DHS Data Center infrastructure
- Transition of disaster recovery/backup/COOP (Continuity of Operations) capability to DHS Data Centers
- Installation of infrastructure support as part of system migrations at the DHS Data Centers
- Migration of USCIS hardware, systems/applications to occupy rack space at the DHS Data Centers.

Justification

The Data Center consolidation efforts will standardize IT resource acquisitions across DHS Components, and streamline maintenance and support contracts, allowing for less complex vendor support and expediting response times in the event of an emergency. Benefits derived from consolidation are enhanced DHS IT security posture, improved information sharing with stakeholders, and increased operational efficiencies over time.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

Department of Homeland Security  
United States Secret Service  
Justification of Proposed Changes in Salaries and Expenses  
Appropriation Language

For necessary expenses of the United States Secret Service, including purchase of not to exceed 652 vehicles for police-type use, for replacement only, and hire of passenger motor vehicles; purchase of motorcycles made in the United States; hire of aircraft; services of expert witnesses at such rates as may be determined by the Director of the Secret Service; rental of buildings in the District of Columbia, and fencing, lighting, guard booths, and other facilities on private or other property not in Government ownership or control, as may be necessary to perform protective functions; payment of per diem or subsistence allowances to employees where a protective assignment during the actual day or days of the visit of a protectee requires an employee to work 16 hours per day or to remain overnight at a post of duty; conduct of and participation in firearms matches; presentation of awards; travel of United States Secret Service employees on protective missions without regard to the limitations on such expenditures in this or any other Act [if approval is obtained in advance from the Committees on Appropriations of the Senate and the House of Representatives]; research and development; grants to conduct behavioral research in support of protective research and operations; and payment in advance for commercial accommodations as may be necessary to perform protective functions; [\$1,478,669,000] \$1,567,642,000; of which not to exceed \$25,000 shall be for official reception and representation expenses; of which not to exceed \$100,000 shall be to provide technical assistance and equipment to foreign law enforcement organizations in counterfeit investigations; of which \$2,366,000 shall be for forensic and related support of investigations of missing and exploited children; and of which \$6,000,000 shall be for a grant for activities related to the investigations of missing and exploited children and shall remain available until expended: Provided, That up to \$18,000,000 provided for protective travel shall remain available until September 30, [2011] 2012: Provided further, That up to \$1,000,000 for National Special Security Events shall remain available until expended: Provided further, That the United States Secret Service is authorized to obligate funds in anticipation of reimbursements from Federal agencies and entities, as defined in section 105 of title 5, United States Code, receiving training sponsored by the James J. Rowley Training Center, except that total obligations at the end of the fiscal year shall not exceed total budgetary resources available under this heading at the end of the fiscal year: Provided further, That none of the funds made available under this heading shall be available to compensate any employee for overtime in an annual amount in excess of \$35,000, except that the Secretary of Homeland Security, or the designee of the Secretary, may waive that amount as necessary for national security purposes: Provided further, That none of the funds appropriated to the United States Secret Service by this Act or by previous appropriations

Acts may be made available for the protection of the head of a Federal agency other than the Secretary of Homeland Security: Provided further, That the Director of the United States Secret Service may enter into an agreement to perform such service on a fully reimbursable basis [: Provided further, That of the total amount made available under this heading, \$33,960,000, to remain available until expended, is for information technology modernization: Provided further, That none of the funds made available in the preceding proviso shall be obligated to purchase or install information technology equipment until the Chief Information Officer of the Department of Homeland Security submits a report to the Committees on Appropriations of the Senate and the House of Representatives certifying that all plans for such modernization are consistent with Department of Homeland Security data center migration and enterprise architecture requirements: Provided further, That none of the funds made available to the United States Secret Service by this Act or by previous appropriations acts may be obligated for the purpose of opening a new permanent domestic or overseas office or location unless the Committee on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such obligation]. (Department of Homeland Security Appropriations Act, [2010] 2011.)

#### Explanation of Changes

[\$1,478,669,000] \$1,567,642,000– No substantive changes proposed.

[2011] 2012 – No substantive changes proposed.

[: Provided further, That of the total amount made available under this heading, \$33,960,000, to remain available until expended, is for information technology modernization: Provided further, That none of the funds made available in the preceding proviso shall be obligated to purchase or install information technology equipment until the Chief Information Officer of the Department of Homeland Security submits a report to the Committees on Appropriations of the Senate and the House of Representatives certifying that all plans for such modernization are consistent with Department of Homeland Security data center migration and enterprise architecture requirements: Provided further, That none of the funds made available to the United States Secret Service by this Act or by previous appropriations acts may be obligated for the purpose of opening a new permanent domestic or overseas office or location unless the Committee on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such obligation] – Program increase in FY 2010 Enacted budget.

#### Authorization Cites

The Secret Service is established in 18 U.S.C. 3056 and 3 U.S.C. 202. 18 U.S.C. 1029 and 1030 specifically authorize the Service to investigate offenses under those sections.

### PPA Mission Statement

Protection of Persons and Facilities - Ensure the safety and security of national leaders, visiting heads of state and government and other designated protectees. Safeguard the White House Complex, the Vice President's residence, foreign missions in the Washington, DC area and other high profile sites.

Protection resources directly support the DHS strategic goal to protect critical infrastructure, which includes our nation's leaders, other high profile persons and designated sites. The Service ensures protectees' physical protection at all times. Protection includes all activities related to identifying threats, mitigating vulnerabilities and creating secure environments wherever protectees work, reside and travel. The requested amount addresses strategic challenges which include terrorists' sustained motivation to attack U.S. interests (including its leaders), and the increasing complexity and technological sophistication of the threat environment.

### Summary Justification and Explanation of Changes

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
11.1 Total FTE & personnel compensation	400,675	424,607	455,331	30,724

Salaries and benefits includes funding for 3,754 FTE, including \$1,328,000 for full performance costs associated with 27 positions hired in FY 2009 for enhanced protection for White House protectees,

\$9,662,000 and 46 FTE for the increased level of staffing initially funded in FY 2009 by P.L. 111-8, and \$1,230,000 for full performance costs associated with 103 positions hired in FY 2009 to staff the President Bush post-presidency detail. The FY 2011 request also includes a reduction of (\$9,600,000) and (46) FTE to the increased level of staffing initially funded in FY 2009 with P.L. 111-8, \$8,000,000 for Uniformed Division modernization, \$3,066,000 for annualization of the FY 2010 pay raise, an increase of \$8,035,000 to cover increased payroll costs, and an object class realignment between salaries and benefits.

	FY 2009 Actuals	FY 2010 Enacted	FY 2011 Request	FY 2010 to FY 2011 Change
