HOW DO I AVOID SEXUAL VIOLENCE?
You may avoid sexual violence by keeping the following safety guidelines in mind:
• Be aware of situations that make you feel uncomfortable.
• Trust your instincts. If it feels wrong, LEAVE.
• Don’t let your manners get in the way of keeping yourself safe. Don’t be afraid to say “NO” or “STOP IT NOW.”
• Be Alert! Do not use drugs or alcohol. These can weaken your ability to stay alert and make good judgments.
• Walk and stand with confidence. Many perpetrators of sexual violence choose victims who look like they won’t fight back or are emotionally weak.

Avoid talking about sex. This may be considered a come-on, or make others believe that you have an interest in a sexual relationship.

DO not accept store items or gifts from others. Placing yourself in debt to others may lead to the expectation of repayment with sexual favors.

Avoid secluded areas.
• If you fear for your safety or are being pressured for sex, report it to staff immediately.

DID YOU KNOW?
Rape and sexual assault happens to females and males of all ages.
• According to National Crime Victimization Surveys, approximately one out of every eight rape victims is male.
• Most males who assault men or women are married or report having girlfriends.
• Victims are not at fault for being raped.
• Normal, involuntary physiological reactions such as becoming sexually aroused or ejaculating may occur during sexual assaults. This does not mean you consented or that you were not raped.
• Sexual assault has nothing to do with the victim’s present or future sexual orientation. Victims may be either heterosexual or homosexual.

REMEMBER
• Sexual violence is never o.k.
• If you are a victim, report it immediately.
• You can get help.
• All reported incidents will be investigated.
• False allegations can hurt you and the accused.
